MAC1105 - College Algebra

Overview

Subject code
MAC

Catalog Number
1105

Course Title
College Algebra

Career
Undergraduate

Course Description
In this course, students will develop problem solving skills, critical thinking, computational proficiency, and contextual fluency through the study of equations, functions, and their graphs. Emphasis will be placed on quadratic, exponential, and logarithmic functions. Topics will include solving equations and inequalities, definition and properties of a function, domain and range, transformations of graphs, operations on functions, composite and inverse functions, basic polynomial and rational functions, exponential and logarithmic functions, and applications.

MAC1114 - Trigonometry

Overview

Subject code
MAC

Catalog Number
1114

Course Title
Trigonometry

Career
Undergraduate

Course Description
Trigonometric functions, identities, conditional equations, polar coordinates, vectors, polar graphs, complex numbers, DeMoivres theorem, conic sections. Students will determine appropriate mathematical and computational models and methods in problem solving and demonstrate an understanding of mathematical concepts. Students will apply appropriate mathematical and computational models and methods in problem solving. Student cannot receive credit for both this course and MAC 1147 pre-calculus.

Subject code
MAD

Catalog Number
3301

Course Title
Graph Theory

Career
Undergraduate

Course Description
An introduction to the study of graphs. Topics include the following: paths and circuits, connectedness, trees, shortest paths, networks, planar graphs, the coloring of graphs, and directed graphs. Applications of graphs to computer science will be discussed.

MAD3401 - Numerical Analysis

Overview

Subject code
MAD

Catalog Number
3401

Course Title
Numerical Analysis

Career
Undergraduate

Course Description
Basic ideas and techniques of numerical analysis. Topics include: finite differences, interpolation, solution of equations, numerical integration and differentiation, applications, introduction to applied linear algebra. This course will make extensive laboratory use of the computer facility.

MAP - ML for DE

Overview

Subject code
MAP

Course Title
Fundamentals of ML in Differential Equations

Career
Graduate

Course Description
The course aims to introduce students to the fundamentals of neural networks (NNs) in Machine Learning (ML) and their applications in solving ordinary differential equations (ODEs) and partial differential equations (PDEs). The main objectives are to provide graduate students with a strong foundation in the mathematical and numerical principles of neural networks in Machine Learning and to foster students' ability to apply neural networks in solving PDEs in real-world applications.

Overview

Subject code
MAP

Course Title
Intro to Fundamentals of Machine Learning and Neural Networks with applications

Career
Undergraduate

Course Description
This course introduces undergraduate students to the basics of neural networks (NNs) in machine learning (ML) and their applications. The main objectives are to provide students with a foundation in the mathematical and numerical principles behind neural networks and to develop their ability to apply these techniques to real-world problems, such as image classifications. Advanced topics such as, NN for differential equations, will also be covered.

MAP5467 - Stochastic Differential Equations and Applications

Overview

Subject code
MAP

Catalog Number
5467

Course Title
Stochastic Diff Eqns

Career
Graduate

Course Description
Review of measure theory, stochastic processes, Ito Integral and its properties, martingales and their generalizations, stochastic differential equations, diffusions. Applications to boundary value problems and finance. Prerequisites: MAS 3105, MAP 4401, MAA 4211, MAA 5616 or permission of instructor.

MAP6416 - Fourier Analysis

Overview

Subject code
MAP

Catalog Number
6416

Course Title
Fourier Analysis

Career
Graduate

Course Description
Continuation of "Introduction of Fourier Analysis" (MAP 5415). Topics may include interpolation, Sobolev spaces, oscillatory integrals, Hilbert transform, singular integrals, Littlewood-Paley theory. Prerequisite: MAP 5415, MAA 6616 (or consent of the instructor). Corequisite: preferred but not required: MAA 6406, MAA 6506.

MAR7622 - Marketing Research Methodology I

Overview

Subject code
MAR

Catalog Number
7622

Course Title
Mar Res Meth I

Career
Graduate

Course Description
Philosophy, concepts, methods of marketing research design. Experimental methods, sampling procedures, measurement techniques, other methodological considerations. Prerequisites: Successful completion of first year research methods requirements in a College of Business Ph.D. Program or permission of the instructor.

MAS3105 - Linear Algebra

Overview

Subject code
MAS

Catalog Number
3105

Course Title
Linear Algebra

Career
Undergraduate

Course Description
An introduction to the topics in linear algebra most often used in applications. Topics include: matrices and their applications; simultaneous linear equations and elementary operations; linear dependence; vector spaces; rank and inverses; inner products and best approximations; numerical solutions of simultaneous linear equations; eigen-values and eigenvectors; iterative methods for calculating eigenvalues; and systems of linear equations.

MAT3501 - Numbers, Functions and Modeling for Teachers

Overview

Subject code
MAT

Catalog Number
3501

Course Title
Numb, Funct and Modeling

Career
Undergraduate

Course Description
It is a required course for math majors in the FIU teach program. It surveys the mathematics (future) high school mathematics teachers are expected to know--widening their mathematical knowledge base, helping pre-service and in-service teachers gain the knowledge they need to facilitate students' interest in mathematics. Students will demonstrate proficiency in working with mathematical ideas and solving problems involving integers, real, and complex numbers. The course provides a very practical introduction to mathematical proofs.

MDC7120 - Family Medicine Clerkship

Overview

Subject code
MDC

Catalog Number
7120

Course Title
Family Medicine Clerkship

Career
College of Medicine

Course Description
Family medicine is the specialty that focuses on care for the whole person regardless of age, sex, or disease, set within his or her social and community context. The Period 3 Family Medicine Clerkship is a practical opportunity for students to demonstrate progressive skill development, integrating theirknowledge of basic and social sciences, clinical skills, professional development, and social accountability. Under the supervision of FIU Family Medicine faculty, students conduct and document histories, physical exams, assessments, and management plans while providing patient education. The course is aimed at preparing students for Period 4 rotations and their future careers asphysicians, regardless of the specialty they ultimately choose.Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDC7180 - Obstetrics and Gynecology Clerkship

Overview

Subject code
MDC

Catalog Number
7180

Course Title
OB/GYN Clerkship

Career
College of Medicine

Course Description
The Obstetrics and Gynecology Clerkship offers third-year medical students a 6-week rotation in the core discipline of women's health. The gynecologist and obstetrician are involved in every facet of women's health care maintenance and delivery throughout the patient's lifespan. They provide care from prepubertal and early menarche; act as primary care providers for healthy women; help women experience the joy of normal pregnancy and delivery; and provide care during crises of infertility, pregnancy loss, and cancer. Therefore, a general understanding of the field is important to the development of a well-rounded primary care physician. Medical students are exposed to all aspects of the specialty, including ambulatory clinics, hospital inpatient wards, the operating room, emergency room visits and consults, radiology, and the labor and delivery suite. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDC7200 - Internal Medicine Clerkship

Overview

Subject code
MDC

Catalog Number
7200

Course Title
Internal Medicine Clerkship

Career
College of Medicine

Course Description
The Period 3 Internal Medicine Clerkship occurs in consecutive rotations. This clerkship has two components, ambulatory and hospital-based, and is designed to provide medical students with a foundation of knowledge, skills, and attitudes necessary to approach and care for adult patients in outpatient and hospital settings. Students' primary work is done under direct supervision of internalmedicine preceptors from the community, the public health system, and the academic setting. The Internal Medicine Clerkship emphasizes basic assessment and management of core common problems in internal medicine, including identifying patient problems, establishing a differential diagnosis, andplanning an appropriate evaluation and treatment in preparation for an increased independence in management and therapeutics during Period 4. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDC7600 - Surgery Clerkship

Overview

Subject code
MDC

Catalog Number
7600

Course Title
Surgery Clerkship

Career
College of Medicine

Course Description
This clerkship will provide students with experience in the recognition and management of surgical disease and in basic surgical techniques. During this clerkship students will develop understanding of the scientific basis of surgical diseases and disorders. Students will then learn to perform assessments and develop differential diagnoses for these surgical presentations. Students will learn through participating in preoperative care, operative procedures, outpatient surgery clinics and didactic experiences on management of surgical diseases. Students will also learn how to evaluate normal and complicated postoperative recovery with surgical inpatients and outpatients. Upon completion of the surgery clerkship, students will also fully understand norms of professional behavior by working effectively with patients and families as a member of the health care team. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDC7760 - Principles of Radiology

Overview

Subject code
MDC

Catalog Number
7760

Course Title
Principles of Radiology

Career
College of Medicine

Course Description
The Principles of Radiology Course is a largely self-directed online study of selected resources and developed PowerPoint presentations together with directed reading of required text and articles. This course will provide medical students with a basic understanding of the common techniques used in medical imaging, the evidence-based choice of appropriate imaging studies for given clinical symptoms or clinical conditions, the potential complications and side effects of such studies, and the interpretation of medical imaging studies of common clinical conditions. Progress in understanding these concepts will be assessed by several examinations consisting of multiple-choice questions.

MDC7832 - Palliative Care Psychiatry Elective

Overview

Subject code
MDC

Catalog Number
7832

Course Title
Palliative Care Psych

Career
College of Medicine

Course Description
The Palliative Care Psychiatry rotation allows Period 4 medical students to refine the skills they acquired in the Period 3 Psychiatry Clerkship through specialized experience on a Palliative Care service. In particular, students will focus on improving their skills related to psychiatric interviewing, diagnostic reasoning, and treatment planning and goal setting. Students will observe and participate in all aspects of inpatient and ambulatory Palliative Care consults and clinic visits, tumor boards and clinical meetings. Throughout the rotation, students will gain anincreased understanding of the psychosocial and spiritual aspects of care by working directly with psychologists, social workers, and chaplains; as appropriate. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDE - Ind. Research Experience

Overview

Subject code
MDE

Course Title
Independent Research Experience

Career
College of Medicine

Course Description
The Independent Research Experience allows students to pursue scholarly investigations under the guidance of FIU or non-FIU faculty for up to one academic year. Students may enroll in this course for up to one consecutive Summer, Fall, and Spring semesters. Research may be clinical, epidemiologic, translational, or laboratory based; projects must be approved by the course director. As part of this course, students are expected to formulate research questions, develop high-quality plans for investigation, execute research protocols, analyze data and develop presentations and manuscripts.

MDE7014 - Career Advising & Professional Development Rotation

Overview

Subject code
MDE

Catalog Number
7014

Course Title
Career Adv & Prof Dev

Career
College of Medicine

Course Description
Each year of medical school provides students with a gradual increase in responsibility. The transition from the third to fourth year of training occurs at a pivotal time, as students start to narrow their focus and apply to residency in a specific specialty. This course will focus on the development of the clinical and professional skills necessary for the fourth year of medical school. Students will review the core clinical skills necessary to successfully carry the increased level of clinical responsibility during the fourth year of medical school. Additionally, this course will prepare students for the residency application process; with sessions devoted to, among other topics, compiling a curriculum vitae, writing a personal statement, interviewing, and specialty-specific advice. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDE7021 - Medical Nutrition Elective

Overview

Subject code
MDE

Catalog Number
7021

Course Title
Medical Nutrition

Career
College of Medicine

Course Description
This two-week elective is designed to provide an advanced training in medical nutrition to fourth year medical students. The main objective is to assist students in building a strong foundation in nutrition to improve patients' health in their medical practices while enhancing their interprofessional skills. This course employs a hands-on approach for prevention and treatment of common nutrition-related diseases and conditions (including diabetes, cardiovascular disease, chronic kidney disease, obesity, cancer, dysphagia, and bariatric surgery) across lifespan in both in-patient and outpatient settings. During this course, students will build competencies in medical nutrition therapy, culinary medicine, nutrition counselling, community nutrition, and climate change. About 60% of the course will be offered in the partner clinical settings, 20% in form of case-based culinary learning sessions and 20% in form of interactive didactic sessions. The clinical rotations will be offered in 3 tracks:-Pediatrics (feeding disorders, nutrition support, type 1 diabetes, obesity, anorexia nervosa, bulimia)-Surgery (bariatrics, enteral and parenteral tube feeding, dialysis)-Internal Medicine (obesity, diabetes, cardiovascular, bariatrics, and dialysis)Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDE7048 - Narrative Medicine Elective

Overview

Subject code
MDE

Catalog Number
7048

Course Title
Narrative Medicine Elect

Career
College of Medicine

Course Description
Pioneered by Rita Charon, narrative medicine trains doctors and other caregivers to use careful listening and reflective writing to forge deeper connections with their patients, resulting in the provision of better care and the promotion of physician wellness. The narrative medicine elective is offered as a two week rotation, with the option for students to enroll in an additional two-credit longitudinal component. During this elective, students will have the opportunity to explore different types of narrative medicine writing including the parallel chart, 55-word stories, poetry and using narratives as an advocacy tool. Students will participate in discussion sessions about assigned readings; participate in small group writing workshops; and share their writing with their peers. The course director will create individualized writing plans tailored to students' specific interests, objectives, and clinical schedules. Students will write a total, including drafts, of about 10,000 words. Prerequisite: Enrolled in HWCOM.

MDE7053 - Medicine and Society Elective

Overview

Subject code
MDE

Catalog Number
7053

Course Title
Medicine and Society Elective

Career
College of Medicine

Course Description
The Medicine and Society elective is designed for individualized study and further pursuit of topics relevant to the Medicine and Society strand's mission to improve health outcomes for underserved communities in the delivery of care through the educational objectives on social determinants of health and policy. Students design an independent study experience under the tutelage of Medicine and Society or other Humanities, Health, and Society faculty. Potentialprojects include pursuit of a policy initiative in collaboration with Law, a cultural competency project, or an intensive community-based health initiative.Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDE7058 - Medical History through Art

Overview

Subject code
MDE

Catalog Number
7058

Course Title
Medical History

Career
College of Medicine

Course Description
This course will provide an overview of medical world history through the lens of art. The sessions highlight different forms of art (i.e., visual and written) and aim to foster a global perspective. We emphasize certain areas of medicine, including anatomy, physical diagnosis, different types of illness, and the evolution of treatment modalities. The elective also includes a field experience portion, which involves visits to local art museums and other arts institutions. The three principal areas of historical focus are: the four protagonists of our Panther Learning Communities (Hippocrates, Pasteur, Semmelweis, and Anderson); the role of women in medicine; and the evolution of several clinical specialties as portrayed through artistic works. The selected specialties will include obstetrics/gynecology, surgery, psychiatry, pathology, preventive medicine, and radiology. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDE7059 - Community Medicine Practicum

Overview

Subject code
MDE

Catalog Number
7059

Course Title
Community Med Practicum

Career
College of Medicine

Course Description
This longitudinal course aims to increase students' competencies in population health and community needs assessment. Students are evaluated based on their development of a community health written assignment and health promotion plan alongside a service-learning practicum portfolio. A final reflection assignment helps students more deeply understand the importance of social accountability, critical and ethical thinking, and working with underserved/disadvantaged communities. This course develops students' skills and insights into community assessments and efforts that address the social determinants of health on a population level. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDE7061 - Seminars in Physician Leadership Elective

Overview

Subject code
MDE

Catalog Number
7061

Course Title
Seminar Phys Leadership

Career
College of Medicine

Course Description
This course introduces medical students to the foundations of leadership principles and how they apply to the practice of medicine. The course covers four interrelated topics: 1) foundations of leadership; 2) managing common resources to maximize social welfare; 3) anticipating and responding to change at social, organizational, and individual levels; and 4) paradoxes in leadership in a complex world. Case studies are used to introduce students to critical leadership thinking and problem-based learning. Prerequisite: Enrolled in HWCOM

MDE7067 - Professional Development and Clinical Medicine Capstone

Overview

Subject code
MDE

Catalog Number
7067

Course Title
PD and CM Capstone

Career
College of Medicine

Course Description
The Professional Development Capstone is explicitly designed to address anticipated expectations of Professionalism in the first few months of residency and beyond. Additionally, the Capstone in Professional Development is intended to serve as a review of relevant topics for Internship and the introduction of specific practical topics not otherwise covered in the curriculum. The Clinical Medicine Capstone is a yearlong required course for all Period 4 medical students. It consists of two components. The first component is a monthly online module including a clinical reasoning case exercise, several EKG and radiology challenge questions, and a short quiz based on a review article covering a topic relevant to internship. The second component, held during the final month of medical school, is a week-long transition to internship bootcamp consisting of small group and individual role play and standardized patient activities designed to simulate common clinical scenarios encountered during internship. Completion of each of the monthly modules and attendance at the bootcamp are mandatory and will be tracked. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDE7108 - LGBTQ + Healthy Equity Elective

Overview

Subject code
MDE

Catalog Number
7108

Course Title
LGBTQ + Health Equity Elec

Career
College of Medicine

Course Description
This elective will provide medical students with the essential background and tools needed to provide high-quality and culturally appropriate care to patients who identify as LGBTQ (Lesbian, Gay, Bisexual, Transgender, Queer, and Questioning), gender non-conforming, or who are born with differences of sex development. Medical students will diagnose, treat and provide preventative care to LGBTQ and gender non-conforming patients through clinical assignments with health providers who work primarily with this patient population. Additionally, students will work with core FIU HWCOM faculty to produce a public health, research, medical education, or advocacy project related to LGBTQ health. MDE7109 - Fundamentals of Population Health Elective

Overview

Subject code
MDE

Catalog Number
7109

Course Title
Population Health

Career
College of Medicine

Course Description
This elective will provide medical students the essential background to understand the role of population health in medicine. Medical students will have an opportunity to formulate their own Quality Improvement project and/or become involved with an ongoing QI project in an area of their choosing. Quality Improvement projects can be designed towards improving patient outcomes or addressing the social determinants of health using tools such as the Health Risk Profile. This elective is available in both two-week and four-week tracks. In addition, students can use this elective to complete research projects that were initiated in the summer research course or population health work group, if approved by the course director. Through reading materials, the completion of assigned modules and cases, and discussions with faculty, students will develop the skills needed to meaningfully participate in population health initiatives in their future medical careers. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDE7120 - Family Medicine Elective

Overview

Subject code
MDE

Catalog Number
7120

Course Title
Family Medicine Elective

Career
College of Medicine

Course Description
This intensive ambulatory or inpatient block is particularly suited to students interested in primary care. Students will be assigned to either an inpatient or outpatient Family Medicine experience. Under the supervision of FIU faculty, the student will assume a level of independence appropriate to a fourth year student. For each patient s/he sees, the student will be responsible for the history and physical, writing a note, presenting the case to the supervising faculty member, and putting the agreed-upon management plan into action. Through this process, students will hone their patient communication skills, diagnostic skills and clinical reasoning, development of management plans for common ambulatory or inpatient clinical scenarios, and execution of patient education. Students will attend all departmental rounds and teaching activities, as well as complete any relevant reading assignments. Students will be provided with regular feedback from the supervising physician. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDE7121 - Primary Care Sports Medicine Elective

Overview

Subject code
MDE

Catalog Number
7121

Course Title
PC Sports Med Elective

Career
College of Medicine

Course Description
This is an outpatient clinical rotation that provides a comprehensive spectrum of evaluation and management of both medical illness and orthopedic injury as it relates to musculoskeletal medicine. Students will diagnose, treat and help prevent general medical problems and injuries in athletes regardless of gender, or level of competition. The care of the athlete will include performance of pre-participation sports physicals, assessment of common medical problems and musculoskeletal injuries, as well as treatment and rehabilitation of these conditions. The student will learn nonsurgical treatments for acute and overuse musculoskeletal problems to minimize time away from sports, school or work. The student will also treat chronic problems such as osteoarthritis to help minimize disability and maximize function, develop skills in conservative fracture management with splinting and casting and may be involved in sideline coverage of sporting events. The student will also be exposed to musculoskeletal ultrasound diagnostics and injections. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

Course Title
Gastroenterology/Hepatology

Career
College of Medicine

Course Description
This course will consist of a four week rotation, which will include inpatient and outpatient gastroenterology and hepatology. Throughout the rotation, students will be assuming primary responsibility of patients under the supervision of gastroenterology attendings. The experience will also allow for participation in varied endoscopic procedures, such as esophageal manometry, and upper and lower endoscopy. During the week, students will participate in pathology and radiology conferences geared to gastroenterology and hepatology cases. The course will concentrate on teaching students how to interpret clinical information and develop therapeutic decision making. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDE7280 - Hematology-Oncology Elective

Overview

Subject code
MDE

Catalog Number
7280

Course Title
Hematology-Oncology Elect

Career
College of Medicine

Course Description
This rotation is intended to prepare students to learn a basic approach to evaluation, diagnosis, staging and treatment of patients with blood diseases and cancer. Through exposure to patients with these diseases, students will improve their physical diagnosis skills, recognition of complications of disease, and understanding of therapeutic issues. Students will learn concepts of palliative care, end of life and hospice care. The rotation is mainly inpatient-consult service with some outpatient exposure. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDE7301 - Allergy and Clinical Immunology Elective

Overview

Subject code
MDE

Catalog Number
7301

Course Title
Allergy and Clinic Imm Elec

Career
College of Medicine

Course Description
Students actively participate in all outpatient clinics to ensure a broad and comprehensive experience. Where pertinent to our training goals, students will also have the opportunity to evaluate inpatients. Emphasis will be placed on history-taking and the physical examination as they relate to patients with allergic and immunologic conditions. Students will develop basic skills in the evaluation of and interpretation of immunological studies performed on blood specimens, pertinent imaging studies, pulmonary function testing and allergy skin testing. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDE7310 - Rheumatology Elective

Overview

Subject code
MDE

Catalog Number
7310

Course Title
Rheumatology Elective

Career
College of Medicine

Course Description
This rotation includes office and hospital consultation. The objective is to improve the student's understanding of the pathophysiology, clinical presentation, differential diagnosis, and treatment of common rheumatologic disorders, including the evaluation of soft tissue rheumatism, acute and chronic arthritis, autoimmune connective tissue disorders, and indications for arthrocentesis and tendon injections. Students learn the interpretation of the most common laboratory tests used in rheumatic conditions. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

Course Title
Anatomic & Clinical Pathology

Career
College of Medicine

Course Description
This elective will provide an introduction and overview to the practice of pathology and is aimed at the student who may be considering pathology as a career. The student will be exposed to anatomic pathology (surgical, autopsy and cytopathology) and clinical pathology (clinical chemistry, hematology, microbiology and transfusion medicine). Molecular pathology will also be touched upon. The student will have access to the entire laboratory but will spend the most time in sign-out sessions and clinical conferences with the attending pathologists and residents. The student will learn pathology but will also experience what a career in pathology is like in a cordial setting surrounded by enthusiastic physicians. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDE7537 - Pediatric Pathology Elective

Overview

Subject code
MDE

Catalog Number
7537

Course Title
Pediatric Pathology Elective

Career
College of Medicine

Course Description
This elective will allow the student to become familiar with, observe, and participate in the daily activities in the pediatric pathology department of a large tertiary care Children's Hospital. Students will be exposed to both anatomic pathology and clinical laboratory medicine with emphasis on neonatal and pediatric disease processes. They will also gain an appreciation of performance of laboratory tests and their interpretation, quality control and cost-effectiveness. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDE7550 - Ophthalmology Elective

Overview

Subject code
MDE

Catalog Number
7550

Course Title
Ophthalmology Elective

Career
College of Medicine

Course Description
The clinical rotation in ophthalmology provides students with a focused and in-depth experience in the evaluation, diagnosis, and management of ophthalmic conditions. Students spend substantial time in the clinic and the operating room in general ophthalmology or their ophthalmologic subspecialty of interest. Students are expected to be actively involved in the workup of patients with various presenting concerns; and to interpret and present their findings and suggested clinical management to the attending physician. Students also have the opportunity to perform research in a preferred area of interest. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDE7570 - Orthopedic Surgery Elective

Overview

Subject code
MDE

Catalog Number
7570

Course Title
Orthopedic Surgery Elective

Career
College of Medicine

Course Description
The section of Orthopedics presents to the student a comprehensive outline of the spectrum of orthopedic surgery as practiced in a community hospital. The student is involved in an intensive in-patient experience and has significantly increased responsibility, involving primary workup of new patients and writing orders. The student performs procedures such as evaluating patients, taking an orthopedic history, and performing a physical examination of the musculoskeletal system. The student should improve his or her ability to manage complex patient presentations, including diagnosing and treating common adult orthopedic problems. The student should develop advanced skills in fracture treatment and cast application. He or she should be involved in joint replacement surgery and management of postoperative adult orthopedic patients.Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDE7580 - Physical Medicine and Rehabilitation Elective

Overview

Subject code
MDE

Catalog Number
7580

Course Title
Physical Med & Rehab Elec

Career
College of Medicine

Course Description
This elective offers students experience in the diagnosis and management of patients with a variety of neuro-muscular diagnoses such as stroke, spinal cord injury, traumatic brain injury, and neuro-degenerative disorders such as multiple sclerosis. Students may treat patients with musculo-skeletal disorders such as amputation, total hip arthroplasty, total knee arthroplasty, and multiple trauma victims. Students attend physical, occupational, and speech therapy sessions with their patients to learn the daily process of rehabilitation. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDE7583 - Physical Medicine and Rehabilitation and Cancer Rehabilitation Elective

Overview

Subject code
MDE

Catalog Number
7583

Course Title
PM&R & Cancr Rhb Elect

Career
College of Medicine

Course Description
Medical students will work with attending physiatrists (physicians specializing in physical medicine and rehabilitation) on a daily basis. They will be taught basic principles of rehabilitation medicine as they apply to spine and musculoskeletal medicine and the care of cancer patients, and exposed to various diagnostic tests used to assess common neuro-musculoskeletal conditions in this population, such as electro diagnostic testing and musculoskeletal ultrasound. They will also be part of discussions on the treatment of these conditions, learning about the role of medications, injections and rehabilitative therapies. The medical student will be asked to do a brief presentation at the end of the rotation on a cancer rehabilitation topic. Opportunity to be involved in a research project can be discussed based on the student's interest. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDE7590 - Oral and Maxillofacial Surgery Elective

Overview

Subject code
MDE

Catalog Number
7590

Course Title
Oral and Maxillofacial Surg El

Career
College of Medicine

Course Description
This elective is an opportunity for medical students to expand their knowledge in anatomy and physiology of the oral cavity, maxillofacial region, the neck, and their adnexal structures to the extent of being capable of recognizing abnormal findings. Students also learn about the surgical management of oral and head and neck pathology and the correction of congenital and traumatic deformities. Acute trauma care is a major component of this service. Students have the opportunity to perform minor procedures in the hospital clinic, as well as the emergency room. Students observe and participate in surgical procedures involving oral and maxillofacial pathology, IV sedation, infections, major hard and soft tissue trauma, reconstruction, and dento-craniofacial deformities. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

Overview

Subject code
MDE

Catalog Number
7592

Course Title
Otolaryngology/ENT Elective

Career
College of Medicine

Course Description
This clinical elective exposes medical students to the surgical subspecialty of Otolaryngology-Head and Neck Surgery, also known as Ear, Nose and Throat (ENT). Medical students work directly with clinical team in the operating room, inpatient setting, and outpatient clinic caring for patients with a variety of medical and surgical diseases affecting the head and neck region. Students are expected to be an active member of the patient care team; they should participate in diagnostic evaluations, present their findings to the attending physician, and synthesize assessments and plans. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDE7600 - General Surgery Elective

Overview

Subject code
MDE

Catalog Number
7600

Course Title
General Surgery Elective

Career
College of Medicine

Course Description
The student works directly with general and vascular surgeons. During the rotation, the student is exposed to all phases of patient care, including outpatient clinic, the operating room and hospital. Emphasis will be placed on the initial assessment, physical examination and preoperative evaluation of surgical patients. When appropriate, the student will follow individual patients whose cases are particularly instructive. While no formal projects are required, ample opportunity exists for independent projects as dictated by the student's special interests. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDE7605 - Vascular Surgery Elective

Overview

Subject code
MDE

Catalog Number
7605

Course Title
Vascular Surgery Elective

Career
College of Medicine

Course Description
The goal of the rotation is to provide students with a thorough understanding of the diseases of the peripheral vascular systems - arterial, venous, and lymphatic. Those considering a career in vascular surgery can gauge if the specialty meets their interests and skills while those planning to choose other fields can learn more than enough to know when referral to a vascular surgeon is appropriate. Students will work with our vascular surgeons in the office, hospital wards, operating room, interventional suite, and wound center to learn the about the diagnosis and management of the full spectrum of vascular diseases. They will be exposed to patients with carotid artery disease, aortic and peripheral artery aneurysms, peripheral artery occlusive disease, dialysis access needs, venous thrombosis, varicose veins, and chronic wounds. They will be able to assist in open surgeries and in balloon angioplasty/stent procedures. There will also be opportunities for clinical research if desired. There will be no night or weekend call. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDE7632 - Cardiothoracic Surgery Elective

Overview

Subject code
MDE

Catalog Number
7632

Course Title
Cardiothoracic Surgery Electiv

Career
College of Medicine

Course Description
The goal is to provide fourth year medical students with a special interest in Cardiothoracic Surgery with the opportunity to become more familiar with the pathophysiology and clinical presentation of the most common cardiothoracic diseases. It is expected that the medical student will be part of the Cardiothoracic Surgical team involved in the daily routine including the operating room, the cardiothoracic intensive care unit and floor. Some exposure to catheter based therapy in the hemodynamics room (cath lab) will also be included. Because of the short duration of the rotation, students will have exposure to both the cardiac and thoracic pathways. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

Course Title
Surg Oncology Elective

Career
College of Medicine

Course Description
The goal of this elective is to introduce the student to the surgeon's role in the multidisciplinary management of patients with cancer. The program includes the evaluation and management of patients with malignant and benign solid tumors and their surgical management. The full spectrum of care includes medical oncology, radiation oncology and nuclear oncology. The experience will include outpatient clinics, in-patient rounds/consults, surgery and exposure to clinical trials and clinical research. The students will attend and present at weekly multidisciplinary tumor conferences, attend cancer committees, and participate in monthly journal clubs. The opportunity to participate in clinical research will be made available to interested students. Prerequisite: Enrolled in Herbert Wertheim College of Medicine.

MDE7661 - Breast Surgery Elective

Overview

Subject code
MDE

Catalog Number
7661

Course Title
Breast Surgery Elective

Career
College of Medicine

Course Description
The Breast Surgery Elective focuses exclusively on the clinical management of benign and malignant breast diseases. The student will become proficient in taking a history, performing a breast examination, and developing a differential diagnosis for breast patients. The student will learn about the surgical management of breast cancer and the integration of other modalities in the overall management of this disease. Working 1-on-1 with an FIU faculty attending surgeon, the student will have some responsibility for inpatient care and will have the opportunity to be first assistant in the operating room. Weekly didactic sessions with the attending physician will cover the most important aspects of breast cancer including biology, diagnostics, prevention, and treatment. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

7780

Course Title
Radiation Oncology Elective

Career
College of Medicine

Course Description
This rotation provides students with supervised participation in the care of radiation oncology patients. This includes the diagnostic/clinical evaluation of the patient's disease and the development of treatment plans involving radiation therapy. Students are exposed to state-of-the- art radiation oncology equipment and, during the planning phase, are shown the use of CT imaging with plain and contrast-enhanced techniques for therapy planning and positioning of the patient for radiation treatment. They are exposed to the management of the most common tumors seen in our community, including breast, prostate, lung, GI, skin, and head and neck cancer. Students are introduced to palliative care and the incorporation of integrative medicine in the overall care of the patient. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

Course Title
Neurology Elective

Career
College of Medicine

Course Description
This course is designed to give students an advanced experience in the field of Neurology. By the completion of the rotation, students will be able to perform a detailed neurological examination and describe the neuro-anatomic phases of the examination and any findings. There will be an emphasis of the diagnosis and treatment of common neurologic conditions including headache, neck pain, back pain, peripheral neuropathy, dementia, seizures, multiple sclerosis, pain management, cerebrovascular disease, and altered mental status. Students will additionally receive basic training in reading EMG/NCS and EEG. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDE7807 - Neuro-Oncology Elective

Overview

Subject code
MDE

Catalog Number
7807

Course Title
Neuro-Oncology Elective

Career
College of Medicine

Course Description
The management of patients with primary and metastatic brain malignancies is a complex endeavor. Treatment strategies for these patients often involve a multi-disciplinary approach. This rotation will provide exposure to all of the main modalities that care for patients with neurologic malignancies, including radiation oncology, neurosurgical oncology, and medical neuro-oncology, with a focus on medical neuro-oncology. Outside of the core subspecialties, there are opportunities for time in neuro-radiology, review of current surgical cases with the pathology department, and exposure to rehab and palliative medicine through subspecialty clinics. Students should take away a basic understanding of the management of patients with primary and secondary brain malignancies as well as the neurologic complications of cancer patients undergoing treatment.

MDE7820 - Pain Management Elective

Overview

Subject code
MDE

Catalog Number
7820

Course Title
Pain Management Elective

Career
College of Medicine

Course Description
Students will rotate in an ambulatory setting at a pain management practice under the direct supervision of an FIU faculty member. This rotation will provide students with exposure to the evaluation and management of acute and chronic pain including: upper and lower back pain; chronic arthritis; disk disease; radicular and neuropathic pain syndromes; and pain associated with malignancy. Students will gain an understanding of common procedures used in pain management: local anesthesia, joint injections, epidural injections, peripheral nerve blocks, and trigger point injections. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDE7843 - Community Psychiatry Elective

Overview

Subject code
MDE

Catalog Number
7843

Course Title
Community Psych Elective

Career
College of Medicine

Course Description
This 2-week or 4-week rotation allows Period 4 medical students to refine the skills they acquired in the Period 3 Psychiatry Clerkship through further inpatient, outpatient and emergency psychiatry experiences. Students will focus on honing their skills related to psychiatric interviewing, diagnostic reasoning, and treatment planning. Students will participate in the initial assessment of patients presenting for admission and will follow inpatients throughout their hospital stay. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDE7846 - Neuromodulation Elective

Overview

Subject code
MDE

Catalog Number
7846

Course Title
Neuromodulation Elective

Career
College of Medicine

Course Description
This elective offers 4th year Herbert Wertheim College of Medicine (HWCOM) medical students the opportunity to learn about neuromodulation techniques in the treatment of mood disorders. Students learn the theoretical basis for the use of electroconvulsive therapy (ECT) and repetitive transcranial stimulation (rTMS) in the treatment of mood disorders. They learn indications and contraindications to treatment, the process of evaluation of patients prior to and during treatment (including use of standardized depression rating scales), how to monitor forcomplications and side effects to treatment, and the latest research in the field.

MDE7911 - Independent Research Experience

Overview

Subject code
MDE

Catalog Number
7911

Course Title
Ind. Research Experience

Career
College of Medicine

Course Description
The Independent Research Experience allows students to pursue scholarly investigations under the guidance of FIU or non-FIU faculty for up to one academic year. Students may enroll in this course for up to one consecutive Summer, Fall, and Spring semesters. Research may be clinical, epidemiologic, translational, or laboratory based; projects must be approved by the course director. As part of this course, students are expected to formulate research questions, develop high-quality plans for investigation, execute research protocols, analyze data and develop presentations and manuscripts. Prerequisite:1. Completion of all required coursework for AY1 and AY22. USMLE Step 1 passing score3. Research project/plan (including identified mentor) approved by the course director

MDE7930 - Anatomy Elective

Overview

Subject code
MDE

Catalog Number
7930

Course Title
Anatomy Elective

Career
College of Medicine

Course Description
The 4-week Anatomy Elective will allow students the opportunity to gain a deeper insight into human anatomy and develop the skills and knowledge required for surgical internships and subspecialties. This will allow the students to develop an understanding of the anatomical basis of successful surgical interventions and the risks involved. Under the direct supervision of faculty anatomists and clinicians, students will perform dissections of all relevant body regions in groups of 4-6 students. Moreover, students will assist in the laboratory teaching sessions of the courses "Structure of the Human Body" and "Musculoskeletal Anatomy for Physiotherapy Students." Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDE8046 - Medical Spanish Elective

Overview

Subject code
MDE

Catalog Number
8046

Course Title
Medical Spanish Elective

Career
College of Medicine

Course Description
Students who complete the three-year longitudinal focus in Medical Spanish will be able to demonstrate enhanced communication skills in Spanish. This course is offered to students who have completed the Medical Spanish focus in years 1-3. Language concordance can improve healthcare outcomes and Miami is a unique city to train in due to the large percentage of patients who speak Spanish. As part of this elective, students will have the opportunity to complete the final level of CanopyLearn and participate in small group sessions. There will a formative OSCE and a project to complete by the end of the elective. Prerequisites: 1. Senior medical student (4th year)2. Completion of core clerkships3. Successful passing of USMLE Step 1 and 24. Successful passing of promotional OSCE at end of AY 35. Basic Life Support certification6. Completion of Longitudinal Medical Spanish Focus

MDE8394 - Evidence-Based Lifestyle Medicine Elective

Overview

Subject code
MDE

Catalog Number
8394

Course Title
EB Lifestyle Med. Elect..

Career
College of Medicine

Course Description
Lifestyle Medicine is a medical specialty that uses evidence-based lifestyle interventions as the primary modality to prevent, treat and potentially reverse chronic conditions. This course offers a broad perspective on the principles and practice of Lifestyle Medicine and aims to build the knowledge base and the skills for addressing its six pillars¿a whole-food, plant-predominant eating pattern, physical activity, restorative sleep, stress management, avoidance of risky substances and positive social connections. The philosophy of this course is centered on an evidence-based framework, critical thinking, integration with disease-specific physiopathology and pharmacotherapy, as well as on effective patient counseling strategies rooted in Motivational Interviewing and Positive Psychology. Prerequisite: 1. Senior medical student (4th year)2. Completion of core clerkships3. Successful passing of USMLE Step 1 and 24. Successful passing of promotional OSCE at end of AY 35. Basic Life Support certification

MDI7160 - Obstetrics and Gynecology Sub-Internship

Overview

Subject code
MDI

Catalog Number
7160

Course Title
Obgyn Subinternship

Career
College of Medicine

Course Description
During the obstetrics and gynecology (ob/gyn) sub-internship, the student is responsible for performing all intern level activities under supervision including, but not limited to: evaluating patients' presenting issues and all medical concerns, admitting patients, managing labor and delivery, and formulating a management plan. The sub-intern will demonstrate the ability to counsel and obtain informed consent for vaginal and cesarean deliveries and postpartum tubal ligations. S/he will interpret fetal heart rate tracings and formulate a plan of care for an abnormal tracing. S/he will be responsible for crosscoverage of postpartum patients during labor and delivery shifts. S/he may also be involved in the gynecologic care of patients, including pre-, intra- and post-operative management. The student isexpected to participate in all of the educational activities of the Department of Obstetrics and Gynecology during the sub-internship. Prerequisite: Student must be In his/her fourth year and have successfully completed all core third year clerkships.

MDI7200 - Internal Medicine Subinternship

Overview

Subject code
MDI

Catalog Number
7200

Course Title
Internal Medicine Subinternshp

Career
College of Medicine

Course Description
The Sub-Internship in Internal Medicine is intended to prepare students to effectively care for medical conditions commonly encountered during inpatient rotations, including ward emergency scenarios. Building on the skills gained during period 3, students will take a more active role in patient care; including admitting patients, documenting in the electronic medical record, entering orders, and coordinating and implementing the patient's care plan. This rotation will provide necessary skills to be successful during their first year of post-graduate education. The sub-intern will fulfill clinical and academic responsibilities as an integral team member of an inpatient medical service. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

Overview

Subject code
MDI

Catalog Number
7400

Course Title
Pediatric Medicine Subintern

Career
College of Medicine

Course Description
The Pediatric Medicine Sub-internship gives the student increased responsibility for decisions made for the total care of the patient. In general, the student is expected to function more as an intern than as a third year student. During the sub-internship, the student will be exposed to all competencies central to medical education; including interpersonal skills, professionalism, practice and systems based learning, patient care, and medical knowledge. Sub-interns are expected to examine patients admitted to the inpatient hospitalist services, write daily progress notes and enter orders in the medical record, develop and assist in implementation of plans for care, and make daily rounds on all patients. Students will participate in all academic activities of the Hospitalist Service, including simulation training and didactic lectures. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDI7480 - Pediatric Orthopedic Surgery Subinternship

Overview

Subject code
MDI

Catalog Number
7480

Course Title
Pediatric Orthopedic Surg Sub

Career
College of Medicine

Course Description
The Orthopedics sub-internship will present the sub-intern with a comprehensive outline of the spectrum of orthopedic surgery as practiced in a community hospital. The sub-intern will be involved in an intensive in-patient experience and will have significantly increased responsibility; involving taking an orthopedic history, performing a focused musculoskeletal exam, participating in the primary workup of new patients and writing orders. Over the course of the rotation, the sub-intern should improve his or her ability to manage both common and complex patient presentations. The sub-intern should develop advanced skills in fracture treatment and cast application. He or she should be involved in a wide array of pediatric orthopedic surgeries and the management of postoperative pediatric orthopedic patients. The sub-intern will participate in daily patient care tasks, take night call, write notes, and dictate discharge summaries. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

7600

Course Title
General Surgery Subinternship

Career
College of Medicine

Course Description
This course is designed for students who desire a greater in-depth experience in general surgery or who are seriously considering surgery as a possible career choice. It serves as an exploratory path for a planned career in general surgery or other surgical sub-specialties. In this role, the subintern will have more responsibilities than a period 3 clerkship student. The student will examine patients, assist in surgery, participate in pre-operative and post-operative care and will also be encouraged to develop his/her clinical and technical skills. The student will be expected to participate in all of the educational activities of the Department of Surgery during the course of his/her rotation. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

7660

Course Title
Plastic & Reconstructive Sub

Career
College of Medicine

Course Description
The Subinternship in Plastic Surgery is a 4-week experience designed to provide the student with advanced exposure to the clinical problems and techniques commonly encountered in the field of plastic surgery, with the goal of preparing the student for residency in this discipline. A student may choose to focus on pediatric plastic surgery, hand surgery, general reconstructive surgery, or aesthetic surgery. Students will rotate through a single setting during the rotation and will develop working relationships with the surgical preceptor. The student is expected to participate in pre- and post-operative office visits, hospital visits, and surgeries. In addition, the student will be expected to further advance his or her basic plastic surgery technical skills. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

College of Medicine

Course Description
In this rotation, the student will acquire knowledge of Urology and urologic anatomy; develop an understanding of and ability to perform a urologic history and physical exam; interview and present patients; develop an understanding of emergent urologic issues as well as common urologic issues with an emphasis on the acute scrotum, urinary tract infections, urinary stones, incontinence, benign prostatic hyperplasia, erectile dysfunction, hematuria and prostate cancer/PSA testing by both didactic and practice based learning; develop an understanding of a spectrum of urologic procedures/surgeries, including foley catherization, cystoscopy, and transrectal ultrasound and prostate biopsy by observation and participation; develop an understanding of peri-operative urologic issues of both urologic and non-urologic patients via inpatient encounters; and develop an understanding of the role of a Urologist in the care of both math and female patients and when an appropriate referral should be made (emergent or routine). The student will function as a supervised member of the urologic team, interacting with faculty and resident staff and participating in urologic clinics and in the operating room. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDI7680 - Trauma/Acute Care Surgery Subinternship

Overview

Subject code
MDI

Catalog Number
7680

Course Title
Trauma/Acute Care Surgery

Career
College of Medicine

Course Description
The Trauma/Acute Care Surgery subinternship is intended to provide the student with in-depth knowledge of patient care as it relates to trauma and non-trauma emergency surgical diseases. The student is expected to function at the level of a junior resident and be on the scene for first-line evaluation and management of patients in the emergency room. In addition, it is expected that the student maintains close follow-up of the patient's progress on a daily basis. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDR7060 - Medical Ethics and Humanism Elective

Overview

Subject code
MDR

Catalog Number
7060

Course Title
Med Ethics and Hum Elective

Career
College of Medicine

Course Description
Offered as a two-week rotation, with the option for an additional two-credit longitudinal component; this elective is designed for the individualized study of topics in clinical, research, and service-learning ethics and humanism in medicine. Students will examine ethical and humanistic issues in medicine that emerge in the clinical setting, lab, or community. Students will read, write and analyze case vignettes, attend community ethics activities (e.g. Hospital ethics committee meetings), develop a scholarly project, and contribute to an ethics research project. Humanism in medicine is the recognition that both practitioner and patient are human beings, with the shared values and experiences of humanity. This provides a framework for improved clinical interactions and addresses phenomena such as ethical leadership, inclusive communication, and burnout. The course director will create learning contracts tailored to students' individual interests, objectives, and clinical schedules. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDR7910 - Research Scholarship

Overview

Subject code
MDR

Catalog Number
7910

Course Title
Research Scholarship

Career
College of Medicine

Course Description
The Research Scholarship Course aims to develop competencies required to do research as a lead investigator or colead investigator. This course provides students the opportunity to be exposed to and supported through the completion of a research project in a role that very closely resembles the role of a primary investigator or first author researcher. The student should be a full participant and a crucial element in the generation of (or fully understand, if assigned to anongoing project) the research idea (research question or hypothesis), the development of the project proposal, data collection tools, data collection activities, analysis, interpretation, and the writing of a short document summarizing the experience. Potential research projects could encompass, but are not to be limited to the areas of basic sciences and community-based clinical and epidemiological research. Prerequisite: Enrolled in the Herbert College of Medicine.

Catalog Number
7160

Course Title
Obstetrics/Gynecology Selectiv

Career
College of Medicine

Course Description
This fourth year clinical selective in Obstetrics and Gynecology offers the student the opportunity to enhance his/her skills in outpatient diagnosis and management. The student is expected to adhere to the schedule agreed upon with the FIU faculty member, including call duty, rounding, and other clinical responsibilities (ie. those related to surgery, outpatient clinic, or the labor floor). The rotation may be tailored based on the student's specific goals and learning objectives; the student should reach out to the course director to discuss special considerations. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

Course Title
Perinatology/Maternal Fetal Me

Career
College of Medicine

Course Description
This Period 4 clerkship allows students to experience the full range of maternal-fetal medicine and familiarizes students with the diagnosis and management of pregnant patients who have obstetrical, medical, or surgical complications. Students receive experience in ultrasound, genetics, genetic counseling, and the management of high-risk obstetrical patients. Students follow patients through theinpatient antepartum service and participate in the care of high-risk obstetrical patients admitted to the hospital. Attendance at the following conferences is required: FHR tracing and labor management review, high risk obstetrics conference, grand rounds, prenatal - neonatology conference, and journalclub. Students are required to take call on the Labor and Delivery Unit one night per week.

Course Title
Gastroenterology/Hepatology Se

Career
College of Medicine

Course Description
This course will consist of a four week rotation, which will include inpatient and outpatient gastroenterology and hepatology. Throughout the rotation, students will be assuming primary responsibility of patients under the supervision of gastroenterology attendings. The experience will also allow for participation in varied endoscopic procedures, such as esophageal manometry, and upper and lower endoscopy. During the week, students will participate in pathology and radiology conferences geared to gastroenterology and hepatology cases. The course will concentrate on teaching students how to interpret clinical information and develop therapeutic decision making. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDS7494 - Pediatric Orthopedic Surgery Selective

Overview

Subject code
MDS

Catalog Number
7494

Course Title
Peds Ortho Surgery Sel

Career
College of Medicine

Course Description
The section of Orthopedics presents to the fourth-year student a comprehensive outline of the spectrum of orthopedic surgery as practiced in a pediatric setting. The student is involved in an intensive in-patient experience and has increased responsibility, involving primary workup of new patients and writing orders. The student also performs procedures such as evaluating patients, taking an orthopedic history, performing a physical examination of the musculoskeletal system, assisting in the operating room, and being involved in postoperativecare. The student is involved in the management of orthopedic trauma and is expected to participate with the orthopedic surgery team in the diagnosis, surgical treatment, and postoperative management of orthopedic trauma patients. The student may participate directly with patients in the emergency department, operating room, intensive care unit, and the orthopedic unit.

MDS7580 - Physical Medicine and Rehabilitation Selective

Overview

Subject code
MDS

Catalog Number
7580

Course Title
Phys Med and Rehab Sel

Career
College of Medicine

Course Description
This selective offers students experience in the diagnosis and management of patients with a variety of neuro-muscular diagnoses such as stroke, spinal cord injury, traumatic brain injury, and neuro-degenerative disorders such as multiple sclerosis. Students may treat patients with musculo-skeletal disorders such as amputation, total hip arthroplasty, total knee arthroplasty, and multiple trauma victims. Students attend physical, occupational, and speech therapy sessions with their patients to learn the daily process of rehabilitation. They learn to perform accurate functional assessments of patients, establish a plan of care for those patients, and provide accurate estimates of goals of the admission, including length of stay. Students learn comprehensive discharge planning for a newly disabled individual. Prerequisite: Enrolled in Herbert Wertheim College of Medicine.

MDS7605 - Vascular Surgery Selective

Overview

Subject code
MDS

Catalog Number
7605

Course Title
Vascular Surgery Selective

Career
College of Medicine

Course Description
The goal of the rotation is to provide students with a thorough understanding of the diseases of the peripheral vascular systems - arterial, venous, and lymphatic. Those considering a career in vascular surgery can gauge if the specialty meets their interests and skills while those planning to choose other fields can learn more than enough to know when referral to a vascular surgeon is appropriate. Students will work with our vascular surgeons in the office, hospital wards, operating room, interventional suite, and wound center to learn about the diagnosis and management of the full spectrum of vascular diseases. They will be exposed to patients with carotid artery disease, aortic and peripheral artery aneurysms, peripheral artery occlusive disease, dialysis access needs, venous thrombosis, varicose veins, and chronic wounds. They will be able to assist in open surgeries and in balloon angioplasty/stent procedures. There will also be opportunities for clinical research if desired. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDS7630 - Cardiothoracic Surgery Selective

Overview

Subject code
MDS

Catalog Number
7630

Course Title
Cardiothoracic Surgery Select

Career
College of Medicine

Course Description
The goal is to provide fourth year medical students with a special interest in cardiothoracic surgery with the opportunity to become more familiar with the pathophysiology and clinical presentation of the most common cardiothoracic diseases. It is expected that the medical student will be part of the cardiothoracic surgical team involved in the daily routine including the operating room, the cardiothoracic intensive care unit and floor. Some exposure to catheter-based therapy in the hemodynamics room (cath lab) will also be included. Because of the short duration of the rotation, students will have exposure to both the cardiac and thoracic pathways. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDS7641 - Surgical Oncology Selective

Overview

Subject code
MDS

Catalog Number
7641

Course Title
Surgical Oncology Selective

Career
College of Medicine

Course Description
The goal of this selective is to introduce the student to the surgeon's role in the multidisciplinary management of patients with cancer. The program includes the evaluation and management of patients with malignant and benign solid tumors and their surgical management. The full spectrum of care includes medical oncology, radiation oncology and nuclear oncology. The experience will include outpatient clinics, in-patient rounds/consults, surgery and exposure to clinical trials and clinical research. The students will attend and present at weekly multidisciplinary tumor conferences, attend monthly cancer committees, and participate in monthly journal clubs. The opportunity to participate in clinical research will be made available to interested students. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDS7650 - Neurosurgery/Neuroscience Selective

Overview

Subject code
MDS

Catalog Number
7650

Course Title
Neurosurgery/Neurosci Selectiv

Career
College of Medicine

Course Description
The 4-week Neurosurgery/Neuroscience Selective will assign interested students to faculty neurosurgeons at one of our affiliated facilities. This rotation presents the student the broad-spectrum of neurosurgical conditions and procedures encountered in a tertiary hospital setting. Students are expected to be involved in all aspects of pre-operative, intra-operative, and post-operative care; including care provided in the inpatient, outpatient, and surgical settings. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDS7660 - Plastic and Reconstructive Surgery Selective

Overview

Subject code
MDS

Catalog Number
7660

Course Title
Plastic & Reconstructive Sur S

Career
College of Medicine

Course Description
The selective rotation in plastic surgery is a 4-week rotation designed to expose the student to a wide variety of clinical problems and techniques commonly encountered in the field of plastic surgery. The student will be exposed to all subspecialties in plastic surgery, including general reconstructive surgery, pediatric/craniofacial surgery, hand surgery, and aesthetic surgery. Students will rotate through an in-patient setting during the rotation and will be expected to participate in pre- and post-operative office visits, hospital visits, and surgeries. In addition, the student will be expected to master wound closure techniques and other basic plastic surgery technical skills. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDS7682 - Trauma Surgery Selective

Overview

Subject code
MDS

Catalog Number
7682

Course Title
Trauma Surgery Selective

Career
College of Medicine

Course Description
This selective provides the 4th year medical student experience in the evaluation and treatment of the patient with severe trauma. The student will be initially involved in the assessment and stabilization of the patient in the Trauma Room in the ER and will then be involved in the preoperative management, intraoperative treatment, and postoperative recovery of the patient. Students will be exposed to emergency interpretation of imaging and diagnostic studies, ventilatory management, invasive monitoring procedures and interventional procedures such as chest tube insertion, thoracentesis and paracentesis
Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDS

Catalog Number
7710

Course Title
Emergency Med Clerkship

Career
College of Medicine

Course Description
The Emergency Medicine Clerkship is intended to make the student familiar with the wide range of clinical conditions, minor to major, which are responsible for the patient seeking care in an Emergency Department. The student will practice skills in the recognition and management of acute life-threatening conditions and exacerbation of serious disease in a strictly supervised setting. Prerequisite: 1. Enrolled in the FIU Herbert Wertheim College of Medicine 2. Passing USMLE Step 1 3. Basic Life Support certification (BLS)

MDS7760 - Diagnostic Radiology Selective

Overview

Subject code
MDS

Catalog Number
7760

Course Title
Diagnostic Radiology Selective

Career
College of Medicine

Course Description
This rotation is intended to give students an introduction to the basics of diagnostic imaging, the appropriate choice of imaging method for given clinical problems and the side-effects and risks associated with each. Students will become familiar with imaging findings in common clinical condition. The rotation will involve online modules, small group sessions and 'virtual' and real reading room sessions. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDS7780 - Radiation Oncology Selective

Overview

Subject code
MDS

Catalog Number
7780

Course Title
Radiation Oncology Sel

Career
College of Medicine

Course Description
This rotation provides students with supervised participation in the care of radiation oncology patients. This includes the diagnostic/clinical evaluation of the patient's disease and the development of treatment plans involving radiation therapy. Students are exposed to state-of-the- art radiation oncology equipment and, during the planning phase, are shown the use of CT imaging with plain and contrast-enhanced techniques for therapy planning and positioning of the patient for radiation treatment. They are exposed to the management of the mostcommon tumors seen in our community, including breast, prostate, lung, GI, skin, and head and neck cancer. Students are introduced to palliative care and the incorporation of integrative medicine in the overall care of the patient.Prerequisite: Enrolled in Herbert Wertheim College of Medicine.

MET5105 - Planetary Climate Change: Processes and Impacts

Overview

Subject code
MET

Catalog Number
5105

Course Title
Climate Process and Impact

Career
Graduate

Course Description
Interdisciplinary study of the reasons the Earth's climate is changing, the climates past and expected future variations, impacts on the human and natural environments, and ways to reduce them. Prerequisite: Graduate standing.

Credits

Minimum Credits:
3

Maximum Credits:

MET5305 - Boundary Layer Meteorology

Overview

Subject code
MET

Catalog Number
5305

Course Title
Boundary Layer MET

Career
Graduate

Course Description
General survey of boundary meteorology. Topics include atmospheric boundary layer, (ABL), role in exchange and circulation, use in interpreting wind, temperature, and moisture distribution, hurricane boundary layer wind, and turbulent structures.

MET5311 - Dynamic Meteorology I

Overview

Subject code
MET

Catalog Number
5311

Course Title
Dynamic Meteorology I

Career
Graduate

Course Description
To study atmospheric phenomena on a rotating planet. It intends to lead towards an understanding of the theories of the atmospheric motion by applying concepts of Math., thermodynamics, and dynamics.

MGF1130 - Mathematical Thinking

Overview

Subject code
MGF

Catalog Number
1130

Course Title
Mathematical Thinking

Career
Undergraduate

Course Description
In this course, students will utilize multiple means of problem solving through student-centered mathematical exploration. The course is designed to teach students to think more effectively and vastly increase their problem-solving ability through practical application and divergent thinking. This course is appropriate for students in a wide range of disciplines/programs.

MUE5695 - Landscape of 21st Century Performing Arts

Overview

Subject code
MUE

Catalog Number
5695

Course Title
Landscape Performing Arts

Career
Graduate

Course Description
This course examines the ways in which, using critical thinking, creativity and communication proficiency, students will be able to recognize the challenges that face today's performing arts educator, artist and organization. It aims to develop multiple ways to articulate and discuss new ways of teaching, performing and working within the arts. The objective is to guide students to innovative and multiple ways to apply their musical experiences to fit today's challenges and adaptive arts landscape.

MUH2370 - The History of The Beatles

Overview

Subject code
MUH

Catalog Number
2370

Course Title
Hist The Beatles

Career
Undergraduate

Course Description
This course traces the development of The Beatles from their beginnings to their solo work. The discussions begin in America with the Blues, Rockability and the birth of Rock 'n' Roll. The paramount role of The Beatles in the revolutionary decade of the 1960s will be explored in detail, both from a musical and sociological perspective.

NGR6333L - Advanced Pediatric Acute Care Health Nursing Practicum III

Overview

Subject code
NGR

Catalog Number
6333L

Course Title
Pedi Acute NP Prac III

Career
Graduate

Course Description
This practicum focuses on integration and synthesis of knowledge and skills needed to care for critically ill pediatric patients with life-threatening conditions in acute care settings. Focus is on specialized assessment skills, identifying and managing multisystem diagnoses using ethical principles and evidence-based guidelines. Prerequisite: NGR 6332, NGR 6332L Corequisite: NGR 6333

NGR6372 - Diagnostics and Procedures for Pediatric Acute Care

Overview

Subject code
NGR

Catalog Number
6372

Course Title
Diag & Proc for Ped Acute

Career
Graduate

Course Description
This course prepares students to order and interpret diagnostic studies and perform advanced procedures for pediatric patients from birth to young adulthood in acute care settings. Students learn the rationale for the diagnostic studies and procedures, protocols, techniques, and documentation with an emphasis on safety and effectiveness. Prerequisite(s): NGR 6002C, NGR 5141, NGR 6172 Corequisite(s): NGR 6331, NGR 6331L

PAS6044 - History and Physical Examination IV

Overview

Subject code
PAS

Catalog Number
6044

Course Title
History Physical Exam IV

Career
Graduate

Course Description
This course provides instruction in history taking, physical examination, counseling, and presenting and documenting medical information. Prerequisite: PAS 6042

Credits

Minimum Credits:
3

Maximum Credits:
3

Contact Hours

Contact Hours Value:

PAS6050 - The Role of the PA in Clinical Practice

Overview

Subject code
PAS

Catalog Number
6050

Course Title
Role PA Clinical Practice

Career
Graduate

Course Description
This course surveys the U.S health care delivery system, reviews economic and policy issues that face the system, and focuses on issues that directly affect the practicing physician assistant. Prerequisite: Enrolled in the Physician Assistant Program.

Credits

Minimum Credits:
2

Maximum Credits:
2

PAS6085 - Health Promotion and Disease Prevention

Overview

Subject code
PAS

Catalog Number
6085

Course Title
Health Prmt Disease Prev

Career
Graduate

Course Description
Provides students with an overview of the basic concepts of epidemiology, public health, diet and nutrition and preventative medicine. Prerequisite: Enrolled in Physician Assistant Program

Credits

PAS6090 - Evidence-Based Medicine I

Overview

Subject code
PAS

Catalog Number
6090

Course Title
Evidence-Based Medicine I

Career
Graduate

Course Description
Introductory concepts of evidence-based medicine utilizing medical databases and provides a practical approach to critical evaluation of medical literature and its application to patient care. Prerequisite: Enrolled in the Physician Assistant Program.

Credits

Minimum Credits:
2

Maximum Credits:
2

PAS6091 - Evidence-Based Medicine II

Overview

Subject code
PAS

Catalog Number
6091

Course Title
Evidence-Based Medicine II

Career
Graduate

Course Description
Advanced application of research, statistical, and evidence-based medicine concepts with emphasis on studies assessing therapeutic interventions. Prerequisite: PAS 6090.

Credits

PAS6103 - Internal Medicine Clerkship

Overview

Subject code
PAS

Catalog Number
6103

Course Title
Internal Med Clerkship

Career
Graduate

Course Description
Provides students with a foundation of knowledge, skills, and attitudes necessary to approach and care for adult patients with short term and chronic diseases in outpatient and hospital settings. Prerequisite: Enrolled in the Physician Assistant Program.

Credits

Minimum Credits:
4

Maximum Credits:
4

PAS6600 - Emergency Medicine Clerkship

Overview

Subject code
PAS

Catalog Number
6600

Course Title
ER Medicine Clerkship

Career
Graduate

Course Description
This required rotation is designed to provide an in-depth exposure to the illnesses and injuries sustained by adults and children that necessitate emergency care. These educational experiences are intended to emphasize interview and examination skills and the performance of techniques and procedures essential to the proper management of emergency illness and injury. Prerequisite: Enrolled in the Physician Assistant Program.

PCB4553 - General Population Genetics

Overview

Subject code
PCB

Catalog Number
4553

Course Title
Gen Population Genetics

Career
Undergraduate

Course Description
Analysis of gene and genotype frequencies in theoretical and real populations. Topics include genetic drift, mutation, and selection.

Credits

PCB4561 - Epigenetics

Overview

Subject code
PCB

Catalog Number
4561

Course Title
Epigenetics

Career
Undergraduate

Course Description
An overview of the mechanisms involved in epigenetic inheritance and their role in reproduction, development, environmental responses and health. Prerequisites: BSC1011, PCB3063

Credits

Minimum Credits:
3

Maximum Credits:
3

Contact Hours

PCB4663 - General Human Genetics

Overview

Subject code
PCB

Catalog Number
4663

Course Title
Gen Human Genetics

Career
Undergraduate

Course Description
Examination of genetics as it applies to the normal and abnormal human condition. Includes topics such as genetic engineering, cloning, and human evolution.

Credits

Minimum Credits:
3

Maximum Credits:
3

PCB4676 - Human Evolution

Overview

Subject code
PCB

Catalog Number
4676

Course Title
Human Evolution

Career
Undergraduate

Course Description
The evolutionary processes and relationships that have led to the unique biocultural development of the human species. Hominin origins and taxonomy are examined through fossil evidence.

Credits

Minimum Credits:
3

Maximum Credits:
3

PCB4805 - Endocrinology

Overview

Subject code
PCB

Catalog Number
4805

Course Title
Endocrinology

Career
Undergraduate

Course Description
Biochemistry, physiology and anatomy of the endocrine systems of vertebrates and invertebrates. Steroid, peptide, and terpenoid hormones which control reproduction, growth, and other parameters. Prerequisites: BSC1011, one physiology course

Credits

Minimum Credits:
3

Maximum Credits:

PCB4810 - Biology of Stress

Overview

Subject code
PCB

Catalog Number
4810

Course Title
Biology of Stress

Career
Undergraduate

Course Description
An overview of the physiological processes, neural and hormonal mechanisms of the stress response. Integrates multiple disciplines in biology explaining the mechanisms and consequences of stress. [C] Prerequisite: BSC 2010 & BSC 2011

Credits

Minimum Credits:
3

PCB5025L - Molecular Biology Techniques Laboratory

Overview

Subject code
PCB

Catalog Number
5025L

Course Title
Mol Biol Tech Lab

Career
Graduate

Course Description
Covers DNA and RNA extraction, digestion, electrophoresis, Southern analysis, RFLP analysis, PCR amplification, cloning and automated sequencing. Prerequisites: Graduate status or permission of the instructor.

Credits

Minimum Credits:
3

Maximum Credits:
3

Contact Hours

Contact Hours Value:

PCB5356L - Tropical Ecology Field Lab

Overview

Subject code
PCB

Catalog Number
5356L

Course Title
Trop Ecol Field Lab

Career
Graduate

Course Description
Field course in Costa Rica with fieldwork in two or more diverse habitats (rainforest, and dry forest). Emphasis on diversity and interactions between species. Visits to selected sites of deforestation, conservation and restoration.

Credits

Minimum Credits:
3

Maximum Credits:
3

PHC4318 - Introduction to Biological Basis of Environmental Public Health

Overview

Subject code
PHC

Catalog Number
4318

Course Title
Intro Bio of Env PH

Career
Undergraduate

Course Description
This course will introduce students to cutting-edge research in the field of environmental public health with a focus towards better treatment and prevention of human diseases.

PHC4376 - Disaster by Design: Exercise Development for Homeland Security Professionals

Overview

Subject code
PHC

Catalog Number
4376

Course Title
Disaster by Design

Career
Undergraduate

Course Description
This course analyzes the role disaster exercises play in the preparation phase of disaster planning. Students will design and participate in such exercises.

PHC6118 - Population Health Management and Improvement I

Overview

Subject code
PHC

Catalog Number
6118

Course Title
Pop Health Man I

Career
Graduate

Course Description
This course is an introduction to population health management, an emerging model in healthcare delivery that involves moving from individual-based episodic healthcare to a population health model. Prerequisite: PHC 6102.

PHC6146 - Health Promotion Program Planning and Intervention Design

Overview

Subject code
PHC

Catalog Number
6146

Course Title
Hlth Prom Pro Plan Int Des

Career
Graduate

Course Description
The principles of and practices of health promotion program planning and design, development, testing of behavioral interventions are described and explained in this course. Prerequisites: PHC 6410, PHC 6706, PHC 6065.

PHC7083 - Advanced Bayesian Inference

Overview

Subject code
PHC

Catalog Number
7083

Course Title
Adv Bayesian Inference

Career
Graduate

Course Description
This course will cover advanced topics related to Bayesian methods such as prior assumptions, hierarchical modeling and computational MCMC methods with various sampling algorithms. Prerequisite: PHC 6084

PHC7162 - Grant Writing in Public Health

Overview

Subject code
PHC

Catalog Number
7162

Course Title
Grant Writing

Career
Graduate

Course Description
Course covers proposal writing political/social aspects of 'grantmanship' identifying sources of grant funding doing research to support the application, and tailoring the proposal to specific audiences.

PHT6716C - Advanced Orthopedics

Overview

Subject code
PHT

Catalog Number
6716C

Course Title
Adv Ortho

Career
Graduate

Course Description
This Independent Advanced Orthopedics course will enable the student to evaluate and provide treatment interventions for specific tissue pathology of the spine and the extremities in a clinical setting with direct clinical supervision. Therefore, a thorough knowledge of the orthopedic examination as well as pathologies will be discussed and demonstrated. Biomechanics, anatomy, kinesiology, and histology will be included in discussion as well as its clinical application. Prerequisite: PHT 6009

PHT6725L - Orthopedic Tests and Measures Lab

Overview

Subject code
PHT

Catalog Number
6725L

Course Title
Ortho Tests L

Career
Graduate

Course Description
This course focuses on the understanding and application of orthopedic special tests used to assess musculoskeletal conditions. Students will learn to perform, interpret, and document a variety of special tests for different joints and regions of the body, emphasizing practical skills, clinical reasoning, and evidence-based practice. Prerequisite: PHT 5174, PHT 5174L, PHT 5180, PHT 5180L Corequisite: PHT 5181, PHT 5181L

PHY1020 - Understanding the Physical World

Overview

Subject code
PHY

Catalog Number
1020

Course Title
Undst Physical World

Career
Undergraduate

Course Description
This course offers a comprehensive survey of physics, covering a wide range of topics including motion, Newton's laws, energy, sound, heat, electricity, magnetism, and optics. Emphasizing a conceptual understanding of physics, the course integrates critical thinking skills and real-world applications.

PHY3802L - Intermediate Physics Lab

Overview

Subject code
PHY

Catalog Number
3802L

Course Title
Intermed Phys Lab

Career
Undergraduate

Course Description
Experiments covering physics topics from the 20th century are performed, analyzed, and discussed. An introduction to modern physics equipment, and techniques of data reduction and error analysis.

PHY4221 - Introduction to Classical Mechanics

Overview

Subject code
PHY

Catalog Number
4221

Course Title
Intro Classical Mechanics

Career
Undergraduate

Course Description
An introduction to classical mechanics. Topics include: Newton's laws, particle dynamics, central forces, oscillatory motion, Lagrangian and Hamiltonian mechanics, system and rigid body dynamics. Prerequisites: PHY 2049, MAC 2313 or equivalent.

Credits

Minimum Credits:
4

PHY4323 - Intermediate Electromagnetism I

Overview

Subject code
PHY

Catalog Number
4323

Course Title
Interm Electromag I

Career
Undergraduate

Course Description
The theory of electromagnetic fields and waves is developed from basic principles. Vector calculus, Coulomb's law, Gauss's Law, electrostatic potential, dielectrics, solutions to Laplace's and Poisson's equations, magnetic induction, vector potential, magnetic materials, Maxwell's equations, and propagation of waves in space and various media are discussed.

PHZ3113 - Methods in Theoretical Physics

Overview

Subject code
PHZ

Catalog Number
3113

Course Title
Meth Theoric Physics

Career
Undergraduate

Course Description
Methods in theoretical physics and theoretical applications in physics. Includes analytic and numerical methods for differential equations, integral equations and transformations and other applications of real analysis. Prerequisite: PHY 2048 and PHY 2049 and MAC 2313

Credits

Minimum Credits:
3

PHZ3308 - Applications of Nuclear Physics

Overview

Subject code
PHZ

Catalog Number
3308

Course Title
Applied Nuclear Physics

Career
Undergraduate

Course Description
An introduction to nuclear structure, radioactivity, nuclear reactions, radiation detection, interactions of radiation with matter, biological effects, and the application of nuclear physics.

Credits

PHZ3360 - Introduction to Radiation Protection

Overview

Subject code
PHZ

Catalog Number
3360

Course Title
Radiation Protection

Career
Undergraduate

Course Description
An introduction to the principles of radiation protection. Topics include time, distance, and shielding, activity, radioactive decay, nuclear instrumentation, and the measurement of radiation.

Credits

POS2041 - American Government

Overview

Subject code
POS

Catalog Number
2041

Course Title
American Government

Career
Undergraduate

Course Description
In this course, students will investigate how the national government is structured and how the American constitutional republic operates. It covers the philosophical and historical foundations of American government, including but not limited to the Declaration of Independence, the United States constitution and all its amendments, and The Federalist Papers. The course examines the branches of government and the government's laws, policies, and programs. It also examines the ways in which citizens participate in their government and ways their government responds to citizens.

POW3284 - Brazilian Short Story

Overview

Subject code
POW

Catalog Number
3284

Course Title
Braz Short Story

Career
Undergraduate

Course Description
Short stories by major Brazilian authors serve to expand students reading ability, help them become familiar with modern Brazilian life, and learn to approach this literacy form critically. Prerequisites: At least three semesters study of the language or permission of the instructor.

PPE3502 - Psychology of Consciousness

Overview

Subject code
PPE

Catalog Number
3502

Course Title
Psy Of Consciousness

Career
Undergraduate

Course Description
Normal and altered states of human consciousness are analyzed from the perceptual and neuro-psychological viewpoint. Broad topic areas include physiologically determined levels of arousal, from deep sleep to intense excitement; selective attention; perceptual plasticity; illusions; sensory deprivation; biofeedback; psychosomatic disease; hypnotism and suggestibility; as well as a critical treatment of the phenomena of parapsychology.

STA3951 - Oral Presentations in Statistics

Overview

Subject code
STA

Catalog Number
3951

Course Title
Stat Presentations

Career
Undergraduate

Course Description
Students will communicate orally all stages of statistical analysis through a presentation in front of faculty and students. The problem must have a global component to be explained by the student.

STA4321 - Introduction to Mathematical Statistics I

Overview

Subject code
STA

Catalog Number
4321

Course Title
Intro To Math Stat I

Career
Undergraduate

Course Description
This course presents an introduction to the mathematics underlying the concepts of statistical analysis. It is based on a solid grounding in probability theory, and requires a knowledge of single and multivariable calculus. Specific topics include the following: basic probability concepts, random variables, probability densities, expectations, moment generating functions, sampling distributions, decision theory, estimation, hypothesis testing (parametric and non-parametric), regression, analysis of variance, and design of experiments.

SUR2101C - Geomatics and Surveying

Overview

Subject code
SUR

Catalog Number
2101C

Course Title
Geomatics & Surveying

Career
Undergraduate

Course Description
This course covers fundamental principles and practical applications of surveying and geomatics including traditional surveying such as measuring angles, distances, and elevation differences distance. It also covers Global Positioning System, laser scanning, topographic mapping, remote sensing, photogrammetry, and introduction to geographic information. Basic concepts on these topics are applied to solve practical problems in Civil Engineering. Laboratory is included with field measurements.

SYG3002 - Basic Ideas of Sociology

Overview

Subject code
SYG

Catalog Number
3002

Course Title
Basic Ideas Of Soc

Career
Undergraduate

Course Description
Sociology as a science seeks to understand how human beliefs, perceptions, and actions are shaped by the social contexts in which we live, and how in turn those contexts endure or change as the result of social behavior. This course will introduce you to some of the key concepts underlying this sociological perspective on our world, such as community, power, authority, status, socialization, stratification, and social mobility. It introduces the most important theorists who developed these ideas. It also offers a comparative global perspective on how these ideas illuminate and can help to explain variations across societies.

SYO2101 - Families in the United States

Overview

Subject code
SYO

Catalog Number
2101

Course Title
Families in the US

Career
Undergraduate

Course Description
In this course, students will explore the family as a fundamental social unit in American society. Students will examine the macro historical processes that have shaped families over time within the context of American culture. As they do so, students will develop an understanding of basic social and behavioral concepts and well-established scientific methods used by social scientists to investigate social phenomena.

Subject code
ZOO

Catalog Number
4454

Course Title
Fish Biology

Career
Undergraduate

Course Description
Covers the systematics, anatomy, physiology, reproductive biology, and ecology of fish.

Credits

Minimum Credits:
3

Maximum Credits:
3

Contact Hours

Contact Hours Value:
0

Academic Progress Units

Academic Progress Units Value:

Course Count:
1

Repeat for Credit:
No

Number Of Repeats:
1

Total Units Allowed:
3

ZOO4462C - Herpetology

Overview

Subject code
ZOO

Catalog Number
4462C

Course Title
Herpetology

Career
Undergraduate

Course Description
Study of the biology of reptiles and amphibians with emphasis on the natural history and ecology of local species.

Credits

Minimum Credits:
4

Maximum Credits:
4

Contact Hours

Contact Hours Value:
0

Academic Progress Units

Academic Progress Units Value:

Financial Aid Units

Financial Aid Units Value:
4

Course Count:
1

Repeat for Credit:
No

Number Of Repeats:
1

Total Units Allowed:
4

ZOO4484 - Primate Biology

Overview

Subject code
ZOO

Catalog Number
4484

Course Title
Primate Biology

Career
Undergraduate

Course Description
Survey of the natural history of the prosimians, monkeys, and apes with special emphasis on primate anatomy, evolution, ecology, and behavior.

Credits

Minimum Credits:
3

Maximum Credits:
3

Contact Hours

Contact Hours Value:
0

No

Number Of Repeats:
1

Total Units Allowed:
3

ZOO4484L - Primate Biology Lab

Overview

Subject code
ZOO

Catalog Number
4484L

Course Title
Primate Biology Lab

Career
Undergraduate

Course Description
Survey of the natural history of the prosimians, monkeys, and apes with special emphasis on primate anatomy, evolution, ecology, and behavior.

Credits

Minimum Credits:
1

Maximum Credits:
1

Contact Hours

Contact Hours Value:
0

Number Of Repeats:
1

Total Units Allowed:
1

ZOO4513 - Animal Behavior

Overview

Subject code
ZOO

Catalog Number
4513

Course Title
Animal Behavior

Career
Undergraduate

Course Description
Evolutionary approach to understanding the breadth of behavioral strategies. Ecological and physiological mechanisms of behavior will be emphasized.

Credits

Minimum Credits:
3

Maximum Credits:
3

Contact Hours

Contact Hours Value:
0

Academic Progress Units

Academic Progress Units Value:
3

Financial Aid Units

Financial Aid Units Value:
3

Course Count:
1

No

Number Of Repeats:
1

Total Units Allowed:
3

ZOO4513L - Animal Behavior Laboratory

Overview

Subject code
ZOO

Catalog Number
4513L

Course Title
Animal Behavior Lab

Career
Undergraduate

Course Description
Evolutionary approach to under-standing the diversity of behavioral strategies. Ecological and physiological mechanisms of behavior will be emphasized.

Credits

Minimum Credits:
2

Maximum Credits:
2

Contact Hours

Contact Hours Value:
0

Academic Progress Units

2

Financial Aid Units

Financial Aid Units Value:
2

Course Count:
1

Repeat for Credit:
No

Number Of Repeats:
1

Total Units Allowed:
2

ZOO4733 - Survey of Regional Anatomy

Overview

Subject code
ZOO

Catalog Number
4733

Course Title
Survey Regional Anat

Career
Undergraduate

Course Description
The regional anatomy of the human body as revealed by dissections, radiographs, models and videos.

Credits

Minimum Credits:
3

Maximum Credits:
3

Contact Hours

Contact Hours Value:
0

Academic Progress Units

Academic Progress Units Value:
3

Financial Aid Units

Financial Aid Units Value:
3

Course Count:
1

Repeat for Credit:
No

Number Of Repeats:
1

Total Units Allowed:
3

ZOO4743C - Neuroscience

Overview

Subject code
ZOO

Catalog Number
4743C

Course Title
Neuroscience

Career
Undergraduate

Course Description
Structure and function of the human nervous system. Dissection and demonstration of human nervous system and various neurophysiology labs.

Credits

Minimum Credits:
4

Maximum Credits:
4

Contact Hours

Contact Hours Value:
0

Academic Progress Units

Academic Progress Units Value:
4

Financial Aid Units Value:
4

Course Count:
1

Repeat for Credit:
No

Number Of Repeats:
1

Total Units Allowed:
4

ZOO4744 - Neurobiology

Overview

Subject code
ZOO

Catalog Number
4744

Course Title
Neurobiology

Career
Undergraduate

Course Description
A comparative overview of the function of the nervous system covering neurons, sensory and motor systems, and the neural basis of behavior.

Credits

Minimum Credits:
3

Maximum Credits:
3

Contact Hours

Contact Hours Value:
0

Academic Progress Units

Academic Progress Units Value:
3

Financial Aid Units

Financial Aid Units Value:
3

Course Count:
1

Repeat for Credit:
No

Number Of Repeats:
1

Total Units Allowed:
3

ZOO4781 - Sensory Systems in Neurobiology

Overview

Subject code
ZOO

Catalog Number
4781

Course Title
Sensory Sytm Neurobiology

Career
Undergraduate

Course Description
A comparative overview of sensory systems covering environmental stimuli, physical transduction, neural processing, and behavioral responses.

Credits

Minimum Credits:
3

Maximum Credits:
3

Contact Hours

Contact Hours Value:
0

Academic Progress Units

Academic Progress Units Value:

Course Count:
1

Repeat for Credit:
No

Number Of Repeats:
1

Total Units Allowed:
3

ZOO5265L - Biology of Crustaceans Laboratory

Overview

Subject code
ZOO

Catalog Number
5265L

Course Title
Bio Of Crustac Lab

Career
Graduate

Course Description
Morphology, physiology, systematics and evolution in crustaceans. Inactivated per SCNS review, last term offered Summer 1998

Credits

Minimum Credits:
1

Maximum Credits:
1

Contact Hours

Contact Hours Value:
0

Academic Progress Units

Academic Progress Units Value:

1

Repeat for Credit:
No

Number Of Repeats:
1

Total Units Allowed:
1

ZOO5456 - Ichthyology

Overview

Subject code
ZOO

Catalog Number
5456

Course Title
Ichthyology

Career
Graduate

Course Description
Systematics, structure, function, ecology, and evolution of fishes. Prerequisites: BSC 2010, BSC 2011 and PCB 3043. Corequisite: Concurrent registration of lecture with lab course.

Credits

Minimum Credits:
3

Maximum Credits:
3

Contact Hours

Contact Hours Value:

Number Of Repeats:
1

Total Units Allowed:
3

ZOO5456L - Ichthyology Lab

Overview

Subject code
ZOO

Catalog Number
5456L

Course Title
Ichthyology Lab

Career
Graduate

Course Description
Systematics, structure, function, ecology, and evolution of fishes. Prerequisites: BSC 2010, BSC 2011 and PCB 3043. Corequisite: Concurrent registration of lecture with lab course.

Credits

Minimum Credits:
1

Maximum Credits:
1

No

Number Of Repeats:
1

Total Units Allowed:
1

ZOO5463C - Advanced Herpetology

Overview

Subject code
ZOO

Catalog Number
5463C

Course Title
Advanced Herpetology

Career
Graduate

Course Description
Advanced Herpetology will cover advanced topics in herpetology, from global diversity of reptiles and amphibians to modern research methods in herpetology. Prerequisite: General Biology I (BSC 2010) and General Biology II (BSC 2011)

Credits

Minimum Credits:
4

Maximum Credits:
4

Contact Hours

Contact Hours Value:
0

Repeat for Credit:
No

Number Of Repeats:
1

Total Units Allowed:
4

ZOO5785 - Advanced Neurobiology

Overview

Subject code
ZOO

Catalog Number
5785

Course Title
Advanced Neurobiology

Career
Graduate

Course Description
An in depth treatment of the nervous system covering molecular and cellular function, sensory and motor systems, and the neural basis of behavior. Prerequisite: Graduate standing.

Credits

Minimum Credits:
3

Maximum Credits:
3

Contact Hours

Contact Hours Value:
0

Repeat for Credit:
No

Number Of Repeats:
1

Total Units Allowed:
3

ZOO5895 - Zoo Conservation Biology

Overview

Subject code
ZOO

Catalog Number
5895

Course Title
Zoo Conservation Bio

Career
Graduate

Course Description
Zoo Conservation Biology is a hands-on workshop that examines of the role of zoos in conservation science, conservation action, and conservation education. Prerequisite: Permission of Instructor

Credits

Minimum Credits:
1

Maximum Credits:
1

Contact Hours

Contact Hours Value:
0

Number Of Repeats:
1

Total Units Allowed:
1

ZOO6782 - Advanced Sensory Systems in Neurobiology

Overview

Subject code
ZOO

Catalog Number
6782

Course Title
Advanced Sensory Systems

Career
Graduate

Course Description
A comparative overview of sensory systems for graduate students, covering environmental stimuli, physical transduction, neural processing, and behavioral responses. Prerequisite: ZOO 5785 or permission of the instructor.

Credits

Minimum Credits:
3

Maximum Credits:
3

Contact Hours
