Florida Residency Information

Per Florida Statute 1009.21 and Board of Governors Regulation 7.005 Determination of Residency Status for Tuition Purposes, students shall be classified as residents or nonresidents for the purpose of assessing tuition in postsecondary educational programs offered by charter technical career centers or career centers operated by school districts, in Florida College System institutions, and in state universities.

Florida International University's Residency for Tuition Purposes is governed under Florida Statute 1009.21, Board of Governors Regulation 7.005, and FIU Regulation 1302 -Florida Residency Status for Tuition Purposes.

A Florida resident for tuition purposes refers to whether a student qualifies as an in-state Florida resident or an out-of-state resident. This classification determines your cost of tuition. Residency for tuition purposes, for newly admitted or readmitted students, known as initial classification, is determined by the Office of Admissions when you apply to the university.

A currently enrolled student that was classified as an out-of-state resident, and wishes to be considered for reclassification as a Florida resident, can do so via our residency reclassification process. Please note, residency reclassification is reviewed and determined by the Office of the Registrar. For additional information, please refer to the FIU website for Florida Residency for Tuition Purposes.

The College of Law and the Herbert Wertheim College of Medicine maintain independent Admissions and Registrar's Offices to administer Florida Residency for Tuition Purposes for their respective students.

Related FIU Regulation and Policy

FIU Regulation 1302 -Florida Residency Status for Tuition Purposes.

FIU Policy 340.160 Florida Residency

Reclassification to In-State Resident for Tuition Purposes

A student who is classified as a nonresident for tuition purposes may become eligible for reclassification as a resident for tuition purposes by presenting the required documents identified in Florida Statute 1009.21, Board of Governors Regulation 7.005, and FIU Regulation 1302 - Florida Resident Status for Tuition Purposes. Clear and convincing documentation must be provided to prove that the establishment of permanent legal residence in Florida was not for the sole purpose of pursuing a postsecondary education. Documentation must demonstrate that the student or, if the student is a dependent, their parent has maintained legal residence in Florida for at least twelve (12) consecutive months immediately prior to the first day of classes for the term for which residency reclassification is sought, except as otherwise provided in section 1009.21, Florida Statutes. In addition, an affidavit/statement explaining why the student/parent moved to the state of Florida along with appropriate supporting documentation is required. For more information on residency reclassification, please visit the Residency website.

Appealing Your Residency Classification

In accordance with section 1009.21 of the Florida Statutes, Florida Board of Governors Regulation 7.005, and FIU Regulation 1302 - Florida Resident Status for Tuition Purposes, FIU has an established Florida Residency Appeal Committee. The Residency Appeal Committee provides a mechanism for students to appeal their out-of-state tuition decisions and strives to provide fairness and equity to all students. The Residency Appeal Committee's decision on behalf of the institution is final and may not be appealed further.

A student may appeal the denial of a request to be classified or reclassified from out-of-state to in-state status for tuition purposes only once. Students must submit the request in writing to residency@fiu.edu with accompanying documentation to support reconsideration of the original decision.

The committee meets once a month and will review the submitted appeal(s) and the accompanying documentation. The committee may request additional information from the student to make its decision. Not submitting supporting documentation will delay the review and the petition may be denied. After review, the committee will inform the student of the decision in writing.

Additional information regarding classification and reclassification of Florida residency for tuition purposes may be found at the Residency website.

Note: Appeals for the Herbert Wertheim College of Medicine should be sent to comregistrar@fiu.edu and appeals for the Rafael Diaz-Balart College of Law should be sent to lawregistrar@fiu.edu.

Undergraduate Academic Amnesty

FIU undergraduate students who apply for re-admission (with a prior cumulative GPA below a 2.0) and have not been enrolled in any university or college for at least five calendar years may apply for academic amnesty. If re-admitted, students will begin with a new grade point average of 0.0. No grades previously earned will be included in the University grade point average; however, credit for previous University courses, in which a grade of “C” or better was earned may be applied toward a degree, subject to determination by the College of the student’s major. All prior courses attempted and grades received will remain on the student’s transcript. Admitted or re-admitted students may not petition for any retroactive change in their academic record utilizing this policy. Students applying for academic amnesty to a limited access program must meet the admission criteria of that program. Students must follow the regular re-admission application process and complete the amnesty form for consideration to be determined by the student’s academic dean. Re-admission applications and academic amnesty applications may be obtained on the Undergraduate Admissions website. Please refer to FIU Policy 340.300 Undergraduate Academic Amnesty in the Policies and Procedures Library for further information.

Undergraduate Academic Salvage

FIU undergraduate students who are academically dismissed from the University or who have a cumulative GPA below a 2.0, and who subsequently receive an Associate in Arts degree from another Florida public institution of higher learning may apply for academic salvage. If re-admitted, students will begin with a new FIU grade point average of 0.0. Students re-admitted under academic salvage will be credited with a maximum of 60 semester credit hours. Students must follow the regular re-admission application process and complete the Academic Salvage form for consideration by the student’s academic dean. Re-admission applications and academic salvage applications may be obtained on the Undergraduate Admissions website. Please refer to FIU Policy 340.305 Undergraduate Academic Salvage in the Policies and Procedures Library for further information.

NOTE: Credits earned prior to readmission under academic amnesty or salvage are not applicable in computing the FIU 40-credit requirement grade points to graduate with honors.

FIU Policy 340.305 Undergraduate Academic Salvage Policy

Undergraduate Re-admission

An admitted degree-seeking student who has not enrolled in any course at the University for three (3) or more consecutive terms, excluding military withdrawals, will be required to apply for re-admission. The student must meet the University and program regulations in effect at the time of re-admission. Students must apply for readmission through the Returning Applicants Admissions website. Please refer to FIU Policy 340.230 Re-Admission for further information.

Related FIU Policy

FIU Policy 340.230 Re-Admission

Graduate Re-Admission

A student will be inactivated for non-enrollment if there is a lapse in enrollment for three consecutive terms or more. Once a student is inactivated, the student must re-apply for admission to the University and the College of the graduate program. The student must meet the program requirements and policies in effect at the time of re-application.

For an academically dismissed student, a period of at least one academic year must elapse after the date of dismissal before an application for admission will be accepted for consideration. During this year the student is prohibited from enrolling as a non-degree seeking student as well.

A student who has been dismissed from a graduate program for failure to maintain a 3.0 GPA may re-apply to the same program or apply to any other graduate program at FIU under the program requirements and policies in force at the time of re-application. In applications for re-admission to the same program or admission to another program, admission criteria shall include consideration of previous performance at the graduate level in addition to the normal admission requirements.

A student who has been dismissed for failure to make sufficient progress toward degree completion or for non-compliance with the continuous enrollment policy may submit an application for re-admission at any time prior to their time limit for degree completion.

Re-admission of all doctoral students will require approval by the Dean of the University Graduate School.

For more information, please visit the Graduate Admissions/Re-Admissions website.

Collection and Use of Social Security Numbers

In accordance with Florida Statute 119.071(5)(a)(2), the University collects social security numbers for the following reasons:

- For use in processing admission applications for purposes of identification and verification of student records;
- For use in administering federal and state programs/loans, including verification of eligibility. These programs include, but are not limited to:
    - Financial aid and other related loan programs;
    - Scholarship programs, including Bright Futures; and
    - Veterans Administration benefits for qualified students
- For use in complying with IRS Reporting Requirements pertaining to the Hope Scholarship Credit and the Lifetime Learning Credit provided under federal legislation;
- For use in preparing Student Enrollment Reports required to be submitted to the National Student Loan Data System under Federal Law;
- For use in providing official student transcripts to authorized third parties (i.e., educational institutions and employers upon receipt of required releases) for student identification purposes;
- For enrollment verification and eligibility for health insurance coverage, auto insurance coverage, and benefits, as requested by students; and
- For submitting reports to the Florida Board of Governors as required.

Please note that this is only a listing of the collection and use of social security numbers by the University in the admissions, registration, and financial aid areas. All students are advised that social security numbers are confidential and may only be released in accordance with applicable law. For more information on the collection of social security numbers, please review the Collection and Use of SSN webpage and the following privacy policies: FIU 1930.015, FIU 1710.070, FIU 1110.032, FIU 150.110. The Florida International University Identity Theft Prevention Program also serves as an additional resource.

FIU Related Policy

1930.015 - Gramm-Leach-Bliley Act: Safeguards to Protect Confidential Financial Information

1710.070 - Confidentiality Agreement Policy

1110.032 - Preventing Identity Theft on Covered Accounts Offered or Maintained by Florida International University

150.110 - FIU Records

Student Records

FIU maintains student education records in a confidential and secure manner in accordance with the Family Educational Rights and Privacy Act (FERPA) codified in 20 U.S.C. section 1232g, and sections 1002.225 and 1006.52, Florida Statutes. Student academic records are maintained in the Office of the Registrar and in the academic department of the student's major. Students in some degree programs may be subject to background checks and/or drug testing prior to eligibility for internships or practicums. All currently enrolled and former students have the right to review their records to determine their content and accuracy.

Release of Student Information from Education Records (FERPA Notice)

FIU will not release or permit access to education records or personally identifiable information maintained on a student except as otherwise permitted by law and FIU Board of Trustees Regulation FIU-108 Access to Student Education Records.

A student's consent is required for the disclosure or publication of any information which is a) personally identifiable and b) a part of the educational record. However, certain exceptions to that generality, both in types of information that can be disclosed and in access to that information, are allowed within the regulations of FERPA. The University may disclose information pertaining to the student to a parent/legal guardian as long as the student submits a FERPA form authorizing the disclosure.

FIU discloses education records without a student's prior consent under the FERPA exception for disclosure to school officials with legitimate educational interests. A school official is a person employed by the University in an administrative, supervisory, academic, research, or support staff position (including law enforcement unit personnel and health staff); a person or company with whom the University has contracted as its agent to provide a service instead of using University employees or officials (such as an attorney, auditor, or collection agent); a person serving on the Board of Trustees; or a student serving on an official committee, such as a disciplinary or grievance committee, or assisting another school official in performing his or her tasks. A school official has a legitimate educational interest if the official needs to review an education record in order to fulfill his or her professional responsibilities for the University. Upon request, the University also discloses education records without consent to officials of another school in which a student seeks or intends to enroll.

FIU student email addresses are used to communicate and collaborate on supported FIU applications (e.g., Teams, Office 365, Zoom) with members of the University community. Student name and FIU email addresses may be accessed by members of the University community with an active FIU account. Because student email addresses are used on multiple communication platforms for legitimate educational purposes, internal disclosures of student e-mail addresses amongst or between University Officials and/or other students will not constitute a FERPA violation.

Directory Information

The University may disclose, without consent, "directory," or public, information, which is information available about a student that is not considered harmful or an invasion of privacy if disclosed. While FERPA and state law protect the privacy of educational records, directory information is not treated as confidential and may be disclosed by the University without student consent unless the student has placed a FERPA block via their MyFIU Self-Service portal.

FIU considers the following to be directory information items:

- Student's name;
- Student classification and major and minor fields of study;
- Participation in officially recognized activities and sports;
- Weight and height of members of athletic teams; dates of attendance, and degrees and awards received;
- The most recent previous educational agency or institution attended by the student;
- The student's photographic image independent of any additional personal identifiers.

In order to prevent access to or release of directory information, students must request non-disclosure through their MyFIU Self-Service portal. Access to or release of directory information will be withheld until further written instruction is received from a student.

Students have a right to challenge the accuracy of their educational records and may file a request to amend these records.

For complete information regarding the policies outlined above, please refer to the Student Privacy and FERPA website or contact:

University Registrar
Florida International University
Email: ferpa@fiu.edu

FIU-108 Access to Student Education Records

Policy Statement with Reference to Religious Holy Days

A faculty member who wishes to observe a religious holy day shall make arrangements to have another instructor teach the class in his or her absence, if possible, or shall reschedule the class.

Because there are some classes and other functions where attendance may be considered essential, the following policy is in effect:

- Each student shall, upon notifying his or her instructor at the beginning of the semester, be excused from class to observe a religious holy day of his or her faith.
- While the student will be held responsible for the material covered in his or her absence, each student shall be permitted a reasonable amount of time to make up any work missed.
- No major test, major class event, or major University activity will be scheduled on a major religious holy day.
- Professors and University administrators shall not arbitrarily penalize students who are absent from academic or social activities because of religious observances.

For further information, please refer to FIU Board of Trustees FIU - 2504 Student Religious Observances, Practices, and Beliefs.

Related FIU Regulation and Policy

FIU - 2504 Student Religious Observances, Practices, and Beliefs

FIU Policy 350.061 Missed Class Related to Authorized University Event

Class Attendance

The University expects students to attend their classes in order to create an effective learning environment in which to master course content and satisfy performance objectives and learning outcomes as outlined by instructors. Instructors may establish specific class attendance requirements and may consider attendance and participation in class in evaluating student performance.

In general, instructors must excuse students from classes due to their military obligations, jury duty, religious days, disability accommodations as approved by the Disability Resource Center, and/or participation in official university activities (i.e., athletic events, artistic performances, curricular activities). Instructors must afford students a reasonable amount of time to complete course work and/or assignments missed during their approved absence.

Only registered students appearing on an official class roster may attend a class at the University. During the first week of class, instructors must inform students of any special requirements and articulate any penalties, including a failing grade that may result for non-attendance. This information should be clearly stated in the course syllabus.

First Two Weeks Attendance Requirement

In addition to our general expectation that students attend their classes, we require students to attend the initial sessions of all classes in which they are registered. If a student fails to attend initial class sessions, then the University may drop that student from the class. Please note that students are still accountable for all aspects of their enrollments; students maintain responsibility for verifying all course drops and associated fee adjustments.

Florida's Statewide Course Numbering System

The State of Florida offers transfer course guarantees for students who earn the Associate in Arts (AA) degree or meet General Education requirements at Florida public institutions. There are also guarantees for students with courses from private institutions that take part in the Florida Statewide Course Numbering System. To learn more about the State of Florida's longstanding articulation and transfer guarantees, visit: the Florida Department of Education.

Courses in this catalog are identified by prefixes and numbers that were assigned by Florida's Statewide Course Numbering System (SCNS). This numbering system is used by all public postsecondary institutions in Florida and by participating nonpublic institutions. The major purpose of this system is to facilitate the transfer of courses between participating institutions. Students and administrators can use the online SCNS database to obtain course descriptions and specific information about course transfer between participating Florida institutions. Visit the SCNS website.

Each participating institution controls the title, credit, and content of its own courses and recommends the first digit of the course number to indicate the level at which students normally take the course. Course prefixes and the last three digits of the course numbers are assigned by members of faculty discipline committees appointed to the SCNS for that purpose by the Florida Department of Education. Individuals nominated to serve on these committees are selected to maintain a representative balance as to type of institution and discipline field or specialization.

The course prefix and each digit in the course number have a meaning in the SCNS. The listing of prefixes and associated courses is referred to as the “SCNS taxonomy.” Descriptions of the content of courses are referred to as “statewide course profiles.”

The Course Prefix

The course prefix is a three-letter designator for a major division of an academic discipline, subject matter area, or subcategory of knowledge. The prefix is not intended to identify the department in which a course is offered. Rather, the content of a course determines the assigned prefix to identify the course.

General Rule for Course Equivalencies

Equivalent courses at different institutions are identified by the same prefixes and same last three digits of the course number and are guaranteed to be transferable between participating institutions that offer the course, with a few exceptions, as listed below in Exceptions to the General Rule for Equivalency.

For example, a freshman composition skills course is offered by multiple public and nonpublic postsecondary institutions. Each institution uses “ENC_101” to identify its freshman composition skills course. The level code is the first digit and represents the year in which students normally take the course at a specific institution. In the SCNS taxonomy, “ENC” means “English Composition,” the century digit “1” represents “Freshman Composition,” the decade digit “0” represents “Freshman Composition Skills,” and the unit digit “1” represents “Freshman Composition Skills I.”

In the sciences and certain other areas, a “C” or “L” after the course number is known as a lab indicator. The “C” represents a combined lecture and laboratory course that meets in the same place at the same time. The “L” represents a laboratory course or the laboratory part of a course that has the same prefix and course number but meets at a different time or place.

Transfer of any successfully completed course from one participating institution to another is guaranteed in cases where the course to be transferred is equivalent to one offered by the receiving institution. Equivalencies are established by the same prefix and last three digits and comparable faculty credentials at both institutions. For example, ENC 1101 is offered at a state/community college. The same course is offered at a state university as ENC 2101. A student who has successfully completed ENC 1101 at a Florida College System institution is guaranteed to receive transfer credit for ENC 2101 at the state university if the student transfers. The student cannot be required to take ENC 2101 since ENC 1101 is equivalent to ENC 2101. Transfer credit must be awarded for successfully completed equivalent courses and used by the receiving institution to determine satisfaction of requirements by transfer students on the same basis as credit awarded to the native students. It is the prerogative of the receiving institution, however, to offer transfer credit for courses successfully completed that have not been designated as equivalent. NOTE: Credit generated at institutions on the quarter-term system may not transfer the equivalent number of credits to institutions on the semester-term system. For example, 4.0 quarter hours transfers as 2.67 semester hours.

Authority for Acceptance of Equivalent Courses

Section 1007.24(7), Florida Statutes, states:

Any student who transfers among postsecondary institutions that are fully accredited by a regional or national accrediting agency recognized by the United States Department of Education and that participate in the statewide course numbering system shall be awarded credit by the receiving institution for courses satisfactorily completed by the student at the previous institutions. Credit shall be awarded if the courses are judged by the appropriate statewide course numbering system faculty committees representing school districts, public postsecondary educational institutions, and participating nonpublic postsecondary educational institutions to be academically equivalent to courses offered at the receiving institution, including equivalency of faculty credentials, regardless of the public or nonpublic control of the previous institution. The Department of Education shall ensure that credits to be accepted by a receiving institution are generated in courses for which the faculty possess credentials that are comparable to those required by the accrediting association of the receiving institution. The award of credit may be limited to courses that are entered in the statewide course numbering system. Credits awarded pursuant to this subsection shall satisfy institutional requirements on the same basis as credits awarded to native students.

For purposes of clarity, an accredited institution refers to a post-secondary institution whose institutional accreditor is recognized by the U.S. Department of Education, Office of Postsecondary Education.

Exceptions to the General Rule for Equivalency

Since the initial implementation of the SCNS, specific disciplines or types of courses have been excluded from the guarantee of transfer for equivalent courses. These include courses that must be evaluated individually or courses in which the student must be evaluated for mastery of skill and technique. The following courses are exceptions to the general rule for course equivalencies and may not transfer. Transferability of the below courses is at the discretion of the receiving institution:

- Courses not offered by the receiving institution;
- Courses included in the SCNS completed prior to the established transfer date of the course in question;
- Courses in the _900-999 series must be evaluated individually. These include special topics, internships, apprenticeships, practica, study abroad, theses and dissertations;
- Applied academics for adult education courses;
- Graduate courses;
- Internships, apprenticeships, practica, clinical experiences and study abroad courses with numbers other than those ranging from 900-999;
- Applied courses in the performing arts (Art, Dance, Interior Design, Music, and Theatre) and skills courses in Criminal Justice (academy certificate courses). These courses need evidence of achievement (e.g., portfolio, audition, interview).

Courses at Nonpublic Accredited Institutions

The SCNS website contains a comprehensive listing of all nonpublic institution courses in the SCNS inventory, as well as each course's transfer level and transfer effective date. This report is updated monthly. For more information about the SCNS and appeals process regarding course credit transfer decisions, visit the Transfer and Transition Services website, contact 305-348-3844, or e-mail transfer@fiu.edu. You may also visit the Florida Department of Education, Office of Articulation website, contact 850-245-0427, or e-mail articulation@fldoe.org.

State of Florida Common Program Prerequisites

Faculty discipline committees from the Florida College System (FCS) and State University System (SUS) of Florida have identified common prerequisites required for baccalaureate degree programs. Most, but not all, baccalaureate degree programs require common prerequisites. The identified courses are also part of the Statewide Common Course Numbering System (SCNS) which supports statewide articulation and transfer guarantees between FCS and SUS institutions.

Students must complete common prerequisites for timely progression through the degree program as these are required for enrollment in upper-division courses. Students can find common prerequisites for each of FIU's baccalaureate degree programs under each college/school/program. Florida's Common Prerequisites Manual (CPM) offers a searchable database of all state-approved prerequisites, including alternatives.

FIU Related Policy

340.050 Articulation

Credit Hour Definition

A credit hour is an amount of work represented in intended learning outcomes and verified by evidence of student achievement that is an institutionally established equivalency that reasonably approximates:

1. Not less than one hour of classroom or direct faculty instruction and a minimum of two hours of out of class student work each week for approximately fifteen weeks for one semester, or the equivalent amount of work over a different amount of time, or
2. At least an equivalent amount of work as outlined in item 1 above for the academic activities established by the institution including laboratory work, internships, practica, studio work, and other academic work leading to the award of credit hours.

Related FIU Policy

FIU Policy 1360.035 Semester Credit Hour

Transfer and Transition Services

Transfer and Transition Services (TTS) provides transfer students with the information, support, and resources needed for a successful transition to the university.

A critical component of the transfer process is determining course equivalencies. TTS coordinates the course equivalency process for courses in the University Core Curriculum (UCC), including older curricula (Core Curriculum, General Education). Approved course equivalencies from institutions in the U.S. and Puerto Rico, are posted on the Transfer Equivalency Database (TED) for transparency and planning.

Transfer Credit

For clarity, the Office of Admissions determines the acceptability of transfer credit using statewide regulations, accreditation, and institutional policies. Credit is transferrable when it is from a post-secondary accredited institution, defined as "a post-secondary institution whose institutional accreditor is recognized by the U.S. Department of Education, Office of Postsecondary Education." Credit is also transferrable from a post-secondary institution outside of the U.S. deemed as accredited through an official evaluation of foreign education or subject matter experts from FIU's Office of Admissions.

TTS determines the applicability of courses to satisfy the UCC requirements and lower-division prerequisites, while each academic department is responsible for determining course equivalency for transfer courses that may be applicable to the student's program, including upper-division requirements. The Transfer Equivalency Process is proactive and holistic and includes consultation with faculty. At minimum, the process includes reviewing course syllabi for content, assessments, writing assignments (when applicable), laboratory assignments (when applicable), textbooks, and student learning outcomes, as well as transcript keys, course sequences, and the student's major at FIU.

A grade of 'D' may be accepted for transfer credit, although it may not satisfy major specific requirements. However, such a grade in coursework in the major field/discipline is subject to review and approval by the appropriate academic department. Transfer course grades are not included in any FIU grade point average calculations.

Transfer credit is applied as appropriate to a student's degree program. If a student chooses to transfer to another academic unit within the university, credit previously earned at another post-secondary institution may be re-evaluated and applied as appropriate to the student's new degree program.

Transfer Credit Limits

A maximum of 60 lower-division credits may be counted toward a degree at the university. A maximum of 30 upper-division credits may be counted toward a degree at FIU.

Lower-division courses in excess of 60 semester hours may serve to meet specific course requirements for a degree, but credit hours represented by these courses will not reduce the number of credit hours to be completed at the university.

Transferring New Courses/Credits Post-FIU Enrollment

A student enrolled at FIU and interested in completing a course at an accredited post-secondary institution or an approved acceleration method must receive advanced documented approval from their academic advisor. Doing so ensures that transfer credits are acceptable and satisfy degree requirements. A student who plans to enroll in a Florida College System (FCS) institution or State University System (SUS) institution completes the Transient Student Process, which includes requesting advisor approval.

Except for the guaranteed transfer of credit among the FCS and SUS around common course numbers and common prerequisites. The acceptability or applicability of credit earned at FIU that is transferred to another institution is at the sole discretion of the receiving institution.

Credit Used to Accelerate Time-to-Degree

Academic programs of the university are planned in such a manner that students may complete some of their degree requirements through one or more accelerated mechanisms. Degree-seeking students may utilize several acceleration methods, including credit-by-exam, military education or training, American Council on Education evaluated courses (approved by TTS), departmental proficiency examination, and prior learning portfolio. Acceleration does not reduce the number of credits required to earn the baccalaureate degree nor does it satisfy FIU's 25% residency undergraduate degree requirement. Additional examinations identified in the Articulation Coordinating Committee Credit-by-Exam Guidelines approved by the Board of Governors also have transfer guarantees.

Credit-by-Exam

FIU accepts Credit-by-Exam according to state guidelines established by the Articulation Coordinating Committee of the State University System of Florida Board of Governors in August 2006 and updated annually.

The guidelines include, but are not limited to, the following:

- Credit awarded by exam may not duplicate other credit.
- If duplicate credit exists, the exam yielding the most credit will be awarded.
- Course equivalencies are included in the student's transcript and degree audit.
- There are no grades associated with credit-by-exam equivalencies.

The following exams are approved by the ACC: Advanced Placement (AP), Cambridge Advanced International Certificate of Education (AICE/A and AS-Level), College Level Examination Program (CLEP), Defense Activity for Non-Traditional Education Support (DANTES) Subject Standardized Tests (DSST), Defense Language Proficiency Test (DLPT), Excelsior College Examinations (UExcel), International Baccalaureate (IB).

Additional Acceleration Through Examination

FIU may accept credit for the Caribbean Advanced Proficiency Examinations (CAPE), Foreign Language Achievement Testing Service (FLATS), French Baccalaureate, and German Abitur. These, and other examinations outside the ACC guidelines, are evaluated on a case-by-case basis, and the transferability and applicability of credit is left at the discretion of the university.

FIU awards credit for Advanced Level Program completed through College Board, Puerto Rico and Latin America Office. The following three exams and scores are accepted: Pre-Calculus (Level II) with a score of 4 or 5; English with a score of 4 or 5; and Spanish with a score of 3, 4, or 5.

Military Education and Training

TTS reviews military education and training for applicability to the UCC using the Joint Services Transcript (JST) American Council on Education (ACE) recommendations, Community College of the Air Force (CCAF) transcript, ACE Military Guide, Statewide Credit or Clock Hour for Military Experience Equivalency List. Discipline-faculty and subject-matter experts are consulted as appropriate.

Law Enforcement Experience/Training

Students with law enforcement experience noted in the Articulation Coordinating Committee's Credit or Clock Hour for Law Enforcement Experience Equivalency List in effect at the time experience is evaluated for equivalency shall be awarded credit.

Prior Learning Assessment (PLA)

It is the prerogative of each academic unit to assess and award (or waive) credit for knowledge and competencies acquired through documented life/work experiences, including but not limited to, workplace trainings, professional certifications, standardized professional examinations, and non-credit courses.

Credit is deemed equivalent to college-level coursework upon careful review and assessment of learning outcomes through either completion of an existing credit-by-exam (when applicable), department examination or portfolio. The significant learning must be applicable to the student's degree program and should be discussed with an academic advisor and appropriately documented at the point of major selection. Credit earned through PLA from a transfer institution and documented on the student's transcript is not guaranteed to transfer to FIU.

Posting of Transfer Credits and Appeals

Awarded transfer credits or credits approved through Prior Learning Assessment (by FIU) are posted on a student's transcript but are not used in the calculation of the FIU grade point average. Departmental examination (offered by FIU) is noted on the student's transcript as EM (examination).

Students may contact TTS (transfer@fiu.edu) to appeal the acceptance/denial of transfer credits. Appeals are reviewed by the Director of Transfer and Transition Services (or designee), and decisions are made in line with state regulations, accreditation, and university policies. Appeals must be based on updated or new documentation.

Connect4Success

FIU Connect4Success (C4S) supports students enrolled at partner colleges in achieving a seamless transfer to the university with guidance from both college advisors and FIU Bridge Advisors. The program offers guaranteed admission to FIU, excluding specialized admission programs, upon completion of the Associate in Arts (AA) degree from any Florida College System institution within three years. Additionally, articulated Associate in Science (AS) degree pathways under the C4S program offer guaranteed transfer credit and applicability of that credit, providing students with a clear and efficient pathway to continue their education at FIU.

Reverse Transfer

Reverse Transfer is statewide agreement between the Florida College System and State University System. The agreement permits eligible students who transfer to an SUS institution from an FCS institution without the AA degree to earn the degree upon satisfying AA degree requirements at the SUS institution. The originating Florida College System institution awards the AA degree using the "reverse" transfer credits earned at the SUS institution.

Florida Common Prerequisites Manual (CPM)

Undergraduate Accelerated Credit

In compliance with BOG Regulation 6.006 Acceleration Mechanisms, academic programs at the university are planned in such a manner that students may complete a minimum of twenty-five percent (25%) of their degree requirements through one or more accelerated mechanisms.

Dual Enrollment

FIU adheres to Florida Statute 1007.271 -Dual enrollment programs and awards credit accordingly for successful passage of approved dual enrollment courses at a Florida College System (FCS) or University taken prior to graduation from high school. Students in secondary (grades 6-12) public, private, charter schools and home education programs in Florida, and who meet eligibility requirements are eligible to participate. Students in dual enrollment courses receive credit toward high school completion and an associate or baccalaureate degree. While in this program students are exempt from the payment of all tuition and fees, and receive all instructional materials free of charge. Eligible secondary school students may also enroll in the early admission program (full-time early college dual enrollment). Qualifications for this program are in subsection 1007.271(2), Florida Statutes. For more information please visit the Dual Enrollment website.

Credit-By-Exam

FIU accepts examinations for credit according to state guidelines established by the Articulation Coordinating Committee of the State University System of Florida Board of Governors in August 2006 and updated annually. Based on these guidelines, the following exams have transfer guarantees: Advanced Placement (AP), Cambridge Advanced International Certificate of Education (AICE/A and AS-Level), College Level Examination Program (CLEP), DANTES Subject Standardized Tests (DSST), Defense Language Proficiency Test (DLPT), Excelsior College Examinations (UExcel), and International Baccalaureate (IB). Additional examinations identified in the Articulation Coordinating Committee Credit-by-Exam Guidelines approved by the Board of Governors also have transfer guarantees.

These guidelines include, but are not limited to, the following:

1. Credit awarded by exam may not duplicate other credit.
2. If duplicate credit exists, the exam yielding the most credit will be awarded.
3. Course equivalencies are included in the student's transcript and degree audit.
4. There are no grades associated with credit-by-exam equivalencies.

A complete set of guidelines, as well as credit-by-exam equivalency tables, can be found on the Transfer and Transition Services (TTS) website: Credit-by-Exam

Additional Credit-By-Exam

FIU recognizes additional forms of acceleration, including the Caribbean Advanced Proficiency Examinations (CAPE), Foreign Language Achievement Testing Service (FLATS), German Abitur, and French and General Baccalaureate. These credit-by-exam mechanisms are evaluated on a case-by-case basis in consultation with university faculty. The application of credit for these exams is left to the discretion of the university.

FIU awards credit for Advanced Level Program completed through College Board, Puerto Rico and Latin America Office. The following three exams and scores are accepted: Pre-Calculus (Level II) with a score of 4 or 5; English with a score of 4 or 5; and Spanish with a score of 3, 4, or 5.

College Level Examination Program (CLEP)

CLEP is available to students while enrolled at the university. This examination program is designed to measure knowledge in specific subject areas of general education. Credit earned through CLEP may be equated to courses in the UCC or lower-division electives. Students can register to take a CLEP exam by visiting Center for Testing and Certification - CLEP or by contacting the Center for Testing and Career Certification at (305) 348-2441 (for the Modesto A. Maidique Campus) and (305) 919-4043 (for the Biscayne Bay Campus).

Dantes (Defense Activity for Non-Traditional Education Support) Subject Standardized Tests (DSST)

DSST is available to students while enrolled at the university. Any individual who is seeking college credit for knowledge gained outside the traditional college classroom, such as through work experience, independent study, military training, or prior coursework, can attempt DSST exams. In addition to the considerable cost savings, adult learners, high school students, or military personnel who successfully complete DSST, accelerate their academic goals toward degree completion.

Active Duty and Veteran Military Members

DSST enables military personnel to advance their educational and academic goals even while in the service. At FIU, as a Fully Funded DSST Test Center, eligible military members and eligible spouses qualify to have the test center's sitting fee waived (first attempt only) for any of the DSST exams attempted.

Credit Used to Accelerate Time-To-Degree

Degree-seeking students may utilize several acceleration methods to accelerate time-to-degree, including dual enrollment, credit-by-exam (CLEP, DSST), military education or training, law enforcement experience/training, American Council on Education evaluated course (approved by TTS), departmental proficiency examination, and prior learning portfolio. It is the prerogative of each academic unit to award credit for knowledge and competencies acquired through documented life/work experiences deemed equivalent to college-level coursework upon careful review and assessment of learning outcomes. The significant learning must be applicable to the student's degree program and should be discussed with an academic advisor and appropriately documented at the point of major selection.

Awarded credits are identified on a student's transcript but are not used in the calculation of the grade point average. Departmental examination is noted on the student's transcript as EM (examination). Accelerated credit may not be applied to meet the 25% residency undergraduate degree requirement.

Students may contact TTS to appeal the acceptance/denial of credits used to accelerate time-to- degree. Appeals must be based on additional evidence/documentation.

Departmental Proficiency Examination

Departmental Proficiency Examination is only available for courses that do not have credit-by-exam equivalents at the post-secondary level (e.g., CLEP, DSST, Excelsior). Awarding departmental credit by examination is the prerogative of each academic unit. To receive credit by examination, a student must be degree seeking and make testing arrangements with the academic unit and Center for Testing and Career Certification. Once the student is awarded credit for the exam, an EM (examination) grade will be recorded on the transcript but will not be used in the calculation of the GPA. Departmental Proficiency Examinations cannot be used for a course previously attempted. Students are strongly encouraged to discuss this option with an academic advisor to ensure it meets degree requirements.

350.040 Development of Prior Learning Assessments (PLA)

340.135 Dual Enrollment

Graduate Academic Standing

Academic Standing

To remain in good academic standing, graduate students must maintain a graduate GPA of 3.0. Undergraduate prerequisites taken after the bachelor's degree will not count toward the graduate GPA. More stringent grade expectations may be required by individual programs, however they must be published in the University Catalog.

For doctoral students, and master’s students for whom an annual evaluation is required, satisfactory performance in the annual evaluation is necessary in order to maintain good academic standing. In programs with rolling admissions, students will be evaluated on a term basis.

Failure to maintain good academic standing will result in placement on academic warning, probation, or dismissal.

Academic Warning

A graduate student whose cumulative graduate GPA falls below a 3.0 will be placed on warning, indicating academic difficulty. The designation will be notated on the transcript when a warning is based on GPA.

A doctoral student whose annual evaluation is unsatisfactory in a given year will be placed on warning, indicating difficulty in progressing through the program.

Academic Probation

A graduate student on warning whose cumulative graduate GPA remains below 3.0 in the following semester will be placed on probation, indicating serious academic difficulty. The designation will be notated on the transcript when probation is based on GPA. The College or School of the student on probation may indicate the conditions which must be met in order to continue enrollment.

A second unsatisfactory annual evaluation for doctoral students will result in probation, indicating serious difficulty in progressing through the program.

Academic Dismissal

A graduate student on probation whose cumulative and semester GPA's fall below a 3.0 for a third term will be automatically dismissed from the program and the University. The designation will be notated on the transcript when dismissal is based on GPA. The student has ten working days to appeal the dismissal decision.

A student may also be dismissed for failure to make satisfactory progress toward degree completion or failure to complete all the requirements for a graduate degree within the time limits for degree completion. Each unit must have a policy specifying the criteria for satisfactory progress at each stage of the program.

A student may be dismissed for non-compliance with the continuous enrollment policy for doctoral students who have advanced to candidacy or master's students with an approved research proposal.

A third unsatisfactory annual evaluation for doctoral students will result in dismissal.

Dismissed students who are readmitted or who register as non-degree-seeking students after a one-year period are placed on academic probation.

Related FIU Policy

FIU Policy 380.044 Graduate Academic Standing, Academic Dismissal, and Readmission

Undergraduate Academic Standing

Academic Warning

An undergraduate student whose cumulative GPA falls below a 2.0 will be placed on warning, indicating academic difficulty. This designation will be notated on the transcript.

Academic Probation

An undergraduate student on warning whose cumulative GPA remains below 2.0 will be placed on probation, indicating serious academic difficulty. The College/School of the student on probation may indicate the conditions which must be met in order to continue enrollment. A student who maintains a term/semester GPA of 2.0 while on probation will remain on probation if the cumulative GPA is below 2.0 but will not be dismissed from the university. This designation will be notated on the transcript.

Academic Dismissal

An undergraduate student on probation whose cumulative and semester GPAs fall below a 2.0 will be automatically dismissed from his/her program and the University. This designation will be notated on the transcript. An undergraduate student will not be dismissed prior to attempting a minimum of 20 semester hours of coursework. The dismissal from the University is for a minimum of one year. After one year, the student may apply for re-admission (see Re-admission) to the University in the same or different program, or register as a non-degree seeking student.

A student who has been dismissed from the University will have ten working days to submit an appeal for Academic Reinstatement. The appeal for Academic Reinstatement is the formal method through which a student may appeal the dismissal decision. Please refer to the Academic Dismissal website for information and instructions on submitting an appeal.

If approved, the Academic Reinstatement specifies the term for which the student has been reinstated and (if applicable) limitations on the number of credit hours in which a student can enroll; please note that the student must enroll during the term specified in the reinstatement decision. The reinstatement after academic dismissal will be notated on the transcript. Dismissed students reinstated to the university are placed on academic probation. Please refer to FIU Policy 340.045 Undergraduate Appeal of Academic Dismissal for further information.

Related FIU Policies

FIU Policy 340.045 Undergraduate Appeal of Academic Dismissal
FIU Policy 340.020 Undergraduate Academic Status

Change or Correction of Grades

Once submitted, end-of-semester grades are final. The only exception is for incompletes, which default to an F grade if not completed by the end of two consecutive terms. Grades are subject to change only through an official Change of Grade process to correct an error in computation or transcribing, or where part of the student's work has been unintentionally overlooked. For more information pertaining to grades, such as grading system and GPA calculations, visit the Grades website.

The Office of the University Registrar makes available the Change of Grade process on the FIU instructor portal or through another approved change of grade process. The Herbert Wertheim College of Medicine and the College of Law are authorized to use a different change of grade process, if needed, through a secure and auditable system as approved by the University-wide Chief Information Technology Security Officer and Family Educational Rights and Privacy Act (FERPA) group.

Related FIU Policy

FIU Policy 340.085 Change or Correction of Grade

Dean's List

Undergraduate students who earn a term grade point average of 3.500 or higher by completing nine or more term credit hours of coursework for which grade points are earned are placed on the semester Dean's List. This achievement is noted on the student's permanent academic record (transcript).

Academic Honors for Graduation

The following academic honors for graduation are awarded to undergraduate students:

- ***Summa Cum Laude.*** Students must have earned a cumulative FIU GPA of 3.900 or higher.
- ***Magna Cum Laude.*** Students must have earned a cumulative FIU GPA between 3.700 and 3.899.
- ***Cum Laude.*** Students must have earned a cumulative FIU GPA between 3.500 and 3.699.

***NOTE**: Graduate degrees do not award honors for GPA.

To graduate with the honors designations listed above an undergraduate student must receive grade points in a minimum of 40 semester hours of credit at FIU. An exception to the minimum 40 credits will be made for the 33-credit RN-BSN Program and RN-BSN/MSN Combined Degree Pathway, for the BSN. The honors designation is noted on the student's permanent academic record (transcript) when the degree is posted.

P/F, S/U and AU (audit) grades do not count towards the minimum credit total.

Credits earned prior to readmission under academic amnesty or salvage are not applicable in computing the FIU 40 or 33 credit-requirement grade points to graduate with honors.

For more information, visit the Graduate with Honors website.

Related FIU Policy

FIU Policy 340.015 Dean's List and Academic Honors

Grade Forgiveness

Grade forgiveness is a way in which an undergraduate student, taking undergraduate classes, may repeat a limited number of courses to improve their GPA. Only the grade received on the last repeat will be used in the calculation. Grade forgiveness applies only to courses in which the student received a grade lower than a C (2.00). All courses taken with the grades earned will be recorded on the student's transcript. Once the degree is conferred, grade forgiveness cannot be applied to the student record.

Undergraduate students are allowed grade forgiveness only three times, regardless of the number of bachelor's degrees pursued at FIU. The same class may be forgiven up to three times, or the student may use the three opportunities to apply to different classes. Only the final grade for the three classes repeated under the grade forgiveness will count in computing the student's GPA. The recalculation of the GPA is an internal University policy only, and one which may not be accepted by other institutions and/or services.

For a class to qualify as repeated and result in a GPA adjustment under this policy, the repeated course must be the same as the original attempt, including the same grading option and number of credits. Exceptions may be granted if the number of course credits has changed after the student's initial attempt. Additionally, both the original attempt and the repeated course must have been completed at FIU. Courses offered for variable credit must be repeated for the same number of credits as the original attempt in order to be eligible for grade forgiveness. Repeated courses will be appropriately designated on the student academic record/transcript, with a transcript comment.

Students who have used their three options under the grade forgiveness may still repeat courses in which a non-passing grade was received. However, both the original grade and any additional grades received will be used in computing the GPA.

Students who are found responsible for academic misconduct violations under FIU Board of Trustees Regulation FIU-2501 Student Conduct and Honor Code are prohibited from using the Undergraduate Grade Forgiveness Policy for the course in which the academic misconduct occurred.

Related FIU Regulation and Policy

FIU-2501 Student Conduct and Honor Code

FIU Policy 1360.030 Undergraduate Grade Forgiveness

Grades and Grading System

A Grade Point Average (GPA) is calculated for all students. GPAs are calculated only for grades earned at FIU. There are two types of GPAs: Term and Cumulative. The term GPA is calculated using the courses taken in that term only. The cumulative GPA is a summary of all FIU courses taken over a student's career. Note, when a student's career changes (i.e., undergraduate to graduate), the GPA calculation begins anew. Transfer course grades are not included in any GPA calculations.

Current Grading System

Grade	Points Per Credit Hour
A	4.000
A-	3.670
B+	3.330
B	3.000
B-	2.670
C+	2.330
C	2.000
D	1.000
F (Failure)	0.000
F0 (Failure based on non-attendance)	0.000
H (Holding) - Designated Mathematics Classes only	N/A
P (Satisfactory [Pass])	N/A
EM (Credit by Departmental Examination)	N/A
IN (Incomplete*)	N/A
IP (In Progress - Thesis/Dissertation Courses only)	N/A
AU (Audit)	N/A
W (Withdrew from Course)	N/A
WA (Administratively Withdrawn)	N/A
WI (Withdrew from the University)	N/A
+ (National/International Student Exchange)	N/A
U (Unsatisfactory)	N/A
S (Satisfactory)	N/A
DR (Dropped Course)	N/A
NC (No Credit Earned)	N/A
NG (No Grade Assigned by Instructor [system generated])	N/A
*An incomplete grade (IN) is a temporary grade. Please see the Incomplete Grade section of this catalog for additional information.	

For additional information please visit the Grades website.

How to Calculate Grade Point Average (GPA)

To calculate a GPA, one must know the course grade, the course credits or semester hours associated with that course, and the values associated with each grade assigned. See the Grading System list above for "Points Per Credit Hour" values. To calculate a GPA, first multiply the number of course credits/term hours for each course by the grade point values associated with the grade received in that course. Then add all of those totals together and divide that sum by the total number of course credits/term hours. For a term GPA use all regularly graded courses in that semester (plus P/F courses in which an F or U was earned), and for the cumulative GPA use all courses. Do not average term GPAs in order to calculate the cumulative GPA.

Note: All GPAs are rounded to two decimal points. Note: On the Grading System list above, some grades will not affect GPA, such as “P” (Satisfactory), “IN” (Incomplete) or “DR” (Dropped). Therefore, do not include credits from courses with those grades in the calculation.

Example of term GPA calculation:

Calculating aTerm GPA				
Course	Grade	Course Credits Attempted	Points Per Credit Hour	Points Per Course
ENC 1101	B	3.0 x	3.00 =	9.00
MAC 1147	B+	4.0 x	3.33 =	13.32
BSC 2010	A-	3.0 x	3.67 =	11.01
BSC 2010L	A	1.0 x	4.00 =	4.00
AMH 2041	C	3.0 x	2.00 =	6.00
ARH 2050	F	3.0 x	0.00 =	0.00
Total		17		43.33
Semester GPA		43.33 divided by 17 = 2.55		

Grading Options

The colleges and the schools make the determination of the grading option of each course, except in Thesis and Dissertation credits. A course may be offered for a letter grade as listed above or Pass/Fail; or for an optional grade (if designated by a dept.) in which the student has a choice of either receiving a letter grade or pass/fail; or the student may choose to audit a course, and an ‘AU’ grade will be recorded on the student’s record. The grading option must be indicated at the time of registration. The grading option cannot be changed after the add/drop period. There are no exceptions to this deadline. The grading options for thesis and dissertation credits are Pass, In Progress, Unsatisfactory, and Fail.

To register for an audit, the student must obtain the permission and signature of the instructor of the course to be audited. Once the course is registered for as ‘Audit’, the grading option cannot be changed. Tuition and fees are the same whether the student is taking the course for credit or for audit.

Incomplete Grade

A grade of incomplete (IN) is a temporary grade given at the discretion of the instructor for work not completed during the term and not caused by the student’s own negligence. An IN grade may only be awarded to a student when a small portion of the student’s work is missing, not to exceed 50% of the course work, and only when the student is otherwise earning a passing grade.

An incomplete must be made up as quickly as possible but no longer than two consecutive terms (including summer term) after the initial course or it will automatically default to an “F” grade. The student must not register again for the course to make up the incomplete. A student cannot graduate with an IN grade.

An IN grade cannot be assigned to dissertation or thesis credits to indicate that work is in progress. Additionally, graduate students must be enrolled in the term they graduate. However, completing a course with an IN grade does NOT count as being enrolled for the term of graduation.

Please refer to FIU Policy 380.0449 Incomplete Grades (IN) for Graduate and Undergraduate Students for further information.

In accordance with FIU Board of Trustees Regulation FIU-2501 Student Conduct and Honor Code, an IN grade may also be given in matters of alleged academic misconduct.

No Credit (NC) Grade

For freshmen students entering academic year 2016 or later, and dual enrollment students enrolled in Fall 2023 and thereafter, a No Credit (NC) grade will be applied to grades of “D”, or “F” in any University Core Curriculum (UCC) course and approved additional courses taken within one year of their first enrollment date, or while enrolled as a dual enrollment student. The purpose of the No Credit grade is to assist freshmen and dual enrollment students in their transition to college at FIU. This policy allows students to maintain progress towards their degree by allowing them an opportunity to recover from any academic difficulties they may have experienced during their first year and/or while taking dual enrollment courses.

Please refer to FIU Policy 1360.050 No Credit (NC) Grade Policy and corresponding Procedure for further information.

FIU Policy 380.0449 Incomplete Grades (IN) for Graduate and Undergraduate Students

FIU Policy 340.085 Change or Correction of Grade Policy

Repeated Courses

Undergraduate students may repeat courses in which they received a grade of “W,” “DR”, U,” “D,” “NC,” or “F”. Both the original and repeat grades will be used in the calculation of Grade Point Average (GPA), unless the student applies for grade forgiveness, but credit for only one attempt will apply towards graduation. All attempts and grades will remain on the student academic record/transcript. Students may not re-enroll in courses for which they have received a grade of “C” or higher without permission from their academic advisor. Students may repeat courses which are specifically designated as repeatable for credit. Repeatable courses may be taken up to the maximum number of times or hours as stated in the course description and/or university catalog. Course enrollment beyond these limits may not count toward the student's earned hours. Repeated courses may be subject to the Repeat Course Surcharge. Students should refer to the Repeat Course Surcharge website for further Information.

Graduate students may repeat courses, but grades from all graduate courses, including repeats, will be calculated in the term and cumulative GPA.

FIU University Core Curriculum (UCC)

Florida International University seeks to develop productive, creative, and responsible citizens who both shape society and lay the foundation for tomorrow. The UCC provides broad, foundational knowledge through a well-defined curriculum to help students develop intellectual skills and habits that enable them to think critically, analytically, and creatively, thus fostering more effective and lifelong learners. Together with concentration in major fields of study, the UCC builds the base that makes future academic and professional excellence possible.

Implementation of the UCC and day-to-day monitoring of student compliance with UCC requirements are the responsibility of the Office of Academic Support Initiatives & Services (OASIS) within the Division of Academic Affairs. Academic advising is a priority at the university. Undergraduate students are assigned to academic advisors within their major who will assist them with understanding and completing the requirements of the UCC.

The UCC requirements detailed below apply to all FIU students entering as first-time-in-college students in Summer B 2026 or later, and to all students entering as transfer students (who have not already earned an Associate in Arts [AA] degree at a state college or university in the State of Florida) in Fall 2026 or later. Students are required to complete a minimum of 36 credits from the UCC course list and satisfy the category requirements. Courses in the UCC are divided into five categories: Communication, Humanities, Mathematics, Natural Science, and Social Science. Each category includes state core (Group 1) and institutional general education (Group 2) courses approved by the State University System of Florida Board of Governors. Each category includes the number of courses required as well as the current list of approved courses; only these courses meet the UCC requirements and all must be taken for a letter grade.

Most programs require certain common prerequisite courses in addition to UCC requirements. Students should consult the catalog section dealing with the programs they wish to pursue to determine the nature and extent of the additional requirements. Students are ultimately responsible for meeting with advisors to discuss academic and career goals, course planning, academic policies and procedures, and opportunities for engagement at the University. Students are encouraged to meet with advisors should they have any questions about the UCC requirements or any of the graduation requirements or notes included below.

For information about the Florida Postsecondary Institutions General Education Digital Badges, please visit the Office of Micro-Credentials.

Additional Graduation Requirements

College-Level Communication and Computation Skills: Courses in the following areas are considered part of the College-Level Communication and Computation Skills requirement: Communication, Mathematics, and courses designated as Writing Intensive Requirement (WIR). A grade of "C" or higher is required in these courses.

Writing Intensive Requirement (WIR): Students are required to demonstrate college-level writing skills through six semester hours of Writing Intensive Requirement (WIR)-designated courses. To fulfill this requirement, students can select any two WIR-designated courses in the UCC. Students must earn a grade of "C" or higher to earn WIR credit.

Postsecondary Civic Literacy (CL) Requirement: Students must demonstrate understanding of American Civics via completed course work and/or test credit. This requirement is applicable to first year students enrolling for the first time in a Florida state college or university starting Summer 2018 or transfer students starting Fall 2018. All undergraduate students initially entering a Florida state college or university Summer B 2021 and thereafter must complete both a course and an exam. In addition to AMH 2020 and POS 2041, AMH 2010 will also satisfy the state of Florida's civic literacy course requirement if taken Fall 2024 or later. Note: Students awarded an associate or baccalaureate degree by a Florida state institution who initially entered prior to fall 2018 are required to meet the civic literacy requirements should they return to seek an additional undergraduate degree if they did not meet the requirements as part of their initial degree.

Summer Enrollment Requirement: Students who transfer to FIU with fewer than 60 credits must earn at least 9 credits during one or more summer semesters to be eligible for graduation. **Natural Science Lab:** All students must complete at least one science lab that corresponds with courses from Natural Science Group One or Group Two as a graduation requirement. **First-Year Experience Graduation Requirement:** All students entering the University with **fewer than 30 semester hours** are required to take this one-credit course during their first or second year at FIU. This course focuses on developing 21st -century skills and life skills that will facilitate students' transition to the University and preparation for future academic and professional success. High-school-earned college credit does not exempt students from this requirement. This is a graduation requirement, not a UCC requirement.	
SLS1501 First Year Exper	First-Year Experience

Communication Category (3 courses required; one from Group One and two from Group Two)

Communication courses afford students the ability to communicate effectively, including the ability to write clearly and engage in public speaking. [These are state required courses; a grade of “C” or higher is required.]

Communication – Group One (State Required)	
ENC1101 Writing and Rhetoric I	Writing and Rhetoric I
Communication – Group Two (FIU Required)	
ENC1102 Writing and Rhetoric II	Writing and Rhetoric II
SPC2608	Public Speaking

Humanities Category (2 courses required; one of which must be from Group One)

Humanities courses afford students the ability to think critically through the mastering of subjects concerned with human culture, especially literature, history, art, music, and philosophy, and must include selections from the Western canon.

Humanities – Group One (State Required)	
ARH2000 Exploring Art	Exploring Art – GL

Natural Science Lab (1 required): All students must complete at least one science lab that corresponds with a course from Natural Science Group One or Group Two as a graduation requirement.

Student Choice Category (1 course required)

Students must complete one additional course of their choice from the Humanities, Mathematics, Natural Science, or Social Science categories.

Additional Policies and Requirements

A student who has graduated from a Florida State College or University with an Associate in Arts degree will have met UCC requirements.

A student who has met the General Education requirements (as noted on their transcript) of any institution in the State University System of Florida will have met UCC requirements.

A student who has earned a previous baccalaureate degree from an accredited institution will have met UCC requirements.

A student who has taken the first two years in an accredited college other than a Florida College System or a State University System of Florida institution may receive credit for courses meeting UCC requirements.

A student who has been admitted before completing an equivalent general education program must do so at the university prior to graduation.

A transfer student who has successfully completed one or both science courses without labs at another institution prior to admission to FIU will be deemed to have satisfied the Natural Science and lab requirement. Transfer students who completed only one science lecture without a lab will be required to complete a lecture and lab at FIU.

Students in the Honors College who have satisfied designated Honors Courses will be deemed to have met sections of the UCC requirements. Visit http://honors.fiu.edu for course equivalencies.

FIU Policy 340.280 The Core Curriculum

Additional Policies & Requirements

College-Level Communication and Computation Skills

State Board of Education Rule 6A-10.030 (formerly Gordon Rule) of the state of Florida requires all public colleges and universities to include intensive writing and mathematics in their curricula to ensure that students have achieved substantial competency in these areas. This requirement must be fulfilled within the first two years of study.

6a. Writing Requirement (12 credits) Students must successfully complete twelve hours of writing courses with grades of C or better. Six hours must be in communication courses (i.e., courses with the prefix ENC). The additional six hours taken must be approved as a writing intensive course with the **Writing Intensive Requirement (WIR) designation**, which require demonstration of college-level writing skills through multiple assignments. Students who matriculated prior to 1983 need only six credits of writing courses with an ENC prefix.

6b. Mathematics (6 credits) One course must be at or above College Algebra level. Students subject to Rule 6A.10.030 need six credits in mathematics, three of which can be a computer programming course, a statistics course, or PHI 2100 Introduction to Logic. A grade of C or better indicates successful completion of this requirement. Students who matriculated prior to 1983 need only three credits in mathematics, but they must take one mathematics or statistics course.

Summer Enrollment

Students entering with fewer than 60 credit hours are required to enroll in a minimum of 9 credit hours in the summer as required by the Florida Board of Education. These hours can be spread out over the course of earning the FIU degree.

Civic Literacy

Civic Literacy Requirement

The Florida Civic Literacy Competency is a statewide requirement that applies to undergraduate degree seeking students initially entering a Florida State University System (SUS) or Florida College System (FCS) institution in the 2018-19 academic year and thereafter. In accordance with Florida Statute 1007.25 and Board of Governors Regulation 8.006 Civic Literacy Competency students must demonstrate competency in civic literacy to graduate from a Florida public postsecondary institution.

Students must meet the requirement based on when they first entered a Florida public college or university after graduating High School. Please refer to the Florida Civic Literacy Competency Requirement website for detailed information. Students may also view the Board of Governors 2025 Guidance document.

For information on registering for the Florida Civic Literacy Exam, please visit the Civic Literacy website.

Related FIU Policy

FIU Policy # 340.065 Award of Initial Baccalaureate Degree

Foreign Language Requirement (FLENT/FLEX)

The Foreign Language Requirement, Foreign Language Entrance, Foreign Language Exit (FLENT/FLEX) is a state-mandated graduation requirement for undergraduate degrees. To meet this requirement, students must either “enter” (FLENT) FIU with a foreign language, or “exit” (FLEX) with a foreign language. The foreign language is a language other than English, including American Sign Language.

In addition to the University Core Curriculum requirements, any student admitted without a foreign language competency as required in F.S 1007.25 General Education courses; Common Prerequisites; Other Degree Requirements and F.S. 1007.262 Foreign Language Competence; Equivalence Determinations must successfully complete the foreign language competency prior to graduation.

Students are encouraged to meet with their assigned academic advisor to discuss the options to complete this requirement, which may include two years of foreign language in high school, credit-by-exam, transfer credit, and foreign credentials Test of English as a Foreign Language [TOEFL], or completion of high school equivalent outside of the U.S. in a language other than English). A previously earned baccalaureate degree from an accredited institution may also satisfy this requirement.

Related FIU Policy

FIU Policy 340.065 Award of Initial Baccalaureate Degree

Change of Degree or Major

The process for changing a degree program varies based on the program, academic level, number of credits earned, and whether the student is undergraduate or graduate. Students should follow the guidelines outlined on the Change of Program/Plan website website and summarized below according to their student category.

Students applying for or receiving Financial Aid should be aware that Federal and State aid can only be awarded for course(s) that are required for a student’s declared major, second major, minor, second bachelors, and/or Honors requirements, until the time that the requirements for the primary major are completed. Students planning to change their major, should reach out to the advising center in the college of the intended new plan. All plans must be reflected on the student record prior to the start of the term to be considered for financial aid eligibility for that term. For more information on this requirement please visit the following websites: Financial Aid and Finances section of the catalog, Financial Aid Course Auditor, and corresponding Finances website.

Undergraduate

An admitted undergraduate student may change majors, provided they meet the requirements of the new program, established success markers, and is approved by the new program’s academic unit. A request to change majors must be initiated by an academic advisor through the electronic Change of Program/Plan process.

Once students have earned 90 credit hours, any changes to student degree programs, majors, minors, or academic tracks that extend the time required to complete degrees or result in excess credit hours will require approval from the College Dean and the Vice President of Academic Affairs or assigned designees.

Graduate

Only fully admitted and enrolled students who are in good academic standing may apply to change a graduate degree program without applying for re-admission and paying the application fee for the new program. All other students must submit a request through the Graduate Admissions process. Change of Graduate Degree Program forms are evaluated as new applications by the department into which the student wishes to transfer. A Change of Graduate Degree Program form and instructions are available on the University Graduate School website.

Related FIU Policy

FIU Policy 380.004 Change of Graduate Degree Program

Master's Degree

Course Requirements

Programs leading to a master's degree will normally require at least 30 credit hours of non-thesis course work. Master's programs normally include courses at the 5000 and 6000 levels. No course counted toward a student's undergraduate degree may be included in that student's Masters degree program except in approved combined or 4+1 bachelor's-master's degree programs.

Thesis Requirements

All FIU faculty who are members of the thesis committee must be members of the Graduate Faculty. Thesis committees must have a minimum a chairperson and two additional members. All committee appointments must be approved by the Dean of the University Graduate School.

A thesis proposal must be approved by the University Graduate School at least one semester prior to the date of graduation.

Once an approved thesis proposal is on file, continuous registration for at least 1 thesis credit hour each semester (including the summer term) is required until the thesis requirement is fulfilled. During the academic year, international students must maintain full-time enrollment.

Time Limits

For the Master of Fine Arts degree, all requirements, including the successful defense of a thesis where required, must be completed within eight years of first enrollment in the master's program. For all other master's degree programs, all requirements, including the successful defense of a thesis where required, must be completed within six years of first enrollment in the master's program. No courses used in a program of study that are beyond these time limits at the time of graduation can be used toward degree completion, with the exception of credits that are part of an earned graduate degree.

Graduation Requirements

The University will confer the master's degree when the student has met the following conditions:

- Earned an overall average GPA of 3.0 in all courses in the graduate degree program.
- Recommended by the faculty of the College or the School.
- If applicable, submission of the final approved thesis via ETD.
- Certified by the Academic Dean of the College or the School that all requirements for the degree being sought have been completed.

Master's students who have been recommended for the degree by the faculty of the School or College may participate in the commencement ceremonies.

Related FIU Policy

FIU Policy 380.065 University Master's Program Requirements

FIU Policy 380.008 Continuous Enrollment Requirement for Dissertation and Thesis Students

Doctoral Degree

Course Requirements

Programs leading to a doctoral degree require at least 75 credit hours beyond the bachelor's degree. These shall include a minimum of:

- 30 credit hours earned in academic courses which are part of the doctoral program. Doctoral programs normally include courses at the 6000 level and above. Courses at the 5000 level may be included in a doctoral degree program in appropriate cases.
- A student may enroll for dissertation credits after completing all coursework, passing the candidacy examination, and being advanced to candidacy. Dissertation credits may not be taken before advancement to candidacy.

Dissertation Requirements

Candidacy

A student is admitted to candidacy upon successfully completing all required coursework, language requirements, and qualifying examinations and passing the candidacy examination. Some programs require students to defend the dissertation proposal as part of candidacy. The student's written request for candidacy must be approved by his or her major professor and forwarded to the program director, the unit dean, and then to the Dean of the University Graduate School.

Each candidacy examination must be prepared and graded by a committee consisting of a minimum of three faculty of the academic unit offering the degree. Admission to candidacy requires that a majority of the committee members agree that the student passed the examination. A candidacy examination may not be passed conditionally. A "Pass" on the examination cannot be made contingent upon other factors, such as the completion of additional coursework or the preparation of extra research projects.

Students must be informed in writing of the results of their performance on the examinations within 30 days of the examination date. If the student fails the candidacy examination the committee, at its discretion, may provide for reexamination at a mutually satisfactory time but no more than one year from the original date of the examination. Passing the candidacy examination is requisite to continuing in the graduate program. Students who fail the candidacy examination twice will be dismissed from the doctoral program.

After a doctoral student is admitted to candidacy, continuous registration for at least 3 dissertation credit hours each semester (including the summer term) is required until the dissertation requirement is fulfilled. During the academic year, international students must maintain full-time enrollment.

Dissertation Committee

Dissertation committees must have a minimum of four members: At least two of the four must be from the academic department offering the degree, at least one must be from the another academic department at FIU, the fourth member may be: 1) from the academic department offering the degree, 2) from another academic department at FIU, 3) from outside the institution who has been reviewed and approved by the academic department and the University Graduate School. All FIU faculty who are members of the dissertation committee must be members of the Graduate Faculty. All committee appointments are made by the Dean of the University Graduate School.

Dissertation Proposal

A dissertation proposal must be approved by the University Graduate School at least three semesters prior to the date of graduation.

Time Limits

All requirements, including the successful defense of a dissertation, must be completed within nine years of first enrollment in the doctoral program. No courses used in a program of study that are beyond these time limits at the time of graduation can be used toward degree completion, with the exception of credits that are part of an earned graduate degree.

Graduation Requirements

The University will confer the doctoral degree when the student has met the following conditions:

- Earned an overall average GPA of 3.0 in all courses in the graduate degree program;
- Completed and defended satisfactorily a doctoral dissertation;
- Recommended by the faculty of the College or the School;
- Submission of the final approved dissertation via ETD; and
- Certified by the Academic Dean of the College or the School that all requirements of the degree being sought have been completed.

Doctoral students must have completed all requirements for the degree to participate in the commencement ceremonies.

Graduate Certificate Programs

A certificate program is a combination of courses with a common base or interest selected from one or more academic disciplines and so arranged as to form an area of academic concentration. Students must apply and be admitted into the certificate program through the Office of Admissions based on the recommendation of the academic department.

Graduate Certificates require 15 to 18 hours of graduate credit. At least six of the hours must be in core courses taken by all individuals obtaining a given Graduate Certificate.

All the credits earned in a Graduate Certificate Program may be used in a master's degree program, provided the student is admitted to the master's degree program prior to the completion of no more than 12 Graduate Certificate credits. Non-Degree-Seeking student policies apply to Graduate Certificate students.

In all cases, the Graduate Program Director will evaluate whether the Graduate Certificate credits are acceptable in that particular graduate program.

Related FIU Policy

FIU Policy 380.045 Graduate Certificate Programs

FIU Policy 1360.025 Classification of Students

Associate in Arts Degree

Students who satisfactorily complete 60 semester hours of acceptable college work with a cumulative GPA of 2.0 or higher, fulfill the University Core Curriculum/General Education requirements, the Civic Literacy requirement, the foreign language (FLENT/FLEX) requirement, and complete at least 20 credit hours in residence at the University may apply for the Associate in Arts degree.

Students who transfer in 41 or more credits are not eligible for the degree. The Associate in Arts degree will not be awarded to a student who completed the bachelor's degree or applied for graduation. A notation will appear on the student's transcript, but no diploma will be issued.

There must be no incomplete grades for the AA to be awarded.

At the time of degree award, students cannot be on suspension or expulsion, have any outstanding sanctions, or have any pending/open case(s) under review by the Office of Civil Rights (OCR) or the Office of Student Conduct and Academic Integrity (SCAI). For more information visit the Associate in Arts Degree website.

Related FIU Policy

FIU Policy 340.060 Award of Associate in Arts Degree

Bachelor's Degree

The University will confer the bachelor's degree when all degree requirements have been met. To initiate the degree certification process, students should apply for graduation through the MyFIU Self-Service portal (my.fiu.edu) by the deadline in the academic calendar. If an application for graduation is denied, it will be automatically reevaluated each semester until all degree requirements have been met. This will continue until such time that the student has been inactive for three consecutive terms. The University may initiate the degree certification process without an application if it has been determined that all degree requirements have been met.

The University will confer the bachelor's degree when the following conditions have been met:

1. Recommended by the faculty of the college or the school awarding the degree.

2. Certified by the dean of the college or the school that all requirements of the degree being sought have been completed.

3. Completion of a minimum of 120 semester hours in acceptable coursework.

4. Completion of the last 30 credit hours at the University. Exceptions (normally not to exceed six hours) may be made in advance by the appropriate dean. In no case may the number of credits awarded by FIU be fewer than 25% of the total number of credits required for the degree program.

5. Completion of the University Core Curriculum or State General Education Requirements.

6. Earned a cumulative grade point average (GPA) of 2.0 or higher at the University (or the minimum cumulative GPA requirement for a specific program if applicable).

7. Earned the grade requirements for major, University Core Curriculum Courses, and course sequences established by the appropriate College or School.

8. Completion of 8-10 sequential credits in one foreign language (American Sign Language is acceptable). Students who entered the University with a foreign language requirement deficiency, regardless of whether the student holds an A.A. degree, must complete 8-10 sequential credits in one foreign language. Transfer credit acceptable to the requirement and exemption by College Level Examination Program (CLEP) examination is available. Students who have successfully completed two years of high school foreign language study in one language are considered to have met the requirement. Students who can

demonstrate continuous enrollment in a degree program at an SUS institution or FCS institution since Fall 1989 (continuous enrollment is defined by the state to be the completion of at least one course per year) will be exempt from the foreign language requirement. Also exempt are students holding an A.A. degree from an FCS or SUS institution prior to Fall 1989.

9. Completion of the civic literacy requirement.

a) Baccalaureate degree-seeking students initially entering a Florida College System (FCS) or Florida State University System institution (SUS) in the 2018-19 academic year through the 2020-21 academic year must demonstrate competency in civic literacy through one of the following options prior to graduation:

i) Successfully passing POS X041 American Government or AMH X020 Introductory Survey Since 1877.

ii) Achieving the standard score on one of the following assessments: U.S. Citizenship and Immigration Services Naturalization Test – Civics (U.S. History and Government) with supplemental questions (score of 60 or higher); Advanced Placement Government and Politics: United States (score of 3 or higher). Advanced Placement United States History (score of 4 or higher); CLEP American Government (score of 50 or higher).

b) Baccalaureate degree-seeking students initially entering an FCS or SUS institution in the 2021-22 academic year and thereafter must demonstrate competency in civic literacy by completing (i) and (ii) prior to graduation:

i) Successfully passing POS x041 American Government or AMH x020 Introductory Survey Since 1877.

ii) Achieving the standard score on one of the following assessments: U.S. Citizenship and Immigration Services Naturalization Test – Civics (U.S. History and Government) with supplemental questions or the Florida Civic Literacy Examination (score of 60 or higher).

iii) Students may meet both of the competency requirements in (b)(i) and (b)(ii) through accelerated mechanisms as specified below.

(1) Students may meet the course requirement in (b)(i) by successfully passing dual enrollment versions of POS x041 American Government or AMH x020 Introductory Survey Since 1877; Cambridge AICE History, U.S. History, c.1840-1990 (A-Level) (score of A-E); CLEP History of the United States II History of the United States II: 1865 to Present (score of 50 or higher), or I.B. History: History of America (score of 5-7).

(2) Students may meet both the course requirement in (b)(i) and the exam requirement in (b)(ii) by achieving a passing score on the Advanced Placement Government and Politics: United States (score of 3 or higher); Advanced Placement United States History (score of 4 or higher), or CLEP American Government (score of 50 or higher).

10. Completion of summer enrollment requirement. All students entering FIU or any university within the SUS with fewer than 60 credit hours are required to earn at least nine credit hours prior to graduation by attending one or more summer terms at a university in the SUS.

11. There must be no incomplete grades for the degree to be awarded.

12. At the time of degree award, student cannot be on suspension or expulsion, have any outstanding sanctions, or have any pending/open case(s) under review by the Office of Civil Rights Compliance and Accessibility (CRCA) or the Office of Student Conduct and Academic Integrity (SCAI).

Two Bachelor’s Degrees

Two bachelor’s degrees may be awarded simultaneously when the following conditions have been met:

- Requirements for two majors have been completed as certified by the appropriate academic units.
- A minimum of 30 appropriate semester hours in addition to the requirements of one degree has been earned.

A graduate from an accredited four-year institution who applies for admission to work towards a second bachelor's degree must meet the requirements of the major department, which shall include (but is not limited to) a minimum of 30 semester hours of coursework.

Two Majors for a Bachelor's Degree

Students may request to carry a second major and work to fulfill the requirements of both concurrently. Students requesting the addition of a second major should work closely with their advisors to plan the courses to avoid extending their time to graduation. Upon successful completion of the requirements of two majors, the student will be awarded one degree and a notation denoting both majors will be entered on the transcript. A request for a second major must be initiated by an academic advisor through the electronic Change of Program Plan process and approved by the appropriate academic unit.

Once students have earned 90 credit hours, any changes to student degree programs, majors, minors, or academic tracks that extend the time required to complete degrees or result in excess credit hours will require approval from the College Dean.

Related FIU Policies

FIU Policy 340.125 Degrees Granted to Undergraduate Students

FIU Policy 340.065 Award of Initial Baccalaureate Degree

FIU Policy 340.075 Award of Second Baccalaureate Degree

FIU Policy 340.295 Two Majors Requirements

Minor and Certificate Programs

Students requesting the addition of a minor or certificate should work closely with their advisors to plan the courses to avoid extending their time to graduation. Students who have completed an approved minor as part of their bachelor's degree program will have this notation as a part of the degree comment on their transcript. A request to declare a minor must be initiated by an academic advisor through the electronic Change of Program Plan process and approved by the appropriate academic unit.

Students who have completed an approved certificate program will have an appropriate notation placed on their transcript. For students currently active in a degree-seeking program, a request to declare a certificate must be initiated by an academic advisor through the electronic Change of Program Plan process and approved by the appropriate academic unit. Once students have earned 90 credit hours, any changes to student degree programs, majors, minors, or academic tracks that extend the time required to complete degrees or result in excess credit hours will require approval from the College Dean.

For students who have already completed a degree program and who wish to pursue a standalone certificate, a request for admission into an undergraduate certificate via an Undergraduate Certificate Application must be completed and turned into the appropriate academic unit for approval. This form can be downloaded from the Forms section at onestop.fiu.edu.

Minor Program

A minor program is an arrangement of courses that enables students to develop some degree of expertise in one area of study. A minor is awarded upon completion of the bachelor's degree but is not interdisciplinary in nature.

Certificate Program

A certificate program is a combination of courses with a common base or interest selected from one or more academic disciplines and so arranged as to form an area of academic concentration. Types of certificates awarded: academic and professional.

Related FIU Policy

FIU Policy 380.103 Authorization, Modification, and Assessment of Certificate Programs that Award Academic Credit

Degree Progression and Mandatory Degree Checks

Using various platforms, the University provides degree seeking students with academic plans based on the program requirements for their majors. The colleges designed these plans to support students as they pursue timely graduation.

Additionally, FIU utilizes Course Auditor, a specialized tool within the Panther Degree Audit system. This tool supports compliance with federal financial aid regulations by ensuring that only courses meeting the requirements of a student's declared program (major, second major, minor, dual degree, or honors) are considered.

Undergraduate Degrees and Programs

Many undergraduate programs have explicitly stated academic progress requirements (Panther Success Markers and Milestones) specific to freshmen, sophomore, junior, and senior years; these requirements may include minimum GPA criteria, maximum course attempts, courses which must be completed before students reach specified class levels, etc. Through various strategies, which may include outreach efforts and registration holds, the University will ensure that students who do not meet these progress requirements seek support from their academic advisors to develop plans that result in timely graduation. The University requires undergraduate degree seeking students to meet with their academic advisors before the end of the terms in which they will earn 45 and 90 cumulative credit hours to conduct preliminary degree checks and develop plans for students to complete unfulfilled degree requirements.

Once students and advisors complete the 90-credit-hour check, any changes to student degree programs, majors, minors, or academic tracks that may have an impact on time required to complete degrees or counts of excess credit hours will require approval from the College Dean and the Vice President of Academic Affairs or assigned designees.

Please note that students who have declared dual degree or double majors as part of their program plans and do not complete the requirements of these program plans will not be eligible for refunds of excess credit hour surcharges associated with incomplete portions of their program plans.

For more information, students should check their Panther Degree Audit and periodically meet with their assigned academic advisor.

Graduate Degrees and Programs

Graduate students should always confer with their Graduate Program Director and Panther Degree Audit. For more information, please refer to the University Graduate School Students webpage.

Excess Credit Surcharge

In 2009 the Florida Legislature enacted Florida Statute 1009.286 and Board of Governors Regulation 7.003 Fees, Fines and Penalties to encourage undergraduate students who enroll in a Florida State University System institution to complete their baccalaureate degree program in an efficient and timely manner. This requires a student to pay an excess hour surcharge for each credit hour in excess of the number of credit hours required to complete the undergraduate degree program in which they are enrolled. The Excess Credit Hour threshold and the Excess Credit Hour Surcharges (ECS) vary based on the student's first-time-in-college admission term while maintaining continuous enrollment.

If a student changes degree programs, the excess credit hour threshold must be adjusted only if the number of credit hours required to complete the new degree program exceeds that of the original degree program. Note that courses in which students receive grades of DR, W, WA, WI, IN, NC, and F will count towards excess credit calculations.

The excess credit hours are calculated based on the chart below:

Semester You First Entered a College or University after High School	Excess Credit Hour Threshold	Surcharge Percentage of Tuition Rate
Prior to Fall 2009	Not applicable	Not applicable
Fall 2009 – Summer 2011	120% of Program Requirements	50% of Tuition Rate
Fall 2011 – Summer 2012	115% of Program Requirements	100% of Tuition Rate
Fall 2012 - Spring 2019	110% of Program Requirements	100% of Tuition Rate
Summer 2019 or Thereafter	120% of Program Requirements	100% of Tuition Rate

FIU has developed an excess credit counter for students to review their progress. It is important that students communicate with their academic advisor in order to stay on track towards graduation and to avoid excess credit surcharges that may have financial repercussions.

Petition to Remove Credits from Excess Credit Counter

FIU has an established process for students to petition courses that may be excluded from the excess credit counter. Students should carefully review their excess credit counter, which is available in the MYFIU portal, and meet with their advisor to review their academic record and verify if any exclusions may be applied.

Additional information regarding excess credits, related surcharges, how to petition, and other frequently asked questions can be found at the FIU website on Excess Credit Hour Surcharge.

FIU-1101 Tuition Fees Schedule

Financial Aid & Finances

Federal and State Need-Based Aid

Federal and State aid can only be awarded for courses that are required for a student's declared major, second major, minor, second bachelors, and/or Honors requirements, until the time that the requirements for the primary major are completed. Students will no longer be eligible for federal or state aid once they have completed the requirements for their primary major. No federal or state aid will be awarded for courses satisfying requirements for a certificate, unless the course also satisfies a requirement for a different eligible program.

Students pursuing a second bachelor's after receiving their first bachelor's degree may be eligible for federal loans. Students must re-apply to the institution and new program and be classified as pursuing a second bachelor's degree. Students should contact the Financial Aid Office for further information.

Bright Futures

Bright Futures can be awarded up to 120 attempted credits, for up to five years from high school graduation, or until the time that the student has completed the requirements for their declared program of study (major, second major, minor, second bachelors, and/or Honors requirements), whichever comes first.

Institutional Aid

Institutional merit scholarships are awarded for up to 120 attempted credits or 4 years, whichever comes first, towards the completion of the first undergraduate degree. If the undergraduate major requires more than 120 credits, the scholarship will cover the total required credits. To maintain the scholarship, students must meet the renewal criteria by the end of each academic year. Renewal criteria are listed on the Office of Scholarship's website: Policies & Renewal | FIU Office of Scholarships.

For students in a 4+1 program, the merit scholarship covers a total of 120 attempted credits, 4 years, or until the student transitions to Graduate status, whichever comes first. Once the student is classified as a Graduate student in our system, they will no longer be eligible for the undergraduate merit award. The scholarship does not cover second majors, degrees, minors, or certificates unless they are completed within the 120 attempted credit limit, while in undergraduate status.

Appeals

Upon completion of the program of study, students may appeal to extend their graduation for up to one semester. Approved extensions will not result in an extension of need-based aid eligibility. Merit aid eligibility is subject to review and approval by the Office of Scholarships, including a review of academic performance, academic standing, attempted credits, and term limits.

For more information on Financial Aid and requirements visit the Finances website.

Dropping and Adding Courses

Students may add, drop, or swap courses without incurring financial liability and without it appearing on their permanent academic record during the Drop/Add period (refer to the Academic Calendar for dates). If a student drops a course that has been paid, and the drop is within the Drop/Add period, the Student Financials Office will generate a refund or use the credit to pay other balances owed to the University.

Late Drops

Courses officially dropped after the Drop/Add period and through the last day to drop for the term (check the Academic Calendar for specific dates), are recorded on the student's transcript with a grade of 'DR/W' (dropped). The student is financially liable for all courses dropped after Drop/Add period ends. Before withdrawing from the institution (i.e., dropping all courses with DR/W grades), financial aid students should refer to the Maintaining Aid website for information. Non-attendance or non-payment will not constitute a drop.

Petition to Drop/Withdraw

The petition process provides students with a method to request a removal of grade and course or replacement of grade with a DR/W grade due to documented extenuating circumstances. Extenuating circumstances are those determined to be exceptional and beyond the control of the student and based on the Florida Board of Governors Regulation 7.002 (10 & 11).

Petitions will be considered only when the extenuating circumstance(s) occurred during the same academic term in which the courses under petition were taken. Petitions for removal of grade and course must be submitted no later than six months after the end of the term in which the courses were taken. Petition requests received later than six months after the end of the term in which the courses were taken will only be considered for DR/W grades. Students cannot petition to both remove course(s)

and replace grades with DR/W grades in the same term; only one option is allowed per term. Refer to the Academic Calendar for the appropriate deadlines. Petitions to remove with a refund or drop/withdraw (DR-W grades) courses completed with a passing grade will not be considered.

A student may submit a petition for an exception to an enrollment deadline for a late drop by submitting a completed petition form to OneStop. A drop after the deadline will be approved only in the following exceptional circumstances:

- Death of a student or immediate family member (parent, spouse, child, sibling, or grandparents). Death certificate and documentation establishing relationship are required.
- Call to active military service. Copy of orders required.
- Illness of student of such severity or duration to preclude completion of courses. Confirmation by a physician required.

Petitions may take 6-8 weeks for review and processing due to additional consultation which may be needed from other departments such as, but not limited to: Student Health Services, Veteran & Military Affairs, Financial Aid/Scholarships, International Students, or Athletics. For further information please refer to the website for Student Petitions.

Classification of Students

The University classifies students as degree-seeking and non-degree-seeking students.

Degree-Seeking Students

Degree-seeking students are those who have been admitted to a degree program but have not completed the requirements for the degree. Degree-seeking students are classified by class levels based on the number of credit hours earned:

- **Freshmen:** Students who have earned fewer than 30 semester hours.
- **Sophomores:** Students who have earned at least 30 semester hours but fewer than 60 semester hours.
- **Juniors:** Students who have earned at least 60 semester hours but fewer than 90 semester hours.
- **Seniors:** Students who have earned 90 or more semester hours but who have not earned a baccalaureate degree.
- **Beginning Graduate:** A graduate student who has been formally admitted to a graduate degree program, is enrolled in a master's program, and is not an advanced graduate student.
- **Advanced Graduate:** A graduate student who has been formally admitted to a recognized doctoral or post-master's degree program.

Non-Degree-Seeking Students

Non-degree-seeking students may be either affiliated with a college or school or unaffiliated in their status. Unaffiliated students are limited to taking a total of 15 undergraduate or 12 graduate credits at the University. Affiliated students must be approved by the appropriate college or school and must meet its specific requirements. Graduate affiliated students must also be approved by the University Graduate School.

The following apply to non-degree seeking students:

- All non-degree seeking students must complete the online application; and Florida residency declaration if qualified under Florida Statute 1009.21, Florida Board of Governors Regulation 7.005 Residency for Tuition Purposes, and FIU Regulation 1302 - Florida Residency Status for Tuition Purposes.
- A $30.00 non-refundable application fee (U.S. dollars) made payable to Florida International University (FIU)
- Students are not required to meet the general admission requirements and are not officially admitted as regular students. Enrollment as a non-degree seeking student does not imply a right for future admission as a regular, degree-seeking student. Credit earned will not be counted toward a degree at the University unless such students subsequently apply for regular admission and are accepted as degree seeking students. Graduate credits must meet time limit and grade of no less than a “B”.
- Registration is permitted on a space-available basis. Non-degree seeking students may not register during the official registration period for degree-seeking students. Non-degree seeking students are allowed to register two business days prior to the beginning of the term.
- No more than 15 undergraduate credit hours earned as a non-degree seeking student may be counted toward an undergraduate degree (12 graduate credits toward graduate degree, 15-18 if part of a graduate certificate). The appropriate dean must approve the acceptance of such credit. Credits earned as part of high school dual enrollment are excluded from the 15-credit undergraduate count.
- International students are not permitted to enroll as non-degree seeking students unless certain conditions apply. International students should refer to FIU Policy 1360.025 Classification of Students for specific information or contact the Office of International Student and Scholar Services.

Affiliated Students

Students applying for affiliated status as non-degree seeking students must be approved by the appropriate academic dean and, in the case of a graduate student, the University Graduate School in accordance with criteria approved by that College or School’s Faculty Curriculum Committee. Non-Degree Seeking student policies apply to Affiliated Students. Visit the Forms website for the undergraduate student form and the graduate student form.

Transient Students

This category includes FIU degree-seeing students who wish to take courses at another State University System or Florida College System institution, as well as undergraduates who are actively pursuing a degree at another Florida public institution and plan to take courses at FIU.

Students attending Florida public institutions must submit a transient student application through FloridaShines.org. For additional information and instructions visit FIU's Transient student page.

Those enrolled at a Florida private or out-of-state college or university must apply as a non-degree seeking student through FIU's application portal.

Certificate Students

This category includes students who have been accepted into a specific certificate program by the academic department responsible for that program. Certificate programs are subject to all University policies, regulations, and procedures, and must meet all required admissions criteria for the certificate.

FIU Regulation 1302 - Florida Residency Status for Tuition Purposes.

Continuous Enrollment

Re-admission to the University

Florida International University defines continuous enrollment as enrollment in the University without a non-enrollment period of three or more consecutive semesters, including summer terms. Credits earned at other institutions during any semester, while not registered at FIU, will not constitute continuous enrollment at FIU. Students who break continuous enrollment must apply for re-admission to FIU and are subject to all admission requirements and criteria at the time of re-admission and, in most cases, must pay another application fee. Students who break continuous enrollment are also subject to the program requirements published in the catalog for the academic year in which they are re-admitted.

Dissertation and Thesis Student Continuous Enrollment Requirements

Refer to FIU Policy 308.008 Continuous Enrollment Requirement for Dissertation and Thesis Students for additional information.

Tuition Rate Requirements

For purposes of the Tuition Differential fee, the Graduate fees, and the Law fees, “continuous enrollment” means the student has not been absent from the University for two (2) or more consecutive terms (excluding summer terms and military withdrawals).

Related FIU Regulation and Policies

FIU 1101 Tuition Fees Schedule

FIU Policy 340.230 Re-Admission

FIU Policy 308.008 Continuous Enrollment Requirement for Dissertation and Thesis Students

Enrollment Certification and Status

The Office of the Registrar is responsible for certification of students’ enrollment. Enrollment certifications cannot be processed if the student has a financial liability. Enrollment certifications for a current semester can only be done after the drop/add period ends. Enrollment certifications may be obtained through the MyFIU Self-Service portal (my.fiu.edu). For more information about enrollment certifications, please visit the OneStop website.

Enrollment status is based on the number of credit hours attempted during a semester. Any drops or withdrawals after the add/drop deadline will result in a change in enrollment status. Audited credits do not count towards enrollment status. Academic loads for financial aid purposes are based on Federal regulations and may be different than these enrollment status definitions.

Undergraduate

Enrollment status is based on the number of credit hours attempted during a semester:

Status	Number of Credits
Full time	12 or more
Half time	Between 6 and 11
Less than half time	5 or fewer

Graduate

Status	Number of Credits: Fall and Spring Semesters	Number of Credits: Summer Semesters
Full time	9 or more	6
Half time	Between 5 and 8	–
Less than half time	4 or fewer	–

Doctoral students who have reached candidacy or master's students who have completed all requirements except for the thesis and have an approved thesis proposal on file in the University Graduate School, are considered full-time when registered for three credits per term.

Enrollment status is for continuous enrollment for the semester in which the student is registered. Reduction of course load may change the student's status.

Additional Enrollment Status Information for Students Receiving Veteran and Military Benefits

Rate of Pursuit & VA Payments (Undergraduate)

Training Status	**Fall & Spring**
Rate of Pursuit	*(16-week Term)*
Full time	12 Credits

Academic Transcripts

The transcript is the complete student record of courses taken at the University, in addition to the number of transfer credits accepted. Once FIU awards a degree to a student, the student's academic history associated with the degree cannot be changed.

The GPA is calculated for all courses taken at the University after Fall 1975. Once a baccalaureate, master's, or doctorate degree is earned, the GPA calculation starts again. After the completion of an undergraduate degree at FIU and upon admission to a graduate degree, the GPA calculation must and will be re-started. The GPA for students who have completed an undergraduate or graduate degree at FIU and return to pursue an additional degree within the same academic level, i.e., undergraduate to undergraduate or graduate to graduate, will be reset. To trigger this reset process, the student's advisor, academic department and/or college must contact the Office of the University Registrar by emailing OneStop@fiu.edu and requesting a GPA reset.

Transcripts must be requested online from the Transcripts webpage. Students may view their unofficial transcripts or order official transcripts. The University charges a $10.00 fee per transcript. In accordance with Florida Statute 1009.26 (17a), FIU students who are active-duty military, honorably discharged veterans of the United States Armed Forces, or spouses and/or dependents may be eligible for a transcript fee waiver. Please refer to the View or Order Transcripts webpage for further information.

Co-Curricular and Experiential Learning Transcript (CCELT)

The Co-Curricular and Experiential Learning Transcript (CCELT) is a comprehensive record of student participation in structured learning activities and achievements outside of the classroom or experiential learning activities that occur within the classroom but are not documented on the academic transcript while enrolled at Florida International University (FIU). The CCELT is arranged into ten categories that represent co-curricular and experiential learning activities available to students at FIU. The established categories and definitions are adapted from the State University System-wide definitions for experiential learning. The CCELT includes elements of experiential learning that are the cornerstone of the FIU experience. Showcasing these activities and the resulting career readiness skills will be of great value to students as they apply to post-baccalaureate programs, scholarships, or the workforce.

Students that have activities included in a CCELT will have this transcript available to view through their MYFIU portal under unofficial transcripts. When ordering an official academic transcript, students will have the CCELT added (free of charge) as part of the request. For more information, please visit the CCELT transcript webpage.

Immunization

As a prerequisite to registration, FIU requires all students to comply with the State University System of Florida Board of Governors Regulation 6.007 regarding immunization regulations. ALL students MUST submit the Immunization Documentation Form 4 weeks prior to registration to release any holds that may prevent them from registering.

Measles, Mumps, Rubella

All students born after December 31, 1956, must present documented proof of immunity to measles (Rubeola) and German measles (Rubella).

Acceptable proof of immunity consists of submitting one of the following:

a. Proof of two (2) vaccinations (doses) of MMR (Measles/Mumps/Rubella) received at least 28 days apart or two separate doses of Measles and one Rubella

- Vaccinations must have been received after your first birthday
- Vaccinations must have been received in 1969 or later

b. Proof of immunity by way of a blood test lab result (Positive Measles and Rubella Titer)

c. A written statement from a physician (MD or DO ONLY) documenting a diagnosis of measles (Rubeola). Must include date of diagnosis, be signed by the physician and be on his/her official stationery. This is acceptable for measles only and does not apply to Rubella.

Exemptions

Students will be exempt from the pre-registration immunization requirement for measles, mumps, and rubella, only if they meet any one of the following three criteria:

a. Students born before January 1, 1957.

b. Medical Exemption: To claim a medical exemption, the student must submit the Personal Physician Immunization Waiver form signed and stamped by their personal physician.

c. Religious Exemption: For details on how to claim religious exemption, please contact the Health Compliance unit at 305-348-2688.

To prevent delays in the ability to register for classes, all documents requesting medical or religious exemptions must be received by the Student Health Services at least four weeks prior to registration.

Temporary Deferments are accepted for the following conditions:

a. Documented pregnancy or fertility treatment

b. Documentation of breastfeeding

c. Documented illness

Deferment status requests must be submitted to the Health Compliance unit at least four weeks prior to registration and the request must be signed by an MD/DO physician, nurse practitioner, or registered nurse and be on their official stationery or utilizing the Personal Physician Immunization Waiver form.

Meningitis and Hepatitis B

All students must present documented proof of vaccination/immunity to meningococcal meningitis and hepatitis B.

Acceptable proof of immunity consists of:

a. Proof of one dose of Meningococcal Meningitis ACWY vaccine (taken at 11 years or older) and a total of three doses of hepatitis B vaccines

b. Proof of immunity by way of a blood test lab result (applicable to hepatitis B only)

c. A written statement from a physician (MD or DO only) documenting a diagnosis of hepatitis B. Must include date of diagnosis, be signed by the physician and be on their official stationery. This is acceptable for hepatitis B only and does not apply to meningococcal meningitis.

Exemptions

Students declining to receive vaccination for meningitis and/or hepatitis B must present a signed waiver of liability acknowledging that they have received and read information pertaining to the disease and, despite knowledge of the risks, have decided to waive receiving the vaccine. These waivers can be accepted and viewed on my.fiu.edu under the "Student Tools" and "Student Health" tabs. NOTE: A parent or legal guardian must sign the waiver for any minor under the age of 18 and provide a valid photo ID for verification.

Acceptable Forms of Documentation

The following documents are acceptable proof of immunity, provided that the dates are acceptable, and the documents are signed and stamped by the healthcare provider:

- FIU Immunization Documentation Form
- Health Department Records
- Childhood Immunization Records
- School Immunization Records
- Military Immunization Records
- Documentation of having the disease during his or her lifetime (ONLY applies to Measles [Rubeola] and Mumps)
- Laboratory test results demonstrating immunity to the disease
    - Measles (Rubeola) positive IgG titer required
    - Rubella positive IgG titer required
    - Hepatitis B positive AB antibody surface titer required
    - **Meningitis lab test is NOT valid and WILL NOT be accepted**

Can't Find Your Immunization Documents?

If the student cannot locate immunization records and is confident they have taken the vaccines, they can submit a positive lab test against both the Measles and Rubella and/or Hepatitis B. The student also has the option to take the required vaccines again with their personal physician, at a local health department or at the FIU Student Health Clinics.

Where can I get immunized?

MMR, meningitis, and hepatitis B vaccines are available for a nominal fee at the FIU Student Health Clinics on both the Modesto A. Maidique Campus and Biscayne Bay Campus. To schedule an appointment for a pre-matriculation vaccine, please call 305-348-8385. Any student under the age of 18 must present a Consent For Treatment of a Minor form signed by their parent/legal guardian with an attached copy of the parent/legal guardian valid photo ID.

Where do I submit my records?

Please submit documents via *email* to **immune@fiu.edu** or by *fax* to (305) 348-3336.

Related FIU Regulation

FIU-402 Admission to the University

Withdrawal from the University

A currently registered student can withdraw from the University according to the withdrawal deadlines as listed in the official Academic Calendar. Non-attendance or non-payment will not constitute a withdrawal.

The transcript of a student who drops all classes during the drop/add period will contain no record of enrollment and no tuition or fees will be assessed. If the tuition has already been paid, a refund will be generated by the Student Financials Office and processed accordingly. A refund for 25% of the tuition and associated fees assessed, adjusted for waivers, will be issued if official withdrawal from the university occurs after the end of drop/add period and prior to the end of the fourth week of classes in a 16-week session, or as designated by the university for shorter sessions.

Visit the Dropping or Withdrawing website for information and process for withdrawal.

The transcript of a student who officially withdraws from all classes after the Drop/Add period and before the end of the last day to drop for the term will reflect a 'WI' for each course.

Academic Support

Advising Support

Undergraduate academic advising at FIU empowers students to gain and expand their knowledge and pursue opportunities to achieve academic, personal, and professional goals.

As advocates for student learning and success, academic advisors partner with students to promote their holistic development, identify academic and career resources, and encourage meaningful engagement, while educating students on degree requirements to support their persistence and timely graduation.

Graduate students receive academic advising from faculty in their respective academic departments. Each program has a Graduate Director who can be a resource for students.

Other Advising Resources

- Global First Year: Through this joint collaboration with Shorelight, international students are provided with exclusive admissions services, academic and language support, and career growth opportunities.
- Honors College: Honors College students are encouraged to meet with an Honors advisor at least once per academic year, to navigate Honors requirements and maximize the Honors College experience.
- International Student and Scholar Services: This office provides international students with support in navigating government regulations and acclimating to a new environment and culture.
- Office of Veteran and Military Affairs: This office provides services and programs that support military-affiliated students.

- Student Athlete Academic Center: At the Student Athlete Academic Center, student-athletes receive customized support in achieving academic success.
- Transfer and Transition Services: This office supports transfer students by evaluating transfer courses, developing transfer-friendly practices, and connecting transfer students with their peers.

Learning Support

- College Access Programs: These programs support students from historically under-represented groups and special populations; the office connects students with services and tools to help them succeed academically, maintain financial aid eligibility, and graduate on time.
- College Life Coaching: Through coaching, students receive one-on-one support in achieving academic and personal goals.
- Dean of Students: The Dean of Students identifies and addresses student concerns, and assists students in identifying appropriate campus resources for support.
- Disability Resource Center: This office offers one-on-one consultations for students with disabilities, providing guidance and support throughout the college experience.
- Financial Wellness Program: This program offers a variety of services and resources for improving financial wellness knowledge and skills.
- Ombudsperson: The Ombudsperson provides assistance to students who have encountered problems or conflicts within the university.
- Mastery Math Lab: Three labs across campuses help students improve their understanding of course content in specific math and statistics courses.
- Pre-College Programs: These year-round and specialized summer programs offer academic enrichment to enhance the academic performance of K-12 students.
- Testing: The Center for Testing and Career Certification offers numerous exams for undergraduate and graduate students at FIU and the local south Florida community.
- Tutoring: A variety of tutoring services are available through the Center for Academic Success, Student Support Services (SSS), Center for Excellence in Writing, Student Athlete Academic Center, and Engineering & Computer Science Tutoring.

Technology Support

- AskIT: This website provides support for IT-related issues, such as those concerning FIU email, FIU account and login, password, two-factor authentication.
- Assistive Technology Software: This software is offered through the Disability Resource Center.
- Canvas Support: This website provides a hub for Canvas support and resources.

- Computer labs: This website provides information about computer labs available for currently enrolled students. Computer labs are also located in the Wolfe University Center in WUC 224 and the Graham Center in GC 1202.
- FIU Panther TECH: Panther TECH offers free software downloads for currently enrolled students; sells computers, tablets, software, and accessories; and provides computer repairs and upgrades.
- Library Device Checkout: Through the FIU Libraries, students have loan access to laptops, WIFI hotspots, and other devices and chargers.

Financial Aid & Finances

Federal and State Need-Based Aid

Federal and State aid can only be awarded for courses that are required for a student's declared major, second major, minor, second bachelors, and/or Honors requirements, until the time that the requirements for the primary major are completed. Students will no longer be eligible for federal or state aid once they have completed the requirements for their primary major. No federal or state aid will be awarded for courses satisfying requirements for a certificate, unless the course also satisfies a requirement for a different eligible program.

Students pursuing a second bachelor's after receiving their first bachelor's degree may be eligible for federal loans. Students must re-apply to the institution and new program and be classified as pursuing a second bachelor's degree. Students should contact the Financial Aid Office for further information.

Bright Futures

Bright Futures can be awarded up to 120 attempted credits, for up to five years from high school graduation, or until the time that the student has completed the requirements for their declared program of study (major, second major, minor, second bachelors, and/or Honors requirements), whichever comes first.

Institutional Aid

Institutional merit scholarships are awarded for up to 120 attempted credits or 4 years, whichever comes first, towards the completion of the first undergraduate degree. If the undergraduate major requires more than 120 credits, the scholarship will cover the total required credits. To maintain the scholarship, students must meet the renewal criteria by the end of each academic year. Renewal criteria are listed on the Office of Scholarship's website: Policies & Renewal | FIU Office of Scholarships.

For students in a 4+1 program, the merit scholarship covers a total of 120 attempted credits, 4 years, or until the student transitions to Graduate status, whichever comes first. Once the student is classified as a Graduate student in our system, they will no longer be eligible for the undergraduate merit award. The scholarship does not cover second majors, degrees, minors, or certificates unless they are completed within the 120 attempted credit limit, while in undergraduate status.

Appeals

Upon completion of the program of study, students may appeal to extend their graduation for up to one semester. Approved extensions will not result in an extension of need-based aid eligibility. Merit aid eligibility is subject to review and approval by the Office of Scholarships, including a review of academic performance, academic standing, attempted credits, and term limits.

For more information on Financial Aid and requirements visit the Finances website.

Involvement, Engagement & Leadership

- Athletics: FIU supports Division I athletic teams and student-athletes as they compete in world-class facilities.

- Career and Talent Development: This office prepares students for careers by developing employable skills through workshops, internships, career coaching, and special events.
- Center for Leadership and Service: This office provides students with developmental and experiential opportunities that foster leadership, action, and community engagement.
- Centers for Student Engagement: The Centers for Student Engagement provide students with opportunities to promote intercultural competency and attain a greater understanding of the individual and collective elements of FIU's diverse student body.
- First-Generation Initiatives: These initiatives include a compilation of services, programs, and news to promote the success of students who are the first in their families to pursue a 4-year bachelor's degree.
- Handshake: This platform allows students to search for internships and jobs.
- Honors College: The Honors College offers a unique academic and social experience that is compatible with all majors, transcends disciplines, and encourages students to become lifelong learners.
- Housing and Residential Experience: Through Housing and Residential Experience, students are given residential opportunities for leadership and engagement.
- Mentoring Programs: Mentors can be integral to students' academic successes, providing them with wisdom, technical knowledge, assistance, support, empathy, and respect during (and sometimes after) the college career.
- Office of Micro-credentials: This office facilitates bite-sized educational experiences designed to prepare all learners with critical skills for the 21st century.
- Panther Camp: This event provides incoming FIU students with the opportunity to transition to FIU by building relationships with other FIU students, fostering school spirit, cultivating future student leaders, and helping students learn about FIU's traditions and unique culture.
- Start-Up FIU: This is a university-wide innovation hub that fosters and develops entrepreneurship and innovation to help students, researchers, and community connect, contribute to, and thrive in today's fast-changing world.
- Study Away Experiences are offered through the National Student Exchange and the Education Abroad office.
- Student Government Association: The Student Government Association represents the interests of FIU students, seeking to act in students' best interests concerning academic, extracurricular, and social issues.
- Student Media: FIU's student media comprises PantherNow (the student-edited newspaper) and The Roar (WRGP) (the student-run radio station).
- Student Organizations: Student organizations comprise clubs, Greek life, and the Multi-Faith Council.

Accounting/CBADM Department

The School of Accounting offers undergraduate- and graduate-level programs and courses in accounting. The school seeks to provide students with the excellent accounting education required become successful business professionals, business leaders, and valued members of society. Through its graduate-level programs, the school also prepares students for advancement in the accounting profession.

The school's faculty serve the academic community through scholarly research, colloquia, and the training of future accounting educators. Faculty also promote opportunities for professional development, lifelong learning, and networking for alumni and accounting professionals in the local, national, and global community.

To explore all of the school's curricular offerings, click the "Programs" and "Courses" tabs above.

Adam Smith Center for Economic Freedom Department

The Adam Smith Center for Economic Freedom, established by State Statue, is positioned to develop and implement undergraduate and graduate certificates and degree programs to meet the needs of the rapidly changing workforce by building upon our unique demographics and geographical location.

The academic programs will prepare and inspire students to become ethical and responsible leaders working across different fields and careers to advance economic and individual freedom and human prosperity at the local, state, national, and international levels, with a special emphasis on Latin America and the Caribbean.

For further details of the Center's activities, please visit freedom.fiu.edu.

African and African Diaspora Studies/SIPA Department

African and African Diaspora Studies (AADS) offers undergraduate- and graduate-level programs and courses in the study of the peoples of continental Africa and of communities of the African diaspora throughout the world. The program is organized around a robust interdisciplinary curriculum, cutting-edge research agendas, and active outreach. AADS hosts interdisciplinary conferences, colloquia, roundtables, symposia, and lectures throughout the year where internationally and nationally recognized scholars and public figures discuss a variety of issues related to continental Africa, the United States, and the African diaspora.

As part of the Steven J. Green School of International and Public Affairs, AADS faculty scholarship contributes to the school's eight strategic research themes: Migration, Diaspora, and Transient Communities; Poverty, Health, and Global Inequalities; Economic Development, Sustainability, and Environment; Religion, Society, and Interfaith Engagement; Nationalism, Identity, and Language; Human Rights and Democratization; Security, Foreign Policy, and Governance; and Historical Inquiry, Memory, and Reconciliation.

Architecture/CARTA Department

The Department of Architecture offers graduate-level programs and courses in architecture, including the accredited Master of Architecture, the advanced post-professional Master of Arts in Design, and the post-professional Doctor of Design. The department also offers a study abroad opportunity in Genoa, Italy. These curricular offerings serve a diverse student body with a variety of academic backgrounds, experiences, and interests by creating an open atmosphere of inquiry and exchange that engages the varied cultural and academic experiences of faculty and students.

The departmental faculty present architecture as a reflective and conceptually based discipline that celebrates the power of innovation and experimentation. Faculty reflect the diverse areas of knowledge that play a critical role in the making of the built environment and in the establishment of successful design practices. The South Florida region provides limitless possibilities for exploring historic architecture and urbanism, as well as contemporary works by many of the world's leading architects. At the same time, the challenges of rapid growth and urban development in Miami and the region have created an ideal environment for the study of these issues.

To explore all of the department's curricular offerings, click the "Programs" and "Courses" tabs above.

Art & Art History/CARTA Department

The Department of Art + Art History at Florida International University offers undergraduate degrees in fine art, digital arts, art history, and art education, as well as graduate programs in art education (MS and MAT) and the Master of Fine Arts (MFA) in Visual Arts. The department prepares artists, designers, scholars, and educators to lead and contribute to the creative industries, cultural institutions, and educational systems shaping visual culture locally and globally.

Programs integrate rigorous studio practice, historical inquiry, and research-driven creative and scholarly inquiry. Students begin with a foundations curriculum that builds skills in visual thinking, material exploration, and critical analysis before advancing into specialized study. Studio programs emphasize technically accomplished and conceptually ambitious work that engages contemporary ideas, emerging technologies, and cultural contexts, while art history courses provide global historical and theoretical frameworks for understanding visual culture across time and place. Art education programs prepare future K–12 teachers to bring creative inquiry and current artistic practices into schools and surrounding communities. Across all areas, the department advances innovation, experiential learning, and community-engaged practice in support of FIU's commitment to student success, research excellence, and cultural impact.

The department is accredited by the National Association of Schools of Art and Design (NASAD).

To explore all of the department's curricular offerings, click the "Programs" and "Courses" tabs above.

Asian Studies/SIPA Department

The Asian Studies unit offers undergraduate- and graduate-level programs and courses. These curricular offerings equip students with a wide understanding of the challenges inherent in today's global business environment and politics. Asian Studies degrees prepare students with the skills and knowledge to remain competitive in today's international environment. Students develop behavioral and cultural sensitivity and knowledge, acquire critical language skills, and foster awareness of current affairs in Asia. Students also have access to local/national internship opportunities, study abroad offerings, and semester exchange programs at the undergraduate level.

As part of the Steven J. Green School of International and Public Affairs, Asian Studies faculty scholarship contributes to the school's eight strategic research themes: Migration, Diaspora, and Transient Communities; Poverty, Health, and Global Inequalities; Economic Development, Sustainability, and Environment; Religion, Society, and Interfaith Engagement; Nationalism, Identity, and Language; Human Rights and Democratization; Security, Foreign Policy, and Governance; and Historical Inquiry, Memory, and Reconciliation.

To explore all curricular offerings, click the “Programs” and “Courses” tabs above.

Department Website

Programs

ASNGB:CFI - Undergraduate Certificate in Asian Globalization and Latin America
ASNGL:CFI - Graduate Certificate in Asian Globalization
ASNST:BA - Bachelor of Arts in Asian Studies
ASNST:CFI - Graduate Certificate in Asian Studies
ASNST:MA - Master of Arts in Asian Studies
ASNSTD:CFI - Undergraduate Certificate in Asian Studies
CHINS:CFI - Undergraduate Certificate in Chinese Studies
JPNST:CFI - Undergraduate Certificate in Japanese Studies
JPNSTG:CFI - Graduate Certificate in Japanese Studies
KORSTU:CFI - Undergraduate Certificate in Korean Studies
SEAS:CFI - Undergraduate Certificate in South and Southeast Asia Area Studies
XASNST:MN - Minor in Asian Studies

Courses

ASN3016 - China Then and Now
ASN3125 - Intro to Spirituality of Japan
ASN3143 - Corporate Culture of China
ASN3153 - Topics in Korean Culture
ASN3154 - Traditional and Modern Korea
ASN3200 - Asia Through Films
ASN3202 - Japanese Anime and Manga
ASN3210 - K-Pop and J-Pop Culture
ASN3215 - Cultural Approaches to Japanese Video Games
ASN3329 - Women in Asian Society
ASN3403 - Zen and the Art of Tea Ceremony
ASN3410 - Introduction to East Asia
ASN3414 - Pop Culture of East Asia
ASN3503 - Exploring East Asia: Virtual Reality Travel
ASN3931 - Special Topics in Asian Studies
ASN4111 - Japan and The New East
ASN4212 - Asian Studies Seminar
ASN4217 - Japanese Spirits, Ghosts, Monsters (Yokai)
ASN4390 - Modern Asia
ASN4404 - Zen and the Art of the Tea Ceremony II
ASN4510 - Dynamics Of Asia
ASN4810 - East Asian Classics to Cool Writings in Translation
ASN4911 - Independent Research in Asian Studies
ASN4913 - Research in Japanese Studies
ASN4941 - Internship in Asian Studies

ASN4970 - Honors Thesis
ASN5050 - Methods in Asian Studies
ASN5130 - Zen and the Arts
ASN5131 - Zen and the Arts II
ASN5149 - Topics in Modern China
ASN5213 - Asian Studies Colloquium
ASN5315 - Topics in Modern Asia
ASN5431 - Studies of Women in East Asia
ASN5815 - Studies of East Asian Texts
ASN5910 - Independent Research in Asian Studies
ASN5932 - Special Topics in Asian Studies
ASN6912 - Master's Essay in Asian Studies
ASN6930 - Seminar in Asian Studies
ASN6940 - Internship in Asian Studies
ASN6972 - Master's Thesis
FLE5855 - Pedagogical Methods for Chinese Language

Athletic Training/CNHS Department

The Department of Athletic Training offers graduate-level programs and courses in athletic training. The department promotes interprofessional collaboration across disciplines, prepares graduates for patient-centered clinical practice and leadership, advances the profession through innovative and emerging approaches, and engages with communities and partners around the world. The department incorporates the college's Simulation Teaching and Research Center (STAR) and additional resources throughout the curriculum to provide extensive real-world educational opportunities.

Faculty service, scholarship, and research activities focus on advancing clinical practice, professional leadership, and applied inquiry that improve healthcare outcomes and athletic training education.

To explore all of the department's curricular offerings, click the "Programs" and "Courses" tabs above.

Department Website

Programs

ATHLTR:MS - Master of Science in Athletic Training
ATHTR:DAT - Doctor of Athletic Training

Courses

ATR5105C - Principles of Athletic Training with Lab
ATR5115C - Management of Medical Emergencies
ATR5217C - Clinical Evaluation and Diagnosis in Athletic Training I
ATR5218C - Clinical Evaluation and Diagnosis in Athletic Training II
ATR5219C - Clinical Evaluation and Diagnosis in Athletic Training III
ATR5305C - Therapeutic Interventions in Athletic Training I
ATR5316C - Therapeutic Interventions in Athletic Training II
ATR5435 - Disease and Disabilities in the Physically Active
ATR5517 - Administration and Professionalism in Athletic Training
ATR5805 - Clinical Education Seminar in Athletic Training
ATR5815L - Clinical Education I
ATR5825L - Clinical Education II
ATR5835L - Clinical Education III

ATR5845L - Clinical Education IV
ATR6207 - Preventative Interventions in Athletic Training
ATR6425 - Pharmacology and Diagnostic Imaging in Athletic Training
ATR6507 - Entrepreneurial Leadership in Athletic Training
ATR6518 - Healthcare Informatics in Athletic Training
ATR6526 - Quality Improvement Strategies in Athletic Training
ATR6527 - Community Health and Prevention Strategies in Athletic Training
ATR6546 - Successful Business Strategies in Athletic Training
ATR6547 - Financial Planning for Athletic Training
ATR6548 - Athletic Training Consulting
ATR6555 - Academic Leadership in Athletic Training
ATR6556 - Curricular Planning & Development in Athletic Training
ATR6557 - Navigating Academia in Athletic Training
ATR6558 - Teaching & Learning Strategies in Athletic Training
ATR6620 - Research and Evidence-Based Practice in Athletic Training I
ATR6621 - Research and Evidence-Based Practice in Athletic Training II
ATR6855L - Clinical Education V
ATR6906 - Independent Study/Thesis in Athletic Training
ATR6935 - Contemporary Issues in Athletic Training
ATR7606 - Epidemiology and Health Surveillance in Athletic Training
ATR7619 - Using Research for Evidence-based Clinical Practice in Athletic Training
ATR7630 - DAT Applied Scholarship I
ATR7631 - DAT Applied Scholarship II
ATR7632 - DAT Applied Scholarship III
ATR7633 - DAT Applied Research IV
ATR7634 - DAT Applied Research V
ATR7806 - DAT Capstone Project
ATR7955 - Athletic Training Globalization

Biological Sciences/CASE Department

The Department of Biological Sciences offers strong programs and courses in the sciences at the undergraduate and graduate levels. At the undergraduate level, the department offers programs in these disciplines: biological sciences, biology, and marine science. The graduate program in Biological Sciences at FIU trains scholars at both the master's- and PhD-levels to meet current and future, local, national, and global scientific needs. National and international students, with the mentoring of their advisors, produce and publish cutting edge research relevant to Florida's future, including research in environmental, biomedical, and health-related issues.

Faculty boast a range of expertise and research skills, directing students through participation in laboratory and applied research in these areas: behavior, biogeosciences, biology education, botany, cellular and molecular biology, ecology, ethnobotany, evolutionary biology, marine biology, microbiology, physiology, and zoology.

To explore all of the department's curricular offerings, click the "Programs" and "Courses" tabs above.

Department Website

Programs

BIOL:BA - Bachelor of Arts in Biological Sciences
BIOL:BS - Bachelor of Science in Biological Sciences
BIOL:MS - Master of Science in Biology
BIOL:PHD - Doctor of Philosophy in Biology

BMFRSC:CFI - Graduate Certificate in Biomolecular Biology with Forensic Emphasis
MRNBIO:BS - Bachelor of Science in Marine Biology
XBIOL:MN - Minor in Biology
XMRNBIO:MN - Minor in Marine Biology

Courses

BCH3033 - General Biochemistry
BCH3033L - General Biochemistry
BCH3034 - Cellular Chemistry
BCH4910L - Undergraduate Research in Biochemistry
BCH6133C - Workshop in DNA Sequencing
BOT1010 - Introduction to Plants
BOT1010L - Introduction to Plants Lab
BOT3014 - Botany
BOT3014L - Botany Lab
BOT3154 - Local Flora
BOT3154L - Local Flora Lab
BOT3353 - Morphology of Vascular Plants
BOT3353L - Morphology of Vascular Plants Lab
BOT3663 - Tropical Botany
BOT3810 - Economic Botany
BOT4402 - Marine Botany
BOT4402L - Marine Botany Lab
BOT4404C - Phycology
BOT4404L - Phycology Lab
BOT4503 - Plant Physiology
BOT4503L - Plant Physiology Lab
BOT4601 - General Plant Ecology
BOT4601L - General Plant Ecology Lab
BOT4684 - Taxonomy Of Tropical Plants
BOT4684L - Taxonomy of Tropical Plants Lab
BOT5602 - The Functional Ecology of Tropical Plants
BOT5602L - The Functional Ecology of Tropical Plants Lab
BOT5648 - Workshop on Aquatic Plants
BOT5725C - Plant Systematics
BOT5727 - Plant Genetics
BOT5728 - Plant Molecular Systematics
BOT5728L - Plant Molecular Systematics Laboratory
BOT5852 - Medical Botany
BOT5924 - Workshop in Tropical Plant Families
BOT6926C - Workshop in Plant Nutrient Analysis
BOT6935 - Advanced Topics in Botany
BSC - Wildlife Conservation Training Program - Workshop 1
BSC - Wildlife Conservation Training Program - Workshop 2
BSC2010 - General Biology I
BSC2010L - General Biology I Lab
BSC2011 - General Biology II: Diversity of Life, Organismal Structure and Function
BSC2011L - General Biology Lab II
BSC2023 - Human Biology
BSC2023L - Human Biology Lab

BSC2077 - Career Planning; How To Make The Most Of Your Biology Degree
BSC2085 - Anatomy and Physiology I
BSC2085L - Anatomy and Physiology I Lab
BSC2086 - Anatomy and Physiology II
BSC2086L - Anatomy and Physiology II Lab
BSC2917 - CAChE Discovery 1: Research in Aquatic Ecosystems
BSC2921 - QBIC Journal Club I
BSC2922 - QBIC Journal Club II
BSC3400 - Wildlife Conservation, Forensic and Crime Science
BSC3441L - Phage Genomics Lab
BSC3456L - Python for Biologists Lab
BSC3466L - Make Your Mutant
BSC3812 - Biology Teacher Examination Preparation
BSC3814 - Research in Peer-led Biology learning
BSC3848 - Junior Seminar in Biology: Evidence, Communication, and Careers
BSC3910 - Research Methods in Biological Sciences
BSC3915 - Student Research Lab I
BSC3923 - QBIC Ecology Journal Club
BSC3924 - QBIC Genetics Journal Club
BSC3930 - CAChE Discovery 2: Professional Pathways in Aquatic and Environmental Science
BSC3941 - Biological Sciences Internship
BSC4205 - Topics in Organismal Diversity
BSC4303 - Biogeography
BSC4304 - Environments of the Past
BSC4363 - Biodiversity in the Caribbean Basin
BSC4401 - Principles of Forensic Biology
BSC4401L - Principles of Forensic Biology Lab
BSC4422 - Biotechnology: Applications in Industry, Agriculture and Medicine
BSC4422L - Biotechnology Laboratory
BSC4434 - Bioinformatics for Biologists
BSC4441L - SEA-GENES
BSC4443 - Functional Genomics and Proteomics
BSC4450L - Computational Biology Lab of Emerging Infectious Disease
BSC4473C - Introduction to Scientific Diving
BSC4480 - Introduction to Veterinary Medicolegal and Live Animal Forensic Investigations
BSC4481 - Introduction to Veterinary Medicolegal Death Investigations
BSC4482 - Forensic and Legal Aspects of Animal Cruelty Investigations
BSC4914 - Student Research Lab II
BSC4915L - Honors Research
BSC4925 - QBIC Cell Biology Journal Club
BSC4926 - QBIC Evolution Journal Club
BSC4927 - QBIC Science Cafe
BSC4931 - Senior Seminar
BSC4934 - Topics in Biology
BSC4944 - Forensic Biology Internship
BSC4970 - Honors Thesis
BSC5302 - Ecosystems of the Past
BSC5406 - Forensic Biology
BSC5446 - Advanced Functional Genomics and Proteomics
BSC5459 - Advanced Bioinformatics for Biologists

BSC5485 - Forensic and Veterinary Medicolegal Investigations
BSC5486 - Advanced Topics in Veterinary Medicolegal Investigations
BSC5487 - Advanced Forensic and Legal Aspects of Animal Cruelty
BSC5893C - Workshop: Intermediate R for Biologists
BSC5927 - Workshop: Introductory R for Biologists
BSC5931 - Thesis Proposal Seminar
BSC5935 - Topics In Biology
BSC5936 - Glaser Seminar: The Biology of Tomorrow
BSC5945 - Supervised Teaching in Biology
BSC5975 - Thesis Defense Seminar
BSC6314 - Workshop: DNA Instrumentation and Analysis
BSC6457 - Introduction to Biological Research
BSC6913 - Student Research Lab
BSC6920 - Workshop: Small Research Vessel Operations
BSC6925C - Workshop: Non-Human DNA Profiling and Analysis
BSC6926 - Workshop in Biology
BSC6928 - Workshop on Multivariate Ecological Data (a Primer on PRIMER)
BSC6936 - Topics In Biology
BSC6946 - Graduate Biology Internship
BSC6950 - Writing, Publishing, and Communicating Peer-Reviewed Papers in Biological Sciences
BSC6971 - Master's Thesis
BSC7961 - Dissertation Proposal Seminar
BSC7980 - Ph.D. Dissertation
BSC7982 - Dissertation Defense Seminar
ENY4060 - Entomology
ENY4060L - Entomology Lab
FAS5307 - Advanced Fisheries Science
FAS6358 - Workshop: Fishery Stock Assessment
MCB2000 - Introductory Microbiology
MCB2000L - Introductory Micro Lab
MCB3007 - Living with Microbes
MCB3020 - General Microbiology
MCB3020L - General Microbiology Lab
MCB4022 - Diversity of Microbes
MCB4503 - Virology
MCB4603 - Microbial Ecology
MCB4603L - Microbial Ecology Lab
MCB5116 - Microbial Diversity
MCB5605 - Microbial Ecology
MCB6935 - Advanced Topics in Microbiology
OCB1930 - Marine Biology at FIU
OCB2000 - Introductory Marine Biology
OCB2000L - Introductory Marine Biology Lab
OCB3043 - Marine Biology and Oceanography
OCB3043L - Marine Biology and Oceanography Lab
OCB3075C - Mariculture for Conservation and Restoration
OCB3264 - Coral Reef Biology
OCB4004 - Biological Oceanography at Sea I
OCB4005C - Biological Oceanography at Sea II
OCB4070 - Coastal Marine Conservation

OCB4104C - Field Methods in Marine Ecology
OCB4303 - Biology of Marine Mammals
OCB4633 - Marine Community Ecology
OCB4711 - Fisheries Science
OCB5634 - Marine Ecology
OCB5634L - Marine Ecology Lab
OCB6205 - Coral Reef Ecosystems
OCB6716 - Fisheries Population Dynamics
OCB6927C - Workshop in Scientific Diving
PCB3043 - Ecology
PCB3043L - Ecology Lab
PCB3063 - Genetics
PCB3063L - Genetics Lab
PCB3374 - Tropical Ecology
PCB3660 - Sex, Gender, and Orientation: A Biological Perspective
PCB3702 - Intermediate Human Physiology
PCB3702L - Intermediate Human Physiology Lab
PCB3703 - Human Physiology I
PCB3703L - Human Physiology Lab I
PCB3704 - Human Physiology II
PCB3704L - Human Physiology Lab II
PCB4023 - Cell Biology
PCB4023L - Cell Biology Lab
PCB4133 - Topics in Structure/Development
PCB4232 - The Biology of Acquired Immune Deficiency Syndrome (AIDS)
PCB4233 - Immunology
PCB4234 - Biology of Cancer
PCB4253 - Developmental Biology
PCB4301 - Freshwater Ecology
PCB4401 - Global Change Ecology: How humans changed the face of Earth
PCB4403C - Urban Vector Biology
PCB4414 - Behavioral Ecology
PCB4452 - Introduction to Wetland Ecology and Management
PCB4462C - Introduction to Landscape Ecology with GIS
PCB4467C - Marine Protected Areas
PCB4524 - Molecular Biology
PCB4524L - Molecular Biology Lab
PCB4553 - General Population Genetics
PCB4561 - Epigenetics
PCB4663 - General Human Genetics
PCB4673 - Evolutionary Ecology
PCB4674 - Evolution
PCB4676 - Human Evolution
PCB4717 - Topics in Physiology/Biochemistry
PCB4723 - Animal Physiology
PCB4724 - Comparative Physiology
PCB4776 - Physiological and Behavioral Ecology of Marine Animals
PCB4805 - Endocrinology
PCB4810 - Biology of Stress
PCB4932 - Topics in Ecology

PCB5025L - Molecular Biology Techniques Laboratory
PCB5307 - Limnology
PCB5328 - Spatial and Landscape Ecology
PCB5356L - Tropical Ecology Field Lab
PCB5405 - Biochemical Ecology
PCB5418C - Advanced Marine Protected Areas
PCB5423 - Advanced Ecology: Populations and Communities
PCB5427 - Predator Ecology
PCB5443 - Advanced Ecology: Communities and Ecosystems
PCB5615 - Mol & Organismal Evo
PCB5685 - Population Genetics
PCB6025 - Molecular and Cellular Biology I
PCB6027 - Molecular and Cellular Biology II
PCB6417 - Workshop: Modeling in Behavioral Ecology
PCB6468 - Design and Analysis of Ecological Studies
ZOO3205C - Invertebrate Zoology
ZOO3303 - Vertebrate Zoology
ZOO3303L - Vertebrate Zoology Lab
ZOO3603 - Embryology
ZOO3603L - Embryology Lab

ZOO3753L - Histology Lab
ZOO4234 - General Parasitology
ZOO4234L - General Parasitology Lab
ZOO4407 - Biology, Ecology, and Conservation of Sharks and their relatives
ZOO4454 - Fish Biology
ZOO4462C - Herpetology
ZOO4484 - Primate Biology
ZOO4484L - Primate Biology Lab
ZOO4513 - Animal Behavior
ZOO4513L - Animal Behavior Laboratory
ZOO4733 - Survey of Regional Anatomy
ZOO4743C - Neuroscience
ZOO4744 - Neurobiology
ZOO4781 - Sensory Systems in Neurobiology
ZOO5265L - Biology of Crustaceans Laboratory
ZOO5456 - Ichthyology
ZOO5456L - Ichthyology Lab
ZOO5463C - Advanced Herpetology
ZOO5785 - Advanced Neurobiology
ZOO5895 - Zoo Conservation Biology
ZOO6782 - Advanced Sensory Systems in Neurobiology

Biomedical Engineering/CENGR Department

The Department of Biomedical Engineering offers undergraduate- and graduate-level programs and courses in biomedical engineering. These curricular offerings bridge engineering, science, and medicine, and are designed to provide students with a thorough understanding of the basic laws of science. Academic programs are structured with the aim of stimulating

and developing students' creative and innovative thinking, professional attitudes, economic judgment, and environmental consciousness. Faculty seek to develop students' potentials, preparing them for superior performance as biomedical engineers or for advanced study in engineering, science, business, or medicine.

Faculty research interests include engineered tissue model systems, diagnostic bioimaging and sensor systems, and therapeutic and reparative neurotechnology. The Department's research also connects to the biomedical industry with a focus on patent production.

To explore all of the department's curricular offerings, click the "Programs" and "Courses" tabs above.

Department Website

Programs

BIOMEG:BS - Bachelor of Science in Biomedical Engineering
BIOMEG:MS - Master of Science in Biomedical Engineering
BIOMEG:PHD - Doctor of Philosophy in Biomedical Engineering
XBIOMED:MN - Minor in Biomedical Engineering for Non-Engineering Majors
XBIOMEG:MN - Minor in Biomedical Engineering

Courses

BME - Quantitative Approaches to Cell Signaling in Neural Systems
BME599 - Translational Neurogenetic Engineering
BME1008C - Introduction to Biomedical Engineering
BME1054L - Introduction to Biomedical Engineering Computing
BME2740 - Biomedical Engineering Modeling and Simulation
BME2810 - Introduction to Biomedical Engineering Design
BME3403 - Engineering Analysis of Biological Systems I
BME3404 - Engineering Analysis of Biological Systems II
BME3632 - Biomedical Engineering Transport
BME3721 - Biomedical Engineering Data Evaluation Principles
BME4011 - Clinical Rotations for Biomedical Engineering
BME4050L - Biomedical Engineering Lab I
BME4051L - Biomedical Engineering Lab II
BME4084 - Research Methods and Ethics in BME
BME4100 - Biomaterials Science
BME4211 - Orthopedic Biomechanics
BME4230 - Biomechanics of Cardiovascular Systems
BME4260 - Engineering Hemodynamics
BME4311 - Molecular Engineering
BME4332 - Cell and Tissue Engineering
BME4422 - The Biophysics of Neural Computation
BME4503C - Medical Instrumentation: Application and Design
BME4531 - Medical Imaging
BME4562 - Introduction to Biomedical Optics
BME4776 - Dynamic cell signaling, modeling and analytics
BME4800C - Design of Biomedical Systems and Devices
BME4908 - Senior Design Project
BME4912 - Undergraduate Research in Biomedical Engineering
BME4930 - Undergraduate Seminar
BME4940 - Undergraduate Internship in Biomedical Engineering

BME4949 - Biomedical Engineering Co-op
BME5005 - Applied Biomedical Engineering Principles
BME5036 - Biotran Processes
BME5105 - Biomaterial Science
BME5141L - Introduction to Laboratory Skills and Materials in Prosthetics and Orthotics
BME5200 - Orthopedic Biomechanics
BME5213L - Modern Clinical Evaluation Tools
BME5214L - Orthotic Management of the Lower Limb 1
BME5215L - Prosthetic Management of the Lower Limb 1
BME5218L - Orthotic Management of the Spine
BME5233 - Biomechanics of Cardiovascular Systems
BME5336 - Cell/Tissue Engineering: Theory and Methodology
BME5410 - Biomedical Physiology and Engineering I
BME5411 - Biomedical Physiology and Engineering II
BME5505 - Advanced Medical Imaging
BME5560 - Biomedical Engineering Optics
BME5561 - Geometrical Optics for Biomedical Engineers
BME5566L - Biomedical Optical Laboratory
BME5573 - Nanomedicine
BME5731 - Analysis of Physiological Control Systems
BME5777 - Quantitative Approaches to Cell Signaling in Neural Systems
BME5803 - Biomedical Device Design
BME5804 - Risk Analysis and Management of Biomedical Devices
BME5805 - Regulatory Process for Medical Devices and Drugs
BME5941 - Biomedical Engineering Internship
BME6019 - Clinical Research Experience
BME6265 - Fluid Mechanics Applications in Physiological Systems
BME6266 - Advanced Biofluid Mechanics
BME6335 - Artificial Organs
BME6421 - Electrophysiological Phenomena in Biological Tissues
BME6501 - Applied Biomedical and Diagnostic Measurements
BME6532 - Molecular Imaging
BME6563 - Optical Spectroscopy
BME6564 - Optical Imaging Biomedicine
BME6565 - Quantitative Microscopy and Visualization
BME6645 - Drug Transport Modeling
BME6705 - Nonlinear Systems with Applications to Life Sciences
BME6715 - Mathematical Modeling of Physiological Systems
BME6716 - Mathematical Modeling of Cellular Systems
BME6717 - Computational Analysis and Simulation of Physiological Processes
BME6719 - Finite Element Analysis in Biomedical Design
BME6905 - Independent Studies
BME6907 - BME MS Professional Project
BME6910 - Supervised Research
BME6914 - BME MS Research Project
BME6933 - Workshop in Biomedical Engineering Techniques
BME6936 - Biomed Eng Seminar
BME6970 - Master's Thesis
BME7334C - Cell/Tissue Engineering: Methods and Applications
BME7938 - Doctoral Biomedical Engineering Seminar

BME7980 - Ph.D. Dissertation
EGM3503 - Applied Mechanics

Biostatistics/CPHSW Department

The Department of Biostatistics offers graduate-level courses and Biostatistics concentration as part of the Master of Public Health (MPH) and PhD in Public Health degrees. The department trains students to facilitate the conduct of health and biomedical research by designing sound experiments and studies relevant to human health, and by collecting, managing, analyzing, and interpreting data. Biostatisticians collaborate in the identification and refinement of important research questions, study design and analytical methods and procedures required to obtain reliable answers to these questions. There remains a shortage of professional biostatisticians, and the field provides meaningful and rewarding careers for those interested and able to go down this path.

Biostatics faculty participate in numerous cross-disciplinary research studies, including topics such as tobacco and substance abuse prevention, cancer, HIV infection, obesity, mindfulness, health disparities, and genomics.

To explore the Biostatistics concentration offered through the MPH degree, see the MPH Program Requirements. To explore the Biostatistics concentration offered through the PhD in Public Health, see the PhD in Public Health program requirements.

Department Website

Courses

PHC6052 - Biostatistics I
PHC6055 - Data Management and Epidemiologic Analysis Using SAS/SPSS
PHC6056 - Longitudinal Health Data Analysis
PHC6059 - Survival Data Analysis
PHC6060 - Principles and Approaches to Biostatistical Consulting
PHC6064 - Applied Statistical Methods for Discrete Data
PHC6065 - Public Health Statistics
PHC6067 - Probabilistic Graphical Models
PHC6080 - SAS Computing for the Health Sciences
PHC6084 - Introduction to Bayesian Inference
PHC6090 - Advanced Public Health Statistics
PHC6091 - Biostatistics 2
PHC6099 - R for Applied Biostatistical Methods
PHC6701 - R for Health Data Science
PHC6931 - Special Topics in Biostatistics
PHC7050 - Advanced Biostatistics I
PHC7051 - Advanced Biostatistics II
PHC7054 - Advanced Biostatistics III
PHC7083 - Advanced Bayesian Inference
PHC7719 - Multivariate Methods in Health Sciences Research
PHC7795 - Advanced SAS Computing for Health Sciences
PHC7933 - Seminar in Biostatistics

Center for the Transformation of Teaching Math Department

The Center for the Transformation of Teaching Math identifies, adapts, develops, evaluates, and implements evidence-based instructional practices and related measures in order to advance students' learning of mathematics. The evaluation process serves the dual purposes of providing critical feedback to mathematics instruction and creating mathematics education research products.

This initiative is intended to improve instructional practices in mathematics, generate knowledge about how students learn mathematics, and identify effective practices in the teaching of mathematics.

Courses included in this improvement process are listed in the "Courses" tab above.

Department Website

Chemistry and Biochemistry/CASE Department

The Department of Chemistry and Biochemistry offers undergraduate- and graduate-level programs and courses in the areas of chemistry, biochemistry, and forensic science.

Faculty with a range of research skills direct students through participation in laboratory and applied research in many fields, including traditional areas of organic and inorganic chemistry, as well as environmental chemistry, forensic chemistry, biochemistry.

To explore all of the department's curricular offerings, click the "Programs" and "Courses" tabs above.

CHEM:PHD - Doctor of Philosophy in Chemistry
FRNSC:CFI - Undergraduate Certificate in Forensic Science
FRNSC:MS - Master of Science in Forensic Science
FRNSC:PSM - Professional Science Master in Forensic Science
XCHEM:MN - Minor in Chemistry

Courses

BCH6108 - Biochemical Techniques
BCH6831 - Introduction to Biochemical Research
BCH7930 - Biochemistry Graduate Seminar
CHM1020 - Chemistry and Society
CHM1020L - Chemistry and Society Lab
CHM1025 - Fundamentals of Chemistry
CHM1025L - Fundamentals of Chemistry Lab
CHM1033 - Survey of Chemistry
CHM1033L - Survey of Chemistry Lab

CHM1045 - General Chemistry I
CHM1045L - General Chemistry Lab I
CHM1046 - General Chemistry II
CHM1046L - General Chemistry Lab II
CHM2200 - Survey of Organic Chemistry
CHM2200L - Survey of Organic Chemistry Lab
CHM2210 - Organic Chemistry I
CHM2210L - Organic Chemistry Lab I
CHM2211 - Organic Chemistry II
CHM2211L - Organic Chemistry Lab II
CHM2216 - Organic Chemistry I Recitation
CHM2219 - Organic Chemistry II Recitation
CHM3120 - Introduction to Analytical Chemistry
CHM3120L - Introduction to Analytical Chemistry Lab
CHM3400 - Fundamentals of Physical Chemistry
CHM3400L - Fundamentals of Physical Chemistry Lab
CHM3410 - Physical Chemistry I
CHM3410L - Physical Chemistry Lab I
CHM3411 - Physical Chemistry II
CHM3411L - Physical Chemistry Lab II
CHM3610 - Fundamentals of Inorganic Chemistry
CHM3610L - Inorganic Chemistry Laboratory
CHM3910 - Research Methods in Chemistry
CHM3931 - Cornerstone Seminar in Chemistry and Biochemistry
CHM3945 - Chemical Education Seminar
CHM3949 - Chemistry and Biochemistry Internship
CHM4130 - Instrumental Analysis
CHM4130L - Instrumental Analysis Lab
CHM4220 - Advanced Organic Chemistry
CHM4230L - Structure Determination Lab
CHM4300 - Bio-Organic Chemistry
CHM4304 - Biological Chemistry I
CHM4304L - Biological Chemistry I Lab
CHM4307 - Biological Chemistry II
CHM4307L - Biological Chemistry Lab II
CHM4611 - Advanced Inorganic Chemistry
CHM4611L - Advanced Inorganic Chemistry Lab
CHM4910L - Undergraduate Research in Chemistry
CHM4911L - Undergraduate Research 2
CHM4930 - Senior Seminar
CHM4932 - Special Topics
CHM5138 - Advanced Mass Spectrometry
CHM5150 - Graduate Analytical Methods
CHM5156 - Advanced Chromatography
CHM5165 - Chemometrics and Sampling
CHM5185 - Field Detection Methods for Explosives and Other Threats
CHM5225 - Graduate Organic Chemistry
CHM5236 - Spectroscopic Techniques and Structures Elucidation
CHM5250 - Organic Synthesis
CHM5251 - Organometallic Chemistry

CHM5263 - Physical Organic Chemistry
CHM5280 - Natural Products Chemistry and Biosynthesis
CHM5305 - Graduate Biological Chemistry
CHM5306 - Special Topics in Biological Chemistry
CHM5380 - Special Topics in Organic Chemistry
CHM5423 - Atmospheric Chemistry
CHM5425 - Graduate Physical Chemistry
CHM5426 - Graduate Physical Chemistry II
CHM5450 - Advanced Polymer Chemistry
CHM5517 - Solid State
CHM5540 - Group Theory In Chemistry
CHM5586 - Computational Chemistry
CHM5620 - Graduate Inorganic Chemistry
CHM5650 - Physical Inorganic Chemistry
CHM5681 - Special Topics in Inorganic Chemistry
CHM5765 - Aquatic Chemistry
CHM5812 - Learning Theories: Three-Dimensional Learning
CHM5932 - Special Topics
CHM5934 - Special Topics in Analytical Chemistry
CHM5938 - Special Topics in Physical Chemistry
CHM6036 - Advanced Biochemistry I
CHM6037 - Advanced Biochemistry II (Molecular Genetics)
CHM6088 - Environmental Chemistry of Trace Elements
CHM6157 - Advanced Analytical Chemistry
CHM6167 - Modern Analytical Methods for Surface and Structural Interrogation
CHM6281 - Environmental Organic Chemistry
CHM6340 - Organic Geochemistry
CHM6461 - Statistical Thermodynamics
CHM6480 - Quantum Mechanics
CHM6491 - Applications of Synchrotron and Electron Based Techniques
CHM6802 - Research Ethics
CHM6905 - Independent Study in Chemistry
CHM6910L - Graduate Research in Chemistry
CHM6935 - Graduate Seminar
CHM6936 - Chemistry Colloquium
CHM6940 - Supervised Teaching
CHM6949 - Industrial Internship
CHM6970 - Thesis Research
CHM6971 - Master's Thesis
CHM7910 - Dissertation Research
CHM7980 - PH.D. Dissertation
CHS2500 - Survey of Forensic Science
CHS2500L - Survey of Forensic Science Laboratory
CHS3511C - Forensic Evidence
CHS4100 - Radiochemistry
CHS4100L - Radiochemical Techniques Lab
CHS4430 - Introduction to Chemical Toxicology
CHS4503C - Forensic Science
CHS4533C - Forensic Biochemistry Applications
CHS4591 - Forensic Science Internship

CHS4600 - Marine Chemistry
CHS4710 - Introduction to Three-Dimensional Learning
CHS5110 - Topics in Radiochemistry
CHS5435 - Pharmacology and Toxicology of Drugs
CHS5513 - Quality Systems in Forensic Science
CHS5535 - Forensic Analysis
CHS5535L - Forensic Analysis Lab
CHS5536 - Forensic DNA Chemistry
CHS5538C - Chemistry and Analysis of Drugs
CHS5539 - Forensic Toxicology
CHS5542 - Forensic Chemistry
CHS5545 - Chemistry and Analysis of Explosives
CHS5571 - Artificial Intelligence Driven Forensics
CHS6111 - Advanced Radiochemistry
CHS6946 - Graduate Forensic Internship
OCC5050 - Chemical Oceanography

Civil & Environmental Engineering/CENGR Department

The Department of Civil and Environmental Engineering offers undergraduate- and graduate-level programs and courses in civil engineering and environmental engineering. These curricular offerings emphasize students' technical proficiency, effective communication, responsible citizenship, lifelong learning, and ethical behavior. The department is committed to preparing students to become graduates who will improve the quality of life, meet the needs of industry and government, and contribute to the economic competitiveness of Florida and the nation. Faculty members teach, conduct research, and serve the community through professional development and technology transfer.

Departmental faculty maintain high levels of research and scholarly productivity and are nationally and internationally recognized. Faculty accomplishments include professional journal publications, conference proceedings, edited books, journal reviewers, and editors. Faculty also have leadership roles in several well-established interdisciplinary research units (e.g., the Wall of Wind, Lehman Center for Transportation Research).

To explore all of the department's curricular offerings, click the "Programs" and "Courses" tabs above.

Programs

CIVLEG:BS - Bachelor of Science in Civil Engineering
CIVLEG:MS - Master of Science in Civil Engineering
CIVLEG:PHD - Doctor of Philosophy in Civil Engineering
ENVEG:BS - Bachelor of Science in Environmental Engineering
ENVEG:MS - Master of Science in Environmental Engineering

Courses

CCE4001 - Heavy Construction
CCE4031 - Project Planning for Civil Engineers
CCE5035 - Construction Engineering Management
CCE5036 - Advanced Project Planning for Civil Engineers
CCE5405 - Advanced Heavy Construction Techniques
CEG4011 - Geotechnical Engineering I
CEG4011L - Geotechnical Testing Laboratory

CEG4012 - Geotechnical Engineering II
CEG4126 - Fundamentals of Pavement Design
CEG5065 - Geotechnical Dynamics
CEG6017 - Theoretical Geotechnical Mechanics
CEG6105 - Advanced Foundations Engineering
CES3100 - Structural Analysis
CES3580 - Hurricane Engineering and Global Sustainability
CES4411 - Science and Engineering of Materials for Built Environment
CES4605 - Steel Design
CES4702 - Reinforced Concrete
CES4711 - Introduction to Prestressed Concrete Structures
CES5106 - Advanced Structural Analysis
CES5226 - Wind Effects on Structures
CES5325 - Design of Highway Bridges
CES5327 - Inspection & Maintenance Decision Making for Bridges and Buildings
CES5587 - Topics in Wind Engineering
CES5606 - Advanced Structural Steel Design
CES5715 - Prestressed Concrete Design
CES5751 - Precast Concrete Design
CES5800 - Timber Design
CES6209 - Advanced Structural Dynamics in Civil Engineering
CES6706 - Advanced Reinforced Concrete Design
CGN2095 - Career Orientation, Ethics, and AI in Civil Engineering
CGN2161 - Career Orientation in Civil Engineering
CGN2420 - Computer Tools for Engineers
CGN3300 - Dynamics for Civil Engineering Systems
CGN4011 - AI-enabled Computational Techniques in Civil Engineering
CGN4321 - GIS Applications in Civil and Environmental Engineering
CGN4431 - Introduction to Thunderstorm Downbursts and Their Impacts on Structures
CGN4510 - Sustainable Building Engineering
CGN4802 - Civil Engineering Senior Design Project
CGN4911 - Undergraduate Research Experience
CGN4930 - Special Topics in Civil Engineering
CGN4949 - Co-Op Work Exp
CGN4980 - Civil Engineering Seminar
CGN5320 - GIS Applications in Civil and Environmental Engineering
CGN5407 - Advanced Numerical Methods for Nonlinear and Large Deformation Problems in Civil Engineering
CGN5411 - Applications of Probability and Statistics to the Analysis of Wind Engineering Experimental Data
CGN5432 - Risk and Reliability Applications in Natural Hazards
CGN5435 - Thunderstorm Downbursts and Their Impacts on Structures
CGN5614 - Engineering Decision Making for Sustainable and Resilient Infrastructure
CGN5870 - Corrosion Control in Civil Engineering
CGN5874 - Building Diagnostics
CGN5878 - AI for Structural Health Monitoring
CGN5930 - Special Topics in Civil Engineering
CGN6030 - Research Methods for Civil Engineers
CGN6426 - Advanced Computing in Civil Engineering
CGN6905 - Directed Independent Study
CGN6910 - Supervised Research
CGN6916 - Engineering Project

CGN6930 - Advanced Special Topics in Civil Engineering
CGN6939 - Graduate Seminar
CGN6971 - Thesis
CGN7980 - Ph.D. Dissertation
CWR3201 - Fluid Mechanics
CWR3201L - Fluid Mechanics Laboratory
CWR3540 - Water Resources Engineering
CWR4204 - Hydraulic Engineering
CWR4530 - Modeling Applications in Water Resources Engineering
CWR4620C - Ecohydrological Engineering
CWR5125 - Groundwater Hydrology
CWR5235 - Open Channel Hydraulics
CWR5251 - Environmental Hydraulics
CWR5305 - Surface Hydrology
CWR5535C - Advanced Modeling Applications in Water Resources Engineering
CWR5571 - Urban Hydrology and Green Infrastructure
CWR5635 - Optimization in Water Resources Engineering
CWR5826 - Coastal Hazards Engineering
CWR6126 - Advanced Groundwater Hydrology
CWR6236 - Engineering Sediment Transport
CWR6625C - Ecological Engineering
EGM3520 - Engineering Mechanics of Materials
EGM3520L - Materials Testing
EGM5351 - Finite Elment Method
EGM5421 - Structural Dynamics
EGM5508 - Energy Principles and Variational Methods in Applied Mechanics
EGM6425 - Structural Reliability
EGM6533 - Advanced Mechanics of Materials
EGN1110C - Engineering Drawing
EGN3613 - Engineering Economy
EGN4070 - Engineering for Global Sustainability and Environmental Protection
EGN5439 - Design of Tall Buildings
EGN5455 - Numerical Methods in Engineering
EGS2030 - Ethics and Legal Aspects in Engineering
ENV3001 - Introduction to Environmental Engineering

SUR2101C - Geomatics and Surveying
TTE4102 - Urban Transportation Planning
TTE4201 - Transportation and Traffic Engineering
TTE4202 - Traffic Engineering
TTE4203 - Highway Capacity Analysis
TTE4804 - Geometric Design of Highways
TTE5007 - Transportation Systems in Developing Nations
TTE5100 - Transportation and Growth Management
TTE5205 - Advanced Highway Capacity Analysis
TTE5215 - Fundamentals of Traffic Engineering
TTE5273 - Intelligent Transportation Systems
TTE5315 - Highway Safety Analysis
TTE5607 - Transportation Demand Analysis
TTE5805 - Advanced Geometric Design of Highways
TTE5835 - Pavement Design
TTE6257 - Traffic Control Systems Design

TTE6267 - Traffic Simulation Models
TTE6506 - Mass Transit Planning
TTE6526 - Airport Planning and Design
TTE6528 - Airport Terminal Design and Operations
TTE6605 - Planning and Design of Intermodal Facilities
TTE6650 - Transportation and Land Development
TTE6701 - Light Rail Planning and Design
TTE6755 - Port Planning and Development
TTE6834 - Pavement Maintenance and Rehabilitation

College of Arts, Sciences & Education Department

The College of Arts, Sciences, and Education (CASE) plays a vital role in the intellectual, cultural, and civic life of local, national, and international communities. The college provides an educational foundation that prepares FIU students to be successful and engaged citizens in a global society. The college generates extensive scholarship that yields new knowledge, shapes how one teaches and learns, and contributes to a more complete understanding of the world.

The college offers courses for all students at the university, from those courses taken to fulfill the requirements of the University Core Curriculum, to required and elective courses for students who seek degrees from colleges and schools across the university. Many professional degree programs require courses in specific arts and sciences disciplines; these needs are carefully addressed. The college's mission goes beyond offering introductory and service courses; its students explore the full implications of the arts and sciences disciplines in historical and contemporary society. High-quality undergraduate degree programs educate students in the fundamentals of each discipline. Graduate programs provide in-depth training for excellent students and allow faculty members the opportunity to teach at the frontiers of their fields. Rigorous academic research, scholarship, and creative activity are integral components of faculty activities in all disciplines and are the heart of graduate education.

Characteristically, the liberal arts endeavor is to synthesize. Thus, in addition to traditional degree programs, the college coordinates special areas and interests through a number of certificate and interdisciplinary degree programs.

The college comprises 11 departments and several interdisciplinary programs housed in three schools: the School of Education and Human Development (SEHD); the School of Environment, Arts, and Society (SEAS); and the School of Integrated Science and Humanity (SISH).

College Website

Programs

CSTMR:CFI - Undergraduate Certificate in Coastal and Marine Affairs

Courses

IDS5999 - Graduation Preparation
ISC3941 - STEM Research and Communication Internship
ISC3999 - CASE Internship
ISC6999 - CASE Internship
SMT2044 - Combined STEP 1 & 2: Inquiry-Based Approaches and Lesson Design for Teaching Mathematics and Science
SMT2661 - Step 1: Inquiry Approaches to Teaching Mathematics and Science
SMT2662 - Step 2: Inquiry-Based Lesson Design in Mathematics and Science
SMT3108 - Virtual Learning Assistant Seminar: Evidence-based STEM Instruction
SMT3931 - Learning Assistant Seminar: Evidence-based STEM Instruction
SMT4943 - Learning Assistant Mentor Internship

SMT4944 - Advanced Learning Assistant Internship
SMT4946 - Learning Assistant Internship
SYA6655 - Program Design and Evaluation

College of Business Department

The College of Business (COB) creates enduring educational value for students, for alumni, and for the business, professional, and academic communities it serves:

• For students—whom the college prepares to succeed in a rapidly changing, technology-driven global business environment;

• For alumni—to whom the college provides opportunities for continuing professional development and a legacy that appreciates as its excellence grows;

• For the business and professional communities—to whom the college offers knowledgeable graduates, educational programs, research, and collaborative projects;

• For the academic community—to whom the college brings new knowledge through high-quality research and the development of future scholars.

The college's most noteworthy teaching and research expertise lies in the business areas linking South Florida, Latin America, and the world economy. The college offers undergraduate, graduate, professional education, customized training, and executive education programs to enterprises around the world.

In all of its programs, the college strives to instill in students a profound understanding of the changing nature of international business in an integrated and digital global economy. Curricular offerings ensure that students are well versed in the impact of information technology on how enterprises are organized and managed, and on how products and services are created and marketed. Students develop a solid grasp of business processes, the ability to think critically and to solve problems ethically, and the sense to conduct oneself with integrity and within the context of social and environmental responsibility. The college fosters a commitment to lifelong learning in a dynamic, complex, and competitive world.

College faculty engage in basic and applied research and in instructional development to contribute not only to the general knowledge base in the field of business but also to the ways in which this knowledge is created and shared.

The college boasts a state-of-the-art information technology infrastructure that enables it to provide leading-edge instruction and research, including online course delivery. At the same time, this information technology investment supports the college's ongoing curricular innovation in related fields (e.g., business analytics, cybersecurity, AI, and logistics).

Programs

ESPRTM:CFI - Undergraduate Certificate in Esports Marketing

Courses

GEB4940 - Business Internship
GEB5999 - Graduation Preparation
GEB6999 - CBADM Internship

College of Communication, Architecture + The Arts Department

The College of Communication, Architecture, and the Arts (CARTA) occupies a unique position in South Florida, offering academic programs in the disciplines of art, design, communication, and performance. These curricular offerings are delivered through the departments of Architecture; Art and Art History; Interior Architecture; Landscape Architecture and Environmental and Urban Design; the School of Communication; and the Caplin School of Journalism and Media. The Herbert and Nicole Wertheim School of Music and Performing Arts offers programs in music and theatre.

Instruction in the college is enriched by a distinguished faculty of artists, designers, journalists, and performers who add dimensions of applicable experience, current issues, and ongoing research to the traditional concepts related to the disciplines and professions within the college.

The college promotes exploration, discovery, and innovation among its programs and is strongly committed to interdisciplinary education. Its diverse programs emphasize urban engagement and are informed by current thinking and new technologies. Developing connections with a wide range of programs and resources in the university, the college is dedicated to being engaged as a leader in art, design, communication, and the performing arts in South Florida, neighboring communities, the nation, and internationally.

College Website

Courses

ARC5999 - Graduation Preparation
IDS3999 - CARTA Internship
IDS6999 - CARTA Internship

College of Engineering and Computing Department

The College of Engineering and Computing (CEC) is committed to educating professionals who can serve industry and the community at large in a wide variety of fields. The college also conducts innovative basic and applied research that meets the technical needs of industry and government, improves the quality of life, and contributes to the economic viability of Florida, the United States, and the world.

The college's programs focus on the practical use of scientific, engineering, and technical principles to meet the objectives of industry, business, government, and the public. The college provides each student with the opportunity to develop a high level of technical skills and to obtain an education in preparation for a rewarding career and personal growth.

College faculty are actively engaged with business, industry, and government. Faculty members also participate in a variety of basic and applied research projects in areas such as energy, transportation, solid waste disposal, biomedical devices and instrumentation, computer engineering, artificial intelligence, manufacturing, robotics, telecommunications, microelectronics, structural systems, biotechnology, systems modeling, information technology, environmental sciences and engineering, and image processing engineering education.

XAI:MN - Artificial Intelligence Minor

Courses

EGN3999 - CENGR Internship

EGN5999 - Graduation Preparation
EGN6999 - CENGR Internship
EGS1002 - Engineering Enrichment Lab

College of Law Department

The College of Law serves the citizens of Florida, and particularly those of South Florida, by offering an outstanding, state-of-the-art legal education that leads the nation in bar passage, teaching quality, and experiential offerings. To increase access, the college offers both full-time and part-time programs, featuring courses in both in-person and distance education modalities.

In addition to the Juris Doctor (JD), the college offers a Juris Master (JM), a Master of Laws (LLM), and a Master of Science (MS) in the Law of Technology. The college also offers certificates in the areas of environmental law, intellectual property, and military law.

Through non-credit programming, the Legal Studies Institute (LSI) provides legal assistant education to meet the needs of the community. The LSI provides exceptional legal training and structures its programs to accommodate the needs of working professionals, and strives to develop highly motivated legal professionals who can enhance and elevate both the local and national legal communities.

College Website

Programs

ENVRL:CFI - Graduate Certificate in Environmental and Natural Resources Law
INTPRO:CFI - Graduate Certificate in Intellectual Property
NSCMLT:CFI - Graduate Certificate in National Security and Military Law

Communication Sciences & Disorders/CNHS Department

The Department of Communication Sciences and Disorders offers graduate-level programs and courses focused on cultural and linguistic diversity. These curricular offerings prepare students to meet the needs of multicultural populations with communication disorders. The MS in Speech-Language Pathology coursework emphasizes multilingual/multicultural issues as they apply to language acquisition, as well as assessment and intervention of speech and language disorders in adults and children. Students complete clinical education in a variety of clinical settings in the South Florida area, including hospitals, schools, private practices, and community-based clinics. Faculty service and scholarly and research activity center around treatment applications through clinical applications and applied research on related topics.

SPA6406 - Dual Language Acquisition and Disorders
SPA6410 - Aphasia and Related Disorders
SPA6479 - Communication Disorders and Aging in a Bilingual Society
SPA6505 - Advanced Clinical Practicum
SPA6559 - Augmentative and Alternative Communication
SPA6565 - Dysphagia
SPA6930L - Master's Project
SPA6938 - Topics in Speech Pathology
SPA6971 - Master's Thesis

Communication/CARTA Department

The School of Communication offers undergraduate- and graduate-level programs and courses in the areas of public relations, advertising, applied and strategic communications, and communication arts. These curricular offerings are designed to develop students' skills for effective leadership, critical decision making, and strategic influence through interpersonal and mediated communication. The academic degree programs prepare students for successful careers in organizational communication, advertising, and public relations in diverse communities and a global digital ecosystem. At the graduate-level, programs give students a global perspective in strategic communication, and are prepared to advance in advertising, public relations, and integrated communication careers.

Faculty have varied research interests, including health communication, organizational communication, crisis communication, advertising, and public relations, and their thought leadership cultivates engaging discussions in the classroom and throughout the academic and professional world. Faculty consider advertising and public relations as complementary and overlapping disciplines that apply to all sectors of society including political, organizational, health, science, technology, governmental, corporate, and non-profit, among others.

To explore all of the school's curricular offerings, click the "Programs" and "Courses" tabs above.

Counseling Recreation & School Psychology/CASE Department

The Department of Counseling, Recreation, and School Psychology offers undergraduate- and graduate-level programs and courses for students aspiring to become transformative leaders in a range of organizational settings, such as schools, mental health agencies, rehabilitation facilities, hospitals, athletic centers, and sport organizations. Academic preparation focuses on five key areas: counselor education, rehabilitation and recreational therapy, research design and analysis, school psychology, and sport and recreation management. Additionally, the department provides the core curricula in the psychological foundations of education, research methodology, measurement, and evaluation.

Faculty are recognized as national and international scholars, exemplifying outstanding teaching practices. They are dedicated to maximizing student learning, engaging in the discovery and dissemination of new knowledge, and fostering a creative and innovative spirit among students. Faculty also are committed to taking leadership roles in professional service and community engagement. Community engagement is pivotal to these programs and sponsored research projects, where faculty and students identify and address critical problems confronting communities.

The department's philosophy is grounded in the following principles:

- Student-centered learning
- Evidence-based research
- High expectations
- Collaboration, community, and engagement
- Excellence and continuous improvement
- Ethical and critical thinking

To explore all of the department’s curricular offerings, click the “Programs” and “Courses” tabs above.

Criminal Justice/SIPA Department

As part of the Steven J. Green School of International and Public Affairs, the Department of Criminology and Criminal Justice offers undergraduate and graduate programs and a comprehensive curriculum in crime and justice studies. Recognized nationally and internationally, the department serves as a leading hub for research, scholarship, and education on key issues in the field. Faculty members bring interdisciplinary and global expertise, advancing knowledge on the causes, impacts, prevention, and control of crime and delinquency.

To explore all of the department's curricular offerings, click the "Programs" and "Courses" tabs above.

Dietetics & Nutrition/CPHSW Department

The Department of Dietetics and Nutrition offers undergraduate- and graduate-level programs and courses in the field of dietetics and nutrition. These curricular offerings prepare students to become practitioners and applied researchers in dietetics, food, and nutrition to build a healthier society. At the undergraduate level, the department offers the Didactic Program in Dietetics (DPD), a major in Nutrition Science, and a minor in Nutrition. The department also offers an MS in Dietetics and Nutrition, a Dietetic Internship, a PhD in Dietetics and Nutrition, and a Graduate Certificate in Pediatric Nutrition. Both the DPD and Dietetic Internship have been granted full accreditation by the Accreditation Council for Education in Nutrition and Dietetics of the Academy of Nutrition and Dietetics (ACEND®).

The department engages in community and professional service to foster healthy lifestyles through better nutrition over the life course of various populations. Faculty engage in evidence-based research to advance the profession; to position nutrition in health promotion, disease prevention/treatment, food science/food service; and to integrate food and nutrition services into the mainstream of health, and home and community-based settings. Areas of research include understanding eating behaviors

in various populations; associating diet/nutrition with the microbiome, inflammation, mental health, obesity and other chronic diseases, and HIV; implementing interventions to improve diet, obesity, and other chronic diseases; using artificial intelligence in dietetics; and understanding roles of zinc in autophagy, metal transport, among others.

To explore all of the department's curricular offerings, click the "Programs" and "Courses" tabs above.

Disaster Management/CPHSW Department

The Academy for International Disaster Preparedness offers undergraduate- and graduate-level programs and courses. The academy seeks to establish a professional educational pathway for existing disaster responders and new students exploring the exciting fields of international disaster management, humanitarian relief, emergency preparedness, and homeland security. Disaster Management professionals provide onsite disaster command and control and coordination interface with local, state, federal leaders, including those in the private sector and at non-governmental organizations. Emergency managers are at the forefront of planning for, responding to, and recovering from all type of disasters. Successful emergency managers have necessary institutional knowledge including public safety and homeland security, public health, logistics, administration, law and government, communication and messaging, public education and much more.

The Academy's faculty and instructors are professionals in their fields of expertise and bring extensive experience into the classroom.

To explore all curricular offerings, click the “Programs” and “Courses” tabs above.

PHC4376 - Disaster by Design: Exercise Development for Homeland Security Professionals
PHC4940 - Internship in Disaster Management

Earth & Environment/CASE Department

The Department of Earth and Environment offers undergraduate- and graduate-level programs and courses in the areas of earth science, environmental studies, geosciences, sustainability, and environmental policy and management. The department seeks to be at the forefront of research and education about the dynamic interaction of Earth's systems, the environment, and related societal issues. The academic programs in the department address understanding and stewardship of the Earth. In addition, these programs offer students an understanding of the planet's bounty, covering topics such as water, mineral, energy, and agricultural resources. A third area of curricular emphasis is on environmental issues both natural (e.g., earthquakes, volcanic eruptions, floods) and humanmade (e.g., oil spills, ecosystem degradation, soil erosion).

Faculty research emphasizes a multidisciplinary approach to solving geoscientific and environmental problems, and stresses the importance of field observations complemented by laboratory analysis and numerical modeling.

To explore all of the department's curricular offerings, click the "Programs" and "Courses" tabs above.

Department website

Programs

AGROG:CFI - Undergraduate Certificate in Agroecology
BICOMG:CFI - Undergraduate Certificate in Biodiversity Conservation and Management
BIOCMG:CFI - Graduate Certificate in Biodiversity Conservation and Management
ENVS:CFI - Undergraduate Certificate in Environmental Studies
ENVST:BS - Bachelor of Science in Environmental Studies
ENVST:CFI - Graduate Certificate in Environmental Studies
ENVST:MS - Master of Science in Environmental Studies
EPM:PSM - Professional Science Master in Environmental Policy and Management
ERTHSC:BA - Bachelor of Arts in Earth Science
ERTHSY:PHD - Doctor of Philosophy in Earth Systems Science

GEOGS:CFI - Graduate Certificate in Geographic Information Systems
GEOSC:BS - Bachelor of Science in Geosciences
GEOSC:MS - Master of Science in Geosciences
QENVF:CFI - Graduate Certificate in Quantitative Environmental Finance
SUSENV:BA - Bachelor of Arts in Sustainability and the Environment
WATRE:CFI - Graduate Certificate in Water, Environment, and Development Studies
XENVST:MN - Minor in Environmental Studies
XGEOL:MN - Minor in Geology
XMETEOR:MN - Minor in Meteorology

Courses

AEB4131 - Farm Economics and Management
AGG4055 - Food Security and Food Safety
AGG4941 - Internship in Agriculture
AGR4240 - Modern Crop Production
AGR5241 - Advance Modern Crop Production
AGR6251 - Sustainable Farming Systems
AGR6255 - Ecological Agriculture
ESC1000 - Introduction to Earth Sciences
ESC1000L - Introduction to Earth Sciences Lab
ESC3930 - Topics in Earth Sciences
ESC5706 - Urban Physical Environments and Hazards
EVR1001 - Introduction to Environmental Science
EVR1001L - Introduction to Environmental Science Lab
EVR1017 - Global Environment and Society
EVR2904 - CAChE Discovery 1: Research in Aquatic Ecosystems
EVR3003 - Latin American Environmental Issues
EVR3010 - Energy Flow in Natural and Man-made Systems
EVR3011 - Environmental Resources and Pollution
EVR3013 - Ecology of South Florida
EVR3013L - Ecology of South Florida Lab
EVR3163 - Sustainable Forests
EVR3326 - Sustainability Principles and Practice
EVR3723 - Natural Resource Valuation and Economics
EVR3740 - Critical Thinking in Sustainability
EVR3925 - CAChE Discovery 2: Professional Pathways in Aquatic and Environmental Science
EVR4023 - Coastal Resource Management
EVR4026 - Ecology of Biotic Resources
EVR4112 - Climate Change Policy
EVR4211 - Water Resources
EVR4211L - Water Resources Lab
EVR4272 - Agroecology
EVR4274 - Sustainable Agriculture
EVR4321 - Sustainable Resource Development
EVR4323 - Restoration Ecology
EVR4323L - Restoration Ecology Lab
EVR4352 - U.S. Environmental Policy
EVR4356 - Coastal and Marine Environmental Policy
EVR4401 - Conservation Biology
EVR4410 - Global Perspectives on Water and Environment

EVR4411 - Human Organizations and Ecosystem Management
EVR4415 - Population and Environment Issues
EVR4434 - Sustainable Cities
EVR4440 - Beaches and Tourism
EVR4504 - Precision Agriculture and Environmental Sustainability
EVR4592 - Soils and Ecosystems
EVR4592L - Soils and Ecosystems Lab
EVR4594 - Analysis of South Florida Ecosystems
EVR4905 - Research and Independent Study
EVR4910 - Applied Ecology Field Excursion
EVR4913C - Urban Sustainability Field Research
EVR4920 - Environmental Studies Senior Seminar
EVR4934 - Special Topics
EVR4941 - Internship in Environmental Studies
EVR5044 - Advanced GIS and Environmental Data Analysis
EVR5069 - Wetland Ecology and Management
EVR5086 - Advanced Environmental Data Analysis for Environmental Finance
EVR5122 - Natural Disasters and Social Vulnerability
EVR5219 - Water Resources Assessment
EVR5320 - Environmental Resource Management
EVR5332 - Integrated Solutions for Water in Environment and Development
EVR5355 - Environmental Resource Policy
EVR5360 - Protected Area Management
EVR5375 - Advanced Restoration Ecology
EVR5409 - Advanced Conservation Biology
EVR5505 - Advanced Precision Agriculture and Environmental Sustainability
EVR5907 - Research and Independent Study
EVR5913 - Advanced Urban Sustainability Field Research
EVR5935 - Special Topics
EVR5945 - Professional Practicum in PSM-EPM: Fieldwork
EVR5946 - Professional Practicum in PSM-EPM: Reflections
EVR6067 - Tropical Forest Conservation and Utilization
EVR6268 - Remote Sensing in Hydrology
EVR6285 - The Practice of Ecological Restoration
EVR6300 - Topics in Urban Ecology
EVR6322 - Methods of Sustainable Resource Management
EVR6330 - Tropical Ecosystems Management
EVR6377 - Natural Resource Conservation and Policy
EVR6950 - Graduate Seminar
EVR6970 - Supervised Research
EVR6971 - Master's Thesis
EVR7056 - GIS in Water Resources
EVR7980 - Ph.D. Dissertation
EVS6145 - Ecotoxicology
EVS6194 - Applied Soil Biology
GEO3510 - Earth Resources
GEO3510L - Earth Resources Laboratory
GEOX400 - GEO AP
GEOX400 - GEO IB
GIS3043C - Introduction to Geographical Information Systems

GIS4119 - Building Geodatabases and Geoprocessing Tools for Earth and Environmental Data
GIS4303 - Geospatial measurement techniques in Earth and Environmental Sciences
GIS4390 - Advanced Spatial Analysis of Earth and Environmental Data
GIS5050 - Environmental GIS
GIS5190 - Advanced geospatial measurement techniques in Earth and Environmental Sciences
GLY1010 - Physical Geology
GLY1010L - Physical Geology Lab
GLY1101 - The History of Life
GLY1101L - The History of Life Laboratory
GLY2072 - Earth's Climate and Global Change
GLY2072L - Earth's Climate and Global Change Lab
GLY3034 - Natural Disasters
GLY3039 - Environmental Geology
GLY3039L - Environmental Geology Lab
GLY3103L - Dinosaurs Laboratory
GLY3112 - Earth Through Time
GLY3157 - Elements of Caribbean Geology
GLY3202 - Earth Materials
GLY3202L - Earth Materials Lab
GLY3754 - Remote Sensing in the Earth Sciences
GLY3782 - Geology Field Excursion
GLY3881 - Environmental Geology Field Methods
GLY4300 - Petrology
GLY4300L - Petrology Lab
GLY4400 - Structural Geology
GLY4400L - Structural Geology Lab
GLY4450 - Environmental and Exploration Geophysics
GLY4450L - Environmental and Exploration Geophysics Laboratory
GLY4511 - Stratigraphy
GLY4511L - Stratigraphy Lab
GLY4660 - Paleoecology
GLY4730 - Marine Geology
GLY4734 - Changing Coastlines
GLY4791 - Field Geology and Geologic Mapping
GLY4822 - Introduction to Hydrogeology
GLY4823 - Florida Geologic and Hydrologic Systems
GLY4881 - Coastal Hazards
GLY4937 - Senior Seminar in Geological Sciences
GLY4947 - Internship in Geoscience
GLY4970 - Geology Honors Thesis
GLY4989L - Geology Honors Research
GLY5108 - Paleoenvironments
GLY5245 - Water-Rock Interaction
GLY5266 - Stable Isotope Biogeochemistry
GLY5287C - Scanning Electron Microscopy with EDS Analysis
GLY5457 - Earth and Environmental Data Analysis with Python
GLY5475 - Exploration Geophysics
GLY5495 - Seminar in Geophysics
GLY5518 - Advanced Stratigraphy
GLY5599 - Seminar in Stratigraphy

GLY5655 - Topics in Paleobiology
GLY5736 - Marine Geology and Geochemistry
GLY5737 - Coastal Processes and Environments
GLY5754 - Applied Remote Sensing in the Earth Sciences
GLY5758 - GIS and Spatial Analysis for Earth Scientists
GLY5786 - Advanced Field Excursion
GLY5826 - Hydrogeologic Modeling
GLY5827 - Hydrogeology
GLY5828 - Chemical Hydrogeology and Solute Transport
GLY5834 - Field Hydrogeology
GLY5835 - Introduction to Lattice Boltzmann Methods
GLY5888 - Coastal Hazards and Mitigation
GLY6061 - Geoscience Systems
GLY6392 - Topics in Igneous Petrology and Geochemistry
GLY6485 - Physics of the Earth
GLY6595 - Topics in Sedimentology
GLY6817 - Topics in Economic Geology
GLY6896 - Advanced Topics in Hydrology
GLY6910 - Supervised Research
GLY6941 - Supervised Teaching in the Geosciences
GLY6949 - Professional Internship in Earth Science
GLY6966 - Master's Comprehensive Examination
GLY6971 - Master's Thesis
GLY7980 - Ph.D. Dissertation
HOS3012 - Introduction to Horticulture Science
HOS3012L - Horticulture Science Lab
IDS1273 - First Year Seminar in Sustainability
IDS4232 - Sustainability in Action
IPM4020 - Integrated Pest Management
ISC1056 - First Year Seminar in Earth and Environment
ISC4935 - Senior Seminar in Earth and Environmental Science
ISC4940 - Undergraduate Research Internship in Earth and Environment
ISC5150 - Introduction to Research in Earth and Environmental Sciences
ISC5151 - Earth and Environmental Graduate Seminar
ISC6152 - Earth and Environment Advanced Graduate Seminar
ISC6153 - Environments of a Changing Planet
ISC6155 - Supervised Teaching in Earth and Environment
MET1010 - Introduction to Weather and Climate
MET1010L - Introduction to Weather and Climate Lab
MET3003 - General Meteorology
MET3103 - Planetary Climate Change
MET3502 - Synoptic Meteorology
MET3502L - Synoptic Meteorology Laboratory
MET4102 - Physical Climatology
MET4300 - Severe Weather
MET4301 - Dynamic Meteorology I
MET4302 - Dynamic Meteorology II
MET4304 - Introduction to Boundary Layer Meteorology
MET4400 - Meteorological Instrumentation and Observations
MET4410 - Remote Sensing: Radar and Satellite Meteorology

MET4420 - Physical Meteorology
MET4521 - Advanced Forecasting
MET4532 - Hurricanes
MET4705 - Operational Meteorology I
MET4706 - Operational Meteorology II
MET4750 - Techniques for Earth System Modeling
MET4912L - Meteorology Honors Research
MET4937 - Senior Seminar in Atmospheric Science
MET4941 - Internship in Meteorology
MET4970 - Meteorology Honors Thesis
MET5016 - Physics of Atmospheres I
MET5017 - Physics of Atmospheres II
MET5105 - Planetary Climate Change: Processes and Impacts
MET5135 - Climate Dynamics
MET5305 - Boundary Layer Meteorology
MET5311 - Dynamic Meteorology I
MET5312 - Atmospheric Dynamics II
MET5355 - Severe and Hazardous Weather
MET5365 - Techniques for Earth System Modeling and Research
MET5412 - Remote Sensing in Meteorology
MET5525 - Advanced Weather Forecasting
MET5530 - Hurricane Meteorology and Impacts
MET5533L - Weather Discussion and Analysis
MET5561 - Midlatitude Synoptic Meteorology
MET5561L - Midlatitude Synoptic Meteorology Lab
MET5707 - Operational Meteorology Research I
MET5708 - Operational Meteorology Research II
MET6971 - Thesis
MET7980 - Ph.D. Dissertation
OCE3014 - Oceanography
OCE3014L - Oceanography Lab
OCP3002 - Physical Oceanography
SWS4303 - Soil Microbiology
SWS4303L - Soil Microbiology Lab
SWS5305 - Advanced Soil Resources Analysis

Economics/SIPA Department

The Department of Economics offers undergraduate- and graduate-level programs and courses in economics and related subfields. These curricular offerings provide students with high-quality training in economic theory and the applications to the public and private sectors. At the undergraduate level, students develop an understanding of economic problems and institutions, and use analytical tools to apply this knowledge to contemporary problems. The graduate programs in Economics place strong emphasis on exploiting synergies between such fields as international economics, industrial organization, technological change, and development economics (including Latin American and Caribbean Studies as well as regional development problems). Issues are analyzed using modern economic tools from fields such as econometrics, game theory, and economic dynamics.

As part of the Steven J. Green School of International and Public Affairs, departmental faculty scholarship contributes to the school's eight strategic research themes: Migration, Diaspora, and Transient Communities; Poverty, Health, and Global Inequalities; Economic Development, Sustainability, and Environment; Religion, Society, and Interfaith Engagement; Nationalism, Identity, and Language; Human Rights and Democratization; Security, Foreign Policy, and Governance; and Historical Inquiry, Memory, and Reconciliation.

To explore all of the department's curricular offerings, click the "Programs" and "Courses" tabs above.

Programs

ECON:BA - Bachelor of Arts in Economics
ECON:BS - Bachelor of Science in Economics
ECON:MA - Master of Arts in Economics
ECON:PHD - Doctor of Philosophy in Economics
XECON:MN - Minor in Economics

Courses

ECO1000 - Intro To Economics
ECO2013 - Principles of Macroeconomics
ECO2023 - Principles of Microeconomics
ECO3041 - Consumer Economics
ECO3101 - Intermediate Microeconomics
ECO3106 - Behavioral Economics
ECO3202 - Applied Macroeconomics
ECO3203 - Intermediate Macroeconomics
ECO3223 - Money and Banking
ECO3303 - Devel Econ Thought
ECO3304 - Economic Forces and the Development of Western Ideas
ECO3410 - Measurement and Analysis of Economic Activity
ECO3703 - International Economics
ECO3949 - Cooperative Education in Economics
ECO4100 - Managerial Econ
ECO4201 - Advanced Macroeconomics
ECO4224 - Issues Money & Bankn
ECO4232 - Monetary Policy and Central Bank Decision Making
ECO4237 - Money Interest Cap
ECO4400 - Economics of Strategy and Information
ECO4401 - Introduction to Mathematical Economics
ECO4421 - Introduction to Econometrics
ECO4465 - Quantitative Economics
ECO4504 - Introduction to Public Finance
ECO4622 - Economic History of the United States
ECO4623 - American Business History
ECO4701 - World Economy
ECO4704 - International Trade Theory and Policy
ECO4713 - International Macroeconomics
ECO4733 - Multinational Corporation
ECO4903 - Undergraduate Seminar
ECO4906 - Undergraduate Tutorial

ECO4932 - Topics In Theory
ECO4933 - Topics In Theory
ECO4934 - Special Topics
ECO4949 - Cooperative Education in Economics
ECO5206 - Economics of Asia
ECO5709 - The World Economy
ECO5906 - Adv Individual Study
ECO5945 - Internship
ECO6019 - Macroeconomics I
ECO6076 - Teaching Economics
ECO6112 - Fundamentals of Microeconomic Theory
ECO6174 - Microeconomics I
ECO6204 - Fundamentals of Macroeconomic Theory
ECO6257 - Macroeconomics and Policy Analysis
ECO6405 - Mathematical Economics
ECO6416 - Applied Quantitative Methods in Economics
ECO6420 - Econometrics I
ECO6425 - Econometrics II
ECO6705 - International Trade for Global Governance I
ECO6716 - International Macroeconomics for Global Governance
ECO6936 - Special Topics
ECO6939 - Advanced Seminar in Applied Economics
ECO6971 - Thesis
ECO7115 - Microeconomic Theory I
ECO7116 - Microeconomic Theory II
ECO7118 - Graduate Seminar in Economic Theory
ECO7206 - Macroeconomic Theory I
ECO7207 - Macroeconomic Theory II
ECO7405 - Mathematical Methods in Economic Analysis I
ECO7424 - Econometric Methods I
ECO7425 - Econometric Methods II
ECO7426 - Econometrics III
ECO7705 - International Trade
ECO7716 - International Money
ECO7717 - Applied International Economics
ECO7925 - Advanced Workshop
ECO7980 - Ph.D. Dissertation
ECOX000 - ECO IB
ECP3000 - Economic Analysis of Social Problems: Intro to Public Programs
ECP3006 - Sports Economics
ECP3123 - Economics of Poverty
ECP3203 - Introduction to Labor Economics
ECP3254 - Women, Men, and Work in the USA
ECP3302 - Introduction to Environmental Economics
ECP3404 - Digital Platforms and the Modern Economy
ECP3410 - Introduction to Public Economics
ECP3451 - Law And Economics
ECP3533 - Health Systems Economics
ECP3555 - Women and the Economy
ECP3613 - Introduction to Urban Economics

ECP4004 - Seminar on Current Economic Topics
ECP4043 - Economic Analysis of Social Problems: Advanced Topics
ECP4204 - Theory of Labor Economics
ECP4314 - Natural Resource Economics
ECP4403 - Industrial Organization
ECP5506 - Advanced Economic Analysis of Social Problems
ECP5707 - International Economic Problems & Policy
ECP6305 - Advanced Environmental Economics
ECP6705 - Managerial Economics
ECP7405 - Industrial Organization

ECS3401 - Brazilian Economy
ECS3402 - The Political Economy of South America
ECS3403 - Economics of Latin America
ECS3431 - Economics of the Caribbean Basin
ECS4011 - Development Economics I
ECS4014 - Development Economics II
ECS5027 - Economic Development of Emerging Nations
ECS5406 - Latin American Economies
ECS6015 - Economic Development for Global Governance I
ECS6016 - Economic Development for Global Governance II
ECS7015 - Development Economics: Theory
ISS6244 - Economic Analysis of Social Challenges: Evidence-Based Evaluation of Public Programs
ISS6255 - International Development Policy
ISS6314 - Data Visualization and Machine Learning
ISS6315 - International Economics and Data Analytics
ISS6365 - Advanced Data Analytics and Economic Modeling
ISS6390 - Global Economic Analysis for Sustainability

Educational Policy Studies/CASE Department

Overview

The Department of Educational Policy Studies (EPS) offers programs and courses for students interested in working in a wide range of educational and training contexts. Academic preparation focuses on the following: educational leadership, education studies, policy development and analysis, adult education, human resource development, higher education administration, and global education studies. The department provides the core undergraduate and graduate curricula in the historical, cultural, social, and philosophical foundations of education. EPS grants undergraduate-, master’s-, specialist-, and doctoral-level degrees.

Department faculty are recognized as national/international scholars from a variety of disciplinary backgrounds. They are committed to serving their communities, and maximizing student learning, engaging in the discovery and dissemination of new knowledge, and encouraging a creative and innovative spirit among students. Community engagement plays a pivotal role in the programs and sponsored-research projects implemented through the department, where critical problems confronting communities are identified and addressed.

The following pages describe the various programs of study in the department and the corresponding requirements. Stated admission requirements are to be considered minimums. An applicant who meets these minimal requirements is not automatically assured admission. Program admission requirements are subject to change. It is the responsibility of the applicant to assure that they have met the requirements.

To explore all of the department's curricular offerings, click the "Programs" and "Courses" tabs above.

Guiding/Philosophy Statements

The Educational Policy Studies department is committed to the transformative power of education to improve the conditions of individuals and communities at large.

- We believe in the unique value of educational perspectives to understand and address a variety of long-standing and emerging challenges and issues.
- We are committed to the development of educational leaders, researchers, and policy makers.
- We believe in developing students to study and understand problems in order to create solutions in local, regional, national, and global contexts.
- We believe students will develop into contributing members of their societies through engagement with community-based partnerships, pedagogy, research to practice, and traditional scholarship.

Department Website

Programs

ACDADV:CFI - Graduate Certificate in Academic Advising
AEHRD:MS - Master of Science in Adult Education and Human Resource Development
EDLD:CFI - Graduate Certificate in Educational Leadership
EDLDR:EDS - Educational Specialist in Educational Leadership
EDLDRES:MS - Master of Science in Educational Leadership and Educational Studies
EDLPS:EDD - Doctor of Education in Educational Leadership and Policy Studies
HIGHED:MS - Master of Science in Higher Education Administration
HIGHED:PHD - Doctor of Philosophy in Higher Education

Courses

ADE5383 - Instructional Analysis and Design
ADE5386 - Individual Learning and Adult Education
ADE5387 - Organizational Learning and Human Resource Development
ADE6074 - Writing for Publication in Adult Education and Human Resource Development
ADE6180 - Organizational and Community Processes in AE/HRD
ADE6186 - Comprehensive Program Evaluation in AE/HRD
ADE6260 - Management of AE/HRD Programs
ADE6286 - Instructional Development and Implementation
ADE6360 - Adult Teaching Methods
ADE6476 - Computer Based Training
ADE6674 - Trends and Issues in AE/HRD
ADE6906 - Directed Study in Adult Education and Human Resource Development
ADE6925 - Workshop in Adult Education and Human Resource Department
ADE6930 - Seminar in Adult Education and Human Resource Development
ADE6935 - Special Topics in Adult Education and Human Resource Development
ADE6945 - Internship in Adult Education or Human Resource Development
ADE6946 - Teaching Practicum
ADE7571 - Consulting as an Adult Education/HRD Process
ADE7772 - Review of Research in Adult Education and Human Resource Development
ADE7920 - Colloquium in AE/HRD
ADE7964 - Comprehensive Doctoral Examination, Adult Education/HRD
ADE7980 - Ed.D. Dissertation

ADE7985 - Dissertation Defense
EDA6061 - Educational Leadership for Change
EDA6192 - Leadership in Education
EDA6195 - Communication in Educational Leadership
EDA6222 - School Personnel Administration
EDA6232 - School Law
EDA6242 - School Finance
EDA6271C - Administering Educational Technology
EDA6423 - Data Analysis for School Improvement
EDA6503 - The Principalship
EDA6504 - Instructional Leadership and Learning Environments
EDA6905 - Directed Study in Educational Leadership
EDA6928 - Special Topics: School Improvement
EDA6930 - Seminar in Educational Leadership
EDA6943 - Administrative Internship
EDA7069 - Educational Policy
EDA7103 - Theories of Educational Administration
EDA7233 - Ethics and Educational Leadership
EDA7288 - Politics of Education
EDA7905 - Directed Study in Educational Administration and Supervision
EDA7930 - Seminar in Educational Administration and Supervision
EDA7964 - Comprehensive Doctoral Examination, Educational Administration and Supervision
EDA7980 - Ed.D. Dissertation
EDA7985 - Dissertation Defense
EDF1005 - Introduction to Education
EDF2085 - Teaching Diverse Populations
EDF3264 - Life-Long Learning
EDF3515 - Philosophical and Historical Foundations of Education
EDF3521 - Education In History
EDF4604 - Cultural and Social Foundations of Education
EDF4655 - Case Studies in Education Policy
EDF4782 - Education Law, Policy, and Social Justice Issues
EDF4803 - Comparative International Education
EDF4823 - Introduction to Comparative and International Education
EDF4930 - Senior Capstone
EDF5517 - Struggles of School and Society
EDF5851 - Social/Cultural Conflict in Educational Change
EDF5905 - Directed Study in Education
EDF5942 - Multicultural Seminar and Practicum in Urban Education

EDH7985 - Dissertation Defense

Electrical & Computer Engineering/CENGR Department

The Department of Electrical and Computer Engineering (ECE) offers undergraduate- and graduate-level programs and courses in electrical engineering, computer engineering, and associated subfields. Areas of study offered by the ECE department include: Artificial Intelligence (AI); applied AI and the internet-of-things; robotics, controls, and intelligent autonomous systems; quantum engineering; cybersecurity; nuclear engineering; semiconductors; nanotechnology; power/energy, RF/microwave/wireless communication; embedded systems; and entrepreneurship.

Faculty research interests include cybersecurity, defense communications, energy systems, energy resources and the electric power grid, nuclear security, universal radio platforms, sustainable technology, unmanned aircraft system security, and wireless communication. Faculty receive honors for their teaching excellence in student mentoring and learning, as well as sponsored training grants for developing educational pipelines.

To explore all of the department's curricular offerings, click the "Programs" and "Courses" tabs above.

Department Website

Programs

COMPEG:BS - Bachelor of Science in Computer Engineering
COMPEG:MS - Master of Science in Computer Engineering
ECE:PHD - Doctor of Philosophy in Electrical and Computer Engineering
ELEG:BS - Bachelor of Science in Electrical Engineering
ELEG:MS - Master of Science in Electrical Engineering
IOT:MS - Master of Science in Applied AI & Internet of Things
IOTAI:BS - Bachelor of Science in Applied AI & Internet of Things

Courses

CAI1850 - Edge Artificial Intelligence
CAI3864 - Data Engineering in ECE
CAI3865 - Applied AI Fundamentals in ECE
CAI4841 - Introduction to Computer Vision
CAI4854 - Embedded AI
CAI4861 - Introduction to Quantum AI in ECE
CAI4863 - Generative AI Fundamentals in ECE
CAI4868 - Fundamentals of AI Security in ECE
CAI5855 - Introduction to Applied AI in ECE
CAI5858 - Advanced Embedded AI
CAI5867 - Advanced Data Engineering in ECE
CAI6856 - Advanced Generative AI in ECE
CAI6866 - Advanced Quantum AI in ECE
CAI6869 - Advanced AI Security in ECE
CDA3104 - Introduction to Computer Design
CIS5208 - Social, Economic, and Policy Aspects of Cybersecurity
CNT3122 - Sensors for Internet of Things
CNT3142 - Microcontrollers for Internet of Things
CNT3143 - Analytics with Cloud Services in ECE
CNT3162 - Wireless Communications for IoT
CNT4145 - Sensor IoT Analytics
CNT4147 - Big Data Analytics in ECE
CNT4149 - Deep Learning in ECE

CNT4151 - Data Visualization in ECE
CNT4153 - Machine Learning in ECE
CNT4155 - Python Programming in ECE
CNT4165 - Network Protocols for Internet of Things
CNT4185 - Internet of Things Privacy
CNT4188 - Internet of Things Forensics
CNT5415 - Practical Applied Security
CNT6144 - Advanced Analytics with Cloud Services in ECE
CNT6148 - Advanced Big Data Analytics in ECE
CNT6150 - Advanced Deep Learning in ECE
CNT6152 - Advanced Data Visualization in ECE
CNT6154 - Advanced Machine Learning in ECE
CNT6156 - Advanced Python Programming in ECE
CTS1120 - Fundamentals of Cybersecurity
EEE1760 - Introduction to Embedded Computing
EEE3303C - Electronics I & Lab
EEE3394 - Electrical Engineering Science I - Electronic Materials
EEE3396 - Introduction to Solid State Devices
EEE4262 - IoT Design of Embedded Sensing, Network, and Signal Processing

TCN4081 - Telecommunication Network Security
TCN4211 - Telecommunication Networks
TCN4212 - Telecommunication Network Analysis and Design
TCN4940 - Senior Project
TCN5155 - Wireless Communications with Multimedia Applications
TCN5271 - Advanced IoT Communications and Networking
TCN6276 - Antennas for Wireless and Body-Centric Communications

Engineering Management/CENGR Department

The Enterprise and Logistics Engineering unit offers graduate-level programs and courses in the areas of engineering management, logistics engineering, and enterprise systems. Academic programs are designed to be flexible, and are offered in a variety of instruction formats, ensuring accessibility and convenience for diverse learning preferences. Faculty aim to equip students with deep knowledge and insight, preparing them to be successful managers and leaders in their industries.

To explore all curricular offerings, click the “Programs” and “Courses” tabs above.

Department Website

English/CASE Department

The Department of English offers undergraduate- and graduate-level programs and courses in the areas of creative writing, English, English education, linguistics, literature, and writing and rhetoric.

Faculty expertise and publications represent all areas of study. Alumni include numerous teachers of English across the curriculum and several well-known authors.

To explore all of the department's curricular offerings, click the "Programs" and "Courses" tabs above.

Department Website

Programs

CRWRTG:MFA - Master of Fine Arts in Creative Writing
ENGED:BA - Bachelor of Arts in English Education
ENGL:BA - Bachelor of Arts in English
ENGL:MA - Master of Arts in English
EXILE:CFI - Undergraduate Certificate in Exile Studies
FILMS:CFI - Undergraduate Certificate in Film Studies
LINGS:CFI - Undergraduate Certificate in Linguistics
LINGST:MA - Master of Arts in Linguistics
PROPW:CFI - Undergraduate Certificate in Professional and Public Writing
XENGL:MN - Minor in English

Courses

AML3042 - Texts and Contexts: American Literature 1492 to the Present
AML3415 - American Literature and the Tradition of Dissent
AML4155 - Modern American Poetry
AML4174 - American Literary Genres since 1860
AML4213 - Studies in Colonial and Early American Literature
AML4223 - Antebellum Literature
AML4233 - American Realism
AML4245 - Modernism and Post-Modernism in American Literature
AML4300 - Major American Writers
AML4306 - Mark Twain
AML4503 - Periods in American Literature
AML4606 - Studies in 19th-Century African American Literature
AML4607 - Studies in 20th-Century African American Literature
AML4612 - Literature of the Harlem Renaissance Period
AML4621 - Major African American Writers
AML4624 - African American Women Writers
AML4630 - Contemporary US Latino Literature
AML4640 - Indigenous American Literatures
AML4930 - Special Topics in American Literature
AML5305 - Major American Literary Figures
AML5505 - Periods in American Literature
AMLX010 - AML CLEP
AMLX100 - AML CLEP
CRW3010 - Creative Writing: Forms and Practices
CRW3111 - Narrative Techniques
CRW3311 - Poetic Techniques
CRW4110 - Writing Fiction
CRW4124 - Writing Mystery and Suspense
CRW4211 - Writing Creative Non-Fiction
CRW4223 - Writing Memoir
CRW4310 - Writing Poetry
CRW4900 - Independent Study in Creative Writing
CRW4930 - Special Topics in Creative Writing

CRW4931 - Special Topics in Creative Writing
CRW5130 - Advanced Fiction Workshop
CRW5331 - Advanced Poetry Workshop
CRW5620 - Advanced Screenwriting Workshop
CRW5934 - Special Topics in Creative Writing
CRW5935 - Special Topics in Creative Writing
CRW5940 - Advanced Independent Study in Creative Writing
CRW6806 - Teaching Creative Writing
CRW6971 - Creative Writing Thesis
CRW6972 - Creative Thesis Continuance
EGC1100L - English for Academic Purposes
ENC1101 - Writing and Rhetoric I
ENC1102 - Writing and Rhetoric II
ENC1930 - Essay Writing
ENC2304 - College Writing for Transfer Students
ENC3213 - Professional and Technical Writing
ENC3249 - Professional and Technical Writing for Computing
ENC3311 - Advanced Writing and Research
ENC3334 - Introduction to Writing Studies
ENC3354 - Writing as Social Action
ENC3363 - Writing About the Environment
ENC3371 - Rhetorical Theory and Practice
ENC3378 - Writing Across Borders
ENC3386 - Rhetorical Grammar
ENC3413 - Writing for the Web
ENC3416 - Writing and New Media
ENC3465 - Legal Writing
ENC3491 - The Processes of Writing
ENC3492 - Interdisciplinary Writing for Writing Fellows
ENC3501 - Teaching Writing in Secondary Contexts
ENC4212 - Professional Editing
ENC4241 - Scientific Writing
ENC4260 - Topics in Professional Writing
ENC4331 - Writing, Rhetoric, and Community
ENC4355 - Writing About Film
ENC4356 - Writing About the Exile Experience
ENC4357 - How To Go Public
ENC4373 - Alternative Writing and Rhetorics
ENC4375 - Rhetoric of Food
ENC4379 - Senior Writing Seminar
ENC4380 - Feminist Rhetorics
ENC4381 - Zine Writing
ENC4385 - Material/Cultural Writing & Rhetorics
ENC4405 - Queer Rhetorics
ENC4437 - Visual Rhetoric and Document Design
ENC4930 - Special Topics in Composition
ENC5235 - Grant Writing
ENC5432 - Document and Visual Design for Professional Writers
ENC5494 - Writing Center Theory and Practice
ENC5703 - Rhetorical Traditions

ENC5720 - Writing Studies Research Methods
ENC5752 - Women's Rhetorics
ENC5935 - Special Topics in Composition
ENC6261 - Theories of Professional and Technical Writing
ENC6702 - Composition Theory and Practice
ENC6734 - Multilingual Matters: Theories of Multilingual Writing
ENC6736 - Writing Across Conventions
ENG2012 - Approaches to Literature
ENG3072 - Literary Theory and Multimedial Popular Culture
ENG3138 - The Movies
ENG4043 - Contemporary Literary Theory and Criticism
ENG4114 - Film Adaptations of Literature
ENG4121 - History Of Film
ENG4132 - Studies In The Film
ENG4134 - Women And Film
ENG4141 - Queer Cinema
ENG4319 - Film Humor & Comedy
ENG4845 - Queer Studies: Literature, Culture and Theory
ENG4906 - Independent Study
ENG4949 - Cooperative Education in English
ENG5009 - Literary Criticism and Scholarship
ENG5026 - Advanced Textual Reading
ENG5048 - Literary Theory
ENG5058 - Form and Theory of Contemporary Literature
ENG5907 - Independent Study
ENG5971 - Thesis and Dissertation Workshop
ENG6935 - Special Topics in College Pedagogy
ENG6937 - Teaching College Composition
ENG6942 - College Composition Practicum
ENL3261 - 19th Century British Women Novelists
ENL3504 - Texts and Contexts: British Literature to 1660
ENL3506 - Texts and Contexts: British Literature Since 1660
ENL4161 - Renaissance Drama
ENL4210 - Studies in Medieval Literature
ENL4215 - Medieval Monstrosity
ENL4220 - Renaissance: Prose and Poetry
ENL4223 - Studies in Renaissance Literature
ENL4225 - Spenser
ENL4230 - Studies in Restoration and 18th-Century Literature
ENL4243 - Studies in Romanticism
ENL4251 - Victorian Literature
ENL4254 - Late Victorian Fiction
ENL4260 - Studies in 19th-Century British Literature
ENL4273 - Studies in Modern British Literature
ENL4303 - Major British Writers
ENL4320 - Shakespeare: Histories
ENL4321 - Shakespeare: Comedies
ENL4322 - Shakespeare: Tragedies
ENL4324 - Global Shakespeares
ENL4341 - Milton

ENL4370 - Virginia Woolf and Her Circle
ENL4503 - Periods in English Literature
ENL4930 - Special Topics in English Literature
ENL5220 - Major British Literary Figures
ENL5505 - Periods in English Literature
ENLX000 - ENL CLEP
ENLX022 - ENL CLEP

LIT5934 - Special Topics
LIT6970 - Master's Thesis
LITX000 - LIT AP

Environmental Health Sciences/CPHSW Department

The Department of Environmental Health Sciences offers graduate-level courses. The department offers two concentrations as part of the Master of Public Health (MPH): Environmental Health Science; and Brain, Behavior, and the Environment. The department also offers two concentrations as part of the PhD in Public Health: Brain, Behavior, and the Environment; and Environmental Toxicology. The department seeks to identify and explore common biological and environmental pathways that contribute to a broad range of diseases, in an effort to develop applicable prevention and intervention strategies. Its curricular offerings prepare students for professional roles in which they will apply the highest quality performance of mechanism-based and evidence-based research to help detect, prevent, and control adverse influences of the environment on human health while communicating the complex interactions between genetic variation and environmental stressors.

Departmental faculty are interdisciplinary, with physicians, chemists, toxicologists, cancer scientists, molecular biologists, environmental/water resource scientists, and other public health scientists. This range of expertise ensures breadth in teaching and research. Faculty conduct high-quality mechanistic research to determine how exposures to chemicals or other agents in the environment impact cancers, cognitive deficits, neurobehavior, neurodegeneration, acute respiratory distress, and healthy aging. Our faculty also carryout evidence-based translational research to improve pediatric cancer treatments with functional precision medicine.

To explore the concentrations offered through the MPH degree, see the MPH Program Requirements. To explore the concentrations offered through the PhD in Public Health, see the PhD in Public Health program requirements.

Department Website

Programs

ENVHL:CFI - Graduate Certificate in Environmental Health Sciences

Courses

IDS2183 - Health Without Borders
PHC4302 - Introduction to Environmental Public Health
PHC4318 - Introduction to Biological Basis of Environmental Public Health
PHC6004 - Injury Epidemiology and Prevention
PHC6307 - Exposure Assessment in Environmental and Occupational Epidemiology
PHC6310 - Environmental Toxicology
PHC6311 - Environmental Health Risk Assessment
PHC6312C - Health Impacts of Air, Water, and Land Pollution
PHC6315 - Introduction to Environmental Health Sciences
PHC6316 - Environmental Health Management
PHC6328 - Molecular and Cellular Toxicology
PHC6329 - Biomarkers
PHC6355 - Environmental and Occupational Health and Safety
PHC6374 - Environmental Disasters and Human Health
PHC6380 - Introduction to Neurotoxicology
PHC6382C - Neuropharmacology
PHC6383C - Neurobehavioral Techniques
PHC6422 - Regulatory Aspects of Environmental Health Sciences
PHC6442 - Global Environmental Public Health
PHC6520 - Public Health Aspects of Foodborne Diseases
PHC6538 - Gene & Environment Interaction
PHC6730C - Neurotoxicology Research Methods
PHC6914L - Current Topics in Environmental Health Sciences Research Lab
PHC6920 - Special Topics in Environmental Health Sciences
PHC6921 - Environmental Health Sciences Seminar
PHC7300 - Biological Basis of Environmental Diseases
PHC7327 - Emerging Issues in Environmental Health Sciences
PHC7372 - Signal Transduction in Environmental Health and Toxicology
PHC7374C - Organ-Specific Toxicology
PHC7381C - Neuroscience
PHC7384 - Advanced Neurotoxicology
PHC7385C - Emerging Issues in Neurotoxicology
PHC7713 - Advanced Environmental Toxicology Research Methods
PHC7731C - Advanced Neurotoxicology Research Methods
PHC7732C - Research Ethics & Scientific Integrity
PHC7917 - Environmental and Occupational Health Sciences Pre Doctoral Research

Epidemiology/CPHSW Department

The Department of Epidemiology offers undergraduate- and graduate-level courses. The department offers two concentrations as part of the Master of Public Health (MPH) degree—the Epidemiology concentration and the Infectious Disease Epidemiology concentration—and one concentration as part of the PhD in Public Health degree. Epidemiology is a science rooted in finding solutions to serious public health problems (e.g., cardiovascular disease, cancer). Students in the Department of Epidemiology acquire the skills to detect, prevent, and control human disease and to promote the health and well-being of the public through innovative research, education, and training. The department's curricular offerings equip students with strong analytic and quantitative skills to be successful in designing and conducting public health investigations, disease surveillance, innovative interventions, and methodological research. Many graduates work as epidemiologists for federal and state agencies, hospitals, pharmaceutical companies, international health organizations, and universities.

Departmental faculty conduct high-quality epidemiological research on infectious and chronic diseases, including their associated behavioral risks and interventions to reduce their burden.

To explore the concentrations offered through the MPH degree, see the MPH Program Requirements. To explore the concentrations offered through the PhD in Public Health, see the PhD in Public Health program requirements.

Department Website

Programs

EPIDG:CFI - Graduate Certificate in Epidemiology

Courses

PHC4024 - Principles of Applied Epidemiology
PHC4721 - Public Health Research
PHC6000 - Epidemiology I: Introduction to Public Health Epidemiology
PHC6002 - Infectious Disease Epidemiology
PHC6003 - Chronic Disease Epidemiology
PHC6007 - Cancer Epidemiology
PHC6008 - Cardiovascular Disease Epidemiology
PHC6009 - AIDS Epidemiology and Control
PHC6012 - Current Research in Epidemiology
PHC6013 - Epidemiology II: Observational Design
PHC6014 - Behavioral Epidemiology
PHC6016 - Social Epidemiology
PHC6020 - Clinical Epidemiology
PHC6039 - Healthcare Epidemiology and Infection Control
PHC6062 - Systematic Reviews and Meta-Analysis
PHC6251 - Disaster and Emergency Epidemiology
PHC6441 - Epidemiology of Health Disparity
PHC6510 - Advanced Infectious and Tropical Disease Epidemiology
PHC6536 - Health Demography
PHC6591 - Reproductive Health Epidemiology
PHC6595 - Genetic Epidemiology
PHC6703 - Epidemiology Methods: Experimental Design
PHC6934 - Scientific Writing and Oral Presentation in Epidemiology
PHC7011 - Advanced Current Research in Epidemiology
PHC7015 - Advanced Research Methods-Experimental Design
PHC7017 - Advanced Epidemiology for Health Disparity

PHC7606 - Tobacco Use: Causes, Consequences, and Control
PHC7702 - Advanced Measurement in Public Health
PHC7705 - Methods in Evidence-Based Public Health
PHC7711 - Methodological Issues in Scientific Inquiry of Public Health Research

Finance/CBADM Department

The Department of Finance offers undergraduate- and graduate-level programs and courses that provide students with solid theoretical and practical knowledge in the areas of banking, corporate finance, investments, portfolio management, financial risk management, financial engineering, financial institutions, markets, and international finance. At the graduate-level, the department's programs seek to extend and deepen students' understanding of finance in both its theoretical and practical dimensions.

The department also produces research that contributes to the body of knowledge in finance. Departmental faculty serve in editorial roles for several prestigious finance journals and have been awarded FIU outstanding research and top scholar awards.

To explore all of the department's curricular offerings, click the "Programs" and "Courses" tabs above.

Global & Sociocultural St/SIPA Department

The Department of Global and Sociocultural Studies (GSS) offers undergraduate- and graduate-level programs and courses. The curricular offerings represent a unique integration of anthropology, geography, and sociology to create an innovative, interdisciplinary social science department. By integrating these approaches, GSS is able to provide discipline-based training at all levels while simultaneously providing students opportunities to transcend outmoded disciplinary boundaries and benefit from cross-disciplinary exchanges. The department's degree programs offer students rigorous training in trans-disciplinary social theory and research methods, including quantitative and qualitative analysis, and geographic information systems.

As part of the Steven J. Green School of International and Public Affairs, departmental faculty scholarship contributes to the school's eight strategic research themes: Migration, Diaspora, and Transient Communities; Poverty, Health, and Global Inequalities; Economic Development, Sustainability, and Environment; Religion, Society, and Interfaith Engagement; Nationalism, Identity, and Language; Human Rights and Democratization; Security, Foreign Policy, and Governance; and Historical Inquiry, Memory, and Reconciliation.

To explore all of the department's curricular offerings, click the "Programs" and "Courses" tabs above.

SYP5447 - Development and Post-Development

Global Health/CPHSW Department

The Department of Global Health offers graduate-level courses and a concentration in Global Health, offered as part of the Master of Public Health (MPH). These curricular offerings provide opportunities for students to global health principles to both domestic and international challenges, with a focus on identifying and addressing health inequities. The program leverages a transdisciplinary approach to prepare technically skilled and cross-culturally competent professionals to overcome challenges in a continually shifting and complex landscape; to analyze the impact of translational problems; to apply an integrative approach to contemporary health issues; to diplomatically function within and in conjunction with international agencies; to advocate as ethical leaders; and to work, communicate, and excel across diverse global and local settings. Graduates are positioned to start or advance careers in global health practice, research, education, or policy.

Departmental faculty comprise collaborators from academia, government, and the private sector. The Department's research and academic activities complement FIU's Population Health Institute to propel collaborative research on addressing health inequities, and to enhance capacity strengthening activities, both locally and globally.

To explore the Global Health concentration offered through the MPH degree, see the MPH Program Requirements.

Department Website

Courses

PHC6102 - Health Policy in a Global Context
PHC6154C - Evidence Synthesis Applied to Clinical Settings and Health Policy-Making
PHC6306 - Intersections Between Human and Planetary Health
PHC6430C - Public Health Economics
PHC6605 - Global Healthcare Quality and Safety
PHC6609 - Healthy Aging for Global Populations
PHC6660 - Global Burden of Disease
PHC6661 - Global Health Governance
PHC6662 - Global One Health
PHC6663 - Global Mental Health
PHC6941 - Global Health Practicum Prep

Global Leadership & Management/CBADM Department

The Department of Global Leadership and Management offers undergraduate- and graduate-level programs and courses in organizational behavior and human resource management. These curricular offerings provide students with the most current knowledge related to the profession. Students who graduate from the department's programs demonstrate a clear understanding of the management field, a broad intellectual framework for managing in an evolving marketplace, the ability to lead and work within teams, computer literacy, and solid communication skills to work in today's global organizations.

The department has an internationally oriented and dedicated faculty with expertise in global management, leadership, human resource management, and organizational behavior. Faculty are devoted to preparing students for successful management careers in the global business arena.

To explore all of the department's curricular offerings, click the "Programs" and "Courses" tabs above.

Graduate Medicine/HWCOM Department

The Herbert Wertheim College of Medicine offers two graduate degree programs.

The Master in Physician Assistant Studies (MPAS) helps meet the increasing demand for health care practitioners by preparing highly trained physician assistants. The program consists of 15 months dedicated to didactic education, followed by 12 months during which students attend supervised clinical rotations. The program emphasizes patient-centered care and community outreach, ensuring that graduates have the skills and professionalism to collaborate effectively with physicians and other health professionals.

The PhD Program in Biomedical Sciences trains top-notch researchers for the future. This 5-year program helps train students to apply research skills from bench to bedside in order to translate fundamental discoveries into new treatments for human diseases. The curriculum emphasizes the roles of both clinical and basic science research in fueling insights needed to improve patient outcomes, and prepares students for careers in academia, medical research, and biomedical and biotechnology industries.

Health Promotion & Disease Prevention/CPHSW Department

The Department of Health Promotion and Disease Prevention offers graduate-level courses. The department offers a concentration in Health Promotion and Disease Prevention and a concentration in Maternal and Child Health, both of which are delivered through the Master of Public Health (MPH) degree. The department also offers a concentration in Health Promotion and Disease Prevention and a concentration in Health Disparities as part of the PhD degree. These curricular offerings address

the behavioral, social, and cultural factors related to individual, community, population health, and health disparities over the life course. The faculty, students, and graduates seek effective behavioral, social, and structural solutions, and advocate for continual improvements in public health programs and policies to achieve health and well-being for all.

Department faculty conduct research in such areas as substance use, mental health, health disparities; HIV/STI prevention and intervention, immigrant health, developmental disabilities, and maternal and child health.

To explore the concentrations offered through the MPH degree, see the MPH Program Requirements. To explore the concentrations offered through the PhD in Public Health, see the PhD in Public Health program requirements.

Department Website

Programs

HLTDIS:CFI - Graduate Certificate in Health Disparities

PHC7733 - Theoretical Paradigms in Health Disparities Research
PHC7932 - Health Disparities Training and Development Seminar
PHC7981 - Research Concepts and Proposal Development

Health Services Administration/CNHS Department

The Department of Health Services Administration offers undergraduate- and graduate-level programs and courses in health services. These curricular offerings seek to prepare industry leaders who manage complex issues, systems, and organizations and ensure the delivery of high-quality, accessible, and culturally competent healthcare. The department aims to promote effective interprofessional collaboration across fields, and seeks to maintain significant engagement with communities and partners around the world. Faculty service, scholarly activity, and research activity centers around healthcare delivery and evidence-based practice and applied research on related topics.

To explore all of the department's curricular offerings, click the "Programs" and "Courses" tabs above.

Herbert Wertheim COM Department

The Herbert Wertheim College of Medicine (HWCOM) offers academic degrees in the Doctor of Medicine, the Master in Physician Assistant Studies, and the PhD in Biomedical Science programs. By working collaboratively to respond to the health needs of patients and communities, the college prepares students to become exemplary physicians, physician assistants, and scientists to serve the South Florida community.

Through the college's research enterprise, faculty, residents, and students conduct basic, applied, translational, clinical, and interdisciplinary research that leverages South Florida's diverse demographics, improves the health of the South Florida community, and aligns with national and global health trends.

In collaboration with Baptist Health South Florida and Nicklaus Children's Hospital, HWCOM is expanding physician training, research, and patient care for the benefit of the local community. HWCOM offers residency and fellowship training options in multiple specialties. The college also provides free primary care and behavioral health services to underserved communities through the Green Family Foundation Neighborhood Health Education Learning Program (NeighborhoodHELP).

To learn more about the Doctor of Medicine degree, click here.

To learn more about the Master in Physician Assistant Studies degree, please click here.

To learn more about the PhD in Biomedical Science degree, click here.

Honors Department

The Honors College

College Website

General Information

The Honors College is the center of undergraduate academic excellence at FIU. We are a community of students, faculty, and staff from all backgrounds and disciplines who are dedicated to excellence in all pursuits. We offer a unique academic and social experience that is compatible with all majors, transcends disciplines, and encourages our students to become life-long learners.

Privileges and Benefits

Honors College students enjoy certain privileges, including:

- Priority registration
- Individualized advising
- The notation “Graduated through the Honors College” on the transcript
- Priority for Honors housing in Parkview Hall
- Graduate-student library privileges
- Honors-only competitive scholarships
- Support to present work at national research conferences
- Unique internships and job opportunities
- Facilities and resources for innovative projects
- Special recognition at commencement

Admissions to the Honors College

Admission to the Honors College is very selective with Honors students representing the top 5% of FIU’s undergraduate students. Students are only admitted to the fall term of a given academic year. Visit **https://honors.fiu.edu/apply** for more detailed information, including criteria and deadlines.

Academic Standing Policy

Students must maintain a cumulative 3.3 GPA for satisfactory standing in the Honors College. However, students who drop (DR) or earn a non-passing grade of a D, F, F0, or NC in an IDH course will be automatically dismissed from the Honors College.

Graduation Policy

Students will graduate through the Honors College if they have met the following criteria:

- completed all major and degree requirements for graduation from the University;

- remained continuously enrolled in Honors courses until the semester of graduation or the completion of the Honors College curriculum (whichever comes first);
- completed a minimum of six credits of Honors courses per year of enrollment in the College; maintained an overall minimum FIU GPA of 3.3 and Honors (IDH) GPA of 3.0;
- remained in good standing by completing engagement pathway and volunteer service hour requirements every year in the Honors College.

Honor Policy

In the Honors College, the term "honor" refers to both academic achievement and character. Students in the College should therefore adhere to and will be held to the highest standards of personal accountability. Students whose behavior brings discredit upon themselves and/or the College or who commit acts of academic misconduct will be dismissed from the College.

Curriculum

Honors students pursue any major in the university while simultaneously completing an independent Honors College curriculum. The first-year addresses epistemology and ontology while stressing multi-disciplinary approaches to solving intellectual and practical problems. Students must additionally complete four courses from years two through four to graduate from the Honors College. Options include:

- Completing Honors seminars.
- Participating in an Honors Study Abroad program. These require a 3-credit preparatory seminar and a 3-credit multi-week international experience that goes well beyond cultural tourism to explore serious themes in depth.
- Completing an honors thesis or thesis-quality research project through the Advanced Research and Creativity in Honors (ARCH) program, culminating in a presentation at the Undergraduate Research Conference at FIU (URFIU).
- Completing an internship for credit.

Year One

IDH1001 Origin of Ideas **Honors Seminar I: The Origin of Ideas and the Idea of Origins (3)**

IDH1002 Honors Seminar II **Honors Seminar II (3)**

IDH1931 Honors Intro **Honors Introduction (1)**

Years Two through Four

Students must complete four courses from a combination of options one through four.

Option 1 – Honors Seminars

IDH2003 Honors Seminar III **Honors Seminar III: Inhabiting Other Lives – *GL* (3)**

IDH2004 Honors Seminar IV **Honors Seminar IV – *GL* (3)**

IDH3034 Honors Seminar V **Honors Seminar V: Aesthetics, Values, and Authority – *GL* (3);** may be repeated.

IDH3035 Honors Seminar VI **Honors Seminar VI – *GL* (3);** may be repeated.

(See website for this year's offerings: (**https://honors.fiu.edu/course-selection**)

Option 2 - Study Abroad

IDH4007 Honors Seminar Vii **Honors Seminar VII (3)**

IDH4008 Honors Seminar Viii **Honors Seminar VIII (3)**

Honors College Study Abroad

Students may choose to complete the honors curriculum through one of the College's study abroad programs. Students take a three-credit preparatory course before traveling abroad. The student will earn the remaining three credits of Honors during the trip. See **http://honors.fiu.edu/studyabroad/** for a list of current programs.

Option 3 - Advanced Research and Creativity in Honors (ARCH)

IDH4905 Honors Independ Stud **Honors Independent Study (0-3);** may be taken multiple semesters.

ARCH Research

The Advanced Research and Creativity in Honors (ARCH) program pairs students and faculty for cutting-edge research. Students must present their research at the annual Undergraduate Research Conference at FIU (URFIU) in the spring. Visit **https://honors.fiu.edu/arch** for more information, including the application.

Departmental Honors Thesis

Department honors courses, honors thesis, and/or capstone courses can be part of ARCH, with the proviso that students register their project with ARCH and present their work at the URFIU conference in spring.

Option 4 - Internship

IDH3940 Honors Internship **Honors College Internship (3);** can only be taken once.

Honors College Internship

Students may choose to complete the honors curriculum by participating in an internship. This structured practical training/work experience must be approved by the Honors College for course credit. In addition, international students must complete the Curricular Practical Training (CPT) application process through International Student & Scholar Services (ISSS).

Student Engagement and Service

Engagement can take many shapes and forms, from building more intentional relationships with faculty and playing in a music ensemble, to seeking service opportunities and being more academically involved. The events, workshops, and activities part of the Engagement Pathway are curated to enrich students' lives and give them an experience that transcends mere classroom learning. Students must complete **11** activities per academic year (including Summer B, Fall, and Spring). Visit **https://honors.fiu.edu/engagement** to learn more.

An important part of being a member of the Honors College is demonstrating leadership by serving the extended community. All Honors College students must complete at least **20** volunteer service hours per academic year (includes Summer B, Fall, and Spring). Qualifying community service activities include tutoring and other opportunities in Sweetwater, Honors service projects, university-wide projects, some kinds of religious service, and work with non-profit organizations. Service can be completed locally, internationally, in your hometown, or online. To learn more about tracking hours, visit **https://honors.fiu.edu/community-service**.

Graduate and Professional Pipeline Programs

The Honors College has pipeline programs with multiple professional and graduate schools, providing students an opportunity to know by the end of the sophomore year whether they will be accepted into the program of their choice (pending continued good academic performance and the outcome of pre-professional exams). These programs include:

- The Herbert Wertheim College of Medicine (FIU) Early Assurance Program

- The Lake Erie College of Medicine Early Acceptance Programs in Dentistry, Pharmacy, or Osteopathy

Honors College and the FIU Herbert Wertheim College of Medicine Baccalaureate/MD Program (3+4 Medical School Program)

This program with the Herbert Wertheim College of Medicine allows eligible students to begin medical school in lieu of their fourth year of undergraduate study, provided the student has completed all required courses for the BS in Biological Sciences undergraduate degree by the end of the junior year, as well as Honors College requirements. The first year of medical school qualifies as the final year of the bachelor's degree.

Courses

IDH1001 - Origin of Ideas
IDH1002 - Honors Seminar II: The Origin of Ideas and the Idea of Origins
IDH1931 - Honors Introduction
IDH2003 - Honors Seminar III: Inhabiting Other Lives

IDH3955 - Research Techniques: Applying Interdisciplinary Research in the Amazon
IDH3999 - HONORS Internship
IDH4007 - Honors Seminar VII
IDH4008 - Honors Seminar VIII
IDH4905 - Honors Independent Study
IDH6999 - HONORS Internship

Hospitality and Tourism Management Department

The Chaplin School of Hospitality and Tourism Management offers baccalaureate- and master's-level degrees in Hospitality Management, and a concentration in the Doctor of Business Administration (offered by the College of Business). These curricular offerings combine practical experience with classroom theory to assist the student in gaining the understanding, skills, and techniques needed to qualify for progressively responsible job opportunities and to achieve career goals in the hospitality and tourism industries.

With the cooperation of industry executives, the school has created an internship program which utilizes the South Florida-area hotels, resorts, restaurants, clubs, airlines, travel agencies, and cruise lines as practice labs for students.

An Executive Advisory Board—which includes outstanding executives in the lodging, food service, and tourism industries—works regularly with the faculty, staff, and students of the school to formulate and update a curriculum that is current, flexible, and related to the needs of the hospitality and tourism industries.

HMG7909 - Advanced Independent Study

Information Systems & Business Analytics/CBADM Department

The Department of Information Systems and Business Analytics (ISBA) provides students with the fundamental skills to serve as the critical link between the technical and business areas of an organization. ISBA offers undergraduate, graduate and Ph.D. level programs and courses in the areas of business analytics, artificial intelligence (AI), cybersecurity risk management, health informatics and analytics, and information systems. Academic programs are AI-infused and provide students with the knowledge and ability to design, develop, implement, and use information systems that allow organizations to solve problems effectively and leverage opportunities.

Students also take part in the ATOM Think Tank, FIU's first and only faculty-led technology consulting practice and student experiential learning program, housed in the ISBA department. Directed towards experiential education in technology and research, ATOM fosters industry collaboration and business partnerships to give students real-world experience both inside and outside the classroom, helping bridge the gap between theory and practice.

The department has a dedicated faculty with expertise spanning artificial intelligence, blockchain, business analytics, business process design, cybersecurity and risk management, database management, cloud data warehousing, global electronic commerce, health informatics and analytics, enterprise systems, project management, and systems analysis and design. Faculty have also demonstrated strong research productivity, publishing in leading journals and securing multiple research grants.

To explore all of the department's curricular offerings, click the "Programs" and "Courses" tabs above.

HIM6694 - Consumer Health Informatics
HIM6705 - Machine Learning for Healthcare Applications
HIM6706 - Integrating Artificial Intelligence in Healthcare: Strategies, Applications, and Ethics
HIM6858 - Health Informatics/Analytics Practicum
HIM6865 - Healthcare Database Systems
HIM6937 - Special Topics
HIM6950C - Healthcare AI Capstone
HIM7118 - Seminar on Health Informatics and Healthcare IT Research
ISM3011 - Artificial Intelligence & Information Systems in Organizations
ISM3012 - Introduction to Information Systems
ISM3153 - Business Process Analysis
ISM3230 - Business Application Programming
ISM3949 - Information Systems Internship I
ISM4113 - Systems Analysis and Design
ISM4151 - Managing Digital Services and Innovation
ISM4210 - Database Applications
ISM4211 - Database Systems and Physical Design
ISM4220 - Business Telecommunication Systems
ISM4264 - Cloud Computing for Business Analytics & AI
ISM4314 - Project Management
ISM4323 - Information Systems Security
ISM4400 - Managerial Information Analysis
ISM4402 - Business Intelligence and Reporting
ISM4420 - Data Mining and Machine Learning for Business
ISM4421 - Artificial Intelligence for Business
ISM4452 - Blockchain for Business
ISM4545 - Advanced Machine Learning For Business

ISM4573 - Data Governance
ISM4601 - Generative AI Applications in Business
ISM4949 - Information Systems Internship II
ISM6021 - Management of Information Systems
ISM6106 - Systems Analysis
ISM6128 - Business Process Design
ISM6136 - Business Analytics Applications
ISM6156 - Enterprise Information Systems
ISM6205 - Database Management
ISM6208 - Cloud Data Warehousing
ISM6217 - Data Management, Strategy, and Governance
ISM6251 - Emerging Information Technologies
ISM6267 - Secure Cloud Computing and Virtualization Management
ISM6305 - Information Systems Planning
ISM6307 - Management of the Information Systems Function
ISM6316 - Project Management
ISM6325 - Ethical Hacking for Business
ISM6326 - Information Security and Compliance
ISM6327 - Protecting and Defending Business Digital Assets
ISM6328 - Information Security Management
ISM6338 - Information Systems Strategy and Governance
ISM6349 - Digital Transformation Capstone
ISM6404 - Business Data Visualization and Reporting
ISM6418 - Business Data Exploration and Visualization
ISM6419 - Business Cybersecurity Data Visualization and AI
ISM6422 - Business Artificial Intelligence Applications
ISM6427 - Artificial Intelligence Strategy
ISM6429 - Business AI Capstone
ISM6465C - AI for Business Analytics
ISM6467 - Generative AI in Business
ISM6489 - E-business and Blockchain Applications
ISM6569 - Business Analytics Capstone
ISM6575 - Security Risk Management and Organizational Cyber Resilience
ISM6576 - Cybersecurity Governance and Strategy
ISM6642 - Machine Learning for Business Applications
ISM6644 - Python Fundamentals for Business Analytics
ISM6914 - Business Cybersecurity Capstone
ISM6930 - Special Topics in Management Information Systems
ISM6942 - MIS Internship
ISM7126 - Design Science Research
ISM7152 - Seminar on System Acquisition and Implementation
ISM7345 - Organizational and Strategic Applications of IS Research
ISM7406 - Business Analytics Research
ISM7906 - Independent Study for Doctoral Students
ISM7931 - Organizational Theories in IS Research
ISM7935 - Research in Information Systems
ISM7936 - Systems and Software Engineering Research
ISM7937 - Seminar on Research in Emerging ICT and their Implications
ISM7980 - Ph.D. Dissertation
ISM7981 - Dissertation Preparation

MAN4583 - Project Management
MAN5524 - Advanced Production Management
MAN6501 - Operations Management
QMB3003 - Quantitative Business Foundations
QMB3200 - Business Statistics and Analysis I
QMB3250 - AI Enhanced Business Statistics & Analysis I
QMB4250 - AI Enhanced Business Statistics & Analysis II
QMB4680 - Business Statistics and Analysis II
QMB6315 - Quantitative Analytical Methods in Business
QMB6357 - Business Statistical Analysis
QMB6603 - Analyzing and Leveraging Transactional Data
QMB6616 - Business Process & Operations Analysis
QMB7910 - Quantitative Research Methods in Business

Interdisciplinary Courses/SIPA Department

The Steven J. Green School of International and Public Affairs addresses the critical challenges confronting the world. Social sciences and humanities faculty members educate tomorrow's leaders—those who will advance global understanding, contribute to policy solutions, and promote international dialogue.

The school offers academic programs leading to the baccalaureate degrees in Asian Studies; Crime Science; Criminal Justice; Economics; Global Languages, Cultures, and Literatures (with French, Portuguese, and other dual major options); Global Studies (Area Studies, Anthropology, Geography, Sociology majors); History; International Relations; Political Science; Public Policy and Administration; Religious Studies; and Spanish.

The school offers academic programs leading to the master's degree in African and African Diaspora studies; Asian Studies; Global and Sociocultural Studies; Criminal Justice; Economics; Global Affairs; History; International Studies; Latin American and Caribbean Studies; Political Science; Public Administration; Religious Studies; and Spanish.

The school offers academic programs leading to the PhD in Global and Sociocultural Studies; Economics; History; International Crime and Justice; International Relations; Political Science; Public Affairs; and Spanish.

Programs

CONDRE:CFI - Undergraduate Certificate in Conflict and Dispute Resolution
CONRE:CFI - Graduate Certificate in Conflict Resolution and Consensus Building
CUBAN:CFI - Undergraduate Certificate in Cuban and Cuban-American Studies
GBLAFF:MA - Master of Arts in Global Affairs
GBLCYB:CFI - Undergraduate Certificate in Cybersecurity Intelligence and Information Policy
HAITST:CFI - Undergraduate Certificate in Haitian Studies
HUMRPT:CFI - Undergraduate Certificate in Human Rights and Political Transitions
LABOR:CFI - Undergraduate Certificate in Labor and Employment Relations
LACR:CFI - Graduate Certificate in Latin American and Caribbean Studies
LACRB:CFI - Undergraduate Certificate in Latin American and Caribbean Studies
LACRBST:MA - Master of Arts in Latin American and Caribbean Studies
MECAS:CFI - Graduate Certificate in Middle East and Muslim World Studies
MIECA:CFI - Undergraduate Certificate in Middle East and Muslim World Studies
NATLS:CFI - Undergraduate Certificate in National Security Studies
PUBPO:CFI - Undergraduate Certificate in Public Policy Studies
SUSTC:CFI - Graduate Certificate in Sustainable Communities

XLABOR:MN - Minor in Labor Studies

Courses

ECO6025 - Economic Policy Analysis for Global Governance
ECT3004 - Foundations of Vocational Education
ECT3183C - Course Planning
ECT3367 - Testing and Measurements in Vocational Education Subjects
ECT3463 - Instructional Materials in Vocational Industrial Education
ECT3815C - Vocational Education Laboratory Management and Safety
ECT4644 - Emerging Emphasis in Career Education
ECT4693 - Technical Applications in Occupational Areas
ECT4905 - Directed Study in Vocational/Technical Education
ECT4920 - Group Training and Development
ECT4931 - Special Topics
ECT4940 - Professional Problems in Vocational and Technical Education
ECT4941 - Student Teaching: Vocational Industrial Education and Technical Education
ECT4946 - Field Experience: Technical Updating
ECT4949 - Occupational Experiences
ECT5078 - Technical Education in American Society
ECT5386 - Vocational Educational Media
ECT5769 - Evaluation in Vocational and Technical Education
ECT5905 - Directed Study in Vocational/Technical Education
ECT5925 - Special Topics in Vocational Education
ECT5927 - Special Topics in Health Occupations Education
ECT6790 - Program Evaluation in Vocational Technical Education
ECT6925 - Special Topics in Vocational Education
ECT6930 - Seminar in Vocational Education
ECT6946 - Supervised Field Experience
ECT6947 - Internship in Vocational Education
ECT7964 - Comprehensive Doctoral Examination, Vocational and Technical Education Leadership
ECT7980 - Ed.D. Dissertation
ECT7985 - Dissertation Defense
ECW4103 - Instructional Strategies and Evaluation in Vocational and Technical Education
ECW4284 - Occupational Safety and Health (OSHA)
ECW4310 - Planning and Operating HOE Programs
ECW4311 - Special Teaching Lab in HOE Programs
ECW4312 - Instructional Strategies and Evaluation in HOE Programs
ECW4564 - Teaching Limited English Proficient Students in Vocational Education
ECW5008 - Cooperative Vocational Education Programs
ECW5168 - Curriculum Development in Vocational Education
ECW5196 - International Comparative Vocational Education
ECW5206 - Supervision and Coordination of Vocational Education Programs
ECW5315 - Improvement of Teaching Strategies in Health Occupations and Nursing Education
ECW5665 - Trends and Issues in Vocational Education
ECW5695 - Community Relations and Resources for Vocational Education
ECW6007 - Theory of Work and Careers in Vocational and Technical Education
ECW6105 - Program Planning in Vocational Education
ECW6205 - Administration of Vocational Education Programs
ECW6318 - Current Issues in Health Occupations and Nursing Education
ECW6596 - Vocational Education in a Multicultural Setting

EDF6367 - Interactive Conflict Resolution: A Third-Party Perspective
EUS4920 - Colloquium: European Studies
EVT4502 - Introduction to Vocational Special Needs Education
EVT4942C - Internship: Training and Development
EVT4990C - Credit by Examination
EVT5317 - Occupational Analyses in Health Occupations and Nursing Education
EVT6760 - Research in Vocational Education
HEE3302 - Curriculum Development in Vocational Home Economics
HEE4104 - Instruction in Vocational Home Economics
HEE4941 - Student Teaching in Home Economics
HEE4944 - Special Teaching Laboratory: Home Economics
HEE5335 - Trends and Issues in Home Economics Education
HEE5360 - Teaching Child Development
HEE5361 - Teaching Consumer Education and Family Economics
HEE5362 - Teaching Clothing and Textiles
HEE5363 - Teaching Family Life Education
HEE5364 - Teaching Housing and Home Furnishings
HEE5365 - Teaching Food and Nutrition
HEE5905 - Directed Study in Home Economics Education
HEE5927 - Special Topics in Home Economics Education
HEE6156 - Teaching Home Economics in Diverse Environments
HEE6915 - Research in Home Economics Education
HEE6928 - Special Topics in Home Economics Education
HEE6937 - Seminar in Home Economics Education
HES5319 - Teaching Health Education
HHD4420 - Home Furnishings and Equipment
HME4230 - Management of Personal and Family Resources
HME5225 - Problems of Home Management in Contemporary Society
HME5255 - Independent Living for the Handicapped
IDC3603 - Introduction to Cyber Operations & Policy
IDC3604 - Cyber Threat Intelligence I
IDC3605 - Cyber Threat Intelligence II
INR3133 - Intelligence and National Security
ISS3130 - Fundamentals of National Security
ISS3214 - Fundamentals of Globalization
ISS3222 - Special Topics in Foreign Policy
ISS3234 - Heavy Metal in Latin America
ISS3240 - World Prospects and Issues
ISS3280 - Canadian Government, Politics and Policy
ISS3613 - Issues in Global Cybersecurity Policy
ISS3652 - Cybersecurity and Globalization
ISS3653 - Foundations of Global Cybersecurity Policy
ISS3940 - Interdisciplinary Social Sciences - Public Policy Internship
ISS4234 - Cultural Expression
ISS4235 - The Cultural Body in the Americas: Critical Issues in Intercultural Understanding
ISS4284 - North America Integration
ISS4364 - Introduction to Structured Analytic Methods
ISS4385 - Effective Governmental Communication
ISS4614 - International Cybersecurity Law and Ethics
ISS4651 - Topics in Global Cybersecurity Policy

ISS4669 - Global Cybersecurity Strategies
ISS4930 - Topics in Globalization
ISS5127 - Urbanization and Disaster Risk
ISS5135 - National Security Essentials
ISS5237 - Latin American and Caribbean Cultural Expressions
ISS5238 - The Imaged Body: The Case of the Americas
ISS5267 - Global Solutions to Sex Trafficking
ISS5309 - Visual Methods in Social Sciences Research
ISS5388 - Communicating Analytically
ISS5654 - Foundations of Cybersecurity and Technology Policy
ISS5656 - Cyberspace and Globalization
ISS6111 - Leadership Dynamics in Global Risk and Corporate Responsibility
ISS6126 - Livelihoods Protection and Disaster Risk Reduction
ISS6128 - Global Health Security
ISS6137 - Disaster Risk Governance and Global Security
ISS6216 - Foundations of Globalization
ISS6219 - International Law and Global Security
ISS6245 - The Politics of Conflict and Development
ISS6246 - Global Economy and Industrial Sustainability
ISS6247 - Social Enterprise and Grassroots Innovation
ISS6248 - Public-Private Partnerships for Social Impact
ISS6249 - Migration, Security and Globalization
ISS6259 - Corporate Diplomacy
ISS6264 - Transitional Justice and Global and Human Security
ISS6266 - Democracy and Human Rights: From Theory to Practice
ISS6275 - Growth, Development, and Policy
ISS6305 - Research Methods and Design
ISS6306 - Writing Research Proposals
ISS6307 - Research Tools for Global Studies
ISS6317 - Social Research Quantitative Methods I
ISS6327 - Global Security Risks and the Private Sector
ISS6346 - Theory and Inquiry
ISS6387 - Analytical Writing and Presentation Skills
ISS6409 - Capstone Reporting
ISS6508 - Technology, Crime & Justice
ISS6609 - Quantitative Methods
ISS6610 - Global Economy, Finance and Institutions
ISS6615 - International Development Policy
ISS6630 - Markets, Governments and Public Policy
ISS6640 - Global Financial Crimes
ISS6650 - US-Russian Relations and Their Impact on Global Security
ISS6655 - Issues in Cybersecurity and Technology Policy
ISS6658 - Cyber Warfare and Strategy
ISS6660 - International Trade for Global Affairs
ISS6690 - Professionalization Seminar
ISS6917 - Directed Research Project in Applied Interdisciplinary Social Science
ISS6926 - Capstone
LAS3002 - Introduction to Latin American and Caribbean Studies
LAS3321 - Brazilian Popular Music in Cultural, Historical, and Political Context
LAS3322 - Introduction to Brazil

LAS3330 - Introduction to the Caribbean
LAS4294 - Contemporary Latin America and the Caribbean
LAS4900 - Independent Study
LAS4931 - Special Topics in Latin America and the Caribbean
LAS4940 - Internship in Latin American and Caribbean Studies
LAS4993 - Youth Violence, Gangs, and Public Policy Responses in Latin America
LAS5301 - Culture and Society in the Rio de la Plata
LAS5325 - Survey of Brazil
LAS5335 - Survey of the Caribbean
LAS5907 - Independent Study
LAS5920 - Teaching Latin American Studies
LAS5931 - Special Topics in Latin America and the Caribbean
LAS5933 - Graduate Seminar in Latin American Studies
LAS5955 - Haiti Study Abroad
LAS6003 - Survey Latin America
LAS6905 - Directed Research in Latin American and Caribbean Studies
LAS6934 - Research Seminar in Latin American and Caribbean Studies
LAS6942 - Internship in Latin American and Caribbean Studies
LAS6970 - Thesis
LBS3001 - Labor and Globalization
LBS3468 - Introduction to Mediation
LBS3480 - Introduction to Conflict Resolution
LBS3482 - Methods of Conflict Resolution
LBS3943 - Internship in Labor Studies
LBS4101 - Theories of the Labor Movement
LBS4110 - Technology and Work
LBS4150 - Contemporary Labor Issues
LBS4154 - Workers and Diversity
LBS4210 - Women and Work
LBS4260 - Union Leadership and Administration
LBS4401 - Labor Contract Negotiations
LBS4461 - Labor Dispute Resolution
LBS4483 - Organizational Conflict
LBS4484 - Applying Conflict Resolution Techniques
LBS4487 - Conflict Theories
LBS4501 - Labor Law
LBS4610 - Cross Cultural Dimensions of Latin American Labor Relations
LBS4653 - Labor Movements in Developing Countries
LBS4654 - Comparative and International Labor Studies
LBS4900 - Directed Study in Labor Studies
LBS4905 - Topics in Labor Studies
LBS4930 - Topics in Labor Studies
LBS4949 - Cooperative Education in Labor Studies
LBS5115 - Tech in the Workplace
LBS5155 - Workplace Diversity
LBS5215 - Women in the Workplace
LBS5406 - Collective Bargaining and Labor Relations
LBS5464 - Labor Arbitration

LBS5466 - Family Mediation

LBS5467 - Civil Mediation
LBS5485 - Fundamentals of Conflict Resolution
LBS5486 - The Dynamics of Conflict Management
LBS5488 - Org Conflict & Dispute Res
LBS5507 - Labor and Employment Law
LBS5658 - Labor Movements and Economic Development
LBS5930 - Topics in Labor Studies
LBS5931 - Topics in the Philosophy and Methods of Conflict Research
LBS6906 - Directed Individual Study
LBS6945 - Internship Labor Studies/Alternative Dispute Resolutions

Interdisciplinary Curriculum/CBADM Department

The College of Business (COB) creates enduring educational value for students, for alumni, and for the business, professional, and academic communities it serves:

• For students—whom the college prepares to succeed in a rapidly changing, technology-driven global business environment;

• For alumni—to whom the college provides opportunities for continuing professional development and a legacy that appreciates as its excellence grows;

• For the business and professional communities—to whom the college offers knowledgeable graduates, educational programs, research, and collaborative projects;

• For the academic community—to whom the college brings new knowledge through high-quality research and the development of future scholars.

The college's most noteworthy teaching and research expertise lies in the business arenas linking South Florida, Latin America, and the world economy. The college offers undergraduate, graduate, professional education, customized training, and executive education programs to enterprises around the world.

In all of its programs, the college strives to instill in students a profound understanding of the changing nature of international business in an integrated and digital global economy. Curricular offerings ensure that students are well versed in the impact of information technology on how enterprises are organized and managed, and on how products and services are created and marketed. Students develop a solid grasp of business processes, the ability to think critically and to solve problems ethically, and the sense to conduct oneself with integrity and within the context of social and environmental responsibility. The college fosters a commitment to lifelong learning in a dynamic, complex, and competitive world.

College faculty engage in basic and applied research and in instructional development to contribute not only to the general knowledge base in the field of business but also to the ways in which this knowledge is created and shared.

The college boasts a state-of-the-art information technology infrastructure that enables it to provide leading-edge instruction and research, including online course delivery. At the same time, this information technology investment supports the college's ongoing curricular innovation in related fields (e.g., business analytics, cybersecurity, and logistics).

Programs

BUSADM:DBA - Doctorate in Business Administration
BUSADM:PHD - Doctor of Philosophy in Business Administration
FLEX:MBA - Flex Master of Business Administration
INT:MBA - International Master of Business Administration
PROF:MBA - Professional Master of Business Administration

XBUSN:MN - Minor in Business for Non-Business Students

Courses

GEB3003 - Career Management
GEB3999 - College of Business Internship
GEB6528 - Organizational Processes that Deliver Economic and Social Value
GEB6529 - Creating Economic and Social Value
GEB7876 - Marketing and Behavioral Theory
GEB7892 - Theory Development
GEB7910 - Advanced Quantitative Research Methods in Business
GEB7911 - Qualitative Research Methods in Business
GEB7912 - Experiments and Survey Design
GEB7915 - Advanced Qualitative Research Methods in Business
GEB7918 - Philosophy and Process of Applied Business Research
MAN6097 - Managerial Decision-Making in Health Economics
MAN6098 - Management of Healthcare Finance and Reimbursement
MAN6356 - Professional Development Seminar I
MAN6357 - Professional Development Seminar II
MAN6358 - Professional Development Seminar III
MAN6636 - Global Megatrends, Geopolitics, & Political Economy
MAN6891 - Leadership Development Seminar I
MAN6892 - Leadership Development Seminar II
MAN6893 - Leadership Development Seminar III
MAN6898 - Leadership Development Seminar IV
MAN6974 - Master's Project in Management

Interior Architecture/CARTA Department

The Department of Interior Architecture offers graduate-level programs and courses in interior architecture and design. These curricular offerings provide students with a value-added education that consists of small student-to-faculty ratios, studio facilities where students have their own workspaces, study abroad options, and digital and fabrication labs offering advanced technology. The department offers the ideal setting for students to become actively involved in learning and exploring the current and future roles of the interior design profession within a global society. More particularly, this context challenges students to critically investigate the diverse roles of interior design and interior architecture and inspires them to explore new avenues of thought and attitudes regarding human environments.

Faculty represent the variety of disciplines required to offer an interior architecture program: studio, art history, art education, and interior architecture with professional experience and teaching competence. Faculty are involved in numerous exhibitions and events across the university and local communities that foster visual and aesthetic knowledge and understanding. Faculty interact with the design community through involvement in professional organizations, fundraising activities, community service work, and advisory boards.

To explore all of the department's curricular offerings, click the "Programs" and "Courses" tabs above.

Programs

CRSHYD:CFI - Graduate Certificate in Cruise Ship and Super Yacht Design
INTA:MA - Master of Arts in Interior Architecture
INTA:MIA - Master of Interior Architecture

INTAXL:MIA - Accelerated Master of Interior Architecture

Courses

IND1932 - Special Topics/Interior Design I
IND2022 - Introduction to Interior Architecture
IND2237 - Interior Architecture Design Studio III
IND2238 - Interior Architecture Design Studio IV
IND2420 - Materials and Methods for Interior Architecture
IND3131 - History of Modern Interior Design
IND3215 - Interior Design 5
IND3216 - Interior Design 6
IND3306 - Fundamental Digital Media for Interior Architecture
IND3308 - Visual Notation for Interior Design
IND3451C - Interior Design Construction Drawing 1
IND3469 - Computer Applications in Interior Design
IND3930 - Special Topics Design Studio
IND3936 - Cejas Eminent Scholar Seminar
IND4225 - Interior Design 7
IND4226 - Interior Design 8
IND4303 - Interior Architecture Visual Communication
IND4311 - Color Theory
IND4441C - Furniture Design
IND4455C - Advanced Construction Documents
IND4501 - Interior Design Practice
IND4543 - Design at Sea
IND4627 - Sustainable Interior Design Practices
IND4904 - Service Learning and Independent Study
IND4940 - Interior Design Internship
IND4943C - Programming
IND5138 - History of Modern Interiors
IND5205 - Fundamentals of Marine Vessel Design
IND5235 - Formative Studio 1
IND5239 - Topics in Interior Architecture
IND5285 - Design Foundations
IND5319 - Visual Notation for Interior Design
IND5325 - Color Theory and Application for the Built Environment
IND5418 - Design at Sea
IND5427 - Construction Documents in Interior Architecture
IND5428 - Materials and Methods
IND5438 - Lighting Design
IND5445C - Furniture Design
IND5454L - Advanced Construction Documents in Interior Architecture Lab
IND5475 - Computer Applications in Design
IND5477 - Computer Applications in Design II
IND5485C - Advanced Construction Documents in Interior Architecture
IND5486 - Materials for Interiors
IND5508 - Professional Practice
IND5509 - Personal Branding and Career Preparation
IND5602 - Healthcare Design 1
IND5603 - Healthcare Design Studio 2

IND5612 - Environmental Systems for Healthcare Environments
IND5615 - Building Systems for Interiors
IND5616 - Environment and Behavior Theory
IND5617 - Health Care Theory
IND5625 - Interior Architecture Theory II
IND5626 - Project Programming
IND5628 - Sustainable Practices in Interior Architecture
IND5629 - Computer Applications in Design III
IND5633 - Thesis Literature Review
IND5637 - Design Research Methods
IND5645 - Structures 1
IND5645L - Structures 1 Lab
IND5937 - Special Topics
IND5939 - Design Thinking and Creative Process
IND5941 - Internship Experience
IND5948 - Interior Architecture Graduate Internship
IND5950 - Interior Architecture Travel, Culture, and Design
IND6255 - Graduate Design 1
IND6256 - Graduate Design 2
IND6257C - Graduate Design 3
IND6258C - Graduate Design 4
IND6259C - Graduate Design 5
IND6616C - Interior Architecture Theory I
IND6639 - Research Methods
IND6906 - Independent Study
IND6970 - Masters Project
IND6971 - Master's Thesis

International Business/CBADM Department

The Department of International Business offers undergraduate- and graduate-level programs and courses in international business. These curricular offerings provide students with opportunities to engage in experiential learning activities and to gain exposure to real-world international business environments. The programs instill in students an understanding of the changing nature of international business in an integrated and digital global economy.

The department is guided by world-renowned faculty members who are often nationally ranked for the number of publications in the Journal of International Business Studies, the leading journal in the field. In addition to the international business expertise of its faculty, the graduate program features lectures and seminars by multinational, foreign, and U.S.-based corporate business leaders.

To explore all of the department’s curricular offerings, click the “Programs” and “Courses” tabs above.

Journalism and Media/CARTA Department

The Lee Caplin School of Journalism and Media offers undergraduate- and graduate-level programs and courses in the areas of journalism, broadcasting, digital TV and game/animation development. Undergraduate majors include: Animation Media, Digital Broadcast Journalism, Digital and Interactive Media, Digital Journalism, Digital TV and Multimedia Production, Game Media, and Sports Media. The school offers professional, hands-on programs that train the next generation of journalists, broadcasters, and digital professionals for successful careers in media.

The school's faculty members bring significant professional experience in journalism, broadcasting and digital media, and include individuals who have worked with national and international media organizations like CNN, The New York Times, Univision, and Telemundo; local media organizations like The Miami Herald, The Sun-Sentinel, and Miami New Times; and local FOX, NBC and Univision affiliates. These distinguished faculty teach students to think critically, write professionally, and incorporate the most up-to-date technologies needed to produce compelling broadcast and multiplatform journalism in the 21st century. Faculty members are engaged in scholarly research and creative activities in the areas of climate change, social media, media law and ethics, and international media.

To explore all of the school’s curricular offerings, click the “Programs” and “Courses” tabs above.

Programs

CDFILM:CFI - Undergraduate Certificate in Creative Digital Filmmaking
DIGCOM:BS - Bachelor of Science in Digital Communication and Media
DIGCOM:CFI - Undergraduate Certificate in Digital Communication and Media
GBLMC:CFI - Professional Certificate in Global Media Communication
MASCOMM:MS - Master of Science in Mass Communication
SPRTMD:CFI - Undergraduate Certificate in Sports Media
VISPR:CFI - Undergraduate Certificate in Visual Production

Courses

DIG2220 - Editing for Animation
DIG2308 - Digital Environments for Animation
DIG2321 - Introduction to 3D Modelling
DIG2370 - Dynamic Rigging for Animation
DIG2461 - Conceptual Storytelling
DIG2592 - User Interface Design
DIG2721 - Intro to Game Design and Development
DIG2729 - Game Engine Programming
DIG3001 - Introduction to Digital Media
DIG3110 - Intro to Web Production
DIG3142 - Sports Journalism and Social Media
DIG3146 - The Social Media Audience
DIG3153 - Writing for Film
DIG3181 - Interactive Visualizations

DIG3253 - Digital Audio and Social Media Production
DIG3306 - Intro to 3D Content Creation
DIG3376 - Animation Media Lab 1: 3D Lighting & Shading
DIG3715 - Game Lab 1: Game Engines
DIG3727 - Game Workshop 1: Game Level Design
DIG3922 - Animation Media Workshop1: Character Rigging
DIG4097 - Digital Media Entrepreneurship
DIG4287 - Sound Design for Visual Media
DIG4293 - Multimedia Production 2
DIG4352 - Animation Media Lab 2: Digital Compositing and Visual Effects
DIG4394 - Motion Graphics for Digital Media
DIG4413 - Digital Cinematography
DIG4552 - Advanced Multimedia Production
DIG4770 - Game Lab 2: AI for Game Design
DIG4800 - Digital Theories
DIG4920 - Animation Media Workshop 2: Advanced Character Motion Development
DIG4940 - Digital Media Internship
DIG4950 - Game Media Project
DIG4951 - Animation Development Project
DIG4952 - Game & Animation Media Capstone
DIG4961 - Game Workshop 2: Building Game Environments
DIG5167 - Social Media Metrics and Evaluation
DIG5346 - VFX Integration & Compositing
DIG5356 - Real-Time Pipeline Planning
DIG5367 - Cinematic Story Development & Animatics
DIG5369 - Cinematic Character Animation
DIG5398 - Motion Capture for Game Engines and Cinematics
DIG5416 - AI in Cinematic Production
DIG5438 - Strategic Storytelling and Digital Content Creation
DIG5556 - Advanced Modeling for Production
DIG5567 - Game Asset Development 1
DIG5569 - Digital Media Management
DIG5629 - Game Programming & Scripting
DIG5723 - Game Engine Pre-Production
DIG5795 - Game UX/UI Design
DIG5796 - Game Design Theory & Systems
DIG6368 - Advanced Rigging Systems
DIG6550 - Game Production Workflows
DIG6568 - Game Asset. Development 2
DIG6629 - Multiplayer & Networking for Games
DIG6655 - AI in Game Development
DIG6724 - Game Engine Post-Production
DIG6794 - Advanced Game Systems & Mechanics
IDS2301 - How We Know What We Know
JOU2100 - Introduction to Reporting & Writing
JOU3003 - Introduction to Journalism
JOU3117 - Digital Journalism
JOU3121 - Finding Stories in Data
JOU3188 - Reporting in a Multi-Ethnic Community
JOU3202 - Editing and Layout

JOU3300 - Advanced Digital Journalism
JOU3313 - Multiplatform Sports Writing
JOU3314 - Environmental Journalism: Communicating Environmental Issues in South Florida
JOU3317 - Field Reporting for Sports Broadcast
JOU4101 - In-Depth Reporting
JOU4108 - Enterprise Reporting
JOU4341C - Digital Journalism Capstone
JOU4368 - Artificial Intelligence in Journalism
JOU4447 - Magazine Editing and Production
JOU4951 - Spanish Media Writing
JOU5806 - Student Media Advising
JOU6118 - Investigative Journalism
JOU6119 - Advanced News Writing
JOU6183 - Judicial System Reporting
JOU6185 - Reporting Social and Ethnic Issues
JOU6186 - Covering Social and Ethnic Issues
JOU6187 - Covering City III
JOU6352 - Advanced Business Feature Writing
JOU6355 - Applied Research Methods in Business Journalism
JOU6358 - Business Reporting: Public Affairs
JOU6931 - Seminar on Special Topics
MMC3003 - Journalism + Media Orientation
MMC3113 - Sports Journalism in Contemporary Society
MMC3123 - Writing for Media
MMC3128 - Evolution of Sports Media Podcasting
MMC3132 - Ready for Prime Time Presentation Skills
MMC3250 - The Communication and Media Industry
MMC3303 - Global Media and Society
MMC3451 - Sports Information Research and Data
MMC3650 - Media and Sustainability
MMC3932C - Intense Pods
MMC4200 - Law And Ethics
MMC4302 - Social Media and Audience Analysis
MMC4304 - Strategic Communication Seminar: Multicultural Marketing Communication
MMC4410 - Integrated Communications Campaigns
MMC4500 - Media History
MMC4541 - E-Cinema and TV Aesthetics
MMC4609 - Integrated Communication Research Strategy
MMC4631 - Audience Analysis, Public Opinion and New Media
MMC4905 - Independent Study
MMC4936 - Special Topics
MMC4940 - Media Practicum
MMC4941C - Journalism + Media Internship
MMC4944 - South Florida Media Network Bureau Experience
MMC4945 - Communication Internship
MMC5268 - Communication in the Digital Age
MMC5306 - Global Communications
MMC5409 - Science, Health Environment and Risk Communication
MMC5440 - Applied Research Methods in the Mass Media
MMC5655 - Mass Communication and the Environment

MMC5932 - Special Topics Seminar
MMC5946C - Journalism and Media Internship
MMC6108 - Theories of Mass Communication and Writing
MMC6135 - Multimedia Production and Design
MMC6213 - Ethics and Social Responsibility
MMC6257 - Media Management and Entrepreneurship
MMC6402 - Theories of Mass Communication
MMC6412 - Applied Media Communication Skills
MMC6416 - Media Planning
MMC6736 - Social Media for Communicators
MMC6900 - Independent Study
MMC6940 - Graduate Internship in Strategic Communication
MMC6950 - Mass Communication Professional Project
MMC6951C - Professional Project II
MMC6970 - Mass Communication Master's Thesis
RTV3007 - Introduction to Television
RTV3301 - Broadcast News Reporting
RTV3503 - Sports Broadcasting and Performance
RTV3511 - Video Studio Production
RTV3531 - Multimedia 1
RTV3571 - Video Post Production
RTV3671 - Video Directing
RTV3803 - Studio Management
RTV4101 - Writing for Video Production
RTV4320 - Electronic News Gathering
RTV4324 - Digital Broadcast Journalism Capstone
RTV4332 - Long-Format TV and Radio
RTV4350 - Live Newscast Producing
RTV4521 - Videography Advanced
RTV4661C - Advanced Video Production Workshop
RTV6309 - Visual Storytelling and Production
RTV6468C - Studio Production Practicum
RTV6603 - Visual Storytelling and Production II
VIC3400 - Visual Design for Globalized Media
VIC4001 - News Visualization
VIC5205 - Trends in Graphics and Design
VIC6005 - Web Design and Data Visualization

Knight Foundation School of Comptg & Info Sciences Department

The Knight Foundation School of Computing and Information Sciences offers undergraduate- and graduate-level programs and courses in the areas of artificial intelligence, computer science, cybersecurity, data science, information technology, and telecommunications and networking. These curricular offerings prepare students for business, industry, and government positions, or for advanced study. The school's programs include a mix and balance of application-oriented course work and study of the underlying theory and principles.

Faculty research seeks to advance the fields of computer science, pursue IT industry collaboration and technology transfer, and discover solutions to societal problems faced by public- and private-sector partners. Research interests include the integration of computing in fields like computational sciences, bioinformatics, disaster management, Geographical Information Systems, cloud computing, social networks, cybersecurity, and highly reliable systems.

To explore all of the school's curricular offerings, click the "Programs" and "Courses" tabs above.

School Website

Programs

COMPSC:BA - Bachelor of Arts in Computer Science
COMPSC:BS - Bachelor of Science in Computer Science
COMPSC:MS - Master of Science in Computer Science
COMPSC:PHD - Doctor of Philosophy in Computer Science
CYBER:BS - Bachelor of Science in Cybersecurity
CYBER:MS - Master of Science in Cybersecurity
DATASC2:BS - Bachelor of Science in Data Science and Artificial Intelligence
DATASC:MS - Master of Science in Data Science and Artificial Intelligence
FUNDCS:CFI - Computer Science Fundamentals
FUNDIT:CFI - Information Technology Fundamentals
IT:BA - Bachelor of Arts in Information Technology
IT:BS - Bachelor of Science in Information Technology
IT:MS - Master of Science in Information Technology
XCOMPSC:MN - Minor in Computer Science
XCYBER:MN - Minor in Cybersecurity

Courses

CAI4002 - Artificial Intelligence
CAI4105 - Introduction to Machine Learning
CAI4203 - Introduction to Deep Learning
CAI4304 - Natural Language Processing
CAI4664 - AI Fairness for Responsible Intelligence
CAI4775 - Advanced Computational Methods in Health and Biomedical Data
CAI4852 - AI and Neuromorphic Hardware: Design and Security
CAI5026 - Artificial Intelligence Ethics
CAI5227 - Visual Intelligence
CAI5607 - Generative Artificial Intelligence
CAI5668 - Artificial Intelligence Fairness for Responsible Intelligence
CAI5738 - Foundations of Blockchain Technologies
CAI5747 - Artificial Intelligence Security Fundamentals
CAI5777 - Advanced Algorithmic and Machine-Learning for Health and Biomedical Data
CAI5887 - Human-Artificial Intelligence Interaction
CAI6225 - Deep Learning
CAP2752 - Data Science for All
CAP2757 - Introduction to Data Science
CAP3764 - Advanced Data Science
CAP4052 - Introduction to Game Design & Development
CAP4104 - Human-Computer Interaction
CAP4453 - Introduction to Robot Vision
CAP4506 - Introduction to Game Theory

CAP4710 - Principles of Computer Graphics
CAP4770 - Introduction to Data Mining
CAP4830 - Fundamentals of Modeling & Simulations
CAP5109 - Advanced Human-Computer Interaction
CAP5507 - Game Theory
CAP5510C - Introduction to Bioinformatics
CAP5602 - Introduction to Artificial Intelligence
CAP5610 - Introduction to Machine Learning
CAP5627 - Socially Interactive Agents
CAP5640 - Graduate Introduction to Natural Language Processing
CAP5701 - Adv Comp Graphics
CAP5738 - Data Visualization
CAP5768 - Introduction to Data Science
CAP5769C - Practical Data Science
CAP5771 - Principles of Data Mining
CAP6619 - Advanced Topics in Machine Learning
CAP6736 - Geometric Modeling and Shape Analysis
CAP6778 - Advanced Topics in Data Mining
CDA3102 - Computer Architecture
CDA3103 - Fundamentals of Computer Systems
CDA4101 - Structured Computer Organization
CDA4625 - Introduction to Mobile Robotics
CEN3721 - Introduction to Human-Computer Interaction
CEN4010 - Software Engineering I
CEN4021 - Software Engineering II
CEN4072 - Fundamentals of Software Testing
CEN4083 - Introduction to Cloud Computing
CEN5011 - Advanced Software Engineering
CEN5064 - Software Design
CEN5076 - Software Testing
CEN5079 - Software Vulnerabilities and Security
CEN5082 - Parallel Computing Systems
CEN5087 - Software and Data Modeling
CEN6070 - Software Verification
CGS1540 - Introduction to Databases for All
CGS1920 - Introduction to the Field of Computing
CGS2060 - Introduction to Microcomputers
CGS2100 - Intro to Microcomputer Applications for Business
CGS2518 - Computer Data Analysis
CGS3095 - Technology in the Global Arena
CGS3559 - Using The Internet
CGS3767 - Computer Operating Systems
CGS4285 - Applied Computer Network
CGS4854 - Website Construction and Management
CGS5166 - Introduction to Bioinformatics Tools
CIS1940 - Internship for Teaching Computational Thinking in K-12
CIS3080 - Cloud Essentials
CIS3590 - Internship Ready Software Development
CIS3900 - Independent Study
CIS3930 - Special Topics

CIS3950 - Capstone I
CIS4203 - Principles and Practices of Digital Forensics Science
CIS4225 - Cybersecurity Risk and Threat Analysis
CIS4226 - Offensive Security
CIS4257 - Empowering Emerging Tech Talent
CIS4332 - Applied IT Security
CIS4365 - Enterprise Cybersecurity Policies and Practices
CIS4431 - IT Automation
CIS4526 - IT Project Management
CIS4641 - Cloud DevOps
CIS4651 - Cloud Deployment and Operations
CIS4731 - Fundamentals of Blockchain Technologies
CIS4911 - Senior Project
CIS4912 - Research Experience for Undergraduate Students
CIS4930 - Special Topics
CIS4947 - Career Readiness
CIS4951 - Capstone II
CIS5027 - Computer Systems Fundamentals
CIS5207 - Advanced AI/ML Techniques for Digital Forensic Applications
CIS5346 - Storage Systems
CIS5370 - Principles of Cybersecurity
CIS5371 - Introduction to Cryptography
CIS5373 - Systems Security
CIS5374 - Security and Privacy: Attacks and Defenses
CIS5900 - Independent Study
CIS5910 - Project Research
CIS5931 - Special Topics
CIS6329 - Research Methods in Computer Science
CIS6900 - Independent Study
CIS6930 - Advanced Special Topics
CIS6931 - Special Topics: Advanced Topics in Information Processing
CIS6933 - Computer Science Seminar
CIS6970 - Thesis
CIS7910 - Graduate Research
CIS7980 - Ph.D. Dissertation
CNT4182 - Mobile and IoT Cybersecurity Policies and Practices
CNT4403 - Computing and Network Security
CNT4504 - Advanced Network Management
CNT4513 - Data Communications
CNT4603 - Windows System Administration
CNT4713 - Net-centric Computing
CNT5109 - Computing for Smart Sensing
CNT6207 - Distributed Process
COP1000 - Introduction to Computer Programming
COP2047 - Python Programming I
COP2210 - Programming I
COP2210L - Lab for Computer Programming I
COP2250 - Java Programming
COP2270 - Secure C Programming For Engineers
COP3045 - Python Programming II

COP3337 - Computer Programming II
COP3410 - Computational Thinking
COP3530 - Data Structures
COP3538 - Data Structures Fundamentals
COP3804 - Intermediate Java Programming
COP3835 - Designing Web Pages
COP3949 - Cooperative Education in Computing
COP4005 - Windows Programming for IT Majors
COP4226 - Advanced Windows Programming
COP4338 - Systems Programming
COP4520 - Introduction to Parallel Computing
COP4534 - Algorithm Techniques
COP4555 - Principles of Programming Languages
COP4604 - Advanced Unix Programming
COP4610 - Operating Systems Principles
COP4655 - Mobile Application Development
COP4703 - Information Storage and Retrieval Concepts
COP4710 - Database Management
COP4751 - Advanced Database Management
COP4813 - Web Application Programming
COP4814 - Component-Based Software Development
COP4857 - Web Systems Development
COP4949 - Cooperative Education in Computing 2
COP5614 - Operating Systems
COP5621 - Compiler Construction
COP5725 - Principles of Database Management Systems
COP5949 - Cooperative Education in Computer Science
COP6727 - Advanced Database Systems
COT3100 - Discrete Structures
COT3510 - Applied Linear Structures for Computing
COT3541 - Logic for Computer Science
COT4431 - Applied Parallel Computing
COT4521 - Introduction to Computational Geometry
COT4601 - Fundamentals of Quantum Computing
COT4604 - Introduction to Quantum Information and Probability
COT5310 - Theory of Computation I
COT5407 - Introduction to Algorithms
COT5432 - Applied Parallel Computing
COT5443 - Optimization Methods for Computing: Theory and Applications
COT5520 - Computational Geometry
COT5600 - Quantum Algorithms
COT5603 - Advanced Quantum Information and Probability
COT6405 - Analysis Of Algorithms
COT6936 - Topics in Algorithms
CTS1500 - Emerging Topics in Digital Life
CTS4348 - Unix System Administration
CTS4408 - Database Administration
CTS4743 - Enterprise IT Troubleshooting
IDC1000 - Computer Science for Everyone
IDC2002 - Artificial Intelligence for All

IDC2020 - Introduction to Cryptocurrencies
IDC4010C - Computer Science Education for Elementary School Children
IDC4011C - Computer Science Education for Middle School Children
IDC4012C - Computer Science Education for High School Children
IDC5007 - Concepts of Artificial Intelligence
IDC5013 - Computer Science for Middle School Teachers
IDC5014 - Computer Science for High School Teachers
IDC6940 - Capstone Course in Data Science
IDS2916 - Vertically Integrated Projects - A
IDS3917 - Vertically Integrated Projects - B
IDS4918 - Vertically Integrated Projects - C
TCN5010 - Telecommunications Technology and Applications
TCN5030 - Computer Communications and Networking Technologies
TCN5060 - Telecommunications Software and Methodologies
TCN5080 - Secure Telecommunications Transactions
TCN5440 - Software Development for Telecommunication Networks
TCN5445 - Telecommunication Network Programming
TCN5455 - Information Theory
TCN5640 - Telecommunications Enterprise Planning and Strategy
TCN6260 - Internetworking
TCN6270 - Mobile and Wireless Networks
TCN6275 - Mobile Computing
TCN6430 - Networks Management and Control Standards
TCN6450 - Wireless Information Systems
TCN6820 - Industrial Development of Telecommunications
TCN6880 - Telecommunications Public Policy Development and Standards

Landscape Architecture + Env & Urban Design/CARTA Department

The Department of Landscape Architecture and Environmental and Urban Design offers graduate-level programs and courses in landscape architecture and design. These curricular offerings provide opportunities for students to learn how to serve and lead the community through the aesthetic, meaningful, and sustainable design of the physical environment. The programs focus on design and draw from art, science, and technology via a rich design studio sequence that benefits from small student-to-faculty ratios, cutting- edge technology and workspaces, and study abroad options. Students explore environmental, ecological, and urban issues, proposing innovative solutions in the design of public spaces, infrastructure, urban planning, industrial reclamation, ecotourism, environmental mitigation, and many other areas at the center of the relationship between human beings and their surroundings.

The faculty implement architecture education that emphasizes the preservation and transformation of the natural and cultural environments through local, regional, and global engagement. The excellence of the faculty is reflected in their numerous local, state, and national awards, and their diversity reflects that of the surrounding community and university. The university's location in South Florida, a thriving global area with strong ties to Latin America and the Caribbean, provide unparalleled opportunities to study design in a diverse and challenging cultural and economic context.

To explore all of the department's curricular offerings, click the "Programs" and "Courses" tabs above.

Department Website

Programs

LAND:MLA - Master of Landscape Architecture
LANDXL:MLA - Accelerated Master of Landscape Architecture
URBD:MA - Master of Arts in Urban Design

Courses

LAA3212 - Landscape Documentation
LAA3232 - Theory of Planting Design
LAA3248 - Catalysts of the Urban Canvas
LAA3333 - Site Analysis and Design
LAA3341 - Visual Notation in Landscape Architecture I
LAA3350C - Landscape Architecture Design 5
LAA3354C - Landscape Architecture Design 6
LAA3372L - Computer Applications in Landscape Architecture
LAA3377C - GIS Applications in Landscape Modeling
LAA3420 - Lscp Construction
LAA3430 - Landscape Structures
LAA3602 - South Florida Landscapes
LAA3712 - Image of the Garden: Nature and Culture
LAA3802 - Landscape Development
LAA3905C - Special Topics Design Studio
LAA3936 - Cejas Eminent Scholar Seminar
LAA4210 - Professional Office Practice
LAA4230 - Theory of Landscape Architecture
LAA4242 - Modern Landscape Architecture
LAA4344 - Italian Design and Culture
LAA4345 - Landscape Architecture of the City
LAA4354C - Landscape Architecture Design 7
LAA4355C - Landscape Architecture Design 8
LAA4375C - Computer Modeling
LAA4546 - Tropical Landscapes
LAA4940 - Landscape Architecture Internship
LAA5233 - Theory of Planting Design
LAA5235 - Theory of Landscape Architecture
LAA5249 - Catalysts of the Urban Canvas
LAA5331 - Site Analysis and Design
LAA5346 - Visual Notation in Landscape Architecture I
LAA5371 - Computer Practices in Landscape Architecture 1
LAA5374 - Computer Practices in Landscape Architecture 2
LAA5378 - GIS Applications in Landscape Modeling
LAA5381 - Computer Practices in Landscape Architecture 3
LAA5422 - Landscape Development
LAA5423 - Landscape Construction
LAA5425 - Landscape Documentation
LAA5541 - South Florida Landscapes
LAA5605 - Design Foundations
LAA5653 - Landscape Architecture Graduate Design 1
LAA5716 - History of Landscape Architecture
LAA5940 - Landscape Architecture Internship

LAA5945 - Internship Experience
LAA6215 - Professional Practice and Entrepreneurship in Landscape Architecture
LAA6245 - Theory Urban Design
LAA6247 - Modern Landscape Architecture
LAA6347 - Italian Design and Culture
LAA6348 - Landscape Architecture of the City
LAA6363 - Landscape Architecture Graduate Design 5
LAA6382 - Analysis Methods
LAA6390 - Digital Landscapes: Techniques in Landscape Representation
LAA6521 - Tropical Landscapes
LAA6654 - Landscape Architecture Graduate Design 2
LAA6655 - Landscape Architecture Graduate Design 3
LAA6656 - Landscape Architecture Graduate Design 4
LAA6905 - Independent Study
LAA6910 - Graduate Seminar
LAA6916 - Research Methods
LAA6936 - Special Topics
LAA6970 - Masters Project
LAA6971 - Master's Thesis

Law/CLAW Department

The College of Law serves the citizens of Florida, and particularly those of South Florida, by offering an outstanding, state-of-the-art legal education that leads the nation in bar passage, teaching quality, and experiential offerings. To increase access, the college offers both full-time and part-time programs, featuring courses in both in-person and distance education modalities.

In addition to the Juris Doctor (JD), the college offers a Juris Master (JM), a Master of Laws (LLM), and a Master of Science (MS) in the Law of Technology. The college also offers certificates in the areas of environmental law, intellectual property, and military law.

Through non-credit programming, the Legal Studies Institute (LSI) provides legal assistant education to meet the needs of the community. The LSI provides exceptional legal training and structures its programs to accommodate the needs of working professionals, and strives to develop highly motivated legal professionals who can enhance and elevate both the local and national legal communities.

LAW6941 - Legal Clinic
LAW6942 - Consumer Bankruptcy Externship
LAW6943 - Carlos A. Costa Immigration and Human Rights Clinic

LAW6945 - Criminal Externship Placement
LAW6947 - Semester in Practice Program
LAW6948 - Business, Innovation and Technology Clinic
LAW6949 - Civil Externship Placement
LAW6950 - Law Review: Board of Editors
LAW6956 - Law Review: Senior Members
LAW6957 - Law Review: Staff Members
LAW6958 - Board of Advocates
LAW6981 - Immigrant Children's Clinic
LAW6984 - Judicial Externship Placement
LAW6987 - International Law Internship
LAW7064 - The Law of Corporate Finance
LAW7065 - Mergers and Acquisitions
LAW7070 - Business Planning
LAW7085 - Banking Law
LAW7200 - United States Law I: Methods, Sources, and Structure
LAW7225 - Transnational Disputes: Practicing Law in the Era of Globalization
LAW7258 - Comparative Business Law
LAW7262 - International Trade Law and Policy
LAW7268 - International Environmental Law
LAW7285 - Profesion Juridica Comparada (Comparative Legal Profession)
LAW7303 - Florida Civil Practice
LAW7308 - Complex Litigation
LAW7364 - Advanced Trial Advocacy
LAW7373 - Appellate Procedure
LAW7475 - Ocean and Coastal Law
LAW7490 - Comparative Perspective on the Regulatory State: Doing Business and Environmental Protection
LAW7503 - Florida Constitutional Law
LAW7510 - Civil Rights
LAW7511 - First Amendment
LAW7549 - Employment Discrimination
LAW7575 - Entertainment Law
LAW7660 - Tax Policy
LAW7707 - Cybersecurity and Privacy Law
LAW7804 - United States Law II: Scholarship and Perspectives
LAW7808 - Legal Skills & Values IV
LAW7813 - Community Law Teaching
LAW7844 - Sports and Entertainment Law
LAW7930 - Special Topics in Law
LAW7940 - Judicial Clinic
LAW7942 - Prosecution Innocence Project
LAW7943 - Advanced Immigration and Human Rights Clinic
LAW7944 - Advanced Legal Clinic
LAW7946 - Advanced Externship Placement
LAW7951 - Trial Advocacy Competition
LAW7952 - Appellate Advocacy Competition
LAW7953 - Client Counseling Competition
LAW7954 - Negotiation Competition
LAW7955 - World Arbitration and Mediation Review
LAW7956 - African Journal of Legal Studies

LAW7959 - Mediation Competition
LNX6991 - Law Student National Exchange
LNX6992 - Law Student National Exchange

Liberal Studies/CASE Department

Liberal Studies offers the BA in Liberal Studies, the BA in Interdisciplinary Studies, and the BA in Natural and Applied Sciences, as well as a Second Major in Medical Sciences track. All degrees empower students to design an individualized program of study that matches their interests and career goals — drawing on multiple disciplinary perspectives to explore meaningful questions, work through complex problems, and engage with the pressing social issues of our time. Through applied learning across a variety of disciplines, students build core competencies in written communication, critical thinking, adaptability, and reflective self-direction. Students also complete impactful cornerstone, capstone, and interdisciplinary coursework, as well as professional development experiences that pair career interests with practical applications and provide a strong foundation for interdisciplinary careers and graduate or professional programs.

To explore all curricular offerings, click the “Programs” and “Courses” tabs above.

Department Website

Programs

INTSTUD:BA - Bachelor of Arts in Interdisciplinary Studies
LIBST:BA - Bachelor of Arts in Liberal Studies
NAPSCI:BA - Bachelor of Arts in Natural and Applied Sciences

Courses

HUM1020 - Introduction to Humanities
HUM4024 - Plagues and Pandemics: Global Perspectives
IDS2395 - Civic Literacies
IDS3073 - Understanding Your Liberal Studies Major
IDS3383 - Psychedelic Compound Fundamentals
IDS3949 - Cooperative Education in Liberal Studies
IDS4384 - Psychedelics Today: Science, Therapy, Policy, and Ethics
IDS4890 - Interdisciplinary Studies Capstone: Applying Knowledge
IDS4920 - Liberal Studies Colloquia
IDS4949 - Internship in Liberal Studies/Interdisciplinary Studies

Marketing and Logistics/CBADM Department

The Department of Marketing and Logistics offers undergraduate- and graduate-level programs and courses in the areas of marketing, logistics, and supply chain management. These curricular offerings foster an educational culture that helps students excel at designing, implementing, and controlling marketing and logistics strategies and tactics. The department strives to be recognized as a leader in marketing and logistics research and education, nationally and internationally.

The department has an internationally diverse, experienced, widely published, and highly involved faculty. These faculty members are recognized experts in digital marketing, branding, marketing analytics, consumer behavior, social media, marketing management, international marketing, logistics and supply chain management, omnichannels, artificial intelligence, logistics technology, and sales and customer relationship management. The department also houses three student organizations, the American Marketing Association, the Sales Society, and the Logistics and Supply Chain Management Association.

To explore all of the department’s curricular offerings, click the “Programs” and “Courses” tabs above.

Department Website

Programs

INTLOG:CFI - Undergraduate Certificate in International Logistics
LOGSCM:BBA - Bachelor of Business Administration in Logistics and Supply Chain Management
LOGSCM:MS - Master of Science in Logistics and Supply Chain Management
MRKET:BBA - Bachelor of Business Administration in Marketing
MRKET:MS - Master of Science in Marketing
MRKTRA:CFI - Undergraduate Certificate in Marketing Research and Analysis
SCRMU:CFI - Undergraduate Certificate in Sales and Customer Relationship Management
SOCDM:CFI - Undergraduate Certificate in Social Media and Digital Marketing Analytics
XLOGSCM:MN - Minor in Logistics and Supply Chain Management
XMRKET:MN - Minor in Marketing
XPRFSL:MN - Minor in Professional Sales
XSOCEM:MN - Minor in Social Media and E-Marketing Analytics

Courses

MAR3023 - Introduction to Marketing
MAR3024 - Marketing Fundamentals
MAR3741 - AI Applications for Marketing Strategy
MAR4025 - Marketing for Entrepreneurs
MAR4144 - Export Marketing
MAR4156 - International Marketing
MAR4203 - Marketing Channels
MAR4231 - Retail Marketing
MAR4232 - Current Issues in Retail Marketing
MAR4233 - Social Media Marketing
MAR4323 - Integrated Marketing Communication
MAR4333 - Promotion Strategy
MAR4341 - Cause Marketing and Social Impact Strategy
MAR4354 - Marketing Yourself in the Global Marketplace
MAR4363 - Digital Marketing and Esports Viewership
MAR4400 - Professional Selling
MAR4403 - Sales Management
MAR4404 - Business-to-Business Sales and Marketing
MAR4411 - Esports Sales
MAR4415 - Advanced Professional Selling
MAR4503 - Consumer Behavior
MAR4504 - Esports Consumer Behavior Insights
MAR4613 - Marketing Research and Analysis
MAR4620 - Marketing Research II
MAR4643 - Decision Making and Negotiations
MAR4674 - Marketing Analytics
MAR4711 - Sports Marketing and Sponsorship
MAR4712 - Health and Fitness Marketing
MAR4718 - Introduction to Esports Marketing
MAR4719 - Esports Marketing Strategic Boldness
MAR4725 - Influencer Marketing
MAR4733 - Digital Marketing

MAR4804 - Marketing Strategy
MAR4860 - Customer Relationship Management
MAR4907 - Independent Study in Marketing
MAR4907L - Independent Study: Marketing Research Practicum
MAR4933 - Special Topics in Marketing
MAR4941 - Marketing Internship
MAR4955 - Study Abroad in Marketing
MAR6075 - Current Issues in Marketing I
MAR6158 - International Marketing
MAR6205 - Omni-channel Marketing and Distribution Systems
MAR6336 - Integrated Marketing Communication
MAR6406 - Sales Management
MAR6446 - Negotiations
MAR6506 - Buyer Psychology and Behavior
MAR6646 - Marketing Research
MAR6675 - Marketing Analytics
MAR6722 - E-Marketing
MAR6735 - Digital Marketing Strategies
MAR6805 - Marketing Management in the Global Environment
MAR6816 - Corporate Simulation
MAR6826 - Customer Relationship Management
MAR6838 - Brand Management
MAR6880 - Social Media Marketing
MAR6915 - Independent Study in Marketing
MAR6936 - Special Topics in Marketing
MAR6944 - Marketing Internship
MAR7399 - Seminar in Advertising and Persuasion
MAR7507 - Seminar in Consumer Behavior
MAR7622 - Marketing Research Methodology I
MAR7623 - Seminar in Marketing Environment
MAR7786 - Seminar in Marketing Theory
MAR7817 - Seminar in Marketing Management
MAR7849 - Seminar in Motivation and Emotion
MAR7875 - Seminar in Consumer Welfare and Well-Being
MAR7931 - Seminar in Service Science: Marketing, Management, and Technology
MAR7979 - Doctoral Research in Marketing
MAR7980 - Ph.D. Dissertation
MAR7981 - Dissertation Preparation
MARX011 - MAR CLEP
SCM4201 - Principles of Logistics
SCM4240 - Principles of Transportation
SCM4291 - Global Logistics
SCM4354 - Logistics Strategy
SCM4443 - Logistics Technology
SCM4945 - Logistics Internship
SCM4955 - Study Abroad in Logistics and Supply Chain Management
SCM6016 - Supply Chain Management
SCM6136 - Purchasing and Inventory Management
SCM6206 - Logistics Systems and Analytics
SCM6215 - Transportation Logistics

SCM6216 - Logistics Strategy
SCM6721 - Import/Export and International Logistics
SCM6936 - Special Topics in Transportation
SCM6946 - Supply Chain Management Internship/Practicum

Mathematics and Statistical Sciences/CASE Department

The Department of Mathematics and Statistics at Florida International University offers a comprehensive range of undergraduate and graduate degree programs designed to develop strong analytical, quantitative, and data-driven skills. At the undergraduate level, students may pursue a Bachelor of Arts in Mathematics, focused on mathematics education, or a Bachelor of Science in Mathematical Sciences with majors in mathematics, statistics, or mathematical data science. A certificate in Actuarial Studies is also offered. Flexible pathways, including combined BS/MS options and minors in mathematics or statistics, allow students to tailor their studies to diverse career goals. Graduate offerings include Master of Science degrees in Mathematical Sciences and Statistics, as well as a Ph.D. in Mathematical Sciences or Statistics, providing advanced training in theory, research, and applied problem-solving. Specialized options such as risk analysis and interdisciplinary data science further prepare students for careers in industry, academia, and emerging data-focused fields.

To explore all of the department's curricular offerings, click the "Programs" and "Courses" tabs above.

Department Website

Programs

ACTRS:CFI - Undergraduate Certificate in Actuarial Studies
APMATH:PHD - Doctor of Philosophy in Mathematical Sciences
MATH:BA - Bachelor of Arts in Mathematics
MATHSC2:BS - Bachelor of Science in Mathematical Sciences
MATHSC:MS - Master of Science in Mathematical Sciences
STATS:MS - Master of Science in Statistics
XMATH:MN - Minor in Mathematics
XMATHSC:MN - Minor in Mathematical Sciences
XSTATS:MN - Minor in Statistics

Courses

IDS4174 - Mathematics and Philosophy in Arts
MAA3200 - Intro To Adv Math
MAA4211 - Advanced Calculus
MAA4212 - Adv Calculus II
MAA4402 - Complex Variables
MAA4504 - Functional Analysis
MAA6406 - Complex Analysis
MAA6506 - Functional Analysis
MAA6525 - Advanced Topics in Functional Analysis
MAA6616 - Real Analysis
MAC1000 - College Algebra Stretch
MAC1105 - College Algebra
MAC1114 - Trigonometry
MAC1140 - PreCalculus Algebra
MAC1147 - Pre-Calculus Algebra and Trigonometry
MAC1907 - Pre-Calculus Algebra and Trigonometry Stretch
MAC2004 - Calculus 1 Stretch

MAC2005 - Calculus II Stretch
MAC2233 - Applied Calculus
MAC2241 - Calculus 1 for Biology
MAC2241L - Lab for Calculus 1 for Biology
MAC2242L - Lab for Calculus 2 for Biology
MAC2281 - Calculus I for Engineering
MAC2282 - Calculus II for Engineering
MAC2283 - Calculus III for Engineering
MAC2311 - Calculus I
MAC2312 - Calculus II
MAC2313 - Multivariable Calc
MAD1100 - Mathematics for Information Technology
MAD2104 - Discrete Mathematics
MAD3301 - Graph Theory
MAD3401 - Numerical Analysis
MAD3512 - Theory of Algorithms
MAD4203 - Intro Combinatorics
MAD5405 - Numerical Methods
MAD6406 - Numerical Linear Algebra
MAD6409 - Numerical Methods II
MAD7408 - Topics in Numerical Analysis
MAE3893 - Mathematics Education Seminar
MAP - ML for DE
MAP - Intro to ML & NN
MAP2302 - Differential Equations
MAP3253 - Mathematical Scientific Computation
MAP4104C - Topics in Mathematical Modeling
MAP4202 - Optimization
MAP4202L - Optimization Lab
MAP4215 - Stochastic Differential Equations
MAP4315 - Nonlinear Dynamics with Applications to Sciences
MAP4401 - Advanced Differential Equations
MAP4412 - Introduction to Fourier Analysis
MAP4634 - Quantitative Risk Management
MAP4950C - Senior Design Project for Mathematical Data Science
MAP5114 - Basic Math for Machine Learning
MAP5117 - Math & Stat Modeling
MAP5204 - Optimization and Linear Algebra
MAP5208 - Numerical Optimization
MAP5236 - Mathematical Techniques of Operations Research
MAP5255 - Mathematical Scientific Computation
MAP5316 - Ordinary Differential Equations
MAP5317 - Advanced Differential Equations for Engineers
MAP5318 - Dynamical Systems and Introduction to Chaos Theory
MAP5406 - Introduction to Functional and Applied Analysis
MAP5414 - Fourier Analysis and Wavelets
MAP5415 - Introduction to Fourier Analysis
MAP5467 - Stochastic Differential Equations and Applications
MAP5620 - A Primer on the Mathematics of Environmental Financial Engineering
MAP5629 - Quantitative Capstone in Environmental Finance

MAP6217 - Calculus of Variations
MAP6218 - Stochastic Calculus
MAP6326 - Partial Differential Equations
MAP6357 - Partial Differential Equations II
MAP6358 - Partial Differential Equations in Fluid Mechanics
MAP6416 - Fourier Analysis
MAP6472 - Probability and Stochastic Processes
MAP6506 - Advanced Methods of Mathematical Physics
MAP6622 - Quantitative Environmental Finance
MAP6630 - Numerical Methods in Risk Analysis and Management
MAP6631 - Intro to Quantitative Risk Analysis and Management
MAP6632 - PDE in Risk Analysis and Management
MAP6635 - Risk Analysis and Management I
MAP6636 - Risk Analysis and Management II
MAP6637 - Risk Analysis and Management III
MAP7359 - Topics in Partial Differential Equations
MAP7934 - Seminar in Applied Mathematics
MAS3105 - Linear Algebra
MAS3931 - Topics in Actuarial Mathematics
MAS4107 - Linear Algebra II
MAS4107L - Linear Algebra II Lab
MAS4110 - Introduction to Matrix Theory
MAS4203 - Number Theory
MAS4301 - Algebraic Structures
MAS4302 - Topics in Algebraic Structures
MAS4310 - Introduction to Algebraic Geometry
MAS4316 - Introduction to Commutative Algebra
MAS5145 - Applied Linear Algebra
MAS5311 - Graduate Algebra
MAS5315 - Algebraic Geometry
MAS5333 - Commutative Algebra I
MAT1033 - Intermediate Algebra
MAT3501 - Numbers, Functions and Modeling for Teachers
MAT3905 - Independent Study
MAT4510 - Problem Solving Seminar
MAT4905 - Independent Study
MAT4930 - Special Topics
MAT4934 - Senior Mathematics Seminar
MAT4943 - Math Sciences Intern
MAT5907 - Independent Study
MAT5921 - Training in Mathematical Exposition
MAT5970 - Master's Research
MAT6946 - Applied Experience Component
MAT7908 - Independent Study
MAT7917 - Graduate Research Seminar in Mathematics
MAT7980 - Dissertation Research
MAT7981 - PhD Dissertation
MGF1000 - Finite Mathematics Stretch
MGF1001 - Social Choice Mathematics Stretch
MGF1106 - Finite Mathematics

MGF1107 - The Mathematics of Social Choice and Decision Making
MGF1130 - Mathematical Thinking
MHF3404 - History Of Math
MHF4102 - Axiomatic Set Thry
MHF4302 - Math Logic
MHF4401 - Methods in the History of Modern Mathematics
MHF5107 - Graduate Set Theory
MHF5306 - Graduate Mathematical Logic
MHF5325 - Theory of Recursive Functions
MHF5345 - Mathematical Logic for Linguistics
MHF5930 - Topics in Modern Mathematics
MTG1204 - Geometry for Education
MTG3212 - College Geometry
MTG4254 - Differential Geometry
MTG4302 - Topology
MTG5256 - Differential Geometry
MTG5257 - Differential Geometry II
MTG5326 - Introduction to Algebraic Topology
MTG5328 - Introduction to Applied Topology
MTG5347 - Algebraic Topology II
MTG6255 - Introduction to Riemannian and Symplectic Geometry
STA2023 - Statistical Methods
STA3033 - Introduction to Probability and Statistics for CS
STA3111 - Statistics I
STA3112 - Statistics II
STA3123 - Statistics for Behavioral and Social Sciences II
STA3163 - Statistical Methods I
STA3164 - Statistical Methods II
STA3193 - Statistics for Biology I
STA3194 - Statistics for Biology II
STA3930 - Special Topics
STA3951 - Oral Presentations in Statistics
STA4202 - Introduction to Design of Experiments
STA4234 - Introduction to Regression Analysis
STA4321 - Introduction to Mathematical Statistics I
STA4322 - Introduction to Mathematical Statistics II
STA4362 - Statistical Machine Learning
STA4362L - Statistical Machine Learning Lab
STA4502 - Introduction to Non-parametric Methods
STA4664 - Stat Quality Control
STA4905 - Independent Study
STA4930 - Special Topics
STA5126 - Fundamentals of Design of Experiments
STA5206 - Design Of Exper I
STA5236 - Regression Analysis
STA5507 - Nonparametric Methods
STA5666 - Advanced Statistical Quality Control
STA5906 - Independent Study
STA6166 - Statistical Methods in Research I
STA6167 - Statistical Methods in Research II

STA6176 - Biostatistics
STA6196 - Statistics for Environmental Sciences
STA6244 - Data Analysis I
STA6246 - Linear Models
STA6247 - Data Analysis II
STA6326 - Mathematical Statistics I
STA6327 - Mathematical Statistics II
STA6636 - High Dimension Data Analysis
STA6746 - Multivariate Statistical Analysis
STA6870 - Time Series Analysis
STA6930 - Special Topics
STA6971 - Thesis Research
STA6972 - Master's Thesis
STA7980 - PhD Dissertation

Mechanical and Materials Engineering/CENGR Department

The Department of Mechanical and Materials Engineering offers undergraduate- and graduate-level programs and courses in mechanical engineering and materials engineering. These curricular offerings are designed to provide students with a thorough understanding of the basic laws of science. Academic programs are structured to stimulate and develop creative thinking, professional attitudes, economic judgment, and environmental consciousness. Faculty seek to develop students' potential, preparing them for superior performance as engineers or for advanced study in engineering, science, or business.

Departmental faculty have a strong research focus, contributing to advancements in mechanical and materials engineering. Research interests include cellular metamaterials, computational mechanics, fluid dynamics, nanomaterials/nanotechnology, renewable energy, and structural health monitoring.

To explore all of the department's curricular offerings, click the "Programs" and "Courses" tabs above.

Department Website

Programs

MECHEG:BS - Bachelor of Science in Mechanical Engineering
MECHEG:MS - Master of Science in Mechanical Engineering
MECHEG:PHD - Doctor of Philosophy in Mechanical Engineering
MTSCEG:MS - Master of Science in Materials Science and Engineering
MTSCEG:PHD - Doctor of Philosophy in Materials Science and Engineering
XAEROEG:MN - Minor in Aerospace Engineering
XENGRSC:MN - Minor in Engineering Science
XENGSY:MN - Minor in Energy Systems
XMECHDN:MN - Minor in Mechanical Design
XROBOT:MN - Minor in Robotics and Mechatronics

Courses

CHM2097 - General Chemistry for Engineers
CHM2097L - General Chemistry for Engineering Lab
EAS4105 - Introduction to Flight Mechanics
EAS4200 - Introduction to Design and Analysis of Aerospace Structures
EAS4213 - Introduction to Aeroelasticity
EAS4505 - Introduction to Astrodynamics

EAS4712 - Aerodynamic Shape Design
EAS5124 - Aerodynamics and Flight Mechanics
EAS5221 - Design and Analysis of Aerospace Structures
EAS5507 - Astrodynamics
EAS6212 - Aeroelasticity
EAS6721 - Advanced Aerodynamic Shape Design
ECH3271 - Introduction to Heat and Mass Transfer
ECH4504 - Intro to Chemical Reaction Engineering
ECH4826 - Corrosion Control
ECH5106 - Chemical Engineering Thermodynamics
ECH5507 - Chemical Reaction Engineering
EGM3311 - Analysis of Engineering Systems
EGM4350 - Finite Elements in Mechanical Engineering
EGM4370 - Introduction to Meshfree and Alternative Methods in Mechanical Engineering
EGM5315 - Intermediate Analysis of Mechanical Systems
EGM5346 - Computational Engineering Analysis
EGM5354 - Finite Element Method Applications in Mechanical Engineering
EGM5615 - Synthesis of Engineering Mechanics
EGM6355 - Nonlinear Finite Element Analysis
EGM6422 - Advanced Computational Engineering Analysis
EGM6570 - Fracture Mechanics
EGN3311 - Statics
EGN3321 - Dynamics
EGN3343 - Thermodynamics I
EGN3365 - Materials in Engineering
EGN4012C - Introduction to Nanoscale Processing Technologies
EGN5013C - Nanoscale Fabrication and Synthesis
EGS1006 - Introduction to Engineering
EGS1041 - Technology, Humans, and Society
EIN3390 - Manufacturing Processes
EIN3390L - Manufacturing Processes Laboratory
EMA3066 - Polymer Science and Engineering
EMA3702 - Mechanics and Materials Science
EMA3702L - Mechanics and Materials Science Lab
EMA4303 - Introduction to Electrochemical Engineering
EMA4990 - Introduction to Ceramic Processing
EMA5001 - Physical Properties of Materials
EMA5015 - Introduction to Nanomaterials Engineering
EMA5016 - Nanoelectronic Materials
EMA5017 - Nanoparticle Technology
EMA5018 - Nanoscale Modeling of Materials
EMA5094 - Introduction to Materials for Sustainable Energy
EMA5104 - Advanced Mechanical Properties of Materials
EMA5106 - Thermodynamics and Kinetics of Materials
EMA5140 - Introduction to Ceramic Materials
EMA5200 - Nanomechanics and Nanotribology
EMA5295 - Principles of Composite Materials
EMA5305 - Electrochemical Engineering
EMA5326 - Corrosion Science and Engineering
EMA5507C - Analytical Techniques of Materials Science

EMA5605 - Fundamentals of Materials Processing
EMA5646 - Ceramic Processing
EMA5935 - Advanced Topics in Materials Engineering
EMA6165C - Polymer Physics and Analytical Techniques
EMA6264 - Mechanical Properties of Polymers
EMA6417 - Sustainable Materials for Nanoscale Semiconductors and Quantum Science
EMA6492 - Materials for Renewable Energy Generation
EMA6495 - Materials for Energy Storage
EMA6516 - Crystallography and X-ray Diffraction
EMA6518 - Transmission Electron Microscopy
EMA6584 - Introduction of Biomolecular Structure and Engineering
EMA6665 - Polymer Processing and Engineering
EMA7980 - Ph.D. Dissertation
EMC4102 - Introduction to Chemical Engineering Thermodynamics
EMC5160 - Heat and Mass Transfer
EMC5415 - Digital Control of Mechanical Systems
EML1533 - Introduction to CAD for Mechanical Engineers
EML2032 - Programming for Mechanical Engineering
EML3036 - Simulation Software for Mechanical Engineers
EML3101 - Thermodynamics II
EML3126 - Transport Phenomena
EML3126L - Transport Phenomena Lab
EML3222 - Systems Dynamics
EML3301L - Instrumentation and Measurement Laboratory
EML3450 - Energy Systems
EML3500 - Mechanical Design I
EML4008 - Introduction to Nuclear Engineering in Mechanical Engineering
EML4046 - Artificial Intelligence in Mechanical Engineering
EML4081 - Introduction to Nondestructive Testing and Mechanical Health Monitoring
EML4140 - Heat Transfer
EML4220 - Mech Vibrations
EML4264 - Vehicle Dynamics
EML4293C - Introduction to Microfluidic Design
EML4300 - Standards in Mechanical and Aerospace Engineering
EML4312 - Automatic Control
EML4384 - Data Science Neural Networks and Deep Learning in Mechanical Engineering
EML4410 - Combustion Process
EML4416 - Solar Energy Technology: Fundamentals and Applications
EML4419 - Propulsion Systems
EML4421 - Internal Combustion Engines
EML4460 - Mechanical Engineering Systems and Energy Utilization
EML4501 - Mechanical Design II
EML4503 - Production Machine Modeling and Design
EML4535 - Mechanical Computer Aided Design
EML4551 - Ethics and Design Project Organization
EML4557 - Market Oriented Design and Production
EML4561 - Introduction to Electronic Packaging
EML4576 - Design Optimization
EML4601 - Principles of Refrigerating and Air Conditioning
EML4603 - Air Conditioning Design

EML4608C - Mechanical Systems in Environmental Control
EML4706 - Design of Thermal and Fluid Systems
EML4711 - Gas Dynamics
EML4721 - Introduction to Computational Thermo-Fluid
EML4804 - Introduction to Mechatronics
EML4806 - Modeling Of Robots
EML4823 - Introduction to Sensors and Signal Processing
EML4840 - Robot Design
EML4905 - Senior Design Project
EML4906L - Mechanical Lab
EML4911 - Undergraduate Research Experience
EML4930 - Special Topics/Projects
EML4936 - Mechanical Engineering Undergraduate Seminar
EML4940 - Undergraduate Internship
EML4942 - Engineering Practicum
EML4949 - Co-op Work Experience
EML5047 - Applied Machine Learning for Mechanical Engineers
EML5082 - Advanced Nondestructive Testing and Mechanical Health Monitoring
EML5103 - Intermediate Thermodynamics
EML5104 - Classical Thermodynamics
EML5152 - Intermediate Heat Transfer
EML5289C - Design and Validation of Microfluidic Systems
EML5290 - Fundamentals of Microfabrication
EML5385 - Identification Techniques of Mechanical Systems
EML5412 - Combustion Process
EML5505 - Smart Machine Design and Development
EML5509 - Optimization Algorithms
EML5530 - Intermediate CAD/CAE
EML5606C - Advanced Refrigeration and Air Conditioning Systems
EML5615C - Cad - A/C
EML5708 - Advanced Design of Thermal and Fluid Systems
EML5709 - Intermediate Fluid Mechanics
EML5808 - Control Technology for Robotic Systems
EML5825 - Sensors and Applied Machine Intelligence
EML5851 - Data Science from Digitization to Automated Decision Making in Mechanical Engineering I
EML5927 - Professional Development and Leadership for Mechanical Engineers
EML6153 - Advanced Heat Transfer
EML6154 - Conduction Heat Transfer
EML6155 - Convection Heat Transfer
EML6157 - Radiation Heat Transfer
EML6223 - Advanced Mechanical Vibration Analysis
EML6532 - Advanced Computer-Aided Design/ Computer-Aided Engineering
EML6712 - Advanced Fluid Mechanics I
EML6714 - Advanced Gas Dynamics
EML6725 - Comp. Fluid Dynamics
EML6805 - Advanced Design of Robots
EML6852 - Data Science from Digitization to Automated Decision Making in Mechanical Engineering
EML6908 - Independent Studies
EML6910 - Supervised Research
EML6935 - Graduate Seminar

EML6946 - Mechanical and Materials Engineering Internship
EML6947 - Supervised Teaching
EML6971 - Masters Thesis
EML7939 - Ph.D. Seminar
EML7980 - Ph.D. Dissertation
ENU5007 - Nuclear Engineering and Applications in Mechanical Engineering

Military Science Department

The Military Science programs at FIU include Army ROTC and Air Force ROTC. Both programs offer an academic minor to complete the ROTC requirements to be commissioned as a Second Lieutenant upon the award of a baccalaureate degree.

The Army minor is offered on the FIU Modesto A. Maidique campus and the Air Force minor is at the University of Miami in Coral Gables, FL.

To explore all curricular offerings, click the “Programs” and “Courses” tabs above.

Department Website

Programs

XAEROST:MN - Minor in Aerospace Studies
XMILTSC:MN - Minor in Military Science

Courses

AFR1101C - Heritage and Values I
AFR1121C - Heritage and Values II
AFR2130C - Team and Leadership Fundamentals I
AFR2131C - Team and Leadership Fundamentals II
AFR3220 - Leading People and Effective Communication I
AFR3230 - Leading People and Effective Communication II
AFR4201 - National Security, Leadership Res and Com Preparation I
AFR4210 - National Security, Leadership Res and Com Preparation II
MSL1001 - Foundations of Officership and Leadership
MSL1001L - Foundations of Officership Laboratory
MSL1002 - Basic Leadership
MSL1002L - Basic Leadership Laboratory
MSL2101 - Individual Leadership Studies
MSL2101L - Individual Leadership Laboratory
MSL2102 - Leadership and Teamwork
MSL2102L - Leadership and Teamwork Laboratory
MSL3201 - Leadership and Problem Solving
MSL3201L - Leadership and Problem Solving Laboratory
MSL3202 - Leadership and Ethics
MSL3202L - Leadership and Ethics Laboratory
MSL4301 - Leadership and Management
MSL4301L - Leadership and Management Laboratory
MSL4302 - Officership and Leadership
MSL4302L - Officer Leadership Laboratory
MSL4400 - United States Military History
MSL4900 - Supervised and/or Independent Study

Modern Languages/SIPA Department

Vision:

Florida International University's Department of Modern Languages provides high-quality language education through advanced pedagogical methods and multilingual instruction. Departmental faculty focus on developing linguistic proficiency and preparing students for success in a globalized environment. By integrating cutting-edge technologies, faculty aim to enhance language and cultural education while advancing research in literary, artistic, and linguistic fields. The department leads innovation in language learning and cultural studies, driving forward-thinking developments locally and globally.

Mission:

Florida International University's Department of Modern Languages is dedicated to providing excellence in multilingual education. The department offers a curriculum incorporating advanced technologies and pedagogical strategies to improve language learning and deepen cultural understanding. Faculty produce innovative research and creative projects that contribute to the study of linguistic and cultural dynamics in world language acquisition. Faculty work to serve a broad range of communities by supporting language learning and contributing to the field of language and culture education on both local and global scales.

To explore all of the department's curricular offerings, click the "Programs" and "Courses" tabs above.

Department Website

Programs

FRECU:CFI - Undergraduate Certificate in French Language and Culture
GBLCTLI:BA - Bachelor of Arts in Global Languages, Cultures, and Literatures

Moss School of Construction Department

The Moss School of Construction offers undergraduate and graduate programs and courses. The school seeks to advance and disseminate construction knowledge. Its motivated students, highly qualified faculty, and dedicated alumni work together to achieve strong educational and research outcomes. Undergraduate students participate in hands-on training, student competitions, and classroom instruction across all areas of construction. At the graduate level, students take courses in advanced topics in construction and technology with opportunities to participate in research guided by faculty members. Graduates enjoy excellent employment opportunities in the South Florida region, one of the busiest construction markets in the country.

Faculty actively participate in several of the college's premier centers (e.g., the Applied Research Center Wall of Wind, Lehman Center for Transportation Research). Research interests include leveraging emerging technologies by optimizing resources, while also maximizing safety and quality.

To explore all of the school's curricular offerings, click the “Programs” and “Courses” tabs above.

Programs

CONMGT:BS - Bachelor of Science in Construction Management
CONMGT:MS - Master of Science in Construction Management
XCONMGT:MN - Minor in Construction Management

Courses

BCN1272 - Plans Interpretation
BCN2210 - Construction Materials and Methods
BCN2253 - Building Construction Drawing
BCN2280 - Construction Surveying
BCN2405 - Structural Design I
BCN3027 - Principles of Construction Management
BCN3240 - Construction Equipment
BCN3441C - Fundamentals of Concrete Properties and Testing
BCN3442C - Concrete Construction Methods
BCN3443 - Introduction to the Concrete Industry
BCN3444 - Applications of Concrete in Construction
BCN3445 - Management of Concrete Products I
BCN3446 - Management of Concrete Products II
BCN3447 - Concrete Problems: Prevention, Diagnosis and Resolution
BCN3611 - Construction Cost Estimating I
BCN3640 - Economic Planning for Construction
BCN3720 - Construction Scheduling I
BCN3727 - Construction Sitework and Equipment
BCN3730 - Construction Safety
BCN3740 - Legal Aspects
BCN3753 - Financial Management of Construction Organizations
BCN3761 - Construction Documentation and Communication
BCN3762 - Building Codes and Quality Control
BCN3949 - Industry Internship
BCN4255C - Building Information Modeling
BCN4334 - Introduction to Robotics in Construction

BCN4340 - Artificial Intelligence Applications in Construction Management
BCN4431 - Structural Design II
BCN4465 - Temp Structures
BCN4561 - Environmental Control in Buildings I
BCN4564 - Environmental Control in Buildings II
BCN4570 - Sustainable Approach to Construction
BCN4612 - Construction Cost Estimating II
BCN4703 - Management of Construction Projects
BCN4724 - Scheduling II
BCN4794 - Quality Control in Construction
BCN4905 - Independent Study
BCN4910 - Senior Project
BCN4930 - Special Topics
BCN5022 - Housing for Developing Countries
BCN5336 - Robotics in Construction
BCN5406 - Principles of Building Structures for Construction Management
BCN5585 - Sustainable Construction
BCN5588 - Vulnerability Analysis
BCN5589 - Hazard Mitigation
BCN5618 - Fundamentals of Construction Estimating
BCN5622 - Advance Planning and Simulation for Construction
BCN5626 - Construction Cost Analysis and Control
BCN5645 - Construction Economic Analysis
BCN5706 - Interdisciplinary Aspects of Housing
BCN5716 - Productivity in Construction
BCN5717 - Construction Industry Best Practices
BCN5728 - Principles of Construction Scheduling
BCN5735 - Hazardous Materials and Waste in Construction
BCN5738 - Construction Safety Management
BCN5741 - Construction Claims
BCN5746 - Construction Legal Environment
BCN5747 - Construction Law Case Studies
BCN5749 - Advanced Construction Documentation
BCN5755 - Construction Financial Management
BCN5766 - Codes and Regulations
BCN5771 - Management and Marketing of Construction Services
BCN5772 - Management of Construction Organizations
BCN5774 - Topics in International Construction
BCN5784 - Construction Information Systems
BCN5792 - Total Quality Management and Planning in Construction
BCN5905 - Directed Independent Studies
BCN5906 - Special Topics
BCN5949 - Graduate Construction Management Internship
BCN6642 - Value Engineering in Construction
BCN6675 - Decision and Risk Analysis in Construction
BCN6785 - Advanced Estimating and Bidding Strategy
BCN6788C - Artificial Intelligence Applications in Construction Management
BCN6795 - Automation in Construction
BCN6796 - Construction Failures
BCN6910 - Supervised Research

BCN6912 - Project in Construction Engineering and Management
BCN6916 - Developments in Construction Technologies
BCN6935 - Seminar on Construction Management
BCN6971 - Thesis

Multi Engr & Comp Edu Systems and Management Dept Department

The Multidisciplinary Engineering & Computing Education, Systems and Management Department (ESM) brings together scholars from an array of engineering and non-engineering disciplines to tackle complex systems-level problems and provide flexible, multidisciplinary engineering degree pathways for the next generation of engineering leaders. ESM offers undergraduate- and graduate-level programs and courses that prepare students to lead innovations in a variety of settings and sectors. The programs are designed to support diverse career paths and evolving societal needs through adaptable, real-world learning experiences.

Faculty in ESM teach, conduct research, and serve the community through partnerships with companies and community organizations. Faculty collaborate with students, staff, and scholars from other departments and organizations in areas such as: community-based learning, educational innovation and transformation, student success and persistence, professional and technical development, engineering student pathways, identity development and belonging, =engineering design processes and practices, resilient infrastructures, and disaster management.

Programs

ECEDU:PHD - Doctor of Philosophy in Engineering and Computing Education
EGMGT:MS - Master of Science in Engineering Management
INTENG:BS - Bachelor of Science in Interdisciplinary Engineering
LOGENG:MS - Master of Science in Logistics Engineering

Courses

EGN3910 - Human-centered Design within Systems and Society
EGN3945 - Cooperative Education in Engineering
EGN4414 - Interdisciplinary Capstone Design Project II
EGN4443 - Interdisciplinary Capstone Design Project I
EGN4930 - Special Topics in Interdisciplinary Engineering
EGN5550 - Risk Analysis in Business Concept Development for Engineers and Entrepreneurs
EGN5644 - Commercializing Innovation
EGN6437 - Manufacturing Systems Design
EGN6900 - Engineering and Computing Education Research Methods in Context
EGN6907 - Independent Study
EGN6920 - Cooperative Education in Engineering
EGN6935 - Seminar on STEM Education Research
EGN6939 - Advanced Special Topics
EGN6942 - Mentored Teaching Practicum in Engineering and Computing Education
EGN6957 - Professional Development in Engineering and Computing Education
EGN7918 - Graduate Research
EGN7980 - Dissertation Research
EGS2053 - Foundations of Interdisciplinary Engineering
EGS3060 - Engineering Professional Development for a Global Society
EGS5620 - Enterprise Systems Configuration
EGS5621 - Enterprise Systems Collaboration

EGS5622 - Enterprise Systems Integration
EGS5623 - Enterprise Systems Optimization
EGS6008 - Foundations of Engineering and Computing Education Scholarship
EGS6039 - Leadership for Engineers
EGS6055 - Foundations of Engineering and Computing Teaching and Learning
EGS6057 - Research, Policy, and Practice in Engineering and Computing Education
EIN4116 - Industrial Information Systems
EIN4122 - Industrial Marketing
EIN4220 - Introduction to Total Quality Management
EIN4328 - Introduction to Engineering Entrepreneurship
EIN4334 - Production Planning and Control
EIN4389 - Technological Forecasting
EIN4440 - Introduction to Technology Entrepreneurship
EIN4451 - Lean Production Systems
EIN4933 - Special Topics in Industrial Engineering
EIN5001 - Quantitative Foundation for Engineering Managers
EIN5106 - Regulatory Aspects of Engineering
EIN5123 - Industrial/Technological Marketing for Engineering
EIN5226C - Total Quality Management for Engineers
EIN5322 - Engineering Management
EIN5332 - Quality Engineering
EIN5346 - Logistics Engineering
EIN5359 - Industrial Financial Decisions
EIN5367 - Design of Production Systems
EIN5436 - Regulatory Compliance in Logistics and Supply Chain Management
EIN6105 - Technology Policies and Strategies
EIN6117 - Advanced Industrial Information Systems
EIN6131 - e-Systems Design
EIN6132 - Collaborative Engineering
EIN6133 - Enterprise Engineering
EIN6155 - Business Plan Development
EIN6160 - Management of Innovation and Technology
EIN6179C - Advanced Total Quality Management for Engineers
EIN6324 - Technology Entrepreneurship
EIN6327 - Entrepreneurship and New Venture Initiation
EIN6329 - Advanced Engineering Business Plan Development
EIN6336 - Advanced Production Planning and Control
EIN6345 - Inventory Control System
EIN6357 - Advanced Engineering Economy
EIN6603 - Applied AI/Expert Systems in Industrial Engineering
EIN6908 - Independent Study
EIN6916 - Master's Project
EIN6932 - Graduate Seminar
EIN6940 - Industrial and Systems Engineering Internship
EIN6950 - Engineering Management Masters Project
EIN6971 - Master's Thesis
ESI3321 - Operations Research I: Deterministic Models
ESI3523 - Simulation Models of Industrial Systems
ESI4322 - Operations Research II: Stochastic Models
ESI4452 - Project Management Systems Design

ESI5010C - Forecasting and Demand Management
ESI5456 - Productivity Management in the Global Organization
ESI5522 - Simulation Models of Engineering Systems
ESI5602 - Engineering Data Representation and Modeling
ESI5603 - Advanced Software Tools for ISE
ESI6316 - Applications of OR in Manufacturing
ESI6319 - Operations Research and Information Technology
ESI6324 - Advances in Logistics Technology
ESI6455 - Advanced Engineering Project Management
ESI6460 - Methods for Algorithm Development for Industrial Engineering Applications
ESI6470 - Stochastic Optimization
ESI6524 - Advanced Industrial Systems Simulation
ESI6546 - Network Flow Analysis
ESI6601 - Data Warehousing and Mining
ETIX410 - ETI IB
LAW5072 - Business Law and Intellectual Property for Engineers and Entrepreneurs

Music and Performing Arts/CARTA Department

The Herbert and Nicole Wertheim School of Music and Performing Arts offers undergraduate- and graduate-level programs and courses in music. These academic programs prepare students for diverse careers as educators, performers, composers, and scholars. Emphasizing comprehensive musicianship, critical thinking, entrepreneurship, and integrated technology, the distinguished artist-faculty provides an outstanding professional musical education in one of the world's most vibrant areas. The breadth of performance opportunities offered at FIU include orchestral, band, choral, jazz, chamber ensembles, fully staged operas, and the latest in cutting-edge new music.

The school’s faculty excel in reputation, quality of teaching, and research and creative activities. Music students benefit from working in a conservatory-style atmosphere alongside internationally celebrated faculty performers, composers, and scholars who are dedicated to inspiring and mentoring the next generation of music leaders.

To explore all of the school’s curricular offerings, click the “Programs” and “Courses” tabs above.

Programs

MTECH:CFI - Undergraduate Certificate in Music Technology
MUSBU:CFI - Undergraduate Certificate in Music Business
MUSIC:BA - Bachelor of Arts in Music
MUSIC:BM - Bachelor of Music
MUSIC:MM - Master of Music
MUSIED:MS - Master of Science in Music Education
XCPIANO:MN - Minor in Collaborative Piano
XMUSCMP:MN - Minor in Music Composition
XMUSIC:MN - Minor in Music
XSMUSC:MN - Minor in Sacred Music

Courses

MUC1101 - Basic Music Composition
MUC2221 - Composition Seminar I
MUC2222 - Composition Seminar II

MUC2301L - Introduction to Electronic Music
MUC3231 - Composition III
MUC3232 - Composition IV
MUC3303L - Digital Instrument Design
MUC3304L - Audio Digital Signal Processing
MUC4241 - Composition Sem V
MUC4242 - Composition VI
MUC4404L - Advanced Topics in Music Technology
MUC4610 - Film Scoring Fundamentals
MUC4611C - Documentary Film and Media Scoring Fundamentals
MUC4932 - Composition Forum
MUC5406 - Electronic Music IV
MUC5407 - Electronic Music V
MUC5614C - Documentary Film and Media Scoring
MUC5615 - Film Scoring
MUC5635 - Computer Music Seminar I
MUC5636 - Computer Music Seminar II
MUC5637 - Computer Music Seminar III
MUC5935 - Composition Forum
MUC6251 - Graduate Music Composition
MUC6305 - Electronic Music Lab I
MUC6306 - Electronic Music Lab II
MUC6405 - Electronic Music Lab III
MUE2040 - Introduction to Music Education
MUE2346 - Vocal Techniques
MUE2364C - Modern Band and Classroom Instrument Techniques
MUE2440C - String Techniques
MUE2450L - Woodwind Techniques
MUE2460L - Brass Techniques
MUE2470L - Percussion Tech
MUE3210 - Content and Methods of Teaching Elementary Music
MUE3332 - Secondary Instrumental Music Methods
MUE3340 - Elementary School Teaching Methods
MUE3395 - Music in Special Education
MUE3411C - Choral Methods
MUE3691C - Introduction to Technology for Music Educators
MUE3744 - Assessment and Evaluation in Music Education
MUE3920 - Music Education Forum
MUE3921 - Choral Conducting Workshop
MUE3922 - String Workshop
MUE3923 - Instrumental Conducting Workshop
MUE3925 - Dalcroze Workshop
MUE4341 - M&S Sch Voc/Ins Tch
MUE4480 - Marching Band Techniques
MUE4481C - Jazz Ensemble Techniques
MUE4646 - Progressive Music Methods
MUE4940 - Student Teaching in Music Education
MUE5336 - Secondary Choral Methods
MUE5338 - Secondary Instrumental Methods
MUE5485 - Marching Band Techniques

MUE5695 - Landscape of 21st Century Performing Arts
MUE5907 - Directed Study in Music Education
MUE5921 - Choral Conducting Workshop
MUE5922 - String Workshop
MUE5923 - Instrumental Conducting Workshop
MUE5924 - Jazz Workshop
MUE5928 - Workshop in Music
MUE5945 - Practicum: Music Ed
MUE6190 - Curriculum and Policy Design in Music Education
MUE6316 - Instruction in Elementary Music
MUE6345 - The Methodology and Analysis of Music Teaching
MUE6396 - Music in Special Education
MUE6785 - Research in Music Education
MUE6815 - Psychological Foundations of Music Behavior
MUE6910 - Directed Research
MUE6925 - Special Topics in Music Education
MUE6938 - Seminar in Music Education
MUE6971 - Thesis in Music Education
MUG4101L - Basic Conducting
MUG4111L - Musical Theatre Conducting
MUG4202 - Choral Conducting
MUG4302L - Instrumental Conduct
MUG4303 - Advanced Orchestral Conducting
MUG5105L - Advanced Conducting Techniques
MUG5205 - Graduate Applied Choral Conducting
MUG5307 - Graduate Applied Wind Conducting
MUG5935 - Conducting Seminar
MUG6309 - Graduate Applied Orchestral Conducting
MUH1013L - Music Ensemble
MUH1560 - African American Music
MUH2010 - Music History Overview
MUH2018 - Evolution of Jazz
MUH2022 - History of Rock Music
MUH2051 - World Music Cultures (for non-music majors)
MUH2370 - The History of The Beatles

Nicole Wertheim Col of Nursing & Health Sciences Department

The Nicole Wertheim College of Nursing and Health Sciences (NWCNHS) prepares healthcare professionals who are providers and forward-thinking leaders in the delivery of high quality, accessible, and compassionate care within in a highly technological and global environment. The college's curricular offerings are innovative, inquiry-driven, and technologically advanced. Excellent faculty, students, and staff work toward the positive transformation of society, with a focus on the healthcare needs of diverse, medically underserved populations.

The college offers baccalaureate degrees in Nursing and Health Services Administration. The college also offers master's-level degrees in Athletic Training, Health Services Administration, Nursing, Occupational Therapy, and Speech-Language Pathology. In addition, the college also offers the Doctor of Philosophy in Nursing and Health Sciences, the Doctor of Nursing Practice, the Doctor of Nursing Practice in Nurse Anesthesiology, the Doctor of Physical Therapy, and the Doctor of Athletic Training.

Nursing Anesthesia/CNHS Department

The Department of Nurse Anesthesia at Florida International University's Nicole Wertheim College of Nursing & Health Sciences is dedicated to educating and developing highly skilled Certified Registered Nurse Anesthetists (CRNAs) through its nationally accredited Doctor of Nursing Practice in Nurse Anesthesia (DNP-NA) program. Committed to clinical excellence, interdisciplinary collaboration, and service to diverse communities, the department provides an intensive, full-time curriculum

that integrates advanced science, evidence-based practice, and over 3,000 hours of hands-on clinical experience. With access to state-of-the-art simulation technology and training at leading medical centers, students are prepared to deliver safe, high-quality, and culturally competent anesthesia care across a wide range of healthcare settings. The department also emphasizes leadership and research to address the evolving needs of patients and the profession.

Programs

NURAN:DNP - Doctor of Nursing Practice - Nurse Anesthesia

Courses

NGR6400 - Chemistry and Physics of Anesthesiology Nursing
NGR6404 - Advanced Bioscience for Anesthesiology Nursing I
NGR6405 - Advanced Bioscience for Anesthesiology Nursing II
NGR6407 - Technology And Physics in Anesthesiology Nursing
NGR6421 - Principles of Anesthesiology Nursing I
NGR6422 - Principles of Anesthesiology Nursing II
NGR6423 - Principles of Anesthesiology Nursing III
NGR6424 - Principles of Anesthesiology Nursing IV
NGR6425 - Advanced Principles of Anesthesiology Nursing I
NGR6426 - Advanced Principles of Anesthesiology Nursing II
NGR6431L - Anesthesiology Nursing Clinical Residency I
NGR6432L - Anesthesiology Nursing Clinical Residency II
NGR6433L - Anesthesiology Nursing Clinical Residency III
NGR6434L - Anesthesiology Nursing Clinical Residency IV
NGR6435 - Principles of Anesthesiology Nursing V
NGR6435L - Anesthesiology Nursing Clinical Residency V
NGR6436L - Anesthesiology Nursing Clinical Residency VI
NGR6437L - Anesthesiology Nursing Clinical Residency VII
NGR6441L - Anesthesiology Nursing Simulation Practicum II
NGR6442L - Anesthesiology Nursing Simulation Practicum III
NGR6460 - Pharmacology of Anesthesiology Nursing I
NGR6461 - Pharmacology of Anesthesiology Nursing II
NGR6462 - Pharmacology and Chemistry of Anesthesiology Nursing
NGR6463 - Pharmacology and Chemistry of Anesthesiology Nursing II
NGR6490 - Regional Anesthesia and Pain Management
NGR6491 - Advanced Anesthesiology Nursing Seminar
NGR6492 - Professional Aspects of Anesthesiology Nursing
NGR6493 - Technology in Anesthesiology Nursing
NGR6494 - Anesthesia for Special Populations I
NGR6495 - Anesthesia for Special Populations II
NGR6497 - Advanced Anesthesia Life Support
NGR6941L - Anesthesiology Nursing Simulation Practicum I
NGR6970 - Master's Thesis I
NGR7716C - Fundamentals of Clinical Education

Nursing Graduate/CNHS Department

The Graduate Nursing Department at Florida International University's Nicole Wertheim College of Nursing & Health Sciences offers nationally accredited programs designed to prepare advanced practice nurses for leadership roles in clinical practice, education, policy, and research. The department offers several Master of Science in Nursing (MSN) degrees, a Doctor of Nursing Practice (DNP) degree, as well as post-graduate certificates. Subspecialties in each program include Adult-Gerontology Acute Care, Adult-Gerontology Primary Care, Family, Pediatric Primary Care, Pediatric Acute Care, and Psychiatric-Mental Health Nurse Practitioner tracks, and Nurse Educator. The curriculum emphasizes evidence-based practice, systems leadership, and quality improvement, to prepare graduates to meet the evolving needs of diverse populations. With a commitment to excellence, the department fosters the development of nursing professionals capable of transforming healthcare delivery and advancing the profession.

NGR7769 - Patient Safety and Quality Improvement in Healthcare
NGR7853 - Translational Research
NGR7854 - Analytical Methods for Evidence-Based Clinical Practice
NGR7871 - Healthcare Informatics
NGR7891 - Healthcare Finance and Economics in Advanced Clinical Practice
NGR7892L - Health Policy Practicum
NGR7940C - DNP Project I

NGR7941C - DNP Project II
NGR7942C - DNP Project III
NGR7943 - DNP Project Completion

Nursing PhD Program/CNHS Department

The Nursing and Health Sciences PhD Department at Florida International University's Nicole Wertheim College of Nursing & Health Sciences is committed to cultivating scientists and healthcare leaders equipped to advance evidence-based practice, education, and policy. Established in 2003 and expanded in 2025, the department offers rigorous, research-focused doctoral education through BSN-to-PhD, MSN-to-PhD, and Health Sciences-to-PhD pathways. Students engage in a curriculum that emphasizes interdisciplinary research, health equity, and leadership, preparing them to address complex healthcare challenges. Graduates are positioned for impactful careers in academia, clinical research, and health policy, contributing to the transformation of healthcare delivery and outcomes.

NGR7982 - Candidacy Examination

Nursing Undergraduate/CNHS Department

The Undergraduate Nursing Department at Florida International University's Nicole Wertheim College of Nursing & Health Sciences prepares students to become competent, compassionate, and practice-ready registered nurses through its comprehensive Bachelor of Science in Nursing (BSN) programs. With a strong focus on academic excellence, hands-on clinical training, and community engagement, the department offers several pathways tailored to diverse student backgrounds, including traditional, accelerated, online RN-to-BSN, and programs for foreign-educated physicians. The department is committed to advancing nursing education to meet the growing demands of today's complex healthcare landscape, ensuring graduates are equipped to pass the NCLEX-RN®, enter the workforce, and pursue advanced nursing degrees.

NUR4940 - Senior Nursing Synthesis

NUR4945L - Senior Clinical Practicum
NURO97 - RN to BSN credits

Nursing/CNHS Department

The Department of Nursing offers undergraduate and graduate programs that prepare students for a wide range of roles in clinical practice, research, education, and leadership. Curricular offerings include the Bachelor of Science in Nursing (BSN), Master of Science in Nursing (MSN), post-master's certificate programs, Doctor of Nursing Practice (DNP), DNP in Nurse Anesthesiology (DNP-NA), and Doctor of Philosophy in Nursing (PhD). These programs provide nursing students with a strong theoretical foundation and practical expertise to address complex healthcare challenges and improve patient outcomes across diverse populations.

Through rigorous coursework, hands-on clinical experiences, and faculty excellence, students gain a deep understanding of evidence-based practice, healthcare systems, interprofessional collaboration, and leadership in nursing. Graduates are equipped to deliver innovative, patient-centered care along the healthcare continuum and to contribute meaningfully to the evolving healthcare environment.

Department faculty are active scholars, educators, and clinicians whose areas of expertise include health promotion, chronic disease prevention and management, maternal and infant health, mental health, family health, advocacy, and healthcare delivery systems. Their research and service promote innovation in clinical instruction and applied practice, with a strong emphasis on improving health equity and outcomes across communities.

To explore all of the department's curricular offerings, click the "Programs" and "Courses" tabs above.

Department Website

Courses

NGR6333 - Advanced Pediatric Acute Care Nursing III

Occupational Therapy/CNHS Department

The Department of Occupational Therapy offers undergraduate-level courses and the Master of Science in Occupational Therapy degree. Through these curricular offerings, students receive training to become practitioners who help individuals across the lifespan to engage in meaningful activities. The department seeks to establish excellence in occupational therapy education, research, and scholarly activities, as well as to prepare knowledgeable, entry-level practitioners who will provide evidence-based occupational therapy services to a locally and globally diverse community.

Faculty service, scholarly activity, and research activity centers around occupational therapy interventions through clinical applications and applied research on related topics. Community practice partnerships provide rich environments for service-learning and applied research.

OTH6281 - Cultural, Global, and Environmental Issues in Occupational Therapy
OTH6431 - Biomechanical and Rehabilitative Approaches in Occupational Therapy II
OTH6431L - Biomechanical and Rehabilitative Approaches in Occupational Therapy II Lab
OTH6706 - Leadership & Management in Occupational Therapy
OTH6772 - Evidence Based Practice and Critical Appraisal
OTH6972 - Master's Project Development
OTH6973 - Master's Project Implementation

Philosophy/CASE Department

The Department of Philosophy offers undergraduate-level programs and undergraduate- and graduate-level courses. The study of philosophy instills habits of critical thinking; enhances reading, writing, and oral communication skills; transmits cultural and intellectual inheritance; stimulates engagement in fundamental questions about reality, knowledge, and the human good; and gives expression, in both teaching and scholarship, to the highest of human aspirations and ideals—the pursuit of knowledge.

The Bachelor of Arts (BA) in Philosophy provides students with excellent preparation for graduate school (e.g., in philosophy or law) and for any career that requires analytical and communicative skills.

To explore all of the department's curricular offerings, click the "Programs" and "Courses" tabs above.

Physical Therapy/CNHS Department

The Doctor of Physical Therapy (DPT) program prepares students to advance physical therapy practice through evidence-based education, clinical research, critical thinking, and community engagement. Students build strong foundations in science, clinical reasoning, and essential psychomotor and patient management skills to deliver high-quality care across the lifespan in diverse populations and settings.

Students participate in extensive laboratory training and full-time clinical education experiences that foster professional behaviors, ethical practice, and readiness for autonomous clinical decision-making.

The DPT program prepares graduates to enter the profession as safe, competent, and ethical physical therapists who meet the expectations outlined by the Commission on Accreditation in Physical Therapy Education (CAPTE) and are eligible to test for licensure, National Physical Therapy Exam (NPTE).

For more information, visit the Nicole Wertheim College of Nursing and Health Sciences website.

PHY2048 - Physics with Calculus I
PHY2048L - General Physics Laboratory I
PHY2049 - Physics with Calculus II
PHY2049L - General Physics Laboratory II
PHY2053 - Physics without Calculus I
PHY2054 - Physics W/O Calc II
PHY2065 - Problem Solving in Physics without Calculus I
PHY2166 - Problem Solving in Physics without Calculus II
PHY3012 - Seminar in Physics Education
PHY3018 - Research Methods in Physics
PHY3106 - Modern Physics
PHY3107 - Advanced Modern Physics
PHY3424 - Optics
PHY3465 - Physics of Music
PHY3513 - Thermodynamics
PHY3802L - Intermediate Physics Lab
PHY3803L - Intermediate Physics Lab II
PHY3941 - Internship in Physics
PHY4221 - Introduction to Classical Mechanics
PHY4222 - Advanced Classical Mechanics
PHY4323 - Intermediate Electromagnetism I
PHY4324 - Intermediate Electromagnetism II
PHY4604 - Quantum Mechanics I
PHY4605 - Quantum Mechanics II
PHY4745 - Physical Foundation of Quantum Computing
PHY4821L - Advanced Physics Lab
PHY4905 - Independent Study
PHY4906 - Independent Study
PHY4907 - Independent Study

PHY4936 - Special Topics
PHY5081 - Graduate Problem Solving in Physics
PHY5115 - Mathematical Physics I
PHY5116 - Mathematical Physics II
PHY5235 - Nonlinear Dynamics and Chaos
PHY5240 - Advanced Classical Mechanics
PHY5346 - Advanced Electromagnetic Theory I
PHY5347 - Advanced Electromagnetic Theory II
PHY5446 - Laser Physics
PHY5466 - The Physics of Music
PHY5930 - Seminar in Physics
PHY5936 - Special Topics Research
PHY5937 - Seminar in Special Topics
PHY5940 - Physics Graduate Teaching Workshop
PHY6524 - Statistical Physics
PHY6645 - Advanced Quantum Mechanics I
PHY6646 - Advanced Quantum Mechanics II
PHY6668 - Relativistic Quantum Field Theory I
PHY6669 - Relativistic Quantum Field II
PHY6716 - Advanced Biophysics
PHY6935 - Grad Research Sem
PHY6936 - Advanced Topics in Physics
PHY6939 - Graduate Research
PHY6970 - Thesis Research
PHY6971 - Master's Thesis
PHY7981 - PH.D. Dissertation
PHZ2102 - Prob Solving Phy I
PHZ2103 - Prob Solving Phy II
PHZ3113 - Methods in Theoretical Physics
PHZ3308 - Applications of Nuclear Physics
PHZ3360 - Introduction to Radiation Protection
PHZ3361 - Radiation Detection and Measurement
PHZ3422 - Nanoscience and Nanotechnology
PHZ4390 - Nuclear and Particle Physics
PHZ4404 - Introduction to Solid State Physics
PHZ4710 - Introduction to Biophysics
PHZ4731 - Introduction to Health Physics
PHZ5156 - Computational Physics I
PHZ5157C - Computational Physics II
PHZ5304 - Advanced Nuclear Physics
PHZ5340 - Particle Interactions and Detection
PHZ5370 - Nanoscience
PHZ5405 - Solid State Physics
PHZ5607 - General Relativity
PHZ5705 - Biomedical Physics
PHZ5734 - Nuclear Medicine Physics
PHZ6255 - Molecular Biophysics
PHZ6354 - Introduction to Particle Physics
PHZ6396 - Advanced Nuclear and Particle Physics
PHZ6426 - Advanced Solid State Physics

PHZ6437C - Surface Physics
PHZ6706 - Physics of Cognitive Neuroimaging Methods I
PHZ6707 - Physics of Cognitive Neuroimaging Methods II
PSC4813 - Modeling Instruction

Politics & Intl Relations/SIPA Department

The Department of Politics and International Relations offers undergraduate- and graduate-level programs and courses in politics and international relations, and related fields. These curricular offerings combine traditional disciplinary strengths in political science with a multidisciplinary approach to the study of international relations. The resulting undergraduate and graduate offerings train students in the programs to become critical global thinkers and problem solvers. Students are provided the opportunity to study various theoretical and methodological approaches to the analysis of these fields of study.

As part of the Steven J. Green School of International and Public Affairs, departmental faculty scholarship contributes to the school's eight strategic research themes: Migration, Diaspora, and Transient Communities; Poverty, Health, and Global Inequalities; Economic Development, Sustainability, and Environment; Religion, Society, and Interfaith Engagement; Nationalism, Identity, and Language; Human Rights and Democratization; Security, Foreign Policy, and Governance; and Historical Inquiry, Memory, and Reconciliation.

To explore all of the department's curricular offerings, click the "Programs" and "Courses" tabs above.

Department Website

Programs

INTLRL:BA - Bachelor of Arts in International Relations
INTLRL:PHD - Doctor of Philosophy in International Relations
INTLST:MA - Master of Arts in International Studies
PLWSPV:CFI - Undergraduate Certificate in Pre-Law Skills and Professional Values
POLSC:BA - Bachelor of Arts in Political Science
POLSC:MA - Master of Arts in Political Science
POLSC:PHD - Doctor of Philosophy in Political Science
XINTREL:MN - Minor in International Relations
XPOLSC:MN - Minor in Political Science

Courses

CPO2002 - Introduction to Comparative Politics
CPO2102 - Politics of Europe
CPO2304 - Politics of Latin America
CPO3010 - Comparative Politics: Theory and Practice
CPO3055 - Authoritarians and Democrats
CPO3104 - Politics of the European Union
CPO3204 - African Politics
CPO3403 - Politics of the Middle East
CPO3502 - Politics of the Far East
CPO3530 - Comparative Politics of Pakistan, India, and South Asia
CPO3643 - Russian Politics
CPO4034 - The Politics of Development and Underdevelopment
CPO4047 - Politics of North American Cooperation
CPO4053 - Political Repression and Human Rights
CPO4057 - Political Violence and Revolution

CPO4072 - Comparative Electoral Behavior
CPO4303 - Politics of South America
CPO4323 - Politics of the Caribbean
CPO4333 - Politics of Central America
CPO4340 - Politics of Mexico
CPO4360 - Cuban Politics
CPO4394 - Race and Politics in the Americas
CPO4401 - The Arab-Israeli Conflict
CPO4507 - Comparative Political Economics of Asia
CPO4541 - Politics Of China
CPO4553 - Government and Politics of Japan
CPO4614 - Politics of Eastern Europe
CPO4725 - Comparative Genocide
CPO4726 - Ethnicity and Nationalism
CPO4735 - Democratic Transitions
CPO4737 - Politics of Transition and Human Rights
CPO4741 - Comparative Political Economy
CPO4930 - Topics in Comparative Politics
CPO4957 - Czech Republic in the Global Arena: Study Abroad
CPO5036 - Politics of Development
CPO5091 - Seminar in Comparative Politics
CPO5325 - Politics of the Caribbean
CPO5745 - Political Economy of Disaster Risk Reduction
CPO5934 - Topics in Comparative Politics
CPO5936 - Seminar in Comparative Political Parties
CPO6084 - War, Peace and the Military
CPO6092 - Seminar in Comparative Political Culture
CPO6105 - Politics of the European Union
CPO6106 - Seminar on European Politics
CPO6307 - Seminar on South American Politics
CPO6316 - Seminar in Latin American Democratic Institutions
CPO6350 - Seminar in Brazilian Politics
CPO6407 - Seminar in Politics of the Middle East
CPO6546 - Chinese Politics
CPO6771 - Politics of Disaster
INR2001 - Introduction to International Relations
INR3030 - Diplomacy
INR3043 - Population and Society
INR3045 - The Global Challenge of Refugees and Migrants
INR3061 - Conflict, Security and Peace Studies in INR
INR3081 - Contemporary International Problems
INR3102 - American Foreign Policy
INR3134 - Writing for Intelligence and National Security
INR3214 - International Relations of Europe
INR3222 - Pakistan in Regional and Global Politics
INR3223 - Japan and the United States
INR3224 - International Relations of East Asia
INR3226 - International Relations of Central Asia and the Caucasus
INR3227 - International Relations of South Asia
INR3243 - International Relations of Latin America

INR3246 - International Relations of the Caribbean
INR3251 - African Development
INR3252 - International Relations of North Africa
INR3253 - International Relations of Sub-Saharan Africa
INR3262 - International Relations of Russia and the Former USSR
INR3274 - International Relations of the Middle East
INR3303 - Foreign Policymaking
INR3331 - European Foreign and Security Policy
INR3403 - International Law
INR3502 - International Organizations
INR3703 - International Political Economy
INR3763 - Global Politics of Cyberspace and Artificial Intelligence
INR4013 - Development of International Relations Thought
INR4031 - The Media and International Relations
INR4054 - World Resources and World Order
INR4073 - International LGBT Politics and Advocacy
INR4075 - International Protection of Human Rights
INR4076 - International Relations of Drug Trafficking
INR4077 - Gender Equality and Human Rights in Global Perspectives
INR4082 - Islam in International Relations
INR4084 - Ethnicity in World Politics
INR4085 - Gender Hierarchies in International Relations
INR4091 - Ethical Problems in International Relations
INR4093 - Postcolonialism in International Relations
INR4204 - Comparative Foreign Policy
INR4210 - International Relations of Scandinavia and the Arctic
INR4232 - International Relations of China
INR4273 - The International Relations of Iran and the Persian Gulf
INR4335 - Strategic Studies and National Security
INR4350 - International Environmental Politics
INR4408 - Topics in International Law
INR4411 - The Laws of War
INR4412 - International Law of the Sea
INR4436 - International Negotiation
INR4501 - Multinational Organizations
INR4521 - Politics of Regional Integration
INR4603 - Theories of International Relations
INR4707 - The Political Economy of China
INR4905 - Independent Study
INR4926 - Model United Nations
INR4927 - Advanced Model United Nations
INR4931 - Topics in International Relations
INR4933 - Topics in International Politics
INR4937 - Honors Seminar 1: Advanced Writings in International Relations
INR4943 - Internship in International Affairs
INR5007 - Seminar in International Politics
INR5012 - Global Issues and Human Rights
INR5017 - Approaches to Area Studies
INR5036 - Politics of Globalization
INR5062 - War, Peace and Conflict Resolution in INR

INR5066 - Global and Human Security
INR5072 - The Media and International Relations
INR5086 - Islam in International Relations
INR5087 - Ethnicity and the Politics of Development
INR5088 - Feminism and International Relations
INR5105 - American Foreign Policy
INR5255 - Seminar in African Development
INR5256 - Conflict and Peacemaking in Africa
INR5275 - International Relations of the Middle East
INR5276 - Graduate Seminar The International Relations of Iran and the Persian Gulf
INR5315 - Foreign Policy Analysis
INR5352 - Environment and Security
INR5409 - International Law I
INR5507 - International Organizations I
INR5543 - International Politics Economy of East Asia
INR5544 - The New Asian Century
INR5607 - International Relations and Development
INR5609 - Contemporary Dynamics of International Relations
INR5615 - Research Design in International Relations
INR5616 - Qualitative and Interpretive Methods in International Relations
INR5766 - Seminar in Cyberspace and AI: Global Politics and Dynamics
INR5906 - Independent Study
INR5934 - Topics in International Politics
INR5935 - Topics in International Relations
INR5943 - Internship in International Relations
INR6010 - Global Governance
INR6019 - Seminar in Comparative Area Studies
INR6056 - Environment and Development
INR6067 - Human Security
INR6089 - International Relations and Human Rights
INR6092 - Seminar on Non-State Actors
INR6107 - U.S. Foreign Policy: Processes and Institutions
INR6209 - Comparative Foreign Policy of Latin America
INR6245 - The Military, Latin America and International Security
INR6266 - Seminar on the International Relations of Russia and Eurasia
INR6338 - Seminar in Security Studies
INR6406 - International Law II
INR6604 - International Relations Theory I
INR6606 - Political Psychology of International Relations
INR6608 - Contemporary International Relations Theory
INR6705 - Seminar in International Political Economy
INR6706 - Political Economy of International Relations
INR6936 - Seminar in Inter-American Politics
INR6967 - Preparation: Comprehensive Examination
INR6975 - Thesis
INR7910 - Pre-Dissertation Research
INR7980 - PH.D. Dissertation
ISS6132 - Intelligence Community Successes and Failure: Policy Implications
ISS6384 - Reputation and Crisis Management
POS2041 - American Government

POS2112 - Introduction to State and Local Government
POS3064 - Federalism and Intergovernmental Relations
POS3152 - Urban Politics
POS3258 - Politics on Film
POS3283 - The Judicial Process
POS3413 - The Presidency
POS3424 - The Legislative Process
POS3443 - Political Parties
POS3603 - Constitutional Law: Powers
POS3604 - Constitutional Law: Limitations
POS3652 - Law and the Legal Profession
POS3703 - Methods of Political Analysis
POS4034 - Political Change in America
POS4035 - Environmental Politics
POS4070 - Race and Politics in the United States
POS4071 - Corporate Power and American Politics
POS4072 - Women In Politics
POS4073 - The Military and the Citizen
POS4074 - Latino Politics
POS4122 - State Government and Politics
POS4154 - Topics in Urban Politics and Policy
POS4173 - Politics in the American South
POS4182 - Florida Politics
POS4188 - Miami Politics
POS4205 - American Political Culture
POS4233 - Public Opinion
POS4252 - Polarization in American Politics
POS4314 - American Ethnic Politics
POS4463 - Interest Group Politics

POT6208 - Seminar in American Political Thought
POT6315 - Democratic Theory
POT6416 - Seminar In Marxism
POT6603 - Political Theory of the Modern State
PUP6105 - Urban Challenges and Policy Innovations

Psychology/CASE Department

The Department of Psychology offers undergraduate- and graduate-level programs and courses in the areas of psychology and neuroscience, and numerous subdisciplines of these fields.

At the undergraduate level, psychology students are taught the fundamentals of psychological science, and are prepared for careers in education, social service, government, health, and business. By coupling science and practice, Psychology students are prepared to understand and develop solutions to problems that will affect their lives and those of future generations. Master's, doctoral, and post-doctoral students are trained to become research scientists or applied professional psychologists.

To explore all of the department's curricular offerings, click the "Programs" and "Courses" tabs above.

Department Website

Programs

ABHVAN:CFI - Graduate Certificate in Applied Behavior Analysis
ASCP:CFI - Graduate Certificate in Applied Social and Cultural Psychology
BHVNEUR:BS - Bachelor of Science in Behavioral Neuroscience
COGNSC:MS - Master of Science in Cognitive Neuroscience
COGNSC:PHD - Doctor of Philosophy in Cognitive Neuroscience
PSYC:BA - Bachelor of Arts in Psychology
PSYC:MS - Master of Science in Psychology
PSYC:PHD - Doctor of Philosophy in Psychology
XPSYCH:MN - Minor in Psychology

Courses

CBH5256 - Animal Cognition
CLP2001 - Personal Adjustment
CLP4134 - Childhood Psychopathology
CLP4146 - Psychopathology
CLP4314 - Psychology of Health and Illness
CLP4374 - Psychotherapy
CLP4444 - Personality Disorder
CLP5007 - Psychological Clinical Science: History, Systems, and Current Controversies
CLP5165 - Psychopathology
CLP5166 - Advanced Abnormal Psychology
CLP5931 - Ethical Code in Psychological Practice
CLP6060 - Affective Bases of Behavior
CLP6426 - Neuropsychology
CLP6432 - Foundation Practicum I
CLP6436 - Introduction to Psychological Assessment
CLP6449 - Career Development in Adolescence and Adulthood
CLP6471 - Assessment and Treatment I: Internalizing Problems
CLP6472 - Assessment and Treatment II: Externalizing Problems
CLP6473 - Assessment and Treatment III: Developmental, Learning and Pediatric Disorders
CLP6498 - Diagnosis and Treatment of Sexual Disorders
CLP6530 - Dissemination and Implementation of Research
CLP6943 - Advanced Clinical Practicum
CLP6945 - Clinical Practicum in Psychology
CLP6947 - Foundations Practicum II (Treatment)
CLP6948 - Clinical Internship
CLP6949 - Advanced Clinical Internship
CYP3003 - Introduction to Community Psychology
CYP5534 - Groups as Agents of Change
CYP6526 - Psychology Research Methods and Program Evaluation
CYP6536 - Principles and Methods of Psychological Consultation
CYP6766 - The Psychology of Crosscultural Sensitization in a Multicultural Context
CYP6936 - Current Issues in Community Psychology
DEP2000 - Human Growth and Development: Introductory Developmental Psychology
DEP2001 - Psychology of Infancy and Childhood
DEP3115 - Development in Infancy: The Basis of Human Knowledge
DEP3305 - Psychology of Adolescence
DEP3404 - Psychology of Adulthood

DEP4014 - Psychology of Parenting & Parenthood
DEP4032 - Life-Span Cognitive Development
DEP4164 - Children's Learning
DEP4182 - Socio-emotional Development
DEP4464 - Psychology of Aging
DEP5058 - Biological Basis of Behavior Development
DEP5065 - Cognitive Development
DEP5068 - Applied Life Span Developmental Psychology
DEP5099 - Pro-seminar in Infancy, Childhood, and Adolescence
DEP5608 - Theoretical Perspectives in Developmental Psychology
DEP5796 - Methods of Developmental Research
DEP5936 - Theory and Research Experience in Developmental Science
DEP6046 - Cross Cultural Perspectives of Emerging & Established Adulthood
DEP7096 - Seminar in Psychology of Life-Span Social Development
EAB3002 - Introduction to the Experimental Analysis of Behavior
EAB3794 - Principles of Applied Behavior Analysis
EAB4741 - Supervision in Applied Behavior Analysis
EAB4764 - Advanced Principles of Applied Behavior Analysis
EAB4782 - Ethics in Applied Behavior Analysis
EAB4795 - Senior Seminar in Applied Behavior Analysis
EAB4798 - Single Case Research Methods
EAB5060 - Behavior Analysis Career Development
EAB5098 - Pro-seminar in the Experimental Analysis of Behavior
EAB5655 - Advanced Methods of Behavior Change
EAB5700 - Concepts and Principles of Behavior Analysis
EAB5701 - Behavior Assessments
EAB5785 - Organizational Behavior Management and Supervision
EAB5797 - Single-Case Research Methods
EAB5917 - Supervised Research in Behavior Analysis
EAB5937 - Special Topics in Behavior Analysis
EAB6005 - Foundations of Behavior Analysis
EAB6707 - Learning and Development
EAB6717 - Science and Practice of Verbal Behavior
EAB6770 - Behavioral Technologies
EAB6780 - Ethical Code in Behavior Analysis
EAB6941 - Practicum in Applied Behavior Analysis
EXP3304 - Motivation and Emotion
EXP3523 - Memory and Memory Improvement
EXP4204 - Sensation and Perception
EXP4604 - Cognitive Processes
EXP5099 - Pro-seminar in Experimental Psychology
EXP5508 - Applied Cognitive Psychology
EXP5667 - Cognitive Neuroscience
INP3004 - Introductory Industrial/Organizational Psychology
INP4203 - Personnel Psychology
INP4210 - Employee Selection
INP4313 - Organizational Psychology
INP5095 - Proseminar in Industrial Psychology
INP6005 - Strategies & Methods in Psychological Research
INP6090 - Applied Psychology and Organizational Consulting

INP6115 - Psychology of Culture and Organizations
INP6216 - Personnel Selection
INP6235 - Applied Psychology of Training and Development
INP6611 - Organizatonal Stress
INP6940 - Industrial Psychology Internship/Practicum
LIN4710 - Language Acquisition
PCO5311 - Theory, Treatment, and Research of Addictive Behavior
PCO6206 - Principles & Practices of Counseling & Psychotherapy
PCO6945 - Case Conceptualization for Counselors
PPE3003 - Theories of Personality
PPE3502 - Psychology of Consciousness
PPE4514 - Psy/Dreams & Dreamin
PSB2071 - Cognitive Neuroscience in the Media and Pop Culture
PSB3002 - Introductory Bio-Psychology
PSB3007 - Introduction to Behavioral Neuroscience
PSB3101 - Behavioral Neuroscience Methods
PSB3461 - Hormones & Behavior
PSB3504 - Developmental Neuroscience
PSB4001 - History of Neuroscience
PSB4100 - Introduction to Programming for Neuroscience
PSB4200 - Systems Neuroscience
PSB4240 - Neuropsychology
PSB4241 - Clinical Neuroscience
PSB4250 - Animal Cognition
PSB4434 - Neuropharmacology
PSB4581 - Behavioral Epigenetics
PSB4800 - Neurobiology of Learning and Memory
PSB4823 - Advanced Behavioral Neuroscience
PSB5115 - Introduction to Psychophysiology: Basics of Electroencephalography and Event-Related Potentials
PSB5247 - Neurobiology of Learning and Memory
PSB5615 - Visual & Visuospatial Cognitive Neuroscience
PSB5938 - Current Topics in Neuroscience Series
PSB6035 - Introduction to Computational Cognitive Neuroscience
PSB6215 - Human Neuroanatomy
PSB6247 - Biological Bases of Behavior
PSB6351 - Cognitive Neuroimaging Methods
PSB6948 - Cogntive Neuroscience Internship
PSY2012 - Introductory Psychology
PSY2930 - Introductory Special Topics in Psychology
PSY3024 - Psychology Career Development
PSY3211 - Research Methods and Data Analysis in Psychology I
PSY3213 - Research Methods in Psychology
PSY3215 - Research Methods and Data Analysis in Psychology II
PSY4302 - Psychological Testing
PSY4900 - Independent Readings in Psychology
PSY4914 - Honors Research Proj
PSY4916 - Independent Research in Psychology
PSY4930 - Advanced Special Topics in Psychology
PSY4931 - Senior Seminar in Psychology
PSY4940 - Research Internship in Psychological Science

PSY4941 - Experiential Learning/Internship in Psychology
PSY5060 - Applied Psychological Science
PSY5246C - Multivariate Analysis in Applied Psychological Research
PSY5605 - Proseminar: History and Systems of Psychology
PSY5908 - Directed Individual Study
PSY5918 - Supervised Research
PSY5930 - Qualitative Research Methods in Psychology
PSY5939 - Special Topics in Psychology
PSY6076 - Professional & Personal Development for Doctoral Students
PSY6219 - Research Methods in Clinical Child Psychology
PSY6919 - Current Research Topics in Psychology
PSY6956 - Psychology Field Experience
PSY6971 - Master's Thesis in Psychology
PSY7980 - Ph.D. Dissertation
SOP2772 - Psychology of Sexual Behavior
SOP3004 - Introductory Social Psychology
SOP3015 - Social and Personality Development
SOP3742 - Psychology of Women
SOP3932 - Psychology of Drugs and Drug Use
SOP4731 - Global Psychology: Cross Cultural Perspectives on Psychological Research and Theories
SOP4745 - Women and Leadership
SOP4774 - Female Sexuality
SOP4842 - Legal Psychology
SOP5058 - Proseminar in Social Psychology
SOP5316 - Theories and Methods of Cross-Cultural Research
SOP5616 - Social Psychology of Organizations
SOP5726 - Proseminar on the Psychology of Stereotyping, Prejudice, and Discrimination
SOP5753 - Wrongful Convictions
SOP5754 - The Psychology of Eyewitness Identification
SOP5755 - Development and the Law
SOP5756 - Investigative Interviewing
SOP5757 - Interrogation and Deception Detection
SOP6098 - Proseminar in Legal Psychology
SOP6752 - Psychology of Juries

Public Policy and Administration/SIPA Department

The Department of Public Policy and Administration, which is located within the Steven J. Green School of International and Public Affairs, offers Bachelor's, Master's, and Ph.D. programs in public policy and public administration. These programs prepare students for careers in public affairs, public administration, nonprofit, and public policy with the skills and values necessary to be effective and thoughtful leaders, managers, analysts, and citizens. The program serves the unique needs of the South Florida community and its employers, as well as the State of Florida, the United States, and international organizations. The department’s faculty, students, alumni, and community contribute to the scholarship of public policy and administration and enhance the quality of life in an increasingly globalized environment. Our world renowned faculty are engaged in cutting edge research on disaster management, performance evaluation, human resources, international development, smart governance, public finance and budgeting, urban planning, and many other public management related areas.

To explore all of the department’s curricular offerings, click the “Programs” and “Courses” tabs above.

Department Website

Programs

CIVLED:CFI - Undergraduate Certificate in Civic Leadership and Engagement
COMMD:CFI - Graduate Certificate in Nonprofit and Community Development
ETCHAI:CFI - Undergraduate Certificate Emerging Technologies and AI Policy
HRPMG:CFI - Graduate Certificate in Human Resource Policy and Management
HSERM:CFI - Graduate Certificate in Homeland Security and Emergency Management
IDEAL:CFI - Graduate Certificate in Inclusion, Diversity, Equity, Access and Leadership (IDEAL)
INCPA:CFI - Graduate Certificate in International and Comparative Public Administration
NATSG:CFI - Graduate Certificate in National Security Studies
PA:MPA - Master of Public Administration
PA:PHD - Doctor of Philosophy in Public Affairs
PADM:BPPA - Bachelor of Public Policy and Administration
PUBFPC:CFI - Graduate Certificate in Public Finance, Procurement, and Contract Management
PUBMG:CFI - Graduate Certificate in Public Management and Civic Leadership
URPOI:CFI - Graduate Certificate in Urban Policy Innovations
XPA:MN - Minor in Public Policy and Service

Courses

PAD2000 - Introduction to Public and Community Service
PAD3003 - Introduction to Public Policy and Administration
PAD3034 - Policy Development and Implementation
PAD3431 - Exploring Leadership: Yourself, Your Organization and Your Community
PAD3800 - Managing Global Cities
PAD3802 - Introduction to Urban and Regional Studies
PAD3803 - Government and Administration of Metropolitan Areas
PAD3834 - International Comparative Administration
PAD4046 - Values, Ethics, and Conflict Resolution
PAD4140 - Introduction to Management of Public and Nonprofit Organizations
PAD4141 - Citizen Participation and Community Empowerment
PAD4223 - Public Sector Budgeting
PAD4414 - Personnel Skills for Administrators
PAD4432 - Administrative Leadership and Behavior
PAD4712 - IT and E-government for Public Managers
PAD4723 - Applied Research Methods for Policy & Management
PAD4905 - Independent Study in Public Administration
PAD4934 - Integrative Seminar in Public Policy and Service
PAD4940 - Public Administration Internship
PAD5043 - Equitable and Inclusive Governance
PAD5187 - Cultural Competency
PAD5256 - Economic Thinking in Policy Making
PAD5416 - Social Equity and Human Resource Management
PAD5427 - Collective Bargaining in the Public Sector
PAD5435 - Gender Equity and Leadership in Public Administration
PAD5443 - The Public Administrator and Media Relations
PAD5460 - Performance Management
PAD5616 - Contracting and Managing Third Party Governments
PAD5805 - Economic Development and Urban Revitalization
PAD5934 - Contemporary Issues in Public Administration
PAD6053 - Political, Social and Economic Context of Public Administration

PAD6056 - The Practice of Public Management
PAD6142 - Management of Nonprofit Organizations
PAD6156 - Applied Organization Theory and Behavior
PAD6205 - Public Financial Management
PAD6209 - Financial Management in Public and Nonprofit Organizations
PAD6227 - Public Finance and the Budgetary Process
PAD6306 - Policy Analysis
PAD6366 - Policy and Program Implementation
PAD6379 - Homeland Security Risk Assessment
PAD6399 - Homeland Security Management for State and Local Government
PAD6417 - Human Resource Policy and Management
PAD6434 - Leadership and Decision-making
PAD6436 - Professionalism and Ethics
PAD6437 - Dynamics of Individual Growth
PAD6605 - Administrative Law and Procedures
PAD6701 - Quantitative Methods in Public Administration
PAD6710 - IT and E-government
PAD6718 - Smart Governance
PAD6726 - Applied Research Methods for Accountability in Public and Nonprofit Organizations
PAD6807 - Urban and Municipal Government Administration

Real Estate/CBADM Department

The Tibor and Sheila Hollo School of Real Estate offers undergraduate- and graduate-level programs and courses in real estate. These curricular offerings provide students with comprehensive exposure to the real estate industry, and include an emphasis on international real estate, the quantification of real estate decisions, the financing of real estate, and the financial markets that support real estate activities.

The school's faculty are internationally recognized specialists in real estate and finance; instruction is augmented with senior real estate professionals. Faculty members are widely published and nationally ranked for research productivity by the Journal of Real Estate Literature, a top journal in the field. Faculty also engage with industry leaders and present cutting-edge research throughout the world.

To explore all of the school's curricular offerings, click the "Programs" and "Courses" tabs above.

Robert Stempel College of Public Hlth & Social Wrk Department

The Robert Stempel College of Public Health and Social Work serves the South Florida community by increasing, sharing, and applying knowledge, wisdom, and ethical decision making in public health and social welfare through:

- Educating and training future leaders, researchers, and practitioners;
- Conducting innovative research translating research into policy, programs, and practice; and
- Promoting healthy lives for diverse and especially underserved populations, here and abroad.

The college includes Public Health (Biostatistics, Environmental Health Sciences, Epidemiology, Global Health, and Health Promotion and Disease Prevention); the Department of Dietetics and Nutrition, the Academy for International Disaster Preparedness, and the School of Social Work.

The college offers academic programs of study that lead to a baccalaureate degree in Dietetics and Nutrition; Disaster Management; and Social Work. The college offers the academic programs of study that lead to a master's degree in Public Health; Dietetics and Nutrition; Social Work; and Disaster Management. The college also offers academic programs of study that lead to the PhD in Public Health; Dietetics and Nutrition; and Social Welfare.

Social Work/CPHSW Department

The School of Social Work offers undergraduate- and graduate-level programs and courses in social work. These curricular offerings prepare students to work in governmental, academic, non-profit, and for-profit settings in community, regional, state, and national systems. Through classroom and field experiences, students gain knowledge and skills vital to the practice and research of social work. Internships are completed in hundreds of community agencies throughout Miami-Dade, Broward, Palm Beach, and Monroe counties, resulting in more than 100,000 internship hours contributed by our student interns each year. As a result, graduates significantly impact the South Florida community and contribute substantially to the field of social work through direct practice, administration, advocacy, and research.

To explore all of the school's curricular offerings, click the "Programs" and "Courses" tabs above.

Teaching & Learning/CASE Department

The Department of Teaching and Learning offers a range of undergraduate and graduate programs that prepare students for impactful careers across educational and human performance fields. Undergraduate and graduate programs (BS, MS, EdS, PhD; with select programs leading to certification) focus on areas such as teacher preparation and professional learning, curriculum studies and development, and movement and health sciences. With a commitment to innovation and evidence-based approaches that bridge theory-research-practice, these programs support current and future educators, researchers, and professionals in classroom and non-classroom settings. Faculty specialty areas in education include Curriculum and Instruction; Early Childhood; Elementary; English; Literacy/Reading; Sports and Exercise Science/Kinesiology; Social Studies; Special Education; Mathematics/Science/STEM; and TESOL/Foreign Language.

To explore all of the department's curricular offerings, click the "Programs" and "Courses" tabs above.

Theatre/CARTA Department

The Department of Theatre offers undergraduate-level programs and courses in the areas of theatre arts, acting, design, and musical theatre. The department seeks to develop artists who are engaged critical thinkers and who enhance the intellectual, aesthetic, and cultural life locally, regionally, and beyond.

Departmental faculty are dedicated, compassionate, and highly skilled professionals with advanced training and academic skill. Faculty help students comprehend and practice discipline and commitment to all endeavors. They strive to actively respect, support, and practice the fundamental and non-traditional ideas of diverse artists in the highly collaborative production process. Faculty scholarship, research, and innovation are accomplished through work within the local, regional, and national theatre companies.

To explore all of the department's curricular offerings, click the "Programs" and "Courses" tabs above.

The Department of Theatre offers specialized programs with selective admission. Students who wish to apply should visit the department's **Application Page** for information on auditions and interviews.

Women's & Gender Studies/CASE Department

Established in 1982, the Center for Women's and Gender Studies (CWGS) serves as the hub for academic programs and generative partnerships that support health studies, violence prevention, cultural studies, and community engagement. Students may take face-to-face or online interdisciplinary courses toward a BA or second major. CWGS also offers undergraduate certificates in Women's and Gender Studies; Health Humanities; and Queer Studies; and a Graduate Certificate in Women's and Gender Studies. Graduates develop competencies for careers that value strong research, writing, and problem-solving skills, as well as knowledge of AI tools and digital literacy across sectors including healthcare, Fem Tech, education, marketing and business, legal professions, social work, psychology and counseling, and international affairs.

To explore all of the center’s curricular offerings, click the “Programs” and “Courses” tabs above.

AAGNP:MSN - Master of Science in Nursing - Adult-Gerontology Nurse Practitioner Program

Overview

Degree Offered
MSN - Master of Science in Nursing

Program Title
Adult-Gerontology Nurse Practitioner

The Master of Science in Nursing (MSN) degree in Adult-Gerontology Nurse Practitioner program prepares students to care for adolescent, young, middle, and older adults. The curriculum emphasizes disease prevention, health promotion, and the management of patients with acute and chronic multisystem health problems. Upon successfully completing the program, graduates will be prepared to act as leaders in the delivery of high-quality, accessible culturally competent healthcare in local and global societies.

Students will have the opportunity to apply directly into the following specialized majors: Primary Care or Acute Care.

For more information, visit the Nicole Wertheim College of Nursing and Health Sciences website.

Requirements

Simple Requirements

Admissions Requirements

Admissions Requirements for the Master of Science in Nursing (MSN) Adult-Gerontology Nurse Practitioner (Major: Primary Care)

1. Successful completion of all the admission requirements for graduate education at Florida International University and the Nicole Wertheim College of Nursing and Health Sciences.

2. Cumulative undergraduate GPA of 3.0 or greater in a 4.0 scale (CUM GPA is a calculation inclusive of all academic coursework including courses at the community college level.)

3. Undergraduate GPA of 3.0 or greater in Bachelor of Nursing upper division coursework.

4. Current State of Florida RN license. Out-of-state students must obtain a license to practice in Florida prior to admission.

5. Baccalaureate degree in Nursing (BSN) from a program accredited by the Commission on Collegiate Nursing Education (CCNE) or by the Accreditation Commission for Education in Nursing (ACEN) formerly known as the National League for Nursing Accrediting Commission (NLNAC). Applicants from Programs without such accreditation will be considered on an individual basis.

6. Completion of all MSN admission paperwork including the NursingCAS application, FIU supplemental application, a written essay, recommendations, and Curriculum Vitae, as well as favorable personal interview with the Graduate Admissions Committee.

7. Additionally, students must complete a background check, drug screening, and more. Candidates for admission must meet all legal requirements to be licensed to practice nursing in the State of Florida. As such, candidates for admission must disclose any conviction or plea of guilty, nolo contendere, or no contest to a misdemeanor or felony in any jurisdiction (other than minor traffic offenses). All misdemeanors and felonies must be disclosed, even if adjudication was withheld. Driving under the influence (DUI) or driving while impaired (DWI) are not minor traffic offenses for purposes of this disclosure.

Admissions Requirements for the Master of Science in Nursing (MSN) Adult-Gerontology Nurse Practitioner (Major: Acute Care)

1. Successful completion of all the admission requirements for graduate education at Florida International University and the Nicole Wertheim College of Nursing and Health Sciences.

2. Cumulative undergraduate GPA of 3.0 or greater in a 4.0 scale (CUM GPA is a calculation inclusive of all academic coursework including courses at the community college level.)

3. Undergraduate GPA of 3.0 or greater in Bachelor of Nursing upper division coursework.

4. Current State of Florida RN license. Out-of-state students must obtain a license to practice in Florida prior to admission.

5. Baccalaureate degree in Nursing (BSN) from a program accredited by the Commission on Collegiate Nursing Education (CCNE) or by the Accreditation Commission for Education in Nursing (ACEN) formerly known as the National League for Nursing Accrediting Commission (NLNAC). Applicants from Programs without such accreditation will be considered on an individual basis.

6. Completion of all MSN admission paperwork including the NursingCAS application, FIU supplemental application, a written essay, recommendations, and Curriculum Vitae, as well as favorable personal interview with the Graduate Admissions Committee.

7. Demonstrate ability in (or potential for) clinical excellent and leadership:

(a) A minimum of 1 year of full-time employment in an acute care setting is **required** by the time of admission.

(b) Experience in critical care, intermediate care, progressive care, or stepdown is **preferred**

8. Additionally, students must complete a background check, drug screening, and more. Candidates for admission must meet all legal requirements to be licensed to practice nursing in the State of Florida. As such, candidates for admission must disclose any conviction or plea of guilty, nolo contendere, or no contest to a misdemeanor or felony in any jurisdiction (other than minor traffic offenses). All misdemeanors and felonies must be disclosed, even if adjudication was withheld. Driving under the influence (DUI) or driving while impaired (DWI) are not minor traffic offenses for purposes of this disclosure.

Application Process

Applicants must complete the following steps in order to be considered for admission:

STEP 1 – Submit an application to Nursing CAS (the Centralized Application Service for Nursing Programs)

1. Complete an online application via Nursing CAS **http://www.nursingcas.org** and pay the appropriate fee to Nursing CAS.

2. Complete the required FIU supplemental application and pay the $30 fee.

3. Send official transcripts from **ALL SCHOOLS attended** (all Associates & Bachelors degree coursework) to Nursing CAS for upload and verification.

EXCEPTION: Foreign transcripts, along with their official evaluations (grades, credits, and GPA in U.S. terms), should be sent directly to the college at the following address: Nicole Wertheim College of Nursing & Health Sciences, AHC-3, Room 121, 11200 S.W. 8th Street, Miami, FL, 33199.

4. Upload all required supplemental items including three (3) professional nursing references, professional CV, copy of an active Florida RN License, and Personal Statement to Nursing CAS.

STEP 2 – Professional Interview

1. Following a review of all completed applications a select number of applicants will be offered the opportunity to participate in a panel interview.

2. Interview candidates may be instructed to bring an additional set of official transcripts to their interview appointment.

Admissions Requirements for the **Post-BSN-to-DNP Adult-Gerontology Nurse Practitioner-MSN/DNP**

1. Successful completion of all the admission requirements for graduate education at Florida International University and the Nicole Wertheim College of Nursing and Health Sciences.

2. Cumulative undergraduate GPA of 3.0 or greater on a 4.0 scale (CUM GPA is a calculation inclusive of all academic coursework including courses at the community college level.)

3. UG 60 GPA of 3.0 or greater in Bachelor of Nursing upper division coursework.

4. Current State of Florida RN license. Out-of-state students must obtain a license to practice in Florida prior to admission.

5. Baccalaureate degree in Nursing (BSN) from a program accredited by the Commission on Collegiate Nursing Education (CCNE) or by the Accreditation Commission for Education in Nursing (ACEN) formerly known as the National League for Nursing Accrediting Commission (NLNAC). Applicants from Programs without such accreditation will be considered on an individual basis.

6. Completion of all admission paperwork including the NursingCAS application, a written essay, Recommendations, and Curriculum Vitae

7. Essay (500 words) addressing desired focus and areas of interest for practice in The Post-BSN-to-DNP program.

8. Three (3) professional recommendations describing ability to be successful in a MSN-DNP program.

9. Curriculum Vitae.

10. Successful personal Interview with The Post-BSN-to-DNP admissions committee.

In order to advance to the DNP Scholarly Project course series component of this track, students must meet the following requirements upon conferral of MSN degree:

1. Maintain good academic standing as defined in the FIU Student Handbook

2. Current licensure with no restrictions as an APRN in your state of residence

3. Proof of Advanced Practice Specialty National Board Certification in the specialty of conferred MSN (i.e., AGNP, FNP, PNP, PMHNP)

Program Requirements

Program Policies

Nursing students are responsible for transportation expenses related to clinical experiences. They are required to carry health and accident insurance. To safeguard the health of clients, nursing students are required to submit proof of immunizations upon entry to into the nursing program. Students must submit proof of basic cardiopulmonary resuscitation (CPR) certification (American Heart Association) prior to entering clinical courses in the nursing major. This CPR certification must cover the period of enrollment in the degree program.

The College reserves the right to terminate a student from the nursing program for reasons related to the inability to safely carry out professional responsibilities.

Progression in the Program

The student must maintain a cumulative GPA of 3.0 in required graduate courses with a minimum of a "B" (85%) or better in all required courses.

If a student earns less than an 85 in any course, the course must be repeated and earn a grade of “85” or better. If this course is a prerequisite for another course, the student will not be allowed to continue enrollment for that course and may be allowed to enroll in other courses if applicable to the program. Only one course repeat in the program will be allowed. Therefore, a student who earns a grade below an 85 in more than one course will be dismissed from the program.

Students may not have a cumulative GPA below 3.0 in the courses for more than two semesters. If the cumulative GPA for required coursework is below 3.0 for a third semester, the student will be dismissed from the program.

Academic Standing

Good Standing: To achieve and maintain a classification of good standing, the student must maintain a minimum G.P.A. of 3.0 in the courses required for the MSN and DNP degrees.

MSN Level Course Requirements

Type
Completion Requirement

Graduate Nursing Core: 9 credits

Complete ALL of the following Courses:

- NGR5110 - Theories in Nursing
- NGR5131 - Culture and Advanced Nursing Practice
- NGR5810 - Research Methods in Nursing

Advanced Practice Nursing Core: 13 credits

Complete ALL of the following Courses:

- NGR6002C - Advanced Health Assessment
- NGR5141 - Pathophysiologic Basis of Advanced Nursing Practice
- NGR6172 - Pharmacology and Pharmacotherapeutics in Advanced Nursing Practice
- NGR5064C - Diagnostic and Therapeutics in Advanced Nursing Practice

Clinical Education Seminar: 1 credit

Complete ALL of the following Courses:

- NGR6743 - Advanced Practice Nursing Clinical Education Seminar

Major Requirements

The Master of Science in Nursing in Adult-Gerontology Primary Care

The Primary Care Nurse Practitioner program prepares advanced practice nurses to provide comprehensive, patient-centered care across the lifespan, focusing on health promotion, disease prevention, and the management of acute stable and chronic conditions in settings such as: outpatient and community-based clinics. Graduates of the program are equipped to develop long-term therapeutic relationships with patients, manage common illnesses, and coordinate care with other healthcare professionals to ensure continuity and holistic care.

Major in Adult-Gerontology Primary Care: 45 credits

Type

Completion Requirement

Advanced Adult-Gerontology Primary Care Nurse Practitioner: 15 credits

It requires a minimum of 45 semester credits of graduate work beyond the baccalaureate, including 630 of direct clinical hours.

Complete ALL of the following Courses:

- NGR6201C - Advanced Adult-Gerontology Nursing I
- NGR6201L - Advanced Adult-Gerontology Nursing Practice I
- NGR6202C - Advanced Adult-Gerontology Nursing II
- NGR6202L - Advanced Adult-Gerontology Nursing Practice II
- NGR6209 - Clinical Decision Making in Advanced Adult-Gerontology Nursing
- NGR6700L - Role Synthesis in Advanced Adult-Gerontology Nursing Practice

Graduation Requirements

1. Successful completion of 45 semester credits in nursing required courses and all clinical experience requirements.

2. Completion of a thesis (6 credits), a master’s paper (3 credits), or a research project (3 credits).

3. Achievement of an overall cumulative GPA of 3.0 or above. See Graduate Catalog in University Graduate School Rules and Regulations for information on Academic Warning, Probation, and Dismissal.

4. Removal of all conditions, deficiencies, and incomplete grades. Credit hours for courses in which the grade is “B-“or below will not count toward satisfying graduate degree requirements.

5. With the exception of thesis courses, students are expected to register for courses with letter grades.

The Master of Science in Nursing in Adult-Gerontology Acute Care

The Adult-Gerontology Acute Care Nurse Practitioner major will prepare advanced practice nurses to deliver high-quality, evidence-based care to acutely ill patients with complex health conditions. The program emphasizes comprehensive assessments, advanced diagnostics, and the management of emergent, life-threatening conditions. Adult-Gerontology

Acute Care graduates are trained to work collaboratively with interprofessional healthcare teams in fast-paced environments, such as intensive care units (ICUs), emergency departments, and specialty care units, providing critical interventions and managing the trajectory of acute illnesses.

Major in Adult-Gerontology Acute Care: 48 credits

Type

Completion Requirement

Advanced Adult-Gerontology Acute Care Nurse Practitioner: 25 credits

It requires a minimum of 48 semester credits of graduate work beyond the baccalaureate, including 630 direct clinical hours

Complete ALL of the following Courses:

- NGR5063C - Diagnostics and Procedures for Acute Care
- NGR6703 - Role Development of the Advanced Practice Nurse
- NGR6210 - Advanced Adult-Gerontology Acute Care Health I
- NGR6210L - Advanced Adult-Gerontology Acute Care Health Practicum I
- NGR6211L - Advanced Adult-Gerontology Acute Care Health Practicum II
- NGR6211L - Advanced Adult-Gerontology Acute Care Health Practicum II
- NGR6213 - Advanced Adult-Gerontology Acute Care Health III
- NGR6213L - Advanced Adult-Gerontology Acute Care Health Practicum III
- NGR6744 - Professional Advanced Practice Seminar

Graduation Requirements

1. Successful completion of 48 semester credits in nursing required courses and all clinical experience requirements.

2. Achievement of an overall cumulative GPA of 3.0 or above. See Graduate Catalog in University Graduate School Rules and Regulations for information on Academic Warning, Probation, and Dismissal.

3. Removal of all conditions, deficiencies, and incomplete grades. Credit hours for courses in which the grade is “B-“or below will not count toward satisfying graduate degree requirements.

4. Students are expected to register for courses with letter grades.

Track, Specialization, Concentration, Area of Emphasis, or Other Curricular Offering Requirements

Other Curricular Offering: Post-BSN-to-DNP Adult-Gerontology Nurse Practitioner-MSN/DNP

The Post-BSN-to-DNP is a program of graduate doctoral study for registered nurses. The Post-BSN-to-DNP program of study builds upon the initial clinical training of entry level nurses prepared at the baccalaureate level. This program will include the study of: advanced specialty practice; systematic practice and program outcome evaluation; application of health information resources; development of safe, equitable, and cost effective health policy; innovation, implementation and evaluation of care delivery models; leadership development in healthcare delivery and clinical expertise for advanced nursing practice education. Graduates of this program will be eligibility for certification as an Adult-Gerontology Primary Care Nurse Practitioner. The goals of the Post-BSN-to-DNP program are to prepare nurses for leadership roles in a specialized area of advanced nursing practice with an emphasis on: philosophical, ethical, and scientific principles

that provide the foundation for leadership in professional nursing care; continued acquisition of knowledge and clinical skills in an area of advanced practice specialization; and leadership and clinical expertise in healthcare delivery, evaluation, quality improvement and advanced practice nursing education.

Requirements

(1) Successful completion of 59 semester credits in post-BSN-to-DNP program required courses and all specialty clinical experience requirements; as well as satisfactory attainment of terminal program competencies (exit examination) prior to conferral of MSN degree.

(2) Successful completion of all DNP required core courses (36 credits), including DNP Project public presentation and defense are required for conferral of DNP degree.

(3) Achievement of an overall cumulative GPA of 3.0 or above. See Graduate Catalog in University Graduate School Rules and Regulations for information on Academic Warning, Probation, and Dismissal.

(4) Removal of all conditions, deficiencies, and incomplete grades. Credit hours for courses in which the grade is "B- or below will not count toward satisfying graduate degree requirements.

(5) With the exception of DNP Project courses, students are expected to register for courses with letter grades.

Other Curricular Offering: Post-BSN-to-DNP Adult-Gerontology Nurse Practitioner

Type

Completion Requirement

Doctor of Nursing Practice Core: 36 credits

Complete ALL of the following Courses:

- NGR7121 - Scientific and Theoretical Foundations for Advanced Nursing Practice
- NGR7769 - Patient Safety and Quality Improvement in Healthcare
- NGR7891 - Healthcare Finance and Economics in Advanced Clinical Practice
- NGR7871 - Healthcare Informatics
- NGR7854 - Analytical Methods for Evidence-Based Clinical Practice
- NGR7892L - Health Policy Practicum
- NGR7733 - Organizational Dynamics of Health Systems
- NGR7853 - Translational Research
- NGR7940C - DNP Project I
- NGR7941C - DNP Project II
- NGR7942C - DNP Project III

Advanced Practice Nursing Core: 14 credits

Complete ALL of the following Courses:

- NGR6002C - Advanced Health Assessment
- NGR5141 - Pathophysiologic Basis of Advanced Nursing Practice
- NGR6172 - Pharmacology and Pharmacotherapeutics in Advanced Nursing Practice
- NGR5064C - Diagnostic and Therapeutics in Advanced Nursing Practice
- NGR6743 - Advanced Practice Nursing Clinical Education Seminar

Graduate Nursing Core: 8 credits

Complete ALL of the following Courses:

- NGR5131 - Culture and Advanced Nursing Practice
- NGR5810 - Research Methods in Nursing
- NGR6703 - Role Development of the Advanced Practice Nurse

Adult-Gerontology Nurse Practitioner: 19 credits

Complete ALL of the following Courses:

- NGR6201C - Advanced Adult-Gerontology Nursing I
- NGR6201L - Advanced Adult-Gerontology Nursing Practice I
- NGR6202C - Advanced Adult-Gerontology Nursing II
- NGR6202L - Advanced Adult-Gerontology Nursing Practice II
- NGR6209 - Clinical Decision Making in Advanced Adult-Gerontology Nursing
- NGR6700L - Role Synthesis in Advanced Adult-Gerontology Nursing Practice

ABHVAN:CFI - Graduate Certificate in Applied Behavior Analysis

Overview

Degree Offered
PCRT - Professional Certificate

Program Title
Graduate Certificate in Applied Behavior Analysis

The Graduate Certificate in Applied Behavior Analysis is intended for individuals who have or are in the process of obtaining a master's degree and have an interest in human services. Students gain an understanding of human behavior based on the scientific principles of behavior analysis. The program focuses on the application of these principles to improve the lives of individuals by obtaining meaningful, lasting change in socially significant behavior. The curriculum meets the Behavior Analyst Certification Board© coursework requirements to become a Board Certified Behavior Analyst (BCBA). There are additional requirements for certification that are not provided through this program. Visit www.bacb.com for details on the certification process and requirements.

For more information, visit the College of Arts, Sciences, and Education website.

ACCT:BACC - Bachelor of Accounting

Overview

Degree Offered
BACC - Bachelor of Accounting

Program Title
Accounting

The Bachelor of Accounting (BAcc) degree prepares students to pursue positions in public, private sector, corporate, and governmental accounting. To qualify for positions in public accounting, students must take the CPA examination, which, in Florida, requires an additional 30 credit-hours beyond the BAcc degree. The BAcc also prepares students to pursue advanced degrees in accounting, business, or law.

For more information, visit the College of Business website.

Admissions Requirements

Admissions and Progression Requirements for All College of Business Undergraduate Students

Applicants must follow regular University admission procedures and upon admission declare their specific program within the College of Business. In addition, students must:

1. Complete courses detailed under Required Common Prerequisite Courses, or equivalent coursework, noted below, as part of their 60 credit-hours of lower-division course work.

2. In their initial 60 credit-hours, earn a GPA of 2.0 or higher to continue pursuing a Bachelor of Business Administration and the Bachelor of Accounting degree (a) AA Transfers, (b) Transfers from other SUS institutions, and (c) students changing degree programs must comply with the GPA requirement for the respective degree program.

3. For the set of all Common Prerequisite Course credit hours, earn a GPA of 2.5 or higher to continue pursuing Bachelor of Business Administration degrees and a GPA of 2.75 or higher to pursue the Bachelor of Accounting degree (a) AA Transfers, (b) Transfers from other SUS institutions, and (c) students changing degree programs to Business from outside the College of Business, must also comply with the 2.5 (or 2.75 Accounting) or higher GPA requirement for the set of Common Prerequisite Course credit hours.

4. Successfully complete with a C or better each of Common Prerequisite Course within two attempts. Drops after the add/drop period, which result in a DR grade, are considered an unsuccessful attempt at the course, (a) AA Transfers, (b) Transfers from other SUS institutions, and (c) students changing degree programs to Business from outside the College of Business, must also comply with the two attempt limit on Common Prerequisite Courses.

5. Students are expected to make satisfactory progress toward degree completion during their first 60 credit hours of lower-division coursework, consistent with the Common Prerequisite Benchmarks noted below. Students not making good progress, may be redirected to another degree program. All (a) AA Transfers and (b) students changing degree programs to Business from outside the College of Business must demonstrate progress consistent with Common Prerequisite Benchmarks.

Common Prerequisite Benchmarks include the following:

By End of Term / Credit Hours Earned	Coursework for equivalents Completed	Minimum GPA in Common Prerequisites *
1st /15 hours	CGS 2100 (or PHI 2600)	2.25
2nd / 30 hours	ECO 2023 and MAC 2233	2.35 (2.50 Accounting)
3rd / 45 hours	ACG 2021 and ECO 2013	2.5 (2.75 Accounting)
4lh / 60 hours	ACG 3301 and STA 2023	2.5 (2.75 Accounting)

* Applicable to all students pursuing or seeking a change of program plan to a Bachelor of Business Administration degree and the Bachelor of Accounting.

Students eligible for readmission are subject to the University's and the College's degree program's regulations in effect at the time of readmission to include admissions and progression requirements.

Admissions Requirements for Bachelor of Accounting (BAcc) to Master of Accounting (MAcc) Accelerated Degree Pathway

(1) Students must be enrolled in the Bachelor of Accounting (BAcc) degree program.

(2) Students must have completed at least 75, but no more than 90, credits of coursework.

(3) Students must have completed ACG 4101 or equivalents with a B+ or better.

(4) Students must have an overall (transfer and FIU) GPA of 3.34 or higher.

(5) Students must have two letters of recommendation, with at least one from a faculty member of the FIU School of Accounting.

Program Requirements

Academic Standards for All College of Business Undergraduate Students

To earn an undergraduate degree from the College of Business, all students must comply with the following:

(1) Students must earn a grade of "C" or higher in each of the lower-division Common Prerequisite Courses.

(2) Students must earn a grade of "C" or higher in all upper-division major courses.

(3) Students must earn a grade of “C” or higher in all upper-division Business Core Courses. Each of these courses cannot be attempted more than three times. Drops after the add/drop period, which result in a DR grade, are considered an attempt in the course and count as an unsuccessful enrollment.

(4) As a student within the College of Business, each student gets two drops after the add/drop period, which result in “DR” grades, in their first 60 credits attempted. Each College of Business student get two additional drops after the add/drop period, which result in “DR” grades, in the second 60 credits attempted. Unused drops after the add/drop period, which result in “DR” grades, do not carry over from the first 60 credits attempted to the second 60 credits attempted. Students entering the College of Business as transfer students with an A.A. degree from a Florida public college or with 60 or more transfer credits earned from another college or university only get two drops after the add/drop period, which result in “DR” grades. Students with disabilities who need to drop a course due to disability-related reasons are allowed to petition for additional drops after the add/drop period, which result in “DR” grades. Students who can document extenuating circumstances may petition the College for additional drops. Approval to drop additional courses in excess of those allowed must be obtained from the College of Business

(5) Students are expected to follow degree program Major Map in making satisfactory progress toward degree completion. Students deviating from Major Maps may be redirected to another degree program.

(6) Students must satisfy the requirements of their respective programs of study and satisfy all university requirements for graduation.

(7) Students who (a) have 60 credit hours earned, but (b) have not completed the seven Common Prerequisite Course for Business majors, may register for, and/or complete, no more than 15 credit hours of upper-division Business courses.

(8) Undergraduate students who register for any graduate business course must be formally admitted to a graduate degree program at the university following the university's admission procedures.

(9) Faculty has the discretion to administratively drop students who do not attend the first class of a course.

The College adheres strictly to the university’s dismissal policy. Students should be sure to read and understand FIU policies regarding Academic Warnings, Probation, and Dismissals.

Academic Standards for Bachelor of Accounting Students

(1) Students may not enroll in any upper division, 4000-level accounting (ACG), business law (BUL) and/or tax (TAX) major courses until they are successfully declared as a major (prior to completing 75 credits) in the Bachelor of Accounting (BAcc) degree.

(2) Students must complete initial attempt in ACG 4101 as soon as all prerequisites for the course have been met in order to ensure timely progression in the BAAC major, but no later than enrollment of 80th credits.

(3) Students must earn a grade of ‘C’ or higher in all accounting major courses, including accounting, business law, and tax courses.

(4) No student may register for upper-level accounting or tax courses after receiving five (5) grades of “D”, “DR”, or “F” in upper-level accounting major courses including accounting, business law, and tax courses.

(5) Students who do not maintain an overall GPA of 2.5 will be removed from the Accounting program.

(6) Students not achieving a grade of ‘C’ or higher in two enrollments in any course will be dropped automatically from the Accounting program. Drops after the add/drop period which result in a DR grade are considered an attempt in the course and count as an unsuccessful enrollment.

(7) Once students have been removed from the Accounting program, they will not be readmitted to the School of Accounting.

(8) Students who wish to take more than two accounting and tax courses in one semester must file a formal request to do so with the School of Accounting.

(9) School of Accounting policy does not permit overrides into closed classes. Accounting and tax professors are not authorized to assist students with registration issues.

Common Prerequisite Courses

Type

Completion Requirement

Required Common Prerequisite Courses Part I

For the set of all Common Prerequisite Course credit hours, earn a GPA of 2.5 or higher to continue pursuing Bachelor of Business Administration degrees and a GPA of 2.75 or higher to pursue the Bachelor of Accounting degree (a) AA Transfers, (b) Transfers from other SUS institutions, and (c) students changing degree programs to Business from outside the College of Business, must also comply with the 2.5 (or 2.75 Accounting) or higher GPA requirement for the set of Common Prerequisite Course credit hours.

Courses which form part of the statewide articulation between the State University System and the Florida College System will fulfill the Lower Division Common Prerequisites.

Please visit https://cpm.flvc.org for a current list of state-approved common prerequisites.

Earn a minimum grade of C in the following:

- ACG2021 - Accounting for Decisions
- ACG2071 - Managerial Accounting
- ECO2013 - Principles of Macroeconomics
- ECO2023 - Principles of Microeconomics
- MAC2233 - Applied Calculus
- STA2023 - Statistical Methods

Required Common Prerequisite Courses Part II

Students pursuing a Bachelor degree in Accounting, Business Analytics, Finance, Information Systems, International Business, Human Resources Management, Management, Marketing, or Real Estate are also required to achieve a grade of "C" or higher in the following course.

Earn a minimum grade of C in the following:

- CGS2100 - Intro to Microcomputer Applications for Business

Required Common Prerequisite Courses Part III

Students admitted in Fall 2012 or after, as freshman or transfer students with fewer than 30 credit hours earned, are encouraged to take GEB 2011 Introduction to Business during their first year. Students admitted in the Fall 2018 or after, as freshman with fewer than 30 credit hours earned, are required to complete SPC 2608 Public Speaking for their Undergraduate Core Curriculum Arts Requirement.

Additional Comments:

Prerequisite course requirements for entry into upper level courses will be enforced. Students will be administratively dropped from courses when they lack the required prerequisite course or courses and/or required grade.

Note: The programs, policies, requirements, and regulations listed in this catalog are subject to continual review in order to meet the needs of the University's various publics and to respond to the mandates of the Florida Board of Education and the Florida Legislature. Changes may be made without advance notice. For the most current and updated information, refer to the COB and appropriate Schools/Departments websites.

Required Business Core Courses: 24 credits

Type

Completion Requirement

Required Core Courses

The Business Core Courses listed below are required for all undergraduate students in the College of Business. Prerequisites for each of the Business Core Courses can be found in the College of Business course descriptions.

Complete ALL of the following Courses:

- ISM3011 - Artificial Intelligence & Information Systems in Organizations
  OR ACG4401 - Accounting Information Systems
- BUL4310 - The Legal Environment of Business
  OR BUL4320 - Business Law I
- FIN3403 - Financial Management
- MAN3025 - Organization and Management
- MAN4720 - Strategic Management
- MAR3023 - Introduction to Marketing
- QMB3200 - Business Statistics and Analysis I
- QMB4680 - Business Statistics and Analysis II

ACG4401 Acctg Info Systems and BUL4320 Bus Law I should **ONLY** be taken by students pursuing a Bachelor of Accounting.

Required Business Professional Development Courses: 3 credit hours

Type

Completion Requirement

Required Courses

The business professional development courses listed below are required for all undergraduate students in the College of Business.

Complete ALL of the following Courses:

- COM3112 - Speech and Writing for Business Communication
- GEB3003 - Career Management

Students admitted before Fall 2011 can take either COM 3150 Advanced Business and Professional Communication **or** COM 3110 Business and Professional Communication

Degree-Specific Courses: 21 credits

Type

Completion Requirement

Courses Required for the Bachelor of Accounting

Complete ALL of the following Courses:

- ACG4101 - Financial Accounting I
- ACG4111 - Financial Accounting II
- ACG4341 - Management Accounting
- ACG4651 - Auditing
- BUL4321 - Advanced Business Law
- TAX4001 - Income Tax Accounting
- TAX4011 - Taxation of Corporations and Partnerships

Upper Division Business Electives: 12 credits

Type

Completion Requirement

Elective Credits

Students must complete 12 credit hours of upper division business electives.
Accounting majors may take any coursework to satisfy their elective requirement.

Major Requirements

There are no majors associated with this program.

Track, Specialization, Concentration, Area of Emphasis, or Other Curricular Offering Requirements

Other Curricular Offering: Combined BAcc to MAcc Accelerated Degree Pathway

The Combined Bachelor of Accounting/Master of Accounting (BAcc/MAcc) degree pathway is designed for outstanding undergraduate students interested in continuing studies beyond their baccalaureate degree. The pathway provides a strong base of knowledge and skills in accounting, and at the same time accelerates completion of the Master of Accounting degree. Students may take advantage of the overlap of courses in the Bachelor of Accounting and Master of Accounting programs to receive their Master of Accounting degree in a shorter period than might otherwise be possible.

A student admitted to the combined degree pathway will be considered to have undergraduate status until conferral of their Bachelor of Accounting degree. Upon conferral of their undergraduate degree, the student will be granted graduate status.

General Requirements

(1) Students must maintain a GPA of 3.0 or greater to remain in the pathway.

(2) Bachelor of Accounting (BAcc) degree must be awarded before the Master of Accounting degree.

(3) No grade below “C” will be accepted in any course taken to satisfy graduate program requirements.

(4) Grade requirements for the Master of Accounting (MAcc) apply to courses counted toward the MAcc degree.

(5) Up to 4 courses (12 credits) may be used in satisfying both the Bachelor of Accounting and Master of Accounting degree requirements.

(6) Students must fulfill the degree requirements of both the Bachelor of Accounting and Master of Accounting programs, with all overlapping courses approved by both graduate program director and undergraduate advisors before students enroll in such courses.

ACCT:MACC - Master of Accounting

Overview

Degree Offered
MACC - Master of Accounting

Program Title
Accounting

Explore the opportunities within FIU's Master of Accounting (MAcc) program, designed for graduates with a background in accounting or business. Students can tailor their study with specializations available in taxation and assurance.

Our flexible learning options, including hybrid or fully online classes, allow professionals to seamlessly integrate career development with their existing commitments. Gain an edge in the field with access to the renowned Becker CPA Course, ensuring thorough preparation for the CPA exam. Students will engage in a cohort-based, lock-step program that fosters lasting connections with a diverse group of peers, and will forge meaningful relationships that extend beyond the program's duration and enrich one's professional network for years to come.

Admissions Requirements

Admissions Requirements for the Master of Accounting (MAcc) Degree

To be eligible for admission to a Master's degree in the School of Accounting in the Chapman Graduate School, students must:

(1) Hold a four-year Business or Accounting Bachelor's degree from an accredited college or university;

(2) Score of minimum of 500 on the Graduate Management Admission Test (GMAT). A GMAT waiver at the discretion of the academic director is available for reasons such as:

(a) A graduate business degree from an AACSB or EQUIS accredited university

(b) passed all parts of the CPA exam

(c) Applicants with an undergraduate accounting or business degree from an AACSB or EQUIS accredited school

(3) Have a minimum upper division grade point average (GPA) of 3.0;

(4) Graduate student applicants whose studies were completed outside of the US must demonstrate English language proficiency according to guidelines set by the University Graduate School.

(5) Be in good standing with all previously-attended colleges and universities.

Students who have a business degree with a major other than accounting, or those with a Bachelors of Accounting degree from overseas must complete pre-requisite courses or select the Professional Accounting Major. Students who complete the pre-requisite courses with a minimum (GPA) of 3.0 may be eligible for a GMAT waiver. Admissions at the graduate level are competitive and meeting minimum requirements does not guarantee admission.

Admissions Requirements for the MAcc and International Master of Business Administration (MBA) Joint Degree Pathway

(1) Candidates to the joint degree pathway must meet the entrance requirements established by each individual program. Candidates must indicate on the application their intention to pursue the joint degree option.

(2) Applications for a joint degree will not be accepted from candidates who have already completed either degree.

Admissions Requirements for the MAcc and MS in Information Systems Joint Degree Pathway

(1) Candidates to the joint degree pathway must meet the entrance requirements established by each individual program. Candidates must indicate on their initial application their intention to pursue the joint degree option.

(2) Applications for a joint degree will not be accepted from candidates who have already completed either degree.

(3) Domestic undergraduate non-accounting degree holders and international degree holders, regardless of major, will take the following courses, for a saving of 15 credits:

-- 24 credits at the 6000-level from the MSIS

-- 15 credits at the 5000-level from the MACC

-- 30 credits at the 6000-level from the MACC

Program Requirements

Special Program Requirements

Consistent with the current Florida CPA credentialing educational requirements, admission to the graduate accounting program requires an applicant with a nonaccounting degree to complete business prerequisite courses and up to eight undergraduate upper-division accounting courses (24 credit hours) from among the following: three credit hours of auditing, three credit hours of cost accounting, six credit hours of financial accounting, three credit hours of accounting information systems, six credit hours of taxation, three credit hours of business law, and three additional credit hours of accounting/business law/taxation coursework.

Alternately, students may complete accelerated graduate-level prerequisite coursework equivalent to the undergraduate courses noted.

Florida Certified Public Accountant Requirements

Completing a Bachelor of Business Administration with a concentration in Accounting does not alone meet the Florida State Board of Accountancy educational requirements for CPA licensure. These requirements include earning 30 credit hours beyond an undergraduate degree for a total of 150 credit hours, with a total of 36 semester hours of accounting and 39 hours of general business including three hours of business law. One year of work experience in an accounting-related field is also required for licensure.

FIU's graduate accounting program satisfies the 30 semester hours beyond a Bachelor's degree required for CPA licensure.

Computer Requirements

All MACC students are expected to own a laptop computer with wireless capability in order to begin your studies. A list of minimum requirements is available at **http://business.fiu.edu** or by contacting the program office.

Program Completion Curriculum Requirements

All majors in the MACC comprise 6 credits of core courses and up to 24 credits of specialized major courses. When a major requires less than 24 credits, students complete the 30 credit degree requirement from electives chosen by the Director of the School of Accounting.

Degree Requirements

Type

Completion Requirement

Core Courses: 6 credits

Complete ALL of the following Courses:

- ACG6225 - Advanced Accounting
- ACG6257 - Global Accounting, Auditing and Financial Strategy

Elective Courses

Elective courses for all majors are selected from the following listing:

Complete ANY of the following Courses:

- ACG6176 - Evaluation of Financial Reports, Business Analysis and Valuation
- ACG6135 - Seminar in Financial Accounting Theory I (Inactive)
- ACG6295 - Financial Accounting IV (Inactive)
- ACG6385 - Managerial Control and Controllership
- ACG6406 - Accounting Data Warehousing and Analysis (Inactive)
- ACG6437 - Advanced Accounting Information Systems
- ACG6466 - Accounting Enterprise Resource Planning (Inactive)
- ACG6506 - Governmental and Non-profit Accounting
- ACG6625 - Information Technology Auditing
- ACG6657 - Environment of Accounting and Auditing
- ACG6675 - Internal Auditing
- ACG6676 - Advanced Internal Auditing
- ACG6677 - Applied Internal Auditing (Inactive)
- ACG6685 - Introduction to Forensic Accounting
- ACG6686 - Fraud Examination
- ACG6687 - Financial Investigation
- ACG6692 - Business Analytics for Forensic Accounting
- ACG6696 - Current Issues in Auditing
- ACG6838 - Fraud Investigation
- ACG6867 - Seminar in Medicare Regulation (Inactive)
- ACG6885 - Accounting Research and Reporting

- ACG6935 - Special Topics in Accounting
- ACG6847 - Accounting and Quantitative Methods
- ISM6136 - Business Analytics Applications
- ISM6404 - Business Data Visualization and Reporting
- QMB6357 - Business Statistical Analysis
- TAX6026 - Value-Added Tax Strategies for Business Decisions
- TAX6065 - Tax Research, Practice and Procedure
- TAX6105 - Taxation of Corporations I
- TAX6107 - Federal Corporate Taxation
- TAX6115 - Taxation of Corporations II
- TAX6205 - Partnership Taxation
- TAX6206 - Taxation of Pass-Through Entities
- TAX6305 - State and Local Taxation
- TAX6405 - Estate and Gift Taxation
- TAX6415 - Fiduciary Accounting and Taxation (Inactive)
- TAX6445 - Estate Planning
- TAX6446 - Wealth Transfers
- TAX6505 - International Taxation I (Inactive)
- TAX6507 - Principles of International Taxation
- TAX6515 - International Taxation II
- TAX6805 - Tax Policy
- TAX6835 - Taxation of Deferred Compensation (Inactive)
- TAX6875 - Current Developments in Taxation
- TAX6876 - Transactions in Property
- TAX6877 - Seminar In Taxation
- TAX6905 - Independent Study in Taxation
- TAX6935 - Special Topics in Taxation

The Director of the School of Accounting determines the schedule and elective courses to be offered to each cohort. Further, the Director of the School of Accounting may substitute up to two 6000 level major required courses with alternative 6000 level accounting courses.

Major Requirements

Major in Analytics

Type

Completion Requirement

Required Courses: 12 credits

The Analytics major of the Masters of Accounting (MACC-Analytics) requires students to complete a minimum of 12 credits of Statistics and Analytics as part of the 30-credit Masters of Accounting program (MACC). The major provides our students a clear designation of their concentration in the field.

The Analytics major also requires students complete one additional required ACG course (3 credits):

Complete ALL of the following Courses:

- ACG6456 - Accounting Information Systems Technology, Control and Audit II

Electives: 9 credits

9 credits from among the group of elective courses
The Faculty Director of the Master of Accounting program and Director of the School of Accounting determines the schedule and major specific elective courses for each cohort. Further, the Director of the School of Accounting may substitute up to two 6000 level major required courses with alternative 6000 level accounting courses.

Major in Audit and Data Intelligence

Type
Completion Requirement

Required Courses: 18 credits

The Audit and Data Intelligence major of the Masters of Accounting (MACC-Audit and Data Intelligence) requires students to complete a major required courses (18 credits) and elective courses (6 credits) in the field of Audit and Data Intelligence within the 30-credit Masters of Accounting program (MACC). The Audit and Data Intelligence Major provides students a clear designation of their concentration in the field.

Complete ALL of the following Courses:

- ACG6455 - Accounting Information Systems Technology, Control and Audit I
- ACG6657 - Environment of Accounting and Auditing
- ACG6847 - Accounting and Quantitative Methods
- ACG6686 - Fraud Examination
- ACG6696 - Current Issues in Auditing
- ACG6176 - Evaluation of Financial Reports, Business Analysis and Valuation

Electives: 6 credits

6 credits of electives
The Faculty Director of the Master of Accounting program and Director of the School of Accounting determines the schedule and major specific elective courses for each cohort. Further, the Director of the School of Accounting may substitute up to two 6000 level major required courses with alternative 6000 level accounting courses.

Major in Taxation

Type
Completion Requirement

Required Courses: 21 credits

The Taxation major of the Master of Accounting (MACC-Tax) requires students to complete major required courses (21 credits) and a minimum of 3 elective credits in the field of taxation within the 30-credit Master of Accounting program (MACC). The Taxation major provides students a clear designation of their concentration in the taxation field.

Complete ALL of the following Courses:

- TAX6065 - Tax Research, Practice and Procedure
- TAX6115 - Taxation of Corporations II
- TAX6206 - Taxation of Pass-Through Entities
- TAX6507 - Principles of International Taxation

- TAX6305 - State and Local Taxation
- TAX6805 - Tax Policy
- TAX6445 - Estate Planning

Electives: 3 credits

3 elective credits in the field of taxation
The Faculty Director of the Master of Accounting program and Director of the School of Accounting determines the schedule and major specific elective courses for each cohort. Further, The Director of the School of Accounting may substitute up to two 6000 level major required courses with alternative 6000 level accounting courses.

Professional Accounting

A Professional Accounting major will prepare you to work in careers such as public accounting, industry, government and not-for-profit organizations. In this major, you'll take the standard accounting courses that cover topics such as financial and managerial accounting. You'll also take intermediate accounting courses, study auditing and learn about federal income tax. In addition, you'll have the opportunity to choose from a variety of electives

Major in Professional Accounting

Type
Completion Requirement

Required Courses: 15 credits

The Professional Accounting Major of the Master of Accounting (MACC-Professional) requires students to complete major required courses (15 credits) and elective courses (9 credits) in the field of accounting within the 30-credit Master of Accounting program (MACC). The Professional Accounting Major provides students with the general skillset necessary for entry into the profession.

Fulfill ALL of the following requirements:

Major Courses

Complete ALL of the following Courses:

- ACG5137 - Standards and Principles of Financial Accounting
- ACG5395 - Seminar in Managerial Accounting
- ACG5806 - Seminar in Financial Accounting
- TAX5875 - Seminar in Taxation
- ACG5627 - Systems Auditing

AND

Electives

9 Credits of Electives
The Faculty Director of the Master of Accounting program and Director of the School of Accounting determines the schedule and major specific elective courses for each cohort. Further, the Director of the School of Accounting may substitute up to two 5000 or 6000 level major required courses with alternative 5000 or 6000 level accounting or tax courses.

Track, Specialization, Concentration, Area of Emphasis, or Other Curricular Offering Requirements

Other Curricular Offering: MAcc and International MBA Joint Degree Pathway

The School of Accounting and the International Master of Business Administration (IMBA) program in the Alvah H. Chapman Jr. Graduate School of Business at Florida International University offer a joint degree pathway culminating in both a Master of Accounting (MACC) and an IMBA. Under the joint degree pathway, a student can obtain both degrees in significantly less time than it would take to obtain both degrees if pursued consecutively. The joint degree pathway will use existing faculty, courses, and resources. Important criteria relating to the joint degree pathway are as follows:

(1) Domestic undergraduate non-accounting degree holders; and international degree holders, regardless of major, will take the following courses, for a saving of 15 credits:

-- 34 credits at the 6000-level from the IMBA

-- 15 credits at the 5000-level from the MACC

-- 30 credits at the 6000-level from the MACC

(2) Domestic undergraduate accounting degree holders from AACSB accredited universities may petition to waive the 5000-level MACC courses, for a saving of an additional 15 credits.

(3) All courses transferred between degrees must be completed with a grade point average of 3.0 or higher. Directors of the MACC and MBA degree programs may adjust these exact course requirements as a result of future changes to the MACC or MBA curriculums.

(4) Joint degree pathway candidates will not receive either degree until all requirements for both programs have been satisfied. Students deciding against completing a second degree must satisfy all first degree program requirements as if the student had never been a joint degree pathway candidate.

With prior approval of the Director of the School of Accounting, two courses may be substituted for other 6000 level business courses.

Other Curricular Offering: MAcc and MS in Information Systems Joint Degree Pathway

The School of Accounting and the Master of Science in Information Systems (MSIS) program in the Alvah H. Chapman Jr. Graduate School of Business at Florida International University offer a joint degree program culminating in both a Master in Accounting (MACC) and a Master of Science in Information Systems (MSIS). Under the joint degree pathway, a student can obtain both degrees in significantly less time than it would take to obtain both degrees if pursued consecutively. The joint degree pathway will use existing faculty, courses, and resources. Important criteria relating to the joint degree pathway are as follows:

(1) Domestic undergraduate accounting degree holders from AACSB accredited universities may petition to waive the 5000-level MACC courses, saving an additional 15 credits.

(2) All courses transferred between degrees must be completed with a grade point average of 3.0 or higher. Directors of the MACC and MSIS degree programs may adjust these exact course requirements as a result of future changes to the MACC or MSIS curriculums.

(3) Joint degree pathway candidates will not receive either degree until all requirements for both programs have been satisfied. Students deciding against completing a second degree must satisfy all first-degree program requirements as if the student had never been a joint degree candidate.

ACDADV:CFI - Graduate Certificate in Academic Advising

Overview

Degree Offered
ACRT - Academic Certificate

Program Title
Graduate Certificate in Academic Advising

The graduate certificate program in academic advising is designed for those wishing to enter the field of academic advising or those working in academic advising with a degree in another discipline. The master's degree is typically the entry-level requirements for an advising position at the university level. For those with a graduate degree in another discipline, the certificate can provide a foundation in the theory and practice of advising. For those interested in the field, a certificate can be a concentration within a master's degree in higher education. The advising certificate consists of 15 hours or required courses and electives.

ACNP:MSN - Master of Science in Nursing - Pediatric Primary Care Nurse Practitioner Program

Overview

Degree Offered
MSN - Master of Science in Nursing

Program Title
Pediatric Primary Care Nurse Practitioner

The Master of Science in Nursing (MSN) degree in Pediatric Primary Care Nurse Practitioner program prepares students to diagnose and manage acute and chronic primary health issues in pediatric patients. Throughout this program, students will enhance their skills in physical and psychosocial assessment, clinical decision making, and health promotion and disease prevention specific to pediatric care.

The curriculum emphasizes advanced nursing practice in various ambulatory and community-based settings, encompassing both urban and rural environments. Students will focus on promoting wellness, preventing diseases, providing episodic care, and managing chronic illnesses within a family-centered approach.

Upon successfully completing the program, graduates will be equipped to practice independently or collaboratively as pediatric primary care nurse practitioners in diverse healthcare settings, effectively meeting the needs of a broad range of patient populations.

For more information, visit the Nicole Wertheim College of Nursing and Health Sciences website.

Requirements

Simple Requirements

Admissions Requirements

Admissions Requirements for the Master of Science in Nursing (MSN) Pediatric Primary Care Nurse Practitioner

(1) Successful completion of all the admission requirements for graduate education at Florida International University and the Nicole Wertheim College of Nursing and Health Sciences.

(2) Cumulative undergraduate GPA of 3.0 or greater in a 4.0 scale (CUM GPA is a calculation inclusive of all academic coursework including courses at the community college level.)

(3) UG 60 GPA of 3.0 or greater in Bachelor of Nursing upper division coursework.

(4) Current State of Florida RN license. Out-of-state students must obtain a license to practice in Florida prior to admission.

(5) Baccalaureate degree in Nursing (BSN) from a program accredited by the Commission on Collegiate Nursing Education (CCNE) or by the Accreditation Commission for Education in Nursing (ACEN) formerly known as the National League for Nursing Accrediting Commission (NLNAC). Applicants from Programs without such accreditation will be considered on an individual basis.

(6) Completion of all MSN admission paperwork including the NursingCAS application, FIU supplemental application, a written essay, recommendations, and Curriculum Vitae, as well as favorable personal interview with MSN Committee.

Application Process

Applicants must complete the following steps in order to be considered for admission:

STEP 1 – Submit an application to Nursing CAS (the Centralized Application Service for Nursing Programs)

(1) Complete an online application via Nursing CAS **http://www.nursingcas.org** and pay the appropriate fee to Nursing CAS.

(2) Complete the required FIU supplemental application and pay the $30 fee.

(3) Send official transcripts from **ALL SCHOOLS attended** (all Associates & Bachelors degree coursework) to Nursing CAS for upload and verification. **EXCEPTION:** Foreign transcripts, along with their official evaluations (grades, credits, and GPA in U.S. terms), should be sent directly to the college at the following address: Nicole Wertheim College of Nursing & Health Sciences, AHC-3, Room 121, 11200 S.W. 8th Street, Miami, FL, 33199.

(4) Upload all required supplemental items including three (3) professional nursing references, professional CV, copy of an active Florida RN License, and Personal Statement to Nursing CAS.

STEP 2 – Professional Interview

(1) Following a review of all completed applications a select number of applicants will be offered the opportunity to participate in a panel interview.

(2) Interview candidates may be instructed to bring an additional set of official transcripts to their interview appointment.

Admissions Requirements for the Post-BSN-to-DNP Pediatric Primary Care Nurse Practitioner-MSN/DNP

(1) Successful completion of all the admission requirements for graduate education at Florida International University and the Nicole Wertheim College of Nursing and Health Sciences.

(2) Cumulative undergraduate GPA of 3.0 or greater on a 4.0 scale (CUM GPA is a calculation inclusive of all academic coursework including courses at the community college level).

(3) UG 60 GPA of 3.0 or greater in Bachelor of Nursing upper division coursework.

(4) Current State of Florida RN license. Out-of-state students must obtain a license to practice in Florida prior to admission.

(5) Baccalaureate degree in Nursing (BSN) from a program accredited by the Commission on Collegiate Nursing Education (CCNE) or by the Accreditation Commission for Education in Nursing (ACEN) formerly known as the National League for Nursing Accrediting Commission (NLNAC). Applicants from Programs without such accreditation will be considered on an individual basis.

(6) Completion of all admission paperwork including the NursingCAS application, a written essay, Recommendations, and Curriculum Vitae

(7) Essay (500 words) addressing desired focus and areas of interest for practice in Post-BSN-to-DNP program.

(8) Three (3) professional recommendations describing ability to be successful in a MSN-DNP program.

(9) Curriculum Vitae.

(10) Successful personal Interview with the Graduate Admissions Committee.

In order to advance to the DNP Scholarly Project course series component of this track, students must meet the following requirements upon conferral of MSN degree:

(1) Maintain good academic standing as defined in the FIU Student Handbook

(2) Current licensure with no restrictions as an APRN in your state of residence;

(3) Proof of Advanced Practice Specialty National Board Certification in the specialty of conferred MSN (i.e., AGNP, FNP, PNP, PMHNP)

Program Requirements

Program Objectives

The objectives of the MSN program are to prepare graduates as:

(1) Leaders, educators, and change agents in the delivery of high-quality, accessible, culturally competent healthcare in local and global societies.

(2) Professional advanced practice nurses who use communication, interprofessional collaboration, and synthesis of evidence-based practice, scholarship, and research in the delivery of health care for local and global societies.

(3) Facilitators and leaders of interprofessional health care teams who use an understanding of organizational systems and the environment and are able to integrate care services and heath care policy across local and global societies.

(4) Critical thinkers who actively and skillfully utilize ethical principles into the translation of evidence into safe, affordable, accessible, innovative, quality care.

(5) Advanced practice nurses who deliver patient and family centered holistic care using knowledge of basic sciences including genetics/genomics, preventive health, and advances in health technology

(6) Advanced practice nurses who analyze, influence, and develop health policy that promotes access and delivery of high-quality healthcare to diverse populations.

Program Policies

Nursing students are responsible for transportation expenses related to clinical experiences. They are required to carry health and accident insurance. To safeguard the health of clients, nursing students are required to submit proof of immunizations upon entry to into the nursing program. Students must submit proof of basic cardiopulmonary resuscitation (CPR) certification (American Heart Association) prior to entering clinical courses in the nursing major. This CPR certification must cover the period of enrollment in the degree program.

The College reserves the right to terminate a student from the nursing program for reasons related to the inability to safely carry out professional responsibilities.

Progression in the Program

The student must maintain a cumulative GPA of 3.0 in required graduate courses with a minimum of a "B" (85%) or better in all required courses.

If a student earns less than an 85 in any course, the course must be repeated and earn a grade of “85” or better. If this course is a pre[1]requisite for another course, the student will not be allowed to continue enrollment for that course and may be allowed to enroll in other courses if applicable to the program. Only one course repeat in the program will be allowed. Therefore, a student who earns a grade below an 85 in more than one course will be dismissed from the program.

Students may not have a cumulative GPA below 3.0 in the courses for more than two semesters. If the cumulative GPA for required coursework is below 3.0 for a third semester, the student will be dismissed from the program.

Academic Standing

Good Standing: To achieve and maintain a classification of good standing, the student must maintain a minimum G.P.A. of 3.0 in the courses required for the MSN and DNP degrees.

MSN Level Course Requirements

Type

Completion Requirement

Graduate Nursing Core: 9 credits

Complete ALL of the following Courses:

- NGR5110 - Theories in Nursing
- NGR5131 - Culture and Advanced Nursing Practice
- NGR5810 - Research Methods in Nursing

Advanced Practice Nursing Core: 13 credits

Complete ALL of the following Courses:

- NGR6002C - Advanced Health Assessment
- NGR5141 - Pathophysiologic Basis of Advanced Nursing Practice
- NGR6172 - Pharmacology and Pharmacotherapeutics in Advanced Nursing Practice
- NGR5064C - Diagnostic and Therapeutics in Advanced Nursing Practice

Clinical Education Seminar: 1 credit

Complete ALL of the following Courses:

- NGR6743 - Advanced Practice Nursing Clinical Education Seminar

Advanced Child Health Nursing: 15 credits

Complete ALL of the following Courses:

- NGR6301C - Advanced Child Health Nursing I
- NGR6301L - Advanced Child Health Nursing Practice I
- NGR6302 - Advanced Child Health Nursing II
- NGR6302L - Advanced Child Health Nursing Practice II
- NGR6337 - Clinical Decision Making in Advanced Child Health Nursing

Role Development: 4 credits

Complete ALL of the following Courses:

- NGR6337L - Role Synthesis in Advanced Child Health Nursing Practice

Graduation Requirements

(1) Successful completion of 45-48 semester credits in nursing required courses and all clinical experience requirements.

(2) Completion of a thesis (6 credits), a master's paper (3 credits), or a research project (3 credits).

(3) Achievement of an overall cumulative GPA of 3.0 or above. See Graduate Catalog in University Graduate School Rules and Regulations for information on Academic Warning, Probation, and Dismissal.

(4) Removal of all conditions, deficiencies, and incomplete grades. Credit hours for courses in which the grade is "B-" or below will not count toward satisfying graduate degree requirements.

(5) With the exception of thesis courses, students are expected to register for courses with letter grades. Electives may be taken as pass/fail subject to the approval of the advisor.

Major Requirements

There are no majors associated with this program.

Track, Specialization, Concentration, Area of Emphasis, or Other Curricular Offering Requirements

Other Curricular Offering: Post-BSN-to-DNP Pediatric Primary Care Nurse Practitioner-MSN/DNP

The Post-BSN-to-DNP is a program of graduate doctoral study for registered nurses. The Post-BSN-to-DNP program of study builds upon the initial clinical training of entry level nurses prepared at the baccalaureate level. This program will include the study of: advanced specialty practice; systematic practice and program outcome evaluation; application of health information resources; development of safe, equitable, and cost effective health policy; innovation, implementation and evaluation of care delivery models; leadership development in healthcare delivery and clinical expertise for advanced nursing practice education. Graduates of this program will be eligibility for certification as a Pediatric Primary Care Nurse Practitioner. The goals of Post-BSN-to-DNP program are to prepare nurses for leadership roles in a specialized area of advanced nursing practice with an emphasis on: philosophical, ethical, and scientific principles that provide the foundation for leadership in professional nursing care; continued acquisition of knowledge and clinical skills in an area of advanced practice specialization; and leadership and clinical expertise in healthcare delivery, evaluation, quality improvement and advanced practice nursing education.

Requirements

(1) Successful completion of 59 semester credits in post-BSN-to-DNP program required courses and all specialty clinical experience requirements; as well as satisfactory attainment of terminal program competencies (exit examination) prior to conferral of MSN degree.

(2) Successful completion of all DNP required core courses (36 credits), including DNP Project public presentation and defense are required for conferral of DNP degreAchievement of an overall cumulative GPA of 3.0 or above. See Graduate Catalog in University Graduate School Rules and Regulations for information on Academic Warning, Probation, and Dismissal.

(3) Removal of all conditions, deficiencies, and incomplete grades. Credit hours for courses in which the grade is "B- or below will not count toward satisfying graduate degree requirements.

(4) With the exception of DNP Project courses, students are expected to register for courses with letter grades.

Other Curricular Offering: Post-BSN-to-DNP Pediatric Primary Care Nurse Practitioner

Type

Completion Requirement

Doctor of Nursing Practice Core: 36 credits

Complete ALL of the following Courses:

- NGR7121 - Scientific and Theoretical Foundations for Advanced Nursing Practice
- NGR7769 - Patient Safety and Quality Improvement in Healthcare
- NGR7891 - Healthcare Finance and Economics in Advanced Clinical Practice
- NGR7871 - Healthcare Informatics
- NGR7854 - Analytical Methods for Evidence-Based Clinical Practice
- NGR7892L - Health Policy Practicum
- NGR7733 - Organizational Dynamics of Health Systems
- NGR7853 - Translational Research
- NGR7940C - DNP Project I
- NGR7941C - DNP Project II
- NGR7942C - DNP Project III

Advanced Practice Nursing Core: 14 credits

Complete ALL of the following Courses:

- NGR6002C - Advanced Health Assessment
- NGR5141 - Pathophysiologic Basis of Advanced Nursing Practice
- NGR6172 - Pharmacology and Pharmacotherapeutics in Advanced Nursing Practice
- NGR5064C - Diagnostic and Therapeutics in Advanced Nursing Practice
- NGR6743 - Advanced Practice Nursing Clinical Education Seminar

Graduate Nursing Core: 8 credits

Complete ALL of the following Courses:

- NGR5131 - Culture and Advanced Nursing Practice
- NGR5810 - Research Methods in Nursing
- NGR6703 - Role Development of the Advanced Practice Nurse

Pediatric Primary Care Nurse Practitioner: 19 credits

Complete ALL of the following Courses:

- NGR6301C - Advanced Child Health Nursing I
- NGR6301L - Advanced Child Health Nursing Practice I
- NGR6302 - Advanced Child Health Nursing II
- NGR6302L - Advanced Child Health Nursing Practice II
- NGR6337L - Role Synthesis in Advanced Child Health Nursing Practice
- NGR6337 - Clinical Decision Making in Advanced Child Health Nursing

ACTRS:CFI - Undergraduate Certificate in Actuarial Studies

Overview

Degree Offered
ACRT - Academic Certificate

Program Title
Certificate in Actuarial Studies

The Undergraduate Certificate in Actuarial Studies provides a focus for students interested in pursuing a career in the actuarial sciences. The primary emphasis of this program is on the mathematical and statistical background that forms the foundation of the work in this area. This certificate program is open to degree-seeking students only and is most suitable for students studying Mathematics or Statistics. It would also be valuable for those who wish eventually to enter the actuarial field, but choose to major in an allied discipline (e.g., Business or Computer Science). In addition, it provides students currently working in this area with opportunities to develop or upgrade their skills. For more information, visit the College of Arts, Sciences, and Education website.

AEHRD:MS - Master of Science in Adult Education and Human Resource Development

Overview

Degree Offered
MS - Master of Science

Program Title
Adult Education and Human Resource Development

The Master of Science (MS) in Adult Education and Human Resource Development prepares individuals to be trainers, organizational development specialists, instructional designers, human performance consultants, and/or researchers in human resource development. Graduates of the program become program coordinators, instructors, directors of non-profit agencies, community school administrators, and outreach professionals in workplace development, community and technical colleges, and corporations. This degree meets the requirements for Florida's certified program in Adult Education Administration as specified on the Florida Department of Education website, and the content for the American Society Training and Development “Certified Learning Professional” program.

For more information, visit the College of Arts, Sciences, and Education website.

Admissions Requirements

Please note:

Admission is currently suspended in this degree program

(1) A bachelor’s degree from an accredited institution and a minimum GPA of 3.0 or better on a 4.0 scale for the last 60 credits of upper-division undergraduate coursework;

(2) A statement of intent, 500 words or less, describing (a) the applicant’s personal and professional goals and how the degree program will enable the accomplishment of these goals and (b) the ways in which the applicant will be an asset to the program;

(3) Complete and current résumé listing educational and professional preparation and employment background; and

(4) Two letters of recommendation from individuals who can knowledgeably assess and describe the applicant's leadership potential and ability to perform graduate-level work. At least one reference must be from an academic source such as a former professor.

(5) Official test scores, official transcripts, letters and other supporting documents should be submitted following the instructions on the Graduate Admissions portal.

Note: The GRE is not a requirement for admission into the M.S. in Adult Education and Human Resource Development Program.

Program Requirements

The M.S. in Adult Education and Human Resource Development (AE & HRD) program consists of 36 hours, with 33 hours of professional emphasis courses in the AE & HRD program area and 3 hours of research methods.

Program Credit Hours: 36 credits

Type

Completion Requirement

Required Courses: 36 credits

Complete ALL of the following Courses:

- ADE5386 - Individual Learning and Adult Education
- ADE6186 - Comprehensive Program Evaluation in AE/HRD
- LBS5155 - Workplace Diversity
- ADE6260 - Management of AE/HRD Programs
- ADE6360 - Adult Teaching Methods
- ADE6945 - Internship in Adult Education or Human Resource Development
- EDF5481 - Foundations of Educational Research
- ADE6476 - Computer Based Training
- ADE5383 - Instructional Analysis and Design
- ADE6286 - Instructional Development and Implementation
- ADE5387 - Organizational Learning and Human Resource Development
- ADE7571 - Consulting as an Adult Education/HRD Process
  OR ADE6180 - Organizational and Community Processes in AE/HRD

This degree meets the requirements for the state certified program in Adult Education Administration (https://www.fldoe.org/teaching/certification/certificate-subjects/administrative-rules/6a-4-008.stml). This degree also covers the content for the American Society Training and Development "Certified Learning Professional" program.

Admissions Requirements

No specific admissions requirements. Contact advisor for additional information.

This certificate is open to degree-seeking students only.

Prerequisite Requirements

Contact advisor for information about any prerequisites.

Program Requirements

Students complete 18 credit hours of study from disciplines as diverse as geography, history, international relations, journalism, sociology, anthropology, literature, music, and political science. The program director may approve other courses upon request. Students requesting an exception from these lists must present a syllabus for the course they would like to enroll in, prior to enrollment. The courses considered for such an exception should have at least a 35% Afro-Latin American content. Not all courses are offered every semester.

Certificate Requirements: 18 credits

Type
Completion Requirement

Required Core Courses: 6 credits

Complete ALL of the following Courses:

- AFA4930 - African and African Diaspora Studies Theory
- AFA4241 - The African Diaspora in Latin America

Electives (Arts and Humanities, Social Sciences) Courses

Earn at least 12 credits from the following:

- AFA2004 - Black Popular Cultures: Global Dimensions
- AFA4931 - Special Topics in African Diaspora Studies
- AFA4905 - Independent Study
- AFA4351 - Hip Hop Culture, Social Consciousness and Social Entrepreneurship
- AFA4370 - Global Hip Hop
- AFA4372 - Race, Gender and Sexuality in Hip Hop
- AFA4941 - African and African Diaspora Studies Internship
- AFS4265 - Latin America and the Caribbean in Africa: South-South Interactions
- ARH3511 - Introduction to the Visual Arts of the African World
- CPO4394 - Race and Politics in the Americas
- LAH2020 - Latin American Civilization
- LAH3132 - The Formation of Latin America
- LAH3200 - Latin America: The National Period
- LAH4482 - Cuba: 18th-20th Centuries
- LAH4600 - History of Brazil
- LAH4737 - Music, Modernity and Identity in Latin American History
- LAH4634 - Politics of Race and Nation in Brazil
- WOH4230 - The African Diaspora and the Atlantic Slave Trade

Prior to enrolling in the last course for this “Stand Alone Certificate”, all students should approach the AADS office and indicate that they are about to complete the curricular requirements. Students should be advised that the term paper they turn in in their last certificate course will be used to assess Certificate Student Learning Outcomes. Students will have to make an oral presentation of that paper at an event AADS will routinely organize at the end of the fall and spring semesters, every year.

AFNLTG:CFI - Graduate Certificate in Afro-Latin American Studies

Overview

Degree Offered
ACRT - Academic Certificate

Program Title
Graduate Certificate in Afro-Latin American Studies

The Graduate Certificate in Afro-Latin American Studies employs a multidisciplinary approach to the study of the economic, social, cultural, and historical experiences of people of African descent and their communities in the Latin American Region. These include descendants from those brought over during the Transatlantic slave trade and those who came in subsequent migration movements. The certificate is designed to complement students' professional and academic interests and qualifications, and provides opportunities to students who want to excel in a variety of careers demanding expertise in international, transnational, and multicultural issues. The certificate places a strong emphasis on Afro-Latin American cultural expressions in all their national, subregional, temporal, and socioeconomic diversities. It offers coordinated insights into the ongoing challenges Afrodescendant communities face locally, nationally, and internationally. It also focuses on the ways in which Afro-Latin American communities and individuals have developed political and creative strategies for survival in the midst of, and resistance to, racism and political, economic, and social oppression.

AFNP:MSN - Master of Science in Nursing - Family Nurse Practitioner Program

Overview

Degree Offered
MSN - Master of Science in Nursing

Program Title
Family Nurse Practitioner

The Master of Science in Nursing (MSN) degree in Family Nurse Practitioner program prepares students to deliver comprehensive primary healthcare services to individuals and families across the lifespan, including pregnant and postpartum mothers. The curriculum emphasizes advanced nursing practice in diverse ambulatory and community-based settings, both urban and rural, focusing on wellness, disease prevention, episodic care, and the management of chronic illnesses through a family-centered approach.

Upon successful completion of the program, graduates are equipped to practice independently or collaboratively as family nurse practitioners in a variety of healthcare settings, catering to the needs of diverse populations.

For more information, visit the Nicole Wertheim College of Nursing and Health Sciences website.

Requirements

Simple Requirements

Admissions Requirements

Admissions Requirements for the Master of Science in Nursing - Family Nurse Practitioner

(1) Successful completion of all the admission requirements for graduate education at Florida International University and the Nicole Wertheim College of Nursing and Health Sciences.

(2) Cumulative undergraduate GPA of 3.0 or greater in a 4.0 scale (CUM GPA is a calculation inclusive of all academic coursework including courses at the community college level.)

(3) UG 60 GPA of 3.0 or greater in Bachelor of Nursing upper division coursework.

(4) Current State of Florida RN license. Out-of-state students must obtain a license to practice in Florida prior to admission.

(5) Baccalaureate degree in Nursing (BSN) from a program accredited by the Commission on Collegiate Nursing Education (CCNE) or by the Accreditation Commission for Education in Nursing (ACEN) formerly known as the National League for Nursing Accrediting Commission (NLNAC). Applicants from Programs without such accreditation will be considered on an individual basis.

(6) Completion of all MSN admission paperwork including the NursingCAS application, FIU supplemental application, a written essay, recommendations, and Curriculum Vitae, as well as favorable personal interview with the Graduate Admissions Committee.

Application Process

Applicants must complete the following steps in order to be considered for admission:

STEP 1 – Submit an application to Nursing CAS (the Centralized Application Service for Nursing Programs)

(1) Complete an online application via Nursing CAS **http://www.nursingcas.org** and pay the appropriate fee to Nursing CAS.

(2) Complete the required FIU supplemental application and pay the $30 fee.

(3) Send official transcripts from **ALL SCHOOLS attended** (all Associates & Bachelors degree coursework) to Nursing CAS for upload and verification. **EXCEPTION:** Foreign transcripts, along with their official evaluations (grades, credits, and GPA in U.S. terms), should be sent directly to the college at the following address: Nicole Wertheim College of Nursing & Health Sciences, AHC-3, Room 121, 11200 S.W. 8th Street, Miami, FL, 33199.

(4) Upload all required supplemental items including three (3) professional nursing references, professional CV, copy of an active Florida RN License, and Personal Statement to Nursing CAS.

STEP 2 – Professional Interview

(1) Following a review of all completed applications a select number of applicants will be offered the opportunity to participate in a panel interview.

(2) Interview candidates may be instructed to bring an additional set of official transcripts to their interview appointment.

Admissions Requirements for the Post-BSN-to-DNP Family Nurse Practitioner- MSN/DNP

(1) Successful completion of all the admission requirements for graduate education at Florida International University and the Nicole Wertheim College of Nursing and Health Sciences.

(2) Cumulative undergraduate GPA of 3.0 or greater on a 4.0 scale (CUM GPA is a calculation inclusive of all academic coursework including courses at the community college level.)

(3) UG 60 GPA of 3.0 or greater in Bachelor of Nursing upper division coursework.

(4) Current State of Florida RN license. Out-of-state students must obtain a license to practice in Florida prior to admission.

(5) Baccalaureate degree in Nursing (BSN) from a program accredited by the Commission on Collegiate Nursing Education (CCNE) or by the Accreditation Commission for Education in Nursing (ACEN) formerly known as the National League for Nursing Accrediting Commission (NLNAC). Applicants from Programs without such accreditation will be considered on an individual basis.

(6) Completion of all admission paperwork including the NursingCAS application, a written essay, Recommendations, and Curriculum Vitae

(7) Essay (500 words) addressing desired focus and areas of interest for practice in Post-BSN-to-DNP program.

(8) Three (3) professional recommendations describing ability to be successful in a MSN-DNP program.

(9) Curriculum Vitae.

(10) Successful personal Interview with Graduate Admissions Committee.

In order to advance to the DNP Scholarly Project course series component of this track, students must meet the following requirements upon conferral of MSN degree:

(1) Maintain good academic standing as defined in the FIU Student Handbook

(2) Current licensure with no restrictions as an APRN in your state of residence;

(3) Proof of Advanced Practice Specialty National Board certification in the specialty of conferred MSN (i.e., AGNP, FNP, PNP, PMHNP)

Program Requirements

Program Objectives

The objectives of the MSN program are to prepare graduates as:

(1) Leaders, educators, and change agents in the delivery of high-quality, accessible, culturally competent healthcare in local and global societies.

(2) Professional advanced practice nurses who use communication, interprofessional collaboration, and synthesis of evidence-based practice, scholarship, and research in the delivery of health care for local and global societies.

(3) Facilitators and leaders of interprofessional health care teams who use an understanding of organizational systems and the environment and are able to integrate care services and heath care policy across local and global societies.

(4) Critical thinkers who actively and skillfully utilize ethical principles into the translation of evidence into safe, affordable, accessible, innovative, quality care.

(5) Advanced practice nurses who deliver patient and family centered holistic care using knowledge of basic sciences including genetics/genomics, preventive health, and advances in health technology

(6) Advanced practice nurses who analyze, influence, and develop health policy that promotes access and delivery of high-quality healthcare to diverse populations.

Program Policies

Nursing students are responsible for transportation expenses related to clinical experiences. They are required to carry health and accident insurance. To safeguard the health of clients, nursing students are required to submit proof of immunizations upon entry to into the nursing program. Students must submit proof of basic cardiopulmonary resuscitation (CPR) certification (American Heart Association) prior to entering clinical courses in the nursing major. This CPR certification must cover the period of enrollment in the degree program.

The College reserves the right to terminate a student from the nursing program for reasons related to the inability to safely carry out professional responsibilities.

Progression in the Program

The student must maintain a cumulative GPA of 3.0 in required graduate courses with a minimum of a "B" (85%) or better in all required courses.

If a student earns less than an 85 in any course, the course must be repeated and earn a grade of “85” or better. If this course is a pre[1]requisite for another course, the student will not be allowed to continue enrollment for that course and may be allowed to enroll in other courses if applicable to the program. Only one course repeat in the program will be allowed. Therefore, a student who earns a grade below an 85 in more than one course will be dismissed from the program.

Students may not have a cumulative GPA below 3.0 in the courses for more than two semesters. If the cumulative GPA for required coursework is below 3.0 for a third semester, the student will be dismissed from the program.

Academic Standing

Good Standing: To achieve and maintain a classification of good standing, the student must maintain a minimum G.P.A. of 3.0 in the courses required for the MSN and DNP degrees.

MSN Level Course Requirements

Type

Completion Requirement

Graduate Nursing Core: 9 credits

Complete ALL of the following Courses:

- NGR5110 - Theories in Nursing
- NGR5131 - Culture and Advanced Nursing Practice
- NGR5810 - Research Methods in Nursing

Advanced Practice Nursing Core: 13 credits

Complete ALL of the following Courses:

- NGR6002C - Advanced Health Assessment
- NGR5141 - Pathophysiologic Basis of Advanced Nursing Practice
- NGR6172 - Pharmacology and Pharmacotherapeutics in Advanced Nursing Practice
- NGR5064C - Diagnostic and Therapeutics in Advanced Nursing Practice

Clinical Education Seminar: 1 credit

Complete ALL of the following Courses:

- NGR6743 - Advanced Practice Nursing Clinical Education Seminar

Advanced Family Health Nursing: 19 credits

Complete ALL of the following Courses:

- NGR6601C - Advanced Family Health Nursing I
- NGR6601L - Advanced Family Health Nursing Practice I
- NGR6602C - Advanced Family Health Nursing II
- NGR6602L - Advanced Family Health Nursing Practice II
- NGR6748 - Clinical Decision Making in Advanced Family Nursing Practice

Role Development: 4 credits

Complete ALL of the following Courses:

- NGR6619L - Role Synthesis in Advanced Family Health Nursing Practice

Graduation Requirements

(1) Successful completion of 49-52 semester credits in nursing required courses and all clinical experience requirements.

(2) Completion of a thesis (6 credits), a master's paper (3 credits), or a research project (3 credits).

(3) Achievement of an overall cumulative GPA of 3.0 or above. See Graduate Catalog in University Graduate School Rules and Regulations for information on Academic Warning, Probation, and Dismissal.

(4) Removal of all conditions, deficiencies, and incomplete grades. Credit hours for courses in which the grade is "B-"or below will not count toward satisfying graduate degree requirements.

(5) With the exception of thesis courses, students are expected to register for courses with letter grades.

Major Requirements

There are no majors associated with this program.

Track, Specialization, Concentration, Area of Emphasis, or Other Curricular Offering Requirements

Other Curricular Offering: Post-BSN-to-DNP Family Nurse Practitioner- MSN/DNP

The Post-BSN-to-DNP is a program of graduate doctoral study for registered nurses. The Post-BSN-to-DNP program of study builds upon the initial clinical training of entry level nurses prepared at the baccalaureate level. This program will include the study of: advanced specialty practice; systematic practice and program outcome evaluation; application of health information resources; development of safe, equitable, and cost effective health policy; innovation, implementation and evaluation of care delivery models; leadership development in healthcare delivery and clinical expertise for advanced nursing practice education. Graduates of this program will be eligibility for certification as a Family Nurse Practitioner. The goals of the Post-BSN-to-DNP program are to prepare nurses for leadership roles in a specialized area of advanced nursing practice with an emphasis on: philosophical, ethical, and scientific principles that provide the foundation for leadership in professional nursing care; continued acquisition of knowledge and clinical skills in an area of advanced practice specialization; and leadership and clinical expertise in healthcare delivery, evaluation, quality improvement and advanced practice nursing education.

Requirements

(1) Successful completion of 63 semester credits in post-BSN-to-DNP program required courses and all specialty clinical experience requirements; as well as satisfactory attainment of terminal program competencies (exit examination) prior to conferral of MSN degree.

(2) Successful completion of all DNP required core courses (36 credits), including DNP Project public presentation and defense are required for conferral of DNP degree.

(3) Achievement of an overall cumulative GPA of 3.0 or above. See Graduate Catalog in University Graduate School Rules and Regulations for information on Academic Warning, Probation, and Dismissal.

(4) Removal of all conditions, deficiencies, and incomplete grades. Credit hours for courses in which the grade is "B- or below will not count toward satisfying graduate degree requirements.

(5) With the exception of DNP Project courses, students are expected to register for courses with letter grades.

Other Curricular Offering: Post-BSN-to-DNP Family Nurse Practitioner

Type

Completion Requirement

Doctor of Nursing Practice Core: 36 credits

Complete ALL of the following Courses:

- NGR7121 - Scientific and Theoretical Foundations for Advanced Nursing Practice
- NGR7769 - Patient Safety and Quality Improvement in Healthcare
- NGR7891 - Healthcare Finance and Economics in Advanced Clinical Practice
- NGR7871 - Healthcare Informatics
- NGR7854 - Analytical Methods for Evidence-Based Clinical Practice
- NGR7892L - Health Policy Practicum
- NGR7733 - Organizational Dynamics of Health Systems
- NGR7853 - Translational Research
- NGR7940C - DNP Project I
- NGR7941C - DNP Project II
- NGR7941C - DNP Project II

Advancing Practice Nursing Core: 14 credits

Complete ALL of the following Courses:

- NGR6002C - Advanced Health Assessment
- NGR5141 - Pathophysiologic Basis of Advanced Nursing Practice
- NGR6172 - Pharmacology and Pharmacotherapeutics in Advanced Nursing Practice
- NGR5064C - Diagnostic and Therapeutics in Advanced Nursing Practice
- NGR6743 - Advanced Practice Nursing Clinical Education Seminar

Graduate Nursing Core: 8 credits

Complete ALL of the following Courses:

- NGR5131 - Culture and Advanced Nursing Practice
- NGR5810 - Research Methods in Nursing
- NGR6703 - Role Development of the Advanced Practice Nurse

Family Nurse Practitioner: 23 credits

Complete ALL of the following Courses:

- NGR6601C - Advanced Family Health Nursing I
- NGR6601L - Advanced Family Health Nursing Practice I
- NGR6602C - Advanced Family Health Nursing II
- NGR6602L - Advanced Family Health Nursing Practice II

Type
Completion Requirement

Required Course

Complete ALL of the following Courses:

- AFA5005 - African and African Diaspora Studies Theory

The 12 remaining credit hours may be drawn from courses in the Humanities and Social Sciences as listed below. Note that students are expected to complete 6 credits from each list. Students should consult with advisors since new courses are frequently added, and special topic courses sometimes concern Africa and the African Diaspora. Students may also select other courses not listed below with approval from the Director of AADS or from the Director of AADS Graduate Programs after submitting the appropriate syllabus. Not all courses are offered every semester.

List I: The Humanities

Students must choose between 6 and 9 credits from the list below:

Earn at least 6 credits from the following:

- AFA5107 - Teaching the African-American Experience
- AFA5341 - Health Issues in the African World (Inactive)
- AFA5932 - Special Topics in African and African Diaspora Studies
- AFA6245 - The African Diaspora in Latin America
- AFH5905 - Readings in African History
- AFH5935 - Topics in African History
- FRE5508 - La Francophonie (Inactive)
- HAI5235 - Haitian Creole Seminar
- LIN6602 - Language Contact
- LIT5359 - African Diaspora Women Writers
- LIT5358 - Black Literature and Literary/Cultural Theory
- RLG5122 - African-American Religion
- RLG5372 - The Globalizing of African Spirituality
- RLG5384 - Rasta, Vodou, Santeria
- RLG5488 - Theology and Liberation Movements (Inactive)
- SPN5539 - Special Topics in Afro-Hispanic Culture (Inactive)
- WOH5236 - The Transatlantic Slave Trade and the Making of African Diaspora, 1441-1807
- WOH5237 - The African Diaspora Since the End of the Slave Trade (Inactive)

List II: The Social Sciences

Students must choose between 6 and 9 credits from the list below:

Earn at least 6 credits from the following:

- AFA5600 - National and Transnational Policy Analysis: The African Diaspora (Inactive)
- AFA6217 - Sex, Race, and Power in European Colonialisms (Inactive)
- AFA6851 - Advanced Seminar in African and African Diaspora Studies
- ANG5396 - Representations of Africa and Africans in Films (Inactive)
- ANG5397 - Advanced African Diaspora Cultures and Performativity (Inactive)
- ANG6473 - Diasporas, Migration, and Globalization
- ANT6319 - The African Diaspora: Anthropological Perspectives
- CPO5325 - Politics of the Caribbean
- CPO6350 - Seminar in Brazilian Politics
- CYP6766 - The Psychology of Crosscultural Sensitization in a Multicultural Context
- ECS5406 - Latin American Economies

- ECS7435 - Economics of the Caribbean (Inactive)
- INR5087 - Ethnicity and the Politics of Development
- INR5255 - Seminar in African Development
- INR6936 - Seminar in Inter-American Politics
- SYD6705 - Comparative Analysis of Ethnicity and Race
- SYD6796 - Sex, Race, and Power in Colonial Times (Inactive)

AFNWST:MA - Master of Arts in African and African Diaspora Studies

Overview

Degree Offered
MA - Master of Arts

Program Title
African and African Diaspora Studies

The Master of Arts (MA) degree in African and African Diaspora Studies provides interdisciplinary, graduate-level education and prepares students to develop and employ theoretical, analytical, and methodological approaches in the research of critical issues pertaining to African America, Africa, and its diasporas. The objective of the program is to prepare scholars for professional positions in a range of fields and for further study at the PhD level. Multidisciplinary in scope and diverse in approach, the degree is ideal for candidates interested in a wide array of subjects pertaining to African America, continental Africa, and the African diaspora.

Simple Requirements

Admissions Requirements

Admissions Requirements for the Master of Arts (MA) in African and African Diaspora Studies

Each applicant to the African & African Diaspora Studies Graduate Program (AADS) must complete an online graduate application form and arrange to send transcripts of all prior undergraduate and graduate work and official reports of the TOEFL (if applicable) to the FIU's Office of Graduate Admissions. Each applicant should also send a separate statement of purpose to the director of the AADS Graduate Programs, along with copies of the above material, a resume, and writing sample. The statement of purpose should express the applicant's academic and professional objectives as well as specific interest in African & African Diaspora Studies. Applicants are strongly encouraged to include examples of academic or other relevant professional work that may support their application. Applicants must request three letters of recommendation from professors able to comment on their academic ability. The letters of recommendation should be sent directly to the Director of the African & African Diaspora Studies Graduate Programs.

The application file must be complete before the African & African Diaspora Studies Graduate Committee will consider the applicant for admission. For the admissions deadline please go to https://africana.fiu.edu/academics/admission-requirements-and-procedures/index.html. To be admitted into the MA in AADS program, a student must meet the university's graduate admission requirements and the following minimum standards:

(1) Applicants must have a baccalaureate degree from an accredited college or university.

(2) Applicants must have achieved an undergraduate grade point average (GPA) of 3.0 overall or-in the last 60 credits." The student must also have a GPA of 3.5 on any previous graduate work. Applicants must submit grade transcripts for consideration.

(3) Applicants should request that three letters of recommendation from individuals able to judge their academic potential be sent directly to the Director of the AADS Graduate Programs. For the exact street address, please consult our website at http://africana.fiu.edu.

(4) Applicants are encouraged to submit examples of written work and other supporting materials.

(5) Applicants from non-English speaking countries, including internationally educated American students, must demonstrate proficiency in English. Please refer to the Admissions English Proficiency criteria at https://admissions.fiu.edu/international/graduate-school/english-language-proficiency/index.html.

Financial Aid

Each academic year a limited number of graduate students are hired as graduate assistants. Graduate assistantships are allocated on a competitive basis and typically pay a substantial portion of tuition expenses and provide a stipend. To be considered for an assistantship, the applicant must make such a request in writing to the Director of AADS Graduate Programs. The Director of the AADS Graduate Programs will make the awarding of teaching assistantships in consultation with the AADS Director. Students receiving an assistantship are required to perform approximately (but not more than) 20 hours of teaching and research related duties per week and are required to participate in a one-hour seminar related to teaching at the beginning of their first semester.

Admissions Requirements for the 4+1 BA in Women's and Gender Studies to MA in African and African Diaspora Studies Accelerated Degree Pathway

To be considered for admission to the Accelerated (4+1) BA in WGS/MA in AADS Degree Pathway, students must have completed 75 credits toward the Bachelor's degree in WGS.

Students may apply as early as the end of their sophomore year. Students need only apply once to the Accelerated (4+1) BA/MA Degree Pathway, but the application must be submitted to Graduate Admissions before the student starts the last 30 credits of the bachelor's degree program. Advisors can assist with this process.

Admissions Requirements

(1) Current enrollment in the Bachelor's degree program in Women's and Gender Studies.

(2) Current GPA of 3.2 or higher

(3) Students meet all other admissions criteria for the graduate degree program in AADS.

(4) International graduate student applicants whose native language is not English are required to submit a score for the Test of English as a Foreign Language (TOEFL) or for the International English Language Testing System (IFLTS) A total score of 80 on the IBT TOEFL or 6.3 on the IETS is required.

Admissions Requirements for the MA in African and African Diaspora Studies and PhD in Global and Sociocultural Studies Joint Degree Pathway

Applicants must meet the following minimum requirements to be considered for admission.

(1) Baccalaureate degree from an accredited institution for higher education (or equivalent);

(2) Minimum cumulative grade point average of 3.2 on a 4.0 scale (or equivalent) for the last two years of undergraduate work and/or a GPA of 3.5 on any previous graduate work;

(3) Official Graduate Record Exam (GRE) scores;

(4) International graduate student applicants whose native language is not English and who have not obtained a degree from an English-speaking academic institution are required to submit a score for the Test of English as a Foreign Language (TOEFL) or for the International English Language Testing System (IELTS). A total score of 80 on the internet-based TOEFL (equivalent to 550 on the paper-based version) or a 6.5 overall on the IELTS is required.

Admissions Procedures

To be accepted into this program, students must submit an application to the PhD in Global and Sociocultural Studies with a sub-plan for a MA in African & African Diaspora Studies. This designation will appear in the menu of programs in the graduate application. To be accepted into this program, students must submit an application by **January 1** in the year in which they wish to begin their studies.

The following documents must be submitted and will be reviewed by the Admissions Committees from both units. The following must be submitted as part of the online application:

(1) Online application and application fee;

(2) Official transcripts for all undergraduate and graduate coursework;

(3) Official GRE scores;

(4) Official TOEFL scores, if applicable;

(5) Statement of purpose explaining his/her interest for enrolling in both the AADS MA program and in the PhD program in GSS. The statement of purpose must clearly address the applicant's academic and professional objectives for enrolling in both fields of inquiry. The statement of purpose must also indicate the intended major (anthropology, geography, or sociology) the applicant plans to select while engaged in the PhD in GSS;

(6) Three letters of recommendation from university professors who are able to comment on the various aspects of the student's academic ability;

(7) A curriculum vitae; and

(8) Writing samples and other relevant professional work that may support their applications.

Admissions Requirements for the MA in African and African Diaspora Studies and PhD in History Joint Degree Pathway

Applicants must meet the following minimum requirements to be considered for admission.

(1) Baccalaureate degree from an accredited institution for higher education (or equivalent);

(2) Minimum cumulative grade point average of 3.0 on a 4.0 scale (or equivalent) for the last two years of undergraduate work and/or a GPA of 3.25 on any previous graduate work;

(3) Official Graduate Record Exam (GRE) scores;

(4) International graduate student applicants whose native language is not English and have not obtained a degree from an English-speaking academic institution are required to submit a score for the Test of English as a Foreign Language (TOEFL) or for the International English Language Testing System (IELTS). A total score of 90 on the IBT TOEFL (equivalent to 575 on the paper-based version of the Test of English as a Foreign Language) is required.

Admissions Procedures

To be accepted into this pathway, students must submit an application to the PhD in History with a sub plan for a MA in African & African Diaspora Studies. This designation will appear in the menu of programs in the graduate application. Applicants should prepare all application materials in time for the Department of History and the Office of Graduate Admissions to receive them no later than **December 1** for the following year's fall admissions. Applicants will be notified of the Department's recommendation regarding their application no later than March 15.

The following documents must be submitted as part of the application. They will be reviewed by the Admissions Committee from both units.

(1) Official transcripts of all prior college-level work (undergraduate Bachelor's degree and any graduate transcripts);

(2) Official GRE scores or equivalent;

(3) Official TOEFL scores, if applicable;

(4) A curriculum vita;

(5) A detailed statement of research interests, reasons for seeking the MA/ PhD, future career goals, a summary of scholarly and extra-curricular activities, and the names of History Department faculty members who would be appropriate dissertation advisors (Note: Consult the department website for information about faculty members)

(6) A writing sample (such as a seminar paper) which demonstrates the ability to conduct research and write effectively; and

(7) Three letters of reference from academic sources or others able to judge academic abilities and potential.

In addition, an interview (in person or phone) with members of the MA in AADS Program and/or appropriate faculty in the Department of History is highly recommended.

Admissions Requirements for the MA in African and African Diaspora Studies and PhD in International Relations Joint Degree Pathway

To be accepted into this pathway, students must simultaneously submit applications for the M.A. in African & African Diaspora Studies and the Ph.D. in International Relations by January 15 in the year in which they wish to begin their studies.

To be considered for admission, students must meet the following requirements:

(1) Minimum cumulative grade point average of 3.2 in undergraduate work.

(2) Minimum cumulative grade point average of 3.5 in any prior graduate work.

(3) Official Graduate Record Exam (GRE) scores.

(4) International graduate student applicants whose native language is not English are required to submit a score for the Test of English as a Foreign Language (TOEFL) or for the International English Language Testing System (IELTS). A total score of 90 on the iBT TOEFL (equivalent to 575 on the paper-based version of the Test of English as a Foreign Language) is required.

Applicants must follow the admission procedures for both programs (see the appropriate sections in this graduate catalog). Only applications to begin studies in the fall semester will be considered. This designation will appear in the menu of programs in the graduate application, and students must indicate their intention to apply for this combined degree pathway.

Each applicant must complete an online graduate application form and arrange to send transcripts of all prior college (undergraduate and graduate) work and official reports of the Graduate Records Exam (GRE) and TOEFL (if applicable) to FIU's Office of Graduate Admissions.

Each applicant should also submit a separate statement of purpose, along with copies of the above material. The letter of application should include a statement expressing the applicant's academic and professional objectives. Applicants must include writing samples and other relevant professional work that may support their applications. Applicants must request three letters of recommendation from university professors who are able to comment on the various aspects of the student's academic ability. The letters of recommendation should be sent directly to the Director of the African & African Diaspora Studies Graduate Programs. AADS will photocopy the recommendation letters once they are all in and send them to the International Relations Graduate Program Director.

The application file must be complete before the African & African Diaspora Studies/International Relations Graduate Program Committees will consider the applicant for admission. We encourage applicants to send their application material sooner.

Admission Requirements for the MA in African and African Diaspora Studies and PhD in Political Science Joint Degree Pathway

To be accepted into this pathway, students must simultaneously submit applications for the M.A. in African & African Diaspora Studies and the Ph.D. in Political Science by January 15 in the year in which they wish to begin their studies.

To be considered for admission, students must meet the following requirements:

(1) Minimum cumulative grade point average of 3.2 in undergraduate work.

(2) Minimum cumulative grade point average of 3.5 in any prior graduate work.

(3) Official Graduate Record Exam (GRE) scores from with the last five years.

(4) International graduate student applicants whose native language is not English are required to submit a score for the Test of English as a Foreign Language (TOEFL) or for the International English Language Testing System (IELTS). A total score of 90 on the iBT TOEFL (equivalent to 575 on the paper-based version of the Test of English as a Foreign Language) is required.

Applicants must follow the admission procedures for both programs (see the appropriate sections in this graduate catalog). Only applications to begin studies in the fall semester will be considered. This designation will appear in the menu of programs in the graduate application, and students must indicate their intention to apply for this combined degree pathway.

Each applicant must complete an online graduate application form and arrange to send transcripts of all prior college (undergraduate and graduate) work and official reports of the Graduate Records Exam (GRE) and TOEFL (if applicable) to FIU's Office of Graduate Admissions.

Each applicant should also submit a separate statement of purpose, along with copies of the above material. The letter of application should include a statement expressing the applicant's academic and professional objectives. Applicants must include writing samples and other relevant professional work that may support their applications. Applicants must request three letters of recommendation from university professors who are able to comment on the various aspects of the student's academic ability. The letters of recommendation should be sent directly to the Director of the African & African Diaspora Studies Graduate Programs. AADS will photocopy the recommendation letters once they are all in and send them to the International Relations Graduate Program Director.

The application file must be complete before the African & African Diaspora Studies/International Relations Graduate Program Committees will consider the applicant for admission. We encourage applicants to send their application material sooner.

Program Requirements

General Information

The MA in African & African Diaspora Studies is cohort-based and only admits students to begin their studies in the fall semester. The MA in AADS curriculum unfolds over three terms: fall, spring, and summer C. The full curriculum comprises 30 credits. To graduate on time, students are expected to enroll in courses for 10 credits every term. During the AFA6920 AADS Graduate Colloq sessions (three times, 1 credit each), enrolled students work closely with the AADS faculty mentor and/or Graduate Program Director to prepare their exit requirement (Portfolio). Students will be assigned such as faculty mentor by the AADS Graduate Program Director (GPD) upon admission. Students may request to work with a specific AADS faculty member. Such selection must be requested by the third week of the fall semester. Before placing such request to the AADS GPD, a student must approach and get the approval of the chosen AADS faculty member. That AADS faculty member will serve as the chairperson of the student's research paper/proposal or internship report committee.

Research Paper/Proposal Option

To fulfill this requirement, the student must compile a portfolio of their most representative work, along with a reflection on each paper of how each paper relates to AADS methods and theories. The portfolio should reflect their academic work and interests. Students will work with the Graduate Program Director and/or faculty mentor to develop their portfolio over the fall and spring semesters. Students will complete the portfolio and are required to give an oral presentation (oral defense) of their portfolio to AADS faculty as a requirement for successful completion of AFA6911 Prop Writing in AADS.

The FIU faculty eligible to evaluate the oral presentation are the faculty members who have achieved graduate faculty standing as established by the University Graduate School and are core or affiliated faculty in AADS. Other FIU faculty not identified in that list may be considered to serve on a committee (but not as chairperson of that committee) based on research, identified interest, and publications after approval from the Director of AADS Graduate Programs.

Language Requirement

Students will be asked to demonstrate proficiency in a language other than English according to the nature of their research paper/proposal and professional interests. Credit hours earned in meeting this language requirement will not count toward the 30 credit hours required for the degree.

Program Credit Hours: 30

Type

Completion Requirement

Term 1 - Fall

Complete ALL of the following Courses:

- AFA5005 - African and African Diaspora Studies Theory
- AFA5855 - Research Methods and Scholarly Writing in Africana Studies
- AFA6920 - African and African Diaspora Studies Graduate Colloquium

Plus one elective from the list of Humanities or Social Sciences (3 credits)

Term 2 - Spring

Complete ALL of the following Courses:

- AFA6920 - African and African Diaspora Studies Graduate Colloquium

Plus three electives from Humanities and Social Sciences (9 credits)

Term 3 - Summer

Complete ALL of the following Courses:

- AFA6911 - Research Paper / Proposal Writing in African and African Diaspora Studies
- AFA6920 - African and African Diaspora Studies Graduate Colloquium

Plus two electives from the list of Humanities or Social Sciences (6 credits)

Elective Options

Type

Completion Requirement

List of Electives 1: The Humanities

List of Electives 1: The Humanities includes history of art, classics, history, literature, performing arts, philosophy, theology, and anthropology. With approval of the Graduate Director, students may also select other courses not listed below after submitting the appropriate syllabus.

Earn at least 6 credits from the following:

- AFA5932 - Special Topics in African and African Diaspora Studies
- AFA5107 - Teaching the African-American Experience
- AFA5341 - Health Issues in the African World (Inactive)
- AFA5600 - National and Transnational Policy Analysis: The African Diaspora (Inactive)
- AFA6851 - Advanced Seminar in African and African Diaspora Studies
- AFH5905 - Readings in African History
- AFH5935 - Topics in African History
- FRE5508 - La Francophonie (Inactive)
- HAI5235 - Haitian Creole Seminar
- LIN6602 - Language Contact
- LIT5359 - African Diaspora Women Writers
- LIT5358 - Black Literature and Literary/Cultural Theory
- RLG5122 - African-American Religion
- RLG5372 - The Globalizing of African Spirituality
- RLG5384 - Rasta, Vodou, Santeria
- RLG5488 - Theology and Liberation Movements (Inactive)
- SPN5539 - Special Topics in Afro-Hispanic Culture (Inactive)
- WOH5236 - The Transatlantic Slave Trade and the Making of African Diaspora, 1441-1807
- WOH5237 - The African Diaspora Since the End of the Slave Trade (Inactive)

List of Electives 2: The Social Sciences

List of Electives 2: The Social Sciences includes anthropology; business and management; economics; education; human geography; law; linguistics; media studies; political science and international relations; psychology; social policy and sociology. With approval of the Graduate Director, students may also select other courses not listed below after submitting the appropriate syllabus.

Earn at least 6 credits from the following:

- ANG6473 - Diasporas, Migration, and Globalization
- ANG5397 - Advanced African Diaspora Cultures and Performativity (Inactive)

- ANG5396 - Representations of Africa and Africans in Films (Inactive)
- ANT6319 - The African Diaspora: Anthropological Perspectives
- CPO5325 - Politics of the Caribbean
- CPO6350 - Seminar in Brazilian Politics
- CYP6766 - The Psychology of Crosscultural Sensitization in a Multicultural Context
- ECS5406 - Latin American Economies
- ECS7435 - Economics of the Caribbean (Inactive)
- INR5087 - Ethnicity and the Politics of Development
- INR5255 - Seminar in African Development
- INR6936 - Seminar in Inter-American Politics
- SYD6705 - Comparative Analysis of Ethnicity and Race

Graduation Requirements

Candidates must obtain a grade of “B” or higher in all courses and achieve a cumulative point average of at least 3.0 (based on a 4.0 scale) and present a satisfactory research paper, proposal, or report with scholarly citation styles admitted in the discipline. The selection of the citation style must be made with the research paper/proposal/report advisor.

Major Requirements

There are no majors associated with this program.

Track, Specialization, Concentration, Area of Emphasis, or Other Curricular Offering Requirements

Other Curricular Offering: 4+1 BA in Women's and Gender Studies to MA in African and African Diaspora Studies Accelerated Degree Pathway (30 credits)

Type

Completion Requirement

Term 1 (Fall)

The Accelerated (4+1) BA in WGS /MA in AADS Degree Pathway allows qualified students to earn both their Bachelor’s and MA degrees in a shorter amount of time than typically required for earning degrees sequentially. A student admitted to the Accelerated (4+1) BA/MA Degree Pathway will be considered to have undergraduate status until the student applies for graduation from the WGS Bachelor’s degree program. No undergraduate credit may count toward the graduate degree. Upon conferral of the Bachelor’s degree, students will be granted graduate status and be eligible for graduate assistantships. Only 5000 level or higher courses with at least 50% gender studies content, and no more than four courses (12 credits), may be applied toward both degrees.

General Requirements

The FIU Bachelor’s degree in Women’s and Gender Studies must be awarded before the Master’s degree in African and African Diaspora Studies.

Fulfill ALL of the following requirements:

Term 1 (Fall): Required Courses

Complete ALL of the following Courses:

- AFA5005 - African and African Diaspora Studies Theory
- AFA5855 - Research Methods and Scholarly Writing in Africana Studies
- AFA6920 - African and African Diaspora Studies Graduate Colloquium

AND

Term 1 (Fall): Elective Option

One elective (3 credits) from List 1: The Humanities or List 2: The Social Sciences
Students will select from the lists of electives in the "Program Requirements" section above.

Term 2 (Spring)

Fulfill ALL of the following requirements:

Term 2 (Spring): Required Course

Complete ALL of the following Courses:

- AFA6920 - African and African Diaspora Studies Graduate Colloquium

AND

Term 2 (Spring): Elective Options

Three elective courses (9 credits) from List 1: The Humanities or List 2: The Social Sciences
Students will select from the lists of electives in the "Program Requirements" section above.

Term 3 (Summer C)

Fulfill ALL of the following requirements:

Term 3 (Summer C): Required Courses

Complete ALL of the following Courses:

- AFA6911 - Research Paper / Proposal Writing in African and African Diaspora Studies
- AFA6920 - African and African Diaspora Studies Graduate Colloquium

AND

Term 3 (Summer C): Elective Options

Two elective courses (6 credits) from List 1: The Humanities or List 2: The Social Sciences
Students will select from the lists of electives in the "Program Requirements" section above.

Additional Comments:

Language Requirement

Students will be asked to demonstrate proficiency in a language other than English according to the nature of their research paper/proposal and professional interests. Credit hours earned in meeting language requirement will not count toward the 30 credit hours required for the degree.

Other Curricular Offering: MA in African and African Diaspora Studies and PhD in Global and Sociocultural Studies Joint Degree Pathway

The combined African & African Diaspora Studies MA/Global & Sociocultural Studies PhD pathway allows qualified graduate students to develop an expertise in African & African Diaspora Studies by earning an MA in AADS while progressing toward a PhD in one of the three major areas in the Global and Sociocultural Studies Department geography, sociology, or anthropology.

Degree Requirements for MA in African & African Diaspora Studies

This 30-credit, one year, three-semester program occurring over the Fall, Spring, and Summer includes 9 credits of core AADS courses, which includes 3 credits for the directed research paper exit option, 9 credits of core Global and Sociocultural Studies courses, and 12 credits of electives. There is also a Foreign Language Requirement.

MA in AADS Core: 9 credits

--AFA5005 AAD Studies Theory African & African Diaspora Studies Theory: 3 credits
--AFA5855 Research Methods AADS Research Methods in African and African Diaspora Studies: 3 credits
--AFA6920 AADS Graduate Colloq African & African Diaspora Studies Graduate Colloquium (3 credits: 1 credit over three semesters)

Combined MA in AADS/PhD in Global and Sociocultural Studies Core

--ISS6305 Res Meth and Design Research Methods and Design: 3 credits

MA in AADS Elective: 15 credits

Nine credits of elective courses with an AADS focus must be from the Global and Sociocultural Studies Department. Six credits may be from outside of the Department but within the Green School and/or the College of Arts & Sciences. Students wishing to take courses outside of the Green School and the College of Arts & Sciences must seek prior approval. **Note:** Students are advised to take at least 9 of these elective credits in their chosen major discipline for GSS (anthropology, geography, or sociology).

MA in AADS Research Proposal option

To graduate from the MA in AADS, students enrolled in this combined MA/PhD pathway must elect to complete either a research proposal or research paper for their exit option. Those who elect to write a research proposal must take AFA 6911 Research Paper/Proposal Writing in African and African Diaspora Studies.

MA in AADS Language Requirement

Students must demonstrate proficiency in a language other than English according to the nature of their thesis or research paper/proposal and professional interests.

Application for Graduation from MA in AADS

Students should apply for graduation for the MA in AADS during the summer term if they are on track for completing all requirements for the degree — including the exit option. Ordinarily, the MA will be conferred before the student advances to candidacy for the PhD in Global and Sociocultural Studies.

Matriculation to PhD in GSS

All students must undergo a successful M.A. review upon completion of the AADS Masters Program requirements in order to continue toward the Ph.D. in GSS. The GSS Graduate Committee, along with an appointee from AADS, conducts these reviews. The purpose of the M.A. review is to determine the ability of the student to do Ph.D. level work with the department's faculty. Among the information considered during the review are students' performances and grades in courses, and faculty recommendations.

Degree Requirements for PhD in Global and Sociocultural Studies

The doctorate in Global and Sociocultural Studies requires a minimum of 75 credits beyond the baccalaureate including a dissertation based on original research. 30 credits of the MA in AADS will count toward the 75-credit minimum. Thus, a minimum of 45 credits must be earned beyond the MA.

Major Courses: 33 credits

All doctoral students will choose a major in Anthropology, Geography, or Sociology. The following distribution of coursework is required.

(a) Major theory: 3 credits

(b) Major methods: 3 credits

(c) Major course electives: 6 credits minimum

(d) Exam and dissertation credits and GSS and non-GSS Department electives

--Doctoral Exam Preparation: 6 credits maximum

--Doctoral Dissertation: 15 credits minimum

General Electives: 12 credits

--GSS and non-GSS Department electives

PhD General Examination

After successfully completing the common core requirements, the major's course requirements, and electives, a student prepares for the Ph.D. General Exam by enrolling in a maximum of six credits of exam preparation for their major. In preparation for the exam, a student forms a dissertation committee according to the regulations published on the University Graduate School web page (**http://gradschool.fiu.edu**). The Ph.D. General Exam addresses the student's anticipated dissertation topic, and is conducted according to the University Graduate School Policies and Procedures Manual and the Department's Ph.D. General Exam guidelines.

The Dissertation Proposal and Defense/Candidacy Exam

After passing the Ph.D. General Exam, a student works under the guidance of the dissertation committee to prepare a dissertation proposal and defend it orally before the committee. The chair of the dissertation committee must hold Dissertation Advisor Status from the University Graduate School. The proposal defense serves as the doctoral candidacy exam for the Ph.D. program in Global and Sociocultural Studies. Upon passing the proposal defense, a student is admitted to candidacy status.

The Dissertation and Dissertation Defense

After successfully defending a dissertation proposal, a student conducts the proposed research and completes a dissertation under the guidance of a dissertation committee. Only after successfully defending the dissertation proposal may a student register for dissertation hours (ANG 7980, GEO 7980, or SYA 7980). The Ph.D. program requires a student to be continuously enrolled in a minimum of 3 hours of Doctoral Dissertation each semester from the time of advancement to candidacy until completion of the dissertation, including summers. Upon completion of the dissertation manuscript and authorization by the committee, a student defends the dissertation before the committee and the University community. The University Graduate School's regulations governing the dissertation are described at **http://gradschool.fiu.edu**.

Other Curricular Offering: MA in African and African Diaspora Studies and PhD in History Joint Degree Pathway

The Combined African & African Diaspora Studies MA / Ph.D. in History pathway allows qualified graduate students to complete the MA in African & African Diaspora Studies (MA in AADS) en route to the Ph.D. in History. This pathway will train doctoral students within the discipline of Atlantic History while giving them area studies expertise in African & African Diaspora Studies In combination, these two programs provide a beneficial synthesis for interdisciplinary approaches to both the Atlantic world and the African diasporic experience.

MA in African & African Diaspora Studies (MA in AADS) Requirements

This 30-credit, one year, three-semester program occurring over the Fall, Spring, and Summer includes 9 credits of core AADS courses, which includes 3 credits for the directed research paper exit option, 9 credits core History courses, and 12 credits of electives. There is also a Foreign Language Requirement.

MA in AADS Core Courses: 9 credits

--AFA5005 AAD Studies Theory African and African Diaspora Studies Theory: 3 credits
--AFA5855 Research Methods AADS Research Methods in African and African Diaspora Studies: 3 credits
--AFA6920 AADS Graduate Colloq AADS graduate colloquium: 3 credits (1 credit over three semesters)

Combined MA in AADS/PhD in History Core Courses: 9 credits

--HIS6059 Historical Methods Historical Methods: credits
--6 credits in any of the following courses, or any other graduate History courses with an AADS focus:

AFA6851 Advanced Seminar in AADS Advanced Seminar in African and African Diaspora Studies
AFH5905 Rdgs In African Hist Readings in Asian History
AFH5935 Topics/African Hist Topics in African History
AFH6915 Rsch African Hist Research in African History
AFH6932 Rsch African Hist I Research Seminar in African History I
AFH6933 Rsch African Hist II Research Seminar in African History II
WOH5236 Adv Afr Diaspora I The Transatlantic Slave Trade and the Making of African Diaspora, 1441-1807
WOH5237 Adv Afr Diaspora II The African Diaspora Since the End of the Slave Trade

MA in AADS Electives: 12 credits
--12 credits of elective courses with an AADS focus, at least 6 credits of which are from within the Department of History (making a total of 15 History credits) such as those on the following list:

AFA6851 Advanced Seminar in AADS Advanced Seminar in African and African Diaspora Studies
AFH5905 Rdgs In African Hist Readings in African History
AFH5935 Topics/African Hist Topics in African History
AFH6915 Rsch African Hist Research in African History
AFH6932 Rsch African Hist I Research Seminar in African History I
AFH6933 Rsch African Hist II Research Seminar in African History II
WOH5236 Adv Afr Diaspora I The Transatlantic Slave Trade and the Making of African Diaspora, 1441-1807
WOH5237 Adv Afr Diaspora II The African Diaspora Since the End of the Slave Trade

Students wishing to take courses outside of the Green School and/or the College of Arts & Sciences must seek prior approval from the Graduate Program Directors of the MA and PhD programs.

MA in AADS Research Proposal Option

To graduate from the MA in AADS, students enrolled in this combined MA/PhD program must elect the research proposal option and take the proposal writing course AFA6911 Prop Writing in AADS Research Paper/Proposal Writing in African and African Diaspora Studies.

MA in AADS Language Requirement

Students must demonstrate proficiency in a language other than English according to the nature of their thesis or research paper/proposal and professional interests.

Application for Graduation from MA in AADS

Students should apply for graduation for the MA in AADS during the summer term if they are on track for completing all requirements for the degree – including the exit option. Ordinarily, the MA will be conferred before the student advances to candidacy for the PhD in History.

PhD in History Requirements

Students will begin study toward the Ph.D. in History immediately following their satisfactory completion of MA in AADS degree requirements. Students are expected to meet all the degree requirements for the Ph.D. in History, which requires a total of 75 credits.

Courses required ***in addition to*** the degree requirements for the MA in African & African Diaspora Studies (minimum 45 credits):

--HIS6906 Adv Rdgs Atl Civ Advanced Readings in Atlantic Civilization: 3 credits
--HIS6918 Rsch Atlantic Civ Research in Atlantic Civilization: 3 credits
--6 credits outside of AADS and Atlantic Civilization (also excluding Methods), 3 credits of which must be in a comparative course (HIS or WOH prefix)
--Electives: 18 credits
--HIS7980 PH.D. Dissertation Dissertation: 15 credits

Language Requirements

All students must acquire reading competence in two languages other than English. The language requirement may be fulfilled in one of two ways: 1) achieving a High Pass on the department examination in one language, and at least a Pass on the second; or 2) achieving a Pass or High Pass in departmental examination in one language, and competency in social science quantitative skills, demonstrated by receiving a grade of “B” or “B+”, for Pass, and “A” or “A-“, for High pass, in an appropriate course approved for this purpose by the Graduate Program Director. At least one High Pass must be received. Language requirements vary, according to the concentration fields. In cases where the dissertation will be in the history of US or English-speaking countries, one language plus the quantitative skill is sufficient. In Latin American history, either Spanish or Portuguese, and a second language appropriate to the student’s field are required. Language exams will be graded on a High Pass, Pass, and Fail basis; a High pass is required in the student’s primary language. Students should check with the Department’s Graduate Program Director to determine which languages are appropriate for their program of studies.

Comprehensive Examinations and the Dissertation

Following completion of all course work, satisfaction of language requirements, and the constitution of a dissertation committee, students will be required to pass a written and an oral comprehensive examination. After the completion of their comprehensive examinations and the approval of a dissertation proposal by their dissertation committee, students will write a doctoral dissertation. The time needed for the research and writing of dissertations in History is variable, although doctoral candidates normally spend one year engaged in continuous field research and a second year in full-time writing.

Restrictions

(1) The grade of “B” or better is required for graduate credit.

(2) At the end of the second semester of residence, or upon completion of the first 18 credit-hours of work, the Graduate Committee will examine and evaluate the student’s progress and prospects. Professors will provide detailed written evaluations of the work of all first-year Ph.D. students they have taught. Students whose progress is deemed insufficient will be advised to withdraw from the program.

(3) No more than 6 semester-hours of Topics (5935) courses toward meeting the degree requirements, without permission of the Graduate Program Director.

(4) No more than 6 semester-hours of HIS5908 Independent Studies Independent Study toward meeting the degree requirements, without permission of the Graduate Program Director.

Other Curricular Offering: MA in African and African Diaspora Studies and PhD in International Relations Joint Degree Pathway

The combined African & African Diaspora Studies M.A./International Relations Ph.D. pathway allows qualified graduate students to pursue both degrees at the same time.

Required Credits

Students must fulfill the requirements for both programs. The 30 credits for the M.A. in AADS earned by students will count toward the 75 credits required for the Ph.D. in INR.

Language Requirement

Students must demonstrate proficiency in a language other than English according to the nature of their thesis or research paper/proposal and professional interests. The Director of AADS Graduate Programs will ask a university faculty member fluent in the language of interest to the student, to evaluate the student's fluency by asking her/him to summarize or synthesize the content of a text of between 10 to 20 pages, published in that language, in no more than one page. That exercise will have to take place at the university during a limited period of time. The text will be given to the student at the beginning of the exercise. The chosen text will have some connection to the student's research interest. Once a student has demonstrated proficiency for the M.A. in African & African Diaspora Studies, that proficiency will be recognized by the International Relations Ph.D. program. Therefore, proficiency in a foreign language will not be part of the candidacy exam. Credit hours earned in meeting the language requirement will not count towards the 30 credit hours required for the M.A. degree.

Students should apply for graduation with the M.A. in African & African Diaspora Studies as soon as they have completed all requirements for the degree – including the exit requirements, as specified for the M.A. in African & African Diaspora Studies. Ordinarily, students will complete these requirements and earn their M.A. before advancing to candidacy for the Ph.D. in International Relations. The research paper/proposal option is the only option available for students enrolled in this combined M.A./Ph.D. pathway.

Master of Arts in African & African Diaspora Studies Requirements

This 30-credit, one year, three semester program occurring over the Fall, Spring, and Summer includes 9 credits of core AADS courses, which includes 3 credits for the directed research paper exit option, 6 credits of core International Relations courses, and 15 credits of electives. There is also a Foreign Language Requirement.

MA in AADS Core Courses: 9 credits

--AFA5005 AAD Studies Theory African and African Diaspora Studies Theory: 3 credits
--AFA5855 Research Methods AADS Research Methods in African and African Diaspora Studies: 3 credits
--AFA6920 AADS Graduate Colloq AADS graduate colloquium: 3 credites; 1 semester of graduate colloquium

Combined MA in AADS/PhD in International Relations Core Courses: 6 credits

--INR5609 Contemp Dynam INR Contemporary Dynamics of International Relations: 3 credits
--INR6706 Pol Econ Of Int Rel Political Economy of International Relations: 3 credits

MA in AADS in electives: 15 credits

15 credits of elective courses with an AADS focus may be from outside the International Relations Department and within the Green School and/or the College of Arts & Sciences. Students wishing to take courses outside of the Green School must seek prior approval.

MA in AADS Research Proposal or Paper Option

To graduate from the MA in AADS, students enrolled in this combined MA/PhD pathway must elect to complete either a research proposal or research paper for their exit option. Those who elect to write a research proposal must take AFA6911 Prop Writing in AADS Research Paper/Proposal Writing in African and African Diaspora Studies.

Doctor of Philosophy in International Relations: 75 credits

The following courses in addition to all 30 M.A. credits:

--INR5615 Research Design Inr Research Design in International Relations: 3 credits
--GEO6473 Space/Place/Identit Space, Place, and Identity: 3 credits
--INR6608 Contemporary IR Theory Contemporary International Relations Theory: 3 credits

Major and Minor Fields: 12 credits

--Major field of study: 9 credits
--Minor field of study: 3 credits

Electives: 6 credits

Additional elective course work according to the specific information about elective courses indicated in the INTLRL:PHD section of the catalog.

Comprehensive Examinations

Once students have achieved 60 credits of course work, they must sit for written examinations on the core sequence of their fields indicated in the INTLRL:PHD section of the catalog.

Dissertation: 15 credits

See the INTLRL:PHD section of the catalog for details.

Other Curricular Offering: MA in African and African Diaspora and PhD in Political Science Joint Degree Pathway

Type

Completion Requirement

MA in African and African Diaspora Studies Requirements

The combined African & African Diaspora Studies M.A./Political Science Ph.D. pathway allows qualified graduate students to pursue both degrees at the same time.

Required Credits

Students must fulfill the requirements for both programs. The 30 credits for the M.A. in AADS will count toward the required coursework for the doctoral program.

This 30-credit, one year, three semester program occurring over the Fall, Spring, and Summer includes 9 credits of core AADS courses, which includes 3 credits for the directed research paper exit option, 6 credits of core Political Science courses, and 12 credits of electives. Students are encouraged to select eligible Political Science courses to fulfill their MA elective requirements and must seek advanced approval from the Political Science Graduate Program Director in order to have these credits applied to the Ph.D. course requirements. There is also a Foreign Language Requirement.

Fulfill ALL of the following requirements:

MA in AADS Core Courses: 9 credits

Complete ALL of the following Courses:

- AFA5005 - African and African Diaspora Studies Theory
- AFA5855 - Research Methods and Scholarly Writing in Africana Studies
- AFA6920 - African and African Diaspora Studies Graduate Colloquium

AFA6920 AADS Graduate Colloq is taken as 1 credit over three semesters for a total of 3 credits

AND

Combined MA in AADS/PhD in International Relations Core Courses: 6 credits

Complete ALL of the following Courses:

- POS5706 - Methodology
- POS5716 - Foundations of Political Science

AND

MA in AADS Electives: 15 credits

15 credits of elective courses with an AADS focus are required. Students are encouraged to select courses from within the Political Science Department. If students wish to take electives from outside the Political Science Department and within the Green School and/or the College of Arts & Sciences, they must seek prior approval from the Graduate Program Directors of both AADS and Political Science

Earn at least 15 credits from the following:

- AFA5932 - Special Topics in African and African Diaspora Studies
- AFA6245 - The African Diaspora in Latin America
- AFA5600 - National and Transnational Policy Analysis: The African Diaspora (Inactive)
- AFA5341 - Health Issues in the African World (Inactive)
- AFA6217 - Sex, Race, and Power in European Colonialisms (Inactive)
- ANG6473 - Diasporas, Migration, and Globalization
- POS5728 - Comparative Racial Politics
- CPO5325 - Politics of the Caribbean
- CPO6350 - Seminar in Brazilian Politics
- ECS5406 - Latin American Economies
- ECS7435 - Economics of the Caribbean (Inactive)
- HIS5930 - Special Topics
- INR5087 - Ethnicity and the Politics of Development
- INR5255 - Seminar in African Development
- INR6936 - Seminar in Inter-American Politics
- ISS6317 - Social Research Quantitative Methods I
- LAW6234 - Race and the Law
- RLG5488 - Theology and Liberation Movements (Inactive)
- SYD6705 - Comparative Analysis of Ethnicity and Race
- WOH5236 - The Transatlantic Slave Trade and the Making of African Diaspora, 1441-1807
- WOH5237 - The African Diaspora Since the End of the Slave Trade (Inactive)

MA in AADS Research Proposal or Paper Option

To graduate from the MA in AADS, students enrolled in this combined MA/PhD pathway must elect to complete either a research proposal or research paper for their exit option. Those who elect to write a research proposal must take AFA 6911 Research Paper/Proposal Writing in African and African Diaspora Studies.

Language Requirement

Students must demonstrate proficiency in a language other than English according to the nature of their research paper/proposal and professional interests. The Director of AADS Graduate Programs will ask a university faculty member fluent in the language of interest to the student, to evaluate the student's fluency by asking her/him to summarize or synthesize the context of a text of between 10 to 20 pages, published in that language, in no more than one page. That exercise will have to take place at the university during a limited period of time. The text will be given to the student at the beginning of the exercise. The chosen text will have some connection to the student's research interest. Once a student has demonstrated proficiency for the M.A. in African and African Diaspora Studies, that proficiency will be recognized by the Political Science Ph.D. program. Therefore, proficiency in a foreign language will not be part of the candidacy exam. Credit hours earned in meeting the language requirement will not count towards the 30 credit hours required for the M.A. degree.

Students should apply for graduation with the M.A. in African and African Diaspora Studies as soon as they have completed all requirement for the degree — including the exit requirements, as specified for the M.A. in African and African Diaspora Studies. Ordinarily, students will complete these requirements and earn their M.A. before advancing to candidacy for the Ph.D. in Political Science. The research paper/proposal option is the only option available for students enrolled in this combined M.A./Ph.D. pathway.

Doctor of Philosophy in Political Science: 76 credits

Fulfill ALL of the following requirements:

Required Courses

The following courses are required for the PhD in Political Science. The M.A. earned credits that are eligible to be applied to the Ph.D. must be approved in advanced by the Political Science Graduate Program Director:

Complete ALL of the following Courses:

- POS5702 - Teaching Political Science
- POS6918 - Seminar in Political Science Research Methods
- CPO5091 - Seminar in Comparative Politics
- INR5007 - Seminar in International Politics
- POS5045 - Seminar in American Politics
- POT5007 - Seminar in Political Theory

AND

Examination Fields

12 credits (minimum) of Two Examination Fields

AND

Specialization

9 credits (minimum) of a Third Specialization

AND

Electives

9 credits (minimum) of Approved Electives
Language Requirement

The Political Science Ph.D. program requires competency in one foreign language or demonstrated competency in computer and methodological techniques when considered more appropriate. Language competency must be demonstrated prior to taking the comprehensive examinations.

Comprehensive Examinations

After satisfactory completion of course work, students will take comprehensive exams in two chosen subfields before admitted to candidacy and defending a dissertation proposal. The comprehensive exams require a demonstration of broad knowledge of the two examination fields.

Comprehensive examinations are given twice yearly, in mid-September and in mid-January.

Dissertation: 24 credits minimum

After passing the comprehensive exams, students are admitted to candidacy and enroll for dissertation credits under the supervision of their dissertation advisors. Candidates will prepare and defend a dissertation proposal. Upon completion of the work, a public defense of the dissertation will be scheduled in accordance with university policy.

AFREOD:CFI - Undergraduate Certificate in Advanced Fire Officer Development

Overview

Degree Offered
PCRT - Professional Certificate

Program Title
Certificate in Advanced Fire Officer Development

The Advanced Fire Officer Development Certificate comprises the four courses the Florida Fire College requires of firefighters wishing to promote to the level of captain. Each of these courses not only provide academic credit towards the FIU certificate but are also sent to Florida Fire College to be used to meet industry standards for promotional practices. For more information, visit the Academy for International Disaster Preparedness website.

AGEOI:CFI - Undergraduate Certificate in Applied Geographic Information System

Overview

Degree Offered
ACRT - Academic Certificate

Program Title
Certificate in Applied Geographic Information Systems

The certificate in Applied Geographic Information Systems prepares students to perform a wide array of GIS skills, data collection, and data analysis methods. The certificate program focuses on practical applications of qualitative and quantitative research methods. These prepare students (1) to continue their education into graduate/professional school and/or (2) for jobs that require knowledge and use of statistical, survey, GIS, and other research methods.

AGROG:CFI - Undergraduate Certificate in Agroecology

Overview

Degree Offered
ACRT - Academic Certificate

Program Title
Certificate in Agroecology

The Undergraduate Certificate in Agroecology is an interdisciplinary program aimed at providing students with an opportunity to learn about problems and issues that emerge from the interface between agriculture, natural ecosystems, and urban areas. Students will gain an appreciation of how traditional agricultural production systems influence the quality of natural ecosystems and human environment, and also how human-caused environmental changes and urban development pressures affect agriculture. The program will emphasize natural and economic services that are provided by large agricultural areas interspersed between urban and natural areas. Students will learn structural changes that are necessary within agriculture to make it ecologically sustainable, and community supported. The program includes farm- and field-level experiential learning through internships, field demonstrations and minor experiments. This certificate program is open to degree-seeking students only.

For more information, visit the College of Arts, Sciences, and Education website.

Program Requirements

The Agroecology Certificate Program requires successful completion of the following three categories of coursework, with a total of 17-18 credit hours.

Program Credit Hours: 17-18

Type

Completion Requirement

Agroecology Core Requirement Courses

Complete ALL of the following Courses:

- EVR4272 - Agroecology
- EVR4274 - Sustainable Agriculture

Agricultural Internship or Problem Analysis Courses

Complete ANY of the following Courses:

- AGG4941 - Internship in Agriculture
- ISC4940 - Undergraduate Research Internship in Earth and Environment
- BSC4914 - Student Research Lab II
- BSC4915L - Honors Research

Student must also complete a farm-, field-or lab-based internship that may involve working on farms, carrying out agro-ecological field observations, carrying out agricultural science lab experiments, conducting geo-spatial modeling, or conducting agriculture-related socio-economic analysis. Student will produce a report based on the internship experience. Students also will have the option of doing internship or conducting agroecology science experiments at USDA's Agricultural Research Service, Miami or other research or education institutions.

General Agricultural/Environmental Science and Social Studies Electives

Complete at least 3 of the following courses:

- HOS3012 - Introduction to Horticulture Science
- EVR4592 - Soils and Ecosystems
- EVR3723 - Natural Resource Valuation and Economics
- AEB4131 - Farm Economics and Management
- AGR4240 - Modern Crop Production
- EVR3010 - Energy Flow in Natural and Man-made Systems
- EVR3013 - Ecology of South Florida
- GIS3043C - Introduction to Geographical Information Systems
- BSC4915L - Honors Research
- EVR4026 - Ecology of Biotic Resources
- EVR4211 - Water Resources
- EVR4321 - Sustainable Resource Development
- EVR4323 - Restoration Ecology
- EVR4401 - Conservation Biology
- EVR4352 - U.S. Environmental Policy
- EVR4415 - Population and Environment Issues
- ECP3302 - Introduction to Environmental Economics
- GEO3510 - Earth Resources
- GEO4476 - Political Ecology
- GEO4354 - Geography of the Global Food System
- GLY3039 - Environmental Geology
- ENY4060 - Entomology

- IPM4020 - Integrated Pest Management
- MCB3020 - General Microbiology
- MCB3020L - General Microbiology Lab
- MCB4603 - Microbial Ecology
- PCB4301 - Freshwater Ecology
- MCB2000 - Introductory Microbiology
- BOT3014 - Botany
- BOT3154 - Local Flora
- BOT3663 - Tropical Botany
- BOT3810 - Economic Botany
- BOT4503 - Plant Physiology
- BSC4422 - Biotechnology: Applications in Industry, Agriculture and Medicine
- EVR4504 - Precision Agriculture and Environmental Sustainability
- EVR4592 - Soils and Ecosystems
- INR3043 - Population and Society
- INR4054 - World Resources and World Order
- SWS4303 - Soil Microbiology

The Certificate Committee will consider other courses toward the elective requirement on a case-by-case basis. Up to two courses taken at Miami Dade College or other colleges in the relevant areas of agricultural sciences, horticulture, ecology, and environmental sciences will count toward the general agricultural/environmental science and social studies elective requirement.

Student must earn a grade of “C” or better in all courses. Students obtaining a BS in Environmental Studies with Agri-science major [BS (Agri-science Major)] and wishing to obtain a Certificate in Agroecology must take at least two upper division courses in food, agriculture and environmental sciences or studies different from those used to satisfy the BS (Agri-science Major).

Major Requirements

There are no majors associated with this program.

Track, Specialization, Concentration, Area of Emphasis, or Other Curricular Offering Requirements

There are no track, specialization, concentration, area of emphasis, or other curricular offerings associated with this program.

AHLTN:CFI - Post-Graduate Nurse Practitioner Certificate in Adult-Gerontology Primary Care

Overview

Degree Offered
ACRT - Academic Certificate

Program Title
Graduate Certificate in Adult-Gerontology Primary Care Nurse Practitioner

The Post-Graduate Nurse Practitioner (NP) Certificate in Adult-Gerontology Primary Care is designed for nurses who have completed a Master of Science in Nursing (MSN) degree and wish to specialize in primary care for adult and elderly populations. The program focuses on developing advanced skills in assessing, diagnosing, and managing common and complex health issues in adults and geriatric patients. Graduates of this program are prepared to provide comprehensive primary care services, promote healthy aging, and address the unique needs of older adults in various healthcare settings.

For more information, visit the Nicole Wertheim College of Nursing and Health Sciences website.

Requirements

Simple Requirements

Admissions Requirements

Admissions Requirements for the Graduate Certificate in Adult-Gerontology Primary Care Nurse Practitioner

(1) A Master of Science in Nursing (MSN) degree from an CCNE, NLNAC, or ACEN accredited program.

(2) A graduate (MSN) grade point average (GPA) of 3.0 or above.

(3) Graduate courses in nursing theory (3 credits) and research (3 credits). advanced pathophysiology (3 credits), advanced health assessment (3 credits), and advanced pharmacology (3 credits). *-If the applicant's coursework in advanced pharmacology, advanced pathophysiology, and advanced health assessment took place more than 3 years ago, they may need to repeat the courses prior to enrollment specialty courses, following evaluation of record and professional experience by admission committee and program chair.*

(4) State of Florida RN and/or APRN licensure. A photocopy of the license must be submitted along with student's application to the Post Graduate Nurse Practitioner Certificate Program.

(5) Pre-admission panel interview with members of the Graduate Nursing Admissions Committee.

(6) Two letters of recommendation.

This certificate is open to non-degree-seeking students only.

Admissions Procedures

(1) STEP 1 - Submit an application to Nursing CAS (The Centralized Application Service for Nursing Programs)

-- Complete an online application via Nursing CAS http://www.nursingcas.org and pay appropriate fees. Applications will be accepted from Dec 1 to March 1 for Fall admission.

-- Send official academic transcripts from ALL SCHOOLS attended (all Associate, Bachelors, Masters degree, and higher [if applicable] coursework) to Nursing CAS for upload and verification.

-- Upload all required supplemental items including professional CV, active Florida RN and/or APRN License, recommendations and Personal Statement to Nursing CAS.

-- Complete the required FIU supplemental application and pay the $30 fee.

(2) STEP 2 - Professional Interview

-- Following a review of all completed applications a select number of applicants will be offered the opportunity to participate in a panel interview.

-- Interview candidates may be instructed to bring additional official transcripts to their interview appointment

AMCIV:CFI - Undergraduate Certificate in Ancient Mediterranean Civilization

Overview

Degree Offered
ACRT - Academic Certificate

Program Title
Certificate in Ancient Med Civilization

The Ancient Mediterranean Civilization Certificate Program is an eighteen credit-hour course of study intended to enable students to gain an interdisciplinary concentration in various aspects of the Ancient Mediterranean. It is designed to enhance undergraduates' understanding of the ancient Mediterranean region, primarily (but not exclusively), the cultures of Rome, Greece, and Judaea, and to complement the student's major course of study, especially in Anthropology, English, History, Humanities, Philosophy, Religious Studies, and Visual Arts.

Biblical Hebrew Courses

Complete ANY of the following Courses:

- HBR3100 - Biblical Hebrew I
- HBR3101 - Biblical Hebrew II

Latin Courses

Complete ANY of the following Courses:

- LAT1130 - Latin I (Inactive)
- LAT1131 - Latin II (Inactive)

Foundation Courses

Complete ALL of the following Courses:

- HUM3214 - Ancient Classical Culture and Civilization (Inactive)
  OR EUH2011 - Western Civilization: Early European Civilization

Culture

Complete at least 1 of the following courses:

- HUM3432 - The Roman World
- HUM4431 - The Greek World
- PHH3100 - Ancient Philosophy
- POT2010 - Classical Political Theory
- ARH4131 - Greek Art
- ARH4151 - Roman Art

History

Complete at least 1 of the following courses:

- EUH3400 - Greek History
- EUH3411 - Ancient Rome
- EUH4408 - The Age of Alexander The Great, 400-280 BC

Religion

Complete at least 1 of the following courses:

- REL3209 - The Dead Sea Scrolls
- REL3220 - Moses And Company
- REL3250 - Jesus and the Early Christians
- REL3280 - Biblical Archaeology
- REL3320 - Moses, Jesus, Muham
- REL3325 - Religions of Classical Mythology
- REL3511 - Early Christianity
- REL3625 - Intro To Talmud
- REL4224 - Prophets & Israel
- RLG5614 - Ancient Judaism

Language

Complete ANY of the following Courses:

- GRE1130 - Classical Greek I (Inactive)
- GRE1131 - Classical Greek II (Inactive)
- GRE2200 - Intermediate Greek (Inactive)
- HBR3100 - Biblical Hebrew I
- HBR3101 - Biblical Hebrew II
- LAT1130 - Latin I (Inactive)
- LAT1131 - Latin II (Inactive)
- LAT2200 - Intermediate Latin (Inactive)

APMATH:PHD - Doctor of Philosophy in Mathematical Sciences

Overview

Degree Offered
PHD - Doctor of Philosophy

Program Title
Mathematical Sciences

The PhD in Mathematical Sciences is open to students interested in various fields of mathematics. Research areas within this program include harmonic analysis, nonlinear partial differential equations, inverse problems, dynamical systems, fluid dynamics, mathematical systems, mathematical physics, geometry, topology, numerical analysis, scientific computing, mathematical biology, and financial engineering. The formal course curriculum is designed to ensure thorough grounding in mathematics, as well as choice for specialization. The program prepares students for a successful academic or industrial career in the fields of science, technology, engineering, and mathematics (STEM).

For more information, visit the College of Arts, Sciences, and Education website.

College of Arts, Sciences, and Education

Diploma Title
Doctor of Philosophy in Mathematical Sciences

Total Credits
75

Program Length in Years Based on Full-Time Enrollment
5

CIP Code
27.0301

Requirements

Simple Requirements

Admissions Requirements

(1) Have either a bachelor’s or a graduate degree in Mathematics or another quantitative field

(2) Have a GPA of at least 3.0 in the bachelor’s or Masters’ degree

(3) GRE is not required.

(4) Official transcripts and least three letters of recommendation.

(5) Have received approval of the departmental graduate committee

(6) Foreign student whose native language is not English must obtain a score of 80 or higher on the TOEFL iBT (this corresponds to 550 on the old TOEFL test) or 6.3 overall on the IELTS. The University Graduate School has a list of countries that are exempt from this requirement.

Program Requirements

Degree Program Credit Hours: 75

Type
Completion Requirement

Required Core Courses; 21 credits

Complete ALL of the following Courses:

- MAA6616 - Real Analysis
- MAA6406 - Complex Analysis
- MAD5405 - Numerical Methods
- MAP5316 - Ordinary Differential Equations
- MAP6326 - Partial Differential Equations
- MAS5145 - Applied Linear Algebra
- MAP5255 - Mathematical Scientific Computation
- MAT5921 - Training in Mathematical Exposition

Other Required Courses: 15 credits

Complete ALL of the following Courses:

- MAT7981 - PhD Dissertation

Thesis Prepartory Courses: 12 credits

Complete at least 4 of the following courses:

- MAA6506 - Functional Analysis
- MAP6217 - Calculus of Variations
- MAD6409 - Numerical Methods II
- MAD7408 - Topics in Numerical Analysis
- MAP5415 - Introduction to Fourier Analysis
- MAP6357 - Partial Differential Equations II
- MAP7359 - Topics in Partial Differential Equations
- MAP6218 - Stochastic Calculus
- MAP5467 - Stochastic Differential Equations and Applications

Thesis Research Courses

Complete ALL of the following Courses:

- MAT7908 - Independent Study
- MAT7917 - Graduate Research Seminar in Mathematics
- MAT7980 - Dissertation Research

Graduation Requirements

(1) Completing a total of 75 credit hours of course

(2) A grade of ‘B’ or higher in all required core courses and a cumulative average of 3.0 or higher in the 75 credits of coursework.

(3) Successful completion of the written portion of the Qualifying Exam. This examination is designed primarily to make sure the student has suitable background knowledge to conduct research in his/her chosen area. The student must pass the written Qualifying Exam by the end of the fifth semester (excluding summers) in the program. Two attempts are permitted. Any exception needs to be approved by the Graduate Committee. The student chooses any two of the

following six areas of the exams: (1) Analysis (including both real analysis and complex analysis); (2) Differential Equations (including both Ordinary Differential Equations and Partial Differential Equations); (3) Numerical Analysis; (4) Mathematical Statistics; (5) Algebra (Graduate Algebra and Applied Linear Algebra); (6) Geometry/Topology (Introduction to Algebraic Topology and Differential Geometry).

(4) Choosing advisor(s). The student will choose a faculty from the Department of Mathematics and Statistics as their dissertation advisor. A co-advisor could be selected from within the department or from outside.

(5) Successful completion of the oral portion of the Qualifying Exam. The student will present and defend an oral examination. The purpose of this exam is to verify that the candidate has chosen a suitable topic for dissertation research and to evaluate the candidate's ability to conduct such research. The student will normally take the oral examination after completion of the core requirements and the written portion of the Qualifying Exam. The oral examination will be conducted by a panel of math faculty including the student's advisor(s). During the oral examination, the candidate presents his/her accomplished and proposed research and answers questions from the panel and others in the audience.

(6) Upon completion of the required core courses and passing both portions of the Qualifying Exam, the student can advance to Candidacy.

Dissertation Requirements

(1) The student will assemble a Dissertation Committee of at least four faculty members [including advisor(s)], three of whom will be from the Department of Mathematics and Statistics.

(2) Submission and defense of a dissertation based upon original research in mathematical science. A dissertation is required of all candidates for the PhD degree and must conform to the format outlined in the Regulations for Thesis and Dissertation Preparation Manual available to students online from the FIU Graduate School.

(3) After submission of the dissertation and completion of all other required work for the PhD degree, the candidate will be given a final oral thesis defense examination by the Dissertation Committee. Successful completion of all of these steps will culminate in the granting of the PhD degree.

Major Requirements

Students can complete the PhD in Mathematical Sciences as described under program requirements or they may choose the Statistics Major.

This Major provides advanced training in statistical theory and translational methods to make optimal decisions based on real-world data in diverse scientific and engineering areas. Research/study on statistics allows graduates to better understand data, measure uncertainty, and calculate risk in depth.

Statistics Major

Type

Completion Requirement

Required Courses: 24 credits

The Doctor in Mathematical Sciences (Statistics) degree consists of the 8 core courses, a minimum of 15 credit hours must be of Ph.D. dissertation course, at least 4 courses (for a subtotal of at least 12 credits) from the thesis preparatory courses list. The remaining 24 credits of the required 75 may be filled by courses from:

1. Any courses from the thesis preparatory courses which are not counted as the four courses above, or thesis research courses, or other 6XXX/7XXX courses from the departmental catalog.

2. Courses of level 5000 or higher from Biostatistics, Computer Science, Mathematics, Physics, Economics, or Engineering approved by the Graduate Committee.

Complete ALL of the following Courses:

- MAS5145 - Applied Linear Algebra
- MAP5255 - Mathematical Scientific Computation
- STA6326 - Mathematical Statistics I
- STA6327 - Mathematical Statistics II
- STA5206 - Design Of Exper I
- STA6244 - Data Analysis I
- STA6247 - Data Analysis II
- STA6246 - Linear Models

Dissertation Requirment: 15 credits

Complete ALL of the following Courses:

- STA7980 - PhD Dissertation

Thesis Prepatory Courses: 12 credits

Complete at least 4 of the following courses:

- STA5236 - Regression Analysis
- STA5507 - Nonparametric Methods
- STA5676 - Reliability Engineering (Inactive)
- STA5447 - Probability Thry II (Inactive)
- STA5676 - Reliability Engineering (Inactive)
- STA6176 - Biostatistics
- STA6636 - High Dimension Data Analysis
- STA6746 - Multivariate Statistical Analysis
- STA6870 - Time Series Analysis
- STA6930 - Special Topics
- MAP6472 - Probability and Stochastic Processes
- MAP5114 - Basic Math for Machine Learning
- MAP5236 - Mathematical Techniques of Operations Research

Graduation Requirements

1. Completing a total of 75 credit hours of course.

2. A grade of ‘B’ or higher in all required statistics core courses and a cumulative average of 3.0 or higher in the 75 credits of coursework.

3. Successful completion of the written portion of the Qualifying Exam. This examination is designed primarily to make sure the student has suitable background knowledge to conduct research in his/her chosen area. The student must pass the written Qualifying Exam by the end of the fifth semester (excluding summers) in the program. Two attempts are permitted. Any exception needs to be approved by the Graduate Committee.

The following two areas of the exams will be taken: (1) Mathematical Statistics I & II, (2) Applied Statistics (including Data Analysis I and II, Design of Experiments and Linear Models)

4. Choosing advisor(s). The student will choose a faculty from the Department of Mathematics and Statistics as their dissertation advisor. A co-advisor could be selected from within the department or from outside.

5. Successful completion of the oral portion of the Qualifying Exam. The student will present and defend an oral examination. The purpose of this exam is to verify that the candidate has chosen a suitable topic for dissertation research and to evaluate the candidate's ability to conduct such research. The student will normally take the oral examination after completion of the core requirements and the written portion of the Qualifying Exam. The oral examination will be conducted by a panel of Statistics faculty including the student’s advisor(s). During the oral examination, the candidate presents his/her accomplished and proposed research and answers questions from the panel and others in the audience.

6. Upon completion of the required core courses and passing both portions of the Qualifying Exam, the student can advance to Candidacy.

Dissertation Requirements

1. The student will assemble a Dissertation Committee of at least five faculty members [including advisor(s)], with a minimum of 3 from the department of mathematics and statistics and a minimum of one from another department.

2. Submission and defense of a dissertation based upon original research in mathematical science (specialty in statistics). A dissertation is required for all candidates for the PhD degree and must conform to the format outlined in the Regulations for Thesis and Dissertation Preparation Manual available to students online from the FIU Graduate School.

3. After submission of the dissertation and completion of all other required work for the PhD degree, the candidate will be given a final oral thesis defense examination by the Dissertation Committee. Successful completion of all of these steps will culminate in the granting of the PhD degree.

Track, Specialization, Concentration, Area of Emphasis, or Other Curricular Offering Requirements

There are no tracks, specializations, concentrations, areas of emphasis, or other curricular offerings associated with this program.

APNP:MSN - Master of Science in Nursing - Psychiatric Mental Health Nurse Practitioner Program

Overview

Degree Offered
MSN - Master of Science in Nursing

Program Title
Psychiatric-Mental Health Nurse Practitioner

The Master of Science in Nursing (MSN) degree in Psychiatric Mental Health Nurse Practitioner program equips students with the skills and knowledge necessary for assessing, diagnosing, and treating individuals with mental health disorders across the lifespan. Graduates are trained to provide comprehensive psychiatric care, including psychotherapy and medication management, in various settings (e.g., hospitals, community mental health centers, private practices, telehealth services). The program emphasizes evidence-based practice, interprofessional collaboration, and culturally appropriate care to improve mental health outcomes for diverse populations.

Upon successfully completing the program, graduates will be equipped to practice independently or collaboratively as psychiatric-mental health nurse practitioners in diverse healthcare settings, effectively meeting the needs of a broad range of patient populations.

Graduates will be eligible to take the Psychiatric Mental Health Nurse Practitioner National Certification Exam.

For more information, visit the Nicole Wertheim College of Nursing and Health Sciences website.

Requirements

Simple Requirements

Admissions Requirements

Admissions Requirements for the Post-BSN-to-DNP Psychiatric-Mental Health Nurse Practitioner-MSN/DNP

(1) Successful completion of all the admission requirements for graduate education at Florida International University and the Nicole Wertheim College of Nursing and Health Sciences.

(2) Cumulative undergraduate GPA of 3.0 or greater on a 4.0 scale (CUM GPA is a calculation inclusive of all academic coursework including courses at the community college level.)

(3) UG 60 GPA of 3.0 or greater in Bachelor of Nursing upper division coursework.

(4) Current State of Florida RN license. Out-of-state students must obtain a license to practice in Florida prior to admission.

(5) Baccalaureate degree in Nursing (BSN) from a program accredited by the Commission on Collegiate Nursing Education (CCNE) or by the Accreditation Commission for Education in Nursing (ACEN) formerly known as the National League for Nursing Accrediting Commission (NLNAC). Applicants from Programs without such accreditation will be considered on an individual basis.

(6) Completion of all admission paperwork including the NursingCAS application, a written essay, Recommendations, and Curriculum Vitae

(7) Essay (500 words) addressing desired focus and areas of interest for practice in the Post-BSN-to-DNP program.

(8) Three (3) professional recommendations describing ability to be successful in a MSN-DNP program.

(9) Curriculum Vitae.

(10) Successful personal Interview with the Graduate Admissions Committee.

In order to advance to the DNP Scholarly Project course series component of this track, students must meet the following requirements upon conferral of MSN degree:

(1) Maintain good academic standing as defined in the FIU Student Handbook

(2) Current licensure with no restrictions as an APRN in your state of residence;

(3) Proof of Advanced Practice Specialty National Board Certification in the specialty of conferred MSN (i.e., AGNP, FNP, PNP, PMHNP)

Program Requirements

Program Policies

Nursing students are responsible for transportation expenses related to clinical experiences. They are required to carry health and accident insurance. To safeguard the health of clients, nursing students are required to submit proof of immunizations upon entry to into the nursing program. Students must submit proof of basic cardiopulmonary resuscitation (CPR) certification (American Heart Association) prior to entering clinical courses in the nursing major. This CPR certification must cover the period of enrollment in the degree program.

The College reserves the right to terminate a student from the nursing program for reasons related to the inability to safely carry out professional responsibilities.

Progression in the Program

The student must maintain a cumulative GPA of 3.0 in required graduate courses with a minimum of a "B" (85%) or better in all required courses.

If a student earns less than an 85 in any course, the course must be repeated and earn a grade of “85” or better. If this course is a pre[1]requisite for another course, the student will not be allowed to continue enrollment for that course and may be allowed to enroll in other courses if applicable to the program. Only one course repeat in the program will be allowed. Therefore, a student who earns a grade below an 85 in more than one course will be dismissed from the program.

Students may not have a cumulative GPA below 3.0 in the courses for more than two semesters. If the cumulative GPA for required coursework is below 3.0 for a third semester, the student will be dismissed from the program.

Academic Standing

Good Standing: To achieve and maintain a classification of good standing, the student must maintain a minimum G.P.A. of 3.0 in the courses required for the MSN and DNP degrees.

MSN Level Course Requirements

Type

Completion Requirement

Graduate Nursing Core: 9 credits

Complete ALL of the following Courses:

- NGR5110 - Theories in Nursing
- NGR5131 - Culture and Advanced Nursing Practice
- NGR5810 - Research Methods in Nursing

Advanced Practice Nursing Core: 15 credits

Complete ALL of the following Courses:

- NGR6002C - Advanced Health Assessment
- NGR5141 - Pathophysiologic Basis of Advanced Nursing Practice
- NGR6172 - Pharmacology and Pharmacotherapeutics in Advanced Nursing Practice
- NGR6743 - Advanced Practice Nursing Clinical Education Seminar
- NGR6703 - Role Development of the Advanced Practice Nurse
- NGR6744 - Professional Advanced Practice Seminar

Advanced Psychiatric-Mental Health Nursing Specialty Credits Hours: 23

Complete ALL of the following Courses:

- NGR6503 - Advanced Psychiatric-Mental Health Nursing I
- NGR6503L - Advanced Psychiatric-Mental Health Nursing Practicum I
- NGR6504C - Advanced Psychiatric-Mental Health Nursing II
- NGR6504L - Advanced Psychiatric-Mental Health Nursing Practice II

Graduation Requirements

(1) Successful completion of a minimum of 47 semester credits of graduate work beyond the baccalaureate, including 770 direct patient care clinical hours.

(2) Achievement of an overall cumulative GPA of 3.0 or above. See Graduate Catalog in University Graduate School Rules and Regulations for information on Academic Warning, Probation, and Dismissal.

(3) Removal of all conditions, deficiencies, and incomplete grades. Credit hours for courses in which the grade is “B-“ or below will not count toward satisfying graduate degree requirements.

Major Requirements

There are no majors associated with this program.

APSSR:CFI - Undergraduate Certificate in Applied Social Science Research Methods

Overview

Degree Offered
ACRT - Academic Certificate

Program Title
Undergraduate Certificate in Applied Social Science Research Methods

Applied social research skills—surveys, media analysis, digital mapping, data management and analysis, and more—are increasingly vital to career options as well for graduate and professional training in diverse fields. Non-profits, social service, government, education, healthcare, environment, disaster management, law, and business: these and other fields revolve around diverse kinds of data collection, analysis, and application. This undergraduate certificate provides students with a strong and balanced foundation upon which to pursue these opportunities.

ARC:MA - Master of Arts in Design

Overview

Degree Offered
MA - Master of Arts

Program Title
Design

The Master of Arts (MA) in Design is a post-professional degree program that enables students to pursue advanced studies in design. This degree offers a unique opportunity for qualified students to study industrial and product design with advanced technologies including: additive and subtractive manufacturing, robotics, fabrication, sensor technologies and Internet of things (IoT), Augmented Reality (AR), and Virtual Reality (VR), as well as other applied technologies.

For more information, visit the College of Communication, Architecture, and the Arts website.

Requirements

Simple Requirements

Admissions Requirements

The following is in addition to the University's graduate admission requirements:

(1) Applicants seeking admission to the program must have either an accredited Professional BArch degree with a 3.0 GPA or an accredited Professional March degree.

(2) Applicants seeking admission to the program must have either an accredited Professional BArch degree with a 3.0 GPA based on the last 60 hours of undergraduate study or an accredited Professional March degree.

(3) Applicants must submit a portfolio of creative work for review. The portfolio review examines evidence of creative ability, academic success, and professional achievement.

(4) Applicants must submit three letters of recommendation.

(5) Applicants must submit a Statement of Intent clearly indicating which area of specialization they intend to pursue and why. The statement should include the applicant's qualifications for research and a brief outline of their intent and goal. The statement should demonstrate the applicant's intellectual merit and motivation for pursuing advanced study. Applicants will be evaluated on strength of their statement, personal achievement, and their commitment to making a meaningful contribution to the field through their research.

(6) Applicants must submit a writing sample that demonstrates the candidates' written communication skills. The sample should be illustrative of their writing and does not have to be related to the proposed area of specialization.

Program Requirements

Ownership of Student Work

Student work, submitted to the Department in satisfaction of course or degree requirements, becomes the physical property of the Department. However, students retain all rights to the intellectual property of such work. This work may include papers, drawings, models, and other materials. The Department assumes no responsibility for safeguarding such materials. At its discretion, the Department may retain, return, or discard such materials. The Department will not normally discard the materials of currently enrolled students without giving the student a chance to reclaim them.

Degree Program Credit Hours: 36

Type

Completion Requirement

Course Requirements

Fulfill ALL of the following requirements:

First Year (Fall Semester)

Complete ALL of the following Courses:

- ARC5340 - Architectural Design 7
- ARC5935 - Special Topics
- ARC6906 - Independent Study
- ARC5176C - Computer Practices in Design II

AND

First Year (Spring Semester)

Complete ALL of the following Courses:

- ARC5343 - Architectural Design 8
- ARC6906 - Independent Study
- ARC6184 - Advances Studies in Technology
- ARC6229 - Theories of the Digital

**ARC6184 ADV Studies in tech and ARC6229 Theories of the Digital: Online*

AND

Second Year (Fall Semester)

Complete ALL of the following Courses:

- ARC6948 - MADES Capstone

Study Abroad programs may be included in this degree in consultation with the student's primary advisor.

Graduation Requirements

The degree will be conferred when the following conditions are met:

(1) Recommendation of the Primary Advisor and faculty of the Department.

(2) Certification provided by the Department Chair, College Dean, and University Graduate School that all degree requirements have been met.

(3) Completed undergraduate course deficiencies if specified at admission with no grades below a “C” and a GPA ≥ 3.0.

(4) No grade below a “C” will be accepted for graduation in required course or professional electives.

(5) Completed MADES Capstone course.

Major Requirements

There are no majors associated with this program.

Track, Specialization, Concentration, Area of Emphasis, or Other Curricular Offering Requirements

There are no tracks, specializations, concentrations, areas of emphasis, or other curricular offerings associated with this program.

ARC:MARCH - Master of Architecture

Overview

Degree Offered
MARCH - Master of Architecture

Program Title
Architecture

The Master of Architecture (MArch) is a professional, STEM-designated degree accredited by the National Architectural Accrediting Board (NAAB). Based on an applicant's baccalaureate degree field of study, the MArch can be earned via a 2-year or 3-year pathway. It prepares students for professional practice in architecture through six focus areas: architectural design; history/theory; building technologies; digital technologies; ethics and professional business practice; and general education. A laboratory for the study of architecture and urbanism in the context of rapid growth, Miami provides opportunities to explore environmental challenges, historic structures, and contemporary works by the world's leading practices. The program takes advantage of Miami's geographic location as one of the principal academic and economic gateways to the Global South and Europe.

The Department of Architecture also offers an Accelerated Master of Architecture for undergraduate students to complete the MArch in a 5-year or 6-year accelerated format. Information on that alternative can be found as the Accelerated Master of Architecture on the catalog program list. For more information, visit the College of Communication, Architecture, and the Arts website.

Requirements

Simple Requirements

Admissions Requirements

Admissions Requirements for all Professional Graduate Degree Paths in the Department of Architecture

All applicants must meet University graduate admissions requirements. Applicants to the Department of Architecture degree programs must also submit a portfolio of creative work for review.

The portfolio review examines evidence of creative ability, academic success, and professional achievement. It is an important component of the admissions process. Please contact the Department of Architecture for specific portfolio requirements. The deadline for portfolio submission is January 15th of each year. Portfolios submitted after this date will be considered if studio space is available.

Students who have successfully completed the portfolio review process must also meet the minimum requirements of an undergraduate degree from an accredited college or university with undergraduate grade point average (GPA) of 3.0 on a 4.0 scale, or hold a graduate degree from an accredited institution or have completed the entirety of the pre-graduate component of the Department's Accelerated Master of Architecture degree to be fully admitted in the graduate program.

Additional Information for Applicants

Applicants to the school should plan for the financial aspects of a design education. These include the cost associated with required access to a laptop computer as well as the costs of software, travel and field trips, tools and equipment, and modeling supplies. Students in the program must have access to a laptop computer through purchase, lease or other arrangements. For further information contact the Department.

Program Requirements

NAAB Statement

“In the United States, most registration boards require a degree from an accredited professional degree program as a prerequisite for licensure. The National Architectural Accrediting Board (NAAB), which is the sole agency authorized to accredit professional degree programs in architecture offered by institutions with U.S. regional accreditation, recognizes three types of degrees: the Bachelor of Architecture, the Master of Architecture, and the Doctor of Architecture. A program may be granted an eight-year term, an eight-year term with conditions, or a three-year term of initial accreditation, depending on the extent of its conformance with established education standards.

Doctor of Architecture and Master of Architecture degree programs may require a non-accredited undergraduate degree in architecture for admission. However, the non-accredited degree is not, by itself, recognized as an accredited degree.”

M. Arch. (high school degree + 174 credits)
M. Arch. (pre-professional degree + 60 credits)
M. Arch. (non-pre-professional degree + 105 credits)

Next accreditation visit: 2026

Ownership of Student Work

Student work, submitted to the Department in satisfaction of course or degree requirements, becomes the physical property of the Department. However, students retain all rights to the intellectual property of such work. This work may include papers, drawings, models, and other materials. The Department assumes no responsibility for safeguarding such materials. At its discretion, the Department may retain, return, or discard such materials. The Department will not normally discard the materials of currently enrolled students without giving the student a chance to reclaim them.

Academic Travel

The Architecture Department values academic travel both nationally and abroad. Immersion in other cities and cultures provides our students with critical experiences that enhance learning. The firsthand interaction with exemplary completed buildings and sites, as well as those under construction, enrich learning throughout the curriculum. It is a requirement of the academic program in Architecture that each student participate in at least one of the department's travel options before graduation. The department offers three options for travel: 1-Residence abroad for a full semester through our Genoa, Italy, program; 2- International travel through one of the many study abroad programs offered each summer; and 3- Domestic travel outside Miami as part of a design studio. Students must hold a 3.0 or higher cumulative graduate GPA to participate in Study Abroad programs.

Academic Progression Requirements

(1) No grade below a ‘C’ will be accepted for graduation in required courses or professional electives.

(2) Student must achieve an overall cumulative graduate GPA of 3.0 in order to apply for to graduation. Refer to Graduate Academic Standing on Academic Warning, Probation, and Dismissal.

Master's Project/Thesis Requirement

Graduate students in all masters degree programs are required to undertake a master's project or a master's thesis as part of their course of study in the Department of Architecture.

Major Requirements

There are no majors associated with this program.

Track, Specialization, Concentration, Area of Emphasis, or Other Curricular Offering Requirements

Three-Year Path

A professional degree for students with a Bachelor of Arts or a Bachelor of Science, or equivalent, from an accredited institution.

Three-Year Path Prerequisites

Type
Prerequisite

Prerequisites: 11 Credits

Complete ALL of the following Courses:

- PHY2053 - Physics without Calculus I
- MAC1147 - Pre-Calculus Algebra and Trigonometry
- ARC4058 - Fundamentals of Digital Design

Three-Year Path Credit Hours: 105

Type
Completion Requirement

Required Courses

Fulfill ALL of the following requirements:

First Year (Fall Semester): 15 Credits

Complete ALL of the following Courses:

- ARC5075 - Formative Studio
- ARC5711 - History of Design Antiquity to Middle Ages
- ARC5249 - Introduction to Design Theories
- ARC5612 - Environmental Systems in Architecture 1

AND

First Year (Spring Semester): 18 Credits

Complete ALL of the following Courses:

- ARC5076 - Formative Studio 2
- ARC5733 - History of Design Renaissance to XIX Century
- ARC5582 - Structures 1
- ARC5582L - Structures 1 Lab
- ARC5467 - Materials and Methods of Construction
- SPC5066 - Presentation Skills for Architects

AND

First Year (Summer Semester): 15 Credits

Complete ALL of the following Courses:

- ARC5077 - Formative Studio 3
- ARC5554 - Structures 2
- ARC5554L - Structures 2 Lab
- ARC5176C - Computer Practices in Design II

ARC Directed Elective (3 credits)

AND

Second Year (Fall Semester): 15 Credits

Complete ALL of the following Courses:

- ARC5361 - Integrated Comprehensive Design
- ARC5205 - Advanced Design Theories
- ARC5483 - Integrated Building Systems
- ARC5744 - History of Design from the XIX Century to Present
- ARC5744L - History of Design from the XIX Century to Present Lab

AND

Second Year (Spring Semester): 12 Credits

Complete ALL of the following Courses:

- ARC5362 - Architectural Design 9: Sustainable Practices
- ARC5555 - Structures 3
- ARC5555L - Structures 3 Lab
- ARC5621 - Environmental Systems in Architecture 2

Complete ALL of the following Courses:

- ARC6970 - Master's Project
- ARC6280 - Professional Office Practice
- ARC6949 - Architect Registration Exam Preparation

ARC Directed Elective (3 credits)

Two-Year Path

A professional track for students who have completed a 4-year pre-professional Bachelor of Arts in Architecture or Bachelor of Architectural Studies degree.

Two-Year Path Credit Hours: 60

Type

Completion Requirement

Required Courses

Fulfill ALL of the following requirements:

First Year (Fall Semester): 15 Credits

Complete ALL of the following Courses:

- ARC5361 - Integrated Comprehensive Design
- ARC5205 - Advanced Design Theories
- ARC5483 - Integrated Building Systems
- ARC5554 - Structures 2
- ARC5554L - Structures 2 Lab

**ARC5554 Structures 2 and ARC5554L Structures 2 Lab: May be replaced with ARC elective if the content of these courses has been satisfied in the pre-professional degree program. A minimum of one of these 3 credit classes is to be satisfied in the pre-professional degree program.*

AND

First Year (Spring Semester): 15 Credits

Complete ALL of the following Courses:

- ARC5362 - Architectural Design 9: Sustainable Practices
- ARC5555 - Structures 3
- ARC5555L - Structures 3 Lab
- ARC5621 - Environmental Systems in Architecture 2
- SPC5066 - Presentation Skills for Architects

**ARC5555 Structures 3, ARC5555L Structures 3 Lab, and ARC5621 Envir Systems in Arch 2: May be replaced with ARC elective if the content of these courses has been satisfied in the pre-professional degree program. A minimum of one of these 3 credit classes is to be satisfied in the pre-professional degree program.*

AND

First Year (Summer Semester): 3 Credits

Complete ALL of the following Courses:

- ARC5176C - Computer Practices in Design II

AND

Second Year (Fall Semester) (Miami or Genoa Italy): 12 Credits

Complete ALL of the following Courses:

- ARC6356 - Architectural Design 10
- ARC5744 - History of Design from the XIX Century to Present
- ARC5744L - History of Design from the XIX Century to Present Lab

ARC Directed Elective (3 credits)

**ARC5744 Des Hist XIX to XXI and ARC5744L Des Hist XIX to XXI Lab: May be replaced with ARC elective if the content of these courses has been satisfied in the pre-professional degree program. A minimum of one of these 3 credit classes is to be satisfied in the pre-professional degree program.*

AND

Second Year (Spring Semester): 15 Credits

Complete ALL of the following Courses:

- ARC6970 - Master's Project
- ARC6280 - Professional Office Practice
- ARC6949 - Architect Registration Exam Preparation

ARC Directed Elective (3 credits)

ARCX:MARCH - Accelerated Master of Architecture

Overview

Degree Offered
MARCH - Master of Architecture

Program Title
Architecture

The accelerated Master of Architecture program provides a seamless course of study leading from undergraduate freshman year to the conferral of the Professional Master of Architecture degree (M. Arch). The Accelerated M. Arch is comprised of 174 credit hours of integrated pre-graduate and graduate coursework. The degree consists of 72 credit hours of pre-graduate coursework which is taken over two years and is followed by 102 credit hours of graduate coursework which can be completed in either three or four years. Students in the accelerated M. Arch program are awarded the professional Master's degree without first having to earn an undergraduate degree. As such, no Bachelor's degree is awarded.

Admissions Requirements

Admissions Requirements

Application Deadline: January 15

The department admits students once a year to begin their coursework in the fall semester; therefore, it is recommended that interested applicants meet with a member of the college's Student Services and Advising Center during the Fall semester prior to the application deadline. Admission to the department is competitive and is not guaranteed. Admission will be offered based on space availability to those applicants judged by the Department Faculty Committee to have the greatest potential for successful completion of the program.

The department offers professional degrees in Architecture. The curriculum is composed of two years of foundational, undergraduate coursework followed by three (or four) years of focused graduate course work leading to the professional accredited Master of Architecture (M. Arch). The department does not award the pre-professional bachelor's degree.

Undergraduate students may apply for admission into the first year or the third year of the program. Students of the program are considered undergraduate students until they have accumulated 120 credit hours; therefore, freshman and transfer applicants must apply to both FIU's Undergraduate Admissions Office and to the department. Students accepted for admission in the first year or the third year of the department's program, and who are in good academic standing with a cumulative 3.0 GPA at completion of 120 credit hours, are automatically converted to graduate student status.

First-Year Admission Requirements

Applicants must meet the University's admission requirements and submit a design portfolio – please refer to the Design Portfolio Requirements section.

Third-Year Transfer Student Admission Requirements

Applicants for third year admission must meet the University's admission requirements and submit a design portfolio – please refer to the Design Portfolio Requirements section. Students who have completed an AA in architectural studies must meet the following requirements: minimum cumulative GPA of 3.0; completed design studio courses 1 through 4 with a grade of 'C' or better; and be judged by the Faculty Admissions Committee to have passed a competitive portfolio review. Only grades of 'C' or higher (2.0 on a 4.0 grading scale) are accepted for transfer of applicable prerequisite and core courses from other institutions.

Transfer Students: University policy allows the transfer of 60 lower-division credits. Additional upper-division transfer credits may be accepted. For most transfer students it will be necessary to take a certain number of undergraduate credits at FIU in order to achieve the minimum required to satisfy the degree requirements.

Third-Year Native Student Admission Requirements

FIU undergraduate students who wish to change their major to architecture should check program requirements and be advised by the college's undergraduate advisors well in advance of application for admission.

Design Portfolio Requirements

As part of each department's admission review process, all students are required to submit a design portfolio demonstrating the candidate's creative abilities as well as their level of design. The design portfolio is evaluated based on a candidate's demonstrated sense of composition, attention to detail, graphic communication skills, expressive quality, and sense of space, accuracy, and observation. The design portfolio should be formatted on 8.5'' x 11" sheets, bound or carefully packaged, with a maximum thickness of 3". Applicants may also include 11' x 17" sheets provided they are folded to 8.5" x 11". Design portfolios may include two-dimensional storyboards (a sequence of still images that show a story), computer printouts, and photographs of small three-dimensional models/projects. The design portfolio cannot contain slides, videos, computer discs, or other formats that require electric power to view.

First-Year Design Portfolio Requirements

All candidates' design portfolios must include a one-page (maximum) statement outlining your intentions, aspirations, and purpose in pursuing a professional degree. In addition, all candidates' design portfolios require three freehand drawings based on accurate observations: (1) a drawing of a stair or stairs, (2) a drawing of a bicycle or bicycles or a part of a bicycle or bicycles, and (3) a drawing of your own choice. These drawings may be in ink, pencil or charcoal. In addition to the three required freehand drawings, the first year design portfolio may contain reproductions of a two-or-three dimensional work.

Third-Year Transfer Portfolio Requirements

All candidates' design portfolios must include a one-page (maximum) statement outlining your intentions, aspirations, and purpose in pursuing a professional degree. The design portfolio should include no more than 10 examples of your design work executed within the past two years. Examples include, but are not limited to, studies of buildings that demonstrate your analytical ability. Recent art and/or design projects that an applicant completed in collaboration with others are acceptable as long as the example contains an explanation of the applicant's role in the process. Portfolios should not contain samples of architectural or interior design construction documents either by hand or by computer.

Additional Information for Applicants

Applicants to the Department should plan for the financial aspects of a design education. This includes the costs associated with required access to a laptop computer, as well as the cost of software, travel and field trips, tools and equipment, and modeling supplies. Students in the program must have access to a laptop computer through purchase, lease or other arrangements. Students in the Department of Architecture are encouraged to participate in the Department's study abroad semester during the fourth year. For further information, contact the Department.

Program Requirements

Student Work

Student work submitted to the Department in satisfaction of course or degree requirements becomes the physical property of the Department. However, students retain all rights to the intellectual property of such work. This work may include papers, drawings, models, and other materials. The Department assumes no responsibility for safeguarding such materials. At its discretion, the Department may retain, return, or discard such materials. The Department will not normally discard the materials of current students without giving them a chance to reclaim them.

Students must petition the Department in writing for any deviation from the established policies.

Academic Standards and Policies

(1) Progression Requirements: At the conclusion of 72 credit hours of pre-graduate architecture program coursework, students with of an overall cumulative GPA of 3.0 or above move directly to graduate coursework.

(2) All students must maintain a minimum cumulative GPA of 2.75 in all undergraduate ARC courses. Students who fail to meet this minimum GPA requirement are subject to an internal academic review and may be delayed in their progression to graduate coursework.

(3) No grade below a 'C' will be accepted for graduation in required courses or professional electives.

(4) Students must maintain a minimum cumulative 3.0 or higher GPA in graduate level coursework (5000 level or higher).

(5) After three semesters or 30 credits of graduate coursework, students who fail to maintain a minimum cumulative 3.00 GPA are subject to an internal academic review, which may result in dismissal from the program.

Undergraduate to Graduate Standing

Students will be evaluated for matriculation to graduate status based upon their graduate GPA at the end of the spring semester of their 4th year (provided they have earned a minimum of 120 total credits). The criteria listed below must be satisfied:

(1) 5 Year Path and Transfer students must have completed ARC5362 Arch Design 9: Sust Prac.

(2) 6 Year Path students must have completed ARC5343 Arch Design 8.

(3) A minimum of 120 earned credits (counting no more than 60 lower-division transfer credits),

(4) 3.0 or higher GPA in graduate level coursework (5000 level or higher), and

(5) Completion of undergraduate coursework.

If student does not meet the criteria above to transition to graduate status, the student will be subject to Departmental review for continuation in the program.

Master’s Project/Thesis Requirement

Graduate students in all master’s degree programs are required to undertake a master’s project or a master's thesis as part of their course of study in the Department of Architecture.

Academic Travel

The Architecture Department values academic travel both nationally and abroad. Immersion in other cities and cultures provides our students with critical experiences that enhance learning. The firsthand interaction with exemplary completed buildings and sites, as well as those under construction, enrich learning throughout the curriculum. It is a requirement of the academic program in Architecture that each student participate in at least one of the department's travel options before graduation. The department offers three options for travel: 1-Residence abroad for a full semester through our Genoa, Italy, program; 2- International travel through one of the many study abroad programs offered each summer; and 3- Domestic travel outside Miami as part of a design studio. Students must hold a 3.0 or higher cumulative graduate GPA to participate in Study abroad programs.

NAAB Statement

“In the United States, most registration boards require a degree from an accredited professional degree program as a prerequisite for licensure. The National Architectural Accrediting Board (NAAB), which is the sole agency authorized to accredit professional degree programs in architecture offered by institutions with U.S. regional accreditation, recognizes three types of degrees: the Bachelor of Architecture, the Master of Architecture, and the Doctor of Architecture. A program may be granted an eight-year term, an eight-year term with conditions, or a three-year term of initial accreditation, depending on the extent of its conformance with established education standards.

Doctor of Architecture and Master of Architecture degree programs may require a non-accredited undergraduate degree in architecture for admission. However, the non-accredited degree is not, by itself, recognized as an accredited degree.”

M. Arch. (high school degree + 174 credits)

M. Arch. (pre-professional degree + 60 credits)

M. Arch. (non-pre-professional degree + 105 credits)

ART:BA - Bachelor of Arts in Art

Overview

Degree Offered
BA - Bachelor of Arts

Program Title
Art

The Bachelor of Arts (BA) in Art program equips students with foundational skills for careers in the arts and creative industries. Through a range of hands-on studio art experiences, students develop technical, formal, and conceptual abilities, complemented by courses in professional practices. The program offers flexibility, allowing students to focus on a non-art discipline or complete pre-professional requirements in other fields, which prepares them for graduate study in both art-related and non-art areas such as art therapy, law, business, and counseling. Graduates leave with a versatile skill set that supports a wide range of career paths.

For more information, visit the College of Communication, Architecture, and the Arts website.

ART:BFA - Bachelor of Fine Arts in Art

Overview

Degree Offered
BFA - Bachelor of Fine Arts

Program Title
Art

The Bachelor of Fine Arts (BFA) in Art is a professional degree program designed for dedicated and ambitious artists seeking to refine their unique voice, expand creative concepts, and push the boundaries of artistic expression. This rigorous program emphasizes dedication, visionary thinking, experimentation, and personal growth, providing an ideal foundation for those pursuing professional careers as artists.

For more information, visit the College of Communication, Architecture, and the Arts website.

Admissions Requirements

Specialized Admissions Requirements for the Bachelor of Fine Arts (BFA) in Art

All applicants must meet University minimum admission requirements. Candidates for the BFA in Art will be required to submit electronically a portfolio of their works with a short statement. A departmental committee will review the portfolios. The focus of the review will be on quality work, technical ability, and consistency. Currently, the CARTA departments utilize the SlideRoom service for the portfolio submissions. See the Art and Art History Department website for further information.

Admissions Requirements for the Combined BFA in Art to Master of Science (MS) in Art Education Accelerated Degree Pathway

(1) Current enrollment in the BFA in Art

(2) Completed a minimum of 75 undergraduate credits

(3) Current GPA of 3.2 or higher

(4) Portfolio review and interview

(5) Complete the separate Accelerated Bachelors/Master's degree application, including signed approval by the director, coordinator or designee of the graduate program.

Program Requirements

Academic Progression Requirements

Students must complete ART1201C DIMENSIONS: Surface, ART1203C DIMENSIONS: Space, ART2300C DIMENSIONS: Perception with a minimum GPA of 3.0, prior to the completion of 60 credit hours.

Students must also successfully complete ART2608C DIMENSIONS: Time, ART3820 Research + Development, and ART3822 Creative Practice, with a minimum GPA of 3.0 or higher.

Students who do not meet these academic requirements may be redirected to the BA in ART degree.

Due to the sequential, cohort-based structure of the BFA Fine Art curricula, students are expected to follow the prescribed course progression and complete the degree within the established timeframe. This includes timely enrollment in the following required courses: ART3820 Research + Development, ART3822 Creative Practice, ART4952C Thesis 01, and ART4953C Thesis 02, in accordance with the BFA degree plan. Failure to enroll in these courses as scheduled, or to maintain progress toward timely graduation, may result in removal from the BFA program and redirection to the BA in Art.

ARTED:BS - Bachelor of Science in Art Education

Overview

Degree Offered
BS - Bachelor of Science

Program Title
Art Education

The Bachelor of Science (BS) in Art Education is a professional degree program designed to train artists to teach art, art history, aesthetics, and criticism in K-12 school or studio settings. The program emphasizes the blending of research and theory with rigorous studio experience, and considers the urban, multicultural nature of the university community, and national trends within the discipline. The program involves extensive fieldwork with supervision and seminars. Students are encouraged to pursue specialized interests and needs. The program utilizes a competency-based and field-centered training model and leads to eligibility for the Florida Teaching Certificate in grades K-12. The program meets the National Visual Arts Standards and the Florida Next Generation Sunshine State Standards. It is accredited by the Council for the Accreditation of Educator Preparation (CAEP) and by the National Association of Schools of Art and Design (NASAD). For more information, visit the College of Communication, Architecture, and the Arts website.

Major Requirements

BS **in Art Education: Grades K-12 Major**

The BS in Art Education: Grades K-12 major is a professional degree program designed to train artists to teach art/art history, aesthetics and criticism in a school or studio settings. The program emphasizes the blending of research and theory with rigorous studio experience, and considers the urban, multicultural nature of the university community, as well as more general national trends within the discipline. The program involves extensive fieldwork with supervision and seminars. All students are encouraged to pursue specialized interests and needs. This degree program utilizes a competency-based and field-centered training model and leads to eligibility for the Florida Teaching Certificate in grades K-12.

This program is fully accredited by the Council for the accreditation of Educator Preparation (CAEP) and by the National Association of Schools of Art and Design (NASAD).

Academic Progression Requirements

To progress into upper-division BS in Art Education: Grades K-12 courses, students must complete the four lower division foundation courses (12 credits) with a minimum GPA of 2.50 or greater in two attempts or fewer. These courses include ART1201C DIMENSIONS: Surface, ART1203C DIMENSIONS: Space, ART2300C DIMENSIONS: Perception, and ART2330C DRAWING 01. Drops after the add/drop period, which result in a DR grade, are considered an attempt in the course and count as an unsuccessful enrollment. Students who do not satisfy this requirement will be advised to change major to other degrees such as ARTHST:BA or INTSTUD:BA.

Graduation Requirements

In addition to University graduation requirements, the Grades K-12 Program graduation requirements include successful demonstration of the Florida Educator Accomplished Practices, GPA 2.5 or above and passing scores on all three sections of the Florida Teacher Certification Exams (General Knowledge, Professional Education, and Subject Area Exam Prekindergarten/Primary PK-3).

Grades K-12 Major Credit Hours: 120

Type

Completion Requirement

Professional Education: 24 Credits

Complete ALL of the following Courses:

- EDP3004 - Educational Psychology
- RED4325 - Subject Area Reading
- TSL4324 - ESOL Issues and Strategies for Content Area Teachers
- ARE4316 - Special Teaching Laboratory: Art in Grades K-5
- ARE4341 - Special Teaching Laboratory: Art in Grades 6-12
- ARE4940 - Student Teaching in Art

**ARE4316 Sp. Teach. Lab: Art K-5 and ARE4341 Sp. Teach. Lab: Art 6-12: Fall only*

Additional Comments:

Special Methods and Student Teaching

Students must complete 12 credits of foundation courses prior to enrolling in 4000-level Special Teaching Lab courses. ARE4316 Sp. Teach. Lab: Art K-5 and ARE4341 Sp. Teach. Lab: Art 6-12 must be taken before ARE4940 Student Tchg In Art. Applications to student teach are due in the Office of Clinical Experiences by March 1 for Fall semester placement and June 1 for Spring semester placement.

BS in Art Education: Career Development Major

The BS in Art Education: Career Development major prepares students for employment in professions that depend on an art education background but that do not require teacher certification. Students aspiring to work with art centers, galleries, business, public and private school settings, or with nonprofit organization may consider this major for their professional preparations. Graduates of this program can obtain the Florida Art Teacher Certification by passing the GK and the FTCE exams.

The program is in accordance with and follows the recommendations of both the National Visual Arts Standards and the Florida Next Generation Sunshine State Standards, and is fully accredited by the Council for the Accreditation of Educator Preparation (CAEP) and by the National Association of Schools of Art and Design (NASAD).

Academic Progression Requirements

To progress into upper-division BS in Art Education: Career Development major courses, students must complete the four lower division foundation courses (12 credits) with a minimum GPA of 2.50 or greater in two attempts or fewer. These courses include ART1201C DIMENSIONS: Surface, ART1203C DIMENSIONS: Space, ART2300C DIMENSIONS: Perception, and ART2330C DRAWING 01. Drops after the add/drop period, which result in a DR grade, are considered an attempt in the course and count as an unsuccessful enrollment. Students who do not satisfy this requirement will be advised to change major to other degrees such as ARTHST:BA or INTSTUD:BA.

Career Development Major Credit Hours: 120

Type

Completion Requirement

Professional Education: 15 Credits

Complete ALL of the following Courses:

- EDP3004 - Educational Psychology
- RED4325 - Subject Area Reading
- TSL4324 - ESOL Issues and Strategies for Content Area Teachers
- ARE4316 - Special Teaching Laboratory: Art in Grades K-5
- ARE4341 - Special Teaching Laboratory: Art in Grades 6-12

ARTED:MS - Master of Science in Art Education

Overview

Degree Offered
MS - Master of Science

Program Title
Art Education

The Master of Science (MS) in Art Education is intended to meet the needs of students who wish to achieve advanced professional understanding within the field of Art Education to teach art, art history, aesthetics, and criticism in K-12 school or studio settings. The program emphasizes the blending of research and theory with rigorous studio experience, and considers the urban, multicultural nature of the university community, as well as more general national trends within the discipline. An accelerated pathway is available to qualified students by application.

Admissions Requirements

Admissions Requirements for the Master of Science (MS) in Art Education

Applicants for admission into the Master of Science in Art Education program must meet the minimum University's graduate admission criteria. Admission to the masters program will be based on the following criteria:

1. Applicants for admission to the MS-Art Education program must hold or qualify for the Florida teacher certification in art. All applicants must also satisfy the Board of Education admission requirements. A GPA of 3.0 or higher in the last 60 semester hours of upper division undergraduate study.

2. Application materials must include two (2) letters of recommendation, a résumé, a statement of personal philosophy/ professional goals consistent with the objectives of the masters program.

3. After submission of application, applicants must schedule a portfolio interview with the Graduate Program Director. The Portfolio should contain fifteen (15) pieces of artwork including at least three (3) drawings.

Admissions Requirements for the Combined Bachelor of Arts (BA) in Art to MS in Art Education Accelerated Degree Pathway

(1) Current enrollment in the BA in Art

(2) Completed a minimum of 75 undergraduate credits

(3) Current GPA of 3.2 or higher

(4) Portfolio review and interview

(5) Complete the separate Accelerated Bachelors/Master's degree application, including signed approval by the director, coordinator or designee of the graduate program.

Admissions Requirements for the Combined Bachelor of Fine Arts (BFA) in Art to MS in Art Education Accelerated Degree Pathway

(1) Current enrollment in the BFA in Art

(2) Completed a minimum of 75 undergraduate credits

(3) Current GPA of 3.2 or higher

(4) Portfolio review and interview

(5) Complete the separate Accelerated Bachelors/Master's degree application, including signed approval by the director, coordinator or designee of the graduate program.

Admissions Requirements for the Combined Bachelor of Fine Arts (BFA) in Digital Arts to MS in Art Education Accelerated Degree Pathway

(1) Current enrollment in the BFA in Digital Arts

(2) Completed a minimum of 75 undergraduate credits

(3) Current GPA of 3.2 or higher

(4) Portfolio review and interview

(5) Complete the separate Accelerated Bachelors/Master's degree application, including signed approval by the director, coordinator or designee of the graduate program.

Admissions Requirements for the Combined Bachelor of Science (BS) in Art Education to MS in Art Education Accelerated Degree Pathway

(1) Current enrollment in the BS in Art Education

(2) Completed a minimum of 75 undergraduate credits

(3) Current GPA of 3.2 or higher

(4) Portfolio review and interview

(5) Complete the separate Accelerated Bachelors/Master's degree application, including signed approval by the director, coordinator or designee of the graduate program.

Program Requirements

Transfer of Credit

Students may be allowed to apply up to six semester hours of course work taken at accredited institutions to the masters program requirements with the following stipulations:

--The student received a grade of 3.0 or better on a 4.0 scale.

--The course was relevant, as judged by the Admissions Committee.

--The course is listed on an official transcript received by the Graduate Admissions Office.

--The course will be no older than 6 years at the time of graduation with a master's degree.

--The course meets all University requirements.

Degree Program Credit Hours: 36

Type

Completion Requirement

Part I: Education, including Art, Professional Studies: 6 Credits

Earn at least 6 credits from the following:

ARTHST:BA - Bachelor of Arts in Art History

Overview

Degree Offered
BA - Bachelor of Arts

Program Title
Art History

The Bachelor of Arts (BA) in Art History is designed to introduce methodologies for examining the interplay of art, culture, and politics spanning from ancient times to the present day. The curriculum employs rigorous visual analysis, and engages in current scholarly discourse. Students acquire a comprehensive understanding of art history through foundational courses, followed by specialized studies in areas such as early modern Europe, the history of photography, Latin America, and modern and contemporary art. The BA in Art History prepares students for careers as art professionals and for graduate study. It facilitates broad intellectual development, enabling students to cultivate essential career competencies in research, writing, critical analysis, persuasive communication, and interdisciplinary thinking. The Art History curriculum complements our BFA degree program and provides significant interaction between artists and art historians.

ASCP:CFI - Graduate Certificate in Applied Social and Cultural Psychology

Overview

Degree Offered
PCRT - Professional Certificate

Program Title
Applied Social and Cultural Psychology

The Graduate Certificate in Applied Social and Cultural Psychology gives students an opportunity to learn culturally-humility-based frameworks and methods for working with diverse populations. Students will explore research on urgent social issues facing the global community, such as social mobility, health inequities, gender-based violence, and immigration. Students will also have opportunities to learn about how researchers build relationships with organizations; various modes for communicating research findings to stakeholders, including lawmakers, corporate boards, community leaders and activists, nonprofits, and the public; and the relevance of social justice frameworks for psychology research and practice.

Admissions Requirements

No specific admissions requirements. Contact advisor for additional information.

This certificate is open to degree-seeking students only.

Prerequisites

Contact advisor for information about any prerequisites.

Program Requirements

Students are required to take 18 credits. Courses are to be chosen from the following list in consultation with and approval of the advisor. A grade of "C" or better is required for all courses. These courses represent a partial list; students should consult with an advisor for the certificate program about current course offerings and a full list of courses accepted for the certificate.

Program Credit Hours: 18

Type
Completion Requirement

Language: 9 credits

All students are required to demonstrate proficiency (two semesters) in one language group and familiarity (one semester) in the other language group.

- Group A: Chinese, Japanese, and Korean
- Group B: Portuguese and Spanish

Students already demonstrating proficiency in an Asian or Latin American language may be exempt from this requirement. This requirement may be satisfied through examination (see advisors) or coursework. Below is a sample list of language courses that may be applied, but higher-level language courses will also be counted.

Fulfill ANY of the following requirements:

Group A: Chinese, Japanese, and Korean

Complete ANY of the following Courses:

- CHI1130 - Chinese I
- CHI1131 - Chinese II
- CHI2200 - Intermediate Chinese
- JPN1130 - Japanese I
- JPN1131 - Japanese II
- JPN2200 - Intermediate Japanese I
- KOR1113 - Korean I
- KOR1132 - Korean II
- KOR2220 - Intermediate Korean I

OR

Group B: Portuguese and Spanish

Complete ALL of the following Courses:

- POR1130 - Portuguese I
- POR1131 - Portuguese II
- POR2200 - Intermediate Portuguese
  OR POR1142 - Portuguese for Spanish Speakers I
- POR1143 - Portuguese for Spanish Speakers II
- SPN1130 - Spanish I
- SPN1131 - Spanish II
- SPN2200 - Intermediate Spanish I

Area Studies: 9 credits

The Certificate in Asian Globalization and Latin America requires study in three different regional areas. These fields represent courses in Language & Literature, Philosophy & Religion, Sociology & Anthropology and Environmental Studies, History, Political Science and International Relations & Geography, Economics & Finance, and Fine Arts. All courses acceptable towards the certificate deal with some aspect of Asia, Latin America, and/or trans-regional issues. The combination of courses allows for the student to gain broad-based, multidisciplinary expertise within a specialization on Asian globalization and Latin America.

Courses are to be chosen from the following certificate program course listing, or others approved by the certificate program advisor. Students must take courses distributed across three regional areas:

- A) Asian Studies;
- B) Latin America Studies; and
- C) Global Studies

Earn at least 9 credits

Area A - Asian Studies Courses: 3 credits

ASN- prefix courses are preferred for a minimum of three (3) credit-hours. The following core courses fulfill certificate requirements.

Earn at least 3 credits from the following:

- ASN3016 - China Then and Now
- ASN3125 - Intro to Spirituality of Japan
- ASN3143 - Corporate Culture of China
- ASN3153 - Topics in Korean Culture
- ASN3154 - Traditional and Modern Korea
- ASN3200 - Asia Through Films
- ASN3202 - Japanese Anime and Manga
- ASN3329 - Women in Asian Society
- ASN3403 - Zen and the Art of Tea Ceremony
- ASN3410 - Introduction to East Asia
- ASN3414 - Pop Culture of East Asia
- ASN3503 - Exploring East Asia: Virtual Reality Travel
- ASN3931 - Special Topics in Asian Studies
- ASN4111 - Japan and The New East
- ASN4404 - Zen and the Art of the Tea Ceremony II
- ASN4810 - East Asian Classics to Cool Writings in Translation
- AMH4544 - The United States and the Vietnam War
- ANT4477 - Area Studies (Inactive)
- ARH4552 - Arts of China and Japan
- ASH3440 - History of Japan
- COM3410 - Cultural Communication Patterns of Asia
- CPO3502 - Politics of the Far East
- CPO4541 - Politics Of China
- CPO4553 - Government and Politics of Japan
- ECS3200 - Economics Of Asia
- INR3223 - Japan and the United States
- INR3224 - International Relations of East Asia
- INR4232 - International Relations of China
- JPN3500 - Japanese Culture and Society
- PHH3810 - Phil Of Buddhism
- PHI3762 - East Phil & Rel Thgt
- REL3330 - Religions Of India
- REL4311 - Religious Classics of Asia
- REL3340 - Survey of Buddhism
- REL4345 - Zen Buddhism

- SYD4610 - Topics In Sociology

However, an exception can be made from the list with approval of the Program Director. These courses represent a partial list; students should consult with an advisor for the certificate program about current course offerings and a full list of courses accepted for the certificate.

Area B - Latin American Studies Courses: 3 credits

One course on Latin America must be taken for a minimum of three (3) credits. Students should consult with an advisor for the certificate program about current course offerings and a full list of courses accepted for the certificate.

Earn at least 3 credits from the following:

- ANT4332 - Latin America
- ANT4340 - Caribbean Cultures
- ANT4343 - Cuban Culture and Society

ASNGL:CFI - Graduate Certificate in Asian Globalization

Overview

Degree Offered
ACRT - Academic Certificate

Program Title
Graduate Certificate in Asian Globalization

The Graduate Certificate in Asian Globalization Studies emphasizes a multidisciplinary approach to the studies of Asia on the global stage. This program offers graduate students an in-depth learning experience of an increasingly important region (Asia) in comparison with another world region, such as Africa, Europe, Latin America, or the Middle East. This program allows students the opportunity to study thematic issues related to Asia such as migration, identity, trade, education, technology, environment, and international affairs from a multidisciplinary, multiregional approach.

Program Credit Hours: 15

Type

Completion Requirement

Electives in Asian Studies: 9 credits

Three courses in Asian Studies. Can be ASN or other prefix. See Sample listing of courses below.

Electives in Globalization: 6 credits

See sample listing of Globalization areas below. For additional courses in other world regions inquire with the Department.

Sample Courses in Asian Studies

Courses in studies of Asia or a sub region. Choose from the following list (additional courses will be considered):

Complete at least 3 of the following courses:

- ASH5446 - Readings in Japanese History (Inactive)
- ASH5905 - Readings in Asian History
- ASN5120 - Religion and Society in Japan
- ASN5130 - Zen and the Arts
- ASN5131 - Zen and the Arts II
- ASN5211 - Asian Cultures and Influences (Inactive)
- ASN5213 - Asian Studies Colloquium
- ASN5306 - Applying Asian Cultural Values in Business (Inactive)
- ASN5605 - Silk Road: Then and Now (Inactive)
- ASN5815 - Studies of East Asian Texts
- ASN5910 - Independent Research in Asian Studies
- ASN5932 - Special Topics in Asian Studies
- ASN6930 - Seminar in Asian Studies
- ASN6940 - Internship in Asian Studies
- ECO5206 - Economics of Asia
- INR5544 - The New Asian Century
- INR5086 - Islam in International Relations
- RLG5346 - Seminar on Buddhism
- RLG5352 - Religions of East Asia
- RLG6319 - Seminar in Asian Religions
- SYD6655 - Seminar on Social Change in Asia (Inactive)

Sample Courses in Globalization: African Studies

Complete at least 2 of the following courses:

- AFH5905 - Readings in African History
- ANT6319 - The African Diaspora: Anthropological Perspectives
- CPO6206 - Sem African Pol (Inactive)
- INR5255 - Seminar in African Development
- RLG5372 - The Globalizing of African Spirituality

Sample Courses in Globalization: European Studies

Complete ANY of the following Courses:

- ARH5663 - Graduate Art of Spain and Her Colonies
- ENL5220 - Major British Literary Figures
- ENL5505 - Periods in English Literature
- EUH5126 - Readings in European History
- EUH5935 - Topics in European History

Sample Courses in Globalization: Latin American Studies

Complete ANY of the following Courses:

- ARH5671 - Seminar in 20th Century Latin American Art
- INR6936 - Seminar in Inter-American Politics
- LAH5905 - Readings in Latin American History
- LAS6003 - Survey Latin America

Sample Courses in Globalization: Middle Eastern Studies

Complete ANY of the following Courses:

- CPO6407 - Seminar in Politics of the Middle East
- HIS5930 - Special Topics
- INR5086 - Islam in International Relations
- INR5275 - International Relations of the Middle East

In addition to the courses listed above, relevant special topics, independent study, study aboard credits, and area studies or comparative studies may also be applied.

Major Requirements

There are no majors associated with this program.

Track, Specialization, Concentration, Area of Emphasis, or Other Curricular Offering Requirements

There are no tracks, specializations, concentrations, areas of emphasis, or other curricular offerings associated with this program.

ASNST:BA - Bachelor of Arts in Asian Studies

Overview

Degree Offered
BA - Bachelor of Arts

Program Title
Asian Studies

The Bachelor of Arts (BA) degree in Asian Studies provides students with a rich learning experience about a fascinating and increasingly important region of the world, and is intended to enhance the student's competitiveness upon graduation. The program provides a multidisciplinary approach covering the philosophy, religion, art history, language, and literature of Asia, as well as issues in history, politics, geography, sociology/anthropology, and international relations.

For more information, visit the Steven J. Green School of International and Public Affairs website.

Admissions Requirements for the Bachelor of Arts (BA) in Asian Studies

See general university admissions requirements at admissions.fiu.edu.

Admissions Requirements for the Combined BA in Asian Studies to the Master of Arts (MA) in Asian Studies Accelerated Degree Pathway

To be considered for admission to the combined bachelor's/master's degree pathway, students must have completed at least 75 credits in the bachelor's degree program at FIU and meet the admissions criteria for the graduate degree program to which they are applying. Students need only apply once to the combined degree pathway; the application is submitted to Graduate Admissions typically before the student starts the last 30 credits of the bachelor's degree program. A student admitted to the combined degree pathway will be considered to have undergraduate status until the student applies for graduation from their bachelor's degree program. Upon conferral of the bachelor's degree, the student will be granted graduate status and be eligible for graduate assistantships. Only 5000-level or higher courses, and no more than the number of credits specified by the program catalog, may be applied toward both degrees. A complete application requires:

(1) Current enrollment in BA program in Asian Studies at FIU

(2) Completion of 75 credits of undergraduate coursework

(3) Overall GPA of 3.2 (including undergraduate and graduate courses)

(4) One letter of recommendation

(5) Statement of purpose discussing interests in the field

Students should consult the Asian Studies website for a more comprehensive discussion of admission requirements (**http://asian.fiu.edu**).

Program Requirements

Academic Progression Requirements

Students are admitted directly to their chosen major at the University. Students are expected to make good progress based on critical indicators that include course completion and GPA requirements. In cases where students are not making successful progress, a change of major may be required. Academic advisors work with students to identify an appropriate major where a student will be successful in completing an undergraduate degree.

Common Prerequisite Courses

There are no specified common prerequisites for this degree. For more information about state-approved common prerequisites and alternatives for other programs, visit https://cpm.flvc.org.

Major Requirements

Asian Studies Major: (36 credits)

This major offers the following tracks:

· **Asian Area Studies** emphasizes language studies and regional studies in political economy or cultural history, and language competency.

· **East Asian Studies** emphasizes more advanced language studies in Chinese, Japanese, Korean or other Asian language.

· **Asian World Affairs** emphasizes the role of the Asian region in contemporary world affairs, and requires introductory-level language knowledge.

Major Requirements:

1. 6 credits of Language Requirements – Specific to each track.
2. 3 credits of ASN 3410 – Introduction to East Asia – *GL*.
3. 9 credits of ASN-prefix courses.
4. 9 credits of Asian Area Studies.
5. 3 credits in a supervised research course (ASN 4510, ASN 4390, or another 4000-level course including but not limited to ASN 4111, ASH 4300, ASH 4404, INR 4232, or SYD 4451) based on approval of Program Director.
6. 6 credits in Track-specific courses. For the Asian Area Studies track this could include area studies and/or language courses; and for the East Asian Studies track this must be one year, in a second Asian language. For the Asian World Affairs track this could include courses in contemporary and/or comparative Asian issues.

7. Students may receive credits through Study Abroad courses or an Internship program.

Asian Studies Major: 36

Type

Completion Requirement

Language Requirements in Asian Studies Major: 6 credits

- **Asian Area Studies or East Asian Studies Tracks:** Two semesters (6 credits) of Intermediate-level (2000) or higher in Chinese, Japanese, Korean or other Asian Language. For most students, this will require a prerequisite of Introductory-level (1000) courses or demonstrating proficiency through testing, interview, etc.
- **Asian World Affairs Track:**

  Two semesters (6 credits) of Introductory-level (1000) or higher in Chinese, Japanese, Korean or other Asian Language. (First year language courses are 5-credits each, for a total of 10, but 6 credits will be applied to the track total).

ASN 3410 – Introduction to East Asia: 3 credits

Earn at least 9 credits from the following:

- ASN3410 - Introduction to East Asia

Asian Studies Courses (ASN-prefix): 9 credits

Earn at least 9 credits from the following:

- ASN3016 - China Then and Now
- ASN3125 - Intro to Spirituality of Japan
- ASN3143 - Corporate Culture of China
- ASN3153 - Topics in Korean Culture
- ASN3154 - Traditional and Modern Korea
- ASN3200 - Asia Through Films
- ASN3202 - Japanese Anime and Manga
- ASN3210 - K-Pop and J-Pop Culture
- ASN3215 - Cultural Approaches to Japanese Video Games
- ASN3329 - Women in Asian Society
- ASN3403 - Zen and the Art of Tea Ceremony
- ASN3414 - Pop Culture of East Asia
- ASN3503 - Exploring East Asia: Virtual Reality Travel
- ASN3931 - Special Topics in Asian Studies
- ASN4111 - Japan and The New East
- ASN4217 - Japanese Spirits, Ghosts, Monsters (Yokai)
- ASN4404 - Zen and the Art of the Tea Ceremony II
- ASN4810 - East Asian Classics to Cool Writings in Translation

Asian Area Study Courses: 9 credits

Visit our website at **http://asian.fiu.edu** for a comprehensive list of electives.

Earn at least 9 credits from the following:

- CHI3440 - Business Chinese
- CHI3403 - Chinese Calligraphy (Inactive)
- CPO3502 - Politics of the Far East
- CPO3643 - Russian Politics
- CPO4401 - The Arab-Israeli Conflict
- CPO4507 - Comparative Political Economics of Asia
- CPO4541 - Politics Of China
- CPO4553 - Government and Politics of Japan
- ECO4701 - World Economy
- ECO4704 - International Trade Theory and Policy
- ECS3200 - Economics Of Asia
- ECO3703 - International Economics
- FIN3652 - Asian Fin Mkt/Inst (Inactive)
- GEA3554 - People, Place, and Environment of Russia and Central Eurasia (Inactive)
- GEA3635 - People, Place, and Environment of the Middle East
- GEA3704 - People, Place, and Environment of East Asia
- GEA3705 - Geography of Central Asia and the Caucasus (Inactive)
- KOR2203 - Korean for Business
- KOR3225 - Korean Language Through Drama and Film
- INR3081 - Contemporary International Problems
- INR3223 - Japan and the United States
- INR3224 - International Relations of East Asia
- INR3226 - International Relations of Central Asia and the Caucasus
- INR3227 - International Relations of South Asia
- INR3262 - International Relations of Russia and the Former USSR
- INR3274 - International Relations of the Middle East
- INR3703 - International Political Economy
- INR4032 - Asia & Lat America (Inactive)
- INR4082 - Islam in International Relations
- INR4232 - International Relations of China
- INR4521 - Politics of Regional Integration
- INR4931 - Topics in International Relations
- ISS3240 - World Prospects and Issues
- JPN3000 - Japanese Calligraphy
- JPN3140 - Japanese for Business (Inactive)
- LBS4653 - Labor Movements in Developing Countries
- LBS4654 - Comparative and International Labor Studies
- MAN4600 - International Management
- MAN4661 - Business in Asia (Inactive)
- MAR4156 - International Marketing
- SYD4610 - Topics In Sociology
- SYO4550 - Comparative Sociology (Inactive)
- SYP3456 - Societies in the World
- SYP4454 - Globalization and Society

If you have questions about a specific course not listed above, please email asian@fiu.edu.

Supervised Research Course: 3 credits

Students take 3 credits of a supervised research course (ASN 4510, ASN 4390, **or another 4000-level course** including but not limited to ASN 4111, ASH 4300, ASH 4404, INR 4232, or SYD 4451) based on approval of Program Director.

Earn at least 3 credits from the following:

- ASN4510 - Dynamics Of Asia
- ASN4390 - Modern Asia
- ASN4111 - Japan and The New East
- ASH4300 - East Asian Civilization and Culture
- ASH4404 - History of China
- INR4232 - International Relations of China
- SYD4451 - Japanese Society in Global Perspective

Asian Area Studies track: 6 credits

For the **Asian Area Studies** track this could include area studies and/or language courses.

Earn at least 6 credits from the following:

- AMH4544 - The United States and the Vietnam War
- AML4930 - Special Topics in American Literature
- ANT3367 - Asian American Experiences
- ANT3241 - Myth, Ritual, and Mysticism
- ARH4552 - Arts of China and Japan
- ASH3280 - Introduction to Korean History
- ASH3440 - History of Japan
- ASH3450 - Human Rights in Modern Japanese History
- ASH3631 - The Pacific War in Asia
- ASH4300 - East Asian Civilization and Culture
- ASH4384 - History of Women in Asia
- ASH4404 - History of China
- ASH4453 - History of Travel in Japan
- CHT3514 - Self Cultivation in Traditional and Modern China (Inactive)
- COM3410 - Cultural Communication Patterns of Asia
- DAN4136 - Global Perspectives in Dance and Culture I: Theory
- DAN4137 - Global Perspective in Dance and Culture II: Theory
- JPN3500 - Japanese Culture and Society
- JPN4930 - Special Topics in Japanese
- JPT3521 - Japanese Literature and Cinema
- LIN4624 - Bilingualism and Language Policies (Inactive)
- MUH2512 - Music Of The World
- MUH3570 - Survey of Asian Music
- PHH3810 - Phil Of Buddhism
- PHI3762 - East Phil & Rel Thgt
- REL3027 - Meditation and the Mystical Traditions
- REL3028 - Sacred Places, Sacred Travels
- REL3123 - Asian Religions in the Americas
- REL3145 - Women and Religion
- REL3310 - Introduction to Asian Religions
- REL3314 - Religion on the Silk Road

- REL3330 - Religions Of India
- REL3340 - Survey of Buddhism
- REL3399 - The Art of Yoga and Meditation: Theory and Practicum
- REL4311 - Religious Classics of Asia
- REL4312 - The Jews of Asia and Africa
- REL4345 - Zen Buddhism
- REL4351 - Religion and Japanese Culture (Inactive)
- SPW4133 - Eastern Thought and Latin American Literature: The Age of Octavio Paz (Inactive)
- WOH4431 - Ships, Cargo, and Greed: Material and Cultural encounters in the Spanish Pacific, 1513-1815

East Asian Studies track: 6 credits

For the **East Asian Studies** track this must be one year, in a second Asian language.

Earn at least 6 credits from the following:

- CHI1130 - Chinese I
- CHI1131 - Chinese II
- CHI2200 - Intermediate Chinese
- CHI2201 - Intermediate Chinese II
- CHI3440 - Business Chinese
- JPN1130 - Japanese I
- JPN1131 - Japanese II
- JPN2200 - Intermediate Japanese I
- JPN2201 - Interm Japanese II
- JPN3140 - Japanese for Business (Inactive)
- JPN3400 - Advanced Japanese I
- JPN3401 - Advanced Japanese II
- KOR1113 - Korean I
- KOR1132 - Korean II
- KOR2220 - Intermediate Korean I
- KOR2203 - Korean for Business

Asian World Affairs track: 6 credits

For the **Asian World Affairs** track this could include courses in contemporary and/or comparative Asian issues.

Earn at least 6 credits from the following:

- ANT3212 - World Ethnographies
- ASH3440 - History of Japan
- ASH4300 - East Asian Civilization and Culture
- ASN3016 - China Then and Now
- ASN4810 - East Asian Classics to Cool Writings in Translation
- CPO4507 - Comparative Political Economics of Asia
- INR3223 - Japan and the United States
- INR4232 - International Relations of China
- JPN4930 - Special Topics in Japanese
- SYD4654 - Contemporary Chinese Society (Inactive)
- SYD4451 - Japanese Society in Global Perspective

Please see advisor about other course options.

Study Abroad/Internship Courses (Optional)

Students may receive credits through Study Abroad courses or an Internship program.

Additional Comments:

Visit our website at **http://asian.fiu.edu** for a comprehensive list of electives. If you have questions about a specific course not listed above, please email asian@fiu.edu.

Chinese Area Studies Major: 36 credits

Type

Completion Requirement

Language: 9 credits

Two and a half years of Chinese Language Required.

Fulfill ALL of the following requirements:

First year language

CHI1130 Chinese I and CHI1131 Chinese II is a prerequisite that does not count toward the major requirements.

AND

Following Three semesters of intermediate Chinese language courses: 9 credits

Three semesters of intermediate Chinese language courses (2000 level or above) – 9 credits (or demonstrated proficiency at this level, in which case additional area studies courses would be required); advanced language courses can fulfill the elective requirements

Earn at least 9 credits

Core Courses: 9 credits

Earn at least 9 credits from the following:

- ASN3410 - Introduction to East Asia
- ASN4510 - Dynamics Of Asia
- ASN4390 - Modern Asia
- ASN3016 - China Then and Now

China-specific courses: 9 credits

Earn at least 9 credits from the following:

- ARH4552 - Arts of China and Japan
- ARH4557 - Contemporary Chinese Art
- ASH4404 - History of China
- ASN3143 - Corporate Culture of China
- CHT3502 - Chinese Culture and Society

Required Courses: 9 credits

Complete ALL of the following Courses:

- ASN3410 - Introduction to East Asia
- JPN3500 - Japanese Culture and Society
- ASH3440 - History of Japan

Japanese/Asian Area Studies Courses: 9 credits

Please see an advisor for approved courses or see program website at **http://asian.fiu.edu**.

Earn at least 9 credits

Capstone/Seminar Courses: 6 credits

Earn at least 6 credits from the following:

- ASH4300 - East Asian Civilization and Culture
- ASN4510 - Dynamics Of Asia
- ASN4390 - Modern Asia

Track, Specialization, Concentration, Area of Emphasis, or Other Curricular Offering Requirements

Other Curricular Offering: Combined BA in Asian Studies to MA in Asian Studies Accelerated Degree Pathway

The combined BA/MA degree pathway allows highly qualified undergraduate students to pursue an accelerated MA degree in Asian Studies. Students accepted into this pathway will be able to complete the MA degree as early as one year sooner than would otherwise be possible. Students accepted into the Asian Studies Honors track are particularly encouraged to apply for this pathway.

The program gives students the opportunity to take up to 12 credits of graduate coursework that will count towards both the BA and the MA. Students may take up to four 5000-level or higher graduate courses their senior year and follow the regular MA curriculum after they earn their BA degree.

Undergraduate Senior Year

--Fall Semester – apply to the program by the end of the semester
--Spring Semester – take 12 credits, including 9 graduate credits in 5000-level or higher courses

Graduate Program

--Summer Semester – take 3 graduate credits (5000-level or higher)
--Fall Semester – take 9 graduate credits (5000-level or higher)
--Spring Semester – take 9 graduate credits (5000-level or higher, including thesis or master's essay)

Students in the combined BA/MA pathway in Asian Studies must complete all other requirements for the MA degree in Asian Studies (please consult the program's online graduate handbook). Students in this program have up to a year to complete the master's degree after receipt of the bachelor's degree. Students who fail to meet this year post BA

requirement or who elect to leave the combined pathway at any time and earn only the BA degree will have the same access requirements to regular graduate programs as any other student, but will not be able to use the 12 graduate credits in both the bachelor’s and master’s degrees.

ASNST:CFI - Graduate Certificate in Asian Studies

Overview

Degree Offered
ACRT - Academic Certificate

Program Title
Graduate Certificate in Asian Studies

The Graduate Certificate in Asian Studies provides students with a dynamic learning experience about a fascinating and increasingly important region of the world. The certificate must be pursued in conjunction with another graduate program at FIU. This program provides an overview of the philosophy, religion, art history, language, and literature of Asia, as well as issues in history, politics, geography, sociology/anthropology, and international relations. Students can choose between two areas of concentration, language or non-language, for the Graduate Certificate in Asian Studies.

ASNST:MA - Master of Arts in Asian Studies

Overview

Degree Offered
MA - Master of Arts

Program Title
Asian Studies

The Master of Arts (MA) in Asian Studies is an interdisciplinary program designed for students who wish to pursue advanced studies of historical and contemporary trends. The degree provides students with a strong foundation in the traditional cultures and modern socio-economic societies of Asia, with an emphasis on East Asia. Coursework is available from outstanding professors in a variety of disciplines including history, international relations, political science, religious studies, and more.

For more information, visit the Steven J. Green School of International and Public Affairs website.

Admissions Requirements

Admissions Requirements for the Master of Arts (MA) in Asian Studies

Applications to the Master of Arts (MA) in Asian Studies program must be made through the FIU University Graduate School (UGS) online portal. Applicants must also submit the following materials, as required by UGS:

(1) Statement of Purpose

(2) One Letter of Recommendation

(3) Transcripts from previous accredited institution(s)

As required by the program, applicants must meet one of the following minimum requirements for admission to the MA in Asian Studies program:

(1) A bachelor’s degree from an accredited institution;

(2) A 3.2 GPA in undergraduate degree program;

(3) A 3.0 GPA in undergraduate degree program with appropriate language or study abroad background as determined by examination or evaluated by the program faculty committee.

(4) A master’s degree in the humanities or social sciences from an accredited institution;

The above admission requirements are minimums and not all students meeting them are assured admission. The GRE is not required.

International graduate student applicants whose native language is not English are required to submit a score for the Test of English as a Foreign Language (TOEFL) or for the International English Language Testing System (IELTS). A total score of 80 on the iBT TOEFL or 6.5 overall on the IELTS is required.

Admissions Requirements for the Combined Bachelor of Arts (BA) in Asian Studies to MA in Asian Studies Accelerated Degree Pathway

To be considered for admission to the combined bachelor's/master's degree pathway, students must have completed at least 75 credits in the bachelor's degree program at FIU and meet the admissions criteria for the graduate degree program to which they are applying. Students need only apply once to the combined degree pathway; the application is submitted to Graduate Admissions typically before the student starts the last 30 credits of the bachelor's degree program. A student admitted to the combined degree pathway will be considered to have undergraduate status until the student applies for graduation from their bachelor's degree program. Upon conferral of the bachelor's degree, the student will be granted graduate status and be eligible for graduate assistantships. Only 5000-level or higher courses, and no more than the number of credits specified by the program catalog, may be applied toward both degrees. A complete application requires:

(1) Current enrollment in BA in Asian Studies program at FIU;

(2) Completion of 75 credits of undergraduate coursework;

(3) Overall GPA of 3.2 (including undergraduate and graduate courses);

(4) One letter of recommendation;=

(5) Statement of purpose discussing interests in the field.

Students should consult the Asian Studies website for a more comprehensive discussion of admission requirements (**http://asian.fiu.edu**).

Admissions Requirements for the MA in Asian Studies and PhD in Global and Sociocultural Studies Joint Degree Pathway

Applicants must meet the following minimum requirements of Global and Sociocultural Studies to be considered for admission:

(1) Baccalaureate degree from an accredited institution for higher education (or equivalent);

(2) Minimum cumulative grade point average of 3.5 on a 4.0 scale (or equivalent) for the last two years of undergraduate work and/or a GPA of 3.5 on any previous graduate work;

(3) Official Graduate Record Exam (GRE) scores;

(4) International graduate student applicants whose native language is not English and who have not obtained a degree from an English-speaking academic institution are required to submit a score for the Test of English as a Foreign Language (TOEFL) or for the International English Language Testing System (IELTS). A total score of 80 on the internet-based TOEFL (equivalent to 550 on the paper-based version) or a 6.5 overall on the IELTS is required.

Admission Procedures

To be accepted into this pathway, students must submit an application to the PhD in Global and Sociocultural Studies with a sub-plan for a MA in Asian Studies. This designation will appear in the menu of programs in the graduate application. To be accepted into this pathway, students must submit an application by February 1st in the year in which they wish to begin their studies.

The following documents must be submitted and will be reviewed by the Admissions Committees from both units.

The following must be submitted as part of the online application:

(1) Online application and application fee;

(2) Official transcripts for all undergraduate and graduate coursework;

(3) Official GRE scores;

(4) Official TOEFL scores, if applicable;

(5) Statement of purpose explaining his/her interest for enrolling in both the MA in Asian Studies program and in the PhD in Global and Sociocultural Studies program. The statement of purpose must clearly address the applicant's academic and professional objectives for enrolling in both fields of inquiry. The statement of purpose must also indicate the intended major (international political economy or Asian cultural studies for the MA in Asian Studies; anthropology, geography, or sociology for the PhD in Global and Sociocultral Studies) the applicant plans to select while engaged in the PhD in Global and Socriocultural Studies program;

(6) Three letters of recommendation from university professors who are able to comment on the various aspects of the student's academic ability;

(7) A curriculum vitae or resume; and

(8) Writing samples and other relevant professional work that may support their applications.

Admissions Requirements for the MA in Asian Studies and PhD in International Relations Joint Degree Pathway

The MA in Asian Studies/PhD in International Relations joint degree pathway allows qualified graduate students to pursue both degrees simultaneously. To be accepted into this pathway, students must submit an application for the MA in Asian Studies/PhD in International Relations by January 15 in the year in which they wish to begin their studies. Applicants must meet the admission eligibility requirements and follow the admission procedures for both programs.

Admissions Requirements for the MA in Asian Studies and PhD in History Joint Degree Pathway

The MA in Asian Studies/PhD in History joint degree pathway allows qualified graduate students to pursue both degrees simultaneously. To be accepted into this pathway, students must simultaneously submit applications for the MA in Asian Studies and the PhD in History. Applicants must meet the admission eligibility requirements and follow the admission procedures for both programs.

Program Requirements

Degree Program Credit Hours: 30

Type

Completion Requirement

Core Courses: 9 Credits

Earn at least 9 credits from the following:

- ASN5315 - Topics in Modern Asia
- ASN5050 - Methods in Asian Studies
- ASN5815 - Studies of East Asian Texts
- SYD6901 - Special Topics in Sociology

- ASN5213 - Asian Studies Colloquium
- ASN5910 - Independent Research in Asian Studies
- ASN6930 - Seminar in Asian Studies
- ASN6940 - Internship in Asian Studies

Other Coursework: 15 Credits

Students must complete 15 credits of additional coursework relevant to their research topic. Students may receive credit through independent study, study abroad, or internship approved by the program advisor.

An additional research methods course in a discipline related to the student's primary area of study may be taken as an elective, such as HIS6059 Historical Methods, INR5615 Research Design Inr, POS5706 Methodology, RLG6013 Mod Analysis Relign, RLG6935 Sem Sacred Texts, SYA 6305, or equivalent.

Earn at least 15 credits from the following:

- ASH5446 - Readings in Japanese History (Inactive)
- ASH5905 - Readings in Asian History
- ASN5130 - Zen and the Arts
- ASN5131 - Zen and the Arts II
- ASN5431 - Studies of Women in East Asia
- ASN5815 - Studies of East Asian Texts
- ASN5932 - Special Topics in Asian Studies
- ECO5709 - The World Economy
- ECO5735 - Multinational Corps (Inactive)
- ECP5707 - International Economic Problems & Policy
- HIS6289 - Comparative/Atlantic History
- IDS6938 - Great Ideas Seminar: Human Nature (Inactive)
- INR5086 - Islam in International Relations
- INR5315 - Foreign Policy Analysis
- INR5544 - The New Asian Century
- INR6205 - World Politics (Inactive)
- INR6706 - Political Economy of International Relations
- MUH5057 - Music of the World
- MUH5575 - Survey of Asian Music
- RLG5331 - Religions of India
- RLG5346 - Seminar on Buddhism
- RLG5352 - Religions of East Asia
- RLG6319 - Seminar in Asian Religions
- SYD6655 - Seminar on Social Change in Asia (Inactive)

Exit Options: 6 Credits

The MA in Asian Studies program offers two graduation exit options:

1. 30 credits - Completion of a thesis

2. 30 credits - Completion of a non-thesis master's essay

Fulfill ANY of the following requirements:

Thesis Option: 6 Credits

Please visit the FIU Graduate School website for up to date information on thesis guidelines and deadlines: https://gradschool.fiu.edu/thesis-dissertation/

Language Requirements: Students choosing the thesis option will be asked to demonstrate competence in an Asian language relevant to their thesis project when appropriate (e.g. for pre-modern studies or fieldwork research). Proficiency requirements will be determined by the thesis committee. Credits earned in meeting the language requirement will not count towards the credit hours required for the degree.

Complete ALL of the following Courses:

- ASN6972 - Master's Thesis

OR

Non-Thesis Master's Essay Option: 6 Credits

Please visit the Asian Studies website for up to date information on guidelines and deadlines for the non-thesis master's essay: https://asian.fiu.edu/

Complete ALL of the following Courses:

- ASN6912 - Master's Essay in Asian Studies

Additional graduate-level Asia-specific course (3 credits)

*ASN6912 Master's Essay in AS *can be taken multiple times. Some students may be encouraged to develop their research projects by taking this course.*

Additional Comments:

Important Note about Program Options: At mid-course in the program (15 credits), the student must meet with the program director or graduate director who will determine whether the student is recommended for the thesis or non-thesis option.

Major Requirements

There are no majors associated with this program..

Track, Specialization, Concentration, Area of Emphasis, or Other Curricular Offering Requirements

Other Curricular Offering: Combined BA in Asian Studies to MA in Asian Studies Accelerated Degree Pathway

The combined BA/MA degree pathway allows highly qualified undergraduate students to pursue an accelerated MA degree in Asian Studies. Students accepted into this pathway will be able to complete the MA degree as early as one year sooner than would otherwise be possible. Students accepted into the Asian Studies Honors track are particularly encouraged to apply for this pathway.

The program gives students the opportunity to take up to 12 credits of graduate coursework that will count towards both the BA and the MA. Students may take up to four 5000-level or higher graduate courses their senior year and follow the regular MA curriculum after they earn their BA degree.

Undergraduate Senior Year

--Fall Semester – apply to the program by the end of the semester
--Spring Semester – take 12 credits, including 9 graduate credits in 5000-level or higher courses

Graduate Program

--Summer Semester – take 3 graduate credits (5000-level or higher)
--Fall Semester – take 9 graduate credits (5000-level or higher)
--Spring Semester – take 9 graduate credits (5000-level or higher, including thesis or master's essay)

Students in the combined BA/MA pathway in Asian Studies must complete all other requirements for the MA degree in Asian Studies (please consult the program's online graduate handbook). Students in this program have up to a year to complete the master's degree after receipt of the bachelor's degree. Students who fail to meet this year post BA requirement or who elect to leave the combined pathway at any time and earn only the BA degree will have the same access requirements to regular graduate programs as any other student, but will not be able to use the 12 graduate credits in both the bachelor's and master's degrees.

Other Curricular Offering: MA in Asian Studies and PhD in Global and Sociocultural Studies Joint Degree Pathway

The MA in Asian Studies/PhD in Global and Sociocultural Studies joint degree pathway allows qualified graduate students to pursue both degrees at the same time. Students can develop an expertise in Asian Studies while progressing towards a PhD in one of the three majors in the PhD in Global and Sociocultural Studies program: geography, sociology, or anthropology.

Degree Requirements for MA in Asian Studies

(30 credits Thesis Option/30 credits Non-Thesis Option) Up to 30 credits earned for the MA in Asian Studies will count towards the 75 credits required for the PhD in Global and Sociocultural Studies program. Exceptions can be made based on the needs of the doctoral program

Core: 6 credits

--ASN5050 Methods in Asian Studies Methods in Asian Studies
--ASN5213 Asian Studies Colloquium Asian Studies Colloquium
--ASN5315 Topics in Modern Asia Topics in Modern Asia
--ASN5910 Ind Research Independent Research in Asian Studies
--ASN6930 Semin Asian Studies Seminar in Asian Studies
--ASN6940 Internship Internship in Asian Studies

Courses required for Global and Sociocultural Studies Track: 12 credits

--ISS6305 Res Meth and Design Research Design and Methods
--ISS6346 Theory and Inquiry Theory and Inquiry
--ISS6317 Soc Res Quant Methods I Social Research Quantitative Methods
--ISS6306 Proposal Writing Writing Research Proposals

Asian Studies Courses: 6 credits

Students must take 6 credits Asia-specific courses pertaining to main concentration (from courses listed below):

--SYD6418 Grad Seminar in Urban Soc Graduate Seminar in Urban Sociology
--SYD6901 Special Topics Japanese Society in Global Perspective
--SYD4654 Contemp. Chinese Society State and Society in China

Language Requirement

Depending on the research topic students may be required to demonstrate language competency by the Asian Studies Graduate Committee.

MA in Asian Studies Exit Options, Thesis or Non-Thesis Master's Essay

Thesis Exit Option (6 credits):

--ASN6972 Master's Thesis Thesis

Non-Thesis Master's Essay Exit Option (6 credits):

--ASN6912 Master's Essay in AS Master's Essay (3 credits)
--One additional Asia-specific course (3 credits)

Master's Essay can be taken multiple times. Some students may be encouraged to develop their research projects by taking this course.

Application for Graduation from MA in Asaian Studies

Students should apply for graduation for the MA in Asian Studies as soon as they have completed all requirements for the degree – including the exit option.

Matriculation to PhD in Global and Sociocultural Studies

All students must undergo a successful review upon completion of the MA in Asian Studies program requirements in order to continue toward the PhD in Global and Sociocultural Studies. The Global and Sociocultural Studies Graduate Committee, along with an appointee from Asian Studies, conducts these reviews. The purpose of the MA review is to determine the ability of the student to do PhD-level work with the department's faculty. Among the information considered during the review are student's performances and grades in courses, and faculty recommendations.

Degree Requirements for PhD in Global and Sociocultural Studies

The PhD in Global and Sociocultural Studies program requires a minimum of 75 credits beyond the baccalaureate including a dissertation based on original research; up to 30 credits of the MA in AS will count toward the 75-credit minimum. Thus, a minimum of 42 credits must be earned beyond the MA.

Major Courses: 36 credits

All doctoral students will choose a major in Anthropology, Geography, or Sociology. The following distribution of coursework is required:

-- Major theory methods: 3 credits
-- Major methods: 3 credits
-- Major course electives: 9 credits minimum
-- Doctoral Exam Preparation: 6 credits maximum
-- Doctoral Dissertation: 15 credits minimum

General Electives: 6 credits

--GSS and non-GSS department electives

PhD General Examination

After successfully completing the common core requirements, the major's course requirements, and electives, a student prepares for the PhD General Exam by enrolling in a maximum of six credits of exam preparation for their major. In preparation for the exam, a student forms a dissertation committee according to the regulations published on the University Graduate School web page (**http://gradschool.fiu.edu**). The PhD General Exam addresses the student's anticipated dissertation topic, and is conducted according to the University Graduate School Policies and Procedures Manual and the Department's PhD General Exam guidelines.

The Dissertation Proposal and Defense/Candidacy Exam

After passing the PhD General Exam, a student works under the guidance of the dissertation committee to prepare a dissertation proposal and defend it orally before the committee. The chair of the dissertation committee must hold Dissertation Advisor Status from the University Graduate School. The proposal defense serves as the doctoral candidacy exam for the PhD program in Global and Sociocultural Studies. Upon passing the proposal defense, a student is admitted to candidacy status.

The Dissertation and Dissertation Defense

After successfully defending a dissertation proposal, a student conducts the proposed research and completes a dissertation under the guidance of a dissertation committee. Only after successfully defending the dissertation proposal may a student register for dissertation hours (ANG7980 Ph.D. Dissertation, GEO7980 Ph.D. Dissertation or SYA7980 Ph.D. Dissertation). The PhD program requires a student to be continuously enrolled in a minimum of 3 credits of Doctoral Dissertation each semester from the time of advancement to candidacy until completion of the dissertation, including summers. Upon completion of the dissertation manuscript and authorization by the committee, a student defends the dissertation before the committee and the university community. The University Graduate School's regulations governing the dissertation are described at **http://gradschool.fiu.edu**.

Other Curricular Offering: MA in Asian Studies and PhD in International Relations Joint Degree Pathway

Students must fulfill the requirements for both programs, and up to 33 credits may count for both degrees. To graduate, students must complete the requirements of the International Relations doctoral program, including the required 75 hours.

In addition to the requirements for the two degrees, during their first two years of enrollment in this combined degree pathway, students will enroll in the following course which fulfills the MA in Asian Studies methods requirement:

--INR5615 Research Design Inr Research Design in International Relations

The following International Relations courses will also be taken by MA in Asian Studies students during the first two years of the program and will count toward the MA:

--INR5609 Contemp Dynam INR Contemporary Dynamics of International Relations
--INR6706 Pol Econ Of Int Rel Political Economy of International Relations

Master of Arts in Asian Studies: 30 credit hours for both the Thesis and Non-Thesis Options

Core Courses: 24 credits

-- 9 credits of ASN 5000 or 6000 courses approved by the director
-- 9 credits pertaining to world affairs
-- 6 credits in Asian area studies

MA in Asian Studies offers two exit options, Thesis or Non-Thesis Master's Essay

Thesis Exit Option: 6 credits

--ASN6972 Master's Thesis Master's Thesis

Non-Thesis Master's Essay Exit Option: 6 credits

--ASN6912 Master's Essay in AS Master's Essay: 3 credits (Master's Essay can be taken multiple times. Some students may be encouraged to develop their research projects by taking this course.)
--one additional course: 3 credits

Doctor of Philosophy in International Relations: 75 credit hours

Core Courses: 15 credits

-- INR5609 Contemp Dynam INR Contemporary Dynamics of International Relations
--INR5615 Research Design Inr Research Design in International Relations
--INR6604 Intl Rels Theory I International Relations Theory I
--INR6608 Contemporary IR Theory Contemporary International Relations Theory

Second methods course from the following list (or another methods course approved by the graduate program director):

--INR XXXX Qualitative and Interpretive Methods in International Relations
--POS5706 Methodology Methodology
--ECO7424 Econometrics Metds I Econometric Methods I
--ANG6480 Ethnohistorical Methods Ethnohistorical Research Methods
--ANG6497 Qual Research Meth Qualitative Research Methods
--GIS5935 Topics in GIS Topics in GIS
--PAD7705 Applied Quant Analysis I Applied Quantitative Analysis I
--PAD7707 Applied Quant Analysis II Applied Quantitative Analysis II
--PAD7703C Empirical Methods Empirical Methods in Public Administration

Gateway courses: 9 credits

There are four major field of study: (1) Global Political Economy and Development (2) Comparative Area Studies (3) Foreign Policy and Security Studies, and (4) Global Governance, International Law and International Ethics. Student must take one gateway course for three of these fields. Gateway courses for each field are:

(1) INR6706 Pol Econ Of Int Rel Political Economy of International Relations
(2) INR5017 Approaches Area Studies Approaches to Area Studies
(3) INR6338 Security Studies Strategic Studies
(4) INR5409 Int'L Law I International Law I or INR5507 Int'L Organizat I International Organizations

Major and Minor Fields: 15 credits

--9 credits in major field of study
--6 credits in minor field of study

Electives: 15 credits

--Additional elective coursework

Comprehensive Exams: 6 credits

Once students have achieved 60 credits, they must sit for written examination on the core sequence of their fields

Dissertation: 15 credits

--INR7980 PH. D. Dissertation PhD Dissertation

Other Curricular Offering: MA in Asian Studies and PhD in History Joint Degree Pathway

Students must fulfill the requirements for both programs, and up to 36 credits may count for both degrees. To graduate, students must complete the requirements of the History doctoral program, including the required 75 hours.

During their first two years of enrollment in this dual degree program, students will enroll in the following coursework which fulfills the MA in Asian Studies requirements:

MA in Asian Studies: 30 credit hours required for both the Thesis and Non-Thesis Master's Essay Options

Core Courses: 24 credits

-- 9 credits of ASN 5000 or 6000 courses approved by the director
-- 9 credits pertaining to world affairs
-- 6 credits in Asian area studies

MA in Asian Studies offers two exit options, Thesis or Non-Thesis Master's Essay

Thesis Exit Option: 6 credits

-- ASN6972 Master's Thesis Master's Thesis

Non-Thesis Master's Essay Exit Option: 6 credits

-- ASN6912 Master's Essay in AS Master's Essay: 3 credits (Master's Essay can be taken multiple times. Some students may be encouraged to develop their research projects by taking this course)
-- one additional course: 3 credits

Students will begin study towards the PhD in History immediately following their satisfactory completion of the MA in Asian Studies degree requirements. Students are expected to meet at the degree requirements for the PhD in History, which requires a total of 75 credits.

Doctor of Philosophy in History

Courses required in addition to the degree requirements for the MA in Asian Studies (minimum 42-45 credits depending on MA Option selected)

-- HIS6906 Adv Rdgs Atl Civ Advanced Readings in Atlantic Civilization: 3 credits
-- HIS6918 Rsch Atlantic Civ Research in Atlantic Civilization: 3 credits
-- 6 credits outside of Asian Studies and Atlantic Civilization (also excluding Methods), 3 credits of which must be in a comparative course (HIS or WOH prefix)
--15-18 credits electives depending on MA option
--HIS7980 PH.D. Dissertation Ph.D. Dissertation: 15 credits

ASNSTD:CFI - Undergraduate Certificate in Asian Studies

Overview

Degree Offered
ACRT - Academic Certificate

Program Title
Certificate in Asian Studies

The Undergraduate Certificate in Asian Studies provides students with a rich learning experience about a fascinating and increasingly important region of the world, and is intended to enhance the student's competitiveness upon graduation. The program provides a multidisciplinary approach covering the philosophy, religion, art history, language, and literature of Asia, as well as issues in history, politics, geography, sociology/anthropology, and international relations.

For more information, visit the Steven J. Green School of International and Public Affairs website.

Admissions Requirements

No specific admissions requirements. Contact advisor for additional information.

This certificate program is open to degree-seeking students only.

Prerequisites

Contact advisor for information about any prerequisites.

Program Requirements

Requirements

The Asian Studies certificate requires a total of eighteen (18) credits and includes the following:

a) Two semesters (6 credits) of Introductory-level (1000) or higher in Chinese, Japanese, Korean or other Asian Language. (First year language courses are 5-credits each, for a total of 10, but a maximum of 6 credits will be applied to the certificate).

b) 12 credits focusing on Asian Studies and Asian Area Studies from the coursework listed below to be chosen with the approval of the Director with a “C” or better, with 6 credits of ASN prefix courses; in addition to the courses listed here, relevant special topics, area studies, or comparative studies courses may also be applied. **These courses represent a partial list; students should consult with an advisor for the certificate program about current course offerings and a full list of courses accepted for the certificate.**

Program Credit Hours: 18

Type

Completion Requirement

Asian Studies Courses: 6 credits

Complete at least 2 of the following courses:

- ASN3016 - China Then and Now
- ASN3125 - Intro to Spirituality of Japan
- ASN3143 - Corporate Culture of China
- ASN3153 - Topics in Korean Culture
- ASN3154 - Traditional and Modern Korea
- ASN3200 - Asia Through Films
- ASN3202 - Japanese Anime and Manga
- ASN3329 - Women in Asian Society
- ASN3403 - Zen and the Art of Tea Ceremony
- ASN3410 - Introduction to East Asia
- ASN3414 - Pop Culture of East Asia
- ASN3503 - Exploring East Asia: Virtual Reality Travel
- ASN3931 - Special Topics in Asian Studies
- ASN4111 - Japan and The New East
- ASN4404 - Zen and the Art of the Tea Ceremony II
- ASN4810 - East Asian Classics to Cool Writings in Translation

Language courses: 6 credits

Complete at least 2 of the following courses:

- CHI1130 - Chinese I
- CHI1131 - Chinese II
- CHI2200 - Intermediate Chinese
- CHI2201 - Intermediate Chinese II
- CHI3440 - Business Chinese
- JPN1130 - Japanese I

ATHLTR:MS - Master of Science in Athletic Training

Overview

Degree Offered
MS - Master of Science

Program Title
Athletic Training

The Master of Science (MS) in Athletic Training degree program is accredited by the Commission on Accreditation of Athletic Training Education (CAATE). The program provides the required educational preparation for a professional career as an athletic trainer, and graduates are eligible to sit for the Board of Certification (BOC) examination.

The curriculum focuses on knowledge and skills in the five domains of athletic training: (1) Risk Reduction, Wellness, and Health Literacy; (2) Assessment, Evaluation, and Diagnosis; (3) Critical Incident Management; (4) Therapeutic Intervention; and (5) Healthcare Administration and Professional Responsibility. Graduates of the program are well-equipped to excel in the field of athletic training.

For more information, visit the Nicole Wertheim College of Nursing and Health Sciences website.

Requirements

Simple Requirements

Admissions Requirements

To be admitted to the professional MS in Athletic Training program, the student must:

(1) Hold a bachelor degree from an accredited institution.

(2) Have a minimum 3.00 GPA average (based on a 4.0 scale) in the last 60 credits of upper division courses of the bachelor degree.

(3) Complete the following prerequisite courses with a minimum grade of "C":

-- General Biology and Lab (4 credits)

-- *Human Anatomy and Lab (4 credits)

-- *Human Physiology and Lab (4 credits)

-- Physics and Lab (4 credits)

-- Nutrition (3 credits)

-- Statistics (3 credits)

-- Psychology (3 credits)

-- Kinesiology or Biomechanics (3 credits)

-- Exercise Physiology (3 credits)

-- Chemistry and Lab (4 credits)
**Or, Anatomy and Physiology I and II with Lab for a total of 8 credits*

(4) Three letters of recommendation (one must be from a faculty member).

(5) A curriculum vitae/resume

(6) A personal statement of professional and educational goals

Application and Admission Processes

Applying for admission to the MS in Athletic Training program is via the Athletic Training Centralized Application Service at: **https://atcas.liaisoncas.com/**

Program Requirements

Academic Progression Requirements

The student must maintain a cumulative GPA of 3.0 in required MS in Athletic Training graduate courses with a minimum grade of "B-" or better in all required courses. Courses in which the athletic training student earns a grade of "C" or below must be retaken. In accordance with the program course sequencing requirements, matriculation in the program is suspended until the student earns a passing grade of"B-" or higher. However, only two courses can be repeated. Any student who earns a grade of "C" or below in more than two courses will be dismissed from the program.

Academic Standing

Good Standing: To achieve and maintain a classification of good standing, the student must maintain a minimum GPA of 3.0 in the courses required for the MS in Athletic Training degree.

Program Credit Hours: 58

Type

Completion Requirement

Semester I - Summer B: 8 credits

Complete ALL of the following Courses:

- ATR5105C - Principles of Athletic Training with Lab
- ATR5115C - Management of Medical Emergencies
- ATR5805 - Clinical Education Seminar in Athletic Training

Semester II - Fall: 11 credits

Complete ALL of the following Courses:

- ATR5217C - Clinical Evaluation and Diagnosis in Athletic Training I

- ATR5305C - Therapeutic Interventions in Athletic Training I
- ATR5815L - Clinical Education I

Semester III - Spring: 11 credits

Complete ALL of the following Courses:

- ATR5218C - Clinical Evaluation and Diagnosis in Athletic Training II
- ATR5316C - Therapeutic Interventions in Athletic Training II
- ATR5825L - Clinical Education II

Semester IV - Summer C: 10 credits

Complete ALL of the following Courses:

- ATR5219C - Clinical Evaluation and Diagnosis in Athletic Training III
- ATR5835L - Clinical Education III
- ATR6620 - Research and Evidence-Based Practice in Athletic Training I

Semester V - Fall: 9 credits

Complete ALL of the following Courses:

- ATR5517 - Administration and Professionalism in Athletic Training
- ATR5845L - Clinical Education IV
- ATR6621 - Research and Evidence-Based Practice in Athletic Training II

Semester VI - Spring: 9 credits

Complete ALL of the following Courses:

- ATR6855L - Clinical Education V
- ATR6935 - Contemporary Issues in Athletic Training

Additional Comments:

All courses must be taken in sequence. Course sequence may be modified by the department.

Graduation Requirements

To be eligible for graduation the student must:

-- Meet all University Graduate School requirements for graduation.

-- Satisfactorily complete all didactic and clinical education requirements within the MS in Athletic Training degree program.

-- Have a minimum graduate GPA of 3.0 in program required courses.

Major Requirements

There are no majors associated with this program.

Track, Specialization, Concentration, Area of Emphasis, or Other Curricular Offering Requirements

There are no tracks, specializations, concentrations, areas of emphasis, or other curricular offerings associated with this program.

ATHTR:DAT - Doctor of Athletic Training

Overview

Degree Offered
DAT - Doctor of Athletic Training

Program Title
Athletic Training

The Doctor of Athletic Training (DAT) program is designed to focus on athletic training globalization, educational leadership, entrepreneurial leadership, scholarly appreciation, and the overall development of advanced practice leaders. The curriculum advances career opportunities by integrating the latest evidence for clinical practice leadership, embracing a diverse and global society, utilizing contemporary approaches for technology, incorporating best practices for lifelong learning and educational endeavors, and entrepreneurship.

Requirements

Simple Requirements

Admissions Requirements

Applicants must have completed formal education in the field of Athletic Training or closely related field (e.g., athletic therapy, sport rehabilitation) at either the bachelor’s or master’s level.

The following criteria must be documented and presented in the application. First is a list that all applicants must complete, followed by specifics depending on highest degree earned:

All Applicants:

1. Proof of athletic training certification through the Board of Certification, or equivalent;
2. Proof of state credential (if applicable in the student’s current state of residence/practice);
3. Three letters of recommendation which focus on applicant’s potential for success in doctoral-level program;
4. Resume or curriculum vitae; and
5. Statement of professional and personal goals to include reasoning for completing the DAT program.

Master's degree (or higher) prepared applicants (any field):

1. Minimum graduate GPA equivalent of a 3.0 on 4.0 scale.

Bachelor-only prepared applicants (no graduate degree):

1. Minimum undergraduate GPA of 3.0 on a 4.0 scale overall or last 60 credits;

2. Minimum two-years full-time athletic training or equivalent work experience as a credentialed professional.

Program Requirements

Students are required to attend a 1-week residency on campus each year.

Program Credit Hours: 48

Type

Completion Requirement

Applied Scholarship Core: 9 credits

Complete ALL of the following Courses:

- ATR7630 - DAT Applied Scholarship I
- ATR7631 - DAT Applied Scholarship II
- ATR7632 - DAT Applied Scholarship III

Entrepreneurial Leadership Core: 12 credits

Complete ALL of the following Courses:

- ATR6507 - Entrepreneurial Leadership in Athletic Training
- ATR6546 - Successful Business Strategies in Athletic Training
- ATR6547 - Financial Planning for Athletic Training
- ATR6548 - Athletic Training Consulting

Academic Leadership Core: 27 credits

Complete ALL of the following Courses:

- ATR6557 - Navigating Academia in Athletic Training
- ATR6555 - Academic Leadership in Athletic Training
- ATR6556 - Curricular Planning & Development in Athletic Training
- ATR6558 - Teaching & Learning Strategies in Athletic Training
- ATR7955 - Athletic Training Globalization
- ATR7806 - DAT Capstone Project

ATR7806 DAT Capstone Project must be repeated 4 times.

Graduation Requirements

To be eligible for graduation from the post-professional DAT program, a student must complete a total of 48 credits. Additionally, a student must be in compliance with the FIU Graduate School graduation requirements to be eligible for graduation.

Major Requirements

There are no majors associated with this program.

Track, Specialization, Concentration, Area of Emphasis, or Other Curricular Offering Requirements

There are no tracks, specializations, concentrations, areas of emphasis, or other curricular offerings associated with this program.

BANK3:CFI - Undergraduate Certificate in Banking

Overview

Degree Offered
ACRT - Academic Certificate

Program Title
Certificate in Banking

The Undergraduate Certificate in Banking allows students to earn 15 to 18 semesters hours beyond an undergraduate degree in accounting, or equivalent, required for Certified Public Accountant licensure, consistent with the Florida State Board of Accountancy education requirement.

For more information, visit the College of Business website.

To explore more about this program, visit the website below:

No specific admissions requirements. Contact advisor for additional information.

This certificate is open to degree-seeking students only.

Program Requirements

Prerequisite Courses: 15 credit hours

Type
Prerequisite

Required Courses

Students must complete all of the following courses, and additionally must have a minimum GPA of 2.75.

Complete ALL of the following Courses:

- FIN3403 - Financial Management
- ACG2021 - Accounting for Decisions

- ECO2013 - Principles of Macroeconomics
- FIN3414 - Intermediate Finance
- FIN4502 - Securities Analysis

Program Credit Hours: 12

Type

Completion Requirement

Required Courses

Complete ALL of the following Courses:

- FIN4486 - Financial Risk Management-Financial Engineering
- FIN4303 - Financial Markets and Institutions
- FIN4324 - Commercial Bank Management
- FIN4345 - Credit Analysis and Loan Evaluation
  OR FIN4663 - Global Private Banking

A grade of “C” or higher is required in each course. Students who receive a grade of “C” or higher in all courses, both prerequisite and core, will have earned and will be presented with a Certificate in Banking. Students wishing to participate in more than one certificate program MAY NOT use the same course(s) to satisfy the requirements.

There are no tracks, specializations, concentrations, areas of emphasis, or other curricular offerings associated with this program.

BANLAI:BBA - Bachelor of Business Administration in Business Analytics and Artificial Intelligence

Overview

Degree Offered
BBA - Bachelor of Business Administration

Program Title
Business Analytics and Artificial Intelligence

The Bachelor of Business Administration (BBA) in Business Analytics and Artificial Intelligence is designed to equip students with the knowledge and skills needed to leverage business analytics and AI powered technologies . This program prepares graduates to analyze complex datasets, develop predictive models, and implement AI solutions responsibly and ethically across industries.

Students will gain expertise in statistical analysis, data visualization, business intelligence, data visualization, machine learning, deep learning, natural language processing (NLP), generative AI and data governance. The program emphasizes practical applications through hands-on experience with cutting-edge business analytics and AI tools.

Graduates will be prepared for entry level business analytics and AI analyst positions in organizations.

For more information, visit the College of Business website.

Admissions Requirements

Admissions and Progression Requirements for All College of Business Undergraduate Students

Applicants must follow regular University admission procedures and upon admission declare their specific program within the College of Business. In addition, students must:

(1) Complete courses detailed under Required Common Prerequisite Courses, or equivalent coursework, noted below, as part of their 60 credit-hours of lower-division course work.

(2) In their initial 60 credit-hours, earn a GPA of 2.0 or higher to continue pursuing a Bachelor of Business Administration and the Bachelor of Accounting degree (a) AA Transfers, (b) Transfers from other SUS institutions, and (c) students changing degree programs must comply with the GPA requirement for the respective degree program.

(3) For the set of all Common Prerequisite Course credit hours, earn a GPA of 2.5 or higher to continue pursuing Bachelor of Business Administration degrees and a GPA of 2.75 or higher to pursue the Bachelor of Accounting degree (a) AA Transfers, (b) Transfers from other SUS institutions, and (c) students changing degree programs to Business from outside the College of Business, must also comply with the 2.5 (or 2.75 Accounting) or higher GPA requirement for the set of Common Prerequisite Course credit hours.

(4) Successfully complete with a C or better each of Common Prerequisite Course within two attempts. Drops after the add/drop period, which result in a DR grade, are considered an unsuccessful attempt at the course, (a) AA Transfers, (b) Transfers from other SUS institutions, and (c) students changing degree programs to Business from outside the College of Business, must also comply with the two attempt limit on Common Prerequisite Courses.

(5) Students are expected to make satisfactory progress toward degree completion during their first 60 credit hours of lower-division coursework, consistent with the Common Prerequisite Benchmarks noted below. Students not making good progress, may be redirected to another degree program. All (a) AA Transfers and (b) students changing degree programs to Business from outside the College of Business must demonstrate progress consistent with Common Prerequisite Benchmarks.

Common Prerequisite Benchmarks include the following:

By End of Term / Credit Hours Earned	Coursework for equivalents Completed	Minimum GPA in Common Prerequisites *
1st /15 hours	CGS 2100 (or PHI 2600)	2.25
2nd / 30 hours	ECO 2023 and MAC 2233	2.35 (2.50 Accounting)
3rd / 45 hours	ACG 2021 and ECO 2013	2.5 (2.75 Accounting)
4lh / 60 hours	ACG 3301 and STA 2023	2.5 (2.75 Accounting)

* Applicable to all students pursuing or seeking a change of program plan to a Bachelor of Business Administration degree and the Bachelor of Accounting.

Students eligible for readmission are subject to the University's and the College's degree program's regulations in effect at the time of readmission to include admissions and progression requirements.

Admissions Requirements for the Combined Bachelor of Business Administration (BBA) in Business Analytics to Master of Science (MS) in Information Systems Accelerated Degree Pathway

(1) Students must be enrolled in the BBA in Business Analytics (BA) degree program.

(2) Students must have completed at least 75, but no more than 90, credits of coursework.

(3) Students must have completed ISM 4400 or equivalent with a B or better.

(4) Students must have an overall (transfer and FIU) GPA of 3.34 or higher.

(5) Students must have two letters of recommendation, with at least one from a member of the FIU Department of Information Systems and Business Analytics.

Admissions Requirements for the Combined Bachelor of Business Administration (BBA) in Business Analytics to Master of Science (MS) in Information Systems Accelerated Degree Pathway

(1) Students must be enrolled in the BBA in Business Analytics (BA) degree program.

(2) Students must have completed at least 75, but no more than 90, credits of coursework.

(3) Students must have completed ISM 4400 or equivalent with a B or better.

(4) Students must have an overall (transfer and FIU) GPA of 3.34 or higher.

(5) Students must have two letters of recommendation, with at least one from a member of the FIU Department of Information Systems and Business Analytics.

Program Requirements

Academic Standards

To earn an undergraduate degree from the College of Business, all students must comply with the following:

(1) Students must earn a grade of “C” or higher in each of the lower-division Common Prerequisite Courses.

(2) Students must earn a grade of “C” or higher in all upper-division major courses.

(3) Students must earn a grade of “C” or higher in all upper-division Business Core Courses. Each of these courses cannot be attempted more than three times. Drops after the add/drop period, which result in a DR grade, are considered an attempt in the course and count as an unsuccessful enrollment.

(4) As a student within the College of Business, each student gets two drops after the add/drop period, which result in “DR” grades, in their first 60 credits attempted. Each College of Business student get two additional drops after the add/drop period, which result in “DR” grades, in the second 60 credits attempted. Unused drops after the add/drop period, which result in “DR” grades, do not carry over from the first 60 credits attempted to the second 60 credits attempted. Students entering the College of Business as transfer students with an A.A. degree from a Florida public college or with 60 or more transfer credits earned from another college or university only get two drops after the add/drop period, which result in “DR” grades. Students with disabilities who need to drop a course due to disability-related reasons are allowed to petition for additional drops after the add/drop period, which result in “DR” grades. Students who can document extenuating circumstances may petition the College for additional drops. Approval to drop additional courses in excess of those allowed must be obtained from the College of Business

(5) Students are expected to follow degree program Major Map in making satisfactory progress toward degree completion. Students deviating from Major Maps may be redirected to another degree program.

(6) Students must satisfy the requirements of their respective programs of study and satisfy all university requirements for graduation.

(7) Students who (a) have 60 credit hours earned, but (b) have not completed the seven Common Prerequisite Course for Business majors, may register for, and/or complete, no more than 15 credit hours of upper-division Business courses.

(8) Undergraduate students who register for any graduate business course must be formally admitted to a graduate degree program at the university following the university's admission procedures.

(9) Faculty has the discretion to administratively drop students who do not attend the first class of a course.

The College adheres strictly to the university’s dismissal policy. Students should be sure to read and understand FIU policies regarding Academic Warnings, Probation, and Dismissals.

Common Prerequisites

Type
Completion Requirement

Required Common Prerequisite Courses Part I

For the set of all Common Prerequisite Course credit hours, earn a GPA of 2.5 or higher to continue pursuing Bachelor of Business Administration degrees and a GPA of 2.75 or higher to pursue the Bachelor of Accounting degree (a) AA Transfers, (b) Transfers from other SUS institutions, and (c) students changing degree programs to Business from outside the College of Business, must also comply with the 2.5 (or 2.75 Accounting) or higher GPA requirement for the set of Common Prerequisite Course credit hours.

Courses which form part of the statewide articulation between the State University System and the Florida College System will fulfill the Lower Division Common Prerequisites.

Please visit https://cpm.flvc.org for a current list of state-approved common prerequisites.

Earn a minimum grade of C in the following:

- ACG2021 - Accounting for Decisions
- ACG2071 - Managerial Accounting
- ECO2013 - Principles of Macroeconomics
- ECO2023 - Principles of Microeconomics
- MAC2233 - Applied Calculus
- STA2023 - Statistical Methods

Additional Comments:

Required Common Prerequisite Courses Part II

Type

Completion Requirement

Required Course

Students pursuing a Bachelor degree in Accounting, Business Analytics, Finance, Information Systems, International Business, Human Resources Management, Management, Marketing, or Real Estate are also required to achieve a grade of "C" or higher in the following course.

Earn a minimum grade of C in the following:

- CGS2100 - Intro to Microcomputer Applications for Business

Required Common Prerequisite Courses Part III

Students admitted in Fall 2012 or after, as freshman or transfer students with fewer than 30 credit hours earned, are encouraged to take GEB 2011 Introduction to Business during their first year. Students admitted in the Fall 2018 or after, as freshman with fewer than 30 credit hours earned, are required to complete SPC 2608 Public Speaking for their Undergraduate Core Curriculum Arts Requirement.

Additional Comments:

Prerequisite course requirements for entry into upper level courses will be enforced. Students will be administratively dropped from courses when they lack the required prerequisite course or courses and/or required grade.

Note: The programs, policies, requirements, and regulations listed in this catalog are subject to continual review in order to meet the needs of the University's various publics and to respond to the mandates of the Florida Board of Education and the Florida Legislature. Changes may be made without advance notice. For the most current and updated information, refer to the COB and appropriate Schools/Departments websites

Required Business Core Courses: 24 credit hours

Type

Completion Requirement

Required Core Courses

The Business Core Courses listed below are required for all undergraduate students in the College of Business. Prerequisites for each of the Business Core Courses can be found in the College of Business course descriptions.

Complete ALL of the following Courses:

- ISM3011 - Artificial Intelligence & Information Systems in Organizations
  OR ACG4401 - Accounting Information Systems
- BUL4310 - The Legal Environment of Business
  OR BUL4320 - Business Law I
- FIN3403 - Financial Management
- MAN3025 - Organization and Management
- MAN4720 - Strategic Management
- MAR3023 - Introduction to Marketing
- QMB3200 - Business Statistics and Analysis I
  OR QMB3250 - AI Enhanced Business Statistics & Analysis I
- QMB4680 - Business Statistics and Analysis II
  OR QMB4250 - AI Enhanced Business Statistics & Analysis II

ACG4401 Acctg Info Systems and BUL4320 Bus Law I should **ONLY** be taken by students pursuing a Bachelor of Accounting.

Required Business Professional Development Courses: 3 credit hours

The business professional development courses listed below are required for all undergraduate students in the College of Business.

Complete ALL of the following Courses:

- COM3112 - Speech and Writing for Business Communication
- GEB3003 - Career Management

Students admitted before Fall 2011 can take either COM 3150 Advanced Business and Professional Communication **or** COM 3110 Business and Professional Communication.

Degree-Specific Courses: 24 credit hours

Complete ALL of the following Courses:

- ISM3230 - Business Application Programming
- ISM4210 - Database Applications
- ISM4211 - Database Systems and Physical Design
- ISM4400 - Managerial Information Analysis
- ISM4402 - Business Intelligence and Reporting
- ISM4420 - Data Mining and Machine Learning for Business
- ISM4421 - Artificial Intelligence for Business
- ISM4314 - Project Management
  OR MAN4583 - Project Management

Upper Division Business Electives: 9 credit hours

Students may complete any electives (9 credits). Recommended Department of Information Systems and Business Analytics electives include the following.

Earn at least 9 credits from the following:

- ISM3153 - Business Process Analysis
- ISM3230 - Business Application Programming
- ISM3949 - Information Systems Internship I
- ISM4113 - Systems Analysis and Design
- ISM4220 - Business Telecommunication Systems
- ISM4421 - Artificial Intelligence for Business
- ISM4452 - Blockchain for Business
- ISM4323 - Information Systems Security
- ISM4949 - Information Systems Internship II

Upper Division Electives: 9 credits

Type

Completion Requirement

Recommended Electives

Students not pursuing the Advanced Business Artificial Intelligence Track may complete any electives (9 credits). Recommended Department of Information Systems and Business Analytics electives include the following.

Earn at least 9 credits from the following:

- ISM3153 - Business Process Analysis

- ISM3949 - Information Systems Internship I
- ISM4113 - Systems Analysis and Design
- ISM4452 - Blockchain for Business
- ISM4323 - Information Systems Security
- ISM4949 - Information Systems Internship II
- ISM4151 - Managing Digital Services and Innovation
- ISM4264 - Cloud Computing for Business Analytics & AI
- ISM4573 - Data Governance
- ISM4601 - Generative AI Applications in Business
- ISM4545 - Advanced Machine Learning For Business

Major Requirements

There are no majors associated with this program.

Track, Specialization, Concentration, Area of Emphasis, or Other Curricular Offering Requirements

Other Curricular Offering: Combined BBA in Business Analytics to MS in Information Systems Accelerated Degree Pathway

The Combined Bachelor of Business Administration in Business Analytics /Master of Science in Information Systems – Business Analytics Track Degree Pathway (BA/MSIS-BA) is designed for outstanding undergraduate students interested in continuing studies beyond their baccalaureate degree. The pathway provides a strong base of knowledge and skills in business analytics, and at the same time accelerates completion of the Master of Science in Information Systems degree. Students may take advantage of the overlap of courses in the BA and MSIS-BA programs to receive their MSIS degree in a shorter period than might otherwise be possible.

A student admitted to the Degree Pathway will be considered to have undergraduate status until conferral of their BBA in Business Analytics degree. Upon conferral of their undergraduate degree, the student will be granted graduate status.

General Requirements

(1) Students must maintain a GPA of 3.0 or greater to remain in the Degree Pathway.

(2) BBA in Business Analytics (BA) degree must be awarded before the Master of Science in Information Systems – Business Analytics Track degree.

(3) No grade below “C” will be accepted in any course taken to satisfy graduate program requirements.

(4) Grade requirements for the Master of Science Information Systems – Business Analytics Track apply to courses counted toward the Master of Science Information Systems – Business Analytics Track degree.

(5) Up to 4 courses (12 credits) may be used in satisfying both the BBA in Business Analytics and Master of Science in Information Systems – Business Analytics Track degree requirements.

(6) Students must fulfill the degree requirements of both the BBA in Business Analytics and Master of Science in Information Systems – Business Analytics Track degree programs, with all overlapping courses approved by both graduate program director and undergraduate advisors before students enroll in such courses.

Advanced Business Artificial Intelligence Track

Type
Completion Requirement

Required Courses

Complete ALL of the following Courses:

BHVNEUR:BS - Bachelor of Science in Behavioral Neuroscience

Overview

Degree Offered
BS - Bachelor of Science

Program Title
Behavioral Neuroscience

The Bachelor of Science (BS) in Behavioral Neuroscience offers a rigorous undergraduate education with an emphasis in clinical, systems and behavioral neuroscience, development, neuroplasticity, mental health disorders, research methodology, statistics and data analysis, plus foundational science, technology, engineering, and mathematics (STEM) courses needed to compete in the fastest-growing medical and scientific careers. Graduates of the BS in Behavioral Neuroscience are prepared for high-demand, thriving careers directly after graduating, including in jobs such as medical, clinical, or research laboratory technicians; medical and health services managers; statisticians; technical writers; market research analysts; substance abuse and behavioral disorder counselors; and health educators, among others. Additionally, students graduating from the program will be prepared for advanced graduate study in neuroscience, medicine, pharmacology, veterinary medicine, neuropsychology, biomedical sciences, brain-machine interface technologies, and various areas within psychology.

For more information, visit the College of Arts, Sciences, and Education website.

Admissions Requirements for the BS in Behavioral Neuroscience with Honors

Application must be made, and departmental approval granted.

Program Requirements

Academic Progression Requirements

Students admitted to the university are admitted directly to their chosen major. Students are expected to make satisfactory progress based on critical indicators, such as GPA in specific courses or credits earned. In cases where students are not making satisfactory progress, a change of major may be required. Advisors work to redirect students to more appropriate majors when critical indicators are not met.

Mathematics Progression Milestone Requirements

The BS in Behavioral Neuroscience requires MAC 2311 (Calculus I) or MAC2233 (Applied Calculus). Students who do not place into Calculus in their first semester must meet the following progression milestones:

1.Students must enroll in a mathematics course every semester (Fall, Spring, and Summer, if needed) until the program's mathematics requirement is completed.

2.Students admitted in the Fall or Summer term must successfully complete MAC 1105 with a grade of C or better by the end of their first Spring term.

3.Students admitted in the Spring term must successfully complete MAC 1105 with a grade of C or better by the end of their first Fall term.

4.No more than two attempts of MAC 1105 are permitted. A grade of DR (Drop) counts as an attempt.

Upper Division

Type

Completion Requirement

Core Courses: 15 credits

Behavioral Neuroscience majors must complete 25 credits of Core and Core Research Sequence courses and 9 credit hours of electives. Students must earn a grade of C or higher in all courses required for the major.

Complete ALL of the following Courses:

- PSB3007 - Introduction to Behavioral Neuroscience
- PSB4823 - Advanced Behavioral Neuroscience
- PSB3101 - Behavioral Neuroscience Methods
- PSB4241 - Clinical Neuroscience
- PSB4200 - Systems Neuroscience

Core Research Courses: 10 credits

Sequence (10 credits which must be taken in the following order)

Complete ALL of the following Courses:

- PSY3211 - Research Methods and Data Analysis in Psychology I
- PSY3215 - Research Methods and Data Analysis in Psychology II
- PSY4931 - Senior Seminar in Psychology

Cellular & Molecular Neuroscience Electives

Complete at least 1 of the following courses:

- PSB3504 - Developmental Neuroscience
- PSB4434 - Neuropharmacology
- PSB4581 - Behavioral Epigenetics
- ZOO4743C - Neuroscience
- ZOO4744 - Neurobiology

Behavioral & Systems Neuroscience Electives

Complete at least 1 of the following courses:

- EXP4204 - Sensation and Perception
- PSB3461 - Hormones & Behavior

- PSB4240 - Neuropsychology
- PSB4250 - Animal Cognition
- PSB4800 - Neurobiology of Learning and Memory
- ZOO4513 - Animal Behavior
  AND ZOO4513L - Animal Behavior Laboratory
- ZOO4781 - Sensory Systems in Neurobiology

Other Behavioral Neuroscience Electives

Choose 1 course from this list or any of the preceding lists of electives to complete the 9 credit electives requirement.

Complete ANY of the following Courses:

- PSB4100 - Introduction to Programming for Neuroscience
- PSB4001 - History of Neuroscience
- PSY4914 - Honors Research Proj
- PSY4916 - Independent Research in Psychology
- PSY4941 - Experiential Learning/Internship in Psychology

Behavioral Neuroscience Honors

Type

Completion Requirement

Students must meet all the degree Program Requirements specified for the BS in Behavioral Neuroscience as well as complete the following course to meet the "Other Behavioral Neuroscience Elective" category

The Bachelor's Degree with Honors is designed for highly motivated students seeking advanced academic and research experiences within the Behavioral Neuroscience major. This option provides rigorous preparation for graduate study and careers in neuroscience, psychology, healthcare, and related fields, which is intended for students demonstrating strong academic performance and interest in research.

Students will undertake an independent research project related to neuroscience, which must be approved by and carried out under the supervision of a full-time faculty member. Upon completion of the project, a satisfactory written thesis and its oral defense of the work must be presented to a faculty committee of at least two members. The Bachelor's Degree with Honors fosters critical thinking, scientific inquiry, and professional communication skills, positioning graduates for success in competitive academic and workforce environments.

Complete ALL of the following Courses:

- PSY4914 - Honors Research Proj

BICOMG:CFI - Undergraduate Certificate in Biodiversity Conservation and Management

Overview

Degree Offered
ACRT - Academic Certificate

Program Title
Undergraduate Certificate in Biodiversity Conservation and Management

The Undergraduate Certificate in Biodiversity Conservation and Management draws on areas of strength within the Department of Earth and Environment and the Department of Biological Sciences to provide students with specialized knowledge about managing and conserving the earth's biological resources. It is designed for students who seek careers in agencies that manage and conserve biological resources, for people in the private sector who seek specialized knowledge in this area, for educators seeking advanced training, or for others interested in the topic. The certificate is managed by the Department of Earth and Environment and the Biodiversity and Conservation Certificate Committee. This certificate program is open to degree-seeking students only.

For more information, visit the College of Arts, Sciences, and Education website.

Admissions Requirements

Students should have completed a minimum of two (2) courses in general biology and one (1) course in ecology as a prerequisite to the program.

This certificate is open to degree-seeking students only.

Prerequisites

Contact advisor for information about any prerequisites.

Program Requirements

Students are required to take 18 credit hours of course work outlined below. Other related courses may be approved subject to consideration by the program director and committee on a case by case basis.

Program Credit Hours: 18

Type

Completion Requirement

Foundational Course

Complete ALL of the following Courses:

- EVR4401 - Conservation Biology

Biological Conservation Sciences Courses: 9 credits

Complete at least 3 of the following courses:

- EVR3013 - Ecology of South Florida
- EVR4323 - Restoration Ecology
- EVR4272 - Agroecology
- OCB4070 - Coastal Marine Conservation
- EVR4592 - Soils and Ecosystems
- PCB4452 - Introduction to Wetland Ecology and Management

For Biological Conservation Sciences, additional upper division courses in environmental studies, agro-ecological sciences, and earth resources in the Department of Earth and Environment and organismal biology in the Department of Biological Science can be counted for this certificate on a case-by-case basis. See catalogue for recent offerings.

Integrated Biological Resource Management Courses: 6 credits

Complete at least 2 of the following courses:

- BOT3810 - Economic Botany
- EVR4026 - Ecology of Biotic Resources
- EVR3723 - Natural Resource Valuation and Economics
- EVR4274 - Sustainable Agriculture
- EVR4352 - U.S. Environmental Policy
- EVR4356 - Coastal and Marine Environmental Policy
- EVR4411 - Human Organizations and Ecosystem Management
- EVR4415 - Population and Environment Issues
- EVR4434 - Sustainable Cities
- PCB4467C - Marine Protected Areas

For Integrated Biological Resources Management, additional upper division courses in environmental studies, agro-ecological sciences, and earth resources in the Department of Earth and Environment and in organismal biology in the Department of Biological Science can be counted for this certificate on a case-by-case basis. See catalogue for recent offerings.

Student must earn a grade of “C” or better in all courses. Students obtaining a BS in Environmental Studies (BS) or a BA in Sustainability and the Environment (BA) and wishing to obtain a Certificate in Biodiversity Conservation and Management must take at least two upper division courses in biological or integrated biological conservation different from those used to satisfy the above BS or BA degree.

There are no majors associated with this program.

Track, Specialization, Concentration, Area of Emphasis, or Other Curricular Offering Requirements

There are no track, specialization, concentration, area of emphasis, or other curricular offerings associated with this program.

BIOCHM:BS - Bachelor of Science in Biochemistry

Overview

Degree Offered
BS - Bachelor of Science

Program Title
Biochemistry

The Bachelor of Science (BS) in Biochemistry prepares students to pursue advanced degrees in biochemistry, chemistry, dentistry, law, medicine, and veterinary care. Students also are prepared to pursue positions in education, government service, industry, and nonprofits. Graduates can perform laboratory research, analyze data, communicate, and comprehend research ideas and results, and understand the biochemical basis of living systems from a biological, chemical, and physical perspective. The program seeks students curious about the inner workings of living systems from different perspectives. For more information, visit the College of Arts, Sciences, and Education website.

Program Requirements

The B.S. in Biochemistry program prepares the student for graduate study or a professional career as a biochemist in industry, in government service, or in secondary school teaching. (Students interested in secondary teacher certification should contact the College of Arts, Sciences and Education Center for Academic Services at (305) 348- 2978.)

Academic Progression Requirements

Students admitted to the university are admitted directly to their chosen major. Students are expected to make good progress based on critical indicators, such as GPA in specific courses or credits earned. In cases where students are not making good progress, a change of major may be required. Advisors work to redirect students to more appropriate majors when critical indicators are not met.

Lower Divison

Type

Completion Requirement

Common Prerequisite Courses

For a list of all state-approved common prerequisites, including alternatives, visit https://cpm.flvc.org.

- Students are required to enroll in a mathematics course in both the Fall and Spring terms and in the Summer term, if needed.
- Students admitted in the Fall or Summer terms must successfully complete MAC 1105 with a grade of C or better by the end of their first Spring term and complete MAC 1147 with a grade of C or better by the end of their second Fall term.
- Students admitted in the Spring term must successfully complete MAC 1105 with a grade of C or better by the end of their first Fall term and complete MAC 1147 with a grade of C or better by the end of their second Spring term.

Students who do not meet this mathematics progression milestone will be redirected to a more appropriate academic program.

Complete ALL of the following Courses:

- BSC2010 - General Biology I
  AND BSC2010L - General Biology I Lab
- BSC2011 - General Biology II: Diversity of Life, Organismal Structure and Function
  AND BSC2011L - General Biology Lab II
- CHM1045 - General Chemistry I
  AND CHM1045L - General Chemistry Lab I
- CHM1046 - General Chemistry II
  AND CHM1046L - General Chemistry Lab II
- CHM2210 - Organic Chemistry I
  AND CHM2210L - Organic Chemistry Lab I
- CHM2211 - Organic Chemistry II
  AND CHM2211L - Organic Chemistry Lab II
- PHY2048 - Physics with Calculus I
  AND PHY2048L - General Physics Laboratory I
- PHY2049 - Physics with Calculus II
  AND PHY2049L - General Physics Laboratory II
- MAC2311 - Calculus I
- MAC2312 - Calculus II

Either the General Physics sequence or the Organic Chemistry Sequence must be taken at the lower division. Whichever is not taken must be taken before the degree is granted.

Upper Division

Type

Completion Requirement

Upper Division Courses: 60 credits

Students must earn 60 credits, 48 of which must be 3000 level courses and above.

Complete ALL of the following Courses:

- CHM3120 - Introduction to Analytical Chemistry
  AND CHM3120L - Introduction to Analytical Chemistry Lab
- CHM3410 - Physical Chemistry I
- CHM3411 - Physical Chemistry II
- CHM4304 - Biological Chemistry I
  AND CHM4304L - Biological Chemistry I Lab
- CHM4307 - Biological Chemistry II
  AND CHM4307L - Biological Chemistry Lab II
- CHM4910L - Undergraduate Research in Chemistry
  OR BCH4910L - Undergraduate Research in Biochemistry
- CHM4930 - Senior Seminar
- MCB3020 - General Microbiology
  AND MCB3020L - General Microbiology Lab
- PCB3063 - Genetics
  AND PCB3063L - Genetics Lab

Upper Division Electives

Complete ALL of the following Courses:

- CHM3410L - Physical Chemistry Lab I
- CHM3411L - Physical Chemistry Lab II
- CHM4220 - Advanced Organic Chemistry
- CHM4230L - Structure Determination Lab
- CHM4300 - Bio-Organic Chemistry
- CHS4100 - Radiochemistry
  AND CHS4100L - Radiochemical Techniques Lab
- CHS4430 - Introduction to Chemical Toxicology
- MCB4503 - Virology
- PCB4023 - Cell Biology
- PCB4023L - Cell Biology Lab
- PCB4233 - Immunology

CHM4130 Instrument Analysis and CHM4130L Instr Analysis Lab may be used as a substitute for CHM3410L Phys Chm Lab I and CHM3411L Phys Chem Lab II. Whichever pair not used may also be used toward your upper division elective.

Other appropriate courses may be used as elective with department/program approval.

Major Requirements

There are no majors associated with this program.

Track, Specialization, Concentration, Area of Emphasis, or Other Curricular Offering Requirements

There are no track, specialization, concentration, area of emphasis, or other curricular offerings associated with this program.

BIOCHM:PHD - Doctor of Philosophy in Biochemistry

Overview

Degree Offered
PHD - Doctor of Philosophy

Program Title
Biochemistry

The PhD in Biochemistry is an interdisciplinary program administered jointly by the Department of Chemistry and Biochemistry, the Department of Biological Sciences, and the Herbert Wertheim College of Medicine. This structure allows for interactions among students, postdoctoral fellows, and faculty across multiple disciplines. Students have access to highly accomplished biochemistry faculty on campus. The program offers rigorous training in biochemistry, biophysics, and molecular biology, enabling graduates to pursue careers in government, biotechnology, and academia.

For more information, visit the College of Arts, Sciences, and Education website.

To explore more about this program, visit the website below:
Program Website

Academic Group
College of Arts, Sciences, and Education

Diploma Title
Doctor of Philosophy in Biochemistry

Total Credits
75

Program Length in Years Based on Full-Time Enrollment
5

CIP Code
26.0202

Requirements

Simple Requirements

Admissions Requirements

(1) Hold a BS degree in Biology or Chemistry or the equivalent from an accredited college or university. Previous completion of at least 28 credits, including labs, of chemistry or biology courses at the upper division level is required. The following courses are recommended as background regardless of undergraduate major: biochemistry or molecular biology, two semesters of organic chemistry, and two semesters of general biology. Students are expected to have taken either physical chemistry or genetics as an undergraduate. Students not having taken at least one of these courses will be required to make up this deficiency either before or during their first year of graduate study by taking appropriate coursework.

(2) A GPA of at least 3.0 (on a four-point scale) during the last 60 credits of the undergraduate program.

(3) Three letters of recommendation evaluating the applicant’s potential for graduate and research work.

(4) A statement of purpose/research interests.

(5) Receive approval from the Biochemistry Graduate Committee.

(6) Foreign students whose native language is not English must obtain a score of 80 or higher on the TOEFL iBT or 550 on the paper TOEFL or a 6.5 on the IELTS.

Program Requirements

The PhD in Biochemistry requires a minimum 75 semester hours beyond the baccalaureate degree. The Dissertation Advisor and Committee will assist the student to choose a curriculum suitable to the student's interests, goals and background. This will include selection of electives as well as suggestions for other courses that may be needed to develop skills critical for the student's research and career goals, especially quantitative skills. A grade of C or higher must be earned in all courses.

Program Credit Hours: 75

Type

Completion Requirement

Required Core Courses: 16 credits

Complete ALL of the following Courses:

- BCH6831 - Introduction to Biochemical Research
- BCH6108 - Biochemical Techniques
- CHM6036 - Advanced Biochemistry I
- PCB6025 - Molecular and Cellular Biology I
- CHM6037 - Advanced Biochemistry II (Molecular Genetics)
  OR PCB6027 - Molecular and Cellular Biology II
- CHM6802 - Research Ethics

Biochemistry Graduate Seminar Requirement

Complete ALL of the following Courses:

- BCH7930 - Biochemistry Graduate Seminar

Full time graduate students are required to register for BCH7930 Biochem Graduate Seminar each fall and spring semester. Prior to Advancement to Candidacy they will register for 1 credit of BCH7930 Biochem Graduate Seminar each semester. After the student has advanced to candidacy, the student will register for the 0 credit course each semester.

Additional Required Courses: 22 credits

Students must complete a minimum of 15 credits of PhD Dissertation.

Complete ALL of the following Courses:

- BSC5945 - Supervised Teaching in Biology
  OR CHM6940 - Supervised Teaching
- BSC6913 - Student Research Lab
  OR CHM6910L - Graduate Research in Chemistry
- CHM7910 - Dissertation Research
- BSC7980 - Ph.D. Dissertation
  OR CHM7980 - PH.D. Dissertation

Electives

As the PhD degree requires 75 credits post bachelor degree, electives are chosen based on an academic plan designed to fulfill all degree requirements.

Complete ANY of the following Courses:

- BSC6415 - Animal Cells in Culture (Inactive)
- BSC6415L - Cell Culture Lab (Inactive)
- CHM5302 - Organic Chemistry of Nucleic Acids (Inactive)
- CHM5325 - Physical Chemistry of Proteins (Inactive)
- CHM5351 - Modeling Biomolec (Inactive)
- CHM5440 - Kinetics & Catalyst (Inactive)
- CHM5503 - Physical Chemistry of Nucleic Acids (Inactive)
- CHM5506 - Physical Biochemistry (Inactive)
- CHS5536 - Forensic DNA Chemistry
- MCB6935 - Advanced Topics in Microbiology
- PCB5665 - Human Genetics (Inactive)
- PCB5665L - Human Genetics Lab (Inactive)
- PCB5725 - Membr Signal Transd (Inactive)
- PCB5786 - Membrane Physiology (Inactive)
- PCB6236 - Comparative Immunology (Inactive)
- PCB6526 - Advanced Molecular Biology (Inactive)
- PCB6566 - Chromosome Struct (Inactive)
- PCB6787 - Membrane Biophysics (Inactive)
- PCB6935 - Advanced Topics in Genetics (Inactive)
- BCH6130C - Workshop in DNA Synthesis and Amplifications (Inactive)
- BCH6132C - Ws:Electrophoresis (Inactive)
- BCH6133C - Workshop in DNA Sequencing
- MCB5315C - Workshop: Prokaryotic Cloning (Inactive)

Rotation and Choosing an Advisor

Students will spend 4-5 weeks in the laboratories of three Biochemistry faculty. Some flexibility in length of rotation is acceptable. In most cases, the rotations will be completed during the first semester of study, but an extension into the second semester is possible. At the end of each rotation, the student and the faculty member will complete an evaluation form. After completing a minimum of three rotations, students will submit an ordered list of three advisors they would like to work with. The Biochemistry Graduate Committee will make the research advisor assignments.

Supervised Teaching

Two semesters of supervised teaching or documentation of the equivalent amount of teaching experience is required.

Complete ALL of the following Courses:

- BSC5945 - Supervised Teaching in Biology
- CHM6940 - Supervised Teaching

Completion of Candidacy Exam Requirement

The Candidacy Exam consists of two parts: 1) a written Qualifying Examination and 2) presentation of an Original Research Proposal followed by a Preliminary Oral Exam. The written Qualifying Exam will be administered at the end of the third semester of study (excluding summers), by which time all core courses should have been completed. The exam will be designed primarily to test material mastered in core courses. After passing the written Qualifying Exam, the student will present and defend an original research proposal (on a topic not related to the student's specific doctoral research project) and undergo an oral exam.

Presentation of Formal Proposal of the Dissertation Topic

Each student must present a public seminar on their proposed research.

Complete ANY of the following Courses:

- BSC7961 - Dissertation Proposal Seminar
- CHM6936 - Chemistry Colloquium

Submission and Defense of Dissertation

All students must submit a dissertation based upon original research in biochemistry. After submission of the dissertation and completion of all other prescribed work, the candidate will give a public presentation of the completed research and be given a final oral examination by the Dissertation Committee.

Major Requirements

There are no majors associated with this program.

Track, Specialization, Concentration, Area of Emphasis, or Other Curricular Offering Requirements

There are no tracks, specializations, concentrations, areas of emphasis, or other curricular offerings associated with this program.

BIOCMG:CFI - Graduate Certificate in Biodiversity Conservation and Management

Overview

Degree Offered
ACRT - Academic Certificate

Program Title
Graduate Certificate in Biodiversity Conservation and Management

The Graduate Certificate in Biodiversity Conservation and Management draws on areas of strength within the Department of Earth and Environment and the Department of Biological Sciences to provide students with specialized knowledge about managing and conserving the earth's biological resources. It is designed for students who seek careers in agencies that manage and conserve biological resources, for people in the private sector who seek specialized knowledge in this area, for educators seeking advanced training, or for others interested in the topic. The certificate is managed by the Department of Earth and Environment and the Biodiversity and Conservation Certificate Committee. This certificate program is open to degree-seeking students only.

For more information, visit the College of Arts, Sciences, and Education website.

To explore more about this program, visit the website below:

03.0103

Requirements

Simple Requirements

Admissions Requirements

Students must have an earned bachelor's degree with a minimum GPA of 2.75 in the last 60 credits of their upper division coursework. Students must be in good academic standing. Students should have completed a minimum of two (2) courses in general biology and one course in ecology as a prerequisite to the program.

This certificate is open to degree-seeking students only.

Prerequisites

Contact advisor for information about any prerequisites.

Program Requirements

Students obtaining an MS in Environmental Studies and wishing to obtain a graduate Certificate in Biodiversity Conservation and Management must take at least one graduate level course in biodiversity or integrated biodiversity conservation fields different from that used to satisfy the MS degree.

Program Credit Hours: 15

Type

Completion Requirement

Foundational Course

Complete ALL of the following Courses:

- EVR5409 - Advanced Conservation Biology

Conservation Sciences and Management Courses: 6 credits

Complete at least 2 of the following courses:

- EVR5069 - Wetland Ecology and Management
- EVR5375 - Advanced Restoration Ecology
- SWS5305 - Advanced Soil Resources Analysis

Integrated Biological Resources Management Courses: 6 credits

Complete at least 2 of the following courses:

- PCB5418C - Advanced Marine Protected Areas
- EVR5360 - Protected Area Management
- EVR6330 - Tropical Ecosystems Management

Additional Comments:

F**or Conservation Sciences and Management and Integrated Biological Resources Management, additional graduate level courses in environmental studies, agro-ecological sciences, and earth resources in the Department of Earth and Environment and in organismal biology in the Department of Biological Science can be counted for this certificate on a case-by-case basis. See catalog for recent offerings.**

BIOL:BA - Bachelor of Arts in Biological Sciences

Overview

Degree Offered
BA - Bachelor of Arts

Program Title
Biological Sciences

The Bachelor of Arts (BA) in Biological Sciences provides a biology background and tools for success in a variety of fields. The program is designed to prepare students for further graduate and professional studies, as well as for employment in areas that require university-level training in the life sciences. Available areas for specialization include Allied Health Profession; Science Communication; Education; Bioentrepreneur; and Health Policy, Environmental Policy, and Pre-Law.

For more information, visit the College of Arts, Sciences, and Education website.

Common Prerequisite Courses

For a list of all state-approved common prerequisites, including alternatives, visit https://cpm.flvc.org.

Fulfill ALL of the following requirements:

Common Prerequisites: Sciences

Complete ALL of the following Courses:

- BSC2010 - General Biology I
- BSC2010L - General Biology I Lab
- BSC2011 - General Biology II: Diversity of Life, Organismal Structure and Function
- BSC2011L - General Biology Lab II
- CHM1045 - General Chemistry I
- CHM1045L - General Chemistry Lab I
- CHM1046 - General Chemistry II
- CHM1046L - General Chemistry Lab II
- PHY2053 - Physics without Calculus I

AND

Common Prerequisites: Math

Fulfill ANY of the following requirements:

Option 1

Complete ALL of the following Courses:

- MAC1147 - Pre-Calculus Algebra and Trigonometry

OR

Option 2

Complete ALL of the following Courses:

- MAC1140 - PreCalculus Algebra
- MAC1114 - Trigonometry

Other Degree Requirements

Complete ALL of the following Courses:

- STA2023 - Statistical Methods

Degree Program Credit Hours: 120

Type

Completion Requirement

Biology Degree Core Courses

Complete ALL of the following Courses:

- BSC3848 - Junior Seminar in Biology: Evidence, Communication, and Careers
- BCH3034 - Cellular Chemistry
- PCB3043 - Ecology
- PCB3063 - Genetics
- PCB4674 - Evolution

Biology Electives

Students must complete four (4) lecture courses from the acceptable Upper Division Biology Electives maintained by the Biology Department. The four (4) lecture courses may be chosen at the student's discretion from courses in any of the distribution areas.
The following courses are not allowed as Biology Electives: Student Research Labs (BSC3915 Student Research Lab and BSC4914 Student Research Lab); Cooperative Education credits; Biology of Women; Research Methods in Biological Sciences (BSC3910 Biology Research Methods); Forensic Veterinary courses (BSC4480 Intro Medicolegal Invest, BSC4481 Vet Medico Death Invest, BSC4482 Foren Animal Cruelty Inv) and courses for non-science majors (BOT1010 Introduction to Plants, MCB2000 Intro Microbiology, BSC2023 Human Biology, EVR3013 Ecology Of S. Fla, OCB2000 Intro Marine Biol, and OCE3014 Oceanography).

Biology Laboratory Requirement

Earn two (2) credits in Upper Division Labs

Upper Division General Electives or Track Specific Courses: 18 credits

Students must take 18 credits of upper division courses or select one of the specified tracks in Track Requirements. Alternatively, students can complete a minor offered by a different department. If additional credits are needed to complete a minor, students can use General Electives credits.

Additional Comments:

Major Requirements

There are no majors associated with this program.

Track, Specialization, Concentration, Area of Emphasis, or Other Curricular Offering Requirements

Allied Health Profession Track: 18 credits

Type
Completion Requirement

Courses

Earn at least 18 credits from the following:
- ANT3462 - Medical Anthropology
- ANT4480 - Anthropological Approaches to Global Health
- APK3110 - Exercise Physiology I
- CLP4146 - Psychopathology
- DEP2000 - Human Growth and Development: Introductory Developmental Psychology

- ECO4504 - Introduction to Public Finance
- HIS4492 - A History of U.S. Health Policy (Inactive)
- PAD3034 - Policy Development and Implementation
- PCB3703 - Human Physiology I
- PCB3703L - Human Physiology Lab I
- POS3424 - The Legislative Process
- HSC3537 - Medical Terminology
- HSC3549 - Clinical Physiology for Health Professionals
- HSC4553 - Fundamentals of Pathology
- APK4141 - Applied Biomechanics in Sport and Exercise Science
- PSY2012 - Introductory Psychology
- ZOO3731 - Human Anatomy
- ZOO3731L - Human Anatomy Demonstration

Health Policy, Environmental Policy and Pre-Law Track: 18 credits

Type

Completion Requirement

Courses

Earn at least 18 credits from the following:

- AMH3630 - Environmental History of the United States
- CJL3512 - The Courts
- CJL4064 - Criminal Justice and the Constitution
- COM4462 - Conflict Management
- ECP3302 - Introduction to Environmental Economics
- ENC3311 - Advanced Writing and Research
- ENC3354 - Writing as Social Action
- ENC3371 - Rhetorical Theory and Practice
- ENC4331 - Writing, Rhetoric, and Community
- ENC4930 - Special Topics in Composition
- GEO4354 - Geography of the Global Food System
- INR4350 - International Environmental Politics
- PAD3034 - Policy Development and Implementation
- PHI2100 - Introduction to Logic
- PHI2103 - Critical Thinking
- PHI4130 - Symbolic Logic
- POS3283 - The Judicial Process
- POS3603 - Constitutional Law: Powers
- POS3604 - Constitutional Law: Limitations
- POS4784 - Analytic Writing in Political Science
- REL3492 - Earth Ethics
- SPC2237 - Rhetorical Communication: A Theory of Civil Discourse
- SPC3540 - Persuasion

Science Communication Track: 18 credits

Type
Completion Requirement

Courses

Earn at least 18 credits from the following:

- COM3110 - Business and Professional Communication
- ENC3213 - Professional and Technical Writing
- ENC3311 - Advanced Writing and Research
- ENC3416 - Writing and New Media
- ENC4241 - Scientific Writing
- ENC4260 - Topics in Professional Writing
- ENC4357 - How To Go Public
- IDS2301 - How We Know What We Know
- MMC3650 - Media and Sustainability
- MMC4936 - Special Topics
- JOU3314 - Environmental Journalism: Communicating Environmental Issues in South Florida

Bioentrepreneur Track: 18 credits

Type
Completion Requirement

Courses

Complete ALL of the following Courses:

- ACG3024 - Introduction to Accounting for Managers and Investors
- FIN3005 - Introduction to Business Finance
- ISM3012 - Introduction to Information Systems
- MAN3022 - Introduction to Management
- COM3110 - Business and Professional Communication
  OR HSA3111 - Introduction to Health Services Systems

Biology Education (FIUteach) Track (29 credits)

Type
Completion Requirement

Courses

Complete ALL of the following Courses:

- SMT2661 - Step 1: Inquiry Approaches to Teaching Mathematics and Science
- SMT2662 - Step 2: Inquiry-Based Lesson Design in Mathematics and Science
- BSC3910 - Research Methods in Biological Sciences
- SMT3100 - Knowing, Learning, and Adolescent Development in Mathematics and Science
- SMT4301 - Classroom Management and Interactions in STEM
- SMT4664 - Educational Assessment and Project-Based Instruction in Mathematics and Science
- SCE4194 - Perspectives in Science and Math Education
- SCE4944 - Student Teaching

- RED4325 - Subject Area Reading
- TSL4324 - ESOL Issues and Strategies for Content Area Teachers

Students may take SMT2044 STEP 1&2 Lesson Math and Sci as a substitute for SMT2661 STEP 1 Teach Math and Sci and SMT2662 STEP 2 Lesson Math and Sci.

Additional Comments:

Early Clinical Experiences (Field Hours)

Many courses offered by the Department of Teaching and Learning require completion of clinical experiences (field hours) in approved K–12 school settings under the supervision of a classroom teacher and FIU faculty member. See course descriptions for specific details. In accordance with the Jessica Lunsford Act, students completing clinical experiences must undergo fingerprinting and a background check at the students' own expense. Students will not be allowed to enter a school campus without the necessary clearance. All clinical experiences and the Student Teaching internship must be completed at schools affiliated with FIU, including but not limited to Miami-Dade County Public Schools and Broward County Public Schools. Placements are coordinated through the FIU Office of Clinical Experiences. Students may not arrange placements independently.

Student Teaching

Student Teaching is the semester-long, full-time, culminating clinical experience for candidates in Initial Teacher Preparation Programs. Placements are made in the fall and spring semesters and are contingent upon successful completion of all required coursework and Florida Teacher Certification Examinations. More information about clinical experiences (field hours) and the Student Teaching application process, including deadlines and the online application, is available on the Clinical Experiences | FIU College of Arts, Sciences & Education website. Students must pass all four sections of the FTCE General Knowledge Test to be eligible to apply. The test may be waived if the student achieves qualifying scores, as set by the state, on approved alternative assessments (SAT, ACT, GRE, or CLT). Students should contact their academic advisor to verify their eligibility for a waiver.

For questions, contact the FIU Office of Clinical Experiences at 305-348-2082, email ClinicalExperiences@fiu.edu, or visit the Ziff Education Building (ZEB), Room 130.

BIOL:BS - Bachelor of Science in Biological Sciences

Overview

Degree Offered
BS - Bachelor of Science

Program Title
Biological Sciences

The Bachelor of Science (BS) in Biological Sciences provides students with a foundation of knowledge and skills in diverse areas of biology, including ecology, genetics, molecular and cell biology, evolution, organismal diversity, and physiology/biochemistry. This degree is ideal for students who plan to pursue graduate studies and careers in botany, zoology, ecology, molecular and cellular biology, biomedical research, healthcare, natural resource management and nonprofits, or forensic science.

Available areas for specialization include Tracks in Biotechnology, Forensic Biomolecular Biology, and Quantifying Biology in the Classroom (QBIC), and Biological Sciences with Honors. There is also a major in Biology Education FIU Teach). Pre-health curricula and advising for students planning to go into healthcare-related careers is also available. For more information, visit the College of Arts, Sciences, and Education website.

To explore more about this program, visit the website below:

Requirements

Simple Requirements

Admissions Requirements

Admissions Requirements for the Bachelor of Science (BS) in Biological Sciences

See general university admission requirements at admissions.fiu.edu.

Admissions Requirements for the Biology Education Major (FIUteach)

To qualify for admission to the program, undergraduate candidates must have met all of the lower division requirements including: 60 credit hours of lower-division courses, all general education requirements, lower division GPA of 2.5 higher, and achieve the competencies of the FTCE General Knowledge Exam (GK). All students must pass the GK Exam by the time they reach 72 credit hours in their program of study. All stated admission requirements are to be considered minimum. A student who meets these minimum requirements is not automatically assured admission. Program admission requirements are subject to change. It is the responsibility of the student to assure that he/she has met the requirements.

Admissions Requirements for the Quantifying Biology in the Classroom (QBIC) Track

For consideration for QBIC track admission entering freshman must have ⩾3.3 GPA (unweighted), ⩾1750 SAT with MATH ⩾600, have completed Precalculus Math (or Algebra and Trigonometry) and have an interest in pursuing graduate studies (MD, DVM, DDS, PhD, MD/PhD). Transfer and continuing FIU students can apply on a space available basis if they have maintained ⩾3.3 GPA in college-level work and have completed Calculus I with a grade above ‘B-‘. QBIC students are required to maintain cumulative GPA above 3.0.

Admissions Requirements for the BS with Honors in Biology

Permission of the department. Application should be made by letter to the Honors Committee from the applicant after completion of two semesters at the University and prior to two semesters before graduation. The letter should state the intended research problem and be countersigned by the Thesis Committee (advisor and mentor).

A minimum GPA of 3.5 in biology, chemistry, physics, geology, and mathematics courses.

Admissions Requirements for the 7-Year BS in Biology and Doctor of Medicine (MD) Accelerated Degree Pathway

(1) Must be in the senior year of high school (HS) when applying or have completed HS but did not matriculate to college immediately after HS graduation (First Time in College- FTIC). Transfer students and currently enrolled students are not eligible to apply. Neither are dual enrollment FTICs who enter FIU with an AA degree.

(2) Admissions to FIU and to The Honors College. Prospective students will apply to FIU from HS and indicate the Biology BS. They can then apply to the Honors College. Depending on credentials of the students, they may be invited to the Honors College directly. The students can then accept the Honors College invitation and can then apply for this 3 + 4 program.

(3) Successful interview with The Honors College and HWCOM prior to first semester/Freshman year

(4) US Citizen or US Permanent Resident

(5) SAT score (critical reading and math) of 1350 with no section below 600, or ACT Composite of 31

(6) Unweighted high school GPA of 3.7.

(7) Must have completed four HS units of English and math and at least one HS unit of biology and chemistry at a HS located in the US. Successful completion of Advanced Placement/International Baccalaureate courses is encouraged.

(8) Letter from a HS counselor Once accepted into the program, students meet regularly with their advisors to make sure that yearly milestones of GPA, research, and community service are met in order to continue in the program. The medical school application process is through AMCAS. Students who have met all GPA, MCAT and extra-curricular requirements apply to HWCOM on AMCAS prior to October 1 of their third undergraduate year.

Program Requirements

Academic Progression Requirements

Students admitted to the university are admitted directly to their chosen major. Students are expected to make satisfactory progress based on critical indicators, such as GPA in specific courses or credits earned. In cases where students are not making satisfactory progress, a change of major may be required. Advisors work to redirect students to more appropriate majors when critical indicators are not met.

Lower Division Preparation

Type

Completion Requirement

Common Prerequisites

Please visit https://cpm.flvc.org for a current list of state-approved common prerequisites.

A grade of "C" or better required.

Complete ALL of the following Courses:

- BSC2010 - General Biology I
  AND BSC2010L - General Biology I Lab
- BSC2011 - General Biology II: Diversity of Life, Organismal Structure and Function
  AND BSC2011L - General Biology Lab II
- CHM1045 - General Chemistry I
  AND CHM1045L - General Chemistry Lab I
- CHM1046 - General Chemistry II
  AND CHM1046L - General Chemistry Lab II
- CHM2210 - Organic Chemistry I
  AND CHM2210L - Organic Chemistry Lab I
- CHM2211 - Organic Chemistry II
  AND CHM2211L - Organic Chemistry Lab II
- PHY2048 - Physics with Calculus I
  OR PHY2053 - Physics without Calculus I
- PHY2049 - Physics with Calculus II
  OR PHY2054 - Physics W/O Calc II
- PHY2048L - General Physics Laboratory I
- PHY2049L - General Physics Laboratory II
- MAC2311 - Calculus I
- MAC2312 - Calculus II
  OR STA2023 - Statistical Methods

For common prerequisites, students must complete either the organic chemistry sequence or the physics sequence. However, students must complete both Organic Chemistry and Physics sequences to fulfill degree requirements.

Physics without Calculus I and II and corresponding labs can be substituted (PHY2053 Physics W/O Calc I and PHY2054 Physics W/O Calc II).

Statistics II is required for students who do not take Calculus II.

The Department of Biological Sciences does not accept MAC2233 Applied Calculus (Calculus for Business) as a substitute for MAC2311 Calculus I (Calculus I).

Other Degree Requirements

Students are required to complete both Organic Chemistry I & II and Physics I & II. Students may complete either sequence as part of the Lower Division Common Prerequisites and must complete the other sequence as a requirement for the degree.

Complete ALL of the following Courses:

- STA3123 - Statistics for Behavioral and Social Sciences II

Required only for students who did not take Calculus II.

Degree Program Credit Hours: 120

Type
Completion Requirement

Core Courses in Biological Sciences: 13 credits

IMPORTANT - Completion of this requirement is necessary for all students completing the degree, including those pursuing the tracks or major: **Quantifying Biology in the Classroom (QBIC), Biotechnology, Forensic Biomolecular Biology, and Biology Education Major (FIUteach)**.

Complete ALL of the following Courses:

- BSC3848 - Junior Seminar in Biology: Evidence, Communication, and Careers
- PCB3043 - Ecology
- PCB3063 - Genetics
- PCB4023 - Cell Biology
- PCB4674 - Evolution

For students in the **Quantifying Biology in the Classroom (QBIC) Track, students must substitute** BSC3848 Junior Seminar in Biology with BSC4927 QBIC Science Cafe.

Distribution Requirement

Students must select one (1) additional lecture course in each of the following areas:

Fulfill ALL of the following requirements:

A. Ecology

Complete at least 1 of the following courses:

- BOT4601 - General Plant Ecology
- BSC4303 - Biogeography
- BSC4304 - Environments of the Past
- BSC4363 - Biodiversity in the Caribbean Basin
- MCB4603 - Microbial Ecology
- OCB3043 - Marine Biology and Oceanography
- OCB3075C - Mariculture for Conservation and Restoration
- OCB3264 - Coral Reef Biology
- OCB4004 - Biological Oceanography at Sea I
- OCB4005C - Biological Oceanography at Sea II
- OCB4070 - Coastal Marine Conservation
- OCB4104C - Field Methods in Marine Ecology
- OCB4633 - Marine Community Ecology
- OCB4711 - Fisheries Science
- PCB3374 - Tropical Ecology
- PCB4301 - Freshwater Ecology
- PCB4401 - Global Change Ecology: How humans changed the face of Earth
- PCB4403C - Urban Vector Biology
- PCB4414 - Behavioral Ecology
- PCB4452 - Introduction to Wetland Ecology and Management
- PCB4462C - Introduction to Landscape Ecology with GIS
- PCB4467C - Marine Protected Areas
- PCB4553 - General Population Genetics
- PCB4673 - Evolutionary Ecology

- PCB4932 - Topics in Ecology
- ZOO4513 - Animal Behavior

AND

B. Organismal Diversity

Complete at least 1 of the following courses:

- BOT3154 - Local Flora
- BOT3663 - Tropical Botany
- BOT3810 - Economic Botany
- BOT4402 - Marine Botany
- BOT4404C - Phycology
- BOT4684 - Taxonomy Of Tropical Plants
- BSC3400 - Wildlife Conservation, Forensic and Crime Science
- BSC4205 - Topics in Organismal Diversity
- BSC4434 - Bioinformatics for Biologists
- ENY4060 - Entomology
- MCB3020 - General Microbiology
- MCB4022 - Diversity of Microbes
- OCB4303 - Biology of Marine Mammals
- PCB4676 - Human Evolution
- ZOO3205C - Invertebrate Zoology
- ZOO3303 - Vertebrate Zoology
- ZOO4234 - General Parasitology
- ZOO4454 - Fish Biology
- ZOO4462C - Herpetology
- ZOO4484 - Primate Biology

AND

C. Physiology/Biochemistry

Complete at least 1 of the following courses:

- BCH3033 - General Biochemistry
- BOT4503 - Plant Physiology
- BSC4443 - Functional Genomics and Proteomics
- MCB4503 - Virology
- PCB3702 - Intermediate Human Physiology
- PCB3703 - Human Physiology I
- PCB3704 - Human Physiology II
- PCB4232 - The Biology of Acquired Immune Deficiency Syndrome (AIDS)
- PCB4233 - Immunology
- PCB4234 - Biology of Cancer
- PCB4524 - Molecular Biology
- PCB4717 - Topics in Physiology/Biochemistry
- PCB4723 - Animal Physiology
- PCB4724 - Comparative Physiology

- PCB4776 - Physiological and Behavioral Ecology of Marine Animals
- PCB4805 - Endocrinology
- PCB4810 - Biology of Stress
- ZOO4744 - Neurobiology
- ZOO4781 - Sensory Systems in Neurobiology

AND

D. Structure/Development

Complete at least 1 of the following courses:

- BOT3353 - Morphology of Vascular Plants
- BSC4401 - Principles of Forensic Biology
- BSC4422 - Biotechnology: Applications in Industry, Agriculture and Medicine
- PCB3660 - Sex, Gender, and Orientation: A Biological Perspective
- PCB4133 - Topics in Structure/Development
- PCB4253 - Developmental Biology
- PCB4561 - Epigenetics
- PCB4663 - General Human Genetics
- ZOO3603 - Embryology
- ZOO3713C - Comparative Vertebrate Anatomy
- ZOO3731 - Human Anatomy
- ZOO3753 - Histology
- ZOO4733 - Survey of Regional Anatomy
- ZOO4743C - Neuroscience

Biology Upper Division Lectures

Two upper division lecture courses (3000-level and above) to be chosen at the student's discretion from courses in any of the distribution areas.

Earn at least 6 credits
The following courses are not allowed as Biology Electives: Cellular Chemistry (BCH3034), Student Research Labs (BSC3915, and BSC4914); Cooperative Education credits; Biology of Women; Research Methods in Biological Sciences (BSC3910); Forensic Veterinary courses (BSC4480 Intro Medicolegal Invest,BSC4481 Vet Medico Death Invest, BSC4482 Foren Animal Cruelty Inv); and courses for non-science majors (EVR3013 and OCE3014).

Upper Division Biology Laboratory Requirement

Students must complete four (4) upper division Biology labs, regardless of credits per lab.

Additional Comments:

Students interested in a career in health should visit FIU's pre-health advising (https://case.fiu.edu/pre-health/) for details on how to get a pre-health advisor, requirements for various health professional schools, events, student organizations, and more.

Major Requirements

Biology Education Major (FIU Teach)

This program prepares students interested in biology careers and certification to teach biology. Additional science and/or mathematic certifications at the secondary level may be added (below). Students are encouraged to contact the FIUteach program (**FIUteach.fiu.edu**) for opportunities to try out teaching at no cost. Interested students are encouraged to contact the department, the FIUteach program, or the secondary science advisor for additional details and certification requirements.

Additional coursework in science and/or mathematics is required to prepare for certification in additional subject areas. Students must contact the FIUteach program or the secondary science advisor for details and requirements.

Students interested in the major must complete the Biological Sciences Core Courses listed in Program Requirements. BIOL:BS

Early Clinical Experiences (Field Hours)

Many courses offered by the Department of Teaching and Learning require completion of clinical experiences (field hours) in approved K–12 school settings under the supervision of a classroom teacher and FIU faculty member. See course descriptions for specific details. In accordance with the Jessica Lunsford Act, students completing clinical experiences must undergo fingerprinting and a background check at the students' own expense. Students will not be allowed to enter a school campus without the necessary clearance. All clinical experiences and the Student Teaching internship must be completed at schools affiliated with FIU, including but not limited to Miami-Dade County Public Schools and Broward County Public Schools. Placements are coordinated through the FIU Office of Clinical Experiences. Students may not arrange placements independently.

Student Teaching

Student Teaching is the semester-long, full-time, culminating clinical experience for candidates in Initial Teacher Preparation Programs. Placements are made in the fall and spring semesters and are contingent upon successful completion of all required coursework and Florida Teacher Certification Examinations. More information about clinical experiences (field hours) and the Student Teaching application process, including deadlines and the online application, is available on the Clinical Experiences | FIU College of Arts, Sciences & Education website. Students must pass all four sections of the FTCE General Knowledge Test to be eligible to apply. The test may be waived if the student achieves qualifying scores, as set by the state, on approved alternative assessments (SAT, ACT, GRE, or CLT). Students should contact their academic advisor to verify their eligibility for a waiver.

For questions, contact the FIU Office of Clinical Experiences at 305-348-2082, email ClinicalExperiences@fiu.edu, or visit the Ziff Education Building (ZEB), Room 130.

Biology Education Major (FIUteach)

Type

Completion Requirement

Additional Biology Education Major Prerequisites

Complete ALL of the following Courses:

- SMT2661 - Step 1: Inquiry Approaches to Teaching Mathematics and Science
- SMT2662 - Step 2: Inquiry-Based Lesson Design in Mathematics and Science

SMT2044 STEP 1&2 Lesson Math and Sci may be used as a substitute for SMT2661 STEP 1 Teach Math and Sci and SMT2662 STEP 2 Lesson Math and Sci

Upper Division Biology Education Required Courses

Complete ALL of the following Courses:

- BSC3848 - Junior Seminar in Biology: Evidence, Communication, and Careers
- PCB3043 - Ecology
- PCB3063 - Genetics
- PCB4023 - Cell Biology
- PCB4674 - Evolution

Upper Division Biology Education Required Electives

Select one course each of the following areas:

Fulfill ALL of the following requirements:

A. Ecology

Complete at least 1 of the following courses:

- BOT4601 - General Plant Ecology
- BOT4601L - General Plant Ecology Lab
- BSC4303 - Biogeography
- BSC4304 - Environments of the Past
- BSC4363 - Biodiversity in the Caribbean Basin
- MCB4603 - Microbial Ecology
- MCB4603L - Microbial Ecology Lab
- OCB3043 - Marine Biology and Oceanography
- OCB3043L - Marine Biology and Oceanography Lab
- OCB3075C - Mariculture for Conservation and Restoration
- OCB4004 - Biological Oceanography at Sea I
- OCB4005C - Biological Oceanography at Sea II
- OCB4070 - Coastal Marine Conservation
- OCB4104C - Field Methods in Marine Ecology
- OCB4633 - Marine Community Ecology
- OCB4711 - Fisheries Science
- PCB3043 - Ecology
- PCB3043L - Ecology Lab
- PCB3374 - Tropical Ecology
- PCB4301 - Freshwater Ecology
- PCB4401 - Global Change Ecology: How humans changed the face of Earth
- PCB4403C - Urban Vector Biology
- PCB4414 - Behavioral Ecology
- PCB4452 - Introduction to Wetland Ecology and Management
- PCB4462C - Introduction to Landscape Ecology with GIS
- PCB4467C - Marine Protected Areas
- PCB4553 - General Population Genetics
- PCB4673 - Evolutionary Ecology
- PCB4673 - Evolutionary Ecology
- PCB4932 - Topics in Ecology
- ZOO4513 - Animal Behavior
- ZOO4513L - Animal Behavior Laboratory

AND

B. Organismal Diversity

Complete at least 1 of the following courses:

- BOT3154 - Local Flora
- BOT3154L - Local Flora Lab
- BOT3663 - Tropical Botany
- BOT3810 - Economic Botany
- BOT4402 - Marine Botany
- BOT4404C - Phycology
- BOT4404L - Phycology Lab
- BOT4684 - Taxonomy Of Tropical Plants
- BOT4684L - Taxonomy of Tropical Plants Lab
- BSC3400 - Wildlife Conservation, Forensic and Crime Science
- BSC4434 - Bioinformatics for Biologists
- ENY4060 - Entomology
- ENY4060L - Entomology Lab
- MCB3020 - General Microbiology
- MCB3020L - General Microbiology Lab
- OCB4303 - Biology of Marine Mammals
- PCB4674 - Evolution
- PCB4676 - Human Evolution
- ZOO3205C - Invertebrate Zoology
- ZOO3303 - Vertebrate Zoology
- ZOO3303L - Vertebrate Zoology Lab
- ZOO4234 - General Parasitology
- ZOO4234L - General Parasitology Lab
- ZOO4454 - Fish Biology
- ZOO4462C - Herpetology
- ZOO4484 - Primate Biology
- ZOO4484L - Primate Biology Lab

AND

C. Physiology/Biochemistry

Complete at least 1 of the following courses:

- BCH3033 - General Biochemistry
- BCH3033L - General Biochemistry
- BOT4503 - Plant Physiology
- BOT4503L - Plant Physiology Lab
- BSC4443 - Functional Genomics and Proteomics
- MCB4503 - Virology
- PCB3702 - Intermediate Human Physiology
- PCB3702L - Intermediate Human Physiology Lab
- PCB3703 - Human Physiology I
- PCB3703L - Human Physiology Lab I
- PCB3704 - Human Physiology II
- PCB3704L - Human Physiology Lab II

- PCB4023 - Cell Biology
- PCB4023L - Cell Biology Lab
- PCB4232 - The Biology of Acquired Immune Deficiency Syndrome (AIDS)
- PCB4233 - Immunology
- PCB4234 - Biology of Cancer
- PCB4524 - Molecular Biology
- PCB4524L - Molecular Biology Lab
- PCB4717 - Topics in Physiology/Biochemistry
- PCB4723 - Animal Physiology
- PCB4724 - Comparative Physiology
- PCB4776 - Physiological and Behavioral Ecology of Marine Animals
- PCB4805 - Endocrinology
- PCB4810 - Biology of Stress
- ZOO4744 - Neurobiology
- ZOO4781 - Sensory Systems in Neurobiology

AND

D. Structure/Development

Complete at least 1 of the following courses:

- BOT3353 - Morphology of Vascular Plants
- BOT3353L - Morphology of Vascular Plants Lab
- BSC4401 - Principles of Forensic Biology
- BSC4401L - Principles of Forensic Biology Lab
- BSC4422 - Biotechnology: Applications in Industry, Agriculture and Medicine
- PCB3063 - Genetics
- PCB3063L - Genetics Lab
- PCB4133 - Topics in Structure/Development
- PCB4253 - Developmental Biology
- PCB4561 - Epigenetics
- PCB4663 - General Human Genetics
- ZOO3603 - Embryology
- ZOO3603L - Embryology Lab
- ZOO3713C - Comparative Vertebrate Anatomy
- ZOO3731 - Human Anatomy
- ZOO3731L - Human Anatomy Demonstration
- ZOO3753 - Histology
- ZOO3753L - Histology Lab
- ZOO4733 - Survey of Regional Anatomy
- ZOO4743C - Neuroscience

Biology Laboratory Requirement

Students must complete one (1) Upper Division Lab

Education Requirements

Complete ALL of the following Courses:

- BSC3910 - Research Methods in Biological Sciences
- SMT3100 - Knowing, Learning, and Adolescent Development in Mathematics and Science
- SMT4301 - Classroom Management and Interactions in STEM
- SMT4664 - Educational Assessment and Project-Based Instruction in Mathematics and Science
- SCE4194 - Perspectives in Science and Math Education
- SCE4944 - Student Teaching
- RED4325 - Subject Area Reading
- TSL4324 - ESOL Issues and Strategies for Content Area Teachers

Track, Specialization, Concentration, Area of Emphasis, or Other Curricular Offering Requirements

Students are not required to complete a track to earn the degree. However, students may pursue one of the three (3) tracks along with the completion of the Core Courses in Biological Sciences (see Program Requirements).

Quantifying Biology in the Classroom (QBIC) Track

Type

Completion Requirement

QBIC Prerequisites

Complete ALL of the following Courses:

- BSC2921 - QBIC Journal Club I
- BSC2922 - QBIC Journal Club II
- STA3193 - Statistics for Biology I
- STA3194 - Statistics for Biology II

Statistics I and II are upper division but taken during the Sophomore Year and coordinated with Ecology and Genetics labs.

QBIC Required Courses

Complete ALL of the following Courses:

- BSC3923 - QBIC Ecology Journal Club
- BSC3924 - QBIC Genetics Journal Club
- BSC4925 - QBIC Cell Biology Journal Club
- BSC4926 - QBIC Evolution Journal Club

Biology Elective

One (1) Biology Lecture Course

Lecture courses (3000-level and above) to be chosen in consultation with a faculty advisor. Journal Club courses count as one elective and are corequisites to PCB 3043, PCB 3063, PCB 4023 and PCB 4674.

Laboratory Requirement

Students must complete QBIC sections of PCB 3043L, PCB 3063L, PCB 4023L, and another upper division lab

Laboratory requirement is met with any upper division Biology lab.

Required Electives Outside the Degree

Students must select two (2) electives outside the degree
Modeling+Simulation and Higher Math courses are recommended

Forensic Biomolecular Biology (FBB) Track

Type
Completion Requirement

Required Forensic Biomolecular Biology Courses

Complete ALL of the following Courses:

- BSC3400 - Wildlife Conservation, Forensic and Crime Science
- BSC4401 - Principles of Forensic Biology
- BCH3033 - General Biochemistry
- BSC4944 - Forensic Biology Internship

Minimum 30 hours required for BSC4944 Forensic Internship

Required Biology Electives

Three upper division lecture courses (3000-level and above) to be chosen at the student's discretion from courses in any of the distribution areas. At least one of these three courses must be taken from the department's "Distribution A (Ecology)" courses. Courses that satisfy this distribution have the letter [A] in brackets after the course description. Electives should be selected with the help of an advisor.
The following courses are not allowed as Biology Electives: Cellular Chemistry (BCH3034 Cellular Chemistry), Student Research Labs (BSC3915 Student Research Lab, and BSC4914 Student Research Lab); Cooperative Education credits; Biology of Women; Research Methods in Biological Sciences (BSC3910 Biology Research Methods); and courses for non-science majors (BOT1010 Introduction to Plants, MCB2000 Intro Microbiology, EVR3013 Ecology Of S. Fla, and OCE3014 Oceanography).

Suggested electives to fulfill the above requirements: ENY4060 Entomology & ENY4060L Entomology Lab and PCB4553 Gen Population Genetics.

Laboratory Requirement: 4 credits

Complete ALL of the following Courses:

- BSC4401L - Principles of Forensic Biology Lab
- BCH3033L - General Biochemistry
- ENY4060L - Entomology Lab
- PCB3063L - Genetics Lab

General Electives

Students must earn 12 credits in General Electives

Biotechnology (BT) Track

Type
Completion Requirement

Core Courses in Biological Sciences: 13 credits

Students in the Biotechnology track follow the Biological Sciences Core Courses listed in Program Requirements.

Required Biotechnology Courses

Complete ALL of the following Courses:

- BSC4422 - Biotechnology: Applications in Industry, Agriculture and Medicine
- BCH3033 - General Biochemistry
- BSC4434 - Bioinformatics for Biologists
- MCB3020 - General Microbiology

The letter in parenthesis indicates the distribution area of each course; A) Ecology, B) Organismal Diversity, C) Physiology/Biochemistry, D) Structure/Development

Required Biology Electives

Two upper division lecture courses (3000/4000 level) to be chosen at the student's discretion from courses in any of the distribution areas, at least one of which must be taken from the department's "Distribution A (Ecology)" courses. Courses that satisfy this distribution have the letter [A] in brackets after the course description. Electives should be selected with help of an advisor.
The following courses are not allowed as Biology Electives: Cellular Chemistry (BCH3034 Cellular Chemistry), Student Research Labs (BSC3915 Student Research Lab, and BSC4914 Student Research Lab); Cooperative Education credits; Biology of Women; Research Methods in Biological Sciences (BSC3910 Biology Research Methods); and courses for non-science majors (BOT1010 Introduction to Plants, MCB2000 Intro Microbiology, EVR3013 Ecology Of S. Fla, and OCE3014 Oceanography).

Biotechnology Laboratory Requirement: 2 credits

Complete ALL of the following Courses:

- BSC4422L - Biotechnology Laboratory
- BSC3466L - Make Your Mutant

Additional Biotechnology Laboratory Requirement: 2 credits

Complete at least 2 of the following courses:

- BCH3033L - General Biochemistry
- BSC4450L - Computational Biology Lab of Emerging Infectious Disease
- BSC4441L - SEA-GENES
- BSC3441L - Phage Genomics Lab
- MCB3020L - General Microbiology Lab
- PCB3063L - Genetics Lab
- PCB4023L - Cell Biology Lab
- BSC4401L - Principles of Forensic Biology Lab

Graduation Requirements for the BS with Honors in Biology

(1) A minimum GPA of 3.5 in biology, chemistry, physics, geology, and mathematics courses.

(2) Completion of the BS requirements in Biology, and Honors Research Lab (BSC 4915L, 1 to 3 credits, and Honors Thesis (BSC 4970, 3 credits).

(3) Completion of Honors research in collaboration with a two-person Honors Committee, consisting of the honors advisor and one other member. The honors advisor must be a tenured or tenure-earning member of the department. The research results must be written in the form of an honors thesis and approved by the Honors Committee.

(4) Deposit two completed approved copies of the Honors Thesis with the Department's Office: one copy to be kept in the department and the other to be deposited in the Library.

(5) Presentation of the results of the Honors Research in a departmental seminar.

Other Curricular Offering: 7-Year BS in Biology and MD Accelerated Degree Pathway

The 7-Year BS/MD pathway program is a collaboration between CASE (Department of Biological Sciences), the Honors College, and the Herbert Wertheim College of Medicine. This program allows qualified students to earn both their bachelor's and MD degrees in a shorter amount of time than required for earning both degrees. Matriculated FIU first year undergraduate students meeting eligibility criteria including admission to The Honors College have an opportunity for guaranteed admission to FIU's Herbert Wertheim College of Medicine culminating in an undergraduate and medical degree in seven years, with the proviso that the student meets all of the requirements of the program. The first three years of study are completed as a BS Biology major and an Honors College student. The fourth year will be as a first -year medical student at the FIU Herbert Wertheim College of Medicine. A Bachelor of Science degree in Biological Sciences will be conferred following successful completion of the first year of medical school. Students applying for the accelerated program must major in Biology (BS in Biological Sciences.) Prior to the fourth year, all BS Biology required courses must be taken, and all other CASE requirements must be met with the exception of the science elective courses (up to 12 credits) that will be taken in the first year at HWCOM. The Honors College, the Biology Department, and HWCOM will provide oversight of the students' progress in meeting course requirements for the first three years of the 3 + 4 program. Students will receive advisement and course schedule planning for each semester from The Honors College. HWCOM will provide oversight of the four-year MD curricular component of the program. The program is targeted to students with a strong academic background, demonstrated leadership, community service, and healthcare experiences.

BIOL:MS - Master of Science in Biology

Overview

Degree Offered
MS - Master of Science

Program Title
Biology

The Master of Science (MS) in Biology allows students to develop critical skills and pursue research in diverse areas of biology, including the fields of biochemistry, biological oceanography, botany, cellular and molecular biology, ecology, evolutionary biology, microbiology and zoology.

For more information, visit the College of Arts, Sciences, and Education website.

To explore more about this program, visit the website below:
Program Website

Academic Group
College of Arts, Sciences, and Education

Diploma Title
Master of Science in Biology

Total Credits
36

Program Length in Years Based on Full-Time Enrollment
2

CIP Code
26.0101

Requirements

Simple Requirements

Admissions Requirements

To be admitted into the Master's degree program in Biology, a student must:

(1) Hold a Bachelor's degree in a relevant discipline from an accredited college or university.

(2) Have a 3.0 average or higher during the last two years of the undergraduate program.

(3) Two letters of recommendation of the student's academic potential.

(4) Be accepted by a faculty sponsor.

(5) Receive approval from the Departmental Graduate Committee.

(6) International graduate student applicants whose native language is not English are required to submit a score for the Test of English as a Foreign Language (TOEFL) or for the International English Language Testing System (IELTS). A total score of 80 on the iBT TOEFL or 6.5 overall on the IELTS is required.

Program Requirements

The Master of Science in Biology consists of a minimum 36 credits, including a thesis based upon the student's original research. A maximum of six credits of post baccalaureate course work may be transferred from other institutions, subject to the approval of the Graduate Committee.

Program Credit Hours: 36

Type

Completion Requirement

Requirements for the Degree

Fulfill ALL of the following requirements:

Required Courses

Complete ALL of the following Courses:

- BSC6457 - Introduction to Biological Research
- BSC5931 - Thesis Proposal Seminar

AND

Workshops and Laboratories

Four (4) credits required: Following graduate committee approval, students may fulfill this requirement with any combination of graduate workshops, graduate laboratories, and graduate techniques courses (a minimum of two separate courses.)

AND

Thesis Requirement

Complete ALL of the following Courses:

- BSC6971 - Master's Thesis

Six (6) credits required. To be taken after qualifying exam is passed.

AND

Electives

Electives must include at least 16 credits of courses in the Department of Biological Sciences. No more than six credits can be transferred from another graduate program, subject to the approval of the Graduate Committee. At least six credits must be at the 5000- or 6000-level (excluding thesis credits). Credits taken at the 4000-level beyond six, or at lower levels, will not count towards graduation.

AND

Quantitative Skills Requirement

Two semesters of graduate courses in quantitative skills (e.g., statistics, mathematics, computer programming), or demonstrated equivalence of such, is required for the Master of Science in Biology.

Graduation Requirements

A grade of ‘C’ or higher must be obtained in all courses with a cumulative average of 3.0 or higher in the 36 credits, and a thesis must be completed and accepted by the University.

Major Requirements

There are no majors associated with this program.

Track, Specialization, Concentration, Area of Emphasis, or Other Curricular Offering Requirements

Non-Thesis Option

Type
Completion Requirement

Non-Thesis Option Requirement

Doctoral candidates in the Biological Sciences Major who have filed the D-2 and D-3 forms that are accepted by the University Graduate School can receive a Master of Science in Biology en route to the PhD with “Non-Thesis Option” appearing in the transcript.

Non Thesis Option Graduation Requirement

A minimum GPA of 3.0 in all Graduate course work is required for the Master’s degree.

BIOL:PHD - Doctor of Philosophy in Biology

Overview

Degree Offered
PHD - Doctor of Philosophy

Program Title
Biology

The PhD in Biology equips students with the ability design and execute research projects, critically evaluate scientific literature, write manuscripts for publication, make professional presentations, become effective teachers, and stay abreast of scientific progress in their areas of interest.

For more information, visit the College of Arts, Sciences, and Education website.

To explore more about this program, visit the website below:

Requirements

Simple Requirements

Admissions Requirements

Admissions Requirements for the PhD in Biology

To be admitted into the Ph.D. program in Biology, a student must:

(1) Hold a Bachelor's degree in a relevant discipline from an accredited college or university.

(2) Have a 3.0 grade point average during the last two years of the undergraduate program or a Master's degree in a relevant discipline.

(3) Be sponsored by a Biology faculty member with Dissertation Advisor Status (see list of graduate faculty with DAS).

(4) Arrange to have three letters of recommendation sent to the Biology Graduate Program Director evaluating the applicant's potential for graduate work.

(5) Receive approval from the Department Graduate Committee.

(6) International graduate student applicants whose native language in not English are required to submit a score for the Test of English as a Foreign Language (TOEFL) or for the International English Language Testing System (IELTS). A total score of 80 on the iBT TOEFL or 6.5 overall on the IELTS is required.

Admissions Requirements for the Combined Master of Science (MS) in Forensic Science to PhD in Biology Degree Pathway

For admission into the MSFS/PhD joint degree pathway, students must meet the admission criteria of a PhD student with the understanding that they will have an increased class load of 2-3 classes (e.g., Forensic Biology, Forensic Chemistry, and Forensic Analysis) when compared to the normal PhD applicant but will graduate with two degrees. The requirements will be as follows:

(1) Hold a Bachelor's degree in a natural science from an accredited college or university.

(2) Have a 3.0 GPA during the last two years of the undergraduate program.

(3) Arrange to have three letters of recommendation sent to the Biology graduate program director evaluating the applicant's potential for graduate work.

(4) Be sponsored by a Biology faculty member with Dissertation Advisor Status.

(5) Receive approval from the Department Graduate Program Committee.

(6) International graduate student applicants whose native language is not English are required to submit a score for Test of English as a Foreign Language (TOEFL) or for the International English Language Testing System (IETLS). A score of 80 on the iBT TOEFL or 6.5 overall on the IETLS is required.

Program Requirements

The PhD in Biology is conferred on individuals in recognition of their demonstrated ability to master a specific field of knowledge and to conduct significant independent, original research. A minimum of 75 semester credits of graduate work beyond the baccalaureate are required, including a dissertation based upon the student's original research (minimum 15 dissertation credits). A maximum of 36 credits may be transferred from a completed graduate program with the approval of the Advisory Committee.

Program Credit Hours: 75

Type

Completion Requirement

Requirements for the Degree

Fulfill ALL of the following requirements:

Required Courses

Complete ALL of the following Courses:

- BSC7961 - Dissertation Proposal Seminar
- BSC7982 - Dissertation Defense Seminar
- BSC5945 - Supervised Teaching in Biology
- BSC7980 - Ph.D. Dissertation

Recommended Course: BSC6457 Intro Bio Research

AND

Workshops and Laboratories

Four (4) credits required. Following graduate committee approval, students may fulfill this requirement with any combination of graduate workshops, graduate laboratories, and graduate courses (minimum of two separate courses)

AND

Electives

Eight (8) credits required. No more than 36 credits may be transferred from a completed graduate program, subject to the approval of the Graduate Committee.

AND

Quantitative Skills Requirements

Two semesters of graduate courses in quantitative skills (e.g. statistics, mathematics, computer programming), or demonstrated equivalence of such, is required for the Ph.D. in Biology.

Graduation Requirements

A grade of 'C' or higher must be obtained in all courses with a cumulative average of 3.0 or higher in the 75 credits; two semesters of quantitative skills courses must be completed, and a dissertation (minimum 15 credits) completed and accepted by the University.

Major Requirements

There are no majors associated with this program.

Track, Specialization, Concentration, Area of Emphasis, or Other Curricular Offering Requirements

Other Curricular Offering: Combined MS in Forensic Science and PhD in Biology Degree Pathway

Type

Completion Requirement

Required Courses

The MSFS/PhD in Biology joint degree pathway combines the Master of Science in Forensic Science with a PhD in Biology. Students who pursue this degree will be enrolled in a continuous enrollment pathway; however, upon completion of all the requirements of the MSFS program (report option), students will be awarded a MSFS degree as they transition towards their PhD degree.

As these candidates will be dually enrolled in two graduate degree programs, candidates must complete a minimum of 32 credit hours towards their MSFS degree with a grade of ‘C’ or higher and a cumulative GPA of 3.0. The MSFS report option must be completed and accepted by the university before full transition towards the PhD degree. Candidates must also complete a total of 75 credit hours toward the PhD degree with the allowance for credits transferred from the completed MSFS degree. The student will be able to earn both degrees in a shorter time frame that it would take to obtain either degree if pursued consecutively.

Students will be required to select a Master's defense committee while pursuing the MSFS degree as well as a PhD dissertation committee. This committee may or may not be comprised of the same members as those selected for the Master's program. The Master's proposal should be presented after the second semester of admission and the PhD dissertation defense should be presented after the fourth semester after admission.

Complete ALL of the following Courses:

- BSC6457 - Introduction to Biological Research
- BSC5931 - Thesis Proposal Seminar
- BSC7961 - Dissertation Proposal Seminar
- BSC5975 - Thesis Defense Seminar
- BSC7982 - Dissertation Defense Seminar
- BSC5406 - Forensic Biology
- CHS5535 - Forensic Analysis
- CHS5542 - Forensic Chemistry
- PCB5685 - Population Genetics

Elective Courses

Complete ANY of the following Courses:

- PCB6025 - Molecular and Cellular Biology I
- MCB5116 - Microbial Diversity
- BSC5459 - Advanced Bioinformatics for Biologists
- BOT5852 - Medical Botany
- BOT5727 - Plant Genetics
- STA5507 - Nonparametric Methods

Labs and Workshops

Complete ALL of the following Courses:

- BSC6925C - Workshop: Non-Human DNA Profiling and Analysis
- BSC6926 - Workshop in Biology
- BSC5935 - Topics In Biology

Research

Students must complete a minimum of 15 credits of dissertation.

Complete ALL of the following Courses:

- BSC6971 - Master's Thesis
- BSC7980 - Ph.D. Dissertation

BIOMED:PHD - Doctor of Philosophy in Biomedical Science

Overview

Degree Offered
PHD - Doctor of Philosophy

Program Title
Biomedical Science

The PhD in Biomedical Sciences tailored to meet students' specific needs and research interests. The degree, which bridges basic sciences and biomedical research interests, seeks to train students in the discovery and advancement of medically relevant knowledge. Graduates will be prepared for careers in academia, medical research, and biomedical and biotechnology industries. Depending on a student's career goals, the degree offers two majors: Biomedical Science and Translational Medicine.

The Biomedical Science major develops the ability of graduate students to apply research skills to determine the fundamental discoveries into new treatments for human diseases. Students can choose a laboratory of their choice with a faculty mentor from HWCOM in Miami or the Center for Translational Science in Port St Lucie.

The Translational Medicine major in collaboration with Baptist Health provides specialized training in translational research from the bench to human trials under the guidance of faculty mentors with complementary expertise located at HWCOM and at Baptist Health.

For more information, visit the Herbert Wertheim College of Medicine website.

Admissions Requirements

Admissions Requirements for the PhD in Biomedical Science

The PhD in Biomedical Science program at HWCOM adheres to the general admission procedures outlined by the FIU University Graduate School (UGS). Completed applications are evaluated by an admissions Committee. The applicants must meet FIU Graduate School general requirements:

(1) A bachelor's degree from an accredited college in the United States or a comparable degree from a recognized institution of higher studies outside the United States.

(2) Applicants must have achieved a minimum 3.0 GPA (on a four-point scale) in the last 60 credits of the undergraduate degree or have earned a graduate degree. Official transcripts must be submitted for each college or university attended by the applicant. Transcripts must come directly from the issuing institutions to FIU. Applicants who have attended FIU or are currently attending FIU do not need to submit an FIU transcript.

(3) Three letters of recommendation attesting to an applicant's educational background, motivation, analytical skills, and promise as a research scientist are required and must be written and submitted online by undergraduate advisors, research advisors, or professional colleagues. Students who have earned a degree from a foreign non-English speaking country must take an English proficiency test and earn (550 paperbased, 80 internet-based on TOEFL or 6.5 on IELTS). Registration information can be found at either ETS or IELTS respectively. For a list of exempt countries, see information for Foreign-educated Students. Foreign graduate Applicants will be required to submit an official translated transcript and a course-by-course evaluation of each post-secondary transcript they have acquired since leaving secondary school. These become the property of FIU and it is expected applicants use a NACES member credential evaluation service.

(4) Submit curriculum vitae and a statement of purpose highlighting future goals after obtaining the PhD degree. (For translational medicine majors, highlight the interest in HWCOM/Baptist Translational Medicine Major.)

(5) Students admitted into the Translational Medicine Major are directly accepted in an active collaboration between a HWCOM faculty and an investigator at Baptist Health with the agreement of both investigators.

Program Requirements

Degree Program Requirements: 75 credits

Type

Completion Requirement

Required Courses

The PhD in Biomedical Science requires a minimum of 75 post-baccalaureate credits, of which at least 15 credits are allocated for dissertation research. Students must have at least 42 credits at MMC. Students are required to achieve a grade of B or higher in all courses and maintain a cumulative GPA of 3.0 or higher.

Fulfill ALL of the following requirements:

Core Courses

Complete ALL of the following Courses:

- GMS6864 - Principles of Clinical Epidemiology and Biostatistics
- GMS6939 - Graduate Seminar
- GMS6961 - Qualifying Examination
- GMS6962 - Formation of Committee: Appointment of Dissertation Committee: Preliminary Proposal
- GMS6963 - Doctoral Dissertation Proposal
- GMS6964 - Dissertation Proposal Seminar
- GMS7981 - Dissertation Defense Seminar
- GMS6003C - Introduction to Biomedical Sciences Research
- GMS6930 - Lectureship Seminar
- GMS6097 - Methods in BMS Research
- GMS6910 - Supervised Research
- GMS6925 - Grad Student Present
- GMS6926 - Research Symposium Presentations
- GMS6927 - Scientific Presentations

AND

Dissertation: Minimum 15 Credits

Complete ALL of the following Courses:

- GMS7980 - Dissertation Research Credits

AND

Elective Course Requirement

Students must complete their elective requirements before submitting their dissertation.

Complete ANY of the following Courses:

- BSC5459 - Advanced Bioinformatics for Biologists
- CGS5166 - Introduction to Bioinformatics Tools
- CHM6088 - Environmental Chemistry of Trace Elements
- GMS6300 - General Pathology
- GMS6500 - Basic Pharmacology
- GMS6904 - Introduction to Scientific Writing
- GMS6940 - Supervised Teaching in Biomedical Science
- GMS6103 - Molecular Microbiology and Infectious Diseases
- GMS6605 - Basic Structure of the Human Body

**This is not a complete list of possible elective courses. The dissertation advisor or the Dissertation Advisory Committee, at their discretion, may suggest potential electives that are described in this Graduate Catalog.*

Research Credits

Complete ALL of the following Courses:

- GMS6910 - Supervised Research

Graduate students are required to complete a variable number of GMS6910 Supervised Research (Research Credits) involving research conducted in the PhD advisor's laboratory.

Qualifying Examination

Students take a qualifying exam soon after completion of content courses in program and major requirements. The qualifying exam consists of two parts (refer to student handbook for additional information):

- Part I: The student submits a comprehensive review on a topic chosen by the Dissertation Advisory Committee (DAC);
- Part II: Oral defense of the entire comprehensive review paper submitted by the student.

Doctoral Dissertation Proposal

After completion of the qualifying examination, a student must submit to DAC a doctoral dissertation proposal in the format for an AHA, National Institutes of Health (NIH), or National Science Foundation (NSF) predoctoral fellowship application.

Dissertation Proposal Seminar

A seminar based on the student's proposal is presented and graded by the dissertation committee. The formal admission to PhD candidacy occurs when the student successfully completes required content courses in the program and major requirements and passes the qualifying exam, prepares a formal dissertation proposal, and successfully defends the content of the proposal before his or her advisory committee. Immediately following the proposal defense, the student's dissertation committee votes to admit the student to candidacy, to have the student resubmit the proposal within 6 months, or to dismiss the student from the PhD program. A student can only resubmit his or her proposal once. The dissertation committee should comprise at least five members, at least three of whom should be HWCOM graduate program faculty and at least one who is not a member of the HWCOM faculty and who holds a graduate faculty appointment.

Dissertation Research Credits

Earn at least 15 credits from the following:

- GMS7980 - Dissertation Research Credits

At least 15 credits of GMS7980 Dissertation Research (Dissertation Research) are to be taken after the student has advanced to candidacy. Once a student achieves candidacy and enrolls in GMS 7980, a student may not enroll in further coursework.

Dissertation and Dissertation Defense Seminar

The DAC approves the major goals of a student's research project, monitors progress of student performance, and approves a target date for the dissertation defense. A prerequisite for the dissertation defense is publication or submission of peer-reviewed papers. It is expected that the student will be first or senior author on at least one of the peer-reviewed publications. The format of the dissertation should follow UGS guidelines. The dissertation defense takes place after the dissertation is submitted in a final form and approved by the DAC. Changes recommended at the time of the defense may be incorporated subsequently. The dissertation should be submitted to the DAC at least 4 weeks prior to the expected defense date to permit the members adequate opportunity for review. Review of the dissertation by an outside reviewer is encouraged. The defense of the dissertation is governed by the regulations established by the UGS. The dissertation defense includes a public seminar followed by defense of the dissertation to the DAC in closed session. Following the examination, the DAC evaluates the performance in the candidate's absence and votes to pass or fail the candidate. The record of the vote is recorded on the FIU UGS Defense of Dissertation Results form and submitted to the UGS office.

Major Requirements

Translational Medicine Major

Location in Miami, FL: FIU-HWCOM Modesto A Maidique Campus and Baptist Health Medical Campus

The Translational Medicine major provides a curriculum that aims on preparing graduate students with research skills focused on translating fundamental discoveries into new treatments for human diseases. A distinctive feature of this program is the personalized curriculum designed to meet the specific learning needs of individual students, with the support of two advisors, one with expertise in basic sciences at HWCOM and one with expertise on applied translational medicine at Baptist Health.

The participating faculty members come from the Department of Cellular and Molecular Medicine at the Herbert Wertheim College of Medicine, and the medical and research departments at Baptist Heath. These faculty members will prepare students to be the next generation of scientists in the interface of preclinical and clinical translational medicine. Students will understand relevant aspects of the translation of basic discoveries into effective medical therapies.

Translational Medicine Major

Type

Completion Requirement

Required Courses

Fulfill ALL of the following requirements:

Students must complete all of the following courses:

Complete ALL of the following Courses:

- GMS6220 - Molecular Genetics and Cellular Biology
- GMS6605 - Basic Structure of the Human Body
- GMS6542 - Translational Clinical Pharmacology

Biomedical Science Major

Location: FIU-HWCOM Modesto A. Maidique Campus, Miami, FL and Center for Translational Science, Port St. Lucie, FL

The Biomedical Science major is designed to prepare future scientists to address the emerging challenges in biomedical and translational research using multidisciplinary research strategies and state-of-the-art methodologies. The program's focus has shifted from classic course-heavy training to modern laboratory-directed instruction.

The Advisor and Dissertation Committee are the best qualified to understand and address the student's educational needs. Therefore, the advisor and the student, in consultation with the committee, determine the necessity for elective courses.

Biomedical Science Major

Type

Completion Requirement

Required Courses

Fulfill ALL of the following requirements:

Students must complete all of the following courses:

Complete ALL of the following Courses:

- GMS6220 - Molecular Genetics and Cellular Biology
- GMS6927 - Scientific Presentations
- GMS6942 - Laboratory Rotations

Newly matriculating students may perform research rotations. Students choose faculty laboratories with the consent of those faculty members. The rotation experience is an approved course (GMS6942 Laboratory Rotation) with credit, and students receive a pass or fail grade based on an average of the evaluations of the participating faculty members.

Track, Specialization, Concentration, Area of Emphasis, or Other Curricular Offering Requirements

There are no tracks, specializations, concentrations, areas of emphasis, or other curricular offerings associated with this program.

BIOMEG:BS - Bachelor of Science in Biomedical Engineering

Overview

Degree Offered
BS - Bachelor of Science

Program Title
Biomedical Engineering

Biomedical Engineering is an interdisciplinary field that blends engineering and scientific principles to address various challenges in human health and medicine. Its primary intellectual aim is to employ quantitative engineering principles to analyze the functionality of biological systems and develop innovative systems addressing the unfulfilled demands of clinical medicine. Unlike other life science fields, biomedical engineering leverages scientific understanding to innovate biomaterials, instruments, and devices. The Department of Biomedical Engineering at FIU offers an undergraduate curriculum designed to help students build a thorough understanding of the basic laws of science and acquire knowledge in major biomedical engineering subareas, including tissue engineering, biosignals and systems, and biomaterials and biomechanics. The curriculum also stimulates and develops creative and innovative thinking, a professional attitude, economic judgment, and environmental consciousness. The program has an ultimate goal of fostering the student's potential to the fullest possible extent, equipping them to perform exceptionally as biomedical engineers, and providing them with the fundamental principles needed for pursuing advanced studies in various fields, as well as a plethora of career opportunities, such as scientist/engineer for research and development in medical device company (R&D), product development manager in device manufacturing, quality assurance engineer for regulatory affairs (FDA) and engineering standard (NIST), and sale representatives. Graduates also secure positions in pharmaceutical, nutraceutical and consumer products industries. Although these positions are typically at the Entry-to-Mid level, our program also prepares graduates to pursue terminal degrees in engineering (e.g., PhD) and medicine (MD), and find employment as physicians or researchers in federal agencies such as FDA, NIH, and USPTO.

Admissions Requirements

Admissions Requirements for the Bachelor of Science (BS) in Biomedical Engineering

Applicants to the Biomedical Engineering program must submit an Application for Admission to the University and follow regular University admission procedures. Applicants must meet the University's requirements for admission before being eligible for admission to the Biomedical Engineering program. Continuing FIU students who seek admission to the BME program must submit a completed Academic Program/Plan Declaration or Change Form to the department of Biomedical Engineering.

To be eligible for acceptance into the Biomedical Engineering program, students must have:

(1) Satisfied general University requirements for admission.

(2) First time in college (FTIC) or have completed the Associate in Arts degree or its equivalent;

(3) Continuing FIU students and transfer students must complete all pre-core courses and BSC 2010/L, CHM 1045/L, MAC 2281, PHY 2048L with minimum grade of "C";

(4) If applicant is an international student whose native language is not English, have achieved a minimum score of 500 on the paper-based TOEFL, 173 on the computer-based TOEFL. [International applicants should study the "General Admission" requirements for foreign students in the "Admissions" section of this catalog].

Admissions Requirements for the Combined BS in Biomedical Engineering to Master of Science (MS) in Biomedical Engineering Accelerated Degree Pathway

To be considered for admission to the combined bachelor's/master's degree pathway, students must have completed 75 credits in the bachelor's degree program at FIU, have earned at least a 3.25 GPA on both overall and upper division courses, and meet the admissions criteria for the graduate degree program to which they are applying. Students need only apply once to the combined degree program; the application is submitted to Graduate Admissions typically before the student starts the last 30 credits of the bachelor's degree program.

Admissions Requirements for the BS in Biomedical Engineering to MS in Engineering Management (BSBME/MSEM) Accelerated Degree Pathway

Students who pursue a BS degree and have completed 75 credits in the undergraduate program of Biomedical Engineering with an overall GPA of 3.2 or higher may, upon recommendation from three faculty members, apply to the department to enroll in the combined BSBME/MSEM pathway. Students must also submit an online application to the University Graduate School for admission to the MSEM program. In addition to the admission requirements of the MSEM program, students must meet all the admission requirements of the University Graduate School.

Students need only apply once to the combined degree pathway; the application is submitted to Graduate Admissions typically before the student starts the last 30 credits of the bachelor's degree program.

Students interested in the combined pathway should consult with their undergraduate advisor on their eligibility to the pathway. The student should also meet the MSEM Program Director to learn about the graduate program and available tracks/courses before completing the application form and submitting it to their undergraduate advisor. Final decision for admission to the MSEM program will be made by the University Graduate School upon recommendation by the Engineering Management program director. Applicants will be notified by the Engineering Management Program and the University Graduate School of the decision on their applications.

Program Requirements

CEC Academic Progression Standard

Steady academic progression is expected by the College of Engineering and Computing. Students who are unsuccessful in passing common pre-requisites after two attempts will be advised to change their major into an area where they can be successful. Drops after the add/drop period, which result in a DR grade, are considered an attempt in the course and count as an unsuccessful enrollment.

Students must also meet the Math Progression standard of successfully completing Calculus 1 within three academic terms, not counting summers.

Students will be redirected to a different degree program when completion of the progression standards, including the applicable math progression standard by its stated semester, is no longer feasible.

Lower Division Preparation

Type

Prerequisite

Common Prerequisite Courses

For a list of all state-approved common prerequisites, including alternatives, visit https://cpm.flvc.org.

Complete ALL of the following Courses:

- MAC2281 - Calculus I for Engineering
- MAC2282 - Calculus II for Engineering
- MAC2283 - Calculus III for Engineering
- MAP2302 - Differential Equations
- PHY2048 - Physics with Calculus I
  AND PHY2048L - General Physics Laboratory I
- PHY2049 - Physics with Calculus II
  AND PHY2049L - General Physics Laboratory II
- CHM1045 - General Chemistry I
  AND CHM1045L - General Chemistry Lab I
- CHM1046 - General Chemistry II

- BSC2010 - General Biology I
  AND BSC2010L - General Biology I Lab
- CHM2210 - Organic Chemistry I
  AND CHM2210L - Organic Chemistry Lab I

Upper Division

Type

Completion Requirement

Biomedical Engineering Curriculum

The BS curriculum weaves a strong life science foundation with multidisciplinary engineering fundamentals.

Complete ALL of the following Courses:

- BME1008C - Introduction to Biomedical Engineering
- BME1054L - Introduction to Biomedical Engineering Computing
- ESI3215 - Evaluation of Engineering Data I

OR STA3033 - Introduction to Probability and Statistics for CS
- BME2740 - Biomedical Engineering Modeling and Simulation
- BME2810 - Introduction to Biomedical Engineering Design
- BME3721 - Biomedical Engineering Data Evaluation Principles
- BME3403 - Engineering Analysis of Biological Systems I
- BME3404 - Engineering Analysis of Biological Systems II
- EEL3110C - Circuit Analysis and Lab
- EGM3503 - Applied Mechanics
- BME3632 - Biomedical Engineering Transport
- BME4011 - Clinical Rotations for Biomedical Engineering
- BME4050L - Biomedical Engineering Lab I
- BME4051L - Biomedical Engineering Lab II
- BME4100 - Biomaterials Science
- BME4503C - Medical Instrumentation: Application and Design
- BME4800C - Design of Biomedical Systems and Devices
- BME4908 - Senior Design Project
- BME4930 - Undergraduate Seminar

Electives (9 credits minimum Engineering Electives**) (15 credits)

**BME2740 BME Simulation and BME3721 BME Data Eval Prin have four contact hours of which one hour is a non-credit tutorial/lab session.*

***Six out of the required fifteen elective credits can be either from Engineering or Science. All electives and equivalencies for courses transferred from other institutions must be approved by the Undergraduate Advisor.*

Approved Electives

Courses may be subject to prerequisites and/or corequisites.

Fulfill ANY of the following requirements:

Approved Science Electives

Complete ANY of the following Courses:
- CHM2211 - Organic Chemistry II
- BCH3033 - General Biochemistry
- CHM3120 - Introduction to Analytical Chemistry
- CHM4304 - Biological Chemistry I
- CHM4307 - Biological Chemistry II
- MCB3020 - General Microbiology
- PCB3063 - Genetics
- PCB4233 - Immunology
- PCB4023 - Cell Biology
- PCB4524 - Molecular Biology
- ZOO3753 - Histology

OR

Approved Electives for Tissue Engineering/Pre-Med

Complete ALL of the following Courses:

- BME4332 - Cell and Tissue Engineering
- BME4311 - Molecular Engineering
- BME4230 - Biomechanics of Cardiovascular Systems

Three Approved Science Electives

OR

Approved Electives for Biosignals and Systems

Complete ANY of the following Courses:

- BME4531 - Medical Imaging
- BME4562 - Introduction to Biomedical Optics
- BME4422 - The Biophysics of Neural Computation
- EEL3135 - Signals And Systems
- EEL3657 - Control Systems I
- EEE4510 - Introduction to Digital Signal Processing with AI
- EEE4393C - Wearable Electronics

OR

Approved Electives for Biomaterials and Biomechanics

Complete ANY of the following Courses:

- BME4230 - Biomechanics of Cardiovascular Systems
- BME4211 - Orthopedic Biomechanics
- BME4260 - Engineering Hemodynamics
- EGM3311 - Analysis of Engineering Systems
- EGN3365 - Materials in Engineering
- EML3036 - Simulation Software for Mechanical Engineers
- EML4804 - Introduction to Mechatronics

Major Requirements

There are no majors associated with this program.

Track, Specialization, Concentration, Area of Emphasis, or Other Curricular Offering Requirements

Other Curricular Offering: Combined BS in Biomedical Engineering to MS in Biomedical Engineering Accelerated Degree Pathway

This five-year pathway seamlessly combines a baccalaureate degree in biomedical engineering with the Master's in biomedical engineering. A student admitted to the combined degree pathway will be considered to have undergraduate status until the student applies for graduation from their bachelor's degree program. Upon conferral of the bachelor's degree, the student will be granted graduate status and be eligible for graduate assistantships. Students enrolled in the pathway may count up to 9 hours of graduate level courses (i.e., 5000 level or higher) as credits for both the undergraduate and graduate degree programs. For each of the courses counted as credits for both BS and MS degree,

a minimum grade of 'B' is required. Upon completion of the combined BS/MS pathway, students must have accumulated a minimum of 24 hours of credits at the graduate (5000+) level. Students enrolled in the pathway are encouraged to seek employment with a department faculty member to work as student assistants on sponsored research projects.

Other Curricular Offering: Combined BS in Biomedical Engineering to MS in Engineering Management Accelerated Degree Pathway

A student admitted to the combined degree pathway will be considered to have undergraduate status until the student applies for graduation from their bachelor's degree program. Upon conferral of the bachelor's degree, the student will be granted graduate status and be eligible for graduate assistantships. Students enrolled in the combined degree pathway could count up to three BME graduate courses for both the BSBME electives and the MSEM electives, for a total saving of 9 credit hours. The following is a list of eligible BME graduate courses:

--BME5005 Appl Bio Eng Princ

--BME5036 Biotran Processes

--BME5105 Biomaterial Science

--BME5560 BME Optics

--BME5573 Nanomed

The combined BSBME/MSEM pathway has been designed to be a continuous pathway enrollment. During this combined B·SBME/MSEM pathway, upon completion of all the requirements of the BSBME program, students will receive their BSBME degree. Students may elect to permanently leave the combined pathway and earn only the BSBME degree. Students who elect to leave the combined pathway and earn only the BS degree will have the same access requirements to regular graduate programs as any other student, but will not be able to use the 9 credit hours in both the BSBME and MSEM degrees.

For each of the graduate courses counted as credits for both BSBME and MSEM degrees, a minimum grade of "B" is required. Only graduate courses with formal lecture can be counted for both degrees. The students are responsible for confirming the eligibility of each course with their undergraduate advisors.

BIOMEG:MS - Master of Science in Biomedical Engineering

Overview

Degree Offered
MS - Master of Science

Program Title
Biomedical Engineering

The Master of Science (MS) in Biomedical Engineering program at FIU's Department of Biomedical Engineering provides students with a comprehensive interdisciplinary education blending engineering and scientific principles to tackle diverse challenges in human health and medicine. Emphasizing the application of quantitative engineering techniques to analyze biological systems, the program aims to cultivate innovative thinking and equip students with expertise in key biomedical engineering subfields, such as tissue engineering and biomechanics, bioimaging and sensors, and neurotechnology. With two distinct tracks—Research and Professional—students tailor their educational journey to align with their career aspirations. The Research Track fosters principles of scientific discovery, empowering graduates to lead pioneering research endeavors. The Professional Track integrates project management skills, preparing students to excel in leadership roles within the biomedical industry. Through rigorous coursework and hands-on experiences, graduates emerge poised to address the evolving demands of clinical medicine and drive innovation in biomedical engineering. There are many career opportunities for graduates from the MS program, including mid-to-upper level positions in research and development in biomedical and pharmaceutical industry, product development management in device manufacturing, quality assurance engineering for regulatory affairs (FDA) and engineering standards (NIST), and product sales. For more information, visit the College of Engineering and Computing website.

Requirements

Simple Requirements

Admissions Requirements

Admissions Requirements for the Master of Science (MS) in Biomedical Engineering

The following is in addition to the University's graduate admission requirements:

(1) A student seeking admission into the program must have a bachelor's degree in engineering, the physical/life sciences, computer science, or mathematics from an accredited institution, or in the case of foreign students, from an institution recognized in its own country as preparing students for further study at the graduate level.

(2) An applicant must have achieved a "B" average in upper level undergraduate work.

(3) Applicants who have not satisfied the above will be evaluated for probationary or waiver admission.

(4) In addition to the above criteria, International graduate student applicants whose native language is not English are required to submit a score for the Test of English as a Foreign Language (TOEFL) or for the International English Language Testing System (IELTS). A total score of 80 on the iBT TOEFL or 6.5 overall on the IELTS is required.

(5) The GPA and TOEFL scores specified above are to be considered minimum requirements for admission. Applicants from science and engineering areas other than biomedical engineering will be expected to complete undergraduate remedial courses selected to prepare them for graduate courses in their area of interest. Full admission into the graduate program requires the completion of these background courses with no grades below “C” and a grade point average of 3.0 or better.

Admissions Requirements for the Combined Bachelor of Science (BS) in Biomedical Engineering to MS in Biomedical Engineering Accelerated Degree Pathway

To be considered for admission to the combined bachelor’s/master’s degree pathway, students must have completed 75 credits in the bachelor’s degree program at FIU, have earned at least a 3.25 GPA on both overall and upper division courses, and meet the admissions criteria for the graduate degree program to which they are applying. Students need only apply once to the combined degree program; the application is submitted to Graduate Admissions typically before the student starts the last 30 credits of the bachelor’s degree program.

Admissions Requirements for the Combined BS in Electrical Engineering to MS in Biomedical Engineering Accelerated Degree Pathway

To be considered for admission to the combined bachelor’s/master’s degree pathway, students must have completed 75 credits in the bachelor’s degree program at FIU, have earned at least a 3.25 GPA on both overall and upper division courses, and meet the admissions criteria for the graduate degree program to which they are applying. Students need only apply once to the combined degree program; the application is submitted to Graduate Admissions typically before the student starts the last 30 credits of the bachelor’s degree program.

Admissions Requirements for the Combined BS in Mechanical Engineering to MS in Biomedical Engineering Accelerated Degree Pathway

To be considered for admission to the combined bachelor’s/master’s degree pathway, students must have completed 75 credits in the bachelor’s degree program at FIU, have earned at least a 3.25 GPA on both overall and upper division courses, and meet the admissions criteria for the graduate degree program to which they are applying. Students need only apply once to the combined degree program; the application is submitted to Graduate Admissions typically before the student starts the last 30 credits of the bachelor’s degree program.

Program Requirements

Graduation Requirements

The degree will be conferred when the following conditions have been met:

(1) Recommendation of the advisor and faculty of the Department.

(2) Certification provided by the Department Chair, College Dean, and University Graduate School that all degree requirements have been met.

(3) Meet the undergraduate deficiencies, if any existed in the student’s program, as additional courses toward the degree.

(4) Complete the required semester hours of graduate level credit (not more than six graduate semester hours with a grade of “B” or higher can be transferred from other accredited institutions).

(5) Successful defense of an acceptable graduate thesis if required of the program.

(6) Students must maintain an overall GPA of 3.0. No grade below a “C” will be accepted in a graduate program. In the event that a student is placed on probationary status, he or she must obtain a directed program from his or her advisor and approved by the Graduate Program Director prior to continuing further course work toward the degree. The student must satisfy the directed course of action within the prescribed time limit; otherwise he or she will be academically dismissed.

(7) Comply with all University policies and regulations.

Major Requirements

There are no majors associated with this program.

Track, Specialization, Concentration, Area of Emphasis, or Other Curricular Offering Requirements

Master of Science in Biomedical Engineering: Professional Track

This track is tailored primarily for engineers currently practicing in the biomedical industry and students interested in pursuing a management career in the biomedical industry. A student shall complete 27 credit hours of course work and a 3 credit hour capstone project. The courses are organized into five core areas: Life Sciences, Mathematics, Biomedical Engineering Professional Core, Biomedical Engineering Professional Development, and Biomedical Engineering Electives. While the degree is structured as a non-thesis program, students will be required to conduct an industrial project (3 credit hours) through either an external internship or independent studies. The project will include contemporary topics and trends in biomedical engineering technology development and will require a formal report and presentation upon completion. Students receiving financial support from the department are not eligible for the Professional Track option.

Early in the program (before the end of the second term) the student and advisor will complete a study plan that specifies the courses that will comprise the program. A maximum of three credits of independent studies may be included in a study plan. If so, a syllabus of the independent study course must be provided by the course instructor to the graduate program director before the hold on the independent study course can be removed.

Professional track students are required to take an oral final examination dealing with the objectives of their study plan. The student will briefly summarize the project report (20 minutes) as a part of the exam. The examining committee will include a minimum of three faculty members, at least two of whom have appointments in the Department.

Professional Track: 30 Credits

Type

Completion Requirement

Approved Life Science Elective: 3 Credits

Earn at least 3 credits from the following:

- BME5410 - Biomedical Physiology and Engineering I
- BME5411 - Biomedical Physiology and Engineering II
- PHZ6255 - Molecular Biophysics

Approved Mathematics Core: 3 Credits

Earn at least 3 credits from the following:

- STA5206 - Design Of Exper I
- STA5126 - Fundamentals of Design of Experiments
- STA5676 - Reliability Engineering (Inactive)
- STA6636 - High Dimension Data Analysis

Biomedical Engineering Core: 21 Credits

Fulfill ALL of the following requirements:

Biomedical Engineering Electives: 9 Credits

Consult with graduate program director regarding course selection.

Earn at least 9 credits

AND

Master's Project

Earn at least 3 credits from the following:

- BME6907 - BME MS Professional Project

AND

Approved Biomedical Engineering Professional Core: 9 credits

Earn 9 credits from the following:

Complete at least 3 of the following courses:

- BME5803 - Biomedical Device Design
- BME5804 - Risk Analysis and Management of Biomedical Devices
- BME5805 - Regulatory Process for Medical Devices and Drugs

AND

Approved Biomedical Engineering Professional Development: 3 credits

Earn at least 3 credits from the following:

- BME5941 - Biomedical Engineering Internship
- BME6905 - Independent Studies

Master of Science in Biomedical Engineering: Research Track

The research track is geared to prepare the graduate for further graduate study or a career in biomedical research. A student shall complete a minimum of 30 credit hours. This includes a minimum of 24 hours of course work (15 credits of electives in specialty areas, 6 credits of mathematics core courses, 3 credits of life science elective), one semester of BME6936 Biomed Eng Seminar (Biomed Eng Seminar) and 6 credit hours of BME6970 Master's Thesis (Master's Thesis) or 3 credits of BME6914 BME MS Research Project (M.S. Research Project). Students electing BME6914 BME

MS Research Project (M.S. Research Project) will need to take one additional biomedical engineering elective course. Early in the program (before the end of the second term) the student and advisor will complete a study plan that specifies the courses that will comprise the program. A maximum of three credits of independent studies other than the MS thesis may be included in a study plan. If so, a syllabus of the independent study course must be provided by the course instructor to the graduate program director before the hold on the independent study course can be removed. Students receiving support from the department are not permitted to choose the project option.

All students in the research track are required to complete a research project under the supervision of an advisor and a committee. When the research is completed, the student should schedule a defense with an examining committee consisting of a minimum of three graduate faculty members (at least two of whom have appointments in the Department). The candidate should prepare to summarize the thesis or the report in the manner of a technical paper using appropriate visual aids in 40 minutes or less. Following the presentation, the candidate will answer questions related to the work from the audience and/or the committee. At the conclusion of the defense, the committee will agree upon the outcome - pass or fail - and report the results to the Graduate School. Following the exam, student will implement the committee's suggestions for improving the draft document. Each committee member must sign the approval form in the final document. Copies of the approved thesis must be provided to the advisor, Department, and the University Graduate School. Students should become familiar with the University Graduate School's regulations and deadlines available online at **http://gradschool.fiu.edu**.

Research Track: 30 Credits (minimum)

Type

Completion Requirement

Biomedical Engineering Core: 21 Credits

Fulfill ALL of the following requirements:

Biomedical Engineering Core Part I

All students in the Research Track must take three courses in one specialty area, and one course in each of the other two specialty areas. The current specialty areas are: 1) Basic research in engineered tissue model systems and related biomechanics; 2) Diagnostic bioimaging and sensor systems; and 3) Therapeutic and reparative neurotechnology.

Earn at least 15 credits

AND

Biomedical Engineering Core Part II

Complete ALL of the following Courses:

- BME6970 - Master's Thesis
  OR BME6914 - BME MS Research Project
- BME6936 - Biomed Eng Seminar

**6 credits of BME6970 Master's Thesis or 3 credits of BME 6XXX. Students electing BME 6XXX will need to take one additional biomedical engineering elective course.*

Approved Mathematics Core: 6 Credits

Earn at least 6 credits from the following:

- STA5126 - Fundamentals of Design of Experiments
- STA5206 - Design Of Exper I
- STA6176 - Biostatistics
- BME6705 - Nonlinear Systems with Applications to Life Sciences

Approved Life Science Elective: 3 Credits

Complete ANY of the following Courses:

- BME5410 - Biomedical Physiology and Engineering I
- BME5411 - Biomedical Physiology and Engineering II
- PCB6025 - Molecular and Cellular Biology I
- PCB6027 - Molecular and Cellular Biology II
- PHZ6255 - Molecular Biophysics
- CHM5506 - Physical Biochemistry (Inactive)

Other Curricular Offering: Combined BS in Biomedical Engineering to MS in Biomedical Engineering Accelerated Degree Pathway

This five-year pathway seamlessly combines a baccalaureate degree in biomedical engineering with the Master's in biomedical engineering. A student admitted to the combined degree pathway will be considered to have undergraduate status until the student applies for graduation from their bachelor's degree program. Upon conferral of the bachelor's degree, the student will be granted graduate status and be eligible for graduate assistantships. Students enrolled in the pathway may count up to 9 hours of graduate level courses (i.e., 5000 level or higher) as credits for both the undergraduate and graduate degree programs. For each of the courses counted as credits for both BS and MS degree, a minimum grade of 'B' is required. Upon completion of the combined BS/MS pathway, students must have accumulated a minimum of 24 hours of credits at the graduate (5000+) level. Students enrolled in the pathway are encouraged to seek employment with a department faculty member to work as student assistants on sponsored research projects.

Other Curricular Offering: Combined BS in Electrical Engineering to MS in Biomedical Engineering Accelerated Degree Pathway

This five-year pathway seamlessly combines a baccalaureate degree in electrical engineering with the Master's in biomedical engineering. A student admitted to the combined degree pathway will be considered to have undergraduate status until the student applies for graduation from their bachelor's degree program. Upon conferral of the bachelor's degree, the student will be granted graduate status and be eligible for graduate assistantships. Students enrolled in the pathway may count up to 9 hours of graduate level courses (i.e., 5000 level or higher) as credits for both the undergraduate and graduate degree programs. For each of the courses counted as credits for both BS and MS degree, a minimum grade of 'B' is required. Upon completion of the combined BS/MS pathway, students must have accumulated a minimum of 24 hours of credits at the graduate (5000+) level. Students enrolled in the pathway are encouraged to seek employment with a department faculty member to work as student assistants on sponsored research projects.

Other Curricular Offering: Combined BS in Mechanical Engineering to MS in Biomedical Engineering Accelerated Degree Pathway

This five-year pathway seamlessly combines a baccalaureate degree in mechanical engineering with the Master's in biomedical engineering. A student admitted to the combined degree pathway will be considered to have undergraduate status until the student applies for graduation from their bachelor's degree program. Upon conferral of the bachelor's degree, the student will be granted graduate status and be eligible for graduate assistantships. Students enrolled in the pathway may count up to 9 hours of graduate level courses (i.e., 5000 level or higher) as credits for both the

undergraduate and graduate degree programs. For each of the courses counted as credits for both BS and MS degree, a minimum grade of 'B' is required. Upon completion of the combined BS/MS pathway, students must have accumulated a minimum of 24 hours of credits at the graduate (5000+) level. Students enrolled in the pathway are encouraged to seek employment with a department faculty member to work as student assistants on sponsored research projects.

BIOMEG:PHD - Doctor of Philosophy in Biomedical Engineering

Overview

Degree Offered
PHD - Doctor of Philosophy

Program Title
Biomedical Engineering

The PhD in Biomedical Engineering at FIU's Department of Biomedical Engineering is dedicated to nurturing visionary leaders in research and innovation. Building upon the interdisciplinary foundation of the field, the program immerses students in advanced theoretical concepts and cutting-edge research methodologies aimed at addressing complex challenges in human health and medicine. With a focus on cultivating expertise in specialized areas such as tissue engineering and biomechanics, bioimaging and sensors, and neurotechnology, students engage in rigorous scholarly inquiry and contribute to the advancement of knowledge in the field. Graduates emerge as trailblazers, equipped with the skills and acumen to lead research teams both in academia and the biomedical industry. Whether pursuing careers in academia or driving innovation in the private sector, PhD graduates from this program are poised to make significant contributions to the advancement of biomedical engineering and improve healthcare outcomes on a global scale. There are many career opportunities for graduates from the PhD program, including leadership positions in research and development in academia and biomedical and pharmaceutical industry, product development management in device manufacturing, quality assurance engineering for regulatory affairs (FDA) and engineering standards (NIST), and product sales.

Requirements

Simple Requirements

Admissions Requirements

Admissions Requirements for the PhD in Biomedical Engineering

A prospective student must meet all admission requirements stipulated in the University’s Graduate Policies and Procedures. In addition, the requirements for admission to the doctoral program in Biomedical Engineering are stated as follows:

(1) A student seeking admission to the doctoral program must have a Bachelor's or Master's degree in Biomedical Engineering, or other closely related field from an accredited institution.

(2) An overall GPA of at least 3.0/4.0 or a GPA of at least a 3.0/4.0 in the last 60 credits of the applicant's Bachelor's degree and a GPA of at least 3.3/4.0 in the applicant's Master's degree are required.

(3) Three letters of recommendation.

(4) A statement of research interests and goals.

(5) International graduate student applicants whose native language is not English are required to submit a score for the Test of English as a Foreign Language (TOEFL) or for the International English Language Testing System (IELTS). A total score of 80 on the iBT TOEFL or 6.5 overall on the IELTS is required.

The Graduate Admission Committee will examine credentials of all applicants. Applicants who have not satisfied the above will be evaluated for probationary or waiver admission.

Program Requirements

Credit Requirements

The PhD program requires a total of 75 credit hours beyond the BS degree. These credits are comprised of a minimum of 27 hours of coursework and a minimum of 15 hours of dissertation.

Applicants having a Master's Degree in Biomedical Engineering or closely related field from an accredited institution are given a maximum of 30 transferred semester hours. The graduate program committee and the academic adviser may recommend that applicants take additional courses based on their research needs and deficiencies. Applicants from science and engineering areas other than biomedical engineering will be expected to complete undergraduate courses selected to prepare them for graduate courses in their area of interest. Full admission into the graduate program requires the completion of these background courses with no grades below "C" and a grade point average of 3.0 or better.

The independent study course (BME6905 Ind Studies) may be taken as part of the 75 credits toward graduation. If so, a syllabus of the independent study course must be provided by the course instructor to the graduate program director before the hold on the independent study course can be removed. Doctoral students have a limit of taking BME6905 Ind Studies two times (6 credits maximum) towards their study plan.

Degree Credit Hours: 75

Type

Completion Requirement

Biomedical Engineering: minimum of 15 credits

Courses in this area must cover the major and minor specialty areas of the student. The three current specialty areas within biomedical engineering are:

1. Basic research in engineered tissue model Systems and related biomechanics
2. Diagnostic bioimaging and sensor systems
3. Therapeutic and reparative neurotechnology

Earn at least 15 credits

Approved Mathematics Core: 6 credits

Earn at least 6 credits from the following:

- STA5126 - Fundamentals of Design of Experiments
- STA5206 - Design Of Exper I

- STA6176 - Biostatistics
- STA6636 - High Dimension Data Analysis
- BME6705 - Nonlinear Systems with Applications to Life Sciences

Life Science: minimum of 6 credits

The life science courses maybe selected from approved electives such as:

Earn at least 6 credits from the following:

- BME5410 - Biomedical Physiology and Engineering I
- BME5411 - Biomedical Physiology and Engineering II
- BME6019 - Clinical Research Experience
- PCB6025 - Molecular and Cellular Biology I
- PCB6027 - Molecular and Cellular Biology II
- PHZ6255 - Molecular Biophysics
- CHM5506 - Physical Biochemistry (Inactive)

Biomedical Engineering Seminar

Complete ALL of the following Courses:

- BME7938 - Doctoral Biomedical Engineering Seminar

Qualifying Examination, Candidacy Requirements, and Final Defense

Students must demonstrate Graduate knowledge acquisition in three incremental stages in order to be awarded a PhD in Biomedical Engineering:

· Qualifying Exam
· Proposal Defense (oral and/or written)
· Final Defense (oral)

Qualifying Exam is offered twice a year: one at the end of Fall semester and the other at the end of Spring semester. Students entering the PhD with a Master's degree have to pass the Qualifying Exam within the first year in the PhD program. Students entering the PhD with a bachelor's degree, have to pass the Qualifying Exam within the first two years in the PhD program. In the semester prior to taking the Qualifying Exam, the student must declare an intention to take the exam and must declare a major area. In the event a student fails the Qualifying Exam, the student may retake it one more time the next time it is offered. A student who has successfully passed the Qualifying Exam and completed all the course work will be formally admitted to PhD candidacy.

The student will be required to prepare a formal dissertation proposal, and successfully defend the content of the proposal before his/her advisory committee. Immediately following the proposal defense, the student's dissertation committee will vote to pass the proposal, to have the student resubmit the proposal within six months, or to dismiss the student from the PhD program. A student can only resubmit his/her proposal once. The dissertation committee should be comprised of at least five members, at least three of whom should be biomedical engineering graduate faculty and at least one FIU graduate faculty member must be from outside biomedical engineering.

All students in the PhD program are required to complete a dissertation under the supervision of an advisor and committee. When the dissertation research is completed, the student should schedule a final defense with the examining committee. The dissertation, with an approval cover letter from the advisor, should be given to the examining committee for review not less than four weeks before the scheduled defense. The candidate should prepare to summarize the dissertation in the manner of a technical paper using appropriate visual aids in 40 minutes or less. Following the presentation, the candidate will answer questions related to the work from the audience and/or

the committee. At the conclusion of the defense, the committee will agree upon the outcome pass or fail and report the results to the Graduate School. Following the exam the student will implement the committee's suggestions for improving the draft document. Each committee member must sign the approval form in the final document. Copies of the approved dissertation must be provided to the advisor, Department, and the University Graduate School. Students should become familiar with the University Graduate School's regulations and deadlines available online at **http://gradschool.fiu.edu**.

MS en Route for PhD Candidates

Doctoral candidates who have completed the requirements for the Master of Science degree in Biomedical Engineering and have filed the D-2 and D-3 forms that have been accepted by the University Graduate School will receive a Master of Science en route to the PhD in Biomedical Engineering, respectively.

Courses to be counted in the MS en route must have been taken at FIU. Transfer credits cannot be used for MS en route. Students must consult their Graduate Programs Director to ensure they qualify.

Major Requirements

There are no majors associated with this program.

Track, Specialization, Concentration, Area of Emphasis, or Other Curricular Offering Requirements

BUSADM:DBA - Doctorate in Business Administration

Overview

Degree Offered
DBA - Doctorate in Business Administration

Program Title
Business Administration

The Doctorate in Business Administration (DBA) is designed for working senior-level professionals who desire to achieve a doctoral degree in business while continuing their work responsibilities and careers. The DBA will prepare students with the advanced knowledge necessary to manage complex organizational environments and solve real-world problems via the conduct of applied research in all areas of business. It provides students with the methodological and analytical tools required for executing applied research, as well as the skills required in formulating and communicating quality applied research. The DBA represents the highest level of academic achievement in business administration.

For more information, visit the College of Business website.

Requirements

Simple Requirements

Admissions Requirements

The Chapman School offers a Doctorate in Business Administration (DBA). This program is offered as a track under the Ph.D. program and is designed for working senior-level professionals who desire to achieve a doctoral degree in business while continuing their work responsibilities and careers.

All qualified students are encouraged to apply to the program, regardless of their sex, age, race, color, creed, handicap, marital status, or national or ethnic origin. Applications are accepted from prospective students with a broad variety of educational backgrounds, including areas like business, liberal arts, and the sciences. Successful applicants must have a minimum of 10 years of work experience with a minimum of seven years of which must have been in a documented managerial role (managing people, budgets, projects), and a Master’s degree from an accredited college or university. Those students selected for the DBA program must demonstrate strong evidence of ability, scholarly interest, and success.

Applicants should submit the following:

(1) A completed application form and processing fee.

(2) Two letters of recommendation.

(3) Official transcripts from all institutions in which the applicant has completed any undergraduate and graduate course work.

(4) A formal statement of purpose for seeking the DBA degree and specific reasons for applying to Florida International University.

(5) A resume detailing chronological professional experience and dates of earned degrees.

Applications for the DBA program are accepted on a rolling basis. Applicants are considered once all the required documents have been received.

Financial Aid

Applicants to the DBA program may request financial aid through external scholarships, and federal student loans by completing the FAFSA application for those who qualify.

Program Requirements

Degree Requirements

Type

Completion Requirement

Year I

General degree requirements for all candidates for a Doctorate in Business Administration include:

(1) Successful completion of all required coursework.

(2) Successful completion of a doctoral dissertation.

The following courses and sequence are required for the DBA:

Complete ALL of the following Courses:

- QMB7910 - Quantitative Research Methods in Business
- GEB7918 - Philosophy and Process of Applied Business Research
- GEB7910 - Advanced Quantitative Research Methods in Business
- GEB7912 - Experiments and Survey Design
- MAN7207 - Theories of Organization
- GEB7892 - Theory Development
- GEB7897 - Advanced Statistical Analysis and Structural Equation Modeling
- MAN7916 - Doc Res In Bus Admin
- GEB7913 - DBA Research Project and Qualifying Examination

Year II

Complete ALL of the following Courses:

- GEB7911 - Qualitative Research Methods in Business
- GEB7365 - International Business Theory and Practice
- GEB7915 - Advanced Qualitative Research Methods in Business
- MAN7275 - Org Behav Mgmt
- GEB7876 - Marketing and Behavioral Theory
- MAN7718 - Analysis of Corporate Policy Methods

- MAN7206 - Organizational Analysis
- GEB7981 - DBA Dissertation Preparation

Year III

Earn at least 24 credits from the following:

- GEB7982 - DBA Dissertation

Optional Electives

Complete ANY of the following Courses:

- GEB7366 - Financial Issues in the Global Environment
- ISM6136 - Business Analytics Applications

Additional Comments:

Note: The programs, policies, requirements, and regulations listed in this catalog are subject to continual review in order to meet the needs of the University's various publics and to respond to the mandates of the State Board of Education and the Florida Legislature. Changes may be made without advance notice. For more information, please refer to our website: http://business.fiu.edu or call (305)348-0148.

Residencies

Each semester will have four required residencies for a total of 16 required residencies over the three-year program. The initial residency will be the Thursday before the first residency for orientation with all remaining residencies occurring monthly on a Friday and Saturday.

Major Requirements

There are no majors associated with this program.

Track, Specialization, Concentration, Area of Emphasis, or Other Curricular Offering Requirements

Concentration in Hospitality and Management

The FIU Chaplin School of Hospitality and Tourism Management, in conjunction with the Chapman Graduate School of Business, offers a Doctorate in Business Administration (DBA) with a concentration in hospitality management. This program is designed for working, senior-level professionals who desire to earn a doctoral degree in business, concentrating on hospitality and tourism, while continuing their work responsibilities and careers.

The DBA will equip students with practical-oriented research to fulfill leadership or other strategic responsibilities. Students will obtain the advanced knowledge to address, change, and quickly solve complex business issues in hospitality and tourism management. This program will provide students with the skills to not only conduct applied and academic research, but also for a career as a professor in higher education.

The program is geared towards hospitality industry professionals who have already completed a master's degree and have accrued ten years of management experience. Through the DBA, students gain the opportunity to advance in their current organization, transition into the world of consulting, or join academia and work to develop the next generation of hospitality leaders.

The Hospitality and Management concentration is identical to the base Doctorate in Business Administration Program with the following exceptions:

Students pursuing this concentration will take the following four courses to satisfy the concentration requirement in place of GEB 7365, GEB 7876, MAN 7718, and MAN 7206:

(1) HMG 7230 - Philosophy, Fundamentals & Theories in Hospitality and Tourism (in lieu of GEB 7365)

(2) HMG 7201 - Social Responsibility and Sustainability for Hospitality and Tourism (in lieu of GEB 7876)

(3) HMG 7297 - Hospitality Higher Education Teaching and Training Practices (in lieu of MAN 7718

(4) HMG 7011 - Contemporary Issues in Hospitality and Tourism Management (in lieu of MAN 7206)

BUSADM:PHD - Doctor of Philosophy in Business Administration

Overview

Degree Offered
PHD - Doctor of Philosophy

Program Title
Business Administration

The FIU PhD in Business Administration connects students with world-class faculty members who help develop students' research and teaching skills in preparation for successful academic careers. The PhD program emphasizes a strong foundation in both methodological and theoretical training. Students engage in collaborative work with faculty by developing skills in formulating, conducting, and communicating quality research.

Choose from six core concentrations:

• Accounting

• Finance

• International Business

• Management Information Systems

• Management

• Marketing

Admissions Requirements for the PhD in Business Administration

Applications are accepted from prospective students with a broad variety of educational backgrounds, including areas like business, liberal arts, and the sciences. Those students selected for the Ph.D. program must demonstrate strong evidence of ability, scholarly interest, and success.

Applicants should submit the following:

(1) A completed application form and processing fee.

(2) Three letters of recommendation.

(3) Official transcripts from all institutions in which the applicant has completed any undergraduate and graduate course work.

(4) All applicants are required to have taken either the GMAT or GRE within five years of their application. A GMAT score (or its GRE equivalent) of 600 or higher and a 3.0 GPA or better in post-secondary education is desired, although some applicants falling short of these desired scores and grades have been accepted into our program. Those with GMAT score below 500 or its GRE equivalent score will NOT be considered for admission. For more information about how to covert a GRE score into its GMAT equivalent, go to: http://www.ets.org/gre/comparison.

(5) A formal statement of purpose for seeking the doctoral degree and specific reasons for applying to Florida International University.

(6) A curriculum vitae.

(7) International graduate student applicants whose native language is not English are required to submit a score for the Test of English as a Foreign Language (TOEFL) or for the International English Language Testing System (IELTS). A total score of 80 on the iBT TOEFL or 6.5 overall on the IELTS is required. Such applicants also should review the "General Admission Requirements for Foreign Students" in the "Admission" section of this catalog.

The College admits a new class of doctoral students every year during the Fall semester.

Complete applications must be received by January 15. Acceptance decisions for fall admission are typically made not later than March.

Applicants are considered once all the required documents have been received.

Financial Aid

Applicants to the doctoral program may request financial aid by completing the appropriate form. Stipends requiring a mixture of research and teaching are also available. These stipends may include both a cash award and a tuition waiver, depending upon the applicant's qualifications. If you wish to apply for a stipend include this request with your application documents.

Program Requirements

Degree Requirements

Students must be admitted into one of the five core concentrations:

--Accounting

--Finance

--Management

--Management Information Systems

--Marketing

General degree requirements for all candidates for a Ph.D. in Business Administration include:

(1) Successful completion of all required coursework.

(2) Successful completion of a comprehensive examination at the end of this coursework.

(3) Successful completion and defense of a doctoral dissertation (minimum 15 credits).

Note: The programs, policies, requirements, and regulations listed in this catalog are subject to continual review in order to meet the needs of the University's various publics and to respond to the mandates of the State Board of Education and the Florida Legislature. Changes may be made without advance notice. Please refer to the "Policies and Processes" section of this catalog for the University's policies, requirements, and regulations.

For more information please refer to our website: **http://business.fiu.edu** or call (305) 348-1746.

Major Requirements

There are no majors associated with this program.

Track, Specialization, Concentration, Area of Emphasis, or Other Curricular Offering Requirements

Accounting Concentration in the Ph.D. Business Administration Program

The School of Accounting offers an Accounting concentration in the doctoral program in Business Administration. The degree is a 75-credit hour program.

The first two years of the PhD program are typically spent in coursework and the last two years are spent working on the dissertation.

Students will also take courses with other departments (e.g. Finance, Economics, and Statistics) offering courses relevant to individual doctoral student's research needs.

Notes:

(1) This Accounting Ph.D. program of study is a sample guideline that can be adjusted depending on the availability of classes and students' needs.

2) Students can take additional seminar courses from other departments with the approval of the Accounting Doctoral Director. For example, the students pursuing financial accounting research may be interested in Investment seminar or Corporate Finance Seminar offered by the Finance Department.

(3) All Ph.D. students must register one credit hour for research colloquium in every semester until they have advanced to candidacy.

(4) Every Ph.D. student must present at least one summer paper in the SOA research colloquium before their proposal defense.

Year IV - Fall Courses

Complete ALL of the following Courses:

- ACG7980 - Ph.D. Dissertation

Year IV - Spring Courses

Complete ALL of the following Courses:

- ACG7980 - Ph.D. Dissertation

Year IV - Summer Courses

Complete ALL of the following Courses:

- ACG7980 - Ph.D. Dissertation

Research Tools: ECO Courses

Research tools courses: Specific research tool courses to be taken by Ph.D. students depend on their prior academic background and should be approved by the Accounting Doctoral Director.

Complete ANY of the following Courses:

- ECO6112 - Fundamentals of Microeconomic Theory
- ECO7405 - Mathematical Methods in Economic Analysis I
- ECO7424 - Econometric Methods I
- ECO7425 - Econometric Methods II

Research Tools: STA Courses

Research tools courses: Specific research tool courses to be taken by Ph.D. students depend on their prior academic background and should be approved by the Accounting Doctoral Director.

Complete ANY of the following Courses:

- STA6166 - Statistical Methods in Research I
- STA6167 - Statistical Methods in Research II
- STA6244 - Data Analysis I
- STA6247 - Data Analysis II
- STA6746 - Multivariate Statistical Analysis

Finance Concentration in the Ph.D. Business Administration

Students in the Finance Concentration in the Ph.D. Business Administration are required to complete a minimum of 16 courses. Those concentrating in Finance must take six courses or seminars in Finance (as described below), a two-course sequence in advanced economic theory, and a two-course sequence in either advanced econometrics or an equivalent sequence of courses in advanced statistics. With the advice and consent of the departmental Ph.D. committee, students also select other supporting coursework. The first year of study is regarded as “Tier I” in the Ph.D. program, and successful completion of this year of study is a prerequisite for enrollment in some of the more advanced courses.

Students are expected to maintain a GPA of 3.5 or better in the six departmental courses that comprise the Finance concentration. In addition, students are expected to maintain a GPA of 3.3 or better in all of their coursework. The degree (Business Administration) is a 75-credit program.

A Sample Course of Study

The sample program of study below describes the schedule for a typical student. Variations may be allowed for some students, and, of course, the requirements may be changed at the discretion of the Ph.D. Committee.

Finance Concentration

Type

Completion Requirement

Year I - Fall Courses

Complete ALL of the following Courses:

- FIN7855 - Financial Economics I
- FIN7845 - Statistical Methods in Finance I
- FIN7808 - Financial Theory I

The sequence in Micro-Economic Theory, ECO7115 Micro Theory I and ECO7116 Micro Theory II, may be substituted for the sequence in Financial Economics (FIN7855 Financial Econ I and FIN7856 Financial Econ II).

The sequence in Econometrics, ECO7424 Econometrics Metds Iand ECO7425 Econometrics II, may be substituted for the sequence in Statistical Methods in Finance (FIN7845 Stat Meth Fin I and FIN7846 Stat Meth Fin II).

Year I - Spring Courses

Complete ALL of the following Courses:

- FIN7856 - Financial Economics II
- FIN7846 - Statistical Methods in Finance II
- FIN7809 - Financial Theory II

The sequence in Micro-Economic Theory, ECO7115 Micro Theory I and ECO7116 Micro Theory II, may be substituted for the sequence in Financial Economics (FIN7855 Financial Econ I and FIN7856 Financial Econ II).

The sequence in Econometrics, ECO7424 Econometrics Metds I and ECO7425 Econometrics II, may be substituted for the sequence in Statistical Methods in Finance (FIN7845 Stat Meth Fin I and FIN7846 Stat Meth Fin II).

Year I - Summer Courses

Complete ALL of the following Courses:

- MAN7916 - Doc Res In Bus Admin

Year II - Fall Courses

Complete ALL of the following Courses:

- FIN7810 - Financial Theory III

Plus Two Finance Electives (6 credits)

Year II - Spring Courses

Three Finance Electives (9 credits)

Year II - Summer Courses

Complete ALL of the following Courses:

- MAN7916 - Doc Res In Bus Admin

Year III - Fall Courses

Complete ALL of the following Courses:

- FIN7981 - Finance Dissertation Preparation

Year III - Spring Courses

Complete ALL of the following Courses:

- FIN7980 - Ph.D. Dissertation

Year III - Summer Courses

Complete ALL of the following Courses:

- FIN7980 - Ph.D. Dissertation

Summer IV - Fall Courses

Complete ALL of the following Courses:

- FIN7980 - Ph.D. Dissertation

Year IV - Spring Courses

Complete ALL of the following Courses:

- FIN7980 - Ph.D. Dissertation

Year IV - Summer Courses

Complete ALL of the following Courses:

- FIN7980 - Ph.D. Dissertation

Additional Comments:

Summer Research Projects

Students are required to complete research projects during the summer semesters following their first and second years in the program. One faculty member will serve as an advisor for all research projects in a given summer.

For both summer projects, students must submit a written paper and make a presentation to the faculty. Ideally, these papers should be of sufficient quality to merit their submission to a conference or a journal. Students must satisfy all university and college dissertation requirements.

Management Concentration in the Ph.D. Business Administration Program

The Department of Global Leadership and Management and the Department of International Business jointly offer a Ph.D. concentration in Management. Students may focus their studies on Strategic Management, Entrepreneurship, International Business and International Management, Human Resource Management, Organizational Behavior, and Hospitality Management.

The Management Concentration Doctoral Studies Program in Business Administration is a selective one leading to the Ph.D. degree. The program emphasizes the development of research and teaching skills to ensure the graduates acquire the credentials necessary for placement in leading institutions.

Each doctoral student's program of study is individually tailored to mesh faculty and student interests and to maintain a high level of interaction between the students and faculty.

The program generally requires three to four years of full-time study, including approximately one to one-and-one-half years of dissertation research. A set of core, or "tool area" business courses, geared toward establishing the student's breadth of knowledge, is required of all doctoral candidates during the first year of study. The second year of coursework focuses on a particular area of concentration to develop the student's depth knowledge in a specific discipline.

The degree (Business Administration) is a 75-credit program.

Management Concentration

Type

Completion Requirement

Required Courses: 9 credits

Complete ALL of the following Courses:

- MAN7275 - Org Behav Mgmt
- MAN7895 - Seminar In Management (Inactive)
- MAN7616 - Multinational Firm Global Strategy
  OR MAN7718 - Analysis of Corporate Policy Methods

Content Courses: 9 credits

Complete at least 3 of the following courses:

- MAN7146 - Leadership I (Inactive)
- MAN7206 - Organizational Analysis
- MAN7207 - Theories of Organization
- MAN7235 - Management Philosophy & Strategy (Inactive)
- MAN7609 - Comparative Management

Required Research Methods Courses: 12 credits

Complete ALL of the following Courses:

- MAN7155 - Fundamentals of Behavioral Research
- MAN7910 - Advanced Management Research
- MAN7640 - International Business Research Methods
- QMB7910 - Quantitative Research Methods in Business
  OR GEB7911 - Qualitative Research Methods in Business
  OR MAN7984 - Doctoral Research Seminar: Development and Utilization of Large Scale Datasets (Inactive)

Statistical Courses: 12 credits minimum

Chosen with advisor approval.

Research Project Courses

Complete ALL of the following Courses:

- MAN7916 - Doc Res In Bus Admin
- MAN7981 - Dissertation Prep
- MAN7980 - Ph.D. Dissertation

Students must complete a minimum of 6 credits in MAN7916 Doc Res In Bus Admin, 9 credits in MAN7981 Dissertation Prep, and 15 credits in MAN7980 Ph.D. Dissertation.

Management Information Systems Concentration in the Ph.D. Business Administration Program

The Department of Information Systems and Business Analytics (ISBA) offers a Management Information Systems (MIS) concentration in the doctoral program in Business Administration. The degree (Business Administration) is a 75- credit program.

Please contact the Ph.D. Program Director at (305) 779-7981 for further requirements and details.

Management Information Systems Concentration

Type

Completion Requirement

Year 1 - Fall Courses

Complete ALL of the following Courses:

- ISM7345 - Organizational and Strategic Applications of IS Research
- QMB6603 - Analyzing and Leveraging Transactional Data
- ISM7935 - Research in Information Systems

Year 1 - Spring Courses

Complete ALL of the following Courses:

- STA5206 - Design Of Exper I
  OR STA5126 - Fundamentals of Design of Experiments
- MAN7155 - Fundamentals of Behavioral Research
- ISM7152 - Seminar on System Acquisition and Implementation

Year I - Summer Courses

Complete ALL of the following Courses:

- ISM7906 - Independent Study for Doctoral Students

Year II - Fall Courses

Complete ALL of the following Courses:

- QMB7910 - Quantitative Research Methods in Business
- ISM7406 - Business Analytics Research
- ISM7126 - Design Science Research

Year II - Spring Courses

Seminar in Information Sciences 9 credits

Students choose 3 seminars based on departmental/college offerings (including courses listed below) and advisor approval.

Complete ANY of the following Courses:

- ISM7931 - Organizational Theories in IS Research
- ISM7932 - Seminar on Research in Managing Distributed Operations (Inactive)
- ISM7933 - Seminar on Research in Measurement and Valuation in Knowledge Economy (Inactive)
- ISM7936 - Systems and Software Engineering Research
- ISM7937 - Seminar on Research in Emerging ICT and their Implications
- ISM7938 - Seminar on Research in Collaborative and Competitive Strategies in Global Economy (Inactive)

Year II - Summer Courses

Complete ALL of the following Courses:

- ISM7906 - Independent Study for Doctoral Students

Year III - Fall Courses

Complete ALL of the following Courses:

- ISM7981 - Dissertation Preparation

Year III - Spring Courses

Complete ALL of the following Courses:

- ISM7980 - Ph.D. Dissertation

Year III - Summer Courses

Complete ALL of the following Courses:

- ISM7980 - Ph.D. Dissertation

Year IV - Fall Courses

Complete ALL of the following Courses:

- ISM7980 - Ph.D. Dissertation

Year IV - Spring Courses

Complete ALL of the following Courses:

- ISM7980 - Ph.D. Dissertation

Year IV - Summer

Complete ALL of the following Courses:

- ISM7980 - Ph.D. Dissertation

Marketing Concentration in the Ph.D. Business Administration

The Marketing Concentration in the Ph.D. Business Administration trains students to become marketing researchers and educators at universities. This is a 75-credit program (including transferring in up to 3 credits from an applicable master's degree). The minimum coursework requirements described below provide the initial curriculum framework. Admitted students should work with the Department Doctoral Program Director to determine the fulfillment of other degree requirements.

To remain in the program, students are expected to maintain a GPA of 3.0 or better across all courses in the graduate degree program.

Summer Research Projects

Students are required to complete research projects during the summer semesters following their first and second years in the program. The 12 credits of MAR6915 Indep Study In Mar taken over two summers will satisfy the College of Business doctoral program summer research requirement.

Comprehensive Examination

Upon successfully completing all required coursework (both quantitative courses and courses in their major field of study), students are required to take a comprehensive examination. Research Courses (MAR6915 Indep Study In Mar, MAR7981 Dissertation Preparation, and MAR7980 Ph.D. Dissertation) are not required to be completed before taking the comprehensive examination.

Marketing Concentration

Type
Completion Requirement

Required Field Courses: 24 credits

Complete at least 8 of the following courses:

- MAR7622 - Marketing Research Methodology I
- MAN7155 - Fundamentals of Behavioral Research
- MAR7507 - Seminar in Consumer Behavior
- MAR7786 - Seminar in Marketing Theory
- MAR6936 - Special Topics in Marketing
- MAR7623 - Seminar in Marketing Environment
- MAR7817 - Seminar in Marketing Management
- MAR7399 - Seminar in Advertising and Persuasion
- MAR7931 - Seminar in Service Science: Marketing, Management, and Technology
- MAR7849 - Seminar in Motivation and Emotion
- MAR7875 - Seminar in Consumer Welfare and Well-Being
- MAR7205 - Seminar in Channels of Distribution (Inactive)

Research Courses: 36 credits

Earn at least 36 credits from the following:

- MAR6915 - Independent Study in Marketing
- MAR7981 - Dissertation Preparation
- MAR7980 - Ph.D. Dissertation

Students must complete a minimum of 12 credits in MAR6915 Indep Study In Mar, 9 credits in MAN7981 Dissertation Prep, and 15 credits in MAN7980 Ph.D. Dissertation.

Quantitative Courses: 9 credits

Complete at least 3 of the following courses:

- EDF6486 - Advanced Data Analysis in Quantitative Educational Research
- STA6167 - Statistical Methods in Research II
- EDF7419C - Applied Regression Analysis for Educational Research
- STA5206 - Design Of Exper I
- MAR6936 - Special Topics in Marketing
- MAN7910 - Advanced Management Research
- EDF7437 - Advanced Measurement
- GEB7897 - Advanced Statistical Analysis and Structural Equation Modeling
- ECO7424 - Econometric Methods I
- EDF7489 - Hierarchical Linear Modeling for Educational Research
- EDF7403C - Data Analysis in Multivariate Educational Research
- EDF7412C - Structural Equation Modeling for Educational Research
- PSY5246C - Multivariate Analysis in Applied Psychological Research
- PSY5939 - Special Topics in Psychology
- PHC6062 - Systematic Reviews and Meta-Analysis

International Business Concentration in the Ph.D. Business Administration

The Department of International Business offers a Ph.D. concentration in International Business. The program emphasizes the development of research and teaching skills to ensure that the graduates acquire the credentials necessary for placement in leading institutions. Students may focus their studies on the broad field of International Business.

Each doctoral student's program of study is individually tailored to mesh faculty and student interests and to maintain a high level of interaction between the students and faculty.

The program generally requires four years of full-time study, including approximately two years of dissertation research. A set of core, or "tool area" business courses, geared toward establishing the student's breadth of knowledge, is required of all doctoral candidates during the first year of study. The second year of coursework focuses on a particular area of concentration to develop the student's depth knowledge in a specific discipline.

The degree (Business Administration) is a 75-credit program.

International Business Concentration

Type

Completion Requirement

Required Courses: 15 credits

Complete ALL of the following Courses:

- MAN7616 - Multinational Firm Global Strategy
- MAN7640 - International Business Research Methods
- MAN7718 - Analysis of Corporate Policy Methods
- MAN7609 - Comparative Management
- MAN7910 - Advanced Management Research

Content Courses:12 credits

Complete ALL of the following Courses:

- MAN7620 - Ib Operations I

3 courses chosen with Department Doctoral Program Director's approval

Required Statistics Courses: 12 Credits

4 Statistics Courses (chosen with Department Doctoral Program Director's approval)

Research Project Courses

Complete ALL of the following Courses:

- GEB7914 - IB Doctoral Research
- GEB7983 - Dissertation Preparation in International Business
- GEB7984 - IB Dissertation

Students must complete a minimum of 6 credits in GEB7914 Doctoral Research in Internati IB Doctoral Research, 9 credits in GEB7983 IB Dissertation Prep IB Dissertation Prep, and 15 credits in GEB7984 Dissertation in International IB Dissertation.

Additional Comments:

Summer Research Projects: Students are required to complete a research project during the summer semester following their first year in the program. A faculty member will serve as an advisor to each student. For the summer project, students must submit a written paper and make a presentation to the department's faculty. Ideally, the paper should be of sufficient quality to merit their submission to a major conference or a journal. Students must satisfy all university and college dissertation requirements.

BUSANL:MBA - Master of Business Administration in Business Analytics

Overview

Degree Offered
MBA - Master of Business Administration

Program Title
Business Analytics

The Master of Business Administration (MBA) in Business Analytics delivers an AI-infused curriculum that prepares students to lead data-driven transformation across every business function. Students gain hands-on experience with modern analytics and AI tools and programming languages—including Tableau, Power BI, Amazon Web Services, SQL, Python, R, and RapidMiner—while learning how to apply machine learning and generative AI to solve real organizational problems responsibly and effectively.

In addition to technical depth, students build essential leadership and communication capabilities through presentations, stakeholder storytelling, and professional networking. Graduates learn to translate complex data into high-impact insights, AI-enabled strategies, and measurable business value, positioning them to drive innovation and advance into roles such as chief transformation officer, chief information officer, chief experience officer, technology founder, and other analytics leadership positions.

Requirements

Simple Requirements

Admissions Requirements

Admission to the Master of Business Administration (MBA) in Business Analytics (major: Business Analytics)

The MBA-Business Analytics (BA-MBA) major considers students' work experience, industry knowledge, management skills and undergraduate education as strengths in the candidates qualifying portfolio. Candidate's professional maturity and managerial experience are highly considered in the admission selection process because the BA-MBA major at FIU fosters students' ability to contribute real-world experiences to add value to the overall student learning in this competitive degree program.

To be eligible for admission to the BA-MBA major in the Chapman Graduate School of Business, applicants must:

(1) Hold a bachelor degree or equivalent from either a U.S. accredited college or university or the equivalent degree from institutions outside the U.S.; Students coming from programs where the primary degree is at the master level or higher will meet this requirement;

(2) Show high promise of success in graduate studies as determined by the faculty based upon academic performance, work experience or a combination of academic and work experience.

(3) Evidence a minimum score of 500 on the Graduate Management Admission Test (GMAT) or similar Graduate Record Exam (GRE) score. A GMAT waiver at the discretion of the academic director is available for:

(a) Applicants with two years of demonstrative work experience and success in completing other academic programs;

(b) Applicants who have an undergraduate business or related degree (economics, hospitality management, etc.) with an upper division grade point average (GPA) of 3.25;

(c) Applicants without a business or related degree having an upper division GPA of 3.35;

(d) If the applicant has already completed a graduate degree from an accredited university with a minimum grade point average (GPA) of 3.0 or is entering a business master's program under a special agreement for admissions with specific foreign and domestic universities; grade point average (GPA) of 3.0. An applicant with substantial work experience and industry/work related recommendations will be evaluated based on academic qualifications, work experience, and performance.

(4) Provide a resume describing current and past responsibilities, leadership and management experience highlights and, if any, demonstrated accomplishments in the application of quantitative and analytical skills;

(5) Provide a statement of purpose (short essay) describing how the program fits within your personal and career goals. The essay will be evaluated for applicants' effective and succinct writing skills; 7. When the applicant's studies were completed in non-English speaking countries, demonstrate proficiency of the English language by presenting a minimum score of 80 on the iBT TOEFL (equivalent to 550 on the paper based version or 213 on the computer based version of the test of English as a Foreign Language) or 6.5 overall on the International English Language Testing System (IETLS) or by other university level English proficiency standards as they are approved.

Applicants are encouraged to provide any additional documentation to strengthen their application portfolio. Examples of documentation include: master degree in any discipline other than an MBA, law degree, professional certifications (i.e. CPA, CFA, SHRM, etc.), GMAT or GRE scores, specialized leadership experience or training documentation that the applicant is part of a “fast track” or “high potential” management group at their organization, or any other similar evidence including letters of reference and recommendations.

Admissions at the graduate level are competitive and meeting minimum requirements does not guarantee admission. For additional information about this value-added program, please contact the MBA-BA office at (305) 779-7897.

Admission to the MBA in Business Analytics (major: Artificial Intelligence)

The MBA in Artificial Intelligence (MBAi) program considers students' work experience, industry knowledge, management skills, technical backgrounds and undergraduate education as strengths in the candidates qualifying portfolio. Candidate's professional maturity and managerial experience are highly considered in the admission selection process because the MBAi program at FIU fosters students' ability to contribute real-world experiences to add value to the overall student learning in this competitive degree program.

To be eligible for admission to the MBAi program in the Chapman Graduate School of Business, applicants must:

(1) Hold a bachelor degree or equivalent from either a U.S. accredited college or university or the equivalent degree from institutions outside the U.S.; Students coming from programs where the primary degree is at the master level or higher will meet this requirement;

(2) Show high promise of success in graduate studies as determined by the faculty based upon academic performance, work experience or a combination of academic and work experience.

(3) Evidence a minimum score of 500 on the Graduate Management Admission Test (GMAT) or similar Graduate Record Exam (GRE) score. A GMAT waiver at the discretion of the academic director is available for:

(a) Applicants with two years of demonstrative work experience and success in completing other academic programs;

(b) Applicants who have an undergraduate business or related degree (economics, hospitality management, etc.) with an upper division grade point average (GPA) of 3.25;

(c) Applicants without a business or related degree having an upper division GPA of 3.35;

(d) If the applicant has already completed a graduate degree from an accredited university with a minimum grade point average (GPA) of 3.0, or is entering a business master's program under a special agreement for admissions with specific foreign and domestic universities; grade point average (GPA) of 3.0. An applicant with substantial work experience and industry/work related recommendations will be evaluated based on academic qualifications, work experience, and performance;

(4) Provide a resume describing current and past responsibilities, leadership and management experience highlights and, if any, demonstrated accomplishments in the application of quantitative and analytical skills;

(5) Provide a statement of purpose (short essay) describing how the program fits within your personal and career goals. The essay will be evaluated for applicants' effective and succinct writing skills;

(6) When the applicant's studies were completed in non-English speaking countries, demonstrate proficiency of the English language by presenting a minimum score of 80 on the iBT TOEFL (equivalent to 550 on the paper based version or 213 on the computer based version of the test of English as a Foreign Language) or 6.5 overall on the International English Language Testing System (IETLS) or by other university level English proficiency standards as they are approved.

Applicants are encouraged to provide any additional documentation to strengthen their application portfolio. Examples of documentation include: master degree in any discipline other than an MBA, law degree, professional certifications (i.e. CPA, CFA, SHRM, etc.), GMAT or GRE scores, specialized leadership experience or training documentation that the applicant is part of a "fast track" or "high potential" management group at their organization, or any other similar evidence including letters of reference and recommendations.

Admissions at the graduate level are competitive and meeting minimum requirements does not guarantee admission. For additional information about this value-added program, please contact the MBA-BA office at (305) 779-7897.

Transfer Credits

A student may receive permission to transfer up to a maximum of nine semester hours of graduate credit towards a Master of Science degree program or twelve semester hours of credit for a Master of Business Administration degree program, if:

(1) The courses were taken at the graduate level at an accredited college or university;

(2) The courses were not introductory or survey in nature;

(3) The student earned grades of "B" or higher in the courses;

(4) The courses are judged by the Department Chair, College Dean, Graduate School Dean, and program manager to be relevant to the student's graduate program;

(5) The credits were completed within six years immediately preceding the College's awarding of the degree. Credits are not transferable until the student has earned 15 semester hours in a Chapman School graduate degree program.

Program Requirements

College Policies

To be eligible for a Master's degree, a student must:

(1) Satisfy all University requirements for a Master's degree;

(2) Satisfy required prerequisites;

(3) Complete the required courses in the specific graduate program in which he/she is enrolled.

(4) Earn a minimum average of "B" (3.0) in all approved courses in the student's approved course of graduate study.

No courses in which a graduate student earns a grade below "C" may be counted towards any Master's degree program in the Chapman School. However, all approved undergraduate and graduate course work a graduate student takes will be counted in computing his or her grade point average, including courses in which he or she has earned a "D" or "F" grade.

Faculty have the discretion to administratively drop students who do not attend the first class of a course.

Degree Requirements

Type
Completion Requirement

Core Courses: 33 credits

Students in both the Business Analytics and Artificial Intelligence majors must take the following core courses.

Complete ALL of the following Courses:

- ACG6026 - Accounting for Managers
- FIN6406 - Corporate Finance
- MAN6245 - Organizational Behavior
- MAR6805 - Marketing Management in the Global Environment
- ISM6205 - Database Management
- ISM6208 - Cloud Data Warehousing
- ISM6128 - Business Process Design
- ISM6427 - Artificial Intelligence Strategy
- ISM6316 - Project Management
- ISM6644 - Python Fundamentals for Business Analytics
- ISM6465C - AI for Business Analytics

Additional Comments:
ISM6644 Python Fundamentals may be waived for students with a technical background at the Department 's discretion.

Major Requirements

Major in Business Analytics: 9 credits + 36 credit core

Type
Completion Requirement

Business Analytics Major Core Courses: 12 credits

Graduate business students opting to earn a Master of Business Administration in Business Analytics, Business Analytics (BA-MBA) major will gain a solid foundation in the application of statistical methods, techniques, and tools to large data sets. The major provides students with the background needed to applying statistical methods and techniques through use of AI- enabled business analytics tools. Depending on background and experience, graduates will be prepared for a wide range of positions including entry-level and management business analytics and reporting positions.

Students must successfully complete 15 three-credit hour courses for a total of 45 credit hours, inclusive of the MBA Core*, and three noncredit Professional Development Seminars. Professional development seminars I, II, and III Each of the seminars will focus on soft skills such as leadership, team building, oral presentation, writing skills and career exploration. Seminars will be mandatory, non-credit.

Complete ALL of the following Courses:

- QMB6357 - Business Statistical Analysis
- ISM6136 - Business Analytics Applications
- ISM6404 - Business Data Visualization and Reporting
- ISM6569 - Business Analytics Capstone

Business Analytics Optional Elective

Complete ALL of the following Courses:

- ISM6942 - MIS Internship

Major in Artificial Intelligence: 18 credits + 36 credit core

Type

Completion Requirement

Artificial Intelligence Major Core Courses: 21 credits

Graduate business students opting to earn a Master of Business Administration in Business Analytics, Artificial Intelligence major (MBAi) will gain a solid foundation in the application of statistical methods, techniques, and tools to large data sets. The MBAi program allows students to unlock innovative business strategies and solutions through complex disciplines like machine learning, business analytics, generative artificial intelligence (AI), computer vision, robotics and AI supported decision making. MBAi integrates both business strategy, AI and analytic technologies throughout the curriculum to deepen students' understanding of the interdependent relationship between these disciplines. Depending on background and experience, MBAi graduates will be prepared for careers across industries in technology strategy and operations, artificial intelligence, business analytics and innovation leadership roles.

Students must successfully complete 18 three-credit hour courses for a total of 54 credit hours, inclusive of the MBA core, and three noncredit Professional Development Seminars. Professional development seminars I, II, and III Each of the seminars will focus on soft skills such as leadership, team building, oral presentation, writing skills and career exploration. Seminars will be mandatory, non-credit.

Complete ALL of the following Courses:

- QMB6315 - Quantitative Analytical Methods in Business
- ISM6642 - Machine Learning for Business Applications
- ISM6418 - Business Data Exploration and Visualization
- ISM6467 - Generative AI in Business

- ISM6422 - Business Artificial Intelligence Applications
- QMB6603 - Analyzing and Leveraging Transactional Data
- ISM6429 - Business AI Capstone

Optional Elective

Complete ALL of the following Courses:

- ISM6942 - MIS Internship

Track, Specialization, Concentration, Area of Emphasis, or Other Curricular Offering Requirements

There are no tracks, specializations, concentrations, areas of emphasis, or other curricular offerings associated with this program.

BUSGOVL:BS - Bachelor of Science in Business and Government Leadership

Overview

Degree Offered
BS - Bachelor of Science

Program Title
Business and Government Leadership

The Bachelor of Science in Business and Government Leadership is an interdisciplinary undergraduate degree program for aspiring leaders to examine the challenges of leadership in free market societies. The degree provides an undergraduate with a strong foundation in liberal arts education as well as critical tools to make informed leadership decisions, whether in government, business, or non-profit settings. Students explore the science and art of leadership through theoretical and practical exercises.

Program Requirements

Academic Standing and Progression Requirements

Students are admitted directly to their chosen major at the University. Students are expected to make good progress based on critical indicators that include course completion and GPA requirements. In cases where students are not making successful progress, a change of major may be required. Academic advisors work with students to identify an appropriate major where a student will be successful in completing an undergraduate degree.

Minimum Grade in Degree-Applicable Coursework

Students in the Business & Government Leadership (BUSGL) degree must meet the following standards:

- Students must earn a C (2.0) or higher within two attempts in all courses applied to the degree (including ECON 2013 and ECON 2023). A Drop (DR) grade counts as an attempt. Failure to meet this standard may result in upper-division enrollment restrictions, mandatory advising, or a change of major.
- Students must achieve a 2.5 cumulative GPA across the following core courses: ISS 3124 and ISS 3129. Students that earn a grade of C or lower in any of these two Core Courses will be required to meet with an academic advisor to discuss progression requirements related to achieving the 2.5 cumulative GPA.
- The University will not allow a student to repeat any course in which a C (2.0) is earned.
- Students that cannot achieve a minimum 2.5 GPA based on their progression in core courses ISS 3124 and ISS 3129 will be required to meet with an advisor to change their major.

Sequencing in the Four BUSGL Core Courses

To ensure appropriate skill development and academic progression:

By End of Term / Credit Hours Earned	Course	Minimum GPA	Prerequisites
4th/60 hours	ECON 2013 and ECON 2023	Grade of C (2.0) or better within two attempts	These courses are pre-requisites for all Core Courses
5th or 6th/90 hours	ISS 3124	Grade of C (2.0) or better (2.5 when combined with ISS 3129)	Prerequisite for ISS 4362
5th or 6th/90 hours	ISS 3129	Grade of C (2.0) or better (2.5 GPA when combined with ISS 3124)	Prerequisite for ISS 4362
7th/105 hours	ISS 4362	Grade of C (2.0) or better	Prerequisite for ISS 4950
8th/120 hours	ISS 4950	Grade of C (2.0) or better	

Graduation Requirements

Students must meet all of the Program Requirements of the degree's curriculum and the university's requirements for graduation, including successful completion of 120 credits with a minimum 2.0 GPA.

Lower Division Requirements

Type

Prerequisite

Common Prerequisite Courses

This degree has no required common prerequisites For a list of all state-approved common prerequisites, including alternatives, visit https://cpm.flvc.org.

Other Lower Division Requirements: 6 credits

Complete ALL of the following Courses:

- ECO2013 - Principles of Macroeconomics
- ECO2023 - Principles of Microeconomics

Note: Successful completion with a C or better within two attempts. “DR” grade counts as an attempt.

Degree Program Hours: 120 credits

Type

Completion Requirement

Degree Required Core Courses: 12 credits

Complete ALL of the following Courses:

- ISS3124 - Foundational Principles for Leaders in Free Market Societies
- ISS3129 - Political Leadership in the United States
- ISS4362 - Quantitative and Qualitative Data Analysis for Leaders
- ISS4950 - Leadership Capstone

Required Management Courses: 6 credits

Complete ALL of the following Courses:

- MAN3025 - Organization and Management
- MAN4164 - Leadership

Required Communications Courses: 6 credits

Fulfill ALL of the following requirements:

Required Communications Course

Earn at least 3 credits from the following:

- COM3230 - Crisis Communication

AND

Communication Course from Electives list

Earn at least 3 credits

Students must select a course from the Communication Electives list to meet this degree requirement.

This course **cannot** count both as a completion requirement and elective requirement.

Electives: 15 Credits

Fulfill ALL of the following requirements:

Required Electives

Students must select 15 credits from the electives list below.

Earn at least 15 credits

AND

Elective Lists

Fulfill ANY of the following requirements:

Communication

Complete ANY of the following Courses:

- COM3003 - Human Communication
- COM3110 - Business and Professional Communication
- COM3404 - Nonverbal Communication
- COM4361 - Publishing for Applied Communication
- COM4430 - International Business Communication
- COM4462 - Conflict Management
- COM4510 - Political Communication
- COM4620 - Ethical Communication
- COM4930 - Special Topics in Communication Arts

A course from this list taken to meet the communication requirement will not count towards the required electives.

OR

Economics

Complete ANY of the following Courses:

- ECO3106 - Behavioral Economics
- ECO3223 - Money and Banking
- ECO4701 - World Economy
- ECO4704 - International Trade Theory and Policy
- ECP3410 - Introduction to Public Economics
- ECP3451 - Law And Economics
- ECS3403 - Economics of Latin America

OR

Entrepreneurship

Complete ANY of the following Courses:

- ENT4704 - International Entrepreneurship

OR

Finance

Complete ANY of the following Courses:

- FIN4634 - International Banking
- FIN4651 - Latin American Financial Markets and Institutions
- FIN4663 - Global Private Banking

OR

International Relations

Complete ANY of the following Courses:

- INR3303 - Foreign Policymaking
- INR3703 - International Political Economy

OR

Interdisciplinary Social Sciences

Complete ANY of the following Courses:

- ISS3214 - Fundamentals of Globalization
- ISS3222 - Special Topics in Foreign Policy
- ISS4284 - North America Integration
- ISS4930 - Topics in Globalization

OR

Management

Complete ANY of the following Courses:

- MAN3072 - American Culture in Business
- MAN4064 - Crisis Management
- MAN4065 - Business Ethics
- MAN4151 - Organizational Behavior
- MAN4602 - International Business
- MAN4660 - Business in Latin America
- MAN4662 - Business in Europe
- MAN4663 - Business in the Caribbean
- MAN4673 - Trade Policy and Business
- MAN4701 - Business In Society

OR

Public Administration

Complete ANY of the following Courses:

- PAD3003 - Introduction to Public Policy and Administration

OR

Political Science

Complete ANY of the following Courses:

- POS4930 - Topics in Public Law
- POS3283 - The Judicial Process

OR

Other

Complete ANY of the following Courses:

- PHM4360 - Topics Pol Phil
- AMH4333 - History of American Conservatism
- AMH4373 - Entrepreneurs in U.S.
- AMH4375 - Technology and American Society
- WOH4223 - History of the Global Economy

BUSGOVL:MS - Master of Science in Business and Government Leadership

Overview

Degree Offered
MS - Master of Science

Program Title
Business and Government Leadership - MS

The Master of Science in Business and Government Leadership is an interdisciplinary graduate degree program for seasoned leaders—and talented aspiring leaders—to examine the challenges of leadership in free market societies. The degree provides students with advanced practical and theoretical tools to make informed leadership decisions guided by principles of economic and individual freedom. Students explore the science and art of leadership through graduate-level case studies and academic exercises, guided by experienced faculty.

Requirements

Simple Requirements

Admissions Requirements

Admission Requirements

To be eligible for admission to the program, students must:

1. Hold a bachelor’s degree (or equivalent) from an accredited college or university.
2. Have a GPA of 3.0 (on a 4-point scale) established through overall undergraduate degree GPA or the last 60 credits of the degree GPA; or have earned a graduate degree with a minimum of a 3.0 GPA.
3. Provide two letters of recommendation from professional supervisors and/or former faculty instructor that attest to the applicant’s educational background, motivation, and analytical skills.
4. Provide personal statements regarding their motivation to attend the program, personal and career goals, and contributions that they will bring to their colleagues and fellow students.
5. Complete an interview with one of the faculty advisors or the director of the program.
6. Demonstrate proficiency in the English language per Florida International University’s Graduate Admission requirements when applicant's studies were completed outside of the United States.

7. Be in good standing at all previously attended colleges and universities.

Admissions at the graduate level are competitive and meeting the minimum program requirements does not guarantee admission.

Program Requirements

Graduation Requirements

To be eligible for a Master's degree, a student must:

1. Satisfy all university requirements for a master's degree (minimum 30 graduate credits);
2. Satisfy any required prerequisites;
3. Complete required courses in the enrolled graduate program;
4. Earn a minimum average of "B" (3.0) in all approved courses in the student's approved course of graduate study.

Grades below "C" will not be counted toward the master's degree program.

Degree Program Hours: 30 credits

Type

Completion Requirement

Degree Required Core Courses: 21 credits

Complete ALL of the following Courses:

- ISS6149 - Advanced Political Leadership in the United States
- ISS6366 - Data Analysis for Leaders
- ISS6136 - National Security and Economic Freedom
- ISS6190 - Leadership, Law, and Ethics
- ISS6415 - Advanced Negotiations & Conflict Resolution for Leaders
- ISS6389 - Advanced Communications for Leaders
- ISS6959 - Independent Project

Students must complete 1 credit of ISS6959 Independent Project ISS6959 Independent Project each semester of enrollment until the project is completed and at least three credits have been earned.

Required Management Courses: 6 credits

Complete ALL of the following Courses:

- MAN6167 - Leadership in a Global Environment
- MAN6245 - Organizational Behavior

Required Economics Course: 3 credits

Economics course most relevant to the student's career objectives (Adam Smith Center approval required). Students who require an introductory background in Economics will be enrolled in an appropriate graduate level course.

Earn at least 3 credits

Major Requirements

There are no majors associated with this program.

Track, Specialization, Concentration, Area of Emphasis, or Other Curricular Offering Requirements

There are no tracks, specializations, concentrations, areas of emphasis, or other curricular offerings associated with this program.

CDFILM:CFI - Undergraduate Certificate in Creative Digital Filmmaking

Overview

Degree Offered
ACRT - Academic Certificate

Program Title
Certificate in Creative Digital Filmmaking

The Certificate in Creative Digital Filmmaking combines courses in film appreciation, acting/directing for the screen, scriptwriting for film, digital film production, and post-production. It gives students an introductory foundation in the filmmaking process, culminating in an opportunity to work in teams to produce short films. A joint venture between the Department of Theatre and the Lee Caplin School of Journalism and Media, this certificate fills gaps in both departments, as students have expressed a desire to take courses in directing and acting and producing for film.

For more information, visit the College of Communication, Architecture, and the Arts website.

To explore more about this program, visit the website below:

Requirements

Simple Requirements

Admissions Requirements

Admission to the certificate is open to degree-seeking undergraduate students admitted to majors within the Department of Theatre or the Lee Caplin School of Journalism and Media. Students enrolled in other majors may request admission on a space-available basis.

To officially pursue a certificate(s), students must complete the requisite paperwork. Please visit the Office of Student Services for more information. Students in the Lee Caplin School of Journalism and Media can complete no more than one of the certificates offered by the School. Students may complete a certificate in another academic unit with prior School of Journalism and Media approval. Note: This Certificate is offered in conjunction with the Department of Theatre.

This certificate is open to degree-seeking students only.

Prerequisites

Contact advisor for information about any prerequisites.

Program Requirements

Program Credit Hours: 15

Type

Completion Requirement

Required Courses

Complete ALL of the following Courses:

- FIL2000 - Film Appreciation
- TPP3265 - Introduction to Acting/Directing for TV/Film
- DIG3153 - Writing for Film
- DIG4413 - Digital Cinematography
- DIG4287 - Sound Design for Visual Media

Major Requirements

There are no majors associated with this program.

Track, Specialization, Concentration, Area of Emphasis, or Other Curricular Offering Requirements

There are no tracks, specializations, concentrations, areas of emphasis, or other curricular offerings associated with this program.

CHEM:BA - Bachelor of Arts in Chemistry

Overview

Degree Offered
BA - Bachelor of Arts

Program Title
Chemistry

The Bachelor of Arts (BA) in Chemistry offers a well-rounded education that combines scientific knowledge with valuable skills from the liberal arts, offering flexibility in preparation for a wide range of career opportunities. The technical, writing, and communication skills developed are essential for employment in areas such as education, science communication, environmental policy, pharmaceutical sales, and technical writing. The program is also designed for students preparing for careers in medicine, pharmacy, dentistry, environmental studies, veterinary medicine, patent law, forensic science, or secondary science education. For more information, visit the College of Arts, Sciences, and Education website.

Requirements

Simple Requirements

Admissions Requirements

Admissions Requirements for the Bachelor of Arts (BA) in Chemistry

See general university admission requirements at admissions.fiu.edu.

Admission to the Chemical Education Major (FIU teach)

To qualify for admission to the program, undergraduate candidates must have met all the lower division requirements including: 60 credit hours of lower-division courses, all general education requirements, lower division GPA of 2.5 or higher, and achieve the competencies of the FTCE General Knowledge Exam (GK). All students must pass the GK Exam by the time they reach 72 credit hours in their program of study. All stated admission requirements are to be considered minimum. A student who meets these minimum requirements is not automatically assured admission. Program admission requirements are subject to change. It is the responsibility of the student to assure that he/she has met the requirements.

Program Requirements

This program is designed for students preparing for careers in medicine, pharmacy, dentistry, environmental studies, veterinary medicine, patent law, forensic science, or secondary science education*.

*Students interested in secondary teacher certification should contact the College of Arts, Sciences and Education Center for Academic Services at (305) 348-2978.

Academic Progression Requirements

Students admitted to the university are admitted directly to their chosen major. Students are expected to make good progress based on critical indicators, such as GPA in specific courses or credits earned. In cases where students are not making good progress, a change of major may be required. Advisors work to redirect students to more appropriate majors when critical indicators are not met.

Lower Division

Type

Completion Requirement

Common Prerequisites

For a list of all state-approved common prerequisites, including alternatives, visit https://cpm.flvc.org.

- Students are required to enroll in a mathematics course in both the Fall and Spring terms and in the Summer term, if needed.
- Students admitted in the Fall or Summer terms must successfully complete MAC 1105 with a grade of C or better by the end of their first Spring term and complete MAC 1147 with a grade of C or better by the end of their second Fall term.
- Students admitted in the Spring term must successfully complete MAC 1105 with a grade of C or better by the end of their first Fall term and complete MAC 1147 with a grade of C or better by the end of their second Spring term.

Students who do not meet this mathematics progression milestone will be redirected to a more appropriate academic program.

Complete ALL of the following Courses:

- CHM1045 - General Chemistry I
  AND CHM1045L - General Chemistry Lab I
- CHM1046 - General Chemistry II
  AND CHM1046L - General Chemistry Lab II
- CHM2210 - Organic Chemistry I
  AND CHM2210L - Organic Chemistry Lab I
- CHM2211 - Organic Chemistry II
  AND CHM2211L - Organic Chemistry Lab II
- PHY2048 - Physics with Calculus I
  AND PHY2048L - General Physics Laboratory I
- PHY2049 - Physics with Calculus II
  AND PHY2049L - General Physics Laboratory II
- MAC2311 - Calculus I
- MAC2312 - Calculus II

The PHYX048/PHYX049 sequence is required for the Bachelor in Science degree. It is an option for the Bachelor in Arts degree.

The PHYX053/PHYX054 sequence is not accepted for the Bachelor in Science degree.

Either the General Physics sequence or the Organic Chemistry sequence must be taken at the lower division. Whichever is not taken must be taken before the degree is granted.

For the Bachelor of Arts degree, PHY2053 Physics W/O Calc I and PHY2054 Physics W/O Calc II may be substituted for PHY2048 Physics W/Calculus I and PHY2049 Physics W/Calc II .

Other Lower Division Courses

Complete ALL of the following Courses:

- BSC2010 - General Biology I
  AND BSC2010L - General Biology I Lab

Upper Division

Type

Completion Requirement

Upper Division Courses Required for All Concentrations

To qualify for acceptance into the upper division, FIU undergraduates must have met all the lower division requirements, completed 60 credits (of which 48 must be 3000 level courses and above and must be otherwise acceptable to the program.

Complete ALL of the following Courses:

- CHM3120 - Introduction to Analytical Chemistry
- CHM3120L - Introduction to Analytical Chemistry Lab
- CHM3400 - Fundamentals of Physical Chemistry
- CHM3400L - Fundamentals of Physical Chemistry Lab
- CHM4304 - Biological Chemistry I
- CHM4304L - Biological Chemistry I Lab
- CHM4930 - Senior Seminar

Students are required to take a nationally-normed chemistry examination in their last semester before graduation.

Additional Comments:

Pre-Medical, Dentistry, Veterinary, Optometry Curricula

Students who have satisfied the requirements for either the BA or the BS degree in chemistry will also have satisfied the course requirements for admission to professional schools in the above areas. The BA in Chemistry degree (Biochemistry Concentration) includes additional course work relevant to the career objectives of the student. Interested students should consult the Pre-Health Advisor at (305) 348-0515.

Cooperative Education

Students seeking the baccalaureate degree in chemistry may also take part in the Cooperative Education Program conducted in conjunction with Career and Talent Development in the Division of Student Affairs. The student spends one or two semesters fully employed in an industrial or governmental chemistry laboratory. For further information consult the Department of Chemistry and Biochemistry (305) 348-2606470, or Career Services at (305) 348-2423 (MMC) or (305) 919-5770 (BBC).

Major Requirements

Chemistry Education Major - FIU Teach

This program prepares students interested in chemistry and science for certification to teach at the secondary level. Additional science and/or mathematic certifications at the secondary level may be added (below). Students are encouraged to contact the FIUteach program (**FIUteach.fiu.edu**) for opportunities to try out teaching at no cost. Interested students are encouraged to contact the department, the FIUteach program, or the secondary science advisor for additional details and certification requirements.

Additional coursework in science and/or mathematics is required to prepare for certification in additional subject areas. Students must contact the FIUteach program or the secondary science advisor for details and requirements.

Early Clinical Experiences (Field Hours)

Many courses offered by the Department of Teaching and Learning require completion of clinical experiences (field hours) in approved K–12 school settings under the supervision of a classroom teacher and FIU faculty member. See course descriptions for specific details. In accordance with the Jessica Lunsford Act, students completing clinical experiences must undergo fingerprinting and a background check at the students' own expense. Students will not be allowed to enter a school campus without the necessary clearance. All clinical experiences and the Student Teaching internship must be completed at schools affiliated with FIU, including but not limited to Miami-Dade County Public Schools and Broward County Public Schools. Placements are coordinated through the FIU Office of Clinical Experiences. Students may not arrange placements independently.

Student Teaching

Student Teaching is the semester-long, full-time, culminating clinical experience for candidates in Initial Teacher Preparation Programs. Placements are made in the fall and spring semesters and are contingent upon successful completion of all required coursework and Florida Teacher Certification Examinations. More information about clinical experiences (field hours) and the Student Teaching application process, including deadlines and the online application, is available on the Clinical Experiences | FIU College of Arts, Sciences & Education website. Students must pass all four sections of the FTCE General Knowledge Test to be eligible to apply. The test may be waived if the student achieves qualifying scores, as set by the state, on approved alternative assessments (SAT, ACT, GRE, or CLT). Students should contact their academic advisor to verify their eligibility for a waiver.

For questions, contact the FIU Office of Clinical Experiences at 305-348-2082, email ClinicalExperiences@fiu.edu, or visit the Ziff Education Building (ZEB), Room 130.

Chemical Education Major (FIU teach)

Type

Completion Requirement

Additional Lower Division Courses for the Major

Complete ALL of the following Courses:

- SMT2661 - Step 1: Inquiry Approaches to Teaching Mathematics and Science
- SMT2662 - Step 2: Inquiry-Based Lesson Design in Mathematics and Science

Students may take SMT2044 STEP 1&2 Lesson Math and Sci as a substitute for SMT2661 STEP 1 Teach Math and Sci and SMT2662 STEP 2 Lesson Math and Sci.

Chemical Education Major Electives

Complete ALL of the following Courses:

- BSC2011 - General Biology II: Diversity of Life, Organismal Structure and Function
- BSC2011L - General Biology Lab II

Restricted Electives

Select any two courses. One must include a lab. (minimum 7 credits)

Complete at least 2 of the following courses:

- CHM4220 - Advanced Organic Chemistry
- CHM4300 - Bio-Organic Chemistry
- CHM4307 - Biological Chemistry II
- CHM3610 - Fundamentals of Inorganic Chemistry
- CHM3411 - Physical Chemistry II
- CHM4130 - Instrumental Analysis
- CHM4230L - Structure Determination Lab
- CHM4130L - Instrumental Analysis Lab
- CHM4611L - Advanced Inorganic Chemistry Lab
- CHM3411L - Physical Chemistry Lab II

Education Requirements

Complete ALL of the following Courses:

- CHM3910 - Research Methods in Chemistry
- SMT3100 - Knowing, Learning, and Adolescent Development in Mathematics and Science
- SMT4301 - Classroom Management and Interactions in STEM
- SMT4664 - Educational Assessment and Project-Based Instruction in Mathematics and Science
- SCE4194 - Perspectives in Science and Math Education
- SCE4944 - Student Teaching
- RED4325 - Subject Area Reading
- TSL4324 - ESOL Issues and Strategies for Content Area Teachers

Out of Division Elective

Students must earn three (3) credits of Out of Division Elective

Track, Specialization, Concentration, Area of Emphasis, or Other Curricular Offering Requirements

The BA in Chemistry program is organized into four alternative areas of concentration. Students may choose to follow the “Standard BA in Chemistry Concentration” or – in consultation with an advisor – choose a specific area of emphasis: the Biochemistry Concentration, the Environmental Chemistry Concentration, or the Forensic Chemistry Concentration. Each of the four options are described below.

Standard BA-Chemistry Concentration

Type

Completion Requirement

Required Courses

Fulfill ALL of the following requirements:

Cognate Area Courses

Complete ANY of the following Courses:

- BSC2011 - General Biology II: Diversity of Life, Organismal Structure and Function
- BSC2011L - General Biology Lab II
- CCJ2020 - Introduction to Criminal Justice
- EVR3011 - Environmental Resources and Pollution
- EVR3013L - Ecology of South Florida Lab
- EVR3013 - Ecology of South Florida
- EVR4211 - Water Resources
- EVR4211L - Water Resources Lab
- EVR4231 - Air Resources (Inactive)
- EVR4310 - Energy Resources (Inactive)
- EVR4592 - Soils and Ecosystems
- EVR4592L - Soils and Ecosystems Lab
- GLY3202 - Earth Materials
- GLY3202L - Earth Materials Lab
- GLY4822 - Introduction to Hydrogeology
- OCE3014 - Oceanography

Note: Premed students should choose BSC2011 General Biology II and BSC2011L Gen Biology Lab II

AND

Restricted Electives

IMPORTANT - Student must select a course **WITH its corresponding Lab.**

Complete at least 2 of the following courses:

- CHM3411 - Physical Chemistry II
- CHM3411L - Physical Chemistry Lab II
- CHM3610 - Fundamentals of Inorganic Chemistry
- CHM4130 - Instrumental Analysis
- CHM4130L - Instrumental Analysis Lab
- CHM4220 - Advanced Organic Chemistry
- CHM4230L - Structure Determination Lab
- CHM4300 - Bio-Organic Chemistry
- CHM4307 - Biological Chemistry II
- CHM4307L - Biological Chemistry Lab II
- CHM4611L - Advanced Inorganic Chemistry Lab
- CHS4430 - Introduction to Chemical Toxicology
- CHS4600 - Marine Chemistry

Note: CHM3410 Phys Chem I is a prerequisite of CHM3411 Phys Chem II.

AND

Senior Level Chemistry Elective

One (1) senior level chemistry elective: (CHM4XXX/CHM5XXX)
CHM4910L Under Res Chem or CHM4911L Undergrad Res 2**may not** be used satisfy this requirement.

Biochemistry Concentration

Type

Completion Requirement

Required Courses

This concentration is intended for students who desire a comprehensive background in chemistry but with emphasis in biological chemistry. The curriculum is designed to contain all of the courses necessary for entry into medical and dental school.

Fulfill ALL of the following requirements:

Cognate Area Courses

Complete ALL of the following Courses:

- BSC2011 - General Biology II: Diversity of Life, Organismal Structure and Function
  AND BSC2011L - General Biology Lab II

AND

Restricted Electives

Complete at least 2 of the following courses:

- CHM4300 - Bio-Organic Chemistry
  AND CHM4230L - Structure Determination Lab
- CHM4307 - Biological Chemistry II
  AND CHM4307L - Biological Chemistry Lab II

AND

Additional Restrictive Elective

Complete at least 1 of the following courses:

- CHM4220 - Advanced Organic Chemistry
- CHM4300 - Bio-Organic Chemistry
- CHM4307 - Biological Chemistry II
- CHM3610 - Fundamentals of Inorganic Chemistry
- CHM3411 - Physical Chemistry II
- CHM4130 - Instrumental Analysis
- CHM4130 - Instrumental Analysis

- CHM4230L - Structure Determination Lab
- CHM4130L - Instrumental Analysis Lab
- CHM4307L - Biological Chemistry Lab II
- CHM4611L - Advanced Inorganic Chemistry Lab
- CHM3411L - Physical Chemistry Lab II
- CHS4430 - Introduction to Chemical Toxicology
- CHS4600 - Marine Chemistry

Note: CHM3410 Phys Chem I is a prerequisite of CHM3411 Phys Chem II.

AND

Senior Level Chemistry Elective

One senior level chemistry elective (CHM4XXX/CHM5XXX) which is biomedically related.
CHM4910L Under Res Chem or CHM4911L Undergrad Res 2**may not** be used satisfy this requirement.

Environmental Chemistry Concentration

Type

Completion Requirement

Required Courses

This concentration is intended for students who desire a comprehensive background in chemistry but with an interest in applying their expertise in chemistry to environmentally-related careers and issues.

Fulfill ALL of the following requirements:

Cognate Area Courses

Complete at least 1 of the following courses:

- EVR3011 - Environmental Resources and Pollution
- EVR3013 - Ecology of South Florida
- EVR3013L - Ecology of South Florida Lab
- EVR4211 - Water Resources
- EVR4211L - Water Resources Lab
- EVR4231 - Air Resources (Inactive)
- EVR4310 - Energy Resources (Inactive)
- EVR4592 - Soils and Ecosystems
- EVR4592L - Soils and Ecosystems Lab
- GLY4822 - Introduction to Hydrogeology
- OCE3014 - Oceanography

AND

Restricted Electives

Complete ALL of the following Courses:

- CHM4130 - Instrumental Analysis

AND CHM4130L - Instrumental Analysis Lab

AND

Additional Restricted Electives

Complete at least 1 of the following courses:

- CHM4220 - Advanced Organic Chemistry
- CHM4300 - Bio-Organic Chemistry
- CHM4307 - Biological Chemistry II
- CHM3610 - Fundamentals of Inorganic Chemistry
- CHM3411 - Physical Chemistry II
- CHM4230L - Structure Determination Lab
- CHM4307L - Biological Chemistry Lab II
- CHM4611L - Advanced Inorganic Chemistry Lab
- CHM3411L - Physical Chemistry Lab II
- CHS4430 - Introduction to Chemical Toxicology
- CHS4600 - Marine Chemistry

Note: CHM3410 Phys Chem I is a prerequisite of CHM3411 Phys Chem II.

AND

Senior Level Chemistry Elective

One (1) senior level chemistry elective (CHM4XXX/CHM5XXX) which is environmentally-related.
CHM4910L Under Res Chem or CHM4911L Undergrad Res 2**may not** be used satisfy this requirement.

Additional Comments:

NOTE: Students may earn a Certificate in Environmental Studies (offered by the Department of Earth and Environment), by taking the appropriate environmental studies courses. This also satisfies the College's requirement of 9 credits outside the major.

Forensic Chemistry Concentration

Type

Completion Requirement

Required Courses

This concentration is intended for students who desire a comprehensive background in chemistry but with an interest in applying their expertise in chemistry to a career in forensic science or criminalistics.

Fulfill ALL of the following requirements:

Cognate Area Course

Complete ALL of the following Courses:

- CCJ2020 - Introduction to Criminal Justice

AND

Restricted Electives

Complete ALL of the following Courses:

- CHM4130 - Instrumental Analysis
  AND CHM4130L - Instrumental Analysis Lab

AND

Additional Restricted Elective

Complete at least 1 of the following courses:

- CHM4220 - Advanced Organic Chemistry
- CHM4300 - Bio-Organic Chemistry
- CHM4307 - Biological Chemistry II
- CHM3610 - Fundamentals of Inorganic Chemistry
- CHM3411 - Physical Chemistry II
- CHM4230L - Structure Determination Lab
- CHM4307L - Biological Chemistry Lab II
- CHM4611L - Advanced Inorganic Chemistry Lab
- CHM3411L - Physical Chemistry Lab II
- CHS4430 - Introduction to Chemical Toxicology
- CHS4600 - Marine Chemistry

Note: CHM3410 Phys Chem I is a prerequisite of CHM3411 Phys Chem II.

AND

Senior Level Chemistry Elective

One (1) senior level chemistry elective (CHM4XXX/CHM5XXX or CHS4XXX/CHS5XXX) with a forensic emphasis.
CHM4910L Under Res Chem or CHM4911L Undergrad Res 2**may not** be used satisfy this requirement.

CHEM:BS - Bachelor of Science in Chemistry

Overview

Degree Offered
BS - Bachelor of Science

Program Title
Chemistry

The Bachelor of Science (BS) in Chemistry (certified by the American Chemical Society) prepares students to take a leading role in industry, education, or government service. Graduates are equipped with a diverse set of skills and knowledge that are valued in professional fields. These include laboratory techniques essential for chemical analysis and experimentation; knowledge of safety regulations and proper handling of chemicals; the ability to identify, organize, summarize problems and effectively communicate new ideas in drug discovery, medicine, environment, food chemistry, materials, energy fields, and policymaking; and helping the next generation of scientists through secondary education. Students interested in pursuing a graduate degree in chemistry will, by earning the BS in Chemistry, have a strong foundation for advanced work in their particular field of study. For more information, visit the College of Arts, Sciences, and Education website.

Admissions Requirements for the Bachelor of Science (BS) in Chemistry

See general university admission requirements at admissions.fiu.edu.

Admission to the **Bachelor of Science in Chemistry with Honors program**

To be a candidate for the honors in chemistry degree a student must first:

1. Be admitted to the BS in Chemistry program with a lower division GPA of at least 3.5 in science and math courses, and an overall GPA of at least 3.2,
2. Have completed at least twelve semester hours of chemistry courses,
3. Have arranged to be sponsored by a tenured or tenure-earning faculty researcher, and
4. Submit a letter to the Chemistry Undergraduate Committee requesting permission to pursue the honors program course of study.
5. Note: Any exceptions to these admissions criteria must be approved by the Undergraduate Program Director.

Admissions Requirements for the Combined BS in Chemistry to Master of Science (MS) in Chemistry Accelerated Degree Pathway

To be considered for admission to the combined bachelor's/master's degree pathway, students must have completed at least 75 credits in the bachelor's degree program at FIU and meet the admissions criteria for the graduate degree program to which they are applying. Students need only apply once to the combined degree pathway; the application is submitted to Graduate Admissions typically before the student starts the last 30 credits of the bachelor's degree program.

Admissions Requirements

(1) Current enrollment in the Bachelor of Science program in chemistry at FIU.

(2) Current GPA of 3.2 or higher.

(3) Three letters of recommendation.

(4) Approval of the Chemistry Graduate Committee.

Admissions Requirements for the Combined BS in Chemistry to MS in Forensic Science Accelerated Degree Pathway

To be considered for admission to the combined bachelor's/master's degree pathway, students must have completed at least 75 credits in the bachelor's degree program at FIU and meet the admissions criteria for the graduate degree program to which they are applying. Students need only apply once to the combined degree pathway, but the application must be submitted to Graduate Admissions before the student starts the last 30 credits of the bachelor's degree program.

Admissions Requirements

(1) Current enrollment in the Bachelor of Science program in chemistry at FIU.

(2) Current GPA of 3.2 or higher.

(3) Three letters of recommendation.

(4) Approval of the Chemistry Graduate Committee.

Program Requirements

The B.S. in Chemistry program is certified by the American Chemical Society and prepares the student for graduate study or a professional career as a chemist in industry, in government service, or in secondary school teaching. (Students interested in secondary teacher certification with the BS in Chemistry should contact the College of Arts, Sciences and Education Center for Academic Services at (305) 348-2978. However, note that the BA in Chemistry includes the option of a Chemistry Education Major.)

Academic Progression Requirements

Students admitted to the university are admitted directly to their chosen major. Students are expected to make good progress based on critical indicators, such as GPA in specific courses or credits earned. In cases where students are not making good progress, a change of major may be required. Advisors work to redirect students to more appropriate majors when critical indicators are not met.

Lower Division

Type
Completion Requirement

Common Prerequisites

For a list of all state-approved common prerequisites, including alternatives, visit https://cpm.flvc.org.

- Students are required to enroll in a mathematics course in both the Fall and Spring terms and in the Summer term, if needed.
- Students admitted in the Fall or Summer terms must successfully complete MAC 1105 with a grade of C or better by the end of their first Spring term and complete MAC 1147 with a grade of C or better by the end of their second Fall term.
- Students admitted in the Spring term must successfully complete MAC 1105 with a grade of C or better by the end of their first Fall term and complete MAC 1147 with a grade of C or better by the end of their second Spring term.

The PHYX048/PHYX049 sequence is required for the Bachelor in Science degree. It is an option for the Bachelor in Arts degree.

The PHYX053/PHYX054 sequence is not accepted for the Bachelor in Science degree.

Complete ALL of the following Courses:

- CHM1045 - General Chemistry I
  AND CHM1045L - General Chemistry Lab I
- CHM1046 - General Chemistry II
  AND CHM1046L - General Chemistry Lab II
- CHM2210 - Organic Chemistry I
  AND CHM2210L - Organic Chemistry Lab I
- CHM2211 - Organic Chemistry II
  AND CHM2211L - Organic Chemistry Lab II
- PHY2048 - Physics with Calculus I
  AND PHY2048L - General Physics Laboratory I
- PHY2049 - Physics with Calculus II
  AND PHY2049L - General Physics Laboratory II
- MAC2311 - Calculus I
- MAC2312 - Calculus II

Either the General Physics sequence or the Organic Chemistry Sequence must be taken at the lower division. Whichever is not taken must be taken before the degree is granted.

Upper Division

Type
Completion Requirement

Required Upper Division Courses

60 credits, of which 48 must be 3000 level courses and above

Complete ALL of the following Courses:

- CHM3120 - Introduction to Analytical Chemistry

AND CHM3120L - Introduction to Analytical Chemistry Lab
- CHM3410 - Physical Chemistry I
  AND CHM3410L - Physical Chemistry Lab I
- CHM3411 - Physical Chemistry II
  AND CHM3411L - Physical Chemistry Lab II
- CHM4130 - Instrumental Analysis
  AND CHM4130L - Instrumental Analysis Lab
- CHM4220 - Advanced Organic Chemistry
- CHM4304 - Biological Chemistry I
- CHM4230L - Structure Determination Lab
  OR CHM4304L - Biological Chemistry I Lab
- CHM3610 - Fundamentals of Inorganic Chemistry
  AND CHM3610L - Inorganic Chemistry Laboratory
- CHM4910L - Undergraduate Research in Chemistry
- CHM4930 - Senior Seminar

Required Senior Level Chemistry Course

Students must take one additional senior-level (4000) Chemistry course
CHM4911L Undergrad Res 2 may not be used to satisfy this requirement.

Additional Required Courses

Earn at least 3 credits from the following:
- MAP2302 - Differential Equations
- COP2270 - Secure C Programming For Engineers
- MAC2313 - Multivariable Calc

Additional Comments:

Students are required to take a nationally-normed chemistry examination in their last semester before graduation.

Pre-Medical, Dentistry, Veterinary, Optometry Curricula

Students who have satisfied the requirements for either the BA or the BS degree in chemistry will also have satisfied the course requirements for admission to professional schools in the above areas. The BA in Chemistry degree (Biochemistry Concentration) includes additional course work relevant to the career objectives of the student. Interested students should consult the Pre-Health Advisor at (305) 348-0515.

Cooperative Education

Students seeking the baccalaureate degree in chemistry may also take part in the Cooperative Education Program conducted in conjunction with Career and Talent Development in the Division of Student Affairs. The student spends one or two semesters fully employed in an industrial or governmental chemistry laboratory. For further information consult the Department of Chemistry and Biochemistry (305) 348-2606470, or Career Services at (305) 348-2423 (MMC) or (305) 919-5770 (BBC).

Major Requirements

There are no majors associated with this program.

Track, Specialization, Concentration, Area of Emphasis, or Other Curricular Offering Requirements

Other Curricular Offering: Combined BS in Chemistry to MS in Chemistry Accelerated Degree Pathway

A student admitted to the combined degree pathway will be considered to have undergraduate status until the student applies for graduation from their bachelor's degree program. Upon conferral of the bachelor's degree, the student will be granted graduate status and be eligible for graduate assistantships. Only 5000-level or higher courses, and no more than the number of credits specified by the program catalog, may be applied toward both degrees.

Completion Requirements:

Completed Bachelor of Science degree in chemistry at FIU Required:

(1) 9 credits (3 courses) selected from graduate chemistry core courses. Required courses must be completed with an average of "B" or higher, and only one course may receive a grade less than "B-".

(2) Electives: 3 courses selected from the Chemistry Graduate Elective Offerings.

(3) 9 credits of Thesis Research and 2 credits of Thesis. 1 credit of Colloquium.

(4) Overlap: Up to 3 graduate level courses (9 credits) may be used to satisfy both the Bachelor's and Master's degree requirements.

Other Curricular Offering: Combined BS in Chemistry to MS in Forensic Science Accelerated Degree Pathway

A student admitted to the combined degree pathway will be considered to have undergraduate status until the student applies for graduation from their bachelor's degree program. Upon conferral of the bachelor's degree, the student will be granted graduate status and be eligible for graduate assistantships. Only 5000-level or higher courses, and no more than the number of credits specified by the program catalog, may be applied toward both degrees.

Completion Requirements

Completed Bachelor of Science degree in chemistry at FIU.

Required:

(1) BSC5406 Forensic Biology Forensic Biology

(2) CHS5542 Forensic Chemistry Forensic Chemistry

(3) CHS5535 Forensic Analysis Forensic Analysis

(4) Required courses must be completed with an average of "B" or higher, and only one course may receive a grade of less than "B-".

(5) Electives: 5 courses selected from the Forensic Science Graduate Elective Offerings.

(6) 6 credits of Thesis Research and 1 credit of Thesis.

(7) 1 credit of Colloquium.

(8) Overlap: Up to 3 graduate level courses (9 credits) may be used to satisfy both the Bachelor's and Master's degree requirements.

Graduation Requirements for the Bachelor of Science in Chemistry with Honors program

1. Completion of all requirements for the BS in Chemistry with a minimum GPA of 3.5 in science and math courses and overall GPA of 3.2.

2. Completion of an honors research project in collaboration with a faculty advisor. The results of the research project must be written in the form of an honors thesis which is written in American Chemical Society-style publication format. The student must register for Undergraduate Research (CHM 4910L) and receive a grade of “B” or better. The faculty advisor and the departmental Undergraduate Research Committee must judge the thesis as suitable in style and content for publication in an appropriate American Chemical Society journal.

3. Submission of two completed and approved copies of the Honors Thesis must be presented to the Chemistry Department office; one copy is to be kept in the department, and the second copy is to be housed in the University library.

4. The results of the research project must be presented orally to an audience of peers and faculty members from all science department honors programs. The presentation will be graded by the Undergraduate Research Committee, and the student must receive a score of 4 or 5 on a 5-point scale for their presentation.

1. Completion of all requirements for the BS in Chemistry with a minimum GPA of 3.5 in science and math courses and overall GPA of 3.2.

2. Completion of an honors research project in collaboration with a faculty advisor. The results of the research project must be written in the form of an honors thesis which is written in American Chemical Society-style publication format. The student must register for Undergraduate Research (CHM 4910L) and receive a grade of “B” or better. 3. Submission of two completed and approved copies of the Honors Thesis must be presented to the Chemistry Department office; one copy is to be kept in the department, and the second copy is to be housed in the University library.

4. The results of the research project must be presented orally to an audience of peers and faculty members from all science department honors programs. The presentation will be graded by the Undergraduate Research Committee, and the student must receive a score of 4 or 5 on a 5-point scale for their presentation.

CHEM:MS - Master of Science in Chemistry

Overview

Degree Offered
MS - Master of Science

Program Title
Chemistry

The Master of Science (MS) in Chemistry exposes students to advanced topics in chemistry and provides opportunities for growth in independent scientific research. Upon successful completion, students should be technically skilled to perform advanced scientific research and have strong written and oral communication skills.

For more information, visit the College of Arts, Sciences, and Education website.

Requirements

Simple Requirements

Admissions Requirements

Admissions Requirements for the Master of Science (MS) in Chemistry

(1) A minimum undergraduate grade point average (GPA) of 3.0/4.0 in chemistry and cognate science courses. International graduate student applicants whose native language is not English are required to submit a score for the Test of English as a Foreign Language (TOEFL) or for the International English Language Testing System (IELTS). A total score of 80 on the iBT TOEFL or 6.5 overall on the IELTS is required.

(2) A statement of purpose, official transcripts, and three letters of recommendation evaluating the applicant's potential for graduate work. Originals of these items must be sent to the FIU Admissions office as specified at **https://admissions.fiu.edu/how-to-apply/graduate-applicant/index.html**. Prospective candidates should refer to both the above website and **https://case.fiu.edu/chemistry/** for details regarding the application procedure, which must be completed on-line.

(3) Formal admission to the MS and Doctor of Philosophy programs is granted by the Admissions Office. Awards of teaching assistantships are granted by the Graduate Program Director. Entrance is possible at the beginning of each semester (fall, spring, summer). For consideration for a graduate assistantship applicants need to apply for the Fall semester and all application materials should be received at least five months prior to the desired starting date.

(4) Students whose undergraduate degree is not equivalent to the American Chemical Society certified Bachelor of Science degree in chemistry may be required to make up deficiencies. For example, depending on his or her area of specialization, a student may be required to make up deficiencies in quantum mechanics, instrumental analysis, or biochemistry by successfully completing Graduate Physical Chemistry II (CHM 5426), Graduate Analytical Methods (CHM 5150), or Graduate Biological Chemistry (CHM 5305) respectively.

(5) Entering graduate students must pass two proficiency exams. Proficiencies are offered in organic, physical, inorganic, analytical, and biochemistry. One pass must be in either organic or physical chemistry; the other is open. The proficiency exams will be administered to incoming graduate students in the week before the fall and spring semesters. If a student fails to receive a pass in a proficiency exam, he or she must show proficiency by completing the appropriate course with a grade of “B” (3.0/4.0) or better. These courses are Graduate Organic Chemistry (CHM 5225), Graduate Physical Chemistry (CHM 5425), Graduate Analytical Methods (CHM 5150), and Graduate Biological Chemistry (CHM 5305). Students are expected to complete proficiency requirements by the end of their first semester.

(6) Graduate students must maintain a GPA of 3.0/4.0. Only courses applicable to the graduate program, excluding those for making up deficiencies or satisfying proficiencies, are counted in the GPA. If the cumulative GPA drops below 3.0 for one semester, the student will be placed on academic probation. A student who fails to raise his or her GPA to 3.0 or higher within one semester will be dismissed from the program.

(7) Full-time graduate students generally serve as Teaching Assistants (TA) in the Department of Chemistry and Biochemistry for their first semester. Doctoral candidates must serve as a TA for at least one year except in unusual circumstances. TAs are awarded on a competitive basis, require a minimum cumulative GPA of 3.0, and can be continued for up to four years for PhD students who maintain acceptable academic performance. A limited number of Graduate Research Assistantships (RA) may be available.

Transfer Credits and Financial Support

Students having an MS in Chemistry may transfer as many as 36 credits towards the PhD degree. However, no more than six of those credits will count toward fulfillment of the formal course work requirement. More than six credits for formal course work can be transferred only with special permission of the Graduate Committee, in which case the number of additional course work credits required will depend on the student’s performance in courses, the date courses were completed, and the area of PhD concentration.

Full-time graduate students in good academic standing are eligible for financial support. Teaching and research assistantships are available on a competitive basis. Inquiries concerning application to the program and availability of financial support should be directed to the Chemistry Graduate Program Director.

Admissions Requirements for the Combined Bachelor of Science (BS) in Chemistry to MS in Chemistry Accelerated Degree Pathway

To be considered for admission to the combined BS/MA accelerated degree pathway, students must have completed at least 75 credits in the bachelor’s degree program at FIU and meet the admissions criteria for the graduate degree program to which they are applying. Students need only apply once to the combined degree pathway; the application is submitted to Graduate Admissions typically before the student starts the last 30 credits of the bachelor’s degree program.

Admissions Requirements

(1) Current enrollment in the BS in Chemistry program at FIU.

(2) Current GPA of 3.2 or higher.

(3) Three letters of recommendation.

(4) Approval of the Chemistry Graduate Committee.

Program Requirements

A minimum of 32 credits of course work. A grade of “C or higher must be obtained in all courses, and a cumulative grade point average of 3.0 or higher must be maintained. The course work must include:

Program Credit Hours: 32

Type

Completion Requirement

Core Courses

At least nine (9) credits of chemistry in at least two of the six major areas of chemistry (Analytical, Biochemistry, Environmental, Inorganic, Organic, and Physical) from the core listed below:

Fulfill ANY of the following requirements:

Analytical

Complete ANY of the following Courses:

- CHM5138 - Advanced Mass Spectrometry
- CHM5156 - Advanced Chromatography
- CHM5165 - Chemometrics and Sampling
- CHM6157 - Advanced Analytical Chemistry

OR

Biochemistry

Complete ANY of the following Courses:

- BCH6108 - Biochemical Techniques
- CHM6036 - Advanced Biochemistry I
- CHM6037 - Advanced Biochemistry II (Molecular Genetics)
- CHM5506 - Physical Biochemistry (Inactive)

OR

Environmental

Complete ANY of the following Courses:

- CHM5423 - Atmospheric Chemistry
- CHM5765 - Aquatic Chemistry
- CHM6281 - Environmental Organic Chemistry
- CHM6340 - Organic Geochemistry
- OCC5050 - Chemical Oceanography
- CHM6088 - Environmental Chemistry of Trace Elements

OR

Inorganic

Complete ANY of the following Courses:

- CHM5251 - Organometallic Chemistry
- CHM5440 - Kinetics & Catalyst (Inactive)
- CHM5540 - Group Theory In Chemistry
- CHM5650 - Physical Inorganic Chemistry

OR

Organic

Complete ANY of the following Courses:

- CHM5236 - Spectroscopic Techniques and Structures Elucidation
- CHM5250 - Organic Synthesis
- CHM5263 - Physical Organic Chemistry

OR

Physical

Complete ANY of the following Courses:

- CHM5423 - Atmospheric Chemistry
- CHM5490 - Phys Spectroscopy (Inactive)
- CHM5540 - Group Theory In Chemistry
- CHM5586 - Computational Chemistry
- CHM6461 - Statistical Thermodynamics
- CHM6480 - Quantum Mechanics

Courses not listed above may be counted as core course with prior departmental approval.

Additional Graduate Level Courses

At least six (6) credits of additional graduate-level courses approved by the thesis committee in consultation with the Graduate Program Director with the following guidelines: courses must be 5000 or 6000 level chemistry courses (CHM prefix) or approved cognates (up to a maximum of six credits).
The following do not count toward satisfaction of this requirement: proficiency courses and courses taken to make up for undergraduate-level deficiencies in chemistry (including CHM 5150, CHM 5225, CHM 5305, CHM 5425, and CHM 5426); and courses corresponding to research, seminar, colloquium, supervised teaching, and thesis completion (CHM 6910L, CHM 6935, CHM 6936, CHM 6940, CHM 6970, and CHM 6971).

Supervised Teaching

Earn at least 1 credits from the following:

- CHM6940 - Supervised Teaching

Full-time graduate students are required to register for one credit of Supervised Teaching each semester they serve as teaching assistants.

Graduate Seminar/Chemistry Colloquium

Complete ALL of the following Courses:

- CHM6935 - Graduate Seminar
- CHM6936 - Chemistry Colloquium

Full-time graduate students are required to register for one credit of Graduate Seminar or one credit of Chemistry Colloquium each fall and spring semester.

At least one credit of Chemistry Colloquium is required. Each student must present a seminar on their proposed research at the colloquium for a letter grade in their second semester of graduate study.

Thesis Research

At least eight (8)credits involving independent thesis research under the direction of a faculty member in the department.

Earn at least 8 credits from the following:

- CHM6970 - Thesis Research

Thesis

Course must be taken in the semester in which the thesis is to be defended.

Complete ALL of the following Courses:

- CHM6971 - Master's Thesis

Satisfactory public presentation and defense of a research thesis, evaluated by the student’s Thesis Committee, is required. The Thesis Committee will consist of the research advisor and a randomly-assigned committee member appointed by the Graduate Program Director, both from the department’s graduate faculty, and one additional member with expertise in the student’s research area. At least one committee member must be tenured in the department. The committee may include more members, but they will be non-voting.

Major Requirements

There are no majors associated with this program.

Track, Specialization, Concentration, Area of Emphasis, or Other Curricular Offering Requirements

Report Option

Type

Completion Requirement

Graduate-level Chemistry Course Requirement

At least nine (9) credits of graduate-level (5000 or 6000 level) CHM courses as core courses.
The following do not count toward satisfaction of this requirement: proficiency courses and courses taken to make up for undergraduate-level deficiencies in chemistry (including CHM 5150, CHM 5225, CHM 5305, CHM 5425, and CHM 5426); and courses corresponding to research, seminar, colloquium, supervised teaching, and thesis completion (CHM 6910L, CHM 6935, CHM 6936, CHM 6940, CHM 6970, and CHM 6971).

Additional Graduate-level Chemistry Course Requirement

At least nine (9) credits of additional graduate-level courses (5000 or 6000 level chemistry courses or approved cognates) approved by the student's committee in consultation with the Graduate Program Director. The following do not count toward satisfaction of this requirement: proficiency courses and courses taken to make up for undergraduate-level deficiencies in chemistry (including CHM 5150, CHM 5225, CHM 5305, CHM 5425, and CHM 5426); and courses corresponding to research seminar, colloquium, supervised teaching, and thesis completion (CHM 6910L, CHM 6935, CHM 6936, BCH 7930, CHM 6940, CHM 6970, and CHM 6971).

Supervised Teaching

Complete ALL of the following Courses:

- CHM6940 - Supervised Teaching

Full-time graduate students are required to register for one credit of Supervised Teaching each semester they serve as teaching assistants.

Graduate Seminar/Chemistry Colloquium

Complete ALL of the following Courses:

- CHM6935 - Graduate Seminar
- CHM6936 - Chemistry Colloquium

Full-time graduate students are required to register for one credit of Graduate Seminar or one credit of Chemistry Colloquium each fall and spring semester.

At least one credit of Chemistry Colloquium is required. Each student must present a seminar on their proposed research at the colloquium for a letter grade in their second semester of graduate study.

Thesis Research/Dissertation Research

Complete ANY of the following Courses:

- CHM6970 - Thesis Research
- CHM7910 - Dissertation Research

Satisfactory completion of a research report approved by the student's thesis/dissertation committee and the department's graduate program director. A submitted manuscript, a report written for the candidacy exam, or a stand-alone research report could satisfy the report requirement.

Other Curricular Offering: Combined BS in Chemistry to MS in Chemistry Accelerated Degree Pathway

A student admitted to the combined accelerated degree pathway will be considered to have undergraduate status until the student applies for graduation from their bachelor's degree program. Upon conferral of the bachelor's degree, the student will be granted graduate status and be eligible for graduate assistantships. Only 5000-level or higher courses, and no more than the number of credits specified by the program catalog, may be applied toward both degrees.

Completion Requirements:

Completed BS in Chemistry degree at FIU Required:

(1) 9 credits (3 courses) selected from graduate chemistry core courses. Required courses must be completed with an average of "B" or higher, and only one course may receive a grade less than "B-".

(2) Electives: 3 courses selected from the Chemistry Graduate Elective Offerings.

(3) 9 credits of Thesis Research and 2 credits of Thesis. 1 credit of Colloquium.

(4) Overlap: Up to 3 graduate level courses (9 credits) may be used to satisfy both the Bachelor’s and Master’s degree requirements.

CHEM:PHD - Doctor of Philosophy in Chemistry

Overview

Degree Offered
PHD - Doctor of Philosophy

Program Title
Chemistry

The Doctor of Philosophy (PhD) in Chemistry prepares highly motivated students to become independent scientists by providing an in-depth research experience that includes gaining knowledge and skills in advanced topics of chemistry. They will be able to instruct others in their discipline through development of written and verbal communication skills. Students may choose to specialize in a particular field of study by enrolling in any of the tracks available, including Chemistry Education Research, Environmental Chemistry, Forensic Chemistry, or Radiochemistry. For more information, visit the College of Arts, Sciences, and Education website.

Admissions Requirements

Admissions Requirements for the PhD in Chemistry

(1) A minimum undergraduate grade point average (GPA) of 3.0/4.0 in chemistry and cognate science courses. International graduate student applicants whose native language is not English are required to submit a score for the Test of English as a Foreign Language (TOEFL) or for the International English Language Testing System (IELTS). A total score of 80 on the iBT TOEFL or 6.5 overall on the IELTS is required.

(2) A statement of purpose, official transcripts, and three letters of recommendation evaluating the applicant's potential for graduate work. Originals of these items must be sent to the FIU Admissions office as specified at **https://admissions.fiu.edu/how-to-apply/graduate-applicant/index.html**. Prospective candidates should refer to both the above website and **https://case.fiu.edu/chemistry/** for details regarding the application procedure, which must be completed on-line.

(3) Formal admission to the Master of Science and PhD programs is granted by the Admissions Office. Awards of teaching assistantships are granted by the Graduate Program Director. Entrance is possible at the beginning of each semester (fall, spring, summer). For consideration for a graduate assistantship applicants need to apply for the Fall semester and all application materials should be received at least five months prior to the desired starting date.

(4) Students whose undergraduate degree is not equivalent to the American Chemical Society certified Bachelor of Science degree in chemistry may be required to make up deficiencies. For example, depending on his or her area of specialization, a student may be required to make up deficiencies in quantum mechanics, instrumental analysis, or biochemistry by successfully completing Graduate Physical Chemistry II (CHM 5426), Graduate Analytical Methods (CHM 5150), or Graduate Biological Chemistry (CHM 5305) respectively.

(5) Entering graduate students must pass two proficiency exams. Proficiencies are offered in organic, physical, inorganic, analytical, and biochemistry. One pass must be in either organic or physical chemistry; the other is open. The proficiency exams will be administered to incoming graduate students in the week before the fall and spring semesters. If a student fails to receive a pass in a proficiency exam, he or she must show proficiency by completing the appropriate course with a grade of “B” (3.0/4.0) or better. These courses are Graduate Organic Chemistry (CHM 5225), Graduate Physical Chemistry (CHM 5425), Graduate Analytical Methods (CHM 5150), and Graduate Biological Chemistry (CHM 5305). Students are expected to complete proficiency requirements by the end of their first semester.

(6) Graduate students must maintain a GPA of 3.0/4.0. Only courses applicable to the graduate program, excluding those for making up deficiencies or satisfying proficiencies, are counted in the GPA. If the cumulative GPA drops below 3.0 for one semester, the student will be placed on academic probation. A student who fails to raise his or her GPA to 3.0 or higher within one semester will be dismissed from the program.

(7) Full-time graduate students generally serve as Teaching Assistants (TA) in the Department of Chemistry and Biochemistry for their first semester. Doctoral candidates must serve as a TA for at least one year except in unusual circumstances. TAs are awarded on a competitive basis, require a minimum cumulative GPA of 3.0, and can be continued for up to four years for PhD students who maintain acceptable academic performance. A limited number of Graduate Research Assistantships (RA) may be available.

Admissions Requirements for the Doctor of Philosophy (PhD) in Chemistry (track: Forensic Science)

To be admitted into the PhD in Chemistry program with a Forensic Science track, a candidate must:

(1) Hold a bachelor’s degree in chemistry, forensic science or a relevant discipline from an accredited college or university approved by the Chemistry graduate committee. The minimum requirement is a bachelor’s degree in a natural science with a least 7 semester courses (28 hours including labs) of chemistry courses including physical chemistry, analytical chemistry and biochemistry. Any deficiencies must be completed before being fully accepted to the PhD program;

(2) Have a 3.0/4.0 average or higher during the last two years of the undergraduate program or a master’s degree in a relevant discipline;

(3) Arrange to have three letters of recommendation sent to the Graduate Program Director evaluating the applicant’s potential for graduate work;

(4) Pass at least two proficiency exams in either analytical or biochemistry and either organic or physical chemistry – students who have not taken physical chemistry must take one semester of physical chemistry to make up the deficiency;

(5) International graduate student applicants whose native language is not English are required to submit a score for the Test of English as a Foreign Language (TOEFL) or for the International English Language Testing System (IELTS). A total score of 80 on the iBT TOEFL or 6.5 overall on the IELTS is required.

All admissions to the PhD in Chemistry program must be recommended by the chemistry graduate committee and signed off by the chemistry graduate program director.

Admission Requirements for the Doctor of Philosophy (PhD) in Chemistry (track: Radiochemistry)

To be admitted into the PhD in Chemistry program with the Radiochemistry Track, a candidate must:

(1) Hold a bachelor's degree in chemistry or a relevant discipline from an accredited college or university approved by the Chemistry Department Graduate Committee. The minimum requirement is a bachelor's degree in a natural science with a least 7 semester courses (28 hours including labs) of chemistry courses including: physical chemistry, analytical chemistry and biochemistry. Any deficiencies must be completed before being fully accepted to the PhD program.

(2) Have a 3.0/4.0 average or higher during the last two years of the undergraduate program or a master's degree in a relevant discipline.

(3) Arrange to have three letters of recommendation sent to the Chemistry Graduate Program Director, each evaluating the applicant's potential for graduate work.

(4) Pass at least two proficiency exams in either analytical or biochemistry and either organic or physical chemistry.

(5) Receive approval from the Radiochemistry Graduate Committee.

(6) International graduate student applicants whose native language is not English are required to submit a score for the Test of English as a Foreign Language (TOEFL) or for the International English Language Testing System (IELTS). Minimum required scores is 550 on the paper-based TOEFL, 80 on the internet-based TOEFL (iBT) or 6.5 overall on the IELTS.

(7) All admissions to the PhD in Chemistry program must be approved by the Chemistry Department Graduate Committee and signed off by the Chemistry Graduate Program Director.

Transfer of Credits and Financial Support

Students having an MS in Chemistry may transfer as many as 36 credits towards the PhD degree. However, no more than six of those credits will count toward fulfillment of the formal course work requirement. More than six credits for formal course work can be transferred only with special permission of the Graduate Committee, in which case the number of additional course work credits required will depend on the student's performance in courses, the date courses were completed, and the area of PhD concentration.

Full-time graduate students in good academic standing are eligible for financial support. Teaching and research assistantships are available on a competitive basis. Inquiries concerning application to the program and availability of financial support should be directed to the Chemistry Graduate Program Director.

Program Requirements

A minimum of 75 credits of course work. A grade of "C" or higher must be obtained in all courses, and a cumulative GPA of 3.0 or higher must be maintained.

Satisfactory completion of cumulative examinations. The student will begin taking the cumulative examinations after completing the proficiency requirements but no later than the beginning of the student's second semester. Seven examinations, each lasting three hours, will be given per year. The student must pass four out of ten consecutively-offered exams for admission to candidacy.

Program Credit Hours: 75

Type

Completion Requirement

Core Courses: 9 credits

At least nine credits of chemistry core courses, including courses from at least two of the six major areas of chemistry (Analytical, Biochemistry, Environmental, Inorganic, Organic, and Physical) selected from the core courses listed below.

Fulfill ANY of the following requirements:

Analytical

Complete ANY of the following Courses:

- CHM5138 - Advanced Mass Spectrometry
- CHM5156 - Advanced Chromatography
- CHM5165 - Chemometrics and Sampling
- CHM6157 - Advanced Analytical Chemistry

OR

Core Courses: 9 credits

Complete ANY of the following Courses:

- BCH6108 - Biochemical Techniques
- CHM6036 - Advanced Biochemistry I
- CHM6037 - Advanced Biochemistry II (Molecular Genetics)
- CHM5506 - Physical Biochemistry (Inactive)

OR

Environmental

Complete ALL of the following Courses:

- CHM5423 - Atmospheric Chemistry
- CHM5765 - Aquatic Chemistry
- CHM6281 - Environmental Organic Chemistry
- CHM6340 - Organic Geochemistry
- OCC5050 - Chemical Oceanography
- CHM6088 - Environmental Chemistry of Trace Elements

OR

Inorganic

Complete ALL of the following Courses:

- CHM5251 - Organometallic Chemistry
- CHM5440 - Kinetics & Catalyst (Inactive)
- CHM5540 - Group Theory In Chemistry
- CHM5650 - Physical Inorganic Chemistry

OR

Organic

Complete ALL of the following Courses:

- CHM5236 - Spectroscopic Techniques and Structures Elucidation
- CHM5250 - Organic Synthesis
- CHM5263 - Physical Organic Chemistry

OR

Physical

Complete ANY of the following Courses:

- CHM5423 - Atmospheric Chemistry
- CHM5490 - Phys Spectroscopy (Inactive)
- CHM5540 - Group Theory In Chemistry
- CHM5586 - Computational Chemistry
- CHM6461 - Statistical Thermodynamics
- CHM6480 - Quantum Mechanics

Additional Graduate Level Chemistry Courses

At least nine (9) credits of additional graduate-level chemistry courses approved by the dissertation committee in consultation with the Graduate Program Director. The following guidelines also apply to these courses: The courses must be 5000 or 6000 level chemistry courses or approved cognates.
The following do not count toward satisfaction of this requirement: Proficiency courses and courses taken to make up for undergraduate-level deficiencies in chemistry (including CHM 5150, CHM 5225, CHM 5305, CHM 5425, and CHM 5426); and courses corresponding to research seminar, colloquium, supervised teaching, and thesis completion (CHM 6910L, CHM 6935, CHM 6936, BCH 7930, CHM 6940, CHM 6970, and CHM 6971).

Cumulative Examinations Requirement

Satisfactory completion of cumulative examinations. The student will begin taking the cumulative examinations after completing the proficiency requirements but no later than the beginning of the student's second semester. Seven examinations, each lasting three hours, will be given per year. The student must pass four out of ten consecutively-offered exams for admission to candidacy.

Preliminary Oral Examination Requirement

Satisfactory presentation and defense of a Preliminary Oral examination. The preliminary oral examination occurs in the fifth semesters (excluding summers). The examination will be conducted by the Dissertation Committee, be based on the student's dissertation research progress and future plans and should include at least one original aim conceived and developed independently by the student. The examination will include questions from the student's major field and cognate fields. After fulfilling this requirement, passing the cumulative examinations, and completing all required course work, the student advances to candidacy.

Research Dissertation Requirement

Satisfactory public presentation and defense of a research dissertation, evaluated by the Dissertation Committee. The student's Dissertation Committee will consist of the research advisor (a FIU graduate faculty member who holds dissertation advisor status), a member from outside the Department, or School, but within FIU, a randomly-assigned member appointed by the Graduate Program Director from the Department's graduate faculty, and at least two additional committee members with expertise in the student's research area. At least three members of the Dissertation Committee, including the major research advisor, must be

graduate faculty members from the Department of Chemistry and Biochemistry, and at least two of these three members must be tenured. The Committee may include additional members, but they will be non-voting.

Corequisite Courses

Fulfill ALL of the following requirements:

Supervised Teaching

Full-time graduate students, prior to reaching candidacy, are required to register for one credit of the following course listed below each semester they serve as teaching assistants.

Complete ALL of the following Courses:

- CHM6940 - Supervised Teaching

AND

Graduate Seminar/Colloquium

Full-time graduate students are required to register for CHM6935 Graduate Seminar or one credit of CHM6936 Chem Colloquium each fall and spring semester.

At least one credit from CHM6936 Chem Colloquium is required. Each student must present a seminar on their proposed research at the colloquium for a letter grade by the end of their third semester of graduate study.

Complete ALL of the following Courses:

- CHM6935 - Graduate Seminar
  OR CHM6936 - Chemistry Colloquium

AND

Dissertation Research

At least eight credits from the course below involving independent dissertation research under the direction of a faculty member in the Department are required.

Earn at least 8 credits from the following:

- CHM7910 - Dissertation Research

AND

Dissertation

At least 15 credits of from the course below to be taken after the student has advanced to candidacy.

Earn at least 15 credits from the following:

- CHM7980 - PH.D. Dissertation

Additional Comments:

Students can choose to pursue the PhD in Chemistry without selecting a specific track. One of the following tracks can be chosen in order to specialize in the specific fields of study

Award of an M.S. en route to Ph.D. Individuals directly admitted into the Ph.D. program may apply to be awarded an M.S. degree in Chemistry. To be eligible students must have completed requirements of the MS in Chemistry with report option. Upon certification by the student's advisor, dissertation committee, and the departmental graduate committee that these requirements have been met the student will be eligible to receive an M.S. in Chemistry with report option.

Major Requirements

There are no majors associated with this program.

Track, Specialization, Concentration, Area of Emphasis, or Other Curricular Offering Requirements

Students can choose to pursue the PhD in Chemistry without selecting a specific track. One of the following tracks can be chosen in order to specialize in the specific fields of study below:

Chemistry Education Track

Type

Completion Requirement

Required Courses

Students in the Chemistry Education Track must meet all the PhD in Chemistry degree requirements stated above. The coursework must include:

1. A minimum of twelve credits of chemistry courses, with a minimum of nine of these credits being Chemistry core courses. Students must select an area of concentration (Analytical, Biochemistry, Inorganic, Organic, Physical). Six credits of chemistry coursework must come from the area of concentration and six credits from outside the area of concentration.

2. At least nine credits of education research courses, including one course from each of the categories of courses listed below.

Fulfill ALL of the following requirements:

Foundations of Education Research:

Complete at least 1 of the following courses:

- EDF6481 - Educational Research Methodology
- SCE7761 - Research in Science Education

AND

Quantitative Research Methods

Complete at least 1 of the following courses:

- EDF6472 - Research Methods in Education: Introduction to Data Analysis

AND

Qualitative Research Methods

Complete at least 1 of the following courses:

- EDF6475 - Qualitative Foundations of Educational Research

Advanced Methodology Courses:

1. At least three credits of advanced methodology courses, dependent on the focus of the dissertation project. Suggested courses appear in the list below, but others can be approved of by the dissertation committee in consultation with the Graduate Program Director.

Complete at least 1 of the following courses:

- EDF7476 - Advanced Methods of Qualitative Educational Research
- EDF6486 - Advanced Data Analysis in Quantitative Educational Research
- EDF7489 - Hierarchical Linear Modeling for Educational Research
- STA5507 - Nonparametric Methods
- STA6244 - Data Analysis I
- STA6247 - Data Analysis II
- STA6505 - Analysis of Categorical Data (Inactive)
- STA6746 - Multivariate Statistical Analysis
- STA6990 - Multivariate Statistical Analysis (Inactive)

Environmental Chemistry Track

Type

Completion Requirement

Environmental Chemistry Core Courses: 12 credits

Complete at least 4 of the following courses:

- CHM5423 - Atmospheric Chemistry
- CHM5765 - Aquatic Chemistry
- CHM6281 - Environmental Organic Chemistry
- CHM6340 - Organic Geochemistry
- OCC5050 - Chemical Oceanography
- CHM6088 - Environmental Chemistry of Trace Elements

Chemistry Core Courses

Complete at least 2 of the following courses:

- CHM5156 - Advanced Chromatography
- CHM5138 - Advanced Mass Spectrometry
- CHM5236 - Spectroscopic Techniques and Structures Elucidation
- CHM6157 - Advanced Analytical Chemistry
- CHM5165 - Chemometrics and Sampling
- CHM5236 - Spectroscopic Techniques and Structures Elucidation

Elective

At least one elective. The elective must be approved by the student's Dissertation Committee, and

Environmental Chemistry Graduate Committee. This committee consists of the Environmental Chemistry Graduate Program Director, the Chemistry Graduate Program Director, and two Departmental faculty members active in research in environmental science.

Forensic Science Track

Type

Completion Requirement

Track Requirements

IMPORTANT: This track has specific admission requirements that must be met. Please see Admissions Requirements before you pursue this track.

Students must choose either the Analytical or the Biochemistry concentration. The course of study must include twelve credits of required classes that depend on the concentration (each of the following courses is worth three credits):

Fulfill ANY of the following requirements:

Analytical Chemistry/Trace Concentration: 12 credits

Complete ALL of the following Courses:

- BSC5406 - Forensic Biology
- CHS5542 - Forensic Chemistry
- CHS5539 - Forensic Toxicology
- CHS5545 - Chemistry and Analysis of Explosives
  OR CHS5538C - Chemistry and Analysis of Drugs

OR

Biochemistry/DNA Analysis Concentration: 12 Credits

Complete ALL of the following Courses:

- BSC5406 - Forensic Biology
- CHS5542 - Forensic Chemistry
- CHS5536 - Forensic DNA Chemistry
- PCB5685 - Population Genetics

Chemistry Core Courses

Complete at least 2 of the following courses:

- CHM5156 - Advanced Chromatography
- CHM5138 - Advanced Mass Spectrometry
- CHM5236 - Spectroscopic Techniques and Structures Elucidation
- CHM5302 - Organic Chemistry of Nucleic Acids (Inactive)
- CHM5506 - Physical Biochemistry (Inactive)
- CHM6157 - Advanced Analytical Chemistry
- CHM5165 - Chemometrics and Sampling

Elective

At least one elective. The list of approved electives is maintained by the Chemistry and Forensic Graduate Committees.

Radiochemistry Track

Type

Completion Requirement

Required Courses

IMPORTANT: This track has specific admission requirements that must be met. Please see Admissions Requirements before you pursue this track.

The course work must include at least 21 credits of approved course work from the following three groups.

Complete ALL of the following Courses:

- CHS5110 - Topics in Radiochemistry
- CHS6111 - Advanced Radiochemistry

Additional Courses

A minimum of six credits from the following list, which includes core courses:

Complete at least 2 of the following courses:

- CHM6157 - Advanced Analytical Chemistry
- CHM5156 - Advanced Chromatography
- CHM5540 - Group Theory In Chemistry
- CHM5650 - Physical Inorganic Chemistry
- CHM6491 - Applications of Synchrotron and Electron Based Techniques
- CHM5681 - Special Topics in Inorganic Chemistry
- CHM5236 - Spectroscopic Techniques and Structures Elucidation
- CHM6480 - Quantum Mechanics
  OR PHY6645 - Advanced Quantum Mechanics I
- PHZ5340 - Particle Interactions and Detection

Electives

Additional electives from the following list, or with graduate committee approval, as needed to meet the course requirement

Complete ANY of the following Courses:

- CHM6088 - Environmental Chemistry of Trace Elements
- CHM5165 - Chemometrics and Sampling
- CHM5490 - Phys Spectroscopy (Inactive)
- CHM6461 - Statistical Thermodynamics
- CHM5440 - Kinetics & Catalyst (Inactive)
- CHM5586 - Computational Chemistry
- CHM5263 - Physical Organic Chemistry
- CHM5506 - Physical Biochemistry (Inactive)
- CHM5251 - Organometallic Chemistry
- PHZ5730 - Biophysical Effects of Radiation (Inactive)

- PHZ5732 - Clinical and Medical Dosimetry (Inactive)

CHINS:CFI - Undergraduate Certificate in Chinese Studies

Overview

Degree Offered
ACRT - Academic Certificate

Program Title
Certificate in Chinese Studies

The Undergraduate Certificate in Chinese Studies provides a multidisciplinary approach covering the philosophy, religion, art history, and literature of China as well as issues in history, politics, geography, sociology/anthropology, and international relations.

For more information, visit the Steven J. Green School of International and Public Affairs website.

To explore more about this program, visit the website below:

Requirements

Simple Requirements

Admissions Requirements

This Certificate is open to degree-seeking students only.

No specific admissions requirements. Contact advisor for additional information.

Prerequisites

Contact advisor for information about any prerequisites.

Program Requirements

Program Credit Hours: 18

Type
Completion Requirement

Language Requirements: 12 credits

Students must complete two full years (four semesters) or equivalent of Chinese language. (First year language courses are 5-credits each, for a total of 10, but 6 first-year credits will be applied to the certificate total). If students test out of some portion of this requirement then they must complete additional credits in studies of Chinese and/or East Asia society and culture. Fourth semester of Chinese may be substituted by a Chinese Studies course, if a language course is not available.

Earn at least 12 credits from the following:

- CHI1130 - Chinese I
- CHI1131 - Chinese II
- CHI2200 - Intermediate Chinese
- CHI2201 - Intermediate Chinese II
- CHI3400 - Intermediate Chinese Conversation
- CHI3410 - Advanced Chinese I (Inactive)
- CHI3440 - Business Chinese
- CHI3955 - Foreign Study: Language and Culture
- CHT3391 - Chinese Literature and Cinema (Inactive)
- CHT3502 - Chinese Culture and Society

Elective - Area Studies Courses: 6 credits

Two courses in Chinese or East Asian area studies (history, religion, economics, international relations, etc.) must be completed.

Earn at least 6 credits from the following:

- AML4930 - Special Topics in American Literature
- ARH4552 - Arts of China and Japan
- ASH4300 - East Asian Civilization and Culture
- ASH4384 - History of Women in Asia
- ASH4404 - History of China
- ASN3016 - China Then and Now
- ASN3125 - Intro to Spirituality of Japan
- ASN3143 - Corporate Culture of China
- ASN3153 - Topics in Korean Culture
- ASN3154 - Traditional and Modern Korea
- ASN3200 - Asia Through Films
- ASN3202 - Japanese Anime and Manga
- ASN3329 - Women in Asian Society
- ASN3403 - Zen and the Art of Tea Ceremony
- ASN3410 - Introduction to East Asia
- ASN3414 - Pop Culture of East Asia
- ASN3503 - Exploring East Asia: Virtual Reality Travel
- ASN3931 - Special Topics in Asian Studies
- ASN4111 - Japan and The New East
- ASN4404 - Zen and the Art of the Tea Ceremony II
- ASN4810 - East Asian Classics to Cool Writings in Translation
- CHI3440 - Business Chinese
- CPO3502 - Politics of the Far East
- CPO4541 - Politics Of China
- ECS3200 - Economics Of Asia

- HFT4955 - Study Abroad: Hospitality and Tourism
- INR3224 - International Relations of East Asia
- INR4232 - International Relations of China
- LIT3930 - Special Topics
- MAN4600 - International Management
- PHI3762 - East Phil & Rel Thgt
- REL3340 - Survey of Buddhism
- REL4345 - Zen Buddhism
- SYD4610 - Topics In Sociology

In addition to the courses listed here, relevant special topics, study abroad credits, area studies or comparative studies courses may also be applied. Students are encouraged to earn credits through study abroad in China or through internships.

Additional Comments:

Please note: No more than two courses (6 credits) from the BA in Asian Studies degree or minor can be counted towards the certificate.

For more information, or to request additional courses, contact the Asian Studies office, SIPA-I 523. Email: **asian@fiu.edu**; phone: (305) 348-1914; website: **http://asian.fiu.edu**.

CHLDH:CFI - Post-Graduate Nurse Practitioner Certificate in Pediatric Primary Care

Overview

Degree Offered
ACRT - Academic Certificate

Program Title
Graduate Certificate in Pediatric Primary Care Nurse Practitioner

The Post-Graduate Nurse Practitioner (NP) Certificate in Pediatric Primary Care is designed for nurses who hold a Master of Science in Nursing (MSN) and wish to specialize in providing primary care for children and adolescents in primary care settings. This program offers advanced training in pediatric health assessment, diagnosis, and management of both common and complex health conditions prevalent in the pediatric population. Graduates emerge prepared to administer comprehensive, family-centered care and collaborate with interprofessional teams to enhance health outcomes for children and adolescents.

Graduates will be eligible to take the Pediatric Primary Care Nurse Practitioner National Certification Exam.

For more information, visit the Nicole Wertheim College of Nursing and Health Sciences website.

Requirements

Simple Requirements

Admissions Requirements

Admissions Requirements for the Graduate Certificate in Pediatric Primary Care Nurse Practitioner

(1) A Master of Science in Nursing (MSN) degree from an CCNE, NLNAC, or ACEN accredited program.

(2) A graduate (MSN) grade point average (GPA) of 3.0 or above.

(3) Graduate courses in nursing theory (3 credits) and research (3 credits). advanced pathophysiology (3 credits), advanced health assessment (3 credits), and advanced pharmacology (3 credits). *-If the applicant's coursework in advanced pharmacology, advanced pathophysiology, and advanced health assessment took place more than 3 years ago, they may need to repeat the courses prior to enrollment in specialty courses, following, gap analysis, evaluation of records and professional experience by the admission committee and program chair.*

(4) State of Florida RN and/or APRN licensure. A photocopy of the license must be submitted along with student's application to the Post Graduate Nurse Practitioner Certificate Program.

(5) Pre-admission panel interview with members of the Graduate Nursing Admissions Committee.

(6) Two letters of recommendation.

This certificate is open to non-degree-seeking students only.

Admissions Procedure

STEP 1 - Submit an application to Nursing CAS (The Centralized Application Service for Nursing Programs)

--Complete an online application via Nursing CAS http://www.nursingcas.org and pay appropriate fees. Applications will be accepted from Dec 1 to March 1 for Fall admission.

--Send official academic transcripts from ALL SCHOOLS attended (all Associate, Bachelors, Masters degree, and higher [if applicable] coursework) to Nursing CAS for upload and verification.

--Upload all required supplemental items including professional CV, active Florida RN and/or APRN License, recommendations and Personal Statement to Nursing CAS.

--Complete the required FIU supplemental application and pay the $30 fee.

STEP 2 - Professional Interview

--Following a review of all completed applications a select number of applicants will be offered the opportunity to participate in a panel interview.

--Interview candidates may be instructed to bring additional official transcripts to their interview appointment

Program Requirements

Advanced Practice Nursing Specialty Credit Hours: 22

Type

Completion Requirement

Required Courses

Complete ALL of the following Courses:

- NGR6301C - Advanced Child Health Nursing I
- NGR6301L - Advanced Child Health Nursing Practice I
- NGR6302 - Advanced Child Health Nursing II
- NGR6302L - Advanced Child Health Nursing Practice II

Certificate Completion Requirements

(1) Successful completion of a minimum of 22 semester credits of graduate coursework beyond the MSN, including up to 770 direct patient care clinical hours, with required clinical hours and coursework determined by gap analysis. (2) Achievement of an overall cumulative GPA of 3.0 or above. See Graduate Catalog in University Graduate School Rules and Regulations for information on Academic Warning, Probation, and Dismissal. (3) Removal of all conditions, deficiencies, and incomplete grades. Credit hours for courses in which the grade is "B-" or below will not count toward satisfying certificate completion requirements.

Major Requirements

There are no majors associated with this program.

Track, Specialization, Concentration, Area of Emphasis, or Other Curricular Offering Requirements

There are no tracks, specializations, concentrations, areas of emphasis, or other curricular offerings associated with this program.

CHRSTU:CFI - Undergraduate Certificate in Christian Studies

Overview

Degree Offered
ACRT - Academic Certificate

Program Title
Certificate in Christian Studies

Christianity is the largest religion in the world today and is present in every part of the globe. It has played a major role in world affairs and continues to influence politics, law, social organization, economics, art, literature, philosophy and more. The purpose of the Christian Studies certificate is to provide students the opportunity to develop expertise in this important field by putting together a focused sequence of courses from various departments at FIU.

The Certificate in Christian Studies is a fifteen credit interdisciplinary program, rooted in the humanities, social sciences, and fine arts. The program is available to degree seeking students and independently to non- degree-seeking students who already have a B.A. The Certificate in Christian Studies provides students with a multidisciplinary approach to the religion, arts, languages and literatures of Christianity as well as issues in history, politics, international relations, and sociology/ anthropology.

Contact advisor for information about any prerequisites.

Program Requirements

Program Credit Hours: 15

Type
Completion Requirement

Core Courses: 6 credits

Complete ALL of the following Courses:

- REL3505 - Introduction to Christianity
- REL4910 - Independent Research

A. Foundation Course: REL3505 Intro To Christnity Introduction to Christianity (3 credits). This should be taken at the start of the Certificate Program.

B. Capstone Course: REL4910 Independent Research Independent Research (3 credits). This should be taken at the end of the certificate process in order to produce a quality research paper to serve as part of the student's graduation portfolio. Students will have to make an oral presentation of that paper as part of the independent research course.

Electives: 9 credits

The balance of the 15-credit Certificate may be drawn from courses listed below. In addition to the courses listed below, relevant special topics, area studies or comparative studies courses may also be applied, including up to 6 transfer credits. Such courses should have at least a 50 percent Christian history, policy, or theology content. Students seeking an exception must present a syllabus to the program director for review and approval. All must be passed with "C" or better.

Complete at least 3 of the following courses:

- AMH3012 - American History, 1600-1763
- AMH4333 - History of American Conservatism
- EUH3511 - Tudor and Stuart England
- EUH4025 - Saints, Relics and Miracles in Medieval Europe
- EUH4130 - The Knight in European and Mediterranean History
- EUH4142 - Renaissance and Reformation
- EUH4384 - The Premodern Mediterranean
- HBR3100 - Biblical Hebrew I
- HBR3101 - Biblical Hebrew II
- PHI3700 - Phil Of Religion
- PHI4938 - Special Topics in Philosophy of Religion
- REL1200 - Introduction to Christian Scripture
- REL2011 - Introduction to Religion
- REL3029 - Christian Mysticism
- REL3106 - Introduction to Religion in Latin America
- REL3120 - Religion in America
- REL3127 - Church and State
- REL3207 - Jesus and the Dead Sea Scrolls
- REL3209 - The Dead Sea Scrolls
- REL3218 - Women in the Bible
- REL3220 - Moses And Company
- REL3250 - Jesus and the Early Christians
- REL3280 - Biblical Archaeology
- REL3443 - Liberation Theology (Inactive)
- REL3511 - Early Christianity
- REL3520 - Saints, Witches, and Cathedrals
- REL3530 - Protestantism

- REL3532 - Reformation
- REL3583 - World Christianity
- REL3593 - Women in the Early Christian Church
- REL3692 - Jerusalem: Religious, Historical, Political, and Cultural Significance
- REL4063 - Faith and Community
- REL4105 - Latino/a Immigration and Religion
- REL4224 - Prophets & Israel
- REL4382 - Latin American Women and Religions in the Americas
- REL4425 - Issues Chr Theology (Inactive)
- REL4931 - Religious Studies Seminar
- REL4461 - Topics in the Philosophy of Religion
- REL4481 - Contemporary Latin American Religious Thought (Inactive)

Note: Not all courses are offered every semester. Prior to enrolling in the last course for this Certificate, all students should approach the program director and indicate that they are about to complete the curricular requirements. Students should be advised that the term paper they turn in for their last Certificate course will be used to assess Certificate Student Learning Outcomes. Students will have to make an oral presentation of that paper as part of the independent research course.

Overview

Degree Offered
ACRT - Academic Certificate

Program Title
Graduate Certificate in Child Welfare

This Graduate Certificate in Child Welfare (GCCW) will provide specialized training in child protection and child welfare services. Students who are awarded the GCCW will be prepared for work with neglected and abused children, their families, and the social service organizations that serve them. A total of 18 graduate credits are required for this certificate. This certificate program is open to degree-seeking social work students only. For more information, visit the School of Social Work website.

CIVLED:CFI - Undergraduate Certificate in Civic Leadership and Engagement

Overview

Degree Offered
ACRT - Academic Certificate

Program Title
Certificate in Civic Leadership and Engagement

The Undergraduate Certificate in Civic Leadership prepares students for the evolving nature of civic leadership through coursework and practice that emphasizes relationship building, change management, global dynamics, intercultural understanding, and collaboration. The goal of this certificate program is to foster civic leadership and engagement in the FIU student body by encouraging a consideration of leadership from multiple perspectives and contexts. Through involvement with the campus and greater community, students will become engaged in their own professional leadership education and development.

Admissions Requirements

No specific admissions requirements. Contact advisor for additional information.

This certificate is open to degree-seeking students only.

Prerequisites

Contact advisor for information about any prerequisites.

Program Requirements

Requirements

The Certificate Program requires completion of 18 credit hours of coursework. Students must earn a “C” or better in courses for the Certificate.

All students choose from a list of 3 core required courses (9 credits) and the remaining 9 credits will be chosen based on their academic and career objectives. Sample electives are listed below by areas.

Program Credit Hours: 18

Type

Completion Requirement

Required Courses: 9 credits

These three sets of courses meet the core requirements:

Complete at least 3 of the following courses:

- PAD3431 - Exploring Leadership: Yourself, Your Organization and Your Community
  OR PUP4033 - Public Service Leadership and Management
- POS3424 - The Legislative Process
  OR PAD3034 - Policy Development and Implementation
- PAD3800 - Managing Global Cities
  OR INR3303 - Foreign Policymaking

Electives: 9 credits

Students may choose electives based on academic and professional goals. Courses may include those in the lists below or any other advisor approved course:

Fulfill ANY of the following requirements:

Public Policy and Administration

Complete ANY of the following Courses:

- PAD3003 - Introduction to Public Policy and Administration
- PAD3034 - Policy Development and Implementation
- PAD4046 - Values, Ethics, and Conflict Resolution
- PAD4141 - Citizen Participation and Community Empowerment
- PAD4905 - Independent Study in Public Administration
- PAD4940 - Public Administration Internship
- PUP4033 - Public Service Leadership and Management
- PUP4103 - South Florida Urban Laboratory
- PUP4214 - Global Perspectives on Urban Inequality, Poverty, and Economic Development

OR

Global and Sociocultural Studies

Complete ANY of the following Courses:

- ANT3212 - World Ethnographies
- GEO3001 - Geographies of Global Change
- SSE4380 - Developing a Global Perspective
- SYP3456 - Societies in the World
- IDS3315 - Gaining Global Perspectives

OR

Criminal Justice

Complete ANY of the following Courses:

- CCJ4054 - Ethics in Criminal Justice
- CJE3001 - Professional Development in Criminal Justice

OR

Politics and International Relations

Complete ANY of the following Courses:

- POS3413 - The Presidency
- POS3424 - The Legislative Process
- INR3081 - Contemporary International Problems
- INR3303 - Foreign Policymaking

Major Requirements

There are no majors associated with this program.

Track, Specialization, Concentration, Area of Emphasis, or Other Curricular Offering Requirements

There are no tracks, specializations, concentrations, areas of emphasis, and other curricular offerings associated with this program.

CIVLEG:BS - Bachelor of Science in Civil Engineering

Overview

Degree Offered
BS - Bachelor of Science

Program Title
Civil Engineering

Civil engineers play an essential role in serving people and the environmental needs of society. These needs relate to shelter, mobility, water, air, and development of land and physical facilities. FIU Bachelor of Science (BS) in Civil Engineering prepares graduates who improve the quality of life, meet the needs of industry and government, and contribute to the economic competitiveness of our society. Civil Engineering involves the planning, design, construction, operation and maintenance of buildings, highways, railways, bridges, airports, seaports, and other structures of modern society. Given the global need for rebuilding, maintaining, and further developing infrastructures, the demand for civil engineers has never been greater. Civil engineers can choose from a broad spectrum of career opportunities in industry, government and private consulting. Our ABET (Accreditation Board for Engineering and Technology) accredited program offers in-depth education in fundamental subjects across various subdisciplines of Civil Engineering. These areas include construction, geotechnical, environmental, structural, surveying, transportation, and water resources engineering. The curriculum is designed to meet the State of Florida's articulation policy and to equip graduates for professional engineering licensure.

Simple Requirements

Admissions Requirements

Admissions Requirements for the Bachelor of Science (BS) in Civil Engineering

See general university admissions requirements at admissions.fiu.edu.

Admissions Requirements for the Combined BS in Civil Engineering to Master of Science (MS) in Civil Engineering Accelerated Degree Pathway

Students who pursue a BS degree in Civil Engineering and have completed 75 credits and have at least a 3.3 GPA on both overall and upper division courses may apply to enroll in the combined BS/MS pathway in Civil Engineering upon recommendation from three CEE faculty members. In addition to the admission requirements of the combined BS/MS

pathway, students must meet all the admission requirements of both the department and the University Graduate School. Students need only apply once to the combined degree pathway; the application is submitted to Graduate Admissions typically before the student starts the last 30 credits of the bachelor's degree program.

Students interested in the pathway should consult with the Undergraduate Advisor on their eligibility for the pathway. The students should also meet the Graduate Program Director to learn about the graduate program and available courses before completing the application form and submitting it to the Undergraduate Advisor. Applicants will be notified by the department and the University Graduate School of the decision on their applications.

Admissions Requirements for the Combined BS in Civil Engineering to MS in Environmental Engineering Accelerated Degree Pathway

Students who pursue a BS degree in Civil Engineering and are in their senior year and have at least a 3.3 GPA on both overall and upper division courses may apply to the department to enroll in the combined BS (Civil)/MS pathway in Environmental Engineering upon recommendation from three CEE faculty members. To be considered for admission to the combined bachelor's/masters degree pathway in Environmental Engineering, students must have completed at least 75 credits in the bachelor's degree program in Civil Engineering at FIU and meet the admissions criteria for the graduate degree program at FIU and meet the admissions criteria for the graduate degree program to the which they are applying. Students need only apply once to the combined degree pathway; the application is submitted to the Graduate Admissions typically before the student starts the last 30 credit of the bachelor's degree program.

Students interested in the pathway should consult with the Undergraduate Advisor on their eligibility for the pathway. The students should also meet the Graduate Program Director to learn about the graduate program and available courses before completing the application form and submitting it to the Undergraduate Advisor. Applicants will be notified by the department and the University Graduate School of the decision on their applications.

Program Requirements

CEC Academic Progression Standard

Steady academic progression is expected by the College of Engineering and Computing. Students who are unsuccessful in passing common pre-requisites after two attempts will be advised to change their major into an area where they can be successful. Drops after the add/drop period, which result in a DR grade, are considered an attempt in the course and count as an unsuccessful enrollment.

Students must also meet the Math Progression standard of successfully completing Calculus 1 within three academic terms, not counting summers.

Students will be redirected to a different degree program when completion of the progression standards, including the applicable math progression standard by its stated semester, is no longer feasible.

Lower Division Preparation

Type

Prerequisite

Common Prerequisites

Complete ALL of the following Courses:

- CHM1045 - General Chemistry I
  AND CHM1045L - General Chemistry Lab I

- MAC2281 - Calculus I for Engineering
- MAC2282 - Calculus II for Engineering
- MAC2283 - Calculus III for Engineering
- MAP2302 - Differential Equations
- PHY2048 - Physics with Calculus I
  AND PHY2048L - General Physics Laboratory I
- PHY2049 - Physics with Calculus II

PHY2049L General Phys Lab II Does not count toward the degree at FIU

Additional lower-division courses required for the degree

Complete ALL of the following Courses:

- GLY1010 - Physical Geology
  AND GLY1010L - Physical Geology Lab
- EGN1110C - Engineering Drawing

Students may substitute GLY1010 Physical Geology and GLY1010L Physical Geology Lab with any UCC Natural Science course with lab, except for those in physics and chemistry.

Additional Comments:

For a list of all state-approved common prerequisites, including alternatives, visit https://cpm.flvc.org.

Upper Division

Type

Completion Requirement

Applied Mathematics: 3 credits

Complete at least 1 of the following courses:

- STA3033 - Introduction to Probability and Statistics for CS
- ESI3215 - Evaluation of Engineering Data I

Engineering Sciences: 17 credits

Complete ALL of the following Courses:

- CGN2420 - Computer Tools for Engineers
- CWR3201 - Fluid Mechanics
  AND CWR3201L - Fluid Mechanics Laboratory
- EGM3520 - Engineering Mechanics of Materials
  AND EGM3520L - Materials Testing
- EGN3311 - Statics
- CGN3300 - Dynamics for Civil Engineering Systems

Students may substitute CGN3300 Dynamics for CE Systems with EGN3321 Dynamics when CGN3300 Dynamics for CE Systems is not offered.

General Engineering Courses: 5 credits

Complete ALL of the following Courses:

- CGN2161 - Career Orientation in Civil Engineering
- EGS2030 - Ethics and Legal Aspects in Engineering
- EGN3613 - Engineering Economy

Civil Engineering Curriculum: 42 credits

Complete ALL of the following Courses:

- CCE4031 - Project Planning for Civil Engineers
- CEG4011 - Geotechnical Engineering I
- CEG4011L - Geotechnical Testing Laboratory
- CES3100 - Structural Analysis
- CGN4802 - Civil Engineering Senior Design Project
- CWR3540 - Water Resources Engineering
- ENV3001 - Introduction to Environmental Engineering
  AND ENV3001L - Environmental Laboratory I
- SUR2101C - Geomatics and Surveying
- TTE4201 - Transportation and Traffic Engineering
- CGN4980 - Civil Engineering Seminar

C.E. Design Elective (minimum of 3 credits)

C.E. Design Elective (minimum of 3 credits)

C.E. Elective (minimum of 3 credits)

C.E. Elective (minimum of 3 credits)

C.E. Elective (minimum of 3 credits)

General Electives

General elective credits may be used for CGN4949 Co-Op Work Exp Co-Op Work Experience (3 credits) or for any other extra curriculum course in cases where students choose not to pursue an internship.

Earn at least 3 credits

Design Elective Requirements

All students must take 6 credits from the following Design Elective Courses.

Earn at least 6 credits from the following:

- CEG4012 - Geotechnical Engineering II
- CES4702 - Reinforced Concrete
  OR CES4605 - Steel Design
- CWR4204 - Hydraulic Engineering
- ENV4551 - Wastewater Treatment Engineering
- TTE4804 - Geometric Design of Highways
- CEG4126 - Fundamentals of Pavement Design

Suggested Elective Options

All recommended and other technical electives must be approved by the advisor and must concentrate on relevant applications of civil engineering design. Selection of a proper sequence would allow the student to specialize within a focus area of interest (e.g., structural, geotechnical, construction, water, environmental, or transportation).

Fulfill ANY of the following requirements:

Structural Engineering Option

Complete ANY of the following Courses:

- CES3580 - Hurricane Engineering and Global Sustainability
- CES4605 - Steel Design
- CES4711 - Introduction to Prestressed Concrete Structures
- CGN4011 - AI-enabled Computational Techniques in Civil Engineering
- CGN4510 - Sustainable Building Engineering
- CES5106 - Advanced Structural Analysis
- EGM5421 - Structural Dynamics

OR

Water Resources Engineering Option

Complete ANY of the following Courses:

- CWR4204 - Hydraulic Engineering
- CWR4530 - Modeling Applications in Water Resources Engineering
- CWR4620C - Ecohydrological Engineering
- CWR5235 - Open Channel Hydraulics
- ENV4401 - Water Supply Engineering

OR

Geotechnical Engineering Option

Complete ANY of the following Courses:

- CEG4012 - Geotechnical Engineering II
- CEG4126 - Fundamentals of Pavement Design
- CEG5065 - Geotechnical Dynamics
- CES3580 - Hurricane Engineering and Global Sustainability
- CGN4011 - AI-enabled Computational Techniques in Civil Engineering

OR

Environmental Engineering Option

Complete ANY of the following Courses:

- ENV4005L - Environmental Laboratory II
- ENV4024 - Bioremediation Engineering
- ENV4101 - Fundamentals of Air Pollution Engineering
- ENV4330 - Hazardous Waste Site Assessment
- ENV4351 - Solid and Hazardous Waste Management
- ENV4401 - Water Supply Engineering
- ENV4513 - Chemistry for Environmental Engineers
- ENV4551 - Wastewater Treatment Engineering
- ENV4560 - Reactor Design

OR

Construction Engineering Option

Complete ANY of the following Courses:

- CCE4001 - Heavy Construction
- CES3580 - Hurricane Engineering and Global Sustainability
- CGN4510 - Sustainable Building Engineering
- CGN4930 - Special Topics in Civil Engineering
- CCE5035 - Construction Engineering Management
- CCE5036 - Advanced Project Planning for Civil Engineers

OR

Transportation Engineering Option

Complete ANY of the following Courses:

- CEG4126 - Fundamentals of Pavement Design
- CGN4321 - GIS Applications in Civil and Environmental Engineering
- TTE4102 - Urban Transportation Planning
- TTE4202 - Traffic Engineering
- TTE4203 - Highway Capacity Analysis
- TTE4804 - Geometric Design of Highways

Professional Graduation Requirement

Civil Engineering students must take and pass CGN4980 Civil Engr Seminar. Students showing evidence of passing the state FE (EIT) examination will have this requirement waived. This evidence must be shown prior to the last semester; otherwise, the student must enroll in CGN4980 Civil Engr Seminar.

Major Requirements

There are no majors associated with this program.

Track, Specialization, Concentration, Area of Emphasis, or Other Curricular Offering Requirements

Other Curricular Offering: Combined BS in Civil Engineering to MS in Civil Engineering Accelerated Degree Pathway

A student admitted to the combined degree pathway will be considered to have undergraduate status until the student applies for graduation from their bachelor's degree program. Upon conferral of the bachelor's degree, the student will be granted graduate status and be eligible for graduate assistantships.

Students enrolled in the pathway may count up to nine credit hours of CEE graduate courses as credits for both the BS and MS degrees. The combined BS/MS pathway has been designed to be a continuous enrollment pathway. However, upon completion of all the requirements of the undergraduate program, students will receive their BS degrees. Students in this pathway have up to one year to complete the master's degree after receipt of the bachelor's degree. Students

who fail to meet this one year post BS requirement or who elect to leave the combined pathway at any time and earn only the BS degree will have the same access requirements to regular graduate programs as any other student, but will not be able to use the nine credits in both the bachelor's and master's degrees.

For each of the graduate courses counted as credits for both BS and MS degree, a minimum grade of B is required. All double counted courses must be at 5000 level or higher. Students enrolled in the pathway may count up to nine credit hours of CEE graduate courses toward the elective engineering BS requirements as well as toward the MS degree. Only graduate courses with formal lectures can be counted for both degrees. The students are responsible for confirming the eligibility of each course with the Undergraduate Advisor.

Undergraduate students enrolled in the pathway are encouraged to seek employment with a department faculty to work as student assistants on sponsored research projects. The students will be eligible for graduate assistantships upon full admission into the graduate school.

Other Curricular Offering: Combined BS in Civil Engineering to MS in Environmental Engineering Accelerated Degree Pathway

A student admitted to the combined degree pathway will be considered to have undergraduate status until the student applies for graduation from their bachelor's degree program. Upon conferral of the bachelor's degree, the student will be granted graduate status and will be eligible for graduate assistantships. Only 5000-level or higher courses, and no more than the credits specified by the program catalog, may be applied toward both degrees. In addition to the admission requirements of the combined BS/MS pathway, students must meet all the admission requirements of both the department and the University Graduate School.

Students enrolled in the pathway may count up to nine credit hours of CEE graduate courses as credits for both the BS and MS degrees. The combined BS/MS pathway has been designed to be a continuous enrollment pathway. However, upon completion of all the requirements of the undergraduate program, students will receive their BS degrees. Students in this pathway have up to one year to complete the master's degree after receipt of the bachelor's degree. Students who fail to meet this one year post BS requirement or who elect to leave the combined pathway at any time and earn only the BS degree will have the same access requirements to regular graduate programs as any other student, but will not be able to use the nine credits in both the bachelor's and master's degrees.

For each of the graduate courses counted as credits for both BS and MS degree, a minimum grade of "B" is required. All double counted courses must be at 5000 level or higher. Students enrolled in the pathway may count up to nine credit hours of CEE graduate courses toward the elective engineering BS requirements as well as toward the MS degree. Only graduate courses with formal lectures can be counted for both degrees. The students are responsible for confirming the eligibility of each course with the Undergraduate Advisor.

Undergraduate students enrolled in the pathway are encouraged to seek employment with a department faculty to work as student assistants on sponsored research projects. The students will be eligible for graduate assistantships upon full admission into the graduate school.

CIVLEG:MS - Master of Science in Civil Engineering

Overview

Degree Offered
MS - Master of Science

Program Title
Civil Engineering

The Department of Civil and Environmental Engineering at FIU offers graduate degrees that can enhance career opportunities and prepare a student for further success in academia. The Master of Science (MS) in Civil Engineering prepares qualified students for the professional practice of or advanced academic research in civil engineering. The student is required to specialize in a defined area of civil engineering but may broaden knowledge through studies combining subject material from different areas of specialization and interdisciplinary related courses. The MS degree is available in a thesis or non-thesis program. The thesis program entails a minimum of six credits for the successful completion of the research and thesis. The non-thesis program must be supported by either the successful completion of a project and a report of substantial engineering content for a minimum of three credits or the all-course option. A combined accelerated BS/MS degree pathway is also available. For more information, visit the College of Engineering and Computing website.

Requirements

Simple Requirements

Admissions Requirements

Admissions Policies for Master of Science Programs

A student seeking admission into the Civil Engineering or the Environmental Engineering graduate program must have a bachelor’s degree in Civil Engineering, Environmental Engineering, or related engineering or equivalent from an accredited institution or, in the case of foreign students, an institution recognized in its own country as preparing students for further study at the graduate level. The minimum requirements for admission to the Master programs are:

(1) GPA of at least 3.0/4.0 in either the last 60 credit hours or the overall undergraduate degree, and

(2) A bachelor’s degree in engineering, science, or a closely related field from an accredited institution, and

(3) International graduate student applicants whose native language is not English are required to submit a score for the Test of English as a Foreign Language (TOEFL) or for the International English Language Testing System (IELTS). A total score of 80 on the iBT TOEFL or 6.5 overall on the IELTS is required, and

(4) Three letters of recommendation or the forms provided by the department, and

(5) A statement of objectives in which, in addition to other information, the intended concentration must be clearly stated, and

(6) A resume including contact information, education and employment history, practical and research experiences (such as projects and publications), skills and other pertinent information.

Students who meet all criteria, except for requirements 1 and 2 above, may be evaluated for conditional admission. Meeting the minimum requirements does not guarantee admission to the programs.

Grades earned at an institution with non-traditional grading systems will be given every consideration and applicants will be treated equally as are students from institutions with traditional grading systems.

Application Procedures for Master of Science Programs

A student planning to enroll in the graduate program must complete the following:

(1) Submit an online Graduate Application for Admission to the Graduate Admissions Office.

(2) Have a copy of the official transcripts of all previously earned college or university credits sent from the applicant's former institution(s) to the Graduate Admissions Office.

(3) Submit three letters of recommendation, statement of objectives, and resume as part of the online Graduate Application for Graduate Admissions Office.

(4) International graduate student applicants whose native language is not English are required to submit a score for the Test of English as a Foreign Language (TOEFL) or for the International English Language Testing System (IELTS). A total score of 80 on the iBT TOEFL or 6.5 overall on the IELTS is required.

It should be emphasized that the admission cannot be acted upon until all of the documents and credentials have been received.

Students seeking a waiver to normal admissions standards must contact the departmental main office for filing instructions and deadlines.

Admissions Requirements for the Combined Bachelor of Science (BS) in Civil Engineering to Master of Science (MS) in Civil Engineering Accelerated Degree Pathway

Students who pursue a BS degree in Civil Engineering and have completed 75 credits and have at least a 3.3 GPA in either the last 60 credit hours or the overall courses may apply to enroll in the combined BS/MS pathway in Civil Engineering upon recommendation from three CEE faculty members. In addition to the admission requirements of the combined BS/MS pathway, students must meet all the admission requirements of both the department and the University Graduate School. Students need only apply once to the combined degree pathway; the application is submitted to Graduate Admissions typically before the student starts the last 30 credits of the bachelor's degree program.

Students interested in the pathway should consult with the Undergraduate Advisor on their eligibility for the pathway. The students should also meet the Graduate Program Director to learn about the graduate program and available courses before completing the application form and submitting it to the Undergraduate Advisor. Applicants will be notified by the department and the University Graduate School of the decision on their applications.

Program Requirements

Degree Requirements for Master of Science Programs

To be eligible for a Master's degree a student must:

(1) Satisfy all University requirements for a Master's degree.

(2) Meet all undergraduate deficiencies, and requirements as specified by the students' advisory committee.

(3) Complete 30 semester hours of acceptable graduate level courses, including up to 3 credits of an Independent Study course. Supervised Research credits are not counted toward the 30 credit degree requirement.

(4) Optionally, complete an acceptable thesis (minimum six credits) or engineering project (minimum three credits).

(5) Successfully complete the 15 credit core courses defined for the student's chosen specialty area.

(6) Earn a minimum grade point average of 3.0 in all approved courses in the student's program of study.

(7) Complete CGN6939 Graduate Seminar.

(8) For students who chose the thesis option, they must get approval and written evaluation of the oral defense and written thesis by their thesis committee. The committee should have, at a minimum, three graduate faculty members, and each member must complete and sign the student evaluation.

(9) For students who chose the engineering project option, they must get approval and written evaluation of the oral defense and written engineering project by their project committee. The committee should have, at a minimum, three graduate faculty members, and each member must complete and sign the student evaluation.

(10) For students who chose the non-thesis and non-engineering project (all-course) option, they must present a 5-page written report (in the format of a journal article) and an oral presentation (in CGN6939 Graduate Seminar) of a selected topic that demonstrates substantial professional engineering knowledge and experience. The written report and oral presentation must be evaluated and the student evaluation forms must be completed and signed by two departmental graduate faculty members, at a minimum, and then used by the CGN6939 Graduate Seminar instructor to issue a P/F grade. The seminar will be scheduled and will be announced to students and faculty at least one week in advance in the last semester of the student's program.

Core Courses

In order to master real-life engineering problems, engineers need to have an education with core knowledge and related skills in their selected concentration. Upon enrollment, students must choose a degree program and concentration (for MS in Civil Engineering students) and satisfy the 15 credits of core course requirements as defined below in each concentration. A proposed program of study shall be developed by a student's academic advisor together with the student and approved by the Graduate Program Director. All MS in Civil Engineering students are strongly encouraged to take the Research Methods for Civil Engineers course - especially those who are pursuing the thesis option. Students are also required to register for CGN6939 Graduate Seminar at least once and are encouraged to take it each Fall and Spring.

Independent Study Course

A student may take up to a total of three credits of independent study, which will be letter graded. If a student needs a course that will not be offered during the student's course of study, special topics courses should be set up to meet the student's needs. There will be no limit on the number of special topics courses provided that the core course requirements are satisfied.

Grades and Credits

No course in which a grade below a 'C' is earned may be counted toward a Master of Science degree.

Transfer Credit

The student may receive permission to transfer up to a maximum of six credit hours of graduate credit earned from another institution or up to 12 credit hours of graduate credit earned as a non-degree seeking students at FIU after admitted into one of the graduate programs in the Civil and Environmental Engineering Department. Such credits are transferable provided that: (1) the course(s) were taken at the graduate level at an accredited college or university; (2)

grade(s) of ‘B’ or higher were earned for the courses; (3) the course(s) are judged relevant by the student’s advisory committee; (4) the credits were not used toward another degree; and (5) the credit(s) were completed within six years immediately preceding the awarding of the degree.

Credits are not transferable until the student has earned 12 credit hours in the graduate programs in the Department of Civil Engineering and Environmental Engineering.

Master of Science in Civil Engineering

Students pursuing a M.S. in Civil Engineering must choose one of the following five concentrations and complete a minimum of 15 core course credits, which focus on the knowledge and applications within the selected concentration:

--Water Resources Engineering

--Structural Engineering

--Construction Engineering

--Geotechnical Engineering

--Transportation Engineering

Major Requirements

There are no majors associated with this program.

Track, Specialization, Concentration, Area of Emphasis, or Other Curricular Offering Requirements

Water Resources Engineering

This field involves the analysis of qualitative and quantitative water issues and the search for integrated, innovative and sustainable solutions to problems in the surface, groundwater, and atmospheric water environments.

Students pursuing a M.S. in Civil Engineering with concentration in Water Resources Engineering will follow a program of study that includes 15 credit hours of core civil engineering coursework emphasizing advanced knowledge and applications in either hydrology, hydraulics or hydrosystems or their combination thereof. The students will also complete a three credit-hour independent study to enrich the area of sought expertise.

Water Resources Engineering Concentration

Type

Completion Requirement

Background Courses

Take one course (3 credits) among the following background courses:

Complete ANY of the following Courses:

- CWR5305 - Surface Hydrology
- CWR5125 - Groundwater Hydrology

Applied Courses

Take one among the following applied courses:

Complete ANY of the following Courses:

- CWR5235 - Open Channel Hydraulics
- CWR5535C - Advanced Modeling Applications in Water Resources Engineering
- CWR6236 - Engineering Sediment Transport

Additional Comments:

Students are required to take CGN6939 Graduate Seminar once and are strongly encouraged to attend it while registering in the program. Students may also include up to six credit hours from other civil engineering areas or related disciplines, as long as the subjects relevantly add to the student's water resources engineering knowledge.

Structural Engineering

Students pursuing a M.S. in Civil Engineering with concentration in Structural Engineering will take at least twelve (12) credit hours of elective courses in structural engineering relevant to their track. A maximum of six (6) credits taken outside of the Civil and Environmental Engineering Department to enhance knowledge from related disciplines can be applied, upon approval of the academic advisor (or major professor), to graduation requirements. Furthermore, it is advisable that students gain some expertise in numerical methods.

Structural Engineering Concentration

Type

Completion Requirement

Core Courses

Students in the Structural Engineering track are required to take at least six (6) credit hours of core course work as follows:

Fulfill ALL of the following requirements:

Design of Structures Core Courses

Earn at least 3 credits from the following:

- CES5325 - Design of Highway Bridges
- CES5606 - Advanced Structural Steel Design
- CES5715 - Prestressed Concrete Design
- CES5800 - Timber Design
- CES6706 - Advanced Reinforced Concrete Design

AND

Analysis of Structures Core Courses

Earn at least 3 credits from the following:

- CES5106 - Advanced Structural Analysis
- CES5587 - Topics in Wind Engineering
- CES6209 - Advanced Structural Dynamics in Civil Engineering
- EGM5421 - Structural Dynamics

Construction Engineering

Students pursuing a M.S. in Civil Engineering with concentration in Construction Engineering will follow a program of study that includes at least fifteen (15) credit hours of civil engineering coursework that focuses on knowledge and applications within Construction Engineering of civil and environmental engineering infrastructure. The students will also complete a three (3) credit hour independent study to enrich their graduate experience. Furthermore, it is advisable that students gain expertise in state-of-the-art computational methods in construction engineering.

Construction Engineering Concentration

Type

Completion Requirement

Construction Engineering Courses

Students in the Construction Engineering concentration are required to take at least six (6) credit hours of the required 15 credit core course work from the following:

Earn at least 6 credits from the following:

- CCE5035 - Construction Engineering Management
- CCE5036 - Advanced Project Planning for Civil Engineers
- CCE5405 - Advanced Heavy Construction Techniques

Geotechnical Engineering

Students pursuing a M.S. in Civil Engineering with concentration in Geotechnical Engineering will follow a program of study that includes at least fifteen (15) credit hours of civil engineering coursework that focuses on knowledge and applications to the Geotechnical Engineering of civil and environmental engineering infrastructure. The students will also complete a three (3) credit hour independent study to enrich their graduate experience. Furthermore, it is advisable that students gain expertise in state-of-the-art computational methods in construction engineering.

Geotechnical Engineering Concentration

Type

Completion Requirement

Geotechnical Engineering Courses

Students in the Geotechnical Engineering track are required to take at least six (6) credit hours of core course work from the following:

Earn at least 6 credits from the following:

- CEG5065 - Geotechnical Dynamics
- CEG6017 - Theoretical Geotechnical Mechanics
- CEG6105 - Advanced Foundations Engineering

Transportation Engineering

Transportation engineering is concerned with the planning, design, operation, and maintenance of the transportation infrastructure and systems.

Transportation Engineering Concentration

Type

Completion Requirement

Transportation Engineering Core Courses

A student who chooses to specialize in transportation engineering must complete a minimum of 15 credits in the core courses from the list below:

Earn at least 15 credits from the following:

- TTE5205 - Advanced Highway Capacity Analysis
- TTE5215 - Fundamentals of Traffic Engineering
- TTE5607 - Transportation Demand Analysis
- TTE5805 - Advanced Geometric Design of Highways
- TTE6257 - Traffic Control Systems Design
- TTE6506 - Mass Transit Planning
- CGN5320 - GIS Applications in Civil and Environmental Engineering

Students are also required to register for the zero-credit CGN6939 Graduate Seminar and are encouraged to participate in it each semester.

Other Curricular Offering: Combined BS in Civil Engineering to MS in Civil Engineering Accelerated Degree Pathway

A student admitted to the combined degree pathway will be considered to have undergraduate status until the student applies for graduation from their bachelor's degree program. Upon conferral of the bachelor's degree, the student will be granted graduate status and be eligible for graduate assistantships.

Students enrolled in the pathway may count up to nine credit hours of CEE graduate courses as credits for both the BS and MS degrees. The combined BS/MS pathway has been designed to be a continuous enrollment pathway. However, upon completion of all the requirements of the undergraduate program, students will receive their BS degrees. Students in this pathway have up to one year to complete the master's degree after receipt of the bachelor's degree. Students who fail to meet this one year post BS requirement or who elect to leave the combined pathway at any time and earn only the BS degree will have the same access requirements to regular graduate programs as any other student, but will not be able to use the nine credits in both the bachelor's and master's degrees.

For each of the graduate courses counted as credits for both BS and MS degree, a minimum grade of B is required. All double counted courses must be at 5000 level or higher. Students enrolled in the pathway may count up to nine credit hours of CEE graduate courses toward the elective engineering BS requirements as well as toward the MS degree. Only graduate courses with formal lectures can be counted for both degrees. The students are responsible for confirming the eligibility of each course with the Undergraduate Advisor.

Undergraduate students enrolled in the pathway are encouraged to seek employment with a department faculty to work as student assistants on sponsored research projects. The students will be eligible for graduate assistantships upon full admission into the graduate school.

CIVLEG:PHD - Doctor of Philosophy in Civil Engineering

Overview

Degree Offered
PHD - Doctor of Philosophy

Program Title
Civil Engineering

The Department of Civil and Environmental Engineering at FIU offers cutting-edge research and advanced studies leading to the PhD in Civil Engineering. The doctoral degree provides specialization to qualified students for the professional practice of or advanced academic research in civil engineering. The student is required to specialize in a defined area of civil engineering but may broaden knowledge through studies combining subject material from different areas of specialization and interdisciplinary related courses. Three main areas of concentration are currently available: 1) Structural, Construction, and Geotechnical Engineering; 2) Environmental and Water Resources Engineering; and 3) Transportation Engineering. A key component of the doctoral degree is the PhD dissertation and its defense. For more information, visit the College of Engineering and Computing website.

Requirements

Simple Requirements

Admissions Requirements

The minimum requirements for admission to the doctoral degree program in Civil Engineering are:

(1) Applicants having a Master’s degree in Civil Engineering or Environmental Engineering (the latter for those applicants seeking the environmental area of specialization only) from a U.S. institution must satisfy the following requirements for admission to the doctoral program:

(a) GPA of at least 3.3/4.0 in the master’s program

(b) Three letters of recommendation or recommendation forms provided by the department

(c) A statement of objectives in which, in addition to other information, the intended research area must be clearly stated. (see identification of Research Area)

(d) A resume containing contact information, education and employment history, practical and research experiences (including publications), skills and other pertinent information.

(2) Credentials of all other applicants including those with foreign degrees and those with B.S. degrees in disciplines other than Civil Engineering (or Environmental Engineering) will be examined by the Graduate Program Advisory Committee on a case by case basis. Additional credentials that will be considered include, but are not limited to, work experience, awards and recognitions, publications and presentations, and other professional experience.

(3) International graduate student applicants whose native language is not English are required to submit a score for the Test of English as a Foreign Language (TOEFL) or for the International English Language Testing System (IELTS). A total score of 80 on the iBT TOEFL or 6.5 overall on the IELTS is required.

(4) In addition to the departmental requirements, all students must satisfy the University's Admission and Graduate Policies and Procedures.

Program Requirements

Maximum Length of Study

The maximum length of study is seven years for students admitted with an acceptable B.S. degree and six years for students with an acceptable M.S. degree. For those students who have not completed their studies within these limits, the length of study may be extended on a yearly basis after petition by the student and approval by the student's supervisory committee. Any extension beyond nine years must be approved by the University Graduate School.

Identification of Research Area

There are currently three main areas of research or specialization: (1) Structural, Geotechnical, and Construction Engineering; (2) Environmental and Water Resources Engineering; and (3) Transportation Engineering. The student must contact the Department for a list of all faculty members, visit them, and be accepted by one professor to guide the dissertation research. If no such professor can be found, within 15 months of admission, the student will be dismissed from the Ph.D. program.

Course Requirement

The program will consist of at least 75 semester credit hours beyond the baccalaureate degree, 54 hours of which are course work and 15 hours dissertation. Applicants who have a Master's degree in Civil Engineering or Environmental Engineering (the latter for those applicants seeking the environmental area of specialization only) or a closely related engineering field from an accredited institution may be given a maximum of 30 transferred semester credit hours. In addition to the above requirements, the selection of courses must meet the following requirements for credits beyond the Master's degree:

(1) Minimum three credits in Mathematics or Statistics

(2) Minimum 18 core credits (see exception under Core Courses below) in the selected major area in Civil Engineering (or Environmental Engineering).

(3) Any deviation from requirements 1 and 2 above must be justified in writing and approved by the departmental Graduate Program Director.

(4) Complete CGN6939 Graduate Seminar – Graduate Seminar.

Additional engineering courses (3000 and 4000 level) may be required as deficiencies for students coming from other engineering and non-engineering majors.

All courses and dissertation topics must be approved by the student's dissertation committee. A proposed program of study shall be developed by a student's major professor together with the student and approved by the Graduate Program Director.

Core Courses

All Ph.D. students must satisfy the core course requirements defined for the MS degree programs, except those students who, upon admission, have completed an eligible and acceptable BS and MS degrees programs in Civil Engineering. A student may take other courses, preferably at the 6000-level and above, in the specialty as well as in other areas to meet the minimum 18 hours of departmental coursework requirement, as approved by the major professor and the dissertation committee, provided all the core courses have been completed previously during the MS program or will be completed in the Ph.D. program. In addition, all doctoral students are required to take the Research Methods for Civil Engineers courses before or during the first semester of dissertation credits. Students are also required to register for the 0-credit Graduate Seminar (CGN6939 Graduate Seminar) at least once and are encouraged to take it each Fall and Spring semesters.

Directed Independent Study Course (CGN6905 Dir Ind Study)

A student may take up to a total of three credits of directed independent study, which will be letter graded. If a student needs a course that will not be offered during the student's course of study, special topics in civil engineering courses should be set up to meet the student's needs. There will be no limit on the number of special topics courses provided that the core course requirements are satisfied.

Dissertation Committee

The student's dissertation committee should be appointed as soon as possible and within the 15-month period after the student has been admitted to the Ph.D. program. The committee must have a minimum of four eligible faculty members, at least three from the Department of Civil & Environmental Engineering, and at least one from outside the department, but within FIU. All committee members should have a Ph.D. degree and must be members of the graduate faculty. The major professor must hold dissertation advisor status. The dissertation committee should meet as early as possible to review student's background, discuss student's expected research areas, provide guidance on course selection, etc.

Residency Requirements

The Ph.D. student should spend at least one academic year in full residency, after successfully passing his/her Comprehensive Examination (see the following description).

Examinations

A student must successfully complete the following written exam and oral defenses in partial fulfillment of requirements for the Ph.D. degree in Civil Engineering:

(1) Qualifying Exam: The Qualifying Exam must be taken as soon as possible and no later than the semester the student completes the minimum applicable course requirements. The exam consists of a 2-hour oral examination by the dissertation committee on topics related to the student's dissertation or relevant core courses. In the event that a student fails the exam, he or she can retake it only once in the subsequent semester.

(2) Proposal Defense: The proposal defense must be completed at least one year prior to the expected graduation date. The student must prepare a detailed proposal that contains, at a minimum, background information, problem statement, objectives, literature review, methodology, work plan, and schedule. The proposal must be submitted to each committee member at least two weeks prior to the defense date. The defense will be given in the form of a graduate seminar that is open to all faculty, students, and visitors. A student can take the proposal defense twice. In addition the student needs to follow the University Graduate School dissertation proposal submission requirements.

(3) Dissertation Defense: A draft dissertation must be submitted to each committee member at least six weeks prior to the date of the defense. The defense will be given in the form of a graduate seminar that is open to all faculty, students, and visitors. A student can fail this defense only once. Students should become familiar with the University Graduate School's policies, procedures, regulations and deadlines available on line at http://gradschool.fiu.edu.

MS en Route for PhD Candidates

Doctoral candidates who have completed the requirements for the Master of Science degree in Civil Engineering or Environmental Engineering and have filed the D-2 and D-3 forms that have been accepted by the University Graduate School will receive a Master of Science en route to the PhD in Civil Engineering or Environmental Engineering, respectively. Courses to be counted in the MS en route must have been taken at FIU.

Transfer credits cannot be used for MS en route. Students must consult their Graduate Programs Director to ensure they qualify.

Major Requirements

There are no majors associated with this program.

Track, Specialization, Concentration, Area of Emphasis, or Other Curricular Offering Requirements

There are no tracks, specializations, concentrations, areas of emphasis, or other curricular offerings associated with this program.

CNSLED:MS - Master of Science in Counselor Education

Overview

Degree Offered
MS - Master of Science

Program Title
Master of Science in Counselor Education

The Master of Science (MS) in Counselor Education offers three majors, each accredited by the Council for Accreditation of Counseling and Related Educational Programs (CACREP). The program prepares students to become competent clinical mental health, school, or rehabilitation counselors positioned to significantly impact diverse individuals in a variety of settings (e.g., hospital, agencies, private practice). The program provides both educational experiences that emphasize multiculturalism in practice and theory, as well as opportunities for professional and personal growth. The program aims to produce ethical and responsible counselors who support others in achieving positive personal change.

For more information, visit the College of Arts, Sciences, and Education website.

CIP Code
13.1101

Requirements

Simple Requirements

Admissions Requirements

Admissions Requirements for the Master of Science (MS) in Counselor Education

Applicants are required to submit an on-line application to the Office of Graduate Admissions. All applicants must submit the following:

(1) Official transcripts

(2) Three (3) letters of recommendation (at least one from academic sources and one from work or volunteer experience),

(3) An autobiographical statement

(4) Curriculum Vitae (resume).

After initial review of application materials, candidates will be invited to participate in interview activities on a day coordinated by the Counselor Education program. Candidates are admitted by recommendation of the program's Graduate Admissions Committee. Minimum criteria for program acceptance include an undergraduate 3.0 GPA for the Rehabilitation Counseling track and 3.2 GPA for the Clinical Mental Health and School Counseling tracks.

Applicants with a completed master's degree or higher, who do not meet the undergraduate GPA requirement, will have their graduate GPA considered as long as it is a GPA of 3.2 or higher. This is a full-time cohort-based program. As such, candidates are admitted to either a Fall and Spring cohort and complete coursework together within their respective cohort. The application deadline for Fall admissions takes place in March, while the application deadline for Spring admissions takes place in October.

All stated admission requirements are to be considered minimal. A student who meets these minimal requirements is not automatically assured admission. Program admission requirements are subject to change. It is the responsibility of the student to assure that he/she has met the requirements. Allow 6-8 weeks for applications to be processed by the Graduate Admissions Office.

Transfer Credits

Students may request to transfer six credits earned at another institution accredited by the Council for Accreditation of Counseling and Related Educational Programs (CACREP) into the program provided the coursework was completed within a three year time period and meets university's requirements. Students must complete this process with their advisor during the first semester in the program.

Additional Degree Requirements

Once admitted, each student is responsible for tracking academic progress throughout the program, and a degree can be revoked if academic dishonesty or fraudulence is discovered. Students are allowed a maximum of six (6) years from the date of initial enrollment to complete program requirements.

Given the unique nature of the field of counseling requiring mastery of cognitive skills and demonstration of relevant and appropriate interpersonal skills, the faculty retains the right to "counsel out" of the program and/or not recommend for internship placement any student whose level of interpersonal competence is considered incompatible with that required for effective functioning as a practitioner in counseling.

Program Requirements

See Major Requirements for details.

Major Requirements

The MS in Counselor Education Majors prepare individuals for professional counseling positions in schools, community mental health settings, and rehabilitation agencies and institutions. These programs emphasize the blending of research and theory with practical applied experience. They also emphasize and reflect the urban and multicultural nature of our community, as well as general trends within specified fields. All programs involve intensive field work with accompanying seminars.

Students can select one of three majors; School Counseling (60 credits), Clinical Mental Health Counseling (60 credits), or Rehabilitation Counseling (60 credits). The early part of each major focuses on the development of knowledge and skills in the areas of individual and group counseling, consultation, preventive mental health, education-vocational development, client appraisal, systems intervention, and program organization and evaluation. The latter part of each major is more differentiated towards the practice of school counseling, mental health counseling, or rehabilitation counseling. A substantial amount of time is spent in field work to meet practicum and internship requirements, as such, the student should plan for this field work to be during the day rather than during evening hours. Because internship experiences require full-time work in the field, students are advised that full-time employment is not compatible with successful completion of the program.

The Master of Science in Counselor Education, School Counseling Major is accredited by the Council for the Accreditation of Counseling and Related Education Programs (CACREP) and is approved by the Florida Department of Education, which allows students completing the program to be eligible for certification in Guidance and Counseling. The Master of Science in Counselor Education, Clinical Mental Health Counseling Major is accredited by the Council for the Accreditation of Counseling and Related Education Programs (CACREP) and meets all requirements as outlined by the Florida Department of Medical Quality Assurance for licensure as a Mental Health Counselor. The Master of Science in Counselor Education, Rehabilitation Counseling Major is accredited by the Council for the Accreditation of Counseling and Related Education Programs (CACREP) and prepares students for certification in Rehabilitation Counseling.

School Counseling Major: 60 credits

Type

Completion Requirement

Counselor Education Core Courses: 27 credits

All students entering the School Counseling program with an undergraduate degree in an area other than education must enroll for courses in general professional education as required by the Florida Department of Education in order to meet state certification requirements in Florida.

Complete ALL of the following Courses:

- EDP6277 - Human Development: Across the Life Span
- MHS5340 - Educational-Vocational Counseling
- MHS5400 - Counseling Skills and Techniques
- MHS6200 - Measurement and Appraisal in Counseling
- MHS6428 - Counseling Approaches Across Populations
- MHS6511 - Group Counseling
- MHS6630 - Program Evaluation and Research in Counseling & School Psychology
- MHS6700 - Ethical, Legal and Professional Issues in Counseling
- MHS6802 - Personality Theories

Specialization Courses: 21 credits

Complete ALL of the following Courses:

- EDF6211 - Psychological Foundations of Education
- MHS6450C - Substance Abuse Counseling
- SDS5420 - Counseling Students with Exceptionalities
- SDS5460 - Crisis Intervention in the Schools
- SDS6411 - Counseling Children and Adolescents
- SDS6700 - Organization and Administration of School Counseling
- SPS6199 - Family-School Consultation and Collaboration

Clinical Experience Courses: 12 credits

Complete ALL of the following Courses:

- SDS6800 - Advanced Practicum in Counseling
- SDS6820 - Supervised Field Experience in Counselor Education

Application for clinical experiences for school counseling must have faculty advisor approval and be submitted to the coordinator of school counseling by March 15 for a fall placement or by October 15 for a spring placement.

Corequisites

Students who do not hold a Florida Teacher's Certificate (or have not taken these courses as an undergraduate student) must complete additional credits of professional education courses in classroom management and general methods of teaching, TESOL, and reading. One course in each of the following subject areas must be completed prior to the awarding of the school counseling degree.

Fulfill ALL of the following requirements:

Classroom Management and General Methods of Teaching

Complete ALL of the following Courses:

- EDG5414 - Teaching Environments: Instructional Strategies and Classroom Management

AND

TESOL

Complete ALL of the following Courses:

- TSL5361C - TESOL for Secondary Teachers

AND

Reading

Complete at least 1 of the following courses:

- RED4325 - Subject Area Reading
- RED5339 - Subject - Related Reading

Graduation Requirements

Students entering this program on or after Fall 2001 must have an overall GPA of 3.0 and successfully demonstrate satisfactorily all Florida Educator Accomplished Practices. Students who hold a Florida teacher certificate received prior to July 1, 2002 are required to pass only the subject area exam in school counseling. Students who do not hold a valid Florida certificate are required to pass the Professional Education Exam and Subject Area Exam in School Counseling.

Additional Comments:

Students should seek academic advisement from the School Counseling Coordinator on enrollment in professional education courses.

Note: This program of study is subject to change at any time.

Clinical Mental Health Counseling Major: 60 credits

Type

Completion Requirement

Prerequisite Psychology Courses: 9 credits

Students applying to the Clinical Mental Health Counseling program without a bachelor's degree in psychology (or a related field) are required to successfully complete 9 credits of prerequisite psychology courses prior to acceptance. The student should consult with an advisor with reference to these courses. Required prerequisite courses include:

Complete ALL of the following Courses:

- PSY2012 - Introductory Psychology
- EDP3004 - Educational Psychology
  OR CLP4146 - Psychopathology
  OR PPE3003 - Theories of Personality
- STA2122 - Introduction to Applied Statistics (Inactive)

NOTE: The above prerequisite courses are those used at FIU. All prerequisite courses must be completed with a minimum grade of “C” or higher and a cumulative grade point average of 3.0 or higher for all courses taken.

Counselor Education Core Courses: 27 credits

Complete ALL of the following Courses:

- EDP6277 - Human Development: Across the Life Span
- MHS5340 - Educational-Vocational Counseling
- MHS5400 - Counseling Skills and Techniques
- MHS6428 - Counseling Approaches Across Populations
- MHS6511 - Group Counseling
- MHS6630 - Program Evaluation and Research in Counseling & School Psychology
- MHS6700 - Ethical, Legal and Professional Issues in Counseling
- MHS6802 - Personality Theories

Specialization Courses: 21 credits

Complete ALL of the following Courses:

- MHS6020 - Foundations of Mental Health Counseling
- MHS6411 - Counseling and Consultation in Community Settings
- MHS6427 - Adult Psychopathology
- MHS6470 - Human Sexuality Counseling
- MHS6450C - Substance Abuse Counseling
- SDS5460 - Crisis Intervention in the Schools
- SDS6411 - Counseling Children and Adolescents

Clinical Experience Courses: 12 credits

Application for clinical experiences for mental health counseling must have faculty advisor approval and be submitted to the clinical director of counselor education programs by June 15 for a fall placement, by October 1 for a spring placement, or by March 1 for a summer placement.

Complete ALL of the following Courses:

- MHS6800 - Advanced Practicum in Counseling
- MHS6820 - Supervised Field Experience in Counseling

Graduation Requirements

Students in the Clinical Mental Health Counseling program are required to take and pass all sections of the

National Board of Certified Counselors, Counseling Preparation Competency Exam (CPCE). The CPCE is a requirement for graduation and is designed to assess counseling students' knowledge of counseling information viewed as important by counselor preparation programs. In the Clinical Mental Health Counseling program, it is used by the faculty as a capstone experience to be completed by students prior to completing their practicum and before embarking on the internship experience.

Additional Comments:

Note: This program of study is subject to change at any time.

Rehabilitation Counseling Major: 60 credits

Type

Completion Requirement

Counselor Education Core Courses: 27 credits

Complete ALL of the following Courses:

- EDP6277 - Human Development: Across the Life Span
- MHS5340 - Educational-Vocational Counseling
- MHS5400 - Counseling Skills and Techniques
- MHS6700 - Ethical, Legal and Professional Issues in Counseling
- MHS6802 - Personality Theories
- MHS6428 - Counseling Approaches Across Populations
- MHS6511 - Group Counseling
- MHS6630 - Program Evaluation and Research in Counseling & School Psychology
- MHS6200 - Measurement and Appraisal in Counseling

Specialization Courses: 21 credits

Complete ALL of the following Courses:

- MHS6411 - Counseling and Consultation in Community Settings
- MHS6427 - Adult Psychopathology
- MHS6450C - Substance Abuse Counseling
- RCS6031 - Rehabilitation Counseling: Principles and Practices
- RCS6080 - Medical Aspects of Disability
- RCS6245 - Psychological/Sociological Aspects of Disability
- RCS6625 - Service Delivery and Case Management in Rehabilitation Counseling

Clinical Experience Courses: 12 credits

Application for clinical experiences for rehabilitation counseling must have faculty advisor approval and be submitted to the clinical director of counselor education programs by June 15 for a fall placement, by October 1 for a spring placement, or by March 1 for a Summer placement.

Complete ALL of the following Courses:

- RCS6801 - Advanced Practicum in Counseling and Consultation
- RCS6821 - Supervised Field Experience in Counseling and Consultation

Graduation Requirements

Students in the Rehabilitation Counseling program are required to take and pass the Certified Rehabilitation

Counseling examination (CRCE). The CRCE is a requirement for graduation and is designed to assess rehabilitation counseling students' knowledge of information viewed as important by rehabilitation counselor preparation programs. This exam provides a national professional credential for students as well as helps the Counselor Education program meet accreditation program evaluation needs.

Additional Comments:

Note: This program of study is subject to change at any time.

Track, Specialization, Concentration, Area of Emphasis, or Other Curricular Offering Requirements

There are no track, specialization, concentration, area of emphasis, or other curricular offerings associated with this program.

COGNSC:MS - Master of Science in Cognitive Neuroscience

Overview

Degree Offered
MS - Master of Science

Program Title
Cognitive Neuroscience

This program trains students to become experts in the study of the neuroscience of cognition and behavior. The primary goal of the program is to equip students with the skills necessary to function as academic and/or research scientists. The program provides a rigorous, broad-based graduate education with an emphasis on topic-specific skills in neuroscience research methodology and data analysis; cognitive, developmental, and behavioral neuroscience; learning and memory; and neuropsychological disorders, combined with broader STEM-related skills.

For more information, visit the College of Arts, Sciences, and Education website.

Requirements

Simple Requirements

Admissions Requirements

Students will apply and be admitted directly to the doctoral program in Cognitive Neuroscience based on the following criteria (applications will not be accepted and students will not be admitted for a terminal M.S. degree):

To be admitted into the Cognitive Neuroscience doctoral program, a student must:

(1) Hold a Bachelor’s degree in a relevant discipline from an accredited college or university.

(2) Have a 3.0 average or higher during the last two years of the undergraduate program.

(3) Have completed an undergraduate or graduate research methods course as a prerequisite.

(4) Arrange to have three letters of recommendation evaluating the applicant’s potential for graduate work sent to the Psychology Graduate Program Director.

(5) Send a brief essay stating reasons for interest in the program and career goals to the Psychology Graduate Secretary.

(6) Receive approval from the Departmental Graduate Education Committee.

(7) International graduate student applicants whose native language is not English are required to submit a score for the Test of English as a Foreign Language (TOEFL) or for the International English Language Testing System (IELTS). A total score of 92 on the iBT TOEFL (equivalent to 580 in the TOEFL) is required.

These are minimum requirements. Admission is competitive.

Program Requirements

Degree Requirements

The M.S. in Cognitive Neuroscience requires a minimum of 36 semester credits of graduate work beyond the baccalaureate, including a master's project based upon the student's original research. A maximum of 6 credits of post-baccalaureate course work may be transferred from another institution with the approval of the program director. M.S. in Cognitive Neuroscience students are required to complete the following minimum requirements. The remaining credits to complete the post-baccalaureate 36-credit requirement can be drawn from supervised research, directed individual study, electives, or PSB5938 CurrTopicsNeurosci. The remaining credits to complete the post-baccalaureate 36-credit requirement can be drawn from supervised research, directed individual study, electives, PSB6948 CogNeuro Internship, or PSB5938 CurrTopicsNeurosci

Program Credit Hours: 36

Type

Completion Requirement

Common core courses in Statistics/Methodology: 9 credits

Students must take all three of the following 3-credit courses or a course approved by the program director:

Earn at least 9 credits from the following:

- PSY5939 - Special Topics in Psychology
- PSY5939 - Special Topics in Psychology
- PSY5246C - Multivariate Analysis in Applied Psychological Research

PSY5939 Spec Topics In Psy must be taken twice in Quantitative Methods I and Quantitative Methods II

Cognitive Neuroscience (CN) Content Courses: Minimum 6 credits

Students must take 2 courses drawn from the following 3-credit courses or a course approved by the program director:

Earn at least 6 credits from the following:

- DEP5058 - Biological Basis of Behavior Development
- EXP5667 - Cognitive Neuroscience
- PSB6247 - Biological Bases of Behavior
- PSB6215 - Human Neuroanatomy
- CLP6426 - Neuropsychology
- PSB6351 - Cognitive Neuroimaging Methods
- PSB5115 - Introduction to Psychophysiology: Basics of Electroencephalography and Event-Related Potentials
- PSB6035 - Introduction to Computational Cognitive Neuroscience
- PSB5247 - Neurobiology of Learning and Memory
- PSB5615 - Visual & Visuospatial Cognitive Neuroscience

- DEP5608 - Theoretical Perspectives in Developmental Psychology
- PSY5605 - Proseminar: History and Systems of Psychology
- DEP5099 - Pro-seminar in Infancy, Childhood, and Adolescence
- DEP5065 - Cognitive Development

Electives: Minimum 3 credits

Minimum 3 credits approved by the program director. Students may choose electives from the list of content courses provided above or identify electives outside of the department based on their research interest.

Earn at least 3 credits

Current Topics: Variable Credits

Students must take PSB5938 CurrTopicsNeurosci every Fall and Spring while enrolled in the Doctoral Program.

Complete course(s) and earn credits from the following:

- PSB5938 - Current Topics in Neuroscience Series

Master's Project

Earn at least 6 credits from the following:

- PSY5918 - Supervised Research

Major Requirements

There are no majors associated with this program.

Track, Specialization, Concentration, Area of Emphasis, or Other Curricular Offering Requirements

There are no tracks, specializations, concentrations, areas of emphasis, or other curricular offerings associated with this program.

COMMART:BA - Bachelor of Arts in Communication Arts

Overview

Degree Offered
BA - Bachelor of Arts

Program Title
Communication Arts

In today's global environment, effective communication skills have a significant impact on career success. The Bachelor of Arts (BA) in Communication Arts is an in-demand degree for those interested in pursuing careers as directors of communication in business, government, non-profit organizations, or the arts. With three majors, the degree combines a strong foundation of writing and speaking courses with practical experience for those interested in entering the communication field. Students choose from Organizational Communication, Art + Performance, and Design Studies to develop their communication skills.

For more information, visit the College of Communication, Architecture, and the Arts website.

Requirements

Simple Requirements

Admissions Requirements

Admission Standards

(1) Minimum GPA of 2.0 for all lower-division courses and upper-division non-Communication Arts courses (including transfer coursework).

(2) Minimum GPA of 2.0 for ALL FIU courses.

Program Requirements

Academic Progression Requirements

Students are admitted directly to their chosen major at the University. Students are expected to make good progress based on critical indicators that include course completion and GPA requirements. In cases where students are not making successful progress, a change of major may be required. Academic advisors work with students to identify an appropriate major where a student will be successful in completing an undergraduate degree.

Lower-Division Preparation

Type
Prerequisite

Common Prerequisite Courses

For a list of all state-approved common prerequisites, including alternatives, visit https://cpm.flvc.org.

Complete ALL of the following Courses:

- SPC2608 - Public Speaking

Degree Program Credit Hours: 120 (Minimum)

Type
Completion Requirement

Core Courses: 15 Credits

Complete ALL of the following Courses:

- COM1921 - Communication Arts Orientation
- COM3120 - Organizational Communication
- COM3461 - Intercultural Communication
- COM4310 - Research Methods in Communication
- SPC3210 - Communication Theory
- SPC3602 - Advanced Public Speaking

**(COM3120 Organizational Comm required for Organizational Communication Studies and Media & Design)*

**(SPC3602 Adv Public Speaking required for Organizational Communication Studies and Art & Performance Studies; Alternative for Media & Design)*

Foundational Requirements:

Minimum of 15 credits from the list below, including the 2 required courses

Complete at least 5 of the following courses:

- COM4346 - Interviewing Principles and Practices
- SPC3425 - Small Group Communication
- COM3110 - Business and Professional Communication
- COM3230 - Crisis Communication
- COM3404 - Nonverbal Communication
- COM3471 - Social Media's Impact on Communication
- COM4430 - International Business Communication
- COM4462 - Conflict Management
- SPC3301 - Interpersonal Communication
- SPC3540 - Persuasion
- SPC3711 - Gender and Communication
- SPC4445 - Communication for Effective Leadership

**COM4346 Interviewing and SPC3425 Small Group Comm are required.*

Skills (S) courses: COM4346 Interviewing, SPC3425 Small Group Comm.

Graduation Requirements

(1) Students need a minimum of 120 credit hours to be eligible for a bachelor's degree.

(2) Students must have at least a 2.0 FIU grade point average to be eligible for graduation.

(3) A grade of "C" or higher is required in all courses in the degree.

Honor Society Requirements – Lambda Pi Eta

(1) At least 60 hours of college credit.

(2) At least 12 hours in Communication Arts.

(3) An overall GPA of at least a 3.2 or above.

(4) A GPA of 3.5 in Communication Arts courses

Major Requirements

Organizational Communication Studies Major Credit Hours: 42

Type

Completion Requirement

Required Courses

The Organizational major includes 15 credits of Core Courses and 15 credits of Foundational Requirements listed in the Program Requirements section; and a minimum additional 12 credits selected from any course listed below or in Program Requirements, if not used as a Foundational Course.

Fulfill ANY of the following requirements:

Course Options:

Complete ANY of the following Courses:

- COM2417 - Communication in Film
- COM3601 - Environmental Communication
- COM4022 - Health Communication
- COM4510 - Political Communication
- COM4620 - Ethical Communication
- COM4900 - Directed Independent Studies in Communication Arts
- COM4930 - Special Topics in Communication Arts
- COM4940 - Internship in Communication Arts
- IDS3336 - Artistic Expression in a Global Society
- SPC2237 - Rhetorical Communication: A Theory of Civil Discourse
- SPC2270 - Rhetoric and Public Address
- SPC3513 - Argumentation and Debate

*Theory (T) courses: COM2417 Com in Film, COM3601 Environmental Communication, COM4022 Health Communication, COM4510 Political Communication, COM4620 Ethical Communication, IDS3336 Artistic Expression (*if not taken as a core course*), SPC2237 Rhetorical Communication, SPC2270 Rhetoric and Public Address*

Skills (S) courses: COM4940 Internship in Comm Arts, SPC3513 Argumentation

OR

Study Abroad Course Options:

Complete ALL of the following Courses:

- COM3410 - Cultural Communication Patterns of Asia

OR

Other Course Options:

Up to 12 credits from the College of Business or Industrial Psychology.

Art & Performance Studies Major Credit Hours: 36

Type

Completion Requirement

Required Courses

Fulfill ALL of the following requirements:

Major Core Courses: 15 Credits

Complete ALL of the following Courses:

- COM1921 - Communication Arts Orientation
- COM3461 - Intercultural Communication
- COM4310 - Research Methods in Communication
- SPC3210 - Communication Theory
- SPC3602 - Advanced Public Speaking
- IDS3336 - Artistic Expression in a Global Society

AND

Foundational Requirements:

Minimum of 21 credits from the list below, including at least 1 skills course (S) and one theory course (T)

Fulfill ANY of the following requirements:

Course Options:

Complete ANY of the following Courses:

- COM3110 - Business and Professional Communication
- COM3120 - Organizational Communication
- COM3230 - Crisis Communication
- COM3404 - Nonverbal Communication
- COM2417 - Communication in Film
- COM3471 - Social Media's Impact on Communication
- COM3601 - Environmental Communication
- COM4022 - Health Communication

- COM4346 - Interviewing Principles and Practices
- COM4430 - International Business Communication

COMMD:CFI - Graduate Certificate in Nonprofit and Community Development

Overview

Degree Offered
ACRT - Academic Certificate

Program Title
Graduate Certificate in Nonprofit and Community Development

The Graduate Certificate in Nonprofit and Community Development is intended to provide critical tools and analytic frameworks useful to local decision-makers responsible for developing and managing sustainable, high-wage communities in an increasingly competitive world economy. Course material will address the critical drivers of local and regional development in the context of South Florida's "gateway" status for commerce and immigration. Content will address spatial, managerial, and social components of development.

For more information, visit the Steven J. Green School of International and Public Affairs website.

Program Length in Years Based on Full-Time Enrollment
1

CIP Code
44.0401

Requirements

Simple Requirements

Admissions Requirements

Applicants must be actively enrolled in an FIU graduate-degree program and must be in good academic standing (i.e., must have an overall GPA of at least 3.0). This certificate is open to degree-seeking students only.

Prerequisites

Contact advisor for information about any prerequisites.

Program Requirements

Program Credit Hours: 15

Type
Completion Requirement

Required Courses: 9 credits

Complete ALL of the following Courses:

- PAD6142 - Management of Nonprofit Organizations
- PAD5805 - Economic Development and Urban Revitalization
- PAD6209 - Financial Management in Public and Nonprofit Organizations

Electives: 6 credits

Certificate students who are not also MPA students must take PAD6907 Independent Study In as a certificate capstone. If they do, they will only have to take one additional elective course (3 credits).

Complete at least 2 of the following courses:

- PAD5043 - Equitable and Inclusive Governance
- PAD5443 - The Public Administrator and Media Relations
- PAD5616 - Contracting and Managing Third Party Governments
- PAD6038 - Policy Formulation and Legitimation (Inactive)
- PAD6156 - Applied Organization Theory and Behavior
- PAD6366 - Policy and Program Implementation
- PAD6436 - Professionalism and Ethics
- PAD6437 - Dynamics of Individual Growth
- PAD6807 - Urban and Municipal Government Administration
- PAD6836 - International Public Administration
- PAD6946 - Public Administration Internship
- PAD5934 - Contemporary Issues in Public Administration
- URP5426 - Emergency Management and Planning
- URP6315 - Introduction to Urban Planning and Growth Management

Students may take up to two electives outside the department. These electives must be selected from a list of approved electives or must be approved by the certificate co-chairs.

Note: Depending on the topic of the course and pending MPA program approval, PAD5934 Contemp Issues Pad may be counted as a certificate elective.

Major Requirements

There are no majors associated with this program.

Track, Specialization, Concentration, Area of Emphasis, or Other Curricular Offering Requirements

There are no tracks, specializations, concentrations, areas pf emphasis, and other curricular offerings associated with this program.

COMPEG:BS - Bachelor of Science in Computer Engineering

Overview

Degree Offered
BS - Bachelor of Science

Program Title
Computer Engineering

The Bachelor of Science (BS) in Computer Engineering at FIU is accredited by the Accreditation Board for Engineering and Technology (ABET). Computer engineers serve as the architects of both hardware and software systems. Our curriculum places a strong emphasis on cutting-edge developments in computing systems, from quantum-level advancements to the implementation of large-scale infrastructure for servers, cloud computing, and artificial intelligence, autonomous smart systems, among other pioneering areas of computer engineering. Through our program, students learn engineering concepts and design principles tailored to the dynamic and expanding field of computer engineering, covering both hardware and software solutions. Whether one's goal is to enter industry, entrepreneurship, or pursue advanced studies in computer engineering, our bachelor’s degree equips students for success.

For more information, visit the College of Engineering and Computing website.

Requirements

Simple Requirements

Admissions Requirements

Admissions Requirements for the Bachelor of Science (BS) in Computer Engineering

See general university admissions requirements at admissions.fiu.edu.

Admissions Requirements for the Combined BS in Computer Engineering to Master of Science (MS) in Computer Engineering Accelerated Degree Pathway

To be considered for admission to the combined bachelor's/master's degree pathway, students must have completed at least 75 credits required for the bachelor's degree program at FIU, have earned at least a 3.2 GPA on both overall and upper-division courses, and meet the admissions criteria for the graduate degree program to which they are applying. Students need only apply once to the combined degree pathway; the application is submitted to Graduate Admissions typically before the student starts the last 30 credits of the bachelor's degree program.

Admissions Requirements to the Combined BS in Computer Engineering to MS in Engineering Management (BSCpE/MSEM) Accelerated Degree Pathway

Students, who are pursuing a Bachelor of Science degree in Computer Engineering and have completed at least 75 credits with a minimum of a 3.2 overall GPA on both lower and upper division courses may, upon recommendation from three ECE faculty members, apply to enroll in the combined BSCpE/MSEM pathway. Students need only apply once to the combined degree pathway; the application is submitted to Graduate Admissions typically before the student starts the last 30 credits of the bachelor's degree program. In addition to the admission requirements of the MSEM program, students must meet all the admission requirements of the University Graduate School.

Students interested in the combined pathway should consult with their undergraduate advisor on their eligibility to the pathway. The student should also meet the MSEM Program Director to learn about the graduate program and available tracks/courses before completing the application form and submitting it to their undergraduate advisor. Final decision for admission to the MSEM program will be made by the University Graduate School upon recommendation by the Engineering Management program director. Applicants will be notified by the Engineering Management Program and the University Graduate School of the decision on their applications.

Program Requirements

CEC Academic Progression Standard

Steady academic progression is expected by the College of Engineering and Computing. Students who are unsuccessful in passing common pre-requisites after two attempts will be advised to change their major into an area where they can be successful. Drops after the add/drop period, which result in a DR grade, are considered an attempt in the course and count as an unsuccessful enrollment.

Students must also meet the Math Progression standard of successfully completing Calculus 1 within three academic terms, not counting summers.

Students will be redirected to a different degree program when completion of the progression standards, including the applicable math progression standard by its stated semester, is no longer feasible.

Students applying to Computer Engineering should have good communication skills in English (verbal and written) and exhibit logical thinking, creativity, imagination, and persistence. They should have proven academic background in mathematics, chemistry, and physics. First time in college at FIU and eligible to enroll in Calculus I can declare Computer Engineering as a major. All others will be admitted to Computer Engineering after successfully registering for Calculus II. Missing courses may be taken at FIU, with advisor approval.

At the undergraduate level, the basic required program of instruction in fundamental theory and laboratory practice is balanced by a broad range of electives in such fields as bioengineering, communication systems, control systems, energy and power. Students, with the counsel and guidance of faculty advisers, design their electives program around their own special interests and career objectives. Students are allowed to take ECE electives when they complete the University core and start taking degree core. Students must choose elective classes from an approved concentration list. Students may choose any class from any concentration as long as they fulfill the prerequisite(s) and corequisite(s). Students are required to choose at least two concentrations, at least nine credits from each of these two concentrations.

Any course taken without the required prerequisites and corequisites will be automatically dropped before the end of the term, resulting in a grade of "DR" or "DF". The student will not be eligible for a refund.

Students must earn a minimum grade of "C" and a minimum GPA of 2.0 in all EEE, EEL, and elective courses required for graduation.

Students, who have been dismissed for the first time from the University due to low grades, may appeal to the department for reinstatement. A second dismissal results in no possibility of reinstatement.

Students are required to take SPC2608 Public Speaking (for Engineers) or an equivalent Public Speaking course.

Lower-Division Preparation

Lower-division requirements include at least 50 credit hours of pre-engineering courses. These courses include common prerequisite courses, 2 semesters of English composition and 2 other Writing Intensive Requirement (WIR) courses. A minimum grade of “C” is required in all writing courses, all calculus courses, differential equations, both physics classes, and chemistry. In addition, both transfer students and FIU freshman must take a combination of social sciences and humanities that fulfill the FIU University Core Curriculum requirements and those topics also complement the goals and objectives of the College of Engineering and Computing (including economic, environmental, political, and/or social issues).

In addition, students may transfer a pre-approved engineering Statics course if it meets the proper prerequisites for the course (speak to an FIU engineering advisor to see if your college offers an acceptable statics course). Students must make up any missing prerequisites before they are allowed to begin taking certain engineering courses.

Lower Division Preparation

Type

Prerequisite

Common Prerequisite Courses

For a list of all state-approved common prerequisites, including alternatives, visit https://cpm.flvc.org.

Complete ALL of the following Courses:

- CHM1045 - General Chemistry I
  AND CHM1045L - General Chemistry Lab I
- MAC2281 - Calculus I for Engineering
- MAC2282 - Calculus II for Engineering
- MAC2283 - Calculus III for Engineering
- MAP2302 - Differential Equations
- PHY2048 - Physics with Calculus I
- PHY2049 - Physics with Calculus II
  AND PHY2049L - General Physics Laboratory II

PHY2048L General Phys Lab I is not a requirement for this program.

Additional lower-division courses required:

Complete ALL of the following Courses:

- EEL2880 - C Programming for Embedded Systems
- MAD2104 - Discrete Mathematics
  OR COT3100 - Discrete Structures

MAD2104 Discrete Mathematics *or equivalent fulfilling Discrete Mathematics requirements*

Upper Division

Type
Completion Requirement

Engineering Breadth and Elective: 11-12 credits

Complete ALL of the following Courses:

- EGN1002 - Engineering Orientation
  OR EEE1760 - Introduction to Embedded Computing
  OR EEL1603 - Introduction to Robotic Systems, Instrumentation, and Control for Electrical and Computer Engineers
- ESI3215 - Evaluation of Engineering Data I
- EGN3613 - Engineering Economy
- CAI4841 - Introduction to Computer Vision
  OR CNT4153 - Machine Learning in ECE

ECE Core: 21 credits

Complete ALL of the following Courses:

- EEL2880 - C Programming for Embedded Systems
- EEL3110C - Circuit Analysis and Lab
- EEL3120 - Introduction to Linear Systems in Engineering
- EEL3135 - Signals And Systems
- EEL3712 - Logic Design I
  AND EEL3712L - Logic Design I Lab
- EEL4920 - Senior Design I: Ethics, Communications, and Constraints
- EEL4921C - Senior Design II: Project Implementation

EEL4920 Senior Design I and EEL4921C Senior Design II are intended to be taken in the last 2 semesters of the undergraduate experience. Students are required to complete at least 100 credits, other ECE core courses, and Electrical Engineering Degree Core before EEL4920 Senior Design I registration.

Computer Engineering Degree Core: 15 credits

Complete ALL of the following Courses:

- EEL3370 - C++ Programming for Embedded Systems
- EEL4709C - Computer Design
- EEL4730 - Programming Embedded Systems
- EEL4740 - Embedded Computing Systems
- MAD2104 - Discrete Mathematics
  OR COT3100 - Discrete Structures

Computer Engineering Electives: 31 credits

(Selected from Areas of Interest offered by ECE Department)

Areas of Interest offered by the ECE Department:

Electrical Engineering and Computer Engineering students must choose elective classes from an area of interest from the following list and take the corresponding courses as their Electives. Students may choose any class from any area of interest as long as they fulfill the prerequisite(s) and corequisite(s). Students must choose at least two areas of interest, and complete at least nine credits from each of those two areas of interest, or additional depth in a area of interest can be substituted.

*Upon the start of the program, up to 6 general credits can be applied toward degree completion.

Fulfill ANY of the following requirements:

Biosensing, Devices, and Digital Health:

Earn at least 9 credits from the following:

- EEE3303C - Electronics I & Lab
- EEE4393C - Wearable Electronics
- EEE4510 - Introduction to Digital Signal Processing with AI
- EEL4652C - Smart Sensors and Transducer Systems
- CAI4841 - Introduction to Computer Vision

EEE3303C Electronics I & Lab is a CpE Only Elective

OR

RF and Wireless Communications:

Earn at least 9 credits from the following:

- EEL3514 - Communication Systems
  AND EEL3514L - Communication Systems Lab
- EEL4413 - Wave-Propagation for Wireless Communication
- EEL4421 - Introduction to RF Circuit Design
- EEL4461C - Antennas
- EEE4510 - Introduction to Digital Signal Processing with AI
- EEL4515 - Advanced Communication Systems
- EEE4550 - Introduction to Radar Systems
- EEL4583 - Basics of RF Systems

OR

Robotics, Control, and, Autonomous Systems:

Earn at least 9 credits from the following:

- EEL3657 - Control Systems I
- EEL3664 - Introduction to Autonomous Systems
- EEL4658 - Industrial Control Systems
- EEL4664 - Sensors, Perception, and Robotic Manipulation
- EEL3660 - Introduction to ROS-Based Modeling and Simulation for ECE

OR

Quantum Engineering, Semiconductors, and Chip Technology:

Complete ALL of the following Courses:

- EEE3303C - Electronics I & Lab
- EEE3396 - Introduction to Solid State Devices
- EEL4005 - Measurements and Instrumentation in Electrical Engineering
- EEE4304C - Electronics II and Lab
- EEE4314 - Integrated Circuits and Systems
  AND EEE4314L - Integrated Circuits Laboratory
- EEL4160 - Introduction to VLSI Systems and Design
- EEE4423 - Introduction to Quantum Computers

EEE3303C Electronics I & Lab is a CpE Only Elective.

OR

Power/Energy:

Earn at least 9 credits from the following:

- EEL4005 - Measurements and Instrumentation in Electrical Engineering
- EEL4212 - High Voltage Engineering
- EEL4213 - Power Systems I
  AND EEL4213L - Energy Conversion Lab
- EEL4214 - Power Systems II
- EEL4215 - Power Systems III
- EEL4241 - Power Electronics
- EEL4495 - Introduction to Applied Electromagnetics for Safety Analysis

OR

Computer Architecture, GPU, and Hardware Design:

Complete ALL of the following Courses:

- EEE4343 - Introduction to Digital Electronics
- EEL4709C - Computer Design
- EEL4746 - Microcomputers I
  AND EEL4746L - Microcomputers I Lab
- EEL4747 - Reduced Instruction Set Computing Processors
  AND EEL4747L - Microcomputers II (RISC) Lab
- EEE4761 - AI Embedded Hardware Design and Implementation

EEL4709C Computer Design is a EE Only Elective.

OR

Embedded System Software:

Earn at least 9 credits from the following:

- EEL3370 - C++ Programming for Embedded Systems
- EEL4730 - Programming Embedded Systems
- EEL4734 - Embedded Operating Systems

- EEL4740 - Embedded Computing Systems
- EEL4831 - Embedded GUI Programming
- EEE4763 - Embedded Programming for AI Application and Implementation

EEL3370 C++ Prog Emb Sys, EEL4730 Programming Embedded Systms, EEL4740 Embedded System are EE Only Electives.

OR

Networking and Security:

Earn at least 9 credits from the following:

- TCN4081 - Telecommunication Network Security
- TCN4211 - Telecommunication Networks
- TCN4212 - Telecommunication Network Analysis and Design
- TCN4431 - Principles of Network Management and Control Standards (Inactive)
- EEE4717 - Introduction to IoT Security

OR

Cybersecurity and Digital Forensics:

Earn at least 9 credits from the following:

- EEL4806 - Ethical Hacking and Countermeasures
- EEL4802 - Introduction to Digital Forensics Engineering
- EEL4804 - Introduction Malware Reverse Engineering
- EEE4754 - Introduction to Mobile Forensics
- EEE4750 - Introduction to Image and Video Forensics
- EEE4752 - Introduction to Network Forensics and Incident Response

OR

Engineering Entrepreneurship:

Earn at least 9 credits from the following:

- EEL4933 - Engineering Entrepreneurship
- EEL4062 - Engineering Business Plan Development
- EEL4063 - Introduction to Business Decisions
- EEL4090C - Technical Sales for Engineers

OR

Artificial Intelligence and Big Data:

Earn at least 9 credits from the following:

- CNT4147 - Big Data Analytics in ECE
- CNT4151 - Data Visualization in ECE
- CNT4155 - Python Programming in ECE

- CNT3143 - Analytics with Cloud Services in ECE
- CNT4153 - Machine Learning in ECE
- CNT4149 - Deep Learning in ECE
- CNT4145 - Sensor IoT Analytics
- CAI4868 - Fundamentals of AI Security in ECE

OR

Cyber Defense:

Earn at least 9 credits from the following:

- TCN4211 - Telecommunication Networks
- TCN4081 - Telecommunication Network Security
- EEL4802 - Introduction to Digital Forensics Engineering
- EEL4804 - Introduction Malware Reverse Engineering
- EEL4806 - Ethical Hacking and Countermeasures
- EEL4730 - Programming Embedded Systems
- EEL4734 - Embedded Operating Systems

EEL4730 Programming Embedded Systms is an EE Only Elective.

OR

Nuclear Engineering and Instrumentation & Controls:

Earn at least 9 credits from the following:

- EEL4476 - Radiation Detection and Measurement in ECE
- ENU4004 - Introduction to Nuclear Engineering in ECE
- ENU4150 - Fundamental Instrumentation and Controls I for Nuclear in ECE
- ENU4151 - Fundamental Instrumentation and Controls II for Nuclear in ECE
- ENU4111 - Introduction to Nuclear Reactor Simulators in ECE

(Applied to all Department degree programs)

Major Requirements

There are no majors associated with this program.

Track, Specialization, Concentration, Area of Emphasis, or Other Curricular Offering Requirements

Pre-Medical Concentration for B.S. in Electrical and Computer Engineering: 24 credits

Type

Completion Requirement

Required courses

The B.S. in Electrical or Computer Engineering Pre-Med Concentration is designed for motivated students who have dual interests in engineering and medical careers.

Student are required to complete all the courses in this concentration plus the core requirements for a B.S. degree in Electrical or Computer Engineering and other ECE engineering concentration credits.

Fulfill ALL of the following requirements:

Biology

Complete ALL of the following Courses:

- BSC2010 - General Biology I
  AND BSC2010L - General Biology I Lab
- BSC2011 - General Biology II: Diversity of Life, Organismal Structure and Function
  AND BSC2011L - General Biology Lab II

AND

General Chemistry

Complete ALL of the following Courses:

- CHM1046 - General Chemistry II
  AND CHM1046L - General Chemistry Lab II

AND

Organic Chemistry

Complete ALL of the following Courses:

- CHM2210 - Organic Chemistry I
  AND CHM2210L - Organic Chemistry Lab I
- CHM2211 - Organic Chemistry II

AND

Pre-Medical Student Must Take

Complete at least 1 of the following courses:

- BCH3033 - General Biochemistry
- CHM4304 - Biological Chemistry I

Physics Concentration for B.S. in Electrical and Computer Engineering: 23 credits

Type

Completion Requirement

Required Courses

The B.S. in Electrical or Computer Engineering Physics Concentration is designed for motivated students who have dual interests in engineering and physics.

Student are required to complete all the courses in this concentration plus the core requirements for a B.S. degree in Electrical or Computer Engineering and other ECE engineering concentration credits.

Complete ALL of the following Courses:

- PHY1033 - Physics Pathways
- PHY3106 - Modern Physics
- PHY3802L - Intermediate Physics Lab
- PHY3513 - Thermodynamics
- PHY4221 - Introduction to Classical Mechanics
- PHY4323 - Intermediate Electromagnetism I
- PHY4604 - Quantum Mechanics I
- PHY4821L - Advanced Physics Lab

Additional Comments:

Within Arts, Sciences and Education, any undergraduate student who elects to do so may carry two majors and work to fulfill the requirements of both concurrently. Upon successful completion of the requirements of two majors, the student will be awarded one degree and a notation denoting both majors will be entered on the transcript.

Students are required to complete all the courses in this concentration plus the core requirements for a B.S. degree in Electrical or Computer Engineering and other ECE engineering concentration credits.

For the degree concentrations for the Bachelor of Science in Computer Engineering, see the above Program Requirement section.

Other Curricular Offering: Combined BS in Computer Engineering to MS in Computer Engineering Accelerated Degree Pathway

This five-year pathway seamlessly combines a baccalaureate degree in Computer Engineering with the Master's in Computer Engineering. A student admitted to the combined degree pathway will be considered to have undergraduate status until the student applies for graduation from their bachelor's degree program. Upon conferral of the bachelor's degree, the student will be granted graduate status and be eligible for graduate assistantships. Students enrolled in the pathway may count up to 9 hours of graduate-level courses (i.e., 5000 level or higher) as credits for both the undergraduate and graduate degree programs. For each of the courses counted as credits for both BS and MS degree, a minimum grade of 'B' is required. Students enrolled in the pathway are encouraged to seek employment with a department faculty member to work as a student assistant on a sponsored research project.

Other Curricular Offering: Combined BS in Computer Engineering to MS in Engineering Management (BSCpE/ MSEM) Accelerated Degree Pathway

Students enrolled in the combined degree pathway could count up to two Electrical Engineering graduate courses for both the BSCpE electives and the MSEM electives, for a total saving of 6 credit hours. A minimum grade of “B” is required graduate courses counted as credits for both BSCpE and MSEM degrees. Only 5000-level or higher courses may be applied toward both degrees. Only graduate courses with formal lecture can be counted for both degrees.

The combined BSCpE/MSEM pathway has been designed to be a continuous pathway enrollment. Students will receive their BSCpE degree upon completion of all the requirements of the BSCpE program. A student admitted to the combined degree pathway will be considered to have undergraduate status until the student applies for graduation from his/her bachelor's degree program. Upon conferral of the bachelor's degree, the student will be granted graduate status and be eligible for graduate assistantships.

Students may elect to permanently leave the combined pathway and earn only the BSCpE degree. Students who elect to leave the combined pathway and earn only the BS degree will have the same access requirements to regular graduate programs as any other student but will not be able to use the 6 credit hours in both the BSCpE and MSEM degrees.

COMPEG:MS - Master of Science in Computer Engineering

Overview

Degree Offered
MS - Master of Science

Program Title
Computer Engineering

The Master of Science (MS) program in Computer Engineering at FIU presents an extensive and interdisciplinary curriculum, delving deeply into a range of specialized domains including Big Data, Robotics, Wireless Technologies, Digital Image Processing, Signal Processing, Neuromorphic Computing, Network Security, Cybersecurity, Computing Systems, VLSI Design, Artificial Intelligence, and Machine Learning, among others. Whether the goal is to advance in a professional journey, stay abreast of the latest developments in computer engineering, or pursue further academic pursuits, this degree equips students for success. For more information, visit the College of Engineering and Computing website.

Requirements

Simple Requirements

Admissions Requirements

Admissions Requirements for Master of Science (MS) in Computer Engineering

The following are in addition to the University's graduate admission requirements:

(1) A student seeking admission into the program must have a bachelor's degree in engineering, physical sciences, computer science or mathematics from an accredited institution, or, in the case of foreign students, from an institution comparable or equivalent to US degree for further study at the graduate-level, or, a bachelor's degree in a related and a minimum of one year of work experience in the broad areas of electrical engineering and/or technology.

(2) An applicant must have a GPA score of at least 3.0/4.0 in either the overall undergraduate degree or the last 60 credit hours.

(3) Applicants who have not satisfied the above score may be evaluated for conditional admission.

(4) International applicants whose native language is not English are required to demonstrate English language proficiency in accordance with the University requirements, https://admissions.fiu.edu/international/graduate-school/english-language-proficiency/.

(5) Applicants from science areas other than electrical or computer engineering will be expected to complete sufficient background material at the undergraduate level prior to unconditional acceptance into the graduate program.

Admissions Requirements for the MS in Computer Engineering – Emerging Technologies Online

The following is in addition to the University Graduate School admission requirements:

(1) A student seeking admission into the program must have a bachelor's degree in engineering, physical sciences, computer science or mathematics from an accredited institution, or, in the case of foreign students, from an institution comparable or equivalent to US degree for further study at the graduate-level.

(2) An applicant must have a GPA score of at least 3.0/4.0 in either the overall undergraduate degree or the last 60 credit hours.

(3) Applicants who have not satisfied the above score may be evaluated for conditional admission.

(4) International students whose native language is not English, must refer to the Graduate School Admission English-Language Requirements.

(5) Applicants from areas other than electrical or computer engineering will be expected to complete sufficient background material at the undergraduate level prior to unconditional acceptance into the graduate program.

Admissions Requirements for the Combined Bachelor of Science (BS) in Computer Engineering to MS in Computer Engineering Accelerated Degree Pathway

To be considered for admission to the combined bachelor's/master's degree pathway, students must have completed at least 75 credits required for the bachelor's degree program at FIU, have earned at least a 3.2 GPA on both overall and upper-division courses, and meet the admissions criteria for the graduate degree program to which they are applying. Students need only apply once to the combined degree pathway; the application is submitted to Graduate Admissions typically before the student starts the last 30 credits of the bachelor's degree program.

Program Requirements

Thesis Option

A student must complete 24 semester credit hours of technical course work plus 6 semester credit hours of EEL6971 Research Master's Thesis. The candidate's Thesis committee shall approve an appropriate thesis topic.

The course requirements include a minimum of 12 hours of 6000 level course credit and a minimum of 9 hours at the 5000-6000 level in Electrical and Computer Engineering. One AI course is required for graduation. Three AI courses are provided as alternatives: CAI5855 – Introduction to Applied AI, CNT6154 – Adv Mach Learning in ECE, and EEL 6821 – Computer Vision.

Upon the successful completion of all course work, including thesis work, and after the determination by the student's advisor that they have completed the objectives of the thesis research, the student must pass a final oral examination which is primarily a defense of the thesis research.

The courses are chosen by mutual agreement between the student and the thesis advisor.

Non-Thesis Option

Students may choose the non-thesis option for their master's degree. The degree requirements differ from the thesis option in one aspect. The student must either:

(1) Complete 27 credits of coursework approved by the student's academic advisor and successfully finish EEL6916 Graduate Project with at least a 'B'.

OR

(2) Complete 30 credits of coursework approved by the Graduate Program Director.

Students choosing the non-thesis option must take:

(1) Six semester credit hours at the 5000+ level in mathematics. The list of approved choices is below.

(2) Twelve semester credit hours in graduate-level Electrical and Computer Engineering approved courses from at least two areas of interest, at least six credit hours from each of these two areas of interest.

(3) The remaining electives can be chosen from 5000+ level graduate courses in Science, Technology, Engineering, and Mathematics (STEM) disciplines based upon student's approved plan of study determined by the student and their academic advisor based on student's career objectives.

(4) One AI course is required for graduation. Three AI courses are provided as alternatives: CAI5855 – Introduction to Applied AI, CNT6154 – Adv Mach Learning in ECE, and EEL 6821 – Computer Vision.

Non-Thesis Option

Type
Completion Requirement

Math Requirement: 6 Credits

Earn at least 6 credits from the following:

- EEL5171 - Advanced Systems Theory
- EEE5543 - Random Signal Principles
- EEL6020 - Numerical Analysis of Electrical Devices
- STA5206 - Design Of Exper I

The above list may be changed or expanded by the Graduate Advisory Committee.

Master of Science in Computer Engineering Areas of Interest

Type
Completion Requirement

Areas of Interest

Students must choose at least two areas of interest and complete at least six credit hours in each of the two required areas of interest. Student may choose any class from any area of interest as long as they fulfill the prerequisite (s) and corequisite (s).

Complete at least 2 of the following:

Computer Systems and VLSI: 6 Credits

Earn at least 6 credits from the following:

- EEL5725 - Hardware Description Languages (VHDL or Verilog)
- EEL5741 - Advanced Computing Architecture
- EEL6167 - VLSI Design
- EEL6726 - Advanced VLSI Design
- EEL6758 - Engineering Design of Microprocessor Based Operating Systems
- EEL6795 - Power Aware Computing
- EEL6894 - Real-Time Computing and Applications

OR

Machine Learning: 6 Credits

Earn at least 6 credits from the following:

- EEL5813 - Neural Networks
- EEL6681 - Fuzzy Systems Design
- EEL6812 - Adv In Neural Nets
- EEL6825 - Pattern Recognition

OR

Artificial Intelligence and Big Data: 6 Credits

Earn at least 6 credits from the following:

- CNT6144 - Advanced Analytics with Cloud Services in ECE
- CNT6148 - Advanced Big Data Analytics in ECE
- CNT6150 - Advanced Deep Learning in ECE
- CNT6152 - Advanced Data Visualization in ECE
- CNT6154 - Advanced Machine Learning in ECE
- CNT6156 - Advanced Python Programming in ECE
- CAI6869 - Advanced AI Security in ECE

OR

Robotics, Controls, and Autonomous Sysems: 6 Credits

Earn at least 6 credits from the following:

- EEL5669 - Autonomous Systems and Controls
- EEE6765 - Advanced Embedded Systems Design and Implementation for IoT Applications
- EEE6767 - Advanced Embedded Programming for IoT Sensing, Network, Control, and Applications
- EEL6821 - Computer Vision
- EEL5607 - Advanced Physics-Based Robot Simulation for ECE

OR

Network Security: 6 Credits

Earn at least 6 credits from the following:

- TCN5155 - Wireless Communications with Multimedia Applications
- TCN5271 - Advanced IoT Communications and Networking
- CNT5415 - Practical Applied Security
- EEL5807 - Advanced Ethical Hacking
- EEL6787 - Network Security
- EEL6803 - Advanced Digital Forensics
- EEL6805 - Advanced Malware Reverse Engineering

OR

Digital Image Processing: 6 credits

Earn at least 6 credits from the following:

- EEL5813 - Neural Networks
- EEL5820 - Digital Image Processing
- EEL6812 - Adv In Neural Nets
- EEL6821 - Computer Vision

OR

Energy Cybersecurity: 6 credits

Earn at least 6 credits from the following:

- EEL5278 - Smart Grid Cyber Security and Intelligent Electronic Devices
- EEL5718 - Computer-Communication Network Engineering
- EEL6267 - Application of Intelligent Systems to Power System Operations
- EEL6787 - Network Security
- EEL6803 - Advanced Digital Forensics

OR

Power and Energy: 6 credits

Earn at least 6 credits from the following:

- EEL5259 - Modeling and Analysis of Modern Distribution Grids
- EEL5260 - Power System Optimization
- EEL5270 - Electrical Transients in Power Systems
- EEL6254 - Power Systems Reliability

OR

RF and Wireless Systems

Earn at least 6 credits from the following:

- TCN5155 - Wireless Communications with Multimedia Applications
- EEL5426 - RF Circuit Design
- EEL5427C - Electromagnetic Modeling of Radio Frequency (RF) Structures
- EEL5437 - Microwave Engineering
- EEL5467 - Antennas for Wireless Communication Systems
- EEL5482 - Fields and Waves Engineering
- EEL5500 - Digital Communication Systems I
- EEL5501 - Digital Communication Systems II
- EEE5557 - Principles of Modern Radar
- EEL6437C - Advanced Active Microwave Circuits
- EEL6439 - RF System Design for Wireless Communications

OR

Quantum Engineering, Semiconductors, and Chip Technology:6 credits

Earn at least 6 credits from the following:

- EEE6318 - Semiconductor Material and Device Characterization
- EEE6332 - Thin Film Engineering
- EEE6399C - Electronic Prop Mat
- EEE6429 - Advanced Quantum Computers
- EEE6397 - Semiconductor Device Theory
- EEE6395 - Superconductivity

OR

Nuclear Engineering and Instrumentation & Controls: 6 Credits

Earn at least 6 credits from the following:

- EEL6485 - Advanced Radiation Detection and Measurement in ECE
- ENU5006 - Fundamentals in Nuclear Engineering in ECE
- ENU6155 - Advanced Instrumentation and Controls I for Nuclear in ECE
- ENU6156 - Advanced Instrumentation and Controls II for Nuclear in ECE
- ENU6116 - Advanced Nuclear Reactor Simulators in ECE

Additional Comments:

Additional Program Information

Any course taken without the proper prerequisites and corequisites will be dropped automatically before the end of the term, resulting in a grade of “DR” or “DF”.

Students may select elective courses from other Department in College of Engineering and Computing (up to 9 credit hours) with the approval of the Graduate Program Director or the thesis advisor. No more than six (6) credit hours of Special Topics can count toward degree requirement.

Students, who are dismissed from the University due to low grades, may appeal to the Dean for reinstatement. A second dismissal results in no possibility of reinstatement. Any exception to the program requires the department’s approval.

Graduation Requirements

The degree will be conferred when the following conditions have been met:

(1) Recommendation of the advisor and faculty of the Department.

(2) Certification by the Dean of the College that all requirements of the degree being sought have been completed including a minimum of 30 credits.

(3) A GPA of at least 3.0 has been earned for non-elective courses required by the program.

(4) Met the undergraduate deficiencies, if any existed in the student’s graduate program, as additional courses toward the degree.

(5) Completed the required semester hours of graduate- level credit (not more than 6 graduate semester hours with a grade of “B” or higher can be transferred from other accredited institutions).

(6) Students must maintain an overall GPA of 3.0. No grade below “C” will be accepted in a graduate program. In the event that a student is placed on a probationary status, the student must obtain a directed program from their advisor and approved by the Dean prior to continuing further course work toward the degree. The student must satisfy the directed course of action within the prescribed time limit, otherwise the student will be academically dismissed.

(7) Complied with all University policies and regulations.

Major Requirements

There are no majors associated with this program.

Track, Specialization, Concentration, Area of Emphasis, or Other Curricular Offering Requirements

See the list of concentration areas to choose from for selection of the courses in the Program Requirements section above for the MS Degree in Computer Engineering.

MS in Computer Engineering – Online

The Master of Science in Computer Engineering – Emerging Technologies Online program requires 30 semester hours beyond the bachelor’s degree. This is a lock-step program that consists of a specific sequence of courses, plus courses from the Area of Interest.

The program offers areas of interests, which are selected as part of the program with the guidance of the program director.

Areas of Interest: (1) Cybersecurity, (2) Artificial Intelligence, (3) Robotics and Automation, and (4) Quantum

Master of Science in Computer Engineering – Emerging Technologies Online

Type

Completion Requirement

Computer Engineering Courses: 15 Credits

Complete ALL of the following Courses:

- CAI5855 - Introduction to Applied AI in ECE
- CAI5867 - Advanced Data Engineering in ECE
- CIS5208 - Social, Economic, and Policy Aspects of Cybersecurity
- CNT6154 - Advanced Machine Learning in ECE
- EEL5807 - Advanced Ethical Hacking

Math Requirement: 6 Credits

Earn at least 6 credits from the following:

- EEL5171 - Advanced Systems Theory
- EEE5543 - Random Signal Principles
- EEL6020 - Numerical Analysis of Electrical Devices
- EEL6141 - Advanced Network Analysis

The Math Electives may be changed or expanded by the Graduate Advisory Committee.

Areas of Interest: 9 credits

Students must complete 9 credit hours from the following areas of interest: Cybersecurity, Artificial Intelligence, Robotics and Automation, Quantum.

Complete at least 3 of the following:

Cybersecurity

Complete ANY of the following Courses:

- EEL6787 - Network Security
- EEL6803 - Advanced Digital Forensics
- EEL6805 - Advanced Malware Reverse Engineering

OR

Artificial Intelligence

Complete ANY of the following Courses:

- CAI6856 - Advanced Generative AI in ECE
- CNT6150 - Advanced Deep Learning in ECE
- CNT6144 - Advanced Analytics with Cloud Services in ECE

OR

Robotics and Automation

Complete ANY of the following Courses:

- EEL6821 - Computer Vision
- EEE6766 - Algorithm Design and Firmware Implementation for IoTSensing,NetworkConnectivity, Closed-Loop Control
- EEL6615 - Modern Control Systems, Theory, and IoT Applications

OR

Quantum

Complete ANY of the following Courses:

- CAI6866 - Advanced Quantum AI in ECE
- EEE6429 - Advanced Quantum Computers
- EEL5935 - Advanced Special Topics

Any exception to the program requires the approval of the Program Director for the MS in Computer Engineering-Emerging Technologies Online degree program.

MS in Computer Engineering – Robotics for Computer Engineer Track

Within the Computer Engineering Major, students may choose to complete the 24 credits in the Robotics for Computer Engineer Track requirements as well as these specific 6 credits from the Electrical Engineering Major

Master of Science in Computer Engineering – Robotics for Computer Engineer Track

Type

Completion Requirement

Math Requirement: 6 Credits

Complete ALL of the following Courses:

- EEL5171 - Advanced Systems Theory
- EEE5543 - Random Signal Principles

Track-Specific Courses: 12 Credits

Complete ALL of the following Courses:

- EEL5669 - Autonomous Systems and Controls
- EEE6767 - Advanced Embedded Programming for IoT Sensing, Network, Control, and Applications
- EML5808 - Control Technology for Robotic Systems
- EML6805 - Advanced Design of Robots

Track-Elective Courses: 12 Credits

Earn at least 12 credits from the following:

- EEE6765 - Advanced Embedded Systems Design and Implementation for IoT Applications
- EEL6821 - Computer Vision
- EEL6825 - Pattern Recognition
- EEL5813 - Neural Networks
- EEL6812 - Adv In Neural Nets
- EEL6681 - Fuzzy Systems Design
- EML5505 - Smart Machine Design and Development
- EMC5415 - Digital Control of Mechanical Systems
- EML5825 - Sensors and Applied Machine Intelligence

Other Curricular Offering: Combined BS in Computer Engineering to MS in Computer Engineering Accelerated Degree Pathway

This five-year pathway seamlessly combines a baccalaureate degree in Computer Engineering with the Master's in Computer Engineering. A student admitted to the combined degree pathway will be considered to have undergraduate status until the student applies for graduation from their bachelor's degree program. Upon conferral of the bachelor's degree, the student will be granted graduate status and be eligible for graduate assistantships. Students enrolled in the pathway may count up to 9 hours of graduate-level courses (i.e., 5000 level or higher) as credits for both the undergraduate and graduate degree programs. For each of the courses counted as credits for both BS and MS degree, a minimum grade of 'B' is required. Students enrolled in the pathway are encouraged to seek employment with a department faculty member to work as a student assistant on a sponsored research project.

COMPSC:BA - Bachelor of Arts in Computer Science

Overview

Degree Offered
BA - Bachelor of Arts

Program Title
Computer Science

The Bachelor of Arts (BA) in Computer Science offers students the choice to combine the BA in Computer Science with another degree, such as digital media, business, economics, and more. The program allows graduates to pursue careers in the field of computing, while it offers them the ability to have a more specialized focus outside of computer science. The program provides strong skills in Computer Science, but unlike the Bachelor of Science (BS) in Computer Science, it is not as math and science-heavy as the BS in Computer Science. The BA in Computer Science is for students who want more choice and flexibility with their coursework and are interested in obtaining computing skills to pursue careers in fields that use technology significantly, such as health, science, medicine, or research. Students of this program will gain the skills needed to research technological solutions and create digital programming to offer new solutions. Graduates will be prepared to offer new approaches to computing technology to create greater efficiencies and ensure systems operate in the intended manner.

For more information, visit the College of Engineering and Computing website.

Program Website

Academic Group
College of Engineering and Computing

Diploma Title
Bachelor of Arts in Computer Science

Total Credits
120

Program Length in Years Based on Full-Time Enrollment
4

CIP Code
11.0101

Requirements

Simple Requirements

Admissions Requirements

Students must follow regular University admission procedures and upon admission declare their specific major as Computer Science.

Program Requirements

CEC Academic Progression Standard

Students admitted to the program must successfully complete MAC 1147 within three academic terms, not counting summers. Students not meeting the math progression requirement will be advised to move to a program where they can be more successful.

Lower Division Preparation

Type
Prerequisite

Common Prerequisite Courses

Please visit https://cpm.flvc.org for a current list of state-approved common prerequisites.

Students must complete the following courses as part of their course work, preferably during the first 60 credits:

Complete ALL of the following Courses:

- MAC1140 - PreCalculus Algebra
- STA2023 - Statistical Methods

STA2023 Statistical Methods may be replaced with STA3111 Statistics I

Upper-Division Requirements

At least 50% of the upper division credits required for the BA in Computer Science must be taken at FIU.

Upper Division Requirements

Type
Completion Requirement

Courses Required for the Degree: Third and Fourth Years

Complete ALL of the following Courses:

- COT3100 - Discrete Structures
  OR MAD2104 - Discrete Mathematics
- ENC3249 - Professional and Technical Writing for Computing
  OR ENC3213 - Professional and Technical Writing
- CDA3102 - Computer Architecture
- CEN4010 - Software Engineering I
- CGS3095 - Technology in the Global Arena
- COP2047 - Python Programming I
- COP3410 - Computational Thinking
- COP3337 - Computer Programming II
- COP3530 - Data Structures
- COP4338 - Systems Programming
- COP4610 - Operating Systems Principles

Computer Science Electives

The list of elective courses are available at: https://www.cis.fiu.edu/academics/degrees/undergraduate/computer-science. BA-CS students must take 12 credits of electives, including at least one course from each elective group (Foundations, Systems and Applications). Remaining credits must be taken from these three groups OR from the group (CIS4947, CIS4912, CIS4257, CIS3590).

Interdisciplinary Courses

Nine additional credits must be taken outside the Knight Foundation School of Computing and Information Sciences. These credits must normally be selected from the courses for a minor or certificate in another discipline. When there is no minor or certificate in the area of the student's interest, a set of courses can be created with the approval of advisers from KFSCIS and the other area of interest.

Earn at least 9 credits

Major Requirements

There are no majors associated with this program.

Track, Specialization, Concentration, Area of Emphasis, or Other Curricular Offering Requirements

There are no tracks, specializations, concentrations, areas of emphasis, or other curricular offerings associated with this program.

COMPSC:BS - Bachelor of Science in Computer Science

Overview

Degree Offered
BS - Bachelor of Science

Program Title
Computer Science

A Bachelor of Science (BS) in Computer Science degree emphasizes the mathematical and theoretical foundations of computing, rather than teaching specific technologies. It provides the foundation to break into some of the most exciting and profitable careers. Students will be prepared for opportunities in various fields, including artificial intelligence, computer gaming, virtual reality, media convergence, digital, evolutionary computing, computer architecture, and so much more. Students learn from faculty with internationally recognized expertise in fundamental and application areas. The coursework offers opportunities to design, implement, and evaluate a computing-based solution to meet a given set of computing requirements and apply computer science theory and software development fundamentals to produce computing-based solutions. Graduates of this program will apply principles and practices of computing grounded in mathematics and science to complete software-related projects to meet customer business objectives and/or productively engage in research.

For more information, visit the College of Engineering and Computing website.

Program Length in Years Based on Full-Time Enrollment
4

CIP Code
11.0101

Requirements

Simple Requirements

Admissions Requirements

Admissions Requirements for the Bachelor of Science (BS) in Computer Science

See general university admissions requirements at admissions.fiu.edu.

Students must follow regular University admission procedures and upon admission declare their specific major/degree as Computer Science.

Admissions Requirements for the Combined BS in Computer Science to Master of Science (MS) in Computer Science Accelerated Degree Pathway

To be considered for admission to the combined bachelor’s/master’s degree pathway, students must have completed 75 credits in the bachelor’s degree program at FIU and meet the admissions criteria for the graduate degree program to which they are applying. Students need only apply once to the combined degree pathway the application is submitted to

Graduate Admissions typically before the student starts the last 30 credits of the bachelor's degree program. A student admitted to the combined degree pathway will be considered to have undergraduate status until the student applies for graduation from their bachelor's degree program. Upon conferral of the bachelor's degree, the student will be granted graduate status and be eligible for graduate assistantships. Only 5000-level or higher courses, and no more than the number of credits specified by the program catalog, may be applied toward both degrees.

Admissions Requirements

(1) Current enrollment in the Bachelor's Degree program in Computer Science at FIU.

(2) Completed at least 75 credits of coursework.

(3) Current GPA must be 3.3 or higher.

(4) Foreign students whose native language is not English must score at least 550 on the paper-based (or 80 on iBT) in the Test of English as a Foreign Language (TOEFL). Complete the separate Combined Degree Pathway application, including signed approval by the director or designee from the graduate program.

Admissions Requirements for the Combined BS in Computer Science to MS in Engineering Management Accelerated Degree Pathway

Students who pursue a BS degree and are in their first semester of the senior year in Computer Science and have earned at least a 3.2 overall GPA may, upon recommendation from three faculty members, apply to the department to enroll in the combined BSCS/MSEM program. Students must also submit an online application to the University Graduate School for admission to the MSEM program. In addition to the admission requirements of the MSEM program, students must meet all the admission requirements of the University Graduate School.

Students need only apply once to the combined degree pathway; the application is submitted to Graduate Admissions typically before the student starts the last 30 credits of the bachelor's degree program.

Students interested in the combined pathway should consult with their undergraduate advisor on their eligibility to the pathway, preferably during their junior year, since appropriate planning of coursework is required in order to achieve the full nine-credit benefit. The student should also meet the MSEM Program Director to learn about the graduate program and available tracks/courses before completing the application form and submitting it to their undergraduate advisor. Final decision for admission to the MSEM program will be made by the University Graduate School upon recommendation by the Engineering Management program director. Applicants will be notified by the Engineering Management Program and the University Graduate School of the decision on their applications.

Program Requirements

CEC Academic Progression Standard

Steady academic progression is expected by the College of Engineering and Computing. Students who are unsuccessful in passing common pre-requisites after two attempts will be advised to change their major into an area where they can be successful. Drops after the add/drop period, which result in a DR grade, are considered an attempt in the course and count as an unsuccessful enrollment.

Students must also meet the Math Progression standard of successfully completing Calculus 1 within three academic terms, not counting summers.

Students will be redirected to a different degree program when completion of the progression standards, including the applicable math progression standard by its stated semester, is no longer feasible.

Lower Division Preparation

Type
Prerequisite

Common Prerequisite Courses

Students must complete the following courses as part of their course work, preferably during the first 60 credits and complete COP2047 Python Programming I with a grade of “C” or higher:

For a list of all state-approved common prerequisites, including alternatives, visit https://cpm.flvc.org.

Fulfill ALL of the following requirements:

Prerequisite Courses

Complete ALL of the following Courses:

- COP2210 - Programming I
  OR COP2047 - Python Programming I
- MAC2311 - Calculus I
- MAC2312 - Calculus II

AND

Natural Sciences Group 1 (State Core Requirement)

The following courses and corresponding lab may be used for Natural Sciences Group 1:

BSC2010 General Biology I, CHM1045 Gen Chemistry I, ESC1000 Intro to Earth Science, PHY2048 Physics W/ Calculus I

or any other Natural Sciences Group 1 (State Requirement) course

AND

Natural Sciences Group 2 and Natural Sciences Group 2 Lab (Institution's Core Requirement)

The following courses and corresponding lab may be used for Natural Sciences Group 2:

BSC2011 General Biology II/BSC2011L Gen Biology Lab II, GLY3039 Environ Geology/GLY3039L Envrnmtl Geol Lab, PHY2049 Physics W/Calc II/PHY2049L General Phys Lab II.

or any other Natural Sciences Group 2 (Institution's Core Requirement) course and Lab

Upper Division Requirements

Type
Completion Requirement

Courses Required for the Degree:

Third and Fourth Years

At least 50% of the upper division credits required for the BS in Computer Science must be taken at FIU.

Complete ALL of the following Courses:

- COT3100 - Discrete Structures

OR MAD2104 - Discrete Mathematics
- ENC3249 - Professional and Technical Writing for Computing
  OR ENC3213 - Professional and Technical Writing
- CDA3102 - Computer Architecture
- CEN4010 - Software Engineering I
- CGS3095 - Technology in the Global Arena
- COP3530 - Data Structures
- COP3410 - Computational Thinking
- COP3337 - Computer Programming II
- COP4338 - Systems Programming
- COP4555 - Principles of Programming Languages
- COP4610 - Operating Systems Principles
- COP4710 - Database Management
- COP4857 - Web Systems Development
- STA3033 - Introduction to Probability and Statistics for CS
- CIS3950 - Capstone I
- CIS4951 - Capstone II

Students admitted before Fall 2020 are strongly encouraged to take CIS3950 Capstone I and CIS4951 Capstone II. However, they may fulfill the capstone requirement by completing either CIS4911 Senior Project or IDS4918 VIP Program - C.

Students admitted from Fall 2020 must take CIS3950 Capstone I and CIS4951 Capstone II, and not allowed to take CIS4911 Senior Project.

Computer Science Elective Groups

KFSCIS maintains three lists of courses for three elective groups: Foundations, Systems, and Applications, available at: https://www.cis.fiu.edu/academics/degrees/undergraduate/computer-science.

NOTE: Graduate courses can also be used to satisfy elective requirements. Please see adviser for approval. Graduate courses are subject to graduate fees.

Additional Comments:

Remarks: The following courses are not acceptable for credit toward graduation, unless a student has passed the course before declaring a Computer Science major: CGS2060 Intro To Micro Comp,CGS2100 Comp Appls Business, MAC2233 Applied Calculus, STA2023 Statistical Methods, STA2122 Intro to Applied Statistics, QMB3200 Bus Stats & Analysis I.

Major Requirements

There are no majors associated with this program.

Track, Specialization, Concentration, Area of Emphasis, or Other Curricular Offering Requirements

The **Computer Science track** should be followed by the student who intends to continue to graduate study in computer science.

Computer Science track

Type
Completion Requirement

Electives

The list of elective courses are available at: https://www.cis.fiu.edu/academics/degrees/undergraduate/computer-science.

CS-track students must complete 12 credits of electives, including one course from the Foundations elective group. Remaining credits must be taken either from these elective groups OR at most 6 credits from the group (CIS4947, CIS4912, CIS4257, CIS3590).

The **Software Design and Development track** may be followed by the student who intends to pursue a software engineering career.

Software Design and Development track

Type
Completion Requirement

Additional required courses for SDD track

Complete ALL of the following Courses:

- CEN4021 - Software Engineering II
- CEN4072 - Fundamentals of Software Testing

With the permission of an KFSCIS UG advisor, students can register for CEN5064 Software Design and then substitute CEN 5064 for CEN 4072.

Electives

The list of elective courses are available at: https://www.cis.fiu.edu/academics/degrees/undergraduate/computer-science.

SDD-track students must complete 6 credits of electives, including one course from the Foundations elective group. Remaining credits must be taken either from these elective groups OR at most 6 credits from the group (CIS4947, CIS4912, CIS4257, CIS3590).

Other Curricular Offering: BS in Computer Science to MS in Computer Science Accelerated Degree Pathway

Type
Completion Requirement

Accelerated Degree Pathway

General Requirements

The FIU Bachelor's degree in Computer Science must be awarded before the Master's degree. No grade below "C" will be accepted in any course taken to satisfy graduate program requirements.

Fulfill ALL of the following requirements:

Required Courses Part 1

Complete ALL of the following Courses:

- COT5407 - Introduction to Algorithms

AND

Required Courses Part 2

Complete at least 2 of the following courses:

- CEN5011 - Advanced Software Engineering
- COP5614 - Operating Systems
- COP5725 - Principles of Database Management Systems

AND

Electives

7 courses selected from the KFSCIS Graduate Course Offerings

Overlap

Up to 4 courses (12 credits) may be used in satisfying both the Bachelor's and Master's degree requirements. All overlapping courses must be approved by both graduate and undergraduate program directors before students are enrolled in such courses.

The courses must be regular 5000-level computer science graduate courses intended for graduate majors.

Other Curricular Offering: BS in Computer Science to MS in Engineering Management Accelerated Degree Pathway

Type

Completion Requirement

Accelerated Degree Pathway

A student admitted to the combined degree pathway will be considered to have undergraduate status until the student applies for graduation from their bachelor's degree program. Upon conferral of the bachelor's degree, the student will be granted graduate status and be eligible for graduate assistantships. Students enrolled in the combined degree pathway could count up to three Computer Science graduate courses toward satisfying both the BSCS and the MSEM requirements, for a total saving of 9 credit hours. Students are required to take courses from the following list. Additional courses may be selected with approval of the program director.

Complete ALL of the following Courses:

- CEN5011 - Advanced Software Engineering
- COP5614 - Operating Systems
- COP5725 - Principles of Database Management Systems
- COT5310 - Theory of Computation I
- COT5407 - Introduction to Algorithms

The combined BSCS/MSEM pathway has been designed to be a continuous enrollment pathway. During this combined BSCS/MSEM pathway, upon completion of all the requirements of the BSCS pathway, students will receive their BSCS degree. Students may elect to permanently leave the combined pathway and earn only the BSCS degree.

Students who elect to leave the combined pathway and earn only the BS degree will have the same access requirements to regular graduate programs as any other student but will not be able to use the 9 credit hours in both the BSCS and MSEM degrees.

For each of the graduate courses counted as credits for both BSCS and MSEM degrees, a minimum grade of “B” is required. Only graduate courses with formal lecture can be counted for both degrees. The students are responsible for confirming the eligibility of each course with their undergraduate advisors.

COMPSC:MS - Master of Science in Computer Science

Overview

Degree Offered
MS - Master of Science

Program Title
Computer Science

The Master of Science (MS) degree in Computer Science provides studies in state-of-the-art computer applications, as well as an introduction to the theoretical foundations of computer science. The coursework offered by this program allows students to acquire and refine their skills across a broad spectrum of theoretical and applied computer science topics. The MS in Computer Science curriculum prepares students with the necessary skills for advancing their careers across a range of industry applications, such as web application development, business analytics, mobile application development, data science and artificial intelligence, cybersecurity, robotics, human-machine interfaces, among others. Students graduating from this program will also possess skills in effective written and oral communication, problem-solving, decision-making, professional ethics, and working effectively in diverse teams.

Admissions Requirements

Admissions Requirements for the Master of Science (MS) in Computer Science

The following are in addition to the University's graduate admission requirements:

(1) A Bachelor's Degree or equivalent in Computer Science from an accredited institution. A degree in a related field is acceptable if the applicant shows evidence of background suitable for entry into the master's program as judged by the Graduate Committee.

(2) Per FIU's Graduate Admission Criteria and Denial Policy # 380.0443, the applicant should have a minimum of a "B" average (3.0 GPA) in the last 60 credits of upper-level work undergraduate coursework.

(3) Foreign students whose native language is not English must score at least 550 on the paper-based (or 80 on iBT) in the Test of English as a Foreign Language (TOEFL), 6.5 overall on International English Language Testing System (IELTS), or 110 on Duolingo.

Admissions Requirements for the Combined Bachelor of Science (BS) in Computer Science to MS in Computer Science Accelerated Degree Pathway

To be considered for admission to the combined bachelor's/master's degree pathway, students must have completed 75 credits in the bachelor's degree program at FIU and meet the admissions criteria for the graduate degree program to which they are applying. Students need only apply once to the combined degree pathway the application is submitted to Graduate Admissions typically before the student starts the last 30 credits of the bachelor's degree program. A student admitted to the combined degree pathway will be considered to have undergraduate status until the student applies for graduation from their bachelor's degree program. Only 5000-level or higher courses, and no more than the number of credits specified by the program catalog, may be applied toward both degrees.

Admissions Requirements

(1) Current enrollment in the Bachelor's Degree program in Computer Science at FIU.

(2) Current GPA must be 3.3 or higher.

Program Requirements

Academic Progression Requirements

No grade below "C" will be accepted in any course taken to satisfy graduate program requirements.

Degree Program Credit Hours: 30

Type

Completion Requirement

Required Coursework: 9 Credits

Fulfill ALL of the following requirements:

Part I

Complete ALL of the following Courses:

- COT5407 - Introduction to Algorithms

AND

Part II

Complete at least 2 of the following courses:

- CEN5011 - Advanced Software Engineering
- COP5725 - Principles of Database Management Systems
- COP5614 - Operating Systems

Elective Coursework

Fulfill ANY of the following requirements:

Non-thesis Option: 21 credits of elective courses

OR

Thesis Option: 15 credits of elective courses and 6 credits of master's thesis

Complete ALL of the following Courses:

- CIS6970 - Thesis

After completion of the other required courses, the student must conduct a research thesis. The topic must first be approved by the faculty member who will supervise the research and then by the Thesis Committee. The thesis will be accepted only after being read and approved by a Thesis Committee. An oral defense is required before the Thesis Committee.

Elective courses can be selected from SCIS Graduate Course Offerings.

Major Requirements

There are no majors associated with this program.

Track, Specialization, Concentration, Area of Emphasis, or Other Curricular Offering Requirements

The courses must be regular 5000-level computer science graduate courses intended for graduate majors.

COMPSC:PHD - Doctor of Philosophy in Computer Science

Overview

Degree Offered
PHD - Doctor of Philosophy

Program Title
Computer Science

The PhD in Computer Science is to designed to provide cutting-edge research in all major areas of computer science while leading to the frontiers of knowledge in a student's chosen field of concentration. Students will work closely with faculty embodying a broad range of computing interests, often affiliated with various dynamic and innovative research laboratories, centers, and groups around serveral areas of specialization. The areas in which students may carry out dissertation research include machine learning and AI, cybersecurity, Internet-of-Things, high performance computing, bioinformatics, intelligent systems, databases, and modeling and simulation. With a highly individualized program of study, the degree provides students with depth in their chosen research area, coupled with a rigorous breadth of knowledge across the discipline. This program prepares students for high-level computer science research roles in industry, government, and academia.

Requirements

Simple Requirements

Admissions Requirements

The following are in addition to the University's graduate admission requirements:

(1) A baccalaureate or master's degree in Computer Science, or equivalent degree in a related field as judged by the School's Graduate Committee.

(2) For students without a Master's degree in a related field: A minimum of a 3.2 average on all upper division work and acceptable courses in Calculus and Statistics.

(3) For students with a Master's degree in a related field: A minimum of a 3.0 average on all upper division work and acceptable courses in Calculus and Statistics, and a minimum of a 3.3 average in related graduate work.

(4) Foreign students whose native language is not English must score at least 550 on the paper-base (or 80 on iBT) in the Test of English as a Foreign Language (TOEFL) within the past two years, 6.5 overall on International English Language Testing System (IELTS), or 110 on Duolingo.

(5) Three letters of recommendation from persons in a position to judge the applicant's potential for advanced graduate study in computer science.

Program Requirements

Program Credit Hours: 75

Type

Completion Requirement

Required Courses

Earn a minimum grade of 'B' in the following:

- COP5614 - Operating Systems
- COT5310 - Theory of Computation I
- COT6405 - Analysis Of Algorithms

Additional Degree Requirements

1. The student must pass at least seven elective courses, for a total of 30 semester credit hours of course work. At least four of the seven elective courses must be distinguished and specially marked Ph.D. level courses. The acceptable elective courses and distinguished Ph.D. level courses can be found in a list maintained and published by the School. In addition, the student must also earn at least 15 dissertation credit hours and satisfy the School's seminar attendance requirement (3 credits). In total, 75 credits beyond the bachelor's degree are required.

2. The student must pass the Qualifying Examination, which is an examination designed to ensure that the student has competency in core computer science topics.

3. The student must pass the Preliminary Examination, which is an oral examination of his or her dissertation proposal.

4. The student must write a dissertation on his or her research and successfully defend it orally in the Dissertation Defense.

5. The student must spend at least one academic year in full-time residence. Normally, this will be after passing the Qualifying Examination.

CONDRE:CFI - Undergraduate Certificate in Conflict and Dispute Resolution

Overview

Degree Offered
ACRT - Academic Certificate

Program Title
Certificate in Conflict and Dispute Resolution

The Undergraduate Certificate in Conflict and Dispute Resolution is an 18-credit course of study designed to provide both degree-seeking and non-degree-seeking students with an opportunity to delve into the interdisciplinary field of conflict resolution. This program equips students with theoretical knowledge and practical methodologies for managing conflicts and disputes effectively.

The certificate offers an interdisciplinary concentration, allowing students to explore conflict resolution from various angles. Whether one is pursuing a bachelor’s degree or already holds one, this program stands alone and complements other academic pursuits. Students will engage in a comprehensive curriculum that covers conflict and dispute resolution theories, methodologies, and practical skills. These skills are essential for navigating personal and professional challenges in a conflict-prone world. The certificate emphasizes the application of effective conflict resolution skills across diverse scenarios. The program fosters connections across disciplines such as business, criminology, education, human resource management, international relations, labor studies, law, public administration, political science, and psychology. By integrating knowledge from these fields, students gain a holistic understanding of conflict management. In summary, the Certificate in Conflict and Dispute Resolution equips students with the necessary tools to navigate conflicts successfully, fostering a more harmonious and productive society.

There are no tracks, specializations, concentrations, areas of emphasis, or other curricular offerings associated with this program.

CONMGT:BS - Bachelor of Science in Construction Management

Overview

Degree Offered
BS - Bachelor of Science

Program Title
Construction Management

The Bachelor of Science (BS) in Construction Management is a multidisciplinary program accredited by the American Council for Construction Education. It integrates principles from project management, engineering, architecture, and business management to provide students with a comprehensive understanding of the construction industry. This degree equips students with the skills and knowledge needed to oversee construction projects from start to finish, covering areas such as cost estimating, project scheduling, construction safety, quality management, construction materials and methods, and construction project management. The program also offers elective courses in various advanced topics and emerging technologies, such as artificial intelligence and construction robotics. Further, students can engage in hands-on learning experiences, including internships and site visits, allowing them to acquire essential skills and knowledge necessary for successful professional careers in the industry. Graduates are well-prepared for various career paths within the construction industry, including roles such as project manager, superintendent, cost estimator, or project scheduler.

Requirements

Simple Requirements

Admissions Requirements

Admissions Requirements for the Bachelor of Science (BS) in Construction Management

The Moss Department of Construction Management follows FIU Admissions undergraduate degree requirements (admissions.fiu.edu).

Transfer Students

Students transferring from another university or community college should review the Florida International University Transfer Student guidelines. Prior to or upon admission, transfer students should also contact a Construction Management advisor to review transcripts and determine allowable transfer credits.

Transfer Credits

No grade below a ‘C’ in any required course is acceptable for transfer into the program. Lower Division courses (courses at the 1000 or 2000 level) designated as equivalent by the statewide course numbering system will be accepted by the Department as fulfilling the Upper Division requirements. Credits from these Lower Division courses may be used to offset Upper Division core credit requirements. Other 1000 and 2000 level courses designated as equivalent by a Department advisor may be accepted by the Department as fulfilling Upper Division requirements. When equivalent Lower Division courses are used to fulfill Upper Division course requirements a student will be required to complete an equal number of 3000 level (or above) credits from approved Departmental electives. Transfer credits above the 60 semester credit hours accepted from the community college system will not reduce the number of credit hours to be completed in the Upper Division, including electives, to earn a degree.

Admissions Requirements for the Combined BS in Construction Management to Master of Science (MS) in Construction Management Accelerated Degree Pathway

Students who pursue a BS degree in Construction Management, completed 75 credits and have an overall GPA of at least a 3.2 GPA may apply to enroll in the combined BS/MS pathway in Construction Management upon recommendation from the undergraduate advisor. Students should complete all lower division courses to be considered for this degree pathway. The student must also meet the admission criteria for the graduate degree program and the University Graduate School. Students need only apply once to the combined degree pathway, but the application must be submitted to Graduate Admissions before the student starts the last 30 credits of the bachelor’s degree program.

Students interested in the pathway should consult with the Undergraduate Advisor on their eligibility for admission. The students should also meet the Graduate Program Director to learn about the graduate program and available courses before completing the application form online.

Program Requirements

CEC Academic Progression Standard

Students admitted to the program must successfully complete MAC 1147 within three academic terms, not counting summers. Students not meeting the math progression requirement will be advised to move to a program where they can be more successful.

In order to be eligible to graduate, the student must meet all University and Department requirements. The program of studies consists of a minimum of 24 Lower Division semester credit hours, including 3 semester credit hours that can be used to satisfy the University Core Curriculum, and 60 Upper Division semester credit hours. The total minimum program requirements for both Lower and Upper Divisions is 120 semester credit hours. The waiving of any required course shall not reduce the minimum of 120 semester credit hours required for graduation. A student entering as a freshman or a transfer student transferring without an AA degree from a state institution in Florida must complete the University Core Curriculum. In addition, all required Lower Division and Upper Division Construction Management courses and electives must be completed with a grade of ‘C’ or better. In order to graduate, a student must also have a minimum grade point average of 2.0, and have met all University undergraduate graduation requirements.

Students should contact an advisor at least one semester prior to their projected graduation and request a review of his or her file. At the start of the final semester the student is required to complete an Application for Graduation. (See catalog for additional information on graduation procedures and scheduling.) If for any reason a student fails to graduate in the semester after applying for graduation, they must reapply.

It is the student’s responsibility to ascertain that all requirements for graduation have been met.

Lower Division Preparation

Type
Prerequisite

Common Prerequisite Courses

For a list of all state-approved common prerequisites, including alternatives, visit https://cpm.flvc.org.

Complete ALL of the following Courses:

- GLY1010 - Physical Geology
  AND GLY1010L - Physical Geology Lab
- BCN1272 - Plans Interpretation
- BCN2210 - Construction Materials and Methods
- BCN2405 - Structural Design I
- BCN2253 - Building Construction Drawing
- BCN2280 - Construction Surveying
- BUL4310 - The Legal Environment of Business
- MAC2233 - Applied Calculus
  OR MAC2311 - Calculus I
  OR MAC1147 - Pre-Calculus Algebra and Trigonometry
  OR MAC1114 - Trigonometry
- PHY2053 - Physics without Calculus I
- PHY2048L - General Physics Laboratory I
- ECO2013 - Principles of Macroeconomics
  OR ECO2023 - Principles of Microeconomics
- ACG3024 - Introduction to Accounting for Managers and Investors
- STA2023 - Statistical Methods
- SPC2608 - Public Speaking

Additional Comments:
Note: It is recommended to complete the Physics course and lab, however substitutions from other State Approved Natural Sciences Requirements will be accepted for Physics and Geology. To meet the Mathematics Requirements, any State Approved Mathematics Requirement Group 1 or Group 2 courses with an MAC or STA prefix will be accepted.

Upper Division

Type
Completion Requirement

Upper Division Courses

Complete ALL of the following Courses:

- BCN3027 - Principles of Construction Management
- BCN3730 - Construction Safety
- BCN3740 - Legal Aspects
- BCN3761 - Construction Documentation and Communication
- BCN3762 - Building Codes and Quality Control
- BCN4431 - Structural Design II
- BCN3611 - Construction Cost Estimating I
- BCN4612 - Construction Cost Estimating II
- BCN3720 - Construction Scheduling I

- BCN4724 - Scheduling II
- BCN3753 - Financial Management of Construction Organizations
- BCN3727 - Construction Sitework and Equipment
- BCN4465 - Temp Structures
- BCN4561 - Environmental Control in Buildings I
- BCN4703 - Management of Construction Projects
- BCN4910 - Senior Project
- MAN3022 - Introduction to Management

Electives

Students can take up to eleven credits as electives. Nine of these elective credits must be 3000-4000 level courses selected in consultation with the Undergraduate Advisor, including at least six credits from construction management and up to 3 credits can be from business/management.

Earn at least 9 credits

Independent Study

Students who wish to enroll in an independent study course must have the prior written approval of both the instructor and the Department Chair. Independent Study courses can not be substituted for required Lower or Upper Division departmental core courses or for elective courses.

Minor in Business

Construction Management students take courses in the College of Business Administration that may be applied towards a minor in Business, Marketing, or Entrepreneurship. Students interested in pursuing one of these options should consult the appropriate section of the catalog for details.

Credit By Examination

The Department does not generally offer credit by examination. A student with outstanding, exceptional and documented skills in a particular subject as well as an outstanding academic record may request credit by examination, and it is the option of the Department Faculty and the Department Chair whether to grant the request.

Credit For Non-College Learning

The Department does not award credit for non-college learning (life work experience).

Student Work

The Department reserves the right to retain any and all student work for the purposes of record, exhibition or instruction.

Class Attendance

Class attendance may be required and may be used for grade determination at the option of the instructor.

Major Requirements

There are no majors associated with this program.

Track, Specialization, Concentration, Area of Emphasis, or Other Curricular Offering Requirements

Other Curricular Offering: Combined BS in Construction Management to MS in Construction Management Accelerated Degree Pathway

A student admitted to the combined degree pathway will be considered to have undergraduate status until the student applies for graduation from their bachelor's degree program. Upon conferral of the bachelor's degree, the student will be granted graduate status and be eligible for graduate assistantships.

Students enrolled in the pathway may count up to nine credit hours of BCN graduate courses towards the electives of the BS degree. A minimum grade of B is required for all graduate courses counted for both the BS and MS degrees. Only graduate courses with formal lectures can be counted for both degrees. The students are responsible for confirming the eligibility of each course with the Undergraduate Advisor.

The combined BS/MS pathway has been designed to be a continuous program. However, upon completion of all the requirements of the undergraduate program, students will receive their BS degrees. Students in this pathway have up to one year to complete the master's degree after receipt of the bachelor's degree. Students who fail to meet this one year post BS requirement or who elect to leave the combined pathway at any time and earn only the BS degree will have the same access requirements to regular graduate programs as any other student, but will not be able to use the nine credits in both the bachelor's and master's degrees.

CONMGT:MS - Master of Science in Construction Management

Overview

Degree Offered
MS - Master of Science

Program Title
Construction Management

The Master of Science (MS) in Construction Management is now a standard requirement for middle- and upper-level managerial positions in the construction industry. The program aims to equip students with advanced knowledge and skills essential for success in these roles. It is flexible, accommodating graduates from other disciplines who may lack an undergraduate background in construction management. Students with undergraduate degrees in construction management, engineering, or architecture can complete the master's degree in one academic year as full-time students. Students with other backgrounds will need to take prerequisite courses before entering the program. Equivalent fields include studies in construction drawings, materials, accounting, finance, economic planning, structures, site work, legal aspects of construction, cost estimating, and business management/finance. Upon graduation, students will possess skills in effective written communication, critical thinking, problem-solving, decision-making, research methods, advanced communication technology, professional ethics, advanced construction management practices, risk management, and principles of leadership in business.

Admissions Requirements

Admissions Requirements for the Master of Science (MS) in Construction Management

In order to be admitted, applicants should hold a Bachelor's Degree in Construction, Construction Management, Architecture, Engineering, Business or equivalent related fields. Students with baccalaureate degrees other than Construction Science, Construction Management, or Construction Engineering may be accepted with the understanding that they will be required to take specified basic undergraduate courses as determined by the Graduate Program Director, to provide an adequate background for more advanced courses. In addition, applicants must have earned a minimum grade point average (GPA) of 3.0 in the upper division course work related to their undergraduate degree.

Eligibility for admission for those students whose upper division undergraduate GPA is less than 3.0 (on a 4.0 scale) may be evaluated on the basis of one or more of the following:

--GRE or GMAT scores

--Letters of reference

--Work experience

--Other relevant factors, including but not limited to, awards, recognitions, published journal articles, conference presentations, etc.

Applicants who do not satisfy the GPA requirement will be evaluated by the Department's Graduate Program Director based on the factors identified earlier, and may be recommended for admission on a provisional/conditional status.

TOEFL

In addition to the above criteria, international graduate student applicants whose native language is not English are required to submit a score for the Test of English as a Foreign Language (TOEFL) or for the International English Language Testing System (IELTS). A total score of 80 on the iBT TOEFL or 6.5 overall on the IELTS is required.

Admissions Requirements for the Combined Bachelor of Science (BS) in Construction Management to MS in Construction Management Accelerated Degree Pathway

Students who pursue a BS degree in Construction Management, completed 75 credits and have an overall GPA of at least a 3.2 GPA may apply to enroll in the combined BS/MS pathway in Construction Management upon recommendation from the undergraduate advisor. Students should complete all lower division courses to be considered for this degree pathway. The student must also meet the admission criteria for the graduate degree program and the University Graduate School. Students need only apply once to the combined degree pathway, but the application must be submitted to Graduate Admissions before the student starts the last 30 credits of the bachelor's degree program.

Students interested in the pathway should consult with the Undergraduate Advisor on their eligibility for admission. The students should also meet the Graduate Program Director to learn about the graduate program and available courses before completing the application form online.

Admissions Requirements for the MS in Construction Management and Juris Doctor Joint Degree Pathway

Candidates for the pathway must meet the entrance requirements for and be accepted by both Colleges. Both Colleges must be informed by the student at the time of application to the second program that the student intends to pursue the dual degree. The joint degree pathway is not open to students who have already earned one degree.

Program Requirements

College Policies

Non-Degree Seeking Students

In exceptional cases, students wishing to enroll in courses during the application process may do so as a non-degree seeking student. No more than 12 semester credits of work taken as a non-degree seeking student can be applied towards graduation. No courses with a grade lower than a "B", earned as a non-degree seeking student, will be included in the Masters program upon admission. Students taking courses under the non-degree seeking student designation should consult other sections of this catalog in Policies and Processes for pertinent regulations covering the non-degree seeking student status.

Grades

The Moss Department of Construction Management requires a minimum cumulative grade point average of 3.0 in all courses taken towards a masters degree. The minimum acceptable grade for any work attempted as a graduate student is a “C.”

Grade of Incomplete

Please refer to the University Policy on Incomplete Grades. (https://policies.fiu.edu/files/767.pdf)

Graduation

In order to be eligible to graduate the student must have successfully completed his/her plan of study as established with the student’s graduate advisor, his/her supervisory committee (if applicable), and the Department Chair. This includes completion of all applicable graduate course work with an overall minimum grade point average of 3.0. A student choosing the thesis option must also have submitted a complete masters thesis, whose format, content, and presentation must be acceptable to and approved by his/her graduate advisor, supervisory committee, Department Chair, College Dean, and the Dean of the University Graduate School.

Students should contact an advisor at least one semester prior to their projected graduation and request a review of their file. At the start of the final semester the student is required to complete an Application for Graduation (online application). If for any reason a student fails to graduate in the semester after applying for graduation, the student must reapply for graduation and enroll for at least one graduate credit.

It is the student’s responsibility to ascertain that all requirements for graduation, as stated in the University Catalog and in the Department Program sheets, have been met.

Curriculum

Students seeking to obtain a Master of Science in Construction Management have a choice of either a thesis or a non-thesis option. Students have to complete 30-36 semester hours including thesis. Students with a Bachelor of Science (BS) degree in Construction Management, Construction Science, or Construction Engineering must complete at least 30 semester hours to graduate. Students with a BS degree in Engineering or a BA degree in Architecture must complete at least 33 semester hours to graduate. All other students with undergraduate degrees in disciplines such as business, accounting, finance, etc. must complete at least 36 semester hours to graduate. The thesis option consists of a minimum of 24-30 semester hours of course work and 6 semester hours of thesis. The non-thesis option consists of 30-36 semester hours of course work and may include up to 6 semester hours of independent studies. A student shall not register for masters thesis without first having received the approval from his/her thesis supervisor and the Chair of the Department. A student may not register for independent studies without the approval of his/her advisor, and the Chair of the Department.

Program Credit Hours: 30

Type

Completion Requirement

Foundation Courses

Students (CM majors) requiring 30 credit hours to graduate are not allowed to take any of the foundation courses to count towards their MSCM degree. Students requiring 33 credit hours to graduate must take at least three courses (9 credits) from the foundation courses listed below – unless exempted by the Graduate Program Director. Students requiring 36 credits to graduate must take at least four courses (12 credits) from the list of foundation courses given below – unless exempted by the Graduate Program Director. The foundation courses, whether three or four, must be taken with the approval of the Graduate Program Director.

Complete up to 4 course(s) and earn up to 12 credits from the following:

- BCN5618 - Fundamentals of Construction Estimating
- BCN5645 - Construction Economic Analysis
- BCN5728 - Principles of Construction Scheduling
- BCN5766 - Codes and Regulations
- BCN5746 - Construction Legal Environment

Construction Management Electives

All BCN courses listed in this catalog can be taken as elective courses Depending on the academic background of the student, the balance of 30-36 credits is to be taken from the list. Thesis students may take up to 6 credits of BCN6971 Thesis spread over at least two consecutive terms with 3 credit hours in each. All students may take up to 6 credits of BCN5905 Independent Studies. A student shall not register for BCN5905 Independent Studies, BCN6910 Supervised Research, or BCN6971 Thesis , without the approval of his/her advisor, and the School Director. Not more than 3 credit hours of BCN5905 Independent Studies or BCN6971 Thesis may be taken in any one semester. A student shall count BCN5949 Grad CM Internship only once towards graduation.

Examination

A final oral examination, which is primarily a defense of the thesis research, is required for thesis masters candidates. A passing grade must be obtained in order to qualify for graduation. The examination will be administered by his/her supervisory committee.

Major Requirements

There are no majors associated with this program.

Track, Specialization, Concentration, Area of Emphasis, or Other Curricular Offering Requirements

Other Curricular Offering: Combined BS in Construction Management to MS in Construction Management Accelerated Degree Pathway

A student admitted to the combined degree pathway will be considered to have undergraduate status until the student applies for graduation from their bachelor’s degree program. Upon conferral of the bachelor’s degree, the student will be granted graduate status and be eligible for graduate assistantships.

Students enrolled in the pathway may count up to nine credit hours of BCN graduate courses towards the electives of the BS degree. A minimum grade of B is required for all graduate courses counted for both the BS and MS degrees. Only graduate courses with formal lectures can be counted for both degrees. The students are responsible for confirming the eligibility of each course with the Undergraduate Advisor.

The combined BS/MS pathway has been designed to be a continuous program. However, upon completion of all the requirements of the undergraduate program, students will receive their BS degrees. Students in this pathway have up to one year to complete the master’s degree after receipt of the bachelor’s degree. Students who fail to meet this one year post BS requirement or who elect to leave the combined pathway at any time and earn only the BS degree will have the same access requirements to regular graduate programs as any other student, but will not be able to use the nine credits in both the bachelor’s and master’s degrees.

Other Curricular Offering: MS in Construction Management and Juris Doctor Joint Degree Pathway

Florida International University (College of Engineering and Computing and College of Law) offers a joint degree pathway culminating in both a Juris Doctor degree, awarded by the College of Law, and a Master of Science in Construction Management (MSCM) degree, awarded by the College of Engineering and Computing.

Under this joint degree pathway, a student can obtain expertise in both fields (construction and law) in significantly less time than it would take to obtain both degrees if pursued consecutively.

Essential criteria relating to this joint degree pathway are as follows.

(1) For law students, enrollment in the MSCM program is required no later than the completion of 63 credit hours in the J.D. program. For MSCM students, enrollment in the J.D. program is required no later than the end of the first semester after beginning the MSCM program. (A summer session is counted as a full semester.)

(2) The College of Engineering and Computing will allow 9 credit hours of law courses to be credited toward both the MSCM and J.D. degrees. These [9] credit hours of law classes will be in lieu of the three elective courses required for the MSCM degree. Foundation courses must be completed as required and explained in the catalog and cannot be substituted with any College of Law courses. The students must have a minimum GPA of 3.0 in each of the three law courses for inclusion in their MSCM degree program. Reciprocally, law students may receive 9 hours of credit toward the satisfaction of the J.D. degree for courses taken in the MSCM curriculum upon completion of the MSCM degree curriculum with a grade point average of 3.0 or higher. These 9 credit hours of construction management courses will be in lieu of electives required for the J.D.

(3) A student enrolled in the joint degree pathway may begin the student's studies in either College, but full-time law students must take the first two semesters of law study consecutively and part-time law students must take the first three semesters of law study consecutively. Students enrolled in the MSCM program must be enrolled at least in one course in any given semester during his/her entire course of study. Students admitted to one College but electing to begin study in the other College under the joint degree pathway may enter the second College thereafter without once again qualifying for admission so long as they have notified the second College before the end of the first week of the first semester in the second College and are in good academic standing when studies commence in the second College.

(4) A student enrolled in the joint degree pathway can receive either degree if the student has satisfied all of the requirements for that degree.

CONRE:CFI - Graduate Certificate in Conflict Resolution and Consensus Building

Overview

Degree Offered
ACRT - Academic Certificate

Program Title
Graduate Certificate in Conflict Resolution and Consensus Building

The Graduate Certificate in Conflict Resolution and Consensus Building provides professionals and post-baccalaureate students with an opportunity to explore an interdisciplinary concentration in conflict resolution. By participating in this program, students will develop both intellectual and practical expertise in conflict resolution theories and methodologies. The certificate fosters connections across a wide range of disciplines, including business, criminology, education, human resource management, international relations, labor studies, law, political science, psychology, public administration, sociology, and more. Upon completion of the certificate, you'll be equipped with essential skills, including active listening, problem-solving, compromise, collaboration, communication, and mediation. These skills are invaluable for identifying issues early, evaluating innovative solutions for personal and organizational transformation, nurturing healthy relationships, and effectively leading teams.

For more information, visit the Steven J. Green School of International and Public Affairs website.

Admissions Requirements

No specific admissions requirements. Contact advisor for additional information.

This certificate is a stand-alone program that can be completed simultaneously by degree-seeking students pursuing a master's degree or non-degree-seeking students who hold a bachelor's degree.

Prerequisites

Contact advisor for information about any prerequisites.

Program Requirements

Program Credit Hours: 15

Type

Completion Requirement

Required Courses Part I: 6 credits

A minimum of 15 credit hours is required. A grade of “C” or better is required for all courses. Courses are to be selected in consultation with an advisor. Other related courses may be accepted or substituted pending approval from the Center’s Academic Director.

Complete ALL of the following Courses:

- LBS5465 - Mediation Techniques
- LBS5485 - Fundamentals of Conflict Resolution

Required Courses Part II: 6 credits

Earn at least 6 credits from the following:

- LBS5155 - Workplace Diversity
- LBS5215 - Women in the Workplace
- LBS5466 - Family Mediation
- LBS5467 - Civil Mediation
- LBS5486 - The Dynamics of Conflict Management
- LBS5488 - Org Conflict & Dispute Res

Electives: 3 credits

The courses listed below should be understood as a partial list of approved electives. Other related courses may be accepted or substituted pending approval from the Center’s Academic Director.

Fulfill ANY of the following requirements:

Labor Studies

Complete ANY of the following Courses:

- LBS5155 - Workplace Diversity
- LBS5215 - Women in the Workplace
- LBS5406 - Collective Bargaining and Labor Relations
- LBS5464 - Labor Arbitration
- LBS5466 - Family Mediation
- LBS5486 - The Dynamics of Conflict Management
- LBS5488 - Org Conflict & Dispute Res
- LBS5507 - Labor and Employment Law
- LBS5930 - Topics in Labor Studies
- LBS5931 - Topics in the Philosophy and Methods of Conflict Research
- LBS6906 - Directed Individual Study
- LBS6945 - Internship Labor Studies/Alternative Dispute Resolutions

OR

Communication

Complete ANY of the following Courses:

- MMC6213 - Ethics and Social Responsibility
- MMC6402 - Theories of Mass Communication
- PUR5476 - Communication for Change Management
- PUR6477 - Strategic Facilitation
- PUR6607 - Global Strategic Communication Management

OR

Education

Complete ANY of the following Courses:

- ADE5387 - Organizational Learning and Human Resource Development
- ADE6180 - Organizational and Community Processes in AE/HRD
- ADE6260 - Management of AE/HRD Programs
- EDA6232 - School Law
- EDA7233 - Ethics and Educational Leadership
- EDF6365 - Cultural Identities and Conflict
- EDF6367 - Interactive Conflict Resolution: A Third-Party Perspective
- EDF6658 - Selected Topics in International Development Education: Current Policy Issues and Problems
- EDG5707 - Cultural and Cross-Cultural Studies
- EDH6055 - Access and Choice in US Higher Education

OR

Global and Sociocultural Studies

Complete ANY of the following Courses:

- ANT6319 - The African Diaspora: Anthropological Perspectives
- SYD6236 - International Migration and Refugees
- SYD6625 - South Florida Socio-cultural Systems (Inactive)
- SYD6705 - Comparative Analysis of Ethnicity and Race
- SYO6536 - Comparative and Global Inequality

OR

Hospitality

Complete ANY of the following Courses:

- HMG5547 - Leadership Training for Team Building
- HMG6225 - Multicultural Human Resources Management for the Hospitality Industry
- HMG6226 - Motivation and Leadership
- HMG6246 - Organizational Behavior in the Hospitality and Tourism

OR

International Relations

Complete ANY of the following Courses:

- INR5007 - Seminar in International Politics
- INR5062 - War, Peace and Conflict Resolution in INR
- INR5086 - Islam in International Relations
- INR5087 - Ethnicity and the Politics of Development
- INR5105 - American Foreign Policy
- INR5275 - International Relations of the Middle East
- INR5315 - Foreign Policy Analysis
- INR5409 - International Law I
- INR5507 - International Organizations I
- INR6092 - Seminar on Non-State Actors
- INR6089 - International Relations and Human Rights
- INR6107 - U.S. Foreign Policy: Processes and Institutions
- INR6338 - Seminar in Security Studies
- INR6606 - Political Psychology of International Relations
- INR6705 - Seminar in International Political Economy

OR

Management

Complete ANY of the following Courses:

- MAN6209 - Organization Design and Behavior
- MAN6297 - Labor Issues and Conflict Management
- MAN6601 - Global Management Skills
- MAN6703 - Colloquium in Managing Organizational Ethics (Inactive)

OR

Politics and International Relations

Complete ANY of the following Courses:

- POS5045 - Seminar in American Politics
- POS5146 - Seminar in Urban Politics

OR

Psychology

Complete ANY of the following Courses:

- CYP5534 - Groups as Agents of Change
- CYP6766 - The Psychology of Crosscultural Sensitization in a Multicultural Context
- SOP6752 - Psychology of Juries

OR

Public Administration

Complete ANY of the following Courses:

- PAD5043 - Equitable and Inclusive Governance
- PAD5427 - Collective Bargaining in the Public Sector
- PAD6417 - Human Resource Policy and Management
- PAD6436 - Professionalism and Ethics
- PAD6434 - Leadership and Decision-making

OR

Public Health

Complete ANY of the following Courses:

- PHC6311 - Environmental Health Risk Assessment
- PHC6355 - Environmental and Occupational Health and Safety
- PHC6356 - Fundamentals of Industrial Hygiene (Inactive)
- PHC6315 - Introduction to Environmental Health Sciences
- PHC6589 - Health Promotion in Institutional Settings
- PHC6762 - International Public Health

OR

Religious Studies

Complete ANY of the following Courses:

- RLG5149 - Religion, Violence, and Conflict

CRMJST:BS - Bachelor of Science in Criminal Justice

Overview

Degree Offered
BS - Bachelor of Science

Program Title
Criminal Justice

The Bachelor of Science (BS) in Criminal Justice provides students with an understanding of the three main components of the justice system: police, courts, and corrections. Through an interdisciplinary approach, the program focuses on the definitions, causes, and prevention of crime, as well as legal processes, treatment, and rehabilitation of offenders. The study of criminal justice and criminology involves research methods and the application of criminological theories. The BS in Criminal Justice program is suitable for students wishing to pursue a career in law enforcement, legal studies, corrections, social services, and loss prevention.

For more information, visit the Steven J. Green School of International and Public Affairs website.

Admissions Requirements

Admissions Requirements for the Bachelor of Science (BS) in Criminal Justice

See general university admissions requirements at admissions.fiu.edu.

Admissions Requirements for the 4+1 BS in Criminal Justice to Master of Public Administration (MPA) Accelerated Degree Pathway

(1) The applicant must have an overall GPA of 3.25 or better.

(2) Letter of recommendation from a faculty member at FIU or from a supervisor.

(3) Current resume.

(4) Letter-of-intent not to exceed three double-spaced pages explaining how earning the MPA is consistent with long-term career goals. Students may also use this letter to discuss their passion for public service or policies and to communicate to the admission committee if they feel that their admission file does not properly reflect their potential to succeed in graduate school.

(5) Students can apply after having completed 75 credits in a bachelor's degree program.

(6) Students must apply prior to the semester in which graduate credits will be counted towards their undergraduate degree program.

Admissions Requirements for the Combined BS in Criminal Justice to Master of Science (MS) in Criminal Justice Accelerated Degree Pathway

Students must have completed 75 credits, have a 3.2 cumulative GPA, and meet the admissions criteria for the MS in Criminal Justice. Only 5000-level or higher courses, and no more than 12 credits may be applied toward both degrees.

Program Requirements

Academic Progression Requirements

Students are admitted directly to their chosen major at the university. Students are expected to make good progress based on critical indicators that include course completion and GPA requirements. In cases where students are not making successful progress, a change of major may be required. Academic advisors work with students to identify an appropriate major where a student will be successful in completing an undergraduate degree.

Lower Division Preparation

Type

Prerequisite

Common Prerequisite Courses

There are no specified common prerequisites for this degree. For information about state-approved common prerequisites and alternatives for other programs, visit https://cpm.flvc.org.

Degree Program Credits Hours: 120

Type

Completion Requirement

Upper Division Program

Students must complete 18 credits of core courses and 18 credits of electives with a grade of "C" or higher. Students also must satisfy the Steven J. Green School of International and Public Affairs foreign language requirement.

Core Courses: 18 credits

Six courses are required for all criminal justice majors:

Complete ALL of the following Courses:

- CCJ2020 - Introduction to Criminal Justice
- CCJ4014 - Criminological Theory
- CCJ4700 - Research Methods and Analysis
- CJE3001 - Professional Development in Criminal Justice
- CJL4064 - Criminal Justice and the Constitution
- CCJ4497 - Senior Capstone in Criminal Justice

Students employed full-time in a criminal justice related position for a minimum of three years may petition to replace CJE3001 Professional Development with CCJ4054 Ethics Criminal Justice.

Criminal Justice Electives: 18 credits

Any 3000 or 4000 level courses with the prefixes CCJ, CJC, CJE, CJJ, CJL, and DSC.

General Electives

A minimum of 15 credits must be 3000 or 4000 level courses. Nine (9) credits of electives must be taken outside of criminal justice. One- and two-credit physical activity courses (with the prefixes PEL, PEM, PEN) cannot be included as part of the credits needed for graduation. Independent study courses may not be taken outside of criminal justice.

Students are encouraged to double major or pursue a minor in related fields. Students may also consider appropriate academic certificates such as the NATLS:CFI, the LDRST:CFI, the LAWET:CFI, the PUBPO:CFE, and the PLWSPV:CFI.

Major Requirements

There are no majors associated with this program.

Track, Specialization, Concentration, Area of Emphasis, or Other Curricular Offering Requirements

Internship Program

It is highly recommended that students apply for an internship with a criminal justice agency. Students must have an overall minimum GPA of 2.0. For more information on the application process and course requirements, see http://cj.fiu.edu/internship/.

Law Enforcement Apprenticeship Program (LEAP)

The LEAP combines classroom instruction with specialized police training and workplace experience to produce successful law enforcement professionals and future leaders in the field. The LEAP provides students with college credits towards the completion of the Bachelor of Science degree programs in Criminal Justice or Crime Science. For additional information, see https://cj.fiu.edu/leap/.

Other Curricular Offering: 4+1 BS in Criminal Justice to MPA Accelerated Degree Pathway

Type

Completion Requirement

Required Courses Part I

The Master of Public Administration (MPA) program allows qualified students to earn both their Bachelor of Science in Criminal Justice (BSCJ) and MPA degrees in a shorter amount of time than typically required for earning degrees sequentially. A student admitted to the accelerated 4+1 BSCJ/ MPA degree pathway will be considered to have undergraduate status until the student applies for graduation from the bachelor’s degree program.

Upon conferral of the bachelor's degree, the student will be granted graduate status and be eligible for graduate assistantships.

Students accepted into the accelerated 4+1 BSCJ/MPA degree pathway may take up to four MPA courses, 12 graduate credits, which will be double counted for their bachelor and master's degrees.

Students admitted into the accelerated 4+1 BSCJ/MPA degree pathway should take up to four courses from the list below toward satisfying both their bachelor and master's degree requirements:

Complete ALL of the following Courses:

- PAD6053 - Political, Social and Economic Context of Public Administration

PAD6053 Pol Soc Econ Pub Adm must be taken within the first two semesters after a student is accepted into the accelerated degree pathway

Required Courses Part II

Complete at least 2 of the following courses:

- PAD6227 - Public Finance and the Budgetary Process
- PAD6306 - Policy Analysis
- PAD6417 - Human Resource Policy and Management
- PAD6434 - Leadership and Decision-making
- PAD6701 - Quantitative Methods in Public Administration
- PAD6726 - Applied Research Methods for Accountability in Public and Nonprofit Organizations
- PAD6718 - Smart Governance

If only two courses are selected from the above list, students may select one additional graduate-level course to be double counted. The course must have a course number of 5000 or higher and have a prefix of PAD, PUP, URP, or URS.

Students in the accelerated 4+1 BSCJ/MPA degree pathway should consult their advisor regarding substitutions of the courses mentioned above for undergraduate courses in their program.

Students must pass graduate courses with a grade of "B" or higher to count them toward the MPA degree. Students accepted into the accelerated degree pathway must fulfill all the MPA requirements to receive the MPA degree.

Note: PAD6701 Quant Applications is a prerequisite to PAD6726 App Res Acct Pub

Other Curricular Offering: Combined BS in Criminal Justice to MS in Criminal Justice Accelerated Degree Pathway

This pathway accelerates completion of the MS in Criminal Justice for qualified students enrolled in the BS in Criminal Justice at FIU.

Completion Requirements

Students must complete the bachelor degree at FIU, including up to 12 credits of graduate criminal justice courses.

CRMJST:MS - Master of Science in Criminal Justice

Overview

Degree Offered
MS - Master of Science

Program Title
Criminal Justice

The Master of Science (MS) in Criminal Justice is designed for students who wish to eventually pursue a doctorate degree, a career in academia, and careers in applied research and analysis with criminal justice agencies and organizations.

For more information, visit the Steven J. Green School of International and Public Affairs website.

Requirements

Simple Requirements

Admissions Requirements

Admissions Requirements for the Master of Science (MS) in Criminal Justice

(1) Bachelor’s degree from an accredited institution.

(2) GPA of 3.2 or higher in upper division coursework.

(3) Grade of “B” or better in an undergraduate research methods course.

(4) Statement of purpose describing the reasons for pursuing an advanced degree, research interests, and career plans.

(5) Example of your written work judged by the admission committee to be of sufficient quality.

(6) Three letters of recommendation from professors or employers familiar with your academic and professional qualifications.

Admissions Requirements for the 4+1 MS in Criminal Justice Accelerated Degree Pathway

Students must have completed 75 credits, have a 3.2 cumulative GPA, and meet the admissions criteria for the MS in Criminal Justice. Only 5000-level or higher courses, and no more than 12 credits may be applied toward both degrees.

Admissions Requirements for the Combined Bachelor of Science (BS) in Criminal Justice to MS in Criminal Justice Accelerated Degree Pathway

Students must have completed 75 credits, have a 3.2 cumulative GPA, and meet the admissions criteria for the MS in Criminal Justice. Only 5000-level or higher courses, and no more than 12 credits may be applied toward both degrees.

Admissions Requirements for the MS in Criminal Justice and Juris Doctor Joint Degree Pathway

(1) Candidates for the pathway must meet the entrance requirements for and be accepted by both programs. Both programs must be informed by the student at the time of application to the second program that the student intends to pursue the joint degree.

(2) The joint degree pathway is not open to students who have already earned a JD or a MSCJ.

(3) For law students, enrollment in the MSCJ program is required no later than the completion of 63 credit hours in the JD program. For MSCJ students, enrollment in the JD program is required no later than the completion of 24 credit hours in the MSCJ program.

Admissions Requirements for the MS in Criminal Justice to Master of Public Administration (MPA) Joint Degree Pathway

(1) Candidates in the joint degree pathway must meet the admission requirements established by each individual program. Candidates must indicate in the application their intention to pursue the joint degree option. Students deciding to pursue the joint degree option after having been admitted to one program will indicate this intention only on their second application.

(2) Applicants for a joint degree pathway will not be accepted from candidates who have already completed either degree. MSCJ or MPA students must apply and be admitted by no later than the second to last semester in which they are expected to complete their original degree requirements.

Program Requirements

The Master of Science in Criminal Justice degree requires 36 credit hours (12 courses). All students entering the program are required to complete six courses (18 credits) of core requirements, four electives (12 credits) in criminal justice, and two courses (6 credits) in general electives.

Graduation Requirements

To receive the Master's degree in Criminal Justice, a student must satisfy all University regulations governing graduate study. All students must complete the six core courses, four electives in criminal justice, and two courses in general electives. A minimum graduate GPA of 3.0 is required.

Degree Program Credit Hours: 36 credits

Type

Completion Requirement

Core Requirements: 18 credits

Complete ALL of the following Courses:

- CCJ6025 - Criminological Theory
- CCJ6079 - Geospatial Crime Analysis
- CCJ6676 - Transnational Crime and National Security
- CCJ6705 - Research Methods in Criminal Justice

- CCJ6706 - Data Analysis in Criminal Justice
- CCJ6485 - Criminal Justice Policy Analysis

Criminal Justice Electives: 12 credits

Students must select four criminal justice elective courses (12 credits). All elective credits must be earned at the graduate level in criminal justice (i.e., course numbers of 5000 and higher with the prefixes CCJ, CJC, CJE, CJJ, CJL, DSC).

College teaching preparation: Students interested in college teaching should complete the Graduate Teaching Certificate Program offered by the Center for the Advancement of Teaching and CCJ6815 Teaching Methods.

Doctoral studies preparation: Advanced students intending to enroll in a doctoral degree program should complete CCJ6915 Supervised Research.

Internship: Students interested in gaining practical experience within the criminal justice field should complete CCJ6946 Internship Program.

General Electives: 6 credits

Students must select two additional general elective courses (6 credits). These courses may be taken outside of criminal justice, if no credits have been transferred in from another degree program or included in a joint degree program. All courses taken from outside fields must be relevant to criminal justice and approved by the graduate director. All elective credits must be earned at the graduate level (i.e., course numbers of 5000 and higher).

Major Requirements

There are no majors associated with this program.

Track, Specialization, Concentration, Area of Emphasis, or Other Curricular Offering Requirements

Other Curricular Offering: 4+1 MS in Criminal Justice Accelerated Degree Pathway

This pathway accelerates completion of the MS in Criminal Justice for qualified students enrolled in an approved bachelor's degree program at FIU (other than the BS in Criminal Justice).

Completion Requirements

Students must complete their bachelor's degree at FIU, including up to 12 credits of graduate criminal justice courses.

Other Curricular Offering: Combined BS in Criminal Justice to MS in Criminal Justice Accelerated Degree Pathway

This pathway accelerates completion of the MS in Criminal Justice for qualified students enrolled in the BS in Criminal Justice at FIU.

Completion Requirements

Students must complete their bachelor's degree at FIU, including up to 12 credits of graduate criminal justice courses.

Other Curricular Offering: MS in Criminal Justice and Juris Doctor Joint Degree Pathway

The faculties of the College of Law and the Department of Criminology and Criminal Justice at Florida International University have approved a joint degree pathway culminating in both a Juris Doctor degree (JD), awarded by the College of Law, and a Master of Science in Criminal Justice degree (MSCJ), awarded by the Department of Criminology and Criminal Justice. Under the joint degree program, a student can obtain the degrees in significantly less time than it would take to obtain both degrees if pursued consecutively. Essential criteria relating to the joint degree pathway are as follows:

(1) A student must satisfy the curriculum requirements for each degree before either degree is awarded. The Department of Criminology and Criminal Justice will allow 12 credit hours of College of Law criminal law and jurisprudence courses to be credited toward both the MSCJ and JD degrees. These 12 credit hours of law classes will be in lieu of four elective courses. Reciprocally, law students may receive 9 hours of credit toward the satisfaction of the JD degree for courses taken in the MSCJ curriculum upon completion of the MSCJ degree with a grade point average of 3.0 or higher. Subject to prior approval, law school students are normally allowed 6 credit hours from graduate level courses offered by other units of the University as counting toward the JD degree.

(2) A full-time law student enrolled in the joint degree pathway may spend the first year in either the College of Law or the Department of Criminology and Criminal Justice. A part-time law student enrolled in the joint degree pathway may begin the student's studies in either program, but must take the first three semesters of law study consecutively. Students admitted to one program may enter the second program thereafter without once again qualifying for admission so long as they have notified the second program before the end of the first week of the first semester in the second program and are in good academic standing when studies commence in the second program.

(3) A student enrolled in the joint degree pathway will not receive either degree until the student has satisfied all of the requirements for both degrees, or until the student has satisfied the requirements of one of the degrees as if the student had not been a joint degree pathway candidate.

Other Curricular Offering: MS in Criminal Justice and MPA Joint Degree Pathway

The Department of Criminology and Criminal Justice and the Department of Public Policy and Administration have a joint degree pathway culminating in both a Master of Science in Criminal Justice (MSCJ) and a Master of Public Administration (MPA). The joint degree pathway prepares graduate students for overlapping careers in criminal justice and public management. It is intended to prepare students for positions in public, private, and nonprofit organizations that require both criminal justice and management knowledge. Under the joint degree pathway, a student can obtain both degrees in significantly less time than it would take to obtain both degrees if pursued consecutively.

Degree Requirements

The joint degree pathway requires a total of 20 courses (60 credits) as follows:

(1) Nine core courses (27 credits) from MPA.

(2) Six core courses (18 credits) from MSCJ.

(3) Five electives (15 credits). Of the five electives, 2 (6 credits) must be from MSCJ and 2 (6 credits) must be from MPA. The remaining elective course (3 credits) can be selected from either program.

Award of Degrees

Joint degree pathway candidates will not receive either degree until all requirements for both programs have been satisfied. Students deciding against completing a second degree must satisfy all first degree program requirements as if the student had never been a joint degree pathway candidate.

CRMSCI:BS - Bachelor of Science in Crime Science

Overview

Degree Offered
BS - Bachelor of Science

Program Title
Crime Science

The Bachelor of Science (BS) in Crime Science combines forensics and computer science with traditional criminology and criminal justice. The BS Crime Science is intended for students who appreciate the modern complexities of crime, its prevention, and control. The BS Crime Science program produces students with sophisticated analytical skills needed for the new era of law enforcement within the United States and abroad. For more information, visit the Steven J. Green School of International and Public Affairs website.

Admissions Requirements for the Bachelor of Science (BS) in Crime Science

See general university admissions requirements at admissions.fiu.edu.

Admissions Requirements for the 4+1 BS in Crime Science to Master of Public Administration (MPA) Accelerated Degree Pathway

(1) The applicant must have an overall GPA of 3.25 or better.

(2) Letter of recommendation from a faculty member at FIU or from a supervisor.

(3) Current resume.

(4) Letter-of-intent not to exceed three double-spaced pages explaining how earning the MPA is consistent with long-term career goals. Students may also use this letter to discuss their passion for public service or policies and to communicate to the admission committee if they feel that their admission file does not properly reflect their potential to succeed in graduate school.

(5) Students can apply after having completed 75 credits in a bachelor’s degree program.

(6) Students must apply prior to the semester in which graduate credits will be counted towards their undergraduate degree program.

Program Requirements

Academic Progression Requirements

Students admitted to the university are directly admitted to their chosen major. Students are expected to make adequate progress based on critical indicators such as GPA in specific courses or credits earned. In cases where students are not making adequate progress, a change of major may be required. Advisors will redirect students to more appropriate majors when critical indicators are not actualized.

Lower Division Preparation

Type

Prerequisite

Common Prerequisites

Complete ALL of the following Courses:

- STA2023 - Statistical Methods
- BSC2010 - General Biology I
  AND BSC2010L - General Biology I Lab
- CHM1020 - Chemistry and Society
  OR CHM1025 - Fundamentals of Chemistry
- CHM1020L - Chemistry and Society Lab
  OR CHM1025L - Fundamentals of Chemistry Lab

For a list of all state-approved common prerequisites, including alternatives, visit https://cpm.flvc.org.

Degree Program Credit Hours: 120

Type

Completion Requirement

Upper Division Program

Crime science majors must complete 40 credit hours of core courses and 20 credit hours of general electives. Students must earn a grade of 'C' or higher in all classes required for the major and satisfy the Green School Language Requirement.

Core Courses: 40 credits

Complete ALL of the following Courses:

- CCJ4014 - Criminological Theory
- CCJ4045 - Transnational Crime
- CCJ4225 - The Courts and Forensic Science
- CCJ4700 - Research Methods and Analysis
- CCJ4072 - GIS and Crime Mapping
- CJE3444 - Security and Crime Science

- CJE3610 - Crime Scene Investigation (CSI)
- CJE4694 - Cyber Crime
- CJE4717 - Senior Capstone in Crime Science
- CJL4133 - Criminal Evidence
- CHS2500 - Survey of Forensic Science
- CHS2500L - Survey of Forensic Science Laboratory
- CTS1120 - Fundamentals of Cybersecurity
- EEE4752 - Introduction to Network Forensics and Incident Response

General Electives: 20 credits

Students must complete 5 credit hours of 3000 or 4000 level courses and 9 credit hours outside the Criminology and Criminal Justice Department. Students are strongly encouraged to complete an internship to gain practical experience in the field (CCJ4940 Internship in CJ). For information on internships, see http:/cj.fiu.edu/internship/.

Major Requirements

There are no majors associated with this program.

Track, Specialization, Concentration, Area of Emphasis, or Other Curricular Offering Requirements

Other Curricular Offering: 4+1 BS in Crime Science to MPA Accelerated Degree Pathway

Type

Completion Requirement

Required Courses Part 1

The MPA program allows qualified students to earn both their Bachelor's and MPA degrees in a shorter amount of time than typically required for earning degrees sequentially. A student admitted to the Accelerated (4+1) degree BS in Crime Science/ MPA Degree Pathway will be considered to have undergraduate status until the student applies for graduation from bachelor's degree program.

Upon conferral of the bachelor's degree, the student will be granted graduate status and be eligible for graduate assistantships.

Students accepted into the Accelerated (4+1 degree) BS in Crime Science/MPA Degree Pathway may take up to four MPA courses, 12 graduate credits, which will be double counted for their Bachelor's and MPA degrees.

Students admitted into the Accelerated (4+1 degree) BS in Crime Science/MPA Degree Pathway should take up to four courses from the listed below toward satisfying both their Bachelor's and MPA degree requirements:

Complete ALL of the following Courses:

- PAD6053 - Political, Social and Economic Context of Public Administration

PAD6053 Pol Soc Econ Pub Adm must be taken within the first two semesters after a student is accepted into the combined degree pathway

Required Courses Part 2

Complete at least 2 of the following courses:

- PAD6227 - Public Finance and the Budgetary Process
- PAD6306 - Policy Analysis
- PAD6417 - Human Resource Policy and Management
- PAD6434 - Leadership and Decision-making
- PAD6701 - Quantitative Methods in Public Administration
- PAD6726 - Applied Research Methods for Accountability in Public and Nonprofit Organizations
- PAD6718 - Smart Governance

If only two courses are selected from the above list, students may select one additional graduate-level course to be double counted. The course must have a course number of 5000 or higher and have a prefix of PAD, PUP, URP, or URS.

Students in the Accelerated (4+1 degree) BS in Crime Science/MPA Degree Pathway should consult their advisor regarding substitutions of the courses mentioned above for undergraduate courses in their program.

Students must pass graduate courses with a grade of B or higher to count them toward their MPA degree. Students accepted into the Accelerated Degree Pathway must fulfill all the MPA requirements to receive their MPA degree.

Note: PAD6701 Quant Applications is a prerequisite to PAD6726 App Res Acct Pub

CRSHYD:CFI - Graduate Certificate in Cruise Ship and Super Yacht Design

Overview

Degree Offered
ACRT - Academic Certificate

Program Title
Graduate Certificate in Cruise Ship and Super Yacht Design

The Certificate in Cruise Ship and Super Yacht Design prepares designers to address specific issues associated with the design of cruise ship and yacht interiors. This is the nation's only formal educational initiative that prepares interior designers to work in the cruise ship and yacht industry. Admission to the certificate program is limited to students beginning the second year of the Master of Interior Architecture program who have earned a graduate level GPA of 3.0 or higher. Capitalizing on Miami's coastal location, this one-year certificate program is seamlessly integrated into the MIA curriculum and comprises two design studios—one based in Miami, Florida, and the other in Genoa, Italy. The program offers specialized knowledge enabling students to address the conceptual, developmental, and documentation phases of cruise ship and yacht design.

For more information, visit the College of Communication, Architecture, and the Arts website.

Requirements

Simple Requirements

Admissions Requirements

The certificate program is offered to students who are enrolled in the FIU's Master of Interior Architecture program.

Entrance into the program is limited to students entering their fourth year of the MIA curriculum who have earned a 3.0 or better grade point average in the graduate program. All applicants should access the appropriate application through the OneStop website, at: https://admissions.fiu.edu/how-to-apply/graduate-applicant/applications/index.html. The application is in paper form and must be completed by the student.

This certificate is open to degree-seeking students only.

Prerequisites

Contact advisor for information about any prerequisites.

Program Requirements

Ownership of Student Work

Student work, submitted to the department in satisfaction of course or degree requirements, becomes the physical property of the department. However, students retain all rights to the intellectual property of such work. This work may include papers, drawings, models, and other materials. The department assumes no responsibility for safeguarding such materials. At its discretion, the department may retain, return, or discard such materials. The department will not normally discard the materials of currently enrolled students without giving the student an opportunity to reclaim them.

Program Credit Hours: 15

Type

Completion Requirement

Required Courses

The certificate program consists of 15 credit hours of courses currently embedded within the existing Master of Interior Design curriculum: two specialized sixteen-week studio courses; plus an industry specific internship course coordinated through FIU's interior design program.

Complete ALL of the following Courses:

- IND5418 - Design at Sea
- IND6257C - Graduate Design 3
- IND6258C - Graduate Design 4

Major Requirements

There are no majors associated with this program.

There are no tracks, specializations, concentrations, areas of emphasis, or other curricular offerings associated with this program.

CRTIND:CFI - Undergraduate Certificate in Creative Industries

Overview

Degree Offered
ACRT - Academic Certificate

Program Title
Undergraduate Certificate in Creative Industries

The Undergraduate Certificate in the Creative Industries prepares students for entry-level and early-career positions within arts organizations and cultural industries. The curriculum emphasizes practical, workforce-ready skills related to exhibition development, curatorial practice, marketing and promotion, grant writing, legal foundations, professional writing, documentation, and gallery operations. Through applied coursework and internship or fieldwork experiences, students gain firsthand knowledge of how museums, galleries, nonprofit arts organizations, and creative enterprises function. The certificate supports career readiness by strengthening professional communication, organizational awareness, and real-world experience, equipping students to transition effectively into the creative workforce or related professional roles.

Admissions Requirements for the Master of Fine Arts (MFA) in Creative Writing

To be admitted to the Master of Fine Arts (MFA) in Creative Writing, a student must meet the university's graduate admissions requirements and:

(1) Hold a baccalaureate degree with a 3.0 GPA;

(2) Completed a minimum of nine (9) credits of undergraduate coursework in creative writing; and

(3) Submission of a writing sample.

Admission is based primarily on the strength of the applicant’s submitted writing sample.

Please refer to the Program Website for further details.

Financial Support

Fellowships, teaching assistantships, and tuition remission scholarships are available on a competitive basis.

Program Requirements

The MFA in Creative Writing requires 48 credits in studio/academic curriculum, with a minimum in each area as follows:

-- Literature: 15 credits

-- Writing Workshop (both poetry and fiction required: 18 credits

-- Form and Theory: 3 credits

-- Thesis: 6 credits

There is no foreign language requirement. Graduate workshops include short fiction, the novel, memoir, screenwriting, creative non-fiction, and poetry. The program places emphasis on the preparation and completion of a book-length creative thesis of publishable quality. Candidates must pass a final defense/examination.

CSD:CFI - Graduate Certificate in Communication Sciences and Disorders

Overview

Degree Offered
ACRT - Academic Certificate

Program Title
Graduate Certificate in Communication Sciences & Disorders

The post-baccalaureate Graduate Certificate in Communication Sciences & Disorders prepares students to support speech-language pathology professionals through comprehensive practical and classroom experience. Students learn about disorders and treatments, communication devices, and working with people with verbal impairments. Successful completion of the program can serve toward a career as a speech-language pathology assistant, or as the foundation to apply for our Master of Science in Speech-Language Pathology (MS-SLP) degree program.

Admissions Requirements

A student already holding a BA or BS degree who has a minimum 3.0 cumulative GPA is eligible to apply for the Graduate Certificate program in CSD. A minimum grade of “C” or better is required for all certificate courses. For any courses in the Graduate Certificate program in CSD that are eligible for transfer to the “Masters’” program in SLP (see Graduate course catalog), a minimum grade of “B” is required.

This certificate is open to non-degree-seeking students only.

Prerequisites

Contact advisor for information about any prerequisites.

Program Requirements

Additional Requirements

To remain in the Graduate Certificate program in CSD, students must maintain a minimum 3.0 cumulative GPA in the graduate certificate coursework. To be awarded the Graduate Certificate in CSD, the student must achieve a minimum 3.0 GPA in the certificate and complete all of the courses in the Certificate at FIU. Students in the Graduate Certificate in CSD are required to be continuously enrolled in at least two courses per semester (except when taking the last course in the certificate program). Furthermore, all students are required to complete the certificate within four continuous semesters, which includes summer semesters.

Program Credit Hours: 28

Type

Completion Requirement

Required Courses: 28 credits

The Graduate Certificate program in CSD consists of 28 required credits (10 courses) of specified graduate coursework.

Complete ALL of the following Courses:

- SPA5009C - Normal Communication Development and Disorders
- SPA5012C - Introduction to Communication Sciences and Disorders
- SPA5035C - Disorders of Hearing and Audiological Sciences
- SPA5051C - Clinical Observation, Management, and Procedures in Communication Disorders
- SPA5102C - Advanced Human Anatomy and Physiology of Mechanisms of Communication
- SPA5102L - Laboratory in Advanced Human Anatomy and Physiology of Mechanisms of Communication
- SPA5113C - Advanced Applied Phonetics
  OR LIN5206 - Phonetics
- SPA5150C - Acoustics of the Sciences of Speech and Hearing
- SPA5262C - Linguistics for Speech-Language Pathology
  OR LIN5018 - Introduction to Linguistics
- SPA6322 - Aural Habilitation and Rehabilitation

Note: SPA6322 Aural Rehab is a required course in the “Masters’” program in SLP at FIU. Students who complete this course through the Graduate Certificate in CSD or who complete the course at another university will be exempt from taking the course in the “Masters’” program.

Core Natural Science Courses: 3-9 credits

Complete course(s) and earn 3 - 9 credits from the following:

- CHS4600 - Marine Chemistry
- OCB3043 - Marine Biology and Oceanography
- OCB3043L - Marine Biology and Oceanography Lab
- OCE3014 - Oceanography
  OR OCP3002 - Physical Oceanography
- OCE3014L - Oceanography Lab

Students may take either OCP3002 Physical Oceanography or OCE3014 Oceanography, **NOT both.**

Core Social Science Courses: 3 credits

Earn at least 3 credits from the following:

- EVR4356 - Coastal and Marine Environmental Policy
- GEO4391 - Marine Geography
- INR4412 - International Law of the Sea
- OCB4070 - Coastal Marine Conservation

Other Primary Courses: 3 credits

Earn at least 3 credits from the following:

- ART4843C - TRANSMEDIA: Land + Environment
- ENC3363 - Writing About the Environment
- GLY4734 - Changing Coastlines
- HFT3103 - Global Sustainable Tourism Development in Natural Resources
- HFT4708 - Coastal and Marine Tourism
- LIT4606 - Literature of the Sea
- OCB3264 - Coral Reef Biology
- OCB4303 - Biology of Marine Mammals
- PCB4467C - Marine Protected Areas

Electives: 0-6 credits

Complete course(s) and earn up to 6 credits from the following:

- ANT4340 - Caribbean Cultures
- EVR1001 - Introduction to Environmental Science
- EVR1001L - Introduction to Environmental Science Lab
- EVR1017 - Global Environment and Society
- EVR3013 - Ecology of South Florida
- EVR3013L - Ecology of South Florida Lab
- GEA2000 - World Regional Geography
- GEA3320 - People, Place, and Environment of the Caribbean
- GIS2000 - Cartography & Mapping in Geography
- GIS3048 - Applications of Geographic Information Systems
- GLY1010 - Physical Geology
- GLY1010L - Physical Geology Lab
- HFT3701 - Sustainable Tourism Practices
- HFT3770 - Cruise Line Operations & Management

- JOU3314 - Environmental Journalism: Communicating Environmental Issues in South Florida
- OCB2000 - Introductory Marine Biology
- OCB2000L - Introductory Marine Biology Lab
- PHI3640 - Environmental Ethics

CUBAN:CFI - Undergraduate Certificate in Cuban and Cuban-American Studies

Overview

Degree Offered
ACRT - Academic Certificate

Program Title
Certificate in Cuban and Cuban-American Studies

The Cuban Research Institute offers an Undergraduate Certificate in Cuban and Cuban-American Studies. The certificate provides an opportunity for students to integrate scholarship from various disciplines into a comprehensive program of study. Students gain a broad knowledge of Cuban and Cuban-American history, economics, politics, and culture.

The Undergraduate Certificate in Cuban and Cuban-American Studies is designed to complement a student's major field of study. Interdisciplinary in nature, the program consists of more than 70 courses from numerous departments, including African and African Diaspora Studies, Art and Art History, Economics, English, Global and Sociocultural Studies, History, Linguistics, Music, Politics and International Relations, and Religious Studies.

Admissions Requirements

All degree-seeking students enrolled at FIU qualify for the certificate, which will be awarded upon graduation. This certificate is open to degree-seeking students only. A working knowledge of Spanish is recommended.

Students interested in the certificate program should contact the Cuban Research Institute at (305) 348-1991, or e-mail cri@fiu.edu.

Prerequisites

Contact advisor for information about any prerequisites.

Program Requirements

Certificate Requirements: 18 Credits

Type
Completion Requirement

Requirements

Students are required to take:

LAH4482 Cuba: 18Th C.-20Th C Cuba: 18th-20th Centuries as well as five other courses from four different departments for a total of 18 credits.

Courses applicable for the certificate are listed every semester in the University's course schedule.

Courses at the five-thousand level qualify for the program. However, undergraduates should consult with the professor prior to taking such courses as typically only advanced seniors qualify for enrollment.

One independent study course may be submitted to count towards the certificate provided that the final paper is of thematic relevance. To inquire if a specific course meets the certificate requirements please contact an advisor at the Cuban Research Institute.

The following courses fulfill certificate requirements. These courses represent a partial list; students should consult with the certificate program advisor about current course offerings.

Fulfill ANY of the following requirements:

African and African Diaspora Studies

Complete ANY of the following Courses:

- AFA2004 - Black Popular Cultures: Global Dimensions
- AFA4933 - Special Topics in Black Transnationalism

OR

Anthropology

Complete ANY of the following Courses:

- ANT3241 - Myth, Ritual, and Mysticism
- ANT3451 - Anthropology of Race and Ethnicity
- ANT4477 - Area Studies (Inactive)
- ANT4340 - Caribbean Cultures
- ANT4343 - Cuban Culture and Society

OR

Art and Art History

Complete ANY of the following Courses:

- ARH4450 - Modern Art
- ARH4470 - Contemporary Art
- ARH4672 - A History of Cuban Art

OR

Biological Sciences

Complete ANY of the following Courses:

- BSC4363 - Biodiversity in the Caribbean Basin

OR

Communication

Complete ALL of the following Courses:

- NGR6718 - Testing and Evaluation in Nursing Education

NGR6710L Clin. Spec. Practicum NE ***Note***: **Prior Learning Assessment (PLA)** - The PLA process is integrated as part of this 1-credit/60-hour clinical practicum course, designed to award credit to Nurse Educator Certificate students who are Board-Certified Advanced Practice Registered Nurse (APRN) providers, based on the evaluation of the individual's direct-patient advanced practice care gained in the clinical setting, as a practicing nurse practitioner. Direct-patient care knowledge, skills, and competencies, at the advanced practice level, can be demonstrated by producing an electronic portfolio to include evidence of the following items:

1. Active Unencumbered APRN license,
2. Active Board Certification in an APRN specialty role,
3. Current APRN employment verification within the last 5 years,
4. Current clinical experience within the last 5 years, and a
5. Reflective Writing Assignment

All Nurse Educator Certificate students must enroll in NGR 6710L and complete the course requirements to pass the course. Students who submit the electronic portfolio to satisfy the PLA (approval at the discretion of the faculty), will be exempt from the 60-hour clinical practicum requirement. Students who are unable to produce the electronic portfolio requirements, will have to complete at least 60 practicum hours of precepted direct-patient care at a FIU-approved clinical site.

There are no tracks, specializations, concentrations, areas of emphasis, or other curricular offerings associated with this program.

CURINS:EDS - Educational Specialist in Teaching and Learning

Overview

Degree Offered
EDS - Education Specialist

Program Title
Teaching and Learning

The Educational Specialist (EdS) degree in Teaching and Learning is an advanced graduate degree for teachers and other professional educators. This program introduces professional educators to the theoretical basis of curriculum and instruction and provides opportunities to connect theory with practice. Students may specialize in one of six areas: Curriculum, Cultural and Social Studies; Elementary Education and Early Childhood Education; Kinesiology; Language, Literature, Literacy, and Culture; Science, Technology, Engineering and Mathematics (STEM) Education; or Special Education.

For more information, visit the College of Arts, Sciences, and Education website.

Requirements

Simple Requirements

Admissions Requirements

Minimum admissions requirements for the EdS Program in Teaching and Learning are as follows:

(1) A Bachelor's Degree from an accredited institution in an appropriate area with a 3.0 GPA on a 4.0 scale on the last 60 hours of undergraduate work or a 3.25 GPA in a completed Master's Degree from an accredited program.

(2) International graduate student applicants whose native language is not English are required to submit a score for the Test of English as a Foreign Language (TOEFL) or for the International English Language Testing System (IELTS). A total score of 80 on the iBT TOEFL or 6.5 overall on the IELTS is required.

(3) Three letters of recommendation addressing the applicant's academic abilities. Letters and any other supporting documents are to be submitted per instructions on Graduate Admissions portal.

(4) A letter of intent.

(5) An admissions interview by the Teaching and Learning Admissions Committee.

The Teaching and Learning Admissions Committee will review, interview, and make admissions recommendation for each applicant. The GPA scores stated above are minimum requirements. Meeting the minimum requirements does not guarantee admission.

Program Requirements

The Ed.S Degree requires 60 credit hours beyond the bachelor's degree. Students with a master's degree directly related to the area of concentration must complete a minimum of 36 credit hours at FIU beyond their master's degree.

A maximum of 24 credits from a completed master's degree in Teaching and Learning or related field from an accredited institution may be applied toward the Ed.S. with advisor's approval.

The Ed.S. program of study includes three required components (to include a maximum of 24 credits from a completed master's degree):

--Teaching and Learning Core (9 credit hours)

--Research Inquiry and Analysis (12 credit hours)

--Major Area of Specialization (39 credit hours)

Degree Program Credit Hours: 60

Type

Completion Requirement

Required Courses

Fulfill ALL of the following requirements:

Teaching and Learning Core: 9 Credits

The Teaching and Learning Core includes a coherent sequence of courses and experiences required of all students.

Complete ALL of the following Courses:

- EDG7923C - Doctoral Seminar in Curriculum Studies
- EDG7362 - Instruction: Theory and Research
- EDG7692 - Theory, Organization, and Policy in Teaching and Learning

AND

Research Inquiry and Analysis: 12 Credits

Select at least 12 credit hours with approval of Major Professor/Committee on appropriate course selection.

At least 12 credit hours of advanced coursework to include at least one quantitative and one qualitative methods course related to the comprehensive exam component on research.

AND

Major Area of Specialization: No Less Than 39 Credits

Select at least 39 credit hours with approval of Major Professor/Committee on appropriate course selection.

All courses must be at the 5000-level or higher.

Major Requirements

There are no majors associated with this program.

Track, Specialization, Concentration, Area of Emphasis, or Other Curricular Offering Requirements

The following areas of specialization are offered: Curriculum, Cultural and Social Studies; Elementary Education and Early Childhood Education; Kinesiology; Language, Literacy, Literature, and Culture; Science, Technology, Engineering, and Mathematics (STEM) Education; and Special Education.

CURINS:MS - Master of Science in Curriculum and Instruction

Overview

Degree Offered
MS - Master of Science

Program Title
Curriculum and Instruction

The Master of Science in Curriculum and Instruction (MSCI) program prepares professionals to further their knowledge on curriculum and instruction by facilitating learning and development within diverse settings; promotes the discovery, development, documentation, assessment, and dissemination of guiding philosophies related to teaching and learning; and develops professional partnerships in the larger community. Applicants can major in one of the following areas: (1) Curriculum Development, (2) Elementary Education, (3) English Education, (4) Learning Technologies, (5) Mathematics Education, (6) Science Education, (7) Social Studies Education, (8) Curriculum Development Research Emphasis (9) Elementary Education Research Emphasis.

Requirements

Simple Requirements

Admissions Requirements

Admissions Requirements for the Master of Science (MS) in Curriculum and Instruction

Applicants for admission into the Master of Science in Curriculum and Instruction program must meet the minimum University Graduate School admission criteria. Admission to the masters program will be based on the following criteria:

(1) A bachelor’s degree Education or an appropriate area from an accredited institution.

(2) Applicants with a non-Education degree must demonstrate teaching experience.

(3) A GPA of 3.0 in the last 60 semester hours of upper division undergraduate study.

(4) Two (2) letters of recommendation to support the application.

(5) A statement of personal philosophy/professional goals consistent with the objectives of the master’s program.

(6) International graduate student applicants whose native language is not English are required to submit a score for the Test of English as a Foreign Language (TOEFL) or for the International English Language Testing System (IELTS). A total score of 80 on the IBT TOEFL or 6.5 overall on the IELTS is required. (Exceptions: Students who completed an undergraduate or graduate program from a U.S. institution or accredited higher education institution in other English-speaking countries).

Admissions Procedures

In order to begin the masters program, a student must be accepted into the University Graduate School and the program in Curriculum and Instruction. Admission procedures are as follows:

(1) Follow all of the instructions for the online graduate admission application available at https://admissions.fiu.edu/how-to-apply/graduate-applicant/index.html. Official transcripts of all prior college work must be submitted following the online admission procedures. Omission of any one of these items will delay the processing of the application.

(2) Two letters of recommendation are required. Letters are to be from those who have knowledge of the applicant's prior professional experience (e.g. a supervisor) or of the applicant's ability to perform graduate work (e.g., a professor) and should attest to the applicant's intellectual ability, motivation, maturity, and potential. Letters and any other supporting documents are to be submitted following the online admission procedures.

(3) Once the University application procedures are completed, the Graduate Admissions Office forwards the applicant's materials to the Department of Teaching and Learning. The file is then forwarded to the program faculty for review. On the basis of its review, the program faculty will (1) recommend admission, (2) withhold a decision and request additional information from the applicant, or (3) deny admission.

(4) Admission to the program is determined by the program faculty on the basis of its evaluation of the applicant's academic and professional credentials.

(5) Meeting the minimum admission requirements does not guarantee admission into the program.

Transfer of Credit

Students may be allowed to apply up to six semester hours of course work taken at accredited institutions to the master's program requirements with the following stipulations:

(1) The student received a grade of 3.0 or better on a 4.0 scale.

(2) The course was relevant, as judged by the Admissions Committee.

(3) The course is listed on an official transcript received by the Graduate Admissions Office.

(4) The course will be no older than 6 years at the time of graduation with a master’s degree.

(5) The course(s) meets all University requirements.

Program Requirements

The Master of Science in Curriculum and Instruction program requires 30 semester hours beyond the bachelor's degree. Up to 6 semester hours of graduate credit may be transferred into the master's program. The Master of Science in Curriculum and Instruction program includes the following required components:

Degree Core (12 credits)

--Curriculum and Instruction Core (9 credits)

--Research Core (3 credits)

Content Majors (18 - 24 credits)

Students must choose a major to complete the degree requirements.

The MSCI Program is a non-initial teacher preparation program and does not lead to teaching certification.

Degree Program Credit Hours: Minimum 30

Type

Completion Requirement

Degree Core: 12 Credits

Fulfill ALL of the following requirements:

Curriculum and Instruction Core: 9 Credits

Fulfill ALL of the following requirements:

Curriculum and Instruction Core Part I

Complete ALL of the following Courses:

- EDG6250 - Curriculum Development
- EDG6627 - Seminar: Issues and Trends in Curriculum and Instruction

AND

Curriculum and Instruction Core Part II

Special Methods of Teaching

Choose one from the following:

Complete at least 1 of the following courses:

- EDE5267 - Education of the Child in Urban Society
- EME6405 - Computers in the Classrooms
- LAE6339 - Teaching English in the Secondary School
- MAE6336 - Teaching Mathematics in the Secondary School
- SCE6366 - Teaching Science in the Secondary School
- SSE6633 - Teaching Social Studies in the Secondary School

AND

Research Core: 3 Credits

Complete ALL of the following Courses:

- EDF5481 - Foundations of Educational Research

AND

Content Majors: 18-24 Credits

Students must choose a major from the section below to complete the degree requirements.

Additional Comments:
The MSCI Program is a non-initial teacher preparation program and does not lead to teaching certification

Major Requirements

Curriculum Development Major

The MSCI in Curriculum Development Major seeks to familiarize graduate students with the knowledge and skills to design, deliver, and assess lessons/units and programs. The MSCI Curriculum Development track will expand students' knowledge in curriculum design theories and frameworks, identifying learning and teaching needs, understanding of current issues impacting our classrooms, and promoting teaching and learning research-based practices. This program is designed to benefit educators and/or administrators.

Curriculum Development: 18 Credits

Type
Completion Requirement

Required Courses

Complete ALL of the following Courses:

- EDG5417 - Fundamentals of Learning
- EDE6205 - Curriculum Design for Childhood Education
- ESE6215 - Secondary School Curriculum
- EDG6286 - Curriculum Evaluation and Improvement in Urban School Systems
- EDG6920 - Colloquium in Curriculum and Instruction
- EDG7692C - Politics of Curriculum

Elementary Education Major

The MSCI Elementary Education Major seeks to expand teachers' knowledge base and enhance teaching methodologies in the K-6 setting.

Elementary Education: 18 Credits

Type
Completion Requirement

Additional Comments:
12 graduate credits (with Advisor approval) from the following areas (no more than 6 semester hours from any one area):

· Art Education

· Early Childhood Education

· Mathematics Education

· Reading

· TESOL

· Science Education

· Social Studies Education

· Special Education

· Linguistics

· Psychology

· Sociology

Curriculum and Instruction Electives – Select 6 graduate credits (with Advisor approval) from General Education or Foundations of Education courses.

English Education Major

The MSCI English Education Major allows teachers and future teachers to gain knowledge of a more varied English content; implement curriculum theories and pedagogical concepts; and to write for different audiences and purposes which includes conducting research about students, teachers, and the English Language Arts (ELA) profession.

English Education: 18 Credits

Type
Completion Requirement

Additional Comments:
Select (with Advisor approval) 6 graduate level courses in English/English Education.

Learning Technologies Major

The MSCI Learning Technologies Major seeks to teach teachers how to use technologies to facilitate teaching and learning. Teachers will also learn to create digital artifacts that they can use in their classrooms and how to teach programming and computational thinking to their K-12 students.

Learning Technology Innovations: 18 Credits

Type
Completion Requirement

Required Courses

Select (with Advisor approval) 6 graduate-level courses in the Technology Education/Technology/Technology Innovations, including Artificial Intelligence.

Mathematics Education Major

The MSCI Mathematics Education Major is designed for current and future K-16 teachers of mathematics, (non-teacher certification track). This track focuses on building the understanding needed to teach mathematics effectively and on developing mathematics content knowledge for teaching. The MSCI in Mathematics Education supports continuous growth and development of K-16 teachers as reflective practitioners for teaching mathematics. Additionally, this track helps K-16 teachers develop knowledge and skills appropriate for mentoring, collaborating with other teachers, and providing professional development for continuous growth in teaching mathematics.

Mathematics Education: 18 Credits

Type
Completion Requirement

Additional Comments:
Select (with Advisor approval) 6 graduate level courses in Mathematics/Mathematics Education/STEM Education.

Science Education Major

The MSCI Science Education Major is suitable for current K-12 teachers and other educators interested in science education. The track seeks to further develop individuals' knowledge of curriculum, theory, and practices related to teaching science.

Science Education: 18 Credits

Type
Completion Requirement

Additional Comments:
Select (with Advisor approval) 6 graduate level courses in the Sciences/Science Education.

Social Studies Education Major

The MSCI Social Studies Education Major is designed for individuals that teach in the fields of Social Studies (e.g., History, Geography, the Humanities and Social Sciences) at the middle or secondary levels. In addition to the core education courses, students will take content specific areas including interdisciplinary studies across the university. Individuals may also gain the content knowledge applicable to teaching dual enrollment courses in these content areas.

Social Studies Education: 18 Credits

Type
Completion Requirement

Additional Comments:
Select (with Advisor approval) 6 graduate level courses in the Social Sciences/Social Studies Education or Area Studies: African and African Diaspora Studies, Asian Studies, Latin American and Caribbean Studies, European Studies. Students are encouraged to take courses with a global/international perspective.

Curriculum Development Research Emphasis Major

The MSCI in Curriculum Development Research Emphasis Major seeks to familiarize graduate students with the knowledge and skills to design, deliver, and assess lessons/units and programs with a research focus. The MSCI Curriculum Development Major will expand students' knowledge in curriculum design theories and frameworks, identifying learning and teaching needs, understanding of current issues impacting our classrooms, and promoting teaching and learning research-based practices. This program is designed to benefit educators and/or administrators.

Curriculum Development Research Emphasis: 24 Credits

Type
Completion Requirement

Required Courses: 18

Fulfill ALL of the following requirements:

Required Courses

Complete ALL of the following Courses:

- EDG5417 - Fundamentals of Learning
- EDE6205 - Curriculum Design for Childhood Education
- ESE6215 - Secondary School Curriculum
- EDG6286 - Curriculum Evaluation and Improvement in Urban School Systems
- EDG6920 - Colloquium in Curriculum and Instruction
- EDG7692C - Politics of Curriculum

Curriculum and Instruction Elective: 3 Credits

Advisor approved elective in Curriculum and Instruction.

AND

Research: 3 Credits

Complete ALL of the following Courses:

- EDF6481 - Educational Research Methodology

Curriculum and Instruction Elective: 3 Credits

Advisor approved elective in Curriculum and Instruction.

Elementary Education Research Emphasis Major

The MSCI Elementary Education Major seeks to expand teachers' knowledge base and enhance teaching methodologies in the K-6 setting.

Elementary Education Research Emphasis: 24 Credits

Type

Completion Requirement

Select - 12 graduate credits (with Advisor approval) from the following areas (no more than 6 semester hours from any one area):

· Art Education

· Early Childhood Education

· Mathematics Education

· Reading

· TESOL

· Science Education

· Social Studies Education

· Special Education

· Linguistics

· Psychology

· Sociology

Fulfill ALL of the following requirements:

Research: 3 Credits

Complete ALL of the following Courses:

- EDF6481 - Educational Research Methodology

Curriculum and Instruction Elective – Select 9 graduate credits (with Advisor approval) from General Education or Foundations of Education courses.

Track, Specialization, Concentration, Area of Emphasis, or Other Curricular Offering Requirements

There are no tracks, specializations, concentrations, areas of emphasis, and other curricular offerings associated with this program.

CYBER:BS - Bachelor of Science in Cybersecurity

Overview

Degree Offered
BS - Bachelor of Science

Program Title
Cybersecurity

The Bachelor of Science (BS) in Cybersecurity degree emphasizes the core principles of cybersecurity. Students master the intricacies of network security, cryptography, ethical hacking, and digital forensics. They navigate cyber threats, learning to anticipate, detect, and neutralize malicious activities that lurk in the digital realm. With hands-on experience in state-of-the-art labs and simulations, students hone their skills in real-world scenarios, dissecting cyber-attacks and fortifying systems against potential breaches. They analyze case studies of past incidents, extracting valuable lessons to inform their strategies in the ongoing battle for digital security. Upon completing the degree, graduates emerge as cyber guardians, armed with a comprehensive understanding of cybersecurity frameworks and best practices. They are adept at designing robust defense systems, conducting vulnerability assessments, and implementing proactive measures to mitigate risks. Graduates of this program will apply principles, best practices, and current cybersecurity techniques to protect computing infrastructure, data, processes, and people from adversaries and exposure.

Program Requirements

CEC Academic Progression Standard

Students admitted to the program must successfully complete MAC 1147 within three academic terms, not counting summers. Students not meeting the math progression requirement will be advised to move to a program where they can be more successful.

Lower Division Preparation

Type
Prerequisite

Common Prerequisite Courses

Students must complete the following courses as part of their course work, preferably during the first 60 credits.

Please visit https://cpm.flvc.org for a current list of state-approved common prerequisites.

Fulfill ALL of the following requirements:

Part I

Complete ALL of the following Courses:

- CGS1540 - Introduction to Databases for All
  OR CTS1500 - Emerging Topics in Digital Life
  OR CTS1120 - Fundamentals of Cybersecurity
- COP2047 - Python Programming I
- COP1000 - Introduction to Computer Programming
  OR COP2270 - Secure C Programming For Engineers
- ECO2013 - Principles of Macroeconomics
- MAC1140 - PreCalculus Algebra
  OR MAC1147 - Pre-Calculus Algebra and Trigonometry
- MAD2104 - Discrete Mathematics
- PSY2012 - Introductory Psychology
- STA2023 - Statistical Methods

STA2023 Statistical Methods may be replaced with STA3111 Statistics I.

MAD2104 Discrete Mathematics may be replaced with COT3100 Discrete Structures.

AND

Part II

Any University Core Curriculum (UCC) Physics Course must also be taken.

Upper Division

Type
Completion Requirement

Third and Fourth Years: 42 credits

At least 50% of the upper-division credits required for the BS in Cybersecurity must be taken at FIU.

Complete ALL of the following Courses:

- CGS3095 - Technology in the Global Arena
- CGS3767 - Computer Operating Systems
- CGS4285 - Applied Computer Network
- CIS3080 - Cloud Essentials

- CIS4203 - Principles and Practices of Digital Forensics Science
- CIS4225 - Cybersecurity Risk and Threat Analysis
- CIS4332 - Applied IT Security
- CIS4365 - Enterprise Cybersecurity Policies and Practices
- CNT4403 - Computing and Network Security
- COP3804 - Intermediate Java Programming
- COP4703 - Information Storage and Retrieval Concepts
- ENC3249 - Professional and Technical Writing for Computing
  OR ENC3213 - Professional and Technical Writing
- IDC2002 - Artificial Intelligence for All
- CIS3950 - Capstone I
- CIS4951 - Capstone II

Cybersecurity Electives: 9 credits

Students must complete three courses from the list of electives maintained by KFSCIS*. These electives will be drawn from acceptable elective courses from the BA in Computer Science, BS in Information Technology, and from the concentration electives of Electrical and Computer Engineering Department.

Earn at least 9 credits
*https://www.cis.fiu.edu/academics/degrees/undergraduate/cybersecurity/

Interdisciplinary Courses: 9 credits

Nine additional credits must be taken from one cognitive area outside KFSCIS. For example, 9 credits within a minor or certificate meets this requirement. Find minors and certificates in the FIU University Catalog. When there is no minor or certificate in the area of the student's interest, a set of courses can be created with the approval of advisers from KFSCIS and from the other area of interest.

Earn at least 9 credits

Major Requirements

There are no majors associated with this program.

Track, Specialization, Concentration, Area of Emphasis, or Other Curricular Offering Requirements

There are no tracks, specializations, concentrations, areas of emphasis, or other curricular offerings associated with this program.

CYBER:MS - Master of Science in Cybersecurity

Overview

Degree Offered
MS - Master of Science

Program Title
Cybersecurity

The Master of Science (MS) in Cybersecurity prepares students in the protection of systems, data assets, and sensitive information. The program features a curriculum focused on policy operations and technologies and defense techniques. Students will work with secure systems and applications, develop an understanding of the legal impacts of cybersecurity, and learn how to lead, manage, and help build cybersecurity solutions. The program will prepare students to meet the growing need for leaders who can protect data and information in the public and private sectors. The program also will equip students with the advanced skills and versatile knowledge needed to lead large, complex, and multi-disciplinary cybersecurity challenges.

For more information, visit the College of Engineering and Computing website.

Requirements

Simple Requirements

Admissions Requirements

Admissions Requirements for the Master of Science (MS) in Cybersecurity

The following are in addition to the University's graduate admission requirements.

(1) A Bachelor's degree in Computer Science, Computer Engineering, Information Technology, or a similar discipline from an accredited institution. A degree in a related field is acceptable if the applicant shows evidence of background suitable for entry into the master's program as judged by the Graduate Committee. The academic background of each student shall be analyzed to determine if there is a need for remedial courses in addition to the required curriculum.

(2) Per FIU's Graduate Admission Criteria and Denial Policy # 380.0443, the applicant should have a minimum of a "B" average (3.0 GPA) in the last 60 credits of upper-level work undergraduate coursework.

(3) Foreign students whose native language is not English must score at least 550 on the paper-based (or 80 on iBT) in the Test of English as a Foreign Language (TOEFL).

Admissions Requirements for the 4+1 MS in Cybersecurity Accelerated Degree Pathway

To be considered for admission to the combined bachelor's/master's degree pathway, students must have completed 75 credits in the bachelor's degree program at FIU and meet the admissions criteria for the graduate degree program to which they are applying. Students need only apply once to the combined degree pathway. The application is submitted to Graduate Admissions typically before the student starts the last 30 credits of the bachelor's degree program. A student admitted to the combined degree pathway will be considered to have undergraduate status until the student applies for graduation from their bachelor's degree program. Only 5000-level or higher courses with a B grade or better, and no more than 12 credits may be applied toward both degrees.

(1) Current enrollment in a bachelor's degree program at FIU.

(2) Current GPA of 3.3 or higher.

Program Requirements

Required Courses

The students are required to earn 30 credits from 10 courses, or 8 courses and a thesis. The courses include 3 core courses, 4 concentration area courses chosen from one of two concentration areas, and either 3 or 1 elective courses chosen from an approved set of electives.

Program Credit Hours: 30

Type

Completion Requirement

Core Courses: 9 Credits

Complete ALL of the following Courses:

- CIS5370 - Principles of Cybersecurity
- CIS5371 - Introduction to Cryptography
- CIS5374 - Security and Privacy: Attacks and Defenses

Concentration Area Courses: 12 Credits

Students need to choose one concentration area (Systems Concentration Area or Applications Concentration Area) and choose 4 courses from that area (see Knight Foundation School of Computer and Information Sciences or Department of Electrical and Computer Engineering for course lists).

Students who choose the Systems area will study security and privacy issues in computer, network, and information systems.

Students who choose the Applications area will study various applications of cybersecurity, as well as security policy, compliance, and management issues.

Earn at least 12 credits

Elective Courses: 9 Credits

Fulfill ANY of the following requirements:

Non-thesis Option

9 credits of elective courses

Earn at least 9 credits

OR

Thesis Option

Fulfill ALL of the following requirements:

Thesis: 6 Credits

Complete ALL of the following Courses:

- CIS6970 - Thesis

AND

Elective Courses: 3 Credits

Earn at least 3 credits

Additional Comments:

List of Concentration courses is maintained by the Knight Foundation School of Computing and Information Sciences and the Department of Electrical and Computer Engineering.

Major Requirements

There are no majors associated with this program.

Track, Specialization, Concentration, Area of Emphasis, or Other Curricular Offering Requirements

Other Curricular Offering: 4+1 MS in Cybersecurity Accelerated Degree Pathway

With the KFSCIS Graduate Advisor's approval, students from undergraduate majors from the KFSCIS as well as other colleges and disciplines may apply to the Accelerated 4+1 MS in Cybersecurity Degree Pathway. If accepted, students will be allowed to take up to 12 credits of the KFSCIS advisor-approved graduate courses which will apply toward both their undergraduate and their master's degree programs.

CYBRMG:MBA - Master of Business Administration in Cybersecurity Risk Management

Overview

Degree Offered
MBA - Master of Business Administration

Program Title
Cybersecurity Risk Management

The Master of Business Administration (MBA) in Cybersecurity Risk Management prepares students to become strategic thinkers who can effectively bridge gaps between business needs, security policies, technologies, and human behaviors. Students will be equipped with the skills to fulfill roles like chief information security officer, security architect, information systems security manager, cyber policy and strategy planner, IT investment/portfolio manager and more.

For more information, visit the College of Business website.

CIP Code
11.1003

Requirements

Simple Requirements

Admissions Requirements

Admissions Requirements for the Master of Business Administration (MBA) in Cybersecurity Risk Management

The Master of Business Administration in Cybersecurity Risk Management (MBA-Cybersecurity) program considers students' work experience, industry knowledge, management skills and undergraduate education as strengths in candidate's qualifying portfolio. The candidate's professional maturity, and managerial experience are highly considered in the admission selection process because the MBA-Cybersecurity program at FIU fosters students' ability to contribute real-world experiences to add value to the overall student learning in this competitive degree program.

To be eligible for admission to the MBA-Cybersecurity program in the Chapman Graduate School of Business, applicants must:

(1) Hold a bachelor's degree or equivalent from either a U.S. accredited college or university or the equivalent degree from institutions outside the U.S.; Students coming from programs where the primary degree is at the master level or higher will meet this requirement.

(2) Have a minimum of four (4) years professional work experience.

(3) Show high promise of success in graduate studies as determined by the faculty based upon academic performance, work experience or a combination of academic and work experience.

(4) Should, in general, have a minimum upper division grade point average (GPA) of 3.0. An applicant with substantial work experience and industry/work related recommendations will be evaluated based on academic qualifications, work experience, and performance;

(5) Provide a resume describing current and past responsibilities, leadership and management experience highlights and, if any, demonstrated accomplishments in management, cybersecurity and/or information systems.

(6) Provide a statement of purpose (short essay) describing how the program fits within personal and career goals. The essay will be evaluated for applicants' effective and succinct writing skills.

(7) When the applicant's studies were completed in non-English speaking countries, demonstrate proficiency of the English language by presenting a minimum score of 80 on the iBT TOEFL (equivalent to 550 on the paper-based version or 213 on the computer-based version of the test of English as a Foreign Language) or 6.5 overall on the International English Language Testing System (IETLS) or by other university level English proficiency standards as they are approved.

Applicants are encouraged to provide any additional documentation to strengthen their application portfolio. Examples of documentation include: Master's degree in any discipline other than an MBA, law degree, professional certifications (i.e. CPA, CFA, SHRM, etc.), GMAT or GRE scores, specialized leadership experience or training documentation that the applicant is part of a "fast track" or "high potential" management group at their organization, or any other similar evidence including letters of reference and recommendations.

Transfer Credits

A student may receive permission to transfer up to a maximum of nine semester hours of graduate credit towards a Master of Science degree program or twelve semester hours of credit for a Master of Business Administration degree program, if:

(1) The courses were taken at the graduate level at an accredited college or university;

(2) The courses were not introductory or survey in nature;

(3) The student earned grades of "B" or higher in the courses;

(4) The courses are judged by the Department Chair, College Dean, Graduate School Dean, and program manager to be relevant to the student's graduate program;

(5) The credits were completed within six years immediately preceding the College's awarding of the degree. Credits are not transferable until the student has earned 15 semester hours in a Chapman School graduate degree program.

Program Requirements

College Policies

To be eligible for a Master's degree, a student must:

(1) Satisfy all University requirements for a Master's degree;

(2) Satisfy required prerequisites;

(3) Complete the required courses in the specific graduate program in which he/she is enrolled.

(4) Earn a minimum average of "B" (3.0) in all approved courses in the student's approved course of graduate study.

No courses in which a graduate student earns a grade below “C” may be counted towards any Master’s degree program in the Chapman School. However, all approved undergraduate and graduate course work a graduate student takes will be counted in computing his or her grade point average, including courses in which he or she has earned a “D” or “F” grade.

Faculty have the discretion to administratively drop students who do not attend the first class of a course.

Complete ALL of the following Courses:

- ACG6026 - Accounting for Managers
- FIN6406 - Corporate Finance
- MAN6608 - International Business
- MAN6245 - Organizational Behavior
- FIN6446 - Competitive Strategy
- QMB6357 - Business Statistical Analysis
- ACG6175 - Financial Reporting and Analysis

Cybersecurity Risk Management Core

Complete ALL of the following Courses:

- ISM6327 - Protecting and Defending Business Digital Assets
- ISM6316 - Project Management
- ISM6267 - Secure Cloud Computing and Virtualization Management
- ISM6328 - Information Security Management
- ISM6575 - Security Risk Management and Organizational Cyber Resilience
- ISM6326 - Information Security and Compliance
- ISM6419 - Business Cybersecurity Data Visualization and AI
- ISM6576 - Cybersecurity Governance and Strategy

Optional Elective

Complete ALL of the following Courses:

- ISM6942 - MIS Internship

Major Requirements

There are no majors associated with this program.

Track, Specialization, Concentration, Area of Emphasis, or Other Curricular Offering Requirements

There are no tracks, specializations, concentrations, areas of emphasis, or other curricular offerings associated with this program.

DATASC2:BS - Bachelor of Science in Data Science and Artificial Intelligence

Overview

Degree Offered
BS - Bachelor of Science

Program Title
Data Science and Artificial Intelligence

Students who decide to pursue a Bachelor of Science in Data Science and Artificial Intelligence at Florida International University will be given a broad foundation in the fast-evolving fields of data science and AI. This degree program will prepare learners with the skills to analyze and interpret complex data, develop algorithms, and build AI systems that can think and learn. Students will explore key concepts in machine learning, neural networks, statistical modeling, and computational problem-solving. Upon completion, graduates are well-prepared to pursue careers in data science, technology, finance, healthcare, robotics, bioinformatics, and many other industries, or to continue their studies in advanced degree programs. This program not only opens up numerous job opportunities but also provides the analytical foundation necessary to drive innovation and decision-making in a data-driven world.

Program website

Academic Group
College of Engineering and Computing

Diploma Title
Bachelor of Science in Data Science and Artificial Intelligence

Total Credits
120

Program Length in Years Based on Full-Time Enrollment
4

CIP Code
30.7001

Requirements

Simple Requirements

Admissions Requirements

Students must follow regular University admission procedures and upon admission declare their specific major as Data Science and Artificial Intelligence.

Program Requirements

Academic Progression Requirements

Steady academic progression is expected by the College of Engineering and Computing. Students who are unsuccessful in passing common pre-requisites after two attempts will be advised to change their major into an area where they can be successful. Drops after the add/drop period, which result in a DR grade, are considered an attempt in the course and count as an unsuccessful enrollment.

Students must also meet the Math Progression standard of successfully completing Calculus 1 within three academic terms, not counting summers.

Students will be redirected to a different degree program when completion of the progression standards, including the applicable math progression standard by its stated semester, is no longer feasible.

Lower Division Preparation

Type

Prerequisite

Common Prerequisite Courses

Complete ALL of the following Courses:

- MAC2311 - Calculus I
- MAC2312 - Calculus II
- MAS3105 - Linear Algebra
  OR MAC2313 - Multivariable Calc
  OR COT3510 - Applied Linear Structures for Computing
- COP2047 - Python Programming I
- BSC2010 - General Biology I
  AND BSC2010L - General Biology I Lab
- PHY2048 - Physics with Calculus I
  AND PHY2048L - General Physics Laboratory I
- STA2023 - Statistical Methods
  OR STA3111 - Statistics I
  OR STA3163 - Statistical Methods I
  OR STA3033 - Introduction to Probability and Statistics for CS
  OR STA3193 - Statistics for Biology I
  OR STA4322 - Introduction to Mathematical Statistics II

Students may take any COP2XXX-X999 Computer Programming course at FIU in place of COP2047

Students may take any Natural Science Group 1 or Group 2 course with lab or BSC 2010/L.

Upper-Division Requirements

At least 50% of the upper division credits required for the BA in Data Science and Artificial Intelligence must be taken at FIU.

Upper Division

Type

Completion Requirement

Degree Program Credit Hours: 120

The Bachelor of Science in Data Science and Artificial Intelligence program will comprise 120 credit hours and will offer students the option to pursue one of the concentrations: Computational and Big Data Analytics, Artificial Intelligence and Robotics, and Statistical Modeling.

Fulfill ALL of the following requirements:

Required Courses: 36 credits

Complete ALL of the following Courses:

- CTS1500 - Emerging Topics in Digital Life
- COP3410 - Computational Thinking
- CAP2757 - Introduction to Data Science
- COP3045 - Python Programming II
- CGS3095 - Technology in the Global Arena
- COT3100 - Discrete Structures
  OR MAD2104 - Discrete Mathematics
- ENC3249 - Professional and Technical Writing for Computing
- COP3538 - Data Structures Fundamentals
- CAP3764 - Advanced Data Science
- CIS3950 - Capstone I
- CAI4002 - Artificial Intelligence
- CIS4951 - Capstone II
- CAI4105 - Introduction to Machine Learning

Elective Courses

Students may broaden their expertise by selecting electives from the up-to-date list of elective courses maintained by the Knight Foundation School of Computing and Information Sciences. For more details and to view the lists of electives (and determine pre-requisites), please visit: KFSCIS's Electives Page for BS in DS & AI.

Concentration Courses: 12 credits

Students complete 4 courses within one concentration, or students complete 4 courses from any of the concentrations:

- **Computational and Big Data Analytics**
- **Artificial Intelligence and Robotics**
- **Statistical Modeling**

Earn at least 12 credits

Major Requirements

There are no majors associated with this program.

Track, Specialization, Concentration, Area of Emphasis, or Other Curricular Offering Requirements

Concentration in Computational and Big Data Analytics

Strong emphasis on developing programming and analytical skills, as well as gaining a solid understanding of computer science principles, and encourages students to apply the latest technologies in data storage, manipulation, security, retrieval, mining, machine learning, AI, and cloud computing.

Concentration in Computational and Big Data Analytics: 12 credits

Type
Completion Requirement

Computational and Big Data Analytics Courses

Complete at least 4 of the following courses:

- CAI4203 - Introduction to Deep Learning
- CAP4770 - Introduction to Data Mining
- COP4534 - Algorithm Techniques
- COT4431 - Applied Parallel Computing
- CEN4083 - Introduction to Cloud Computing
- COP4703 - Information Storage and Retrieval Concepts

Concentration in Artificial Intelligence and Robotics

Developing algorithms and computational techniques to enable machines to learn, reason, and adapt, empowering them to solve complex problems and enhance decision-making processes.

Concentration in Artificial Intelligence and Robotics: 12 credits

Type
Completion Requirement

Artificial Intelligence and Robotics Courses

Complete at least 4 of the following courses:

- CAP4770 - Introduction to Data Mining
- CAI4304 - Natural Language Processing
- CAP4453 - Introduction to Robot Vision
- CDA4625 - Introduction to Mobile Robotics
- CAI4203 - Introduction to Deep Learning
- CAP4506 - Introduction to Game Theory

Concentration in Statistical Modeling

Statistically driven decision making with emphasis on mathematical theory that underlies the models and programming.

Concentration in Statistical Modeling: 12 credits

Type
Completion Requirement

Statistical Modeling Courses

Complete at least 4 of the following courses:

- CAP4830 - Fundamentals of Modeling & Simulations
- STA3164 - Statistical Methods II
- STA4234 - Introduction to Regression Analysis
- MAD3301 - Graph Theory

- MAD3401 - Numerical Analysis
- CAP4770 - Introduction to Data Mining

**STA3164: Prerequisite course is STA3163.*

DATASC:MS - Master of Science in Data Science and Artificial Intelligence

Overview

Degree Offered
MS - Master of Science

Program Title
Data Science and Artificial Intelligence

The Master of Science (MS) in Data Science and Artificial Intelligence is an interdisciplinary degree program designed to provide studies in scientific methods, processes, and systems to extract knowledge or insights from data into various forms. Data science, analytics, and AI are part of a booming field with various applications across industries, from information technology to business analytics to healthcare. This program prepares students for the fastest growing, highest demanded job prospect in recent history. Students will take a step into the world of data-driven models and multidimensional dataset to find answers in bioinformatics, financial computing, computer forensics, big data algorithms, and much more.

For more information, visit the College of Engineering and Computing website.

Requirements

Simple Requirements

Admissions Requirements

Admissions Requirements for the Master of Science (MS) in Data Science and Artificial Intelligence

The following requirements are in addition to the University's graduate admission requirements.

(1) Bachelor's degree in a discipline appropriate for the specialization sought. For example, a specialization in Computational Data Analytics or Artificial Intelligence requires a Bachelor's degree in Computer Science, Computer Engineering, Information Technology, Mathematics, Statistics, or a related discipline. Students seeking to specialize in other tracks would require an appropriate Bachelor's degree. A degree in a related field is acceptable if the applicant shows evidence of background suitable for entry int the master's program as judged by the Graduate Committee. The academic background of each student shall be analyzed to determine if there is need for remedial courses in addition to the required curriculum.

(2) Per FIU's Graduate Admission Criteria and Denial Policy # 380.0443, the applicant should have a minimum of a "B" average (3.0 GPA) in the last 60 credits of upper-level undergraduate coursework.

(3) Foreign students who native language is not English must score at least 550 on the paper-based (or 80 on iBT) Test of English as a Foreign Language (TOEFL), 6.5 overall on International English Language Testing System (IELTS), or 110 on Duolingo.

Admissions Requirements for the 4+1 MS in Data Science and Artificial Intelligence Accelerated Degree Pathway

To be considered for admission to the combined bachelor's/master's degree pathway, students must have completed 75 credits in the bachelor's degree program at FIU and meet the admissions criteria for the graduate degree program to which they are applying. Students need only apply once to the combined degree pathway the application is submitted to Graduate Admissions typically before the student starts the last 30 credits of the bachelor's degree program. A student admitted to the combined degree pathway will be considered to have undergraduate status until the student applies for graduation from their bachelor's degree program. Only 5000-level or higher courses with a B grade or better, and no more than 12 credits may be applied toward both degrees.

(1) Current enrollment in an approved bachelor's degree program at FIU.

(2) Current GPA must be 3.3 or higher.

(3) Completed prerequisites for the MS in Data Science and Artificial Intelligence program or demonstrated competencies in the specialization areas (the latter option requires approval by the graduate program director of the appropriate specialization area)

Program Requirements

Required Courses

Students are required to complete 30 credits of graduate level courses. Included in the program are 12 credits of core courses, 15 credits of elective courses, and 3 credits of a capstone course spread out over two semesters.

Program Credit Hours: 30

Type

Completion Requirement

Core Coursework: 12 Credits

Students must complete these four courses.

Complete at least 4 of the following courses:

- CAP5768 - Introduction to Data Science
- CAP5771 - Principles of Data Mining
- STA6244 - Data Analysis I
  OR PHC6052 - Biostatistics I
  OR QMB6357 - Business Statistical Analysis
- CAP5602 - Introduction to Artificial Intelligence

Required Capstone Course: 3 Credits

Students in each track must complete three credits of capstone course involving a data analytics project. This course is spread over two semesters.

Earn at least 3 credits from the following:

- IDC6940 - Capstone Course in Data Science
  OR ISM6307 - Management of the Information Systems Function

ISM6307 Mgmt of IS Function is only an option for the Business Analytics Track.

Specialization Elective Courses: 15 Credits

Students must complete five courses from one of the specialization tracks detailed under the Tracks Tab below.

- **Artificial Intelligence** (Knight Foundation School of Computing and Information Sciences)
- **Business Analytics** (Dept. Information Systems and Business Analytics)
- **Biostatistics Data Analytics** (Dept. Biostatistics)
- **Computational Data Analytics** (Knight Foundation School of Computing and Information Sciences)
- **Public Policy Analytics** (Dept. of Public Policy and Administration)

Earn at least 15 credits

Major Requirements

There are no majors associated with this program.

Track, Specialization, Concentration, Area of Emphasis, or Other Curricular Offering Requirements

Master of Science in Data Science and Artificial Intelligence - Artificial Intelligence Track

Within this track, students with computing majors can readily design course sequences that help them Artificial Intelligence or Machine Learning.

Artificial Intelligence Track

Type

Completion Requirement

Artificial Intelligence Track Courses: 15 Credits

Complete at least 5 of the following courses:

- CAP5109 - Advanced Human-Computer Interaction
- CAP5507 - Game Theory
- CAP5510C - Introduction to Bioinformatics
- CAP5610 - Introduction to Machine Learning
- CAP5640 - Graduate Introduction to Natural Language Processing
- CAP5627 - Socially Interactive Agents
- CAP6619 - Advanced Topics in Machine Learning
- EEL5820 - Digital Image Processing
- EEL5813 - Neural Networks
- STA6247 - Data Analysis II
  OR PHC6091 - Biostatistics 2

Biostatistics Data Analytics Track

Type
Completion Requirement

Biostatistics Data Analytics Track Courses: 15 Credits

Complete at least 5 of the following courses:

- PHC6056 - Longitudinal Health Data Analysis
- PHC6059 - Survival Data Analysis
- PHC6064 - Applied Statistical Methods for Discrete Data
- PHC6067 - Probabilistic Graphical Models
- PHC6060 - Principles and Approaches to Biostatistical Consulting
- PHC6080 - SAS Computing for the Health Sciences
- PHC6084 - Introduction to Bayesian Inference
- PHC6093 - Biostatistical Data Management Concepts and Procedures (Inactive)
- PHC6099 - R for Applied Biostatistical Methods
- PHC7083 - Advanced Bayesian Inference
- PHC7719 - Multivariate Methods in Health Sciences Research
- STA6247 - Data Analysis II
  OR PHC6091 - Biostatistics 2

Business Analytics Track

Type
Completion Requirement

Business Analytics Track Courses: 15 Credits

Complete at least 5 of the following courses:

- ISM6136 - Business Analytics Applications
- ISM6205 - Database Management
  OR COP5725 - Principles of Database Management Systems
- ISM6208 - Cloud Data Warehousing
  OR ISM6404 - Business Data Visualization and Reporting
  OR CAP5738 - Data Visualization
- STA6247 - Data Analysis II
  OR PHC6091 - Biostatistics 2
- CAP6778 - Advanced Topics in Data Mining
  OR STA6636 - High Dimension Data Analysis
  OR COP6727 - Advanced Database Systems
  OR CAP5610 - Introduction to Machine Learning

Master of Science in Data Science and Artificial Intelligence – Computer Data Analytics Track

Within this track, students with computing majors can readily design course sequences that help them specialize in Bioinformatics, Medical Informatics, Financial Computing, Network Traffic Analysis, Computing Forensics, Big Data Algorithms, and much more.

Computer Data Analytics Track

Type
Completion Requirement

Computer Data Analytics Track Courses: 15 Credits

Complete at least 5 of the following courses:

- CAP5109 - Advanced Human-Computer Interaction
- CAP5510C - Introduction to Bioinformatics
- CAP5610 - Introduction to Machine Learning
- CAP5640 - Graduate Introduction to Natural Language Processing
- CAP5738 - Data Visualization
- CAP6776 - Advanced Topics in Information Retrieval (Inactive)
- CAP6778 - Advanced Topics in Data Mining
- CEN5082 - Parallel Computing Systems
- CIS5372 - Fundamentals of Computer Security (Inactive)
- CIS5374 - Security and Privacy: Attacks and Defenses
- CIS6931 - Special Topics: Advanced Topics in Information Processing
- COP5725 - Principles of Database Management Systems
- COP6727 - Advanced Database Systems
- COT6405 - Analysis Of Algorithms
- COT6936 - Topics in Algorithms
- TCN6420 - Modeling and Performance Evaluation of Telecommunications Networks (Inactive)
- EEL6803 - Advanced Digital Forensics
- STA6247 - Data Analysis II
  OR PHC6091 - Biostatistics 2
- STA6636 - High Dimension Data Analysis
- EEL5820 - Digital Image Processing
- EEL5813 - Neural Networks
- AMH4318 - Health Humanities

Master of Science in Data Science and Artificial Intelligence - Public Policy Analytics Track

Within this track, students will master the use of statistics, computer science, quantitative methods, and big data tools to create more effective public policies. They will be able to meld machine generated data (e.g. sensors) with citizen gathered data to predict events, mine social media and the internet for behavior patterns, and create effective and appealing data visualization programs to demonstrate the effects of decisions to politicians.

Public Policy Analytics Track

Type
Completion Requirement

Public Policy Analytics Courses: 15 Credits

Complete at least 5 of the following courses:

- PAD6053 - Political, Social and Economic Context of Public Administration
- PAD6306 - Policy Analysis

- PAD5256 - Economic Thinking in Policy Making
- PUP6006 - Public Policy Analysis and Evaluation
- PAD6434 - Leadership and Decision-making
- STA6247 - Data Analysis II
  OR PHC6091 - Biostatistics 2

Other Curricular Offering: 4+1 MS in Data Science and Artificial Intelligence Accelerated Degree Pathway

With their advisor's approval, students from all undergraduate majors including Computer Science, Information Systems, and Statistics may apply to the Data Science 4+1 degree pathway. If accepted, students will be allowed to take up to 12 credits of graduate data science courses which will apply towards both their undergraduate degree requirements and the MS in Data Science and Artificial Intelligence degree requirements.

DBHLT:CFI - Graduate Certificate in Disaster Behavioral Health

Overview

Degree Offered
ACRT - Academic Certificate

Program Title
Graduate Certificate in Disaster Behavioral Health

The **Disaster Behavioral Health Certificate** prepares Master of Social Work (MSW) students to address the complex behavioral health needs that arise before, during, and after disasters. This specialized program focuses on the intersection of trauma, crisis response, and clinical social work practice in the context of mass casualty events -including natural disasters, public health emergencies, mass violence, and other large-scale disruptive events.

Students gain the theoretical foundation and practical skills necessary to assess, intervene, and support both survivors and responders affected by disaster-related trauma, stress, and associated psychosocial concerns throughout the disaster cycle. The curriculum emphasizes evidence-based approaches to crisis intervention, trauma-informed care, psychopathology, screening and assessment, responder well-being and self-care, and practices tailored to different population groups. Graduates are equipped with the foundations to serve to help with behavioral health in emergency response teams, behavioral health agencies, and community recovery efforts, with competencies in interprofessional collaboration, preparedness planning, and evaluation of disaster behavioral health programs and policies.

DESGN:DDES - Doctor of Design

Overview

Degree Offered
DDES - Doctor of Design

Program Title
Design

The Doctor of Design (DDes) program is a 2-year, low-residency post-professional doctoral program. Candidates may opt to study either primarily online, or in person in Miami. The program is designed for working professionals and academics, allowing them to remain in post, while completing their doctoral studies. It focuses on three areas of research: Advanced Design Technologies; Environmental Studies; and History, Theory and Criticism. The DDes prepares candidates to reach the highest levels of the profession and academia, and to contribute to design knowledge through scholarship, research, and innovation. Providing specialized credentials for advanced professional and academic applied research, the DDes is designed for research-active candidates who are teaching or aspiring to teach in college/university departments of architecture worldwide.

For more information, visit the College of Communication, Architecture, and the Arts website.

Program Website

Academic Group
College of Communication, Architecture + The Arts

Diploma Title
Doctor of Design

Total Credits
60

Program Length in Years Based on Full-Time Enrollment
2

CIP Code
04.0902

Requirements

Simple Requirements

Admissions Requirements

The admission standards for applicants to the Doctor of Design Program are:

(1) Hold a Master of Architecture degree from accredited program, or equivalent professional architectural degree, or other advanced degrees subject to program approval.

(2) Have a GPA of 3.25 in their master’s degree program.

(3) Submit three letters of recommendation to the Architecture Program Chair from faculty members or supervisors qualified to evaluate the applicant’s potential for doctoral work.

(4) Submit a brief letter of interest in the program and future career goals.

(5) Submit a portfolio and preliminary statement of research interest.

(6) Receive recommendation for admission from the Departmental Doctoral Education Committee.

(7) International graduate student applicants whose native language is not English are required to submit a score for the Test of English as a Foreign Language (TOEFL) or for the International English Language Testing System (IELTS). A total score of 80 on the iBT TOEFL (equivalent to 550 on the TOEFL) is required.

Additional Information for Applicants

Applicants to the school should plan for the financial aspects of a design education. These include the cost associated with required access to a laptop computer as well as the costs of software, travel and field trips, tools and equipment, and modeling supplies. Students in the program must have access to a laptop computer through purchase, lease or other arrangements. For further information contact the Department.

Program Requirements

Ownership of Student Work

Student work, submitted to the Department in satisfaction of course or degree requirements, becomes the physical property of the Department. However, students retain all rights to the intellectual property of such work. This work may include papers, drawings, models, and other materials. The Department assumes no responsibility for safeguarding such materials. At its discretion, the Department may retain, return, or discard such materials. The Department will not normally discard the materials of currently enrolled students without giving the student a chance to reclaim them.

Degree Program Credit Hours: 60

Type

Completion Requirement

Core Courses: 15 credits

Complete ALL of the following Courses:

- ARC6229 - Theories of the Digital
- ARC6761 - Miami Urban Studies
- ARC6184 - Advances Studies in Technology
- ARC7981 - Advanced Research Methods
- ARC6204 - Architectural Philosophy

Research Requirements: 30 credits

Complete ALL of the following Courses:

- ARC6906 - Independent Study
- ARC7980 - Doctoral Project
- ARC7982 - Doctoral Defense

**ARC6906 Independent Study - 6 credits*

**ARC7980 Doctoral Project - 21 credits*

Other Courses: 15 credits

Fifteen credits are taken as part of the FIU 174-credit Master of Architecture degree. Students applying with Master of Architecture degrees from other universities will have 15 credits evaluated for recency/applicability as transferable and applied to the DDes or will be required to enroll in 15 credits at FIU.

Additional Comments:

There are short annual residency periods, which will be held at our Miami Beach Urban Studios (MBUS) that will support all classes.

Graduation Requirements

The graduation requirements for the Doctor of Design Program are completion of the 60-credit hour postmaster's curriculum with a 3.0 or higher GPA, with each course having a grade of B- or higher. Additionally, a student must be in compliance with the FIU Graduate School graduation requirements to be eligible for graduation.

Major Requirements

There are no majors associated with this program.

Track, Specialization, Concentration, Area of Emphasis, or Other Curricular Offering Requirements

There are no tracks, specializations, concentrations, areas of emphasis, or other curricular offerings associated with this program.

DIART:BFA - Bachelor of Fine Arts in Digital Arts

Overview

Degree Offered
BFA - Bachelor of Fine Arts

Program Title
Digital Arts

The BFA in Digital Arts offers a comprehensive education in creative practices shaped by technology, critical inquiry, and fine arts foundations. Students pursue one of three majors—Animation, Graphic Design, or Emerging Genres—while engaging a shared curriculum that emphasizes conceptual exploration, technical fluency, and interdisciplinary approaches. The program prepares students to push the boundaries of artistic and design practice, whether through experimental work in contemporary art contexts, advanced study in digital arts, or professional pathways across art and design fields.

For more information, visit the College of Communication, Architecture, and the Arts website.

Requirements

Simple Requirements

Admissions Requirements

Admissions Requirements for the Bachelor of Fine Arts (BFA) in Digital Arts

These admission requirements apply to all majors within the BFA in Digital Arts degree. All applicants must meet University minimum admission requirements. Candidates for the BFA in Digital Arts will be required to submit electronically a portfolio of their works with a short statement. A departmental committee will review the portfolios. The focus of the review will be on quality work, technical ability, and consistency. This will assist the program to better advise students in a course sequence designed for student success. Currently, the CARTA departments utilize the SlideRoom service for the portfolio submissions. See the Art and Art History Department website for further information.

Admissions Requirements for the Combined BFA in Digital Arts to Master of Science (MS) in Art Education Accelerated Degree Pathway

(1) Current enrollment in the BFA in Digital Arts

(2) Completed a minimum of 75 undergraduate credits

(3) Current GPA of 3.2 or higher

(4) Portfolio review and interview

(5) Complete the separate Accelerated Bachelors/Master's degree application, including signed approval by the director, coordinator or designee of the graduate program.

Program Requirements

Academic Progression Requirements

Students must complete MAC1105 and either CGS2518 or COP2250 with a minimum GPA of 2.75, and ART1201C, ART1203C, and ART2300C with a minimum GPA of 3.0, prior to the completion of 60 credit hours.

Students must also successfully complete ART2608C DIMENSIONS: Time, ART3820 Research + Development, and ART3822 Creative Practice with a minimum GPA of 3.0 or higher.

Students who do not meet these academic requirements may be redirected to the BA in ART degree.

Due to the sequential, cohort-based structure of the BFA Digital Art curricula, students are expected to follow the prescribed course progression and complete the degree within the established timeframe. This includes timely enrollment in the following required courses: ART3820 Research + Development, ART3822 Creative Practice, ART4952C Thesis 01, and ART4953C Thesis 02, in accordance with the BFA degree plan. Failure to enroll in these courses as scheduled, or to maintain progress toward timely graduation, may result in removal from the BFA program and redirection to the BA in Art.

- ARH4470 - Contemporary Art

Major Requirements

Bachelor of Fine Arts in Digital Arts: Graphic Design Major

The BFA in Digital Arts: Graphic Design Major provides an intensive program of study in contemporary design strategies and theory. The curriculum emphasizes conceptual and critical thinking while cultivating practical skills across branding, UI/UX, spatial, and publication design. Students engage collaborative and ethical design practices while building a strong foundation in fine arts and digital methods. Graduates are prepared for advanced study or professional careers in diverse industries.

Graphic Design Major Credit Hours: 120

- GRA4199 - DESIGN: Thesis

Electives comes from the following prefixes: ART/PGY/GRA/ARH

Plus 9 credits of Advisor-Approved Electives

The BFA in Digital Arts: Animation Major

The BFA in Digital Arts: Animation Major emphasizes an experimental, auteur-driven approach to both 2D and 3D computer animation. Students explore animation as a critical and artistic practice, engaging narrative, identity, and place through digital and time-based forms. The curriculum encourages a balance of conceptual exploration and technical skill, supporting students in developing an artistic animation practice that reflects their chosen tools, methods, and creative visions within contemporary art.

Electives comes from the following prefixes: ART/PGY/GRA/ARH

Plus 9 credits of Advisor-Approved Electives

Bachelor of Fine Arts in Digital Arts: Emerging Genres Major

The BFA in Digital Arts: Emerging Genres Major emphasizes pluralistic approaches to art-making grounded in critical frameworks for understanding art's role in contemporary society. Students experiment across video, sound, installation, interactivity, social practice, performance, and environmental practices, integrating emerging technologies while developing hybrid approaches that move fluidly across contexts and forms. The program fosters digital experimentation, creative risk-taking, transdisciplinarity, and collaboration, preparing students to shape contemporary culture at the intersections of art, technology, and culture.

Emerging Genres Major Credit Hours: 120

Type

Completion Requirement

Program Requirements

Fulfill ALL of the following requirements:

Major Courses

Complete ALL of the following Courses:

- ARH4771 - History of Digital Art
- ART2622C - VIDEO 01: Gestures
- ART2648C - TECHNOLOGY 01: Networks
- ART4952C - Thesis 01
- ART4953C - Thesis 02

AND

Choose TWO from the following Courses:

Fulfill ANY of the following requirements:

Technology

Complete ANY of the following Courses:

- ART3649C - TECHNOLOGY 02: Input / Output
- ART4650C - TECHNOLOGY 03: Interactivity

OR

Transmedia

Complete ANY of the following Courses:

- ART4678C - TRANSMEDIA: Sound
- ART4593C - TRANSMEDIA: Collage + Assemblage
- ART4642C - TRANSMEDIA: Digital / Analog
- ART4647C - TRANSMEDIA: Internet
- ART4665C - TRANSMEDIA: Modeling / Fabrication
- ART4809C - TRANSMEDIA: Performance
- ART4843C - TRANSMEDIA: Land + Environment
- ART4856C - TRANSMEDIA: Social Practice

OR

Video

Complete ANY of the following Courses:

- ART3617C - VIDEO 02: Systems
- ART4636C - VIDEO 03: Synthesis
- ART4638C - VIDEO: Installation

Additional Comments:

Electives come from the following pre-fixes: ART/PGY/GRA/ARH

Plus 9 credits of Advisor-Approved Electives

Track, Specialization, Concentration, Area of Emphasis, or Other Curricular Offering Requirements

Other Curricular Offering: Combined BFA in Digital Arts to MS in Art Education Accelerated Degree Pathway

Students enrolled in the BFA in Digital Arts may apply to the Accelerated MS in Art Education Degree Pathway. If accepted, students will be allowed to take up to 12 credits of graduate courses which will apply toward both their undergraduate and their master's degree program.

DIET:BS - Bachelor of Science in Dietetics and Nutrition

Overview

Degree Offered
BS - Bachelor of Science

Program Title
Dietetics and Nutrition

The Bachelor of Science (BS) in Dietetics and Nutrition prepares students to become competent, intellectually curious professionals and leaders. The degree includes two majors: Didactic Program in Dietetics and Nutrition Science.

The Didactic Program in Dietetics (DPD) is the first of three steps required to become a registered dietitian/nutritionist. This major is accredited by the Accreditation Council for Education in Nutrition and Dietetics.

The Nutrition Science major prepares students for pursuing health professional graduate degree programs.

For more information, visit the Department of Dietetics and Nutrition website.

To explore more about this program, visit the website below:

Requirements

Simple Requirements

Admissions Requirements

Specialized Admissions Requirements for Undergraduate Programs

Freshmen applicants must follow regular university admission procedures and upon admission declare their specific major in Dietetics and Nutrition. Students must complete the program prerequisite courses as part of their 60 credit hours of lower-division course work. To remain in the program, FIU undergraduates must maintain a minimum cumulative GPA of 2.7. See Academic Progression Requirements for additional information.

Specialized Admissions Requirements for Transfer Students

Students seeking to transfer to FIU must follow regular University Transfer Student admission procedures.

Students are encouraged to complete all Common Prerequisite courses found in Program Requirements as part of their 60 credit hours of lower-division Associate of Arts coursework prior to transferring to FIU.

In order to declare a major in Dietetics and Nutrition, transfer students are evaluated on meeting the following requirements for admission:

(1) Associate of Arts degree from a Florida public institution or completion of FIU's University Core Curriculum;

(2) Minimum cumulative GPA of 2.7;

(3) Grade of “C” or higher earned in the following courses

--CHM1045 Gen Chemistry I/CHM1045L Gen Chem Lab I *

--CHM1046 Gen Chemistry II/CHM1046L Gen Chem Lab II *

--CHM2200 Survey Organic Chem/CHM2200L Survey Org Chem Lab

--BSC2010 General Biology I/BSC2010L Gen Biology Lab I *

--MCB2000 Intro Microbiology/MCB2000L Intro Microbio Lab

--HUN2201 Principls Nutrition *

*Indicates minimum prerequisite course completion for admission.

Admissions Requirements for the Combined Bachelor of Science in Dietetics and Nutrition (major: Nutrition Science) to Master of Science in Dietetics and Nutrition Accelerated Degree Pathway

Admission into the combined BS/MS accelerated degree pathway in Dietetics & Nutrition requires the following:

(1) Enrollment in the nutrition science major of the undergraduate dietetics and nutrition degree program.

(2) Completion of 75 credits in the bachelor's in dietetics and nutrition degree program and 15 credits in the major.

(3) Minimum overall GPA of 3.5.

(4) Two evaluation forms (preferably filled out by FIU Faculty).

(5) Statement of purpose (1 page double spaced) discussing interests in, and benefits of, the combined BS/MS accelerated degree pathway. Concepts to include, but not limited to, are why the BS/MS accelerated degree pathway was chosen, what interests you about the pathway, and how this pathway will advance career goals.

(6) Meet admission requirements for FIU's graduate school and the master’s program in the Department of Dietetics and Nutrition.

Program Requirements

Academic Progression Requirements

Students are expected to make good progress towards completion of degree requirements based on critical indicators such as maintaining a minimum 2.7 GPA and earning grades of “C” or higher in all science prerequisites and core courses. If a student fails to meet a critical indicator, they will be required to meet with an academic advisor to discuss their eligibility to continue in the program. In cases where students are not making good progress, a change of major may be required. Advisors work to redirect students to more appropriate majors when critical indicators are not met.

Lower Division Preparation

Type

Prerequisite

Common Prerequisite Courses

For a list of all state-approved common prerequisites, including alternatives, visit https://cpm.flvc.org.

Complete ALL of the following Courses:

- BSC2010 - General Biology I
  AND BSC2010L - General Biology I Lab
- CHM1045 - General Chemistry I
  AND CHM1045L - General Chemistry Lab I
- CHM1046 - General Chemistry II
  AND CHM1046L - General Chemistry Lab II
- CHM2210 - Organic Chemistry I
  AND CHM2210L - Organic Chemistry Lab I
- CHM2211 - Organic Chemistry II
  AND CHM2211L - Organic Chemistry Lab II
- ECO2013 - Principles of Macroeconomics
- HUN2201 - Principles of Nutrition
- MAC1105 - College Algebra
  OR MAC1147 - Pre-Calculus Algebra and Trigonometry
- MCB2000 - Introductory Microbiology
  AND MCB2000L - Introductory Micro Lab
- PSY2012 - Introductory Psychology
- STA3111 - Statistics I
  OR STA2023 - Statistical Methods

Didactic Program Students:

Didactic Program Students may take CHM2200 Survey Organic Chem and CHM2200L Survey Org Chem Lab in place of CHM2210 Organic Chem I/CHM2210L Org Chem Lab I and CHM2211 Organic Chem II/ CHM2211L Organic Chem Lab II (does not apply to Nutrition Science Majors).

Didactic Program Students may take HUN3191 World Nutrition in place of ECO2013 Principles Macroeco.

Didactic Program Students may take INP3004 Intro. Ind/Org Psy in place of PSY2012 Intro To Psychology.

Nutrition Science Major Students:

Nutrition Science Major Students must also take BSC2011 General Biology II and BSC2011L Gen Biology Lab II

Major Requirements

Bachelor of Science in Dietetics and Nutrition: Dietetics Major (Didactic Program)

The Dietetics Major (Didactic Program in Dietetics) is intended for students interested in becoming a Registered Dietitian Nutritionist (RDN). It prepares undergraduates with the academic foundation needed to be future practitioners in the field of dietetics. Students are prepared for careers in health promotion research, clinical nutrition, management of food and nutrition systems, as well as in the fostering of healthy lifestyles among the underserved populations.

Current accreditation information about the Didactic Program in Dietetics (DPD) may be found on the department website. Upon successful completion of the DPD requirements, students are eligible to receive a Didactic Program Verification Statement signifying they have completed the requirements of a dietetics education program accredited by the Accreditation Council for Education in Nutrition and Dietetics (ACEND®).

Dietetics Major (Didactic Program): 120 Credits

Type
Completion Requirement

Additional Courses Required

Complete ALL of the following Courses:

- ANT3451 - Anthropology of Race and Ethnicity
  OR COM3461 - Intercultural Communication
  OR SYP2001 - The Individual in Society

Upper Division Program Requirements

Complete ALL of the following Courses:

- DIE3005 - Orientation to Dietetics
- FOS3021 - Fundamentals Of Food
  AND FOS3021L - Fundamentals of Food Laboratory
- HUN4403 - Life Cycle Nutrition
- HSC3549 - Clinical Physiology for Health Professionals
  OR PCB3702 - Intermediate Human Physiology
- FOS4041 - Food Science
  AND FOS4041L - Food Science Laboratory
- FSS3233C - Institutional Food Service Production
- HUN4240 - Nutrition and Biochemistry
- HUN4241 - Advanced Nutrition
- DIE3125 - Management of Dietary Systems
  AND DIE3125L - Applied Management of Dietary Systems
- DIE3310 - Dietetics in Community Health
- DIE3244 - Medical Nutrition Therapy
  AND DIE3244L - Applied Diet Therapy (Inactive)
- DIE3434 - Nutrition Education
  AND DIE3434L - Nutrition Education Laboratory
- DIE4246 - Clinical Nutrition
  AND DIE4246L - Clinical Nutrition Laboratory
- DIE4365 - Dietetic Management of Nutrition Programs
  AND DIE4365L - Applied Dietetic Management of Nutrition Programs
- DIE4435 - Nutrition Counseling and Communication Skills
  AND DIE4435L - Nutrition Counseling and Communication Skills Lab
- HUN4404 - Nutrition, Physical Activity and Special Populations
- DIE4506 - Seminar in Dietetics and Nutrition
- DIE4564 - Evidence Based Research in Dietetics
- DIE4963 - Comprehensive Dietetic Examination

Recommended Electives

Selected courses in: computer science, education, statistics, social work, health science, adult education, business, anthropology, sociology. These courses need to be discussed with an advisor before scheduling.

Additional Comments:

Bachelor of Science in Dietetics and Nutrition: Nutrition Science Major

The Nutrition Science Major emphasizes the basic sciences—biology and chemistry—and uses this foundation to build up to the nutrition science core curriculum. Students explore optimal health, disease states, human physiology, metabolism, as well as the complex relationship between nutrients/non-nutrients in foods. It provides a strong nutrition base for entry into professional programs such as medicine, dentistry, occupational or physical therapy, pharmaceutical sciences, physician assistant, registered nurse, among others.

Nutrition Science Major: 120 Credits

Type

Completion Requirement

Upper Division Program Requirements

Complete ALL of the following Courses:

- HUN3191 - World Nutrition
- FOS3021 - Fundamentals Of Food
  AND FOS3021L - Fundamentals of Food Laboratory
- HUN4403 - Life Cycle Nutrition
- PCB3702 - Intermediate Human Physiology
  OR HSC3549 - Clinical Physiology for Health Professionals
- FOS4041 - Food Science
  AND FOS4041L - Food Science Laboratory
- PCB3063 - Genetics
- BCH3033 - General Biochemistry
  OR HUN4240 - Nutrition and Biochemistry
  OR CHM4304 - Biological Chemistry I
- DIE3310 - Dietetics in Community Health
  OR HUN4404 - Nutrition, Physical Activity and Special Populations
- DIE3244 - Medical Nutrition Therapy
- HUN4241 - Advanced Nutrition
- DIE4246 - Clinical Nutrition
- HUN4701 - Nutrigenomics
- DIE4564 - Evidence Based Research in Dietetics

**Labs for DIE3244 Med Nutr Therapy and DIE4246 Clinical Nutrition are not required; however they are recommended.*

Recommended Electives

Depending on the student's career objectives, students should enroll in selected courses in: calculus, physics, computer science, education, statistics, social work, health science, psychology, business, anthropology, and sociology. These courses need to be discussed with an advisor before scheduling.

If the student is interested in a future career in the medical field, electives should be discussed with a pre-health advisor. The Pre-Health Advising office is located in DM 331A and can be contacted at (305) 348-0515 or **preprofc@fiu.edu**.

Additional Comments:

Track, Specialization, Concentration, Area of Emphasis, or Other Curricular Offering Requirements

Other Curricular Offering: Combined Bachelor of Sciences in Dietetics and Nutrition (major: Nutrition Science) to Master of Science in Dietetics and Nutrition Accelerated Degree Pathway

Type

Completion Requirement

Required Courses

The combined BS/MS accelerated degree pathway provides an accelerated seamless course of study leading from the undergraduate freshman year to the conferral of the MS in Dietetics and Nutrition. The combined BS/MS accelerated degree pathway integrates undergraduate and graduate coursework. The BS in Dietetics and Nutrition (Nutrition Science Major) requires 120 credits. The MS in Dietetics and Nutrition is comprised of 37 credits. Ten graduate credits taken in the senior year of the baccalaureate program will count as elective credits toward the baccalaureate degree and toward course requirements for the master’s degree in dietetics and nutrition. Completion of the remaining 27 graduate credits to earn the master's degree may occur in three semesters following undergraduate graduation.

Retention in the pathway necessitates meeting the requirements of the bachelor’s and master’s courses and programs. In addition to the program requirements of the undergraduate nutrition science major, students are expected to complete the following 10 credits of graduate courses during their senior year:

Complete ALL of the following Courses:

- STA6166 - Statistical Methods in Research I
  OR PHC6052 - Biostatistics I
  OR STA6176 - Biostatistics
- PHC6500 - Foundations of Public Health Practice
- HUN6522 - Public Health Nutrition
- DIE6937 - Graduate Seminar in Dietetics and Nutrition

To earn a BS and MS in Dietetics and Nutrition, students must meet the graduation requirements of both degree programs.

DIET:MS - Master of Science in Dietetics and Nutrition

Overview

Degree Offered
MS - Master of Science

Program Title
Dietetics and Nutrition

The Master of Science (MS) in Dietetics and Nutrition expands and strengthens the knowledge and skills required by students at the graduate level to build successful careers in the field of nutrition with a greater emphasis on clinical science, community, and food service. Students learn the elements of evidence-based research and are prepared for enrollment into doctoral programs or to enter the professional practice of nutrition and dietetics. Our graduates receive enhanced training to serve the community through the promotion of healthier lifestyles across diverse populations. Students may use their electives to pick an area of emphasis such as the Sports Nutrition specialization or the Infant and Childhood Nutrition specialization. For more information, visit the Department of Dietetics and Nutrition website.

Towards the end of the MS, students may apply to the Dietetic Internship (DI) Graduate Program, which is only open to MS students. The DI is fully accredited by ACEND and prepares competent entry-level Registered Dietitian Nutritionists (RDNs) through experiential learning and evidence-based practice, who are leaders, and are ethically and culturally proficient. This internship is committed to training qualified practitioners who can provide dietetic services that promote eating and lifestyle behaviors that enhance health and quality of life.

For more information, visit the Department of Dietetics and Nutrition website.

Admissions Requirements

Admissions Requirements for the Master of Science (MS) in Dietetics and Nutrition

Minimum entrance requirements under current University Graduate School must be met.

For the MS degree, this includes a "B" (3.0 on a 4.0 scale) average in all upper division coursework.

Prospective applicants must have completed all of the prerequisite courses listed below with a grade of “C” or higher.

Admissions Requirements for the Combined BS in Dietetics and Nutrition (major: Nutrition Science) to MS in dietetics and Nutrition Accelerated Degree Pathway

Admission into the combined BS/MS in Dietetics & Nutrition accelerated degree pathway requires the following:

(1) Enrollment in the nutrition science major of the undergraduate dietetics & nutrition degree program.

(2) Completion of 75 credits in the dietetics & nutrition bachelor's degree program and 15 credits in the major.

(3) Minimum overall GPA of 3.5

(4) Two Evaluation forms (preferably filled out by FIU Faculty)

(5) Statement of purpose (1 page double spaced) discussing interests in and benefits of the combined BS/MS accelerated degree pathway. Concepts to include but not limited to are why BS/MS accelerated degree pathway was chosen, what interests you about the pathway, and how will this pathway advance career goals.

(6) Meet admission requirements for FIU graduate school and master's program in the Department of Dietetics & Nutrition.

Program Requirements

Prerequisite Courses

Type

Prerequisite

Prerequisite Courses

Complete ALL of the following Courses:

- CHM1045 - General Chemistry I
- CHM1045L - General Chemistry Lab I
- CHM2210 - Organic Chemistry I
- CHM2210L - Organic Chemistry Lab I
- CHM2211 - Organic Chemistry II
- CHM2211L - Organic Chemistry Lab II
- MCB2000 - Introductory Microbiology
- MCB2000L - Introductory Micro Lab
- PCB3702 - Intermediate Human Physiology
  OR HSC3549 - Clinical Physiology for Health Professionals
- HUN2201 - Principles of Nutrition
- HUN4240 - Nutrition and Biochemistry
  OR BCH3033 - General Biochemistry

CHM2200 and CHM2200L Survey Org Chem Lab can be taken instead of taking the following 4 courses: CHM2210 Organic Chem I, CHM2210L Org Chem Lab I, CHM2211 Organic Chem II and CHM2211L Organic Chem Lab II.

Program Requirements

Students who are candidates for the Master of Science in Dietetics and Nutrition degree must complete a minimum of 31 credit hours of graduate study including at least 28 credit hours at this university. All course work must be recent enough to be relevant to the contemporary field of dietetics and nutrition.

Graduate students wishing to become a Registered Dietitian may use the department website for information and discuss their options with the Graduate Program Director.

Each student's program will be planned to support his/her career goals through consultation with an assigned faculty advisor. Retention and graduation in the MS program requires maintenance of a 3.0 GPA and student may not receive more than 2 grades of "C+".

Degree Program Credit Hours: 31

Type

Completion Requirement

Nutrition Core: 9 credits

Complete at least 3 of the following courses:

- HUN5245 - Nutrition and Biochemistry
- HUN6307 - Carbohydrates and Lipids
- HUN6327 - Proteins
- HUN6335 - Functions of Vitamins
- HUN6355 - Minerals in Human Nutrition

Public Health Core: 3 credits

Complete ALL of the following Courses:

- PHC6500 - Foundations of Public Health Practice

Research Core

There are two options to meet the requirements for research:

Option 1: Research Courses

Option 2: Master's Project

Option 1 Research Courses: 10 credits

The research option provides the opportunity to develop an overview in the knowledge and skills of research primarily through secondary data analysis. Students who select this option state a research problem and relevant research question which will be addressed through the creation of a research proposal. Students will write a report and present their topic to the class.

Complete ALL of the following Courses:

- DIE6568 - Research I
- DIE6567 - Research II
- STA6166 - Statistical Methods in Research I
  OR PHC6052 - Biostatistics I
- DIE6937 - Graduate Seminar in Dietetics and Nutrition

Option 2 Master's Project: 13 credits

Master's Project is a non-thesis option. It affords the opportunity to conduct original applied research, program planning, or program evaluation on a specific dietetics and nutrition problem, topic, or existing program. Students who select the Master's Project must choose a major professor to direct their project. The advisor and the student may

identify other resource persons to serve in an advisory capacity for the project. Before beginning the project, student must present a project concept proposal to the major professor. Student will write a project report and present the project in Seminar.

Complete ALL of the following Courses:

- DIE6568 - Research I
- DIE6937 - Graduate Seminar in Dietetics and Nutrition
- STA6166 - Statistical Methods in Research I
  OR PHC6052 - Biostatistics I
- DIE6576 - Project in Dietetics and Nutrition

DIE6576 Project Diet Nutr is a variable credit course. Students must complete a total of 6 credits for this option.

Recommended Electives

Choose sufficient electives to meet degree requirements, or choose a specialization in the Track, Specialization, Concentration, Area of Emphasis, or Other Curricular Offering Requirements section below

Complete ANY of the following Courses:

- ANT6469 - Graduate Medical Anthropology
- DIE5247 - Trends in Therapeutic Nutrition
- DIE6128 - Dietetic Administration and Management
- DIE6259 - Management of Nutrition Services
- DIE6285 - Pregnancy and Lactation
- DIE6286 - Pediatric Obesity
- DIE6287 - Dysfunctional Eating in Pediatrics
- DIE6368 - Advanced Techniques in Dietetic Practice
  AND DIE6368L - Advanced Techniques Dietetic Practice Lab
- DIE6929 - Specialized Short Courses in Dietetics and Nutrition (Inactive)
- DIE6935 - Special Topics in Dietetics
- FOS6236 - Food Toxicology & Food Safety (Inactive)
- HUN5123 - Ethnic Influences on Nutrition and Food Habits
- HUN5195 - International Nutrition: Problems, Policies, and Planning
- HUN5245 - Nutrition and Biochemistry
- HUN5611 - Nutrition Education in the Community
- HUN5621 - Food, Nutrition and Communication
- HUN6248 - Sports Nutrition
- HUN6254 - Drug and Nutrient Interaction
- HUN6255 - Nutrition in Wellness Program (Inactive)
- HUN6257 - Physio/Psychology of Food Intake
- HUN6266 - Nutritional Assessment
- HUN6295 - Contemporary Issues in Food and Nutrition
- HUN6415 - Pediatric Nutrition
- HUN6416 - Advanced Pediatric Nutrition
- HUN6417 - Nutrition of the High Risk Infant and Newborn in Intensive Care
- HUN6435 - Nutrition And Aging
- HUN6522 - Public Health Nutrition

Courses that are not listed as recommended electives may be taken as approved by advisor/Program Director.

Major Requirements

There are no majors associated with this program.

Track, Specialization, Concentration, Area of Emphasis, or Other Curricular Offering Requirements

Other Curricular Offering: Combined BS in Dietetics and Nutrition (major: Nutrition Science) to MS in Dietetics and Nutrition Accelerated Degree Pathway

Type

Completion Requirement

Required Courses

The combined degree pathway provides an accelerated seamless course of study leading from the undergraduate freshman year to the conferral of the Master of Science in Dietetics & Nutrition. The combined BS/MS accelerated degree pathway will integrate undergraduate and graduate coursework. The BS in Dietetics & Nutrition (Nutrition Science Major) requires 120 credits. The MS in Dietetics & Nutrition is comprised of 31 credit hours. Ten graduate credits taken in the senior year of the baccalaureate program will count as elective credits toward the baccalaureate degree and toward course requirements for the master's degree in dietetics and nutrition. Completion of the remaining 21 graduate credits to earn the master's degree may occur in three semesters following undergraduate graduation.

Retention in the pathway necessitates meeting the requirements of the bachelor's and master's courses and programs. In addition to the program requirements of the undergraduate nutrition science major, students will be expected to complete the following 10 credits of graduate courses during their senior year:

Complete ALL of the following Courses:

- STA6166 - Statistical Methods in Research I
  OR PHC6052 - Biostatistics I
  OR STA6167 - Statistical Methods in Research II
- PHC6500 - Foundations of Public Health Practice
- HUN6522 - Public Health Nutrition
- DIE6937 - Graduate Seminar in Dietetics and Nutrition

To earn a BS and MS in Dietetics and Nutrition, students must meet the graduation requirements of both degree programs.

Sports Nutrition Specialization

The Sports Nutrition specialization provides students with the opportunity to learn more about optimal nutrition for exercise and sports performance in relation to strength and conditioning

Sports Nutrition Specialization: 9 credits

Type

Completion Requirement

Students must complete all of the following:

Complete ALL of the following Courses:

- HUN6248 - Sports Nutrition
- APK5111 - Advanced Exercise Physiology

Students will choose some of the courses from the Kinesiology and Exercise Science program.

Required Courses

Complete at least 1 of the following courses:

- PET5216 - Sport and Exercise Psychology
- PET5368 - Exercise, Diet and Weight Management
- PET5391C - Comprehensive Conditioning of Elite Athletes
- PET5693 - Athletic Performance Assessment and Exercise Prescription

Infant and Childhood Nutrition

The Infant and Childhood Nutrition specialization provides students with the opportunity to learn more about nutritional issues in infancy and childhood.

Infant and Childhood Nutrition Specialization: 9 credits

Type

Completion Requirement

Required Courses

Any 3 courses from the following courses may be chosen to complete this specialization.

Complete at least 3 of the following courses:

- DIE6285 - Pregnancy and Lactation
- DIE6286 - Pediatric Obesity
- DIE6287 - Dysfunctional Eating in Pediatrics
- HUN6415 - Pediatric Nutrition
- HUN6416 - Advanced Pediatric Nutrition

DIET:PHD - Doctor of Philosophy in Dietetics and Nutrition

Overview

Degree Offered
PHD - Doctor of Philosophy

Program Title
Dietetics and Nutrition

This program prepares graduates to assume leadership roles in research, academia, government agencies, private industry and community-based organizations. It allows students to study and work side-by-side with nationally known educators, researchers, and practitioners who serve as their mentors, with state-of-the-art laboratories for both research and teaching. Throughout the program students are encouraged to develop and strengthen their skills in the methods of scientific inquiry, to deepen their understanding and analysis of research data and to contribute to the knowledge base in the published literature. For more information, visit the Department of Dietetics and Nutrition website.

To explore more about this program, visit the website below:

Requirements

Simple Requirements

Admissions Requirements

Admission Requirements for the Ph.D. in Dietetics and Nutrition

Minimum entrance requirements under current University Graduate School must be met.

(1) A four-year bachelor's degree or equivalent from a nationally accredited institution or, in the case of foreign students, from a well-established institution of higher learning that is authorized to grant degrees by appropriate authorities in that country.

(2) A minimum of a 3.0 GPA, “B” average, in the last 60 upper-division undergraduate coursework, or a graduate degree from a nationally accredited institution.

(3) International graduate student applicants whose native language is not English are required to submit a standardized proficiency of English test score which meet FIU requirements.

The Department also requires:

1. A curriculum vitae
2. Three letters of recommendation
3. A personal statement of interest

Program Requirements

Degree Program Credit Hours: 75

Type

Completion Requirement

Students must complete a minimum of 55 hours after the MS degree or a minimum of 75 hours beyond the BS degree. The stated minimum does not include remedial coursework. Students who did not complete PHC6500 Fnd Public Hld Prac to admission to the PhD program must complete it as part of the program of studies. Coursework will be planned with the advisor and the dissertation committee to support the student's research interests and career goals and to ensure the program of study meets the 75-credit hour requirement. A 3.0 GPA must be maintained, and all courses needed for graduation must be completed with a grade of "C+" or higher.

Fulfill ALL of the following requirements:

Required Research Method Core: 9 credits

DIE7566 Res Concept Develop is designed for Dietetics Students.

PHC7981 Research Concepts is designed for Public Health Students.

Complete ALL of the following Courses:

- PHC6703 - Epidemiology Methods: Experimental Design
- HUN6266 - Nutritional Assessment
- DIE7566 - Research Concept Development in Dietetics and Nutrition
  OR PHC7981 - Research Concepts and Proposal Development

(Prerequisites: PHC6500 Fnd Public Hld Prac or equivalent)

AND

Required Data Analysis Core: 9 Credits minimum

Courses must be approved by advisor/Program Director. Students may use the following to meet a portion this requirement

Complete ANY of the following Courses:

- PHC6091 - Biostatistics 2
- PHC7198 - Advanced Qualitative Methods in Public Health

AND

Required Dietetics: 0-12 credits minimum

A program of study will be developed with the assistance of a major professor and dissertation committee. More than 12 credits may be required for the student to achieve competency in the research methods and content related to their dissertation research. Graduate courses outside of Dietetics & Nutrition may be taken as approved by dissertation committee.

Complete ALL of the following Courses:

- HUN6535 - Health Disparities and Nutrition
- HUN7408 - Nutrition Across the Lifespan

- HUN7523 - Community Nutrition
- HUN7524 - Nutrition Science and Implications for Community Health

AND

Required Nutrition Sciences: 12 credits

Complete ALL of the following Courses:

- HUN6307 - Carbohydrates and Lipids
- HUN6327 - Proteins
- HUN6335 - Functions of Vitamins
- HUN6355 - Minerals in Human Nutrition

Do not need if equivalent previously taken at the graduate level and approved by the program director.

AND

Required Seminar: 1 credit minimum

Complete ALL of the following Courses:

- DIE6937 - Graduate Seminar in Dietetics and Nutrition

AND

Required Electives 0-6 credits minimum

Do not need if equivalent previously taken at the graduate level and approved by the program director.

AND

Required Dissertation: 15 credits minimum

Complete ALL of the following Courses:

- DIE7980 - Ph.D. Dissertation

Major Requirements

There are no majors associated with this program.

Track, Specialization, Concentration, Area of Emphasis, or Other Curricular Offering Requirements

There are no tracks, specializations, concentrations, areas of emphasis, or other curricular offerings associated with this program.

DIGCOM:BS - Bachelor of Science in Digital Communication and Media

Overview

Degree Offered
BS - Bachelor of Science

Program Title
Digital Communication and Media

The Lee Caplin School of Journalism and Media offers the Bachelor of Science (BS) degree in Digital Communication and Media in six undergraduate majors. The Digital Journalism and Digital Broadcast Journalism majors are for students interested in pursuing fast-paced careers in journalism and public communication. Students interested in media may choose from Digital TV and Multimedia Production, Digital and Interactive Media, Game Media, ~~and~~ Animation Media, and Sports Media. ~~.~~All our majors are hands-on, experiential learning programs that prepare students for their first jobs immediately upon graduation. Students will learn media skills under the supervision of award-winning faculty in professional facilities that include a newsroom, a broadcast TV studio, a virtual reality lab, and advanced computer labs. The Lee Caplin School of Journalism and Media is committed to preparing career-ready journalists and media professionals, in English and Spanish, who are critical and reflective thinkers and communicators, ethical, socially responsible, well-rounded, and fair-minded.

Requirements

Simple Requirements

Admissions Requirements

See general university admissions requirements for Freshmen at FIU Admissions.

Specialized Admissions Requirements for BS in Digital Communication and Media

In order to be eligible to take all degree-specific requirements, first time in college and transfer students seeking this degree must successfully pass MMC3003 Journalism + Media Orient with a C, and have a minimum cumulative GPA of 2.85, including any transfer work. For further details, see Academic Progression Requirements under the Program Requirements section below.

Program Requirements

Common Prerequisites

Common Prerequisites include the following: ENC1101 Writing and Rhetoric I and ENC1102 Writing and Rhetoric II and any MMC prefixed course.

For a list of all state-approved common prerequisites, including alternatives, visit https://cpm.flvc.org.

Academic Progression Requirements

MAGIC program: Students transferring from the Miami Dade College MAGIC program who wish to enroll in the Animation Media or Game Media majors must have a minimum cumulative GPA of 2.85, including all transfer work in addition to at least 15 hours of FIU work, in order to be eligible to take advanced (4000-level) major-specific requirements.

All other students: In order to be eligible to take advanced (4000-level) major-specific requirements, first time and transfer students seeking this degree must successfully pass MMC3003 Journalism + Media Orient, and have a minimum cumulative GPA of 2.85, including all transfer work in addition to at least 15 hours of FIU work. Before taking the advanced major-specific courses, students must pass with a "C" or better the following required courses: MMC3303 Global Media and Society, MMC3123 Media Writing, and IDS2301 How We Know What We Know. IDS2301 How We Know What We Know also satisfies the FIU Humanities Group 2 core requirement and a Global Learning requirement, while MMC3303 Global Media and Society satisfies a discipline-specific Global Learning requirements.

Degree Program Credit Hours: 120

Type

Completion Requirement

Core Degree Requirements: 15 Credits

All students in this degree must complete a degree core that includes five courses:

Complete ALL of the following Courses:

- MMC3003 - Journalism + Media Orientation
- MMC3303 - Global Media and Society
- MMC3123 - Writing for Media
  OR DIG3153 - Writing for Film
- IDS2301 - How We Know What We Know
- MMC4200 - Law And Ethics
- VIC3400 - Visual Design for Globalized Media

**Students in the following majors must complete MMC3123 Media Writing: Digital Broadcast Journalism, Digital and Interactive Media, Digital Journalism, Digital TV and Multimedia Production.*

Additional Comments:

Specific credit requirements for each major in addition to the 15-credit Degree Core can be found under *Major Requirements*.

Major Requirements

Animation Media Major Credit Hours: 60

Type

Completion Requirement

Required Courses

Students in the Animation Media major must satisfy all the following requirements as instructed.

Fulfill ALL of the following requirements:

General Education:

Students transferring from Miami Dade College with an Associate in Science degree may take 18 credits to satisfy missing requirements in General Education.

AND

Major Specific Requirements: 45 Credits

Students transferring from Miami Dade College with an Associate in Science degree in Animation and Game Art will likely have satisfied the 2000-level courses. All students entering the major as a Freshman must take the five 2000-level courses.

Complete ALL of the following Courses:

- DIG3306 - Intro to 3D Content Creation
- DIG2220 - Editing for Animation
- DIG2308 - Digital Environments for Animation
- DIG2321 - Introduction to 3D Modelling
- DIG2370 - Dynamic Rigging for Animation
- DIG2461 - Conceptual Storytelling
- DIG3001 - Introduction to Digital Media
- DIG3922 - Animation Media Workshop1: Character Rigging
- DIG3376 - Animation Media Lab 1: 3D Lighting & Shading
- DIG4352 - Animation Media Lab 2: Digital Compositing and Visual Effects
- DIG4800 - Digital Theories
- DIG4920 - Animation Media Workshop 2: Advanced Character Motion Development
- DIG4951 - Animation Development Project
- DIG4952 - Game & Animation Media Capstone

AND

Lee Caplin School of Journalism & Media Electives

Students in the Animation Media major who have satisfied all of their General Education, Core Degree and Major Specific requirements and who are still shy of the 120 credits needed to graduate, may choose any course at the 3000/4000 level from ADV, COM, DIG, JOU, MMC, PUR, RTV, SPC.

Digital Broadcast Journalism Major Credit Hours: 60

Type

Completion Requirement

Required Courses

Students in the Digital Broadcast Journalism major must satisfy all the following requirements as instructed.

Fulfill ALL of the following requirements:

Major Specific Requirements: 24 Credits

Complete ALL of the following Courses:

- JOU2100 - Introduction to Reporting & Writing
- JOU3003 - Introduction to Journalism
- JOU3117 - Digital Journalism
- RTV3531 - Multimedia 1
- DIG4293 - Multimedia Production 2
- RTV4320 - Electronic News Gathering
- RTV4350 - Live Newscast Producing
- RTV4324 - Digital Broadcast Journalism Capstone

AND

Lee Caplin School of Journalism & Media Electives: 9 Credits

Complete ALL of the following Courses:

- MMC3932C - Intense Pods

Choose any course at the 3000/4000 level from ADV, COM, DIG, JOU, MMC, PUR, RTV, SPC

AND

Area of Concentration: 12 Credits

In consultation with an advisor, students must select a coherent series of four upper-division courses (3000/4000 level). Students may select an Area of Concentration from courses within the School, or from a non-communication area that can be related to their career.

Digital and Interactive Media Major Credit Hours: 60

Type

Completion Requirement

Required Courses

Students in the Digital and Interactive Media major must satisfy all the following requirements as instructed.

Fulfill ALL of the following requirements:

Major Specific Requirements: 27 Credits

Complete ALL of the following Courses:

- DIG3001 - Introduction to Digital Media
- RTV3531 - Multimedia 1
- DIG3110 - Intro to Web Production
- DIG3181 - Interactive Visualizations
- DIG3146 - The Social Media Audience
- DIG4394 - Motion Graphics for Digital Media
- DIG4800 - Digital Theories
- DIG4293 - Multimedia Production 2

- DIG4552 - Advanced Multimedia Production

AND

Lee Caplin School of Journalism & Media Electives: 6 Credits

Choose any course at the 3000/4000 level from ADV, COM, DIG, JOU, MMC, PUR, RTV, SPC

AND

Area of Concentration: 12 Credits

In consultation with an advisor, students must select a coherent series of four upper-division courses (3000/4000 level). Students may select an Area of Concentration from courses within the School, or from a non-communication area that can be related to their career.

Digital Journalism Major Credit Hours: 60

Type

Completion Requirement

Required Courses

Students in the Digital Journalism major must satisfy all the following requirements as instructed.

Fulfill ALL of the following requirements:

Major Specific Requirements: 27 Credits

Complete ALL of the following Courses:

- DIG3181 - Interactive Visualizations
- DIG4293 - Multimedia Production 2
- JOU2100 - Introduction to Reporting & Writing
- JOU3003 - Introduction to Journalism
- JOU3117 - Digital Journalism
- JOU3300 - Advanced Digital Journalism
- JOU4108 - Enterprise Reporting
- JOU4341C - Digital Journalism Capstone
- RTV3531 - Multimedia 1

AND

School of Communication and Journalism Track Electives: 6 Credits

Complete ALL of the following Courses:

- MMC3932C - Intense Pods

Any SCJ courses at the 3000/4000 level from ADV, COM, DIG, JOU, MMC, PUR, RTV, SPC

AND

Area of Concentration: 12 Credits

In consultation with an advisor, students must select a coherent series of four upper-division courses (3000/4000 level). Students may select an Area of Concentration from courses within the department, or from a non-communication area that can be related to their career.

Digital TV and Multimedia Production Major Credit Hours: 60

Type

Completion Requirement

Required Courses

Students in the Digital TV and Multimedia Production major must satisfy all the following requirements as instructed.

Fulfill ALL of the following requirements:

Major Specific Requirements: 27 Credits

Complete ALL of the following Courses:

- RTV3007 - Introduction to Television
- RTV3511 - Video Studio Production
- RTV3531 - Multimedia 1
- DIG3110 - Intro to Web Production
- DIG3253 - Digital Audio and Social Media Production
- RTV4101 - Writing for Video Production
- DIG4394 - Motion Graphics for Digital Media
- DIG4293 - Multimedia Production 2
- DIG4552 - Advanced Multimedia Production

AND

Lee Caplin School of Journalism & Media Electives: 6 Credits

Choose any course at the 3000/4000 level from ADV, COM, DIG, JOU, MMC, PUR, RTV, SPC

AND

Area of Concentration: 12 Credits

In consultation with an advisor, students must select a coherent series of four upper-division courses (3000/4000 level). Students may select an Area of Concentration from courses within the School, or from a non-communication area that can be related to their career.

Game Media Major Credit Hours: 60

Type

Completion Requirement

Required Courses

Students in the Game Media major must satisfy all the following requirements as instructed.

Fulfill ALL of the following requirements:

General Education:

Students entering the major as Freshman complete the University Core Curriculum to meet General Education credits.

Students transferring from Miami Dade College with an Associate in Science degree may take 18 credits to satisfy missing requirements in General Education.

AND

Major Specific Requirements: 45 Credits

Students transferring from Miami Dade College with an Associate in Science degree in Game Development and Design will likely have satisfied the 2000-level courses. All students entering the major as Freshman must take the five 2000-level courses.

Complete ALL of the following Courses:

- DIG2321 - Introduction to 3D Modelling
- DIG2461 - Conceptual Storytelling
- DIG2592 - User Interface Design
- DIG2721 - Intro to Game Design and Development
- DIG2729 - Game Engine Programming
- DIG3001 - Introduction to Digital Media
- DIG3306 - Intro to 3D Content Creation
- DIG3727 - Game Workshop 1: Game Level Design
- DIG3715 - Game Lab 1: Game Engines
- DIG4770 - Game Lab 2: AI for Game Design
- DIG4800 - Digital Theories
- DIG4961 - Game Workshop 2: Building Game Environments
- DIG4950 - Game Media Project
- DIG4952 - Game & Animation Media Capstone

AND

Lee Caplin School of Journalism & Media Electives

Students in the Game Media major who have satisfied all of their General Education, Core Degree, and Major-Specific requirements and who are still shy of the 120 credits needed to graduate, may choose any course at the 3000/4000 level from ADV, COM, DIG, JOU, MMC, PUR, RTV, SPC.

Sports Media Major

With an expansive program that features both classroom and experiential curriculum, the Sports Media major in the Lee Caplin School of Journalism & Media will prepare students a gateway into this burgeoning industry, offering career paths with local, national and international employment opportunities, all while maximizing the breadth of sports content available in and around Miami.

Sports Media Major Credit Hours: 60

Type
Completion Requirement

Major Specific Requirements: 27 Credits

Complete ALL of the following Courses:

- JOU3313 - Multiplatform Sports Writing
- DIG3142 - Sports Journalism and Social Media
- JOU4341C - Digital Journalism Capstone
- JOU3317 - Field Reporting for Sports Broadcast
- MMC3128 - Evolution of Sports Media Podcasting
- MMC3113 - Sports Journalism in Contemporary Society
- MMC3451 - Sports Information Research and Data
- MMC4940 - Media Practicum
- RTV3503 - Sports Broadcasting and Performance

Track, Specialization, Concentration, Area of Emphasis, or Other Curricular Offering Requirements

DIGCOM:CFI - Undergraduate Certificate in Digital Communication and Media

Overview

Degree Offered
ACRT - Academic Certificate

Program Title
Certificate in Digital Communication and Media

The Undergraduate Certificate in Digital Communication and Media is for students interested in broadening their understanding of the history and future trajectory of digital media. Students will have opportunities to research the evolution and impact of smartphones, games, artificial intelligence, block chain, and other emerging technologies. Students also will learn to identify media misinformation techniques and will dive deep into best practices of content creation for social media audiences.

DISMGT:BA - Bachelor of Arts in Disaster Management

Overview

Degree Offered
BA - Bachelor of Arts

Program Title
Disaster Management

The BA in Disaster Management prepares students for a career in emergency services where they will find employment in public, private, and governmental organizations. Graduates earn coveted FEMA certifications in Incident Command and Homeland Security through their curriculum. If a student has industry related experience prior to enrolling, they are able to earn academic credit for the knowledge they have acquired outside the classroom. This is done through the Prior Learning Assessment process. For more information, visit the Academy for International Disaster Preparedness website.

Requirements

Simple Requirements

Admissions Requirements

Admissions Standards

Minimum GPA of 2.0 for all lower and upper division courses (including transfer coursework from other institutions).

Program Requirements

Academic Progression Requirement

Students admitted to the university are admitted directly to their chosen major. Students are expected to make satisfactory progress based on critical indicators, such as GPA in specific courses or credits earned. In cases where students are not making satisfactory progress, a change of major may be required. Advisors work to redirect students to more appropriate majors when critical indicators are not met.

Lower Division Preparation

Type
Prerequisite

Common Prerequisites

Six semester hours of English coursework in which the student is required to demonstrate college-level English skills through multiple assignments. Note: A grade of "C" or better is required for all coursework.

For a list of all state-approved common prerequisites, including alternatives, visit https://cpm.flvc.org.

Complete ALL of the following Courses:

- ENC1102 - Writing and Rhetoric II

Program Credit Hours: 120

Type

Completion Requirement

Required Core Courses: 27 Credits

Complete ALL of the following Courses:

- PHC3101 - Introduction to Public Health
- PHC4189 - Disaster Management Ensuring Success and Avoiding Failure
- PHC4250 - Crisis Leadership in Disasters
- DSC4023 - Homeland Security and Disaster Management
- FES3859 - Disaster Preparedness
- FES3804 - Disaster Response
- FES3807 - Disaster Recovery
- PAD4088 - Incident Command Systems
- FES4852 - Advanced Principles in Disaster Management

Additional Core Course: 3 Credits

Complete at least 1 of the following courses:

- PHC4376 - Disaster by Design: Exercise Development for Homeland Security Professionals
- FES3000 - Disaster Risk Assessment

Disaster Management Prior Learning Assessment Program for Upper Division Credit

Many first responder skill sets are either gained through employment experience, military service, disaster related deployments, licenses, certification training programs, including those offered online by the Federal Emergency Management Agency or accredited universities, or acquisition of a Certified Emergency Manager (CEM®) or Associate Emergency manager (AEM®) designation through International Association of Emergency Managers (IAEM). PLA is not awarded for experience per se; rather it is awarded for college-level learning, which entails knowledge, skills, and competencies obtained as a result of prior learning experiences through certifications, licensures, veteran status, workplace skills and acquired knowledge.

Individuals majoring in Disaster Management program can submit evidence of documented prior learning. Between 0-30 credits of upper division academic credits will be awarded based on the extent of an individual's prior learning experience in the field of disaster management.

Any individual who prepares and submits a portfolio for review will be required to formulate a justification and rationale on how the prior learning experience relates to the discipline and learning outcomes associated with the degree. Mandatory attendance at the Introduction to Portfolio Development for Prior Learning Assessment for Disaster Management (offered every semester for 0 credits) is required in order to submit a portfolio. Portfolios may only be submitted once and are bound by FIU's Academic Integrity Policies.

Qualifications to complete Prior Learning Assessment for Upper Division Credit

(1) Instructor approval

(2) Attendance at a mandatory (0 credit) Introduction to Portfolio Development for Prior Learning Assessment for Disaster Management offered each semester.

Internship Program

On-the-job educational experiences at approved organizations allows interns to assist and observe all job functions and duties related to various aspects of disaster management within the profession. Students need department approval to enroll in PHC4940 Internship in Disaster. Learning assignments will be tied to professional experience and evaluated by the faculty of the program.

Graduation Requirements

(1) Students need a minimum of 120 credit hours to be eligible for a bachelor’s degree.

(2) Students must have at least a 2.0 FIU grade point average to be eligible for graduation.

(3) Students must meet all FIU requirements for graduation above and beyond the course work within the Disaster Management program.

Major Requirements

There are no majors associated with this program.

Track, Specialization, Concentration, Area of Emphasis, or Other Curricular Offering Requirements

There are no tracks, specializations, concentrations, areas of emphasis, or other curricular offerings associated with this program.

DISMGT:MA - Master of Arts in Disaster Management

Overview

Degree Offered
MA - Master of Arts

Program Title
Disaster Management

The Master of Arts in Disaster Management is an innovative, accelerated program designed to equip students with the knowledge and skills necessary to excel in the field of disaster management. This intensive one-year program encompasses ten core courses, seamlessly integrating theoretical knowledge and practical application. Its curriculum is distinguished by its comprehensive approach, combining insights from both domestic and international disaster management strategies. Upon completing the program, graduates are well-prepared to tackle the challenges associated with disaster preparedness, response, recovery, and mitigation. For more information, visit the Academy for International Disaster Preparedness website.

Requirements

Simple Requirements

Admissions Requirements

All applicants for graduate study at FIU must have a:

(1) Baccalaureate degree from an accredited institution for higher education, or equivalent degree from a foreign institution.

(2) 3.0 undergraduate GPA.

(3) Foreign students must submit official Test of English as a Foreign Language (TOEFL) scores and must have a minimum score: 550 Paper and Pencil, 213 Computer-based, 80 Internet-based.

The above admission requirements are minimums, and not all students meeting them are assured admission. Students with a grade-point average below the above minimums may still apply and request a waiver of those scores. The student must provide an explanation of why the waiver should be approved.

Program Requirements

Degree Program Credit Hours: 30

Type
Completion Requirement

Required Courses

Complete ALL of the following Courses:

- FES6846 - Comparative Disaster Management Systems
- FES6858 - Crisis Communications
- FES6826 - Disaster Preparedness and Planning Methodologies
- SYG6932 - Special Topics in Disaster Studies (Inactive)
- FES6857 - Introduction to Vulnerability Analysis and Hazard Mitigation
- FES6806 - Disaster Response and Recovery
- FES6848 - Disaster Health Readiness
- FES6847 - Core Competencies of the Humanitarian Profession
- FES6805 - Disaster Field Operations
- PHC6374 - Environmental Disasters and Human Health

***Note**: Courses not included on the approved list of required courses may count toward meeting the requirement of this degree only with the permission of the Director or Dean.*

Graduation Requirements

In order to graduate, a student must maintain a 3.0 GPA and complete satisfactorily the prescribed curriculum.

Major Requirements

There are no majors associated with this program.

Track, Specialization, Concentration, Area of Emphasis, or Other Curricular Offering Requirements

Hybrid Washington DC Master of Arts in Disaster Management

The hybrid Washington DC Master of Arts in Disaster Management option consists of the same 30-credit curriculum as the face-to-face and online programs focusing studies in emergency preparedness, disaster management, and humanitarian assistance. Broadly speaking, the general learning outcome of the program is aligned with FEMA's Higher Education Core Competencies and is designed to take students beyond the core competencies needed by practitioners, to a deeper understanding of the reasons behind the practice and cultivate in them an ability to develop and implement integrated solutions to problems. The hybrid program consists of approximately 20% course meetings at the FIU facility in Washington, DC, 75% online course work, and 5% participation at a multiple-day disaster field exercise held in Miami, Florida at the culmination of the program.

Refer to Admissions Requirements and Program Requirements above.

Online Master of Arts in Disaster Management

The online Master of Arts in Disaster Management is a 30-credit graduate program featuring course work in emergency preparedness, disaster management, and humanitarian assistance. This one-year graduate program has been developed in response to the growing recognition and need for graduate level education in disaster management. The program’s curriculum is interdisciplinary in nature and scope; designed to develop and improve the skills of disaster

practitioners and those interested in entering the exciting field of disaster management. Broadly speaking, the general learning outcome of the program is aligned with FEMA's Higher Education Core Competencies and is designed to take students beyond the core competencies needed by practitioners, to a deeper understanding of the reasons behind the practice and cultivate in them an ability to develop and implement integrated solutions to problems. Students enrolled in the online program will be required to travel to Miami to participate in a multiple-day disaster field exercise, which is part of the Disaster Field Operations course (FES6805 Disaster Field Operations).

Refer to Admissions Requirements and Program Requirements above.

ECE:PHD - Doctor of Philosophy in Electrical and Computer Engineering

Overview

Degree Offered
PHD - Doctor of Philosophy

Program Title
Electrical and Computer Engineering

The PhD program in Electrical and Computer Engineering at FIU fortifies students with unparalleled proficiencies in critical thinking, research acumen, innovation, and leadership, thereby unlocking a myriad of enriching and fulfilling career trajectories across technical and non-technical domains. This degree opens up a wide range of possibilities and opportunities in academia, industry and the government sector, such as research scientist, research engineer, consulting, government or non-profit work, academia, and entrepreneurship.

For more information, visit the College of Engineering and Computing website.

College of Engineering and Computing

Diploma Title
Doctor of Philosophy in Electrical and Computer Engineering

Total Credits
78

Program Length in Years Based on Full-Time Enrollment
5

CIP Code
14.1001

Requirements

Simple Requirements

Admissions Requirements

The requirements for admission to the doctoral program in Electrical and Computer Engineering are:

(1) Applicants having a bachelor's degree in engineering, physical sciences, computer science or mathematics from an accredited institution must provide the following for admission to the doctoral program:

-- An applicant must have a GPA score of 3.0/4.0 or higher in either the overall undergraduate degree or the last 60 credit hours.

-- Applicants who have not satisfied the above score may be evaluated for conditional admission.

-- Three letters of recommendation in the forms provided by the department

-- Applicants from non-English speaking countries, including internationally educated American students, must demonstrate proficiency in English. Please refer to the Admissions English Proficiency criteria at https://admissions.fiu.edu/international/graduate-school/english-language-proficiency/

(2) Applicants having a Master's degree in Electrical or Computer Engineering from an accredited institution must provide the following for admission to the doctoral program:

-- GPA of at least 3.3/4.0 in the master's program

-- Three letters of recommendation in the forms provided by the department

-- Applicants from non-English speaking countries, including internationally educated American students, must demonstrate proficiency in English. Please refer to the Admissions English Proficiency criteria at https://admissions.fiu.edu/international/graduate-school/english-language-proficiency/.

(3) Credentials of all other applicants will be examined by the Graduate Admission Committee on a case-by-case basis. In addition to the departmental requirements, all students must satisfy the University's Graduate Policies and Procedures.

Program Requirements

Identification of Research Area

Within 12 months upon acceptance into the Ph.D. program, the student has to identify an area of research of his or her interest by contacting and being accepted by a professor willing to guide the dissertation research. If no such professor can be found, the student will be dismissed from the Ph.D. program. Contact the Department for a list of the faculty members with Dissertation Advisor status and their research interests.

Course Requirements

The Ph.D. in Electrical and Computer Engineering requires at least 75 credit hours beyond the bachelor’s degree. A maximum of 30 credit hours of coursework earned in a Master’s degree in Electrical or Computer Engineering, from FIU or another accredited institution, may be counted toward the Ph.D. provided that a minimum grade of “B” is earned in each course.

Degree Requirements

(1) Students must complete at least 9 credits of coursework in their major area (EEL 6905, 6916, 6932 and 6971 will not be counted as coursework) and at least 6 credits in two different breadth areas (a grade of “B” or better in each course). The appropriate areas of study and specific courses are determined by the dissertation advisor. Students majoring in Electrical Engineering should have one minor in computer engineering, and those majoring in Computer Engineering should have one minor in Electrical Engineering.

(2) The student must have completed a minimum of 45 credits of graduate coursework toward the Ph.D. before the student is eligible for the candidacy. This includes up to 30 transfer credits.

(3) At least 15 credits of EEL7980 are required. Registration for EEL7980 is allowed only after achieving candidacy status.

(4) Fifty percent of the total hours counted toward the doctoral degree have to be at the 6000 and 7000 levels (including EEL7980 Ph.D. Dissertation).

Residency Requirements

The Ph.D. student must spend at least one academic year in full-time residency. Usually, this will be after being admitted to candidacy. To satisfy the residency requirement for a Ph.D. degree in Electrical and Computer Engineering, the candidate must complete a minimum of 18 credit hours within a period of 12 months in residency at the University.

Graduate Supervisory and Research Committee

The student’s Ph.D. Graduate Supervisory and Research Committee should be appointed as soon as possible and not later than 15 months after being admitted to the Ph.D. program. Consult the Graduate Handbook in the Department for more details on how to select the committee members.

Ph.D. Course Breadth Requirements

The student must submit information about how the breadth requirement has been satisfied to the Graduate Program Director at the time he/she signs up for the Ph.D. Qualifying Examination.

Qualifying Examination

To be eligible for the qualifying examination, the student must have satisfied the Ph.D. course breadth requirements in his or her area of specialization and in two other areas. The students can take the qualifying examination no later than the semester in which all the required coursework for the degree is completed. Failure to do this is causation for dismissal from the Ph.D. program.

One of the following two options will be selected by the student with the approval of student's major advisor for the oral qualifying exam: (1) Research paper based or (2) Course based. Failing any part of the exam implies the failure of the entire examination. The exam must be retaken the next time it is offered. Failing a second time is a cause for dismissal from the Ph.D. program.

Consult the Graduate Handbook available in the Department for details on examination procedures, dates, duration, application and grading criteria.

Proposal Defense

Proposal defense must be taken within one semester after the satisfactory completion of the qualifying examination.

Admission to Candidacy

Candidacy status indicates that a doctoral student is ready for the completion of the dissertation. A student is admitted to candidacy upon successfully completing all required coursework and passing the qualifying examination.

Oral Defense and Submission of Doctoral Dissertation

A dissertation is required of all candidates for the doctoral degree. A proposal must be submitted to the student's Dissertation Committee for approval, following the general guidelines in the "Regulations for Thesis and Dissertation Preparation". A student must enroll for dissertation credits in the semester in which he or she expects to be admitted to candidacy, and must maintain continuous enrollment for not less than 3 credits of EEL7980 Ph.D. Dissertation every semester, including Summers, until the semester in which the doctoral degree is awarded. Upon completion of the dissertation, the degree candidate will submit to the Dean of the Graduate School an application for dissertation defense signed by the student's Dissertation Committee with sufficient time to allow for publishing a notice in the monthly calendar of the dissertation and these defenses to invite members of the university community to observe the defense.

Following the successful defense of the dissertation, as determined by a majority vote of the student's research committee, the dissertation must be forwarded to the Dean of the College of Engineering and Computing and the Dean of the Graduate School for their approval.

All dissertations submitted in fulfillment of requirements for graduate degrees must conform to University guidelines (see "Regulations for Thesis and Dissertation Preparation"). One final, approved copy of the dissertation must be delivered to the Chairperson of the Department of Electrical and Computer Engineering. Library copies must conform to University guidelines, also published in "Regulations for Thesis and Dissertation Preparation".

Any exception to the program requires the department's approval.

MS en-route to PhD

Students in the ECE PhD program may obtain an MS degree in Electrical Engineering or Computer Engineering provided that the following conditions are satisfied.

--Completed 30 credits of graduate coursework at FIU that satisfy the requirements for the Master of Science degree in Electrical or Computer Engineering.

--The courses have not been used for a previously earned master's degree.

--In good academic standing and all courses are within the time limits to degree completion.

--No pending Incomplete grades.

--Have approved D1, D2 and D3 on file with UGS.

This is subject to approval by the GPD and UGS.

Major Requirements

There are no majors associated with this program.

ECEDU:PHD - Doctor of Philosophy in Engineering and Computing Education

Overview

Degree Offered
PHD - Doctor of Philosophy

Program Title
Engineering and Computing Education

Engineering education research and computing education research primarily focus on understanding how people learn engineering and computing respectively and how to improve instruction and educational experiences. A PhD in Engineering and Computing Education will enable graduates to become research and educational leaders in engineering and computer science at all levels and in a variety of settings, such as academia, industry and government.

Requirements

Simple Requirements

Admissions Requirements

For admission into the program, students will:

(1) Have a bachelor degree in Engineering or Computing or a closely related field.

(2) Have either an upper division GPA of at least 3.0 in the bachelor’s degree, calculated based on the last 60 credits attempted or the overall undergraduate GPA, or GPA of at least 3.0 from a Master’s program in a closely related field

(3) Have three letters of recommendation, a copy of the transcript, and a copy of the university graduate application to the Graduate Program Director in accordance with University Graduate School deadlines.

(4) Have received approval of the departmental graduate committee.

(5) International students whose native language is not English must obtain a score of 80 or higher on the TOEFL iBT (this corresponds to 550 on the old TOEFL test), 6.3 overall on the 1ELTS, or equivalent test as approved by the University Graduate School. The University Graduate School has a list of countries that are exempt from this requirement.

Program Requirements

Engineering and Computing Education Foundations

Type
Completion Requirement

Required Courses: 12 credits

Complete ALL of the following Courses:

- EGS6008 - Foundations of Engineering and Computing Education Scholarship
- EGN6900 - Engineering and Computing Education Research Methods in Context
- EGS6057 - Research, Policy, and Practice in Engineering and Computing Education
- EGN6942 - Mentored Teaching Practicum in Engineering and Computing Education
- EGN6957 - Professional Development in Engineering and Computing Education

Engineering Pedagogy

Type
Completion Requirement

Required Courses: 3 credits

Complete ALL of the following Courses:

- EGS6055 - Foundations of Engineering and Computing Teaching and Learning

Research Methods/Statistics Electives

Type
Completion Requirement

Required Courses: 9 credits

Students are required to complete three research methods courses. One course must be an educational/social science research methods survey course (e.g., EDF6481 Ed Research Method). List of eligible courses are held by SUCCEED. In conjunction with their advisor, students must choose two additional research methods courses.

1. Educational/Social Science research methods survey course (List held by SUCCEED)
2. Research methods electives

ECED Concentration

Type
Completion Requirement

Required Courses: 9 credits

In conjunction with their advisor, students must complete nine credit hours of courses that focus on an area of specialization.

Seminar

Type
Completion Requirement

Required Course: 0 credits

Students are required to register for a seminar course and attend weekly seminars hosted by the STEM Transformation Institute.

Complete at least 1 of the following courses:

- EGN6935 - Seminar on STEM Education Research

Engineering and Computing Specialization

Type
Completion Requirement

Required Courses

Students must complete any five courses from one of the specializations listed below.

Please see Tracks, Specializations, Concentrations, Areas of Emphasis, or Other Curricular Offerings Requirements area for details.

Earn at least 15 credits

Graduation Requirements

The graduation requirements for the program will be:

(1) Completing a total of 75 credit hours of coursework beyond the bachelor degree (see section VIII. C. for detail), with a cumulative GPA of 3.0 or higher.

(2) Successful completion of the Comprehensive Exam. This examination serves as an evaluation of student preparedness for doctoral study. This examination assesses a student’s understanding of the field of engineering and computing education and the major theoretical concepts, applied issues, and means of inquiry for undertaking research in the field. The student must pass the Comprehensive Exam by the end of the seventh semester (excluding summers) in the program if they were admitted without a Master's degree or by the end of the fifth semester if admitted with a Master's or the equivalent 15 credit hours. Two attempts are permitted. Any exception needs to be approved by the Graduate Committee.

(3) Choosing advisor(s). The student will choose a faculty from the College of Engineering and Computing as their dissertation advisor. A co-advisor could be selected from within the College or from outside.

(4) Assembling a Dissertation Committee. The students will assemble a Dissertation Committee of at least four faculty members [including Major advisors]. Two committee members must be SUCCEED faculty, or SUCCEED-affiliated faculty and one must be FIU faculty from outside of SUCCEED.

(5) Successful presentation and submission of a dissertation proposal. The student will present and defend their plan for dissertation study. The purpose of the proposal is to provide an opportunity for the student to demonstrate their abilities to scope and plan a research project and communicate that plan both in writing and orally. The proposal will be submitted to at least three members of the candidate's dissertation committee (at least two of whom will be from SUCCEED or the STEM Transformation Institute). The candidate presents their accomplishments and proposed research and answer questions from the committee and others in the audience.

(6) Upon completion of the required core courses, the Comprehensive Exam, and the dissertation proposal the student advances to Candidacy.

(7) Satisfaction of the teaching requirement. The ability to teach at the university level is an important skill that should be encouraged in all graduate students. For this reason, students will be required to take the EGS6055 Found of Eng and Comp Edu T&L Foundations of Engineering and Computing Teaching and Learning course prior to candidacy and participate in a mentored teaching practicum for one semester during their PhD studies in order to gain exposure to the classroom or laboratory teaching environment. Students with teaching experience from previous graduate programs may petition to waive the teaching requirement, in which case the three-credit course should be replaced with an alternate course. Waivers will be granted at the discretion of the Graduate Program Director.

(8) Submission and defense of a dissertation based upon original research in Engineering or Computing Education. A dissertation is required of all candidates for the PhD degree and must conform to the format outlined in the Regulations for Thesis and Dissertation Preparation Manual available to students online from the FIU Graduate School. Students must complete a minimum of 15 dissertation credits.

(9) After submission of the dissertation and completion of all other required work for the PhD degree, the candidate will be given a final oral thesis defense examination by the Dissertation Committee. Successful completion of all of these steps will culminate in the granting of the PhD degree.

Major Requirements

There are no majors associated with this program.

Track, Specialization, Concentration, Area of Emphasis, or Other Curricular Offering Requirements

Engineering and Computing Specialization

Type

Completion Requirement

Required Courses: 15 credits

Students must complete any five courses from one of the specializations listed below. The list of courses is maintained by the unit that houses the specialization. This requirement can be satisfied by an appropriate Master's degree from an accredited university.

- Biomedical Engineering
- Civil Engineering
- Computer Engineering
- Computer Science
- Electrical Engineering
- Engineering Management
- Environmental Engineering
- Information Technology
- Mechanical and Materials Engineering

ECHDED:BS - Bachelor of Science in Early Childhood Education

Overview

Degree Offered
BS - Bachelor of Science

Program Title
Early Childhood Education

The Bachelor of Science (BS) in Early Childhood Education will prepare students for a multitude of career paths within the field. The program provides opportunities for students to gain knowledge and skills focused on child development, instructional practices, assessment, planning, and family/community studies. Two majors are offered under the BS in Early Childhood Education: (1) the initial teacher preparation program, which results in full certification through the State of Florida in addition to Reading and ESOL endorsements; and (2) the Development degree, which prepares professionals for the field, but does not result in teacher certification.

For more information, visit the College of Arts, Sciences, and Education website.

Requirements

Simple Requirements

Admissions Requirements

Admissions Requirements for the Bachelor of Science (BS) in Early Childhood Education (major: Prekindergarten/Primary Education: Age 3 through Grade 3 with Reading and English Speakers of Other Languages [ESOL] Endorsements)

(1) A minimum lower-division GPA of 2.5 or better on a 4.0 scale;

(2) Either 60 credit hours of lower division coursework or an AA degree from an accredited institution;

(3) A passing score on the Florida Teacher Certification Exam (FTCE) – General Knowledge exam;

(4) All students must pass the GK Exam and be admitted to their program by the end of the semester they successfully complete 72 credit hours.

All stated admission requirements are to be considered minimum. A student who meets these minimum requirements is not automatically assured admission. Program admission requirements are subject to change. It is the responsibility of the student to assure that he/she has met the requirements.

Admissions Requirements for the Bachelor of Science in Early Childhood Education (major: Early Childhood Development)

In order to be admitted into the Early Childhood Development Major, students must (a) have 60 semester hours or an A.A. degree from a FL public institution, (b) have a minimum 2.5 GPA, and (c) meet the general requirements of Florida International University.

Program Requirements

Academic Progression Requirements

Students admitted to the university are admitted directly to their chosen major. Students are expected to make satisfactory progress based on critical indicators, such as GPA in specific courses or credits earned. In cases where students are not making satisfactory progress, a change of major may be required. Advisors work to redirect students to more appropriate majors when critical indicators are not met.

Lower Division Preparation

Type

Completion Requirement

Common Prerequisite Courses

Fulfill ALL of the following requirements:

FIU Common Prerequisite Courses

For a list of all state-approved common prerequisites, including alternatives, visit https://cpm.flvc.org.

Complete ALL of the following Courses:

- EDF1005 - Introduction to Education

EDF1005 Intro To Education require field experience of 15 clock hours outside of class time.

AND

Additional Lower Division Recommended Courses

Completion of the following courses with a grade of C or higher:

Complete ALL of the following Courses:

- EME2040 - Introduction to Educational Technology

Major Requirements

Bachelor of Science in Early Childhood Education: Prekindergarten/Primary Education: Age 3 through Grade 3 with Reading and ESOL Endorsements Major

The Bachelor of Science in Early Childhood Education with Reading and ESOL endorsements is an initial teacher preparation program leading to approval for State of Florida Certification in Prekindergarten/Primary education with Reading and ESOL Endorsements. This degree program is designed to educate future teachers of students from prek-3

to grade 3. The program is designed to prepare future teachers of prekindergarten (3) through grade 3 through coursework and field experiences that focus on the necessary skills to assess, plan, teach, and evaluate the education of young students from diverse cultural and linguistic backgrounds and varying ability levels.

Clinical Experiences

Early Clinical Experiences (Field Hours)

Many courses offered by the Department of Teaching and Learning require completion of a specified number of early clinical experiences (field hours) in approved K–12 school settings. Course descriptions identify those courses that include in-school classroom experiences. These experiences offer guided observation and participation under the supervision of a classroom teacher and a faculty member from the School of Education and Human Development.

Fingerprinting Requirements

In accordance with the Jessica Lunsford Act, all students completing field and clinical experiences in Florida must undergo fingerprinting and a background check at students' own expense. Placement requests in approved schools require the district's clearance verification. Students will not be allowed to enter a school campus without the necessary clearance.

School Placements

All early clinical experiences (field hours) and the Student Teaching internship must be completed at schools with which Florida International University has established affiliation agreements, including but not limited to Miami-Dade County Public Schools and Broward County Public Schools. All placements are coordinated through the FIU Office of Clinical Experiences. Students may not arrange placements independently.

Student Teaching

Student Teaching is the full-time, culminating clinical experience for candidates in Initial Teacher Preparation Programs. This internship allows candidates to apply and demonstrate the professional knowledge and skills acquired throughout their degree program. Under the guidance of a Cooperating Teacher or Mentor Teacher and a University Supervisor, candidates engage in sustained practical teaching over a full academic semester.

Permission to student teach is contingent upon successful completion of all required coursework and Florida Teacher Certification Examinations, as specified in the program of study. Placements are available during the fall and spring semesters of the student's senior year, but not in the summer.

Students in Initial Teacher Preparation Programs must demonstrate mastery of General Knowledge by passing all four sections of the FTCE General Knowledge Test or by achieving qualifying scores, as established by the State of Florida, on approved alternative assessments (SAT, ACT, GRE, or CLT). Students should contact their academic advisor to inquire about eligibility for a General Knowledge (GK) waiver.

Additional information about clinical experiences (field hours) and the Student Teaching application process, including the online application, is available on the FIU Office of Clinical Experiences website. Students are responsible for completing and submitting the online application by the specified semester deadline.

For questions, contact the FIU Office of Clinical Experiences at 305-348-2082, email ClinicalExperiences@fiu.edu, or visit the Ziff Education Building (ZEB), Room 130.

Prekindergarten/Primary Education: Age 3 through Grade 3 with Reading and English Speakers of Other Languages (ESOL) Endorsements Major

Type

Completion Requirement

Upper Division Program: 60 Credits

Minimal acceptable grade is a “C”.

Fulfill ALL of the following requirements:

Foundations: 9 Credits

Complete ALL of the following Courses:

- EEC3751 - Early Childhood Classroom Management and Decision Making
- EDF4604 - Cultural and Social Foundations of Education
- EDP3004 - Educational Psychology

AND

Early Childhood Core: 3 Credits

Complete ALL of the following Courses:

- EEC4250 - Curriculum and Instruction in Early Childhood Education

AND

Teaching Methods & Curriculum: 21 Credits

Complete ALL of the following Courses:

- ARE3313 - Content and Methods of Teaching Elementary Art
- MAE4310 - Content and Methods of Teaching Elementary Math
- SCE4310 - Content and Methods of Teaching Elementary Science
- EDP3273 - Child Development
- EEX3070 - Teaching Students with Exceptionalities in Inclusive Settings
- EEC3613 - Assessing Young Children
- SSE4118 - Social Studies and Foundations in Early Childhood Education

AND

Language & Literacy: 12 Credits

Complete ALL of the following Courses:

- LAE4405 - Children's Literature
- RED4100 - Emergent Literacy
- RED4110 - Content and Methods of Teaching Literacy in Schools
- RED4150 - Content and Methods of Teaching Beginning Literacy

AND

TESOL: 6 Credits

Complete ALL of the following Courses:

- TSL3080 - ESOL Principles and Practices I
- TSL4081 - ESOL Issues: Principles and Practices II

AND

Student Teaching/Internship: 9 Credits

Complete ALL of the following Courses:

- EEC4943 - Student Teaching Internship

Eligibility to enroll in EEC4943 Student Teaching Internship is contingent upon satisfactory completion of all requirements specified in the program, which includes being fully admitted to the Early Childhood Education Program AND passing scores on FTCE Professional Education and Prekindergarten/Primary (PK-3) Subject Area Examinations.

ARE3313 Teach Elem Art, EEC4250 Cur Instr Early Chld, RED4100 Emergent Literacy, RED4110 Teach Lit in School, SSE4118 Soc Stud & Found in EEC, TSL3080 Esol Prin/Prac I and TSL4081 have a co-requisite of clinical experience (field hours) distributed throughout the term. EEC4943 Student Teaching Internship Student Teaching Internship is the full-time, culminating experience. Other courses may also have field requirements.

RED4110 Teach Lit in School meets in selected schools.

These courses must be taken in the following sequence: RED4100 Emergent Literacy, RED4150 Teach Begin Read, RED4110 Teach Lit in School.

TSL3080 Esol Prin/Prac I is a prerequisite of TSL4081.

Additional Comments:

Graduation Requirements

In addition to University graduation requirements, ECE Program graduation requirements include successful demonstration of the Florida Educator Accomplished Practices, GPA 2.5 or above and passing scores on all three sections of the Florida Teacher Certification Exams (General Knowledge, Professional Education, and Subject Area Exam Prekindergarten/Primary PK-3).

Bachelor of Science in Early Childhood Education: Early Childhood Development Major

The Early Childhood Development Major focuses on understanding of learning and development during the early childhood years. Students will learn about the cognitive, language, and social/emotional development of young children within the context of family and community studies. Students will also learn about general and early education practices and curricula.

NOTE: This major does not result in a teacher certification.

Early Childhood Development Major

Type

Completion Requirement

Upper Division Program: 60 Credits

The Early Childhood Development Major requires students to take a total of 60 upper division credit hours in professional education and early childhood development.

Fulfill ALL of the following requirements:

A. Professional Education Courses: 30 Credits

Fulfill ALL of the following requirements:

1. Foundations: 12 Credits

Complete ALL of the following Courses:

- EDG3321 - Managing Teaching Environments: Instructional Decisions and Classroom Management
- EDP3004 - Educational Psychology
- EDF3251 - Classroom Management
- EDF4604 - Cultural and Social Foundations of Education

AND

2. Teaching Methods and Curriculum: 9 Credits (minimum)

Choose three (3) advisor-approved teaching methods and curriculum courses, such as:

Complete at least 3 of the following courses:

- EEC3242 - Art in Early Childhood Education
- EEC4211 - Integrated Math and Science in Early Childhood
- EEX3070 - Teaching Students with Exceptionalities in Inclusive Settings
- MAE4310 - Content and Methods of Teaching Elementary Math
- SCE4310 - Content and Methods of Teaching Elementary Science
- TSL3004 - Foundations of Bilingual & ESOL Education

AND

3. Early Childhood Education: 9 Credits

Complete ALL of the following Courses:

- EEC3204 - Issues in Early Childhood Education
- EEC4005 - Early Childhood Education Programs
- LAE4405 - Children's Literature

AND

Early Child Development Courses: 21 Credits

Fulfill ALL of the following requirements:

Required Courses

Fulfill ALL of the following requirements:

4. Child Development: 9 Credits

Complete ALL of the following Courses:

- EDP3273 - Child Development
- EDP4274 - Early Social and Emotional Development
- EEC3613 - Assessing Young Children

AND

5. Family & Community Studies: 6 Credits (minimum)

Select two (2) advisor-approved courses in family and community studies, such as:

Complete at least 2 of the following courses:

- EEC3400 - Family Literacy and the Young Child
- EEC3403 - Special Needs of Children and Their Families
- EEC3408 - Communities, Families and Young Children

AND

6. Literacy/Language/Reading Development: 6 Credits (minimum)

Select two (2) advisor-approved literacy/language/reading development courses, such as:

Earn at least 6 credits from the following:

- RED3313 - Language and Literacy Development
- RED4100 - Emergent Literacy
- RED4150 - Content and Methods of Teaching Beginning Literacy

AND

7.Elective Courses: 9 Credits

Select up to three (3) advisor-approved elective courses in the area of early childhood learning and development. Elective courses may be used to take additional courses in any of the areas listed above.

Track, Specialization, Concentration, Area of Emphasis, or Other Curricular Offering Requirements

There are no tracks, specializations, concentrations, areas of emphasis, or other curricular offerings associated with this program.

ECHDED:MS - Master of Science in Early Childhood Education

Overview

Degree Offered
MS - Master of Science

Program Title
Early Childhood Education

The Master of Science (MS) in Early Childhood Education provides graduate training in the understanding and teaching of children from birth to eight years old. The program provides students with a foundation in curriculum and instruction, and specialization in learning and development during early childhood. This program is available both in person and fully online, catering to diverse learning preferences and schedules.

For more information, visit the College of Arts, Sciences, and Education website.

Requirements

Simple Requirements

Admissions Requirements

Applicants must meet the minimum University Graduate School admissions requirements. Specific requirements for admissions into the M.S. degree in Early Childhood Education are as follows:

1. A Bachelor's Degree from an accredited institution in education, psychology, human development, or related field with a 3.0 GPA on a 4.0 scale in the last 60 hours of undergraduate work.

2. Two (2) letters of recommendation to support the applicant. Letters and any other supporting documents are to be sent to Graduate Admissions Office at Florida International University, PO Box 659004, Miami, Florida, 33265 to complete the application for admissions.

3. A statement of intent describing the applicant's personal and professional goals in relation to (a) how the program will help the applicant reach these goals and (b) how the applicant's goals are consistent with the program's mission.

4. A current resume/curriculum vitae that includes, at a minimum, educational history (with relevant courses listed), employment background, and relevant/related experiences.

Program Requirements

Program Credit Hours: 30

Type

Completion Requirement

Program Requirements

The M.S. in Early Childhood Education program requires all students to take 9 hours of foundation courses in curriculum and instruction and in 3 methods/statistics. Students take an additional 15 hours within early childhood education/development, and 3 hours of education-related electives.

Fulfill ALL of the following requirements:

1. Foundations: 9 Credits

Complete ALL of the following Courses:

- EDF6211 - Psychological Foundations of Education
- EEC6261 - The History and Philosophy of Early Childhood Education

Choose one (1) course in social, philosophical, and/or historical foundations of education, such as EDF6608 Socio-Histo Foundation Ed or equivalent special topic course.

AND

2. Research Methods & Data Analysis: 3 Credits

Complete ANY of the following Courses:

- EDF5481 - Foundations of Educational Research
- EEC6678 - Research in Early Childhood Education

AND

3. Early Childhood Education/Development: 15 Credits

Fulfill ALL of the following requirements:

Required Courses: 9 Credits

Complete ALL of the following Courses:

- EEC6705 - Typical and Atypical Child Development: Birth to Eight Years
- EEC6277 - Thinking and Learning in the 21st Century
- EEC6419 - Working With Families Using Culturally Responsive Practices

AND

Early Education Elective Courses: 6 Credits

Select two (2) advisor-approved electives in Early Childhood Education, such as

Complete at least 2 of the following courses:

- EEC6932 - Seminar in Early Childhood Education
- LAE5415 - Children's Literature
- MAE6305 - Instruction to Early Childhood Mathematics

- RED6305 - Instruction in Early Childhood Literacy
- EEC6019 - Integrating Educational Technology for Intentional Teaching

AND

4. Elective Course OR Thesis: 3 Credits

Select one (1) advisor approved elective in education, psychology, human development, or related field. Students may opt to complete a thesis instead of taking an elective course. Faculty consent is required to enroll into the thesis course

Complete ALL of the following Courses:

- EEC6971 - Thesis in Early Childhood Education

Graduation Requirements

Students must meet all Department, College, Graduate School, and University graduation requirements. No grades of “C-“ or less received in courses that are part of a masters program of study will be accepted toward graduation.

Major Requirements

There are no majors associated with this program.

Track, Specialization, Concentration, Area of Emphasis, or Other Curricular Offering Requirements

There are no tracks, specializations, concentrations, areas of emphasis, or other curricular offerings associated with this program.

ECON:BA - Bachelor of Arts in Economics

Overview

Degree Offered
BA - Bachelor of Arts

Program Title
Economics

The Bachelor of Arts (BA) degree in Economics provides students with the skills to think critically and to make optimal decisions in a world of scarce resources. Economics is critical in shaping public policy and guiding public and private decision making. The BA program is suitable for those who want to pursue a career in areas such as public administration, international relations, political science, business, sociology, and law.

For more information, visit the Steven J. Green School of International and Public Affairs website.

Requirements

Simple Requirements

Admissions Requirements

See general university admissions requirements at admissions.fiu.edu.

Admissions Requirements for the Combined Bachelor of Arts (BA) in Economics to Master of Arts (MA) in Economics Accelerated Degree Pathway

To be considered for admission to the bachelor's/master's accelerated degree pathway, students must have completed at least 75 credits in the bachelor's degree program at FIU and meet the admissions criteria for the graduate degree program to which they are applying. Students need only apply once to the accelerated degree pathway; the application is submitted to Graduate Admissions typically before the student starts the last 30 credits of the bachelor's degree program. A student admitted to the accelerated degree pathway will be considered to have undergraduate status until the student applies for graduation from their bachelor's degree program. Upon conferral of the bachelor's degree, the student will be granted graduate status and be eligible for graduate assistantships. Only 5000-level or higher courses, and no more than the number of credits specified by the program catalog, may be applied toward both degrees.

The BA program in economics requires that students take 9 upper division elective courses. Students in the BA/MA accelerated degree pathway would take elective courses that would satisfy both the BA and MA requirement.

To apply, the student's GPA needs to be significantly above average (3.25). Students would also be required to maintain a high GPA (3.0) to remain in the pathway. The grade requirements for an MA in economics would apply to courses that are counted toward the MA degree.

Admissions Requirements

--Current enrollment in the Bachelor's degree program in economics at FIU.
--Completed MAC2311 Calculus I Calculus I and MAC2312 Calculus II Calculus II or equivalents.
--Current GPA of 3.25 or higher.
--Three letters of recommendation.
--Approval of the Graduate Committee.
--Official GRE scores.

Program Requirements

Academic Progression Requirements

Students are admitted directly to their chosen major at the University. Students are expected to make good progress based on critical indicators that include course completion and GPA requirements. In cases where students are not making successful progress, a change of major may be required. Academic advisors work with students to identify an appropriate major where a student will be successful in completing an undergraduate degree.

Lower Division Requirements:

Type
Prerequisite

Common Prerequisite Courses

For a list of all state-approved common prerequisites, including alternatives, visit https://cpm.flvc.org.

Complete ALL of the following Courses:

- ECO2013 - Principles of Macroeconomics
- ECO2023 - Principles of Microeconomics
- MAC2311 - Calculus I
  OR MAC2233 - Applied Calculus
- STA2023 - Statistical Methods

Degree Program Hours: 120 credits

Type
Completion Requirement

Required Economics Courses: 15

Each of the following five courses are required for the BA in Economics:

Complete ALL of the following Courses:

- ECO3101 - Intermediate Microeconomics
- ECO3203 - Intermediate Macroeconomics
- ECO3410 - Measurement and Analysis of Economic Activity

- ECO4421 - Introduction to Econometrics
- ECO4903 - Undergraduate Seminar

ECO3410 Measr & Analys Economic Act and ECO4421 Econometrics each satisfy the FIU requirement in Computer Competency. ECO4903 Undergrad Seminar satisfies the requirement in Oral Competency.

Upper-Division Elective Courses: 18

Fulfill ALL of the following requirements:

Elective courses Part I

Six additional upper-division economics courses, of which at least three must be from the following list of courses which require an intermediate theory course as a prerequisite:

Complete at least 3 of the following courses:

- ECS4011 - Development Economics I
- ECS4014 - Development Economics II
- ECP4031 - Cost-Benefit Analysis (Inactive)
- ECP4043 - Economic Analysis of Social Problems: Advanced Topics
- ECO4100 - Managerial Econ
- ECP4204 - Theory of Labor Economics
- ECO4224 - Issues Money & Bankn
- ECO4237 - Money Interest Cap
- ECP4314 - Natural Resource Economics
- ECO4400 - Economics of Strategy and Information
- ECO4401 - Introduction to Mathematical Economics
- ECP4403 - Industrial Organization
- ECO4504 - Introduction to Public Finance
- ECO4704 - International Trade Theory and Policy
- ECO4713 - International Macroeconomics
- ECO4934 - Special Topics

AND

Elective courses Part II

Earn at least 9 credits

General Electives: 27 credits

Earn at least 27 credits
Students should consult their advisor when choosing electives.

The following courses **cannot** be used as Elective Courses for the Major: ECO2013 Principles Macroeco, ECO2023 Principles Microeco, ECO3041 Consumer Economics, ECO3202 Applied Macroeconomi, ECO3949 Co-Op Ed In Eco, ECO4906 Undergraduate Tutorial, ECO4949 Co-Op Ed In Eco.

Major Requirements

There are no majors associated with this program.

Track, Specialization, Concentration, Area of Emphasis, or Other Curricular Offering Requirements

Tracks

Students have the option of choosing their electives in economics in such a way as to satisfy the requirements for a specialized Track. The student's academic plan should be updated to reflect enrollment in the chosen track in order for the transcript to show a degree in economics with a specialization in the Track.

Each Track consists of:

(1) A core set of economics courses from which the student must successfully complete at least two;

(2) A secondary set of economics courses from which the student must successfully complete at least one.

One or more Tracks may not be offered in a given year.

Track in International Economics

Type
Completion Requirement

Core Courses:

Complete ALL of the following Courses:

- ECO4704 - International Trade Theory and Policy
- ECO4713 - International Macroeconomics

Secondary Courses:

Complete at least 1 of the following courses:

- ECO4701 - World Economy
  OR ECO5709 - The World Economy
- ECS4011 - Development Economics I
- ECS4014 - Development Economics II

Track in the Economics of Public Policy

Type
Completion Requirement

Core Courses:

Complete at least 2 of the following courses:

- ECO4504 - Introduction to Public Finance
- ECP4204 - Theory of Labor Economics

Secondary Courses:

Complete at least 1 of the following courses:

- ECP3203 - Introduction to Labor Economics
- ECO3223 - Money and Banking
- ECP3302 - Introduction to Environmental Economics

- ECP3410 - Introduction to Public Economics
- ECP4314 - Natural Resource Economics
- ECP3451 - Law And Economics

Track in the Economics of Business and Industry

Type

Completion Requirement

Core Courses:

Complete at least 2 of the following courses:

- ECP4403 - Industrial Organization
- ECO4100 - Managerial Econ
- ECO4237 - Money Interest Cap
- ECO4400 - Economics of Strategy and Information

Secondary Courses:

Complete at least 1 of the following courses:

- ECO3223 - Money and Banking
- ECO4224 - Issues Money & Bankn
- ECP3203 - Introduction to Labor Economics

Track in Economic Development:

Type

Completion Requirement

Core Courses:

Complete at least 2 of the following courses:

- ECS4011 - Development Economics I
- ECS4014 - Development Economics II

Secondary Courses:

Complete at least 1 of the following courses:

- ECO4704 - International Trade Theory and Policy
- ECO4713 - International Macroeconomics
- ECP4031 - Cost-Benefit Analysis (Inactive)
- ECS3013 - Introduction to Economic Development
- ECS3401 - Brazilian Economy
- ECS3402 - The Political Economy of South America
- ECS3403 - Economics of Latin America
- ECS3431 - Economics of the Caribbean Basin
- ECS3432 - Economic Integration/Caribbean (Inactive)
- ECS3200 - Economics Of Asia

Other Curricular Offering: Combined BA in Economics to MA in Economics Accelerated Degree Pathway

The Bachelor of Arts/Master of Arts (BA/MA) in Economics accelerated degree pathway is designed for outstanding undergraduate students. It provides a strong base of knowledge and skills in economics, and at the same time accelerates completion of the Master of Arts degree. Students may take advantage of the overlap of courses in the BA and MA programs to receive their MA degree in a shorter period than it would otherwise be possible.

General Requirements

--Meet the requirements of both the BA and the MA degree in economics.
--Overlap: Up to 4 courses (12 credits) may be used in satisfying ***both*** the bachelor's and master's degree requirements in economics.

ECON:BS - Bachelor of Science in Economics

Overview

Degree Offered
BS - Bachelor of Science

Program Title
Economics

The Bachelor of Science (BS) degree in Economics equips students with the quantitative and qualitative skills to think critically and to make optimal decisions in a world of scarce resources. The BS program emphasizes the quantitative side of economics and is appropriate for students focused on developing their analytical skills by providing a more intensive background in math and data analysis, as well those planning to attend a graduate program in economics and related fields in business.

Program Requirements

Academic Progression Requirements

Students are admitted directly to their chosen major at the university. Students are expected to make good progress based on critical indicators that include course completion and GPA requirements. In cases where students are not making successful progress, a change of major may be required. Academic advisors work with students to identify an appropriate major where a student will be successful in completing an undergraduate degree.

Lower Division Preparation

Type
Prerequisite

Common Prerequisite

Complete ALL of the following Courses:

- ECO2013 - Principles of Macroeconomics
- ECO2023 - Principles of Microeconomics

For a list of all state-approved common prerequisites, including alternatives, visit https://cpm.flvc.org

Other Degree Requirements:

Complete ALL of the following Courses:

- MAC2311 - Calculus I
  OR MAC2233 - Applied Calculus
- STA2023 - Statistical Methods

Students who are contemplating going on to study graduate-level economics are encouraged to take MAC2311 Calculus I, MAC2312 Calculus II, and MAC2313 Multivariable Calc.

Degree Requirements: 120 credits

Type

Completion Requirement

Required Economics Courses: 21 credits

Each of the following seven courses are required for the BS in Economics:

Complete ALL of the following Courses:

- ECO3101 - Intermediate Microeconomics
- ECO3203 - Intermediate Macroeconomics
- ECO3410 - Measurement and Analysis of Economic Activity
- ECO4401 - Introduction to Mathematical Economics
- ECO4421 - Introduction to Econometrics
- ECO4465 - Quantitative Economics
- ECO4903 - Undergraduate Seminar

ECO3410 Measr & Analys Economic Act and ECO4421 Econometrics each satisfy the FIU requirement in Computer Competency. ECO4903 Undergrad Seminar satisfies the requirement in Oral Competency.

Elective Economics Courses: 12 credits

In addition to the seven required economics courses, majors must complete four upper-division economics electives (ECO, ECP, or ECS courses), of which at least one must be from the following list of courses which require an intermediate theory course as a prerequisite: ECO4224 Issues Money & Bankn, ECO4504 Introduction to Public Finance, ECO4704 Int Trade Theory, ECO4713 Intl Macroeconomics, ECO4932 Topics In Theory/ECO4933 Topics In Theory, ECO4934 Special Topics, ECP4204 Theory Of Labor Eco,ECP4314 Natural Resource Economics, ECP4403 Industrial Organization, ECO4100 Managerial Econ,ECO4237 Money Interest Cap,ECS4011 Development Economics I, ECS4014 Development Economics II.

The following courses cannot be used as elective economics courses: ECO3041 Consumer Economics, ECO3202 Applied Macroeconomi, ECO3949 Co-Op Ed In Eco, ECO4906 Undergraduate Tutorial, ECO4949 Co-Op Ed In Eco.

General Electives: 27 credits

To complete the degree program, majors will need to earn an additional 27 credits on top of the required 33 credits of economics. Students are encouraged to earn those additional credits in pursuit of a second major or a minor in a related field such as math, statistics, business, political science, international relations, or public administration.

Earn at least 27 credits

ECON:MA - Master of Arts in Economics

Overview

Degree Offered
MA - Master of Arts

Program Title
Economics

The Master of Arts (MA) degree in Economics provides students with rigorous training in advanced economic analysis. It emphasizes skills in data analytics and trains students in using appropriate software. The degree can be completed full time or on a part-time basis, equipping students with solid foundations for a career in the public or private sector. The degree also prepares students to seek further study through a doctoral degree in Economics or other social science field. For more information, visit the Steven J. Green School of International and Public Affairs website.

Requirements

Simple Requirements

Admissions Requirements

Admissions Requirements for the Master of Arts (MA) in Economics

To be admitted into the Master's degree program in Economics, a student must meet the university's graduate admission requirements and:

(1) Have a Bachelor's degree from an accredited institution.

(2) Have a 'B' average (3.0) or higher during the last two years of undergraduate studies.

(3) Applicants from non-English speaking countries, including internationally educated American students, must demonstrate proficiency in English. Please refer to the Admissions English Proficiency criteria at https://admissions.fiu.edu/international/graduate-school/english-language-proficiency/index.html.

(4) Receive approval of the departmental graduate committee.

(5) Have taken as prerequisites Statistics and Calculus I. Students who have not fulfilled all these prerequisites may be admitted on a provisional basis. Unless specifically exempted, such students must take these courses as required, obtaining no credit for them in the program.

Admissions Requirements for the Combined Bachelor (BA or BS) in Economics to Master of Arts (MA) in Economics Accelerated Degree Pathway

To be considered for admission to the bachelor's/master's accelerated degree pathway, students must have completed at least 75 credits in the bachelor's degree program at FIU and meet the admissions criteria for the graduate degree program to which they are applying. Students need only apply once to the accelerated degree pathway; the application is submitted to Graduate Admissions typically before the student starts the last 30 credits of the bachelor's degree program. A student admitted to the accelerated degree pathway will be considered to have undergraduate status until the student applies for graduation from their bachelor's degree program. Upon conferral of the bachelor's degree, the student will be granted graduate status and be eligible for graduate assistantships. Only 5000-level or higher courses, and no more than the number of credits specified by the program catalog, may be applied toward both degrees.

Students in the Combined (BA or BS) in Economics to Master of Arts (MA) in Economics accelerated degree pathway would take elective courses that would satisfy both the BA and MA requirements.

To apply, the student's GPA needs to be significantly above average (3.25). Students would also be required to maintain a high GPA (3.0) to remain in the pathway. The grade requirements for an MA in economics would apply to courses that are counted toward the MA degree.

Admissions Requirements

--Current enrollment in the Bachelor's degree program in economics at FIU.
--Completed MAC2311 Calculus I Calculus I and MAC2312 Calculus II Calculus II or equivalents.
--Current GPA of 3.25 or higher.
--Three letters of recommendation.
--Approval of the Graduate Committee.

Program Requirements

Degree Requirements

The Master's degree program will consist of 30 semester hours of course work, at a graduate level (course numbers 5000 or above). A maximum of six semester hours may be transferred into the program subject to the approval of the graduate committee. All courses listed below carry 3 credits, except the thesis (6 credits). The specific requirements are:

Degree Program Credit Hours: 30

Type

Completion Requirement

Required Courses: 21 credits

Complete ALL of the following Courses:

- ECO6112 - Fundamentals of Microeconomic Theory
- ECO6204 - Fundamentals of Macroeconomic Theory
- ECO6174 - Microeconomics I
- ECO6019 - Macroeconomics I
- ECO6405 - Mathematical Economics
- ECO6420 - Econometrics I
- ECO6425 - Econometrics II

Research Requirements: 3-6 credits

Students must either write a thesis for 6 credits (ECO6971 Thesis), or take an advanced course in applied economics (7000-level or approved by the graduate director) which involves writing a research paper (3 credits).

Electives: 3-6 credits

A student must take at least one elective in advanced field in economics. The additional course required to complete the Master's program may be taken in Mathematics, International Studies, Social Work, Criminal Justice, Public Administration, the College of Business, or in the other college or schools of the university. The graduate director must approve courses taken outside the department.

The graduate director must approve courses taken outside the department. ECP6705 Managerial Econ I and ECP6432 Macro Forecasting do not count as electives.

Graduation Requirements

To receive the Master of Arts in Economics degree, the student must complete 30 hours of course work with a 'B' (3.0) average or higher; and must receive a grade of 'C' or higher in each course. If the student decides to write a thesis, he/she must receive the grade of 'P'(pass) for ECO6971 Thesis.

Major Requirements

There are no majors associated with this program.

Track, Specialization, Concentration, Area of Emphasis, or Other Curricular Offering Requirements

Combined Bachelor (BA or BS) in Economics to Master of Arts (MA) in Economics Accelerated Degree Pathway

The Bachelor/Master of Arts (BA/BS to MA) in Economics accelerated degree pathway is designed for outstanding undergraduate students. It provides a strong base of knowledge and skills in economics, and at the same time accelerates completion of the Master of Arts degree. Students may take advantage of the overlap of courses in the Bachelor and MA programs to receive their MA degree in a shorter period than it would otherwise be possible.

General Requirements

--Meet the requirements of both the BA/BS and the MA degree in economics.

ECON:PHD - Doctor of Philosophy in Economics

Overview

Degree Offered
PHD - Doctor of Philosophy

Program Title
Economics

The Doctor of Philosophy (PhD) in Economics equips students with the skills to conduct independent research in economics and the social sciences more broadly. The curriculum emphasizes empirical research and data analysis. Graduates can pursue careers not only in academia but also in government, international organizations, or the private sector.

For more information, visit the Steven J. Green School of International and Public Affairs website.

To explore more about this program, visit the website below:
Program Website

Academic Group
Steven J. Green School of International and Public Affairs

Diploma Title
Doctor of Philosophy in Economics

Total Credits
75

Program Length in Years Based on Full-Time Enrollment
5

CIP Code
45.0603

Requirements

Simple Requirements

Admissions Requirements

(1) Have a Bachelor's Degree from an accredited institution.

(2) A minimum GPA of 3.0 for the last two years of undergraduate education and submit official Graduate Record Examination (GRE) scores. International graduate student applicants whose native language is not English are required to submit a score for the Test of English as a Foreign Language (TOEFL) or for the International English Language Testing System (IELTS). A total score of 80 on the iBT TOEFL or 6.5 overall on the IELTS is required.

(3) Three letters of recommendation, using the form provided by the Department, from people in a position to judge the applicant's suitability for graduate studies in economics.

(4) Receive approval of the departmental graduate committee.

(5) Completion of the following courses at the undergraduate level: statistics, two semesters of calculus, and a semester of linear algebra. Unless exempted, the student must take these courses as required, obtaining no graduate credit for them in the program.

The GPA stated above is a minimum requirement. All applications are reviewed by the Graduate Studies Committee, which makes the final admission decisions. Since admission to the program is competitive, the committee's requirements are normally higher than the minimum standards. Meeting the minimum requirements does not guarantee admission.

Program Requirements

Program Credit Hours: 75

Type

Completion Requirement

Degree Requirements

To obtain the Ph.D. in Economics, students must complete the required course work and fulfill dissertation requirements. Ph.D. students who have satisfied the requirements for the Master's degree are eligible to receive the Master's degree. Ph.D. students who have satisfied the Master's degree requirements should consult with the Graduate Program Director about the necessary paperwork and procedure to receive the Master's degree in the course of their Ph.D. studies.

Coursework Requirements

Students must complete 42 hours (14 courses) of graduate level course work. Supervised research, independent study, seminars, and dissertation credit do not count towards this objective. This required minimum of 14 courses consists of ten courses in the Core and four field courses. No credit toward a graduate degree is given for any course in which a grade of 'C' or less is obtained. A graduate student who receives a grade lower than 'B-' in a course must retake that course; if a retake also results in a grade lower than 'B-', the student will not be permitted to continue in the Ph.D. program. A graduate student who receives a grade lower than 'B-' in more than two courses will not be allowed to stay in the Ph.D. in Economics program. Students are required to maintain a minimum GPA of 3.0 (of 4) in their coursework.

Core Courses

During the first four semesters, students are required to take courses which include the ten core courses listed below. Following the second semester, students are required to pass a comprehensive qualifying examination on core theory—(ECO6112 Fund Micro Theory, ECO7115 Micro Theory I, ECO6204 Fund Macro Theory, ECO7206 Macro Theory I). A student who fails twice will not be allowed to remain in the program.

A student must receive at least a 'B' (3.0) average in the first four courses in order to participate in the comprehensive core theory qualifying examination.

Complete ALL of the following Courses:

- ECO6112 - Fundamentals of Microeconomic Theory
- ECO7115 - Microeconomic Theory I
- ECO7116 - Microeconomic Theory II
- ECO6204 - Fundamentals of Macroeconomic Theory
- ECO7206 - Macroeconomic Theory I
- ECO7207 - Macroeconomic Theory II
- ECO7405 - Mathematical Methods in Economic Analysis I
- ECO7424 - Econometric Methods I
- ECO7425 - Econometric Methods II
- ECO7426 - Econometrics III

Field Study

During the fourth and fifth semesters, students will complete course work in four field courses. Students must write a field paper. The field paper must be completed, presented in a workshop, and accepted by the student's field paper committee by the end of the third year. Students who fail twice their field requirements

will not be allowed to continue in that field.

Dissertation Work

Upon completion of field paper requirement, students will be required to choose a specific area of doctoral research. During this phase, which will normally have a total length of two years, the student will:

a. Conduct research and complete a dissertation;

b. Continue taking courses to complete a minimum of 15 credits of Advanced Workshop and 18 credits of dissertation; and

c. Attend Advanced Workshops by enrolling in ECO7925 Adv Workshop in the dissertation area and present at least one paper a year on the work in that workshop.

Students will normally be required to be enrolled as full-time students at the university for at least a year during the dissertation period. Except under abnormal circumstances, the maximum number of years during which a student may do dissertation work is five years.

Graduation Requirements

To graduate, students must complete all course requirements; fulfill workshop presentation requirements, pass the comprehensive examination and have their field paper accepted, and complete the oral defense and acceptance of the Ph.D. dissertation.

Major Requirements

There are no majors associated with this program.

Track, Specialization, Concentration, Area of Emphasis, or Other Curricular Offering Requirements

There are no tracks, specializations, concentrations, areas of emphasis, or other curricular offerings associated with this program.

EDLD:CFI - Graduate Certificate in Educational Leadership

Overview

Degree Offered
ACRT - Academic Certificate

Program Title
Graduate Certificate in Educational LeadershipFlorida state-approved modified prgm in Edu Ldrship

The Graduate Certificate Program in Educational Leadership is designed for students who have a master's degree in a subject or field of Education other than Educational Administration/Leadership. The coursework constitutes the "modified Florida program in educational leadership" at Florida International University and addresses the competencies assessed in the Florida Educational Leadership Examination. The program may be used to satisfy part of the requirements of the Florida Department of Education for certification in Educational Leadership. This certificate program is open to non-degree-seeking students only.

EDLDR:EDS - Educational Specialist in Educational Leadership

Overview

Degree Offered
EDS - Education Specialist

Program Title
Educational LeadershipFlorida state-approved modified program in Educational Leadership

The Educational Specialist (EdS) degree in Educational Leadership challenges practicing PK-16 educators to transform learning institutions. Graduates of the program will develop the capacity to communicate effectively with diverse populations, build effective partnerships with stakeholder groups, and foster an ethical educational community. They will be able to lead and assess equitable, evidence-based policies and practices for student success. The degree is part of a state-approved program; as such, graduates of the program will successfully pass the Florida Educational Leadership Exam (FELE).

EDLDRES:MS - Master of Science in Educational Leadership and Educational Studies

Overview

Degree Offered
MS - Master of Science

Program Title
Educational Leadership and Educational Studies

The Master of Science (MS) in Educational Leadership and Educational Studies degree provides two majors: PK-12 Educational Leadership and Educational Studies.

The Education Studies major is designed for educators and other professionals who are interested in addressing issues in community settings and schools locally, nationally, and globally.

The PK-12 Educational Leadership major challenges practicing PK-16 educators to transform learning institutions. Graduates of the program will develop the capacity to communicate effectively with diverse populations, build effective partnerships with stakeholder groups, and foster an ethical educational community. They will be able to lead and assess equitable, evidence-based policies and practices for student success. The MS degree with the PK-12 Educational Leadership major is part of a state-approved program; as such, graduates of the program will successfully pass the Florida Educational Leadership Exam (FELE). Note: The online MS degree with the PK-12 Educational Leadership major is not state-approved and therefore does not include the FELE.

Admissions Requirements for the Master of Science (MS) in Educational Leadership

A decision on admission to the Master’s degree in Educational Leadership and Education Studies is based upon the following criteria:

(1) A baccalaureate degree and a grade point average of at least 3.0 (on 4.0 scale) in the last 60 semester hours of undergraduate coursework. At least three years of successful full-time teaching experience prior to application for admission to the program;

(2) Two letters of recommendation from individuals who can comment on the applicant's leadership potential and qualifications for successfully participating in the program. A current resume (curriculum vitae), including education, professional preparation, and employment history;

(3) A brief written statement (approximately 250 words) articulating the applicant's professional career goals and aspirations. Evidence of having satisfied the ESOL requirements of the State of Florida. (Otherwise, a student will be required to satisfy this requirement prior to completion of the program.)

(4) Letters and any other supporting documents are to be sent to FIU Graduate Admissions Office.

(5) Applicants must choose one of the following majors: Educational Leadership or Education Studies.

Admissions Requirements for the PK-12 Educational Leadership Major

(1) At least three (3) years of successful full-time teaching experience prior to application for admission to the program.

(2) Possession of a current valid Teaching Certificate.

(3) Evidence of having satisfied the ESOL requirements of the State of Florida. (Otherwise, a student will be required to satisfy this requirement prior to completion of the program.)

Program Requirements

The Master of Science program requires completing 33 semester hours of coursework at the graduate level with a minimum 3.0 GPA. A maximum of six graduate hours may be transferred from another institution, upon approval from an advisor.

Program Credit Hours: 18 Credits

Type

Completion Requirement

Program of Study Core Courses: 18 Credits

Students in both the PK-12 Educational Leadership major and the Education Studies major will take the following courses.

Complete ALL of the following Courses:

- EDF5481 - Foundations of Educational Research
- EDA6061 - Educational Leadership for Change
- EDA6232 - School Law
- EDA6504 - Instructional Leadership and Learning Environments
- EDF6608 - Socio-Historical Foundations of Education
- EDF6656 - Comparative and International Education Policy

Major Requirements

The Education Studies major is designed for educators and other professionals who are interested in addressing issues in community settings and schools locally, nationally, and globally. This major is for those students who want to build their understanding of comparative theoretical foundations and engage in critical dialogue. This major emphasizes a social justice theoretical framework and draws on the belief that students become reflective professionals by developing an understanding of formal and informal education within diverse sociocultural, linguistic, political, global, and international contexts.

Education Studies Major: 15 Credits

Type

Completion Requirement

Major Credit Hours: 15

In addition to the 18 hours of core courses, students choose five (5) courses (15 hours) from the list below or from other areas with advisor approval.

Earn at least 15 credits from the following:

- EDF5517 - Struggles of School and Society
- EDF5851 - Social/Cultural Conflict in Educational Change
- EDF6211 - Psychological Foundations of Education
- EDF6365 - Cultural Identities and Conflict
- EDF6602 - Urban Education Perspectives
- EDF6658 - Selected Topics in International Development Education: Current Policy Issues and Problems
- EDF6684 - Socially Engaged Education
- EDF6487 - Action Research for Educators
- EDF6689 - Contemporary Issues in Urban Education
- EDF6852 - Educational Development Issues in Context: A Multidisciplinary Perspective
- EDF7937 - Advanced Topics in the Social Foundations of Education

OR Advisor Approved Electives

The PK-12 Educational Leadership major challenges practicing PK-16 educators to transform learning institutions. This major develops students' professional knowledge based related to PK-12 building-level school leadership, educational policy and practice, instructional leadership, and the school improvement process. Students will develop the capacity to communicate effectively with diverse populations, build effective partnerships with stakeholder groups, and foster an ethical educational community.

Students will be able to lead and assess equitable evidence-based policies and practices for student success. This major is a state approved program that prepares students for the Florida Educational Leadership Exam (FELE).

Graduation Requirement: Passing the FELE Exam

PK-12 Educational Leadership Major: 15 Credits

Type

Completion Requirement

Major Credit Hours: 15

Complete ALL of the following Courses:

- EDA6222 - School Personnel Administration
- EDA6503 - The Principalship
- EDA6928 - Special Topics: School Improvement
- EDA6242 - School Finance
- EDA6943 - Administrative Internship

Note: Successful completion of EDA6943 Admin Internship requires passing all sub-tests of the Florida Educational Leadership Examination (FELE). Evidence of passing the exam must be provided by the student no later than the last week of the semester.

Track, Specialization, Concentration, Area of Emphasis, or Other Curricular Offering Requirements

There are no tracks, specializations, concentrations, areas of emphasis, or other curricular offerings associated with this program.

EDLPS:EDD - Doctor of Education in Educational Leadership and Policy Studies

Overview

Degree Offered
EDD - Doctor of Education

Program Title
Educational Leadership and Policy Studies

The Doctor of Education (EdD) degree in Educational Leadership and Policy Studies prepares advanced professionals to pursue leadership roles in educational institutions. Graduates of the program are prepared to pursue careers as school superintendents, principals, directors, and supervisors; administrators in state, federal, and international agencies; and professors of educational administration or leadership. The Higher Education Administration major prepares administrators in institutions of higher education. For more information, visit the College of Arts, Sciences, and Education website.

Admissions Requirements for the Doctor of Education in Educational Leadership and Policy Studies

Applicants to the program must submit the following records and documents to the Office of Graduate Admissions:

(1) A completed online application for Graduate Admission with appropriate fees.

(2) Official transcripts of all higher education institutions attended.

(3) Three letters of reference attesting to the applicant’s ability to succeed in doctoral study.

(4) A current resume/vitae.

(5) Evidence of at least three years of successful and appropriate professional experience.

(6) A statement that sets forth the applicant’s career goals and relates these goals to the completion of the doctoral program.

(7) A writing sample illustrating academic writing skills (e.g., paper submitted for academic credit; professional report using research);

(8) International graduate student applicants whose native language is not English are required to submit a score for the Test of English as a Foreign Language (TOEFL) or for the International English Language Testing System (IELTS). A total score of 80 on the iBT TOEFL or 6.5 overall on the IELTS is required.

No action will be taken on incomplete files. A file is considered incomplete if any of the above is missing.

The application and all supporting documentation are reviewed by program faculty. The criteria applied in reviewing the applicant's file are noted below. Exceptions to one or more of the stated criteria may be granted provided the applicant can provide compelling reasons and evidence.

(1) A grade point average (GPA) of at least 3.0 (on a 4.0 scale) in upper level undergraduate work.

(2) A 3.25 GPA in all graduate work attempted.

(3) A master's degree in education from an accredited institution, A bachelor's degree from an accredited institution may be accepted for Admission.

(4) Evidence of successful prior professional leadership experience.

(5) Evidence of graduate-level writing competency.

(6) Upon completion of the review of the file the applicant will be interviewed by program and departmental faculty which comprise a Faculty Admissions Committee.

Final decisions are made by the Faculty Admissions Committee and other Academic Administrators. As admission to programs is competitive, meeting minimum admission requirements does not assure admission into the program. A candidate for admission to the program will be judged not only on the basis of quantitative criteria but also in relation to prior experience, especially as it relates to future career goals. Additional information is available from the Program Director.

Admissions Requirements for the Major in Higher Education Administration

Applicants should indicate on their application the interest in this major. All the above requirements also apply to the Higher Education Administration major as well.

Program Requirements

The program requires the completion of a minimum of 75 credits of academic work beyond the baccalaureate degree. This Program Requirements section describes the coursework for the generic program. Students interested in the Higher Education Administration major, see the Major Requirements section below for coursework requirements.

All the Applied Dissertation, Dissertation Proposal, Candidacy, and Time to Completion requirements described in this Program Requirements section apply to all Educational Leadership and Policy Studies doctoral students, including the the Higher Education Administration major.

Program Credit Hours: 75 credits

Type

Completion Requirement

Required Courses

Fulfill ALL of the following requirements:

Educational Administration and Leadership Core: 12 credits

Complete ALL of the following Courses:

- EDA7069 - Educational Policy
- EDA7103 - Theories of Educational Administration
- EDA7233 - Ethics and Educational Leadership
- EDA7288 - Politics of Education

AND

Major Area

Earn at least 36 credits
The major area requires a minimum of 36 credits of course work. The courses should be chosen with regard to coherence and relevance to the anticipated substantive aspect of the dissertation and in consultation with the student's advisor. The cognate may be used as an extension of expertise in the major and courses may be taken at any academic unit at the university. Students may transfer in up to 36 credit hours from a previous master's degree in either educational leadership, higher education, or closely aligned prior graduate work in education.

AND

Professional Education Core: 6 credits

Complete ALL of the following Courses:

- EDF7937 - Advanced Topics in the Social Foundations of Education
- EDP7057 - Educational Psychology: Advanced Applications

AND

Research and Statistics Core: 9 credits

Complete ALL of the following Courses:

- EDF6472 - Research Methods in Education: Introduction to Data Analysis
- EDF6486 - Advanced Data Analysis in Quantitative Educational Research
- EDF6475 - Qualitative Foundations of Educational Research

AND

Research and Statistics Core: 3 credits

And one other advisor approved research course

Earn at least 3 credits
Note: *Evidence of completion of a graduate-level research course (e.g., EDF5481 Foundations Ed Res) or equivalent at FIU or at another accredited institution is required before starting the Research Core.*

AND

Doctoral Dissertation Requirement for all Majors

Earn at least 15 credits from the following:

- EDA7980 - Ed.D. Dissertation

OR EDH7980 - Ph.D. Dissertation

All doctoral students in the program are responsible for a minimum of 15 credits of dissertation credits. All doctoral students must be continuously enrolled in a minimum of three (3) dissertation credits each term following advancement to candidacy until graduation. A candidate for the doctorate in Educational Leadership and Policy Studies is required to prepare and present for faculty approval a doctoral dissertation that demonstrates a capacity for independent thought and for the application of the tools and methods of research to educational issues and problems.

Candidacy Examination and Advancement to Candidacy

To advance to candidacy, the student must select a dissertation committee and submit a draft of his or her proposal to the dissertation committees. The dissertation committee will review the proposal and determine, by majority votes, whether or not to advance the student to candidacy and to the proposal defense. This process constitutes the candidacy exam. To continue in the program, and barring official approval by the University Graduation School of a leave of absence during this process, the student will have 1 year after completion of all non-dissertation coursework to be admitted to candidacy.

If the dissertation committee advances the student to candidacy, the student will enroll in the following term in EDH7964 Doctoral Candidacy Exam and EDH7983 Dissertation Proposal Sem. In those courses, the student will continue to work on their proposal, complete the IRB approval process, if applicable, and successfully defend his or her dissertation proposal. The student will be required to submit all documents and forms related to the advancement to candidacy and dissertation proposal, including the D-2 and D-3, to the University Graduate School at the same time.

The University Graduate School admits students to candidacy. After advancement to candidacy, students must be continuously enrolled in a minimum of 3 dissertation credits (EDH7980 Ph.D. Dissertation) each term until graduation.

Dissertation Proposal

A student admitted to candidacy must successfully complete and defend his or her proposal for the applied dissertation, which constitutes the research plan for the dissertation. Because the applied dissertation proposal is part of the candidacy exam process, please refer to the section on "Candidacy Examination and Advancement to Candidacy" above. More information about the dissertation proposal is available from the student's advisor.

The Applied Dissertation (Generic and Higher Education Administration Majors)

Students will enter the program as a cohort and engage in a prolonged study of a critical problem or concern in education. During the first year in the program, students will examine a chosen problem in order to identify underlying causes and associated factors via a variety of courses intended to approach problems from different theoretical and methodological perspectives. In general, problems of practice must fall within three bodies of knowledge: leadership in education, social contexts in schooling and learning, and policy and system studies of education. Writing of the dissertation proposal is integrated throughout the first two years of coursework. Once dissertation hours commence, students work independently to complete their research study in collaboration with a Dissertation Committee composed of faculty. Unlike many dissertations, which have implications for the larger body of literature and scholarship, applied dissertations have implications for practice and the organization(s) dealing with the problem at hand. Although different from a traditional dissertation in its focus, students are nevertheless expected to excel in written and oral skills associated with reviewing scholarly literature, collecting data, and interpreting the results in light of previous studies.

Students will demonstrate mastery of the oral and written skills needed to complete their applied research through a candidacy exam/dissertation proposal indicating readiness for conducting their studies offering solutions to their problem of practice. Students will then evaluate the effectiveness of this solution in their dissertation. The candidacy exam, proposal, and dissertation will be submitted to, and presented orally before, the student's Dissertation Committee. Typically, we expect that students will complete coursework and research in two years. It is possible that some students may need more than two years to complete their research, in which case they will be required to enroll in at least three credit hours of dissertation until they have successfully defended their applied dissertation.

Time to Completion

While this program is designed to be completed in 3 years, the University policy permits only 9 years to complete a doctoral program, counting from admission to graduation. Students must have completed all coursework and program requirements within that time, including a successful defense of the dissertation. Coursework applied toward completion of program requirements cannot be more than nine years old at the time of graduation, unless the coursework was transferred from a previously-earned graduate degree.

Graduation Requirements

The following is required for successful graduation from the program:

(1) Successful completion of all course work and candidacy exam; GPA of 3.00 or better; and

(2) Successful completion, defense, and University approval of the applied dissertation.

Major Requirements

Higher Education Administration Major

This major of study prepares students for advanced careers as leaders across institutions of higher education. The major is designed to prepare practitioners specifically in the field of higher education, both nationally and internationally, who will become important leaders in private and public postsecondary institutions and be able to apply evidence-based practices to improve higher education outcomes. Graduates are able to apply empirical and scholarly research and evidence-based practices to improve institutional outcomes, foster the professional growth of their colleagues, and impact the effectiveness of their institution through the advanced study of leadership and educational policy.

All the Applied Dissertation, Dissertation Proposal, Candidacy, and Time to Completion requirements described above apply to the Higher Education Administration major as well.

Program Credit Hours: 75 credits

Type

Completion Requirement

Required Courses

Master in Higher Education or Related Field (36 transferred from M.S.)

Fulfill ALL of the following requirements:

Major Area

Earn at least 36 credits

The major area requires a minimum of 36 credits of course work. The courses should be chosen with regard to coherence and relevance to the anticipated substantive aspect of the dissertation and in consultation with the student's advisor. The cognate may be used as an extension of expertise in the major and courses may be taken at any academic unit at the university. Students may transfer in up to 36 credit hours from a previous master's degree in higher education.

AND

Doctoral Seminar: 3 credits

Complete ALL of the following Courses:

- EDH7666 - Doctoral Seminar

AND

Educational Administration and Leadership Core: 12 credits

Complete ALL of the following Courses:

- EDA7069 - Educational Policy
- EDA7103 - Theories of Educational Administration
- EDA7233 - Ethics and Educational Leadership
- EDA7288 - Politics of Education

AND

Research Core

Earn at least 6 credits
Advisor Approved

AND

Milestone Courses: 3 credits

Complete ALL of the following Courses:

- EDH7964 - Doctoral Candidacy Examination
- EDH7983 - Dissertation Proposal Seminar
- EDH7985 - Dissertation Defense

Track, Specialization, Concentration, Area of Emphasis, or Other Curricular Offering Requirements

There are no tracks, specializations, concentrations, areas of emphasis, or other curricular offerings associated with this program.

EESTDG:CFI - Graduate Certificate in European and Eurasian Studies

Overview

Degree Offered
ACRT - Academic Certificate

Program Title
Graduate Certificate in European and Eurasian Studies

The Graduate Certificate in European & Eurasian Studies is designed so that students can demonstrate substantive knowledge about specific aspects of European culture, history, politics, economics, and society. The program promotes improvement of competency in European languages and the development of a broader understanding of the relations of the region with the rest of the world. The Certificate is based on a multidisciplinary area studies perspective. For more information, visit the Steven J. Green School of International and Public Affairs website.

To explore more about this program, visit the website below:

Steven J. Green School of International and Public Affairs

Total Credits
15

Program Length in Years Based on Full-Time Enrollment
1

CIP Code
54.0101

Requirements

Simple Requirements

Admissions Requirements

(1) Baccalaureate degree from an accredited institution for higher education (or equivalent);

(2) Minimum cumulative grade point average of 3.0 on a 4.0 scale (or equivalent) for the last two years of undergraduate work.

This certificate is open to degree-seeking students only.

Prerequisites

Contact advisor for information about any prerequisites.

Program Requirements

Students must take a total of five European-content classes in at least two academic disciplines (different course prefixes). Available courses will be listed on our website www.europe.fiu.edu each semester. All students are to choose from the courses listed below and earn a grade of “B” or better. These courses represent a partial list. Courses not included on the semester lists of approved courses may count toward meeting the requirement of the certificate only with the permission of the certificate director.

Program Credit Hours: 15

Type

Completion Requirement

Sample Courses in European Studies: Social Sciences

Complete ANY of the following Courses:

- CPO6105 - Politics of the European Union
- CPO6106 - Seminar on European Politics
- CPO5091 - Seminar in Comparative Politics
- INR5507 - International Organizations I
- INR6010 - Global Governance

Sample Courses in European Studies: Humanities

Complete ANY of the following Courses:

- ENL5220 - Major British Literary Figures
- EUH5935 - Topics in European History
- EUH5126 - Readings in European History
- EUH6932 - Research Seminar in European History I
- FRW5934 - Special Topics in Language Literature (Inactive)
- RLG5515 - History of Early Christianity
- RLG5619 - Holocaust Representations: Religion and Remembrance

The EUH5935 Topics In Eur Hist course can be repeated with one enrollment focusing on Women and Gender in Europe and the other enrollment focusing on the Russian Revolution.

The EUH5126 Rdgs In Eur Hist course can be repeated with enrollment focusing on Early Modern Court Societies and the other enrollment focusing on European Historical Film.

Once all requirements have been fulfilled and graduation completed, the Graduate Certificate in European and Eurasian Studies will be awarded

For more information, contact the European and Eurasian Studies office, SIPA 513. Email: europe@fiu.edu; Website: http://europe.fiu.edu

EESTDU:CFI - Undergraduate Certificate in European and Eurasian Studies

Overview

Degree Offered
ACRT - Academic Certificate

Program Title
Certificate in European and Eurasian Studies

The Undergraduate Certificate in European and Eurasian Studies enables students to obtain an interdisciplinary concentration in various aspects of Europe and Eurasia. It is designed to enhance a student's understanding of European politics, society, and culture, drawing on a broad range of courses in the arts and sciences and complementing the student's major course of study.

Program Requirements

Program Credit Hours: 15

Type
Completion Requirement

Certificate Requirements

The program requires 15 credit hours (5 courses) from at least three departments, distributed as follows:

Language Requirement: 3 credits

One course in a European language at the intermediate level or above (2000 or higher)

Breadth Requirement: 12 credits

Four courses, at 3000 level or above, at least one of which must be in the social sciences and one in the humanities, from an approved list published in the term schedule and available from the Certificate Director. These include courses from the Departments of Economics, English, Earth and Environmental, History, Honors College, Humanities, International Relations, Modern Languages, Philosophy, Political Science, Religious Studies, and Art and Art History. Courses not on the list but containing substantial European and Eurasian content may be accepted at the discretion of the Director.

Courses applicable for the certificate are listed every semester on the European and Eurasian studies website.

Once all requirements have been fulfilled and graduation completed, the Certificate in European and Eurasian Studies will be awarded.

For more information, contact the European & Eurasian Studies office, SIPA 513. Email: europe@fiu.edu; website: http://europe.fiu.edu.

EGMGT:MS - Master of Science in Engineering Management

Overview

Degree Offered
MS - Master of Science

Program Title
Engineering Management

The Master of Science (MS) in Engineering Management program develops future leaders in the engineering and technology industries and businesses. The program blends a mix of coursework from Engineering and Computing to Business Administration and Law. It is ideal for STEM (science, technology, engineering, and mathematics) students who would like to acquire managerial skills while advancing their technical knowledge. For non-technical students, this program paves the way to learn engineering processes and essential skills in managing quality, productivity, and profitability.

For more information, visit the College of Engineering and Computing website.

Admissions Requirements

Admissions Requirements for the Master of Science (MS) in Engineering Management

The applicant to the MSEM program must have a bachelor’s degree in engineering or a closely related field from an accredited institution with GPA of at least 3.0/4.0 in either the last 60 credit hours or the overall undergraduate degree, or a graduate degree from an accredited institution.

The applicant whose GPA does not meet the minimum GPA requirement may be considered for conditional admission. For such consideration, the applicant must submit (1) three letters of recommendation; (2) a resume including education, training, and employment history, practical and research experience (such as projects and publications), skills and other pertinent information; and (3) a statement of objective in which the applicant must clearly state his/her intended engineering track, in addition to other information.

Admissions Requirements for the Combined Bachelor of Science (BS) in Biomedical Engineering to MS in Engineering Management (BSBME/MSEM) Accelerated Degree Pathway

Students who pursue a BS degree and have completed 75 credits in the undergraduate program of Biomedical Engineering with an overall GPA of 3.2 or higher may, upon recommendation from three faculty members, apply to the department to enroll in the combined BSBME/MSEM pathway. Students must also submit an online application to the University Graduate School for admission to the MSEM program. In addition to the admission requirements of the MSEM program, students must meet all the admission requirements of the University Graduate School.

Students need only apply once to the combined degree pathway; the application is submitted to Graduate Admissions typically before the student starts the last 30 credits of the bachelor's degree program.

Students interested in the combined pathway should consult with their undergraduate advisor on their eligibility to the pathway. The student should also meet the MSEM Program Director to learn about the graduate program and available tracks/courses before completing the application form and submitting it to their undergraduate advisor. Final decision for admission to the MSEM program will be made by the University Graduate School upon recommendation by the Engineering Management program director. Applicants will be notified by the Engineering Management Program and the University Graduate School of the decision on their applications.

Admissions Requirements for the Combined BS in Computer Engineering to MS in Engineering Management (BSCpE/MSEM) Accelerated Degree Pathway

Students who are pursuing a Bachelor of Science degree in Computer Engineering and have completed at least 75 credits with a minimum of a 3.2 overall GPA on both lower and upper division courses may, upon recommendation from three ECE faculty members, apply to enroll in the combined BSCpE/MSEM pathway. Students need only apply once to the combined degree pathway; the application is submitted to Graduate Admissions typically before the student starts the last 30 credits of the bachelor's degree program. In addition to the admission requirements of the MSEM program, students must meet all the admission requirements of the University Graduate School.

Students interested in the combined pathway should consult with their undergraduate advisor on their eligibility to the pathway. The student should also meet the MSEM Program Director to learn about the graduate program and available tracks/courses before completing the application form and submitting it to their undergraduate advisor. Final decision for admission to the MSEM program will be made by the University Graduate School upon recommendation by the Engineering Management program director. Applicants will be notified by the Engineering Management Program and the University Graduate School of the decision on their applications.

Admissions Requirements for the Combined BS in Computer Science to MS in Engineering Management Accelerated Degree Pathway

Students who pursue a BS degree and are in their first semester of the senior year in Computer Science and have earned at least a 3.2 overall GPA may, upon recommendation from three faculty members, apply to the department to enroll in the combined BSCS/MSEM program. Students must also submit an online application to the University Graduate School for admission to the MSEM program. In addition to the admission requirements of the MSEM program, students must meet all the admission requirements of the University Graduate School.

Students need only apply once to the combined degree pathway; the application is submitted to Graduate Admissions typically before the student starts the last 30 credits of the bachelor's degree program.

Students interested in the combined pathway should consult with their undergraduate advisor on their eligibility to the pathway, preferably during their junior year, since appropriate planning of coursework is required in order to achieve the full nine-credit benefit. The student should also meet the MSEM Program Director to learn about the graduate program and available tracks/courses before completing the application form and submitting it to their undergraduate advisor. Final decision for admission to the MSEM program will be made by the University Graduate School upon recommendation by the Engineering Management program director. Applicants will be notified by the Engineering Management Program and the University Graduate School of the decision on their applications.

Admissions Requirements for the Combined BS in Electrical Engineering to MS in Engineering Management (BSEE/MSEM) Accelerated Degree Pathway

Students who are pursuing a Bachelor of Science degree in Electrical Engineering and have completed at least 75 credits with a minimum of a 3.2 overall GPA on both overall and upper division courses may, upon recommendation from three ECE faculty members, apply to enroll in the combined BSEE/MSEM pathway. Students need only apply once to the combined degree pathway; the application is submitted to Graduate Admissions typically before the student starts the last 30 credits of the bachelor's degree program. In addition to the admission requirements of the MSEM program, students must meet all the admission requirements of the University Graduate School.

Admissions Requirements for the Combined BS in Information Technology to MS in Engineering Management Accelerated Degree Pathway

Students who pursue a BS degree and are approaching their first semester of the senior year in Information Technology and have earned at least a 3.2 overall GPA may, upon recommendation from three faculty members, apply to the department to enroll in the combined BSIT/MSEM pathway. Students must also submit an online application to the University Graduate School for admission to the MSEM program. In addition to the admission requirements of the MSEM program, students must meet all the admission requirements of the University Graduate School. Students need only apply once to the combined degree pathway the application is submitted to Graduate Admissions typically before the student starts the last 30 credits of the bachelor’s degree program.

Students interested in the combined pathway should consult with their undergraduate advisor on their eligibility to the pathway, preferably during their junior year, since appropriate planning of coursework is required in order to achieve the full nine-credit benefit. The student should also meet the MSEM Program Director to learn about the graduate program and available tracks/courses before completing the application form and submitting it to their undergraduate advisor. Final decision for admission to the MSEM program will be made by the University Graduate School upon recommendation by the Engineering Management program director. Applicants will be notified by the Engineering Management Program and the University Graduate School of the decision on their applications.

Admissions Requirements for the Combined BS in Interdisciplinary Engineering to the MS in Engineering Management Accelerated Degree Pathway

Students who pursue a BS degree and are in their first semester of the senior year in Interdisciplinary Engineering and have earned at least a 3.2 overall GPA may, upon recommendation from three faculty members, apply to the department to enroll in the combined BSIE/MSEM pathway. Students must also submit an online application to the University Graduate School for admission to the MSEM program. In addition to the admission requirements of the MSEM program, students must meet all the admission requirements of the University Graduate School. Students need only apply once to the combined degree pathway; the application is submitted to Graduate Admissions typically before the student starts the last 30 credits of the bachelor’s degree program.

Students interested in the combined pathway should consult with their undergraduate advisor on their eligibility to the pathway, preferably during their junior year, since appropriate planning of coursework is required in order to achieve the full nine-credit benefit. The student should also meet the MSEM Program Director to learn about the graduate program and available tracks/courses before completing the application form. Final decision for admission to the MSEM program will be made by the University Graduate School upon recommendation by the Engineering Management program director. Applicants will be notified by the Engineering Management Program and the University Graduate School of the decision on their applications.

Admissions Requirements for the Combined BS in Mechanical Engineering to MS in Engineering Management Accelerated Degree Pathway

Students who pursue a BS degree and have completed 75 credits in the undergraduate program of Mechanical Engineering with an overall GPA of 3.2 or higher may, upon recommendation from three faculty members, apply to the department to enroll in the combined BSME/MSEM pathway. Students must also submit an online application to the University Graduate School for admission to the MSEM program. In addition to the admission requirements of the MSEM program, students must meet all the admission requirements of the University Graduate School.

Students need only apply once to the combined degree pathway; the application is submitted to Graduate Admissions typically before the student starts the last 30 credits of the bachelor's degree program.

Students interested in the combined pathway should consult with their undergraduate advisor on their eligibility to the pathway. The student should also meet the MSEM Program Director to learn about the graduate program and available tracks/courses before completing the application form and submitting it to their undergraduate advisor. Final decision for admission to the MSEM program will be made by the University Graduate School upon recommendation by the Engineering Management program director. Applicants will be notified by the Engineering Management Program and the University Graduate School of the decision on their applications.

Program Requirements

Degree Program Requirements

Type

Completion Requirement

Required Courses: 30 credits

The MSEM program requires 30 credit hours of course work including 9 credit hours of engineering management core courses, 9 credit hours of business electives, and 12 credit hours of approved graduate-level electives from an engineering track.

Fulfill ALL of the following requirements:

Engineering Management Core Courses: 9 credits

Students in the Engineering Management major are required to take three courses (9 credit hours) to build an engineering management foundation that includes topics in engineering quality management, systems improvement, engineering project management, intellectual property issues, and business laws. The three core courses are:

Complete ALL of the following Courses:

- EIN5226C - Total Quality Management for Engineers
- EIN5359 - Industrial Financial Decisions
- ESI6455 - Advanced Engineering Project Management

AND

Business Electives: 9 credits

Students in the Engineering Management major are required to take three courses (9 credit hours) to gain fundamental knowledge about management functions that includes topics in accounting, finance, organizational behavior, leadership, marketing, and operations management. Additional business electives may be considered subject to the Director's approval. A suggested list of business elective courses is given below:

Earn at least 9 credits from the following:

- ACG6026 - Accounting for Managers
- EIN6105 - Technology Policies and Strategies
- EIN6160 - Management of Innovation and Technology
- EIN6324 - Technology Entrepreneurship
- EIN6155 - Business Plan Development
- FIN6406 - Corporate Finance
- FIN6425 - Financial Management Policies
- FIN6487 - Financial Risk Management -Financial Engineering
- LAW5072 - Business Law and Intellectual Property for Engineers and Entrepreneurs
- MAN6209 - Organization Design and Behavior
- MAR6805 - Marketing Management in the Global Environment
- MAN6167 - Leadership in a Global Environment

Additional Program Requirements

Type

Completion Requirement

Master's Project and Thesis Option

Students in the Engineering Management graduate program may receive permission to conduct a master's project of three credit hours or a thesis of six credit hours within their chosen track to complete the degree program. The Master's Project (EIN6916 Master's Project) will replace one graduate track course. The Master's Thesis (EIN6971 Master's Thesis) will replace two technical track courses.

Grades and Credits

Students are required to maintain a GPA of 3.0. Courses with a grade below 'C' will not be counted toward the Master of Science degree in Engineering Management.

Transfer Credit

Students may receive permission to transfer up to a maximum of six semester credits provided that:

(1) The courses were taken at the graduate level at an accredited college or university;

(2) With a grade of 'B' or better;

(3) The courses were judged relevant by the program director;

(4) The credits were not used toward another degree; and

(5) The credits will be no older than six years at the time of graduation.

Students who already have earned (or are earning) a Master's degree that is closely related to his/her technical track (i.e., MSEM sub-plan) may transfer up to 12 semester hours to meet the track requirement, subject to the Program Director's approval. No more than 12 semester hours taken at FIU as a non-degree seeking student may be counted toward the Engineering Management graduate program.

Time Limit

All works applicable to the Master of Science degree in Engineering Management, including transfer credits, must be completed within six years of conferral of the degree.

Major Requirements

There are no majors associated with this program.

Track, Specialization, Concentration, Area of Emphasis, or Other Curricular Offering Requirements

Engineering Tracks

Students in the Engineering Management major must choose an engineering track from any academic unit in the College of Engineering and Computing. Within a chosen track, students are required to take four courses (12 credit hours) that meet the program's technical requirement. These engineering electives are designed to broaden and deepen the students' understanding of engineering and technology development in a chosen track. Students should have a proper educational background in order to take elective courses. Additional tracks and elective courses may be available, subject to the approval of the Engineering Management program director.

Artificial Intelligence Track

This track is designed for students with an interest in AI and related technologies. The courses focus on basic and advanced concepts in machine learning, deep learning, generative AI, and data engineering. These courses help students identify and solve complex problems in various domains, such as IoT, sensors, energy, environment, and robotics. Students will learn the full data science lifecycle and its application to these domains.

AI (Artificial Intelligence) Track

Type

Completion Requirement

Required Courses: 12 credits

Prerequisite: *Knowledge of at least one programming language (e.g., Python, Java, C#, C, C++) AND a Bachelor degree required (STEM, Health, Business or related field is preferred)*.

Students in the AI track are required to take four courses (12 credits) from the following list. Additional courses may be selected with approval of the program Director.

Complete ALL of the following Courses:

- CAI5867 - Advanced Data Engineering in ECE
- CAI6856 - Advanced Generative AI in ECE
- CNT6150 - Advanced Deep Learning in ECE
- CNT6154 - Advanced Machine Learning in ECE

Biomedical Engineering Track

Type

Completion Requirement

Required Courses: 12 credits

Students in this track are required to take four courses from the following list. Additional courses may be selected with approval of the program director.

Complete ANY of the following Courses:

- BME5005 - Applied Biomedical Engineering Principles
- BME5036 - Biotran Processes
- BME5105 - Biomaterial Science
- BME5560 - Biomedical Engineering Optics
- BME5573 - Nanomedicine
- BME5505 - Advanced Medical Imaging

Computer Engineering Track

Type

Completion Requirement

Required Courses: 12 credits

Students in this track are required to take four courses from the following list. Additional courses may be selected with approval of the program director.

Complete ANY of the following Courses:

- EEL5718 - Computer-Communication Network Engineering
- EEL5725 - Hardware Description Languages (VHDL or Verilog)
- EEL5757 - Real-Time Digital Signal Processing Implementations
- EEL6167 - VLSI Design
- EEE6502 - Digital Signal Processing
- EEL6681 - Fuzzy Systems Design

Computer Science Track

Type

Completion Requirement

Required Courses: 12 credits

Students in this track are required to take four courses from the following list. Additional courses may be selected with approval of the program director.

Complete ANY of the following Courses:

- CEN5011 - Advanced Software Engineering
- COP5725 - Principles of Database Management Systems
- COP5614 - Operating Systems
- COT5310 - Theory of Computation I
- COT5407 - Introduction to Algorithms

Construction Management Track

Type

Completion Requirement

Required Courses: 12 credits

Students in this track are required to take four courses from the following list. Additional courses may be selected with approval of the program director.

Complete ANY of the following Courses:

- BCN5716 - Productivity in Construction
- BCN5626 - Construction Cost Analysis and Control
- BCN5645 - Construction Economic Analysis
- BCN5728 - Principles of Construction Scheduling
- BCN5774 - Topics in International Construction
- BCN6675 - Decision and Risk Analysis in Construction
- BCN6916 - Developments in Construction Technologies

Electrical Engineering Track

Type

Completion Requirement

Required Courses: 12 credits

Students in this track are required to take four courses from the following list. Additional courses may be selected with approval of the program director.

Complete ANY of the following Courses:

- EEE5425 - Introduction to Nanotechnology
- EEL5171 - Advanced Systems Theory
- EEL5500 - Digital Communication Systems I
- EEL5501 - Digital Communication Systems II
- EEL6219 - Electric Power Qual
- EEL6261 - Power Systems Engineering
- EEE6502 - Digital Signal Processing

Enterprise Systems Track

This track is designed for students who have a career interest in management of operations at the entire enterprise level. Systems engineering tools and information technology are applied to planning, modeling, analysis, design, and implementation of contemporary enterprise systems in any business sector.

Enterprise Systems Track

Type

Completion Requirement

Required Courses: 12 credits

Students in this track are required to take four courses from the following list. Additional courses may be selected with approval of the program director.

Complete ANY of the following Courses:

- EGS5620 - Enterprise Systems Configuration
- EGS5621 - Enterprise Systems Collaboration

- EGS5622 - Enterprise Systems Integration
- EGS5623 - Enterprise Systems Optimization
- EIN5346 - Logistics Engineering
- EIN5367 - Design of Production Systems
- EIN6133 - Enterprise Engineering
- EIN6336 - Advanced Production Planning and Control
- EIN6345 - Inventory Control System
- ESI5010C - Forecasting and Demand Management

Engineering Entrepreneurship Track

This track is designed for students who have a career interest in becoming an engineering entrepreneur who creates jobs in new business ventures or becoming an engineering manager who manages innovation working within a company.

Engineering Entrepreneurship Track

Type

Completion Requirement

Required Courses: 12 credits

Students in this track are required to take four courses from the following list. Additional courses may be selected with approval of the program director.

Complete ANY of the following Courses:

- EGN5550 - Risk Analysis in Business Concept Development for Engineers and Entrepreneurs
- EGN5644 - Commercializing Innovation
- EIN5367 - Design of Production Systems
- EIN6105 - Technology Policies and Strategies
- EIN6160 - Management of Innovation and Technology
- EIN6324 - Technology Entrepreneurship
- EIN6155 - Business Plan Development
- EIN6327 - Entrepreneurship and New Venture Initiation
- EIN6329 - Advanced Engineering Business Plan Development
- EIN6336 - Advanced Production Planning and Control
- EIN6392 - Product Design for Manufacturability and Automation (Inactive)

Environmental Engineering Track

Type

Completion Requirement

Required Courses: 12 credits

Students in this track are required to take four courses from the following list with the approval of the Graduate Program Director and after meeting prerequisite requirements. Additional courses may be selected with approval of the program director.

Complete ANY of the following Courses:

- ENV5406 - Water Treatment Systems and Design
- ENV5517 - Design of Wastewater Treatment Plants
- ENV5666 - Water Quality Management
- CWR5235 - Open Channel Hydraulics
- CWR5125 - Groundwater Hydrology
- ENV5104 - Indoor Air Quality
- ENV5105 - Air Quality Managemt
- ENV5347 - Waste Incineration
- ENV5126 - Particulate Air Pollution Control
- ENV5127 - Gaseous Air Pollution Control
- ENV5356 - Solid and Hazardous Waste
- ENV5027 - Bioremediation Processes
- ENV5335 - Advanced Hazardous Waste Treatment Processes
- ENV5008 - Appropriate Technology for Developing Countries
- ENV5007 - Environmental Planning
- ENV5519 - Chemistry for Environmental Engineers
- ENV6070 - Green Engineering
- ENV6614 - Environmental Risk Assessment

Information Technology Track

Type

Completion Requirement

Required Courses: 12 credits

Students in this track are required to take four courses from the following list. Additional courses may be selected with approval of the program director.

Complete ANY of the following Courses:

- CIS5027 - Computer Systems Fundamentals
- CIS5372 - Fundamentals of Computer Security (Inactive)
- CEN5087 - Software and Data Modeling
- COP5725 - Principles of Database Management Systems
- TCN5030 - Computer Communications and Networking Technologies
- EGS5620 - Enterprise Systems Configuration
- EGS5621 - Enterprise Systems Collaboration
- EGS5622 - Enterprise Systems Integration
- EGS5623 - Enterprise Systems Optimization
- EIN6117 - Advanced Industrial Information Systems
- EIN6133 - Enterprise Engineering
- ESI5602 - Engineering Data Representation and Modeling
- ESI6601 - Data Warehousing and Mining

Mechanical Engineering Track

Type

Completion Requirement

Required Courses: 12 credits

Students in this track are required to take four courses from the following list. Additional courses may be selected with approval of the program director.

Complete ANY of the following Courses:

- EGM5346 - Computational Engineering Analysis
- EGM5354 - Finite Element Method Applications in Mechanical Engineering
- EGM5615 - Synthesis of Engineering Mechanics
- EGM6422 - Advanced Computational Engineering Analysis
- EML5103 - Intermediate Thermodynamics
- EML5152 - Intermediate Heat Transfer
- EML5505 - Smart Machine Design and Development
- EML5509 - Optimization Algorithms
- EML5530 - Intermediate CAD/CAE
- EML5606C - Advanced Refrigeration and Air Conditioning Systems
- EML5709 - Intermediate Fluid Mechanics
- EML6725 - Comp. Fluid Dynamics

Production and Manufacturing Track

Type

Completion Requirement

Required Courses: 12 credits

Students in this track are required to take four courses from the following list. Additional courses may be selected with approval of the program director.

Complete ANY of the following Courses:

- EGN5540 - Quality and EH&S Management Systems (Inactive)
- EGS5620 - Enterprise Systems Configuration
- EGS5622 - Enterprise Systems Integration
- EIN5332 - Quality Engineering
- EIN5346 - Logistics Engineering
- EIN5367 - Design of Production Systems
- EIN6336 - Advanced Production Planning and Control
- EIN6345 - Inventory Control System
- EIN6392 - Product Design for Manufacturability and Automation (Inactive)
- ESI5010C - Forecasting and Demand Management

Quality Engineering and Management

Type

Completion Requirement

Required Courses: 12 credits

Students in this track are required to take four courses from the following list.

Complete ANY of the following Courses:

- EIN5332 - Quality Engineering
- EGN5540 - Quality and EH&S Management Systems (Inactive)
- ESI6316 - Applications of OR in Manufacturing
- EIN5367 - Design of Production Systems
- EIN5106 - Regulatory Aspects of Engineering
- EIN6133 - Enterprise Engineering
- EIN6179C - Advanced Total Quality Management for Engineers

Risk and Disaster Management Track

Type
Completion Requirement

Required Courses: 12 credits

Students in this track are required to take four courses from the following list. Additional courses may be selected with approval of the program director.

Complete ANY of the following Courses:

- BCN5588 - Vulnerability Analysis
- BCN5589 - Hazard Mitigation
- EGN5550 - Risk Analysis in Business Concept Development for Engineers and Entrepreneurs
- ENV6614 - Environmental Risk Assessment
- FIN6487 - Financial Risk Management -Financial Engineering
- PHC6251 - Disaster and Emergency Epidemiology
- MAN6706 - Crisis Management (Inactive)
- MAP6630 - Numerical Methods in Risk Analysis and Management
- MAP6635 - Risk Analysis and Management I
- MAP6636 - Risk Analysis and Management II

Structural/Wind/Construction Track

Type
Completion Requirement

Required Courses: 12 credits

Students in this track are required to take four courses from the following four groups (one per group) with the approval of the Graduate Program Director and after meeting prerequisite requirements. Additional courses may be selected with approval of the program director.

Fulfill ALL of the following requirements:

Group 1

Complete ANY of the following Courses:

- CCE5035 - Construction Engineering Management
- CCE5036 - Advanced Project Planning for Civil Engineers

AND

Group 2

Complete ANY of the following Courses:

- CES5106 - Advanced Structural Analysis
- EGM5421 - Structural Dynamics

AND

Group 3

Complete ANY of the following Courses:

- CES5715 - Prestressed Concrete Design
- CES5606 - Advanced Structural Steel Design
- CES6706 - Advanced Reinforced Concrete Design
- EGN5439 - Design of Tall Buildings

AND

Group 4

Complete ANY of the following Courses:

- CEG5065 - Geotechnical Dynamics
- CEG6105 - Advanced Foundations Engineering

Systems Engineering Track

Type

Completion Requirement

Required Courses: 12 credits

Students in this track are required to take four courses from the following list. Additional courses may be selected with approval of the program director.

Complete ANY of the following Courses:

- EGN5540 - Quality and EH&S Management Systems (Inactive)
- EIN5332 - Quality Engineering
- EIN5346 - Logistics Engineering
- EIN5367 - Design of Production Systems
- EIN6133 - Enterprise Engineering
- EIN6336 - Advanced Production Planning and Control
- EIN6345 - Inventory Control System
- EIN6357 - Advanced Engineering Economy
- EIN6940 - Industrial and Systems Engineering Internship
- ESI5010C - Forecasting and Demand Management
- ESI5522 - Simulation Models of Engineering Systems
- ESI6316 - Applications of OR in Manufacturing
- ESI6440 - Integer Programming (Inactive)

- ESI6470 - Stochastic Optimization
- ESI6524 - Advanced Industrial Systems Simulation
- ESI6546 - Network Flow Analysis

Telecommunications Track

Type
Completion Requirement

Required Courses: 12 credits

Students in this track are required to take four courses from the following list. Additional courses may be selected with approval of the program director.

Complete ANY of the following Courses:

- TCN5010 - Telecommunications Technology and Applications
- TCN5030 - Computer Communications and Networking Technologies
- TCN5060 - Telecommunications Software and Methodologies
- TCN5640 - Telecommunications Enterprise Planning and Strategy
- TCN6430 - Networks Management and Control Standards
- TCN6450 - Wireless Information Systems
- TCN6880 - Telecommunications Public Policy Development and Standards

Transportation Engineering Track

Type
Completion Requirement

Required Courses: 12 credits

Students in this track are required to take four courses from the following list. Additional courses may be selected with approval of the program director.

Complete ANY of the following Courses:

- TTE5205 - Advanced Highway Capacity Analysis
- TTE5215 - Fundamentals of Traffic Engineering
- TTE5607 - Transportation Demand Analysis
- TTE5805 - Advanced Geometric Design of Highways
- TTE6257 - Traffic Control Systems Design
- TTE6506 - Mass Transit Planning
- CGN5320 - GIS Applications in Civil and Environmental Engineering

Water Resources Engineering Track

Type
Completion Requirement

Required Courses: 12 credits

Students in this track are required to take four courses from the following list with the approval of the Graduate Program Director and after meeting prerequisite requirements. Additional courses may be selected with approval of the program director.

Complete ANY of the following Courses:

- CWR5235 - Open Channel Hydraulics
- CWR5251 - Environmental Hydraulics
- CWR5535C - Advanced Modeling Applications in Water Resources Engineering
- CWR5125 - Groundwater Hydrology
- CWR6126 - Advanced Groundwater Hydrology
- CWR6236 - Engineering Sediment Transport
- ENV5666 - Water Quality Management

Other Curricular Offering: Combined BS in Biomedical Engineering to MS in Engineering Management (BSBME/MSEM) Accelerated Degree Pathway

A student admitted to the combined degree pathway will be considered to have undergraduate status until the student applies for graduation from their bachelor's degree program. Upon conferral of the bachelor's degree, the student will be granted graduate status and be eligible for graduate assistantships. Students enrolled in the combined degree pathway could count up to three BME graduate courses for both the BSBME electives and the MSEM electives, for a total saving of 9 credit hours. The following is a list of eligible BME graduate courses:

--BME5005 Appl Bio Eng Princ

--BME5036 Biotran Processes

--BME5105 Biomaterial Science

--BME5560 BME Optics

--BME5573 Nanomed

The combined BSBME/MSEM pathway has been designed to be a continuous pathway enrollment. During this combined BSBME/MSEM pathway, upon completion of all the requirements of the BSBME program, students will receive their BSBME degree. Students may elect to permanently leave the combined pathway and earn only the BSBME degree. Students who elect to leave the combined pathway and earn only the BS degree will have the same access requirements to regular graduate programs as any other student, but will not be able to use the 9 credit hours in both the BSBME and MSEM degrees.

For each of the graduate courses counted as credits for both BSBME and MSEM degrees, a minimum grade of "B" is required. Only graduate courses with formal lecture can be counted for both degrees. The students are responsible for confirming the eligibility of each course with their undergraduate advisors.

Other Curricular Offering: Combined BS in Computer Engineering/MS in Engineering Management (BSCpE/MSEM) Accelerated Degree Pathway

Students enrolled in the combined degree pathway could count up to two Electrical Engineering graduate courses for both the BSCpE electives and the MSEM electives, for a total saving of 6 credit hours. A minimum grade of "B" is required graduate courses counted as credits for both BSCpE and MSEM degrees. Only 5000-level or higher courses may be applied toward both degrees. Only graduate courses with formal lecture can be counted for both degrees.

The combined BSCpE/MSEM pathway has been designed to be a continuous pathway enrollment. Students will receive their BSCpE degree upon completion of all the requirements of the BSCpE program. A student admitted to the combined degree pathway will be considered to have undergraduate status until the student applies for graduation from his/her bachelor's degree program. Upon conferral of the bachelor's degree, the student will be granted graduate status and be eligible for graduate assistantships.

Students may elect to permanently leave the combined pathway and earn only the BSCpE degree. Students who elect to leave the combined pathway and earn only the BS degree will have the same access requirements to regular graduate programs as any other student but will not be able to use the 6 credit hours in both the BSCpE and MSEM degrees.

Other Curricular Offering: BS in Computer Science to MS in Engineering Management Accelerated Degree Pathway

Type

Completion Requirement

Accelerated Degree Pathway

A student admitted to the combined degree pathway will be considered to have undergraduate status until the student applies for graduation from their bachelor's degree program. Upon conferral of the bachelor's degree, the student will be granted graduate status and be eligible for graduate assistantships. Students enrolled in the combined degree pathway could count up to three Computer Science graduate courses toward satisfying both the BSCS and the MSEM requirements, for a total saving of 9 credit hours. Students are required to take courses from the following list. Additional courses may be selected with approval of the program director.

Complete ALL of the following Courses:

- CEN5011 - Advanced Software Engineering
- COP5614 - Operating Systems
- COP5725 - Principles of Database Management Systems
- COT5310 - Theory of Computation I
- COT5407 - Introduction to Algorithms

The combined BSCS/MSEM pathway has been designed to be a continuous enrollment pathway. During this combined BSCS/MSEM pathway, upon completion of all the requirements of the BSCS pathway, students will receive their BSCS degree. Students may elect to permanently leave the combined pathway and earn only the BSCS degree. Students who elect to leave the combined pathway and earn only the BS degree will have the same access requirements to regular graduate programs as any other student but will not be able to use the 9 credit hours in both the BSCS and MSEM degrees.

For each of the graduate courses counted as credits for both BSCS and MSEM degrees, a minimum grade of "B" is required. Only graduate courses with formal lecture can be counted for both degrees. The students are responsible for confirming the eligibility of each course with their undergraduate advisors.

Other Curricular Offering: Combined BS in Electrical Engineering to MS in Engineering Management (BSEE/MSEM) Accelerated Degree Pathway

Students enrolled in the combined degree pathway could count up to two Electrical Engineering graduate courses for both the BSEE electives and the MSEM electives, for a total saving of 6 credit hours. A minimum grade of "B" is required graduate courses counted as credits for both BSEE and MSEM degrees. Only 5000-level or higher courses may be applied toward both degrees. Only graduate courses with formal lecture can be counted for both degrees.

The combined BSEE/MSEM pathway has been designed to be a continuous enrollment pathway. Students will receive their BSEE degree upon completion of all the requirements of the BSEE program. A student admitted to the combined degree pathway will be considered to have undergraduate status until the student applies for graduation from his/her bachelor's degree program. Upon conferral of the bachelor's degree, the student will be granted graduate status and be eligible for graduate assistantships.

Students may elect to permanently leave the combined pathway and earn only the BSEE degree. Students who elect to leave the combined pathway and earn only the BS degree will have the same access requirements to regular graduate programs as any other student but will not be able to use the 6 credit hours in both the BSEE and MSEM degrees.

Students interested in the combined pathway should consult with their undergraduate advisor on their eligibility to the pathway. The student should also meet the MSEM Program Director to learn about the graduate program and available tracks/courses before completing the application form and submitting it to their undergraduate advisor. Final decision for admission to the MSEM program will be made by the University Graduate School upon recommendation by the Engineering Management program director. Applicants will be notified by the Engineering Management Program and the University Graduate School of the decision on their applications.

Other Curricular Offering: Combined BS in Information Technology to MS in Engineering Management Accelerated Degree Pathway

A student admitted to the combined degree pathway will be considered to have undergraduate status until the student applies for graduation from their bachelor’s degree program. Upon conferral of the bachelor’s degree, the student will be granted graduate status and be eligible for graduate assistantships. Students enrolled in the combined degree pathway could count up to three Management Electives toward their nine “interdisciplinary credits” in the BSIT degree program, for a total saving of 9 credit hours.

--ACG6026 Actg For Managers

--EIN5359 Ind Fin Decisions

--FIN6406 Corporate Finance

--MAN6167 Ldrshp Global Env

--MAN6209 Org Design & Behav

--QMB6616 Process & Oper Analysis

--ISM6021 Mgmt Information Systems

--MAR6805 Mkg Mgt In Glob Env

The combined BSIT/MSEM pathway has been designed to be a continuous enrollment pathway. During this combined BSIT/MSEM pathway, upon completion of all the requirements of the BSIT program, students will receive their BSIT degree. Students may elect to permanently leave the combined pathway and earn only the BSIT degree. Students who elect to leave the combined pathway and earn only the BS degree will have the same access requirements to regular graduate programs as any other student but will not be able to use the 9 credit hours in both the BSIT and MSEM degrees.

For each of the graduate courses counted as credits for both BSIT and MSEM degrees, a minimum grade of “B” is required. Only graduate courses with formal lecture can be counted for both degrees. The students are responsible for confirming the eligibility of each course with their undergraduate advisors.

Other Curricular Offering: Combined BS in Interdisciplinary Engineering to the MS in Engineering Management Accelerated Degree Pathway

A student admitted to the combined degree pathway will be considered to have undergraduate status until the student applies for graduation from their bachelor's degree program. Upon conferral of the bachelor's degree, the student will be granted graduate status and be eligible for graduate assistantships.

Students enrolled in the combined degree pathway could count up to three Management Electives toward their twelve "Engineering Business and Leadership" in the BSIE degree program, for a total saving of 9 credit hours.

The combined BSIE/MSEM pathway has been designed to be a continuous program. During this combined BSIE/MSEM pathway, upon completion of all the requirements of the BSIE program, students will receive their BSIE degree. Students may elect to permanently leave the combined pathway and earn only the BSIE degree. Students who elect to leave the combined pathway and earn only the BS degree will have the same access requirements to regular graduate programs as any other student, but will not be able to use the 9 credit hours in both the BSIE and MSEM degrees

For each of the graduate courses counted as credits for both BSIE and MSEM degrees, a minimum grade of "B" is required. Only graduate courses with formal lecture can be counted for both degrees. The students are responsible for confirming the eligibility of each course with their undergraduate advisors.

Other Curricular Offering: Combined BS in Mechanical Engineering to MS in Engineering Management Accelerated Degree Pathway

A student admitted to the combined degree pathway will be considered to have undergraduate status until the student applies for graduation from their bachelor's degree program. Upon conferral of the bachelor's degree, the student will be granted graduate status and be eligible for graduate assistantships. Students enrolled in the combined degree pathway could count up to three Mechanical Engineering graduate courses for both the BSME electives and the MSEM electives, for a total saving of 9 credit hours. The following is a list of eligible Mechanical Engineering graduate courses:

--EGM5346 Computational Engineering Anal

--EGM5354 Fem In Me

--EGM5615 Synth Of Engg. Mech.

--EML5103 Int Thermodynamics

--EML5152 Int Heat Transfer

--EML5505 Smart Mach Des Dev

--EML5509 Optimization

--EML5530 Inter. Cad/Cae

--EML5606C Adv Ref & A/C Syst

--EML5709 Int. Fluid Mech.

The combined BSME/MSEM pathway has been designed to be a continuous enrollment pathway. During this combined BSME/MSEM pathway, upon completion of all the requirements of the BSME program, students will receive their BSME degree. Students may elect to permanently leave the combined pathway and earn only the BSME degree. Students who elect to leave the combined pathway and earn only the BS degree will have the same access requirements to regular graduate programs as any other student, but will not be able to use the 9 credit hours in both the BSME and MSEM degrees.

For each of the graduate courses counted as credits for both BSME and MSEM degrees, a minimum grade of "B" is required. Only graduate courses with formal lecture can be counted for both degrees. The students are responsible for confirming the eligibility of each course with their undergraduate advisors.

ELEG:BS - Bachelor of Science in Electrical Engineering

Overview

Degree Offered
BS - Bachelor of Science

Program Title
Electrical Engineering

The Bachelor of Science (BS) program in Electrical Engineering at FIU holds accreditation from the Accreditation Board for Engineering and Technology (ABET). Electrical engineers are responsible for the design, development, testing, and oversight of the production of electrical equipment and systems. Within our program, students have the opportunity to specialize in various concentrations, spanning from quantum-scale technologies to the design of large-scale power generation systems. Our curriculum encompasses the practical application of electricity, electronics, and electromagnetism. The field of electrical engineering continually evolves, with emerging technologies such as electric vehicles (EVs), hardware security, control systems, AI-powered autonomous devices, and wireless communications through antennas and other devices. Whether the goal is to enter industry, entrepreneurship, or pursue advanced studies in electrical engineering, this bachelor's degree equips students for success.

Requirements

Simple Requirements

Admissions Requirements

Admissions Requirements for the Bachelor of Science (BS) in Electrical Engineering

See general university admissions requirements at admissions.fiu.edu.

Admissions Requirements for the Combined BS in Electrical Engineering to Master of Science (MS) in Electrical Engineering Accelerated Degree Pathway

To be considered for admission to the combined bachelor's/master's degree pathway, students must have completed at least 75 credits required for the bachelor's degree program at FIU, have earned at least a 3.2 GPA on both overall and upper-division courses, and meet the admissions criteria for the graduate degree program to which they are applying. Students need only apply once to the combined degree pathway; the application is submitted to Graduate Admissions typically before the student starts the last 30 credits of the bachelor's degree program.

Admissions Requirements for the Combined BS in Electrical Engineering to MS in Biomedical Engineering Accelerated Degree Pathway

To be considered for admission to the combined bachelor's/master's degree pathway, students must have completed 75 credits in the bachelor's degree program at FIU, have earned at least a 3.25 GPA on both overall and upper division courses, and meet the admissions criteria for the graduate degree program to which they are applying. Students need only apply once to the combined degree program; the application is submitted to Graduate Admissions typically before the student starts the last 30 credits of the bachelor's degree program.

Admissions Requirements for the Combined BS in Electrical Engineering to MS in Engineering Management (BSEE/MSEM) Accelerated Degree Pathway

Students who are pursuing a Bachelor of Science degree in Electrical Engineering and have completed at least 75 credits with a minimum of a 3.2 overall GPA on both overall and upper division courses may, upon recommendation from three ECE faculty members, apply to enroll in the combined BSEE/MSEM pathway. Students need only apply once to the combined degree pathway; the application is submitted to Graduate Admissions typically before the student starts the last 30 credits of the bachelor's degree program. In addition to the admission requirements of the MSEM program, students must meet all the admission requirements of the University Graduate School.

Admissions Requirements for the Combined BS in Electrical Engineering to MS in Telecommunications and Networking Accelerated Degree Pathway

Students who pursue a BS degree and are in their junior year, with at least a 3.3 GPA on both overall and upper division courses may apply to enroll in the combined BS/MS pathway. To be considered for admission to the combined bachelor's/master's degree pathway, students must have completed at least 75 credits in the bachelor's degree program at FIU and meet the admissions criteria for the graduate degree program to which they are applying. Students need only apply once to the combined degree pathway; the application is submitted to Graduate Admissions typically before the student starts the last 30 credits of the bachelor's degree program. A student admitted to the combined degree pathway will be considered to have undergraduate status until the student applies for graduation from their bachelor's degree program. Upon conferral of the bachelor's degree, the student will be granted graduate status and be eligible for graduate assistantships. Only 5000-level or higher courses, and no more than the number of credits specified by the program catalog, may be applied toward both degrees. In addition to the admission requirements of the combined BS/MS pathway, students must meet all the of the University's graduate admissions requirements.

Program Requirements

Academic Progression Standards

Steady academic progression is expected by the College of Engineering and Computing. Students who are unsuccessful in passing common pre-requisites after two attempts will be advised to change their major into an area where they can be successful. Drops after the add/drop period, which result in a DR grade, are considered an attempt in the course and count as an unsuccessful enrollment.

Students must also meet the Math Progression standard of successfully completing Calculus 1 within three academic terms, not counting summers.

Students will be redirected to a different degree program when completion of the progression standards, including the applicable math progression standard by its stated semester, is no longer feasible.

Students applying to Electrical Engineering should have good communication skills in English (verbal and written) and exhibit logical thinking, creativity, imagination, and persistence. They should have proven academic background in mathematics, chemistry, and physics. First time in college at FIU and eligible to enroll in Calculus I can declare Electrical Engineering as a major. All others will be admitted to Electrical Engineering after successfully registering for Calculus II. Missing courses may be taken at FIU, with advisor approval.

At the undergraduate level, the basic required program of instruction in fundamental theory and laboratory practice is balanced by a broad range of electives in such fields as bioengineering, communication systems, control systems, energy, and power. Students, with the counsel and guidance of faculty advisers, design their electives program around their own special interests and career objectives. Students are allowed to take ECE electives when they complete the University core and start taking degree core. Students must choose elective classes from an approved concentration list. Students may choose any class from any concentration as long as they fulfill the prerequisite(s) and corequisite(s). Students are required to choose at least two concentrations, at least nine credits from each of these two concentrations.

Any course taken without the required prerequisites and corequisites will be dropped automatically before the end of the term, resulting in a grade of “DR” or “DF”. The student will not be eligible for a refund.

Students must earn a minimum grade of “C“ and a minimum GPA of 2.0 in all EEE, EEL, and elective courses required for graduation.

Students, who have been dismissed for the first time from the University due to low grades, may appeal to the department for reinstatement. A second dismissal results in no possibility of reinstatement.

Students are required to take SPC2608 Public Speaking (for Engineers) or an equivalent Public Speaking course.

Lower-Division Preparation

Lower-division requirements include at least 50 credit hours of pre-engineering courses. These courses include common prerequisite courses, 2 semesters of English composition and 2 other Writing Intensive Requirement (WIR) courses. A minimum grade of “C” is required in all writing courses, all calculus courses, differential equations, both physics classes, and chemistry. In addition, both transfer students and FIU freshman must take a combination of social sciences and humanities that fulfill the FIU University Core Curriculum requirements and those topics also complement the goals and objectives of the College of Engineering and Computing (including economic, environmental, political, and/or social issues).

In addition, students may transfer a pre-approved engineering Statics course if it meets the proper prerequisites for the course (speak to an FIU engineering advisor to see if your college offers an acceptable statics course). Students must make up any missing prerequisites before they are allowed to begin taking certain engineering courses.

Lower Division Preparation

Type

Prerequisite

Common Prerequisite Courses

For a list of all state-approved common prerequisites, including alternatives, visit https://cpm.flvc.org.

Complete ALL of the following Courses:

- CHM1045 - General Chemistry I
  AND CHM1045L - General Chemistry Lab I
- MAC2281 - Calculus I for Engineering
- MAC2282 - Calculus II for Engineering

- MAC2283 - Calculus III for Engineering
- MAP2302 - Differential Equations
- PHY2048 - Physics with Calculus I
- PHY2049 - Physics with Calculus II
  AND PHY2049L - General Physics Laboratory II

PHY2048L General Phys Lab I *is not required at FIU*

Additional lower division courses required:

Complete ALL of the following Courses:

- EEL2880 - C Programming for Embedded Systems

Upper Division

Type

Completion Requirement

Engineering Breadth and Elective: 11-12 credits

Complete ALL of the following Courses:

- EGN1002 - Engineering Orientation
  OR EEE1760 - Introduction to Embedded Computing
  OR EEL1603 - Introduction to Robotic Systems, Instrumentation, and Control for Electrical and Computer Engineers
- ESI3215 - Evaluation of Engineering Data I
- EGN3613 - Engineering Economy
- CAI4841 - Introduction to Computer Vision
  OR CNT4153 - Machine Learning in ECE

ECE Core: 21 credits

Complete ALL of the following Courses:

- EEL2880 - C Programming for Embedded Systems
- EEL3110C - Circuit Analysis and Lab
- EEL3120 - Introduction to Linear Systems in Engineering
- EEL3135 - Signals And Systems
- EEL3712 - Logic Design I
  AND EEL3712L - Logic Design I Lab
- EEL4920 - Senior Design I: Ethics, Communications, and Constraints
- EEL4921C - Senior Design II: Project Implementation

EEL4920 Senior Design I and EEL4921C Senior Design II are intended to be taken in the last 2 semesters of the undergraduate experience. Students are required to complete at least 100 credits, other ECE core courses, and Electrical Engineering Degree Core before EEL4920 Senior Design I registration.

Electrical Engineering Degree Core: 10 credits

Complete ALL of the following Courses:

- EEE3303C - Electronics I & Lab

- EEL3200 - Electrical Energy Systems
- EEL4410 - Introduction to Fields and Waves

Electrical Engineering Electives: 36 credits

Selected from Areas of Interest offered by ECE Department

Areas of Interest offered by the ECE Department

(Applied to all Department degree programs)

Electrical Engineering and Computer Engineering students must choose elective classes from an area of interest from the following list and take the corresponding courses as their Electives. Students may choose any class from any area of interest as long as they fulfill the prerequisite(s) and corequisite(s). Students must choose at least two areas of interest, and complete at least nine credits from each of those two areas of interest, or additional depth in an area of interest can be substituted.

Upon the start of the program, up to 6 general credits can be applied toward degree completion.

Complete at least 2 of the following:

Biosensing, Devices, and Digital Health:

Earn at least 9 credits from the following:

- EEE3303C - Electronics I & Lab
- EEE4393C - Wearable Electronics
- EEE4510 - Introduction to Digital Signal Processing with AI
- EEE4421C - Introduction to Nanofabrication
- EEL4652C - Smart Sensors and Transducer Systems
- CAI4841 - Introduction to Computer Vision

EEE3303C Electronics I & Lab is a CpE Only Elective.

OR

RF and Wireless Communications:

Earn at least 9 credits from the following:

- EEL3514 - Communication Systems
  AND EEL3514L - Communication Systems Lab
- EEL4413 - Wave-Propagation for Wireless Communication
- EEL4421 - Introduction to RF Circuit Design
- EEL4461C - Antennas
- EEE4510 - Introduction to Digital Signal Processing with AI
- EEL4515 - Advanced Communication Systems
- EEE4550 - Introduction to Radar Systems
- EEL4583 - Basics of RF Systems

OR

Robotics, Control, and Autonomous Systems:

Earn at least 9 credits from the following:

- EEL3657 - Control Systems I
- EEL3660 - Introduction to ROS-Based Modeling and Simulation for ECE
- EEL3664 - Introduction to Autonomous Systems
- EEL4658 - Industrial Control Systems
- EEL4664 - Sensors, Perception, and Robotic Manipulation

OR

Quantum Engineering, Semiconductors, and Chip Technology:

Earn at least 9 credits from the following:

- EEE3303C - Electronics I & Lab
- EEE3396 - Introduction to Solid State Devices
- EEL4005 - Measurements and Instrumentation in Electrical Engineering
- EEE4304C - Electronics II and Lab
- EEE4314 - Integrated Circuits and Systems
  AND EEE4314L - Integrated Circuits Laboratory
- EEL4160 - Introduction to VLSI Systems and Design
- EEE4423 - Introduction to Quantum Computers

EEE3303C Electronics I & Lab is a CpE Only Elective

OR

Power/Energy:

Earn at least 9 credits from the following:

- EEL4005 - Measurements and Instrumentation in Electrical Engineering
- EEL4212 - High Voltage Engineering
- EEL4213 - Power Systems I
  AND EEL4213L - Energy Conversion Lab
- EEL4214 - Power Systems II
- EEL4215 - Power Systems III
- EEL4241 - Power Electronics
- EEL4495 - Introduction to Applied Electromagnetics for Safety Analysis

OR

Computer Architecture, GPU, and Hardware Design:

Earn at least 9 credits from the following:

- EEE4343 - Introduction to Digital Electronics
- EEL4709C - Computer Design
- EEL4746 - Microcomputers I
  AND EEL4746L - Microcomputers I Lab
- EEL4747 - Reduced Instruction Set Computing Processors
  AND EEL4747L - Microcomputers II (RISC) Lab

EEL4709C Computer Design is an EE only elective

OR

Embedded System Software:

Earn at least 9 credits from the following:

- EEL3370 - C++ Programming for Embedded Systems
- EEL4730 - Programming Embedded Systems
- EEL4734 - Embedded Operating Systems
- EEL4740 - Embedded Computing Systems
- EEL4831 - Embedded GUI Programming
- EEE4763 - Embedded Programming for AI Application and Implementation

EEL3370 C++ Prog Emb Sys, EEL4730 Programming Embedded Systms, EEL4740 Embedded System are EE Only electives

OR

Networking and Security:

Earn at least 9 credits from the following:

- TCN4081 - Telecommunication Network Security
- TCN4211 - Telecommunication Networks
- TCN4212 - Telecommunication Network Analysis and Design
- EEE4717 - Introduction to IoT Security

OR

Cybersecurity and Digital Forensics:

Earn at least 9 credits from the following:

- EEL4806 - Ethical Hacking and Countermeasures
- EEL4802 - Introduction to Digital Forensics Engineering
- EEL4804 - Introduction Malware Reverse Engineering
- EEE4754 - Introduction to Mobile Forensics
- EEE4750 - Introduction to Image and Video Forensics
- EEE4752 - Introduction to Network Forensics and Incident Response

OR

Engineering Entrepreneurship:

Earn at least 9 credits from the following:

- EEL4933 - Engineering Entrepreneurship
- EEL4062 - Engineering Business Plan Development
- EEL4063 - Introduction to Business Decisions
- EEL4090C - Technical Sales for Engineers

OR

Artificial Intelligence and Big Data:

Earn at least 9 credits from the following:

- CAI4868 - Fundamentals of AI Security in ECE
- CNT4147 - Big Data Analytics in ECE
- CNT4151 - Data Visualization in ECE
- CNT4155 - Python Programming in ECE
- CNT3143 - Analytics with Cloud Services in ECE
- CNT4153 - Machine Learning in ECE
- CNT4149 - Deep Learning in ECE
- CNT4145 - Sensor IoT Analytics

OR

Cyber Defense:

Earn at least 9 credits from the following:

- TCN4211 - Telecommunication Networks
- TCN4081 - Telecommunication Network Security
- EEL4802 - Introduction to Digital Forensics Engineering
- EEL4804 - Introduction Malware Reverse Engineering
- EEL4806 - Ethical Hacking and Countermeasures
- EEL4730 - Programming Embedded Systems
- EEL4734 - Embedded Operating Systems

EEL4730 Programming Embedded Systms is an EE Only elective.

OR

Nuclear Engineering and Instrumentation & Controls:

Earn at least 9 credits from the following:

- EEL4476 - Radiation Detection and Measurement in ECE
- ENU4004 - Introduction to Nuclear Engineering in ECE
- ENU4150 - Fundamental Instrumentation and Controls I for Nuclear in ECE
- ENU4151 - Fundamental Instrumentation and Controls II for Nuclear in ECE
- ENU4111 - Introduction to Nuclear Reactor Simulators in ECE

Major Requirements

There are no majors associated with this program.

Track, Specialization, Concentration, Area of Emphasis, or Other Curricular Offering Requirements

Pre-Medical Concentration for B.S. in Electrical and Computer Engineering: 24 credits

Type

Completion Requirement

Required courses

The B.S. in Electrical or Computer Engineering Pre-Med Concentration is designed for motivated students who have dual interests in engineering and medical careers.

Student are required to complete all the courses in this concentration plus the core requirements for a B.S. degree in Electrical or Computer Engineering and other ECE engineering concentration credits.

Fulfill ALL of the following requirements:

Biology

Complete ALL of the following Courses:

- BSC2010 - General Biology I
  AND BSC2010L - General Biology I Lab
- BSC2011 - General Biology II: Diversity of Life, Organismal Structure and Function
  AND BSC2011L - General Biology Lab II

AND

General Chemistry

Complete ALL of the following Courses:

- CHM1046 - General Chemistry II
  AND CHM1046L - General Chemistry Lab II

AND

Organic Chemistry

Complete ALL of the following Courses:

- CHM2210 - Organic Chemistry I
  AND CHM2210L - Organic Chemistry Lab I
- CHM2211 - Organic Chemistry II
  AND CHM2211L - Organic Chemistry Lab II

AND

Pre-Medical

Complete at least 1 of the following courses:

- BCH3033 - General Biochemistry
- CHM4304 - Biological Chemistry I

Additional Comments:

Within Arts, Sciences and Education, any undergraduate student who elects to do so may carry two majors and work to fulfill the requirements of both concurrently. Upon successful completion of the requirements of two majors, the student will be awarded one degree and a notation denoting both majors will be entered on the transcript.

Students are required to complete all the courses in this concentration plus the core requirements for a B.S. degree in Electrical or Computer Engineering and other ECE engineering concentration credits.

Physics Concentration for B.S. in Electrical and Computer Engineering: 23 credits

Type
Completion Requirement

Required Courses

The B.S. in Electrical or Computer Engineering Physics Concentration is designed for motivated students who have dual interests in engineering and physics.

Student are required to complete all the courses in this concentration plus the core requirements for a B.S. degree in Electrical or Computer Engineering and other ECE engineering concentration credits.

Complete ALL of the following Courses:

- PHY1033 - Physics Pathways
- PHY3106 - Modern Physics
- PHY3802L - Intermediate Physics Lab
- PHY3513 - Thermodynamics
- PHY4221 - Introduction to Classical Mechanics
- PHY4323 - Intermediate Electromagnetism I
- PHY4604 - Quantum Mechanics I
- PHY4821L - Advanced Physics Lab

Additional Comments:
Within Arts, Sciences and Education, any undergraduate student who elects to do so may carry two majors and work to fulfill the requirements of both concurrently. Upon successful completion of the requirements of two majors, the student will be awarded one degree and a notation denoting both majors will be entered on the transcript.

Students are required to complete all the courses in this concentration plus the core requirements for a B.S. degree in Electrical or Computer Engineering and other ECE engineering concentration credits.

For the degree concentrations for the Bachelor of Science in Electrical Engineering, see the above Program Requirement section.

Other Curricular Offering: Combined BS in Electrical Engineering to MS in Electrical Engineering Accelerated Degree Pathway

This five-year pathway seamlessly combines a baccalaureate degree in Electrical Engineering with the Master's in Electrical Engineering. A student admitted to the combined degree pathway will be considered to have undergraduate status until the student applies for graduation from their bachelor's degree program. Upon conferral of the bachelor's degree, the student will be granted graduate status and be eligible for graduate assistantships. Students enrolled in the pathway may count up to 9 hours of graduate-level courses (i.e., 5000 level or higher) as credits for both the undergraduate and graduate degree programs. For each of the courses counted as credits for both BS and MS degree, a minimum grade of 'B' is required. Students enrolled in the pathway are encouraged to seek employment with a department faculty member to work as a student assistant on a sponsored research project.

Other Curricular Offering: Combined BS in Electrical Engineering to MS in Biomedical Engineering Accelerated Degree Pathway

This five-year pathway seamlessly combines a baccalaureate degree in electrical engineering with the Master's in biomedical engineering. A student admitted to the combined degree pathway will be considered to have undergraduate status until the student applies for graduation from their bachelor's degree program. Upon conferral of the bachelor's degree, the student will be granted graduate status and be eligible for graduate assistantships. Students enrolled in the pathway may count up to 9 hours of graduate level courses (i.e., 5000 level or higher) as credits for both the undergraduate and graduate degree programs. For each of the courses counted as credits for both BS and MS degree, a minimum grade of 'B' is required. Upon completion of the combined BS/MS pathway, students must have accumulated a minimum of 24 hours of credits at the graduate (5000+) level. Students enrolled in the pathway are encouraged to seek employment with a department faculty member to work as student assistants on sponsored research projects.

Other Curricular Offering: Combined BS in Electrical Engineering to MS in Engineering Management (BSEE/MSEM) Accelerated Degree Pathway

Students enrolled in the combined degree pathway could count up to two Electrical Engineering graduate courses for both the BSEE electives and the MSEM electives, for a total saving of 6 credit hours. A minimum grade of "B" is required graduate courses counted as credits for both BSEE and MSEM degrees. Only 5000-level or higher courses may be applied toward both degrees. Only graduate courses with formal lecture can be counted for both degrees.

The combined BSEE/MSEM pathway has been designed to be a continuous enrollment pathway. Students will receive their BSEE degree upon completion of all the requirements of the BSEE program. A student admitted to the combined degree pathway will be considered to have undergraduate status until the student applies for graduation from his/her bachelor's degree program. Upon conferral of the bachelor's degree, the student will be granted graduate status and be eligible for graduate assistantships.

Students may elect to permanently leave the combined pathway and earn only the BSEE degree. Students who elect to leave the combined pathway and earn only the BS degree will have the same access requirements to regular graduate programs as any other student but will not be able to use the 6 credit hours in both the BSEE and MSEM degrees.

Students interested in the combined pathway should consult with their undergraduate advisor on their eligibility to the pathway. The student should also meet the MSEM Program Director to learn about the graduate program and available tracks/courses before completing the application form and submitting it to their undergraduate advisor. Final decision for admission to the MSEM program will be made by the University Graduate School upon recommendation by the Engineering Management program director. Applicants will be notified by the Engineering Management Program and the University Graduate School of the decision on their applications.

Other Curricular Offering: Combined BS in Electrical Engineering to MS in Telecommunications and Networking Accelerated Degree Pathway

Students enrolled in the pathway may count up to six credit hours of Telecommunications and Networking graduate courses as credits for both the BS and MS degrees. The combined BS/MS pathway has been designed to be a continuous enrollment pathway. During this combined BS/MS pathway, upon completion of all the requirements of the undergraduate program, students will receive their BS degrees. Students in this pathway have one year to complete the master's degree after receipt of the bachelor's degree. Students who fail to meet this one year post B.S. requirement or who elect to leave the combined pathway at any time and earn only the BS degree will have the same access requirements to regular graduate programs as any other student, but will not be able to use the six credits in both the bachelor's and master's degrees.

For each of the graduate courses counted as credits for both BS and MS degree, a minimum grade of “B” is required. Students enrolled in the pathway may count up to six credit hours of Telecommunications and Networking graduate courses toward the elective BSEE requirements as well as toward the MS in Telecommunications and Networking degree. Only graduate courses with formal lectures can be counted for both degrees. The students are responsible for confirming the eligibility of each course with the undergraduate advisor.

Students interested in the pathway should consult with the undergraduate advisor on their eligibility to the pathway. The students should also meet the graduate advisor to learn about the graduate program and available courses before completing the application form and submitting it to the undergraduate advisor. Applicants will be notified by the department and the University Graduate School of the decision on their applications.

ELEG:MS - Master of Science in Electrical Engineering

Overview

Degree Offered
MS - Master of Science

Program Title
Electrical Engineering

The Master of Science (MS) program in Electrical Engineering at FIU presents an extensive and interdisciplinary curriculum, delving deeply into a range of specialized domains including Big Data, Robotics, Wireless Technologies, Power and Smart Grid, Digital Image Processing, Neuromorphic Computing, Signal Processing, Nanotechnology, Semiconductor Manufacturing, VLSI Design, Artificial Intelligence, and Machine Learning. Whether the goal is to advance in a professional journey, stay abreast of the latest developments in electrical engineering, or pursue further academic pursuits, this degree equips students for success.

For more information, visit the College of Engineering and Computing website.

Diploma Title
Master of Science in Electrical Engineering

Total Credits
30

Program Length in Years Based on Full-Time Enrollment
1

CIP Code
14.1001

Requirements

Simple Requirements

Admissions Requirements

Admission Requirements for the Master of Science (MS) in Electrical Engineering

The following are in addition to the University's graduate admission requirements:

(1) A student seeking admission into the program must have a bachelor's degree in engineering, physical sciences, computer science or mathematics from an accredited institution, or, in the case of foreign students, from an institution comparable or equivalent to US degree for further study at the graduate-level, or, a bachelor's degree in a related and a minimum of one year of work experience in the broad areas of electrical engineering and/or technology.

(2) An applicant must have a GPA score of at least 3.0/4.0 in either the overall undergraduate degree or the last 60 credit hours.

(3) Applicants who have not satisfied the above score may be evaluated for conditional admission.

(4) International applicants whose native language is not English are required to demonstrate English language proficiency in accordance with the University requirements, https://admissions.fiu.edu/international/graduate-school/english-language-proficiency/.

(5) Applicants from science areas other than electrical or computer engineering will be expected to complete sufficient background material at the undergraduate level prior to unconditional acceptance into the graduate program.

Admissions Requirements for the Combined Bachelor of Science (BS) in Electrical Engineering to MS in Electrical Engineering Accelerated Degree Pathway

To be considered for admission to the combined bachelor's/master's degree pathway, students must have completed at least 75 credits required for the bachelor's degree program at FIU, have earned at least a 3.2 GPA on both overall and upper-division courses, and meet the admissions criteria for the graduate degree program to which they are applying. Students need only apply once to the combined degree pathway; the application is submitted to Graduate Admissions typically before the student starts the last 30 credits of the bachelor's degree program.

Program Requirements

Thesis Option

A student must complete 24 semester credit hours of technical course work plus 6 semester credit hours of EEL6971 Research Master's Thesis. The candidate's Thesis committee shall approve an appropriate thesis topic.

The course requirements include a minimum of 12 hours of 6000 level course credit and a minimum of 9 hours at the 5000-6000 level in Electrical and Computer Engineering. One AI course is required for graduation. Three AI courses are provided as alternatives: CAI5855 – Introduction to Applied AI, CNT6154 – Adv Mach Learning in ECE, and EEL 6821 – Computer Vision.

Upon the successful completion of all course work, including thesis work, and after the determination by the student's thesis advisor that he or she has completed the objectives of the thesis research, the student must pass a final oral examination which is primarily a defense of the thesis research.

The courses are chosen by mutual agreement between the student and the thesis advisor.

Non-Thesis Option

Students may choose the non-thesis option for their master's degree. The degree requirements differ from the thesis option in one aspect. The student must either:

(1) Complete 27 credits of coursework approved by the student's advisor and successfully finish EEL6916 Graduate Project with at least a 'B'.

OR

(2) Complete 30 credits of coursework approved by the Graduate Program Director.

Students choosing the non-thesis option must take:

(1) Six semester credit hours at the 5000+ level in mathematics. The list of approved choices is below.

(2) Twelve semester credit hours in graduate-level Electrical and Computer Engineering approved courses from at least two areas of interest, at least six credit hours from each of these two areas of interest.

(3) The remaining electives can be chosen from 5000+ level graduate courses in Science, Technology, Engineering, and Mathematics (STEM) disciplines based upon student's approved plan of study determined by the student and their academic advisor based on student's career objectives.

(4) One AI course is required for graduation. Three AI courses are provided as alternatives: CAI5855 – Introduction to Applied AI, CNT6154 – Adv Mach Learning in ECE, and EEL 6821 – Computer Vision.

Non-Thesis Option

Type
Completion Requirement

Math Requirement in Electrical Engineering Major: 6 Credits

Earn at least 6 credits from the following:

- EEL5171 - Advanced Systems Theory
- EEE5543 - Random Signal Principles
- EEL6020 - Numerical Analysis of Electrical Devices
- STA5206 - Design Of Exper I

The above list may be changed or expanded by the Graduate Advisory Committee.

Master of Science in Electrical Engineering Areas of Interest

Type
Completion Requirement

Areas of Interest

Students must choose at least two areas of interest and complete at least six credit hours in each of the two required areas of interest. Students may choose any class from any area of interest as long as they fulfill the prerequisite(s) and corequisite(s).

Complete at least 2 of the following:

Digital Image Processing: 6 Credits

Earn at least 6 credits from the following:

- EEL5813 - Neural Networks
- EEL5820 - Digital Image Processing
- EEL6812 - Adv In Neural Nets
- EEL6821 - Computer Vision

OR

Energy Cybersecurity: 6 Credits

Earn at least 6 credits from the following:

- EEL5278 - Smart Grid Cyber Security and Intelligent Electronic Devices
- EEL5718 - Computer-Communication Network Engineering
- EEL6267 - Application of Intelligent Systems to Power System Operations
- EEL6787 - Network Security
- EEL6803 - Advanced Digital Forensics

OR

Power and Energy: 6 Credits

Earn at least 6 credits from the following:

- EEL5259 - Modeling and Analysis of Modern Distribution Grids
- EEL5260 - Power System Optimization
- EEL5270 - Electrical Transients in Power Systems
- EEL6254 - Power Systems Reliability

OR

RF and Wireless Systems: 6 Credits

Earn at least 6 credits from the following:

- TCN5155 - Wireless Communications with Multimedia Applications
- EEL5426 - RF Circuit Design
- EEL5427C - Electromagnetic Modeling of Radio Frequency (RF) Structures
- EEL5437 - Microwave Engineering
- EEL5467 - Antennas for Wireless Communication Systems
- EEL5482 - Fields and Waves Engineering
- EEL5500 - Digital Communication Systems I
- EEL5501 - Digital Communication Systems II
- EEE5557 - Principles of Modern Radar
- EEL6437C - Advanced Active Microwave Circuits
- EEL6439 - RF System Design for Wireless Communications

OR

Quantum Engineering, Semiconductors, and Chip Technology: 6 Credits

Earn at least 6 credits from the following:

- EEE6318 - Semiconductor Material and Device Characterization
- EEE6332 - Thin Film Engineering
- EEE6399C - Electronic Prop Mat
- EEE6429 - Advanced Quantum Computers
- EEE6397 - Semiconductor Device Theory
- EEE6395 - Superconductivity

OR

Nuclear Engineering and Instrumentation & Controls: 6 Credits

Earn at least 6 credits from the following:

- EEL6485 - Advanced Radiation Detection and Measurement in ECE
- ENU5006 - Fundamentals in Nuclear Engineering in ECE
- ENU6155 - Advanced Instrumentation and Controls I for Nuclear in ECE
- ENU6156 - Advanced Instrumentation and Controls II for Nuclear in ECE
- ENU6116 - Advanced Nuclear Reactor Simulators in ECE

OR

Computer Systems and VLSI: 6 Credits

Earn at least 6 credits from the following:

- EEL5725 - Hardware Description Languages (VHDL or Verilog)
- EEL5741 - Advanced Computing Architecture
- EEL6167 - VLSI Design
- EEL6726 - Advanced VLSI Design
- EEL6758 - Engineering Design of Microprocessor Based Operating Systems
- EEL6795 - Power Aware Computing
- EEL6894 - Real-Time Computing and Applications

OR

Machine Learning: 6 credits

Earn at least 6 credits from the following:

- EEL5813 - Neural Networks
- EEL6681 - Fuzzy Systems Design
- EEL6812 - Adv In Neural Nets
- EEL6825 - Pattern Recognition

OR

Artificial Intelligence and Big Data: 6 credits

Earn at least 6 credits from the following:

- CNT6144 - Advanced Analytics with Cloud Services in ECE
- CNT6148 - Advanced Big Data Analytics in ECE
- CNT6150 - Advanced Deep Learning in ECE
- CNT6152 - Advanced Data Visualization in ECE
- CNT6154 - Advanced Machine Learning in ECE
- CNT6156 - Advanced Python Programming in ECE
- CAI6869 - Advanced AI Security in ECE

OR

Robotics, Controls, and Autonomous Systems: 6 credits

Earn at least 6 credits from the following:

- EEL5669 - Autonomous Systems and Controls
- EEE6765 - Advanced Embedded Systems Design and Implementation for IoT Applications
- EEE6767 - Advanced Embedded Programming for IoT Sensing, Network, Control, and Applications
- EEL6821 - Computer Vision
- EEL5607 - Advanced Physics-Based Robot Simulation for ECE

OR

Network Security: 6 credits

Earn at least 6 credits from the following:

- TCN5155 - Wireless Communications with Multimedia Applications
- TCN5271 - Advanced IoT Communications and Networking
- CNT5415 - Practical Applied Security
- EEL5807 - Advanced Ethical Hacking
- EEL6787 - Network Security
- EEL6803 - Advanced Digital Forensics
- EEL6805 - Advanced Malware Reverse Engineering

Additional Program Information

Any course taken without the proper prerequisites and corequisites will be dropped automatically before the end of the term, resulting in a grade of “DR” or “DF”.

Students may select elective courses from other Departments in College of Engineering and Computing (up to 9 credit hours) with the approval of the Graduate Program Director or the thesis advisor. No more than six (6) credit hours of Special Topics can count toward degree requirement.

Students, who are dismissed from the University due to low grades, may appeal to the Dean for reinstatement. A second dismissal results in no possibility of reinstatement. Any exception to the program requires the department’s approval.

Graduation Requirements

The degree will be conferred when the following conditions have been met:

(1) Recommendation of the advisor and faculty of the Department.

(2) Certification by the Dean of the College that all requirements of the degree being sought have been completed including a minimum of 30 credits.

(3) A GPA of at least 3.0 has been earned for non-elective courses required by the program.

(4) Met the undergraduate deficiencies, if any existed in the student’s graduate program, as additional courses toward the degree.

(5) Completed the required semester hours of graduate- level credit (not more than 6 graduate semester hours with a grade of “B” or higher can be transferred from other accredited institutions).

(6) Students must maintain an overall GPA of 3.0. No grade below “C” will be accepted in a graduate program. In the event that a student is placed on probationary status, the student must obtain a directed program from their advisor and approved by the Dean prior to continuing further course work toward the degree. The student must satisfy the directed course of action within the prescribed time limit; otherwise the student will be academically dismissed.

(7) Complied with all University policies and regulations.

Major Requirements

There are no majors associated with this program.

Track, Specialization, Concentration, Area of Emphasis, or Other Curricular Offering Requirements

See the list of concentration areas to choose from for selection of the courses in the Program Requirements section above for the MS Degree in Electrical Engineering.

Other Curricular Offering: Combined BS in Electrical Engineering to MS in Electrical Engineering Accelerated Degree Pathway

This five-year pathway seamlessly combines a baccalaureate degree in Electrical Engineering with the Master's in Electrical Engineering. A student admitted to the combined degree pathway will be considered to have undergraduate status until the student applies for graduation from their bachelor's degree program. Upon conferral of the bachelor's degree, the student will be granted graduate status and be eligible for graduate assistantships. Students enrolled in the pathway may count up to 9 hours of graduate-level courses (i.e., 5000 level or higher) as credits for both the undergraduate and graduate degree programs. For each of the courses counted as credits for both BS and MS degree, a minimum grade of 'B' is required. Students enrolled in the pathway are encouraged to seek employment with a department faculty member to work as a student assistant on a sponsored research project.

ELEMED:BS - Bachelor of Science in Elementary Education

Overview

Degree Offered
BS - Bachelor of Science

Program Title
Elementary Education

The Bachelor of Science (BS) in Elementary Education degree prepares students to work as teachers in the K-6 education setting. Students in this program may choose from a variety of pathways, including options for certification and endorsements, internships, or options for other educator preparation. Graduates of the program work in elementary school classrooms or other K-6 settings. The program seeks motivated and creative students who wish to make an impactful difference in children's lives and to become leaders in their communities.

For more information, visit the College of Arts, Sciences, and Education website.

Requirements

Simple Requirements

Admissions Requirements

Admissions Requirements for the Bachelor of Science (BS) in Elementary Education (major: Grades K-6 with ESOL and Reading Endorsements)

(1) A minimum lower-division GPA of 2.5 or better on a 4.0 scale

(2) Either 60 credit hours of lower division coursework or an AA degree from an accredited institution

All stated admission requirements are to be considered minimum. A student who meets these minimum requirements is not automatically assured admission. Program admission requirements are subject to change. It is the responsibility of the student to assure that he/she has met the requirements.

Admissions Requirements for the BS in Elementary Education (major: Career Development)

To be admitted into the Elementary Education: Career Development Major students must meet elementary education lower division program course prerequisites, have 60 semester hours or an A.A. degree from a FL public institution, and meet the general requirements of Florida International University.

Program Requirements

Academic Progression Requirements

Students admitted to the university are admitted directly to their chosen major. Students are expected to make satisfactory progress based on critical indicators, such as GPA in specific courses or credits earned. In cases where students are not making satisfactory progress, a change of major may be required. Advisors work to redirect students to more appropriate majors when critical indicators are not met.

Lower Division Preperation

Type

Prerequisite

Common Prerequisite Courses

For a list of all state-approved common prerequisites, including alternatives, visit https://cpm.flvc.org.

Complete ALL of the following Courses:

- EDF1005 - Introduction to Education

EDF1005 Intro To Education requires field experience of 15 clock hours outside of class time.

Major Requirements

BS in Elementary Education (major: Grades K-6 with ESOL and Reading Endorsements)

Early Clinical Experiences (Field Hours)

Many courses offered by the Department of Teaching and Learning require completion of specified number of early clinical experiences (field hours) in approved K-12 settings. Course descriptions identify those courses that include in-school classroom experiences. These experiences offer guided observation and participation under the supervision of a classroom teacher and a faculty member from the School of Education and Human Development.

Fingerprint Requirements

In accordance with the Jessica Lunsford Act, all students completing field and clinical experiences in Florida must undergo fingerprinting and a background check at students' own expense. Placement requests in approved schools require the district's clearance verification. Students will not be allowed to enter a school campus without the necessary clearance.

School Placements

All early clinical (field) experiences and the Student Teaching internship must be completed at schools with which Florida International University has established affiliation agreements, including but not limited to Miami-Dade County Public Schools and Broward County Public Schools. All placements are coordinated through the FIU Office of Clinical Experiences. Students may not arrange placements independently.

Student Teaching

Student Teaching is the full-time, culminating clinical experience for candidates in Initial Teacher Preparation Programs. This internship allows candidates to apply and demonstrate the professional knowledge and skills acquired throughout their degree program. Under the guidance of a Cooperating Teacher or Mentor Teacher and a University Supervisor, candidates engage in sustained practical teaching over a full academic semester.

Permission to student teach is contingent upon successful completion of all required coursework and Florida Teacher Certification Examinations, as specified in the program of study. Placements are available during the fall and spring semesters of the student's senior year, but not in the summer.

Students in Initial Teacher Preparation Programs must demonstrate mastery of General Knowledge by passing all four sections of the FTCE General Knowledge Test or by achieving qualifying scores, as established by the State of Florida, on approved alternative assessments (SAT, ACT, GRE, or CLT). Students should contact their academic advisor to inquire about eligibility for a General Knowledge (GK) waiver.

Additional information about clinical experiences (field hours) and the Student Teaching application process, including the online application, is available on the FIU Office of Clinical Experiences website. Students are responsible for completing and submitting the online application by the specified semester deadline.

For questions, contact the FIU Office of Clinical Experiences at 305-348-2082, email ClinicalExperiences@fiu.edu, or visit the Ziff Education Building (ZEB), Room 130.

Grades K-6 with ESOL and Reading Endorsements Major

Type

Completion Requirement

Upper Division: 60 Credits

Fulfill ALL of the following requirements:

Minimum acceptable grade is "C".

Complete ALL of the following Courses:

- EDG3321 - Managing Teaching Environments: Instructional Decisions and Classroom Management
- EDP3004 - Educational Psychology
- EEX3070 - Teaching Students with Exceptionalities in Inclusive Settings
- RED3313 - Language and Literacy Development
- ARE3313 - Content and Methods of Teaching Elementary Art
- RED4150 - Content and Methods of Teaching Beginning Literacy
- SCE4310 - Content and Methods of Teaching Elementary Science
- TSL3080 - ESOL Principles and Practices I
- MAE4310 - Content and Methods of Teaching Elementary Math
- RED4311 - Content and Methods of Teaching Intermediate and Secondary Literacy
- SCE4311 - Advanced Content and Methods of Teaching Elementary Science
- MAE4312 - Advanced Content and Methods of Teaching Elementary Mathematics
- SSE4312 - Content and Methods of Teaching Elementary Social Studies
- RED4110 - Content and Methods of Teaching Literacy in Schools
- TSL4081 - ESOL Issues: Principles and Practices II
- SSE4352 - Pedagogies and Content of Elementary Social Studies
- EDG3944 - Practicum in Teacher Preparation
- EDE4943 - Student Teaching Internship

ARE3313, TSL3080, RED4311, RED4110, EDG3944 Practicum in Teacher Prep, and TSL4081 have a co-requisite of clinical experience (field hours) distributed throughout the term. EDE4943 Student Teaching Student Teaching Internship is the full-time, culminating clinical experience. Other courses may also have field requirements.

These courses must be taken in the following sequence:
RED3313 Lang & Lit Dev, RED4150 Teach Begin Read, RED4311 Intermediate Sec Literac, RED4110 Teach Lit in School.

RED4110 Teach Lit in School meets in selected schools.

MAE4310 Teach Elem Math is a prerequisite for MAE4312 Adv Elem Math Methods.

SCE4310 Teach Elem Science is a prerequisite for SCE4311 Adv Elem Science Methods.

SSE4312 Teach Elem Soc Stud is a prerequisite for SSE4352 Ped & Content of Elem SS.

TSL3080 Esol Prin/Prac I is a prerequisite for TSL4081 Esol Issues II.

All courses must be taken prior to student teaching EDE4936.

Additional Comments:

Graduation Requirements

In the School of Education and Human Development, all undergraduate students in initial certification programs are required to meet the following before they can graduate from their respective teacher education programs.

1. An overall GPA of 2.5.

2. Successful demonstration of all the Florida Educator Accomplished Practices (FEAPS)- pre-professional level.

3. Passing scores on the three tests that make up the Florida Teacher Certification Exam: General Knowledge, Subject Area, and Professional Knowledge.

BS in Elementary Education (major: Career Development)

The Elementary Education: Career Development major prepares students for employment in professions that depend on an education background but that do not require teacher certification. Students aspiring to work with adults, government agencies and policy making, business, private school settings, or with nonprofit organizations may consider this major for their professional preparation. The new major offers several courses with teacher preparation elements, including field school placements with the purpose of including a broad elementary education professional development. The current Teacher Certification Major (program) progresses much deeper and extensive in Teacher Education, including more advanced field school internship and practicum experiences.

Clinical Experiences

Early Clinical Experiences (Field Hours)

Many courses offered by the Department of Teaching and Learning require completion of a specified number of early clinical experiences (field hours) in approved K–12 school settings. Course descriptions identify those courses that include in-school classroom experiences. These experiences offer guided observation and participation under the supervision of a classroom teacher and a faculty member from the School of Education and Human Development.

Fingerprinting Requirements

In accordance with the Jessica Lunsford Act, all students completing field and clinical experiences in Florida must undergo fingerprinting and a background check at students' own expense. Placement requests in approved schools require the district's clearance verification. Students will not be allowed to enter a school campus without the necessary clearance.

School Placements

All early clinical experiences (field hours) and the Student Teaching internship must be completed at schools with which Florida International University has established affiliation agreements, including but not limited to Miami-Dade County Public Schools and Broward County Public Schools. All placements are coordinated through the FIU Office of Clinical Experiences. Students may not arrange placements independently.

For questions, contact the FIU Office of Clinical Experiences at 305-348-2082, email ClinicalExperiences@fiu.edu, or visit the Ziff Education Building (ZEB), Room 130.

Career Development Major

Type

Completion Requirement

Upper Division Program: 60 Credits

The Elementary Education: Career Development Major requires students to take upper division credit hours in professional, education, and foundations courses.

· Minimum acceptable grade is "C" in non-elective courses

· All students must meet fingerprinting clearance requirements from the Field Experience Office

Fulfill ALL of the following requirements:

CORE A (required): 18 Credits

Complete ALL of the following Courses:

- EDP3004 - Educational Psychology
- EDG3321 - Managing Teaching Environments: Instructional Decisions and Classroom Management
- RED3313 - Language and Literacy Development
- IDS3333 - Diversity of Meaning: Language, Culture, and Gender in Society
- SSE4380 - Developing a Global Perspective
- EDF4604 - Cultural and Social Foundations of Education

AND

CORE B (required): 18 Credits

Complete ALL of the following Courses:

- EEX3070 - Teaching Students with Exceptionalities in Inclusive Settings
- MAE4310 - Content and Methods of Teaching Elementary Math
- RED4150 - Content and Methods of Teaching Beginning Literacy
- SCE4310 - Content and Methods of Teaching Elementary Science
- SSE4312 - Content and Methods of Teaching Elementary Social Studies
- TSL3080 - ESOL Principles and Practices I

AND

CORE C (required): Students must complete at least 12 Credits

Earn at least 12 credits from the following:

- RED4311 - Content and Methods of Teaching Intermediate and Secondary Literacy

- RED4110 - Content and Methods of Teaching Literacy in Schools
- SCE4311 - Advanced Content and Methods of Teaching Elementary Science
- MAE4312 - Advanced Content and Methods of Teaching Elementary Mathematics
- SSE4352 - Pedagogies and Content of Elementary Social Studies
- TSL4081 - ESOL Issues: Principles and Practices II
- EEX3012 - Educational Needs of Students with Exceptionalities
- EDG4734 - Educational and Cultural Preparation for International Teaching
- EDG4940 - International Teaching Internship
- EDE4943 - Student Teaching Internship

*EDE4943 Student Teaching Requires Advisor Approval

AND

CORE D (Practicum required): 3 Credits

Enroll in the following Courses:

- EDG3944 - Practicum in Teacher Preparation

ARE3313 Teach Elem Art, EDG3944, EEX3012 Ed Need Stud Except, EEX3066 Instr Prac Ese I, RED4311, TSL3080 and TSL4081 have a corequisite of clinical experiences (field hours) distributed throughout the term. Other courses may also have field requirements.

These courses must be taken in the following sequence:
RED3313 Lang & Lit Dev, RED4150 Teach Begin Read.

TSL3080 Esol Prin/Prac I is not offered in summer terms.

ENGED:BA - Bachelor of Arts in English Education

Overview

Degree Offered
BA - Bachelor of Arts

Program Title
English Education

The Bachelor of Arts (BA) in English Education combines the rigorous requirements of the BA in English program with content-specific pedagogy to prepare students interested in teaching English at the secondary level. Graduates of this program go on to careers in teaching or education administration.

For more information, visit the College of Arts, Sciences, and Education website.

To explore more about this program, visit the website below:
Program Website

Academic Group
College of Arts, Sciences, and Education

Diploma Title
Bachelor of Arts in English Education

Total Credits
120

Program Length in Years Based on Full-Time Enrollment
4

CIP Code
13.1305

Requirements

Simple Requirements

Admissions Requirements

Admission requirements are those established by FIU for First Time in College (FTIC) and transfer students. Additional admission requirements for all education programs at FIU:

To qualify for admission to the program, undergraduate candidates must have met all the lower division requirements including: 60 credit hours of lower-division courses, all general education requirements, lower division GPA of 2.5 or higher, and achieve the competencies of the FTCE General Knowledge Exam (GK).

All students must pass the GK Exam by the time they reach 72 credit hours in their program of study. All stated admission requirements are to be considered minimum. A student who meets these minimum requirements is not automatically assured admission. Program admission requirements are subject to change. It is the responsibility of the student to assure that they have met the requirements.

Program Requirements

Academic Progression Requirements

Students admitted to the university are admitted directly to their chosen major. Students are expected to make satisfactory progress based on critical indicators, such as GPA in specific courses or credits earned. In cases where students are not making satisfactory progress, a change of major may be required. Advisors work to redirect students to more appropriate majors when critical indicators are not met.

Lower Division Preparation

Type

Prerequisite

Common Prerequisites Courses

For a list of all state-approved common prerequisites, including alternatives, visit https://cpm.flvc.org.

Complete ALL of the following Courses:

- EDF1005 - Introduction to Education
- SPC2608 - Public Speaking
- ENC1101 - Writing and Rhetoric I
- ENC1102 - Writing and Rhetoric II
- LIT1000 - Introduction to Literature

Recommended Courses

Complete ANY of the following Courses:

- ENG2012 - Approaches to Literature
- DEP2000 - Human Growth and Development: Introductory Developmental Psychology
- ENC3213 - Professional and Technical Writing

Additional Degree Requirements

Type

Completion Requirement

Required Courses

In addition to the common prerequisites, students must take the following courses:

Complete ALL of the following Courses:

- ENG4043 - Contemporary Literary Theory and Criticism
- ENC3501 - Teaching Writing in Secondary Contexts

· Multicultural Literature (African American, Jewish literature of exile, etc.) (3 credits)

· Any upper division writing courses (ENC prefix) (3 credits)

· Two courses from the following early historical periods:

- American Literature prior to 1900 (3 credits)

- British Literature prior to 1660 (3 credits)

· Any two additional three-hour upper division Literature courses (6 credits)

**(ENG4043 Contemp Lit Theory Criticism or another designated theory course)*

Early Clinical Experiences (Field Hours)
Many courses offered by the Department of Teaching and Learning require completion of clinical experiences (field hours) in approved K–12 school settings under the supervision of a classroom teacher and FIU faculty member. See course descriptions for specific details. In accordance with the Jessica Lunsford Act, students completing clinical experiences must undergo fingerprinting and a background check at the students' own expense. Students will not be allowed to enter a school campus without the necessary clearance. All clinical experiences and the Student Teaching internship must be completed at schools affiliated with FIU, including but not limited to Miami-Dade County Public Schools and Broward County Public Schools. Placements are coordinated through the FIU Office of Clinical Experiences. Students may not arrange placements independently.

Student Teaching
Student Teaching is the semester-long, full-time, culminating clinical experience for candidates in Initial Teacher Preparation Programs. Placements are made in the fall and spring semesters and are contingent upon successful completion of all required coursework and Florida Teacher Certification Examinations. More information about clinical experiences (field hours) and the Student Teaching application process, including deadlines and the online application, is available on the Clinical Experiences | FIU College of Arts, Sciences & Education website. Students must pass all four sections of the FTCE General Knowledge Test to be eligible to apply. The test may be waived if the student achieves qualifying scores, as set by the state, on approved alternative assessments (SAT, ACT, GRE, or CLT). Students should contact their academic advisor to verify their eligibility for a waiver.

For questions, contact the FIU Office of Clinical Experiences at 305-348-2082, email ClinicalExperiences@fiu.edu, or visit the Ziff Education Building (ZEB), Room 130.

Admissions Requirements

Admissions Requirements for the Bachelor of Arts (BA) in English

See general university admissions requirements at FIU Admissions.

Admissions Requirements for the Combined BA in English to Master of Arts (MA) in Linguistics Accelerated Degree Pathway

To be considered for admission to the combined BA/MA accelerated degree pathway, students must have completed at least 75 credits in the bachelor's degree program at FIU and meet the admissions criteria for the graduate degree program to which they are applying. Students need only apply once to the accelerated degree pathway; the application is submitted to Graduate Admissions typically before the student starts the last 30 credits of the bachelor's degree program. A student admitted to the accelerated degree pathway will be considered to have undergraduate status until the student applies for graduation from his/her bachelor's degree program. Upon conferral of the bachelor's degree, the student will be granted graduate status and be eligible for graduate assistantships. Only 5000-level or higher courses, and no more than the number of credits specified by the program catalog, may be applied toward both degrees.

Admissions Requirements

-- Enrollment in undergraduate program in English, Spanish, French, or Portuguese at FIU.

-- Must have completed 75 credits.

-- Must have completed LIN 3013/LIN 3010 General Linguistics, LIN 4680 Modern English Grammar, FRE 3780 French Phonetics, or SPN 3733 Introduction to Spanish Linguistics with a grade of “A”.

-- Current GPA of 3.2 or higher.

-- Two letters of faculty recommendation.

-- A 2-4 page statement of purpose, explaining academic plans and goals.

Admissions Requirements for the Combined BA in English to Master of Arts (MA) in English Accelerated Degree Pathway

To be accepted into the BA/MA Accelerated Degree Pathway program, students must submit an MA program application by either October 1 (to begin in the Spring semester) or March 1 (to begin in the Fall semester) in their junior year.

A complete application requires:

--Current enrollment in BA program in English at FIU

--Completion of 75 credits of undergraduate coursework

--GPA of 3.2 or above

--Two letters of recommendation

--Statement of purpose describing the applicant’s academic preparation and research interests.

All components of the application must be complete by the application deadline (October 1 or March 1). Students should consult the graduate catalog and the English Department website for a more comprehensive discussion of admission requirements. If the application is approved, students will be admitted into the combined BA/MA degree program once they have successfully completed 90 credits in their undergraduate degree program. Students in the combined BA/MA degree program must apply for their undergraduate degree as soon as possible during the semester the degree requirements will be satisfied.

The program gives students the opportunity to take up to 12 credits of graduate coursework in their senior year that will count toward both the BA and the MA. Students will take up to four 5000-level graduate courses once admitted to the in their senior year and follow the regular MA curriculum after they earn their BA degree.

Program Requirements

Academic Progression Requirements

Students admitted to the university are admitted directly to their chosen major. Students are expected to make satisfactory progress based on critical indicators, such as GPA in specific courses or credits earned. In cases where students are not making satisfactory progress, a change of major may be required. Advisors work to redirect students to more appropriate majors when critical indicators are not met.

Three additional upper-division courses with an ENC prefix for a total of 9 credits

Other Curricular Offering: Bachelor of Arts (BA) in English to Master of Arts (MA) in Linguistics Accelerated Degree Pathway

Type

Completion Requirement

Recommended Courses for Students Pursuing the BA in English

The following graduate courses are recommended to BA students. In order to complete the degree requirements, students may double-count up to 12 graduate credits of coursework toward the BA and MA degrees:

Complete ANY of the following Courses:

- LIN5018 - Introduction to Linguistics
- LIN5206 - Phonetics
- LIN5574 - Languages of the World
- LIN6510 - Syntax I
- LIN6602 - Language Contact
- LIN5601 - Sociolinguistics
- LIN5825 - Pragmatics (Inactive)
- LIN5934 - Special Topics in Linguistics

Notes: LIN5018 Intro Linguistics is an MA core requirement and is a prerequisite to all other course requirements.

LIN5206 Phonetics and LIN5574 Languages Of World fulfill the "structure course" requirement of the MA

LIN6510 Syntax I fulfills one of the core requirements of the MA

Recommended Courses for Students Pursuing the BA in Spanish

The following graduate courses are recommended to BA students. In order to complete the degree requirements, students may double-count up to 12 graduate credits of coursework toward the BA and MA degrees:

Complete ANY of the following Courses:

- LIN5018 - Introduction to Linguistics
- SPN5705 - The Structure of Spanish (Inactive)
- SPN5845 - History Of The Lang
- LIN5604 - Spanish in the United States (Inactive)
- SPN5736 - Spanish as a Heritage Language: Acquisition and Development
- LIN5603 - Language Planning: Linguistic Minority Issues (Inactive)
- LIN5601 - Sociolinguistics
- LIN5720 - Second Language Acquisition (Inactive)
- LIN5825 - Pragmatics (Inactive)
- LIN5934 - Special Topics in Linguistics

Note: LIN5018 Intro Linguistics is an MA core requirement and is a prerequisite to all other course requirements.

Recommended Courses for Students Pursuing the Major in French

The following graduate courses are recommended to BA students. In order to complete the degree requirements, students may double-count up to 12 graduate credits of coursework toward the BA and MA degrees:

Complete ANY of the following Courses:

- LIN5018 - Introduction to Linguistics
- FRE5855 - Structure of Modern French (Inactive)
- FRE5845 - History of the Language I
- FRE5846 - History of the Language II (Inactive)
- FRE5508 - La Francophonie (Inactive)
- FRE5735 - Special Topics in Linguistics (Inactive)
- HAI5235 - Haitian Creole Seminar
- LIN5601 - Sociolinguistics
- LIN5825 - Pragmatics (Inactive)
- LIN5720 - Second Language Acquisition (Inactive)
- LIN5934 - Special Topics in Linguistics

Note: LIN5018 Intro Linguistics is an MA core requirement and is a prerequisite to all other course requirements.

Recommended Courses for Students Pursuing the Major in Portuguese

The following graduate courses are recommended to BA students. In order to complete the degree requirements, students may double-count up to 12 graduate credits of coursework toward the BA and MA degrees:

Complete ANY of the following Courses:

- LIN5018 - Introduction to Linguistics
- LIN5601 - Sociolinguistics
- LIN5825 - Pragmatics (Inactive)
- LIN5720 - Second Language Acquisition (Inactive)
- LIN5934 - Special Topics in Linguistics

Note: LIN5018 Intro Linguistics is an MA core requirement and is a prerequisite to all other course requirements.

MA Degree Requirements: 36 credit hours

The BA will be awarded as soon as all BA requirements of the designated undergraduate program are completed. The MA will be awarded after all MA requirements of the Linguistics Program and the BA requirements are completed.

Fulfill ALL of the following requirements:

Required Courses Part 1

Earn a minimum grade of B in the following:

- LIN5018 - Introduction to Linguistics
- LIN5206 - Phonetics
- LIN6323 - Phonology
- LIN6510 - Syntax I
- LIN6805 - Semantics

AND

Required Courses Part 2

Students also must complete one course about the structure of a non-Indo-European language:

Complete ALL of the following Courses:

- LIN5574 - Languages of the World

AND

Electives

Students must complete 5 LIN-prefixed graduate courses (or 6, if LIN 5018 has been waived)

AND

Master's Research Project

Students must complete a Master's Research Project

Other Curricular Offering: Bachelor of Arts (BA) in English to Master of Arts (MA) in English Accelerated Degree Pathway

Type

Completion Requirement

Program Requirements

The BA/MA in English Accelerated Degree Pathway is for highly-qualified students in the Literature or Writing and Rhetoric Tracks who want to complete the BA and MA degrees in 5 years rather than 6.

Fulfill ALL of the following requirements:

Undergraduate Course of Study

A typical course of study is as follows:

Undergraduate Junior Year - Apply to the program (October1/March 1 deadline)

Undergraduate Senior Year—12 UG credits/12 Graduate Credits

First Semester (Fall or Spring)– take 12 credits, including up to two 5000-level courses

Second Semester (Fall or Spring)– take 12 credits, including up to two 5000 level courses

Earn at least 12 credits

AND

Graduate Course of Study

Graduate Program—18 or 24 credits

First Semester (Fall or Spring)– take 9 graduate credits (5000-level or higher)

Second Semester (Fall or Spring) – take 9 graduate credits (5000-level or higher)

Requirements

Students in the combined BA/MA program in English must complete all other requirements for the MA degree in English (please consult the graduate catalog and the English Department's graduate program manual).

Earn at least 24 credits

AND

Graduate Thesis —6 credits

Final Semester (Fall, Spring or Summer): Take 6 graduate thesis credits and complete and defend the thesis.

Earn at least 6 credits

ENGL:MA - Master of Arts in English

Overview

Degree Offered
MA - Master of Arts

Program Title
English

The Master of Arts (MA) degree in English offers students an advanced education in the study of literature and literary criticism or writing and rhetoric. Students choosing the literature track develop their knowledge of multiple "English Literatures" (particularly North American, British, and Caribbean) across media, employing diverse theoretical and critical approaches. The writing and rhetoric track engages students' diverse linguistic and cultural backgrounds, builds on their 21st-century literacies, and supports them as they learn to communicate more effectively in university, community, K-12, and professional contexts. Both tracks prepare graduates for PhD study, as well as for careers in teaching, professional communication, government, and social advocacy.

For more information, visit the College of Arts, Sciences, and Education website.

Requirements

Simple Requirements

Admissions Requirements

To be admitted into the Master of Arts in English program, a student must meet the university's graduate admission requirements and have:

(1). A minimum 3.0 undergraduate grade point average.

(2). International graduate student applicants whose native language is not English are required to submit a score for the Test of English as a Foreign Language (TOEFL) or for the International English Language Testing System (IELTS). A total score of 80 on the iBT TOEFL or 6.5 overall on the IELTS is required.

(3). Applicant Statement /Letter of Intent that, in no more than 1000 words, describes the relevant academic, personal, and/or professional experiences compelling you to pursue advanced study in English. If you were not an English major in college, please take care to describe your qualifications for advanced study in English.

(4). Two letters of recommendation from undergraduate or graduate literature and/or writing and rhetoric professors.

(5). Minimum 10-page writing sample demonstrating your advanced skills in literary or rhetorical research and analysis.

(6). Optional: Statement of purpose indicating a desire to be considered for a teaching assistantship.

Admissions to Combined Bachelor of Arts (BA) in English to Master of Arts (MA) in English Accelerated Degree Pathway

Students are eligible to apply once they have completed 75 undergraduate credits with a GPA of 3.0 or higher.

To be accepted into the combined BA/MA accelerated degree pathway, students must submit an MA program application by either October 1 (to begin in the Spring semester) or March 1 (to begin in the Fall semester) in their junior year.

A complete application requires:

Current enrollment in BA program in English at FIU

Completion of 75 credits of undergraduate coursework

GPA of 3.0 or above

Two letters of recommendation

Statement of purpose describing the applicant's academic preparation and research interests.

All components of the application must be complete by the application deadline (October 1 or March 1). Students should consult the graduate catalog and the English Department website for a more comprehensive discussion of admission requirements. If the application is approved, students will be admitted into the combined BA/MA accelerated degree pathway once they have successfully completed 90 credits in their undergraduate degree program. Students in the combined BA/MA degree pathway must apply for their undergraduate degree as soon as possible during the semester the degree requirements will be satisfied.

The pathway gives students the opportunity to take up to 12 credits of graduate coursework (5000 level courses) in their senior year that will count toward both the BA and the MA degrees. Following full admission to the graduate program, students will complete and follow the regular MA curriculum.

Program Requirements

The MA in English degree consists of 30 credit hours of course work at the graduate level (course numbers 5000 or above) and a thesis (6 credits). A maximum of six graduate credits may be transferred into the program subject to the approval of the graduate committee.

Common Degree Requirements: 12 credits

Fulfill ALL of the following requirements:

Required Courses: 6 credits

Complete ALL of the following Courses:

- ENG5048 - Literary Theory
- ENC5703 - Rhetorical Traditions

AND

Thesis: 6 credits

Complete ALL of the following Courses:

- LIT6970 - Master's Thesis

The student must complete a research thesis. The topic must be approved by the faculty member who will supervise the research, and then approved by the Thesis Committee. The thesis will be accepted only after being read and approved by a Thesis Committee. An oral defense is required before the Thesis Committee.

AND

Electives Outside the English Department: 0-3 credits

Students have the option to take up to 3 elective credits outside of the department with approval from the Associate Director of the MA in English program.

Major Requirements

There are no majors associated with this program.

Track, Specialization, Concentration, Area of Emphasis, or Other Curricular Offering Requirements

Students in the MA in English program may choose between two tracks, Literature or Writing and Rhetoric. The track-specific requirements are as follows:

Literature Track: 24 credits

Type
Completion Requirement

Electives

Earn at least 24 credits
Students are encouraged to consult with a faculty advisor or with the Graduate Program Director.

Literature Electives

Earn at least 12 credits
Students are encouraged to consult with a faculty advisor or with the Graduate Program Director.

Writing and Rhetoric Track: 24 credits

Type
Completion Requirement

Electives: 9-12 credits

Complete at least 12 of the following courses:

- ENC5235 - Grant Writing
- ENC5432 - Document and Visual Design for Professional Writers
- ENC5494 - Writing Center Theory and Practice
- ENC5752 - Women's Rhetorics
- ENC5935 - Special Topics in Composition
- ENC6261 - Theories of Professional and Technical Writing
- ENC6702 - Composition Theory and Practice
- ENC6734 - Multilingual Matters: Theories of Multilingual Writing
- ENC6736 - Writing Across Conventions
- ENG6935 - Special Topics in College Pedagogy
- ENG6937 - Teaching College Composition
- ENG6942 - College Composition Practicum

English Department Electives: 9-12 credits

Students may take up to 6 elective credits within the English Department: AML-American Literature; CRW-Creative Writing; ENC-Writing and Rhetoric; ENG-English-General; ENL-English Literature; LIN-Linguistics; LIT-Literature.

Bachelor of Arts (BA) in English to Master of Arts (MA) in English Accelerated Degree Pathway: 36 credit hours

Type

Completion Requirement

Required Courses

The combined BA/MA in English Degree Pathway is for highly-qualified students in the Literature or Writing and Rhetoric Tracks who want to complete the BA and MA degrees in 5 years rather than 6.

Fulfill ALL of the following requirements:

Undergraduate Years

A typical course of study is as follows:

Undergraduate Junior Year: apply to the program (October 1/March 1 deadline)

Undergraduate Senior Year—12 UG credits/12 Graduate Credits

First Semester (Fall or Spring)– take 12 credits, including up to two 5000-level courses

Second Semester (Fall or Spring)– take 12 credits, including up to two 5000 level courses

Earn at least 12 credits

AND

Graduate Program

Graduate Program—18 or 24 credits

First Semester (Fall or Spring)– take 9 graduate credits (5000-level or higher)

Second Semester (Fall or Spring) – take 9 graduate credits (5000-level or higher)

Earn at least 18 credits

AND

Thesis

Graduate Thesis —6 credits

Final Semester (Fall, Spring or Summer)

Take 6 graduate thesis credits and complete and defend the thesis

Earn at least 6 credits

ENTRU:CFI - Undergraduate Certificate in Entrepreneurship

Overview

Degree Offered
ACRT - Academic Certificate

Program Title
Certificate in Entrepreneurship

The Undergraduate Certificate in Entrepreneurship is designed to offer degree-seeking students the opportunity to complement their major field of study with an additional concentration in entrepreneurship. With this background, in addition to a major field, students can gain the knowledge and skills needed to assess new enterprise opportunities, obtain financial resources, market and start new ventures, and manage entrepreneurial ventures for growth and profitability.

For more information, visit the College of Business website.

This certificate is open to degree-seeking students only.

Prerequisites

Contact advisor for information about any prerequisites.

Program Requirements

Program Credit Hours: 18

Type
Completion Requirement

Required Courses

FIU students wishing to earn a certificate in entrepreneurship must apply for the certificate program and complete six of the following courses (18 credit-hours) with a grade of “C” or higher in each course.

Complete ALL of the following Courses:

- MAN3025 - Organization and Management
  OR MAN3022 - Introduction to Management
- ENT4113 - Entrepreneurship: New Business Development
- GEB4110 - Writing the Business Plan
- MAN4802 - Small Business Management

Students may take MAN3025 Organization & Mgmt, MAN3022 Intro to Management, or an equivalent, such as HFT3202 Fund Mgmt In Hspty.

Elective Courses

Complete at least 2 of the following courses:

- ENT4704 - International Entrepreneurship
- FIN4702 - Entrepreneurial Finance
- GEB4153 - Social Entrepreneurship
- MAN4054 - Managing Innovation
- MAN4301 - Human Resource Management
- MAN4864 - Family Business
- MAR4025 - Marketing for Entrepreneurs
- MAR4400 - Professional Selling
- HFT3292C - Entrepreneurship in the Hospitality and Tourism Industry
- AMH4373 - Entrepreneurs in U.S.
- AMH4375 - Technology and American Society

Major Requirements

There are no majors associated with this program.

Track, Specialization, Concentration, Area of Emphasis, or Other Curricular Offering Requirements

There are no tracks, specializations, concentrations, areas of emphasis, or other curricular offerings associated with this program.

ENVEG:BS - Bachelor of Science in Environmental Engineering

Overview

Degree Offered
BS - Bachelor of Science

Program Title
Environmental Engineering

Environmental engineers are the technical professionals who identify and design solutions for environmental problems affecting health issues and the quality of the air, water, and land. The impact of environmental problems on the quality of life has significantly expanded the job opportunities in environmental engineering, placing it among the fastest growing professional fields. The Department of Civil and Environmental Engineering at FIU is the prime resource for environmental engineering education, training, research, and technology development in Florida. Our program is designed to provide students with a comprehensive foundation of knowledge, which is necessary to produce the best and most cost-effective engineering solutions to local and global environmental problems. Our Bachelor of Science (BS) in Environmental Engineering program, accredited by ABET (Accreditation Board for Engineering and Technology) offers a thorough education in fundamental core subjects across various subdisciplines of Environmental Engineering. These include biology, geology, chemistry, ecology, atmospheric sciences, geoenvironmental engineering, urban planning, water resources engineering, pollution prevention, and waste management. The curriculum is designed to meet the State of Florida's articulation policy and to equip graduates for professional engineering licensure.

For more information, visit the College of Engineering and Computing website.

Admissions Requirements

Admissions Requirements for the Bachelor of Science (BS) in Environmental Engineering

See general university admissions requirements at admissions.fiu.edu.

Admissions Requirements for the Combined BS in Environmental Engineering to Master of Science (MS) in Environmental Engineering Accelerated Degree Pathway

Students who pursue a BS degree in Environmental Engineering and are in their senior year and have at least a 3.3 GPA on both overall and upper division courses may apply to the department to enroll in the combined BS/MS pathway in Environmental Engineering upon recommendation from three CEE faculty members. To be considered for admission to the combined bachelor's/masters degree pathway in Environmental Engineering, students must have completed at least 75 credits in the bachelor's degree program in Environmental Engineering at FIU and meet the admissions criteria for the graduate degree program at FIU and meet the admissions criteria for the graduate degree program to the which they are applying. Students need only apply once to the combined degree pathway; the application is submitted to the Graduate Admissions typically before the student starts the last 30 credit of the bachelor's degree program.

Students interested in the pathway should consult with the Undergraduate Advisor on their eligibility for the pathway. The students should also meet the Graduate Program Director to learn about the graduate program and available courses before completing the application form and submitting it to the Undergraduate Advisor. Applicants will be notified by the department and the University Graduate School of the decision on their applications.

Program Requirements

CEC Academic Progression Standard

Steady academic progression is expected by the College of Engineering and Computing. Students who are unsuccessful in passing common pre-requisites after two attempts will be advised to change their major into an area where they can be successful. Drops after the add/drop period, which result in a DR grade, are considered an attempt in the course and count as an unsuccessful enrollment.

Students must also meet the Math Progression standard of successfully completing Calculus 1 within three academic terms, not counting summers.

Students will be redirected to a different degree program when completion of the progression standards, including the applicable math progression standard by its stated semester, is no longer feasible.

Lower Division Preparation

Type

Prerequisite

Common Prerequisite Courses

For a list of all state-approved common prerequisites, including alternatives, visit https://cpm.flvc.org.

Complete ALL of the following Courses:

- CHM1045 - General Chemistry I
  AND CHM1045L - General Chemistry Lab I
- CHM1046 - General Chemistry II
  AND CHM1046L - General Chemistry Lab II
- MAC2281 - Calculus I for Engineering
- MAC2282 - Calculus II for Engineering
- MAC2283 - Calculus III for Engineering
- MAP2302 - Differential Equations
- PHY2048 - Physics with Calculus I
  AND PHY2048L - General Physics Laboratory I
- PHY2049 - Physics with Calculus II

PHY2049L does not count toward the degree at FIU.

Additional lower-division courses required for the degree:

Complete ALL of the following Courses:

- BSC2010 - General Biology I
  AND BSC2010L - General Biology I Lab
- EGN1110C - Engineering Drawing

Upper Division

Type

Completion Requirement

Applied Mathematics: 3 credits

Complete ALL of the following Courses:

- STA3033 - Introduction to Probability and Statistics for CS
  OR ESI3215 - Evaluation of Engineering Data I

Engineering Sciences: 17 credits

Fulfill ALL of the following requirements:

Engineering Science Courses

Complete ALL of the following Courses:

- CGN2420 - Computer Tools for Engineers
- EGM3503 - Applied Mechanics
- EGN3343 - Thermodynamics I
- CWR3201 - Fluid Mechanics
  AND CWR3201L - Fluid Mechanics Laboratory

AND

Earth Science electives

Earn at least 3 credits from the following:

- GLY1010 - Physical Geology
- GLY2072 - Earth's Climate and Global Change
- GLY3039 - Environmental Geology
- GLY4822 - Introduction to Hydrogeology
- MET3003 - General Meteorology

AND

General Electives (5 credits)

General elective credits may be used for any other extra curriculum course in cases where students choose not to pursue an internship.

General Engineering Courses: 4 credits

Complete ALL of the following Courses:

- EGS2030 - Ethics and Legal Aspects in Engineering
- EGN3613 - Engineering Economy

Environmental Engineering Curriculum with Electives: 37 credits

Complete ALL of the following Courses:

- CWR3540 - Water Resources Engineering
- ENV3001 - Introduction to Environmental Engineering
  AND ENV3001L - Environmental Laboratory I
- ENV3081 - Career Orientation and Project Management Skills
- ENV4005L - Environmental Laboratory II
- ENV4513 - Chemistry for Environmental Engineers
- ENV4351 - Solid and Hazardous Waste Management
- ENV4101 - Fundamentals of Air Pollution Engineering
- ENV4401 - Water Supply Engineering
- ENV4551 - Wastewater Treatment Engineering
- ENV4891 - Environmental Engineering Senior Design Project
- ENV4960 - Environmental Engineering Seminar

ENV Technical Elective (3 credits)

ENV Technical Elective (3 credits)

ENV Technical Elective (3 credits)

ENV Technical Elective

ENV technical electives must be selected from the following:

Earn at least 9 credits from the following:

- CES3580 - Hurricane Engineering and Global Sustainability
- CGN4321 - GIS Applications in Civil and Environmental Engineering
- CGN4510 - Sustainable Building Engineering
- CWR5235 - Open Channel Hydraulics
- CWR4204 - Hydraulic Engineering
- CWR4530 - Modeling Applications in Water Resources Engineering
- CWR4620C - Ecohydrological Engineering
- EGN4070 - Engineering for Global Sustainability and Environmental Protection
- ENV4330 - Hazardous Waste Site Assessment
- ENV5062 - Environmental Health
- ENV4560 - Reactor Design
- ENV4024 - Bioremediation Engineering
- ENV4930 - Special Topics Env
- ENV5104 - Indoor Air Quality
- ENV5666 - Water Quality Management
- EVR3010 - Energy Flow in Natural and Man-made Systems
- EVR3011 - Environmental Resources and Pollution
- EVR3013 - Ecology of South Florida
- EVR4321 - Sustainable Resource Development
- EVR4592 - Soils and Ecosystems

- EVR4026 - Ecology of Biotic Resources
- EVR4323 - Restoration Ecology
- SUR2101C - Geomatics and Surveying
- MCB2000 - Introductory Microbiology
- OCB2000 - Introductory Marine Biology

All recommended and other technical electives must be approved by the advisor and must concentrate on relevant applications of environmental engineering design. Selection of a proper sequence would allow the student to specialize within a focus area of interest (e.g., air, water, or land resources).

Professional Graduation Requirement

Environmental Engineering students must take and pass ENV4960 Environmental Eng Seminar (FE Seminar). Students showing evidence of passing the state FE (EIT) examination will have this requirement waived. This evidence must be shown prior to the last semester; otherwise, the student must enroll in ENV4960 Environmental Eng Seminar (FE Seminar).

Course and Credit Hours Listing

The curriculum includes a sequence of courses which complies with the ABET requirements for mathematics and basic sciences, engineering science, engineering design, and general engineering degree requirements including humanities and social sciences.

Students may complete the program, by specific selection of science and technical elective courses, as arranged with the undergraduate program advisor and based on personal interests in a specialization area.

Other Requirements

Students must have a minimum 2.0 GPA, must complete all required classes, and must otherwise meet all of the state and university requirements in order to graduate.

Students who enter the university with fewer than 60 transferred credits must take 9 summer credits. Refer to the appropriate sections in the Catalog for more information.

Courses are to be taken in the proper sequence. Any course taken without the required prerequisites and corequisites will be dropped automatically before the end of the term, resulting in a ‘DR’ or ‘DF’.

Major Requirements

There are no majors associated with this program.

Track, Specialization, Concentration, Area of Emphasis, or Other Curricular Offering Requirements

Other Curricular Offering: Combined BS in Environmental Engineering to MS in Environmental Engineering Accelerated Degree Pathway

A student admitted to the combined degree pathway will be considered to have undergraduate status until the student applies for graduation from their bachelor’s degree program. Upon conferral of the bachelor’s degree, the student will be granted graduate status and will be eligible for graduate assistantships. Only 5000-level or higher courses, and no more

than the credits specified by the program catalog, may be applied toward both degrees. In addition to the admission requirements of the combined BS/MS pathway, students must meet all the admission requirements of both the department and the University Graduate School.

Students enrolled in the pathway may count up to nine credit hours of CEE graduate courses as credits for both the BS and MS degrees. The combined BS/MS pathway has been designed to be a continuous enrollment pathway. However, upon completion of all the requirements of the undergraduate program, students will receive their BS degrees. Students in this pathway have up to one year to complete the master's degree after receipt of the bachelor's degree. Students who fail to meet this one year post BS requirement or who elect to leave the combined pathway at any time and earn only the BS degree will have the same access requirements to regular graduate programs as any other student, but will not be able to use the nine credits in both the bachelor's and master's degrees.

For each of the graduate courses counted as credits for both BS and MS degree, a minimum grade of "B" is required. All double counted courses must be at 5000 level or higher. Students enrolled in the pathway may count up to nine credit hours of CEE graduate courses toward the elective engineering BS requirements as well as toward the MS degree. Only graduate courses with formal lectures can be counted for both degrees. The students are responsible for confirming the eligibility of each course with the Undergraduate Advisor.

Undergraduate students enrolled in the pathway are encouraged to seek employment with a department faculty to work as student assistants on sponsored research projects. The students will be eligible for graduate assistantships upon full admission into the graduate school.

ENVEG:MS - Master of Science in Environmental Engineering

Overview

Degree Offered
MS - Master of Science

Program Title
Environmental Engineering

The Department of Civil and Environmental Engineering at FIU offers graduate degrees that can enhance career opportunities and prepare a student for further success in academia. The Master of Science (MS) in Environmental Engineering prepares qualified students for the professional practice of or advanced academic research in environmental engineering. The student is required to specialize in a defined area of environmental engineering but may broaden knowledge through studies combining subject material from different areas of specialization and interdisciplinary related courses. The MS degree is available in a thesis or non-thesis program. The thesis program entails a minimum of six credits for the successful completion of the research and thesis. The non-thesis program must be supported by either the successful completion of a project and a report of substantial engineering content for a minimum of three credits or the all-course option. A combined accelerated BS/MS degree pathway is also available.

For more information, visit the College of Engineering and Computing website.

Requirements

Simple Requirements

Admissions Requirements

Admission Policies for Master of Science (MS) Programs

A student seeking admission into the Civil Engineering or the Environmental Engineering graduate program must have a bachelor’s degree in Civil Engineering, Environmental Engineering, or related engineering or equivalent from an accredited institution or, in the case of foreign students, an institution recognized in its own country as preparing students for further study at the graduate level. The minimum requirements for admission to the Master programs are:

(1) GPA of at least 3.0/4.0 in either the last 60 credit hours or the overall undergraduate degree, and

(2) A bachelor’s degree in engineering, science, or a closely related field from an accredited institution, and

(3) International graduate student applicants whose native language is not English are required to submit a score for the Test of English as a Foreign Language (TOEFL) or for the International English Language Testing System (IELTS). A total score of 80 on the iBT TOEFL or 6.5 overall on the IELTS is required, and

(4) Three letters of recommendation or the forms provided by the department, and

(5) A statement of objectives in which, in addition to other information, the intended concentration must be clearly stated, and

(6) A resume including contact information, education and employment history, practical and research experiences (such as projects and publications), skills and other pertinent information.

Students who meet all criteria, except for requirements 1 and 2 above, may be evaluated for conditional admission. Meeting the minimum requirements does not guarantee admission to the programs.

Grades earned at an institution with non-traditional grading systems will be given every consideration and applicants will be treated equally as are students from institutions with traditional grading systems.

Application Procedures for Master of Science Programs

A student planning to enroll in the graduate program must complete the following:

(1) Submit an online Graduate Application for Admission to the Graduate Admissions Office.

(2) Have a copy of the official transcripts of all previously earned college or university credits sent from the applicant's former institution(s) to the Graduate Admissions Office.

(3) Submit three letters of recommendation, statement of objectives, and resume as part of the online Graduate Application for Graduate Admissions Office.

(4) International graduate student applicants whose native language is not English are required to submit a score for the Test of English as a Foreign Language (TOEFL) or for the International English Language Testing System (IELTS). A total score of 80 on the iBT TOEFL or 6.5 overall on the IELTS is required.

It should be emphasized that the admission cannot be acted upon until all of the documents and credentials have been received.

Students seeking a waiver to normal admissions standards must contact the departmental main office for filing instructions and deadlines.

Admissions Requirements for the Combined Bachelor of Science (BS) in Civil Engineering to MS in Environmental Engineering Accelerated Degree Pathway

Students who pursue a BS degree in Civil Engineering and are in their senior year and have GPA of at least 3.3/4.0 in either the last 60 credit hours or the overall courses may apply to the department to enroll in the combined BS (Civil)/MS pathway in Environmental Engineering upon recommendation from three CEE faculty members.

To be considered for admission to the combined bachelor's/masters degree pathway in Environmental Engineering, students must have completed at least 75 credits in the bachelor's degree program in Civil Engineering at FIU and meet the admissions criteria for the graduate degree program at FIU and meet the admissions criteria for the graduate degree program to the which they are applying. Students need only apply once to the combined degree pathway; the application is submitted to the Graduate Admissions typically before the student starts the last 30 credit of the bachelor's degree program.

Students interested in the pathway should consult with the Undergraduate Advisor on their eligibility for the pathway. The students should also meet the Graduate Program Director to learn about the graduate program and available courses before completing the application form and submitting it to the Undergraduate Advisor. Applicants will be notified by the department and the University Graduate School of the decision on their applications.

Admissions Requirements for the Combined BS in Environmental Engineering to MS in Environmental Engineering Accelerated Degree Pathway

Applicants will be notified by the department and the University Graduate School of the decision on their applications.

Program Requirements

Degree Requirements for Master of Science Programs

To be eligible for a Master's degree a student must:

(1) Satisfy all University requirements for a Master's degree.

(2) Meet all undergraduate deficiencies, and requirements as specified by the students' advisory committee.

(3) Complete 30 semester hours of acceptable graduate level courses, including up to 3 credits of an Independent Study course. Supervised Research credits are not counted toward the 30 credit degree requirement.

(4) Optionally, complete an acceptable thesis (minimum six credits) or engineering project (minimum three credits).

(5) Successfully complete the 15 credit core courses defined for the student's chosen specialty area.

(6) Earn a minimum grade point average of 3.0 in all approved courses in the student's program of study.

(7) Complete CGN6939 Graduate Seminar.

(8) For students who chose the thesis option, they must get approval and written evaluation of the oral defense and written thesis by their thesis committee. The committee should have, at a minimum, three graduate faculty members, and each member must complete and sign the student evaluation.

(9) For students who chose the engineering project option, they must get approval and written evaluation of the oral defense and written engineering project by their project committee. The committee should have, at a minimum, three graduate faculty members, and each member must complete and sign the student evaluation.

(10) For students who chose the non-thesis and non-engineering project (all-course) option, they must present a 5-page written report (in the format of a journal article) and an oral presentation (in CGN6939 Graduate Seminar) of a selected topic that demonstrates substantial professional engineering knowledge and experience. The written report and oral presentation must be evaluated and the student evaluation forms must be completed and signed by two departmental graduate faculty members, at a minimum, and then used by the CGN6939 Graduate Seminar instructor to issue a P/F grade. The seminar will be scheduled and will be announced to students and faculty at least one week in advance in the last semester of the student's program.

Core Courses

In order to master real-life engineering problems, engineers need to have an education with core knowledge and related skills in their selected concentration. Upon enrollment, students must satisfy the 15 credits of core course requirements A proposed program of study shall be developed by a student's academic advisor together with the student and approved by the Graduate Program Director. Students are also required to register for CGN6939 Graduate Seminar at least once and are encouraged to take it each Fall and Spring.

Independent Study Course

A student may take up to a total of three credits of independent study, which will be letter graded. If a student needs a course that will not be offered during the student's course of study, special topics courses should be set up to meet the student's needs. There will be no limit on the number of special topics courses provided that the core course requirements are satisfied.

Grades and Credits

No course in which a grade below a 'C' is earned may be counted toward a Master of Science degree.

Transfer Credit

The student may receive permission to transfer up to a maximum of six credit hours of graduate credit earned from another institution or up to 12 credit hours of graduate credit earned as a non-degree seeking students at FIU after admitted into one of the graduate programs in the Civil and Environmental Engineering Department. Such credits are transferable provided that: (1) the course(s) were taken at the graduate level at an accredited college or university; (2) grade(s) of 'B' or higher were earned for the courses; (3) the course(s) are judged relevant by the student's advisory committee; (4) the credits were not used toward another degree; and (5) the credit(s) were completed within six years immediately preceding the awarding of the degree.

Credits are not transferable until the student has earned 12 credit hours in the graduate programs in the Department of Civil Engineering and Environmental Engineering.

MS in Environmental Engineering

Students pursuing an MS in Environmental Engineering students are required to take at least fifteen (15) core course credits from the following core areas:

(1) Water supply/wastewater/water quality,

(2) Air quality,

(3) Soil quality, solid waste, hazardous waste,

(4) Water resources (including groundwater), and

(5) Emerging areas and cross-cutting applications.

Furthermore, it is advisable that students gain some expertise in environmental chemistry and statistics, in programming skills such as Python and MATLAB and in GIS and computational modeling techniques, while seeking knowledge in new areas of research and development.

Students are also required to register for the zero-credit CGN6939 Graduate Seminar and are encouraged to participate in it each semester.

Major Requirements

There are no majors associated with this program.

Track, Specialization, Concentration, Area of Emphasis, or Other Curricular Offering Requirements

See the list of specialty areas to choose from for selection of the core courses in the Program Requirements section above for the MS Degree in Environmental Engineering.

Other Curricular Offering: Combined BS in Civil Engineering to MS in Environmental Engineering Accelerated Degree Pathway

A student admitted to the combined degree pathway will be considered to have undergraduate status until the student applies for graduation from their bachelor's degree program. Upon conferral of the bachelor's degree, the student will be granted graduate status and will be eligible for graduate assistantships. Only 5000-level or higher courses, and no more than the credits specified by the program catalog, may be applied toward both degrees. In addition to the admission requirements of the combined BS/MS pathway, students must meet all the admission requirements of both the department and the University Graduate School.

Students enrolled in the pathway may count up to nine credit hours of CEE graduate courses as credits for both the BS and MS degrees. The combined BS/MS pathway has been designed to be a continuous enrollment pathway. However, upon completion of all the requirements of the undergraduate program, students will receive their BS degrees. Students in this pathway have up to one year to complete the master's degree after receipt of the bachelor's degree. Students who fail to meet this one year post BS requirement or who elect to leave the combined pathway at any time and earn only the BS degree will have the same access requirements to regular graduate programs as any other student, but will not be able to use the nine credits in both the bachelor's and master's degrees.

For each of the graduate courses counted as credits for both BS and MS degree, a minimum grade of "B" is required. All double counted courses must be at 5000 level or higher. Students enrolled in the pathway may count up to nine credit hours of CEE graduate courses toward the elective engineering BS requirements as well as toward the MS degree. Only graduate courses with formal lectures can be counted for both degrees. The students are responsible for confirming the eligibility of each course with the Undergraduate Advisor.

Undergraduate students enrolled in the pathway are encouraged to seek employment with a department faculty to work as student assistants on sponsored research projects. The students will be eligible for graduate assistantships upon full admission into the graduate school.

Other Curricular Offering: Combined BS in Environmental Engineering to MS in Environmental Engineering Accelerated Degree Pathway

A student admitted to the combined degree pathway will be considered to have undergraduate status until the student applies for graduation from their bachelor's degree program. Upon conferral of the bachelor's degree, the student will be granted graduate status and will be eligible for graduate assistantships. Only 5000-level or higher courses, and no more than the credits specified by the program catalog, may be applied toward both degrees. In addition to the admission requirements of the combined BS/MS pathway, students must meet all the admission requirements of both the department and the University Graduate School.

Students enrolled in the pathway may count up to nine credit hours of CEE graduate courses as credits for both the BS and MS degrees. ENVHL:CFI - Graduate Certificate in Environmental Health Sciences

Overview

Degree Offered
ACRT - Academic Certificate

Program Title
Graduate Certificate in Environmental Health Sciences

This Environmental Health Sciences (EHS) Graduate Certificate provides graduate-level instruction to educate and support individuals in the environmental and occupational health, public health, and global health workforce by enhancing their knowledge and skills in environmental health risk assessment, environmental health practice, and influencing policies. Upon completion of the certificate, the student will be able to identify and assess toxicity to manage environmental and occupational exposures of physical, chemical, biological, and radiological risks to human health. This certificate program is open to non-degree and degree-seeking-individuals.

Requirements

Simple Requirements

Admissions Requirements

Applicants must hold a bachelor’s degree or equivalent from an accredited college or university. Science, biology, environment, or health-related background with a graduate course in biostatistics, statistics, or social science statistics is desirable.

This certificate is open to both non-degree and degree-seeking students.

Prerequisites

Contact the advisor for information about any prerequisites.

Program Requirements

Program Requirements

The EHS Graduate Certificate Program requires the completion of 15 graduate credits. The student must demonstrate proficiency in the identification and characterization of human health risks from exposures to environmental and workplace contaminants. Students who are proficient in any one area covered by the required courses may choose from

elective/alternative courses to complete their requirements. Substitution of courses must be approved by the advisor. Students should consult with advisors since new courses are frequently added, and some courses have prerequisites and enrollment stipulations, including online or onsite availability.

Academic Progression Requirements

Completion of 15 graduate credits with an overall ‘B’ average.

Program Credit Hours: 15

Type

Completion Requirement

Required Courses: 6 credits

Complete ALL of the following Courses:

- PHC6315 - Introduction to Environmental Health Sciences
- PHC6311 - Environmental Health Risk Assessment

Select Elective Courses: 9 credits

Earn at least 6 credits from the following:

- PHC6310 - Environmental Toxicology
- PHC6355 - Environmental and Occupational Health and Safety
- PHC6374 - Environmental Disasters and Human Health
- PHC6538 - Gene & Environment Interaction
- PHC6312C - Health Impacts of Air, Water, and Land Pollution
- PHC6442 - Global Environmental Public Health
- PHC6422 - Regulatory Aspects of Environmental Health Sciences
- PHC6662 - Global One Health

Major Requirements

There are no majors associated with this program.

Track, Specialization, Concentration, Area of Emphasis, or Other Curricular Offering Requirements

There are no tracks, specializations, concentrations, areas of emphasis, or other curricular offerings associated with this program.

ENVRL:CFI - Graduate Certificate in Environmental and Natural Resources Law

Overview

Degree Offered
ACRT - Academic Certificate

Program Title
Certificate in Environmental and Natural Resources Law

The Environmental and Natural Resources Law Graduate Certificate program seeks to provide graduate-level interdisciplinary instruction in the diverse fields of Environmental and Natural Resources law. Specifically, the Certificate Program will provide law students with in-depth study and training in state and federal legislation shaping environmental policy and governing the exploitation and preservation of natural resources, thereby increasing their competitiveness amongst law graduates in the state of Florida and elsewhere. The certificate will allow students to complement their legal studies by designing a unique curriculum that focuses on their particular environmental interests, leveraging Florida's unique geographic location and increasing demand for lawyers with training in environmental and natural resources law.

Required Courses

Complete ALL of the following Courses:

- LAW6471 - Environmental Law
- LAW6470 - Natural Resources Law
- LAW6520 - Administrative Law

Elective Courses

Earn at least 6 credits from the following:

- LAW6492 - Water Resources Law
- LAW7475 - Ocean and Coastal Law
- LAW6936 - Seminars
- LAW6460 - Land Use Planning and Control
- LAW7268 - International Environmental Law
- LAW6905 - Independent Study
- LAW7946 - Advanced Externship Placement

**LAW6936 can be taken on the following topics:*

- *Biodiversity Law*
- *Climate Change Law*
- *Energy Law*

Related Courses (may be taken to count for 0-2 of the 6 elective credits)

Complete up to 2 course(s) and earn up to 6 credits from the following:

- LAW6730 - Admiralty Law
- LAW6250 - Comparative Law
- LAW6425 - Construction Law
- LAW6302 - Federal Courts
- LAW6580 - Food and Drug Law
- LAW6720 - Health Law
- LAW6263 - International Human Rights Law
- LAW6555 - Law and Economics
- LAW6821 - Law, Science, and Technology
- LAW6523 - Legislation
- LAW6531 - Local Government Law
- LAW6297 - NAFTA and Other Regional Trade Agreements
- LAW6426 - Real Estate Transactions

ENVS:CFI - Undergraduate Certificate in Environmental Studies

Overview

Degree Offered
ACRT - Academic Certificate

Program Title
Certificate in Environmental Studies

The Undergraduate Certificate in Environmental Studies is designed to provide students in various majors with the unique perspective of interdisciplinary ecological education to both enrich and expand the breadth of their primary training. The certificate seeks to provide participants with an analytic basis for understanding the milieu of local and global environmental problems and processes. This certificate program is open to degree-seeking students only. For more information, visit the College of Arts, Sciences, and Education website.

Prerequisites

Contact advisor for information about any prerequisites.

Program Requirements

The curriculum for the Environmental Studies Certificate consists of six courses (18-20 credits). A grade of “C” or better is required for all courses.

Program Credit Hours: 18-20

Type
Completion Requirement

Environmental Science Courses

Fulfill ANY of the following requirements:

Required Courses for Students with a Non-Science Background

Complete ALL of the following Courses:

- EVR3011 - Environmental Resources and Pollution
  OR GEO3510 - Earth Resources
- EVR3013 - Ecology of South Florida
  AND EVR3013L - Ecology of South Florida Lab

OR

Required Courses for Students with a Science Background

Complete ALL of the following Courses:

- EVR4026 - Ecology of Biotic Resources
- EVR4211 - Water Resources
  AND EVR4211L - Water Resources Lab

Environmental Social Science Courses

Complete at least 2 of the following courses:

- ANT3403 - Cultural Ecology
- GEO3421 - Cultural Geography
- ECP3302 - Introduction to Environmental Economics
- EVR3723 - Natural Resource Valuation and Economics
- EVR4415 - Population and Environment Issues
- EVR4352 - U.S. Environmental Policy
- INR4350 - International Environmental Politics
- POS4035 - Environmental Politics
- REL3492 - Earth Ethics

Environmental Electives

Students should check with the program director for additional courses that may be used to satisfy the elective requirement.

Complete at least 2 of the following courses:

- AMH3630 - Environmental History of the United States
- ANT3403 - Cultural Ecology
- ANG5267 - Environmental Anthropology
- BOT3014 - Botany
- BOT3154 - Local Flora
  AND BOT3154L - Local Flora Lab
- ECP3302 - Introduction to Environmental Economics
- ECP4314 - Natural Resource Economics
- ENY4060 - Entomology
  AND ENY4060L - Entomology Lab

- EVR3010 - Energy Flow in Natural and Man-made Systems
- EVR3013 - Ecology of South Florida
  AND EVR3013L - Ecology of South Florida Lab
- EVR4026 - Ecology of Biotic Resources
- EVR4211 - Water Resources
- EVR4323 - Restoration Ecology
- EVR4401 - Conservation Biology
- EVR4352 - U.S. Environmental Policy
- EVR4410 - Global Perspectives on Water and Environment
- EVR4415 - Population and Environment Issues
- EVR4440 - Beaches and Tourism
- EVR4434 - Sustainable Cities
- EVR4905 - Research and Independent Study
- EVR4934 - Special Topics
- EVR5320 - Environmental Resource Management
- EVR5355 - Environmental Resource Policy
- EVR5907 - Research and Independent Study
- GEO3421 - Cultural Geography
- GIS3043C - Introduction to Geographical Information Systems
- GLY3039 - Environmental Geology
  AND GLY3039L - Environmental Geology Lab
- GLY3754 - Remote Sensing in the Earth Sciences
- GLY4881 - Coastal Hazards
- HFT3701 - Sustainable Tourism Practices
- INR3043 - Population and Society
- INR4054 - World Resources and World Order
- INR4350 - International Environmental Politics
- LIT4930 - Special Topics
- MCB4603 - Microbial Ecology
- MET3103 - Planetary Climate Change
- PCB3043 - Ecology
  AND PCB3043L - Ecology Lab
- PHI3640 - Environmental Ethics
- POS4035 - Environmental Politics
- REL3492 - Earth Ethics
- ZOO4462C - Herpetology

Additional Comments:

Students obtaining a BS in Environmental Studies with Natural Resource Sciences major (BS) or a BA in Sustainability and the Environment (BA) and wishing to obtain a Certificate in Environmental Studies must take at least two upper division courses in environmental sciences or studies different from those used to satisfy the above BS or BA degree.

Major Requirements

There are no majors associated with this program.

Track, Specialization, Concentration, Area of Emphasis, or Other Curricular Offering Requirements

There are no track, specialization, concentration, area of emphasis, or other curricular offerings associated with this program.

ENVST:BS - Bachelor of Science in Environmental Studies

Overview

Degree Offered
BS - Bachelor of Science

Program Title
Environmental Studies

The Bachelor of Science (BS) degree in Environmental Studies offers a choice of majors in Agricultural Sciences and in Natural Resources Sciences. These majors have been designed to provide students with broad academic knowledge and experience to pursue careers in the environmental professions and sustainable agriculture.

For more information, visit the College of Arts, Sciences, and Education website.

Admissions Requirements

Admissions Requirements for the Bachelor of Science (BS) in Environmental Studies

See general university admission requirements at admissions.fiu.edu.

Admissions Requirements for the Combined BS in Environmental Studies to Master of Science (MS) in Environmental Studies Accelerated Degree Pathway

To be considered for admission to the combined bachelor’s/master’s degree pathway, students must have completed at least 75 credit hours including all lower division requirements, typically have at least 30 credit hours remaining in the program, and meet the admissions criteria for the graduate degree program to which they are applying. Students need only apply once to the combined degree pathway; the application is submitted to Graduate Admissions typically before the student starts the last 30 credits of the bachelor’s degree program. Students must apply prior to the semester in which graduate credits will be counted towards the undergraduate degree program.

Admissions Requirements

(1) Current enrollment in the Bachelor’s Degree Program in Environmental Studies at FIU.

(2) Completed at least 75 credits of coursework (including UCC), and typically has at least 30 credits remaining.

(3) Completion of all lower division required courses for the Bachelor’s degree.

(4) Current GPA of 3.25 or higher.

(5) Three letters of recommendation.

(6) Approval by the Earth and Environment Graduate Committee.

Program Requirements

Students admitted to the university are admitted directly to their chosen major. Students are expected to make good progress based on critical indicators, such as GPA in specific courses or credits earned. In cases where students are not making good progress, a change of major may be required. Advisors work to redirect students to more appropriate majors when critical indicators are not met.

Lower Division

Type

Completion Requirement

Common Prerequisites

For a list of all state-approved common prerequisites, including alternatives, visit https://cpm.flvc.org.

Complete ALL of the following Courses:

- BSC2010 - General Biology I
  AND BSC2010L - General Biology I Lab
- BSC2011 - General Biology II: Diversity of Life, Organismal Structure and Function
  AND BSC2011L - General Biology Lab II
- CHM1045 - General Chemistry I
  AND CHM1045L - General Chemistry Lab I
- CHM1046 - General Chemistry II
  AND CHM1046L - General Chemistry Lab II
- ESC1000 - Introduction to Earth Sciences
  AND ESC1000L - Introduction to Earth Sciences Lab
- EVR3010 - Energy Flow in Natural and Man-made Systems
- PHY2048 - Physics with Calculus I
  OR PHY2053 - Physics without Calculus I
- MAC1114 - Trigonometry
  OR MAC1147 - Pre-Calculus Algebra and Trigonometry
- ECO2023 - Principles of Microeconomics

GLY1010 Physical Geology and GLY1010L Physical Geology Lab or GLY3039 Environ Geology and GLY3039L Envrnmtl Geol Lab may be used as a substitute for ESC1000 Intro to Earth Science and ESC1000L Intro to Earth Science Lab

MAC1105 College Algebra or an appropriate score on the ALEKS placement exam is a prerequisite for MAC1114 Trigonometry or MAC1147 PreCal Alg and Trig.

Additional Required Lower Division Courses

Complete ALL of the following Courses:

- ISC1056 - First Year Seminar in Earth and Environment

- STA2023 - Statistical Methods
  OR STA2122 - Introduction to Applied Statistics (Inactive)
  OR STA3111 - Statistics I
- STA3112 - Statistics II
  OR STA3123 - Statistics for Behavioral and Social Sciences II
  OR MAC2311 - Calculus I

Upper Division

Type
Completion Requirement

Required Courses for the Agricultural Sciences Major and Natural Resources Sciences Major: 11 Credits

In addition to the following list of Required Courses, students must complete one of the Major Requirements in the below section: Natural Resource Sciences or Agricultural Sciences.

EVR3723 Nat Res Valuation Econ is strongly recommended for the **Natural Resource Sciences Major**.

AEB4131 Farm Econ ManagementIs strongly recommended for the **Agricultural Sciences Major.**

Complete ALL of the following Courses:

- EVR3011 - Environmental Resources and Pollution
- EVR4211 - Water Resources
- EVR4211L - Water Resources Lab
- EVR3723 - Natural Resource Valuation and Economics
  OR AEB4131 - Farm Economics and Management
  OR ECP3302 - Introduction to Environmental Economics
- ISC4935 - Senior Seminar in Earth and Environmental Science

Major Requirements

Agricultural Sciences Major: 26 Credits

Type
Completion Requirement

Required Courses

Complete ALL of the following Courses:

- AGR4240 - Modern Crop Production
- HOS3012 - Introduction to Horticulture Science
- HOS3012L - Horticulture Science Lab
- IPM4020 - Integrated Pest Management
- EVR4592 - Soils and Ecosystems
- EVR4592L - Soils and Ecosystems Lab
- SWS4303 - Soil Microbiology
- SWS4303L - Soil Microbiology Lab
- AGG4941 - Internship in Agriculture

- EVR4272 - Agroecology
- EVR4274 - Sustainable Agriculture

Natural Resources Sciences Major: 22 Credits (minimum)

Type

Completion Requirement

Required Courses

Complete ALL of the following Courses:

- EVR4594 - Analysis of South Florida Ecosystems
- EVR4323 - Restoration Ecology
  AND EVR4323L - Restoration Ecology Lab
- EVR4352 - U.S. Environmental Policy
  OR POS4035 - Environmental Politics

Additional Required Courses

Complete at least 2 of the following courses:

- EVR4026 - Ecology of Biotic Resources
- EVR4401 - Conservation Biology
- EVR4592 - Soils and Ecosystems
- EVR4910 - Applied Ecology Field Excursion
- GEO3510 - Earth Resources
- GIS3043C - Introduction to Geographical Information Systems

Additional Upper Division Environmental Courses: 6 credits

Students may choose any two environmentally related courses offered by the Department of Earth and Environment. Other courses from outside the Department may be used if approved by the Program Director.

Track, Specialization, Concentration, Area of Emphasis, or Other Curricular Offering Requirements

Other Curricular Offering: Combined BS in Environmental Studies to MS in Environmental Studies Accelerated Degree Pathway

The combined BS/MS degree pathway in Environmental Studies allows qualified students to earn both the BS in Environmental Studies and a non-thesis MS in Environmental Studies, in a shorter amount of time than typically required for earning degrees sequentially. The accelerated pathway is designed for highly qualified undergraduate students in the Department of Earth and Environment.

A student admitted to the combined degree pathway will be considered to have undergraduate status until the student applies for graduation from their bachelor’s degree program. Only 5000-level or higher courses, and no more than the number of credits specified by the program catalog, may be applied toward both degrees. Shared credit is limited to formal coursework, exclusive of independent study. Students may not enroll in graduate level classes until provisionally admitted to the graduate program.

Students must apply for the award of their bachelor's degree the semester the degree requirements will be completed.

The bachelor's degree and master's degree cannot be awarded in the same term. No undergraduate credit may count toward the graduate degree.

General Requirements

(1) Meet the requirements of both the BS in Environmental Studies and the non-thesis MS degree in Environmental Studies.

(2) Overlap of programs: Up to 4 courses (12 credits) may be used in satisfying both the BS and MS degree requirements, which must be at the 5000-level or higher.

ENVST:CFI - Graduate Certificate in Environmental Studies

Overview

Degree Offered
ACRT - Academic Certificate

Program Title
Graduate Certificate in Environmental Studies

The Graduate Certificate in Environmental Studies is an interdisciplinary program focused on various environmental issues; it is analogous to the Undergraduate Certificate in Environmental Studies. The graduate certificate is aimed primarily at graduate students in Politics and International Relations, Economics, and Global and Sociocultural Studies programs, as well as those students pursuing an environmental concentration or track in graduate programs in Tourism, Journalism, Education, and Latin American Studies. The certificate program provides an analytic basis for understanding local, regional, and global environmental problems and their solutions. This certificate program is open to degree-seeking students only.

The Graduate Certificate in Environmental Studies requires 15 graduate credit hours as follows.

Program Credit Hours: 15

Type
Completion Requirement

Core Courses (6 credits)

Complete at least 2 of the following courses:

- ISC6153 - Environments of a Changing Planet
- EVR6377 - Natural Resource Conservation and Policy
  OR RLG5183 - Religion, Nature, and Globalization

Environmental Electives: 9 credits

Complete at least 3 of the following courses:

- ANG5267 - Environmental Anthropology
- AGR6251 - Sustainable Farming Systems
- AGR6255 - Ecological Agriculture
- AGR6251 - Sustainable Farming Systems
- AGR6255 - Ecological Agriculture
- ECP6305 - Advanced Environmental Economics
- ECP6305 - Advanced Environmental Economics
- EDF6766 - Education, the Environment, and Sustainable Futures
- EVR5122 - Natural Disasters and Social Vulnerability
- EVR5219 - Water Resources Assessment
- EVR5320 - Environmental Resource Management
- EVR5332 - Integrated Solutions for Water in Environment and Development
- EVR5355 - Environmental Resource Policy
- EVR5375 - Advanced Restoration Ecology
- EVR5907 - Research and Independent Study
- EVR5935 - Special Topics
- EVR6067 - Tropical Forest Conservation and Utilization
- EVR6300 - Topics in Urban Ecology
- EVR6330 - Tropical Ecosystems Management
- EVR7056 - GIS in Water Resources
- GIS5050 - Environmental GIS
- INR5352 - Environment and Security

ENVST:MS - Master of Science in Environmental Studies

Overview

Degree Offered
MS - Master of Science

Program Title
Environmental Studies

The Master of Science (MS) in Environmental Studies degree program offers opportunities for research in the areas of environmental sciences, environmental policy, conservation, agroecology, and natural resource management. Graduates of the program are trained to work in the areas of environmental policy, natural resource science and management, and sustainable development. The program emphasizes the cultural and political contexts of environmental issues in the region. The program seeks applicants who are highly motivated and capable of meeting the challenges of a rigorous master's degree.

For more information, visit the College of Arts, Sciences, and Education website.

Requirements

Simple Requirements

Admissions Requirements

Admissions Requirements for the Master of Science (MS) in Environmental Studies

To be admitted into the MS in Environmental Studies program, a student must meet the university's graduate admission requirements and:

(1) Have a "B" average in upper level work

(2) International graduate student applicants whose native language is not English are required to submit a score for the Test of English as a Foreign Language (TOEFL) or for the International English Language Testing System (IELTS). A total score of 80 on the iBT TOEFL or 6.5 overall on the IELTS is required.

(3) Submit three letters of recommendation, a one-page statement of research interests, and a copy of all transcripts to University Graduate Admissions on or before February 1 for the Fall admissions and August 1 for the Spring admissions.

(4) Receive approval of the departmental Graduate Program Committee.

Admissions Requirements for the Combined Bachelor of Arts (BA) in Sustainability and the Environment to MS in Environmental Studies Accelerated Degree Pathway

To be considered for admission to the combined bachelor's/master's accelerated degree pathway, students must have completed at least 75 credit hours including all lower division requirements, typically have at least 30 credit hours remaining in the program, and meet the admissions criteria for the graduate degree program to which they are applying. Students need only apply once to the combined accelerated degree pathway; the application is submitted to Graduate Admissions typically before the student starts the last 30 credits of the bachelor's degree program. Students must apply prior to the semester in which graduate credits will be counted towards the undergraduate degree program.

Admissions Requirements

(1) Current enrollment in the BA in Sustainability and the Environment degree program at FIU.

(2) Completed at least 75 credits of coursework (including UCC), and typically has at least 30 credits remaining.

(3) Completion of all lower division required courses for the Bachelor's degree.

(4) Current GPA of 3.25 or higher.

(5) Three letters of recommendation.

(6) Approval by the Earth and Environment Graduate Committee.

Admissions Requirements for the Combined Bachelor of Science (BS) in Environmental Studies to MS in Environmental Studies Accelerated Degree Pathway

To be considered for admission to the combined bachelor's/master's accelerated degree pathway, students must have completed at least 75 credit hours including all lower division requirements, typically have at least 30 credit hours remaining in the program, and meet the admissions criteria for the graduate degree program to which they are applying. Students need only apply once to the combined accelerated degree pathway; the application is submitted to Graduate Admissions typically before the student starts the last 30 credits of the bachelor's degree program. Students must apply prior to the semester in which graduate credits will be counted towards the undergraduate degree program.

Admissions Requirements

(1) Current enrollment in the BS in Environmental Studies degree program at FIU.

(2) Completed at least 75 credits of coursework (including UCC), and typically has at least 30 credits remaining.

(3) Completion of all lower division required courses for the Bachelor's degree.

(4) Current GPA of 3.25 or higher.

(5) Three letters of recommendation.

(6) Approval by the Earth and Environment Graduate Committee.

Admissions Requirements for the MS in Environmental Studies and Juris Doctor Joint Degree Pathway

(1) Candidates for the pathway must meet the entrance requirements for and be accepted by both colleges. Both colleges must be informed by the student at the time of application to the second program that the student intends to pursue the joint degree.

(2) The joint degree pathway is not open to students who have already earned one degree.

Program Requirements

The Master of Science in Environmental Studies requires 36 credits, including the specific requirements (listed below) of either the thesis or non-thesis option of the degree program. A maximum of six credits of post-baccalaureate graduate coursework may be transferred from other institutions, subject to approval of the Graduate Committee. Particular courses will be determined by the student in consultation with the thesis advisory committee, faculty advisor, or the Graduate Program Director.

The MS degree program offers two options: thesis and non-thesis. The thesis option involves rigorous, solutions-oriented scientific research into the functioning of environmental systems. This option is highly recommended for students who are coming directly from undergraduate programs and who are interested in doctoral research in the future. The non-thesis option is primarily designed for employed professionals who may want to enhance their careers and skills through additional academic training beyond their bachelor's degree and practical training through internships with agencies, corporations, non-profit organizations or academic institutions. It is not recommended for students who do not have job experience.

Thesis Option: 36 credits

Type

Completion Requirement

Course Requirements

Fulfill ALL of the following requirements:

Courses

Complete ALL of the following Courses:

- ISC6153 - Environments of a Changing Planet
- EVR6377 - Natural Resource Conservation and Policy
- ISC5150 - Introduction to Research in Earth and Environmental Sciences
- ISC5151 - Earth and Environmental Graduate Seminar
  OR ISC6152 - Earth and Environment Advanced Graduate Seminar
- EVR6971 - Master's Thesis

For EVR 6971, students must complete at least six (6) credits to fulfill this requirement.

AND

Research Methods/Analysis Course

Earn three (3) credits from a Research Methods or Analysis course.
The research methods course and electives are selected in consultation with student's thesis advisor.

AND

Electives

Earn 18 credits from Electives

Elective courses fit the student's thesis research. Additional Master's Thesis, Thesis Research, or Graduate Independent Study up to a maximum total of 3 credits may also be applied as elective credit. Students must demonstrate a competency in Statistics (equivalent to two courses of undergraduate statistics, taken prior to the admission into the program, with a "B" or better grade in both courses, or one course of graduate statistics with a "C" or better grade in both courses). Additional course work may be recommended by the advisory committee.

Graduation Requirements

A grade of 'B' or higher must be obtained in all core courses. A grade of 'C' or higher must be obtained in all courses, with a cumulative GPA of 3.0 or higher in the 36 credits. A thesis must be completed and successfully defended in consultation with the student's graduate thesis committee.

Non-Thesis Option: 36 credits

Type

Completion Requirement

Course Requirements

Fulfill ALL of the following requirements:

Courses

Complete ALL of the following Courses:

- ISC6153 - Environments of a Changing Planet
- EVR6377 - Natural Resource Conservation and Policy
- EVR5907 - Research and Independent Study
- ISC5151 - Earth and Environmental Graduate Seminar
- ISC6152 - Earth and Environment Advanced Graduate Seminar

AND

Quantitative Methods Course

Earn three (3) credits from a Quantitative Methods Course

The quantitative methods course is selected in consultation with faculty advisor.

AND

Electives

Earn 22 credits from Electives

Electives are selected in consultation with faculty advisor.

Elective courses are chosen and to fit the student's particular professional interest and to ensure sufficient breadth and depth of environmental studies knowledge. Students carrying out research, internship or independent study for their non-thesis project should sign up for EVR5907 Independent Study but may not exceed 6 credits total. EVR 6970 and EVR 6971 will not count toward electives. A maximum of 6 credit hours may be taken at the 4000 level. A minimum of 12 elective credits must be taken in Environmental Studies or other departmental courses. All courses must be taken for letter grades.

Graduation Requirements

A grade of “B” or higher must be obtained in all core courses. A grade of “C” or higher must be obtained in other courses, with a cumulative GPA of 3.0 of higher in the 36 credits. A project (EVR 5907) must be completed under faculty supervision, and the project report must be presented as a part of the Graduate Seminar class. This work may be based on a specific field research, or internship of current occupation. A project is defined as a substantial analysis and proposal for change of real-world environmental problem.

Additional Comments:

Doctoral candidates in the Natural Resource Science and Management Major of the Earth Systems Science degree who have filed the D-2 and D-3 forms and accepted by the University Graduate School can receive a MS in Environmental Studies degree en route to the PhD after completion of 36 credits of graduate coursework with “non-thesis option” appearing in the transcript.

Major Requirements

There are no majors associated with this program.

Track, Specialization, Concentration, Area of Emphasis, or Other Curricular Offering Requirements

Graduate Concentrations for the MS in Environmental Studies

The Department of Earth and Environment currently offers graduate-level concentrations in several different areas. A list of electives for each of these concentrations can be obtained from the Department’s Office.

Other Curricular Offering: Combined BA in Sustainability and the Environment to MS in Environmental Studies Accelerated Degree Pathway

The combined BA/MS degree pathway in Environmental Studies allows qualified students to earn both the BA in Sustainability and the Environment and a non-thesis MS in Environmental Studies, in a shorter amount of time than typically required for earning degrees sequentially. The accelerated pathway is designed for highly qualified undergraduate students in the Department of Earth and Environment.

A student admitted to the combined degree pathway will be considered to have undergraduate status until the student applies for graduation from their bachelor’s degree program. Only 5000-level or higher courses, and no more than the number of credits specified by the program catalog, may be applied toward both degrees. Shared credit is limited to formal coursework, exclusive of independent study. Students may not enroll in graduate level classes until provisionally admitted to the graduate program.

Students must apply for the award of their bachelor's degree the semester the degree requirements will be completed.

The bachelor's degree and master's degree cannot be awarded in the same term. No undergraduate credit may count toward the graduate degree.

General Requirements

(1) Meet the requirements of both the BA in Sustainability and the Environment and the non-thesis MS degree in Environmental Studies.

(2) Overlap of programs: Up to 4 courses (12 credits) may be used in satisfying both the BA and MS degree requirements, which must be at the 5000-level or higher.

Other Curricular Offering: Combined BS in Environmental Studies to MS in Environmental Studies Accelerated Degree Pathway

The combined BS/MS degree pathway in Environmental Studies allows qualified students to earn both the BS in Environmental Studies and a non-thesis MS in Environmental Studies, in a shorter amount of time than typically required for earning degrees sequentially. The accelerated pathway is designed for highly qualified undergraduate students in the Department of Earth and Environment.

A student admitted to the combined degree pathway will be considered to have undergraduate status until the student applies for graduation from their bachelor's degree program. Only 5000-level or higher courses, and no more than the number of credits specified by the program catalog, may be applied toward both degrees. Shared credit is limited to formal coursework, exclusive of independent study. Students may not enroll in graduate level classes until provisionally admitted to the graduate program.

Students must apply for the award of their bachelor's degree the semester the degree requirements will be completed.

The bachelor's degree and master's degree cannot be awarded in the same term. No undergraduate credit may count toward the graduate degree.

General Requirements

(1) Meet the requirements of both the BS in Environmental Studies and the non-thesis MS degree in Environmental Studies.

(2) Overlap of programs: Up to 4 courses (12 credits) may be used in satisfying both the BS and MS degree requirements, which must be at the 5000-level or higher.

Other Curricular Offering: MS in Environmental Studies and Juris Doctor Joint Degree Pathway

The faculties of the College of Law and the College of Arts, Sciences, and Education at Florida International University offer a joint degree pathway culminating in both a Juris Doctor (JD) degree, awarded by the College of Law, and a Master of Science in Environmental Studies (MS-ES) degree, awarded by the College of Arts, Sciences, and Education. Under the joint degree pathway, a student can obtain both degrees in significantly less time than it would take to obtain both degrees if pursued consecutively. Essential criteria relating to the joint degree pathway are as follows:

(1) For law students, enrollment in the MS-ES program is required no later than the completion of 63 credit hours in the JD program. For MS-ES students, enrollment in the JD program is required no later than the completion of 24 credit hours in MS-ES program.

(2) A student must satisfy the curriculum requirements for each degree before either degree is awarded. For the MS-ES degree, students must meet the requirement of the non-thesis option. The College of Arts, Sciences, and Education will allow 6 credit hours of foundation law courses and up to 9 credit hours of upper level environmental law courses to be credited toward both the MS-ES and JD degrees. These law classes will count toward the non-EVR Environmental Studies elective credits allowed under the MS-ES non-thesis option program. Reciprocally, law students may receive 9 hours of credit toward the satisfaction of the JD degree for courses taken in the MS-ES curriculum upon completion of the MS-ES degree curriculum with a grade point average of 3.0 or higher.

(3) The College of Arts, Sciences, and Education will recognize any significant, environment-related law review or research project completed with a letter grade of 'B' or better for the JD program toward the 3 credit hour course, EVR5907 Independent Study and the attendant 'Project' required for the MS-ES non-thesis option program. For the purpose of this program, a project is defined as a substantial analysis and proposal for change of a real-world environmental problem, and requires preparation of a report and presentation as part of the required Environmental Studies Graduate Seminar class.

(4) A student enrolled in the joint degree pathway may begin the student's studies in either college, but full-time law students must take the first two semesters of law study consecutively and part-time law students must take the first three semesters of law study consecutively. Students admitted to one college but electing to begin study in the other college under the joint degree pathway may enter the second college thereafter without once again qualifying for admission so long as they have notified the second college before the end of the first week of the first semester in the second college and are in good academic standing when studies commence in the second college.

(5) A student enrolled in the joint degree pathway will not receive either degree until the student has satisfied all of the requirements for both degrees, or until the student has satisfied the requirements of one of the degrees as if the student had not been a joint degree candidate.

(6) As non-thesis option MS-ES students, students in the joint degree pathway will not normally be eligible for the graduate teaching assistantships in the Environmental Studies Department.

EPIDG:CFI - Graduate Certificate in Epidemiology

Overview

Degree Offered
ACRT - Academic Certificate

Program Title
Graduate Certificate in Epidemiology

This Graduate Certificate provides graduate-level instruction to non-graduate-degreed practitioners who seek to enhance their knowledge and skills in epidemiology research and practice. Upon completion of the certificate, the student will have a fundamental understanding of epidemiologic methods and will be able to measure, analyze, and interpret data describing the distribution and determinants of diseases in populations. For more information, visit the Department of Epidemiology website.

Robert Stempel College of Public Health and Social Work

Total Credits
18

Program Length in Years Based on Full-Time Enrollment
1

CIP Code
51.2201

Requirements

Simple Requirements

Admissions Requirements

Applicants must hold a bachelor’s degree or equivalent from an accredited college or university.

This certificate is open to both degree-seeking and non-degree-seeking students only.

Prerequisites

Contact advisor for information about any prerequisites.

Program Requirements

The Graduate Certificate requires the completion of 18 graduate credits. The student must demonstrate proficiency in research methodology, basic statistical and computer skills related to distribution and determinants of disease. If students are proficient in any one area covered by the required courses, alternative courses may be selected. Substitution of courses must be approved by the advisor. Students should consult with advisors since new courses are frequently added, and some courses have prerequisites and enrollment stipulations.

Program Credit Hours: 18

Type
Completion Requirement

Required Courses: 6 credits

Complete ALL of the following Courses:

- PHC6000 - Epidemiology I: Introduction to Public Health Epidemiology
- PHC6013 - Epidemiology II: Observational Design

Elective Courses: 12 credits

Earn at least 12 credits from the following:

- PHC6003 - Chronic Disease Epidemiology
- PHC6008 - Cardiovascular Disease Epidemiology
- PHC6009 - AIDS Epidemiology and Control
- PHC6014 - Behavioral Epidemiology
- PHC6016 - Social Epidemiology
- PHC6703 - Epidemiology Methods: Experimental Design
- PHC6062 - Systematic Reviews and Meta-Analysis
- PHC6441 - Epidemiology of Health Disparity
- PHC6536 - Health Demography

Graduation (Completion) Requirement

Completion of 18 graduate credits with an overall ‘B’ average.

Major Requirements

There are no majors associated with this program.

Track, Specialization, Concentration, Area of Emphasis, or Other Curricular Offering Requirements

There are no tracks, specializations, concentrations, areas of emphasis, or other curricular offerings associated with this program.
