*This major is designed to prepare students to teach in public schools. In order to graduate with this major, students are required to complete Utah State Office of Education licensing requirements. To view these requirements go to https://www.schools.utah.gov/curr/licensing or contact the Education Advisement Center, 350 MCKB, 801-422-3426.*

*Students who are interested in the program should meet with the Physical Education Teaching Education program director (249-D SFH) and Education Student Services (350 MCKB) in September of their sophomore year. Then they must complete an online application (found at http://educator.byu.edu). Applications for the Physical Education Teaching Education program are due February 15 for Fall semester.*

*A teaching minor is not required for licensure. However, it is strongly recommended (approximately 16-30 hours).*

*For students accepted into the major after December 16, 2019, grades below C in any required coursework in a teaching major or teaching minor will not be accepted. Teacher candidates must maintain a cumulative GPA of 2.7 or higher once admitted into the program and to qualify for student teaching. For additional details on admission and retention requirements for teaching majors and teaching minors, see Educator Preparation Program Requirements in the Undergraduate Catalog.*

**Requirement 13 — Complete 1 Options**

**Requirement 13.1 —Obtain confirmation from your advisement center that you have completed the following:**

Complete an approved minor outside of dance. Note: Chosen minor may not be a dance minor, and must be completed as part of your graduation requirements.

**Requirement 13.2 — Obtain confirmation from your advisement center that you have completed the following:**

Complete 15 credit hours in a concentrated area of study outside of the Dept. of Dance. These credits should support a cross-disciplinary understanding of how a dance education can integrate into post graduate pursuits. Examples include but are not limited to the following graduate studies/career pursuits: Dance Movement Therapy, Physical Therapy, Medicine, Occupational Therapy. A justification letter regarding outside electives must accompany your student development plan and all credits must be approved by your faculty advisor and the Dance BA Committee Chair.

**Free Form Requirements**

*Licensure: This program meets the educational requirements designed to lead to an occupationally required professional license or certificate in the state of Utah. Students pursuing occupations requiring a license or certificate in a state other than Utah should contact the appropriate BYU academic advisement center as well as the licensing agency in the state where they intend to work to seek information and guidance regarding licensure and certification requirements.*

*The Dance Education K-12 major is a limited enrollment program which requires students to apply and audition for acceptance through a department admissions process. Candidates should declare a Dance Education K-12 Pre-major and enroll in Dance 241R, Dance 290, and Dance 261 during the freshman year. A proficiency audition, self-choreographed solo, interview, minimum academic requirements, Utah Bureau of Criminal Investigation (UBCI) and FBI fingerprint and background clearance, and successful completion of Dance 276R are required for acceptance to the major. See https://dance.byu.edu for complete acceptance requirements.*

*This major is designed to prepare students to teach in public schools. In order to graduate with this major, students are required to complete Utah State Office of Education licensing requirements. To view these requirements go to http://education.byu.edu/ess/licensing.html or contact Education Student Services (350 MCKB, 801-422-3426).*

*Upon acceptance to the Dance Education K-12 major, students will participate in annual mandatory advisement with an assigned faculty advisor and through the CFAC Advisement Center.*

*Proficiency audition is required for placement and registration in technique courses. All technique courses require at least a B- and teacher approval to advance to the next level.*

*The Dance Department requires at least 21 hours from major courses to be completed in residency at BYU for this degree program. These hours may also go toward BYU's 30-hour residency requirement for graduation.*

*For students accepted into the major after December 16, 2019, grades below C in any required coursework in a teaching major or teaching minor will not be accepted. Teacher candidates must maintain a cumulative GPA of 2.7 or higher once admitted into the program and to qualify for student teaching. For additional details on admission and retention requirements for teaching majors and teaching minors, see Educator Preparation Program Requirements in the Undergraduate Catalog.*

*A teaching minor is recommended.*

**Recommended Courses are not required to complete the program**

*Recommended Courses: Chem 460.*

*Note: Supporting courses suggested by most medical and dental schools are found by visiting the Preprofessional Advisement Office. The more rigorous chemistry, mathematics, and physics courses required for the chemistry majors will satisfy the minimum requirements listed there. Elective courses in biochemistry and in biological science are especially pertinent to these preprofessional programs.*

*Licensure: This program meets the educational requirements designed to lead to an occupationally required professional license or certificate in the state of Utah. Students pursuing occupations requiring a license or certificate in a state other than Utah should contact the appropriate BYU academic advisement center as well as the licensing agency in the state where they intend to work to seek information and guidance regarding licensure and certification requirements.*

*This major is designed to prepare students to teach in public schools. In order to graduate with this major, students are required to complete Utah State Office of Education licensing requirements. To view these requirements go to https://www.schools.utah.gov/curr/licensing or contact the Education Advisement Center, 350 MCKB, 801-422-3426.*

*For students accepted into the major after December 16, 2019, grades below C in any required coursework in a teaching major or teaching minor will not be accepted. Teacher candidates must maintain a cumulative GPA of 2.7 or higher once admitted into the program and to qualify for student teaching. For additional details on admission and retention requirements for teaching majors and teaching minors, see Educator Preparation Program Requirements in the Undergraduate Catalog.*

**Free Form Requirements**

*Licensure: This program meets the educational requirements designed to lead to an occupationally required professional license or certificate in the state of Utah. Students pursuing occupations requiring a license or certificate in a state other than Utah should contact the appropriate BYU academic advisement center as well as the licensing agency in the state where they intend to work to seek information and guidance regarding licensure and certification requirements.*

*This minor is designed to prepare students to teach in public schools. A teaching minor may only be received by students graduating with a teaching major. In order to graduate with this minor, students are required to complete Utah State Office of Education licensing requirements. To view these requirements go to https://www.schools.utah.gov/curr/licensing or contact the Education Advisement Center, 350 MCKB, 801-422-3426.*

*For students accepted into the major after December 16, 2019, grades below C in any required coursework in a teaching major or teaching minor will not be accepted. Teacher candidates must maintain a cumulative GPA of 2.7 or higher once admitted into the program and to qualify for student teaching. For additional details on admission and retention requirements for teaching majors and teaching minors, see Educator Preparation Program Requirements in the Undergraduate Catalog.*

MAP - BS in Computer Science Animation and Games 2023-2024.pdf

| | |
|---|---|
| **Title** | **Learning Outcome** |
| Computational Practice: | Students will design and implement significant computer programs that meet a human need and will develop expertise in animation. See the Computer Science BS program for general assessments shared across all emphases. |

| | |
|---|---|
| **Title** | **Learning Outcome** |
| Computational Theory: | Students will analyze problems and their algorithmic solutions using theoretical concepts.See the Computer Science BS program for general assessments shared across all emphases. |

| | |
|---|---|
| **Title** | **Learning Outcome** |
| Career Preparation | Students will have sufficient maturity in computer science to work in a professional setting in computer science or animation or to enter a graduate program.See the Computer Science BS program for general assessments shared across all emphases. |

**Free Form Requirements**

*Grades below C- are not allowed in major courses.*

**Requirement 1 — Complete 4 Courses**

*Prerequisite Courses:*

C S111 Intro to Computer Science - Intro to Computer Science 3.0

C S235 Data Structures - Data Structures 3.0

CSANM150 Intro to 3D Graphics - Intro to 3D Graphics 1.5

DESAN101 Intro to Drawing for Pre-Anim - Intro to Drawing for Pre-Anim 1.0

*Be admitted to the program.*

**Requirement 2 — Complete 8 Courses**

*Complete the following after being admitted to the program:*

C S224 Computer Systems - Computer Systems 3.0

C S236 Discrete Structure - Discrete Structure 3.0

C S240 Adv Software Construction - Adv Software Construction 4.0

C S312 Algorithm Design & Analysis - Algorithm Design & Analysis 3.0

C S324 Systems Programming - Systems Programming 3.0

**Free Form Requirements**

*Grades below C- are not allowed in major courses.*

**Requirement 1 — Complete 10 Courses**

C S111 Intro to Computer Science - Intro to Computer Science 3.0

C S180 Intro to Data Science - Intro to Data Science 3.0

C S224 Computer Systems - Computer Systems 3.0

C S235 Data Structures - Data Structures 3.0

C S236 Discrete Structure - Discrete Structure 3.0

C S240 Adv Software Construction - Adv Software Construction 4.0

C S312 Algorithm Design & Analysis - Algorithm Design & Analysis 3.0

C S404 Ethics & Computers in Society - Ethics & Computers in Society 2.0

C S472 Intro to Machine Learning - Intro to Machine Learning 3.0

C S474 Deep Learning - Deep Learning 3.0

**Requirement 2 — Complete 3 Courses**

MATH112 Calculus 1 - Calculus 1 4.0

MATH290 Fundamentals of Mathematics- Fundamentals of Mathematics 3.0

C S324 Systems Programming - Systems Programming 3.0

C S355 Graphics and Image Processing - Graphics and Image Processing 3.0

C S455 Computer Graphics - Computer Graphics 3.0

CSANM250 Interm 3D Computer Graphics - Interm 3D Computer Graphics 2.0

**Requirement 3 — Complete 5 Courses**

*Supporting Courses:*

MATH112 Calculus 1 - Calculus 1 4.0

MATH213 Elementary Linear Algebra - Elementary Linear Algebra 2.0

MATH215 Computational Linear Algebra - Computational Linear Algebra 1.0

PHSCS121 Intro to Newtonian Mechanics - Intro to Newtonian Mechanics 3.0

WRTG316 Technical Communication - Technical Communication 3.0

**Requirement 4 — Complete 1 of 2 Courses**

STAT121 Principles of Statistics - Principles of Statistics 3.0

STAT201 Stat for Engineers & Scientist - Stat for Engineers & Scientist 3.0

**Requirement 5 — Complete 1 of 3 Courses**

MATH113 Calculus 2 - Calculus 2 4.0

MATH290 Fundamentals of Mathematics - Fundamentals of Mathematics 3.0

STAT220 Stat Modeling for Data Science - Stat Modeling for Data Science 3.0

**Requirement 6 — Complete 1 of 2 Courses**

CSANM342 Real-time Techniques - Real-time Techniques 3.0

CSANM354 Materials and Surfacing - Materials and Surfacing 3.0

**Requirement 7 — Complete 1 of 2 Courses**

C S404 Ethics & Computers in Society - Ethics & Computers in Society 2.0

DESAN460 Business & Ethics in Animation - Business & Ethics in Animation 2.0

**Requirement 8 — Complete 6 hours**

CSANM352 Animated Film Production 1 - Animated Film Production 1 - *You may take once* 3.0

CSANM450 Animated Film Production 2 - Animated Film Production 2 - *You may take once* 3.0

CSANM452 Animated Film Production 3 - Animated Film Production 3 - *You may take once* 3.0

CSANM459 Video Game Production 1 - Video Game Production 1 - *You may take once* 3.0

CSANM460 Video Game Production 2 - Video Game Production 2 - *You may take once* 3.0

**Requirement 9 — Complete 2 of 28 Courses**

MATH380 Mathematics of Data Science - Mathematics of Data Science 3.0

**Requirement 3 — Complete 2 Courses**

MATH213 Elementary Linear Algebra - Elementary Linear Algebra 2.0

MATH215 Computational Linear Algebra - Computational Linear Algebra 1.0

**Requirement 4 — Complete 1 of 2 Courses**

STAT121 Principles of Statistics - Principles of Statistics 3.0

STAT201 Stat for Engineers & Scientist - Stat for Engineers & Scientist 3.0

**Requirement 5 — Complete 1 of 3 Courses**

ECON388 Intro to Econometrics - Intro to Econometrics 3.0

STAT220 Stat Modeling for Data Science - Stat Modeling for Data Science 3.0

STAT330 Statistical Modeling 2 - Introduction to Regression 3.0

**Requirement 6 — Complete 1 of 2 Courses**

C S412 Linear Prog/Convx Optimization - Linear Prog/Convx Optimization 3.0

MATH522 Mathematics of Deep Learning - Methods of Applied Math 2 3.0

**Requirement 7 — Complete 2 of 4 Courses**

C S450 Computer Vision - Computer Vision 3.0

C S470 Intro Artificial Intelligence - Intro Artificial Intelligence 3.0

C S471 Voice Interfaces - Voice Interfaces 3.0

C S479 Intro to Machine Translation - Intro to Machine Translation 3.0

**Requirement 8 — Complete 6 hours**

**Option 8.1 — Complete up to 6 hours**

C S482 Data Science Capstone 1 - Data Science Capstone 1 3.0

C S483 Data Science Capstone 2 - Data Science Capstone 2 3.0

**Option 8.2 — Complete up to 6 hours**

C S497R Undergraduate Research - Undergraduate Research - *You may take twice* 3.0

If you complete this option you must take two semesters, totaling 6.0 credits

**Requirement 9 — Complete 9 hours**

*Note: Courses taken to fulfill Requirements 6 and 7 cannot double count here*

C S412 Linear Prog/Convx Optimization - Linear Prog/Convx Optimization 3.0

C S450 Computer Vision - Computer Vision 3.0

C S452 Database Modeling Concepts - Database Modeling Concepts 3.0

C S453 Fund of Information Retrieval - Fund of Information Retrieval 3.0

C S470 Intro Artificial Intelligence - Intro Artificial Intelligence 3.0

*Note: If C S 401R is chosen, it must be taken for three hours.*

C S252 Intro to Computational Theory - Intro to Computational Theory 3.0

C S256 Introduction to HCI - Introduction to HCI 3.0

C S260 Web Programming - Web Programming 3.0

C S329 Test, Analysis, & Verification - Test, Analysis, & Verification 3.0

C S330 Concepts of Programng Lang - Concepts of Programig Lang 3.0

C S340 Software Design - Software Design 3.0

C S345 Operating Systems Design - Operating Systems Design 3.0

C S356 Advanced Techniques in HCI -Advanced Techniques in HCI 3.0

C S393 Adv Algorithms & Probl Solving - Adv Algorithms & Probl Solving 3.0

C S401R Topics in Computer Science - Topics in Computer Science - *You may take up to 3.0 credit hours* 1.0v

C S412 Linear Prog/Convx Optimization - Linear Prog/Convx Optimization 3.0

C S428 Software Engineering - Software Engineering 3.0

C S431 Algorithmic Lang & Compilers - Algorithmic Lang & Compilers 3.0

C S450 Computer Vision - Computer Vision 3.0

C S452 Database Modeling Concepts - Database Modeling Concepts 3.0

C S453 Fund of Information Retrieval - Fund of Information Retrieval 3.0

C S456 Mobile and Ubiquitous HCI -Mobile and Ubiquitous HCI 3.0

C S460 Comp Comms & Networking - Comp Comms & Networking 3.0

C S462 Distributed System Design - Distributed System Design 3.0

C S465 Computer Security - Computer Security 3.0

C S466 Blockchain Technologies - Blockchain Technologies 3.0

C S470 Intro Artificial Intelligence - Intro Artificial Intelligence 3.0

C S471 Voice Interfaces - Voice Interfaces 3.0

C S472 Intro to Machine Learning - Intro to Machine Learning 3.0

C S474 Deep Learning - Deep Learning 3.0

C S 478 - Tools for Machine Learning - *This course is no longer available for registration and will count only if you completed it while it was offered. Please see your college advisement center for possible substitutions.* 3.0

C S479 Intro to Machine Translation - Intro to Machine Translation 3.0

C S486 Verification and Validation - Verification and Validation 3.0

**Requirement 10 — Complete 2 of 37 Courses**

*Courses used to fulfill Requirements 6, 8 and 9 cannot be double counted here. Note: If C S 401R, C S 498R, or C S 501R is chosen, it must be taken for three hours.*

C S401R Topics in Computer Science - Topics in Computer Science - *You may take up to 3.0 credit hours* 1.0v

C S471 Voice Interfaces - Voice Interfaces 3.0

C S479 Intro to Machine Translation - Intro to Machine Translation 3.0

C S513 Robust Control - Robust Control 3.0

C S 575 - Intro to Network Science 3.0

C S580 Theory of Predictive Modeling - Theory of Predictive Modeling 3.0

ECON378 Statistics for Economists - Statistics for Economists 3.0

LING581 Natural Lang Processing - Natural Lang Processing 3.0

MATH113 Calculus 2 - Calculus 2 4.0

MATH314 Calculus of Several Variables - Calculus of Several Variables 3.0

MATH413 Advanced Linear Algebra - Advanced Linear Algebra 3.0

MATH431 Probability Theory - Probability Theory 3.0

STAT240 Probability and Inference 1 - Probability and Inference 1 3.0

STAT251 Intro to Bayesian Statistics - Intro to Bayesian Statistics 3.0

STAT340 Probability and Inference 2 - Probability and Inference 2 3.0

STAT386 Data Science Process - Data Science Process 3.0

**Requirement 9 — Obtain confirmation from your advisement center that you have completed the following:**

Complete Senior Exit Interview with the Computer Science department during last semester or term.

*Note: Math 112, Math 113, Phscs 121, Engl 316, and C S 312 can be used to fill both General Education and program requirements. Advanced Writing and Oral Communication: Engl 316. Quantitative Reasoning: Math 112 or 113. Languages of Learning: Math 112 or 113. Physical Science: C S 312 or Phscs 121.*

C S412 Linear Prog/Convx Optimization - Linear Prog/Convx Optimization 3.0

C S428 Software Engineering - Software Engineering 3.0

C S431 Algorithmic Lang & Compilers - Algorithmic Lang & Compilers 3.0

C S450 Computer Vision - Computer Vision 3.0

C S452 Database Modeling Concepts - Database Modeling Concepts 3.0

C S453 Fund of Information Retrieval - Fund of Information Retrieval 3.0

C S456 Mobile and Ubiquitous HCI - Mobile and Ubiquitous HCI 3.0

C S460 Comp Comms & Networking - Comp Comms & Networking 3.0

C S462 Distributed System Design - Distributed System Design 3.0

C S465 Computer Security - Computer Security 3.0

C S 466 - Blockchain Technologies - *This course is no longer available for registration and will count only if you completed it while it was offered. Please see your college advisement center for possible substitutions.* 3.0

C S474 Deep Learning - Deep Learning 3.0

C S479 Intro to Machine Translation - Intro to Machine Translation 3.0

C S486 Verification and Validation - Verification and Validation 3.0

C S498R Undergraduate Special Projects - Undergraduate Special Projects - *You may take up to 3.0 credit hours* 1.0v

C S500 Business Career Essentials - Business Career Essentials 1.5

C S501R Adv Topics in Computer Sci - Adv Topics in Computer Sci - *You may take up to 3.0 credit hours* 1.0v

C S513 Robust Control - Robust Control 3.0

C S 575 - Intro to Network Science - *This course is no longer available for registration and will count only if you completed it while it was offered. Please see your college advisement center for possible substitutions.* 3.0

C S580 Theory of Predictive Modeling - Theory of Predictive Modeling 3.0

CSANM210 Visual Narrative - Visual Narrative 3.0

CSANM252 Intro 3D Animation - Intro 3D Animation 3.0

CSANM258 Scripting for Animation - Scripting for Animation 3.0

CSANM340 Game Design - Game Design 2.0

CSANM342 Real-time Techniques - Real-time Techniques 3.0

CSANM353 Previsualization - Previsualization 3.0

CSANM354 Materials and Surfacing -Materials and Surfacing 3.0

CSANM355 Photography for Animation - Photography for Animation 3.0

CSANM452 Animated Film Production 3 - Senior Film Production 2 -

*You may take once* 3.0

CSANM454 Advanced Shading - Advanced Shading 3.0

CSANM458 3D Visual Effects - 3D Visual Effects 3.0

DESAN364R Digital Sculpting - Digital Sculpting - *You may take once* 3.0

EC EN425 Real-Time Operating Systems - Real-Time Operating Systems 4.0

**Requirement 11 — Complete 1 of 3 Courses**

ARTHC111 Introduction to Art History - Introduction to Art History 3.0

ARTHC202 World Civilization Since 1500 - World Civilization Since 1500 3.0

TMA294 History of Animation - History of Animation 3.0

**Requirement 12 — Obtain confirmation from your advisement center that you have completed the following:**

Complete Senior Exit interview with the CS department during your last semester or term.

MAPS - BS in Earth & Space Science Education 2023-2024.pdf

| Title | Learning Outcome |
|---|---|
| Earth and Space Science Fundamentals | Obtain a broad basic knowledge of the earth and space sciences. (BYU AIMS 1 2 3) |
| Instructional Design and Development | Be able to design and develop inquiry-based science units. (BYU AIMS 2 4) |
| INTASC Standards | Understand and apply the goals and standards of Interstate New Teacher Assessment and Support Consortium (INTASC). (BYU AIMS 2 3 4) |
| Teaching Sensitive Concepts | Understand how to teach sensitive scientific concepts such as evolution by means of natural selection age of the Earth and solar system and the Big Bang in the public school setting. |
| Professional and Moral Practice | Understand and apply the Moral Dimenstions of Teaching as embraced by the McKay School of Education (BYU AIMS 1 2 3 4) |

**Free Form Requirements**

*This major is designed to prepare students to teach in public schools. In order to graduate with this major, students are required to complete Utah State Office of Education licensing requirements. To view these requirements go to https://www.schools.utah.gov/curr/licensing or contact the Education Advisement Center, 350 MCKB, 801-422-3426.*

*For students accepted into the major after December 16, 2019, grades below C in any required coursework in a teaching major or teaching minor will not be accepted. Teacher candidates must maintain a cumulative GPA of 2.7 or higher once admitted into the program and to qualify for student teaching. For additional details on admission and retention requirements for teaching majors and teaching minors, see Educator Preparation Program Requirements in the Undergraduate Catalog.*

**Requirement 1 —Complete 4 Courses**

**Major Academic Plan**

MAPS - BS in Geology 2023-2024.pdf

| Title | Learning Outcome |
|---|---|
| Effective Inquiry and Communication | Demonstrate competence in scientific inquiry writing and oral presentation. |
| Professional Preparation | Be employable in geology-related fields or able to further their education in graduate programs. |
| Technical Competence | Demonstrate competence in relevant computer applications laboratory methods and field methods. |
| Discussing Society's Impact on the Planet | Demonstrate the ability to critically discuss issues related to geology that impact society and planet Earth. |
| Discussing Science and Religion | Demonstrate the ability to critically discuss the relationship between science and religion. |

**Free Form Requirements**

*Licensure: This program meets the educational requirements designed to lead to an occupationally required professional license or certificate in the state of Utah. Students pursuing occupations requiring a license or certificate in a state other than Utah should contact the appropriate BYU academic advisement center as well as the licensing agency in the state where they intend to work to seek information and guidance regarding licensure and certification requirements.*

*No D credit is allowed in major courses.*

**Requirement 7 — Obtain confirmation from your advisement center that you have completed the following:**

Students are required to complete a concentration in an area to which the mathematical and computational tools that they are learning can be applied. The list of the Approved Concentrations is found at www.acme.byu.edu/?page_id=85.

**Requirement 8 — Obtain confirmation from your advisement center that you have completed the following:**

Students are required to take either the GRE Mathematics Subject Test or the Mathematics Major Field Test the last semester before they graduate. The results of these tests do not appear on the transcript or affect the GPA. For more information contact the math department.

*Senior thesis:*

Complete a senior thesis, including the following:

A. Choose a research mentor and group as early as possible, starting with information in Phscs 191 and 192, and discussions with faculty, your advisor, and the senior thesis coordinator. It is best to start as a freshman or sophomore. Some internships may qualify for your project.

**Requirement 4.1 —Complete 2 hours**

*B.*

PHSCS498R Senior Thesis - Senior Thesis - *You may take up to 2.0 credit hours* 0.5v

**Requirement 5 — Obtain confirmation from your advisement center that you have completed the following:**

Students are required to take the Physics "Major Field Test" the last semester before they graduate. The test is a standardized assessment of undergraduate physics written by ETS (Educational Testing Service). The ETS website contains a description of the exam and sample problems: http://www.ets.org/mft/about/content/physics. Results of the exam do not appear on the transcript or affect the GPA. Students should contact the Physics undergraduate secretary to make arrangements for taking the exam; typically it's done in the Testing Center before mid-semester.

*Note: Students planning on graduate school in astronomy should consider taking all four of Phscs 360, 442, 452, 471, instead of only two. Gain statistics and computer programming skills beyond what you get in this major by taking courses such as Stat 201 (Statistics for Engineers and Scientists) and courses such as Phscs 430 (Computational Physics 3) and Me En 373 (Introduction to Scientific Computing).*

### Program Information

| Program Title | Degree |
|---|---|
| Applied Physics: Acoustics | BS |
| Variable Credit Min | Variable Credit Max |
| 62 | 64 |

| Title | Learning Outcome |
|---|---|
| Physics Theory and Application | Apply principles to model and solve representative problems analytically and computationally, at an introductory level from the primary physical theories (classical mechanics, quantum mechanics, special relativity, thermodynamics, electromagnetism and optics), and at an advanced level in classical mechanics, electrostatics and optics/electrodynamics. |

| Title | Learning Outcome |
|---|---|
| Acoustics Theory and Application | Apply acoustical principles to representative problems, such as the generation, propagation and reception of sound, spectral analysis, room acoustics, noise control, hearing, and musical instruments. |

*This minor is designed to prepare students to teach in public schools. A teaching minor may only be received by students graduating with a teaching major. In order to graduate with this minor, students are required to complete Utah State Office of Education licensing requirements. To view these requirements go to https://www.schools.utah.gov/curr/licensing or contact the Education Advisement Center, 350 MCKB, 801-422-3426.*

*For students accepted into the major after December 16, 2019, grades below C in any required coursework in a teaching major or teaching minor will not be accepted. Teacher candidates must maintain a cumulative GPA of 2.7 or higher once admitted into the program and to qualify for student teaching. For additional details on admission and retention requirements for teaching majors and teaching minors, see Educator Preparation Program Requirements in the Undergraduate Catalog.*

*Note: it is the student's responsibility to be sure that the Praxis test has been taken and that BYU has received the test scores, that their fingerprint background clearance is current, and that state licensing fees have been paid prior to graduation. Students are strongly discouraged from working another job during the time of their student teaching/internship. In addition, students must pass the PPAT assessment to graduate and receive a teaching license. Students will also be responsible for any additional requirements imposed by the state prior to their graduation. To confirm the status of these requirements contact the Education Advisement Center, 350 MCKB, 801-422-3426. Graduation and Utah licensure cannot be processed until these requirements have been completed.*

| The Aims of BYU Education | 181901, 3 |

**Learning Outcome**
The Aims of a BYU Education stipulates that students cultivate an informed awareness of the peoples, cultures, languages, and nations of the world. The Global and Cultural Awareness requirement enhances that awareness with a greater understanding and appreciation of the varieties of human experience across time and space. Inherent in the notion of global and cultural awareness is the perspective that we are all spiritual offspring of the same God, that in addition to our common humanity we also possess a nascent divinity. The Global and Cultural Awareness requirement seeks to help BYU students come not only to see the relativity of many of their own, culturally-derived notions but also to go forth to serve, having had meaningful discussion about

had meaningful discussion about or hands-on experience in dealing with real world global issues and problems.

1. Students will acquire informed awareness of either a) a culture outside their own, or b) the interplay of cultures, languages, and/or nations at an international level.

2. Students will experience thoughtful reflection on the above, as demonstrated in a structured, guided manner under the direction of a faculty member. Evidence of reflection implies written or spoke analysis that will include a consideration of the student,??s own responses to the culture or global issue, often involving comparison, and will demonstrate informed awareness.

3. Students will develop greater empathy and charity, and begin to gain a global perspective, by learning to see themselves from another,??s point of view.

Learning Outcome
This course helps students to learn the basic scientific principles which undergird the scientific process, including the strengths and weaknesses of this process. At the same time, students will learn to appreciate the excitement of discovery that has accompanied important scientific developments while engaging with global cultures whose developments have changed the face of humankind throughout time. Students will learn how scientific methodology can be used to analyze real world problems, including societal issues that can be informed by studies of past cultures. Students will become adept at evaluating scientific data and claims in order to make informed decisions on public-policy science issues that affect their community.

Learning Outcome
This course also helps students cultivate an informed awareness of the peoples, cultures, languages, and nations of the world, gaining a greater understanding and appreciation of the varieties of human experience across time and space. This understanding is vital to fulfilling the Lord's injunction to understand "things both in heaven and in the earth, and under the earth; things which have been, things which are... things which are abroad; the wars and the perplexities of the nations, and the judgements which are on the land; and a knowledge also of countries and of kingdoms" (D&C 88:79).

Learning Outcome
On completion of the course students should be

Familiar with the scope of the Anthropology major, its requirements, and ways of fulfilling these
Have a viable Career track plan
Have a viable Graduate School plan
Have a revised and approved MAP for their time at BYU and have met with their Faculty Advisor
Be aware of the Field School requirements and options for both Archaeology and SocioCultural tracks
Be acquainted with Faculty
Have participated in a designated service project

| Course Objectives | 181913, 3 |

**Learning Outcome**
As students complete the course they will learn to communicate their thoughts on various social and scientific topics clearly and meaningfully. Assignments, activities, and discussions include opportunities for students to practice the appropriate use of basic scientific vocabulary and effective interpretation of quantitative data, as well as reflect rationally upon the interface between science, society, and religion. Through the intensive study of examples of peoples in times and places other than their own, students will gain a greater awareness of global cultures outside of their own, thus helping them to develop greater empathy and charity for people in other parts of the world today.

**Teaching Area**
ANTHR

**Course Title**
Ethnographic Research Design and Methods

**Course Description**
This course has two related foci. First, students will practice the methods of ethnographic research, including best practices for participant observation interviewing, among other methods. To this end, students will conduct a mini-ethnography over the course of the semester. Second, students will develop and write a research proposal for the research they will carry out in their field schools. This research proposal will include a research question, a review of the literature that will motivate the research question, a description of the site where the research will be carried out, and an outline of the methods to be used in data collection and analysis. Students will be able to explain ethical research practices and they may need to pursue IRB approval as well.

**Learning Outcome**

Through this course, students will learn principles of good research design, and will be trained in a variety of methods for social science research. By the end of this course, students will have used this training to develop a proosal for a theoretically innovative research project, including laying out valid and reliable methods for answering the research question. By the end of this course, students will have developed the ability to effectivey critique research designs and assess the relative validity and reliability of other research projects. This includes the skills to critically assess the connections between evidence and theoretical claims in social science research.

**Note**
This course is designed for students in Biology majors who have participated in mentored research and have data that can be written about. Some students collected the data previously; other students are provided the data by their mentors. If given data by a mentor, a student could be concurrently enrolled in mentored research or they could have just started working in a lab. Data could also be from a past internship. The pre-requisite is having access to data (with some results) and a scientific mentor.

**Course Title**
Field Exam and Exit Survey
**Course Description**
This course will allow students to reflect on the meaningful learning opportunities they have experienced at BYU, how those experiences have shaped their education, and what role experiential learning has played in their intellectual, professional, and spiritual development. This opportunity for broader reflection is a crucial culminating activity as students prepare for graduation. Students will be reminded of the importance of lifelong learning and will take the ETS Biology Major Field Exam. This national exam evaluates the students' learning and retention of major scientific concepts in the fields of molecular biology, cell biology, organismal biology, population biology, and analytical skills.

Use the rudiments of the environment and the resources available to help them program (editors, basic computer architecture, compilers, libraries, reference manuals, on-line help).

Develop programs from an English description.

Write programs on their own, independent of "hand holding" by a TA or an instructor (typically a dozen or so).

Understand and use the basic programming constructs: types (built in types, basic provided types including arrays and strings, type construction), values (constants,variables, assignment statements, and expressions), control structures (sequential flow, conditional statements, and loops), and I/O (basic output to the screen and input from the keyboard, and file I/O).

Understand and use objects (value representation, applicable operations, hidden implementations).

Implement basic recursive algorithms.

Describe and use the basic ideas of some of the more advanced programming constructs,including exceptions, inheritance, and polymorphism.

**Learning Outcome**

Use HTML and CSS to design pages that adhere to web design principles.
Be proficient with JavaScript and several libraries.
Use a framework to build the front end of a creative JavaScript web application that includes login, user input, and communication with a back end using a REST API.
Use Node, Express, and a Mongo database to build the back end of a web application that provides a REST API, including user authentication and basic create/read/update/delete methods.
Use Git to manage and collaborate on code.
Setup a web and database server running on a remote virtual machine running Linux and use command line tools to manage the server.
Register a domain name for your web server.

**Learning Outcome**

Because 301R is an experiment course, data on how well the course accomplished the outcomes will be gathered. This will usually be in the form of surveys, exam scores, and project scores.

| Experimental course | 204496, 1 |

**Learning Outcome**

A 301R course is used by a professor who is teaching an experimental course. Learning outcomes will vary for the course, but these outcomes are evaluated during the vetting process (through the department undergraduate curriculum committee) before the professor is allowed to teach the course. At this level, typical learning outcomes involve computing practice, critical thinking, and more advanced theory.

**Course Title**
Advanced Algorithms and Problem Solving

**Course Description**
This course will help students to become better at problem solving, increasing their ability to excel at technical/coding interviews (a challenging part of the hiring/interviewing process). Students will build on the algorithms and problem-solving strategies that they were taught and had limited practice with in CS 312. learning primarily through targeted practice. This will result in (1) strengthened skills in each style of problem-solving strategy and (2) the ability to quickly decide which strategy(ies) to apply to a given problem. Students are expected to spend 6+ hours outside of class each week solving interview-type problems.

| Fundamentals of Architectural Design | Understand fundamental principles of intentional architectural design and interactions of the built, natural, and social environments. |

| Title | Learning Outcome |
|---|---|
| Architectural Theory | Apply principles of architectural design theory related to building siting (external impacts of climate, solar position, landscaping, topography, etc.) |

Learning Outcome
Students will demonstrate the ability to evaluate and implement energy-efficient strategies in building systems, taking into account current industry standards and sustainable building practices.

Title
Optimize System Outputs

Tags
181120, 0, 4

Learning Outcome
Students will be capable of optimizing building system outputs, including heating, cooling, ventilation, and lighting, to maximize performance and comfort while minimizing energy consumption and operational costs.

Title
Budgeting and Cost Estimation

Tags
181222, 0, 2

Learning Outcome
Develop skills in estimating the costs associated with installing, operating, and maintaining large building systems and perform cost-benefit analyses for retro-commissioning projects.

Title
Infrastructure Planning

Tags
181151, 0, 6

Learning Outcome
Understand the planning and development of utility infrastructure within the context of a construction project, including connections to power grids, water supply, and waste management.

Title
Condition Assessment and Maintenance Planning

Tags
181037, 0, 7

Learning Outcome
Students will learn how to conduct condition assessments of existing building systems, identify maintenance needs, and develop maintenance plans to ensure system longevity and reliability.

Title
Form Finding

Learning Outcome
Apply principles of architectural design theory to structure form finding.

Title
Building System Design

Learning Outcome
Apply principles of architectural design theory to building internal system selection and design.

Title
Building Envelopes

Learning Outcome
Model and calculate building envelopes and performance.

Title
Embodied/Operational Carbon

Learning Outcome
Model and calculate embodied and operational carbon loads of buildings.

Title
Life Cycle Analysis

Learning Outcome
Conduct lifecycle assessments of buildings.

## CFM 433 - Design Studio

### Course Information

**Course Number**
433
**Teaching Area**
CFM
**Course Title**
Design Studio
**Course Description**
The design studio course engages students in comprehensive design projects, emphasizing critical thinking, sustainable practices, and social awareness in architectural design. Students explore diverse typologies and scales, employing advanced digital tools and interdisciplinary perspectives. The course integrates hands-on exercises, design critiques, and real-world insights to foster a holistic understanding of contemporary architectural practice and the societal impact of design decisions. By the end of the course, students will have a significant portfolio contribution and the skills necessary for further graduate studies in architecture.

Title
Energy Balances (BYU Course Objective)

Tags
179524, 12

Learning Outcome
Students will be able to set up and solve steady state energy balances (1st law of thermodynamics) for closed and open systems.

Title
Fluid Statics (BYU Course Objective)

Tags
179526, 14

Learning Outcome
Students will be able to solve simple fluid statics problems.

Title
Phase Equilibrium (BYU Course Objective)

Tags
179527, 15

Learning Outcome
Students will be able to apply solution thermodynamics fundamentals to solve phase equilibrium problems including bubble point, dew point and flash calculations.

Title
Material Balances with Reactions (BYU Course Objective)

Tags
179528, 16

Learning Outcome
Students will understand and be able to use the extent of reaction in material balances for systems involving chemical reactions.

Title
Heat Properties (BYU Course Objective)

Tags
179529, 17

Learning Outcome
Students will understand and be able to apply the concepts of heat capacity, latent heat, heat of reaction, heat of combustion, and heat of formation.

Title
Phase Diagrams (BYU Course Objective)

Tags
179530, 18

Learning Outcome
Students will be able to read and understand phase diagrams and

use these to determine physical phenomena.

**Title**
Thermodynamic Properties (BYU Course Objective)

**Tags**
179533, 21

**Learning Outcome**
Students will be able to calculate internal energy, enthalpy, and entropy at system conditions assuming ideal behavior.

Designing Multi-unit Processes (BYU Course Objective)

**Tags**
179535, 8

**Learning Outcome**
Students will be able to design multiple-unit processes.

**Title**
Process Variables (BYU Course Objective)

**Tags**
179558, 10

**Learning Outcome**
Students will understand process variables (e.g., P, T, flow rate, conc.) including procedures and equipment for their measurement.

**Title**
Transient Mass Balances (BYU Course Objective)

**Tags**
207581, 13

**Learning Outcome**
Students will be able to set up and solve transient mass balances.

**Title**
Ethics

**Tags**
209016, 0, 9

**Learning Outcome**
Students will understand and commit to practice the AIChE code of ethics.

**Title**
Pure-component Phase Behavior (BYU Course Objective)

**Tags**
179531, 0, 19

**Learning Outcome**
Students will be able to solve problems related to pure-component phase behavior including vapor pressure, critical point, freezing line, triple point, etc.

**Title**
Molecular-level Understanding (BYU Course Objective)

**Tags**
179532, 0, 20

**Learning Outcome**
Students will be able to explain how molecular and continuum phenomena give rise to macroscopic behavior, processes, and properties.

207580, 11

**Learning Outcome**
Students will be able to set up and solve transient mass balances.

**Title**
Phase Equilibrium Calculations (BYU Course Objective)

**Tags**
207582, 13

**Learning Outcome**
Students will be able to apply solution thermodynamics fundamentals to solve phase

equilibrium problems including bubble point, dew point and flash calculations.

**Title**
Chemical Reaction Equilibrium (BYU Course Objective)

**Tags**
207583, 14

**Learning Outcome**
Students will understand the fundamental principles of chemical reaction equilibria including extent of reaction, equilibrium constant and its temperature-dependence, equilibrium conversion.

**Title**
Sensible Heat Effects (BYU Course Objective)

**Tags**
207584, 15

**Learning Outcome**
Students will understand and be able to apply the concepts of heat capacity, latent heat, heat of reaction, heat of combustion, and heat of formation.

**Title**
Entropy (BYU Course Objective)

**Tags**
207585, 16

**Learning Outcome**
Students will understand the concept of entropy and the second law of thermodynamics and be able to apply the second law to closed and open systems.

**Title**
Solution Thermodynamics Fundamentals (BYU Course Objective)

**Tags**
207586, 17

**Learning Outcome**
Students will understand the fundamental concepts of solution thermodynamics including chemical potential, fugacity, activity, partial molar properties, ideal solutions, and excess properties.

**Title**
Phase Diagrams (BYU Course Objective)

**Tags**
207587, 18

**Learning Outcome**
Students will be able to read and understand phase diagrams and

understand phase diagrams and use these to determine physical phenomena.

**Title**
Thermodynamic Properties (BYU Course Objective)

**Tags**
207590, 21

**Learning Outcome**
Students will be able to calculate internal energy, enthalpy, entropy, Helmholtz energy, and Gibbs energy at system conditions assuming both ideal and non-ideal behavior.

**Title**
Pumps, Turbines, Compressors (BYU Course Objective)

**Tags**
207649, 7

**Learning Outcome**
Students will be able to perform design calculations for pumps, turbines, and/or compressors (e.g., involving $\Delta H$, $\Delta S$, work, heat, efficiencies).

**Title**
Molecular-level Understanding (BYU Course Objective)

**Tags**
207589, 0, 20

Students will exhibit critical and creative thinking skills for analysis and evaluation of problems and cause-effect relationships.

Title

Engineering Intuition (BYU Course Objective)

Tags
179561, 6

Learning Outcome
Students will be able to make order of magnitude estimates, assess reasonableness of solutions, and select appropriate levels of solution sophistication.

Title
Flow System Design (BYU Course Objective)

Tags
179562, 7

Learning Outcome
Students will be able to use a mechanical energy balance and/or the concepts of system demand and pump supply curves to design flow systems involving pipes, valves, fittings and/or pumps.

Title
Pumps and Valves (BYU Course Objective)

Tags
179563, 8

Learning Outcome
Students will have a practical understanding of the function and use of pumps and valves and be able to make design decisions accordingly.

Title
Fluid Statics (BYU Course Objective)

Tags
179564, 9

Learning Outcome
Students will be able to solve simple fluid statics problems.

Title
Momentum Balances (BYU Course Objective)

Tags
179565, 10

Learning Outcome
Students will be able to formulate steady-state, integral and differential, momentum balances in one dimension.

Title
Advanced Fluid Mechanics Concepts (BYU Course Objective)

Tags
179566, 11

Learning Outcome
Students will understand and be able to use advanced fluid

Engineering Intuition (BYU Course Objective)

Tags
207597, 7

Learning Outcome
Students will be able to make order of magnitude estimates, assess reasonableness of solutions, and select appropriate levels of solution sophistication.

Title
Shell and Tube Heat Exchanger Design (BYU Course Objective)

Tags
207598, 8

Learning Outcome
Students will be able to design shell & tube heat exchangers to meet specific needs.

Title
Material Balances (BYU Course Objective)

Tags
207599, 9

Learning Outcome
Students will be able to set up and solve steady state material balances.

Title
Transient Energy Balances (BYU Course Objective)

Tags
207601, 11

Learning Outcome
Students will be able to set up and solve transient energy balances.

Title
Heat Transfer Modes, Qualitative (BYU Course Objective)

Tags
207602, 12

Learning Outcome
Students will understand conduction, convection, and radiation qualitatively.

Title
Heat Transfer with Resistances

Tags

mechanical concepts including boundary-layer theory, non-Newtonian flow, and turbulent flow.

Title
External Flow (BYU Course Objective)

Tags
179567, 12

Learning Outcome
Students will understand qualitatively how external flow around objects affects drag and be able to calculate drag forces and terminal velocities.

Title
Compressible Flow (BYU Course Objective)

Tags
179568, 13

Learning Outcome
Students will understand basic concepts relating to compressible flow including Mach numbers and choked flow.

Title
Non-Newtonian Fluids (BYU Course Objective)

Tags
179569, 14

Learning Outcome
Students will be able to calculate the the pressure drop in flow systems involving pipes and pumps for non-Newtonian fluids.

Title
Chemical Properties (BYU Course Objective)

Tags
179570, 15

Learning Outcome
Students will understand the physical/chemical behaviors of materials.

(BYU Course Objective)

207603, 13

Learning Outcome
Students will be able to steady-state solve heat transfer problems involving one or more resistances.

Title
Transient Heat Transfer (BYU Course Objective)

Tags
207604, 14

Learning Outcome
Students will be able to solve simple transient heat transfer problems.

Title
Convective Transfer Coefficients (BYU Course Objective)

Tags
207605, 15

Learning Outcome
Students will be able to determine convective heat and mass transfer coefficients from correlations.

Title
Diffusive Mass Transfer (BYU Course Objective)

Tags

Title
Safety and Environment in Design (BYU Course Objective)

Tags
207652, 0, 15

Learning Outcome
Students will have a working knowledge of safety and environmental regulations and be able to incorporate safety and environmental considerations into engineering design.

Title
Value of Money (BYU Course Objective)

Tags
212014, 0, 16

Learning Outcome
Students will be able to use concepts of interest, compounding, time value of money, annuities, and inflation in performing economic analyses.

Title
Capital Costs

Tags
212015, 0, 17

Learning Outcome
Students will be able to estimate costs in capital ventures, including capital costs, operating costs, cash flow, and profit.

Title
Profitability (BYU Course Objective)

Tags
212016, 0, 18

Learning Outcome
Students will be able to evaluate project profitability using equivalence methods (e.g., net present value) and rate-of-return methods (e.g., internal rate of return).

Title
Multiple-Unit Process Design (BYU Course Objective)

Tags
207650, 0, 19

Learning Outcome

Students will be able to design multiple-unit processes-for fluid flow, heat transfer, reactions, and separations-to produce desired products at specified purities.

**Title**
Flow Systems (BYU Course Objective)

**Tags**
207646, 0, 20

**Learning Outcome**
Students will be able to design flow systems involving pumps, valves, piping, and fittings.

**Title**
Phase Behavior (BYU Course Objective)

**Tags**
212017, 0, 21

**Learning Outcome**
Students will be able to solve problems related to pure-component phase behavior including vapor pressure, critical point, freezing line, triple point, etc.

**Title**
Phase Equilibrium (BYU Course Objective)

**Tags**
212018, 0, 22

**Learning Outcome**
Students will be able to apply solution thermodynamics fundamentals to solve phase equilibrium problems.

**Title**
Chemical Reactions (BYU Course Objective)

**Tags**
212019, 0, 23

**Learning Outcome**
Students will be able to apply the fundamental principles of chemical reactions including conversion, extent of reaction, and equilibrium.

**Title**
Reactor Design (BYU Course Objective)

**Tags**
212020, 0, 24

**Learning Outcome**
Students will be able to design isothermal and non-isothermal chemical reactors.

**Title**
Separation Processes (BYU Course Objective)

**Tags**
212021, 0, 25

**Learning Outcome**
Students will be able to design separations process units including tray-type and packed columns.

**Title**
Material and Energy Balances (BYU Course Objective)

**Tags**
207656, 0, 26

**Learning Outcome**
Students will be able to set up and solve steady state material and energy balances.

**Title**
Heat Transfer Processes (BYU Course Objective)

**Tags**
207647, 0, 27

**Learning Outcome**
Students will be able to design process units for heat transfer.

**Title**
Professional Commitment (BYU Course Objective)

**Tags**
212022, 0, 14

**Learning Outcome**
Students will be committed to safe and environmentally responsible engineering.

Students will have a practical understanding of the function and use of pumps and valves and be able to make design decisions accordingly.

Title
Shell and Tube Heat Exchanger Design (BYU Course Objective)

Tags
207677, 6

Learning Outcome
Students will be able to design shell & tube heat exchangers to meet specific needs.

Title
Safe Engineering Practice (BYU Course Objective)

Tags
207685, 8

Learning Outcome
Students will understand the need for safe engineering practices; demonstrate knowledge of pertinent safety laws and regulations; understand and have a basic knowledge of how safety considerations are incorporated into engineering design.

Title
Technical Presentations (BYU Course Objective)

Tags
207686, 9

Learning Outcome
Students will be able to give effective, well-organized oral presentations to a technical audience.

Title
Oral Reports (BYU Course Objective)

Tags
207687, 10

Learning Outcome
Students will be able to write effective, well-organized reports.

Learning Outcome
Students will be able to acquire and apply new knowledge as needed, using appropriate learning strategies.

Title
Process Simulator (BYU Course Objective)

Tags
179504, 5

Learning Outcome
Students will be able to use commercial process simulation software (e.g. Chemcad, HYSYS, Aspen, etc).

Title
Material Balances (BYU Course Objective)

179505, 13

Learning Outcome
Students will be able to set up and solve steady state material balances.

Title
Energy Balances (BYU Course Objective)

Tags
179506, 14

Learning Outcome
Students will be able to set up and solve steady state energy balances.

Title
Thermodynamics of Mixtures (BYU Course Objective)

Tags
179507, 15

Learning Outcome
Students will understand the fundamental concepts of solution thermodynamics including chemical potential, fugacity, activity, partial molar properties, ideal solutions, and excess properties.

Title
Phase Diagrams (BYU Course Objective)

Tags
179508, 16

Learning Outcome
Students will be able to read and understand phase diagrams and use these to determine physical phenomena.

**Title**
Process Variables (BYU Course Objective)

**Tags**
207689, 12

**Learning Outcome**
Students will understand process variables (e.g., P, T, flow rate, conc.) including procedures and equipment for their measurement.

**Title**
Process Control System (BYU Course Objective)

**Tags**
207690, 13

**Learning Outcome**
Students will be able to operate a process control system and understand the components of such a system.

**Title**
Process Equipment (BYU Course Objective)

**Tags**
207691, 14

**Learning Outcome**
Students will be able to explain and operate real process equipment.

**Title**
Engineering Statistics (BYU Course Objective)

**Tags**
207692, 15

**Learning Outcome**
Students will understand basic engineering statistics.

**Title**
Pumps, Turbines, Compressors (BYU Course Objective)

**Tags**
207678, 0, 7

**Learning Outcome**
Students will be able to perform design calculations for pumps, turbines, and/or compressors (e.g., involving $\Delta H$, $\Delta S$, work, heat, efficiencies).

**Title**
Codes of Ethics (BYU Course Objective)

**Tags**
207688, 0, 11

**Learning Outcome**
Students will understand and commit to practice the AIChE code of ethics.

**Title**
Dimensionless Numbers (BYU Course Objective)

**Tags**
179510, 4

**Learning Outcome**
Students will be able to describe the physical significance behind dimensionless numbers and how these relate to system behavior.

**Title**
Flash Calculations (BYU Course Objective)

**Tags**
179511, 8

**Learning Outcome**
Students will be able to set up and solve single-stage flash calculations.

**Title**
Tray-type Columns (BYU Course Objective)

**Tags**
179512, 9

**Learning Outcome**
Students will be able to design tray-type columns (e.g., number of trays, tray efficiency, column height, column diameter, product specs) and packed columns (e.g., height of column, packing material, column diameter, flooding velocity).

**Title**
Liquid-Liquid Extraction (BYU Course Objective)

**Tags**
179513, 10

**Learning Outcome**
Students will be able to design systems for liquid-liquid extraction.

**Title**
Batch Distillation (BYU Course Objective)

**Tags**
179514, 11

**Learning Outcome**
Students will be able to solve binary batch distillation design problems with and without rectifying stages.

**Title**
Critical Thinking (BYU Course Objective)

**Tags**
179515, 6

**Learning Outcome**
Students will exhibit critical and

creative thinking skills for analysis and evaluation of problems and cause-effect relationships.

**Title**
Engineering Intuition (BYU Course Objective)

**Tags**
179516, 7

**Learning Outcome**
Students will be able to make order of magnitude estimates, assess reasonableness of solutions, and select appropriate levels of solution sophistication.

**Title**
Azeotropes (BYU Course Objective)

**Tags**
179571, 12

**Learning Outcome**
Students will be able to design separation processes involving systems that form azeotropes or are only partially miscible in each other.

**Title**
Molecular-level Understanding (BYU Course Objective)

**Tags**
179509, 0, 17

**Learning Outcome**
Students will be able to explain how molecular and continuum phenomena give rise to macroscopic behavior, processes, and properties.

**Course Title**
Nuclear Reactor Transient Modeling

**Course Description**
This course focuses on the thermal-hydraulic assessment of nuclear reactor design basis and beyond design basis transients using state-of-the-art computer code. Instruction will focus on both instruction in using this code and study of design basis accidents for both standard and advanced reactor concepts.
