Web Development Major (BA)

Requirements

Simple Requisites

Curriculum
This major is administered by the Department of Computing and New Media Technologies within the College of Letters and Science.

Consists of a minimum of 58 credits.

Note: Depending on your math placement score, additional courses may be required. The following required courses below have Math prerequisites: ECON 243, HSW 301, MATH 255, PSYC 300, SOC 351, and UWX MA117.

Program Requirements
Type
Completion Requirement

Required, 49 credits

Complete ALL of the following Courses:

- CNMT 101 - Introduction to Computing and Programming - 3 Credits
- CNMT 110 - Object-Oriented Programming - 4 Credits
- CNMT 199 - Computing Major Seminar - 1 Credits
- CNMT 210 - Web Design and Development I - 4 Credits
- CNMT 310 - Production Programming - 4 Credits
- CNMT 410 - Professional IT Communication - 3 Credits
- CNMT 479 - Senior Project Preparation - 1 Credits
- CNMT 480 - Applied Development Project - 3 Credits
- PSYC 110 - Introduction to Psychology - 3 Credits
- WD 100 - Introduction to Human-Centered Design - 4 Credits
- WD 200 - Introduction to Computer Graphics - 3 Credits

OR MSTU 105 - Foundations of Media Practice: Time, Motion, and Video - 3 Credits
- WD 201 - Interaction Design - 4 Credits
- WD 211 - Web Design and Development II - 4 Credits
- WD 302 - User Interface Design and Development - 4 Credits
- WD 310 - Evaluation of User Interfaces - 4 Credits

Statistics, 3-4 credits

Complete ANY of the following Courses:
- ECON 243 - Economic and Business Statistics - 3 Credits
- HSW 301 - Fundamentals of Biostatistics - 3 Credits
- MATH 255 - Elementary Statistical Methods - 4 Credits
- PSYC 300 - Statistics for Psychologists - 4 Credits
- SOC 351 - Social Statistics - 4 Credits
- UWX MA117 - Elementary Statistics - 4 Credits

Required, 3-4 credits

Complete ANY of the following Courses:
- PSYC 320 - Social Psychology - 3 Credits
- PSYC 330 - Perception - 3 Credits
- PSYC 331 - Cognitive Psychology - 3 Credits
- WD 320 - Human Information Processing - 4 Credits

Electives, 3 credits

Complete Electives
Complete 3 credits in CIS, CNMT, or WD courses numbered 345 and above, with the exceptions of CIS 370/570, CIS 373/573, CIS 499, CNMT 410, CNMT 480, and WD 499.

World Language Courses, 0-8 credits

Complete World Language Requirement
Complete a two-semester sequence of university entry-level world language courses (101, 102). The requirement may be fulfilled through equivalent coursework or other language acquisition as demonstrated through a test-out policy (including Native American languages and American Sign Language). If your native language is not English and you can document formal high school or university study of your native language, you may use ENGL 101 and ENGL 202, or ENGL 150 as a means of fulfilling this world language requirement. Please see the Department of World Languages and Literatures for details.

Additional Comments:

No Requirement Level

Standards

Academic Standards

1. Computer Information Systems, Web Development, and Math courses taken pass/fail do not count for the major.

2. You may petition the department chair to accept coursework done at other institutions, but no more than one-half the Web Development credits applied to your major may be earned outside UW-Stevens Point. The department chair may allow exceptions.

3. To maintain admitted status, you must maintain a GPA of at least 2.5 in all courses taken at UW-Stevens Point that count for the Web Development major.

4. If you are not admitted to the Web Development major, the only Web Development courses for which you will be allowed to register are those required to complete the Web Development minor.

About this Program
Web Development (WD) takes a multidisciplinary approach to preparing graduates for roles in which they collaboratively study, design, and develop interactive products and services through a user-centered design process. Through user research, interaction design and prototyping, programming and evaluation, WD graduates have a direct impact on the usability and user experience of new software programs, websites, and devices. WD is unique in placing people, their needs, expectations, and use of technology at the center of its educational focus. This is important as information technology becomes more ingrained in everything people do so that we develop technology that is viable, usable, and pleasurable. The program and courses in Web Development are administered by the Department of Computing and New Media Technologies.

The Web Development major creates meaningful, useful, and engaging digital experiences across a variety of platforms.

Upon completion of this major you will be able to design and develop interactive products from websites and desktop applications to mobile apps and beyond. You will master the skills, methods, and technologies that help you fashion and craft digital products that meet carefully defined needs, are creative, accessible, and ethical. You will also have solid understanding of the fundamental concepts that underlie your discipline - human behavior, thinking, and emotions; interactive computing technologies; and how people interact with technology and with one another through technology.

Learning Outcomes

Program Learning Outcomes (UWSP)
Upon completion of the Web Development major, you will be able to:

1. Demonstrate mastery of core knowledge in computing.
2. Apply problem-solving and computing skills to solve real problems.
3. Explain how computing influences society, including social, legal, ethical, and cultural concerns.
4. Write about and orally communicate technical information about computing.

Curriculum
This certificate is administered by the Fisheries and Water Resources Discipline.

Consists of 51 credits.

Note: Depending on your math placement score, additional courses may be required. The following required courses below have Math prerequisites: CHEM 101, CHEM 105, CHEM 106, PHYS 201, MATH 109, MATH 111, MATH 225, and MATH 255.

Program Requirements
Type
Completion Requirement

Biological Sciences

Earn at least 15 credits from the following:

- BIOL 101 - General Biology - 5 Credits
- BIOL 110 - Principles of Biology I - 5 Credits
- BIOL 111 - Principles of Biology II - 5 Credits
- BIOL 130 - Introduction to Plant Biology - 5 Credits
- BIOL 160 - Introduction to Animal Biology - 5 Credits
- BIOL 305 - General Ecology - 3 Credits
- BIOL 337 - Plant Pathology - 3 Credits
- BIOL 338 - Phycology - 4 Credits
- BIOL 342 - Vascular Plant Taxonomy - 4 Credits
- BIOL 351 - Plant Physiology - 4 Credits
- BIOL 355 - Plant Ecology - 4 Credits
- BIOL 361 - Aquatic Invertebrate Zoology - 3 Credits
  OR WATR 361 - Aquatic Invertebrate Zoology - 3 Credits
- BIOL 374 - Ichthyology - 4 Credits
- BIOL 375 - Fisheries Ecology - 3 Credits
- BIOL 376 - Herpetology - 3 Credits
- BIOL 377 - Ornithology - 3 Credits
- BIOL 381 - Animal Physiology - 4 Credits
- BIOL 477 - Raptor Ecology - 2 Credits
- FOR 232 - Dendrology and Silvics - 3 Credits
- FOR 332 - Forest Ecosystem Ecology - 3 Credits
- NRES 151 - Ecological Basis for Natural Resource Management - 3 Credits
- NRES 324 - Invasive and Exotic Species - 3 Credits
  OR WATR 324 - Invasive and Exotic Species - 3 Credits
- WATR 380 - Field Experience in Aquatic Ecosystem Evaluation - 1 Credits
- WATR 384 - Life History of Fishes - 3 Credits
- WATR 388 - Aquatic Ecology - 3 Credits
- WATR 488 - Aquatic Insects - 3 Credits
- WLDL 332 - Carnivore Ecology - 2 Credits
- WLDL 334 - Ungulate Ecology and Management - 3 Credits
- WLDL 340 - Field Experience in Wildlife Management Techniques - 1 Credits
- WLDL 378 - Mammalogy - 3 Credits

Physical Sciences

Earn at least 15 credits from the following:

- CHEM 101 - Basic Chemistry - 5 Credits
- CHEM 105 - Fundamental Chemistry - 5 Credits
- CHEM 106 - Fundamental Chemistry - 5 Credits
- CHEM 221 - Survey of Organic Chemistry Lecture - 3 Credits
- CHEM 222 - Survey of Organic Chemistry Lab - 1 Credits
- CHEM 248 - Quantitative Analysis - 4 Credits
- CHEM 325 - Organic Chemistry - 4 Credits
- CHEM 326 - Organic Chemistry - 4 Credits
- GEOG 341 - Geographic Information Systems I - 3 Credits
- GEOL 104 - Physical Geology - 4 Credits
- GEOL 230 - Environmental Geology - 3 Credits
- GEOL 370 - Glacial Geology - 3 Credits
- PHYS 101 - General Physics - 5 Credits
- PHYS 201 - Applied Principles of Physics I - 4 Credits
- PHYS 203 - College Physics I - 5 Credits
- PHYS 204 - College Physics II - 5 Credits
- SOIL 359 - Soil Conservation and Watershed Inventory Techniques - 1 Credits
- SOIL 360 - Field Experience in Soil Inventory Methods - 1 Credits
- SOIL 361 - Forest Soils - 3 Credits
- SOIL 362 - Soil Genesis, Morphology and Classification - 3 Credits
- SOIL 363 - Soil Profile Description Writing - 1 Credits
- SOIL 365 - Soil Quality Assessment and Soil Survey Interpretation - 3 Credits
- SOIL 465 - Soil Physics - 3 Credits
- SOIL 479 - Environmental Fate of Organic Chemicals - 3 Credits
- WATR 389 - Hydrology - 3 Credits
- WATR 390 - Water Chemistry and Analysis - 4 Credits
- WATR 391 - GIS Applications in Natural Resources - 3 Credits

Courses below can be applied toward the Physical Science Category or the Specialized Wetland Course Work Category, but it cannot be applied to both:

- SOIL 362
- WATR 389

Quantitative Sciences

Earn at least 6 credits from the following:

- FOR 321 - Natural Resources Data Analysis - 4 Credits
- MATH 109 - Mathematics for the Social and Management Sciences - 4 Credits (Inactive)
- MATH 111 - Applied Calculus - 4 Credits
- MATH 225 - Calculus I - 5 Credits
- MATH 226 - Calculus II - 5 Credits
- MATH 255 - Elementary Statistical Methods - 4 Credits
- WATR 353 - Fish Population Dynamics - 4 Credits
- WLDL 311 - Quantitative Methods for Wildlife and Fisheries Research and Management - 3 Credits
- WLDL 353 - Analysis of Wildlife Populations - 4 Credits

Specialized Wetland Course Work

Earn at least 15 credits from the following:

- NRES 251 - Introduction to Soil and Water Resources - 4 Credits
- SOIL 362 - Soil Genesis, Morphology and Classification - 3 Credits
- SOIL 366 - Wetland Soils and Wetland Delineation - 3 Credits
  OR WATR 366 - Wetland Soils and Wetland Delineation - 3 Credits
- WATR 347 - Aquatic Plant Taxonomy - 2 Credits
- WATR 360 - Wetlands Ecology and Management - 3 Credits
  OR WLDL 360 - Wetlands Ecology and Management - 3 Credits
- WATR 389 - Hydrology - 3 Credits
- WLDL 361 - Waterfowl Ecology and Management - 3 Credits

Courses below can be applied toward the Physical Science Category or the Specialized Wetland Course Work Category, but it cannot be applied to both:

- SOIL 362
- WATR 389

About this Program
The Certificate in Wetland Science is recognition of completion of a course of study in biological, physical, quantitative, and specialized wetland course work that concentrates on the identification, evaluation and management of wetlands. When you complete the certificate requirements, you will have met the academic requirements necessary to become a Professional Wetland Scientist and can apply for certification as a "wetland professional in training" by the Society of Wetland Scientists. For more information contact the CNR Student Success Center, Room 122 TNR.

Women's and Gender Studies Minor

Requirements

Simple Requisites

Curriculum
This minor is administered by the area of Women's and Gender Studies within the College of Letters and Science.

Consists of 18 credits.

Program Requirements
Type
Completion Requirement

Required

Complete ALL of the following Courses:

- WGS 105 - Introduction to Women's and Gender Studies - 3 Credits

Electives

Earn at least 15 credits from the following:

- ENGL 285 - Women in Literature - 3 Credits
- ENGL 287 - Gay and Lesbian Literature - 3 Credits
- ENGL 288 - The Literature of Human Love and Sexuality - 3 Credits
- ENGL 340 - Language, Gender, and Sexuality - 3 Credits
- ENGL 343 - Sociolinguistics: Languages and Dialects of the U.S. - 3 Credits
- ENGL 374 - Postcolonial Literature in English - 3 Credits
- ENGL 382 - Ethnic Literature of the United States - 3 Credits
- ENGL 383 - Themes in Literature - 3 Credits
- ENGL 385 - Major Authors - 3 Credits
- ENGL 386 - Major Authors of Ethnic Literature - 3 Credits
- FLNG 252 - Media Arts in World Cultures - 3 Credits
- HD 230 - Human Sexuality - 3 Credits
- HIST 285 - Women in American History - 3 Credits
- HIST 383 - Sexuality in American History - 3 Credits
- HIST 395 - Topics in United States History - 3 Credits
- MSTU 394 - Sex, Media, and Rape Culture - 3 Credits
- MSTU 395 - Hashtag Activism - 3 Credits
- MSTU 396 - Communication and Gender - 3 Credits
- PHIL 351 - Ecofeminism - 3 Credits
- POLI 360 - Gender and Politics in Comparative Perspective - 3 Credits
- PSYC 240 - Psychology of Gender - 3 Credits
- PSYC 255 - Psychology of Sexual Behavior - 3 Credits
- REL 330 - Women and Religion - 3 Credits
- REL 333 - Women and Goddesses in India - 3 Credits
- SOC 240 - Marriage and the Family - 3 Credits
- SOC 320 - Sociology of Gender - 3 Credits
- SOC 343 - The Family: Cultural Perspectives - 3 Credits
- SOC 344 - Interpersonal Violence - 3 Credits
- SOC 395 - Special Topics in Sociology - 1-3 Credits
- WGS 130 - Biology of Women - 3 Credits
- WGS 203 - Women in Popular Culture - 3 Credits
- WGS 300 - Topics in Women's and Gender Studies - 3 Credits
- WGS 499 - Special Work - 1-3 Credits

ENGL 382, ENGL 383, ENGL 385, ENGL 386, FLNG 252, HIST 395, SOC 395 are topics courses and require prior approval from the Women's and Gender Studies Coordinator

- WLDL 321 - Principles of Captive Wildlife Management - 2 Credits
- WLDL 322 - Techniques of Captive Wildlife Management - 2 Credits
- WLDL 355 - Wildlife Diseases - 2 Credits

Required

Complete ANY of the following Courses:

- BIOL 386 - Fish Culture - 3 Credits
  OR WATR 386 - Fish Culture - 3 Credits
- BIOL 388 - Animal Behavior - 3 Credits
  OR PSYC 388 - Animal Behavior - 3 Credits
- BIOL 477 - Raptor Ecology - 2 Credits
- BIOL 498 - Selected Topics in Biology - 1-4 Credits
- WLDL 305 - Selected Topics in Wildlife Ecology and Management - 1-3 Credits
- WLDL 332 - Carnivore Ecology - 2 Credits
- WLDL 334 - Ungulate Ecology and Management - 3 Credits
- WLDL 361 - Waterfowl Ecology and Management - 3 Credits
- WLDL 365 - Behavioral Ecology - 3 Credits

Internship

Internship must involve captive wildlife with prior approval of internship coordinator

Earn at least 3 credits from the following:

- WLDL 382 - Internship in Captive Wildlife - 1-12 Credits

Required

Earn at least 6 credits from the following:

- NRES 320 - Natural Resources Communication and Public Relations - 3 Credits
  OR NRES 368 - Oral Interpretation Methods - 3 Credits
  OR WLDL 450 - Human Dimensions of Wildlife - 3 Credits
- WLDL 372 - Wildlife of North America - 3 Credits

Additional Comments:
Note: To be admitted to the minor and to graduate with a minor in captive wildlife you must have 2.25 minimum cumulative grade point average.

No Requirement Level

Standards

Academic Standards
To graduate with a major or minor in the wildlife ecology discipline you must have a 2.50 minimum cumulative grade point average.

About this Program

About this Program
The minor is open to majors in the College of Natural Resources or Biology. Students with majors in other areas must first meet with the coordinator for the captive wildlife minor to be considered.

1. You must complete CHEM 101 or CHEM 105, BIOL 110 and BIOL 111 (or BIOL 101 if majoring in Environmental Education and Interpretation: Wildlife Education Option prior to admittance).
2. You must declare and be admitted to the minor before completion of 70 credit hours toward graduation.

About this Program
The World Languages Communicative Proficiency Certificate helps you further develop your proficiency level in one of the target languages taught in the Department of World Languages and Literatures and deepen your understanding of the cultures of the people who speak this language. It can enhance the general education of any student and allow those who have already studied their target language in K-12 to continue their linguistic adventure. Higher proficiency in any second language prepares you from a variety of disciplines to work more effectively with others in your future workplaces - whether those workplaces are in business, higher education, government, or non-profit agencies.

Wildlife Ecology and Management Major (BS)

Requirements

Simple Requisites

Curriculum
This major is administered by the Wildlife Ecology and Managment Discipline.

Consists of a minimum of 106 credits.

Note: Depending on your math placement score, additional courses may be required. The following required courses below have Math prerequisites: CHEM 105, ECON 110, FOR 321, MATH 255, and MATH 111.

Program Requirements
Type
Completion Requirement

Wildlife Core, 35 credits

Complete ALL of the following Courses:

- NRES 150 - People, Resources and the Biosphere - 3 Credits
- NRES 151 - Ecological Basis for Natural Resource Management - 3 Credits
- NRES 250 - Introduction to Fisheries, Forestry and Wildlife Resources - 4 Credits
- NRES 251 - Introduction to Soil and Water Resources - 4 Credits
- WLDL 100 - Wildlife Profession and Preparation - 1 Credits
- WLDL 311 - Quantitative Methods for Wildlife and Fisheries Research and Management - 3 Credits
- WLDL 350 - Wildlife Management Techniques - 3 Credits
- WLDL 353 - Analysis of Wildlife Populations - 4 Credits
- WLDL 450 - Human Dimensions of Wildlife - 3 Credits
- WLDL 451 - Management of Wildlife Habitat - 4 Credits
- WLDL 458 - Wildlife Ecology and Conservation Biology - 3 Credits

Biology Core, 17-18 credits

Complete ALL of the following Courses:

- BIOL 110 - Principles of Biology I - 5 Credits
- BIOL 111 - Principles of Biology II - 5 Credits
- BIOL 342 - Vascular Plant Taxonomy - 4 Credits
  OR FOR 232 - Dendrology and Silvics - 3 Credits
- BIOL 370 - Comparative Vertebrate Anatomy - 4 Credits
  OR BIOL 381 - Animal Physiology - 4 Credits

Taxonomy and ecology, 5-6 credits

Fulfill ALL of the following requirements:

Primary Taxonomy, 3 credits

Complete ANY of the following Courses:

- BIOL 376 - Herpetology - 3 Credits
- BIOL 377 - Ornithology - 3 Credits
- WLDL 378 - Mammalogy - 3 Credits

AND

Additional Taxonomy, 2-3 credits

Earn at least 2 credits from the following:

- BIOL 376 - Herpetology - 3 Credits
- BIOL 377 - Ornithology - 3 Credits
- BIOL 477 - Raptor Ecology - 2 Credits
- WLDL 332 - Carnivore Ecology - 2 Credits
- WLDL 334 - Ungulate Ecology and Management - 3 Credits
- WLDL 361 - Waterfowl Ecology and Management - 3 Credits
- WLDL 378 - Mammalogy - 3 Credits

BIOL 376, BIOL 377, and WLDL 378 may be taken in Additional Taxonomy if not taken above.

Collateral requirements, 19 credits

Complete ALL of the following Courses:

- CHEM 105 - Fundamental Chemistry - 5 Credits
- ECON 110 - Principles of Macroeconomics - 3 Credits
  OR NRES 372 - Resource Economics - 3 Credits
- FOR 321 - Natural Resources Data Analysis - 4 Credits
  OR MATH 255 - Elementary Statistical Methods - 4 Credits
- GEOG 341 - Geographic Information Systems I - 3 Credits
  OR WATR 391 - GIS Applications in Natural Resources - 3 Credits
- MATH 111 - Applied Calculus - 4 Credits

Directed electives, 8-9 credits

Earn at least 8 credits from the following:

- BIOL 210 - Principles of Genetics - 3 Credits
- BIOL 305 - General Ecology - 3 Credits
- BIOL 361 - Aquatic Invertebrate Zoology - 3 Credits
  OR WATR 361 - Aquatic Invertebrate Zoology - 3 Credits
- BIOL 374 - Ichthyology - 4 Credits
- BIOL 376 - Herpetology - 3 Credits
- BIOL 377 - Ornithology - 3 Credits
- BIOL 477 - Raptor Ecology - 2 Credits
- FOR 324 - Fire Management and Ecology - 3 Credits
- FOR 432 - Silviculture - 3 Credits
- NRES 459 - Ecosystem Management and Restoration - 3 Credits
- SOIL 373 - Agronomy, Agriculture and the Environment - 4 Credits
- WATR 488 - Aquatic Insects - 3 Credits
- WLDL 305 - Selected Topics in Wildlife Ecology and Management - 1-3 Credits
- WLDL 332 - Carnivore Ecology - 2 Credits
- WLDL 334 - Ungulate Ecology and Management - 3 Credits
- WLDL 348 - Wildlife Damage Management - 3 Credits
- WLDL 355 - Wildlife Diseases - 2 Credits
- WLDL 360 - Wetlands Ecology and Management - 3 Credits
  OR WATR 360 - Wetlands Ecology and Management - 3 Credits
- WLDL 361 - Waterfowl Ecology and Management - 3 Credits
- WLDL 365 - Behavioral Ecology - 3 Credits
- WLDL 378 - Mammalogy - 3 Credits
- WLDL 381 - Internship in Wildlife - 1-12 Credits
- WLDL 499 - Special Work - 1-3 Credits

BIOL 376, BIOL 377, BIOL 477, WLDL 332, WLDL 334, WLDL 361, and WLDL 378 may be taken in Directed Electives if not taken above.

WLDL 381 should be taken for 1-3 credits.

Physical Sciences, 3-4 credits

Complete ANY of the following Courses:

- GEOL 104 - Physical Geology - 4 Credits
- PHYS 201 - Applied Principles of Physics I - 4 Credits
- SOIL 362 - Soil Genesis, Morphology and Classification - 3 Credits
- SOIL 364 - Soil and Plant Analysis - 3 Credits
- SOIL 365 - Soil Quality Assessment and Soil Survey Interpretation - 3 Credits
- SOIL 384 - Environmental Microbiology Lecture - 3 Credits
- SOIL 465 - Soil Physics - 3 Credits

Communication, 12 credits

Fulfill ALL of the following requirements:

Written Communication, 9 credits

Earn at least 9 credits from the following:

- ENGL 101 - Academic Reading and Writing - 3 Credits
- ENGL 150 - Accelerated Reading, Writing, and Research - 3 Credits
- ENGL 202 - Academic Writing and Research - 3 Credits
- ENGL 248 - Introduction to Environmental and Science Writing - 3 Credits
- ENGL 250 - Intermediate Composition - 3 Credits
- ENGL 254 - Workplace Writing - 3 Credits
- ENGL 347 - Grant and Proposal Writing - 3 Credits
- ENGL 348 - Advanced Environmental and Science Writing - 3 Credits
- ENGL 351 - Advanced Business Writing - 3 Credits
- ENGL 352 - Writing for Digital Media - 3 Credits
- ENGL 354 - Advanced Technical Writing - 3 Credits
- ENGL 358 - Outdoor Writing - 3 Credits

AND

Oral Communication, 3 credits

Complete ANY of the following Courses:

- COMM 180 - Foundations of Workplace Communication - 3 Credits
- NRES 301 - Foundations of Environmental Education I - 3 Credits
- NRES 320 - Natural Resources Communication and Public Relations - 3 Credits
- NRES 368 - Oral Interpretation Methods - 3 Credits

Summer Field Experience, 7-8 credits

Fulfill ANY of the following requirements:

Summer Field Experience, 7 credits

Complete ALL of the following Courses:

- FOR 319 - Land Surveying - 1 Credits
- FOR 320 - Field Experience in Forest Measurements - 1 Credits
- NRES 405 - Selected Topics in Natural Resources - 1-3 Credits
- SOIL 359 - Soil Conservation and Watershed Inventory Techniques - 1 Credits
- SOIL 360 - Field Experience in Soil Inventory Methods - 1 Credits
- WATR 380 - Field Experience in Aquatic Ecosystem Evaluation - 1 Credits
- WLDL 340 - Field Experience in Wildlife Management Techniques - 1 Credits

OR

International Summer Field Experience, 8 credits

Complete ALL of the following Courses:

- NRES 475 - International Field Experiences in Natural Resources Management - 1-8 Credits

Additional Comments:

No Requirement Level

Standards

Academic Standards

To graduate with a major or minor in the wildlife ecology discipline you must have a 2.50 minimum cumulative grade point average.

About this Program

About this Program

In the wildlife ecology major you will develop problem-solving and scientific skills and understand the social influences and ecological interactions that impact wildlife management and conservation.

Wildlife Minor

Requirements

Simple Requisites

Curriculum

This minor is administered by the Wildlife Ecology Discipline.

Consists of a minimum of 24 credits.

Program Requirements

Type

Completion Requirement

Biology, 5-10 credits

Fulfill ANY of the following requirements:

Biology Option 1

Complete ALL of the following Courses:

- BIOL 101 - General Biology - 5 Credits

OR

Biology Option 2

Complete ALL of the following Courses:

- BIOL 110 - Principles of Biology I - 5 Credits
- BIOL 111 - Principles of Biology II - 5 Credits

OR

Biology Option 3

Complete ALL of the following Courses:

- BIOL 160 - Introduction to Animal Biology - 5 Credits

Required, 10-11 credits

Complete ALL of the following Courses:

- NRES 250 - Introduction to Fisheries, Forestry and Wildlife Resources - 4 Credits
- WLDL 450 - Human Dimensions of Wildlife - 3 Credits
  OR WLDL 451 - Management of Wildlife Habitat - 4 Credits
- WLDL 458 - Wildlife Ecology and Conservation Biology - 3 Credits
  OR NRES 458 - Biodiversity and Conservation Biology - 3 Credits

Required, 2-3 credits

Complete ANY of the following Courses:

- BIOL 376 - Herpetology - 3 Credits
- BIOL 377 - Ornithology - 3 Credits
- BIOL 477 - Raptor Ecology - 2 Credits
- WLDL 332 - Carnivore Ecology - 2 Credits
- WLDL 334 - Ungulate Ecology and Management - 3 Credits
- WLDL 361 - Waterfowl Ecology and Management - 3 Credits
- WLDL 372 - Wildlife of North America - 3 Credits

Electives, 7-8 credits

Choose the remaining credits from the following if not taken above

Earn at least 7 credits from the following:

- FOR 332 - Forest Ecosystem Ecology - 3 Credits
- NRES 459 - Ecosystem Management and Restoration - 3 Credits
- WLDL 305 - Selected Topics in Wildlife Ecology and Management - 1-3 Credits
- WLDL 311 - Quantitative Methods for Wildlife and Fisheries Research and Management - 3 Credits
- WLDL 348 - Wildlife Damage Management - 3 Credits
- WLDL 353 - Analysis of Wildlife Populations - 4 Credits
- WLDL 355 - Wildlife Diseases - 2 Credits
- WLDL 360 - Wetlands Ecology and Management - 3 Credits
- WLDL 365 - Behavioral Ecology - 3 Credits
- WLDL 450 - Human Dimensions of Wildlife - 3 Credits
- WLDL 451 - Management of Wildlife Habitat - 4 Credits

Waste Resources Minor

Requirements

Simple Requisites

Curriculum
This minor is administered by the Soil and Waste Resources Discipline.

Consists of 18 credits.

Program Requirements
Type
Completion Requirement

Required, 4 credits

Complete ALL of the following Courses:

- NRES 251 - Introduction to Soil and Water Resources - 4 Credits
  OR PSEN 215 - Introduction to Process Engineering Calculations - 4 Credits

Required, 6 credits

Earn at least 6 credits from the following:

- WSTE 380 - Solid Waste Management - 3 Credits
- WSTE 382 - Water and Wastewater Treatment - 3 Credits
  OR PSEN 382 - Water and Wastewater Treatment - 3 Credits
  OR WATR 382 - Water and Wastewater Treatment - 3 Credits
- WSTE 476 - Hazardous Waste Management - 3 Credits

Electives, 8 credits

Earn at least 8 credits from the following:

- PSEN 382 - Water and Wastewater Treatment - 3 Credits
  OR WATR 382 - Water and Wastewater Treatment - 3 Credits
  OR WSTE 382 - Water and Wastewater Treatment - 3 Credits
- PSEN 420 - Air Pollution Control and Engineering - 3 Credits
- PSEN 489 - Industrial Environmental Management - 3 Credits
  OR WSTE 489 - Industrial Environmental Management - 3 Credits
- SOIL 365 - Soil Quality Assessment and Soil Survey Interpretation - 3 Credits
- SOIL 384 - Environmental Microbiology Lecture - 3 Credits
  OR SOIL 484 - Environmental Microbiology - 4 Credits
  OR WSTE 484 - Environmental Microbiology - 4 Credits
- SOIL 387 - On-Site Wastewater Treatment Systems - 1 Credits
  OR WSTE 387 - On-Site Wastewater Treatment Systems - 1 Credits
- SOIL 479 - Environmental Fate of Organic Chemicals - 3 Credits
  OR WSTE 479 - Environmental Fate of Organic Chemicals - 3 Credits
- SOIL 482 - Nutrient Management: Land Application and Planning - 3 Credits
  OR WSTE 482 - Nutrient Management: Land Application and Planning - 3 Credits
- SOIL 486 - Composting - 1 Credits
  OR WSTE 486 - Composting - 1 Credits
- WATR 390 - Water Chemistry and Analysis - 4 Credits
- WATR 454 - Design of Constructed Wetlands - 1 Credits
- WSTE 380 - Solid Waste Management - 3 Credits
- WSTE 381 - Internship in Waste Resources - 1-6 Credits
- WSTE 476 - Hazardous Waste Management - 3 Credits
- WSTE 481 - Wastewater Treatment II - 2 Credits
- WSTE 485 - Solid Waste Management II - 2 Credits

Completion Requirement

Human Development, 12 credits

Complete ALL of the following Courses:

- HD 265 - Human Growth and Development: A Life-Span Approach - 3 Credits
  OR PHED 220 - Lifespan Motor Development - 3 Credits
- HD 361 - Development and Guidance of Children - 3 Credits
- HD 455 - Child Life and Therapeutic Play - 3 Credits
- HD 466 - Development and Guidance of Adolescents - 3 Credits

Note: PHED 220 is for PHED majors only.

Diversity/Inclusivity, 2-3 credits

Complete ANY of the following Courses:

- EDUC 205 - Pluralism for Educators - 2 Credits
- HD 366 - Families in Cross Cultural Contexts - 3 Credits
- NRES 305 - Inclusive Practices for Outdoor Professionals - 2 Credits
- SW 387 - Emerging Issues in Social Work with Children and Youth - 3 Credits

Special Populations/Topics, 3 credits

Complete ANY of the following Courses:

- HD 367 - Intentional Intimacy and Family Systems - 3 Credits
- HD 465 - Grief and Loss - 3 Credits
- PHED 302 - Teaching Adventure Education - 3 Credits
- SOC 332 - Juvenile Delinquency - 3 Credits

Program Development, 6-7 credits

Earn at least 6 credits from the following:

- ECED 262 - Infant and Toddler Education - 3 Credits
- NRES 281 - Introduction to Recreation and Parks - 3 Credits
- NRES 301 - Foundations of Environmental Education I - 3 Credits
- NRES 370 - Introduction to Environmental Study and Environmental Education - 3 Credits
- NRES 376 - Environmental Education Practicum - 4 Credits

Leadership/Management, 3 credits

Complete ANY of the following Courses:

- BUS 320 - Principles of Management - 3 Credits
- MSL 202 - Leadership in Contemporary Military Environments - 3 Credits
- NRES 383 - Organizational Leadership - 3 Credits

Fieldwork with Youth, 1 credit

Fulfill ANY of the following requirements:

Non-teaching Majors

Complete ANY of the following Courses:

- HD 497 - Field Work - 1-12 Credits
- NRES 376 - Environmental Education Practicum - 4 Credits
- NRES 482 - Human Dimensions of Natural Resources Practicum - 12 Credits

- Other accepted field work with youth (Credits: 1-12) can be substituted for the courses listed right above.

OR

Teaching Majors

Complete ALL of the following Courses:

- EDUC 398 - Student Teaching - 1-16 Credits

Additional Comments:

No Requirement Level

ABT 745 - Industrial Applications in Regulatory Affairs - 3 Credits

Overview

Subject Area	Catalog Number	Grading Basis
ABT	745	GRD - Graded

Description
Examines the global regulatory environments in risk-based assessment of biotechnological developments across diverse sectors, ensuring consumer and environmental protection. Addresses how validation is essential to the incorporation of emerging technologies into viable, accessible, and successful products. Highlights the stakeholders role in regulatory oversight and policy through relevant industry case studies. 3 hrs lec. online per wk.

ABT 765 - Assessing Innovation in Biotechnology - 3 Credits

Overview

Subject Area
ABT

Catalog Number
765

Grading Basis
GRD - Graded

Description
A survey of biotechnology assessments in areas such as regenerative medicine, agricultural biotechnology, and bioremediation. Course links disciplines with the critical evaluative role played by scientific discovery, market valuation, intellectual property, freedom-to-operate (FTO), and licensing strategy by assessing the role each played in the commercialization of a specific technology. 3 hrs lec. online per wk.

AI 320 - Deep Learning and Neural Networks - 3 Credits

Overview

Subject Area
AI

Catalog Number
320

Grading Basis
GRD - Graded

Description
Introduces students to Bayesian statistics and probabilistic programming to model uncertainty and decision-making in AI. Students will explore key concepts such as training techniques, optimization strategies, and model evaluation, while progressing through perceptron-based models to advanced architectures like convolutional neural networks (CNNs), recurrent neural networks (RNNs), and transformers. Includes both theory and practical application such as pattern/voice, word recognition, handwriting, and facial recognition to ensure proficiency in implementing neural network architectures using popular AI libraries.

Prerequisites

AI 321 - Artificial Intelligence for Cybersecurity - 3 Credits

Overview

Subject Area
AI

Catalog Number
321

Grading Basis
GRD - Graded

Description
Introduces students to the integration of Artificial Intelligence (AI) and Machine Learning (ML) techniques in cybersecurity. The course covers how AI can be applied to detect anomalies, analyze network traffic, and identify potential security threats in real-time. Key topics include AI-driven threat detection, threat modeling, and the automation of cybersecurity processes. Students will explore defensive and offensive applications of AI, including AI-enhanced penetration testing, and anomaly detection.

AI 322 - Computer Vision - 3 Credits

Overview

Subject Area
AI

Catalog Number
322

Grading Basis
GRD - Graded

Description
Explore concepts and techniques for extracting meaningful information from images and videos. Develops skills in image processing, feature extraction, segmentation, object detection and recognition, classification, and tracking using popular libraries, frameworks and tools. Application of computer vision to real-world applications such as image recognition, facial analysis, and autonomous systems.

AI 323 - Introduction to Natural Language Processing - 3 Credits

Overview

Subject Area
AI

Catalog Number
323

Grading Basis
GRD - Graded

Description
Explore techniques for processing and analyzing human language data. Topics include text preprocessing, text classification, tagging, syntactic and semantic analysis, language modeling, and information retrieval. Develop and deploy natural language processing (NLP) applications using modern frameworks and tools to solve real-world problems, such as sentiment analysis, question answering, chatbots, and text generation.

AI 324 - Reinforcement Learning - 3 Credits

Overview

Subject Area
AI

Catalog Number
324

Grading Basis
GRD - Graded

Description
Reinforcement learning (RL) is a type of machine learning where agents learn to make decisions based on their actions and observing the resulting rewards and penalties. This advanced course explores algorithms and methods for decision-making and optimization, the exploration-exploitation tradeoff, multi-agent systems, and application of deep learning to RL. Application of RL to real-world problems such as game playing, robotics, and recommendation systems in various industries.

Prerequisites
005197 - Both CIS 120 and AI 320

Typically Offered on Stevens Point Campus
Spring Only

AI 331 - Artificial Intelligence in the Cloud - 3 Credits

Overview

Subject Area
AI

Catalog Number
331

Grading Basis
GRD - Graded

Description
Application of cloud computing to develop and deploy machine learning models at scale. This course explores popular cloud-based services and how to leverage them for tasks like data preprocessing, model training, and deployment. Covers cloud-based deep learning frameworks and techniques for optimizing model performance on cloud-based infrastructure.

Prerequisites
005198 - AI 320, and either AI 322 or AI 323

Typically Offered on Stevens Point Campus
Spring Only

AI 445 - Big Data and High-Performance Computing - 3 Credits

Overview

Subject Area
AI

Catalog Number
445

Grading Basis
GRD - Graded

Description
High-performance computing is a form of parallel processing that enables the processing of large datasets. Introduces concepts, tools, and techniques for performing complex computations at scale. Examines popular big data and distributed computing frameworks, and high-performance computing (HPC) fundamentals. Applies these skills to solve real-world problems in utilizing large datasets.

APC 300 - Programming I - 3 Credits

Overview

Subject Area	Catalog Number	Grading Basis
APC	300	GRD - Graded

Description
Provides a solid foundation in computing by focusing on problem-solving and fundamental programming skills. Students will gain skills in computational thinking and will learn to implement solutions using a contemporary programming language. This course will emphasize good programming practices such as writing well-tested comprehensible code that is developed incrementally and iteratively. The course will cover essential topics that will include variables, data types and expressions, control structures (conditionals, loops), basic data structures, functions and modular programming, handling input/output, and testing and debugging.

APC 420 - Computer Security I - 3 Credits

Overview

Subject Area
APC

Catalog Number
420

Grading Basis
GRD - Graded

Description
This course covers topics spanning security and risk management, security engineering, identity and access management, and security operations. Topics include cryptography, access control models, malicious software and counter-measures, security policy, security model, trust, vulnerability assessment, security standards and evaluation, administration and auditing, and secure storage.

APC 430 - Applied Data Structures and Algorithms - 3 Credits

Overview

Subject Area
APC

Catalog Number
430

Grading Basis
GRD - Graded

Description
This course covers fundamental concepts and the application of data structures and algorithms. Topics may include abstract data type, dynamic array, iterators, linked list, generics, stacks, queues, binary search tree, navigating trees, collections, maps, heaps, hashing, graphs, and sorting.

Prerequisites

APC 460 - Software Engineering Practices - 3 Credits

Overview

Subject Area	Catalog Number	Grading Basis
APC	460	GRD - Graded

Description
This course covers basic software development methodologies and tools. Methodologies include the waterfall, iterative and agile approaches. Tools include integrated development environments (IDEs), unified modeling language (UML), and testing frameworks. Other topics include requirements analysis, object-oriented analysis, test-driven development, and design patterns. Students will work on a team software project.

APC 470 - IS Strategy and Management - 3 Credits

Overview

Subject Area
APC

Catalog Number
470

Grading Basis
GRD - Graded

Description
This course begins with an exploration of organizational strategy and how Information Systems strategy is developed to support the attainment of organizational goals. The course then explores the management of the IS function using a capability maturity model approach to topics such as budgeting, acquisition, service management, change management, and personnel management.

APC 490 - Capstone Project Preparation - 1 Credits

Overview

Subject Area
APC

Catalog Number
490

Grading Basis
GRD - Graded

Description
The purpose of this course is for students to choose a capstone project, create an initial plan with specific deliverables identified, and receive approval. This course covers review of key concepts necessary for success in the Capstone (APC 495) course, including software engineering practices, project management techniques, systems analysis, and communicating with technical or non-technical audiences (CTO, IT staff, etc.). May include additional topics specific to anticipated capstone projects.

Prerequisites

Description
Use publications, projects, and visits with practitioners, explore ways in which artworks, arts experiences, and arts-based techniques are currently used to enhance the work of education, audience development, community advocacy, human well-being, and societal change. In examining examples of these efforts, will also address issues of inclusion, diversity, equity, and access as factors in their legitimacy and success.

Description
Athletic training clinical education experience under the supervision of a clinical preceptor. Clinical experiences will focus on skill integration in all domains of athletic training to emphasize patient-centered care. This course may not be listed as a requirement or eligible as an elective for any major, minor, or certificate program other than the following: Athletic Training (MS).

BIOL 99 - Basic Biology Tutorial - 1 - 2 Credits

Overview

Subject Area
BIOL

Catalog Number
99

Grading Basis
GRD - Graded

Description
Provide biological instruction through several methods of listening, speaking, reading, writing, and will review basic concepts in Chemistry, Mathematics, and computer skills required in BIOL 101, 110, 111, 130 and 160. The content and skills will empower students to succeed in their concurrent Biology course and in lateral and higher-level Biological Sciences courses. May be repeated for credit. Does not count for degree, major, minor, or certificate.

Prerequisites
004526 - Concurrent registration in BIOL 101, BIOL 110, BIOL 111, BIOL 130, or BIOL 160

Typically Offered on Stevens Point Campus
No Longer Offered

BIOL 101 - General Biology - 5 Credits

Overview

Subject Area
BIOL

Catalog Number
101

Grading Basis
GRD - Graded

Description
Introduces non-major students to the basic principles of Biology and acquaints them with the diversity of life. Exploration of basic cellular-level processes, genetics and reproduction, evolution, biological diversity, physiology, and ecology, with emphasis on the applicability and relevance of biological concepts, scientific method, and technology to the general public.

General Education Designation(s)
LS - Lab Science (AD), NW - Natural World (AD), NSC - Natural Sciences (GEP)

Typically Offered on Stevens Point Campus
Fall and Spring

BIOL 110 - Principles of Biology I - 5 Credits

Overview

Subject Area
BIOL

Catalog Number
110

Grading Basis
GRD - Graded

Description
Fundamental principles of biology, including chemistry of life, cell biology, genetics, and mechanisms of evolution. Principles of cell and molecular biology, from macromolecules to organisms, integrated through an evolutionary framework. Development of scientific skills to form hypotheses, analyze and interpret data, evaluate biological literature, and relate biology to society.

Prerequisites
004584 - Completion of MATH 95 or suitable math placement score of MATH 107 or higher. Concurrent registration in CHEM 105 strongly advised.

General Education Designation(s)
LS - Lab Science (AD), NW - Natural World (AD), NSC - Natural Sciences (GEP)

Typically Offered on Stevens Point Campus

BIOL 190 - Introduction to the Biology Major - 1 Credits

Overview

Subject Area
BIOL

Catalog Number
190

Grading Basis
PFL - Pass/Fail

Description
Introduces students to the biology major and to relevant campus, school, and department resources. Students will become acquainted with the curriculum (including major pathways), faculty and staff (including areas of expertise and research), extracurricular opportunities within the major, and study skills and time management practices that should promote their academic success within the major.

BIOL 205 - Survey of Ecology and Evolution - 2 Credits

Overview

Subject Area
BIOL

Catalog Number
205

Grading Basis
GRD - Graded

Description
Identify the interdependent relationships in ecosystems, and how this relates to ecosystem dynamics, function, and resilience. Understand the interrelatedness and principles of evolution at multiple levels from molecules to ecosystems. Develop scientific skills to form hypotheses, analyze and interpret data, evaluate biological literature, and relate biology to society. Develop inquiry lessons for use in the K-9 classroom. Does not count towards the biology or biochemistry major/minor. Course required for students completing the Life Science Certificate.

Prerequisites
004587 - One of the following: BIOL 100, BIOL 101, BIOL 110, BIOL 111, BIOL 130, BIOL 160, or Instructor Consent

BIOL 233 - Microbiology for Health Sciences - 4 Credits

Overview

Subject Area
BIOL

Catalog Number
233

Grading Basis
GRD - Graded

Description
Morphology, physiology, classification, cultivation of bacteria and viruses, with emphasis on microbial diseases, epidemiology, and immunology. Recommended for nursing and dietetics majors. Does not fulfill requirements for the biology major or minor.

Prerequisites
001054 - One of the following: BIOL 101, BIOL 110, BIOL 130, BIOL 160, CHEM 101, or CHEM 105

General Education Designation(s)

BIOL 285 - Anatomy and Physiology Principles - 4 Credits

Overview

Subject Area
BIOL

Catalog Number
285

Grading Basis
GRD - Graded

Description
An examination of the structure and function of the human body at the molecular, cellular, tissue, organ, and system levels of organization. The integration of these levels of organization within the human organism is emphasized, focusing on body organization, support, movement, and neural control. Lecture, lab, and may also include demonstrations, discussion, and field trips. May not earn credit in both BIOL 285 and UWX BL 285. Does not count toward Biology major.

Prerequisites
005025 - One of the following: BIOL 101, BIOL 110, BIOL 111, BIOL 130, BIOL 160, CHEM 101, CHEM 105, UWX BL101, or Instructor Consent

BIOL 287 - Essentials of Human Anatomy - 4 Credits

Overview

Subject Area
BIOL

Catalog Number
287

Grading Basis
GRD - Graded

Description
Examine human anatomy using models, diagrams, and digital media. Provides a foundational introduction to human structure and function. Recommended for students interested in physical education, nursing, health promotion and wellness, or for students planning to take BIOL 387 who have minimal background knowledge in human anatomy. Does not count towards the Biology major or minor.

BIOL 302 - Cellular and Molecular Biology - 3 Credits

Overview

Subject Area
BIOL

Catalog Number
302

Grading Basis
GRD - Graded

Description
Integrates molecular biology and biochemistry in a cellular context. Focuses on structure, function, metabolism, development, and reproduction of cells. Covers molecular genetics, including DNA replication, mutation, transcription, translation, and gene regulation in multiple systems. Introduces the fundamentals of biotechnology.

Prerequisites
004503 - BIOL 210, and either CHEM 221 or CHEM 325

BIOL 309 - Field Biology - 3 - 4 Credits

Overview

Subject Area
BIOL

Catalog Number
309

Grading Basis
GRD - Graded

Description
Introduction to specific ecosystems while exploring biotic and abiotic components and processes that structure communities within these ecosystems. Content is delivered through active on-site experiences within habitats: lectures, discussions of primary scientific literature, student presentations, quantitative sampling, hypothesis formulation and testing. Offered in Winterim and Summer. Subtitle will designate habitats explored. Off-campus course. Available for graduate credit as BIOL 509.

Prerequisites
001055 - Either BIOL 101 or BIOL 111, or both BIOL 130 and BIOL 160

Typically Offered on Stevens Point Campus
Winterim Only

BIOL 311 - Population Genetics and Evolution - 3 Credits

Overview

Subject Area
BIOL

Catalog Number
311

Grading Basis
GRD - Graded

Description
Natural patterns (variation, classification, phylogeny, biogeography) and processes (genetic drift, natural selection, adaptation, speciation) that underlie the origin and diversification of life on earth. Philosophy of science and history of evolutionary theory. Character evolution and human evolutionary biology. Available for graduate credit as BIOL 511.

BIOL 312 - Human Genetics - 4 Credits

Overview

Subject Area
BIOL

Catalog Number
312

Grading Basis
GRD - Graded

Description
Study of human genes, their functions, mode of inheritance and mutations causing disorders. Includes human pedigree analyses, genetic testing, clinical manifestations and treatment, gene therapy, oncogenetics, case studies, and bioethical issues. Available for graduate credit as BIOL 512.

Prerequisites
001221 - BIOL 210

BIOL 313 - Cancer Biology - 3 Credits

Overview

Subject Area
BIOL

Catalog Number
313

Grading Basis
GRD - Graded

Description
An introduction to cancer biology, from microscopic to macroscopic processes. Topics include the initiation, promotion, and progression of cancer. Available for graduate credit as BIOL 513.

Prerequisites
004297 - BIOL 210 and one of the following (or concurrent registration): CHEM 220, CHEM 221, or CHEM 326

Typically Offered on Stevens Point Campus

BIOL 314 - Cell Biology - 4 Credits

Overview

Subject Area
BIOL

Catalog Number
314

Grading Basis
GRD - Graded

Description
Structure and function of cells and organelles, including membrane structure and transport; biogenetics of mitochondria and chloroplasts; cell motility; DNA replication; protein synthesis and transport; mitosis; meiosis; cytokinesis; laboratory techniques including gel electrophoresis; phase-contrast microscopy; spectrophotometry; respirometry; radioisotope analysis; cell culture; chromosome banding; bacterial DNA transformation. Available for graduate credit as BIOL 514.

BIOL 315 - Virology - 3 Credits

Overview

Subject Area
BIOL

Catalog Number
315

Grading Basis
GRD - Graded

Description
What viruses are, how they are transmitted, replicated, evade destruction, cause disease, prevent disease, and how they can be utilized for advanced molecular experiments, disease treatments, and vaccine production. Multiple specific viruses and their importance (and controversy) across human history will also be studied.

BIOL 320 - Molecular Biology - 4 Credits

Overview

Subject Area
BIOL

Catalog Number
320

Grading Basis
GRD - Graded

Description
Mechanisms that control the maintenance, expression, and evolution of genomes. Some topics include DNA, RNA and protein structure, DNA replication, mutation and repair, transcription and modifications, and gene structure, function and regulation. Theory and application of molecular techniques. Labs include DNA purification, electrophoresis, PCR, restriction digestion, sequence analysis, and gene cloning. Available for graduate credit as BIOL 520.

Prerequisites
001588 - BIOL 210; and either CHEM 221 and CHEM 222 or CHEM 325

Typically Offered on Stevens Point Campus
Spring Only

BIOL 325 - Introduction to Biological Illustration - 2 Credits

Overview

Subject Area
BIOL

Catalog Number
325

Grading Basis
GRD - Graded

Description
Develop an appreciation for the modern forms and uses of illustration in biological publication. Learn to incorporate elements of positive and negative space, line stippling, and shading with black-and-white media (e.g. pen and ink, graphite) into your illustrations on biologically themed subject matter. Create biological illustrations with colored media and with digital media. Assessment will be based on student group or instructor critiques (oral and written) of assignments and portfolio items.

Prerequisites
001059 - One of the following: BIOL 100, BIOL 101, BIOL 110, BIOL 111, BIOL 130, or BIOL 160

Typically Offered on Stevens Point Campus

BIOL 338 - Phycology - 4 Credits

Overview

Subject Area
BIOL

Catalog Number
338

Grading Basis
GRD - Graded

Description
Taxonomy, morphology, and ecology of algae with emphasis on local species. Field collections, small group experiments, lab analysis of field and cultured samples, and discussion of current algal research literature. May not earn credit in both BIOL 338 and WATR 338. Available for graduate credit as BIOL 538.

BIOL 381 - Animal Physiology - 4 Credits

Overview

Subject Area	Catalog Number	Grading Basis
BIOL	381	GRD - Graded

Description
Normal functions of organ systems in wild and domestic vertebrates and invertebrates. Fulfills the physiology requirement for biology, biology: human and animal health emphasis, biochemistry, wildlife ecology and management, and fisheries and water resources: fisheries and aquatic sciences option majors. Fulfills requirements for the biology, captive wildlife, and neuroscience and behavior minors.

Prerequisites
002001 - One of the following: BIOL 101, BIOL 111, or BIOL 160; and one of the following: CHEM 101, CHEM 105, or CHEM 117 (or equivalent).

BIOL 382 - Endocrinology of Mammals - 3 Credits

Overview

Subject Area	Catalog Number	Grading Basis
BIOL	382	GRD - Graded

Description
Anatomy and physiology of major endocrine glands, primarily in mammals; hormonal control systems; biosynthesis, transport, and molecular actions of hormones; common endocrine diseases; current laboratory assay methods; current advances in hormone research. Guest lecturers. Available for graduate credit as BIOL 582.

Prerequisites
001067 - Either BIOL 381 or BIOL 385, or Instructor Consent

Typically Offered on Stevens Point Campus
No Longer Offered

BIOL 383 - Biology of Reproduction - 3 Credits

Overview

Subject Area
BIOL

Catalog Number
383

Grading Basis
GRD - Graded

Description
Survey of mammal reproduction with emphasis on human reproduction, including sexual development and behavior, fertilization, pregnancy, parturition (birth), lactation, natural and synthetic control of contraception and fertility. Available for graduate credit as BIOL 583.

Prerequisites
001068 - Either BIOL 381 or BIOL 385, or Instructor Consent

General Education Designation(s)
SER - Individual, Social, Environmental Respons (AD)

Typically Offered on Stevens Point Campus
Fall terms of odd years

BIOL 385 - Human Physiology - 4 Credits

Overview

Subject Area
BIOL

Catalog Number
385

Grading Basis
GRD - Graded

Description
Normal functions of organ systems in humans; fulfills physiology requirements for biology, human development and nutritional sciences, physical education majors, and is recommended as preprofessional for medical or allied health fields.

Prerequisites
002002 - One of the following: BIOL 101, BIOL 111, or BIOL 160; and one of the following: CHEM 101, CHEM 105, or CHEM 117 (or equivalent)

Typically Offered on Stevens Point Campus

BIOL 386 - Fish Culture - 3 Credits

Overview

Subject Area
BIOL

Catalog Number
386

Grading Basis
GRD - Graded

Description
Introduction to the culture of finfish, methods of production, environmental and ecological considerations, selective breeding, nutrition, diseases, processing and marketing. May not earn credit in both BIOL 386 and WATR 386. Available for graduate credit as BIOL 586.

Prerequisites
001070 - One of the following: BIOL 101, BIOL 111 or BIOL 160; and BIOL 210

Typically Offered on Stevens Point Campus
Fall Only

BIOL 387 - Human Anatomy - 4 Credits

Overview

Subject Area	Catalog Number	Grading Basis
BIOL	387	GRD - Graded

Description
Examine human anatomy using models, diagrams, X-rays, digital media, histology, and prosected cadaver demonstrations. Complements BIOL 385 to provide general background in human structure and function. Recommended for students interested in medicine, physical therapy, pharmacy, dietetics, and related health fields. Available for graduate credit as BIOL 587.

Prerequisites
001008 - Either BIOL 101 and HS 295, or BIOL 110 and HS 295, or one of the following: BIOL 111, BIOL 160, BIOL 285, BIOL 286, BIOL 287, BIOL 385; or Instructor Consent

BIOL 388 - Animal Behavior - 3 Credits

Overview

Subject Area	Catalog Number	Grading Basis
BIOL	388	GRD - Graded

Description
Comparative study of animal behavior; description, classification, analysis, and evolution of behavioral patterns of animals. Also social behavior and underlying mechanisms. May not earn credit for both BIOL 388 and PSYC 388. Available for graduate credit as BIOL 588.

Prerequisites
001071 - One of the following: BIOL 101, BIOL 111, or BIOL 160

BIOL 389 - Immunology - 3 Credits

Overview

Subject Area	Catalog Number	Grading Basis
BIOL	389	GRD - Graded

Description
Study of the molecular and cellular components that comprise the immune system, including their function and interactions with body systems. Applications of immunology to bioassays, customized antibodies, immune therapy, vaccination, and cancer biology are also discussed. Available for graduate credit as BIOL 589.

Prerequisites

BIOL 391 - Essentials of Python for Bioinformatics - 2 Credits

Overview

Subject Area
BIOL

Catalog Number
391

Grading Basis
GRD - Graded

Description
Introduction to Python coding to manipulate and analyze biological and biochemical data. Topics include basic programming concepts such as variables, flow control, and regular expressions, as well as specific Python functions, methods, and data types suited to bioinformatics.

Prerequisites
004588 - BIOL 210; and one of the following: MATH 111, MATH 225, or MATH 255

BIOL 398 - Introduction to Experimental Design - 2 Credits

Overview

Subject Area	Catalog Number	Grading Basis
BIOL	398	GRD - Graded

Description
Learn how to design a meaningful experiment through the iterative process of design, evaluation and refining. Design an experiment in such a way to maximize the probability that the data collected can be effectively analyzed and interpreted. Particularly valuable if you are pursing an independent science research project and to science teachers mentoring their students' projects. Available for graduate credit as BIOL 598.

BIOL 401 - Introduction to Cannabis Science - 3 Credits

Overview

Subject Area	Catalog Number	Grading Basis
BIOL	401	GRD - Graded

Description
A broad introduction to Cannabis Science, including the history of Cannabis cultivation, social and legal controversies surrounding Cannabis, and the many ways in which Cannabis is used. This course may not be listed as a requirement or eligible as an elective for any major, minor, or certificate program except for the Cannabis Science Undergraduate Certificate.

BIOL 487 - Survey in Human Dissection - 2 Credits

Overview

Subject Area	Catalog Number	Grading Basis
BIOL	487	GRD - Graded

Description
Additional study of human anatomy by dissecting a cadaver to gain tactile information on anatomical structures, basic identification skills, and hands-on dissection experience. Complements BIOL 387 with an introduction to cadaver dissection and review of human gross anatomy. Dissection is not the equivalent of a medical school dissection. Available for graduate credit as BIOL 687.

BIOL 533 - General Microbiology - 4 Credits

Overview

Subject Area
BIOL

Catalog Number
533

Grading Basis
GRD - Graded

Description
Morphology, physiology, classification, cultivation of microbes, with introduction to microbial ecology, microbial genetics, metagenomics, pathogenesis, and immunology. Available for undergraduate credit as BIOL 333.

Typically Offered on Stevens Point Campus
As Needed

Credits

BIOL 598 - Introduction to Experimental Design - 2 Credits

Overview

Subject Area
BIOL

Catalog Number
598

Grading Basis
GRD - Graded

Description
Learn how to design a meaningful experiment through the iterative process of design, evaluation and refining. Design an experiment in such a way to maximize the probability that the data collected can be effectively analyzed and interpreted. Particularly valuable if you are pursing an independent science research project and to science teachers mentoring their students' projects. Available for undergraduate credit as BIOL 398.

BUS 710 - Financial Leadership Through Applied Decision-Making - 3 Credits

Overview

Subject Area	Catalog Number	Grading Basis
BUS	710	GRD - Graded

Description
Corporate financial, strategic leadership skills are developed through a variety of projects that apply financial theory and principles to real-world problem solving and strategic planning. The projects and topics may include computer modeling and financial forecasting; capital structure determination, business valuation; investment analysis; industry and firm analysis; important international issues in corporate financial, strategic planning. This course may not be listed as a requirement or eligible as an elective for any major, minor, or certificate program other than the following: Applied Leadership and Decision-Making (MBA).

BUS 731 - Creative, Critical and Design Thinking - 3 Credits

Overview

Subject Area	Catalog Number	Grading Basis
BUS	731	GRD - Graded

Description
An introduction to the practice of consulting - what consultants do, who they work for and how they create value. Understand the life cycle of a consulting project including how to identify and define consulting opportunities, develop proposals, perform diagnostics, develop solutions, create an effective implementation plan and present findings. Develop creative, critical and design thinking skills, by understanding appropriate frameworks to assess, diagnose, suggest and implement solutions.

BUS 732 - NeuroLeadership: Mastering Resilience and High Performance - 3 Credits

Overview

Subject Area
BUS

Catalog Number
732

Grading Basis
GRD - Graded

Description
Introduction to personal, organizational, community, and social resilience, including a focus on processes within the brain that influence performance, decision-making, and interaction. Students will develop skills to lead change, encourage resilience, and manage transitions. Topics covered include wellness, emotion regulation, cognitive flexibility, mindfulness, positive emotions and stress management, and high-quality connections. This course may not be listed as a requirement or eligible as an elective for any major, minor, or certificate program other than the following: Applied Leadership and Decision-Making (MBA).

BUS 740 - Effective Communication in Business Leadership - 3 Credits

Overview

Subject Area	Catalog Number	Grading Basis
BUS	740	GRD - Graded

Description
This is a project-based leadership communication course. Projects expose students to experiences that develop emotional intelligence and cultivate effective oral and written communication skills. Students will discuss, internalize, and apply leadership communication best practices to influence people in their professional, and personal lives. Competencies include crafting business papers, employing oral communication as a leadership tool, and developing and delivering persuasive presentations. This course may not be listed as a requirement or eligible as an elective for any major, minor, or certificate program other than the following: Applied Leadership and Decision-Making (MBA).

BUS 750 - Applied Data Analytics in Business Leadership - 3 Credits

Overview

Subject Area	Catalog Number	Grading Basis
BUS	750	GRD - Graded

Description
Provides an introduction to data analytics and highlights its importance in business. It focuses on using analytical software to collect, manage, and analyze data for strategic decision making. Students develop skills for effective interpretation and communication of results for management applications. Projects involve analyzing business case studies and creating models to aid in strategic planning. Data identification, data structure, and model selection are emphasized throughout. This course may not be listed as a requirement or eligible as an elective for any major, minor, or certificate program other than the following: Applied Leadership and Decision-Making (MBA).

CHEM 105 - Fundamental Chemistry - 5 Credits

Overview

Subject Area
CHEM

Catalog Number
105

Grading Basis
GRD - Graded

Description
(First of Two in a two-semester basic course) Fundamental principles and theories of chemistry, including (i) Units, Measurements, and Problem Solving; (ii) Atoms & Matter; (iii) Quantum Mechanical Model of the Atom; (iv) Periodic Properties of the Elements; (v) Molecules & Compounds; (vi) Chemical Bonding (Lewis, VSEPR, VBT); (vii) Chemical Reactions & Stoichiometry; (viii) Solutions & Aqueous Reactions; (ix) Thermochemistry; (x) Gases.

Prerequisites
001984 - Concurrent registration in MATH 107 or suitable math placement test score. If you receive credit for CHEM 117 you cannot receive credit for CHEM 105. Recommended: High school chemistry or CHEM 101.

General Education Designation(s)
LS - Lab Science (AD), NW - Natural World (AD), QL-AD - Quantitative Literacy (AD), NSC - Natural Sciences (GEP)

CHEM 246 - Quantitative Analysis - 2 Credits

Overview

Subject Area	Catalog Number	Grading Basis
CHEM	246	GRD - Graded

Description
Lecture only course for theory and methods of quantitative chemical analysis including effects of chemical equilibira on quantitative separations, titration curves, polyprotic acids and buffers, and oxidation-reduction processes. 2 hrs lec per wk.

Prerequisites
004832 - Either CHEM 106 or CHEM 117 with a grade of C- or better

Typically Offered on Stevens Point Campus
No Longer Offered

CHEM 250 - Review and Updates in Chemistry and Biochemistry - 3 Credits

Overview

Subject Area
CHEM

Catalog Number
250

Grading Basis
GRD - Graded

Description
Designed specifically for the nursing consortium and is to be taken primarily by RNs already accepted into their BSN degree completion program. Begins with a review of relevant topics in chemistry, both general and organic, and then covers topics typical of a biochemistry course such as biological molecules, metabolism, nutrition, protein functions, and molecular biology. Does not count for credit for the B.S. in Chemistry or B.S. in Biochemistry.

Typically Offered on Stevens Point Campus
No Longer Offered

Typically Offered on the Branch Campuses

CHEM 260 - Elementary Biochemistry - 4 Credits

Overview

Subject Area
CHEM

Catalog Number
260

Grading Basis
GRD - Graded

Description
Introduction to the structure and cellular reactions of the primary constituents of living cells; for students with limited preparation in organic chemistry. Does not count toward any chemistry major.

Prerequisites
001544 - Either CHEM 222 or CHEM 325. If you receive credit for CHEM 365 you cannot receive credit for CHEM 260.

Typically Offered on Stevens Point Campus
Spring Only

CHEM 325 - Organic Chemistry - 4 Credits

Overview

Subject Area
CHEM

Catalog Number
325

Grading Basis
GRD - Graded

Description
(Two semester course) Structure, conformation, stereochemistry, properties and reactions of organic compounds. Structure-property relationships and reaction mechanisms and their application in the study of a broad range of representative functional groups and compounds including carbohydrates, polymers, amino acids and proteins. Retrosynthetic analysis and spectroscopic characterization of organic molecules. (See note 4.)

Prerequisites
001545 - CHEM 106 with a grade of C- or better

General Education Designation(s)
LS - Lab Science (AD), NW - Natural World (AD)

CHEM 333 - Biophysical Chemistry - 3 Credits

Overview

Subject Area
CHEM

Catalog Number
333

Grading Basis
GRD - Graded

Description
Examine physiochemical principles underlying structure and chemical properties of macro-molecules of biological importance, including principles of thermo-dynamics, equilibrium, kinetics, and dynamics. Includes methods for separation and isolation of macromolecules and their spectroscopic characterization.

Prerequisites
002162 - MATH 225, either PHYS 204 or PHYS 250, CHEM 365, and accepted biochemistry major; or Department Consent

Typically Offered on Stevens Point Campus
Spring Only

CHEM 352 - Organic Chemistry Laboratory - 2 Credits

Overview

Subject Area
CHEM

Catalog Number
352

Grading Basis
GRD - Graded

Description
Basic laboratory techniques for organic chemistry including commonly used synthetic methods, purification, and characterization of reaction products. Six to eight hours of laboratory per week. CHEM 352 is equivalent to the laboratory portion of a two-semester organic laboratory sequence.

Prerequisites
004655 - C- or better in a lecture-only Organic Chemistry I course. Recommended: C- or beter in a lecture-only Organic Chemistry II course.

Typically Offered on Stevens Point Campus
No Longer Offered

CHEM 355 - Intermediate Inorganic Chemistry - 4 Credits

Overview

Subject Area
CHEM

Catalog Number
355

Grading Basis
GRD - Graded

Description
An introduction to the chemistry of inorganic compounds and materials. Descriptive chemistry of the elements. A survey of Crystal Field Theory, band theory, and various acid-base theories. Use of the chemical and scientific literature. Introduction to the seminar concept. 3 hrs lec, 3 hrs lab per wk.

Prerequisites
001655 - Both MATH 225 (or concurrent registration) and CHEM 325

Typically Offered on Stevens Point Campus
Spring Only

CHEM 363 - Introduction to Drug Discovery and Pharmacokinetics - 3 Credits

Overview

Subject Area
CHEM

Catalog Number
363

Grading Basis
GRD - Graded

Description
Overview of the drug discovery process and introduction to concepts in pharmacokinetics such as drug absorption, distribution, and metabolism as well as methods for structural determination of drug targets. Introduction to basic concepts in biochemistry while applying concepts from thermodynamics, kinetics, organic chemistry, and molecular modeling.

Prerequisites
004834 - Either CHEM 221 or CHEM 326, or Instructor Consent

Typically Offered on Stevens Point Campus
Spring terms of even years

CHEM 382 - Fundamentals of Atmospheric and Air Pollution Chemistry - 3 Credits

Overview

Subject Area	Catalog Number	Grading Basis
CHEM	382	GRD - Graded

Description
Introduction to the chemistry of the Earth's atmosphere and an overview of the chemical and physical processes (natural and anthropogenic) that determine the chemical composition of the atmosphere at local, regional, and global scales. Tropospheric air pollution, stratospheric ozone depletion, and regulatory control strategies and challenges will be discussed. Available for graduate credit as CHEM 582.

CHEM 535 - Physical Chemistry - Thermodynamics and Kinetics - 4 Credits

Overview

Subject Area
CHEM

Catalog Number
535

Grading Basis
GRD - Graded

Description
Laws and principles of chemical thermodynamics and kinetics. Available for undergraduate credit as CHEM 335.

Prerequisites
001080 - CHEM 248, CHEM 325, MATH 227, and PHYS 240; or Instructor Consent

Typically Offered on Stevens Point Campus
Fall Only

CHEM 536 - Physical Chemistry - Quantum Chemistry and Spectroscopy - 3 Credits

Overview

Subject Area
CHEM

Catalog Number
536

Grading Basis
GRD - Graded

Description
Laws and principles of physical chemistry covering atomic and molecular structure, quantum mechanics, chemical bonding, and spectroscopy. Available for undergraduate credit as CHEM 336.

Prerequisites
001248 - CHEM 325, MATH 227 and PHYS 250; or Instructor Consent

CHEM 539 - Physical Chemistry Laboratory - Spectroscopy - 1 Credits

Overview

Subject Area
CHEM

Catalog Number
539

Grading Basis
GRD - Graded

Description
Spectroscopic analysis of chemical substances with an emphasis on probing the electronic structure of atoms and molecules. Available for undergraduate credit as CHEM 339.

Prerequisites
001249 - CHEM 336 (or concurrent registration)

Typically Offered on Stevens Point Campus
Spring Only

CHEM 582 - Fundamentals of Atmospheric and Air Pollution Chemistry - 3 Credits

Overview

Subject Area
CHEM

Catalog Number
582

Grading Basis
GRD - Graded

Description
Introduction to the chemistry of the Earth's atmosphere and an overview of the chemical and physical processes (natural and anthropogenic) that determine the chemical composition of the atmosphere at local, regional, and global scales. Tropospheric air pollution, stratospheric ozone depletion, and regulatory control strategies and challenges will be discussed. Available for graduate credit as CHEM 382.

CIS 225 - Data Communication and Networks - 4 Credits

Overview

Subject Area
CIS

Catalog Number
225

Grading Basis
GRD - Graded

Description
Introduction to fundamental concepts in the design and implementation of computer communication networks, their protocols, and architectures. Students understand how popular network applications such as Web browser, FTP client, remote connection, and email work on computer networks. Topics include: TCP-IP and OSI architecture, application layer (Web, FTP, remote connection, email, client and server interaction), transport layer (TCP-UDP), network layer (IP), data link layers, and concept of local area network (LAN) and wide area network (WAN).

CIS 303 - Cybersecurity and Society - 3 Credits

Overview

Subject Area
CIS

Catalog Number
303

Grading Basis
GRD - Graded

Description
This course presents the principles of applied sociology and computer criminology that account for the human factors in security systems. Topics include an examination of the human role in cybersecurity, the role of security in the context of an organization with a special focus on the development and implementation of cybersecurity policies. Includes a focus on the ethical considerations of cybersecurity, as required to maintain professional certifications in the field.

CIS 354 - Network Management II - 4 Credits

Overview

Subject Area
CIS

Catalog Number
354

Grading Basis
GRD - Graded

Description
Extend and strengthen skills and knowledge learned from CIS 250 by more focusing on Wide Area Network (WAN). The topics are LAN switching technologies (RSTP, PVSTP, spanning tree mode), IP routing technologies (bootup process, routing protocols including OSPF and EIGRP), IP services (understand high availability, syslog, and SNMP), troubleshooting, and WAN technologies (MPLS, VPN, Cable). Lectures and hands-on labs are provided with Cisco switches and routers and-or simulators.

CSD 806 - Professional Issues: Medical Setting - 1 Credits

Overview

Subject Area	Catalog Number	Grading Basis
CSD	806	GRD - Graded

Description
Evaluation and management of persons with communication disorders within a medical setting. Various medical settings, ethics, functional goals, documentation (e.g. billing, reporting, etc.).

Typically Offered on Stevens Point Campus
Summer Only

Credits

Min Units:
1

Max Units:

CSD 832 - Pediatric Audiology - 3 Credits

Overview

Subject Area	Catalog Number	Grading Basis
CSD	832	GRD - Graded

Description
Study of normal physical, social, cognitive, speech and language and auditory development in children; causes and effects of childhood hearing loss; hearing screening and principles of early intervention; behavioral and objective assessment of hearing in children.

Typically Offered on Stevens Point Campus
Occasionally

Credits

CSD 834 - Counseling in Audiology - 2 Credits

Overview

Subject Area	Catalog Number	Grading Basis
CSD	834	GRD - Graded

Description
Roles of counseling in rehabilitative process, ethical obligations of counselors. Develop awareness and skill to build trusting relationship, convey diagnostic information, inform and empower patient/consumer as to their rights and community resources, and respond to way hearing loss impacts the person's social/economic life.

Typically Offered on Stevens Point Campus
Fall Only

CSD 835 - Research Methods - 3 Credits

Overview

Subject Area
CSD

Catalog Number
835

Grading Basis
GRD - Graded

Description
Critical analysis of research in speech-language pathology and audiology including theoretical support, research design, statistical levels of measurement, methods of reporting research results, and drawing conclusions from results. You may pursue personal research interests.

Typically Offered on Stevens Point Campus
Fall Only

Credits

CSD 845 - The Human Balance System: Structure, Assessment and Rehabilitation - 3 Credits

Overview

Subject Area	Catalog Number	Grading Basis
CSD	845	GRD - Graded

Description
Human balance function with emphasis on vestibular system including neurophysiology, testing and rehabilitation. Clinical experience performing electronystagmography (ENG) and videonystagmography (VNG) examination and analyzing results. Familiarity with rotational and posturography tests and various treatment techniques.

Prerequisites
001691 - Both CSD 850 and CSD 852

CYB 700 - Fundamentals of Cybersecurity - 3 Credits

Overview

Subject Area
CYB

Catalog Number
700

Grading Basis
GRD - Graded

Description
Introduces fundamental concepts and design principles in cybersecurity. Students will understand what, why, and how to protect in the cyberworld. Topics include CIA (Confidentiality, Integrity, and Availability), threats, attacks, defense, least privilege, access control and password management, security policies, critical controls, incident-handling and contingency planning, risk assessment and management.

Overview

Subject Area
CYB

Catalog Number
703

Grading Basis
GRD - Graded

Description
Examines network architectures, threats and attack surfaces exploited by these threats. Students will look at network traffic inspection, common attacks and defensive techniques like encryption, network segmentation, firewalls, application proxies, honeypots, DMZs, monitoring networks using: intrusion detection and intrusion prevention systems, and network access control.

CYB 710 - Introduction to Cryptography - 3 Credits

Overview

Subject Area
CYB

Catalog Number
710

Grading Basis
GRD - Graded

Description
Introduces fundamentals of applied cryptography, including encryption and decryption, symmetric and asymmetric systems, pseudorandom functions, block ciphers, hash functions, common attacks, digital signatures, key exchange, message authentication and public key cryptography. Covers implementation of cryptographic systems in approved programming language, and survey of relevant mathematical concepts, including elementary number theory.

CYB 715 - Managing Security Risk - 3 Credits

Overview

Subject Area	Catalog Number	Grading Basis
CYB	715	GRD - Graded

Description
Covers risk management processes and tools, risk assessment and analysis models, economic and control implications, risk measurement, and the ethics of risk. Students will communicate the technical and management-aspects of risk, based on research of their chosen industry, related regulation, recent industry reports, and risk implications to organizations, individuals and the nation.

CYB 720 - Communication in Cybersecurity - 3 Credits

Overview

Subject Area	Catalog Number	Grading Basis
CYB	720	GRD - Graded

Description
Research, organize, and present technical information to audiences with varying goals and technical needs. Emphasis on ethics, critical thinking, listening skills, and feedback to develop effective messages utilizing verbal and nonverbal communication strategies and visual aids. Individual and group presentations and projects will emulate professional scenarios in cybersecurity.

CYB 725 - Computer Forensics and Investigation - 3 Credits

Overview

Subject Area	Catalog Number	Grading Basis
CYB	725	GRD - Graded

Description
Provides instruction on the investigative and forensics processes of digital evidence with a focus on identifying indicators of compromise, the use of common forensic tools, and the preservation of forensics tools. Topics include forensics iconology, and the analysis of disk, memory, chip-off, mobile device, and OS artifacts.

CYB 730 - Computer Criminology - 3 Credits

Overview

Subject Area	Catalog Number	Grading Basis
CYB	730	GRD - Graded

Description
A primer on modern criminology with specific attention to the aspects of technology that facilitate criminal behaviors. Topics include computer crime laws, criminological theories of computer crime, court room and evidentiary procedure, idiographic and nomothetic digital profiling, computer crime victimology, habit/authorship attribution, stylometry, and case linkage analysis.

CYB 735 - Network Forensics - 3 Credits

Overview

Subject Area	Catalog Number	Grading Basis
CYB	735	GRD - Graded

Description
Covers protocol analysis, identification of malicious behavior in systems, and forensic investigations through event log aggregation, correlation and analysis. Students will analyze clips of wired and wireless network protocol analysis to discern methods of attacks and malicious activities.

CYB 740 - Incident Response and Remediation - 3 Credits

Overview

Subject Area	Catalog Number	Grading Basis
CYB	740	GRD - Graded

Description
Students will learn about the phases of an incident response system, and the use of IDS and forensics, dealing with false alarms and the remediation process to minimize business impact, plan business continuity, and work with law enforcement, auditors, insurance, and compliance in how to prevent future incidents.

Prerequisites
005169 - Prerequisite(s): All of the following: CYB 700, CYB 703, CYB 705, CYB 707, CYB 715, CYB 720

CYB 745 - Secure Operating Systems - 3 Credits

Overview

Subject Area
CYB

Catalog Number
745

Grading Basis
GRD - Graded

Description
Covers operating systems security infrastructure. Topics include, for a given operating system (Windows/Linux), updates and patches, access controls and account management, configuration management, hardening and securing services, and the use of scripting languages to automate security management. Additional topics may include auditing and forensics, virtualization and cloud computing.

CYB 750 - Offensive Security and Threat Management - 3 Credits

Overview

Subject Area
CYB

Catalog Number
750

Grading Basis
GRD - Graded

Description
Covers active defenses such as penetration testing, log management, hacking, threat management and system posturing. Students completing this course will have an understanding of, and the ability to preemptively secure computer and network resources by utilizing information about threats, actors and attack vectors and the ethics behind using this data.

CYB 755 - Security Administration - 3 Credits

Overview

Subject Area
CYB

Catalog Number
755

Grading Basis
GRD - Graded

Description
Covers the policy and governance aspects of security. Topics include application of security policies, standards, procedures and guidelines to administration of IT and communications, assessment of compliance including contractual, legal, industry standard, privacy and regulatory requirements, and implementation of security audits and assessment of security performance and security policy efficacy.

Prerequisites
005170 - Prerequisite(s): All of the following: CYB 700, CYB 703, CYB 705, CYB 707, CYB 715, CYB 720

CYB 760 - Cybersecurity Leadership and Team Dynamics - 3 Credits

Overview

Subject Area
CYB

Catalog Number
760

Grading Basis
GRD - Graded

Description
Focuses on leadership best practices and the interpersonal processes and structural characteristics that influence the effectiveness of teams. Emphasis will be placed on leadership models, principles of team building, group dynamics, problem solving, and crisis management in cybersecurity issues. Course will include case studies of modern security incidents.

CYB 765 - Cybersecurity Management - 3 Credits

Overview

Subject Area
CYB

Catalog Number
765

Grading Basis
GRD - Graded

Description
Covers management of cybersecurity policies and strategies at the organizational, national, and transnational levels. Examines the implications of key domestic and international regulations and changes in information technology and communications on security operations. Includes development of organizational security preparation, processes, and responses, and developing a disaster recover program.

CYB 770 - Security Architecture - 3 Credits

Overview

Subject Area
CYB

Catalog Number
770

Grading Basis
GRD - Graded

Description
Focuses on security architectures for the protection of information systems and data. Students completing this course can identify potential vulnerabilities in system architectures and design secure architectures. Topics include common enterprise and security architecture and their key design elements, such as secure cloud computing and virtualization infrastructures.

CYB 775 - Applied Cryptography - 3 Credits

Overview

Subject Area
CYB

Catalog Number
775

Grading Basis
GRD - Graded

Description
Provides an in-depth study of modern cryptography. Topics include public key and private key cryptography, types of attacks, cryptanalysis, perfect secrecy, hashing, digital signatures, virtual private networks, and quantum key cryptography. Topics from number theory and discrete probability necessary for understanding current cryptosystems and their security will be covered.

DPT 722 - Therapeutic Interventions I - 3 Credits

Overview

Subject Area	Catalog Number	Grading Basis
DPT	722	GRD - Graded

Description
This course will focus on four primary areas of therapeutic interventions: Exercise Prescription, Biophysical Agents (modalities), Integumentary repair and protection, and Manual Techniques. Exercise prescription will introduce and address basic concepts in exercise science and principles of tissue repair, recovery, and strength using current literature. Biophysical agents will introduce the modalities used in the practice of physical therapy, including indications for use, safety considerations, and a critical review of the literature concerning efficacy. Integumentary repair and protection will address principles of tissue repair and protection commonly seen in physical therapy and health related fields, as well as specific interventions used by physical therapists to treat integumentary issues including debridement. Manual techniques will introduce soft tissue and joint mobilization principles and indications for their use in physical therapy. Each areas of focus will have associated lab experiences which will focus on development of therapeutic intervention skills through peer interaction, simulation experiences, instructor demonstrations and competency skills checks. In addition, there will be select activities on campus and in the community with adult clients representative of those seen in physical therapy practice. This course may not be listed as a requirement or eligible as an elective for any major, minor, or certificate program other than the following: Doctor of Physical Therapy (DPT).

DPT 730 - Musculoskeletal Physical Therapy I - 4 Credits

Overview

Subject Area	Catalog Number	Grading Basis
DPT	730	GRD - Graded

Description
First of a three-part series on musculoskeletal physical therapy. Will introduce students to principles of physical therapy examination, evaluation, and management for non-specific musculoskeletal concerns and for common pathologies of the hip, knee, lower leg, ankle, and foot. Soft tissue and joint manual therapy principles and techniques will also be introduced along with indications and contraindications for their use in physical therapy. The lab portion of the course will focus on development of physical examination and treatment skills through peer interaction, simulation, instructor demonstrations and competency skills checks. In addition, there will be select activities on campus and in the community with uncomplicated adult clients representative of those seen in physical therapy practice. This course may not be listed as a requirement or eligible as an elective for any major, minor, or certificate program other than the following: Doctor of Physical Therapy (DPT).

DPT 731 - Musculoskeletal Physical Therapy II - 4 Credits

Overview

Subject Area
DPT

Catalog Number
731

Grading Basis
GRD - Graded

Description
Second of a three-part series on musculoskeletal physical therapy, reinforcing and advancing the concepts presented in DPT 730 (Musculoskeletal PT I). In this course students will be introduced to principles of physical therapy examination, evaluation, and management of common pathologies of the shoulder, elbow, wrist, and hand. The lab portion of the course will focus on development of physical examination and treatment skills through peer interaction, simulation, instructor demonstrations and competency skills checks. In addition, there will be select activities on campus and in the community with uncomplicated adult clients representative of those seen in physical therapy practice. This course may not be listed as a requirement or eligible as an elective for any major, minor, or certificate program other than the following: Doctor of Physical Therapy (DPT).

740

Grading Basis
GRD - Graded

Description
This course focuses on the introduction and development of movement analysis skills including classification of movement patterns. Students will be trained in identification of typical and atypical movement patterns and the correlation to pathologies. Manual movement assessment skills development including muscle length and strength assessment will also be emphasized. This course may not be listed as a requirement or eligible as an elective for any major, minor, or certificate program other than the following: Doctor of Physical Therapy (DPT).

DPT 761 - Integrated Clinical Practice II - 3 Credits

Overview

Subject Area
DPT

Catalog Number
761

Grading Basis
GRD - Graded

Description
Reinforce and build on basic client handling and safety skills that were introduced in DPT 760 Integrated Clinical Practice I. The curriculum will focus on progression of professional identity formation and professional communications skills. Students will be placed in an integrated clinical environment for supervised experiential learning and reinforcement of concepts and techniques learned in instructional lecture and lab. This course may not be listed as a requirement or eligible as an elective for any major, minor, or certificate program other than the following: Doctor of Physical Therapy (DPT).

DPT 763 - Physical Therapy Elective I - 1 - 6 Credits

Overview

Subject Area
DPT

Catalog Number
763

Grading Basis
PFL - Pass/Fail

Description
An advanced elective for Doctor of Physical Therapy students to supplement their graduate studies. The course credit hours, design, and learning outcomes will be established between the student and course instructor as part of an established learning contract prior to enrollment in the course. Course credit (1-6) will be dependent on the scope of the proposed project and specific learning outcomes. May be repeated for credit for up to 6 credits. This course may not be listed as a requirement or eligible as an elective for any major, minor, or certificate program other than the following: Doctor of Physical Therapy (DPT).

DPT 830 - Musculoskeletal Physical Therapy III - 3 Credits

Overview

Subject Area
DPT

Catalog Number
830

Grading Basis
GRD - Graded

Description
Third of a three-part series on musculoskeletal physical therapy, reinforcing and advancing the concepts presented in DPT 730 and 731 (Musculoskeletal PT I and II respectively). In this course students will be introduced to principles of physical therapy examination, evaluation, and management of common pathologies of the spine and temporomandibular joints. The lab

portion of the course will focus on development of physical examination and treatment skills through peer interaction, simulation, instructor demonstrations and competency skills checks. In addition, there will be select activities on campus and in the community with uncomplicated adult clients representative of those seen in physical therapy practice. This course may not be listed as a requirement or eligible as an elective for any major, minor, or certificate program other than the following: Doctor of Physical Therapy (DPT).

DPT 840 - Cardiopulmonary Rehabilitation - 4 Credits

Overview

Subject Area
DPT

Catalog Number
840

Grading Basis
GRD - Graded

Description
This course will address the pathology and pathophysiology of disease states of the cardiac pulmonary and circulatory system including the lymphatics. The course will incorporate intervention skills learned in Applied Exercise Physiology (DPT 710) and Therapeutic Intervention I & II (DPT 722 & DPT 822) and apply it to medically complicated clients. This course will also address clinical knowledge and clinical practice skills utilized in the acute/subacute care environments including: lines and monitors, tracheotomy/ventilator, telemetry, infection management/isolation protocols, and pulmonary hygiene/swallowing disorders. This course may not be listed as a requirement or eligible as an elective for any major, minor, or certificate program other than the following: Doctor of Physical Therapy (DPT).

DPT 851 - Clinical Neurorehabilitation I - 4 Credits

Overview

Subject Area
DPT

Catalog Number
851

Grading Basis
GRD - Graded

Description
This course presents the pathology and pathophysiological mechanisms of common conditions of the neurological system. Students will apply basic knowledge of motor control and motor learning, neuroanatomy, and neurophysiology to the physical examination, diagnosis, and client management of neurological disorders with emphasis on select conditions common to the adult. This course may not be listed as a requirement or eligible as an elective for any major, minor, or certificate program other than the following: Doctor of Physical Therapy (DPT).

DPT 860 - Integrated Clinical Practice IV - 3 Credits

Overview

Subject Area
DPT

Catalog Number
860

Grading Basis
GRD - Graded

Description
This course will reinforce and build on basic client handling and safety skills that were introduced and advanced during Integrated Clinical Practice I, II, III (DPT 760, DPT 761, DPT 762). In addition this course will advance professional identity formation, peer communication skills, patient interaction skills, and clinical practice skills. This course will introduce clinical practice management concepts which include: outcomes measures, case management, quality improvement, health informatics, billing and financial management, marketing and public relations, risk management, staffing, and human resource compliance. This course will also begin to emphasize the direction and supervision of care extenders. As part of the course requirement, students will be placed in an integrated clinical practice environment for supervised experiential learning and reinforcement of concepts and techniques learned in instructional lecture and lab courses. This course may not be listed as a requirement or eligible as an elective for any major, minor, or certificate program other than the following: Doctor of Physical Therapy (DPT).

DPT 990 - Public Health for Rehabilitation Professionals - 3 Credits

Overview

Subject Area	Catalog Number	Grading Basis
DPT	990	GRD - Graded

Description
This course examines population-based strategies for improving the health and preventing disease from the perspective of the 10 Essential Public Health Services for communities. The course examines the public health system within a community. Students will be engaged in an in-depth examination of the public health system of a community of their choice, and engage in either assessment, policy development or assurances associated with public health management in their community. The course will include a focused examination of disability and health. This course may not be listed as a requirement or eligible as an elective for any major, minor, or certificate program other than the following: Doctor of Physical Therapy (DPT).

DPT 991 - Capstone - 2 Credits

Overview

Subject Area	Catalog Number	Grading Basis
DPT	991	PFL - Pass/Fail

Description
Conducted as an on-line seminar. The focus of the course is on developing the reflective and scholarly process associated with case-study, case-series and other small-N comparative research that draws conclusions based on descriptive or causal inference. Students are expected to complete and defend a course project using the methodology presented throughout the curriculum. This course may not be listed as a requirement or eligible as an elective for any major, minor, or certificate program other than the following: Doctor of Physical Therapy (DPT).

Prerequisites
004836 - Enrollment in the Doctor of Physical Therapy Program or Instructor Consent

Typically Offered on Stevens Point Campus
Fall and Summer

DS 700 - Foundations of Data Science - 3 Credits

Overview

Subject Area	Catalog Number	Grading Basis
DS	700	GRD - Graded

Description
Introduction to data science and its importance to business decision making. Overview of commonly used data science tools along with spreadsheet, database, statistics, and programming assignments to lay the foundation for data science applications.

Typically Offered on Stevens Point Campus
Occasionally

DS 701 - Exploratory Data Analysis - 3 Credits

Overview

Subject Area	Catalog Number	Grading Basis
DS	701	GRD - Graded

Description
Introduction to data science and highlights its importance in decision making. Students will learn how to analyze data using the R programming language. During the course, students will learn how to import data into R, tidy it, conduct exploratory data analysis, develop visualizations, and draw statistical inferences. The course aims to teach data wrangling, visualization and exploration with R.

DS 705 - Statistical Methods - 3 Credits

Overview

Subject Area	Catalog Number	Grading Basis
DS	705	GRD - Graded

Description
Statistical methods and inference procedures will be presented with an emphasis on applications, computer implementation, and interpretation of results. Topics include simple and multiple regression, model selection, correlation, moderation/interaction analysis, logistic regression, chi-square test, ANOVA, Kruskal-Walls test, MANOVA, factor analysis, and canonical correlation analysis.

DS 735 - Communicating about Data - 3 Credits

Overview

Subject Area
DS

Catalog Number
735

Grading Basis
GRD - Graded

Description
Prepares you to master technical, informational and persuasive communication to meet organizational goals. Technical communication topics include a study of the nature, structure and interpretation of data. Informational communication topics include data visualization and design of data for understanding and action. Persuasive communication topics include the study of written, verbal and nonverbal approaches to influencing decision makers.

DS 750 - Data Storytelling - 3 Credits

Overview

Subject Area
DS

Catalog Number
750

Grading Basis
GRD - Graded

Description
Data storytelling involves using data to tell a compelling narrative that helps audiences understand, engage with, and act on the information. This course combines data analysis with communication techniques to present data in an informative and engaging way. This course is specifically designed as a graduate-level requirement for the MSDS degree, focusing on teaching students how to effectively communicate insights through data storytelling techniques. Participants will learn to craft engaging stories that resonate with various audiences and drive decision-making.

DS 770 - Ethical Decision-Making Using Data - 3 Credits

Overview

Subject Area
DS

Catalog Number
770

Grading Basis
GRD - Graded

Description
Examines how data science relates to developing strategies for organizations. The emphasis is on using an organization's data assets to inform better decisions. The course investigates the use of data science findings to develop solutions to competitive organizational challenges. Special attention is given to critically examining decisions to ensure that they are ethical and avoid unfair bias. Professional codes of conduct as well as local and international regulations are also considered.

DS 776 - Deep Learning - 3 Credits

Overview

Subject Area
DS

Catalog Number
776

Grading Basis
GRD - Graded

Description
Introduction to the theory and applications of deep learning. The course begins with the study of neural networks and how to train them. Various deep learning architectures are introduced including convolutional neural networks, recurrent neural networks, and transformers. Applications may include image classification, object detection, and natural language processing. Algorithms will be implemented in Python using a high-level framework such as Pytorch or TensorFlow.

DSN 101 - Foundation Studio: Drawing and Visualization - 3 Credits

Overview

Subject Area
DSN

Catalog Number
101

Grading Basis
GRD - Graded

Description
Basic drawing in black and white from observation, as a foundation for the design/creative process, from ideation and conceptualization to technical development, as a means of articulating environments, objects, nature, ideas, and abstract relationships. Compose an effective drawing for a variety of design/creative disciplines and develop confidence in drawing and sketching.

EDSU 715 - Creative and Innovative Technology Thinking in Educational Sustainability - 3 Credits

Overview

Subject Area	Catalog Number	Grading Basis
EDSU	715	GRD - Graded

Description
This course will explore technological tools and frameworks used in societal and environmental meaning making of significance in our planet. Students shall explore from beginning to advanced level technologies in the field of Interactive Story Mapping (ISM), Remote Learning (RL), Location Intelligence (LI), Data Collection, Analysis, and Visualization (DCAV) among others. In this course, students will engage in hands-on project-based activities involving extractive thinking of solutions from examination of empirical data. Such thought processes will lead students to develop applications that reinforces understanding from the lens of United Nations Sustainability Development Goals (UNSDG). Available for doctoral credit for the EdD in Educational Sustainability as EDSU 915. This course may not be listed as a requirement or eligible as an elective for any major, minor, or certificate program other than the following: Doctor of Education - Educational Sustainability (EdD).

EDSU 810 - Philosophical and Theoretical Foundations of Sustainability Leadership in Education - 3 Credits

Overview

Subject Area	Catalog Number	Grading Basis
EDSU	810	GRD - Graded

Description
Interdisciplinary course that provides a foundation for the development of a personal and professional leadership style grounded in leadership theories, as they pertain to socio-cultural, political as well as pedagogical and ecological issues. Leadership discourses and discussion will be reflective of the influence of the social locations and identities of the actors as well as the dynamics of power, resistance, powerlessness and efforts to claim citizenship and justice from the grassroots and up. Through exposure to recognized leaders in society, ecology, education and other fields, you will postulate what leadership principles resonate with your area of work and study. Engage in interdisciplinary analyses of leadership theories and philosophies, and examine complex ethical and professional responsibilities within professional and community relationships. This course may not be listed as a requirement or eligible as an elective for any major, minor, or certificate program other than the following: Doctor of Education - Educational Sustainability (EdD).

EDSU 915 - Creative and Innovative Technology Thinking in Educational Sustainability - 3 Credits

Overview

Subject Area
EDSU

Catalog Number
915

Grading Basis
GRD - Graded

Description
This course will explore technological tools and frameworks used in societal and environmental meaning making of significance in our planet. Students shall explore from beginning to advanced level technologies in the field of Interactive Story Mapping (ISM), Remote Learning (RL), Location Intelligence (LI), Data Collection, Analysis, and Visualization (DCAV) among others. In this course, students will engage in hands-on project-based activities involving extractive thinking of solutions from examination of empirical data. Such thought processes will lead students to develop applications that reinforces understanding from the lens of United Nations Sustainability Development Goals (UNSDG). Available for master's program graduate credit as EDSU 715. This course may not be listed as a requirement or eligible as an elective for any major, minor, or certificate program other than the following: Doctor of Education - Educational Sustainability (EdD).

EDUC 710 - Social and Culturally Responsive Practices - 3 Credits

Overview

Subject Area
EDUC

Catalog Number
710

Grading Basis
GRD - Graded

Description
Theories and related practices of equity and social justice in the context of education, including culturally responsive teaching. Focus on expanding understanding of existing opportunity gaps and the methods, materials, and strategies that support the development of critical consciousness in educational practices; as well as on decreasing opportunity gaps in education through culturally responsive teaching. Educational practices and beliefs that support successful education of students of color, students from families in poverty, LGBT students, and students who speak English as a second or other language. This course may not be listed as a requirement or eligible as an elective for any major, minor, or certificate program other than the following: Master of Science in Education (MSE).

EDUC 762 - The Business of Higher Education - 3 Credits

Overview

Subject Area
EDUC

Catalog Number
762

Grading Basis
GRD - Graded

Description
Will include 4 modules dedicated to the Business of Higher Education: 1) Enrollment Management – Student Affairs play a major role in ensuring the success and viability of their institutions through their work in enrollment management. Understanding factors that shape students' college choice are key components of successful enrollment management, as are institutional decisions regarding marketing, recruitment, and admission of students. The ways in which institutions use financial aid, grants, and tuition discounting to assist students in deciding which institution to attend are examined. 2) Fiscal Management – Solid fiscal management is a critical skill for effective leadership in student affairs units in higher education. This module prepares student affairs administrators for effective fiscal management by examining revenue sources and expenditures, the reasons for rising college prices, the challenges associated with accessibility and affordability, and the roles of states, the federal government, and institutions in financing higher education. 3) Human Resource Management – Preparing and leading a diverse workforce for a changing higher education environment can be challenging. Leadership in student affairs requires effective management of our greatest resource – personnel. The module applies leadership theories through an applied approach to the management of people in complex organizations which includes overviews of recruitment, selection, orientation, performance management, compensation, and on-going training and development. 4) Strategic Planning and Change Management – Students will explore best practices in strategic and programmatic planning to enhance institutional effectiveness. A major goal will be to ensure an understanding of and appreciation for the range of approaches that can be taken regarding strategic planning in tandem with change management theory and application.

ENGR 105 - Engineering Fundamentals - 3 Credits

Overview

Subject Area
ENGR

Catalog Number
105

Grading Basis
GRD - Graded

Description
Designed to equip engineering students with the necessary tools and background information to prepare them to be successful engineering students as well as a successful practicing engineer. Topics include project management, team work, technical writing, working with data and using spreadsheets, creating presentations, engineering design, and a thorough understanding of the engineering profession.

Prerequisites
004547 - MATH 95 or concurrent registration, or suitable math placement score

General Education Designation(s)
CCT - Critical and Creative Thinking (AD)

Typically Offered on Stevens Point Campus
Occasionally

Typically Offered on the Branch Campuses
Marshfield: Fall Only; Wausau: Fall Only

Credits

ENGR 107 - Engineering Graphics with Computer Aided Drafting - 3 Credits

Overview

Subject Area
ENGR

Catalog Number
107

Grading Basis
GRD - Graded

Description
Engineering graphics focusing on graphical communication. Topics include descriptive geometry elements, visualization, engineering drawing techniques, orthographic projection, pictorial representation, auxiliary views, section views, and basic dimensioning. Incorporates computer aided drafting (CAD) with engineering applications using 2-D drawing and 3-D modeling techniques.

General Education Designation(s)
CCT - Critical and Creative Thinking (AD), LS - Lab Science (AD)

Typically Offered on Stevens Point Campus
Occasionally

Typically Offered on the Branch Campuses
Wausau: Spring Only

ENGR 220 - Statics - 3 Credits

Overview

Subject Area
ENGR

Catalog Number
220

Grading Basis
GRD - Graded

Description
Principles of mechanics, force systems, equilibrium, structures, distributed forces, moments of inertia of area, friction. For students in the pre-engineering curriculum. May not earn credit in both ENGR 220 and PHYS 220.

Prerequisites
004549 - MATH 225 or Instructor Consent

General Education Designation(s)
NW - Natural World (AD)

Typically Offered on Stevens Point Campus

ENGR 263 - Engineering Thermodynamics - 3 Credits

Overview

Subject Area
ENGR

Catalog Number
263

Grading Basis
GRD - Graded

Description
First and second laws of thermodynamics; thermodynamic properties of real and ideal gases, vapors, and mixtures; analysis of power and refrigeration cycles.

Prerequisites
004552 - One of the following: CHEM 105, CHEM 117, or PHYS 240; and MATH 227 (or concurrent registration); or Instructor Consent

General Education Designation(s)
NW - Natural World (AD)

FOR 120 - Preparing for a Career in Forestry - 1 Credits

Overview

Subject Area	Catalog Number	Grading Basis
FOR	120	PFL - Pass/Fail

Description
Provides background on careers in the fields of forestry (ecosystem restoration and management, forest management, forest recreation, urban and community forestry). Provides information on professional development; guidance on development of a professional portfolio and development of an effective program of study. Provides exposure to internships, research opportunities, and professional societies.

FOR 428 - Forest Products II: Sawmill Operations and Lumber Manufacturing - 3 Credits

Overview

Subject Area	Catalog Number	Grading Basis
FOR	428	GRD - Graded

Description
Lumber grade and yield analysis, sawing techniques, estimation of residuals, sawmill operations, advanced hardwood log and lumber grading, softwood lumber grading, basic elements of green sizing, quality control, drying, and conducting recovery studies. Factors affecting sawmill production and profits.

Prerequisites
001339 - FOR 370

FOR 429 - Forest Products III: Advanced Manufacturing - 3 Credits

Overview

Subject Area	Catalog Number	Grading Basis
FOR	429	GRD - Graded

Description
Material costing, recovery and conversion in chipping operations, basic considerations in woody biomass combustion, basic overview of the marketing forest products with focus on typical channels of distribution by product type, origin and end use, functions of intermediaries. Business feasibility analysis in sawmill and drying operations. Optional field trips.

GD 320 - Problem Solving I: Branding and Marketing Campaigns - 3 Credits

Overview

Subject Area
GD

Catalog Number
320

Grading Basis
GRD - Graded

Description
Study of branding and marketing systems and their relationships. Focus on audience and the use of research methodologies in design practice. Investigation of materials and processes, and development of crafting abilities.

Prerequisites
004748 - Both GD 301 and GD 310, or Instructor Consent

Typically Offered on Stevens Point Campus
Spring Only

GD 401 - Professional Practice V: Design Research Methods - 3 Credits

Overview

Subject Area	Catalog Number	Grading Basis
GD	401	GRD - Graded

Description
Advanced design challenges, using process steps of identification, exploration, research, activation, and measurement in iterative cycles. Work with project management processes and engage in collaborative and team-based work to understand industry practices.

Prerequisites
004750 - Both GD 302 and GD 320, or Instructor Consent

GEOG 100 - Human Impacts on the Physical Environment - 3 Credits

Overview

Subject Area
GEOG

Catalog Number
100

Grading Basis
GRD - Graded

Description
Physical geographic principles and processes applied to understand selected human impacts on atmosphere, water, land, and biota. Includes detailed, interdisciplinary analysis of several environmental problems, including causes, consequences, and solutions.

General Education Designation(s)
LS - Lab Science (AD), NW - Natural World (AD), ER - Environmental Responsibility (GEP), NSC - Natural Sciences (GEP)

Typically Offered on Stevens Point Campus
Fall, Spring, and Summer

GEOG 105 - The Dynamic Earth - 3 Credits

Overview

Subject Area
GEOG

Catalog Number
105

Grading Basis
GRD - Graded

Description
A contemporary approach to the study of Earth's geologic, atmospheric, hydrologic, and biological systems and its place in the solar system. Natural resource extraction, use, and environmental implications. Wisconsin's natural systems are emphasized. Possible field trips.

General Education Designation(s)
LS - Lab Science (AD), NW - Natural World (AD), NSC - Natural Sciences (GEP)

Typically Offered on Stevens Point Campus

GEOG 141 - The Geospatial Revolution - 3 Credits

Overview

Subject Area
GEOG

Catalog Number
141

Grading Basis
GRD - Graded

Description
Join the revolution by investigating our world from a geographic perspective using popular geospatial technologies. Explore the use of geographic information systems, remote sensing, drones, and global positioning systems among other geospatial tools, data, and concepts to arrive at well-informed decisions, designs, and policies that address perplexing societal issues and problems.

GEOG 170 - Disasters - Living on the Edge - 4 Credits

Overview

Subject Area
GEOG

Catalog Number
170

Grading Basis
GRD - Graded

Description
Study of various environmental hazards, their causes, impacts on humans, and mitigations. Core topics include: earthquakes, volcanoes, flooding, landslides, tornadoes, hurricanes, climate change/global warming, nuclear hazards, and overpopulation. Additional topics may include: coastal hazards, environmental pollution, extreme weather, impacts from space, extinctions, biohazards, chemical hazards, and terrorism. May not earn credit in both GEOG 170 and GEOL 170.

General Education Designation(s)
LS - Lab Science (AD), NW - Natural World (AD), NSC - Natural Sciences (GEP)

GEOG 308 - Climate: Past, Present and Future - 3 Credits

Overview

Subject Area
GEOG

Catalog Number
308

Grading Basis
GRD - Graded

Description
Explore the physical mechanisms of how Earth's climate changes over various timescales. Paleoclimatic techniques, modern weather data, and computer model simulations are used to investigate the geological and biological evidence of past, present, and future climate including global warming and its impacts. May not earn credit in both GEOG 308 and GEOL 308. Available for graduate credit as GEOG 508.

GEOG 696 - Community Development Practices - 3 Credits

Overview

Subject Area
GEOG

Catalog Number
696

Grading Basis
GRD - Graded

Description
Processes and interactions between citizens, community officials, and planners in designing, planning, and implementing community development projects. Social and economic development projects and programs. May require fieldtrip(s). Available for undergraduate credit as GEOG 496.

Typically Offered on Stevens Point Campus
Spring Only

GEOG 733 - Geospatial Approaches to Conservation Design and Adaptation - 3 Credits

Overview

Subject Area	Catalog Number	Grading Basis
GEOG	733	GRD - Graded

Description
Discussion and lab course designed specifically for students in the Capstone Certificate in Geodesign. Explore and use applications of GIS particularly related to landscape ecology, environmental analysis and conservation design.

Prerequisites
004657 - Both GEOG 630 and GEOG 731

Typically Offered on Stevens Point Campus
Occasionally

GEOL 170 - Disasters - Living on the Edge - 4 Credits

Overview

Subject Area
GEOL

Catalog Number
170

Grading Basis
GRD - Graded

Description
Study of various environmental hazards, their causes, impacts on humans, and mitigations. Core topics include: earthquakes, volcanoes, flooding, landslides, tornadoes, hurricanes, climate change/global warming, nuclear hazards, and overpopulation. Additional topics may include: coastal hazards, environmental pollution, extreme weather, impacts from space, extinctions, biohazards, chemical hazards, and terrorism. May not earn credit in both GEOL 170 and GEOG 170.

General Education Designation(s)
LS - Lab Science (AD), NW - Natural World (AD), NSC - Natural Sciences (GEP)

HIMT 300 - Survey of Contemporary Computing - 3 Credits

Overview

Subject Area	Catalog Number	Grading Basis
HIMT	300	GRD - Graded

Description
This course provides a basic overview of contemporary information technology and computers. Topics include computer concepts (e.g., hardware, system architectures, operating systems, etc.), communication technologies, Internet technologies, and data organization/structures. Special emphasis placed on database management systems and data warehousing.

Prerequisites

HIMT 310 - Healthcare Systems and Organizations - 3 Credits

Overview

Subject Area	Catalog Number	Grading Basis
HIMT	310	GRD - Graded

Description
This course provides an overview of how healthcare and public health are organized and how their services are delivered in the United States (US). Topics to be covered include: public policy (including US health reform initiatives); organization of healthcare systems; components and operation of healthcare organizations including e-health delivery; professional roles and accreditation; legal and regulatory issues including licensure requirements.

HIMT 320 - Survey of Information Technology in Healthcare - 3 Credits

Overview

Subject Area	Catalog Number	Grading Basis
HIMT	320	GRD - Graded

Description
This course surveys essential healthcare information technologies (HIT) that are used for healthcare information systems (HISs). Popular HISs include electronic medical record systems (EMRS) that keep record of patients' history; computerized provider order entry systems that record history of procurement of medicine and other medical necessaries; telemedicine, which keeps information of medical doctors in computers; telehealth e-prescribing, which prescribes medicine electronically; medication administration, which keeps information of medical doctors and other hospital staff members; and nursing and ancillary service systems.

HIMT 330 - Healthcare I: Terminology and Body Systems - 3 Credits

Overview

Subject Area	Catalog Number	Grading Basis
HIMT	330	GRD - Graded

Description
This course will examine specific terminology and vocabulary used by workers in healthcare and public health. The focus of this course is on medical terminology that broadly relates to human anatomy and physiology, body systems and diagnosis. The base of medical terms will be examined - such as prefixes, suffixes, roots and combined forms. Topics will also include healthcare taxonomies and nomenclatures (e.g. ICD-9-CM, ICD-10, etc.).

HIMT 350 - Statistics for Healthcare - 3 Credits

Overview

Subject Area
HIMT

Catalog Number
350

Grading Basis
GRD - Graded

Description
This is an introductory course in statistical methods for the health sciences. The course will emphasize the principles of statistical reasoning, underlying assumptions, hypothesis testing, and careful interpretation of results. Some topics covered: major study designs, descriptive statistics, graphical displays of data, probability, confidence intervals and tests for means, differences of means, sample size and power, differences of proportions, chi-square tests for categorical variables, regression, multiple regression, and non-parametric statistics.

Prerequisites
001370 - MATH 95 or suitable placement test score

HIMT 360 - Healthcare II: Survey of Disease and Treatments - 3 Credits

Overview

Subject Area
HIMT

Catalog Number
360

Grading Basis
GRD - Graded

Description
This course further investigates the topics covered in HIMT 330 (Health Care I). Based on each body system the course will further expand into topics of human disease, human health issues and classification of disease/health issues, Diagnostics, Treatment and Clinical procedures that are currently in practice. In addition, the course will also incorporate Pharmacotherapeutic concepts (drugs and therapies to treat/prevent/control human disease/health issues), investigating the variety of drugs used for disease treatment for each body system, this will include current biologicals that are used for treatment. Topics will include how the drugs and biologicals work, their limitations, and the current diversity of available drugs and biologicals.

HIMT 370 - Healthcare Systems: Analysis and Design - 3 Credits

Overview

Subject Area
HIMT

Catalog Number
370

Grading Basis
GRD - Graded

Description
This is a first course in a two-course sequence that addresses methods and techniques of healthcare information system (IS) analysis and design as performed within the system development life cycle. Included will be techniques for problem definition, requirements gathering, analysis, logical design, selection and evaluation of alternative healthcare information systems solutions from the point of view of the health provider and user. An emphasis is placed on analysis, selection, and evaluation of information systems as they relate to healthcare.

HIMT 375 - Database Structures and Management Systems - 3 Credits

Overview

Subject Area
HIMT

Catalog Number
375

Grading Basis
GRD - Graded

Description
Analyze and design databases to support computer-based information systems. Develop and implement relational database management systems using SQL. Topics include: data modeling techniques such as entity-relationship modeling, extended entity-relationship modeling, database constraints, database normalization techniques, and basic and advanced features of database query languages SQL, etc.

HIMT 400 - Healthcare Information and Technology - 3 Credits

Overview

Subject Area
HIMT

Catalog Number
400

Grading Basis
GRD - Graded

Description
This course explores the sources and data contents of health-care information as well as proper presentation of it for different usage levels. Topic addressed include: 1) data structure and use of health information (individual, comparative, and aggregate), 2) type and content of health record, 3) data quality assessment, 4) secondary data source, 5) healthcare data sets, 6) Health information archival systems, and National Healthcare Information Infrastructure (NHII). The course will also cover topics in bioinformatics.

HIMT 420 - Healthcare Systems: Project Management - 3 Credits

Overview

Subject Area	Catalog Number	Grading Basis
HIMT	420	GRD - Graded

Description
This course addresses the phenomenal impact information system (IS) projects have had on healthcare delivery. Students learn how healthcare IS projects affect organizations, doctors, patients, and chronic-illness treatments, as well as individuals interested in managing their own healthcare. Concepts and tools for effective healthcare IS project management, process re-engineering and work redesign are introduced. The purpose of this course is to expose students to IS project management activities in healthcare settings. Topics covered include recent healthcare IS project trends, budgeting, scheduling, resource management, scope, risk analysis, and deployment controls. The genesis of healthcare project management is covered using specific cases and examples.

IA 378 - People, Interfaces and Environments - 4 Credits

Overview

Subject Area
IA

Catalog Number
378

Grading Basis
GRD - Graded

Description
Dedicated to the principles and processes of human centered, interactive design. Architectural design processes that shape the physical world around us combined with the virtual interfaces that connect us socially and functionally in almost every aspect of our technological society. Solve social and environmental problems using both architectural as well as computing and technological media. Interdisciplinary problem solving methods applicable to both disciplines and new hybrid collaborative techniques within a project development framework. May not earn credit in both IA 378 and HTI 378.

ITM 710 - Finance for IT Managers - 3 Credits

Overview

Subject Area
ITM

Catalog Number
710

Grading Basis
GRD - Graded

Description
Frame financial decisions within general and project accounting principles. Topics include: pro forma financial statements, time value of money, cash flows and equivalence, depreciation, net present value, rate of return, and ratio analysis. Prepare budgets that prioritize within constraints, address uncertainty and intangibles, and integrate with project scheduling.

MATH 90 - Beginning Algebra - 3 Credits

Overview

Subject Area
MATH

Catalog Number
90

Grading Basis
GRD - Graded

Description
Real numbers, solving linear equations, exponents, polynomials, rational expressions. Algebra for those with low placement test scores who need practice in fundamental math skills. Does not count toward a degree. IMPORTANT: If you are placed into remedial coursework in mathematics you must restrict your coursework to a level that will allow for success. You must receive written permission from your adviser to enroll in more than 16 credits during any semester that you enroll in remedial coursework. If you want to enroll in more than 18 credits during any semester that includes remedial coursework, you must receive written permission from the dean of your college. Factors that are considered in approving credit load include your ACT score, high school class rank, overall high school record, university GPA, and demands on your time such as coursework, extracurricular activities and employment. Entering freshmen who are placed into remedial mathematics must complete the remedial coursework before earning 30 credits toward graduation. If you are in this category and fail to complete the remedial work before earning 30 credits, you will be restricted to a maximum of 12 credits, including the remedial courses, until you meet the requirement.

4

MATH 111 - Applied Calculus - 4 Credits

Overview

Subject Area
MATH

Catalog Number
111

Grading Basis
GRD - Graded

Description
Calculus applied to business, economics, biology, natural resources, and social science. May not take MATH 111 for credit after successful completion of MATH 225.

Prerequisites
001924 - MATH 107 or suitable placement test score. May not take MATH 111 for credit after successful completion of MATH 120.

General Education Designation(s)
NW - Natural World (AD), QL-AD - Quantitative Literacy (AD), QL - Quantitative Literacy (GEP)

Typically Offered on Stevens Point Campus
Fall, Spring, and Summer

Typically Offered on the Branch Campuses
Marshfield: Occasionally; Wausau: Occasionally

MATH 112 - Basic Trigonometry and Applications - 2 Credits

Overview

Subject Area
MATH

Catalog Number
112

Grading Basis
GRD - Graded

Description
Introduction to trigonometry and applications to surveying, navigation, and indirect measurement. May not earn credit in both MATH 112 and MATH 119.

Prerequisites
002046 - MATH 107 or placement into MATH 112. May not earn credit in both MATH 112 and MATH 119.

Typically Offered on Stevens Point Campus
Fall and Spring

MATH 118 - Pre-Calculus Algebra - 4 Credits

Overview

Subject Area
MATH

Catalog Number
118

Grading Basis
GRD - Graded

Description
Topics include concepts, graphs, and properties of functions, inverse and algebraic functions, techniques of graphing, conic sections, linear and nonlinear systems, arithmetic and geometric series, mathematical induction and the binomial theorem. Preparation for MATH 225 if you did not place into MATH 225.

Prerequisites
001990 - MATH 107 or suitable placement test score

General Education Designation(s)
NW - Natural World (AD), QL-AD - Quantitative Literacy (AD), QL - Quantitative Literacy (GEP)

Typically Offered on Stevens Point Campus

MATH 119 - Pre-Calculus Trigonometry - 2 Credits

Overview

Subject Area
MATH

Catalog Number
119

Grading Basis
GRD - Graded

Description
Trigonometric functions, their basic properties and graphs; inverse trigonometric functions; identities; applications. Preparation for MATH 225 if you did not place into MATH 225. May not earn credit in both MATH 119 and MATH 112. May not earn credit in both MATH 119 and UWX MA113.

Prerequisites
002047 - MATH 107 or suitable placement test score. May not earn credit in both MATH 112 and MATH 119.

MATH 209 - Mathematics for the Information Sciences - 4 Credits

Overview

Subject Area
MATH

Catalog Number
209

Grading Basis
GRD - Graded

Description
Boolean algebra, relational database theory, algorithms, combinatorics, discrete probability, recursion, graph theory, network flows and applications for information sciences.

Prerequisites
001662 - MATH 95 or suitable placement test score, and CNMT 110 (or concurrent registration); or Instructor Consent

Typically Offered on Stevens Point Campus
Fall and Spring

MATH 225 - Calculus I - 5 Credits

Overview

Subject Area
MATH

Catalog Number
225

Grading Basis
GRD - Graded

Description
Introduction to limits; differentiation and integration of algebraic and transcendental functions; applications of differential and integral calculus.

Prerequisites
001922 - MATH 118; MATH 119 or concurrent enrollment in an 8-week section of MATH 119; or suitable placement test score

General Education Designation(s)
NW - Natural World (AD)

Typically Offered on Stevens Point Campus
Fall and Spring

MATH 226 - Calculus II - 5 Credits

Overview

Subject Area
MATH

Catalog Number
226

Grading Basis
GRD - Graded

Description
Techniques of integration for algebraic and transcendental functions and additional applications; improper integrals; introduction to first-order differential equations; parametric equation and polar coordinates; infinite sequences and series.

Prerequisites
001411 - MATH 225

General Education Designation(s)
CCT - Critical and Creative Thinking (AAS)

Typically Offered on Stevens Point Campus
Fall and Spring

Typically Offered on the Branch Campuses
Marshfield: Fall and Spring; Wausau: Fall and Spring

MATH 227 - Calculus III - 4 Credits

Overview

Subject Area
MATH

Catalog Number
227

Grading Basis
GRD - Graded

Description
Coordinate systems and vector algebra; lines, planes, curves and surfaces in three space; differential calculus for functions of several variables; double and triple integrals using different coordinate systems along with related applications; change of variables for multiple integrals; conservative vector fields and line integrals; Green's Theorem, surface integrals, the Divergence Theorem, Stokes' Theorem.

Prerequisites
001413 - MATH 226

General Education Designation(s)
NW - Natural World (AD)

Typically Offered on Stevens Point Campus
Fall and Spring

Typically Offered on the Branch Campuses
Marshfield: Spring Only; Wausau: Spring Only

MATH 228 - Fundamental Mathematical Concepts for Elementary Teachers I - 3 Credits

Overview

Subject Area
MATH

Catalog Number
228

Grading Basis
GRD - Graded

Description
Basic concepts and properties of sets, number systems, and functions for elementary school math.

Prerequisites
002045 - MATH 95 or placement above MATH 95; and declared Elementary Ed, Early Childhood Ed, or Special Ed major

General Education Designation(s)
CCT - Critical and Creative Thinking (AD), QL-AD - Quantitative Literacy (AD), QL - Quantitative Literacy (GEP)

Typically Offered on Stevens Point Campus
Fall and Spring

Typically Offered on the Branch Campuses
Marshfield: Fall Only; Wausau: Fall Only

MATH 230 - Introduction to Linear Algebra - 4 Credits

Overview

Subject Area
MATH

Catalog Number
230

Grading Basis
GRD - Graded

Description
Topics in linear algebra; systems of linear equations, Gauss-Jordan elimination, linear combinations and linear independence, linear transformations, vector spaces and subspaces, matrix algebra, determinants, bases of nullspaces and column spaces, eigenvalues and eigenvectors, inner products and orthogonalprojections with selected applications.

Prerequisites
001412 - One of the following: MATH 109, MATH 111, or MATH 225

General Education Designation(s)
CCT - Critical and Creative Thinking (AAS)

Typically Offered on Stevens Point Campus
Fall and Spring

Typically Offered on the Branch Campuses
Marshfield: Occasionally; Wausau: Occasionally

MATH 255 - Elementary Statistical Methods - 4 Credits

Overview

Subject Area
MATH

Catalog Number
255

Grading Basis
GRD - Graded

Description
Fundamental concepts and techniques that underlie applications to various disciplines, including descriptive statistics; averages; dispersion; random sampling; binomial, normal, Student T, Chi-square, and F distributions; estimation and tests of hypothesis; linear regression and correlation; laboratory emphasis on sampling and applications. Does not count toward math major/minor, or major for teacher certification. May not earn credit in both MATH 255 and MATH 354.

Prerequisites
001923 - MATH 95 or suitable placement test score

General Education Designation(s)
NW - Natural World (AD), QL-AD - Quantitative Literacy (AD), QL - Quantitative Literacy (GEP)

Typically Offered on Stevens Point Campus

MATH 300 - Introduction to Proof - 4 Credits

Overview

Subject Area
MATH

Catalog Number
300

Grading Basis
GRD - Graded

Description
Transition to upper division mathematics. Topics include logic, proof techniques, set theory, relations, functions and cardinality; elementary properties of integers, rational numbers, and real numbers; open and closed subsets of the real numbers; limits; also reading and writing formal mathematical proofs.

Prerequisites
001414 - MATH 226

Typically Offered on Stevens Point Campus
Fall and Spring

MATH 305 - Discrete Mathematics - 3 Credits

Overview

Subject Area
MATH

Catalog Number
305

Grading Basis
GRD - Graded

Description
Algorithm analysis: recursion, complexity; combinatorics: recurrence relations, dynamic systems, counting techniques; graph theory: Eulerian and Hamiltonian graphs, algorithms and heuristics, planar graphs, trees, applications.

Prerequisites
001415 - MATH 230

General Education Designation(s)
CCT - Critical and Creative Thinking (AAS)

MATH 309 - Optimization Modeling - 3 Credits

Overview

Subject Area
MATH

Catalog Number
309

Grading Basis
GRD - Graded

Description
Create models in a mathematical modeling language to solve optimization problems such as linear programs, transportation problems, integer linear programs, scheduling, shortest path, minimum spanning trees, and traveling salesperson problems. Emphasis on applications to logistics, business, and planning. May not earn credit in both MATH 309 and MATH 310.

Prerequisites
005036 - One of the following: MATH 109, MATH 111, MATH 209, or MATH 225

Typically Offered on Stevens Point Campus
Fall Only

Credits

MATH 310 - Operations Research I - 3 Credits

Overview

Subject Area
MATH

Catalog Number
310

Grading Basis
GRD - Graded

Description
Formulation and computation of linear programming problems: simplex method, duality, sensitivity analysis, computer solutions; integer programming; network flows with applications. May not earn credit in both MATH 310 and MATH 309.

Prerequisites
001562 - Either MATH 230 or MATH 209

Typically Offered on Stevens Point Campus
Fall Only

MATH 315 - Operations Research II - 3 Credits

Overview

Subject Area
MATH

Catalog Number
315

Grading Basis
GRD - Graded

Description
Interior point methods for linear programming; nonlinear optimization; dynamic programming; introduction to stochastic models with use of related computer software.

Prerequisites
001631 - Both MATH 227 and MATH 310

Typically Offered on Stevens Point Campus
Occasionally

Credits

MATH 320 - Differential Equations - 3 Credits

Overview

Subject Area
MATH

Catalog Number
320

Grading Basis
GRD - Graded

Description
Introduction to ordinary differential equations of the first and second order; linear equations with constant coefficients; solution in series; numerical approximations; Laplace transforms; system of ordinary equations; selected applications.

Prerequisites
001416 - MATH 226

General Education Designation(s)
NW - Natural World (AAS)

Typically Offered on Stevens Point Campus

MATH 323 - Mathematical Analysis - 3 Credits

Overview

Subject Area
MATH

Catalog Number
323

Grading Basis
GRD - Graded

Description
Provides theoretical foundation of calculus in one variable. Topics include topology and order properties of R; limits and continuity; real sequences and series; differentiability and integration; sequences of functions.

Prerequisites
001417 - MATH 300

Typically Offered on Stevens Point Campus
Occasionally

MATH 327 - Advanced Calculus - 3 Credits

Overview

Subject Area
MATH

Catalog Number
327

Grading Basis
GRD - Graded

Description
Theory of differential and integral calculus of several variables. Topics selected from: differentiability; tangent spaces; line, surface, and space integrals; Inverse and Implicit function theorems; Taylor and Fourier series; transforms.

Prerequisites
001147 - MATH 230, MATH 227, and MATH 300

Typically Offered on Stevens Point Campus

MATH 330 - Intermediate Linear Algebra - 3 Credits

Overview

Subject Area
MATH

Catalog Number
330

Grading Basis
GRD - Graded

Description
Abstract finite and infinite dimensional vector and inner product spaces; subspaces: spanning and linear independence, bases, dimension, coordinates, linear transformations: eigenvalues and eigenvectors, diagonalization, isomorphism, projections, spectral theorems, canonical forms; selected additional topics.

Prerequisites
001626 - Both MATH 230 and MATH 300

Typically Offered on Stevens Point Campus

MATH 359 - Mathematics for Middle School I - 2 Credits

Overview

Subject Area	Catalog Number	Grading Basis
MATH	359	GRD - Graded

Description
Problem-solving with extended topics from algebra, geometry, trigonometry, analytic geometry, measurement, probability, and statistics.

Prerequisites
001670 - MATH 338 and concurrent registration in MED 359

Typically Offered on Stevens Point Campus
No Longer Offered

Credits

MATH 362 - Theory of Interest - 3 Credits

Overview

Subject Area	Catalog Number	Grading Basis
MATH	362	GRD - Graded

Description
Interest rate measurement, force of interest, valuation of annuities with constant or non-constant payments, amortization an dloan payment schedules, bond valuation, methods of measuring rate of return, spot and forward rates of interest, cashflow duration and immunization.

Prerequisites
001422 - MATH 226 or Instructor Consent

Typically Offered on Stevens Point Campus
Occasionally

Credits

MATH 367 - Mathematics of Decision and Choice - 3 Credits

Overview

Subject Area
MATH

Catalog Number
367

Grading Basis
GRD - Graded

Description
Quantitative approaches to rational decision making: game theory, decision analysis with uncertainty and risk, management science; model formulations and solution using computer software.

Prerequisites
001563 - Either MATH 226 or MATH 109

Typically Offered on Stevens Point Campus
Occasionally

MATH 372 - Topology - 3 Credits

Overview

Subject Area
MATH

Catalog Number
372

Grading Basis
GRD - Graded

Description
Topics in metric and point-set topology: homeomorphisms and isometries, connectedness, compactness, and separation axioms; low-dimensional Euclidean topology: curves, surfaces, knots, manifolds.

Prerequisites
001629 - Both MATH 230 and MATH 300

Typically Offered on Stevens Point Campus

MATH 380 - History of Mathematics - 3 Credits

Overview

Subject Area	Catalog Number	Grading Basis
MATH	380	GRD - Graded

Description
Topics taken from the history of mathematics with emphasis on mathematical ideas, problems, and methods from early civilization through the 20th century. Read and analyze mathematical works, and give expository presentations during class and in more general forums.

Prerequisites
004659 - 14 or more credits in 300-level Math or Math Education courses which count toward a math major, excluding MATH 395 (6 credits may be concurrent), or Instructor Consent

Typically Offered on Stevens Point Campus
Occasionally

MED 379 - Teaching Middle School Mathematics - 4 Credits

Overview

Subject Area
MED

Catalog Number
379

Grading Basis
GRD - Graded

Description
Topics focus on algebraic reasoning and number theory concepts. Content includes proportional reasoning, linear and non-linear functions, analytic geometry, elementary proof techniques, divisibility, primes, composites, special number sets, and basic counting principles. Viewpoints and trends in teaching middle school mathematics with instruction planning, and evaluation issues. Implications of research related to organization, content, and techniques for teaching grade 5-9 mathematics. Includes clinical experiences.

Prerequisites
004980 - EDUC 205, and either MATH 225 or MATH 228; or Instructor Consent

MLS 399 - Special Work - 1 - 3 Credits

Overview

Subject Area
MLS

Catalog Number
399

Grading Basis
GRD - Graded

Description
Special independent research projects. Credit based on scope of project. Clinical practicum: course will be completed at affiliated clinical laboratories. May be repeated for credit.

Prerequisites
002005 - Junior standing. Admission to the Professional Program is a prerequisite for all clinical practicum courses.

Typically Offered on Stevens Point Campus
As Needed

NRES 633 - Energy Education Concepts and Practices - 1 Credits

Overview

Subject Area	Catalog Number	Grading Basis
NRES	633	GRD - Graded

Description
Concepts relating to energy definitions, natural laws of energy and energy flows in living/nonliving systems, and their relationships to understanding/evaluating environmental issues. Analyze concepts and synthesize strategies/activities for the classroom. May be repeated for up to 3 credits. Available for undergraduate credit as NRES 433.

NRES 640 - Making Environmental Education Relevant to Culturally Diverse Communities - 1 - 3 Credits

Overview

Subject Area
NRES

Catalog Number
640

Grading Basis
GRD - Graded

Description
Basic knowledge and skills to make EE relevant to culturally diverse communities. Broaden your perspective of EE to encompass interests and issues of concern, assess barriers to participation among culturally diverse communities, and appraise the role and significance of building relationships and partnerships with members of a community you intend to work with in the future. Available for undergraduate credit as NRES 440.

NRES 643 - Sustainable Social-Ecological Systems - 3 Credits

Overview

Subject Area
NRES

Catalog Number
643

Grading Basis
GRD - Graded

Description
Examine the energy challenges facing communities in different regions of the U.S. in this field-based course. Utilize a systems approach to assess these challenges within the complex social-ecological systems in which they are embedded. Employ a transdisciplinary approach to problem solving by integrating knowledge and perspectives from different disciplines and a diverse array of stakeholders; creating new shared knowledge and perspectives; formulating strategies to alter current undesirable trajectories in these social-ecological systems; and creating more sustainable futures for these systems. Available for undergraduate credit as NRES 443.

NRES 770 - Natural Resources Policy - 3 Credits

Overview

Subject Area	Catalog Number	Grading Basis
NRES	770	GRD - Graded

Description
Investigate how the policy development process for public natural resource management agencies is influenced at the federal, state, and local government levels by developing an understanding of social and ecological conditions. Study of specific decision-making techniques is emphasized for both regulatory and resource management action, including an emphasis on methods for working with diverse communities of affected stakeholders in each context. This course may not be listed as a requirement or eligible as an elective for any major, minor, or certificate program other than the following: Conservation and Leadership (MNR) and the Water Resources and Policy Graduate Certificate.

PHIL 396 - Special Topics through Study Abroad - 1 - 3 Credits

Overview

Subject Area
PHIL

Catalog Number
396

Grading Basis
GRD - Graded

Description
Advanced study of Philosophy during UW-Stevens Point semester abroad or study tour. Subject varies by destination and resources. May be repeated for credit with different subtitles.

Typically Offered on Stevens Point Campus
As Needed

Credits

PHIL 399 - Independent Study - 1 - 3 Credits

Overview

Subject Area
PHIL

Catalog Number
399

Grading Basis
GRD - Graded

Description
Independent study of a philosophical problem, theme, thinker, or period with consent of the instructor and chair. Credit based on scope of project. May be repeated for credit with different subtitles.

Typically Offered on Stevens Point Campus
As Needed

PHYS 100 - Prudently Powering Our Planet - 3 Credits

Overview

Subject Area
PHYS

Catalog Number
100

Grading Basis
GRD - Graded

Description
Basic energy concepts; energy sources, conversion, and storage; pollution and global warming; conservation, renewables, and prospects for the future.

Prerequisites
002145 - MATH 090 or suitable placement test score. If you receive credit for PHYS 101, PHYS 201, PHYS 202, PHYS 203, PHYS 204, PHYS 240, or PHYS 250 you cannot receive credit for PHYS 100.

General Education Designation(s)
NW - Natural World (AD), QL-AD - Quantitative Literacy (AD), ER - Environmental Responsibility (GEP), NSC - Natural Sciences (GEP)

PHYS 275 - Modern Perspectives of Physics - 3 Credits

Overview

Subject Area
PHYS

Catalog Number
275

Grading Basis
GRD - Graded

Description
An algebra-based introduction to special relativity, quantum and atomic physics, nuclear physics, and applications of quantum physics to the modern world. Intended for students planning to teach physics at the secondary level. Does not satisfy requirements for the physics major or minor. You may not take both 275 and PHYS 300 for credit.

Prerequisites
002143 - Either PHYS 204 or PHYS 250, or Instructor Consent. You may not take both PHYS 275 and PHYS 300 for credit.

PHYS 405 - Quantum Mechanics - 3 Credits

Overview

Subject Area
PHYS

Catalog Number
405

Grading Basis
GRD - Graded

Description
In-depth study of Schroedinger's equation, the harmonic oscillator, angular momentum, the hydrogen atom, and Dirac formalism, spin, approximation methods, selection rules, transitions, and multi-electron atoms.

Prerequisites
001806 - PHYS 300, either PHYS 314 or MATH 230, and MATH 227; or Instructor Consent

Typically Offered on Stevens Point Campus
Spring terms of even years

POLI 394 - Political Ideas that Changed the World - 3 Credits

Overview

Subject Area
POLI

Catalog Number
394

Grading Basis
GRD - Graded

Description
During certain periods, political ideas undergo significant changes. In Greece, warfare and democracy prompted Plato and Aristotle to offer new ideas capable of making sense of the politics of their tiime. At other times, political ideas provoke change. The Protestant Reformation ignited conflicts in Europe that led to new ideas about individual freedom, equality, revolution, and legal constitutions that remain influential. Focus is on how political ideas reflect their social and historical context as well as how new political ideas have generated conflicts within societies. Available for graduate credit as POLI 594.

PSEN 216 - Engineering Statistical Design and Analysis - 3 Credits

Overview

Subject Area
PSEN

Catalog Number
216

Grading Basis
GRD - Graded

Description
Statistical methods for design, analysis and improvement of engineering experimentation and process operation: experimental design, regression analysis, modeling, analysis of variance, and six-sigma techniques.

Prerequisites
001488 - PSEN 215

Typically Offered on Stevens Point Campus
No Longer Offered

PSEN 300 - Mill Internship - 1 Credits

Overview

Subject Area
PSEN

Catalog Number
300

Grading Basis
GRD - Graded

Description
Chemical Engineering and/or Paper Science and Engineering majors work full-time for at least ten weeks in an industrial facility with emphasis on manufacturing assignments; documentation of work experience required.

Prerequisites
001809 - PSEN 215

Typically Offered on Stevens Point Campus
Fall and Spring

PSEN 316 - Engineering Economics and Project Management - 3 Credits

Overview

Subject Area
PSEN

Catalog Number
316

Grading Basis
GRD - Graded

Description
Interest and economic equivalence; methods for capital and operating cost estimation; depreciation and after-tax economic analysis; methods for comparing project and investment alternatives; project evaluation and justification. Basic project management skills; project documentation; risk management; work breakdown structure and scheduling.

Typically Offered on Stevens Point Campus
Fall Only

PSEN 382 - Water and Wastewater Treatment - 3 Credits

Overview

Subject Area
PSEN

Catalog Number
382

Grading Basis
GRD - Graded

Description
Theory, practice and regulatory framework of water and wastewater treatment with a focus on control and design of physical, chemical and biological treatment processes. May earn credit in only one of PSEN 382, WATR 382 and WSTE 382. Available for graduate credit as PSEN 582.

PSEN 399 - Research Problem - 1 - 3 Credits

Overview

Subject Area
PSEN

Catalog Number
399

Grading Basis
GRD - Graded

Description
Chemical Engineering and/or Paper Science and Engineering majors may arrange for special laboratory or field research in consultation with staff and industry. Emphasizes problem analysis, literature searches, and communication of research results. Credit is based on scope of project. May be repeated for credit.

Typically Offered on Stevens Point Campus

PSEN 420 - Air Pollution Control and Engineering - 3 Credits

Overview

Subject Area
PSEN

Catalog Number
420

Grading Basis
GRD - Graded

Description
Pollutant sources, transport, and fate; effects of air pollutants on human health and environment; physical and chemical characteristics and behavior in the atmosphere; control of air contaminants including toxic air pollutants; source control and prevention; ambient and urban air quality; occupational and residential indoor air quality. Control technologies; air pollution control systems for stationary sources. Technical, regulatory, and economic fundamentals related to control gaseous and particulate emissions, and toxic and/or hazardous air pollutants.

Prerequisites
001812 - Both PSEN 110 and PSEN 215, and either CHEM 220 or CHEM 325

PSEN 440 - Industrial Thermodynamics - 3 Credits

Overview

Subject Area
PSEN

Catalog Number
440

Grading Basis
GRD - Graded

Description
Thermo-dynamic properties; energy and entropy balances; pumps, compressors, turbines, nozzles, and mixing chambers; thermodynamics of energy conversion: steam, vapor, and gas power cycles; energy recovery systems; refrigeration: heat pumps; heat engines. Classical thermodynamics and Maxwell's relationships; engineering equations of state. Field trips.

PSEN 484 - Senior Design Project: Paper Science and Engineering - 3 Credits

Overview

Subject Area
PSEN

Catalog Number
484

Grading Basis
GRD - Graded

Description
Principles of process design; social and environmental impacts of engineering; ethical and professional issues in engineering. Projects focus on processes of importance to the pulp and paper industry. Design project includes project definition, equipment selection and sizing, capital and operating cost estimation, economic evaluation and justification; oral and written presentations.

PSEN 706 - Programmable Controller Systems - 3 Credits

Overview

Subject Area
PSEN

Catalog Number
706

Grading Basis
GRD - Graded

Description
Programming, configuring, adjusting, monitoring, operating, and troubleshooting industrial programmable logic controller (PLC) systems. Adhering to PLC safety rules, performing normal startup/shutdown, operating PLC in different modes, performing emergency shutdown and reset, monitoring for proper operation through indicators and PC-based PLC software, configuring processor software drivers for communication to PC, configuring and loading of Human-Machine-Interface (HMI) programs, operating HMI with PLC, configuring PLC discrete I/O, transferring programs between PC and PLC processor, interpreting PLC ladder logic programs, PLC project creation/editing, and interpreting common PLC program logic applications using electro-pneumatic actuators and on/off motor control systems.

PSL 201 - Internship Preparation: From Industry Exploration to Workplace Expectations - 1 Credits

Overview

Subject Area
PSL

Catalog Number
201

Grading Basis
GRD - Graded

Description
Designed to support you in your internship search process, regardless of your starting point. Through self-reflection activities and assessments, this course will teach you about yourself while also looking into potential career paths and industries. Throughout this course, you will gain knowledge of best practices for creating a resume and cover letter, conducting interviews, networking, and performing internship searches on multiple platforms. You will also learn strategies for maximizing your internship experience. It is ideal for students to take this course one to two semesters prior to their anticipated internship experience.

REL 363 - Religion and Society in Ancient Israel - 3 Credits

Overview

Subject Area
REL

Catalog Number
363

Grading Basis
GRD - Graded

Description
What can we know about the social and religious worlds of ancient Israel? And how does this knowledge shape the way we interpret biblical texts? These questions will be pursued through the application of multiple disciplinary approaches from the Social Sciences and the Humanities to the analysis of both textual and non-textual evidence from ancient Israel and neighboring cultures. Application of different methodologies and distinct fields of knowledge and their impact upon the interpretation of specific biblical texts.

SMGT 750 - Introduction to the Intersections of Sustainability and Wellness - 3 Credits

Overview

Subject Area
SMGT

Catalog Number
750

Grading Basis
GRD - Graded

Description
Addresses the timely and wide-ranging topic of the built environment, including community design and energy use. Students learn how the design of communities and buildings affects organizations and their employees, as well as the broader community, and planet. Concepts and tools for understanding the built environment, community development, and energy for the future are introduced. The purpose of this course is to expose students to energy and the built environment. Topics covered include recent energy trends, community issues and policy, resource management, scope, risk analysis, and facility controls. The built environment topic is covered using authentic cases, narrated scenarios, and examples. Leaming resources such as instructor's lectures, readings, and student assessments are sequenced and organized to support authentic learning.

SOIL 384 - Environmental Microbiology Lecture - 3 Credits

Overview

Subject Area
SOIL

Catalog Number
384

Grading Basis
GRD - Graded

Description
Explore the role of beneficial and pathogenic microorganisms in environmental media. Microbial distributions, energetics, and role in biogeochemical cycles will be emphasized. Soil and (waste) water environments will be a focus. Students will apply concepts to evaluating problems in their major field of study. May earn credit in only one of SOIL 384, SOIL 484 or WSTE 484. Soil and Waste Resources majors must enroll in SOIL 484 or WSTE 484. Available for graduate credit as SOIL 584.

Prerequisites
004090 - Either NRES 251 or PSEN 215, and one of the following: CHEM 101, CHEM 105, CHEM 106, or CHEM 117; or Instructor Consent

SOIL 465 - Soil Physics - 3 Credits

Overview

Subject Area
SOIL

Catalog Number
465

Grading Basis
GRD - Graded

Description
Basic concepts and principles related to state and transport of matter (especially water) and energy in the soil. Physical measurement and mathematical quantification of soil physical properties and processes. Available for graduate credit as SOIL 665.

Prerequisites
002110 - Either MATH 111 or MATH 225, and either PHYS 101 or PHYS 201, Summer Field Experience and CNR major; or Instructor Consent

Typically Offered on Stevens Point Campus
Spring Only

SOIL 479 - Environmental Fate of Organic Chemicals - 3 Credits

Overview

Subject Area
SOIL

Catalog Number
479

Grading Basis
GRD - Graded

Description
Principles governing how organic chemicals behave in environmental media. Emphasizes quantitative determination of organic contaminant partitioning, transformation, and transport in air, surface waters, soils, and groundwater. Applied examples focusing on persistent and emerging chemicals of concern for human and ecosystem health, including pesticides, petroleum hydrocarbons, chlorinated solvents, PCBs, and pharmaceuticals. May not earn credit in both SOIL 479 and WSTE 479. Available for graduate credit as SOIL 679.

Prerequisites
002290 - One of the following: CHEM 101, CHEM 105, or CHEM 106; and NRES 251; or Instructor Consent

Typically Offered on Stevens Point Campus
Spring Only

SOIL 482 - Nutrient Management: Land Application and Planning - 3 Credits

Overview

Subject Area
SOIL

Catalog Number
482

Grading Basis
GRD - Graded

Description
The properties of waste resources, environmental impacts, regulations, and equipment dealing with the processing, transportation and application of industrial, agricultural and municipal wastes (particularly on land) will be discussed. Training to prepare nutrient management plans will be a major class component. May not earn credit in both SOIL 482 and WSTE 482. Available for graduate credit as SOIL 682.

Prerequisites
001835 - NRES 251

Typically Offered on Stevens Point Campus
Spring Only

SOIL 484 - Environmental Microbiology - 4 Credits

Overview

Subject Area
SOIL

Catalog Number
484

Grading Basis
GRD - Graded

Description
Explore the role of beneficial and pathogenic microorganisms in environmental media. Microbial distributions, energetics, and role in biogeochemical cycles will be emphasized. Soil and (waste) water environments will be a focus. Laboratory exercises will develop classic and current methods, and include small group or class projects. May earn credit in only one of SOIL384, SOIL 484 and WSTE 484. Available for graduate credit as SOIL 684.

Prerequisites
001836 - Either NRES 251 or PSEN 215, and one of the following: CHEM 101, CHEM 105, CHEM 106, or CHEM 117; or Instructor Consent

Typically Offered on Stevens Point Campus

SOIL 486 - Composting - 1 Credits

Overview

Subject Area
SOIL

Catalog Number
486

Grading Basis
GRD - Graded

Description
Theory and practice of controlled aerobic decomposition including various methods for composting different types of waste materials. Lab techniques for compost testing and tours of large and small composting facilities. May not earn credit in both SOIL 486 and WSTE 486. Available for graduate credit as SOIL 686.

SOIL 566 - Wetland Soils and Wetland Delineation - 3 Credits

Overview

Subject Area
SOIL

Catalog Number
566

Grading Basis
GRD - Graded

Description
Characteristics of hydric soils including chemistry, biology, physics, morphology, genesis and classification. Review and demonstrate procedures for identifying and delineating wetlands using indicators of hydric soils, hydrophytic vegetation and wetland hydrology. May not earn credit in both WATR 566 and SOIL 566. Available for undergraduate credit as SOIL 366.

UWX AS100 - Survey of Astronomy - 3 Credits

Overview

Subject Area
UWX

Catalog Number
AS100

Grading Basis
GRD - Graded

Description
This is a descriptive survey of astronomy for students with minimal background in mathematics and science. Topics include the solar system, stars, galaxies, and cosmology, as well as the methods by which astronomers learn about the Universe and disseminate their discoveries. Although not math-intensive, this course uses some math at the level of high school algebra I; therefore, students who have been placed in remedial math should consult with the instructor before enrolling in this course. May not earn credit in both UWX AS100 and ASTR 100.

Prerequisites
004895 - Either MATH 90 or UWX MA091, or placement into MATH 95 or above

UWX BL285 - Anatomy and Physiology I - 4 Credits

Overview

Subject Area
UWX

Catalog Number
BL285

Grading Basis
GRD - Graded

Description
An examination of the structure and function of the human body at the molecular, cellular, tissue, organ, and system levels of organization. The integration of these levels of organization within the human organism is emphasized, focusing on body organization, support, movement, and neural control. UWX BL285 is the first course in a two-part series. May not earn credit in both UWX BL 285 and BIOL 285. Does not count toward Biology major.

Prerequisites
004896 - One of the following: UWX BL101, BIOL 101, BIOL 110, BIOL 111, BIOL 130, BIOL 160, or Instructor Consent

UWX BL286 - Anatomy and Physiology II - 4 Credits

Overview

Subject Area
UWX

Catalog Number
BL286

Grading Basis
GRD - Graded

Description
An examination of the structure and function of the human body at the molecular, cellular, tissue, organ, and system levels of organization. The integration of these levels of organization within the human organism is emphasized. UWX BL 286 is the second course in a two-part series. Covers the following major body systems: Endocrine, Cardiovascular, Lymphatic, Immune, Digestive, Respiratory, Urinary, and Reproductive. Course topics include nutrition and genetics as well as water, electrolyte, and pH balance. This course is comprised of both lecture and lab. May not earn credit in both UWX BL 286 and BIOL 286. Does not count toward Biology major.

UWX ED230 - Educational Psychology - 3 Credits

Overview

Subject Area
UWX

Catalog Number
ED230

Grading Basis
GRD - Graded

Description
The purpose of this course is to study child and adolescent development through the psychological principles of teaching and learning. This course will place an emphasis on understanding the social, emotional, physical, and intellectual development of children and adolescents. In particular, emphasis will be placed on the nature and conditions of learning, including the major types of learning, critical aspects of learning, and any problems that may be encountered when working as a professional educator in a school setting. Additionally, a focus will be placed on data-based decision making and intentional teaching, or the ability to provide purposeful instruction. Important legislation that governs education will be discussed with a focus on increased accountability for teachers and its impact on the assessment process. May not earn credit in both UWX ED203 and EDUC 381.

Prerequisites
004898 - A grade of C- or better in one of the following: UWX PS101, PSYC 110, or Instructor Consent

General Education Designation(s)
CCT - Critical and Creative Thinking (AD), SS - Social Sciences (GEP)

UWX EN278 - Multicultural Literature in the United States - 3 Credits

Overview

Subject Area
UWX

Catalog Number
EN278

Grading Basis
GRD - Graded

Description
Study of literature written by, and expressing the perspectives of, writers from minority groups in the United States. Includes readings by contemporary writers focusing on the experiences of African, Asian, Hispanic, and Native Americans through their essays, poetry, fiction, and drama. As an interdisciplinary course, the literature is read in the context of American history and culture. May not earn credit in both UWX EN278 and ENGL 284.

Prerequisites
004762 - Either UWX EN101 or ENGL 101

UWX ES105 - Introduction to Environmental Studies - 3 Credits

Overview

Subject Area
UWX

Catalog Number
ES105

Grading Basis
GRD - Graded

Description
Overview of the interrelationships between humans and the environment. Focus on important ecological concepts and human influence on the environment. Ecological concepts are used throughout to identify, understand, and provide a basis for proposing possible solutions to contemporary environmental problems. Provides a better understanding of how humans can more positively affect the environment in which they live.

UWX GE100 - Physical Geography and the Environment - 3 Credits

Overview

Subject Area
UWX

Catalog Number
GE100

Grading Basis
GRD - Graded

Description
Focus on concepts and processes that explain physical systems on Earth and the relationship between people and their natural environment. Themes in Physical Geography include Earth/Sun relationships, weather dynamics, the biosphere (ecology, biomes, conservation), and the lithosphere (mountain building, rocks, rivers, glaciers). Students complete assignments in CANVAS: assignments may be derived from textbook resources and instructor-created activities designed to better understand the natural world (such as weather patterns, rocks, soil properties or river dynamics) and how it applies to their daily life. May not earn credit in both UWX GE100 and GEOG 100.

UWX GE170 - Disasters - Living on the Edge - 4 Credits

Overview

Subject Area
UWX

Catalog Number
GE170

Grading Basis
GRD - Graded

Description
Study various environmental hazards, their causes, impacts on humans, and mitigations. Core topics include natural hazards (earthquakes, flooding, tornadoes, hurricanes), and anthropogenic hazards (climate change, nuclear hazards, overpopulation). Additional topics may include: coastal hazards, pollution, other atmospheric hazards, impacts from space, extinctions, biohazards, chemical hazards, and terrorism. May not earn credit in both UWX GE170 and either GEOG 170 or GEOL 170.

UWX GS231 - Sex, Power, and Public Policy - 3 Credits

Overview

Subject Area
UWX

Catalog Number
GS231

Grading Basis
GRD - Graded

Description
A course on public policy, with a special focus on policy that addresses issues of sex and gender, including voting and political rights, social and economic equality, reproduction and healthcare, marriage and family, and sex and sexuality. We also examine general areas of public policy (such as education, work, and the economy) with an eye to the specific implications these policies have on sex and gender.

UWX SC222 - Race and Ethnicity - 3 Credits

Overview

Subject Area
UWX

Catalog Number
SC222

Grading Basis
GRD - Graded

Description
Race and ethnicity are axes of stratification, identity, and experience. They are often taken for granted or go unrecognized by some. In this course, we will address the multiple and intersecting ways these concepts shape society, individual life-chances, and daily social interactions. Studying the "socially-constructed" nature of the concepts of race and ethnicity, we ask what meanings and values social actors have attached to them, and we inquire into the ways the social constructions help to rationalize and justify social inequality. We will analyze the significance of race and ethnicity in a variety of institutional and interpersonal contexts, including the labor force, the media, culture, and the criminal justice system. We will discuss the role of race and ethnicity in the future, evaluating solutions to social inequality and strategies for social change.

UWX SC231 - Crime and Criminal Justice - 3 Credits

Overview

Subject Area
UWX

Catalog Number
SC231

Grading Basis
GRD - Graded

Description
Examine the American systems of Criminal Law and Justice in socio-historical context. The three branches of the Criminal Justice system (Law Enforcement, Courts, Corrections) will be presented and critiqued against the backdrop of five cultural philosophies of criminal justice. Explore how crime is defined and measured, and how social sciences theorize causes of crime and crime patterns. May not earn credit in both UWX SC231 and SOC 230.

UWX SP101 - First Semester Spanish - 4 Credits

Overview

Subject Area
UWX

Catalog Number
SP101

Grading Basis
GRD - Graded

Description
For students who have had little or no previous training in the language. The fundamentals of pronunciation and grammar are presented through reading, writing, speaking, and listening activities created to introduce both the Spanish language and the cultures of Spanish-speakers in the U.S. and abroad. May not earn credit in both UWX SP101 and SPAN 101.

UWX SP236 - Cultures and Civilizations of the Spanish Speaking Americas - 3 Credits

Overview

Subject Area
UWX

Catalog Number
SP236

Grading Basis
GRD - Graded

Description
Introductory-level survey course offers an overview of major historical and cultural developments of the Spanish-speaking Americas from the time of European contact (1492) through the colonial period, national struggles for independence, and popular revolutions until the 21st century. The second half of the semester emphasizes the exploration of modern Latin America by region, with particular focus on how artistic, spiritual and other forms of cultural expression in each region can be understood as the result of a confluence of five centuries of indigenous, African diasporic, and Iberian/European influence.

UWX SW150 - Social Advocacy and the Social Work Experience - 3 Credits

Overview

Subject Area
UWX

Catalog Number
SW150

Grading Basis
GRD - Graded

Description
Social work as a profession, and social welfare as a social institution, have been influenced by, and influence the developing American society. This course presents an overview of the problems and issues addressed within social services environments and how to advocate for social change. Students will develop an understanding of the historical progression of this social welfare policies and programs and the evolution and contribution of the social work profession within this context. We explore three critical areas: Ethical citizenship and frameworks that guide social welfare states, the role ethical frameworks play in guiding practice, and the social problems and human groups that are the focus of generalist social work practice.

WATR 200 - Preparing for a Career in Fisheries and Water Resources - 1 Credits

Overview

Subject Area
WATR

Catalog Number
200

Grading Basis
GRD - Graded

Description
Provides background on careers in the fields of water resource management (fisheries, hydrology, waste water, groundwater, aquatic ecology). Provides information on professional development, development of a professional portfolio and guidance on developing an effective program of study. Provides exposure to internships, research opportunities, and professional societies.

WATR 391 - GIS Applications in Natural Resources - 3 Credits

Overview

Subject Area
WATR

Catalog Number
391

Grading Basis
GRD - Graded

Description
Use of geographic information systems (GIS) and geospatial data to map, model and analyze natural resources. Available for graduate credit as WATR 591.

Prerequisites
001886 - NRES 251 or Instructor Consent

Typically Offered on Stevens Point Campus
Fall and Spring

WATR 405 - Advanced Stream Field Techniques - 2 Credits

Overview

Subject Area
WATR

Catalog Number
405

Grading Basis
GRD - Graded

Description
Advanced field techniques to survey stream geomorphology and measure channel hydraulics and sediment transport. Field methods include but are not limited to installation of pressure transducers and development of rating curves, use of Helley-Smith bed load samplers, and discharge and shear stress measurements using acoustic Doppler equipment. Includes one required field station experience. Available for graduate credit as WATR 605.

WATR 454 - Design of Constructed Wetlands - 1 Credits

Overview

Subject Area
WATR

Catalog Number
454

Grading Basis
GRD - Graded

Description
Design and construction of wetland areas for water quality control. Available for graduate credit as WATR 654.

Prerequisites
002117 - WATR 389 (or concurrent registration) and Formal Admission to CNR

Typically Offered on Stevens Point Campus
Spring Only

WATR 462 - Environmental Biogeochemistry - 3 Credits

Overview

Subject Area
WATR

Catalog Number
462

Grading Basis
GRD - Graded

Description
Theory, concepts and methods available to quantify biogeochemical cycles in atmospheric, terrestrial and aquatic ecosystems will be introduced. Used learned theory and advanced analytical biogeochemical techniques to plan, develop and conduct a major project. A professional-level oral presentation of project outcomes will culminate the course. May not earn credit in both WATR 462 and SOIL 462. Available for graduate credit as WATR 662.

Prerequisites
001885 - CHEM 106 and either SOIL 364 or WATR 390; or Instructor Consent

Typically Offered on Stevens Point Campus

WATR 483 - Fisheries Research - 3 Credits

Overview

Subject Area
WATR

Catalog Number
483

Grading Basis
GRD - Graded

Description
Field and laboratory techniques for fishery research. Principles of designing research projects, testing hypotheses, sampling fish, analyzing fishery data, reporting results in both written and oral forms, and defending research. Available for graduate credit as WATR 683.

Prerequisites
004381 - Prerequisite(s): WATR 353, WATR 388, BIOL 374 (or concurrent registration), CNR Summer Field Experience, and either CNR or biology major; or Instructor Consent

Typically Offered on Stevens Point Campus

WATR 683 - Fisheries Research - 3 Credits

Overview

Subject Area	Catalog Number	Grading Basis
WATR	683	GRD - Graded

Description
Field and laboratory techniques for fishery research. Principles of designing research projects, testing hypotheses, sampling fish, analyzing fishery data, reporting results in both written and oral forms, and defending research. Available for undergraduate credit as WATR 483.

Prerequisites
004668 - WATR 553, WATR 588 and BIOL 574 (or concurrent registration)

Typically Offered on Stevens Point Campus
Fall Only

WD 378 - People, Interfaces and Environments - 4 Credits

Overview

Subject Area
WD

Catalog Number
378

Grading Basis
GRD - Graded

Description
Dedicated to the principles and processes of human centered, interactive design. Architectural design processes that shape the physical world around us combined with the virtual interfaces that connect us socially and functionally in almost every aspect of our technological society. Solve social and environmental problems using both architectural as well as computing and technological media. Interdisciplinary problem solving methods applicable to both disciplines and new hybrid collaborative techniques within a project development framework. May not earn credit in both WD 378 and IA 378.

WGS 204 - Introduction to Masculinities - 3 Credits

Overview

Subject Area
WGS

Catalog Number
204

Grading Basis
GRD - Graded

Description
Focus on how the central concepts of masculinity work within history, politics, literature, technology, art, music, philosophy, education, and psychology. Work towards a deep understanding of the intersectional dynamics of race, gender, class, and other aspects of identity as they relate to the construction of various masculinities.

WGS 210 - Women's Health and Sexuality in Society - 3 Credits

Overview

Subject Area
WGS

Catalog Number
210

Grading Basis
GRD - Graded

Description
Basic facts about the structure and functioning of the female body; issues in women's health and sexuality will be approached interdisciplinarily and will include physical, mental, emotional, and social health and wellness topics and will be framed by discussions of race, class, and other cultural identities. Cultural, social, economic, and political contexts will be explored.

General Education Designation(s)
DUS - Diversity in the US (AD), ES - Ethnic Studies (AD), HC - Human Cultures (AD)

Typically Offered on the Branch Campuses

WGS 247 - Latin American and Latina Women - 3 Credits

Overview

Subject Area
WGS

Catalog Number
247

Grading Basis
GRD - Graded

Description
Examines the lives and literary works of Latin American and Latina women within Latin American society and in the US, particularly in regard to gender roles and stereotypes associated with patriarchal cultures. Examines how Latin American and Latina women have resisted race, class, and gender oppression through the analysis of a variety of primary texts, films, and scholarly articles.

WLDL 311 - Quantitative Methods for Wildlife and Fisheries Research and Management - 3 Credits

Overview

Subject Area
WLDL

Catalog Number
311

Grading Basis
GRD - Graded

Description
Practical experience in formulating hypotheses, designing field studies, analyzing and interpreting data commonly collected in wildlife and fisheries research and management. Through examples and collected data sets, learn appropriate design, selection of quantitative methods, biological interpretation of results, field complications, and impacts of violations of assumptions. Available for graduate credit as WLDL 511.

WLDL 361 - Waterfowl Ecology and Management - 3 Credits

Overview

Subject Area	Catalog Number	Grading Basis
WLDL	361	GRD - Graded

Description
Covers identification, ecology, life-history and conservation of ducks, geese and swans with specific focus on species commonly occurring in Wisconsin and the Mississippi Flyway. Learn about focal species population ecology and how non-government organizations, state and federal agencies partner to conserve populations and habitat. Read peer-reviewed papers and management plan reports on conservation (i.e., climate change, contaminants, etc.) and partake in field experiences as applicable. Available for graduate credit as WLDL 561.

WLDL 511 - Quantitative Methods for Wildlife and Fisheries Research and Management - 3 Credits

Overview

Subject Area
WLDL

Catalog Number
511

Grading Basis
GRD - Graded

Description
Practical experience in formulating hypotheses, designing field studies, analyzing and interpreting data commonly collected in wildlife and fisheries research and management. Through examples and collected data sets, learn appropriate design, selection of quantitative methods, biological interpretation of results, field complications, and impacts of violations of assumptions. Available for undergraduate credit as WLDL 311.

WLDL 561 - Waterfowl Ecology and Management - 3 Credits

Overview

Subject Area
WLDL

Catalog Number
561

Grading Basis
GRD - Graded

Description
Covers identification, ecology, life-history and conservation of ducks, geese and swans with specific focus on species commonly occurring in Wisconsin and the Mississippi Flyway. Learn about focal species population ecology and how non-government organizations, state and federal agencies partner to conserve populations and habitat. Read peer-reviewed papers and management plan reports on conservation (i.e., climate change, contaminants, etc.) and partake in field experiences as applicable. Available for undergraduate credit as WLDL 361.

GRD - Graded

Description
Explore physical, chemical and biological treatment options for the removal of plant nutrients from wastewater and the processing of wastewater biosolids. Advanced lab techniques and the economics of treatment will be discussed. Available for graduate credit as WSTE 681.

Prerequisites
001969 - WSTE 382 or Instructor Consent

Typically Offered on Stevens Point Campus
Fall Only

WSTE 482 - Nutrient Management: Land Application and Planning - 3 Credits

Overview

Subject Area	Catalog Number	Grading Basis
WSTE	482	GRD - Graded

Description
The properties of waste resources, environmental impacts, regulations, and equipment dealing with the processing, transportation, and application of industrial, agricultural and municipal wastes (particularly on land) will be discussed. Training to prepare nutrient management plans will be a major class component. May not earn credit in both WSTE 482 and SOIL 482. Available for graduate credit as WSTE 682.

Prerequisites
001970 - NRES 251

Typically Offered on Stevens Point Campus
Spring Only

WSTE 484 - Environmental Microbiology - 4 Credits

Overview

Subject Area	Catalog Number	Grading Basis
WSTE	484	GRD - Graded

Description
Explore the role of beneficial and pathogenic microorganisms in environmental media. Microbial distributions, energetics, and role in biogeochemical cycles will be emphasized. Soil and (waste) water environments will be a focus. Laboratory exercises will develop classic and current methods, and include small group or class projects. May earn credit in only one of SOIL 384, SOIL 484 and WSTE 484. Available for graduate credit as WSTE 684.

Prerequisites
001898 - Either NRES 251 or PSEN 215, and one of the following: CHEM 101, CHEM 105, CHEM 106, or CHEM 117; or Instructor Consent

Typically Offered on Stevens Point Campus
Fall Only

WSTE 485 - Solid Waste Management II - 2 Credits

Overview

Subject Area	Catalog Number	Grading Basis
WSTE	485	GRD - Graded

Description
Exposure to recycling of solid waste practices; methods for the collection and processing of solid waste recyclables will be explored. Conversion of waste material to energy via incineration, pyrolysis, and anaerobic conversion to methane will be discussed. Available for graduate credit as WSTE 685.

Prerequisites
001971 - WSTE 380 or Instructor Consent

Typically Offered on Stevens Point Campus
Spring Only

WSTE 486 - Composting - 1 Credits

Overview

Subject Area	Catalog Number	Grading Basis
WSTE	486	GRD - Graded

Description
Exposure to the theory and practice of controlled aerobic decomposition. Explore various methods of composting different types of waste materials. Learn lab techniques for compost testing. Tour of large and small composting facilities. May not earn credit in both WSTE 486 and SOIL 486. Available for graduate credit as WSTE 686.

Typically Offered on Stevens Point Campus
Fall Only

WSTE 489 - Industrial Environmental Management - 3 Credits

Overview

Subject Area	Catalog Number	Grading Basis
WSTE	489	GRD - Graded

Description
Regulations, economic, and technical aspects of industrial waste (air, water, solid, and hazardous) generation, alternative methods of treatment, and release of treated materials to the environment, resource consumption and mathematics of growth, risk assessment. May not earn credit in both PSEN 489 and WSTE 489.

Prerequisites
001899 - Both MATH 225 and CHEM 106

Typically Offered on Stevens Point Campus
Occasionally

WSTE 679 - Environmental Fate of Organic Chemicals - 3 Credits

Overview

Subject Area	Catalog Number	Grading Basis
WSTE	679	GRD - Graded

Description
Principles governing how organic chemicals behave in environmental media. Emphasizes quantitative determination of organic contaminant partitioning, transformation, and transport in air, surface waters, soils, and groundwater. Applied examples focusing on persistent and emerging chemicals of concern for human and ecosystem health, including pesticides, petroleum hydrocarbons, chlorinated solvents, PCBs, and pharmaceuticals. May not earn credit in both WSTE 679 and SOIL 679. Available for undergraduate credit as WSTE 479.

Typically Offered on Stevens Point Campus
