Learning Outcome
1. Demonstrate foundational knowledge and skills in the methods of investigating, expressing, and evaluating concepts in the social sciences and the study of the Arts. 2. Apply sound and original thinking to address issues and problems in the world today. In so doing, demonstrate a mature understanding of the different roles that the social sciences and the arts play both in how we conceptualize and contextualize these issues and problems, and also in how we might deepen our understanding of and devise possible solutions for them. 3. Communicate effectively with diverse audiences on current issues and problems we face. 4. Model the disposition and character of an educated and faithful person. That is: 1. Take seriously both the course topic and your own responsibility to work towards solutions to current issues and problems. 2. Demonstrate the ability and the humility to learn from and collaborate productively with others who have backgrounds, views, or expertise different from

practices of two distinct disciplines.

**Course Title**
Introduction to Database Design and SQL for Non-Majors
**Course Description**
Introduction to databases, specifically focusing on the relational database model, database design and modeling, and the structured query language (SQL). Students will master essential database concepts by developing critical thinking skills by producing conceptual data models and solving relational algebra and SQL query problems. Students will also learn the standard symbols and notation for data modeling and relational database design and will be able to demonstrate this knowledge in conceptual and relational data models.

  **AND** PHSCS 121 - Introduction to Newtonian Mechanics

**Additional Comments:**

**Title**
Communications of Digital Information

**Tags**
209616, 0, 4

**Learning Outcome**
Describe multiple types of digital information and how that information is communicated over wire, wireless, and optical fiber.

**Title**
Spectrums

**Tags**
181106, 0, 1, 2023-08-26 08:48:39

**Learning Outcome**
Describe the significance of the EM spectrum and spectral analysis in digital communications.

**Title**
Communications Links

**Tags**
181030, 0, 2, 2023-08-26 08:48:39

**Learning Outcome**
Describe the data rate limitations of communications links, referencing especially Shannon's Law.

**Title**
Signal Modulation

**Tags**
181250, 0, 3, 2023-08-26 08:48:39

**Learning Outcome**
List the intrinsic advantages and disadvantages of the three types of signal modulation (amplitude, frequency, phase).

**Title**

**Additional Comments:**

**Other Prerequisites**
Must have received a grade of C or higher in IT&C 210B.

**Title**
OS Architecture

**Tags**
181260, 0, 0, 2023-08-26 08:48:09

**Learning Outcome**
Describe the purposes, types, components, functions and inter-relationships of operating systems (desktop, mobile, and enterprise). Describe how hardware enables and integrates with this functionality.

**Title**
OS Subsystems

**Tags**
181150, 0, 1, 2023-08-26 08:48:09

**Learning Outcome**
Describe how OS sub-systems work (scheduling, memory management, etc).

**Title**
OS Practice

**Tags**
181165, 0, 2, 2023-08-26 08:48:09

**Learning Outcome**
Demonstrate an ability to work with Operating Systems by installing, compiling, configuring, and optimizing real and virtual systems. Describe Scalability issues.

**Title**
Information Assurance and Security

**Tags**
181092, 0, 3, 2023-08-26 08:48:09

**Learning Outcome**
Describe common IAS concepts related to system administration. Describe system administration aspects of IAS, including authentication, directory services and access control models.

Give the physical properties of physical communication media (wire, wireless, optical fiber) and describe how they affect data rate capacity.

| Title | Tags |
| --- | --- |
| Digital Information | 213296, 0, 9, 2023-08-26 08:48:39 |

| Parallel Computing | 213290, 0, 1, 2023-08-26 08:36:36 |

Learning Outcome
Understand and implement parallel computing practices including threading, multi-processing, mutual exclusion, and avoiding race conditions.

| Title | Tags |
| --- | --- |
| Distributed Computing | 213291, 0, 2, 2023-08-26 08:36:36 |

Learning Outcome
Utilize networked computers to solve problems using techniques such as workflow decomposition, job scheduling, and message passing.

| Title | Tags |
| --- | --- |
| Technical Concepts and Practices | 213292, 0, 3, 2023-08-26 08:36:36 |

Learning Outcome
Define and apply supporting concepts and tools such as Bash, version control, build systems, basic computer architecture and storage management at scale.

| Title | Tags |
| --- | --- |
| Effective Communication | 213293, 0, 4, 2023-08-26 08:36:36 |

Learning Outcome
Illustrate through written reports and verbal presentation the impact of computing on scientific research.

| Experience | 181102, 2 |
|---|---|

**Learning Outcome**
Has received experience with real implementation of the concepts.

| Title | Tags |
|---|---|
| Presentations | 181144, 16 |

**Learning Outcome**
Has gained experience and confidence in presenting technical information.

| Title | Tags |
|---|---|
| Problem Solving | 181148, 4 |

**Learning Outcome**
Has built confidence through problem solving.

| Title | Tags |
|---|---|
| Describe Issues | 181152, 5 |

**Learning Outcome**
Describe configuration and management issues relative to SNMP MIB.

| Title | Tags |
|---|---|
| Network Management Systems | 181155, 8 |

**Learning Outcome**
Describe function and purpose of network management systems such as Zenoss, HP OpenView, Tivoli, OpenNMS.

| Title | Tags |
|---|---|
| Continuous Learning | 181191, 22 |

**Learning Outcome**
Explain the need for continuous learning in the networking field.

| Title | Tags |
|---|---|
| IPv6 Adopted Slowly | 181195, 19 |

**Learning Outcome**
Explain reasons why IPv6 has not been adopted as rapidly as originally predicted.

| Title | Tags |
|---|---|
| IPv6 | 181199, 18 |

Learning Outcome
Describe IPv6 and its evolution from IPv4.

| Title | Tags |
| --- | --- |
| Bodies and Technology | 181224, 3 |

Learning Outcome
Has built an intuition of the relationship between standards bodies and technology.

| Title | Tags |
| --- | --- |
| Describe | 181225, 15 |

Learning Outcome
Describe the function of and uses of MPLS.

| Title | Tags |
| --- | --- |
| Read and Evaluate | 181230, 20 |

Learning Outcome
Is prepared to read technical literature and evaluate quality of the information.

| Title | Tags |
| --- | --- |
| Link State | 181241, 13 |

Learning Outcome
Explain the details of Link state routing and its advantages and disadvantages relative to Distance Vector Routing.

| Title | Tags |
| --- | --- |
| VLAN Routers | 181269, 10 |

Learning Outcome
Explain the interaction of a router and a switch implemented in the same device where the router forwards between VLANs only.

| Title | Tags |
| --- | --- |
| Monitoring | 181284, 6 |

Learning Outcome
Perform basic monitoring with SNMP.

This course prepares students to take courses in calculus, statistics, mathematics for elementary education majors, and other areas where algebra skills are required. Fluent skills in algebra are necessary for success in any area that uses mathematical analysis. The mastery of college algebra requires well-developed skills, clear conceptual understanding, and the ability to model phenomena in a variety of settings. College Algebra develops the concepts of graphing functions, polynomial and rational functions, exponential and logarithmic functions, conic sections, solving systems of equations, the binomial theorem,

**Learning Outcome**
This course is aimed at graduates majoring in mathematical and physical sciences and engineering. In addition to being an important branch of mathematics in its own right, complex analysis is an important tool for differential equations (ordinary and partial), algebraic geometry and number theory. Thus it is a core requirement for all mathematics majors. It contributes to all the expected learning outcomes of the Mathematics BS degree.For more detailed information visit the Math 352 Wiki page.

**Learning Outcome**
Students should gain a familiarity with how the disciplines of mathematics and biology can complement each other. Increasingly, mathematics is used to understand complex biological systems. Without some familiarity with the mathematical techniques, it is difficult to know how to interpret the results. In this class, a variety of applications to medicine and biology will be studied, highlighting the different mathematical techniques. The objective of the class is not only to introduce the students to various applications and methods but also to help determine the strengths and weaknesses of different methods. **Learning Outcome**
This course is designed to prepare students to solve mathematical models represented by initial or boundary value problems involving partial differential equations that cannot be solved directly using standard mathematical techniques but are amenable to a computational approach. Numerical solution of partial differential equations has important applications in many application areas. Students are introduced to the discretization methodologies, with particular emphasis on the finite difference method, that allows the construction of accurate and stable numerical schemes. In-depth discussion of theoretical aspects such as stability analysis and convergence will be used to enhance the students' understanding of the numerical methods. | Conservation of Mass | 180736, 3 |

Learning Outcome
4. Be able to derive the integral form of the conservation of mass principle from the Reynolds Transport Theorem and appropriately apply it to steady and unsteady flow situations with uniform or two-dimensional velocity distributions. Recognize and be able to utilize the differential form of conservation of mass.

| Title | Tags |
| --- | --- |
| Global Force/Momentum Balances | 180737, 5 |

Learning Outcome
5. Be able to derive the integral form of the linear momentum principle from the Reynolds Transport Theorem and apply global force/momentum balances for stationary and constant velocity frames of reference with uniform or two-dimensional velocity distributions. Recognize the Navier-Stokes equations and solve them for simplified viscous flows.

Learning Outcome
Each student can characterize the material comprising a thermodynamic system, use the state postulate to fix the state of a system and obtain thermodynamic properties using appropriate methods. Each student can use properties and boundary interactions to describe processes and can sketch processes on thermodynamic diagrams.

| Dimensional Analysis | 180738, 6 |

**Learning Outcome**
6. Be able to determine appropriate dimensionless variables for a given dynamical situation. Understand the usefulness in presenting experimental data using dimensional analysis. Predict prototype analysis based on similitude and understand the pitfalls of modeling.

| Title | Tags |
| --- | --- |
| Mechanical Energy Equation | 180739, 7 |

**Learning Outcome**
7. Understand the mechanical energy equation and be able to apply it to laminar and turbulent flow with minor and major losses through pipe networks.

| Title | Tags |
| --- | --- |
| Real World Problem Solving | 208077, 9 |

**Learning Outcome**
9. Be able to utilize the principles of fluid dynamics to analyze and solve real world flow phenomena. Be able to use structured techniques (e.g. The 5 Ps of problem definition) to develop an engineering problem statement based on real-world applications of fluid mechanics and apply structured problem solving techniques (e.g. SAFER) to solve fluids engineering problems. Be able to methodically explore the possible solution space (e.g. using ConVerSAnT) for fluids problems.

| Title | Tags |

Kinetics of Materials
**Course Description**
A unified treatment of kinetic processes in materials,including transport, chemical reactions, phase transformations, and microstructure evolution. Emphasis is placed on crystalline materials, but application to glasses, polymers and other material systems are discussed throughout. Specific topics include: kinetic theory of gases,rate theory, reaction kinetics, irreversible thermodynamics,diffusion in a broad spectrum of material classes (both atomistic mechanisms and phenomenological/continuum level models), influence of defects of diffusion, evolution of surfaces, phase transformations (solidification, nucleation and growth, spinodal decomposition), coarsening, grain growth, and morphological instabilities. \n

**Title**
Aircraft Control Techniques and Autopilots

**Tags**
214052, 0, 2, 2023-08-29 10:55:06

**Learning Outcome**
An understanding of common aircraft control techniques, such as successive loop closure, and how they apply to the design of longitudinal and lateral-directional autopilots.

**Title**
State Estimators

**Tags**
214053, 0, 3, 2023-08-29 10:55:08

**Learning Outcome**
The ability to design and implement estimators, including Kalman filters, to estimate aircraft states.

MFGEN
Course Title
Lean Manufacturing & System Design
Course Description
Basic elements, planning and integration issues of manufacturing systems. Analyzing product specifications and production requirements for manufacturing concepts and practices involved in process planning and manufacturing system design. Designing a manufacturing system can be as complex and crucial to the success of a company as the design of the products being made. Equipment selection and justification; facility layout and material-handling system design; process-improvement techniques. Lean manufacturing principles will be used within the context of each topic in this course.

Outcome 4:WinningThe Ranger Challenge Team, selected from the top 11 enrolled in the class, placed 1st overall in the Brigade Ranger Challenge Competition in Colorado. As the winner of the Brigade Competition, the team was selected to participate in the Sandhurst Cup at West Point Military Academy. The BYU Ranger Challenge team placed 14 out of 54 Participating teams from all over the world at the Sandhurst Cup.Competition is one of the key drivers for active learning in this tactical leadership class. The students are more focused, they work harder, and they put in more hours in order to achieve higher standards on individual and collective skill-sets for the benefit of the team.

| Leader Development | 41328, 0 |

**Learning Outcome**
Outcome 1:Leader DevelopmentStudents are given training guidance, mandatory training/class timeline, and expected outcomes from the instructor (CPT Young). From there it becomes the responsibility of the students to asses their available resources, identify their key training tasks, and build a detailed event timeline with a comprehensive training outline.
Classes/training for each block of instruction/skill-set is supervised by class leadership and delegated to other students to become subject mater experts for their respective skill-sets and train the other students in the class.The students demonstrated solid leadership, good work ethic, and developed quality training. However, their training was not always nested within the initial guidance given by the instructor (CPT Young). This resulted in inefficiencies in lines of effort that were not focused on intended outcomes.Instructors'

**Teaching Area**
MMBIO

**Course Title**
Genetic Counseling

**Course Description**
Preparing students to make critical decisions in the field of human genetics, especially those preparing for a career in genetic counseling. Discussion of the principles of genetics, molecular mechanisms of heredity, how genes affect traits and development, genetic diseases, and technologies used to gather genetic information. The use of genetic information (basic probability, test reliability and sensitivity, and how to evaluate genetic risks). Effective communication of genetic information to others, with an emphasis on empathy and communication in difficult circumstances. The risks and benefits to genetic tests, and the implications of release of genetic information. Evaluation of the moral and ethical implications of human genetic knowledge.

Learning Outcome
This course is designed to allow the student to interpret, evaluate, and correlate laboratory data and clinical symptoms pertaining to specific disease states. Each week several students will present case study presentations covering current lecture content. For example, week two covers carbohydrate metabolism and related disease processes so the assigned students will present patient data focusing on a specific disease such as diabetes mellitus, including symptoms, laboratory findings and treatment.

| Mathematical Understanding | 205029, 3 |

Learning Outcome

Students know and can describe what it means to understand mathematics relationally, can demonstrate mathematical understanding by creating and evaluating conceptually-oriented mathematical explanations, and can explain why conceptually-oriented mathematics instruction is essential for supporting adolescents' learning of mathematics.

| Title | Tags |
| --- | --- |
| Mathematics | 207314, 1 |

**Learning Outcome**
Students have a deep understanding of select central concepts of middle school mathematics, with significant attention to multiplicative structures, proportionality and linearity, as well as core representations, canonical examples, and alternative algorithms germane to teaching these select concepts. Other learning outcomes in the course are situated in the mathematics of multiplicative structures, proportionality and linearity.

| Title | Tags |
| --- | --- |
| Mathematics Instruction | 207315, 4 |

**Learning Outcome**
Students recognize that mathematics instruction that does not build relational understanding has failed a majority of adolescents, even themselves, and is particularly detrimental to adolescents from historically marginalized populations, and that they have a moral obligation to seek the necessary knowledge and expertise to teach mathematics in ways that enable all adolescents to develop conceptual understanding, procedural fluency, and facility with authentic mathematical practices.

Building on prior knowledge and experience; that adolescents differ cognitively, linguistically, socially, emotionally, and physically; and that adolescents learn best when given regular opportunities to reason about and make sense of mathematics in an environment of high expectations and strong support.
Instructional Design for Mathematics Learning
Students understand how to design learning environments and mathematical experiences that engage all adolescents in the exploration and development of mathematical ideas, as well as how to effectively foster these environments and orchestrate these experiences by promoting conceptual understanding, procedural fluency, and authentic mathematical practices.
Assessment of Mathematics Learning
Students understand how to design and use formative and summative assessments that monitor the learner's progress, inform instructional decisions, and engage adolescents in assessing their own mathematical learning.
Professionalism
Students demonstrate their professionalism through maintaining appropriate relationships and behavior in the school setting, and by seeking opportunities to improve practice and advance the profession through reflecting on practice, soliciting and incorporating feedback, and contributing to professional, school, and community organizations.
Spiritual StewardshipStudents seek integrity between their personal and professional lives consistent with the restored gospel of Jesus Christ by recognizing all learners as children of God and striving to nurture their divine potential; applying gospel-centered principles of teaching and learning to family relationships, gospel service, and involvement in the community; and serving as examples of a Christ-centered life within their spheres of influence.

| Scholarship | 205061, 0 |

**Learning Outcome**
Students understand and can evaluate important issues, trends, theories, paradigms of research, and research findings in the field of mathematics education, as well as their implications for the teaching and learning of mathematics in the public schools, mathematics teacher development, and participation in mathematics education scholarship.

Scholarship 205062, 0

Learning Outcome
Students understand and can evaluate the role of proof in geometry and in mathematics in general, the theories of how students progress through the van Hiele levels in learning geometry and how these two topics are related. They can use this knowledge to evaluate current instructional, curricular, and policy recommendations of leaders in mathematics education regrading the teaching of geometry in the public schools.

Title
Professionalism
Tags
205081, 4

Learning Outcome
Students recognize the key role that geometry should play in school mathematics and the valuable insights provided by the literature on the teaching and learning of geometry, and feel a desire to continually seek opportunities to improve their own teaching of geometry and promote better instruction of geometry in the schools by seeking to adapt the instruction to the van Hiele level of the students.

Title
Spiritual Stewardship
Tags
205085, 5

Learning Outcome
Students strive to follow the example of Jesus Christ in both their personal and professional lives, seek consistency between their understanding of the restored gospel of Jesus Christ and principles of geometry teaching and learning, and use this enriched understanding of teaching and learning to nurture the divine potential of all in their spheres of influence.

Title
Euclidean Geometry
Tags
205088, 2

Learning Outcome
Students understand the central concepts, conditions, definitions, theorems, assumptions

Title
Identifying and Situating Research Problems
Tags
205063, 1

Learning Outcome
Students understand the importance of situating research problems and questions in the literature, and can identify important research problems and relate them to appropriate issues, trends, theories, paradigms, and findings in the literature.

Title
Becoming a Professional
Tags
205070, 3

Learning Outcome
Students perceive themselves as emerging scholars and leaders in the field, and feel responsibility for and commitment to their own growth and the growth of the field.

Title
Spiritual Stewardship
Tags
205073, 4

Learning Outcome
Students strive to follow the example of Jesus Christ in both their personal and professional lives, seek consistency between their understanding of the restored gospel of Jesus Christ and principles of mathematics teaching and learning, and use this enriched understanding of teaching and learning to nurture the divine potential of all in their spheres of influence.

Title
Applying Scholarship to Teaching
Tags
205082, 2

Learning Outcome
Students can use their understanding of the important issues, trends, theories, paradigms, and findings in the field of mathematics to evaluate, reflect on, and improve their mathematics instruction.

theorems, assumptions, structure and extensions of high school (Euclidean) geometry. They can use these understandings to prove general cases of geometric theorems and apply these theorems to solve problems in Euclidean geometry.

| Title | Tags |
| --- | --- |
| Teaching | 205129, 3 |

**Learning Outcome**
Students can assess the van Hiele level at which their students are operating and design tasks and lessons to move learners to a higher van Hiele level, eventually to the level of deduction and proof. Throughout the instruction at different van Hiele levels, students can continually evaluate the role that proof is playing for the learners and understand how to adjust their instruction to ensure that proof activities are meaningful. Students can use their knowledge of the van Hiele levels, proof, and the NCTM Standards to evaluate geometry curriculum for appropriate sequencing.

Students study such topics as creativity itself, writing techniques, and the importance of collaboration. By the end of the semester each student will have completed several preparatory assignments in addition to a culminating creative song project. The students will receive an introduction to a working MIDI-technology studio. Parallel to these assignments are readings about the models of the music business: music publishing, record labels, legal concepts, the copyright law, etc. Quizzes and a final exam measure retention of these concepts. Students who master the principles advanced will be able to function creatively and to manage others involved in the

creation of commercial songs.

**Learning Outcome**
The goal of 264/265 is to give students a strong introduction to various musical skills that they will very likely come across in the professional world. Many of these skills will draw on the student's knowledge of music theory and become the concrete application of that knowledge.As keyboard players –they are expected to have the strongest working knowledge of harmony, as the instrument is polyphonic in nature – not homophonic. The ability to see many notes and instantly divide them into harmonic groupings is crucial and a common denominator for nearly every aspect of this class. Sometimes this grouping skill will include adding or subtracting notes from the page, or supplying notes that are only notated by a symbol. Very often students can play their performance repertoire wonderfully, but are virtually helpless and intimidated when attempting to add or subtract some of their own notes when not written specifically on the

not written specifically on the page. This tendency represents incomplete musicianship - it is instead only well trained muscles. The outcomes for this course include sight reading, modulation, score reading, figured bass, transposition and improvisation. After discussing other items that would be considered foundational material for keyboard players in 2012, it was decided that added emphasis would be given to the history of great pianists.
