PWS375 Aquatic Policies & Laws - Aquatic Policies & Laws 3.0

PWS385 Terrestrial Policies and Laws - Terrestrial Policies and Laws 3.0

SOC340 Soc of International Develpmnt- Sociology of International Development 3.0

Requirement 3 —Complete 3 hours

Elective Courses. A course taken on this list cannot be used to meet requirement 2. As the topics of 'R' courses are variable, students should approve the section topic of these courses with the program director before enrollment.

Internship or experiential learning credit that has environmental content can be used to meet this requirement with the approval of the Global Environmental Studies program director.

BIO430 Plant Classif. & Identif. - Plant Classif. & Identif. 4.0

BIO441 Entomology - Entomology 4.0

BIO450 Capstone in Biodiversity & Con - Capstone in Biodiversity & Con 3.0

BIO452 Marine Biology - Marine Biology 4.0

BIO455 Plant Ecology - Plant Ecology 3.0

BIO470 History&Philosophy of Biology-History and Philosophy of Biology 3.0

BIO550 Behavioral Ecology- Behavioral Ecology 3.0

BIO557 Stream & Wetland Ecology- Stream and Wetland Ecology 3.0

CCE102 Sustainable Infrastructure - Sustainable Infrastructure 3.0

CE451 Environmental Engineering Proc - Environmental Engineering Proc 3.0

CBE311 CBE - Health, Safety, Environ - CBE - Health, Safety, Envir 3.0

CBE433 Energy Engineering - Energy Engineering 3.0

ECON440 Natrl Resources & Envir Econ - Natrl Resources & Envir Econ 3.0

ENGL317R Writing Creative Nonfiction - Writing Creative Nonfiction - *You may take once* 3.0

GEOG212 Intro to GIS - Intro to GIS 3.0

GEOG304 Climate & Society - Climate & Society 3.0

GEOG306 Public Lands: Planning & Mgmt - Public Lands: Planning & Mgmt 3.0

GEOG423 Planning for Unique Lands - Planning for Unique Lands 2.0

GEOL411 Geomorphology - Geomorphology 3.0

GEOL435 Groundwater- Groundwater 3.0

GEOL550 Environmental Soil Chemistry - Environmental Soil Chemistry 3.0

IHUM490R Seminar in the Humanities - Seminar in the Humanities - *You may take once* 3.0

ME EN321 Thermodynamics - Thermodynamics 3.0

PHIL413R Environmental Ethics - Environmental Ethics - *You may take once* 3.0

PWS405 Environmental Chemistry Lab - Environmental Chemistry Lab 2.0

PWS419 Forest Measures, Manage & Ecol - Forest Measures, Manage & Ecol 3.0

PWS480 Environmental Capstone - Environmental Capstone 3.0

Requirement 4 —Complete 3 hours

Capstone. Prior to taking this course, students are recommended to take at least one 300-level course or higher among the options in requirement 2 or 3.

GES490 Global Enviro Studies Capstone - Global Enviro Studies Capstone 3.0

American Studies (Minor)

Program Information

Minimum Credit Hours
17

Maximum Credit Hours

Program Requirements

Minors should begin course work by taking Am St 303 fall semester. Course substitutions may only be made with written, prior permission of the American Studies coordinator. Courses do not double count between the different requirement sections within the minor.

Requirement 1 — Complete 1 Course

AM ST303 Intro American Studies - Intro American Studies 3.0

Requirement 2 — Complete 1 of 3 Options

Option 2.1 — Complete 2 Requirements

Religious Lives, Liberties, & Histories Track

ENGL 357R, ENGL 388R, GWS 337R, and HIST 390R, must focus, to some degree, on religious life, liberties, and histories of the United States.

Option 2.1.1 — Complete 2 hours

REL C351 World Religions - World Religions 2.0

Option 2.1.2 — Complete 12 hours

Option 2.1.2.1 — Complete up to 12 hours

AM ST390R Topics in American Studies - Topics in American Studies - *You may take once* 3.0

AM ST392R Lecture Series - Lecture Series - *You may take 3 times* 1.0

COMMS482 Religion, Media, and Society - Media and World Religions 3.0

ENGL268 Literature of the LDS - Literature of the LDS 3.0

ENGL357R Literature, Ethics, and Values - Literature, Ethics, and Values - *You may take once* 3.0

ENGL368 Lit of the Latter-day Saints - Lit of the Latter-day Saints 3.0

ENGL388R American Lit before 1800 - American Lit before 1800 - *You may take once* 3.0

FHSS351 Faith, Culture, Ldrship Sem - Civil Rights Seminar 3.0

GWS332 History Latter-day Saint Women - History Latter-day Saint Women 3.0

GWS337R LDS Women Cultural Producers - LDS Women Cultural Producers - *You may take once* 3.0

HIST218 Fam & Law in Amer Hist - Fam & Law in Amer Hist 3.0

HIST364 Utah - Utah 3.0

HIST371 Revolutionary Amer - Revolutionary Amer 3.0

HIST379 US Religious History to 1860 - US Religious History to 1860 3.0

HIST380 US Religious Hist Since 1860 - US Religious Hist Since 1860 3.0

HIST382 Mormonism Am Exper - Mormonism Am Exper 3.0

HIST389 Mormonism Amg Chrstn Theol - Mormonism Amg Chrstn Theol 3.0

HIST390R Special Topics - Special Topics - *You may take once* 0.5v

HIST392 US Constitutnl His - US Constitutnl His 3.0

POLI336 Religion and Politics - Religion and Politics 3.0

PSYCH353 Restored Gospel and Psychology - Restored Gospel and Psychology 3.0

PSYCH354 Psychology of Religion - Psychology of Religion 3.0

SFL345 Family Life in World Religions - Family Life in World Religions 3.0

SOC361 Theoretical Foundations Family - Theoretical Foundations Family 3.0

Option 2.1.2.2 — Complete up to 4 hours

REL A336 Book of Mormon as Sacred Lit - Book of Mormon as Sacred Lit 2.0

REL C341 JS & Restoration 1805-1845 - JS & Restoration 1805-1845 2.0

REL C342 Pioneers, Conflict, and Growth - Pioneers, Conflict, and Growth 2.0

REL C343 Modern Church 1900-Present - Modern Church 1900-Present 2.0

REL C352 Survey of Christianity - Survey of Christianity 2.0

REL C353 American Christianity - American Christianity 2.0

Option 2.2 — Complete 14 hours

Constitution & Democracy in the World Track

ENGL 327R, HIST 390R, POLI 319R, and POLI 359R must focus, to some degree, on the US constitution, systems of governance, and/or its democratic ideals

Option 2.2.1 — Complete up to 6 hours

HIST218 Fam & Law in Amer Hist - Fam & Law in Amer Hist 3.0

HIST293 WW II in History & Memory - WW II in History & Memory 3.0

HIST366 Slavery in Africa & Atlantic - Slavery in Africa & Atlantic 3.0

HIST370 Early America - Early America 3.0

HIST374 US Hist, 1890-1945 - US Hist, 1890-1945 3.0

HIST376 US Hist, 1945-2000 - US Hist, 1945-2000 3.0

HIST390R Special Topics - Special Topics - *You may take once* 0.5v

HIST392 US Constitutnl His - US Constitutnl His 3.0

HIST393 US Foreign Relations - US Foreign Relations 3.0

HIST398 American Capitalism - American Capitalism 3.0

Option 2.2.2 — Complete up to 6 hours

POLI311 State Government and Politics - State Government and Politics 3.0

POLI312 American Judicial Politics - American Judicial Politics 3.0

POLI314 U S Presidency - U S Presidency 3.0

POLI315 Congress & Legislative Process - Congress & Legislative Process 3.0

Nursing (BS) *

Program Information

Minimum Credit Hours
87

Maximum Credit Hours
87

Major Academic Plan
MAPS - BS in Nursing 2026-2027.docx

Learning Outcomes

Title
1. Integration of Gospel Values

Learning Outcome
Integrate the principles of the Gospel of Jesus Christ as part of clinical judgment; caring holistically for diverse individuals, families, communities, and populations; personal health and well-being; and life-long learning.

Title
2. Liberal Education

Learning Outcome
Acquire liberal education that provides the cornerstone for the practice and education of baccalaureate prepared nurses.

Title
3. Baccalaureate Generalist Nursing Practice

Learning Outcome
Provide nursing care to patients, including individuals, families, communities, and populations across the lifespan and across the continuum of healthcare environments. The baccalaureate graduate understands and addresses social determinants of health, health equity, and the increasing complexity of healthcare to advocate and optimize care for all patients.

Title
4. Professionalism

Learning Outcome
Exemplify and advocate for the nursing profession using the values of faith in Christ, excellence, accountability, belonging, and Christlike service.

Title
5. Interprofessional Communication and Collaboration:

Learning Outcome
Communicate and collaborate among interdisciplinary healthcare professionals and community partners to foster team respect and trust, and deliver high quality patient-centered and population-based care.

Title
6. Information Management and Technology

Learning Outcome
Demonstrate clinical judgment, knowledge and skills in data management and patient care technology to guide quality patient-centered care.

Title
7. Quality of Nursing Care Delivery, Patient Safety, and the Health Care System:

Learning Outcome
Exhibit clinical judgment, knowledge and skills in leadership, quality improvement, and patient safety necessary to provide high-quality patient-centered and population-based health care.

Title
8. Scholarship for Evidence-Based Practice:

Learning Outcome
Provide patient-centered and population-based care grounded in the translation of current evidence into nursing practice and reflective of sound clinical judgment linking theory, practice, and research.

Title
9. Clinical Prevention and Population Health

Learning Outcome
Advocate for social justice, health promotion, and disease prevention across the lifespan for diverse individuals, families, communities, and populations to improve population health at all levels of healthcare.

Title
10. Health Care Policy, Finance and Regulatory Environments

Learning Outcome
Evaluate how healthcare policies, including financial and regulatory, directly and indirectly influence the nature and functioning of the healthcare system and thereby are important considerations in social determinants of health and professional nursing practice.

Program Requirements

Licensure: This program meets the educational requirements designed to lead to an occupationally required professional license or certificate in the state of Utah. Students pursuing occupations requiring a license or certificate in a state other than Utah should contact the Nursing academic Advisement Center as well as the licensing agency in the state where they intend to work to seek information and guidance regarding licensure and certification requirements.

A "C" grade or higher must be maintained in all required courses.

Requirement 1 —Complete 2 Requirements

Prerequisite courses:

Requirement 1.1 —Complete 3 Courses

CHEM285 Intro Bio-organic Chemistry - Intro Bio-organic Chemistry 4.0

CELL305 Human Physiology - Human Physiology 4.0

MMBIO221 General Microbiology - General Microbiology 3.0

Note: Chem 101 or an acceptable score on the Chemistry Placement Exam is recommended prior to taking Chem 285 if the student has not completed previous chemistry course work.

Requirement 1.2 —Complete 1 of 2 Courses

CELL210 Human Anatomy (w/ virtual lab) - Human Anatomy (w/ virtual lab) 3.0

CELL220 Human Anatomy (with lab) - Human Anatomy (with lab) 4.0

Requirement 2 —Complete 1 Course

NDFS100 Essentials of Human Nutrition - Essentials of Human Nutrition 3.0

Requirement 3 —Complete 29 Courses

NURS288 Nursing Skills I - Nursing Skills I 1.0

NURS290 Think Like a Nurse - Think Like a Nurse 1.5

NURS292 Cl Prac Nurs Fundamentals - Cl Prac Nurs Fundamentals 1.5

NURS294 Hlth Assessment & Promotion - Hlth Assessment & Promotion 2.0

NURS295 Fund Nurs - Fund Nurs 2.0

NURS296 Population Health Nursing - Introduction to Population Health Nursing 2.0

NURS298 Nursing Skills II - Nursing Skills II 1.0

NURS300 Applied Pharm in Nursing - Pharmacology in Nursing 3.0

NURS301 Applied Patho in Nursing - Applied Patho in Nursing 3.0

NURS320 EBP & Informatics - EBP & Informatics 3.0

NURS341 Acute & Chronic Illness - Acute & Chronic Illness 3.0

NURS342 Cl Prac Acute/Chronic Illness - Cl Prac Acute/Chronic Illness 2.5

NURS348 Nursing Skills III - Nursing Skills III 1.0

NURS351 Nurs Care of Women - Nurs Care of Women 2.0

NURS352 Cl Prac Women across Lifespan - Cl Prac Women across Lifespan 2.0

NURS361 Nurs Care of Children - Nurs Care of Children & Fam 2.0

NURS362 Cl Prac Children - Cl Prac Children 1.0

NURS371 Nsg Care Older Adults - Nsg Care Older Adults 2.0

NURS372 Clin Prac Chronic Disease - Clin Prac Chronic Disease 2.0

NURS378 Nursing Skills IV - Nursing Skills IV 1.0

NURS403 Global and Population Hlth Nsg - Global and Population Hlth Nsg 3.0

NURS449 Ethics in Nursing - Ethics in Nursing 3.0

NURS461 Psych/Mental Hlth Nursing - Psych/Mental Hlth Nursing 2.5

NURS471 Nurs Care of Adults in Crisis - Nurs Care of Adults in Crisis 3.0

NURS472 Cl Prac Adults in Crisis - Cl Prac Adults in Crisis 2.5

NURS478 Nursing Skills V - Nursing Skills V 0.5

NURS491 Leadership & Health Policy - Nursing Capstone 2.0

NURS492 Cl Prac Capstone Nurs - Cl Prac Capstone Nurs 5.0

Requirement 4 —Complete 4 hours

Complete a minimum of 4 credit hours

NURS404 Cl Prac Glob & Pop Hlth Nurs - Cl Prac Publ & Glob Hlth Nurs 4.0v

School Health Education (Minor)

Program Information

Minimum Credit Hours	Maximum Credit Hours
25	25

Program Requirements

Licensure: This program meets the educational requirements designed to lead to an occupationally required professional license or certificate in the state of Utah. Students pursuing occupations requiring a license or certificate in a state other than Utah should contact the appropriate BYU academic advisement center as well as the licensing agency in the state where they intend to work to seek information and guidance regarding licensure and certification requirements.

This minor is designed to prepare students to teach in public schools. A teaching minor may only be received by students graduating with a teaching major. In order to graduate with this minor, students are required to complete Utah State Office of Education licensing requirements. To view these requirements go to https://www.schools.utah.gov/curr/licensing or contact the Education Advisement Center, 350 MCKB, 801-422-3426.

For students accepted into the major after December 16, 2019, grades below C in any required coursework in a teaching major or teaching minor will not be accepted. Teacher candidates must maintain a cumulative GPA of 2.7 or higher once admitted into the program and to qualify for student teaching. For additional details on admission and retention requirements for teaching majors and teaching minors, see Educator Preparation Program Requirements in the Undergraduate Catalog.

Requirement 1 — Complete 7 Courses

HLTH314 Hlth, Disease & Determinants 1 - Hlth, Disease & Determinants 1 3.0

HLTH381 Methods & Curriculum A - Methods & Curriculum A 3.0

HLTH382 Methods & Curriculum B - Methods & Curriculum B 3.0

HLTH383 Mind/Body Health - Mind/Body Health 3.0

HLTH436 Sexual and Reproductive Health - Sexual and Reproductive Health 3.0

HLTH460 Substance Use Disorders - Substance Use Disorders 3.0

NDFS100 Essentials of Human Nutrition - Essentials of Human Nutrition 3.0

Requirement 2 — Complete 1 Course

HLTH477R Sec Minor Student Teaching - Sec Minor Student Teaching - *You may take once* 4.0

Be certified in CPR. Students desiring to take a traditional first aid course including CPR training may enroll in Hlth 320.

Public Health (BS): Environmental/ Occupational Health Emphasis

Program Information

Minimum Credit Hours
58

Maximum Credit Hours
58

Major Academic Plan
MAPS - BS in Public Health Environmental-Occupational Health 2026-2027.docx

Learning Outcomes

Title
Environmental/Occupational Hazards Assessment

Learning Outcome
Assess the various biological chemical and physical hazards of the ambient indoor and work environment that can adversely affect human health.

Title
Environmental/Occupational Health Interventions

Learning Outcome
Anticipate recognize evaluate and control environmental and occupational hazards.

Title
Environmental/Occupational Moral Code and Ethics

Learning Outcome
Apply moral and ethical principles as they apply to the science of Environmental/Occupational theory and practice.

Program Requirements

Requirement 1 —Complete 11 Courses

HLTH100 Intro to Public Health - Intro to Public Health 1.0

HLTH312 Intro to Plan, Interv, Eval - Intro to Plan, Interv, Eval 3.0

HLTH420 Injury & Violence Prevention - Injury & Violence Prevention 3.0

HLTH422 Disaster Response & Emer Prep - Disaster Response & Emer Prep 3.0

HLTH456 Families and Public Health - Families and Public Health 3.0

HLTH480 International Health - International Health 3.0

HLTH482 Medical Geography - Medical Geography 3.0

HLTH492R Directed Pub Hlth Readings - Directed Pub Hlth Readings - *You may take up to 3.0 credit hours* 1.0v

MMBIO121 Gen Biology: Health & Disease - Gen Biology: Health & Disease 3.0

MMBIO261 Infection & Immunity - Infection & Immunity 3.0

MMBIO418 Medical Parasitology - Medical Parasitology 2.0

MMBIO465 Virology - Virology 3.0

NDFS361 Food Microbiology - Food Microbiology 3.0

PWS150 Environmental Biology - Environmental Biology 3.0

Recommended Courses are not required to complete the program

WRTG315 Writing in the Social Sciences - Writing in the Social Sciences 3.0

WRTG316 Technical Communication - Technical Communication 3.0

Public Health (BS): Epidemiology Emphasis

Program Information

Minimum Credit Hours
58

Maximum Credit Hours
59

Major Academic Plan
MAPS - BS in Public Health Epidemiology 2026-2027.docx

Learning Outcomes

Title
Select meaningful research goals

Learning Outcome
Deliberately choose epidemiologic research projects that add value to human knowledge and support human well-being.

Title
Design epidemiologic studies

Learning Outcome
Design epidemiologic studies that are methodologically strong and ethically sound in participant selection, measurement, data curation, statistical analysis, and stewardship of resources.

Title
Analyze quantitative data and report findings

Learning Outcome
Apply rigorous statistical methods to epidemiologic data and report numerical findings to suitable audiences in tables, graphs, and text, honestly and responsibly without disortion or misrepresentation.

Title
Draw conclusions that support action

Learning Outcome
Communicate conclusions and implications of epidemiologic findings to support policy decisions that will advance human well-being, consistent with a commitment to serving and uplifting all people.

Title
Use gospel principles to understand disease

Learning Outcome
Analyze aspects of human disease such as prevalence, causes, treatments, prevention, and experiences of individuals and families through a lens of gospel principles such as faith, charity, humility, patience, and compassion.

Program Requirements

Requirement 1 —Complete 12 Courses

Note: Prior to taking HLTH 493, the student must complete HLTH 100, 313, 314, 315, 345, 440, 447, 449.

HLTH100 Intro to Public Health - Intro to Public Health 1.0

HLTH312 Intro to Plan, Interv, Eval - Intro to Plan, Interv, Eval 3.0

HLTH313 Intro to Data Coll & Analysis - Intro to Data Coll & Analysis 3.0

HLTH314 Hlth, Disease & Determinants 1 - Hlth, Disease & Determinants 1 3.0

HLTH315 Hlth, Disease & Determinants 2 - Hlth, Disease & Determinants 2 3.0

HLTH316 Health Systems and Policy - Health Systems and Policy 3.0

HLTH345 Principles of Epidemiology - Principles of Epidemiology 3.0

HLTH440 Statistical Computing in Epi - Statistical Computing in Epi 3.0

HLTH447 Introduction to Biostatistics - Introduction to Biostatistics 3.0

HLTH449 Epi Study Design and Analysis - Epi Study Design and Analysis 3.0

HLTH493 Epidemiology Capstone - Epidemiology Capstone 3.0

STAT121 Intro to Stat Data Analysis - Intro to Stat Data Analysis 3.0

Requirement 2 — Complete 1 of 3 Options

Option 2.1 — Complete 3 hours

HLTH101 Health and the Human Body - Health and the Human Body 3.0

Option 2.2 — Complete 6 hours

CELL210 Human Anatomy (w/ virtual lab) - Human Anatomy (w/ virtual lab) 3.0

MMBIO221 General Microbiology - General Microbiology 3.0

Option 2.3 — Complete 7 hours

CELL220 Human Anatomy (with lab) - Human Anatomy (with lab) 4.0

MMBIO221 General Microbiology - General Microbiology 3.0

Requirement 3 —Complete 3 hours

Applied Learning Experience

HLTH196R Public Health Practicum - Public Health Practicum - *You may take up to 3.0 credit hours* 0.5

HLTH199R Global Health Experiences - Global Health Experiences - *You may take up to 3.0 credits* 0.5v

HLTH391R Mentored Teaching in Pub Hlth - Mentored Teaching in Pub Hlth - *You may take up to 3.0 credit hours* 0.5

HLTH396R Campus Engagement - Campus Engagement - *You may take up to 3.0 credits* 0.5v

HLTH481 Applied International Health - Applied International Health - *You may take up to 3.0 credits* 1.0v

HLTH491R Mentored Research - Mentored Research - *You may take up to 3.0 credits* 0.5v

HLTH496R Academic Internship: Hlth Prom - Academic Internship: EH/OH - *You may take up to 3.0 credits* 0.5v

Requirement 4 — Complete 6 hours

HLTH322 Environmental Health - Environmental Health 3.0

HLTH324 Occupational Health & Safety - Occupational Health & Safety 3.0

HLTH420 Injury & Violence Prevention - Injury & Violence Prevention 3.0

HLTH422 Disaster Response & Emer Prep - Disaster Response & Emer Prep 3.0

HLTH426 Environmental Toxicology - Environmental Toxicology 3.0

HLTH436 Sexual and Reproductive Health - Sexual and Reproductive Health 3.0

HLTH450 Women's Health - Women's Health 3.0

HLTH456 Families and Public Health - Families and Public Health 3.0

HLTH460 Substance Use Disorders - Substance Use Disorders 3.0

HLTH461 Population Mental Health - Population Mental Health 3.0

HLTH466 Hlth & the Aging Process - Hlth & the Aging Process 3.0

HLTH480 International Health - International Health 3.0

NDFS201 Society Nutr Chronic Disease - Society Nutr Chronic Disease 3.0

NDFS380 International Nutrition - International Nutrition 3.0

Requirement 5 —Complete 12 hours

BIO264 Stat Analysis for Biologists - Stat Analysis for Biologists 4.0

HLTH199R Global Health Experiences - Global health Experirences - *You may take up to 3.0 credit hours* 0.5v

HLTH416 Clinical Data Sys in Pub Hlth - Clinical Data Sys in Pub Hlth 3.0

HLTH434 Public Health Eval & Analytics - Public Health Eval & Analytics 3.0

HLTH482 Medical Geography - Medical Geography 3.0

HLTH492R Directed Pub Hlth Readings - Directed Pub Hlth Readings - *You may take up to 3.0 credit hours* 1.0v

MATH112 Calculus 1 - Calculus 1 4.0

MATH113 Calculus 2 - Calculus 2 4.0

MATH116 Essentials of Calculus - Essentials of Calculus 1.0

MATH213 Elementary Linear Algebra - Elementary Linear Algebra 2.0

MATH215 Computational Linear Algebra - Computational Linear Algebra 1.0

SOC300 Methods of Research in Soc - Methods of Research in Soc 3.0

STAT124 SAS Base Programming Skills - SAS Base Programming Skills 1.5

STAT230 Statistical Modeling 1 - Statistical Modeling 1 3.0

STAT234 Methods of Survey Sampling - Methods of Survey Sampling 3.0

STAT240 Probability and Inference 1 - Probability and Inference 1 3.0

STAT330 Statistical Modeling 2 - Statistical Modeling 2 3.0

Recommended Courses are not required to complete the program

WRTG315 Writing in the Social Sciences - Writing in the Social Sciences 3.0

WRTG316 Technical Communication - Technical Communication 3.0

Math 112, 113 are recommended for students who want a firm foundation in calculus and/or plan to pursue graduate education.

Public Health (BS): Health Promotion Emphasis

Program Information

Minimum Credit Hours
58

Maximum Credit Hours
59

Major Academic Plan
MAPS - BS in Public Health Health Promotion 2026-2027.docx

Learning Outcomes

Title
Assess Needs

Learning Outcome
Conduct an assessment of community needs, assets, and health problems with integrity and compassion.

Title
Plan Programs

Learning Outcome
Design goals, objectives and interventions based on assessment data.

Title
Implement Interventions

Learning Outcome
Implement effective interventions that improve health and well-being of communities, families, and individuals.

Title
Research and Evaluation

Learning Outcome
Design ethical evaluations of health promotion interventions using appropriate research methods.

Title
Christ-centered Discipleship

Learning Outcome
Demonstrate Christ-centered principles in health promotion practice.

Program Requirements

Requirement 1 — Complete 12 Courses

HLTH100 Intro to Public Health - Intro to Public Health 1.0

HLTH312 Intro to Plan, Interv, Eval - Intro to Plan, Interv, Eval 3.0

HLTH313 Intro to Data Coll & Analysis - Intro to Data Coll & Analysis 3.0

HLTH314 Hlth, Disease & Determinants 1 - Hlth, Disease & Determinants 1 3.0

HLTH315 Hlth, Disease & Determinants 2 - Hlth, Disease & Determinants 2 3.0

HLTH316 Health Systems and Policy - Health Systems and Policy 3.0

HLTH330 Health Promotion - Health Promotion 3.0

HLTH335 Health Behavior Change - Health Behavior Change 3.0

HLTH431 Hlth Comm and Advocacy - Hlth Comm and Advocacy 3.0

HLTH434 Public Health Eval & Analytics - Public Health Eval & Analytics 3.0

HLTH494 Program Planning Capstone - Program Planning Capstone 3.0

STAT121 Intro to Stat Data Analysis - Intro to Stat Data Analysis 3.0

Requirement 2 —Complete 1 of 3 Options

Option 2.1 — Complete 3 hours

HLTH101 Health and the Human Body - Health and the Human Body 3.0

Option 2.2 — Complete 6 hours

CELL210 Human Anatomy (w/ virtual lab) - Human Anatomy (w/ virtual lab) 3.0

MMBIO221 General Microbiology - General Microbiology 3.0

Option 2.3 — Complete 7 hours

CELL220 Human Anatomy (with lab) - Human Anatomy (with lab) 4.0

MMBIO221 General Microbiology - General Microbiology 3.0

Requirement 3 —Complete 3 hours

Applied Learning Experience

HLTH196R Public Health Practicum - Public Health Practicum - *You may take up to 3.0 credit hours* 0.5

HLTH199R Global Health Experiences - Global Health Experiences - *You may take up to 3.0 credits* 0.5v

HLTH391R Mentored Teaching in Pub Hlth - Mentored Teaching in Pub Hlth - *You may take up to 3.0 credit hours* 0.5

HLTH396R Campus Engagement - Campus Engagement - *You may take up to 3.0 credits* 0.5v

HLTH481 Applied International Health - Applied International Health *You may take up to 3.0 credits* 1.0v

HLTH491R Mentored Research - Mentored Research - *You may take up to 3.0 credits* 0.5v

HLTH496R Academic Internship: Hlth Prom - Academic Internship: Hlth Prom - *You may take up to 3.0 credits* 0.5v

Requirement 4 — Complete 1 of 6 Options

Option 4.1 — Complete 15 hours

GCI300 Social Impact - Social Impact 3.0

GCI430R Ballard Brief - Ballard Brief 3.0

HLTH403R Special Topics - Special Topics - *You may take up to 3.0 credit hours* 0.5v

HLTH413 Refugee & Migrant Health - Refugee & Migrant Health 3.0

HLTH422 Disaster Response & Emer Prep - Disaster Response & Emer Prep 3.0

HLTH450 Women's Health - Women's Health 3.0

HLTH456 Families and Public Health - Families and Public Health 3.0

HLTH461 Population Mental Health - Population Mental Health 3.0

HLTH480 International Health - International Health 3.0

HLTH482 Medical Geography - Medical Geography 3.0

HLTH492R Directed Pub Hlth Readings - Directed Pub Hlth Readings - *You may take up to 3.0 credit hours* 1.0v

IAS220 Intro Devel Stu - Intro Devel Stu 3.0

NDFS380 International Nutrition - International Nutrition 3.0

SOC345 World Populations - World Populations 3.0

Option 4.2 — Complete 15 hours

GES200 Intro to Global Enviro Studies - Intro to Global Enviro Studies 3.0

HIST290 Nature & History - Nature & History 3.0

HLTH322 Environmental Health - Environmental Health 3.0

HLTH324 Occupational Health & Safety - Occupational Health & Safety 3.0

HLTH403R Special Topics - Special Topics - *You may take up to 3.0 credit hours* 0.5v

HLTH426 Environmental Toxicology - Environmental Toxicology 3.0

HLTH428 Occupational Exposure Lab - Occupational Exposure Lab 3.0

HLTH429 Air Quality Assessment Lab - Air Quality Assessment Lab 3.0

HLTH492R Directed Pub Hlth Readings - Directed Pub Hlth Readings - *You may take up to 3.0 credit hours* 1.0v

PWS150 Environmental Biology - Environmental Biology 3.0

PWS180 Global Climate Change - Global Climate Change 3.0

Option 4.3 — Complete 15 hours

HLTH345 Principles of Epidemiology - Principles of Epidemiology 3.0

HLTH403R Special Topics - Special Topics - *You may take up to 3.0 credit hours* 0.5v

HLTH416 Clinical Data Sys in Pub Hlth - Clinical Data Sys in Pub Hlth 3.0

HLTH440 Statistical Computing in Epi - Statistical Computing in Epi 3.0

HLTH447 Introduction to Biostatistics - Introduction to Biostatistics 3.0

HLTH449 Epi Study Design and Analysis - Epi Study Design and Analysis 3.0

HLTH492R Directed Pub Hlth Readings - Directed Pub Hlth Readings - *You may take up to 3.0 credit hours* 1.0v

Option 4.4 — Complete 15 hours

COMMS235 Intro PR + AD - Intro PR + AD 3.0

DIGHT230 Intro to Print Publishing - Intro to Print Publishing 3.0

DIGHT250 Web Publishing - Web Publishing 3.0

HLTH403R Special Topics - Special Topics - *You may take up to 3.0 credit hours* 0.5v

HLTH492R Directed Pub Hlth Readings - Directed Pub Hlth Readings - *You may take up to 3.0 credit hours* 1.0v

MKTG201 Marketing Management - Marketing Management 3.0

Option 4.5 — Complete 15 hours

ACC200 Principles of Accounting - Principles of Accounting 3.0

HL288 Intro to Healthcare Leadership - Intro to Healthcare Leadership 3.0

HL 289R - Healthcare Leadership Lectures - *You may take once* 1.0

HL382 Delivering Value in Healthcare - Delivering Value in Healthcare 3.0

HL383 Healthcare Law and Ethics - Healthcare Law and Ethics 3.0

HL385R Healthcare Research Hub - Healthcare Research - *You may take once* 3.0

Major Academic Plan
MAPS - BS in Public Health Health Science 2026-2027.docx

Learning Outcomes

Title
Cultural Humility & Vulnerable Populations

Learning Outcome
Recognize each person's inherent value as a divine child of God by integrating faith, cultural humility, and compassionate communication in the delivery of equitable public health interventions and patient-centered care, especially for vulnerable and marginalized populations.

Title
Upstream Approach to Health

Learning Outcome
Analyze an upstream team approach to health by identifying and evaluating points where public health and primary care can integrate, highlighting opportunities for interdisciplinary collaboration to reduce inequities in access, quality, and delivery of care.

Title
Clinical Data Methods

Learning Outcome
Apply statistical methods to manage, analyze, and interpret clinical data from health systems to make inferences about population health in public health and primary care contexts.

Program Requirements

Requirement 1 —Complete 10 Courses

Note 1: Prior to taking HLTH 495, the student must complete HLTH 100, 312, 313, 314, 315, and 316. This class may be taken concurrently with HLTH 425 and HLTH 447.

HLTH100 Intro to Public Health - Intro to Public Health 1.0

HLTH312 Intro to Plan, Interv, Eval - Intro to Plan, Interv, Eval 3.0

HLTH313 Intro to Data Coll & Analysis - Intro to Data Coll & Analysis 3.0

HLTH314 Hlth, Disease & Determinants 1 - Hlth, Disease & Determinants 1 3.0

HLTH315 Hlth, Disease & Determinants 2 - Hlth, Disease & Determinants 2 3.0

HLTH316 Health Systems and Policy - Health Systems and Policy 3.0

HLTH416 Clinical Data Sys in Pub Hlth - Clinical Data Sys in Pub Hlth 3.0

HLTH425 Vulnerable & Diverse Poplns - Vulnerable & Diverse Poplns 3.0

HLTH447 Introduction to Biostatistics - Introduction to Biostatistics 3.0

HLTH495 Public Health & Primary Care - Public Health & Primary Care 3.0

Requirement 2 — Complete 3 hours

Applied Learning Experience

HLTH196R Public Health Practicum - Public Health Practicum - *You may take up to 3.0 credit hours* 0.5

HLTH199R Global Health Experiences - Global Health Experiences - *You may take up to 3.0 credit hours* 0.5v

HLTH391R Mentored Teaching in Pub Hlth - Mentored Teaching in Pub Hlth - *You may take up to 3.0 credit hours* 0.5

Major Academic Plan
MAPS - BS in Physical Education Tchg-Coaching K-12 2026-2027.docx

Learning Outcomes

Title
1. Skill and Fitness Based Competence

Learning Outcome
Physical education teacher candidates are physically educated individuals with the knowledge and skills necessary to demonstrate competent movement performance and health enhancing fitness as delineated in the NASPE K-12 Standards.

Title
2. Learner Development

Learning Outcome
The candidate understands cognitive linguistic social emotional and physical areas of student development.

Title
3. Learning Differences

Learning Outcome
The candidate understands individual learner differences and cultural and linguistic diversity.

Title
4. Learning Environments

Learning Outcome
The candidate works with learners to create environments that support individual and collaborative learning positive social interaction active engagement in learning and self-motivation.

Title
5. Content Knowledge

Learning Outcome
The candidate understands the central concepts tools of inquiry and structures of the discipline.

Title
6. Assessment

Learning Outcome
The candidate uses multiple methods of assessment to engage learners in their own growth monitor learner progress guide planning and instruction and determine whether the outcomes described in content standards have been met.

Title
7. Instructional Planning

Learning Outcome
The candidate plans instruction to support students in meeting rigorous learning goals by drawing upon knowledge of content areas Utah Core Standards instructional best practices and the community context.

Title
8. Instructional Strategies

Learning Outcome
The candidate uses various instructional strategies to ensure that all learners develop a deep understanding of content areas and their connections and build skills to apply and extend knowledge in meaningful ways.

Title
9. Reflection and Continuous Growth

Learning Outcome
The candidate is a reflective practitioner who uses evidence to continually evaluate and adapt practice to meet the needs of each learner.

Title
10. Leadership and Collaboration

Learning Outcome
The candidate is a leader who engages collaboratively with learners families colleagues and community members to build a shared vision and supportive professional culture focused on student growth and success.

Title
11. Professional and Ethical Behavior

Learning Outcome
The candidate demonstrates the highest standard of legal moral and ethical conduct as specified in Utah State Board Rule R277-515.

Program Requirements

Licensure: This program meets the educational requirements designed to lead to an occupationally required professional license or certificate in the state of Utah. Students pursuing occupations requiring a license or certificate in a state other than Utah should contact the appropriate BYU academic advisement center as well as the licensing agency in the state where they intend to work to seek information and guidance regarding licensure and certification requirements.

This major is designed to prepare students to teach in public schools. In order to graduate with this major, students are required to complete Utah State Office of Education licensing requirements. To review these requirements, contact the Education Advisement Center, 175 MCKB, 801-422-3426.

Students who are interested in the program should meet with the Physical Education Teaching Education program director (249-E SFH) and Education Student Services (175 MCKB) in September of their sophomore year. Then they must complete an online application (found at http://educator.byu.edu). Applications for the Physical Education Teaching Education program are due February 15 for Fall semester.

A teaching minor is not required for licensure. However, it is strongly recommended (approximately 16-30 hours).

For students accepted into the major after May 2020, grades below C in any required coursework in a teaching major or teaching minor will not be accepted. Teacher candidates must maintain a cumulative GPA of 2.7 or higher once admitted into the program and to qualify for student teaching. For additional details on admission and retention requirements for teaching majors and teaching minors, see Educator Preparation Program Requirements in the Undergraduate Catalog.

Requirement 1 — Complete 3 Courses

Required prerequisite courses:

NDFS100 Essentials of Human Nutrition - Essentials of Human Nutrition 3.0

PETE227 Fitness for Life - Fitness for Life 1.0

SFL210 Human Development - Human Development 3.0

Requirement 2 — Complete 9 Courses

EXDM123 Intro Outdoor Rec Activities - Intro Outdoor Rec Activities 2.0

PETE230 K-12 Act Cont & Skls 1 - K-12 Act Cont & Skls 1 3.0

PETE231 K-12 Phys Act Cnt & Skls 2 - K-12 Phys Act Cnt & Skls 2 3.0

PETE302 Advoc for PE & Hlthy Act Life - Advoc for PE & Hlthy Act Life 3.0

PETE330R Coaching Selected Sports - Coaching Selected Sports - *You may take once* 2.0

PETE367 Scientific Fndns for PE Tchrs - Scientific Fndns for PE Tchrs 3.0

PETE399R Academic Internship: Coaching - Academic Internship: Coaching - *You may take once* 1.0v

PETE430 Principles of Coaching - Principles of Coaching 2.0

SWELL191 Weight Training - Weight Training, Beginning 0.5

Requirement 3 — Complete 1 of 8 Courses

SWELL107 Pilates - Pilates 0.5

SWELL108 Zumba - Zumba 0.5

SWELL109 Yoga - Yoga 0.5

SWELL110 Indoor Cycling - Indoor Cycling 0.5

SWELL141 Martial Arts - Martial Arts 0.5

SWELL155 Self-Defense - Self-Defense 0.5

SWELL171 Swimming, Beginning - Swimming, Beginning 0.5

SWELL172 Swimming, Intermediate - Swimming, Intermediate 0.5

Requirement 4 — Complete 2 Requirements

Professional Education Component:

Requirement 4.1 — Complete 8 Courses

CPSE402 Educ Stdnts w/Disablts in ScEd - Educ Stdnts w/Disablts in ScEd 2.0

IP&T371 Integrating K-12 Ed Tec 1 - Integrating K-12 Ed Tec 1 1.0

IP&T373 Tching K-12 Online/Blended Lrn - Tching K-12 Online/Blended Lrn 1.0

PETE274 Fund Skills &Tchg Methods-ElEd - Fund Skills &Tchg Methods-ElEd 3.0

PETE276R Exploration of Teaching - Exploration of Teaching - *You may take once* 3.0

PETE377 Secondary Practicum - Secondary Practicum 3.0

SC ED350 Adolescent Development - Adolescent Development 2.0

SC ED353 Multicultural Educ - Multicultural Educ 2.0

Note: FBI fingerprinting and background clearance must be completed prior to enrolling in PETE 276R.

Requirement 4.2 — Complete 12 hours

Note: Prior application is required.

PETE476R Student Teaching - Physical Ed - Student Teaching - Physical Ed - *You may take 2 times* 12.0

PETE496R Academic Internship--Phys Educ - Academic Internship--Phys Educ - *You may take once* 12.0

Note: PETE 399R must be completed before PETE 476R and PETE 496R.

Note: It is the student's responsibility to be sure that the Praxis test has been passed and that BYU has received the test scores and that their fingerprint background clearance is current and that state licensing fees have been paid prior to graduation. Students will also be responsible for any additional requirements imposed by the state prior to their graduation. To confirm the status of these requirements, contact the Education Advisement Center, 175 MCKB, 801-422-3426. Graduation and Utah licensure cannot be processed until these requirements have been completed.

Complete the PRAXIS II exam.

PE Teaching/Coaching (Minor)

Program Information

Minimum Credit Hours	Maximum Credit Hours
25.5	25.5

Program Requirements

This minor is designed to prepare students to teach in public schools. A teaching minor may only be received by students graduating with a teaching major. In order to graduate with this minor, students are required to complete Utah State Office of Education licensing requirements. To review these requirements, contact the Education Advisement Center, 175 MCKB, 801-422-3426.

For students accepted into the major after May 2020, grades below C in any required coursework in a teaching major or teaching minor will not be accepted. Teacher candidates must maintain a cumulative GPA of 2.7 or higher once admitted into the program and to qualify for student teaching. For additional details on admission and retention requirements for teaching majors and teaching minors, see Educator Preparation Program Requirements in the Undergraduate Catalog.

Requirement 1 — Complete 8 Courses

NDFS100 Essentials of Human Nutrition - Essentials of Human Nutrition 3.0

PETE227 Fitness for Life - Fitness for Life 1.0

PETE230 K-12 Act Cont & Skls 1 - K-12 Act Cont & Skls 1 3.0

PETE276R Exploration of Teaching - Exploration of Teaching - *You may take once* 3.0

PETE302 Advoc for PE & Hlthy Act Life - Advoc for PE & Healthy Life 3.0

PETE330R Coaching Selected Sports - Coaching Selected Sports - *You may take once* 2.0

PETE367 Scientific Fndns for PE Tchrs - Principles of Coaching 2.0

PETE430 Principles of Coaching - Principles of Coaching 2.0

Requirement 2 — Complete 0.5 hours

SWELL108 Zumba - Zumba 0.5

SWELL109 Yoga - Yoga 0.5

SWELL110 Indoor Cycling - Indoor Cycling 0.5

SWELL111 Basketball, Beginning - Basketball, Beginning 0.5

SWELL131 Golf, Beginning - Golf, Beginning 0.5

SWELL141 Martial Arts - Martial Arts 0.5

SWELL171 Swimming, Beginning - Swimming, Beginning 0.5

SWELL186 Volleyball, Beginning - Volleyball, Beginning 0.5

SWELL191 Weight Training - Weight Training, Beginning 0.5

Requirement 3 — Complete 1 hour

PETE399R Academic Internship: Coaching - Academic Internship: Coaching - *You may take up to 1.0 credit hours* 1.0v

Requirement 4 — Complete 1 Course

PETE477R Sec Minor Student Teaching - Sec Minor Student Teaching - *You may take once* 4.0

Exercise & Wellness (BS)

Program Information

Major Academic Plan

MAPS - BS in Exercise & Wellness 2026-2027.docx

Learning Outcomes

Title
Exercise and Wellness Knowledge

Learning Outcome
Students will demonstrate adequate knowledge acquisition and understanding in areas relating to stress management, chronic disease prevention, anatomy, exercise physiology, appraising health and fitness, worksite wellness program component design, healthy diet, and weight management.

Title
Health Assessment, Evaluation, and Prescription

Learning Outcome
Students will conduct fitness assessments, write exercise prescriptions, evaluate health behaviors/health outcomes, and risk factors for disease and physical dysfunction.

Title
Career and Professional Preparation

Learning Outcome
Students will demonstrate an understanding of current ethical concerns in the profession leading them to successful employment or further schooling.

Program Requirements

Requirement 1 —Complete 6 Courses

Prerequisites to the exercise and wellness core:

CELL220 Human Anatomy (with lab) - Human Anatomy (with lab) 4.0

CELL305 Human Physiology - Human Physiology 4.0

HLTH320 Adv First Aid & Safety - Adv First Aid & Safety 3.0

NDFS100 Essentials of Human Nutrition - Essentials of Human Nutrition 3.0

STAT121 Intro to Stat Data Analysis - Intro to Stat Data Analysis 3.0

STDEV150 Public Speaking - Public Speaking 3.0

Requirement 2 —Complete 7 Courses

Required core courses:

EXSC151 Intro to Exercise Sciences - Intro to Exercise Sciences 1.0

EXSC360 Exercise Is Medicine - Exercise Is Medicine 3.0

EXSC387 Chronic Disease Prevention - Chronic Disease Prevention 3.0

EXSC410 Stress Management - Stress Management 3.0

EXSC463 Exercise Physiology - Exercise Physiology 3.0

EXSC464 Exercise Physiology Lab - Exercise Physiology Lab 0.5

EXSC480 Obesity & Weight Management - Obesity & Weight Management 3.0

Requirement 3 — Complete 3 hours

Experiential Learning:

EXSC399R Exercise Sciences Internship - Exercise Sciences Internship - *You may take up to 3.0 credit hours* 0.5v

EXSC399R HWSG Internship - HWSG Internship - *You may take up to 3.0 credit hours* 1.0v

EXSC497R Undergrad Research & Study - Undergrad Research & Study - *You may take once* 3.0v

Requirement 4 — Complete 21 hours

Electives:

Option 4.1 — Complete at least 15 hours up to 21 hours

CELL365 Pathophysiology - Pathophysiology 4.0

EXSC221 Science of Wellness - Science of Wellness 3.0

EXSC320 Basic Athletic Training - Basic Athletic Training 3.0

EXSC321 Basic Athletic Training Lab - Basic Athletic Training Lab 0.5

EXSC362 Kinesiology & Biomechanics - Kinesiology & Biomechanics 3.0

EXSC385 Personal Training Strategies - Personal Training Strategies 3.0

EXSC440 Adv Musskl Hum Anat (incl lab) - Adv Musskl Hum Anat (incl lab) 4.0

EXSC455 Worksite Health Promotion - Worksite Health Promotion 3.0

EXSC468 Exercise Prescription - Problems in Exercise Prsrptn 2.0

HLTH335 Health Behavior Change - Health Behavior Change 3.0

HLTH345 Principles of Epidemiology - Principles of Epidemiology 3.0

HLTH460 Substance Use Disorders - Substance Use Disorders 3.0

HLTH466 Hlth & the Aging Process - Hlth & the Aging Process 3.0

NDFS310 Nutr & Metab Sports Exercise - Nutr & Metab Sports Exercise 3.0

PSYCH220 Human Dev: Life Span - Human Dev: Life Span 3.0

PSYCH356 Intro to Health Psychology - Intro to Health Psychology 3.0

STDEV317 Job Search Strategies - Job Search Strategies 2.0

Option 4.2 —Complete up to 6 hours

Complete up to 6 hours from the following:

ACC200 Principles of Accounting - Principles of Accounting 3.0

BIO130 Biology - Biology 4.0

CELL363 Adv Physiology Lab - Adv Physiology Lab 1.0

CHEM101 Introductory General Chemistry - Introductory General Chemistry 3.0

CHEM105 Gen College Chem 1+Lab Integr - Gen College Chem 1+Lab Integr 4.0

CHEM285 Intro Bio-organic Chemistry - Intro Bio-organic Chemistry 4.0

ENT301 Business Model Validation - Business Model Validation 3.0

EXSC350 Res. Meth. & Evid. Based Prac. - Res. Meth. & Evid. Based Prac. 3.0

EXSC466 Intro to ECG - Intro to ECG 2.0

FIN201 Principles of Finance - Principles of Finance 3.0

HLTH383 Mind/Body Health - Mind/Body Health 3.0

HLTH403R Special Topics - Special Topics - *You may take once* 0.5v

HLTH450 Women's Health - Women's Health 3.0

HRM300 Organizational Behavior - Organizational Behavior 3.0

MKTG201 Marketing Management - Marketing Management 3.0

MMBIO221 General Microbiology - General Microbiology 3.0

NDFS200 Nutrient Metabolism - Nutrient Metabolism 3.0

STDEV170 Intro to Health Professions - Intro to Health Professions 1.0

Note: Only 2.0 credits of EXSC 399R: Hunstman World Senior Games Internship may be used as part of the EXSC 399R: Exercise Sciences Internship requirement.

Exercise Science (BS)

Program Information

Major Academic Plan

MAPS - BS in Exercise Science 2026-2027.docx

Learning Outcomes

Title
Spiritually Strengthening

Learning Outcome
Through faith-based learning, students will (1) recognize and appreciate the connection between the health of the human body and spirit, (2) grasp the import of caring for the human body in God's plan of happiness, (3) strengthen their faith in Jesus Christ, and (4) develop a lasting commitment to cultivate physical health that is often required to serve others throughout mortality.

Title
Exercise Science Fundamentals

Learning Outcome
Students will apply their knowledge of human anatomy, physiology, and biomechanics to solve problems related to the body's responses and adaptations to physical activity and exercise, empowering them to promote lifelong health and service.

Title
Inspiring Learning

Learning Outcome
As disciples of Christ, students will bless the lives of others, including individuals in the broader community, by sharing the knowledge they gained from faith-based classroom instruction and mentoring experiences.

Title
Exercise is Medicine

Learning Outcome
Students will use exercise science to improve quality of life, including proposing strategies that will improve quality of life, rehabilitate injury, enhance performance, and reduce utilize principles of exercise in the reduction and prevalence of lifestyle related diseases.

Title
Career and Professional Preparation

Learning Outcome
Students will express an understanding of requirements necessary to gain admittance to a graduate or professional program or for exercise science related employment (See program description). Students will also desire to pursue lifelong learning leading them to successful employment in their chosen careers.

Program Requirements

Requirement 1 — Complete 11.5 hours

Complete These Major Required Courses:

EXSC151 Intro to Exercise Sciences - Intro to Exercise Sciences 1.0

EXSC362 Kinesiology & Biomechanics - Kinesiology & Biomechanics 3.0

EXSC440 Adv Musskl Hum Anat (incl lab) - Adv Musskl Hum Anat (incl lab) 4.0

EXSC463 Exercise Physiology - Exercise Physiology 3.0

EXSC464 Exercise Physiology Lab - Exercise Physiology Lab 0.5

Requirement 2 — Complete 2 hours

Complete at Least 2.0 Experiential Learning:

EXSC399R Exercise Sciences Internship - Exercise Science Internship 1.0v

EXSC399R HWSG Internship - HWSG Internship 1.0v

EXSC497R Undergrad Research & Study - Undergrad Research & Study 0.5v

Requirement 3 —Complete 12 hours

Complete at Least 12 Major Elective Credits:

EXSC221 Science of Wellness - Science of Wellness 3.0

EXSC320 Basic Athletic Training - Basic Athletic Training 3.0

EXSC321 Basic Athletic Training Lab - Basic Athletic Training Lab 0.5

EXSC350 Res. Meth. & Evid. Based Prac. - Res. Meth. & Evid. Based Prac. 3.0

EXSC360 Exercise Is Medicine - Exercise Is Medicine 3.0

EXSC387 Chronic Disease Prevention - Chronic Disease Prevention 3.0

EXSC460 Ortho Impairments & Ther Exer - Ortho Impairments & Ther Exer 3.0

EXSC462 Clinical Biomechanics - Clinical Biomechanics 3.0

EXSC466 Intro to ECG - Intro to ECG 2.0

EXSC468 Exercise Prescription - Exercise Prescription 3.0

EXSC470 Functional Neuroanatomy - Functional Neuroanatomy 3.0

EXSC488 Motor Control - Motor Control 3.0

EXSC501 Pathophysiology for AT - Pathophysiology for AT 3.0

EXSC516 Lower Extremities - Lower Extremities 3.0

EXSC517 Upper Extremities - Upper Extremities 3.0

EXSC518 Rehabilitation - Rehabilitation 3.0

Requirement 4 —Complete 10 Courses

Complete the Following Non-Major Required Courses (28.0 credits)

CELL120 Science of Biology - Science of Biology 3.0

CELL220 Human Anatomy (with lab) - Human Anatomy (with lab) 4.0

CHEM105 Gen College Chem 1+Lab Integr - Gen College Chem 1+Lab Integr 4.0

CHEM106 General College Chemistry 2 - General College Chemistry 2 3.0

CHEM107 Gen Coll Chem Lab - Gen Coll Chem Lab 1.0

MMBIO240 Molecular Biology - Molecular Biology 3.0

NDFS100 Essentials of Human Nutrition - Essentials of Human Nutrition 3.0

PHSCS105 General Physics 1 - General Physics 1 3.0

PHSCS107 General Physics Lab 1 - General Physics Lab 1 1.0

STAT121 Intro to Stat Data Analysis - Intro to Stat Data Analysis 3.0

Requirement 5 —Complete 1 of 2 Options

Complete 1 Physiology Option (4.0 Credits)

Option 5.1 —Complete 1 Course

CELL305 Human Physiology - Human Physiology 4.0

Option 5.2 —Complete 2 Courses

CELL362 Advanced Physiology - Advanced Physiology 3.0

CELL363 Adv Physiology Lab - Adv Physiology Lab 1.0

Requirement 6 —Complete 3 hours

Complete at Least 3 Non-Major Elective Credits:

Note: SOME OF THESE ELECTIVES HAVE REQUIRED PREREQUISITES.

CELL320 Dissection Tech Human Anatomy - Dissection Tech Human Anatomy 1.0

CELL325 Tissue Biology (with lab) - Tissue Biology (with lab) 3.0

CELL360 Cell Biology - Cell Biology 3.0

CELL363 Adv Physiology Lab - Adv Physiology Lab 1.0

CELL365 Pathophysiology - Pathophysiology 4.0

CELL484 Human Embryology - Human Embryology 3.0

CELL561 Physiology of Drug Mechanisms - Physiology of Drug Mechanisms 3.0

CELL565 Endocrinology - Endocrinology 3.0

CHEM285 Intro Bio-organic Chemistry - Intro Bio-organic Chemistry 4.0

CHEM351 Organic Chemistry 1 - Organic Chemistry 1 3.0

CHEM351M Organic Chemistry 1 - Majors - Organic Chemistry 1 - Majors 3.0

CHEM352 Organic Chemistry 2 - Organic Chemistry 2 3.0

CHEM352M Organic Chemistry 2 - Majors - Organic Chemistry 2 - Majors 3.0

CHEM353 Organic Chem Lab-Nonmajors - Organic Chem Lab-Nonmajors 1.0v

CHEM481 Biochemistry - Biochemistry 3.0

HLTH320 Adv First Aid & Safety - Adv First Aid & Safety 3.0

HLTH335 Health Behavior Change - Health Behavior Change 3.0

MATH112 Calculus 1 - Calculus 1 4.0

MATH119 Introduction to Calculus - Introduction to Calculus 4.0

MMBIO221 General Microbiology - General Microbiology 3.0

MMBIO222 Gen Micro Lab - Gen Micro Lab 1.0

MMBIO241 Molecular & Cellular Bio Lab - Molecular & Cellular Bio Lab 1.0

NDFS200 Nutrient Metabolism - Nutrient Metabolism 3.0

NDFS201 Society Nutr Chronic Disease - Society Nutr Chronic Disease 3.0

NDFS305 Nutr Implications of Disease - Nutr Implications of Disease 4.0

NDFS310 Nutr & Metab Sports Exercise - Nutr & Metab Sports Exercise 3.0

PHSCS106 General Physics 2 - General Physics 2 3.0

PHSCS108 General Physics Lab 2 - General Physics Lab 2 1.0

PSYCH111 Psychological Science - Psychological Science 3.0

PSYCH220 Human Dev: Life Span - Human Dev: Life Span 3.0

PSYCH342 Psychopathology - Psychopathology 3.0

PWS340 Genetics - Genetics 3.0

SOC111 Introductory Sociology - Introductory Sociology 3.0

SOC112 Current Social Problems - Current Social Problems 3.0

STDEV170 Intro to Health Professions - Intro to Health Professions 1.0

STDEV317 Job Search Strategies - Job Search Strategies 2.0

Note to Students Desiring to Pursue Master of Athletic Training (MAT) degree: In order to prepare for acceptance into the MAT graduate degree program, you must take the following courses during your BS Exercise Science major: EXSC 320, 321, 387, 501, 516, 517, 518, 601, and PSYCH 111. Contact Life Sciences Advisement (2060 LSB) for additional information (lsa.byu.edu; 801-422-3042; lifesciences@byu.edu). See MAT website for details. Some elective courses may be offered only in Spring term.

Note to Premed Students: Professional schools and graduate programs may require additional courses not required for this major. Contact the programs to which you may apply to determine specific courses that meet their entrance requirements. Students considering professional or graduate degrees should take at least two semesters of mathematical courses. The following required or elective courses are strongly recommended for students considering professional or graduate degrees in the exercise sciences: MMBio 241; CELL 360, 362, 363; Chem 351, 352, 353, 481; Math 119; Stat 121. For more information contact the Preprofessional Advisement Center, 3328 WSC, (801) 422-3044. Contact potential schools of choice for a complete list of entrance requirements.

General Studies (BGS): Exercise and Wellness Emphasis

Program Information

Minimum Credit Hours
33

Maximum Credit Hours
33

Major Academic Plan
MAPS - BGS in General Studies - Exercise and Wellness 2026-2027.docx

Program Requirements
Have 27 hours of campus residency.

Complete a minimum of 10 hours in the emphasis after formal admission to the BGS program.

Thirty of the 120 hours including 15 hours in the emphasis must be 300-level or above courses.

Students must earn a minimum 2.0 BYU grade point average, a minimum 2.0 cumulative grade point average, and a minimum 2.0 emphasis grade point average.

The program must be completed in eight years or less.

All emphasis courses taken after admission to BGS must be BYU courses.

Requirement 1 —Complete 1 Course

Complete the following prerequisite course (required of all applicants to the BGS program):

STDEV100 Essential College Skills - Essential College Skills 1.0

Requirement 2 —Complete 5 Courses

EXSC221 Science of Wellness - Science of Wellness 3.0

EXSC362 Kinesiology & Biomechanics - Kinesiology & Biomechanics 3.0

EXSC387 Chronic Disease Prevention - Chronic Disease Prevention 3.0

EXSC410 Stress Management - Stress Management 3.0

EXSC463 Exercise Physiology - Exercise Physiology 3.0

Requirement 3 —Complete 15 hours

CELL205 Human Biology - Human Biology 3.0

CELL210 Human Anatomy (w/ virtual lab) - Human Anatomy (w/ virtual lab) 3.0

HLTH330 Health Promotion - Health Promotion 3.0

HLTH335 Health Behavior Change - Health Behavior Change 3.0

NDFS100 Essentials of Human Nutrition - Essentials of Human Nutrition 3.0

PSYCH111 Psychological Science - Psychological Science 3.0

PSYCH338 Sport Psychology - Sport Psychology 3.0

PSYCH 365 - Motivation 3.0 - *This course is no longer available*

SOC111 Introductory Sociology - Introductory Sociology 3.0

SOC112 Current Social Problems - Current Social Problems 3.0

STAT121 Intro to Stat Data Analysis - Intro to Stat Data Analysis 3.0

Requirement 4 —Complete 1 Course

Complete the capstone experience (last course to be completed):

STDEV490 BGS Capstone - BGS Capstone 2.0

Cultural Dance (Minor)

Program Information

Minimum Credit Hours
16

Maximum Credit Hours
16

Program Requirements

Requirement 1 — Complete 1 Course

Complete the following with a grade of B or better:

DANCE270 Cultural Dance Technique 1 - Cultural Dance Technique 1 1.0

The Dance Department requires a minimum of 8 hours to be completed in residency at BYU for this minor program. These hours may also go toward BYU's 30-hour residency requirement for graduation.

Requirement 2 — Complete 6 Courses

Core courses:

DANCE170 Cultural Dance Introduction - Cultural Dance, Introduction 1.0

DANCE172 Western Square & Amer Dance - Western Square & Amer Dance 1.0

DANCE260 Introduction to Dance - Introduction to Dance 3.0

DANCE357 Dance- A Reflection of Culture - Dance- A Reflection of Culture 2.0

DANCE370 Cultural Dance Technique 2 - Cultural Dance Technique 2 1.0

DANCE376 Mthds of Tchg Cultural Dance - Mthds of Tchg Cultural Dance 2.0

Requirement 3 — Complete 1 hour

Core course:

DANCE228R Mexican Dance Technique 1 - Mexican Dance Technique 1 1.0

DANCE235R Tap Dance Technique 1 - Tap Dance Technique 1 - *You may take once* 1.0

DANCE271R Clogging Dance Int Tech 1 - Clogging Dance Int Tech 1 - *You may take once* 1.0

DANCE274R Irish Dance Tech 1 - Irish Dance Tech 1 - *You may take once* 1.0

Requirement 4 — Complete 4 hours

R courses may not be repeated for credit toward the four hours unless specified; only 2 credit hours total may be used for performance classes, either Dance 327R, Dance 378R, Dance 438R.

DANCE173R Culture-Specific Dance Beg. - Culture-Specific Dance Beg. *You may take once* 1.0

DANCE192 Character Dance - Character Dance 1.0

DANCE238R Folk Dance Performance - Folk Dance Performance - *You may take once* 1.0

DANCE272R Culture-Specific Dance Tech 1 - Cultural Dance Forms 1.0

DANCE273R Hungarian Dance Tech1 - Hungarian Dance Tech 1 1.0

DANCE275 Polynesian Dance Tech 1 - Polynesian Dance Tech 1 1.0

DANCE277 Spanish Dance Tech 1 - Spanish Dance Tech 1 1.0

DANCE278 Ukrainian Dance Tech 1 - Ukrainian Dance Tech 1 1.0

DANCE279 Indian Dance: prct/thry, tech1 - Indian Dance: prct/thry, tech1 1.0

DANCE327R Living Legends - Living Legends - *You may take up to 2.0 credit hours* 3.0v

DANCE335R Tap Dance Technique 2 - Tap Dance Technique 2 - *You may take once* 1.0

DANCE338R Folk Dance Performance - Folk Dance Performance - *You may take once* 2.0

DANCE371R Clog Dance Technique 2 - Clog Dance Technique 2 - *You may take once* 1.0

DANCE373R Hungarian Dance Tech 2 - Hungarian Dance Tech 2 - *You may take once* 1.0

DANCE374R Irish Dance Tech 2 - Irish Dance Tech 2 - *You may take once* 1.0

DANCE377R Cultural Dance Choreography - Cultural Dance Choreography - *You may take once* 2.0

DANCE438R Folk Dance Performance Co - Folk Dance Performance Co - *You may take up to 2.0 credit hours* 2.0v

DANCE474R Percussive Step Styles - Percussive Step Styles - *You may take once* 1.0

Dance (BA)

Program Information

Minimum Credit Hours
60

Maximum Credit Hours
62

Major Academic Plan
MAPS - BA in Dance 2026-2027.docx

Learning Outcomes

Title
Body, Mind, Spirit Connection

Learning Outcome
Students will be able to express in written, movement, and oral presentation the body, mind, spirit connection through applied knowledge in dance science, somatic theory, and movement studies.

Title
Dance Making

Learning Outcome
Students will be able to perform and choreograph dance works that demonstrate an awareness of historical and cultural contexts, application of the choreographic processes, and the shaping of a personal aesthetic.

Title
Interdisciplinary Integration

Learning Outcome
Students will integrate their dance education with an accompanying self-selected minor or area of outside focus through thoughtful reflective practice.

Title
Citizenship

Learning Outcome
Students will be able to value and model professional and civic engagement.

Program Requirements

The Bachelor of Arts (BA) in Dance is an open enrollment program. Students may declare the Dance BA major upon entry to the university and will be assigned a dance major advisor.

The Dance Department requires a minimum of 30 hours of dance credit to be taken in residency at BYU's Provo campus for this degree program. BYU Independent Study courses do not count toward residency. These hours may also go toward BYU's 30-hour residency requirement for graduation.

Requirement 1 — Complete 3 hours

Note: CELL 220 is preferred.

CELL210 Human Anatomy (w/ virtual lab) - Human Anatomy (w/ virtual lab) 3.0

CELL220 Human Anatomy (with lab) - Human Anatomy (with lab) 4.0

Requirement 2 — Complete 1 of 2 Courses

DANCE240R Contemp Mdrn, Tech & Theory 1 - Contemp Mdrn, Tech & Theory 1- *You may take once* 1.0

DANCE245 Foundational Street Dance - Urban & Street Dance Forms 1.0

Note: an Upper level contemporary technique course can be substituted in for DANCE 240

Requirement 3 — Complete 8 Courses

DANCE230 Conditioning - Conditioning 2.0

DANCE244R Beginning Creative Processes - Beginning Creative Processes - *You may take once* 1.0

DANCE261 Freshman Seminar in Dance - Freshman Seminar in Dance 1.0

DANCE317 Adv Writing for Dance - Adv Writing for Dance 3.0

DANCE342 Kinesiology for Dancers - Kinesiology for Dancers 4.0

DANCE459 Seminar in Dance - Seminar in Dance 1.0

DANCE460 Dance History and Theory - Dance History and Theory 2.0

DANCE469 Capstone in Dance - Capstone in Dance 2.0

Requirement 4 — Complete 1 of 4 Courses

DANCE362 Cont Mdrn Dnce Choreo Interm - Cont Mdrn Dnce Choreo Interm 2.0

DANCE377R Cultural Dance Choreography - Cultural Dance Choreography 2.0

DANCE387R Ballroom Dance Choreography - Ballroom Dance Choreography 2.0

DANCE397R Ballet Choreography - Ballet Choreography 2.0

Requirement 5 — Complete 1 of 2 Courses

DANCE343 Principles of Somatics - Principles of Somatics 2.0

DANCE351 Laban Movement Analysis - Laban Movement Analysis 2.0

Requirement 6 — Complete 2 hours

DANCE346 Dance and Diaspora - DANCE DIASPORA 3.0

DANCE354 Dance & Identity - Dance & Identity 2.0

DANCE357 Dance- A Reflection of Culture - Dance- A Reflection of Culture 2.0

DANCE359R Special Topics & Issues - Special Topics & Issues - *You may take once* 2.0

Requirement 7 — Complete 1 of 4 Courses

DANCE264 Music for Dancers - Music for Dancers 2.0

DANCE355 Dnc Prductn Intro - Dnc Prductn Intro 2.0

DANCE358 Dance and Film - Dance and Film 2.0

DANCE359R Special Topics & Issues - Special Topics & Issues - *You may take once* 2.0

Requirement 8 — Complete 1 of 8 Courses

DANCE365 Creative Dance Elementary Edu - Creative Dance Elementary Edu 2.0

DANCE366 Tchg Mthds of Mdrn & Cont Dnce - Tchg Mthds of Mdrn & Cont Dnce 2.0

DANCE367 MthdsTchg Chld Creative Dance - MthdsTchg Chld Creative Dance 2.0

DANCE376 Mthds of Tchg Cultural Dance - Mthds of Tchg Cultural Dance 2.0

DANCE386 Methods of Tchg Social Dance - Methods of Tchg Social Dance 2.0

DANCE396 Methods of Teaching Ballet - Methods of Teaching Ballet 2.0

DANCE486 Theory & Not of Intl Ballroom - Theory & Not of Intl Ballroom 2.0

DANCE487 Theory & Not of Intl Latin Dnc - Theory & Not of Intl Latin Dnc 2.0

Requirement 9 — Complete 3 hours

DANCE228R Mexican Dance Technique 1 - Mexican Dance Technique 1 - *You may take once* 1.0

DANCE231R Jazz Dance Technique 1 - Jazz Dance Technique 1 - *You may take once* 1.0

Requirement 13 — Complete 1 Options

Requirement 13.1 —Obtain confirmation from your advisement center that you have completed the following:

Complete an approved minor outside of dance. Note: Chosen minor may not be a dance minor, and must be completed as part of your graduation requirements.

Requirement 13.2 — Obtain confirmation from your advisement center that you have completed the following:

Complete 15 credit hours in a concentrated area of study outside of the Dept. of Dance. These credits should support a cross-disciplinary understanding of how a dance education can integrate into post graduate pursuits. Examples include but are not limited to the following graduate studies/career pursuits: Dance Movement Therapy, Physical Therapy, Medicine, Occupational Therapy. A justification letter regarding outside electives must accompany your student development plan and all credits must be approved by your faculty advisor and the Dance BA Committee Chair.

MAPS - BA in Dance Education K-12 2026-2027.docx

Learning Outcomes

Title
Dance Technique, Performance, and Choreography

Learning Outcome
Students will be able to perform and choreograph with technical proficiency, clear intent, creativity, and artistry, integrating dance principles with spiritual aspects and holistic approaches.

Title
Instructional Strategies, Standards, and Pedagogy

Learning Outcome
Students will be able to demonstrate teaching competency aligned with Utah state and national education standards, inclusive of best practices specific to learner development and needs, instructional design clarity, instructional practices, classroom climate, and professional responsibilities.

Title
Dance Theory and Curriculum Design

Learning Outcome
Students will be able to examine and synthesize dance studies to create comprehensive dance curricula and implement creative arts approaches that enrich lives, invite reflection, deepen learning, uplift souls, and share the light of Christ.

Title
Professionalism

Learning Outcome
Students will be able to construct and model their professional presence in the dance education K-12 community by maintaining licensing/certification standards of professionalism and ethics, engaging in professional development, and expressing commitment to stewardship and renewal.

Title
Spirituality

Learning Outcome
Students will be able to integrate and maximize their spiritual strengths and insights with artistic prowess and educational expertise in secular and faith-based settings to empower K-12 students, strengthen schools, benefit the community, foster belonging, and build the kingdom of God.

Program Requirements

Licensure: This program meets the educational requirements designed to lead to an occupationally required professional license or certificate in the state of Utah. Students pursuing occupations requiring a license or certificate in a state other than Utah should contact the appropriate BYU academic advisement center as well as the licensing agency in the state where they intend to work to seek information and guidance regarding licensure and certification requirements.

The Dance Education K-12 major is a limited enrollment program which requires students to apply and audition for acceptance through a department admissions process. Candidates should declare a Dance Education K-12 Pre-major and enroll in Dance 241R, Dance 290, and Dance 261 during the freshman year. A proficiency audition, self-choreographed solo, interview, minimum academic requirements, Utah Bureau of Criminal Investigation (UBCI) and FBI fingerprint and background clearance, and successful completion of Dance 276R are required for acceptance to the major. See https://dance.byu.edu for complete acceptance requirements.

This major is designed to prepare students to teach in public schools. In order to graduate with this major, students are required to complete Utah State Office of Education licensing requirements. To view these requirements go to http://education.byu.edu/ess/licensing.html or contact Education Student Services (350 MCKB, 801-422-3426).

Upon acceptance to the Dance Education K-12 major, students will participate in annual mandatory advisement with an assigned faculty advisor and through the CFAC Advisement Center.

Proficiency audition is required for placement and registration in technique courses. All technique courses require at least a B- and teacher approval to advance to the next level.

The Dance Department requires at least 21 hours from major courses to be completed in residency at BYU for this degree program. These hours may also go toward BYU's 30-hour residency requirement for graduation.

For students accepted into the major after December 16, 2019, grades below C in any required coursework in a teaching major or teaching minor will not be accepted. Teacher candidates must maintain a cumulative GPA of 2.7 or higher once admitted into the program and to qualify for student teaching. For additional details on admission and retention requirements for teaching majors and teaching minors, see Educator Preparation Program Requirements in the Undergraduate Catalog.

A teaching minor is recommended.

Requirement 1 — Complete 1 Course

Prerequisite course:

CELL220 Human Anatomy (with lab) - Human Anatomy (with lab) 4.0

Requirement 2 — Complete 14 Courses

DANCE180 Social Dance, Beginning- Social Dance, Beg 1.0

DANCE230 Conditioning - Conditioning 2.0

DANCE241R Contemp Mdrn, Tech & Theory 2 - Contemp Mdrn, Tech & Theory 2 - *You may take this course up to one time* 1.5

DANCE243R Std Workshop Cont Mdrn Dance - Std Workshop Cont Mdrn Dance - *You may take once* 2.5

DANCE245 Foundational Street Dance - Foundational Street Dance 1.0

Learning Outcomes

Title
Technical Skill and Performance

Learning Outcome
Students will exhibit advanced technical and performance mastery, expressing discipline, artistry, and the divine nature of the human form through embodied practice.

Title
Choreography

Learning Outcome
Students will create original works that apply advanced choreographic principles to integrate intellect and spirit, communicate meaning, and uplift audiences.

Title
Research and Theory

Learning Outcome
Student will analyze and apply dance theory and research to inform creative, scholarly, and pedagogical practice with clarity and rigor.

Title
Professionalism

Learning Outcome
Students will model integrity, discipline, and respect in all professional and collaborative endeavors, contributing responsibly to the field and community.

Title
Spiritual Values and Ethical Issues

Learning Outcome
Students will critically engage with spiritual, ethical, and professional issues in dance, aligning artistic expression with gospel-centered values and service.

Program Requirements

This is a limited-enrollment program requiring that students pass an audition and receive departmental acceptance. Please see the Dance Department for information regarding requirements for application to this major, and for all pre-major requirements.

Proficiency audition is required for placement and registration in technique courses.

Students are required to participate in regular proficiency assessments and are subject to being transferred from the BFA program into the BA program if proficiencies are not maintained.

All technique courses require at least a B- and teacher approval to advance to the next level.

The Dance Department requires a minimum of 30 hours of dance credit to be taken in residency at BYU's Provo campus for this degree program. These hours may also go toward BYU's 30-hour residency requirement for graduation.

Requirement 1 — Complete 14 Courses

CELL220 Human Anatomy (with lab) - Human Anatomy (with lab) 4.0

DANCE230 Conditioning - Conditioning 2.0

DANCE241R Contemp Mdrn, Tech & Theory 2 - Contemp Mdrn, Tech & Theory 2 - *You may take 2 times* 1.5

DANCE261 Freshman Seminar in Dance - Freshman Seminar in Dance 1.0

DANCE264 Music for Dancers - Music for Dancers 2.0

DANCE291R Ballet Technique 1 - Ballet Technique 1 - *You may take once* 1.5

DANCE317 Adv Writing for Dance - Adv Writing for Dance 3.0

DANCE342 Kinesiology for Dancers - Kinesiology for Dancers 4.0

DANCE343 Principles of Somatics - Principles of Somatics 2.0

DANCE351 Laban Movement Analysis - Laban Movement Analysis 2.0

MAPS - BS in Experience Design and Management 2026-2027.docx

Learning Outcomes

Title
Integrate Business with Experience Design

Learning Outcome
Apply business strategy, financial analysis, marketing principles, and organizational behavior insights to experience design decisions, demonstrating intellectual rigor and integrative thinking to create solutions that achieve measurable business objectives while promoting human flourishing.

Title
Discover Insights

Learning Outcome
Conduct qualitative and quantitative research to identify opportunities where designed experiences can create meaningful value, demonstrating intellectual humility, respect for diverse perspectives, and commitment to truth-seeking as essential to becoming discerning, lifelong learners.

Title
Design Intentional Experiences

Learning Outcome
Employ the experience design process to create human-centered experiences that engage participants as co-creators, applying compassion, sound judgment, and theory-driven design choices to support human flourishing and meaningful engagement.

Title
Lead Implementation Processes

Learning Outcome
Manage cross-functional project teams using agile methodologies to stage designed experiences with fidelity to design intent, exercising Christlike leadership through collaboration, integrity, and service while adapting responsibly to organizational constraints.

Title
Demonstrate Impact That Matters

Learning Outcome
Design and implement measurement systems that evaluate both business performance and experience quality, using data with ethical stewardship and intellectual honesty to drive continuous improvement that serves individuals, organizations, and communities.

Title
Practice Inclusive Design

Learning Outcome
Apply inclusive design principles to create accessible experiences that honor the inherent worth and divine potential of every person, enabling meaningful and equitable participation for people of diverse backgrounds, abilities, and perspectives.

Program Requirements

Students are advised to take STAT 121 to fulfill their Languages of Learning general education requirement.

Requirement 1 —Complete 3 Courses

Complete the following prerequisite management courses:

ACC200 Principles of Accounting - Principles of Accounting 3.0

EXDM300 Creating a Good Life - Creating a Good Life 3.0

IS201 Intro to Information Systems - Intro to Information Systems 3.0

Apply and be formally accepted into the program.

Requirement 2 —Complete 2 Requirements

Complete the following Experience Design and Management Core courses:

Requirement 2.1 —Complete 8 Courses

EXDM404 Experience Design - Experience Design 3.0

Major Academic Plan
MAPS - BS in Physical Science Education 2026-2027.docx

Learning Outcomes

Title
Physical Science Fundamentals

Learning Outcome
Students will obtain a broad basic knowledge of physical sciences.

Title
Instruction Design and Development

Learning Outcome
Students will be able to design individual lectures reflecting the curriculum and informed by best practices in pedagogy and technology.

Title
Utah Teacher and TEAC Standards

Learning Outcome
Students understand and apply the goals and standards of the Utah Teacher and TEAC.

Title
Professional and Moral Practice

Learning Outcome
Students understand and apply the Guiding Principles of Teaching as embraced by the McKay School of Education.

Program Requirements
Licensure: This program meets the educational requirements designed to lead to an occupationally required professional license or certificate in the state of Utah. Students pursuing occupations requiring a license or certificate in a state other than Utah should contact the appropriate BYU academic advisement center as well as the licensing agency in the state where they intend to work to seek information and guidance regarding licensure and certification requirements.

This major is designed to prepare students to teach in public schools. In order to graduate with this major, students are required to complete Utah State Office of Education licensing requirements. To view these requirements go to https://www.schools.utah.gov/curr/licensing or contact the Education Advisement Center, 175 MCKB, 801-422-3426.

For students accepted into the major after December 16, 2019, grades below C in any required coursework in a teaching major or teaching minor will not be accepted. Teacher candidates must maintain a cumulative GPA of 2.7 or higher once admitted into the program and to qualify for student teaching. For additional details on admission and retention requirements for teaching majors and teaching minors, see Educator Preparation Program Requirements in the Undergraduate Catalog.

Requirement 1 —Complete 17 Courses

Note for Geol 210: Contact Geological Sciences Department (S-389 ESC) before April 15th for dates of upcoming August field trip.

CHEM105 Gen College Chem 1+Lab Integr - Gen College Chem 1+Lab Integr 4.0

CHEM106 General College Chemistry 2 - General College Chemistry 2 3.0

CHEM107 Gen Coll Chem Lab - Gen Coll Chem Lab 1.0

CHEM201 Chem Handling & Safe Lab Prac - Chem Handling & Safe Lab Prac 0.5

CHEM227 Principles of Chem Analysis - Principles of Chem Analysis 4.0

CHEM331 Guided Learn Chem Instruction - Guided Learn Chem Instruction 3.0

GEOL111 Physical Geology - Physical Geology 4.0

GEOL112 Historical Geology - Historical Geology 4.0

GEOL210 Field Studies - Field Studies 3.0

PHSCS105 General Physics 1 - General Physics 1 3.0

PHSCS106 General Physics 2 - General Physics 2 3.0

PHSCS107 General Physics Lab 1 - General Physics Lab 1 1.0

PHSCS108 General Physics Lab 2 - General Physics Lab 2 1.0

PHSCS127 Descriptive Astronomy - Descriptive Astronomy 3.0

PHSCS137 Energy, Climate, Environment - Energy, Climate, Environment 3.0

PHSCS167 Desc Acoustics of Music & Spch - Desc Acoustics of Music & Spch 3.0

PHSCS310 Physics By Inquiry: Mechanics - Physics By Inquiry: Mechanics 3.0

Requirement 2 —Complete 1 of 5 Courses

GEOL100 Dinosaurs - Dinosaurs 3.0

GEOL351 Mineralogy - Mineralogy 4.0

GEOL370 Sedimentology & Stratigraphy - Sedimentology & Stratigraphy 3.0

GEOL480 Paleontology - Paleontology 3.0

PHIL423R History&Philosophy of Science - History&Philosophy of Science - *You may take once* 3.0

Requirement 3 —Complete 3 Requirements

Professional Education Component:

Licensure requirements: Contact the Education Advisement Center, 350 MCKB, 801-422-3426, to schedule the exit interview to clear your application for the secondary teaching license. You should be registered for your last semester at BYU prior to the scheduled appointment. Note: FBI fingerprint and background clearance must be completed prior to enrollment in Phy S 276.

Requirement 3.1 —Complete 6 Courses

CPSE402 Educ Stdnts w/Disablts in ScEd - Educ Stdnts w/Disablts in ScEd 2.0

PHY S276 Exploration of Teaching - Exploration of Teaching 4.0

PHY S377 Teaching Methods & Instruction - Teaching Methods & Instruction 3.0

PHY S378 Practicum in Secondary Educ - Practicum in Secondary Educ 1.0

SC ED353 Multicultural Educ - Multicultural Educ 2.0

SC ED375 Ad Dev & Class Mgmt - Ad Dev & Class Mgmt 3.0

Requirement 3.2 — Complete 1 of 2 Options

Option 3.2.1 — Complete 1 Course

PHY S312 Science and Tech - Science and Tech 3.0

Option 3.2.2 — Complete 3 Courses

IP&T371 Integrating K-12 Ed Tec 1 - Integrating K-12 Ed Tec 1 1.0

IP&T372 Integrating K-12 in El. Ed. - Integrating K-12 in El. Ed. 1.0

IP&T373 Tching K-12 Online/Blended Lrn - Tching K-12 Online/Blended Lrn 1.0

Requirement 3.3 — Complete 12 hours

Apply for student teaching/internship one semester in advance by September 30 or January 31st. Applications are online at www.byu.edu/fieldservices.html.

PHY S476 Secondary Student Teaching - Secondary Student Teaching 0.0v

PHY S496 Acad Intern: Secondary Ed - Acad Intern: Secondary Ed 0.0v

Student teachers/interns must complete all required EPP assessments and paperwork in the Educator system.

Chemistry (Minor)

Program Information

Minimum Credit Hours
20.5

Maximum Credit Hours
21.5

Program Requirements

Requirement 1 — Complete 1 of 2 Options

Option 1.1 — Complete 3 Courses

CHEM111 Principles of Chemistry 1 - Principles of Chemistry 1 4.0

CHEM112 Principles of Chemistry 2 - Principles of Chemistry 2 3.0

CHEM113 Intro General Chemistry Lab - Intro General Chemistry Lab 2.0

Option 1.2 — Complete 3 Courses

CHEM105 Gen College Chem 1+Lab Integr - Gen College Chem 1+Lab Integr 4.0

CHEM106 General College Chemistry 2 - General College Chemistry 2 3.0

CHEM107 Gen Coll Chem Lab - Gen Coll Chem Lab 1.0

Requirement 2 — Complete 2 of 8 Courses

CHEM351 Organic Chemistry 1 - Organic Chemistry 1 3.0

CHEM352 Organic Chemistry 2 - Organic Chemistry 2 3.0

CHEM357 Industrial Organic Chemistry - Industrial Organic Chemistry 3.0

CHEM462 Physical Chemistry 1 - Physical Chemistry 1 3.0

CHEM463 Physical Chemistry 2 - Physical Chemistry 2 3.0

CHEM467 Physical Chemistry - Engineers - Physical Chemistry - Engineers 3.0

CHEM468 Biophysical Chemistry - Biophysical Chemistry 3.0

CHEM481 Biochemistry - Biochemistry 3.0

Requirement 3 — Complete 1 Course

CHEM201 Chem Handling & Safe Lab Prac - Chem Handling & Safe Lab Prac 0.5

Requirement 4 — Complete 2 hours

NOTE: Chem 353 or Chem 354 may be taken for 1 or 2 credits.

CHEM353 Organic Chem Lab-Nonmajors - Organic Chem Lab-Nonmajors 1.0v

CHEM354 Organic Chem Lab-Major - Organic Chem Lab-Major 1.0v

CHEM355 Organic Lab 2 - Nonmajors - Organic Lab 2 - Nonmajors 1.0

CHEM464 Physical Chemistry Lab 1 - Physical Chemistry Lab 1 1.0

CHEM465 Physical Chemistry Lab 2 - Physical Chemistry Lab 2 1.0

Requirement 5 — Complete 1 of 2 Courses

CHEM227 Principles of Chem Analysis - Principles of Chem Analysis 4.0

CHEM455 Synthesis & Qual Organic Analy - Synthesis & Qual Organic Analy 4.0

Note: When all of the chemistry credit required for a minor is transferred from another school, at least one course in chemistry must be taken at BYU with a grade of C or better - or the student may request to take a standardized national exam covering advanced material required for the minor. Chemistry programs at some schools have been evaluated, and their credit is acceptable for the minor.

Chemistry Education (Minor)

Program Information

Minimum Credit Hours
28.5

Maximum Credit Hours
30.5

Program Requirements

Licensure: This program meets the educational requirements designed to lead to an occupationally required professional license or certificate in the state of Utah. Students pursuing occupations requiring a license or certificate in a state other than Utah should contact the appropriate BYU academic advisement center as well as the licensing agency in the state where they intend to work to seek information and guidance regarding licensure and certification requirements.

This minor is designed to prepare students to teach in public schools with a level 2 chemistry endorsement. A teaching minor may only be received by students graduating with a teaching major. In order to graduate with this minor, students are required to complete Utah State Office of Education licensing requirements. To view these requirements go to https://www.schools.utah.gov/curr/licensing or contact the Education Advisement Center, 350 MCKB, 801-422-3426.

For students accepted into the major after December 16, 2019, grades below C in any required coursework in a teaching major or teaching minor will not be accepted. Teacher candidates must maintain a cumulative GPA of 2.7 or higher once admitted into the program and to qualify for student teaching. For additional details on admission and retention requirements for teaching majors and teaching minors, see Educator Preparation Program Requirements in the Undergraduate Catalog.

Requirement 1 — Complete 1 of 2 Options

Option 1.1 — Complete 3 Courses

CHEM111 Principles of Chemistry 1 - Principles of Chemistry 1 4.0

CHEM112 Principles of Chemistry 2 - Principles of Chemistry 2 3.0

CHEM113 Intro General Chemistry Lab - Intro General Chemistry Lab 2.0

Option 1.2 — Complete 3 Courses

CHEM105 Gen College Chem 1+Lab Integr - Gen College Chem 1+Lab Integr 4.0

CHEM106 General College Chemistry 2 - General College Chemistry 2 3.0

CHEM107 Gen Coll Chem Lab - Gen Coll Chem Lab 1.0

Requirement 2 — Complete 2 Courses

CHEM201 Chem Handling & Safe Lab Prac - Chem Handling & Safe Lab Prac 0.5

CHEM227 Principles of Chem Analysis - Principles of Chem Analysis 4.0

Requirement 3 — Complete 3 Courses

CHEM285 Intro Bio-organic Chemistry - Intro Bio-organic Chemistry 4.0

CHEM351M Organic Chemistry 1 - Majors - Organic Chemistry 1 - Majors 3.0

CHEM352M Organic Chemistry 2 - Majors - Organic Chemistry 2 - Majors 3.0

CHEM357 Industrial Organic Chemistry - Industrial Organic Chemistry 3.0

CHEM381 Biochem Fundamentals - Biochem Fundamentals 3.0

CHEM462 Physical Chemistry 1 - Physical Chemistry 1 3.0

CHEM463 Physical Chemistry 2 - Physical Chemistry 2 3.0

CHEM467 Physical Chemistry - Engineers - Physical Chemistry - Engineers 3.0

CHEM481 Biochemistry - Biochemistry 3.0

CHEM514 Inorganic Chemistry - Inorganic Chemistry 3.0

Requirement 4 — Complete 1 Course

PHY S377 Teaching Methods & Instruction - Teaching Methods & Instruction 3.0

Requirement 5 — Complete 1 Course

CHEM477R Sec Minor Student Teaching - Sec Minor Student Teaching - *You may take once* 4.0

Note: When all of the chemistry credit required for a minor is transferred from another school, at least one course in chemistry must be taken at BYU with a grade of C or better -- or the student may request to take a standardized national exam covering advanced material required for the minor. Chemistry programs at some schools have been evaluated, and their credit is acceptable for the minor.

Major Academic Plan
MAPS - BS in Chemistry 2026-2027.docx

Learning Outcomes

Title
Chemistry Fundamentals

Learning Outcome
Program graduates will have demonstrated a mastery of core concepts and principles in the five chemistry sub-disciplines: analytical chemistry, biochemistry, inorganic chemistry, organic chemistry, and physical chemistry.

Title
Laboratory Procedures and Practice

Learning Outcome
Program graduates will be able to perform basic laboratory procedures in multiple areas of chemistry, including safely applying appropriate lab practices and accurate record keeping. Graduates will also be able to design and troubleshoot effective experiments, critically analyze and present data, and be able to carry out an independent project in a laboratory setting.

Title
Research

Learning Outcome
Program graduates who choose to engage in mentored research will be able to draw on classroom knowledge, laboratory classes, and personal revelation to make an individual contribution in a research laboratory.

Title
Effective Communication

Learning Outcome
Program graduates will be able to effectively communicate ideas and experimental results in a variety of formats, including written reports, oral presentations, and technical graphics. Graduates will also be able to search, read, and understand technical literature in the chemical sciences related to their area of interest.

Title
Career Preparation

Learning Outcome
Students approaching the end of their course of study will be able to make informed choices among post-graduate opportunities for work or further education and identify how chemistry can be used to improve the human condition.

Title
Professionalism

Learning Outcome
Program graduates will demonstrate the highest levels of integrity. They will also be professional and ethical as they collaborate with and mentor others.

Title
Faith and Science

Learning Outcome
Students will develop an appreciation for the relationship between faith and science in a way that strengthens their testimony of the Restored Gospel of Jesus Christ.

Program Requirements

Requirement 1 — Complete 20 Courses

Note: With department approval, Chem 105 may substitute for Chem 111; and Chem 106 for Chem 112; and Chem 107 for Chem 113. Math 314 may substitute for Chem 460. Note: 2 credit hours of Chem 354 are required.

CHEM111 Principles of Chemistry 1 - Principles of Chemistry 1 4.0

CHEM112 Principles of Chemistry 2 - Principles of Chemistry 2 3.0

CHEM113 Intro General Chemistry Lab - Intro General Chemistry Lab 2.0

CHEM195 Intro to Chem & Biochem - Intro to Chem & Biochem 0.5

CHEM201 Chem Handling & Safe Lab Prac - Chem Handling & Safe Lab Prac 0.5

CHEM227 Principles of Chem Analysis - Principles of Chem Analysis 4.0

CHEM351M Organic Chemistry 1 - Majors - Organic Chemistry 1 - Majors 3.0

CHEM352M Organic Chemistry 2 - Majors - Organic Chemistry 2 - Majors 3.0

CHEM354 Organic Chem Lab-Major - Organic Chem Lab-Major 2.0

CHEM381 Biochem Fundamentals - Biochem Fundamentals 3.0

CHEM391 Tech Writing Using Chem Lit - Tech Writing Using Chem Lit 3.0

CHEM460 Math for Physical Chemistry - Math for Physical Chemistry 1.0

CHEM462 Physical Chemistry 1 - Physical Chemistry 1 3.0

CHEM463 Physical Chemistry 2 - Physical Chemistry 2 3.0

CHEM464 Physical Chemistry Lab 1 - Physical Chemistry Lab 1 1.0

CHEM465 Physical Chemistry Lab 2 - Physical Chemistry Lab 2 1.0

CHEM495 Senior Seminar - Senior Seminar 0.5

CHEM514 Inorganic Chemistry - Inorganic Chemistry 3.0

CHEM518 Advanced Inorganic Laboratory - Advanced Inorganic Laboratory 2.0

CHEM594R General Seminar - General Seminar - *You may take once* 0.5

Requirement 2 — Complete 6 Courses

MATH112 Calculus 1 - Calculus 1 4.0

MATH113 Calculus 2 - Calculus 2 4.0

MATH213 Elementary Linear Algebra - Elementary Linear Algebra 2.0

MATH215 Computational Linear Algebra - Computational Linear Algebra 1.0

PHSCS121 Intro to Newtonian Mechanics - Intro to Newtonian Mechanics 3.0

PHSCS220 Intro Electricity & Magnetism - Intro Electricity & Magnetism 3.0

Requirement 3 — Complete 1 of 2 Options

Complete one of the following advanced options:

Option 3.1 — Complete 1 Course

CHEM455 Synthesis & Qual Organic Analy - Synthesis & Qual Organic Analy 4.0

Option 3.2 — Complete 2 Courses

CHEM521 Instrumental Analysis Lecture - Instrumental Analysis Lecture 2.0

CHEM523 Instrumental Analysis Lab - Instrumental Analysis Lab 2.0

Requirement 4 — Complete 12.0 hours

After consulting with an advisor, complete 12 hours from the following. NOTE: Only one of Bio 130, CELL 120, or PHSCS 123 can be applied to this requirement. NOTE: With approval, certain other 300-level and above courses in the allied fields of physics, statistics, engineering, and biology may be taken to satisfy this requirement. NOTE: Any course not taken to satisfy Requirement 3 can be taken to satisfy Requirement 4.

BIO130 Biology - Biology 4.0

CELL120 Science of Biology - Science of Biology 3.0

CHEM384 Biochem Methods - Biochem Methods 1.0

CHEM397R Mentored Outreach Svc Learning - Mentored Outreach Svc Learning - *You may take up to 3.0 credit hours* 0.5v

CHEM455 Synthesis & Qual Organic Analy - Synthesis & Qual Organic Analy 4.0

CHEM482 Mechanisms of Molecular Biol - Mechanisms of Molecular Biol 3.0

CHEM483 Bioenergetics & Metabolism - Bioengergetics and Metabolism 3.0

CHEM496R Academic Internship - Academic Internship - *You may take up to 3.0 credit hours* 0.5v

CHEM498R Capstone Experience - Capstone Experience - *You may take up to 3.0 credit hours* 0.5v

CHEM521 Instrumental Analysis Lecture - Instrumental Analysis Lecture 2.0

CHEM523 Instrumental Analysis Lab - Instrumental Analysis Lab 2.0

CHEM552 Advanced Organic Chemistry - Advanced Organic Chemistry 3.0

CHEM553 Advanced Organic Chemistry - Advanced Organic Chemistry 3.0

CHEM555 Organic Spectroscopic Ident - Organic Spectroscopic Ident 2.0

CHEM563 Reaction Kinetics - Reaction Kinetics 3.0

CHEM565 Intro to Quantum Chemistry - Intro to Quantum Chemistry 3.0

CHEM567 Statistical Mechanics - Statistical Mechanics 3.0

CHEM569 Fundamentals of Spectroscopy - Fundamentals of Spectroscopy 3.0

CHEM571 Polymer & Materials Chemistry - Polymer & Materials Chemistry 3.0

CHEM575 X-ray Diffraction - X-ray Diffraction 3.0

CHEM581 Adv Biochemical Methodology 1 - Biochemistry 3.0

CHEM584 Adv Biochemistry Methods 1 - Adv Biochemistry Methods 1 3.0

CHEM586 Adv Biochemistry Methods 2 - Adv Biochemistry Methods 2 3.0

CHEM596R Special Topics in Chemistry - Special Topics in Chemistry - *You may take up to 3.0 credit hours* 0.5v

HONRS499R Honors Thesis - Honors Thesis - *You may take up to 3.0 credit hours* 0.5v

PHSCS123 Intro to Waves, Optics, Thermo - Intro to Waves, Optics, and Thermo 3.0

Recommended Courses are not required to complete the program

Recommended Courses: Phscs 225; Stat 201.

Note: Elective courses, beyond the requirements above, should be selected in consultation with an advisor. The following should be given consideration: advanced chemistry, foreign languages (especially French, German, Japanese, and Russian), biological sciences, computer science, engineering, mathematics, physics, statistics.

Biochemistry (BS)

CHEM352M Organic Chemistry 2 - Majors - Organic Chemistry 2 - Majors 3.0

CHEM354 Organic Chem Lab-Major - Organic Chem Lab-Major - *You may take up to 1.0 credit hours* 1.0v

CHEM381 Biochem Fundamentals - Biochem Fundamentals 3.0

CHEM384 Biochem Methods - Biochem Methods 1.0

CHEM391 Tech Writing Using Chem Lit - Tech Writing Using Chem Lit 3.0

CHEM468 Biophysical Chemistry - Biophysical Chemistry 3.0

CHEM482 Mechanisms of Molecular Biol - Mechanisms of Molecular Biol 3.0

CHEM483 Bioenergetics & Metabolism - Bioenergetics & Metabolism 3.0

CHEM489 Structural Biochemistry - Structural Biochemistry 3.0

CHEM495 Senior Seminar - Senior Seminar 0.5

CHEM584 Adv Biochemistry Methods 1 - Adv Biochemistry Methods 1 3.0

CHEM586 Adv Biochemistry Methods 2 - Adv Biochemistry Methods 2 3.0

CHEM594R General Seminar- General Seminar - *You may take up to 0.5 credit hours* 0.5

Requirement 2 — Complete 5 Courses

MATH112 Calculus 1 - Calculus 1 4.0

MATH113 Calculus 2 - Calculus 2 4.0

PHSCS121 Intro to Newtonian Mechanics - Intro to Newtonian Mechanics 3.0

PHSCS220 Intro Electricity & Magnetism- Intro Electricity & Magnetism 3.0

PWS340 Genetics - Genetics 3.0

Requirement 3 — Complete 1 of 2 Options

Option 3.1 — Complete 1 Course

STAT201 Stat for Engineers & Scientist - Stat for Engineers & Scientist 3.0

Option 3.2 — Complete 2 Courses

MATH213 Elementary Linear Algebra - Elementary Linear Algebra 2.0

MATH215 Computational Linear Algebra - Computational Linear Algebra 1.0

Requirement 4 — Complete 1 Course

CELL360 Cell Biology- Cell Biology 3.0

CELL362 Advanced Physiology - Advanced Physiology 3.0

MMBIO463 Immunology- Immunology 3.0

MMBIO465 Virology - Virology 3.0

MMBIO368 Genomics - Genomics 3.0

Requirement 5 — Complete 7 hours

After consulting with an advisor, complete 7 hours from the following. NOTE: Only one of Bio 130, CELL 120, or PHSCS 123 can be applied to this requirement. NOTE: Chem 355 cannot be taken if Chem 354 was taken for 2 credit hours. NOTE: With prior approval, many 300-level and above courses in biology, integrative biology, microbiology and molecular biology, and physiology and developmental biology will fill this requirement.

BIO130 Biology - Biology 4.0

CELL120 Science of Biology - Science of Biology 3.0

CHEM355 Organic Lab 2 - Nonmajors - Organic Lab 2 - Nonmajors 1.0

CHEM397R Mentored Outreach Svc Learning - Mentored Outreach Svc Learning - *You may take once* 0.5v

CHEM596R Special Topics in Chemistry - Special Topics in Chemistry - *You may take up to 3.0 credit hours* 0.5v

HONRS499R Honors Thesis - Honors Thesis - *You may take up to 3.0 credit hours* 0.5v

PHSCS123 Intro to Waves, Optics, Thermo- Intro to Waves, Optics, Thermo 3.0

Recommended Courses are not required to complete the program

Recommended Courses: Chem 460.

Note: Supporting courses suggested by most medical and dental schools are found by visiting the Preprofessional Advisement Office. The more rigorous chemistry, mathematics, and physics courses required for the chemistry majors will satisfy the minimum requirements listed there. Elective courses in biochemistry and in biological science are especially pertinent to these preprofessional programs.

CHEM467 Physical Chemistry - Engineers - Physical Chemistry - Engineers 3.0

CHEM468 Biophysical Chemistry - Biophysical Chemistry 3.0

Requirement 3.1.3 — Complete 11 Hours

Chem 355 cannot be taken if Chem 354 was taken for 2 credit hours

CELL360 Cell Biology - Cell Biology 3.0

CHEM352M Organic Chemistry 2 - Majors - Organic Chemistry 2 - Majors 3.0

CHEM354 Organic Chem Lab-Major - Organic Chem Lab-Major- *You may take up to 2.0 credit hours* 1.0v

CHEM355 Organic Lab 2 - Nonmajors - Organic Lab 2 - Nonmajors 1.0

CHEM381 Biochem Fundamentals - Biochem Fundamentals 3.0

CHEM384 Biochem Methods - Biochem Methods 1.0

CHEM397R Mentored Outreach Svc Learning - Mentored Outreach Svc Learning - *You may take once* 0.5v

CHEM455 Synthesis & Qual Organic Analy - Synthesis & Qual Organic Analy 4.0

CHEM460 Math for Physical Chemistry - Math for Physical Chemistry 1.0

CHEM462 Physical Chemistry 1 - Physical Chemistry 1 3.0

CHEM463 Physical Chemistry 2 - Physical Chemistry 2 3.0

CHEM464 Physical Chemistry Lab 1 - Physical Chemistry Lab 1 1.0

CHEM465 Physical Chemistry Lab 2 - Physical Chemistry Lab 2 1.0

CHEM482 Mechanisms of Molecular Biol - Mechanisms of Molecular Biol 3.0

CHEM483 Bioenergetics & Metabolism- Bioenergetics and Metabolism 3.0

CHEM489 Structural Biochemistry - Structural Biochemistry 3.0

CHEM496R Academic Internship - Academic Internship - *You may take up to 3.0 credit hours* 0.5v

CHEM498R Capstone Experience - Capstone Experience - *You may take up to 3.0 credit hours* 0.5v

CHEM514 Inorganic Chemistry - Inorganic Chemistry 3.0

CHEM518 Advanced Inorganic Laboratory - Advanced Inorganic Laboratory 2.0

CHEM521 Instrumental Analysis Lecture - Instrumental Analysis Lecture 2.0

CHEM523 Instrumental Analysis Lab - Instrumental Analysis Lab 2.0

CHEM552 Advanced Organic Chemistry - Advanced Organic Chemistry 3.0

CHEM553 Advanced Organic Chemistry - Advanced Organic Chemistry 3.0

CHEM563 Reaction Kinetics - Reaction Kinetics 3.0

CHEM565 Intro to Quantum Chemistry - Intro to Quantum Chemistry 3.0

CHEM567 Statistical Mechanics - Statistical Mechanics 3.0

CHEM569 Fundamentals of Spectroscopy - Fundamentals of Spectroscopy 3.0

CHEM571 Polymer & Materials Chemistry - Polymer & Materials Chemistry 3.0

CHEM575 X-ray Diffraction - X-ray Diffractions 3.0

CHEM581 Adv Biochemical Methodology 1 - Adv Biochemical Methodology 1 3.0

CHEM583 Adv Biochemical Methodology 2 - Adv Biochemical Methodology 2 3.0

CHEM584 Adv Biochemistry Methods 1 - Adv Biochemistry Methods 1 3.0

CHEM586 Adv Biochemistry Methods 2 - Adv Biochemistry Methods 2 3.0

CHEM594R General Seminar - General Seminar - *You may take up to 0.5 credit hours* 0.5

CHEM596R Special Topics in Chemistry - Special Topics in Chemistry - *You may take up to 3.0 credit hours* 0.5v

HONRS499R Honors Thesis - Honors Thesis - *You may take up to 3.0 credit hours* 0.5v

Option 3.2 — Complete 3 Requirements

Requirement 3.2.1 — Complete 7 Courses

Math 314 may substitute for Chem 460.

CHEM460 Math for Physical Chemistry - Math for Physical Chemistry 1.0

CHEM462 Physical Chemistry 1 - Physical Chemistry 1 3.0

CHEM463 Physical Chemistry 2 - Physical Chemistry 2 3.0

CHEM464 Physical Chemistry Lab 1 - Physical Chemistry Lab 1 1.0

CHEM465 Physical Chemistry Lab 2 - Physical Chemistry Lab 2 1.0

MATH213 Elementary Linear Algebra - Elementary Linear Algebra 2.0

MATH215 Computational Linear Algebra - Computational Linear Algebra 1.0

Requirement 3.2.2 — Complete 1 of 2 Courses

CHEM351M Organic Chemistry 1 - Majors - Organic Chemistry 1 - Majors 3.0

CHEM357 Industrial Organic Chemistry - Industrial Organic Chemistry 3.0

Requirement 3.2.3 — Complete 11 Hours

Chem 355 cannot be taken if Chem 354 was taken for 2 credit hours

CELL360 Cell Biology - Cell Biology 3.0

CHEM352M Organic Chemistry 2 - Majors - Organic Chemistry 2 - Majors 3.0

CHEM354 Organic Chem Lab-Major - Organic Chem Lab-Major- *You may take up to 2.0 credit hours* 1.0v

CHEM355 Organic Lab 2 - Nonmajors - Organic Lab 2 - Nonmajors 1.0

CHEM381 Biochem Fundamentals - Biochem Fundamentals 3.0

CHEM384 Biochem Methods - Biochem Methods 1.0

CHEM397R Mentored Outreach Svc Learning - Mentored Outreach Svc Learning - *You may take once* 0.5v

CHEM455 Synthesis & Qual Organic Analy - Synthesis & Qual Organic Analy 4.0

CHEM460 Math for Physical Chemistry - Math for Physical Chemistry 1.0

CHEM462 Physical Chemistry 1 - Physical Chemistry 1 3.0

CHEM463 Physical Chemistry 2 - Physical Chemistry 2 3.0

CHEM464 Physical Chemistry Lab 1 - Physical Chemistry Lab 1 1.0

CHEM465 Physical Chemistry Lab 2 - Physical Chemistry Lab 2 1.0

CHEM482 Mechanisms of Molecular Biol - Mechanisms of Molecular Biol 3.0

CHEM483 Bioenergetics & Metabolism- Bioenergetics and Metabolism 3.0

CHEM489 Structural Biochemistry - Structural Biochemistry 3.0

CHEM496R Academic Internship - Academic Internship - *You may take up to 3.0 credit hours* 0.5v

CHEM498R Capstone Experience - Capstone Experience - *You may take up to 3.0 credit hours* 0.5v

CHEM514 Inorganic Chemistry - Inorganic Chemistry 3.0

CHEM518 Advanced Inorganic Laboratory - Advanced Inorganic Laboratory 2.0

CHEM521 Instrumental Analysis Lecture - Instrumental Analysis Lecture 2.0

CHEM523 Instrumental Analysis Lab - Instrumental Analysis Lab 2.0

CHEM552 Advanced Organic Chemistry - Advanced Organic Chemistry 3.0

CHEM553 Advanced Organic Chemistry - Advanced Organic Chemistry 3.0

CHEM563 Reaction Kinetics - Reaction Kinetics 3.0

CHEM565 Intro to Quantum Chemistry - Intro to Quantum Chemistry 3.0

CHEM567 Statistical Mechanics - Statistical Mechanics 3.0

CHEM569 Fundamentals of Spectroscopy - Fundamentals of Spectroscopy 3.0

CHEM571 Polymer & Materials Chemistry - Polymer & Materials Chemistry 3.0

CHEM575 X-ray Diffraction - X-ray Diffractions 3.0

CHEM581 Adv Biochemical Methodology 1 - Adv Biochemical Methodology 1 3.0

CHEM583 Adv Biochemical Methodology 2 - Adv Biochemical Methodology 2 3.0

CHEM584 Adv Biochemistry Methods 1 - Adv Biochemistry Methods 1 3.0

CHEM586 Adv Biochemistry Methods 2 - Adv Biochemistry Methods 2 3.0

CHEM594R General Seminar - General Seminar - *You may take up to 0.5 credit hours* 0.5

CHEM596R Special Topics in Chemistry - Special Topics in Chemistry - *You may take up to 3.0 credit hours* 0.5v

HONRS499R Honors Thesis - Honors Thesis - *You may take up to 3.0 credit hours* 0.5v

Option 3.3 — Complete 3 Requirements

Requirement 3.3.1 — Complete 7 Courses

Note: Only 1 credit hour of Chem 354 is required; completion of 2 credit hours will satisfy the requirement for Chem 354 and 1 credit hour of electives under Requirement 3.3

CHEM351M Organic Chemistry 1 - Majors - Organic Chemistry 1 - Majors 3.0

CHEM352M Organic Chemistry 2 - Majors- Organic Chemistry 2 - Majors 3.0

CHEM354 Organic Chem Lab-Major - Organic Chem Lab-Major - *You may take up to 2.0 credit hours* 1.0v

CHEM381 Biochem Fundamentals - Biochem Fundamentals 3.0

CHEM384 Biochem Methods - Biochem Methods 1.0

CHEM468 Biophysical Chemistry - Biophysical Chemistry 3.0

CHEM584 Adv Biochemistry Methods 1 - Adv Biochemistry Methods 1 3.0

Requirement 3.3.2 — Complete 1 of 2 Options

Option 3.3.2.1 — Complete 1 Course

STAT201 Stat for Engineers & Scientist - Stat for Engineers & Scientist 3.0

Option 3.3.2.2 —Complete 2 Courses

MATH213 Elementary Linear Algebra - Elementary Linear Algebra 2.0

MATH215 Computational Linear Algebra - Computational Linear Algebra 1.0

Requirement 3.3.3 — Complete 6 Hours

Chem 355 cannot be taken if Chem 354 was taken for 2 credit hours

CELL360 Cell Biology - Cell Biology 3.0

CHEM352M Organic Chemistry 2 - Majors - Organic Chemistry 2 - Majors 3.0

CHEM354 Organic Chem Lab-Major - Organic Chem Lab-Major- *You may take up to 2.0 credit hours* 1.0v

CHEM355 Organic Lab 2 - Nonmajors - Organic Lab 2 - Nonmajors 1.0

CHEM381 Biochem Fundamentals - Biochem Fundamentals 3.0

CHEM384 Biochem Methods - Biochem Methods 1.0

CHEM397R Mentored Outreach Svc Learning - Mentored Outreach Svc Learning - *You may take once* 0.5v

CHEM455 Synthesis & Qual Organic Analy - Synthesis & Qual Organic Analy 4.0

CHEM596R Special Topics in Chemistry - Special Topics in Chemistry - *You may take up to 3.0 credit hours* 0.5v

HONRS499R Honors Thesis - Honors Thesis - *You may take up to 3.0 credit hours* 0.5v

Note 1: With prior approval, certain 300-level and above courses in biology, engineering, physics, and statistics may be taken to satisfy Requirement 3.

Recommended Courses are not required to complete the program

Recommended Courses: PHSCS 225.

Note: Supporting courses suggested by most medical and dental schools are found by visiting the Preprofessional Advisement Center (ppa.byu.edu). The more rigorous chemistry, mathematics, and physics courses required for the chemistry majors will satisfy the minimum requirements listed there.

Chemistry Education (BS)

Program Information

Minimum Credit Hours
82.5

Maximum Credit Hours
82.5

Major Academic Plan
MAPS - BS in Chemistry Education 2025-2026.pdf

Learning Outcomes

Title
Chemistry Fundamentals

Learning Outcome
Program graduates will have demonstrated a solid conceptual understanding of the structure and reactivity of matter and will firmly grasp the key ideas and practices in general, analytical, and organic chemistry, with additional specialization in areas of interest.

Title
Laboratory Procedures and Practice

Learning Outcome
Program graduates will be able to perform basic laboratory procedures used in general and analytical chemistry, including safely applying appropriate lab practices and accurate record keeping. They will also be able to design and troubleshoot effective experiments and critically analyze data.

Title
Professional Ethics

Learning Outcome
Program graduates will demonstrate professional and scientific ethics. They will apply the Moral Dimensions of Teaching embraced by the McKay School of Education.

Title
Career Preparation

Learning Outcome
Graduates will be prepared to be effective educators at the secondary level and will be able to effectively communicate the range of career opportunities in the chemical sciences open to their students.

Title
Communication, Pedagogy and Classroom Management

Learning Outcome
Program graduates will be able to search, read, and understand technical literature related to chemistry and chemistry education and effectively communicate chemical ideas orally, graphically, and in writing to both scientific and lay audiences. Program graduates will be able to design three-dimensional science instruction that supports student learning of disciplinary core ideas, scientific practices, and crosscutting concepts, and implement student-centered pedagogies to engage students from diverse cultural backgrounds, create meaningful assessments, and modify instruction based on student learning data.

Title
Research

Learning Outcome
Program graduates who choose to engage in mentored research will be able to draw on classroom knowledge, laboratory classes, and personal revelation to make an individual contribution in a research laboratory.

Title
Faith and Science

Learning Outcome
Students will develop an appreciation for the relationship between faith and science in a way that strengthens their testimony of the Restored Gospel of Jesus Christ.

Program Requirements

Licensure: This program meets the educational requirements designed to lead to an occupationally required professional license or certificate in the state of Utah. Students pursuing occupations requiring a license or certificate in a state other than Utah should contact the appropriate BYU academic advisement center as well as the licensing agency in the state where they intend to work to seek information and guidance regarding licensure and certification requirements.

This major is designed to prepare students to teach in public schools. In order to graduate with this major, students are required to complete Utah State Office of Education licensing requirements. To view these requirements go to https://www.schools.utah.gov/curr/licensing or contact the Education Advisement Center, 350 MCKB, 801-422-3426.

For students accepted into the major after December 16, 2019, grades below C in any required coursework in a teaching major or teaching minor will not be accepted. Teacher candidates must maintain a cumulative GPA of 2.7 or higher once admitted into the program and to qualify for student teaching. For additional details on admission and retention requirements for teaching majors and teaching minors, see Educator Preparation Program Requirements in the Undergraduate Catalog.

Contact Education Student Services for entrance requirements into the licensure program.

A teaching minor is not required for licensure. However, it is strongly recommended.

Requirement 1 — Complete 9 Courses

Note: With department approval Chem 105 may substitute for Chem 111; and Chem 106 for Chem 112; and Chem 107 for Chem 113.

CHEM111 Principles of Chemistry 1 - Principles of Chemistry 1 4.0

CHEM112 Principles of Chemistry 2 - Principles of Chemistry 2 3.0

CHEM113 Intro General Chemistry Lab - Intro General Chemistry Lab 2.0

CHEM195 Intro to Chem & Biochem - Freshman Seminar 0.5

CHEM201 Chem Handling & Safe Lab Prac - Chem Handling & Safe Lab Prac 0.5

CHEM227 Principles of Chem Analysis - Principles of Chem Analysis 4.0

CHEM331 Guided Learn Chem Instruction - Guided Learn Chem Instruction 3.0

CHEM391 Tech Writing Using Chem Lit - Tech Writing Using Chem Lit 3.0

CHEM495 Senior Seminar - Senior Seminar 0.5

Requirement 2 — Complete 1 of 2 Courses

CHEM351M Organic Chemistry 1 - Majors - Organic Chemistry 1 - Majors 3.0

CHEM357 Industrial Organic Chemistry - Industrial Organic Chemistry 3.0

Requirement 3 — Complete 4 Courses

MATH112 Calculus 1 - Calculus 1 4.0

MATH113 Calculus 2 - Calculus 2 4.0

PHSCS121 Intro to Newtonian Mechanics - Intro to Newtonian Mechanics 3.0

PHSCS123 Intro to Waves, Optics, Thermo - Intro to Waves, Optics, Thermo 3.0

Requirement 4 — Complete 9 hours

Note: Chem 354 may be taken for either 1 or 2 credit hours.

CHEM352M Organic Chemistry 2 - Majors - Organic Chemistry 2 - Majors 3.0

CHEM354 Organic Chem Lab-Major - Organic Chem Lab-Major 1.0v

CHEM381 Biochem Fundamentals - Biochem Fundamentals 3.0

CHEM384 Biochem Methods - Biochem Methods 1.0

CHEM397R Mentored Outreach Svc Learning - Mentored Outreach Svc Learning - *You may take up to 3.0 credit hours* 0.5v

CHEM460 Math for Physical Chemistry - Math for Physical Chemistry 1.0

CHEM462 Physical Chemistry 1 - Physical Chemistry 1 3.0

CHEM463 Physical Chemistry 2 - Physical Chemistry 2 3.0

CHEM464 Physical Chemistry Lab 1 - Physical Chemistry Lab 1 1.0

CHEM465 Physical Chemistry Lab 2 - Physical Chemistry Lab 2 1.0

CHEM468 Biophysical Chemistry - Biophysical Chemistry 3.0

CHEM498R Capstone Experience - Capstone Experience - *You may take up to 3.0 credit hours* 0.5v

CHEM514 Inorganic Chemistry - Inorganic Chemistry 3.0

HONRS499R Honors Thesis - Honors Thesis - *You may take up to 3.0 credit hours* 0.5v

Requirement 5 — Complete 6 hours

Only ONE of Geol 101 or 111 can be applied to this requirement. Only ONE of Bio 100, Bio 130, CELL 120, or PWS 150 can be applied to this requirement. With approval, certain other courses in physics, geology, mathematics, and biology may be taken to satisfy this requirement. Note: Any course not taken to satisfy Requirement 4 can be taken to satisfy Requirement 5.

BIO100 Principles of Biology - Principles of Biology 3.0

BIO130 Biology - Biology 4.0

CELL120 Science of Biology - Science of Biology 3.0

GEOL101 Introduction to Geology - Introduction to Geology 3.0

GEOL111 Physical Geology - Physical Geology 4.0

MATH213 Elementary Linear Algebra - Elementary Linear Algebra 2.0

MATH215 Computational Linear Algebra - Computational Linear Algebra 1.0

MATH290 Fundamentals of Mathematics - Fundamentals of Mathematics 3.0

MATH302 Math for Engr 1 - Math for Engr 1 4.0

MATH314 Calculus of Several Variables - Calculus of Several Variables 3.0

MATH334 Ordinary Differential Equation - Ordinary Differential Equation 3.0

PHIL423R History&Philosophy of Science - History&Philosophy of Science - *You may take once* 3.0

PHSCS127 Descriptive Astronomy - Descriptive Astronomy 3.0

PHSCS137 Energy, Climate, Environment - Energy, Climate, Environment 3.0

PHSCS220 Intro Electricity & Magnetism - Intro Electricity & Magnetism 3.0

PHSCS222 Modern Physics - Modern Physics 3.0

PHSCS225 Intro to Experimental Physics - Intro to Experimental Physics 2.0

PHSCS240 Dsgn, Fabricatn, Sci Apparatus - Dsgn, Fabricatn, Sci Apparatus 2.0

PWS150 Environmental Biology - Environmental Biology 3.0

Requirement 6 — Complete 2 Requirements

Professional Education Component. Complete both 6.1 and 6.2.

Licensure requirements: Contact the Education Advisement Center, 350 MCKB, 801-422-3426, to schedule the final interview to clear your application for the secondary teaching license. You should be registered for your last semester at BYU prior to the scheduled appointment.

Requirement 6.1 — Complete 7 Courses

CPSE402 Educ Stdnts w/Disablts in ScEd - Educ Stdnts w/Disablts in ScEd 2.0

PHY S312 Science and Tech - Science and Tech 3.0

PHY S276 Exploration of Teaching - Exploration of Teaching 4.0

PHY S377 Teaching Methods & Instruction - Teaching Methods & Instruction 3.0

PHY S378 Practicum in Secondary Educ - Practicum in Secondary Educ 1.0

SC ED353 Multicultural Educ - Multicultural Educ 2.0

SC ED375 Ad Dev & Class Mgmt - Ad Dev & Class Mgmt 3.0

Note: FBI fingerprint and background clearance must be completed before enrollment into Phy S 276.

Requirement 6.2 — Complete 12 hours

PHY S476 Secondary Student Teaching - Secondary Student Teaching 0.0v

PHY S496 Acad Intern: Secondary Ed - Acad Intern: Secondary Ed 0.0v

Student teachers/interns must complete three forms in their Educator accounts (PIBS, CDS, FED) and attach their TWS to the Educator account for their program. All four must be completed to be cleared for graduation.

Requirement 1 — Complete 6 Courses

C S111 Intro to Computer Science - Intro to Computer Science 3.0

C S224 Computer Systems - Computer Systems 3.0

C S235 Data Structures - Data Structures 3.0

C S236 Discrete Structure - Discrete Structure 3.0

C S240 Adv Software Construction - Adv Software Construction 4.0

TES377 Tchg Mthds in Technology Educ - Tchg Mthds in Technology Educ 2.0

Requirement 2 — Complete 1 Course

C S477R Sec Minor Student Teaching - Sec Minor Student Teaching - *You may take once* 4.0

FBI fingerprinting and background clearance must be completed.

Computer Science (Minor)

Program Information

Minimum Credit Hours
19

Maximum Credit Hours
19

Learning Outcomes

Title
Computational Practice

Learning Outcome
Students will design and implement significant computer programs using a combination of design, implementation, documentation, and testing.

Title
Computational Theory

Learning Outcome
Students will analyze problems and their algorithmic solutions using theoretical concepts.

Title
Inclusion, Diversity, Equity

Learning Outcome
Students experience a spirit of belonging and have access to the resources they need to succeed. All students are welcome, including those traditionally underrepresented in CS programs and those new to programming.

Program Requirements

Grades below C- are not allowed in minor courses.

Requirement 1 — Complete 4 Courses

C S111 Intro to Computer Science - Intro to Computer Science 3.0

C S235 Data Structures - Data Structures 3.0

C S236 Discrete Structure - Discrete Structure 3.0

C S240 Adv Software Construction - Adv Software Construction 4.0

Requirement 2 — Complete 6 hours

Complete a total of 2 courses (6.0 credit hours) from the following groups.

Option 2.1 — Complete at least 3 hours up to 6 hours

Complete 1-2 elective courses (3-6 credit hours) from the following list:

C S180 Intro to Data Science - Intro to Data Science 3.0

C S201R Topics in Computer Science - Topics in Computer Science - *You may take up to 3.0 credit hours* 1.0v

C S252 Intro to Computational Theory - Intro to Computational Theory 3.0

C S256 Introduction to HCI - Introduction to HCI 3.0

C S260 Web Programming - Web Programming 3.0

C S270 Intro to Machine Learning - Intro to Machine Learning 3.0

C S301R Topics in Computer Science - Topics in Computer Science - *You may take up to 3.0 credit hours* 1.0v

C S312 Algorithm Design & Analysis - Algorithm Design & Analysis 3.0

C S324 Systems Programming - Systems Programming 3.0

C S329 QA & DevOps - QA & DevOps 3.0

C S330 Concepts of Programng Lang - Concepts of Programng Lang 3.0

C S340 Software Design - Software Design 3.0

C S345 Operating Systems Design - Operating Systems Design 3.0

C S355 Graphics and Image Processing - Graphics and Image Processing 3.0

C S356 Advanced Techniques in HCI - Advanced Techniques in HCI 3.0

C S393 Collaborative Probl Solving - Collaborative Probl Solving 3.0

C S401R Topics in Computer Science - Topics in Computer Science - *You may take up to 3.0 credit hours* 1.0v

C S412 Linear Prog/Convx Optimization - Linear Prog/Convx Optimization 3.0

C S416 Advanced Algorithms - Advanced Algorithms 3.0

C S418 Bioinformatics Algorithms - Bioinformatics Algorithms 3.0

C S428 Software Engineering - Software Engineering 3.0

C S430 Formal Verification - Formal Verification 3.0

C S431 Algorithmic Lang & Compilers - Algorithmic Lang & Compilers 3.0

C S450 Computer Vision - Computer Vision 3.0

C S452 Database Modeling Concepts - Database Modeling Concepts 3.0

C S453 Fund of Information Retrieval - Fund of Information Retrieval 3.0

C S455 Computer Graphics - Computer Graphics 3.0

C S456 Mobile and Ubiquitous HCI - Mobile and Ubiquitous HCI 3.0

C S460 Comp Comms & Networking - Comp Comms & Networking 3.0

C S462 Distributed System Design - Distributed System Design 3.0

C S465 Computer Security - Computer Security 3.0

C S466 Blockchain Technologies - Blockchain Technologies 3.0

C S470 Intro Artificial Intelligence - Intro Artificial Intelligence 3.0

C S471 Voice Interfaces - Voice Interfaces 3.0

C S473 Advanced Machine Learning - Advanced Machine Learning 3.0

C S474 Deep Learning - Deep Learning 3.0

C S479 Intro to Machine Translation - Intro to Machine Translation 3.0

C S486 Verification and Validation - Verification and Validation 3.0

Note: If C S 201R, C S 301$, or C S 401R is chosen, it must be taken for three credit hours.

Option 2.2 — Complete 1 of 2 Courses

C S224 Computer Systems - Computer Systems 3.0

EC EN224 Introduction to Computer Sys - Introduction to Computer Sys 3.0

Computer Science (BS)

Program Information

Minimum Credit Hours
74

Maximum Credit Hours
75

Major Academic Plan
MAPS - BS Computer Science 2026-2027.docx

Learning Outcomes

Title
Analysis

Learning Outcome
Analyze a complex computing problem and to apply principles of computing and other relevant disciplines to identify solutions.

Title
Design

Learning Outcome
Design, implement, and evaluate a computing-based solution to meet a given set of computing requirements in the context of the program's discipline.

Title
Communication

Learning Outcome
Communicate effectively in a variety of professional contexts.

Title
Ethics

Learning Outcome
Recognize professional responsibilities and make informed judgments in computing practice based on legal and ethical principles.

Title
Teamwork

Learning Outcome
Function effectively as a member or leader of a team engaged in activities appropriate to the program's discipline.

Title
Implementation

Learning Outcome
Apply computer science theory and software development fundamentals to produce computing-based solutions.

Program Requirements

Computer science majors, especially those planning graduate work, are advised to acquire a strong background in mathematics, possibly a minor.

Personnel in the College of Physical and Mathematical Sciences Advisement Center will advise regarding core courses and suggested general education. Questions regarding curriculum and career decisions should be directed to the undergraduate advisor in the Computer Science Department.

Note: All hours of credit applied toward a major in computer science must be of C- or better and must be taken within eight years of declaring the computer science major. Any exceptions must be approved by the department. Students may choose to graduate under later requirements by updating their date of entry into the major at the college advisement center.

Note: No double counting is allowed within the major.

Requirement 1 — Complete 13 Courses

Core courses:

C S111 Intro to Computer Science - Intro to Computer Science 3.0

C S191 Exploring CS - Exploring CS 0.5

C S224 Computer Systems - Computer Systems 3.0

C S235 Data Structures - Data Structures 3.0

C S236 Discrete Structure - Discrete Structure 3.0

C S240 Adv Software Construction - Adv Software Construction 4.0

C S252 Intro to Computational Theory - Intro to Computational Theory 3.0

C S260 Web Programming - Web Programming 3.0

C S291 Careers in CS - Careers in CS 0.5

C S312 Algorithm Design & Analysis - Algorithm Design & Analysis 3.0

C S324 Systems Programming - Systems Programming 3.0

C S340 Software Design - Software Design 3.0

C S404 Ethics & Computers in Society - Ethics & Computers in Society 2.0

Requirement 2 — Complete 5 Courses

MATH112 Calculus 1 - Calculus 1 4.0

MATH213 Elementary Linear Algebra - Elementary Linear Algebra 2.0

MATH215 Computational Linear Algebra - Computational Linear Algebra 1.0

PHSCS121 Intro to Newtonian Mechanics - Intro to Newtonian Mechanics 3.0

WRTG316 Technical Communication - Technical Communication 3.0

Requirement 3 — Complete 1 of 3 Courses

MATH431 Probability Theory - Probability Theory 3.0

STAT121 Intro to Stat Data Analysis - Intro to Stat Data Analysis 3.0

STAT201 Stat for Engineers & Scientist - Stat for Engineers & Scientist 3.0

Requirement 4 — Complete 1 of 3 Courses

MATH113 Calculus 2 - Calculus 2 4.0

MATH290 Fundamentals of Mathematics - Fundamentals of Mathematics 3.0

STAT220 Stat Modeling for Data Science - Stat Modeling for Data Science 3.0

Requirement 5 — Complete 21 hours

Complete 21.0 hours from the following option(s)

Option 5.1 — Complete up to 21 hours

Complete 12.0 to 21.0 hours from the following course(s)

C S329 QA & DevOps - QA & DevOps 3.0

C S330 Concepts of Programng Lang - Concepts of Programng Lang 3.0

C S345 Operating Systems Design - Operating Systems Design 3.0

C S355 Graphics and Image Processing - Graphics and Image Processing 3.0

C S356 Advanced Techniques in HCI - Advanced Techniques in HCI 3.0

C S393 Collaborative Probl Solving - Collaborative Probl Solving 3.0

C S401R Topics in Computer Science - Topics in Computer Science - *You may take up to 3.0 credit hours* 1.0v

C S412 Linear Prog/Convx Optimization - Linear Prog/Convx Optimization 3.0

C S416 Advanced Algorithms - Advanced Algorithms 3.0

C S418 Bioinformatics Algorithms - Bioinformatics Algorithms 3.0

C S428 Software Engineering - Software Engineering 3.0

C S430 Formal Verification - Formal Verification 3.0

C S431 Algorithmic Lang & Compilers - Algorithmic Lang & Compilers 3.0

C S450 Computer Vision - Computer Vision 3.0

C S452 Database Modeling Concepts - Database Modeling Concepts 3.0

C S453 Fund of Information Retrieval - Fund of Information Retrieval 3.0

C S455 Computer Graphics - Computer Graphics 3.0

C S456 Mobile and Ubiquitous HCI - Mobile and Ubiquitous HCI 3.0

C S460 Comp Comms & Networking - Comp Comms & Networking 3.0

C S462 Distributed System Design - Distributed System Design 3.0

C S465 Computer Security - Computer Security 3.0

C S466 Blockchain Technologies - Blockchain Technologies 3.0

C S470 Intro Artificial Intelligence - Intro Artificial Intelligence 3.0

C S471 Voice Interfaces - Voice Interfaces 3.0

C S473 Advanced Machine Learning - Advanced Machine Learning 3.0

C S474 Deep Learning - Deep Learning 3.0

C S479 Intro to Machine Translation - Intro to Machine Translation 3.0

C S486 Verification and Validation - Verification and Validation 3.0

C S501R Adv Topics in Computer Sci - Adv Topics in Computer Sci - *You may take up to 3.0 credit hours* 1.0v

C S513 Robust Control - Robust Control 3.0

C S556 Research Methods in HCI - Inter Soft Systems 3.0

C S574 Transformers for NLP - Transformers for NLP 3.0

C S575 Intro to Graph Data Science - Intro to Network Science 3.0

C S575 Intro to Graph Data Science - Intro to Network Science 3.0

C S580 Theory of Predictive Modeling - Theory of Predictive Modeling 3.0

Note: If C S 401R or C S 501R is chosen, it must be taken for three hours.

Option 5.2 — Complete up to 6 hours

Courses can not double count between requirement 4 and option 5.2

C S180 Intro to Data Science - Intro to Data Science 3.0

C S202 Software Engineering Lab 1 - Software Engineering Lab 1 1.0

C S203 Software Engineering Lab 2 - Software Engineering Lab 2 1.0

C S204 Software Engineering Lab 3 - Software Engineering Lab 3 1.0

C S256 Introduction to HCI - Introduction to HCI 3.0

C S270 Intro to Machine Learning - Intro to Machine Learning 3.0

C S405 Software Business - Software Business 3.0

C S 478 - Tools for Machine Learning - *This course is no longer available for registration and will count only if you completed it while it was offered. Please see your college advisement center for possible substitutions.* 3.0

EC EN220 Fund of Digital Systems - Fund of Digital Systems 3.0

MATH113 Calculus 2 - Calculus 2 4.0

MATH290 Fundamentals of Mathematics - Fundamentals of Mathematics 3.0

STAT220 Stat Modeling for Data Science - Stat Modeling for Data Science 3.0

Option 5.3 — Complete up to 8 hours

Complete up to 8.0 hours from the following course(s)

EC EN330 Intro Embedded Programming - Intro Embedded Programming 4.0

EC EN427 Embedded Systems - Embedded Systems 4.0

IS567 Cybersecurity & Pen Testing - Cybersecurity & Pen Testing 3.0

MATH485 Mathematical Cryptography - Mathematical Cryptography 3.0

Option 5.4 — Complete up to 9 hours

C S480 Soft Eng Capstone 1 - Soft Eng Capstone 1 3.0

C S481 Soft Eng Capstone 2 - Soft Eng Capstone 2 3.0

C S482 Data Science Capstone 1 - Data Science Capstone 1 3.0

C S483 Data Science Capstone 2 - Data Science Capstone 2 3.0

C S493R Computing Competitions - Computing Competitions - *You may take up to 3.0 credit hours* 3.0

C S494 Capstone 1 - Capstone 1 3.0

C S495 Capstone 2 - Capstone 2 3.0

C S497R Undergraduate Research - Undergraduate Research - *You may take up to 6.0 credit hours* 3.0

C S498R Undergraduate Special Projects - Undergraduate Special Projects - *You may take up to 3.0 credit hours* 1.0v

Note: If C S 493R, C S 497R, C S 498R, or C S 501R is chosen, it must be taken for three credit hours.

Requirement 6 — Obtain confirmation from your advisement center that you have completed the following:

Complete Senior Exit Interview with the CS department during your last semester or term.

Computer Science (BS): Bioinformatics Emphasis

Program Information

Minimum Credit Hours
79

Maximum Credit Hours
81

Major Academic Plan
MAPS - BS in Computer Science Bioinformatics 2026-2027.docx

Learning Outcomes

Title
Analysis

Learning Outcome
Analyze a complex computing problem and to apply principles of computing and other relevant disciplines to identify solutions.

Title
Design

Learning Outcome
Design, implement, and evaluate a computing-based solution to meet a given set of computing requirements in the context of the program's discipline.

Title
Communication

Learning Outcome
Communicate effectively in a variety of professional contexts.

Title
Ethics

Learning Outcome
Recognize professional responsibilities and make informed judgments in computing practice based on legal and ethical principles.

Program Requirements

Personnel in the College of Physical and Mathematical Sciences Advisement Center will advise regarding core courses and suggested general education. Questions regarding curriculum and career decisions should be directed to the undergraduate advisor in the Computer Science Department.

Note: All hours of credit applied toward a major in computer science must be of C- or better and must be taken within eight years of declaring the computer science major. Any exceptions must be approved by the department. Students may choose to graduate under later requirements by updating their date of entry into the major at the college advisement center.

Requirement 1 — Complete 10 Courses

Computer Science core:

C S111 Intro to Computer Science - Intro to Computer Science 3.0

C S191 Exploring CS - Exploring CS 0.5

C S224 Computer Systems - Computer Systems 3.0

C S235 Data Structures - Data Structures 3.0

C S236 Discrete Structure - Discrete Structure 3.0

C S240 Adv Software Construction - Adv Software Construction 4.0

C S270 Intro to Machine Learning - Intro to Machine Learning 3.0

C S291 Careers in CS - Careers in CS 0.5

C S312 Algorithm Design & Analysis - Algorithm Design & Analysis 3.0

C S404 Ethics & Computers in Society - Ethics & Computers in Society 2.0

Requirement 2 — Complete 7 of 8 Courses

Biology core:

BIO130 Biology - Biology 4.0

BIO165 Introduction to Bioinformatics - Introduction to Bioinformatics 2.0

BIO264 Stat Analysis for Biologists - Stat Analysis for Biologists 4.0

BIO364 Bioinformatics Algorithms - Bioinformatics Algorithms 3.0

BIO465 Capstone in Bioinformatics - Capstone in Bioinformatics 3.0

C S418 Bioinformatics Algorithms - Bioinformatics Algorithms 3.0

MMBIO240 Molecular Biology - Molecular Biology 3.0

PWS340 Genetics - Genetics 3.0

Requirement 3 — Complete 5 Courses

Supporting courses:

CHEM105 Gen College Chem 1+Lab Integr - Gen College Chem 1+Lab Integr 4.0

MATH112 Calculus 1 - Calculus 1 4.0

MATH213 Elementary Linear Algebra - Elementary Linear Algebra 2.0

MATH215 Computational Linear Algebra - Computational Linear Algebra 1.0

WRTG316 Technical Communication - Technical Communication 3.0

Requirement 4 — Complete 1 of 2 Courses

BIO250 Evolutionary Medicine - Evolutionary Medicine 2.0

BIO420 Evolutionary Biology - Evolutionary Biology 4.0

Requirement 5 — Complete 1 of 2 Courses

C S473 Advanced Machine Learning - Advanced Machine Learning 3.0

C S474 Deep Learning - Deep Learning 3.0

Requirement 6 — Complete 12 hours

Courses will not double count between Requirement 5 and Requirement 6.

Option 6.1 — Complete at least 6 hours up to 12 hours

Complete up to 12 hours from the following courses

BIO463 Genetics of Human Disease - Genetics of Human Disease 3.0

C S256 Introduction to HCI - Introduction to HCI 3.0

C S260 Web Programming - Web Programming 3.0

C S329 QA & DevOps - QA & DevOps 3.0

C S330 Concepts of Programng Lang - Concepts of Programng Lang 3.0

C S345 Operating Systems Design - Operating Systems Design 3.0

C S355 Graphics and Image Processing - Graphics and Image Processing 3.0

C S356 Advanced Techniques in HCI - Advanced Techniques in HCI 3.0

C S393 Collaborative Probl Solving - Collaborative Probl Solving 3.0

C S401R Topics in Computer Science - Topics in Computer Science - *You may take up to 3.0 credit hours* 1.0v

C S405 Software Business - Software Business 3.0

C S412 Linear Prog/Convx Optimization - Linear Prog/Convx Optimization 3.0

C S416 Advanced Algorithms - Advanced Algorithms 3.0

C S428 Software Engineering - Software Engineering 3.0

C S430 Formal Verification - Formal Verification 3.0

C S431 Algorithmic Lang & Compilers - Algorithmic Lang & Compilers 3.0

C S450 Computer Vision - Computer Vision 3.0

C S452 Database Modeling Concepts - Database Modeling Concepts 3.0

C S453 Fund of Information Retrieval - Fund of Information Retrieval 3.0

C S455 Computer Graphics - Computer Graphics 3.0

C S456 Mobile and Ubiquitous HCI - Mobile and Ubiquitous HCI 3.0

C S460 Comp Comms & Networking - Comp Comms & Networking 3.0

C S462 Distributed System Design - Distributed System Design 3.0

C S465 Computer Security - Computer Security 3.0

C S466 Blockchain Technologies - Blockchain Technologies 3.0

C S470 Intro Artificial Intelligence - Intro Artificial Intelligence 3.0

C S471 Voice Interfaces - Voice Interfaces 3.0

C S473 Advanced Machine Learning - Advanced Machine Learning 3.0

C S474 Deep Learning - Deep Learning 3.0

C S 478 - Tools for Machine Learning - *This course is no longer available for registration and will count only if you completed it while it was offered. Please see your college advisement center for possible substitutions.* 3.0

C S479 Intro to Machine Translation - Intro to Machine Translation 3.0

C S480 Soft Eng Capstone 1 - Soft Eng Capstone 1 3.0

C S481 Soft Eng Capstone 2 - Soft Eng Capstone 2 3.0

C S482 Data Science Capstone 1 - Data Science Capstone 1 3.0

C S483 Data Science Capstone 2 - Data Science Capstone 2 3.0

C S486 Verification and Validation - Verification and Validation 3.0

C S493R Computing Competitions - Computing Competitions - *You may take up to 3.0 credit hours* 3.0

C S513 Robust Control - Robust Control 3.0

C S556 Research Methods in HCI - Inter Soft Systems 3.0

C S574 Transformers for NLP - Transformers for NLP 3.0

C S575 Intro to Graph Data Science - Intro to Network Science

C S580 Theory of Predictive Modeling - Theory of Predictive Modeling 3.0

Option 6.2 — Complete up to 6 hours

C S497R Undergraduate Research - Undergraduate Research - *You may take up to 6.0 credit hours* 3.0

C S498R Undergraduate Special Projects - Undergraduate Special Projects - *You may take up to 3.0 credit hours* 1.0v

Requirement 7 — Obtain confirmation from your advisement center that you have completed the following:

Complete Senior Exit Interview with the CS department during your last semester or term.

Computer Science (BS): Animation and Games Emphasis

Program Information

Minimum Credit Hours
77

Maximum Credit Hours
81.5

Major Academic Plan
MAPS - BS in Computer Science Animation and Games 2026-2027.docx

Learning Outcomes

Title
Analysis

Learning Outcome
Analyze a complex computing problem and to apply principles of computing and other relevant disciplines to identify solutions.

Title
Design

Learning Outcome
Design, implement, and evaluate a computing-based solution to meet a given set of computing requirements in the context of the program's discipline.

Title
Communication

Learning Outcome
Communicate effectively in a variety of professional contexts.

Title
Ethics

Learning Outcome
Recognize professional responsibilities and make informed judgments in computing practice based on legal and ethical principles.

Title
Teamwork

Learning Outcome
Function effectively as a member or leader of a team engaged in activities appropriate to the program's discipline.

Title
Implementation

Learning Outcome
Apply computer science theory and software development fundamentals to produce computing-based solutions.

Program Requirements
Grades below C- are not allowed in major courses.

Requirement 1 — Complete 6 Courses

Prerequisite Courses:

C S111 Intro to Computer Science - Intro to Computer Science 3.0

C S191 Exploring CS - Exploring CS 0.5

C S235 Data Structures - Data Structures 3.0

C S291 Careers in CS - Careers in CS 0.5

CSANM150 Intro to 3D Graphics - Intro to 3D Graphics 1.5

DESAN101 Intro to Animation - Intro to Animation 1.0

Be admitted to the program.

Requirement 2 — Complete 8 Courses

Complete the following after being admitted to the program:

C S224 Computer Systems - Computer Systems 3.0

C S236 Discrete Structure - Discrete Structure 3.0

C S240 Adv Software Construction - Adv Software Construction 4.0

C S312 Algorithm Design & Analysis - Algorithm Design & Analysis 3.0

C S324 Systems Programming - Systems Programming 3.0

C S355 Graphics and Image Processing - Graphics and Image Processing 3.0

C S455 Computer Graphics - Computer Graphics 3.0

CSANM250 Interm 3D Computer Graphics - Interm 3D Computer Graphics 2.0

Requirement 3 — Complete 5 Courses

Supporting Courses:

MATH112 Calculus 1 - Calculus 1 4.0

MATH213 Elementary Linear Algebra - Elementary Linear Algebra 2.0

MATH215 Computational Linear Algebra - Computational Linear Algebra 1.0

PHSCS121 Intro to Newtonian Mechanics - Intro to Newtonian Mechanics 3.0

WRTG316 Technical Communication - Technical Communication 3.0

Requirement 4 — Complete 1 of 2 Courses

STAT121 Intro to Stat Data Analysis - Intro to Stat Data Analysis 3.0

STAT201 Stat for Engineers & Scientist - Stat for Engineers & Scientist 3.0

Requirement 5 — Complete 1 of 3 Courses

MATH113 Calculus 2 - Calculus 2 4.0

MATH290 Fundamentals of Mathematics - Fundamentals of Mathematics 3.0

STAT220 Stat Modeling for Data Science - Stat Modeling for Data Science 3.0

Requirement 6 — Complete 1 of 2 Courses

CSANM342 Real-time Techniques - Real-time Techniques 3.0

CSANM354 Materials and Surfacing - Materials and Surfacing 3.0

Requirement 7 — Complete 1 of 2 Courses

C S404 Ethics & Computers in Society - Ethics & Computers in Society 2.0

DESAN460 Business & Ethics in Animation - Business & Ethics in Animation 2.0

Requirement 8 — Complete 6 hours

CSANM352 Animated Film Production 1 - Animated Film Production 1 - *You may take once* 3.0

CSANM450 Animated Film Production 2 - Animated Film Production 2 - *You may take once* 3.0

CSANM452 Animated Film Production 3 - Animated Film Production 3 - *You may take once* 3.0

CSANM459 Video Game Production 1 - Video Game Production 1 - *You may take once* 3.0

CSANM460 Video Game Production 2 - Video Game Production 2 - *You may take once* 3.0

Requirement 9 — Complete 6 hours

Note: If C S 401R is chosen, it must be taken for three hours.

C S252 Intro to Computational Theory - Intro to Computational Theory 3.0

C S256 Introduction to HCI - Introduction to HCI 3.0

C S260 Web Programming - Web Programming 3.0

C S270 Intro to Machine Learning- Intro to Machine Learning 3.0

C S329 QA & DevOps - QA & DevOps 3.0

C S330 Concepts of Programng Lang - Concepts of Programig Lang 3.0

C S340 Software Design - Software Design 3.0

C S345 Operating Systems Design - Operating Systems Design 3.0

C S356 Advanced Techniques in HCI -Advanced Techniques in HCI 3.0

C S393 Collaborative Probl Solving - Collaborative Probl Solving 3.0

C S401R Topics in Computer Science - Topics in Computer Science - *You may take up to 3.0 credit hours* 1.0v

C S412 Linear Prog/Convx Optimization - Linear Prog/Convx Optimization 3.0

C S416 Advanced Algorithms - Advanced Algorithms 3.0

C S428 Software Engineering - Software Engineering 3.0

C S430 Formal Verification - Formal Verification 3.0

C S431 Algorithmic Lang & Compilers - Algorithmic Lang & Compilers 3.0

C S450 Computer Vision - Computer Vision 3.0

C S452 Database Modeling Concepts - Database Modeling Concepts 3.0

C S453 Fund of Information Retrieval - Fund of Information Retrieval 3.0

C S456 Mobile and Ubiquitous HCI -Mobile and Ubiquitous HCI 3.0

C S460 Comp Comms & Networking - Comp Comms & Networking 3.0

C S462 Distributed System Design - Distributed System Design 3.0

C S465 Computer Security - Computer Security 3.0

C S466 Blockchain Technologies - Blockchain Technologies 3.0

C S470 Intro Artificial Intelligence - Intro Artificial Intelligence 3.0

C S471 Voice Interfaces - Voice Interfaces 3.0

C S473 Advanced Machine Learning - Advanced Machine Learning 3.0

C S474 Deep Learning - Deep Learning 3.0

C S 478 - Tools for Machine Learning - *This course is no longer available for registration and will count only if you completed it while it was offered. Please see your college advisement center for possible substitutions.* 3.0

C S479 Intro to Machine Translation - Intro to Machine Translation 3.0

C S486 Verification and Validation - Verification and Validation 3.0

C S556 Research Methods in HCI - Inter Soft Systems 3.0

C S574 Transformers for NLP - Transformers for NLP 3.0

C S575 Intro to Graph Data Science - Intro to Network Science 3.0

Requirement 10 — Complete 6 hours

Courses used to fulfill Requirements 6, 8 and 9 cannot be double counted here. Note: If C S 401R, C S 498R, or C S 501R is chosen, it must be taken for three hours.

C S401R Topics in Computer Science - Topics in Computer Science - *You may take up to 3.0 credit hours* 1.0v

C S412 Linear Prog/Convx Optimization - Linear Prog/Convx Optimization 3.0

C S416 Advanced Algorithms - Advanced Algorithms 3.0

C S418 Bioinformatics Algorithms - Bioinformatics Algorithms 3.0

C S428 Software Engineering - Software Engineering 3.0

C S430 Formal Verification - Formal Verification 3.0

C S431 Algorithmic Lang & Compilers - Algorithmic Lang & Compilers 3.0

C S450 Computer Vision - Computer Vision 3.0

C S452 Database Modeling Concepts - Database Modeling Concepts 3.0

C S453 Fund of Information Retrieval - Fund of Information Retrieval 3.0

C S456 Mobile and Ubiquitous HCI - Mobile and Ubiquitous HCI 3.0

C S460 Comp Comms & Networking - Comp Comms & Networking 3.0

C S462 Distributed System Design - Distributed System Design 3.0

C S465 Computer Security - Computer Security 3.0

C S 466 - Blockchain Technologies - *This course is no longer available for registration and will count only if you completed it while it was offered. Please see your college advisement center for possible substitutions.* 3.0

C S470 Intro Artificial Intelligence - Intro Artificial Intelligence 3.0

C S471 Voice Interfaces - Voice Interfaces 3.0

C S473 Advanced Machine Learning - Advanced Machine Learning 3.0

C S474 Deep Learning - Deep Learning 3.0

C S479 Intro to Machine Translation - Intro to Machine Translation 3.0

C S486 Verification and Validation - Verification and Validation 3.0

C S498R Undergraduate Special Projects - Undergraduate Special Projects - *You may take up to 3.0 credit hours* 1.0v

C S500 Business Career Essentials - Business Career Essentials 1.5

C S501R Adv Topics in Computer Sci - Adv Topics in Computer Sci - *You may take up to 3.0 credit hours* 1.0v

C S513 Robust Control - Robust Control 3.0

C S556 Research Methods in HCI - Inter Soft Systems 3.0

C S574 Transformers for NLP - Transformers for NLP 3.0

C S575 Intro to Graph Data Science - Intro to Network Science 3.0

C S580 Theory of Predictive Modeling - Theory of Predictive Modeling 3.0

CSANM210 Visual Narrative - Visual Narrative 3.0

CSANM252 Intro 3D Animation - Intro 3D Animation 3.0

CSANM258 Scripting for Animation - Scripting for Animation 3.0

CSANM340 Game Design - Game Design 2.0

CSANM342 Real-time Techniques - Real-time Techniques 3.0

CSANM351R Lighting for 3D Graphics - Lighting for 3D Graphics - *You may take once* 3.0

CSANM353 Previsualization - Previsualization 3.0

CSANM354 Materials and Surfacing -Materials and Surfacing 3.0

CSANM355 Photography for Animation - Photography for Animation 3.0

CSANM452 Animated Film Production 3 - Senior Film Production 2 - *You may take once* 3.0

CSANM454 Advanced Shading - Advanced Shading 3.0

CSANM458R 3D Visual Effects - 3D Visual Effects 3.0

DESAN364R Digital Sculpting - Digital Sculpting - *You may take once* 3.0

EC EN425 Real-Time Operating Systems - Real-Time Operating Systems 4.0

Requirement 11 — Complete 1 of 3 Courses

ARTHC111 Introduction to Art History - Introduction to Art History 3.0

ARTHC202 World Civilization Since 1500 - World Civilization Since 1500 3.0

TMA294 History of Animation - History of Animation 3.0

Requirement 12 — Obtain confirmation from your advisement center that you have completed the following:

Complete Senior Exit interview with the CS department during your last semester or term.

Machine Learning (BS)

Program Information

Minimum Credit Hours
74

Maximum Credit Hours
74

Major Academic Plan
MAPS - BS in Machine Learning 2026-2027.docx

Learning Outcomes

Title
Machine Learning Practice

Learning Outcome
Students will design and implement significant computer programs that meet a human need.

Title
Machine Learning Theory

Learning Outcome
Students will analyze problems and their algorithmic solutions using theoretical concepts.

Title
Career Preparation

Learning Outcome
Students will have sufficient maturity in machine learning to work in a professional setting or enter a graduate program.

Title
Diversity, Equity, and Inclusion

Learning Outcome
Our program is accessible to everyone, including women, minorities, and those new to programming, and provides an equal opportunity for every student to succeed.

Program Requirements

Grades below C- are not allowed in major courses.

Requirement 1 — Complete 12 Courses

C S111 Intro to Computer Science - Intro to Computer Science 3.0

C S180 Intro to Data Science - Intro to Data Science 3.0

C S191 Exploring CS - Exploring CS 0.5

C S235 Data Structures - Data Structures 3.0

C S236 Discrete Structure - Discrete Structure 3.0

C S240 Adv Software Construction - Adv Software Construction 4.0

C S270 Intro to Machine Learning - Intro to Machine Learning 3.0

C S291 Careers in CS - Careers in CS 0.5

C S312 Algorithm Design & Analysis - Algorithm Design & Analysis 3.0

C S404 Ethics & Computers in Society - Ethics & Computers in Society 2.0

C S473 Advanced Machine Learning - Advanced Machine Learning 3.0

C S474 Deep Learning - Deep Learning 3.0

Requirement 2 — Complete 3 Courses

MATH112 Calculus 1 - Calculus 1 4.0

MATH290 Fundamentals of Mathematics- Fundamentals of Mathematics 3.0

MATH380 Mathematics of Data Science - Mathematics of Data Science 3.0

Requirement 3 — Complete 2 Courses

MATH213 Elementary Linear Algebra - Elementary Linear Algebra 2.0

MATH215 Computational Linear Algebra - Computational Linear Algebra 1.0

Requirement 4 — Complete 1 of 2 Courses

STAT121 Intro to Stat Data Analysis - Principles of Statistics 3.0

STAT201 Stat for Engineers & Scientist - Stat for Engineers & Scientist 3.0

Requirement 5 — Complete 1 of 3 Courses

ECON388 Intro to Econometrics - Intro to Econometrics 3.0

STAT220 Stat Modeling for Data Science - Stat Modeling for Data Science 3.0

STAT330 Statistical Modeling 2 - Introduction to Regression 3.0

Requirement 6 — Complete 3 of 7 Courses

C S412 Linear Prog/Convx Optimization - Linear Prog/Convx Optimization 3.0

C S450 Computer Vision - Computer Vision 3.0

C S470 Intro Artificial Intelligence - Intro Artificial Intelligence 3.0

C S471 Voice Interfaces - Voice Interfaces 3.0

C S479 Intro to Machine Translation - Intro to Machine Translation 3.0

C S574 Transformers for NLP - Transformers for NLP 3.0

MATH522 Mathematics of Deep Learning - Methods of Applied Math 2 3.0

Requirement 7 — Complete 6 hours

Option 7.1 — Complete up to 6 hours

C S482 Data Science Capstone 1 - Data Science Capstone 1 3.0

C S483 Data Science Capstone 2 - Data Science Capstone 2 3.0

Option 7.2 — Complete up to 6 hours

C S497R Undergraduate Research - Undergraduate Research - *You may take twice* 3.0

If you complete this option you must take two semesters, totaling 6.0 credits

Requirement 8 — Complete 9 hours

Note: Courses taken to fulfill Requirements 6 and 7 cannot double count here

C S412 Linear Prog/Convx Optimization - Linear Prog/Convx Optimization 3.0

C S418 Bioinformatics Algorithms - Bioinformatics Algorithms 3.0

C S450 Computer Vision - Computer Vision 3.0

C S452 Database Modeling Concepts - Database Modeling Concepts 3.0

C S453 Fund of Information Retrieval - Fund of Information Retrieval 3.0

C S470 Intro Artificial Intelligence - Intro Artificial Intelligence 3.0

C S471 Voice Interfaces - Voice Interfaces 3.0

C S479 Intro to Machine Translation - Intro to Machine Translation 3.0

C S513 Robust Control - Robust Control 3.0

C S574 Transformers for NLP - Transformers for NLP 3.0

C S575 Intro to Graph Data Science - Intro to Graph Data Science 3.0

C S580 Theory of Predictive Modeling - Theory of Predictive Modeling 3.0

ECON378 Statistics for Economists - Statistics for Economists 3.0

LING581 Natural Lang Processing - Natural Lang Processing 3.0

MATH113 Calculus 2 - Calculus 2 4.0

MATH314 Calculus of Several Variables - Calculus of Several Variables 3.0

MATH413 Advanced Linear Algebra - Advanced Linear Algebra 3.0

MATH431 Probability Theory - Probability Theory 3.0

STAT240 Probability and Inference 1 - Probability and Inference 1 3.0

STAT251 Intro to Bayesian Statistics - Intro to Bayesian Statistics 3.0

STAT340 Probability and Inference 2 - Probability and Inference 2 3.0

STAT386 Data Science Process - Data Science Process 3.0

Requirement 9 — Obtain confirmation from your advisement center that you have completed the following:

Complete Senior Exit Interview with the Computer Science department during last semester or term.

Note: Math 112, Math 113, Phscs 121, Engl 316, and C S 312 can be used to fill both General Education and program requirements. Advanced Writing and Oral Communication: Engl 316. Quantitative Reasoning: Math 112 or 113. Languages of Learning: Math 112 or 113. Physical Science: C S 312 or Phscs 121.

Learning Outcomes

Title
Analysis

Learning Outcome
Analyze a complex computing problem and to apply principles of computing and other relevant disciplines to identify solutions.

Title
Design

Learning Outcome
Design, implement, and evaluate a computing-based solution to meet a given set of computing requirements in the context of the program's discipline.

Title
Communication

Learning Outcome
Communicate effectively in a variety of professional contexts.

Title
Ethics

Learning Outcome
Recognize professional responsibilities and make informed judgments in computing practice based on legal and ethical principles.

Title
Teamwork

Learning Outcome
Function effectively as a member or leader of a team engaged in activities appropriate to the program's discipline.

Title
Implementation

Learning Outcome
Apply computer science theory and software development fundamentals to produce computing-based solutions.

Program Requirements
Grades below C- are not allowed in major courses.

Requirement 1 — Complete 19 Courses

Core courses:

C S111 Intro to Computer Science - Intro to Computer Science 3.0

C S191 Exploring CS - Exploring CS 0.5

C S202 Software Engineering Lab 1 - Software Engineering Lab 1 1.0

C S203 Software Engineering Lab 2 - Software Engineering Lab 2 1.0

C S204 Software Engineering Lab 3 - Software Engineering Lab 3 1.0

C S224 Computer Systems - Computer Systems 3.0

C S235 Data Structures - Data Structures 3.0

C S236 Discrete Structure - Discrete Structure 3.0

C S240 Adv Software Construction - Adv Software Construction 4.0

C S260 Web Programming - Web Programming 3.0

C S291 Careers in CS - Careers in CS 0.5

C S312 Algorithm Design & Analysis - Algorithm Design & Analysis 3.0

C S324 Systems Programming - Systems Programming3.0

C S329 QA & DevOps - QA & DevOps 3.0

C S340 Software Design - Software Design3.0

C S404 Ethics & Computers in Society - Ethics & Computers in Society2.0

C S452 Database Modeling Concepts - Database Modeling Concepts3.0

C S480 Soft Eng Capstone 1 - Soft Eng Capstone 13.0

C S481 Soft Eng Capstone 2 - Soft Eng Capstone 23.0

Requirement 2 —Complete 5 Courses

MATH112 Calculus 1 - Calculus 14.0

MATH213 Elementary Linear Algebra - Elementary Linear Algebra 2.0

MATH215 Computational Linear Algebra - Computational Linear Algebra 1.0

PHSCS121 Intro to Newtonian Mechanics - Intro to Newtonian Mechanics3.0

WRTG316 Technical Communication - Technical Communication3.0

Requirement 3 — Complete 1 of 2 Courses

STAT121 Intro to Stat Data Analysis - Intro to Stat Data Analysis 3.0

STAT201 Stat for Engineers & Scientist - Stat for Engineers & Scientist 3.0

Requirement 4 — Complete 1 of 3 Courses

MATH113 Calculus 2 - Calculus 2 4.0

MATH290 Fundamentals of Mathematics - Fundamentals of Mathematics 3.0

STAT220 Stat Modeling for Data Science - Stat Modeling for Data Science 3.0

Requirement 5 — Complete 2 of 11 Courses

C S256 Introduction to HCI - Introduction to HCI 3.0

C S270 Intro to Machine Learning - Intro to Machine Learning 3.0

C S330 Concepts of Programng Lang - Concepts of Programng Lang 3.0

C S345 Operating Systems Design - Operating Systems Design 3.0

C S356 Advanced Techniques in HCI - Advanced Techniques in HCI 3.0

C S453 Fund of Information Retrieval - Fund of Information Retrieval 3.0

C S456 Mobile and Ubiquitous HCI -Mobile and Ubiquitous HCI 3.0

C S460 Comp Comms & Networking - Comp Comms & Networking 3.0

C S462 Distributed System Design - Distributed System Design 3.0

C S465 Computer Security - Computer Security 3.0

C S473 Advanced Machine Learning - Advanced Machine Learning 3.0

C S486 Verification and Validation - Verification and Validation 3.0

Requirement 6 — Complete 3 hours

Courses will not double count between Requirement 5 and Requirement 6.

C S252 Intro to Computational Theory - Intro to Computational Theory 3.0

C S256 Introduction to HCI - Introduction to HCI 3.0

C S270 Intro to Machine Learning - Intro to Machine Learning 3.0

C S330 Concepts of Programng Lang - Concepts of Programng Lang 3.0

C S345 Operating Systems Design - Operating Systems Design 3.0

C S355 Graphics and Image Processing - Graphics and Image Processing 3.0

C S356 Advanced Techniques in HCI - Advanced Techniques in HCI 3.0

C S393 Collaborative Probl Solving - Collaborative Probl Solving 3.0

C S401R Topics in Computer Science - Topics in Computer Science - *You may take up to 3.0 credit hours* 1.0v

C S405 Software Business - Software Business 3.0

C S412 Linear Prog/Convx Optimization - Linear Prog/Convx Optimization 3.0

C S416 Advanced Algorithms - Advanced Algorithms 3.0

C S418 Bioinformatics Algorithms - Bioinformatics Algorithms 3.0

C S430 Formal Verification - Formal Verification 3.0

C S450 Computer Vision - Computer Vision 3.0

C S453 Fund of Information Retrieval - Fund of Information Retrieval 3.0

C S455 Computer Graphics - Computer Graphics 3.0

C S456 Mobile and Ubiquitous HCI - Mobile and Ubiquitous HCI 3.0

C S460 Comp Comms & Networking - Comp Comms & Networking 3.0

C S462 Distributed System Design - Distributed System Design 3.0

C S465 Computer Security - Computer Security 3.0

C S466 Blockchain Technologies - Blockchain Technologies 3.0

C S470 Intro Artificial Intelligence - Intro Artificial Intelligence 3.0

C S471 Voice Interfaces - Voice Interfaces 3.0

C S473 Advanced Machine Learning - Advanced Machine Learning 3.0

C S474 Deep Learning - Deep Learning 3.0

C S479 Intro to Machine Translation - Intro to Machine Translation 3.0

C S486 Verification and Validation - Verification and Validation 3.0

C S493R Computing Competitions - Computing Competitions - *You may take up to 3.0 credit hours* 3.0

C S497R Undergraduate Research - Undergraduate Research - *You may take up to 6.0 credit hours* 3.0

C S498R Undergraduate Special Projects - Undergraduate Special Projects - *You may take up to 3.0 credit hours* 1.0v

C S501R Adv Topics in Computer Sci - Adv Topics in Computer Sci - *You may take up to 3.0 credit hours* 1.0v

C S513 Robust Control - Robust Control 3.0

C S556 Research Methods in HCI - Inter Soft Systems 3.0

C S574 Transformers for NLP - Transformers for NLP 3.0

C S575 Intro to Graph Data Science - Intro to Network Science 3.0

C S580 Theory of Predictive Modeling - Theory of Predictive Modeling 3.0

EC EN424 Computer Systems - Computer Systems 4.0

EC EN425 Real-Time Operating Systems - Real-Time Operating Systems 4.0

CYBER467 Cybersecurity & Pen Test - Cybersecurity & Pen Test 3.0

MATH411 Numerical Methods - Numerical Methods 3.0

MATH431 Probability Theory - Probability Theory 3.0

MATH485 Mathematical Cryptography - Mathematical Cryptography 3.0

Note: If C S 493R, C S 498R, or C S 501R is chosen, it must be taken for 3 credit hours.

Requirement 7 — Obtain confirmation from your advisement center that you have completed the following:

Complete Senior Exit interview with the C S department during last semester or term.

Note: Math 112, Math 113, Phscs 121, WRTG 316, and C S 312 can be used to fill both General Education and program requirements. Advanced Writing and Oral Communication: WRTG 316. Quantitative Reasoning: Math 112 or 113. Languages of Learning: Math 112 or 113. Physical Science: C S 312 or Phscs 121.

Computer Science (BS): Human-Computer Interaction Emphasis

Program Information

Minimum Credit Hours
73

Maximum Credit Hours
74

Major Academic Plan
MAPS - BS in Computer Science - Human Computer Interaction 2026-2027.docx

Learning Outcomes

Title
Computational Practice

Learning Outcome
Students will design and implement significant computer programs using a combination of design, implementation, documentation, and testing.

Title
Computational Theory

Learning Outcome
Students will analyze problems and their algorithmic solutions using theoretical concepts.

Title
Career Preparation

Learning Outcome
Students will have sufficient maturity in computer science to work in a professional setting or enter a graduate program.

Title
Inclusion, Diversity, Equity

Learning Outcome
Students experience a spirit of belonging and have access to the resources they need to succeed. All students are welcome, including those traditionally underrepresented in CS programs and those new to programming.

Title
Methods

Learning Outcome
Select and use appropriate evaluation methods.

Title
Prototypes

Learning Outcome
Construct prototypes with varying degrees of fidelity and fluidity.

Title
HCI Theories

Learning Outcome
Understand theories and concepts that inform the design of interactive systems.

Program Requirements

Requirement 1 —Complete 9 Courses

C S111 Intro to Computer Science - Intro to Computer Science 3.0

C S224 Computer Systems - Computer Systems 3.0

C S235 Data Structures- Data Structures 3.0

C S236 Discrete Structure - Discrete Structure 3.0

C S240 Adv Software Construction - Adv Software Construction 4.0

C S260 Web Programming - Web Programming 3.0

C S312 Algorithm Design & Analysis - Algorithm Design & Analysis 3.0

C S340 Software Design - Software Design 3.0

C S404 Ethics & Computers in Society - Ethics & Computers in Society 2.0

Requirement 2 —Complete 5 Courses

MATH112 Calculus 1 - Calculus 1 4.0

MATH213 Elementary Linear Algebra - Elementary Linear Algebra 2.0

MATH215 Computational Linear Algebra - Computational Linear Algebra 1.0

PHSCS121 Intro to Newtonian Mechanics - Intro to Newtonian Mechanics 3.0

WRTG316 Technical Communication - Technical Communication 3.0

Requirement 3 —Complete 1 of 2 Courses

STAT121 Intro to Stat Data Analysis - Intro to Stat Data Analysis 3.0

STAT201 Stat for Engineers & Scientist - Stat for Engineers & Scientist 3.0

Requirement 4 —Complete 1 of 3 Courses

MATH113 Calculus 2 - Calculus 2 4.0

MATH290 Fundamentals of Mathematics - Fundamentals of Mathematics 3.0

STAT230 Statistical Modeling 1 - Statistical Modeling 1 3.0

Requirement 5 —Complete 3 Courses

C S256 Introduction to HCI - Introduction to HCI 3.0

C S356 Advanced Techniques in HCI - Advanced Techniques in HCI 3.0

C S456 Mobile and Ubiquitous HCI - Mobile and Ubiquitous HCI 3.0

Requirement 6 —Complete 1 of 4 Courses

If COMMS 101 is taken, students should enroll in the online section

ANTHR101 Culture and Human Experience - Social/Cultural Anthropology 3.0

COMMS101 Mass Comm & Soc - Mass Comm & Soc 3.0

PSYCH111 Psychological Science - Psychological Science 3.0

SOC111 Introductory Sociology - Introductory Sociology 3.0

Requirement 7 —Complete 1 of 2 Courses

Note: Courses taken to fulfill Requirement 4 cannot double count here.

EXDM300 Creating a Good Life - Creating a Good Life 3.0

STAT230 Statistical Modeling 1 - Statistical Modeling 1 3.0

Requirement 8 —Complete 12 hours

Option 8.1 —Complete up to 12 hours

C S252 Intro to Computational Theory - Intro to Computational Theory 3.0

C S324 Systems Programming - Systems Programming 3.0

C S329 QA & DevOps - QA & DevOps 3.0

C S330 Concepts of Programng Lang - Concepts of Programng Lang 3.0

C S345 Operating Systems Design - Operating Systems Design 3.0

C S355 Graphics and Image Processing - Graphics and Image Processing 3.0

C S393 Collaborative Probl Solving - Collaborative Probl Solving 3.0

C S401R Topics in Computer Science - Topics in Computer Science - You may take once 1.0v

C S412 Linear Prog/Convx Optimization - Linear Prog/Convx Optimization 3.0

C S416 Advanced Algorithms - Advanced Algorithms

C S418 Bioinformatics Algorithms - Bioinformatics

C S428 Software Engineering - Software Engineering 3.0

C S430 Formal Verification - Formal Verification

C S431 Algorithmic Lang & Compilers - Algorithmic Lang & Compilers 3.0

C S450 Computer Vision - Computer Vision 3.0

C S452 Database Modeling Concepts - Database Modeling Concepts 3.0

C S453 Fund of Information Retrieval - Fund of Information Retrieval 3.0

C S455 Computer Graphics - Computer Graphics 3.0

C S460 Comp Comms & Networking - Comp Comms & Networking 3.0

C S462 Distributed System Design - Distributed System Design 3.0

C S465 Computer Security - Computer Security 3.0

C S471 Voice Interfaces - Voice Interfaces 3.0

C S473 Advanced Machine Learning - Advanced Machine Learning

C S474 Deep Learning - Deep Learning 3.0

C S479 Intro to Machine Translation - Intro to Machine Translation 3.0

C S486 Verification and Validation - Verification and Validation 3.0

C S501R Adv Topics in Computer Sci - Adv Topics in Computer Sci - You may take once 1.0v

C S513 Robust Control - Robust Control 3.0

C S556 Research Methods in HCI - Research Methods in HCI 3.0

C S574 Transformers for NLP - Transformers for NLP 3.0

C S575 Intro to Graph Data Science - Intro to Graph Data Science 3.0

C S580 Theory of Predictive Modeling - Theory of Predictive Modeling 3.0

Option 8.2 —Complete up to 3 hours

C S493R Computing Competitions - Computing Competitions - You may take once 3.0

C S497R Undergraduate Research - Undergraduate Research - You may take once 3.0

C S498R Undergraduate Special Projects - Undergraduate Special Projects - You may take once 1.0v

Geology (Minor)

Program Information

Minimum Credit Hours
17

Maximum Credit Hours
18

Program Requirements

No D credit is allowed in minor courses.

Requirement 1 — Complete 2 Courses

GEOL111 Physical Geology - Physical Geology 4.0

GEOL112 Historical Geology - Historical Geology 4.0

Requirement 2 — Complete 3 Courses

GEOL100 Dinosaurs - Dinosaurs 3.0

GEOL109 Geology of Planets - Geology of Planets 3.0

GEOL210 Field Studies - Field Studies 3.0

GEOL351 Mineralogy - Mineralogy 4.0

GEOL352 Petrology - Petrology 3.0

GEOL370 Sedimentology & Stratigraphy - Sedimentology & Stratigraphy 3.0

GEOL375 Structural Geology - Structural Geology 3.0

GEOL405 GeoMathematics - GeoMathematics 3.0

GEOL411 Geomorphology - Geomorphology 3.0

GEOL435 Groundwater - Groundwater 3.0

GEOL440 Solid Earth Geophysics - Solid Earth Geophysics 3.0

GEOL445 Geochemistry - Geochemistry 3.0

GEOL452 Petrography to Petrogenesis - Petrography to Petrogenesis 3.0

GEOL460 Economic & Resource Geology - Economic & Resource Geology 3.0

GEOL480 Paleontology - Paleontology 3.0

GEOL546 Isotope Geochemistry-Low Temp - Isotope Geochemistry-Low Temp 3.0

Earth & Space Science Education (BS)

Program Information

Minimum Credit Hours
83

Maximum Credit Hours
85

Major Academic Plan
MAPS - BS in Earth and Space Science Education 2025-2026.pdf

Learning Outcomes

Title
Earth and Space Science Fundamentals

Learning Outcome
Obtain a broad, basic knowledge of the earth and space sciences. (BYU AIMS 1,2,3)

Title
Instructional Design and Development

Learning Outcome
Be able to design and develop inquiry-based science units. (BYU AIMS 2,4)

Title
INTASC Standards

Learning Outcome
Understand and apply the goals and standards of Interstate New Teacher Assessment and Support Consortium (INTASC). (BYU AIMS 2,3,4)

Title
Teaching Sensitive Concepts

Learning Outcome
Understand how to teach sensitive scientific concepts such as evolution by means of natural selection, age of the Earth and solar system and the Big Bang in the public school setting.

Title
Professional and Moral Practice

Learning Outcome
Understand and apply the Moral Dimensions of Teaching as embraced by the McKay School of Education (BYU AIMS 1,2,3,4)

Program Requirements
This major is designed to prepare students to teach in public schools. In order to graduate with this major, students are required to complete Utah State Office of Education licensing requirements. To view these requirements go to https://www.schools.utah.gov/curr/licensing or contact the Education Advisement Center, 350 MCKB, 801-422-3426.

For students accepted into the major after December 16, 2019, grades below C in any required coursework in a teaching major or teaching minor will not be accepted. Teacher candidates must maintain a cumulative GPA of 2.7 or higher once admitted into the program and to qualify for student teaching. For additional details on admission and retention requirements for teaching majors and teaching minors, see Educator Preparation Program Requirements in the Undergraduate Catalog.

Requirement 1 —Complete 4 Courses

GEOL111 Physical Geology - Physical Geology 4.0

GEOL112 Historical Geology - Historical Geology 4.0

GEOL210 Field Studies - Field Studies 3.0

GEOL411 Geomorphology - Geomorphology 3.0

Requirement 2 —Complete 2 hours

Take 4 times.

GEOL491R Geology Seminar - Geology Seminar - *You may take up to 2.0 credit hours* 0.5

Requirement 3 —Complete 3 of 15 Courses

GEOL100 Dinosaurs - Dinosaurs 3.0

GEOL109 Geology of Planets - Geology of Planets 3.0

GEOL230 Earth Data Vis - Earth Data Visualization 3.0

GEOL351 Mineralogy - Mineralogy 4.0

GEOL352 Petrology - Petrology 3.0

GEOL370 Sedimentology & Stratigraphy - Sedimentology & Stratigraphy 3.0

GEOL375 Structural Geology - Structural Geology 3.0

GEOL405 GeoMathematics - GeoMathematics 3.0

GEOL435 Groundwater - Groundwater 3.0

GEOL440 Solid Earth Geophysics - Solid Earth Geophysics 3.0

GEOL445 Geochemistry - Geochemistry 3.0

GEOL452 Petrography to Petrogenesis - Petrography to Petrogenesis 3.0

GEOL460 Economic & Resource Geology - Economic & Resource Geology 3.0

GEOL476 Intro Seismic Interpretation - Intro Seismic Interpretation 3.0

GEOL480 Paleontology - Paleontology 3.0

Requirement 4 —Complete 1 of 2 Options

Option 4.1 —Complete 3 Courses

CHEM105 Gen College Chem 1+Lab Integr - Gen College Chem 1+Lab Integr 4.0

CHEM106 General College Chemistry 2 - General College Chemistry 2 3.0

CHEM107 Gen Coll Chem Lab - Gen Coll Chem Lab 1.0

Option 4.2 —Complete 2 Courses

CHEM111 Principles of Chemistry 1 - Principles of Chemistry 1 4.0

CHEM112 Principles of Chemistry 2 - Principles of Chemistry 2 3.0

Requirement 5 —Complete 8 Courses

MATH112 Calculus 1 - Calculus 1 4.0

PHSCS105 General Physics 1 - General Physics 1 3.0

PHSCS106 General Physics 2 - General Physics 2 3.0

PHSCS107 General Physics Lab 1 - General Physics Lab 1 1.0

PHSCS108 General Physics Lab 2 - General Physics Lab 2 1.0

PHSCS127 Descriptive Astronomy - Descriptive Astronomy 3.0

PHSCS137 Energy, Climate, Environment - Energy, Climate, Environment 3.0

WRTG316 Technical Communication - Technical Communication 3.0

Requirement 6 —Complete 2 Requirements

Professional Education Component:

Licensure requirements: Contact the Education Advisement Center, 350 MCKB, 801-422-3426, to schedule the final interview to clear your application for the secondary teaching license. You should be registered for your last semester at BYU prior to the scheduled appointment.

Requirement 6.1 —Complete 7 Courses

CPSE402 Educ Stdnts w/Disablts in ScEd - Educ Stdnts w/Disablts in ScEd 2.0

PHY S312 Science and Tech - Science and Tech 3.0

PHY S276 Exploration of Teaching - Exploration of Teaching 4.0

PHY S377 Teaching Methods & Instruction - Teaching Methods & Instruction 3.0

PHY S378 Practicum in Secondary Educ - Practicum in Secondary Educ 1.0

SC ED353 Multicultural Educ - Multicultural Educ 2.0

SC ED375 Ad Dev & Class Mgmt - Multicultural Educ 2.0

Note: Fingerprinting and FBI clearance must be completed before enrollment in Phy S 276.

Requirement 6.2 —Complete 12 hours

PHY S476 Secondary Student Teaching - Secondary Student Teaching 0.0v

PHY S496 Acad Intern: Secondary Ed - Acad Intern: Secondary Ed 0.0v

Student teachers/interns must complete three forms in their Educator accounts (PIBS, CDS, FED) and attach their TWS to the Educator account for their program. All four must be completed to be cleared for graduation.

Geology (BS)

Program Information

Minimum Credit Hours
73

Maximum Credit Hours
74

Major Academic Plan
MAPS - BS in Geology 2026-2027.docx

Learning Outcomes

Title
Effective Inquiry and Communication

Learning Outcome
Demonstrate competence in scientific inquiry writing and oral presentation.

Title
Professional Preparation

Learning Outcome
Be employable in geology-related fields or able to further their education in graduate programs.

Title
Technical Competence

Learning Outcome
Demonstrate competence in relevant computer applications laboratory methods and field methods.

Title
Discussing Society's Impact on the Planet

Learning Outcome
Demonstrate the ability to critically discuss issues related to geology that impact society and planet Earth.

Title
Discussing Science and Religion

Learning Outcome
Demonstrate the ability to critically discuss the relationship between science and religion.

Program Requirements
Licensure: This program meets the educational requirements designed to lead to an occupationally required professional license or certificate in the state of Utah. Students pursuing occupations requiring a license or certificate in a state other

than Utah should contact the appropriate BYU academic advisement center as well as the licensing agency in the state where they intend to work to seek information and guidance regarding licensure and certification requirements.

No D credit is allowed in major courses.

Requirement 1 — Complete 11 Courses

GEOL111 Physical Geology - Physical Geology 4.0

GEOL112 Historical Geology - Historical Geology 4.0

GEOL210 Field Studies - Field Studies 3.0

GEOL230 Earth Data Vis - Earth Data Vis 3.0

GEOL320 Geology GIS - Geology GIS 3.0

GEOL351 Mineralogy - Mineralogy 4.0

GEOL352 Petrology - Petrology 3.0

GEOL370 Sedimentology & Stratigraphy - Sedimentology & Stratigraphy 3.0

GEOL375 Structural Geology - Structural Geology 3.0

GEOL420 Geological Field Methods - Geological Field Methods 3.0

GEOL421 Geological Mapping - Geological Mapping 3.0

Requirement 2 — Complete 2 hours

Take 4 times.

GEOL491R Geology Seminar - Geology Seminar - *You may take up to 2.0 credit hours* 0.5

Requirement 3 — Complete 4 of 9 Courses

GEOL405 GeoMathematics - GeoMathematics 3.0

GEOL411 Geomorphology - Geomorphology 3.0

GEOL435 Groundwater - Groundwater 3.0

GEOL440 Solid Earth Geophysics - Solid Earth Geophysics 3.0

GEOL445 Geochemistry - Geochemistry 3.0

GEOL452 Petrography to Petrogenesis - Petrography to Petrogenesis 3.0

GEOL460 Economic & Resource Geology - Economic & Resource Geology 3.0

GEOL476 Intro Seismic Interpretation - Intro Seismic Interpretation 3.0

GEOL480 Paleontology - Paleontology 3.0

Requirement 4 — Complete 1 of 2 Options

Option 4.1 — Complete 3 Courses

CHEM105 Gen College Chem 1+Lab Integr - Gen College Chem 1+Lab Integr 4.0

CHEM106 General College Chemistry 2 - General College Chemistry 2 3.0

Option 4.2 — Complete 2 Courses

CHEM111 Principles of Chemistry 1 - Principles of Chemistry 1 4.0

CHEM112 Principles of Chemistry 2 - Principles of Chemistry 2 3.0

Requirement 5 — Complete 1 of 2 Courses

STAT121 Intro to Stat Data Analysis - Intro to Stat Data Analysis 3.0

STAT201 Stat for Engineers & Scientist - Stat for Engineers & Scientist 3.0

Requirement 6 — Complete 4 Courses

MATH112 Calculus 1 - Calculus 1 4.0

PHSCS105 General Physics 1 - General Physics 1 3.0

PHSCS106 General Physics 2 - General Physics 2 3.0

WRTG316 Technical Communication - Technical Communication 3.0

Geology Education (Minor)

Program Information

Minimum Credit Hours
23

Maximum Credit Hours
23

Program Requirements

This minor is designed to prepare students to teach in public schools. A teaching minor may only be received by students graduating with a teaching major. In order to graduate with this minor, students are required to complete Utah State Office of Education licensing requirements. To view these requirements go to https://www.schools.utah.gov/curr/licensing or contact the Education Advisement Center, 350 MCKB, 801-422-3426.

When all the geology credit required for a minor is transferred from another school, at least one course in geology must be taken at BYU.

For students accepted into the major after December 16, 2019, grades below C in any required coursework in a teaching major or teaching minor will not be accepted. Teacher candidates must maintain a cumulative GPA of 2.7 or higher once admitted into the program and to qualify for student teaching. For additional details on admission and retention requirements for teaching majors and teaching minors, see Educator Preparation Program Requirements in the Undergraduate Catalog.

Requirement 1 — Complete 3 Courses

GEOL111 Physical Geology - Physical Geology 4.0

GEOL112 Historical Geology - Historical Geology 4.0

PHY S377 Teaching Methods & Instruction - Teaching Methods & Instruction 3.0

Requirement 2 — Complete 8 hours

GEOL100 Dinosaurs - Dinosaurs 3.0

GEOL109 Geology of Planets - Geology of Planets 3.0

GEOL210 Field Studies - Field Studies 3.0

GEOL351 Mineralogy - Mineralogy 4.0

GEOL352 Petrology - Petrology 3.0

GEOL370 Sedimentology & Stratigraphy - Sedimentology & Stratigraphy 3.0

Option 4.2 — Complete 2 Courses

CHEM111 Principles of Chemistry 1 - Principles of Chemistry 1 4.0

CHEM112 Principles of Chemistry 2 - Principles of Chemistry 2 3.0

Requirement 5 — Complete 5 Courses

MATH112 Calculus 1 - Calculus 1 4.0

PHSCS105 General Physics 1 - General Physics 1 3.0

PHSCS106 General Physics 2 - General Physics 2 3.0

STAT121 Intro to Stat Data Analysis - Intro to Stat Data Analysis 3.0

WRTG316 Technical Communication - Technical Communication 3.0

Mathematics (Minor)

Program Information

Minimum Credit Hours
20

Maximum Credit Hours
21

Program Requirements

Grades of C- or below will not be accepted.

Substitutions require the approval of the Undergraduate Coordinator of the Department of Mathematics.

Requirement 1 — Complete 3 Courses

MATH112 Calculus 1 - Calculus 1 4.0

MATH113 Calculus 2 - Calculus 2 4.0

MATH290 Fundamentals of Mathematics - Fundamentals of Mathematics 3.0

Requirement 2 — Complete 1 Course

MATH213 Elementary Linear Algebra - Elementary Linear Algebra 2.0

Requirement 3 — Complete 1 of 2 Courses

MATH302 Math for Engr 1 - Math for Engr 1 4.0

MATH314 Calculus of Several Variables - Calculus of Several Variables 3.0

Requirement 4 — Complete 4 hours

MATH215 Computational Linear Algebra - Computational Linear Algebra 1.0

MATH303 Math for Engineering 2 - Math for Engineering 2 4.0

MATH334 Ordinary Differential Equation - Ordinary Differential Equation 3.0

MATH341 Theory of Analysis 1 - Theory of Analysis 1 3.0

MATH342 Theory of Analysis 2 - Theory of Analysis 2 3.0

MATH350 Combinatorics & Graph Theory - Combinatorics & Graph Theory 3.0

MATH352 Intro to Complex Analysis - Intro to Complex Analysis 3.0

MATH362 Survey of Geometry - Survey of Geometry 3.0

MATH371 Abstract Algebra 1 - Abstract Algebra 1 3.0

MATH372 Abstract Algebra 2 - Abstract Algebra 2 3.0

MATH380 Mathematics of Data Science - Mathematics of Data Science 3.0

MATH406R Topics in Mathematics - Topics in Mathematics - *You may take once* 3.0

MATH410 Intro to Numerical Methods - Intro to Numerical Methods 3.0

MATH411 Numerical Methods - Numerical Methods 3.0

MATH413 Advanced Linear Algebra - Advanced Linear Algebra 3.0

MATH425 Mathematical Biology - Mathematical Biology 3.0

MATH431 Probability Theory - Probability Theory 3.0

MATH435 Mathematical Finance - Mathematical Finance 3.0

MATH447 Intro Partial Differential Eqs - Intro Partial Differential Eqs 3.0

MATH451 Introduction to Topology - Introduction to Topology 3.0

MATH465 Differential Geometry - Differential Geometry 3.0

MATH473 Group Representation Theory - Group Representation Theory 3.0

MATH485 Mathematical Cryptography - Mathematical Cryptography 3.0

MATH487 Number Theory - Number Theory 3.0

MATH495R Readings in Math - Readings in Math - *You may take once* 0.5v

MATH510 Num Methods for Linear Algebra - Num Methods for Linear Algebra 3.0

MATH511 Num Methods for Partial Diff - Num Methods for Partial Diff 3.0

MATH513R Adv Topics in Applied Math - Adv Topics in Applied Math - *You may take once* 3.0

MATH521 Classical Applied Mathematics - Classical Applied Mathematics 3.0

MATH522 Mathematics of Deep Learning - Mathematics of Deep Learning 3.0.

MATH525 Network Theory - Network Theory 3.0

MATH532 Complex Analysis - Complex Analysis 3.0

MATH534 Intro to Dynamical Systems 1 - Intro to Dynamical Systems 1 3.0

MATH536 Applied Discrete Probability - Applied Discrete Probability 3.0

MATH540 Linear Analysis - Linear Analysis 3.0

MATH541 Real Analysis - Real Analysis 3.0

MATH547 Modeling and Analysis of PDEs - Modeling and Analysis of PDEs 3.0

MATH553 Foundations of Topology 1 - Foundations of Topology 1 3.0

MATH554 Foundations of Topology 2 - Foundations of Topology 2 3.0

MATH561 Intro to Algebraic Geometry 1 - Intro to Algebraic Geometry 1 3.0

MATH562 Intro to Algebraic Geometry 2 - Intro to Algebraic Geometry 2 3.0

MATH565 Differential Geometry - Differential Geometry 3.0

MATH570 Matrix Analysis - Matrix Analysis 3.0

MATH571 Algebra 1 - Algebra 1 3.0

MATH572 Algebra 2 - Algebra 2 3.0

MATH586 Intro Algebraic Number Theory - Intro Algebraic Number Theory 3.0

MATH587 Intro to Analytic Number Thry - Intro to Analytic Number Thry 3.0

Mathematics (BS)

Program Information

Minimum Credit Hours
53.5

Maximum Credit Hours
53.5

Major Academic Plan
MAPS - BS in Mathematics 2026-2027.docx

Learning Outcomes

Title
Mid-Level Mathematics

Learning Outcome
Demonstrate understanding of mid-level undergraduate mathematics including abstract algebra complex analysis and advanced calculus.

Title
Advanced Mathematics

Learning Outcome
Demonstrate a breadth and depth of knowledge in a coherent group of advanced mathematical topics.

Title
Effective Reasoning and Communication

Learning Outcome
Explain and critique mathematical reasoning through speaking and writing in a precise and articulate manner.

Title
Mathematics Fundamentals

Learning Outcome
Demonstrate basic mathematical understanding and computational skills in calculus, linear algebra, and differential equations.

Program Requirements
Grades of C- or below will not be acceptable in major courses.

Requirement 1 — Complete 13 Courses

Core requirements:

C S111 Intro to Computer Science- Intro to Computer Science 3.0

MATH112 Calculus 1 - Calculus 1 4.0

MATH113 Calculus 2 - Calculus 2 4.0

MATH191 Seminar in Mathematics 1 - Seminar in Mathematics 1 0.5

MATH213 Elementary Linear Algebra- Elementary Linear Algebra 2.0

MATH215 Computational Linear Algebra- Computational Linear Algebra 1.0

MATH290 Fundamentals of Mathematics - Fundamentals of Mathematics 3.0

MATH314 Calculus of Several Variables - Calculus of Several Variables 3.0

MATH334 Ordinary Differential Equation - Ordinary Differential Equation 3.0

MATH341 Theory of Analysis 1 - Theory of Analysis 1 3.0

MATH352 Intro to Complex Analysis - Intro to Complex Analysis 3.0

MATH371 Abstract Algebra 1 - Abstract Algebra 1 3.0

MATH413 Advanced Linear Algebra - Advanced Linear Algebra 3.0

Requirement 2 — Complete 1 of 2 Courses

STAT201 Stat for Engineers & Scientist - Stat for Engineers & Scientist 3.0

MATH431 Probability Theory - Probability Theory 3.0

Requirement 3 — Complete 1 of 3 Courses

C S235 Data Structures - Data Structures 3.0

C S270 Intro to Machine Learning - Intro to Machine Learning 3.0

STAT386 Data Science Process - Data Science Process 3.0

Requirement 4 — Complete 12 hours

Courses cannot double count in Requirement 2 or 3

C S235 Data Structures - Data Structures 3.0

MATH342 Theory of Analysis 2 - Theory of Analysis 2 3.0

MATH350 Combinatorics & Graph Theory - Combinatorics & Graph Theory 3.0

MATH372 Abstract Algebra 2 - Abstract Algebra 2 3.0

MATH380 Mathematics of Data Science - Mathematics of Data Science 3.0

MATH402 Model Uncertainty & Data 1 - Model Uncertainty & Data 1 3.0

MATH403 Model Uncertainty & Data 1 Lab - Model Uncertainty & Data 1 Lab 1.0

MATH404 Model Uncertainty & Data 2 - Model Uncertainty & Data 2 3.0

MATH405 Model Uncertainty & Data 2 Lab - Model Uncertainty & Data 2 Lab 1.0

MATH406R Topics in Mathematics - Topics in Mathematics - *You may take once* 3.0

MATH410 Intro to Numerical Methods - Intro to Numerical Methods 3.0

MATH411 Numerical Methods - Numerical Methods 3.0

MATH425 Mathematical Biology - Mathematical Biology 3.0

MATH431 Probability Theory - Probability Theory 3.0

MATH435 Mathematical Finance - Mathematical Finance 3.0

MATH436 Model Dynamics & Control 1 - Model Dynamics & Control 1 3.0

MATH437 Model Dynamics & Control 1 Lab - Model Dynamics & Control 1 Lab 1.0

MATH438 Model Dynamics & Control 2 - Model Dynamics & Control 2 3.0

MATH439 Model Dynamics & Control 2 Lab - Model Dynamics & Control 2 Lab 1.0

MATH447 Intro Partial Differential Eqs - Intro Partial Differential Eqs 3.0

MATH451 Introduction to Topology - Introduction to Topology 3.0

MATH465 Differential Geometry - Differential Geometry 3.0

MATH473 Group Representation Theory - Group Representation Theory 3.0

MATH485 Mathematical Cryptography - Mathematical Cryptography 3.0

MATH487 Number Theory - Number Theory 3.0

MATH495R Readings in Math - Readings in Math - *You may take once* 0.5v

MATH510 Num Methods for Linear Algebra - Num Methods for Linear Algebra 3.0

MATH511 Num Methods for Partial Diff - Num Methods for Partial Diff 3.0

MATH513R Adv Topics in Applied Math - Adv Topics in Applied Math - *You may take once* 3.0

MATH521 Classical Applied Mathematics - Classical Applied Mathematics 3.0

MATH522 Mathematics of Deep Learning - Mathematics of Deep Learning 3.0

MATH525 Network Theory - Network Theory 3.0

MATH532 Complex Analysis - Complex Analysis 3.0

MATH534 Intro to Dynamical Systems 1 - Intro to Dynamical Systems 1 3.0

MATH536 Applied Discrete Probability - Applied Discrete Probability 3.0

MATH540 Linear Analysis - Linear Analysis 3.0

MATH541 Real Analysis - Real Analysis 3.0

MATH547 Modeling and Analysis of PDEs - Modeling and Analysis of PDEs 3.0

MATH553 Foundations of Topology 1 - Foundations of Topology 1 3.0

MATH554 Foundations of Topology 2 - Foundations of Topology 2 3.0

MATH561 Intro to Algebraic Geometry 1 - Intro to Algebraic Geometry 1 3.0

MATH562 Intro to Algebraic Geometry 2 - Intro to Algebraic Geometry 2 3.0

MATH565 Differential Geometry - Differential Geometry 3.0

MATH570 Matrix Analysis - Matrix Analysis 3.0

MATH571 Algebra 1 - Algebra 1 3.0

MATH572 Algebra 2 - Algebra 2 3.0

MATH586 Intro Algebraic Number Theory - Intro Algebraic Number Theory 3.0

MATH587 Intro to Analytic Number Thry - Intro to Analytic Number Thry 3.0

Requirement 5 — Obtain confirmation from your advisement center that you have completed the following:

Students are required to take either the GRE Mathematics Subject Test or the Mathematics Major Field Test the last semester before they graduate. The tests are ETS (Educational Testing Service) standardized assessment tests of undergraduate mathematics. Go to ETS Math Subject Test (https://www.ets.org/gre/test-takers/subject-tests/about/content-structure.html#accordion-792530b110-item-ab30804f15) or ETS Major Field Tests (https://www.ets.org/mft/about/test-content.html#accordion-635e2f095b-item-2bc2ca81b4) for a test description and sample problems. These tests do not appear on the transcript or affect the GPA.

Students must participate in an exit interview before graduation.

Note: Students who plan to pursue a Ph.D. in mathematics are encouraged to complete Math 372 or Math 473, as well as Math 410, Math 541 and Math 553.

Mathematics (BS): Applied and Computational Mathematics Emphasis

Program Information

Minimum Credit Hours
70

Maximum Credit Hours
76

Major Academic Plan
MAPS - BS Mathematics - Applied and Computational Mathematics 2026-2027.docx

Learning Outcomes

Title
Effective Reasoning and Communication

Learning Outcome
Explain and criticize mathematical reasoning through speaking and writing in a precise and articulate manner.

Title
Mathematics Fundamentals

Learning Outcome
Demonstrate basic mathematical understanding and computational skills in calculus, linear algebra, and differential equations, and advanced calculus.

Title
Statistics

Learning Outcome
Demonstrate a knowledge of inference, estimation, regression, multivariable statistics, Bayesian statistics, time-series analysis, and state-space modeling.

Title
Advanced Applied Mathematics

Learning Outcome
Demonstrate understanding of linear and nonlinear analysis, the analysis of algorithms, combinatorics, asymptotic methods, approximation theory, transform theory, optimization, dynamic programming, probability theory, stochastic processes, differential equations, dynamical systems and optimal control theory.

Title
Computing

Learning Outcome
Demonstrate facility in computer programming, data processing, databases, numerical simulation, scientific visualization, and virtual experimentation. Write, compile and execute numerical algorithms in a low-level language, such as C/C++, as well as develop I/O wrappers for standard numerical libraries in a common scripting language, such as Python. Demonstrate the ability to use the technologies for parallel and distributed computing.

Program Requirements

Requirement 1 — Complete 9 Courses

Complete the following pre-core requirements before junior year:

C S111 Intro to Computer Science - Intro to Computer Science 3.0

MATH112 Calculus 1 - Calculus 1 4.0

MATH113 Calculus 2 - Calculus 2 4.0

MATH213 Elementary Linear Algebra - Elementary Linear Algebra 2.0

MATH215 Computational Linear Algebra - Computational Linear Algebra 1.0

MATH290 Fundamentals of Mathematics - Fundamentals of Mathematics 3.0

MATH314 Calculus of Several Variables - Calculus of Several Variables 3.0

MATH334 Ordinary Differential Equation - Ordinary Differential Equation 3.0

MATH341 Theory of Analysis 1 - Theory of Analysis 1 3.0

Requirement 2 — Complete 4 Courses

Complete the following core requirements first semester of junior year:

MATH320 Algorithm Design & Opt 1 - Algorithm Design & Opt 1 3.0

MATH321 Algorithm Design & Opt 1 Lab - Algorithm Design & Opt 1 Lab 1.0

MATH344 Mathematical Analysis 1 - Mathematical Analysis 1 3.0

MATH345 Mathematical Analysis 1 Lab - Mathematical Analysis 1 Lab 1.0

Requirement 3 — Complete 4 Courses

Complete the following core requirements second semester of junior year:

MATH322 Algorithm Design & Opt 2 - Algorithm Design & Opt 2 3.0

MATH323 Algorithm Design & Opt 2 Lab - Algorithm Design & Opt 2 Lab 1.0

MATH346 Mathematical Analysis 2 - Mathematical Analysis 2 3.0

MATH347 Mathematical Analysis 2 Lab - Mathematical Analysis 2 Lab 1.0

Requirement 4 — Complete 4 Courses

Complete the following core requirements first semester of senior year:

MATH402 Model Uncertainty & Data 1 - Model Uncertainty & Data 1 3.0

MATH403 Model Uncertainty & Data 1 Lab - Model Uncertainty & Data 1 Lab 1.0

MATH436 Model Dynamics & Control 1 - Model Dynamics & Control 1 3.0

MATH437 Model Dynamics & Control 1 Lab - Model Dynamics & Control 1 Lab 1.0

Completion of an internship in the summer term between the junior and senior years is strongly recommended.

Requirement 5 — Complete 4 Courses

Complete the following core requirements second semester of senior year:

MATH404 Model Uncertainty & Data 2 - Model Uncertainty & Data 2 3.0

MATH405 Model Uncertainty & Data 2 Lab - Model Uncertainty & Data 2 Lab 1.0

MATH438 Model Dynamics & Control 2 - Model Dynamics & Control 2 3.0

MATH439 Model Dynamics & Control 2 Lab - Model Dynamics & Control 2 Lab 1.0

Requirement 6 — Obtain confirmation from your advisement center that you have completed the following:

Students are required to complete a concentration (at least 12 credit hours) in an area to which the mathematical and computational tools that they are learning can be applied. The list of the Approved Concentrations is found at https://acme.byu.edu/concentrations-in-acme

Requirement 7 — Obtain confirmation from your advisement center that you have completed the following:

Students are required to take either the GRE Mathematics Subject Test or the Mathematics Major Field Test the last semester before they graduate. The results of these tests do not appear on the transcript or affect the GPA. For more information contact the math department.

Mathematics Education (Minor)

Program Information

Minimum Credit Hours	Maximum Credit Hours
37	37

Program Requirements

Licensure: This program meets the educational requirements designed to lead to an occupationally required professional license or certificate in the state of Utah. Students pursuing occupations requiring a license or certificate in a state other than Utah should contact the appropriate BYU academic advisement center as well as the licensing agency in the state where they intend to work to seek information and guidance regarding licensure and certification requirements.

This minor is designed to prepare students to teach mathematics in public schools. A teaching minor may only be received by students graduating with a teaching major. In order to graduate with this minor, students are required to complete Utah State Office of Education licensing requirements. To view these requirements go to https://www.schools.utah.gov/curr/licensing or contact the Education Advisement Center, 350 MCKB, 801-422-3426.

For students accepted into the major after December 16, 2019, grades below C in any required coursework in a teaching major or teaching minor will not be accepted. Teacher candidates must maintain a cumulative GPA of 2.7 or higher once admitted into their major program to qualify for student teaching. For additional details on admission and retention requirements for teaching majors and teaching minors, see Educator Preparation Program Requirements in the Undergraduate Catalog.

Requirement 1 — Complete 12 Courses

MATH112 Calculus 1 - Calculus 1 4.0

MATH113 Calculus 2 - Calculus 2 4.0

MATH213 Elementary Linear Algebra - Elementary Linear Algebra 2.0

MATH215 Computational Linear Algebra - Computational Linear Algebra 1.0

Learning Outcomes

Title
Assessment of Mathematical Learning

Learning Outcome
Graduates can design and use formative and summative assessments that monitor student progress, inform instructional decisions, and engage students in assessing their own mathematical learning.

Title
Understanding of Mathematics Learners

Learning Outcome
Graduates make instructional decisions that 1) help students develop mathematical knowledge by building on prior knowledge and experience; 2) reflect how students differ cognitively, linguistically, socially, emotionally, and physically; 3) provide students regular opportunities to reason about and make sense of mathematics in an environment of high expectations and strong support.

Title
Mathematics

Learning Outcome
Graduates understand central concepts, tools of inquiry, and structures of the discipline of mathematics as well as core representations, canonical examples, and alternative algorithms germane to teaching secondary school mathematics.

Title
Instructional Design for Mathematics Learning

Learning Outcome
Graduates can design learning environments and mathematical experiences that engage all students in the exploration and development of mathematical ideas and can effectively foster these environments and orchestrate these experiences by promoting conceptual understanding, procedural fluency, and authentic mathematical practices.

Title
Professionalism

Learning Outcome
Graduates demonstrate professionalism through maintaining appropriate relationships and behavior in the school setting, and by seeking opportunities to improve practice and advance the profession through reflecting on practice, soliciting and incorporating feedback, and contributing to professional, school, and community organizations.

Title
Spiritual Stewardship

Learning Outcome
Graduates seek integrity between their personal and professional lives consistent with the restored gospel of Jesus Christ by recognizing all students as children of God and striving to nurture their divine potential; applying gospel-centered principles of teaching and learning to family relationships, gospel service, and involvement in the community; and serving as examples of a Christ-centered life within their spheres of influence.

Title
Equity

Learning Outcome
Graduates make instructional decisions that 1) develop students' understanding that mathematics and mathematical practices are human constructs that are socially situated; 2) provide mathematical and social positions that increase access for all students; 3) challenge systemic privilege and oppression in their classrooms; and 4) provide students opportunities to use mathematics to promote a socially just society.

Program Requirements

Licensure: This program meets the educational requirements designed to lead to an occupationally required professional license or certificate in the state of Utah. Students pursuing occupations requiring a license or certificate in a state other than Utah should contact the appropriate BYU academic advisement center as well as the licensing agency in the state where they intend to work to seek information and guidance regarding licensure and certification requirements.

This major is designed to prepare students to teach in public schools. In order to graduate with this major, students are required to complete Utah State Office of Education licensing requirements. To view these requirements go to https://www.schools.utah.gov/curr/licensing or contact the Education Advisement Center, 350 MCKB, 801-422-3426.

For students accepted into the major after December 16, 2019, grades below C in any required coursework in a teaching major or teaching minor will not be accepted. Teacher candidates must maintain a cumulative GPA of 2.7 or higher once admitted into the program and to qualify for student teaching. For additional details on admission and retention requirements for teaching majors and teaching minors, see Educator Preparation Program Requirements in the Undergraduate Catalog.

Requirement 1 —Complete 7 Courses

Core requirements. Note 1: Prerequisites for all mathematics education courses will be strictly adhered to. Note 2: FBI fingerprint and background clearance must be completed prior to enrollment in MthEd 276.

MTHED177 Critical Review of School Math - Critical Review of School Math 3.0

Learning Outcomes

Title
Physics Theory and Application

Learning Outcome
Apply principles from the primary physical theories (classical mechanics, quantum mechanics, thermodynamics, electromagnetism) to model and solve representative problems analytically and computationally.

Title
Experimental and Computational Skills

Learning Outcome
Design and conduct experiments, build scientific equipment, write scientific programs to simulate physical systems, and analyze data.

Title
Effective Communication

Learning Outcome
Communicate professionally to a technical audience both orally and in writing. Be able to understand scientific ideas by reading books and journal articles.

Title
Professional Ethics

Learning Outcome
Understand scientific ethical practices and demonstrate them in the conduct of scientific research.

Title
Research and Professional Preparation

Learning Outcome
Conduct experimental, theoretical or computational research under the direction of a mentor to contribute to the generation of new knowledge or technologies, and prepare to do this professionally.

Program Requirements

No more than 3 hours of D credit is allowed in major courses.

Requirement 1 —Complete 19 Courses

Note: Phscs 191 should be taken the first semester as a freshman. Phscs 291 should be taken the first semester as a sophomore.

C S111 Intro to Computer Science - Intro to Computer Science 3.0

MATH113 Calculus 2 - Calculus 2 4.0

PHSCS121 Intro to Newtonian Mechanics - Intro to Newtonian Mechanics 3.0

PHSCS123 Intro to Waves, Optics, Thermo - Intro to Waves, Optics, Thermo 3.0

PHSCS191 Intro Phscs Careers & Rsrch 1 - Intro Phscs Careers & Rsrch 1 0.5

PHSCS220 Intro Electricity & Magnetism - Intro Electricity & Magnetism 3.0

PHSCS222 Modern Physics - Modern Physics 3.0

PHSCS225 Intro to Experimental Physics - Intro to Experimental Physics 2.0

PHSCS230 Computational Physics Lab 1 - Computational Physics Lab 1 1.0

PHSCS240 Dsgn, Fabricatn, Sci Apparatus - Dsgn, Fabricatn, Sci Apparatus 2.0

PHSCS245 Experiments in Contemp Phscs - Experiments in Contemp Phscs 2.0

PHSCS291 Intro Phscs Careers & Rsrch 2 - Intro Phscs Careers & Rsrch 2 0.5

PHSCS318 Intro Math Physics - Intro Math Physics 3.0

PHSCS321 Mechanics - Mechanics 3.0

PHSCS330 Computational Physics Lab 2 - Computational Physics Lab 2 1.0

PHSCS360 Statistical & Thermal Physics - Statistical & Thermal Physics 3.0

PHSCS430 Computational Physics Lab 3 - Computational Physics Lab 3 1.0

PHSCS441 Electricity & Magnetism - Electricity & Magnetism 3.0

PHSCS451 Quantum Mechanics - Quantum Mechanics 3.0

Requirement 2 —Complete 2 of 3 Courses

PHSCS442 Electrodynamics - Electrodynamics 3.0

PHSCS452 Appl Quantum Mechanics - Appl Quantum Mechanics 3.0

PHSCS471 Principles of Optics - Principles of Optics 3.0

Requirement 3 —Complete 1 of 6 Courses

PHSCS442 Electrodynamics - Electrodynamics 3.0

PHSCS452 Appl Quantum Mechanics - Appl Quantum Mechanics 3.0

PHSCS461 Introduction to Acoustics - Introduction to Acoustics 3.0

PHSCS471 Principles of Optics - Principles of Optics 3.0

PHSCS522 Intro to Elementary Particles - Intro to Elementary Particles 3.0

PHSCS530 Computational Physics - Computational Physics 3.0

PHSCS581 Solid State Physics - Solid State Physics 3.0

Requirement 4 —Complete 1 of 2 Options

Option 4.1 —Complete 2 Courses

MATH302 Math for Engr 1 - Math for Engr 1 4.0

MATH303 Math for Engineering 2 - Math for Engineering 2 4.0

Option 4.2 —Complete 4 Courses

MATH213 Elementary Linear Algebra - Elementary Linear Algebra 2.0

MATH215 Computational Linear Algebra - Computational Linear Algebra 1.0

MATH314 Calculus of Several Variables - Calculus of Several Variables 3.0

MATH334 Ordinary Differential Equation - Ordinary Differential Equation 3.0

Requirement 5 —Complete 1 Requirement

Senior thesis:

Complete a senior thesis, including the following:

A. Choose a research mentor and group as early as possible, starting with information in Phscs 191 and 291, and discussion with faculty, your advisor and senior thesis coordinator. It is best to start as a freshman or sophomore. Interdisciplinary work in other departments or in internships is possible.

Requirement 5.1 —Complete 2 hours

B.

PHSCS498R Senior Thesis - Senior Thesis - *You may take up to 2.0 credit hours* 0.5v

Requirement 6 — Obtain confirmation from your advisement center that you have completed the following:

Students are required to take the Physics "Major Field Test" the last semester before they graduate. The test is a standardized assessment of undergraduate physics written by ETS (Educational Testing Service). The ETS website contains a description of the exam and sample problems: http://www.ets.org/mft/about/content/physics. Results of the exam do not appear on the transcript or affect the GPA. Students should contact the Physics undergraduate secretary to make arrangements for taking the exam; typically it's done in the Testing Center before mid-semester.

Note 1: Students planning careers in experimental, applied, or industrial physics should complete Stat 201.

Note 2: All students will benefit, through courses or individual study, by learning programming skills and numerical methods beyond what you are taught in C S 111 and our computational physics courses. Consider the following: C S courses, Math 410, Me En 373.

Note 3: Students planning graduate school in physics should learn complex analysis. Consider the following: Math 332, Phscs 601, 602.

Applied Physics (BS)

Program Information

62

Maximum Credit Hours
64

Major Academic Plan
MAPS - BS in Applied Physics 2026-2027.docx

Learning Outcomes

Title
Physics Theory and Application

Learning Outcome
Apply principles to model and solve representative problems analytically and computationally at an introductory level from the primary physical theories (classical mechanics quantum mechanics special relativity thermodynamics electromagnetism and optics) and at an advanced level in classical mechanics electrostatics and optics/electrodynamics.

Title
Experimental and Computational Skills

Learning Outcome
Design and conduct experiments build scientific equipment write scientific programs to simulate physical systems and analyze data.

Title
Effective Communication

Learning Outcome
Communicate professionally to a technical audience both orally and in writing. Be able to understand scientific ideas by reading books and journal articles.

Title
Professional Ethics

Learning Outcome
Understand scientific ethical practices and demonstrate them in the conduct of scientific research.

Title
Research and Professional Preparation

Learning Outcome
Conduct experimental theoretical or computational research under the direction of a mentor to contribute to the generation of new knowledge or technologies and prepare to do this professionally.

Program Requirements

No more than 3 hours of D credit is allowed in major courses.

Consult with a faculty advisor as early as possible to choose electives.

Requirement 1 — Complete 17 Courses

Note: Phscs 191 should be taken the first semester as a freshman. Phscs 291 should be taken the first semester as a sophomore.

C S111 Intro to Computer Science - Intro to Computer Science 3.0

MATH113 Calculus 2 - Calculus 2 4.0

PHSCS121 Intro to Newtonian Mechanics - Intro to Newtonian Mechanics 3.0

PHSCS123 Intro to Waves, Optics, Thermo - Intro to Waves, Optics, Thermo 3.0

PHSCS191 Intro Phscs Careers & Rsrch 1 - Intro Phscs Careers & Rsrch 1 0.5

PHSCS220 Intro Electricity & Magnetism - Intro Electricity & Magnetism 3.0

PHSCS222 Modern Physics - Modern Physics 3.0

PHSCS225 Intro to Experimental Physics - Intro to Experimental Physics 2.0

PHSCS230 Computational Physics Lab 1 - Computational Physics Lab 1 1.0

PHSCS240 Dsgn, Fabricatn, Sci Apparatus - Dsgn, Fabricatn, Sci Apparatus 2.0

PHSCS245 Experiments in Contemp Phscs - Experiments in Contemp Phscs 2.0

PHSCS291 Intro Phscs Careers & Rsrch 2 - Intro Phscs Careers & Rsrch 2 0.5

PHSCS318 Intro Math Physics - Intro Math Physics 3.0

PHSCS321 Mechanics - Mechanics 3.0

PHSCS330 Computational Physics Lab 2 - Computational Physics Lab 2 1.0

PHSCS430 Computational Physics Lab 3 - Computational Physics Lab 3 1.0

PHSCS441 Electricity & Magnetism - Electricity & Magnetism 3.0

Requirement 2 — Complete 1 of 3 Courses

Note: Although Ec En 466 has some Ec En classes listed as prerequisites, they are often waived for Applied Physics majors. Specifically, Ec En 466 can be taken with no other prereqs as long as the student has taken Phscs 441. However, it is still recommended for students who have taken Phscs 441 to also take Phscs 442 or Ec En 462 prior to taking Ec En 466. Interested students should talk to the Ec En 466 instructor about their specific backgrounds.

EC EN466 Intro to Optical Engineering - Intro to Optical Engineering 2.0

PHSCS442 Electrodynamics - Electrodynamics 3.0

PHSCS471 Principles of Optics - Principles of Optics 3.0

Requirement 3 — Obtain confirmation from your advisement center that you have completed the following:

After gaining department advisor's approval of courses selected to define an option, complete an additional 12 hours of electives (cannot include any courses already taken above). These 12 hours must consist of a coherent set of upper-division courses with an identified educational goal. Nine hours must be upper division (300-level or above); three hours must be 200-level or above.

Requirement 4 — Complete 1 of 2 Options

Option 4.1 — Complete 2 Courses

MATH302 Math for Engr 1 - Math for Engr 1 4.0

MATH303 Math for Engineering 2 - Math for Engineering 2 4.0

Option 4.2 — Complete 4 Courses

MATH213 Elementary Linear Algebra - Elementary Linear Algebra 2.0

MATH215 Computational Linear Algebra - Computational Linear Algebra 1.0

MATH314 Calculus of Several Variables - Calculus of Several Variables 3.0

MATH334 Ordinary Differential Equation - Ordinary Differential Equation 3.0

Requirement 5 — Complete 2 hours

Complete a capstone project or senior thesis including the following:

A. Choose a research mentor and group as early as possible, starting with information in Phscs 191 and 291, and discussions with faculty, your advisor, and the capstone project coordinator or senior thesis coordinator. It is best to start as a freshman or sophomore. Interdisciplinary work in other departments or in internships is possible.

Option 5.1 — Complete up to 2 hours

B. Complete 2 hours of one of the following:

PHSCS492R Capstone in Applied Phscs - Capstone in Applied Phscs - *You may take up to 2.0 credit hours* 2.0

PHSCS498R Senior Thesis - Senior Thesis - *You may take up to 2.0 credit hours* 0.5v

Requirement 6 — Obtain confirmation from your advisement center that you have completed the following:

Students are required to take the Physics "Major Field Test" the last semester before they graduate. The test is a standardized assessment of undergraduate physics written by ETS (Educational Testing Service). The ETS website contains a description of the exam and sample problems: http://www.ets.org/mft/about/content/physics. Results of the exam do not appear on the transcript or affect the GPA. Students should contact the Physics undergraduate secretary to make arrangements for taking the exam; typically it's done in the Testing Center before mid-semester.

Note 1: Students planning careers in experimental, applied, or industrial physics should complete Stat 201.

Note 2: All students will benefit, through courses or individual study, by learning programming skills and numerical methods beyond what you are taught in C S 111 and our computational physics courses. Consider the following: CS courses, Math 410, Me En 373.

77.5

Maximum Credit Hours
78.5

Major Academic Plan
MAPS - BS in Physics Education 2026-2027.docx

Learning Outcomes

Title
Teaching Physical Science and Problem Solving

Learning Outcome
Able to teach concepts and problem solving at the high school and advanced placement level in astronomy classical mechanics thermodynamics electromagnetism optics quantum mechanics and special relativity.

Title
Classroom Management and Lab Design

Learning Outcome
Manage high school classroom in teaching setting. Direct high school student labs and build simple lab equipment and demonstrations.

Title
Physics Theory and Application

Learning Outcome
Apply principles at an introductory college level from the primary physical theories (classical mechanics quantum mechanics special relativity thermodynamics electromagnetism and optics) to solve representative problems.

Title
Instruction Design

Learning Outcome
Students will be able to design develop and administer inquiry-based science units.

Title
Addressing Student Diversity

Learning Outcome
Able to adapt teaching to adolescents and students with different cultural backgrounds.

Title
Guiding Principles

Learning Outcome
Understand and apply the BYU's McKay School of Education Guiding Principles.

Program Requirements

Licensure: This program meets the educational requirements designed to lead to an occupationally required professional license or certificate in the state of Utah. Students pursuing occupations requiring a license or certificate in a state other than Utah should contact the appropriate BYU academic advisement center as well as the licensing agency in the state where they intend to work to seek information and guidance regarding licensure and certification requirements.

This major is designed to prepare students to teach in public schools. In order to graduate with this major, students are required to complete Utah State Office of Education licensing requirements. To view these requirements go to https://www.schools.utah.gov/curr/licensing or contact the Education Advisement Center, 175 MCKB, 801-422-3426.

For students accepted into the major after December 16, 2019, grades below C in any required coursework in a teaching major or teaching minor will not be accepted. Teacher candidates must maintain a cumulative GPA of 2.7 or higher once admitted into the program and to qualify for student teaching. For additional details on admission and retention requirements for teaching majors and teaching minors, see Educator Preparation Program Requirements in the Undergraduate Catalog.

A teaching minor is not required for licensure. However, it is strongly recommended.

Requirement 1 — Complete 10 Courses

Note: Phscs 191 should be taken the first semester.

MATH112 Calculus 1 - Calculus 1 4.0

MATH113 Calculus 2 - Calculus 2 4.0

PHSCS121 Intro to Newtonian Mechanics - Intro to Newtonian Mechanics 3.0

PHSCS123 Intro to Waves, Optics, Thermo - Intro to Waves, Optics, Thermo 3.0

PHSCS127 Descriptive Astronomy - Descriptive Astronomy 3.0

PHSCS191 Intro Phscs Careers & Rsrch 1 - Intro Phscs Careers & Rsrch 1 0.5

PHSCS220 Intro Electricity & Magnetism - Intro Electricity & Magnetism 3.0

PHSCS222 Modern Physics - Modern Physics 3.0

PHSCS225 Intro to Experimental Physics - Intro to Experimental Physics 2.0

PHSCS240 Dsgn, Fabricatn, Sci Apparatus - Dsgn, Fabricatn, Sci Apparatus 2.0

Requirement 2 — Complete 1 of 2 Options

Option 2.1 — Complete 2 Courses

MATH302 Math for Engr 1 - Math for Engr 1 4.0

MATH303 Math for Engineering 2 - Math for Engineering 2 4.0

Option 2.2 — Complete 4 Courses

MATH213 Elementary Linear Algebra - Elementary Linear Algebra 2.0

MATH215 Computational Linear Algebra - Computational Linear Algebra 1.0

MATH314 Calculus of Several Variables - Calculus of Several Variables 3.0

MATH334 Ordinary Differential Equation - Ordinary Differential Equation 3.0

Requirement 3 — Complete 1 of 2 Courses

PHSCS310 Physics By Inquiry: Mechanics - Physics By Inquiry: Mechanics 3.0

PHSCS311 Physics By Inquiry:Electricity - Physics By Inquiry:Electricity 3.0

Requirement 4 — Complete 9 hours

Physics electives: Complete an additional 9 hours from the following (any physics course already taken will not double count).

Option 4.1 — Complete up to 3 hours

Complete UP TO 3.0 hours from the following. Courses from requirement 3 can't be double counted as electives.

PHIL423R History&Philosophy of Science - History&Philosophy of Science - *You may take once* 3.0

PHSCS137 Energy, Climate, Environment - Energy, Climate, Environment 3.0

PHSCS167 Desc Acoustics of Music & Spch - Desc Acoustics of Music & Spch 3.0

PHSCS310 Physics By Inquiry: Mechanics - Physics By Inquiry: Mechanics 3.0

PHSCS311 Physics By Inquiry:Electricity - Physics By Inquiry:Electricity 3.0

PHSCS313R Special Topics in Physics - Special Topics in Physics - *You may take once* 0.5v

PHY S312 Science and Tech- Teaching Science with Technology 3.0

Option 4.2 — Complete up to 9 hours

Complete AT LEAST 6 hours from 300-, 400-, or 500-level physics courses, not including 310 or 311 or 399R (Phscs 321, 461, and 471 are highly recommended).

C S502 Job Search Strategies - Job Search Strategies 1.0

CHEM500 Business Career Essentials - Business Career Essentials 1.5

PHSCS313R Special Topics in Physics - Special Topics in Physics - *You may take once* 0.5v

PHSCS318 Intro Math Physics - Intro Math Physics 3.0

PHSCS321 Mechanics - Mechanics 3.0

PHSCS329 Observational Astronomy - Observational Astronomy 3.0

PHSCS330 Computational Physics Lab 2 - Computational Physics Lab 2 1.0

PHSCS360 Statistical & Thermal Physics - Statistical & Thermal Physics 3.0

PHSCS391R Seminar in Current Physics - Seminar in Current Physics - *You may take once* 1.0

PHSCS416 Writing in Physics - Writing in Physics 3.0

PHSCS427 Stellar Astrophysics - Stellar Astrophysics 3.0

PHSCS428 Galaxies and Cosmology - Galaxies and Cosmology 3.0

PHSCS430 Computational Physics Lab 3 - Computational Physics Lab 3 1.0

PHSCS441 Electricity & Magnetism - Electricity & Magnetism 3.0

PHSCS442 Electrodynamics - Electrodynamics 3.0

PHSCS451 Quantum Mechanics - Quantum Mechanics 3.0

PHSCS452 Appl Quantum Mechanics - Appl Quantum Mechanics 3.0

PHSCS461 Introduction to Acoustics - Introduction to Acoustics 3.0

PHSCS471 Principles of Optics - Principles of Optics 3.0

PHSCS477R Sec Minor Student Teaching - Sec Minor Student Teaching - *You may take once* 4.0

PHSCS492R Capstone in Applied Phscs - Capstone in Applied Phscs - *You may take once* 0.5v

PHSCS497R Research in Physics - Research in Physics - *You may take once* 1.0v

PHSCS498R Senior Thesis - Senior Thesis - *You may take once* 0.5v

PHSCS540 Electr Eng Princpls & Practice - Electr Eng Princpls & Practice 2.0

PHSCS560 Acoustical Measurement Methods - Acoustical Measurement Methods 3.0

PHSCS561 Fundamentals of Acoustics - Fundamentals of Acoustics 3.0

PHSCS571 Lasers & Atoms - Lasers & Atoms 3.0

PHSCS581 Solid State Physics - Solid State Physics 3.0

PHSCS583 Nano and Surface Phscs - Nano and Surface Phscs 3.0

PHSCS585 Thin-Film Physics - Thin-Film Physics 3.0

PHSCS586 Trans Electron Microscopy - Trans Electron Microscopy 3.0

PHSCS587 Semiconductor Devices Phscs - Semiconductor Devices Phscs 3.0

PHSCS588 Scanning Electron Microscopy - Scanning Electron Microscopy 3.0

PHSCS599R Academic Internship - Academic Internship - *You may take once* 0.5v

PHY S312 Science and Tech- Teaching Science with Technology 3.0

Requirement 5 — Complete 2 Requirements

Professional Education Component:

Licensure requirements: Contact the Education Advisement Center, 350 MCKB, 801-422-3426, to schedule the final interview to clear your application for the secondary teaching license. You should be registered for your last semester at BYU prior to the scheduled appointment.

Requirement 5.1 — Complete 9 Courses

CPSE402 Educ Stdnts w/Disablts in ScEd - Educ Stdnts w/Disablts in ScEd 2.0

IP&T371 Integrating K-12 Ed Tec 1 - Integrating K-12 Ed Tec 1 1.0

IP&T372 Integrating K-12 in El. Ed. - Integrating K-12 in El. Ed. 1.0

IP&T373 Tching K-12 Online/Blended Lrn - Tching K-12 Online/Blended Lrn 1.0

PHY S276 Exploration of Teaching - Exploration of Teaching 4.0

PHY S377 Teaching Methods & Instruction - Teaching Methods & Instruction 3.0

PHY S378 Practicum in Secondary Educ - Practicum in Secondary Educ 1.0

SC ED353 Multicultural Educ - Multicultural Educ 2.0

SC ED375 Ad Dev & Class Mgmt - Ad Dev & Class Mgmt 3.0

Note: FBI fingerprint and background clearance must be completed prior to enrollment in Phy S 276.

Requirement 5.2 — Complete 12 hours

PHY S476 Secondary Student Teaching - Secondary Student Teaching 0.0v

PHY S496 Acad Intern: Secondary Ed - Acad Intern: Secondary Ed 0.0v

Student teachers/interns must complete three forms in their Educator accounts (PIBS, CDS, FED) and attach their TWS to the Educator account for their program. All four must be completed to be cleared for graduation.

MAPS - BS in Physics and Astronomy 2026-2027.docx

Learning Outcomes

Title
Physics Theory and Application

Learning Outcome
Students will be able to apply principles to model and solve representative problems both analytically and computationally at an introductory level from the primary physical theories (classical mechanics quantum mechanics special relativity thermodynamics electromagnetism and optics) and at an advanced level from classical mechanics electricity and magnetism and in topics chosen from quantum mechanics optics and thermal physics. Apply physical theories to the solution of astrophysical problems.

Title
Observation and Computational Skills

Learning Outcome
Students will be able to locate and observe astronomical objects write scientific programs to simulate physical systems and analyze astrophysical data.

Title
Effective Communication

Learning Outcome
Communicate professionally to a technical audience both orally and in writing. Be able to understand scientific ideas by reading books and journal articles.

Title
Professional Ethics

Learning Outcome
Students will be able to understand scientific ethical practices and demonstrate them in the conduct of scientific research.

Title
Research and Professional Preparation

Learning Outcome
Students will be able to conduct astronomical or astrophysical research under the direction of a faculty mentor to contribute to the generation of new knowledge and prepare to do this professionally.

Program Requirements

No more than 3 hours of D credit is allowed in major courses.

Requirement 1 —Complete 1 Requirement

Requirement 1.1 —Complete 20 Courses

C S111 Intro to Computer Science - Intro to Computer Science 3.0

MATH113 Calculus 2 - Calculus 2 4.0

PHSCS121 Intro to Newtonian Mechanics - Intro to Newtonian Mechanics 3.0

PHSCS123 Intro to Waves, Optics, Thermo - Intro to Waves, Optics, Thermo 3.0

PHSCS127 Descriptive Astronomy - Descriptive Astronomy 3.0

PHSCS191 Intro Phscs Careers & Rsrch 1 - Intro Phscs Careers & Rsrch 1 0.5

PHSCS220 Intro Electricity & Magnetism - Intro Electricity & Magnetism 3.0

PHSCS222 Modern Physics - Modern Physics 3.0

PHSCS227 Planets and Stars - Planets and Stars 3.0

PHSCS228 Stars & Galaxies - Stars & Galaxies 3.0

PHSCS230 Computational Physics Lab 1 - Computational Physics Lab 1 1.0

PHSCS291 Intro Phscs Careers & Rsrch 2 - Intro Phscs Careers & Rsrch 2 0.5

PHSCS318 Intro Math Physics - Intro Math Physics 3.0

PHSCS321 Mechanics - Mechanics 3.0

PHSCS329 Observational Astronomy - Observational Astronomy 3.0

PHSCS330 Computational Physics Lab 2 - Computational Physics Lab 2 1.0

PHSCS427 Stellar Astrophysics - Stellar Astrophysics 3.0

PHSCS428 Galaxies and Cosmology - Galaxies and Cosmology 3.0

PHSCS441 Electricity & Magnetism - Electricity & Magnetism 3.0

PHSCS451 Quantum Mechanics - Quantum Mechanics 3.0

Note: Phscs 191 should be taken the first semester as a freshman. Phscs 291 should be taken the first semester as a sophomore.

Requirement 2 —Complete 2 of 4 Courses

PHSCS360 Statistical & Thermal Physics - Statistical & Thermal Physics 3.0

PHSCS442 Electrodynamics - Electrodynamics 3.0

PHSCS452 Appl Quantum Mechanics - Appl Quantum Mechanics 3.0

PHSCS471 Principles of Optics - Principles of Optics 3.0

Requirement 3 —Complete 1 of 2 Options

Option 3.1 —Complete 2 Courses

MATH302 Math for Engr 1 - Math for Engr 1 4.0

MATH303 Math for Engineering 2 - Math for Engineering 2 4.0

Option 3.2 —Complete 4 Courses

MATH213 Elementary Linear Algebra - Elementary Linear Algebra 2.0

MATH215 Computational Linear Algebra - Computational Linear Algebra 1.0

MATH314 Calculus of Several Variables - Calculus of Several Variables 3.0

MATH334 Ordinary Differential Equation - Ordinary Differential Equation 3.0

Requirement 4 —Complete 1 Requirement

Senior thesis:

Complete a senior thesis, including the following:

A. Choose a research mentor and group as early as possible, starting with information in Phscs 191 and 192, and discussions with faculty, your advisor, and the senior thesis coordinator. It is best to start as a freshman or sophomore. Some internships may qualify for your project.

Requirement 4.1 —Complete 2 hours

B.

PHSCS498R Senior Thesis - Senior Thesis - *You may take up to 2.0 credit hours* 0.5v

Requirement 5 — Obtain confirmation from your advisement center that you have completed the following:

Students are required to take the Physics "Major Field Test" the last semester before they graduate. The test is a standardized assessment of undergraduate physics written by ETS (Educational Testing Service). The ETS website contains a description of the exam and sample problems: http://www.ets.org/mft/about/content/physics. Results of the exam do not appear on the transcript or affect the GPA. Students should contact the Physics undergraduate secretary to make arrangements for taking the exam; typically it's done in the Testing Center before mid-semester.

Note: Students planning on graduate school in astronomy should consider taking all four of Phscs 360, 442, 452, 471, instead of only two. Gain statistics and computer programming skills beyond what you get in this major by taking courses such as Stat 201 (Statistics for Engineers and Scientists) and courses such as Phscs 430 (Computational Physics 3) and Me En 373 (Introduction to Scientific Computing).

Learning Outcome
Apply principles of data science to model physical systems, address physical and astronomical problems, and evaluate the uncertainty, sensitivity, and fidelity of the models.

Title
Effective Communication

Learning Outcome
Communicate professionally to a technical audience both orally and in writing. Be able to understand scientific ideas by reading books and journal articles.

Title
Professional Ethics

Learning Outcome
Understand scientific ethical practices, and demonstrate them in the conduct of scientific research.

Title
Research and Professional Preparation

Learning Outcome
Conduct data-science related research of a physical or astronomical system under the direction of a mentor to contribute to the generation of new knowledge or technologies, and prepare to do this professionally.

Program Requirements

No more than 3 hours of D credit is allowed in major courses.

Consult with a faculty advisor as early as possible to choose electives.

Requirement 1 — Complete 19 Courses

Note: Phscs 191 should be taken the first semester as a freshman. Phscs 291 should be taken the first semester as a sophomore.

C S111 Intro to Computer Science - Intro to Computer Science 3.0

C S235 Data Structures - Data Structures 3.0

MATH113 Calculus 2 - Calculus 2 4.0

PHSCS121 Intro to Newtonian Mechanics - Intro to Newtonian Mechanics 3.0

PHSCS123 Intro to Waves, Optics, Thermo - Intro to Waves, Optics, Thermo 3.0

PHSCS191 Intro Phscs Careers & Rsrch 1 - Intro Phscs Careers & Rsrch 1 0.5

PHSCS220 Intro Electricity & Magnetism - Intro Electricity & Magnetism 3.0

PHSCS222 Modern Physics - Modern Physics 3.0

PHSCS225 Intro to Experimental Physics - Intro to Experimental Physics 2.0

PHSCS230 Computational Physics Lab 1 - Computational Physics Lab 1 1.0

PHSCS240 Dsgn, Fabricatn, Sci Apparatus - Dsgn, Fabricatn, Sci Apparatus 2.0

PHSCS291 Intro Phscs Careers & Rsrch 2 - Intro Phscs Careers & Rsrch 2 0.5

PHSCS318 Intro Math Physics - Intro Math Physics 3.0

PHSCS321 Mechanics - Mechanics 3.0

PHSCS330 Computational Physics Lab 2 - Computational Physics Lab 2 1.0

PHSCS360 Statistical & Thermal Physics - Statistical & Thermal Physics 3.0

PHSCS383 Physical Reasoning With Data - Physical Reasoning With Data 3.0

PHSCS430 Computational Physics Lab 3 - Computational Physics Lab 3 1.0

STAT201 Stat for Engineers & Scientist - Stat for Engineers & Scientist 3.0

Requirement 2 — Complete 1 Course

PHSCS427 Stellar Astrophysics - Stellar Astrophysics 3.0

PHSCS428 Galaxies and Cosmology - Galaxies and Cosmology 3.0

PHSCS441 Electricity & Magnetism - Electricity & Magnetism 3.0

PHSCS451 Quantum Mechanics - Quantum Mechanics 3.0

PHSCS461 Introduction to Acoustics - Introduction to Acoustics 3.0

PHSCS471 Principles of Optics - Principles of Optics 3.0

PHSCS581 Solid State Physics - Solid State Physics 3.0

Requirement 3 — Complete 9 Hours

C S270 Intro to Machine Learning - Intro to Machine Learning 3.0

C S473 Advanced Machine Learning - Advanced Machine Learning 3.0

C S474 Deep Learning - Deep Learning 3.0

EC EN380 Signals & Systems - Signals & Systems 4.0

MATH380 Mathematics of Data Science - Mathematics of Data Science 3.0

MATH510 Num Methods for Linear Algebra - Num Methods for Linear Algebra 3.0

PHSCS530 Computational Physics - Computational Physics 3.0

PHSCS580 Theory of Predictive Modeling - Theory of Predictive Modeling 3.0

STAT220 Stat Modeling for Data Science - Stat Modeling for Data Science 3.0

STAT230 Statistical Modeling 1 - Statistical Modeling 1 3.0

STAT251 Intro to Bayesian Statistics - Intro to Bayesian Statistics 3.0

STAT286 Data Science Ecosystems - Data Science Ecosystems 3.0

STAT330 Statistical Modeling 2 - Statistical Modeling 2 3.0

STAT386 Data Science Process - Data Science Process 3.0

Requirement 4 — Complete 1 Option

Note: Option 4.1 is preferred.

Option 4.1 — Complete 4 Courses

MATH213 Elementary Linear Algebra - Elementary Linear Algebra 2.0

MATH215 Computational Linear Algebra - Computational Linear Algebra 1.0

MATH314 Calculus of Several Variables - Calculus of Several Variables 3.0

MATH334 Ordinary Differential Equation - Ordinary Differential Equation 3.0

Option 4.2 — Complete 2 Courses

MATH302 Math for Engr 1 - Math for Engr 1 4.0

MATH303 Math for Engineering 2 - Math for Engineering 2 4.0

Requirement 5 — Complete 1 Requirement

Complete a capstone project or senior thesis including the following: A. Choose a research mentor and group as early as possible, starting with information in Phscs 191 and 291, and discussions with faculty, your advisor, and the capstone project coordinator or senior thesis coordinator. It is best to start as a freshman or sophomore. Interdisciplinary work in other departments or in internships is possible.

Requirement 5.1 — Complete 2 Hours

B. Complete 2 hours of one of the following:

PHSCS492R Capstone in Applied Phscs - Capstone in Applied Phscs - *You may take up to 2.0 credit hours* 0.5v

PHSCS498R Senior Thesis - Senior Thesis - *You may take up to 2.0 credit hours* 0.5v

Requirement 6 — Obtain confirmation from your advisement center that you have completed the following:

Students are required to take the Physics "Major Field Test" the last semester before they graduate. The test is a standardized assessment of undergraduate physics written by ETS (Educational Testing Service). The ETS website contains a description of the exam and sample problems: http://www.ets.org/mft/about/content/physics. Results of the exam do not appear on the transcript or affect the GPA. Students should contact the Physics undergraduate secretary to make arrangements for taking the exam; typically it's done in the Testing Center before mid-semester

Statistics (Minor)

Program Information

Minimum Credit Hours	Maximum Credit Hours
18	20

Program Requirements

Requirement 1 — Complete 1 of 2 Courses

Note: Students who have passed the AP statistics exam or an introductory statistics course should not take Stat 121.

STAT121 Intro to Stat Data Analysis - Intro to Stat Data Analysis 3.0

STAT201 Stat for Engineers & Scientist - Stat for Engineers & Scientist 3.0

Requirement 2 —Complete 1 Course

STAT230 Statistical Modeling 1 - Statistical Modeling 1 3.0

Requirement 3 — Complete 1 of 3 Options

Option 3.1 — Complete 2 Courses

MATH112 Calculus 1 - Calculus 1 4.0

STAT330 Statistical Modeling 2 - Statistical Modeling 2 3.0

Option 3.2 — Complete 2 Courses

C S111 Intro to Computer Science - Intro to Computer Science 3.0

STAT220 Stat Modeling for Data Science - Stat Modeling for Data Science 3.0

Option 3.3 — Complete 2 Courses

IS303 Intro Computer Programming - Intro Computer Programming 3.0

STAT220 Stat Modeling for Data Science - Stat Modeling for Data Science 3.0

Requirement 4 — Complete 1 of 6 Courses

STAT234 Methods of Survey Sampling - Methods of Survey Sampling 3.0

STAT240 Probability and Inference 1 - Probability and Inference 1 3.0

STAT281 Data Visualization - Data Visualization 3.0

STAT286 Data Science Ecosystems - Data Science Ecosystems 3.0

STAT386 Data Science Process - Data Science Process 3.0

STAT448 Predictive Analytics - Predictive Analytics 3.0

Requirement 5 — Complete 1 of 29 Courses

BIO264 Stat Analysis for Biologists - Stat Analysis for Biologists 4.0

C S270 Intro to Machine Learning - Intro to Machine Learning 3.0

ECON388 Intro to Econometrics - Intro to Econometrics 3.0

FIN400 Analytical Methods in Finance - Analytical Methods in Finance 3.0

GEOG322 Statistics for Geographers 2 - Statistics for Geographers 2 3.0

GSCM412 Operations Analytics - Operations Analytics 3.0

HLTH313 Intro to Data Coll & Analysis - Intro to Data Coll & Analysis 3.0

IS302 Intro Databases (Non-Majors) - Intro Databases (Non-Majors) 3.0

IS315 Intro to Python Data Analytics - Intro to Python Data Analytics 3.0

IS355 Predictive AI - Predictive AI 3.0

MKTG411 Marketing Analytics - Marketing Analytics 3.0

MSB325 Intro Business Analytics - Intro Business Analytics 3.0

PHSCS383 Physical Reasoning With Data - Physical Reasoning With Data 3.0

POLI300 Statistical Analysis - Statistical Analysis 4.0

PSYCH308 Psychological Statistics - Psychological Statistics 4.0

PWS274 Applied Biostatistics - Applied Biostatistics 3.0

STAT234 Methods of Survey Sampling - Methods of Survey Sampling 3.0

STAT240 Probability and Inference 1 - Probability and Inference 1 3.0

STAT250 Applied R Programming - Applied R Programming 3.0

STAT251 Intro to Bayesian Statistics - Intro to Bayesian Statistics 3.0

STAT281 Data Visualization - Data Visualization 3.0

STAT286 Data Science Ecosystems - Data Science Ecosystems 3.0

STAT340 Probability and Inference 2 - Probability and Inference 2 3.0

STAT381 Statistical Cloud Computing - Statistical Cloud Computing 3.0

STAT386 Data Science Process - Data Science Process 3.0

STAT448 Predictive Analytics - Predictive Analytics 3.0

STAT486 Machine Learning - Machine Learning 3.0

STAT487 Deep Learning - Deep Learning 3.0

STRAT412 Strategy Analytics - Strategy Analytics 3.0

Data Science (BS)

Program Information

Minimum Credit Hours
74.5

Maximum Credit Hours
74.5

Major Academic Plan
MAP-BS in Data Science 2026-2027.docx

Learning Outcomes

Title
Data Science Practice

Learning Outcome
Students will be able to acquire, clean, wrangle, store, analyze and visualize a wide variety of data types using a wide variety of data science tools; they will be able to apply their knowledge of tools to solve novel problems, and understand the benefits and limitations of new tools.

Title
Data Science Theory

Learning Outcome
Students will demonstrate the ability to analyze data by appropriately visualizing, fitting, assessing, and interpreting a variety of models, and will understand the limits and possibilities of conclusions drawn from data.

Title
Data Science Ethics

Learning Outcome
Students will be able to mitigate the effects of biased or unreliable data, will be able to avoid the dangers of overreliance on unreliable data, and will be an ethical and positive voice arguing for fairness and transparency in high-impact applications of data science.

Title
Communication Skills

Learning Outcome
Students will be able to create effective visualizations, write technical reports and make technical presentations that convey insight harvested from data.

Title
Professional Preparation

Title
Belonging

Learning Outcome
This program is accessible to everyone, including women, minorities, and those new to STEM. Several strategies to support students from different backgrounds include broad advertisement, individual advisement, representation of professors and advisors from diverse backgrounds, working closely with the Office of Belonging, and belonging training for faculty and advisors.

Program Requirements

Requirement 1 — Complete 2 Requirements

Take the following introductory courses:

Requirement 1.1 — Complete 4 of 5 Courses

C S111 Intro to Computer Science - Intro to Computer Science 3.0

DS115 Data Science Careers - Data Science Careers 0.5

DS180 Intro to Data Science - Intro to Data Science 3.0

MATH112 Calculus 1 - Calculus 1 4.0

STAT121 Intro to Stat Data Analysis - Intro to Stat Data Analysis 3.0

Requirement 2 — Complete 7 hours

Take the following courses in mathematical foundations:

MATH113 Calculus 2 - Calculus 2 4.0

MATH213 Elementary Linear Algebra - Elementary Linear Algebra 2.0

MATH215 Computational Linear Algebra - Computational Linear Algebra 1.0

Requirement 3 — Complete 12 hours

Take the following courses in statistical foundations:

STAT230 Statistical Modeling 1 - Statistical Modeling 1 3.0

STAT240 Probability and Inference 1 - Probability and Inference 1 3.0

STAT251 Intro to Bayesian Statistics - Intro to Bayesian Statistics 3.0

STAT330 Statistical Modeling 2 - Statistical Modeling 2 3.0

Requirement 4 — Complete 10 hours

Take the following courses in computing foundations:

C S235 Data Structures - Data Structures 3.0

C S240 Adv Software Construction - Adv Software Construction 4.0

C S452 Database Modeling Concepts - Database Modeling Concepts 3.0

Requirement 5 — Complete 17 hours

Take the following courses in the data science core:

C S270 Intro to Machine Learning - Intro to Machine Learning 3.0

C S404 Ethics & Computers in Society - Ethics & Computers in Society 2.0

MATH380 Mathematics of Data Science - Mathematics of Data Science 3.0

PHSCS383 Physical Reasoning With Data - Physical Reasoning With Data 3.0

STAT281 Data Visualization - Data Visualization 3.0

STAT386 Data Science Process - Data Science Process 3.0

Requirement 6 — Complete 12 hours

Take 4 of the following classes: Classes taken here will not double count in Requirement 7. C S 580 and PHSCS 580 are the same course; only one may be counted as an elective

BIO364 Bioinformatics Algorithms - Bioinformatics Algorithms 3.0

BIO 462 - Computational Cancer Biology 3.0 - *This course is no longer offered.*

C S462 Distributed System Design - Distributed System Design 3.0

C S473 Advanced Machine Learning - Advanced Machine Learning 3.0

C S474 Deep Learning - Deep Learning 3.0

C S482 Data Science Capstone 1 - Data Science Capstone 1 3.0

C S483 Data Science Capstone 2 - Data Science Capstone 2 3.0

C S574 Transformers for NLP - Transformers for NLP 3.0

C S575 Intro to Graph Data Science - Intro to Graph Data Science 3.0

C S580 Theory of Predictive Modeling - Theory of Predictive Modeling 3.0

ECON398 Applied Econometrics - Applied Econometrics 3.0

ECON484 Machine Learning for Econ - Machine Learning for Econ 3.0

ECON588 Advanced Econometrics - Advanced Econometrics 3.0

GEOL230 Earth Data Vis - Earth Data Visualization 3.0

GEOL531 Geoscience Data Analysis - Geoscience Data Analysis 3.0

MATH404 Model Uncertainty & Data 2 - Model Uncertainty & Data 2 3.0

MATH510 Num Methods for Linear Algebra - Num Methods for Linear Algebra 3.0

MATH522 Mathematics of Deep Learning - Mathematics of Deep Learning 3.0

PHSCS580 Theory of Predictive Modeling - Theory of Predictive Modeling 3.0

STAT250 Applied R Programming - Applied R Programming 3.0

STAT340 Probability and Inference 2 - Probability and Inference 2 3.0

STAT448 Predictive Analytics - Predictive Analytics 3.0

STAT486 Machine Learning - Machine Learning 3.0

STAT496R Academic Internship - Academic Internship - *You may take once* 0.5v

Some courses may require prerequisites outside of program requirements.

Requirement 7 — Complete 3 hours

Note: Courses used to fulfill this requirement will not double count in Requirement 6.

C S473 Advanced Machine Learning - Advanced Machine Learning 3.0

C S474 Deep Learning - Deep Learning 3.0

C S483 Data Science Capstone 2 - Data Science Capstone 2 3.0

C S497R Undergraduate Research - Undergraduate Research - *You may take once* 3.0

MATH399R Academic Internship - Academic Internship - *You may take once* 0.5v

MATH404 Model Uncertainty & Data 2 - Model Uncertainty & Data 2 3.0

MATH522 Mathematics of Deep Learning - Mathematics of Deep Learning 3.0

PHSCS492R Capstone in Applied Phscs - Capstone in Applied Phscs - *You may take once* 0.5v

PHSCS497R Research in Physics - Research in Physics - *You may take once* 0.5v

STAT486 Machine Learning - Machine Learning 3.0

STAT496R Academic Internship - Academic Internship - *You may take once* 0.5v

STAT497R Intro to Research - Intro to Research - *You may take once* 0.5v

Statistics (BS): Statistical Science Emphasis

Program Information

Minimum Credit Hours
53.5

Maximum Credit Hours
53.5

Major Academic Plan
MAP-BS in Statistical Science 2026-2027.docx

Learning Outcomes

Title
Skills in Fitting Statistical Models

Learning Outcome
Graduates of the program will demonstrate the ability to analyze data by appropriately fitting assessing and interpreting a variety of statistical models

Title
Communication Skills

Learning Outcome
Graduates of the program will write technical reports and make technical presentations containing statistical findings and work in teams to demonstrate the consulting skills of a professional statistician

Title
Computing Skills

Learning Outcome
Graduates of the program will be able to manipulate data use appropriate statistical methods document and debug code in one or more profession statistical software programs

Title
Theoretical Foundations

Learning Outcome
Graduates of the program will be able to solve problems in basic probability theory statistical inference and calculus.

Title
Academic Preparation

Learning Outcome
Be prepared to enter top graduate (masters and/or PhD) programs in statistics

Program Requirements

Requirement 1 — Complete 2 Courses

STAT121 Intro to Stat Data Analysis - Intro to Stat Data Analysis 3.0

STAT130 Intro to Statistics Department - Intro to Statistics Department 0.5

Requirement 2 —Complete 6 Courses

Statistics core courses:

STAT230 Statistical Modeling 1 - Statistical Modeling 1 3.0

STAT240 Probability and Inference 1 - Probability and Inference 1 3.0

STAT330 Statistical Modeling 2 - Statistical Modeling 2 3.0

STAT340 Probability and Inference 2 - Probability and Inference 2 3.0

STAT390 Data Science Ethics - Data Ethics 1.5

STAT430 Statistical Modeling 3 - Statistical Modeling 3 3.0

Requirement 3 —Complete 4 Courses

Mathematical foundation courses:

MATH112 Calculus 1 - Calculus 1 4.0

MATH113 Calculus 2 - Calculus 2 4.0

MATH213 Elementary Linear Algebra - Elementary Linear Algebra 2.0

MATH215 Computational Linear Algebra - Computational Linear Algebra 1.0

Requirement 4 —Complete 3 hours

C S110 How to Program - How to Program 3.0

C S111 Intro to Computer Science - Intro to Computer Science 3.0

HLTH440 Statistical Computing in Epi - Statistical Computing in Epi 3.0

IS520 Spreadsheet Automation - Spreadsheet Automation 3.0

STAT286 Data Science Ecosystems - Data Science Ecosystems 3.0

Requirement 5 —Complete 1 Course

MATH314 Calculus of Several Variables - Calculus of Several Variables 3.0

Requirement 6 —Complete 6 hours

STAT435 Nonparametric Stat Methods - Nonparametric Stat Methods 3.0

STAT437 Applications in Biostatistics - Applications in Biostatistics 3.0

STAT451 Applied Bayesian Statistics - Applied Bayesian Statistics 3.0

STAT466 Bayesian Reliability - Bayesian Reliability 3.0

STAT469 Analysis of Correlated Data - Analysis of Correlated Data 3.0

STAT482 Data Science Capstone 1 - Data Science Capstone 1 3.0

STAT483 Data Science Capstone 2 - Data Science Capstone 2 3.0

STAT486 Machine Learning - Machine Learning 3.0

STAT487 Deep Learning - Deep Learning 3.0

STAT495R Special Topics in Statistics - Special Topics in Statistics - *You may take once* 1.0v

STAT531 Experimental Design and Causal - Experimental Design 3.0

STAT538 Survival Analysis - Survival Analysis 3.0

Requirement 7 —Complete 12 hours

Note: Courses used in Requirements 4 and 6 will not double count here. Note: No more than 3.0 hours of any combination of STAT 496R and STAT 497R can be used for this requirement.

MATH334 Ordinary Differential Equation - Ordinary Differential Equation 3.0

MATH341 Theory of Analysis 1 - Theory of Analysis 1 3.0

MATH342 Theory of Analysis 2 - Theory of Analysis 2 3.0

STAT234 Methods of Survey Sampling - Methods of Survey Sampling 3.0

STAT251 Intro to Bayesian Statistics - Intro to Bayesian Statistics 3.0

STAT274 Theory of Interest - Theory of Interest 3.0

STAT281 Data Visualization - Data Visualization 3.0

STAT286 Data Science Ecosystems - Data Science Ecosystems 3.0

STAT381 Statistical Cloud Computing - Statistical Computing 3.0

STAT386 Data Science Process - Data Science Process 3.0

STAT395R Special Topics in Applied Stat - Special Topics in Applied Stat - *You may take once* 1.0v

STAT435 Nonparametric Stat Methods - Nonparametric Stat Methods 3.0

STAT437 Applications in Biostatistics - Applications in Biostatistics 3.0

STAT448 Predictive Analytics - Predictive Analytics 3.0

STAT451 Applied Bayesian Statistics - Applied Bayesian Statistics 3.0

STAT466 Bayesian Reliability -Bayesian Reliability 3.0

STAT469 Analysis of Correlated Data - Analysis of Correlated Data 3.0

STAT482 Data Science Capstone 1 - Data Science Capstone 1 3.0

STAT483 Data Science Capstone 2 - Data Science Capstone 2 3.0

STAT486 Machine Learning - Machine Learning 3.0

STAT487 Deep Learning - Deep Learning 3.0

STAT495R Special Topics in Statistics - Special Topics in Statistics - *You may take up to 3.0 credit hours* 1.0v

STAT496R Academic Internship - Academic Internship - *You may take once* 0.5v

STAT497R Intro to Research - Intro to Research - *You may take once* 0.5v

STAT531 Experimental Design and Causal - Experimental Design 3.0

STAT538 Survival Analysis - Survival Analysis 3.0

It is strongly recommended that students interested in graduate study in statistics choose electives to prepare for the BYU BS/MS statistics integrated program by meeting with the Statistics Department graduate coordinator.

Actuarial Science (BS)

Program Information

Minimum Credit Hours
58

Maximum Credit Hours
58

Major Academic Plan
MAP-BS in Actuarial Science 2026-2027.docx

Learning Outcomes

Title
Actuarial Exams

Learning Outcome
Graduates will prepare for take and pass the exams required for employment in the actuarial science profession

Title
Communication Skills

Learning Outcome
Graduates of the program will write technical reports and make technical presentations containing statistical and actuarial results.

Title
Skills in Applied Statistics and Computing

Learning Outcome
Graduates of the program will apply statistical methods using relevant software to solve real world problems

Program Requirements

Requirement 1 —Complete 3 Courses

STAT121 Intro to Stat Data Analysis - Intro to Stat Data Analysis 3.0

STAT130 Intro to Statistics Department - Intro to Statistics Department 0.5

STAT274 Theory of Interest - Theory of Interest 3.0

Requirement 2 —Complete 6 Courses

Statistics core courses:

STAT230 Statistical Modeling 1 - Statistical Modeling 1 3.0

STAT240 Probability and Inference 1 - Probability and Inference 1 3.0

STAT330 Statistical Modeling 2 - Statistical Modeling 2 3.0

STAT340 Probability and Inference 2 - Probability and Inference 2 3.0

STAT390 Data Science Ethics - Data Ethics 1.5

STAT430 Statistical Modeling 3 - Statistical Modeling 3 3.0

Requirement 3 —Complete 4 Courses

Mathematical foundation courses:

MATH112 Calculus 1 - Calculus 1 4.0

MATH113 Calculus 2 - Calculus 2 4.0

MATH213 Elementary Linear Algebra - Elementary Linear Algebra 2.0

MATH215 Computational Linear Algebra - Computational Linear Algebra 1.0

Requirement 4 —Complete 3 hours

Recommended course: Actuarial science majors should take IS 520, but all of the courses are valuable.

C S110 How to Program - How to Program 3.0

C S111 Intro to Computer Science - Intro to Computer Science 3.0

HLTH440 Statistical Computing in Epi - Statistical Computing in Epi 3.0

IS520 Spreadsheet Automation - Spreadsheet Automation 3.0

STAT286 Data Science Ecosystems - Data Science Ecosystems 3.0

Requirement 5 —Complete 3 Courses

STAT344 Long-term Actuarial Math - Long-term Actuarial Math 3.0

STAT346 Short-term Actuarial Math - Short-term Actuarial Math 3.0

STAT448 Predictive Analytics - Predictive Analytics 3.0

Requirement 6 —Complete 3 hours

Note: If both courses are taken in requirement 6, one can be used as an elective in requirement 7. Students interested in life, finance, or pensions should take 444 and those interested in health or property/casualty should take 446.

STAT444 Adv Long-term Act Math - Adv Long-term Act Math 3.0

STAT446 Adv Short-term Act Math - Adv Short-term Act Math 3.0

Requirement 7 —Complete 9 hours

Note: Courses used to fulfill Requirements 4 and 6 will not double count here. Note: No more than 3.0 hours of any combination of STAT 496R and STAT 497R can be used for this requirement.

ACC200 Principles of Accounting - Principles of Accounting 3.0

ECON110 Econ Principles & Problems - Econ Principles & Problems 3.0

FIN201 Principles of Finance - Principles of Finance 3.0

IS515 Adv Spreadsheets Bus Analysis - Spreadsheets for Bus Analysis 3.0

IS520 Spreadsheet Automation - Spreadsheet Automation 3.0

STAT234 Methods of Survey Sampling - Methods of Survey Sampling 3.0

STAT251 Intro to Bayesian Statistics - Intro to Bayesian Statistics 3.0

STAT281 Data Visualization - Data Visualization 3.0

STAT286 Data Science Ecosystems - Data Science Ecosystems 3.0

STAT381 Statistical Cloud Computing - Statistical Computing 3.0

STAT386 Data Science Process - Data Science Process 3.0

STAT395R Special Topics in Applied Stat - Special Topics in Applied Stat - *You may take up to 3.0 credit hours* 1.0v

STAT435 Nonparametric Stat Methods - Nonparametric Stat Methods 3.0

STAT437 Applications in Biostatistics - Applications in Biostatistics 3.0

STAT444 Adv Long-term Act Math - Adv Long-term Act Math 3.0

STAT446 Adv Short-term Act Math - Adv Short-term Act Math 3.0

STAT451 Applied Bayesian Statistics - Applied Bayesian Statistics 3.0

STAT466 Bayesian Reliability - Bayesian Reliability 3.0

STAT469 Analysis of Correlated Data - Analysis of Correlated Data 3.0

STAT482 Data Science Capstone 1 - Data Science Capstone 1 3.0

STAT483 Data Science Capstone 2 - Data Science Capstone 2 3.0

STAT486 Machine Learning - Machine Learning 3.0

STAT487 Deep Learning - Deep Learning 3.0

STAT495R Special Topics in Statistics - Special Topics in Statistics - *You may take up to 3.0 credit hours* 1.0v

STAT496R Academic Internship - Academic Internship - *You may take up to 3.0 credit hours* 0.5v

STAT497R Intro to Research - Intro to Research - *You may take up to 3.0 credit hours* 0.5v

STAT531 Experimental Design and Causal - Experimental Design 3.0

Recommended Courses: Students should take Econ 110, Acc 200, and Fin 201 to complete the Society of Actuaries VEEs. Additionally, IS 515 and IS 520 are valuable in the daily work of an actuary.

STAT538 Survival Analysis - Survival Analysis 3.0

Requirement 8 — Complete 3 hours

Note: Courses used anywhere above will not double count here.

STAT234 Methods of Survey Sampling - Methods of Survey Sampling 3.0

STAT251 Intro to Bayesian Statistics - Intro to Bayesian Statistics 3.0

STAT274 Theory of Interest - Theory of Interest 3.0

STAT281 Data Visualization - Data Visualization 3.0

STAT286 Data Science Ecosystems - Data Science Ecosystems 3.0

STAT381 Statistical Cloud Computing - Statistical Computing 3.0

STAT386 Data Science Process - Data Science Process 3.0

STAT435 Nonparametric Stat Methods - Nonparametric Stat Methods 3.0

STAT437 Applications in Biostatistics - Applications in Biostatistics 3.0

STAT448 Predictive Analytics - Predictive Analysis 3.0

STAT451 Applied Bayesian Statistics - Applied Bayesian Statistics 3.0

STAT466 Bayesian Reliability - Bayesian Reliability 3.0

STAT469 Analysis of Correlated Data - Analysis of Correlated Data 3.0

STAT482 Data Science Capstone 1 - Data Science Capstone 1 3.0

STAT483 Data Science Capstone 2 - Data Science Capstone 2 3.0

STAT486 Machine Learning - Machine Learning 3.0

STAT487 Deep Learning - Deep Learning 3.0

STAT495R Special Topics in Statistics - Special Topics in Statistics - *You may take up to 3.0 credit hours* 1.0v

STAT531 Experimental Design and Causal - Experimental Design 3.0

STAT538 Survival Analysis - Survival Analysis 3.0

Requirement 9 — Complete 6 hours

Note: Courses used anywhere above will not double count here. Note: No more than 3.0 credit hours of any combination of Stat 496R and Stat 497R may be counted toward this requirement. Note: It is strongly recommended that students interested in graduate study in biostatistics complete Math 341 and 342.

HLTH345 Principles of Epidemiology - Principles of Epidemiology 3.0

MATH341 Theory of Analysis 1 - Theory of Analysis 1 3.0

MATH342 Theory of Analysis 2 - Theory of Analysis 2 3.0

STAT234 Methods of Survey Sampling - Methods of Survey Sampling 3.0

STAT251 Intro to Bayesian Statistics - Intro to Bayesian Statistics 3.0

STAT274 Theory of Interest - Theory of Interest 3.0

STAT281 Data Visualization - Data Visualization 3.0

STAT286 Data Science Ecosystems - Data Science Ecosystems 3.0

STAT381 Statistical Cloud Computing - Statistical Computing 3.0

STAT386 Data Science Process - Data Science Process 3.0

STAT395R Special Topics in Applied Stat - Special Topics in Applied Stat - *You may take once* 1.0v

STAT435 Nonparametric Stat Methods - Nonparametric Stat Methods 3.0

STAT437 Applications in Biostatistics - Applications in Biostatistics 3.0

STAT448 Predictive Analytics - Predictive Analysis 3.0

STAT451 Applied Bayesian Statistics - Applied Bayesian Statistics 3.0

STAT466 Bayesian Reliability - Bayesian Reliability 3.0

STAT469 Analysis of Correlated Data - Analysis of Correlated Data 3.0

STAT482 Data Science Capstone 1 - Data Science Capstone 1 3.0

STAT483 Data Science Capstone 2 - Data Science Capstone 2 3.0

STAT486 Machine Learning - Machine Learning 3.0

STAT487 Deep Learning - Deep Learning 3.0

STAT495R Special Topics in Statistics - Special Topics in Statistics - *You may take up to 3.0 credit hours*

STAT496R Academic Internship - Academic Internship - *You may take up to 3.0 credit hours*

STAT497R Intro to Research - Intro to Research - *You may take up to 3.0 credit hours*

STAT531 Experimental Design and Causal - Experimental Design 3.0

STAT538 Survival Analysis - Survival Analysis 3.0

Statistics (BS): Applied Statistics & Analytics Emphasis

Program Information

Minimum Credit Hours
55

Maximum Credit Hours
55

Major Academic Plan
MAPS - BS in Statistics Applied Statistics & Analytics 2026-2027.docx

Learning Outcomes

Title
Fitting Statistical Models

Learning Outcome
Graduates of the program will demonstrate the ability to analyze data by appropriately fitting assessing and interpreting a variety of statistical models

Title
Communication Skills

Learning Outcome
Graduates of the program will write technical reports and make technical presentations containing statistical results and work in teams to demonstrate the consulting skills of a professional statistician

Title
Computing Skills

Learning Outcome
Graduates of the program will be able to manipulate data use appropriate statistical methods to analyze data document and debug code in one or more statistical software programs.

Title
Theoretical Foundations

Learning Outcome
Graduates of the program will be able to solve problems in basic probability theory statistical inference and calculus.

Title
Professional Preparation

Learning Outcome
Be employable in jobs with BS Applied Statistics requirement

Program Requirements
Requirement 1 —Complete 2 Courses

STAT121 Intro to Stat Data Analysis - Intro to Stat Data Analysis 3.0

STAT130 Intro to Statistics Department - Intro to Statistics Department 0.5

Requirement 2 —Complete 6 Courses

Statistics core courses:

STAT230 Statistical Modeling 1 - Statistical Modeling 1 3.0

STAT240 Probability and Inference 1 - Probability and Inference 1 3.0

STAT250 Applied R Programming - Applied R Programming 3.0

STAT330 Statistical Modeling 2 - Statistical Modeling 2 3.0

STAT340 Probability and Inference 2 - Probability and Inference 2 3.0

STAT390 Data Science Ethics - Data Ethics 1.5

Requirement 3 —Complete 4 Courses

Mathematical foundation courses:

MATH112 Calculus 1 - Calculus 1 4.0

MATH113 Calculus 2 - Calculus 2 4.0

MATH213 Elementary Linear Algebra - Elementary Linear Algebra 2.0

MATH215 Computational Linear Algebra - Computational Linear Algebra 1.0

Requirement 4 —Complete 3 hours

C S110 How to Program - How to Program 3.0

C S111 Intro to Computer Science - Intro to Computer Science 3.0

HLTH440 Statistical Computing in Epi - Statistical Computing in Epi 3.0

IS520 Spreadsheet Automation - Spreadsheet Automation 3.0

STAT286 Data Science Ecosystems - Data Science Ecosystems 3.0

Requirement 5 —Complete 6 hours

STAT435 Nonparametric Stat Methods - Nonparametric Stat Methods 3.0

STAT437 Applications in Biostatistics - Applications in Biostatistics 3.0

STAT451 Applied Bayesian Statistics - Applied Bayesian Statistics 3.0

STAT466 Bayesian Reliability - Bayesian Reliability 3.0

STAT469 Analysis of Correlated Data - Analysis of Correlated Data 3.0

STAT482 Data Science Capstone 1 - Data Science Capstone 1 3.0

STAT483 Data Science Capstone 2 - Data Science Capstone 2 3.0

STAT486 Machine Learning - Machine Learning 3.0

STAT487 Deep Learning - Deep Learning 3.0

STAT495R Special Topics in Statistics - Special Topics in Statistics - *You may take once* 1.0v

STAT531 Experimental Design and Causal - Experimental Design 3.0

STAT538 Survival Analysis - Survival Analysis 3.0

Requirement 6 —Complete 15 hours

Note: Courses used in Requirements 4 and 5 will not double count here. Note: No more than 3.0 hours of any combination of STAT 496R and STAT 497R can be used for this requirement.

IS515 Adv Spreadsheets Bus Analysis - Spreadsheets for Bus Analysis 3.0

IS520 Spreadsheet Automation - Spreadsheet Automation 3.0

MATH314 Calculus of Several Variables - Calculus of Several Variables 3.0

STAT234 Methods of Survey Sampling - Methods of Survey Sampling 3.0

STAT251 Intro to Bayesian Statistics - Intro to Bayesian Statistics 3.0

STAT274 Theory of Interest - Theory of Interest 3.0

STAT281 Data Visualization - Data Visualization 3.0

STAT286 Data Science Ecosystems - Data Science Ecosystems 3.0

STAT344 Long-term Actuarial Math - Long-term Actuarial Math 3.0

STAT346 Short-term Actuarial Math - Short-term Actuarial Math 3.0

STAT448 Predictive Analytics - Predictive Analytics 3.0

STAT381 Statistical Cloud Computing - Statistical Cloud Computing 3.0

STAT386 Data Science Process - Data Science Process 3.0

STAT395R Special Topics in Applied Stat - Special Topics in Applied Stat - *You may take up to 3.0 credit hours* 1.0v

STAT435 Nonparametric Stat Methods - Nonparametric Stat Methods 3.0

STAT437 Applications in Biostatistics - Applications in Biostatistics 3.0

STAT451 Applied Bayesian Statistics - Applied Bayesian Statistics 3.0

STAT466 Bayesian Reliability - Bayesian Reliability 3.0

STAT469 Analysis of Correlated Data - Analysis of Correlated Data 3.0

STAT482 Data Science Capstone 1 - Data Science Capstone 1 3.0

STAT483 Data Science Capstone 2 - Data Science Capstone 2 3.0

STAT486 Machine Learning - Machine Learning 3.0

STAT487 Deep Learning - Deep Learning 3.0

STAT495R Special Topics in Statistics - Special Topics in Statistics - *You may take up to 3.0 credit hours* 1.0v

STAT496R Academic Internship - Academic Internship - *You may take up to 3.0 credit hours* 0.5v

STAT497R Intro to Research - Intro to Research - *You may take up to 3.0 credit hours* 0.5v

STAT531 Experimental Design and Causal - Experimental Design 3.0

STAT538 Survival Analysis - Survival Analysis 3.0

Learning Outcomes

Title
Skill in fitting statistical models

Learning Outcome
Graduates of the program will demonstrate the ability to analyze data by appropriately fitting, assessing, and interpreting a variety of statistical models.

Title
Communication Skills

Learning Outcome
Graduates of the program will write technical reports and make technical presentations containing statistical results, and work in teams to demonstrate the consulting skills of a professional statistician

Title
Computing Skills

Learning Outcome
Graduates of the program will be able to manipulate data, use appropriate statistical methods, and document and debug code in one or more statistical software programs.

Title
Theoretical Foundations

Learning Outcome
Graduates of the program will be able to solve problems in basic probability theory, statistical inference and calculus.

Title
Professional Preparation

Learning Outcome
Graduates of the program will be employable in jobs with BS Data Science or BS Applied Statistics requirement.

Program Requirements

Requirement 1 —Complete 2 Courses

STAT121 Intro to Stat Data Analysis - Intro to Stat Data Analysis 3.0

STAT130 Intro to Statistics Department - Intro to Statistics Department 0.5

Requirement 2 —Complete 7 Courses

Statistics core courses:

STAT230 Statistical Modeling 1 - Statistical Modeling 1 3.0

STAT240 Probability and Inference 1 - Probability and Inference 1 3.0

STAT251 Intro to Bayesian Statistics - Introduction to Bayesian Statistics 3.0

STAT330 Statistical Modeling 2 - Statistical Modeling 2 3.0

STAT340 Probability and Inference 2 - Probability and Inference 2 3.0

STAT390 Data Science Ethics - Data Ethics 1.5

STAT430 Statistical Modeling 3 - Statistical Modeling 3 3.0

Requirement 3 — Complete 4 Courses

Mathematical foundation courses:

MATH112 Calculus 1 - Calculus 1 4.0

MATH113 Calculus 2 - Calculus 2 4.0

MATH213 Elementary Linear Algebra - Elementary Linear Algebra 2.0

MATH215 Computational Linear Algebra - Computational Linear Algebra 1.0

Requirement 4 —Complete 3 hours

C S180 Intro to Data Science - Intro to Data Science 3.0

HLTH440 Statistical Computing in Epi - Statistical Computing in Epi 3.0

IS520 Spreadsheet Automation - Spreadsheet Automation 3.0

STAT286 Data Science Ecosystems - Data Science Ecosystems 3.0

Requirement 5 —Complete 1 of 2 Options

Option 5.1 —Complete 2 Courses

STAT482 Data Science Capstone 1 - Data Science Capstone 1 3.0

STAT483 Data Science Capstone 2 - Data Science Capstone 2 3.0

Option 5.2 —Complete 2 Courses

STAT386 Data Science Process - Data Science Process 3.0

STAT486 Machine Learning - Machine Learning 3.0

Requirement 6 —Complete 2 Courses

C S111 Intro to Computer Science - Intro to Computer Science 3.0

C S235 Data Structures - Data Structures 3.0

Requirement 7 —Complete 3 hours

Courses taken in any of the requirements above will not double count here.

STAT381 Statistical Cloud Computing - Statistical Cloud Computing 3.0

STAT435 Nonparametric Stat Methods - Nonparametric Stat Methods 3.0

STAT437 Applications in Biostatistics - Applications in Biostatistics 3.0

STAT451 Applied Bayesian Statistics - Applied Bayesian Statistics 3.0

STAT466 Bayesian Reliability - Bayesian Reliability 3.0

STAT469 Analysis of Correlated Data - Analysis of Correlated Data 3.0

STAT487 Deep Learning - Deep Learning 3.0

STAT495R Special Topics in Statistics - Special Topics in Statistics - *You may take once* 1.0v

STAT531 Experimental Design and Causal - Experimental Design 3.0

STAT538 Survival Analysis - Survival Analysis 3.0

Requirement 8 —Complete 6 hours

Courses taken in any of the requirements above will not double count here. No more than 3.0 hours of any combination of STAT 496R and STAT 497R can be used for this requirement.

IS515 Adv Spreadsheets Bus Analysis - Spreadsheets for Bus Analysis 3.0

IS520 Spreadsheet Automation - Spreadsheet Automation 3.0

MATH314 Calculus of Several Variables - Calculus of Several Variables 3.0

MATH341 Theory of Analysis 1 - Theory of Analysis 1 3.0

MATH342 Theory of Analysis 2 - Theory of Analysis 2 3.0

STAT538 Survival Analysis - Survival Analysis 3.0

Global Women's Studies (Minor)

Program Information

Minimum Credit Hours
16

Maximum Credit Hours
16

Learning Outcomes

Title
Women and Society

Learning Outcome
Students will demonstrate knowledge of the ways different institutions (such as religion, education, media, family, government and law), issues (gender-based violence, health, representation in the media, the workplace), and factors (race, ethnicity, class, sexuality, ability) intersect with and affect women's lives.

Title
Women's Contributions

Learning Outcome
Students will demonstrate knowledge of the worldwide contributions of women (individually and collectively) to history, culture, politics, health, sciences, religions, family, etc.

Title
Effective Communication and Analysis

Learning Outcome
Students will read, write, and think analytically. They will conduct research using primary and secondary sources and communicate that research effectively in oral, written, and multi-media presentations.

Title
Women and Stewardship

Learning Outcome
Students will be afforded opportunities in and outside the classroom to define and cultivate their personal, civic, and spiritual stewardships.

Program Requirements

Requirement 1 — Complete 1 Course

GWS222 Intro Global Women's Studies - Intro Global Women's Studies 3.0

Requirement 2 —Complete 2 Options

Option 2.1 —Complete 1 Course

GWS392R GWS Colloquium - GWS Colloquium - *You may take once* 1.0

Option 2.2 — Complete 1 of 3 Courses

GWS392R GWS Colloquium - GWS Colloquium - *You may take once* 1.0

GWS394R GWS Topics in Other Languages - GWS Topics in Other Languages - *You may take once* 1.0v

IAS301R KC Lecture Series - KC Lecture Series - *You may take once* 1.0

Requirement 3 — Complete 2 hours

Other study abroad, internship, mentored learning, or experiential opportunities related to women's studies may be substituted with faculty coordinator approval.

GWS395R GWS Mentored Study Experience - GWS Mentored Study Experience - *You may take once* 1.0v

GWS397R GWS Editing for Publication - GWS Editing for Publication - *You may take once* 1.0v

GWS398R GWS Study Abroad Experience - GWS Study Abroad Experience - *You may take once* 3.0

GWS399R GWS Internship - GWS Internship - *You may take once* 1.0v

GWS492 GWS Capstone - GWS Capstone 2.0

Requirement 4 — Complete 9 hours

ANTHR431 Kinship, Race, and Gender - Kinship, Race, and Gender 3.0

ARAB427 Arab Women Authors - Arab Women Authors 2.0

ARTHC301 Women in Art - Women in Art 3.0

COMMS481 Family, Gender, and Media - Family, Gender, and Media 3.0

ENGL396R Studies in Women's Lit - Studies in Women's Lit - *You may take once* 3.0

FREN458R Women in French Literature - Women in French Literature - *You may take once* 3.0

GERM430 Women's Studies Seminar - Women's Studies Seminar 3.0

GWS330 Women in the Scriptures - Women in the Scriptures 3.0

GWS332 History Latter-day Saint Women - History Latter-day Saint Women 3.0

GWS337R LDS Women Cultural Producers - LDS Women Cultural Producers - *You may take once* 3.0

GWS341 Women and Global Migration - Women and Global Migration 3.0

GWS350 Medieval Europe Women Writers - Medieval Europe Women Writers 3.0

GWS351 Early Mod Europ Women Writers - Early Mod Europ Women Writers 3.0

GWS352 Mod European Women Writers - Mod European Women Writers 3.0

GWS354 Pan American Women Writers - Pan American Women Writers 3.0

GWS358 Women and World Cinema - Women and World Cinema 3.0

GWS360R Women Who Made a Difference - Women Who Made a Difference - *You may take once* 1.0v

GWS370 Women in Science - Women in Science 3.0

GWS390R Special Topics - Special Topics - *You may take once* 1.0v

GWS394R GWS Topics in Other Languages - GWS Topics in Other Languages - *You may take once* 1.0v

GWS395R GWS Mentored Study Experience - GWS Mentored Study Experience - *You may take once* 1.0v

GWS397R GWS Editing for Publication - GWS Editing for Publication - *You may take once* 1.0v

GWS398R GWS Study Abroad Experience - GWS Study Abroad Experience - *You may take once* 3.0

GWS399R GWS Internship - GWS Internship - *You may take once* 1.0v

GWS422 Global Women's Studies Theory - Global Women's Studies Theory 3.0

HIST288R Women in a Changing World - Women in a Changing World - *You may take once* 0.5v

HIST318 European Women's History - European Women's History 3.0

HIST319 Family in Europe - Family in Europe 3.0

HIST358 Gender & History in Latin Amer - Gender & History in Latin Amer 3.0

HIST378 History of American Families - History of American Families 3.0

HIST384 US Women's History - US Women's History 3.0

HLTH450 Women's Health - Women's Health 3.0

ITAL445 Italian Women Writers - Italian Women Writers 3.0

PHIL370R Women and Philosophy - Women and Philosophy - *You may take once* 3.0

POLI323 Race, Ethnicity, and Gender - Race, Ethnicity, and Gender 3.0

POLI342 Gender and Politics - Gender and Politics 3.0

POLI472 Intrnl Political Econ of Women - Intrnl Political Econ of Women 3.0

PORT437R Women Writers in Portuguese - Women Writers in Portuguese - *You may take once* 3.0

PSYCH306 Psychology of Gender - Psychology of Gender 3.0

SFL354 Cross-Cultural Fam & Hum Dev - Cross-Cultural Fam & Hum Dev 3.0

SFL356 Gender Development in Families - Gender Development in Families 3.0

SFL358 Media, Fam & Human Dev - Media, Fam & Human Dev 3.0

SOC223 Sociology of Race & Ethnicity - Sociology of Race & Ethnicity 3.0

SOC345 World Populations - World Populations 3.0

SOC360 Intro to Family Sociology - Intro to Family Sociology 3.0

SOC367 Soc of Gender - Soc of Gender 3.0

SPAN437R Women Writers in Spanish - Women Writers in Spanish - *You may take once* 3.0

Anthropology (Minor)

Program Information

Minimum Credit Hours
16

Maximum Credit Hours
16

Learning Outcomes

Title
Effective Communication

Learning Outcome
Students will be able to communicate evidence-based anthropological arguments visually, orally, and in written form with professional and public audiences.

Title
Research Skills and Methods

Learning Outcome
Students will be able to apply appropriate methods to gather, analyze, and interpret anthropological data.

Title
Human Cultural History and Diversity

Learning Outcome
Students will be able to describe the diversity of past human cultures and apply this knowledge to analysis of the contemporary world.

Title
Critical Thinking And Theoretical Application

Learning Outcome
Program graduates will be to evaluate concepts and apply appropriate theoretical frameworks in the analysis of social issues.

Title
Lifelong Learning and Transferable Skills

Learning Outcome
Students will apply anthropological skills to other disciplines and to continuously expand their knowledge after graduation.

Program Requirements

Requirement 1 — Complete 16 hours

No more than two courses can be taken from lower-division (100-level) course offerings.

ANTHR101 Culture and Human Experience - Culture and Human Experience 3.0

ANTHR103 Archaeology Field Trip - Archaeology Field Trip 1.0

ANTHR110 Discovering Archaeology - Discovering Archaeology 3.0

ANTHR120 Biological Anthropology - Biological Anthropology 3.0

ANTHR150 Introduction to the Major - Introduction to the Major 0.5

ANTHR209 Intercultural Communication - Intercultural Communication 3.0

ANTHR215 Archaeological Method Theory - Archaeological Method Theory 3.0

ANTHR239 Intro to Medical/Psych Anthr - Intro to Medical/Psych Anthr 3.0

ANTHR247 Applied Anthropology - Applied Anthropology 3.0

ANTHR301 Human Osteology - Human Osteology 3.0

ANTHR304 Foundations of Social Theory - Foundations of Social Theory 3.0

ANTHR305 Foundations of Anthr Theory - Foundations of Anthr Theory 3.0

ANTHR311 Museums & Cultures - Museums & Cultures 3.0

ANTHR312 Intercultural Communication - Intercultural Communication 3.0

ANTHR314 Museum Registration & Ethics - Museum Registration & Ethics 3.0

ANTHR327 The Hmong Diaspora - The Hmong Diaspora 3.0

ANTHR328 Andean South America - Andean South America 3.0

ANTHR330 Peoples of Africa - Peoples of Africa 3.0

ANTHR340 Peoples of the Middle East - Peoples of the Middle East 3.0

ANTHR341 Ethnonationalism and SE Asia - Ethnonationalism and SE Asia 3.0

ANTHR342 Disease and Society - Disease and Society 3.0

ANTHR343 Chinese Culture & Society - Chinese Culture & Society 3.0

ANTHR344 Korean Culture - Korean Culture 3.0

ANTHR345 American Culture - American Culture 3.0

ANTHR350 Arch Cultures of N America - Arch Cultures of N America 3.0

ANTHR351 Archaeology and the Bible - Archaeology and the Bible 3.0

ANTHR355 Arch Mesoamerica - Arch Mesoamerica 3.0

ANTHR370 Community Based Research - Community Based Research 3.0

ANTHR375 Archaeology of Egypt - Archaeology of Egypt 3.0

ANTHR376 Arch of Ancient Aegean&Greece - Arch of Ancient Aegean&Greece 3.0

ANTHR377 Arch of Roman Civilization - Arch of Roman Civilization 3.0

ANTHR378 Near Eastern Archaeology - Near Eastern Archaeology 3.0

ANTHR379 Archaeology of Islam - Archaeology of Islam 3.0

ANTHR385 Archaeology of Europe - Archaeology of Europe 3.0

ANTHR390R Spec Topics in Regional Anthro - Spec Topics in Regional Anthro - *You may take once* 0.5v

ANTHR402 Quantitative Methods - Quantitative Methods 3.0

ANTHR404 Historical Anthropology - Historical Anthropology 3.0

ANTHR405 Archaeological Science - Archaeological Science 3.0

ANTHR406 Digital Archaeology - Digital Archaeology 3.0

ANTHR407 Multispecies Sociality - Multispecies Sociality 3.0

ANTHR409 Advanced Linguistic Anthr - Advanced Linguistic Anthr 3.0

ANTHR410 Ethnoarchaeology - Ethnoarchaeology 3.0

ANTHR412 Museum Collections Management - Museum Collections Management 3.0

ANTHR414 Museum Projects - Museum Projects 3.0

ANTHR420 Visual Anthro - Visual Anthro 3.0

ANTHR430 Anthropology of Religion - Anthropology of Religion 3.0

ANTHR431 Kinship, Race, and Gender - Kinship & Gender 3.0

ANTHR432 Economic&Political Institutns - Economic&Political Institutns 3.0

ANTHR434 Medical Anthropology - Medical Anthropology 3.0

ANTHR436 Symbolic Anthropology - Symbolic Anthropology 3.0

ANTHR439 Advanced Medical/Psych Anthr - Advanced Medical/Psych Anthr 3.0

ANTHR366 The End of the World - The End of the World 3.0

ANTHR442 Ethnographic Research Design - Ethnographic Research Design 3.0

ANTHR450 Anthropology Seminar - Anthropology Seminar 1.0

ANTHR454 Field School Prep - Field School Prep 2.0

ANTHR455 Field School of Archaeology - Field School of Archaeology 6.0

ANTHR456 Lab Skills for Anthropology - Lab Skills for Anthropology 3.0

ANTHR490R Special Topics - Special Topics in Anthropology - *You may take once* 0.5v

ANTHR495R Ethnographic Field Project - Ethnographic Field Project - *You may take once* 3.0v

ANTHR496R Academic Internship - Academic Internship - *You may take once* 0.5v

ANTHR497 Directed Readings - Directed Readings 3.0

ANTHR499 Senior Thesis - Senior Thesis 3.0

ANTHR503 Contemporary Theory - Contemporary Theory 3.0

ANTHR512 Heritage Resource Mgt - Heritage Resource Mgt 3.0

ANTHR522 Museum Practices & Technlgs - Museum Practices & Technlgs 3.0

ANTHR524 Museology: Curation & Wrtng - Museology: Curation & Wrtng 3.0

ANTHR526 Museum Exhibitns & Progrmmng - Museum Exhibitns & Progrmmng 3.0

ANTHR530 Great Basin Archaeology - Great Basin Archaeology 3.0

ANTHR535 Southwest Seminar - Southwest Seminar 3.0

ANTHR641 Southeast Asia Seminar - Southeast Asia Seminar 3.0

ANTHR543 Ethnographic Data Analysis - Ethnographic Data Analysis 3.0

ANTHR580 Near East Seminar - Near East Seminar 3.0

IAS353R Intercultural Outreach Prep - Intercultural Outreach Prep - *You may take once* 1.0v

Maximum Credit Hours
33.5

Learning Outcomes

Title
See Anthropology BA Cultural Emphasis

Learning Outcome
See Anthropology BA Cultural Emphasis

Program Requirements

Requirement 1 — Obtain confirmation from your advisement center that you have completed the following:

Complete all requirements of a primary major. Double counting courses between primary major and anthropology will not be allowed.

Requirement 2 — Complete 18.5 hours

ANTHR101 Culture and Human Experience - Culture and Human Experience 3.0

ANTHR150 Introduction to the Major - Introduction to the Major 0.5

ANTHR304 Foundations of Social Theory - Foundations of Social Theory 3.0

ANTHR305 Foundations of Anthr Theory - Foundations of Anthr Theory 3.0

ANTHR442 Ethnographic Research Design - Ethnographic Research Design 3.0

ANTHR495R Ethnographic Field Project - Ethnographic Field Project - *You may take once* 3.0v

ANTHR499 Senior Thesis - Senior Thesis 3.0

Note: The major requires that a field project be completed in one of the recognized field schools conducted by a member of the BYU faculty. A local field work option is available in exceptional circumstances and must be approved by the entire faculty.

Requirement 3 — Complete 15 hours

ANTHR120 Biological Anthropology - Biological Anthropology 3.0

ANTHR209 Intercultural Communication - Intercultural Communication 3.0

ANTHR239 Intro to Medical/Psych Anthr - Intro to Medical/Psych Anthr 3.0

ANTHR247 Applied Anthropology - Applied Anthropology 3.0

KF7BlbKyip847bVGy0k6 - Missing course - Nat People So Am 3.0

ANTHR327 The Hmong Diaspora - The Hmong Diaspora 3.0

ANTHR328 Andean South America - Andean South America 3.0

ANTHR340 Peoples of the Middle East - Peoples of the Middle East 3.0

ANTHR341 Ethnonationalism and SE Asia - Ethnonationalism and SE Asia 3.0

ANTHR342 Disease and Society - Disease and Society 3.0

ANTHR344 Korean Culture - Korean Culture 3.0

ANTHR366 The End of the World - The End of the World 3.0

ANTHR370 Community Based Research - Community Based Interventions 3.0

ANTHR390R Spec Topics in Regional Anthro - Spec Topics in Regional Anthropology - *You may take up to 6.0 credits* 0.5v

ANTHR402 Quantitative Methods - Quantitative Methods 3.0

ANTHR404 Historical Anthropology - Historical Anthropology 3.0

ANTHR407 Multispecies Sociality - Multispecies Sociality 3.0

ANTHR409 Advanced Linguistic Anthr - Advanced Linguistic Anthr 3.0

ANTHR420 Visual Anthro - Visual Anthro 3.0

ANTHR430 Anthropology of Religion - Anthropology of Religion 3.0

ANTHR431 Kinship, Race, and Gender - Kinship & Gender 3.0

ANTHR432 Economic&Political Institutns - Economic&Political Institutns 3.0

ANTHR436 Symbolic Anthropology - Symbolic Anthropology 3.0

ANTHR439 Advanced Medical/Psych Anthr - Advanced Medical/Psych Anthr 3.0

ANTHR450 Anthropology Seminar - Anthropology Seminar 1.0

ANTHR490R Special Topics - Special Topics - *You may take up to 3.0 credit hours* 0.5v

ANTHR497 Directed Readings - Directed Readings 3.0

ANTHR498R Directed Research - Directed Research - *You may take once* 1.0v

ANTHR503 Contemporary Theory - Contemporary Theory 3.0

ANTHR543 Ethnographic Data Analysis - Ethnographic Data Analysis 3.0

LING550 Sociolinguistics - Sociolinguistics 3.0

LING551 Anthropological Linguistics - Anthropological Linguistics 3.0

Anthropology (BA): Archaeology Emphasis

Program Information

Minimum Credit Hours
47.5

Maximum Credit Hours
47.5

Learning Outcomes

Title
Professional Communication

Learning Outcome
Graduates will have the oral and written communication skills to be effective professionals, leaders, and to serve their communities.

Title
Human Cultural History and Diversity

Learning Outcome
Graduates will have knowledge of the diversity of human culture throughout the world and time and practice Christ-like love for all people, which comes from our common heritage as children of God (Malachi 4:5-6).

Title
Method and Theory

Learning Outcome
Graduates will be able to think critically, apply anthropological theory and appropriate research methods. They will gather, process, and interpret archaeological data and be able to transfer those research skills to increase our knowledge and serve God's children (D&C 124:26).

Title
Original Mentored Research

Learning Outcome
Inspired by faculty mentors, students will be able to conduct original, high-quality research and disseminate results through senior theses, presentations, reports, published articles, and other products. Students will learn to seek and recognize inspiration in these pursuits.

Title
Lifelong Learning and Service

Learning Outcome
In preparation to serve, uplift, and edify others, graduates will continue life-long learning and teaching, which are integral to our gospel heritage and covenants. They will be guided by the commandment to "seek ye diligently and teach one another words of wisdom; yea, seek ye out of the best books words of wisdom; seek learning, even by study and also by faith" (D&C 88:80, 112).

Program Requirements

Requirement 1 — Complete 6 Courses

ANTHR101 Culture and Human Experience - Culture and Human Experience 3.0

ANTHR110 Discovering Archaeology - Intro to Archaeology 3.0

ANTHR150 Introduction to the Major - Introduction to the Major 0.5

ANTHR215 Archaeological Method Theory - Archaeol:Mthd,Thry 3.0

ANTHR304 Foundations of Social Theory - Foundations of Social Theory 3.0

ANTHR305 Foundations of Anthr Theory - Foundations of Anthr Theory 3.0

Requirement 2 —Complete 9 hours

Regional archaeology courses

ANTHR328 Andean South America - Andean South America 3.0

ANTHR350 Arch Cultures of N America - Arch Cultures of N America 3.0

ANTHR351 Archaeology and the Bible - Archaeology and the Bible 3.0

ANTHR355 Arch Mesoamerica - Arch Mesoamerica 3.0

ANTHR375 Archaeology of Egypt - Archaeology of Egypt 3.0

ANTHR376 Arch of Ancient Aegean&Greece - Arch of Ancient Aegean&Greece 3.0

ANTHR377 Arch of Roman Civilization - Arch of Roman Civilization 3.0

ANTHR378 Near Eastern Archaeology - Near Eastern Archaeology 3.0

ANTHR379 Archaeology of Islam - Archaeology of Islam 3.0

ANTHR385 Archaeology of Europe - Archaeology of Europe 3.0

ANTHR390R Spec Topics in Regional Anthro - Spec Topics in Regional Anthro - *You may take up to 3.0 credit hours* 0.5v

ANTHR530 Great Basin Archaeology - Great Basin Archaeology 3.0

ANTHR535 Southwest Seminar - Southwest Seminar 3.0

ANTHR580 Near East Seminar - Near East Seminar 3.0

ANTHR 590R - Special Topics - *You may take up to 3.0 credit hours* 3.0 - *This course is no longer avaliable.*

Requirement 3 — Complete 6 hours

Archaeological and museum practice courses

ANTHR103 Archaeology Field Trip - Archaeology Field Trip 1.0

ANTHR301 Human Osteology - Human Osteology 3.0

ANTHR311 Museums & Cultures - Museums & Cultures 3.0

ANTHR314 Museum Registration & Ethics - Museum Registration & Ethics 3.0

ANTHR402 Quantitative Methods - Quantitative Methods 3.0

ANTHR404 Historical Anthropology - Historical Anthropology 3.0

ANTHR405 Archaeological Science - Archaeological Science 3.0

ANTHR406 Digital Archaeology - Archaeoinformatics 3.0

ANTHR410 Ethnoarchaeology - Ethnoarchaeology 3.0

ANTHR412 Museum Collections Management - Museum Collections Management 3.0

ANTHR414 Museum Projects - Museum Projects 3.0

ANTHR490R Special Topics - Special Topics - *You may take once* 0.5v

ANTHR512 Heritage Resource Mgt - Heritage Resource Mgt 3.0

Requirement 4 — Complete 3 hours

Other anthropological sub disciplines

ANTHR120 Biological Anthropology - Biological Anthropology 3.0

ANTHR366 The End of the World - The End of the World 3.0

ANTHR407 Multispecies Sociality - Multispecies Sociality 3.0

ANTHR409 Advanced Linguistic Anthr - Advanced Linguistic Anthr 3.0

ANTHR430 Anthropology of Religion - Anthropology of Religion 3.0

ANTHR431 Kinship, Race, and Gender - Kinship & Gender 3.0

ANTHR432 Economic&Political Institutns - Economic&Political Institutns 3.0

ANTHR436 Symbolic Anthropology - Symbolic Anthropology 3.0

ANTHR439 Advanced Medical/Psych Anthr - Advanced Medical/Psych Anthr 3.0

ANTHR450 Anthropology Seminar - Anthropology Seminar 1.0

ANTHR490R Special Topics in Theory & Sys - Special Topics in Theory & Sys - *You may take once* 0.5v

ANTHR495R Ethnographic Field Project - Ethnographic Field Project - *You may take once* 3.0v

ANTHR496R Academic Internship - Academic Internship - *You may take once* 0.5v

ANTHR497 Directed Readings - Directed Readings 3.0

ANTHR498R Directed Research - Directed Research - *You may take once* 1.0v

ANTHR503 Contemporary Theory - Contemporary Theory 3.0

ANTHR543 Ethnographic Data Analysis - Ethnographic Data Analysis 3.0

LING550 Sociolinguistics - Sociolinguistics 3.0

LING551 Anthropological Linguistics - Anthropological Linguistics 3.0

Requirement 5 —Complete 4 Courses

Complete the following in sequential order:

ANTHR454 Field School Prep - Field School Prep 2.0

ANTHR455 Field School of Archaeology - Field School of Archaeology 6.0

ANTHR456 Lab Skills for Anthropology - Lab Skills for Anthropology 3.0

ANTHR499 Senior Thesis - Senior Thesis 3.0

Anthropology (BA): Cultural Emphasis

Program Information

Minimum Credit Hours
45.5

Maximum Credit Hours
45.5

Learning Outcomes

Title
Critical Thinking and Analysis

Learning Outcome
Students will be prepared to analyze and provide anthropological interpretations of human activities, interactions, sociality and thought through the lens of the Gospel of Jesus Christ.

Title
Effective Communication

Learning Outcome
Students will be able to write clearly and precisely. They will also be able to verbally communicate clearly and in a professional manner.

Title
Social Theory

Learning Outcome
Students will be able to utilize a range of social theory frameworks and explain how these rationales are mobilized to understand human agency and action, the relationship between actors and social structures and meaning-making processes.

Title
Research Skills and Methods

Learning Outcome
Students will build character as they use ethnographic, qualitative and quantitative methods to gather, process and interpret research data. They will be able to employ relevant methods and analyses to understand and make decisions about particular issues and problems throughout their lives and careers.

Title
Original Mentored Research

Learning Outcome
Through a 3-course sequence of faculty-mentored research and writing experiences, students will be able to design and conduct an original research project with anthropological questions and appropriate research methods. The research project will culminate in a high quality, theoretically-informed senior thesis.

Title
Human Cultural Diversity

Learning Outcome
Students will be able to identify and interpret diverse social and cultural perspectives through empirical research and empathetic, Christlike engagement.

Title
Integration of Faith and Intellect

Learning Outcome
Students will put theoretical and philosophical concepts and arguments directly into conversation with their faith and testimonies of the Restored Gospel. They will both broaden their understanding of the world-including what anthropologists have contributed to understanding human experience-and deepen their understanding of the Gospel as they "study and learn, and become acquainted with all good books, and with languages, tongues, and people." (Doctrine and Covenants 90:15)

Program Requirements

Requirement 1 — Complete 5 Courses

ANTHR101 Culture and Human Experience - Culture and Human Experience 3.0

ANTHR110 Discovering Archaeology - Intro to Archaeology 3.0

ANTHR150 Introduction to the Major - Introduction to the Major 0.5

ANTHR304 Foundations of Social Theory - Foundations of Social Theory 3.0

ANTHR305 Foundations of Anthr Theory - Foundations of Anthr Theory 3.0

Requirement 2 —Complete 21 hours

These courses can only be counted towards the major if taken on campus, i.e., no test-out language credits can count toward the major.

Option 2.1— Complete 18 hours up to 21 hours

ANTHR120 Biological Anthropology - Biological Anthropology 3.0

ANTHR209 Intercultural Communication - Intercultural Communication 3.0

ANTHR239 Intro to Medical/Psych Anthr - Intro to Medical/Psych Anthr 3.0

ANTHR247 Applied Anthropology - Applied Anthropology 3.0

ANTHR 309 - Language, Culture, & Society 3.0 - *This course is no longer avaliable.*

ANTHR327 The Hmong Diaspora - The Hmong Diaspora 3.0

ANTHR328 Andean South America - Andean South America 3.0

ANTHR330 Peoples of Africa - Peoples of Africa 3.0

ANTHR340 Peoples of the Middle East - Peoples of the Middle East 3.0

ANTHR341 Ethnonationalism and SE Asia - Ethnonationalism and SE Asia 3.0

ANTHR342 Disease and Society - Disease and Society 3.0

ANTHR344 Korean Culture - Korean Culture 3.0

ANTHR366 The End of the World - The End of the World 3.0

ANTHR370 Community Based Research - Community Based Research 3.0

ANTHR390R Spec Topics in Regional Anthro - Spec Topics in Regional Anthro - *You may take up to 9.0 credit hours* 0.5v

ANTHR404 Historical Anthropology - Historical Anthropology 3.0

ANTHR407 Multispecies Sociality- Multispecies Sociality 3.0

ANTHR409 Advanced Linguistic Anthr - Advanced Linguistic Anthr 3.0

ANTHR420 Visual Anthro - Visual Anthro 3.0

ANTHR430 Anthropology of Religion - Anthropology of Religion 3.0

ANTHR431 Kinship, Race, and Gender - Kinship & Gender 3.0

ANTHR432 Economic&Political Institutns - Economic & Political Institutns 3.0

ANTHR436 Symbolic Anthropology - Symbolic Anthropology 3.0

ANTHR439 Advanced Medical/Psych Anthr - Advanced Medical/Psych Anthr 3.0

ANTHR450 Anthropology Seminar - Anthropology Seminar 1.0

ANTHR490R Special Topics - Special Topics - *You may take up to 15.0 credit hours* 0.5v

ANTHR496R Academic Internship - Academic Internship - *You may take once* 0.5v

ANTHR497 Directed Readings - Directed Readings 3.0

ANTHR498R Directed Research - Directed Research - *You may take once* 1.0v

ANTHR503 Contemporary Theory - Contemporary Theory 3.0

ANTHR543 Ethnographic Data Analysis - Ethnographic Data Analysis 3.0

HMONG101 First-Year Hmong - First-Year Hmong 4.0

HMONG102 First-Year Hmong - First-Year Hmong 4.0

HMONG201 Second-Year Hmong - Second-Year Hmong 4.0

HMONG202 Second-Year Hmong - Second-Year Hmong 4.0

KOREA101 First-Year Korean 1 - First-Year Korean 1 4.0

KOREA102 First-Year Korean 2 - First-Year Korean 2 4.0

KOREA201 Second-Year Korean 1 - Second-Year Korean 1 4.0

KOREA202 Second-Year Korean 2 - Second-Year Korean 2 4.0

LING550 Sociolinguistics - Sociolinguistics 3.0

LING551 Anthropological Linguistics - Anthropological Linguistics 3.0

PSYCH311 Critical Issues in Psychology - Critical Issues in Psychology 3.0

Option 2.2 —Complete up to 3 hours

Up to 3 hours of the following Museum Studies courses may be used to complete the Requirement 2.

ANTHR311 Museums & Cultures - Museums & Cultures 3.0

ANTHR314 Museum Registration & Ethics - Museum Registration & Ethics 3.0

ANTHR412 Museum Collections Management - Museum Collections Management 3.0

ANTHR414 Museum Projects - Museum Projects 3.0

ANTHR522 Museum Practices & Technlgs - Museum Practices & Technlgs 3.0

ANTHR524 Museology: Curation & Wrtng - Museology: Curation & Wrtng 3.0

ANTHR526 Museum Exhibitns & Progrmmng - Museum Exhibitns & Progrmmng 3.0

Requirement 3 —Complete 3 Requirements

Complete the following in sequential order:

Requirement 3.1 —Complete 1 Course

ANTHR442 Ethnographic Research Design - Ethnographic Research Design 3.0

Requirement 3.2 —Complete 6 hours

Note: The major requires that a field project be completed in one of the recognized field schools conducted by a member of the BYU faculty. A local field work option is available in exceptional circumstances and must be approved by the entire faculty.

ANTHR495R Ethnographic Field Project - Ethnographic Field Project - *You may take up to 6.0 credit hours* 3.0v

Requirement 3.3 —Complete 1 Course

ANTHR499 Senior Thesis - Senior Thesis 3.0

Family Life (Minor)

Program Information

Minimum Credit Hours
15

Maximum Credit Hours
15

Program Requirements

This minor is intended for non-School of Family Life majors only.

The School of Family Life requires a minimum of nine hours to be taken in residence at BYU and from the School of Family Life for this degree program. These hours may also go toward BYU's 30-hour residency requirement for graduation.

Requirement 1 — Complete 3 Courses

SFL160 Intro to Family Processes - Intro to Family Processes 3.0

SFL210 Human Development - Human Development 3.0

SFL260 Family Finance - Family Finance 3.0

Requirement 2 — Complete 6 hours

SC ED476R Secondary Student Teaching - Secondary Student Teaching - *You may take once* 12.0

SFL102 Introduction to Interiors - Introduction to Interiors 3.0

SFL110 Food Preparation in the Home - Food Preparation in the Home 2.0

SFL185R Basic Sewing Techniques - Basic Sewing Techniques - *You may take once* 3.0

SFL200 Strengthening Marriage/Family - Strengthening Marriage/Family 3.0

SFL202 Design in the Home - Design in the Home 3.0

SFL205 Home and Family Living - Home and Family Living 3.0

SFL215 Advanced Food Preparation - Advanced Food Preparation 3.0

SFL221 Foundations of DAP - Foundations of DAP 2.0

SFL222 DAP Practicum - DAP Practicum 2.0

SFL223 Preparation for Marriage - Preparation for Marriage 3.0

SFL224 Marriage Enhancement - Marriage Enhancement 3.0

SFL230 Housing the Family - Housing the Family 3.0

SFL240 Parenting & Child Guidance - Parenting & Child Guidance 3.0

SFL261 Consumerism and the Market - Consumerism and the Market 3.0

SFL276R Exploration of Tchg-Fam & CS - Exploration of Tchg-Fam & CS - *You may take once* 3.0v

SFL280 Dynamics of Clothing - Dynamics of Clothing 3.0

SFL287 Intermed Sewing Techniques - Intermed Sewing Techniques 3.0

SFL290 Critical Inquiry&Research Meth - Critical Inquiry&Research Meth 3.0

SFL305 Applied Stats/Data Management - Applied Stats/Data Management 3.0

SFL315 Effective Writing & Presenting - Effective Writing & Presenting 3.0

SFL325 Marital Relationships - Marital Relationships 3.0

SFL328 Hist of Interior Design&Arch 1 - Hist of Interior Design&Arch 1 3.0

SFL329 Hist of Interior Design&Arch 2 - Hist of Interior Design&Arch 2 3.0

SFL330 Pre-Prof Prep for MFT - Pre-Prof Prep for MFT 1.0

SFL331 Infant Dev in the Family - Infant Dev in the Family 3.0

SFL333 Adolescent Dev in Fam & Soc - Adolescent Dev in Fam & Soc 3.0

SFL334 Adult Development & Aging - Adult Development & Aging 3.0

SFL335 Family Adaptation&Resiliency - Family Adaptation&Resiliency 3.0

SFL336 Theories in Fam Perspective - Theories in Fam Perspective 3.0

SFL340 Family Meal Management - Family Meal Management 3.0

SFL345 Family Life in World Religions - Family Life in World Religions 3.0

SFL351 Social Development - Social Development 3.0

SFL352 Perception Cognition Language - Perception Cognition Language 3.0

SFL354 Cross-Cultural Fam & Hum Dev - Cross-Cultural Fam & Hum Dev 3.0

ECE355 Language Development - Language Development 3.0

SFL356 Gender Development in Families - Gender Development in Families 3.0

SFL357 Therapeutic Play Foundations - Therapeutic Play Foundations 3.0

SFL358 Media, Fam & Human Dev - Media, Fam & Human Dev 3.0

SFL359 Child Life - Child Life 3.0

SFL360 Advanced Family Finance - Advanced Family Finance 3.0

SFL370 Families in Communities - Families in Communities 3.0

SFL371 Consumer Sciences Technology - Consumer Sciences Technology 1.0

SFL376 Healthy Sexuality in Marriage - Healthy Sexuality in Marriage 3.0

SFL377 Tchg Mthds in Fam&Cons Sci Ed - Tchg Mthds in Fam&Cons Sci Ed 3.0

SFL378 Practicum in Secondary Educ - Practicum in Secondary Educ 1.0

SFL379 Class & Lab management - Class & Lab management 1.0

SFL380 History of Apparel - History of Apparel 3.0

SFL382 Textiles - Textiles 3.0

SFL387 Adv Sewing: Patternmaking - Adv Sewing: Patternmaking 3.0

SFL393R Special Projects in Clothing - Special Projects in Clothing - *You may take once* 0.5v

SFL395R Special Topics in Family Life - Special Topics in Family Life - *You may take once* 1.0v

SFL399R Academic Internship - Academic Internship - *You may take once* 1.0v

SFL400 Addiction Recovery Healing - Addiction Recovery Healing 3.0

SFL401 Helping Relationships - Helping Relationships 3.0

SFL403R Rsrch/Creative Works Practicum - Rsrch/Creative Works Practicum - *You may take once* 0.5v

SFL420 Admin ECE Program - Admin ECE Program 2.0

SFL449 Biological Fndtns of Human Dev - Biological Fndtns of Human Dev 3.0

SFL453 Moral Development - Moral Development 3.0

SFL460 Advanced Family Processes - Advanced Family Processes 3.0

SFL461 The Family & the Law - The Family & the Law 3.0

SFL465 Marr & Fam Enrichment/Therapy - Marr & Fam Enrichment/Therapy 3.0

SFL471 Family Work & Relationships - Family Work & Relationships 3.0

SFL472 Temporal Welfare in Families - Temporal Welfare in Families 3.0

SFL487 Adv Sewing Studies:Constructn - Adv Sewing Studies: Constructn 3.0

SFL488R Home-Based Entrepre - Home-Based Entrepre - *You may take once* 1.0

SFL489 Family & Public Policy - Family & Public Policy 3.0

SFL490 Adv Issues in Human Dev - Adv Issues in Human Dev 3.0

SFL496R Secondary Teaching Internship - Secondary Teaching Internship - *You may take once* 12.0

SFL498 FLE: Theory,Rsch & Practice - FLE: Theory,Rsch & Practice 3.0

Program Requirements

Licensure: This program meets the educational requirements designed to lead to an occupationally required professional license or certificate in the state of Utah. Students pursuing occupations requiring a license or certificate in a state other than Utah should contact the appropriate BYU academic advisement center as well as the licensing agency in the state where they intend to work to seek information and guidance regarding licensure and certification requirements.

This minor is designed to prepare students to teach in public schools. A teaching minor may only be received by students graduating with a teaching major. In order to graduate with this minor, students are required to complete Utah State Office of Education licensing requirements. To view these requirements go to https://www.schools.utah.gov/curr/licensing or contact the Education Advisement Center, 350 MCKB, 801-422-3426.

For students accepted into the major after December 16, 2019, grades below C in any required coursework in a teaching major or teaching minor will not be accepted. Teacher candidates must maintain a cumulative GPA of 2.7 or higher once admitted into the program and to qualify for student teaching. For additional details on admission and retention requirements for teaching majors and teaching minors, see Educator Preparation Program Requirements in the Undergraduate Catalog.

Requirement 1 — Complete 4 Courses

GEOG101 Global Environment - Global Environment 3.0

GEOG120 Geography & World Affairs - Geography & World Affairs 3.0

GEOG130 Intro to Human Geography - Intro to Human Geography 3.0

Major Academic Plan

MAPS - BS in Geography - Tourism Studies 2026-2027.docx

Learning Outcomes

Title
Core Geographic Knowledge and Skills

Learning Outcome
Understand, explain, and apply the NGS-related foundational concepts of Human Societies and Spatiality, Physical Environments, Human-Environmental Interaction, Regional Geography, Critical Spatial Thinking, and Effective Communication.

Title
Geography and Tourism

Learning Outcome
Understand and explain how the different geographies of tourism are created, maintained, and utilized in the modern world. Evaluate the impacts of tourism on present and future economies, cultures, societies, and physical environments.

Title
Tourism Issues and Trends

Learning Outcome
Interpret tourism issues and trends vis-a-vis key geographic concepts of globalization, mobility, production, and consumption. Explain the spatial patterns of tourism development and the dynamic relationships between travel generating regions and destination regions using geographic principles.

Title
Tourism and Cultural Understanding

Learning Outcome
Leverage tourism activities to promote increased understanding, knowledge, passion, respect, and empathy for other peoples, cultures, and places.

Program Requirements

Requirement 1 — Complete 20 hours

Geography core courses:

GEOG100 The Geographic Approach - The Geographic Approach 2.0

GEOG101 Global Environment - Global Environment 3.0

GEOG110 Landscapes of Disaster - Landscapes of Disaster 3.0

GEOG120 Geography & World Affairs - Geography & World Affairs 3.0

GEOG130 Intro to Human Geography - Intro to Human Geography 3.0

GEOG211 Mapping Your World - Mapping Your World 3.0

GEOG222 Statistics for Geographers 1 - Statistics for Geographers 1 3.0

Requirement 2 —Complete 6 hours

Regional courses:

GEOG245 Geography of Utah - Geography of Utah 3.0

GEOG250 US and Canada - US and Canada 3.0

GEOG255 Middle & South America - Middle & South America 3.0

GEOG260 Europe - Europe 3.0

GEOG265 Russia & Former Soviet Union - Russia & Former Soviet Union 3.0

GEOG271 Middle East - Middle East 3.0

GEOG272 East Asia - East Asia 3.0

GEOG273 Southeast Asia - Southeast Asia 3.0

GEOG280 The Pacific Islands - The Pacific Islands 3.0

GEOG285 Africa South of the Sahara - Africa South of the Sahara 3.0

Requirement 3 —Complete 6 hours

Major courses:

GEOG347 Geography of Tourism - Geography of Tourism 3.0

GEOG348 Intl Perspectives on Tourism - Intl Perspectives on Tourism 3.0

Requirement 4 —Complete 12 hours

Advanced tourism courses :

EXDM300 Creating a Good Life - Creating a Good Life 3.0

EXDM302 Hospitality Management - Hospitality Management 3.0

GEOG322 Statistics for Geographers 2 - Statistics for Geographers 2 3.0

GEOG349 Global Adventure Travel - Global Adventure Travel 3.0

GEOG350 Sust Tourism Planning & Devel - Sust Tourism Planning & Devel 3.0

GEOG353 Heritage & Cultural Tourism - Heritage & Cultural Tourism 3.0

MKTG201 Marketing Management - Marketing Management 3.0

Requirement 5 — Complete 3 hours

Experiential Learning.

GEOG399R Academic Internship - Academic Internship 0.5v

GEOG415R Field Methods - Field Methods 1.0v

GEOG495R Mentored Research - Mentored Research 1.0v

Note: A Geography course taken during a study abroad may be counted for this requirement with department approval. Double counting with other requirements is not allowed.

Requirement 6 — Obtain confirmation from your advisement center that you have completed the following:

Complete the exit assessment during the final semester, no later than one month before graduation.

Geography (BS): Geospatial Science & Technology Emphasis

Program Information

Minimum Credit Hours
54

Maximum Credit Hours
54

Major Academic Plan

MAPS - BS in Geography - Geospatial Science & Technology 2026-2027.docx

Learning Outcomes

Title
Core Geographic Knowledge and Skills

Learning Outcome
Understand, explain and apply the NGS-related foundational concepts of Human Societies and Spatiality, Physical Environments, Human-Environmental Interaction, Regional Geography, Critical Spatial Thinking, and Effective Communication.

Title
Geographic Information Science

Learning Outcome
Explain the fundamental theories underlying geospatial technologies, and correlate them to the data models and procedures implemented in those technologies (NGS Standard 2, BoK Knowledge Area CF: Conceptual Foundations)

Title
Geospatial Data Acquisition and Management

Learning Outcome
Acquire and manage geospatial data as appropriate to a given application, using the proper sources, data models, and data formats (NGS standard 1; NGS Skill 2: acquiring geographic information and 3: organizing geographic information; BoK Knowledge Areas GD: Geospatial Data, DA: Design Aspects, DM: Data Models).

Title
Geospatial Data Analysis

Learning Outcome
Analyze geospatial data to accomplish geographic tasks in scientific research and/or decision support, by applying spatial thinking principles using geospatial analysis procedures (GIS, RS, statistical) (NGS Standard 3; NGS skill 4: analyzing geographic information; BoK Knowledge Area AM: Analytical Methods)

Title
Cartography

Learning Outcome
Design quality maps to visualize and communicate geographic information and analysis results (NGS standard 1; NGS skill 5: answering geographic questions; BoK Knowledge Area CV: Cartography and Visualization).

Title
Programming

Learning Outcome
Create programs and scripts to automate geospatial tasks and implement geographic concepts (NGS skill 5: answering geographic questions; BoK Unit DA6: Application Design)

Program Requirements

Requirement 1 — Complete 7 courses

Core courses:

GEOG100 The Geographic Approach - The Geographic Approach 2.0

GEOG101 Global Environment - Global Environment 3.0

GEOG110 Landscapes of Disaster - Landscapes of Disaster 3.0

GEOG120 Geography & World Affairs - Geography & World Affairs 3.0

GEOG130 Intro to Human Geography - Intro to Human Geography 3.0

GEOG211 Mapping Your World - Mapping Your World 3.0

GEOG222 Statistics for Geographers 1 - Statistics for Geographers 1 3.0

Requirement 2 — Complete 3 hours

GEOG245 Geography of Utah - Geography of Utah 3.0

GEOG250 US and Canada - US and Canada 3.0

GEOG255 Middle & South America - Middle & South America 3.0

GEOG260 Europe - Europe 3.0

GEOG265 Russia & Former Soviet Union - Russia & Former Soviet Union 3.0

GEOG271 Middle East - Middle East 3.0

GEOG273 Southeast Asia - Southeast Asia 3.0

GEOG280 The Pacific Islands - The Pacific Islands 3.0

GEOG285 Africa South of the Sahara - Africa South of the Sahara 3.0

Requirement 3 — Complete 3 hours

Physical, regional, or human geography courses:

GEOG210 Intro to City Planning - Intro to City Planning 3.0

GEOG305 Geography of Landforms - Geography of Landforms 3.0

GEOG306 Public Lands: Planning & Mgmt - Public Lands: Planning & Mgmt 3.0

GEOG307 Spatial Analysis of Envr Data - Spatial Analysis of Envr Data 3.0

GEOG210 Intro to City Planning - Intro to City Planning 3.0

GEOG331 Economic Geography - Economic Geography 3.0

GEOG336 Geog Urban Environ - Geog Urban Environ 3.0

GEOG346 Population Geography - Population Geography 3.0

GEOG410 Urban Planning Methods - Urban Planning Methods 3.0

GEOG421 Urban Planning Law - Urban Planning Law 3.0

GEOG424 Urban Transportation Planning - Urban Transportation Planning 3.0

Requirement 4 —Complete 19 hours

Major courses:

GEOG212 Intro to GIS - Intro to GIS 3.0

GEOG217 Programming for Geographers I - Programming for Geographers I 3.0

GEOG311 Intermediate GIS - Intermediate GIS 3.0

GEOG312 Cartographic Desgn - Cartographic Desgn 4.0

GEOG313 Remote Sensing 1 - Remote Sensing 1 3.0

GEOG317 Programming for Geographers II - Programming for Geographers II 3.0

Requirement 5 —Complete 6 hours

Complete two courses (6 credit hours) from the following:

GEOG322 Statistics for Geographers 2 - Statistics for Geographers 2 3.0

GEOG411 Issues in Computer Cartography - Issues in Computer Cartography 3.0

GEOG412 Advanced GIS - Advanced GIS 3.0

GEOG413 Remote Sensing 2 - Remote Sensing 2 3.0

GEOG414 Image Acquisition & Processing - Image Acquisition & Processing 3.0

GEOG521R GIS Practicum - GIS Practicum - *You may take once* 3.0

Requirement 6 —Complete 3 hours

Experiential Learning

GEOG399R Academic Internship - Academic Internship 0.5v

GEOG415R Field Methods - Field Methods 1.0v

GEOG495R Mentored Research - Mentored Research 1.0v

Note: A Geography course taken during a study abroad may be counted for this requirement with department approval. Double counting with other requirements is not allowed.

Requirement 7 — Obtain confirmation from your advisement center that you have completed the following:

Complete the exit assessment during the final semester, no later than one month before graduation.

Geography (BS): Environment and Society Emphasis

Program Information

Minimum Credit Hours
47

Maximum Credit Hours
47

Major Academic Plan
MAPS - BS in Geography - Environment and Society 2026-2027.docx

Learning Outcomes

Title
Environmental Change and Ecological Systems

Learning Outcome
Analyze the causes and potential impacts of global and local environmental change on ecological systems (NGS standards 7, 15, 16, 18).

Title
Environmental Problem Solving

Learning Outcome
Develop a solution to a given environmental issue that incorporates the relevant political, ethical, economic, legal, and cultural factors, in addition to the principles of physical geography (NGS standard 18, skills)

Title
Physical Processes and the Natural Landscape

Learning Outcome
Evaluate the biological, geological, climatic, and other physical processes that produce spatial patterns in the natural landscape.

Title
Core geographic knowledge and skills

Learning Outcome
Understand, explain and apply the NGS-related foundational concepts of Human Societies and Spatiality, Physical Environments, Human-Environmental Interaction, Regional Geography, Critical Spatial Thinking, and Effective Communication.

Program Requirements

Requirement 1 —Complete 20 hours

Core courses:

GEOG100 The Geographic Approach - The Geographic Approach 2.0

GEOG101 Global Environment - Global Environment 3.0

GEOG110 Landscapes of Disaster - Landscapes of Disaster 3.0

GEOG120 Geography & World Affairs - Geography & World Affairs 3.0

GEOG130 Intro to Human Geography - Intro to Human Geography 3.0

GEOG211 Mapping Your World - Mapping Your World 3.0

GEOG222 Statistics for Geographers 1 - Statistics for Geographers 1 3.0

Requirement 2 —Complete 1 of 10 Courses

Regional courses:

GEOG245 Geography of Utah - Geography of Utah 3.0

GEOG250 US and Canada - US and Canada 3.0

GEOG255 Middle & South America - Middle & South America 3.0

GEOG260 Europe - Europe 3.0

GEOG265 Russia & Former Soviet Union - Russia & Former Soviet Union 3.0

GEOG271 Middle East - Middle East 3.0

GEOG272 East Asia - East Asia 3.0

GEOG273 Southeast Asia - Southeast Asia 3.0

GEOG280 The Pacific Islands - The Pacific Islands 3.0

GEOG285 Africa South of the Sahara - Africa South of the Sahara 3.0

Requirement 3 —Complete 1 of 5 Courses

Environment courses:

GEOG303 Biogeography - Biogeography 3.0

GEOG304 Climate & Society - Geog of Climates 3.0

GEOG305 Geography of Landforms - Geography of Landforms 3.0

GEOG306 Public Lands: Planning & Mgmt - Public Lands: Planning & Mgmt 3.0

GEOG307 Spatial Analysis of Envr Data - Spatial Analysis of Envr Data 3.0

Requirement 4 — Complete 1 of 7 Courses

Society courses:

GEOG210 Intro to City Planning - Intro to City Planning 3.0

GEOG331 Economic Geography - Economic Geography 3.0

GEOG336 Geog Urban Environ - Geog Urban Environ 3.0

GEOG341 Political Geography - Political Geography 3.0

GEOG346 Population Geography - Population Geography 3.0

GEOG348 Intl Perspectives on Tourism - Intl Perspectives on Tourism 3.0

GEOG349 Global Adventure Travel - Global Adventure Travel 3.0

Requirement 5 — Complete 1 of 4 Courses

Techniques courses:

GEOG212 Intro to GIS - Intro to GIS 3.0

GEOG217 Programming for Geographers I - Programming for Geographers 3.0

GEOG313 Remote Sensing 1 - Remote Sensing 1 3.0

GEOG322 Statistics for Geographers 2 - Statistics for Geographers 2 3.0

Requirement 6 — Complete 9 hours

Courses taken in Requirements 3-5 do not double count.

Regional Courses:

GEOG245 Geography of Utah - Geography of Utah 3.0

GEOG250 US and Canada - US and Canada 3.0

GEOG255 Middle & South America - Middle & South America 3.0

GEOG260 Europe - Europe 3.0

GEOG265 Russia & Former Soviet Union - Russia & Former Soviet Union 3.0

GEOG271 Middle East - Middle East 3.0

GEOG272 East Asia - East Asia 3.0

GEOG273 Southeast Asia - Southeast Asia 3.0

GEOG280 The Pacific Islands - The Pacific Islands 3.0

GEOG285 Africa South of the Sahara - Africa South of the Sahara 3.0

Environment Courses:

GEOG303 Biogeography - Biogeography 3.0

GEOG304 Climate & Society - Geog of Climates 3.0

GEOG305 Geography of Landforms - Geography of Landforms 3.0

GEOG306 Public Lands: Planning & Mgmt - Public Lands: Planning & Mgmt 3.0

GEOG307 Spatial Analysis of Envr Data - Spatial Analysis of Envr Data 3.0

Society courses:

GEOG210 Intro to City Planning - Intro to City Planning 3.0

GEOG331 Economic Geography - Economic Geography 3.0

GEOG336 Geog Urban Environ - Geog Urban Environ 3.0

GEOG341 Political Geography - Political Geography 3.0

GEOG346 Population Geography - Population Geography 3.0

GEOG348 Intl Perspectives on Tourism - Intl Perspectives on Tourism 3.0

GEOG349 Global Adventure Travel - Global Adventure Travel 3.0

Techniques courses:

GEOG212 Intro to GIS - Intro to GIS 3.0

GEOG217 Programming for Geographers I - Programming for Geographers 3.0

GEOG313 Remote Sensing 1 - Remote Sensing 1 3.0

GEOG322 Statistics for Geographers 2 - Statistics for Geographers 2 3.0

GEOG311 Intermediate GIS - Intermediate GIS 3.0

GEOG313 Remote Sensing 1 - Remote Sensing 1 3.0

GEOG317 Programming for Geographers II - Analytical Cartography 3.0

GEOG322 Statistics for Geographers 2 - Statistics for Geographers 2 3.0

General course:

GEOG493R Special Problems - Special Problems - *You may take once* 0.5-3.0v

Requirement 7 —Complete 1 of 2 Courses

GEOG487 Environment and Society - Environment and Society 3.0

GEOG489 Geog of Contemporary Issues - Geog of Contemporary Issues 3.0

Requirement 8 — Complete 3 hours

GEOG399R Academic Internship - Academic Internship 0.5-6.0v

GEOG415R Field Methods - Field Methods 1.0-3.0v

GEOG495R Mentored Research - Mentored Research 1.0-3.0v

Note: A Geography course taken during a study abroad may be counted for this requirement with department approval. Double counting with other requirements is not allowed.

Requirement 9 — Obtain confirmation from your advisement center that you have completed the following:

Complete the exit assessment during the final semester, no later than one month before graduation.

Geography (BS): Global Studies Emphasis

Program Information

Minimum Credit Hours
38

Maximum Credit Hours
38

Major Academic Plan
MAPS - BS in Geography - Global Studies 2026-2027.docx

Learning Outcomes

Title
Human and Environmental Processes

Learning Outcome
Evaluate the core human and environmental processes which create the context for global issues (Geog 101, 110, 120, 130 and other human and physical geography courses)

Title
Regional Geography

Learning Outcome
Examine the characteristics of a given place or region vis a vis the physical and human patterns and processes that are present (NGS element: Places and Regions).

Title
Current World Issues

Learning Outcome
Recognize and illustrate the tradeoffs associated with current world issues from an increase in knowledge, understanding, passion and emphathy (Courses: Geog 120, 110, 130, 331, 341, 346 and various regional courses).

Title
Core geographic knowledge and skills

Learning Outcome
Understand, explain and apply the NGS-related foundational concepts of Human Societies and Spatiality, Physical Environments, Human-Environmental Interaction, Regional Geography, Critical Spatial Thinking, and Effective Communication.

Program Requirements
Requirement 1 — Complete 20 hours

Geography core courses:

GEOG100 The Geographic Approach - The Geographic Approach 2.0

GEOG101 Global Environment - Global Environment 3.0

GEOG110 Landscapes of Disaster - Landscapes of Disaster 3.0

GEOG120 Geography & World Affairs - Geography & World Affairs 3.0

GEOG130 Intro to Human Geography - Intro to Human Geography 3.0

GEOG211 Mapping Your World - Mapping Your World 3.0

GEOG222 Statistics for Geographers 1 - Statistics for Geographers 1 3.0

Requirement 2 —Complete 3 hours

Regional courses:

GEOG245 Geography of Utah - Geography of Utah 3.0

GEOG250 US and Canada - US and Canada 3.0

GEOG255 Middle & South America - Middle & South America 3.0

GEOG260 Europe - Europe 3.0

GEOG265 Russia & Former Soviet Union - Russia & Former Soviet Union 3.0

GEOG271 Middle East - Middle East 3.0

GEOG272 East Asia - East Asia 3.0

GEOG273 Southeast Asia - Southeast Asia 3.0

GEOG280 The Pacific Islands - The Pacific Islands 3.0

GEOG285 Africa South of the Sahara - Africa South of the Sahara 3.0

Requirement 3 —Complete 9 hours

(No double counting with Requirement 2)

Regional courses:

GEOG245 Geography of Utah - Geography of Utah 3.0

GEOG250 US and Canada - US and Canada 3.0

GEOG255 Middle & South America - Middle & South America 3.0

GEOG260 Europe - Europe 3.0

GEOG265 Russia & Former Soviet Union - Russia & Former Soviet Union 3.0

GEOG271 Middle East - Middle East 3.0

GEOG272 East Asia - East Asia 3.0

GEOG273 Southeast Asia - Southeast Asia 3.0

GEOG280 The Pacific Islands - The Pacific Islands 3.0

GEOG285 Africa South of the Sahara - Africa South of the Sahara 3.0

Environment courses:

GEOG303 Biogeography - Biogeography 3.0

GEOG304 Climate & Society - Geog of Climates 3.0

GEOG305 Geography of Landforms - Geography of Landforms 3.0

GEOG306 Public Lands: Planning & Mgmt -Public Lands: Planning & Mgmt 3.0

GEOG307 Spatial Analysis of Envr Data - Spatial Analysis of Envr Data 3.0

Society courses:

GEOG210 Intro to City Planning - Intro to City Planning 3.0

GEOG331 Economic Geography - Economic Geography 3.0

GEOG336 Geog Urban Environ - Geog Urban Environ 3.0

GEOG341 Political Geography - Political Geography 3.0

GEOG346 Population Geography - Population Geography 3.0

GEOG348 Intl Perspectives on Tourism - Intl Perspectives on Tourism 3.0

GEOG349 Global Adventure Travel - Global Adventure Travel 3.0

Techniques courses:

GEOG212 Intro to GIS - Intro to GIS 3.0

GEOG217 Programming for Geographers I - Programming for Geographers 3.0

GEOG311 Intermediate GIS - Intermediate GIS 3.0

GEOG313 Remote Sensing 1 - Remote Sensing 1 3.0

GEOG317 Programming for Geographers II - Analytical Cartography 3.0

GEOG322 Statistics for Geographers 2 - Statistics for Geographers 2 3.0

General course:

GEOG493R Special Problems - Special Problems - *You may take once* 0.5-3.0v

Requirement 4 — Complete 1 of 2 Courses

GEOG487 Environment and Society - Environment and Society 3.0

GEOG489 Geog of Contemporary Issues - Geog of Contemporary Issues 3.0

Requirement 5 — Complete 3 hours

Experiential Learning:

GEOG399R Academic Internship - Academic Internship 0.5-6.0v

GEOG415R Field Methods - Field Methods 1.0-3.0v

GEOG495R Mentored Research - Mentored Research 1.0-3.0v

Note: A Geography course taken during a study abroad may be counted for this requirement with department approval. Double counting with other requirements is not allowed.

Requirement 6 — Obtain confirmation from your advisement center that you have completed the following:

Complete the exit assessment during the final semester, no later than one month before graduation.

Geography (BS): Urban & Regional Planning Emphasis

Program Information

Minimum Credit Hours
50

Maximum Credit Hours
50

Major Academic Plan
MAPS - BS in Geography - Urban & Regional Planning 2026-2027.docx

Learning Outcomes

Title
Core Geographic Knowledge and Skills

Learning Outcome
Understand, explain and apply the NGS-related foundational concepts of Human Societies and Spatiality, Physical Environments, Human-Environmental Interaction, Regional Geography, Critical Spatial Thinking, and Effective Communication, particularly as it applies to the knowledge area and practice of urban planning.

Title
Understand Human Settlement as it relates to Urban Planning

Learning Outcome
Identify and describe the social, economic, legal, and environmental structure of urban and regional systems and how these play out spatially in the urban landscape.

Title
Understand Historical and Contemporary Planning Practice

Learning Outcome
Evaluate new and historic projects to identify patterns of failure and strategies for success.

Title
Possess the Skills Needed to Practice Planning

Learning Outcome
Develop coherent solutions to urban and other land management issues, that respect the diverse (and sometimes conflicting) needs of planners, engineers, architects, land developers, elected officials, and citizens including using the methods of of plan creation, plan adoption, and plan implementation to bring about the greatest public good while mitigating foreseeable negative impacts.

Title
Plan Development

Learning Outcome
Create plans, maps, ordinances, and reports to communicate effectively with citizens and officials concerning planning issues and solutions. In three of the planning courses (GEOG210,410,510), students create plans, elements, or ordinances that have real-world application.

Program Requirements

Requirement 1 — Complete 20 hours

Geography core courses:

GEOG100 The Geographic Approach - The Geographic Approach 2.0

GEOG101 Global Environment - Global Environment 3.0

GEOG110 Landscapes of Disaster - Landscapes of Disaster 3.0

GEOG120 Geography & World Affairs - Geography & World Affairs 3.0

GEOG130 Intro to Human Geography - Intro to Human Geography 3.0

GEOG211 Mapping Your World - Mapping Your World 3.0

GEOG222 Statistics for Geographers 1 - Statistics for Geographers 1 3.0

Requirement 2 —Complete 1 of 2 Courses

GEOG311 Intermediate GIS - Intermediate GIS 3.0

GEOG322 Statistics for Geographers 2 - Statistics for Geographers 2 3.0

Requirement 2 — Complete 3 hours

Regional courses:

GEOG245 Geography of Utah - Geography of Utah 3.0

GEOG250 US and Canada - US and Canada 3.0

GEOG255 Middle & South America - Middle & South America 3.0

GEOG260 Europe - Europe 3.0

GEOG265 Russia & Former Soviet Union - Russia & Former Soviet Union 3.0

GEOG271 Middle East - Middle East 3.0

GEOG272 East Asia - East Asia 3.0

GEOG273 Southeast Asia - Southeast Asia 3.0

GEOG280 The Pacific Islands - The Pacific Islands 3.0

GEOG285 Africa South of the Sahara - Africa South of the Sahara 3.0

Requirement 3 — Complete 1 of 2 Courses

GEOG212 Intro to GIS - Intro to GIS 3.0

GEOG322 Statistics for Geographers 2 - Statistics for Geographers 2 3.0

Requirement 4 — Complete 21 hours

Urban planning core courses:

GEOG210 Intro to City Planning - Intro to City Planning 3.0

GEOG336 Geog Urban Environ - Geog Urban Environ 3.0

GEOG410 Urban Planning Methods - Urban Planning Methods 3.0

GEOG421 Urban Planning Law - Urban Planning Law 3.0

GEOG422 Urban Design - Urban Design 2.0

GEOG424 Urban Transportation Planning - Urban Transportation Planning 3.0

GEOG510 Professional Planning Studio - Professional Planning Studio 4.0

Requirement 5 —Complete 3 hours

Experiential Learning

GEOG399R Academic Internship - Academic Internship 0.5-6.0v

GEOG415R Field Methods - Field Methods 1.0-3.0v

GEOG495R Mentored Research - Mentored Research 1.0-3.0v

Note: A Geography course taken during a study abroad may be counted for this requirement with department approval. Double counting with other requirements is not allowed.

Requirement 6 — Obtain confirmation from your advisement center that you have completed the following:

Complete the exit assessment during the final semester, no later than one month before graduation.

Geography (BS): Geospatial Intelligence Emphasis

Program Information

Minimum Credit Hours
50

Maximum Credit Hours
50

Major Academic Plan
MAPS - BS in Geography - Geospatial Intelligence 2026-2027.docx

Learning Outcomes

Title
Core Geographic Knowledge and Skills

Learning Outcome
Understand, explain and apply the NGS-related foundational concepts of Human Societies and Spatiality, Physical Environments, Human-Environmental Interaction, Regional Geography, Critical Spatial Thinking, and Effective Communication.

Title
Intelligence and the Intelligence Community

Learning Outcome
Understand the fundamental principles of geospatial intelligence and its role in the intelligence community, including government and private environments. Contributing courses include Geography 441 and 442

Title
Geography and Security

Learning Outcome
Analyze security and intelligence problems using a geographic perspective, relating human actions to cultural, political, economic, social,and physical landscapes.

Title
Case Study Analysis

Learning Outcome
Analyze social science data (case histories) using structured analytical methods specific to intelligence analysis as practiced in the United States.

Title
Collaboration and Problem Solving

Learning Outcome
Work and communicate with diverse teams and decision makers using skills in collaboration, speaking, writing, and mapping.

Program Requirements

Requirement 1 — Complete 20 hours

Core courses:

GEOG100 The Geographic Approach - The Geographic Approach 2.0

GEOG101 Global Environment - Global Environment 3.0

GEOG110 Landscapes of Disaster - Landscapes of Disaster 3.0

GEOG120 Geography & World Affairs - Geography & World Affairs 3.0

GEOG130 Intro to Human Geography - Intro to Human Geography 3.0

GEOG211 Mapping Your World - Mapping Your World 3.0

GEOG222 Statistics for Geographers 1 - Statistics for Geographers 1 3.0

Requirement 2 — Complete 12 hours

GEOG212 Intro to GIS - Intro to GIS 3.0

GEOG304 Climate & Society - Climate & Society 3.0

GEOG313 Remote Sensing 1 - Remote Sensing 1 3.0

GEOG322 Statistics for Geographers 2 - Statistics for Geographers 2 3.0

Requirement 3 — Complete 3 hours

GEOG331 Economic Geography - Economic Geography 3.0

GEOG341 Political Geography - Political Geography 3.0

GEOG442 Sem in Geospatial Intellig 2 - Sem in Geospatial Intellig 2 3.0

GEOG487 Environment and Society - Environment and Society 3.0

GEOG489 Geog of Contemporary Issues - Geog of Contemporary Issues 3.0

Requirement 4 —Complete 3 hours

GIS courses:

GEOG217 Programming for Geographers I - Programming for Geographers I 3.0

GEOG311 Intermediate GIS - Intermediate GIS 3.0

GEOG312 Cartographic Desgn - Cartographic Desgn 4.0

GEOG317 Programming for Geographers II - Programming for Geographers II 3.0

GEOG412 Advanced GIS - Advanced GIS 3.0

GEOG413 Remote Sensing 2 - Remote Sensing 2 3.0

Requirement 5 —Complete 2 of 7 Courses

Regional geography courses:

GEOG255 Middle & South America - Middle & South America 3.0

GEOG265 Russia & Former Soviet Union - Russia & Former Soviet Union 3.0

GEOG271 Middle East - Middle East 3.0

GEOG272 East Asia - East Asia 3.0

GEOG273 Southeast Asia - Southeast Asia 3.0

GEOG280 The Pacific Islands - The Pacific Islands 3.0

GEOG285 Africa South of the Sahara - Africa South of the Sahara 3.0

Note: Geog 271 is highly recommended.

Requirement 6 —Complete 3 hours

GEOG441 Sem in Geospatial Intellig 1 - Sem in Geospatial Intellig 1 3.0

Requirement 7 — Complete 3 hours

Experiential Learning. Complete 3 hours from the following.

GEOG399R Academic Internship - Academic Internship 0.5-6.0v

GEOG415R Field Methods - Field Methods 1.0-3.0v

GEOG495R Mentored Research - Mentored Research 1.0-3.0v

Note: A Geography course taken during a study abroad may be counted for this requirement with department approval. Double counting with other requirements is not allowed.

Requirement 8 — Obtain confirmation from your advisement center that you have completed the following:

Complete the exit assessment during the final semester, no later than one month before graduation.

Gerontology (Minor)

Program Information

Minimum Credit Hours
15

Maximum Credit Hours
19.5

Learning Outcomes

Title
Professionalist

Learning Outcome
Interact professionally with adults aged 50 years and older.

Title
Aging

Learning Outcome
Explain the physical and social changes experienced by individuals as they age in the later years.

Title
Application of Gerontology Principles

Learning Outcome
Apply knowledge from courses taken and fieldwork experience in the gerontology minor, as they interact with and serve older adults.

Title
Promoting Healthy Behaviors

Learning Outcome
Effectively apply health promoting activities and behaviors among older adults to improve overall quality of life and well-being.

Program Requirements

Requirement 1 — Complete 1 of 3 Options

Complete an internship or research experience that is primarily focused on older adults. Students should enroll in an internship or research course provided by their major department. Students must email the course number and experience description to the Gerontology Program in order to request approval of their internship or research experience for Gerontology Minor credit. If approved, the Gerontology Program will substitute the student?s internship or research course for GERO 399R or GERO 403R. If an internship course is not available through the student's major department, they may sign up for GERO 399R.

Option 1.1 — Complete 3 hours

GERO 403R - GERO Research - *You may take up to 3.0 credit hours - This course is no longer available for registration and will count only if you completed it while it was offered. Please see your college advisement center for possible substitutions.* 1.0v

Option 1.2 — Complete 2 Courses

NURS491 Leadership & Health Policy - Nursing Capstone 2.0

NURS492 Cl Prac Capstone Nurs - Cl Prac Capstone Nurs 5.0

Option 1.3 — Complete 3 hours

Note: Internships other than those listed below can be approved by the Academic Advisor (major specific).

EXSC399R HWSG Internship - HWSG Internship - *You may take up to 3.0 credit hours* 1.0v

GERO399R Gerontology Internship - GERO Internship - *You may take up to 3.0 credit hours* 0.5v

STDEV399R Health Professions Internship - Health Professions Internship - *You may take up to 3.0 credit hours* 0.5v

Requirement 2 — Complete 6 hours

Complete 6 hours from the following core courses:

CELL305 Human Physiology - Human Physiology 4.0

CELL362 Advanced Physiology - Advanced Physiology 3.0

COMD420 Neurofndtns Lang,Spch,Hearing - Neurofndtns Lang,Spch,Hearing 3.0

EXSC387 Chronic Disease Prevention - Chronic Disease Prevention 3.0

EXSC460 Ortho Impairments & Ther Exer - Ortho Impairments & Ther Exer 3.0

HLTH466 Hlth & the Aging Process - Hlth & the Aging Process 3.0

NEURO205 Neurobiology - Neurobiology 3.0

NEURO460 Behavioral Neuroscience - Behavioral Neuroscience 3.0

NURS291 Nurs Care of the Older Adult - Nurs Care of the Older Adult 2.0

NURS292 Cl Prac Nurs Fundamentals - Cl Prac Nurs Fundamentals 1.5

NURS 293 - Communication for Nurs 0.5 - *This course is no longer available for registration and will count only if you completed it while it was offered. Please see your college advisement center for possible substitutions.*

NURS333 End-of-Life Care - End-of-Life Care 3.0

PSYCH220 Human Dev: Life Span - Human Dev: Life Span 3.0

PSYCH322 Developmental Psych: Adulthood - Developmental Psych: Adulthood 3.0

PSYCH381 Behavioral Neurobiology - Behavioral Neurobiology 3.0

SFL334 Adult Development & Aging - Adult Development & Aging 3.0

SOC333 End-of-Life Care - End-of-Life Care 3.0

SOC365 Sociology of Aging - Sociology of Aging 3.0

Requirement 3 — Complete 6 hours

Core classes can be substituted for elective credit.

CELL205 Human Biology - Human Biology 3.0

CELL210 Human Anatomy (w/ virtual lab) - Human Anatomy (w/ virtual lab) 3.0

CELL220 Human Anatomy (with lab) - Human Anatomy (with lab) 4.0

CELL365 Pathophysiology - Pathophysiology 4.0

CELL561 Physiology of Drug Mechanisms - Physiology of Drug Mechanisms 3.0

CELL565 Endocrinology - Endocrinology 3.0

CELL575 Physiology of Aging - Physiology of Aging 3.0

COMD370 Medical Speech Pathology - Medical Speech Pathology 3.0

EXSC221 Science of Wellness - Science of Wellness 3.0

EXSC470 Functional Neuroanatomy - Functional Neuroanatomy 3.0

FIN200 Personal Finance - Personal Finance 3.0

FIN418 Financial Planning - Financial Planning 3.0

HLTH314 Hlth, Disease & Determinants 1 - Hlth, Disease & Determinants 1 3.0

HLTH320 Adv First Aid & Safety - Adv First Aid & Safety 3.0

HLTH345 Principles of Epidemiology - Principles of Epidemiology 3.0

HLTH425 Vulnerable & Diverse Poplns - Vulnerable & Diverse Poplns 3.0

HLTH450 Women's Health - Women's Health 3.0

MMBIO261 Infection & Immunity - Infection & Immunity 3.0

NDFS100 Essentials of Human Nutrition - Essentials of Human Nutrition 3.0

NDFS201 Society Nutr Chronic Disease - Society Nutr Chronic Disease 3.0

NDFS424 Nutrition Through Life Cycle - Nutrition Through Life Cycle 2.0

PSYCH342 Psychopathology - Psychopathology 3.0

PSYCH375 Cognition - Cognition 3.0

SFL210 Human Development - Human Development 3.0

SFL260 Family Finance - Family Finance 3.0

SFL306 Death and Dying - Death and Dying 3.0

General Studies (BGS): Family Life Emphasis

Program Information

Minimum Credit Hours

Major Academic Plan
MAPS - BGS in General Studies - Family Life 2026-2027.docx

Learning Outcomes

Title
Aims of a BYU Education

Learning Outcome
Describe how their coursework in the BGS program has contributed to the aims of a BYU education: Spiritually strengthening, Character building, Intellectually enlarging, Preparing for lifelong learning and service.

Title
Marriage, Family, and Human Development Knowledge

Learning Outcome
Describe major theories and research findings related to marriage family living & human development.

Title
Effective Writing and Critical Thinking

Learning Outcome
Write professional research papers in the discipline that demonstrate an ability to synthesize and critically evaluate research related to specific theories and/or substantive areas.

Program Requirements

Have 27 hours of campus residency.

Complete a minimum of 10 hours in the emphasis after formal admission to the BGS program.

Thirty of the 120 hours including 15 hours in the emphasis must be 300-level or above courses.

Students must earn a minimum 2.0 BYU grade point average, a minimum 2.0 cumulative grade point average, and a minimum 2.0 emphasis grade point average.

The program must be completed in eight years or less.

All emphasis courses taken after admission to BGS must be BYU courses.

Requirement 1 —Complete 1 Course

Prerequisite course (must be completed before taking any other courses, includes preparing academic plan which must be approved before proceeding):

STDEV100 Essential College Skills - Essential College Skills 1.0

Requirement 2 —Complete 4 Courses

Core courses:

SFL160 Intro to Family Processes - Intro to Family Processes 3.0

SFL200 Strengthening Marriage/Family - Strengthening Marriage/Family 3.0

SFL210 Human Development - Human Development 3.0

SFL290 Critical Inquiry&Research Meth - Critical Inquiry&Research Meth 3.0

Requirement 3 —Complete 3 hours

Any courses not taken in requirement 4 below may be used toward fulfilling this three-hour elective requirement.

SFL102 Introduction to Interiors - Introduction to Interiors 3.0

SFL110 Food Preparation in the Home - Food Preparation in the Home 2.0

SFL224 Marriage Enhancement - Marriage Enhancement 3.0

SFL240 Parenting & Child Guidance - Parenting & Child Guidance 3.0

SFL260 Family Finance - Family Finance 3.0

SFL359 Child Life - Child Life 3.0

Requirement 4 —Complete 15 hours

BYU 300- or 400-level campus courses in the School of Family Life (including Salt Lake Center classes) may also be used to fill this requirement. Note: Only 3 credit hours of 399R may count toward the BGS degree requirements in Family Life. Additional 399R credits may be used as general electives for the upper division hour requirement and for total university hours.

SFL331 Infant Dev in the Family - Infant Dev in the Family 3.0

SFL333 Adolescent Dev in Fam & Soc - Adolescent Dev in Fam & Soc 3.0

SFL334 Adult Development & Aging - Adult Development & Aging 3.0

SFL335 Family Adaptation&Resiliency - Family Adaptation&Resiliency 3.0

SFL351 Social Development - Social Development 3.0

ECE355 Language Development - Language Development 3.0

SFL358 Media, Fam & Human Dev - Media, Fam & Human Dev 3.0

Requirement 5 —Complete 1 Course

Complete a capstone experience (last course to be completed):

STDEV490 BGS Capstone - BGS Capstone 2.0

Family History - Genealogy (Minor)

Learning Outcomes

Title
Subject Matter

Learning Outcome
Candidates can identify the core concepts and standards associated with the social science curricula taught in secondary history classrooms and can create learning experiences that make these concepts meaningful for students.

Title
Learner and Learning

Learning Outcome
Candidates can articulate how young people learn and develop acknowledging individual and cultural differences in order to create environments that motivate collaborative learning.

Title
Instructional Strategies

Learning Outcome
Candidates use a variety of instructional strategies to encourage students' development of critical thinking problem solving and performance skills and use assessments to inform instruction.

Title
Professional Development

Learning Outcome
Candidates continually reflect on and evaluate their teaching practices actively seek opportunities to grow professionally engage in ethical behavior and collaborate with stakeholders (students parents and other professionals in the learning community).

Title
Utah Effective Teaching Standards

Learning Outcome
Demonstrate basic competency in the Utah Effective Teaching Standards as established by Utah Teacher Education Assessment and Accreditation Council and the Utah State Board of Education

Program Requirements

Licensure: This program meets the educational requirements designed to lead to an occupationally required professional license or certificate in the state of Utah. Students pursuing occupations requiring a license or certificate in a state other than Utah should contact the appropriate BYU academic advisement center as well as the licensing agency in the state where they intend to work to seek information and guidance regarding licensure and certification requirements.

This minor is designed to prepare students to teach in public schools. A teaching minor may only be received by students graduating with a teaching major. In order to graduate with this minor, students are required to complete Utah State Office of Education licensing requirements. To view these requirements go to https://www.schools.utah.gov/curr/licensing or contact the Education Advisement Center, 350 MCKB, 801-422-3426.

The History Department requires a minimum of 6 hours of history credit to be taken in residency at BYU's Provo campus for this minor program. BYU Independent Study courses do not count toward residency. These hours may also go toward BYU's 30-hour residency requirement for graduation.

For students accepted into the major after December 16, 2019, grades below C in any required coursework in a teaching major or teaching minor will not be accepted. Teacher candidates must maintain a cumulative GPA of 2.7 or higher once admitted into the program and to qualify for student teaching. For additional details on admission and retention requirements for teaching majors and teaching minors, see Educator Preparation Program Requirements in the Undergraduate Catalog.

Requirement 1 — Complete 5 Courses

Core courses. NOTE: Minors must complete all core courses in history at the college level. University Core Civilization courses (201/202) offered by other departments are not equivalent. Advanced Placement U.S. history courses are not equivalent. Hist 220 and 221 must be completed as college/university courses and cannot be fulfilled with AP or other test scores.

HIST201 World Civilization to 1500 - World Civilization to 1500 3.0

HIST202 World Civilization from 1500 - World Civilization from 1500 3.0

HIST220 U S Through 1877 - U S Through 1877 3.0

HIST221 U S Since 1877 - U S Since 1877 3.0

HIST364 Utah - Utah 3.0

Requirement 2 — Complete 1 Course

HIST200 Historian's Craft - Historian's Caft 3.0

Requirement 3 — Complete 3 hours

NOTE: University Core Civilization courses (201/202) offered by other departments can substitute for their History equivalents (HIST 201 and/or HIST 202). A score of a 4 or higher on the AP United States History Exam can substitute for either HIST 220 or HIST 221. A score of 4 or higher on the AP World History Modern Exam can substitute for HIST 202. For each course in Requirement 3 substituted by either AP exam credit or other department Civilization credit, History Teaching Majors are required to take an additional 3.0 credit course from the list in Requirement 7.

Learning Outcomes

Title
Historical Knowledge

Learning Outcome
Understand how past societies deveoloped, changed, and navigated conflict and cooperation while also recognizing how the presence or absence of applied principles of the restored Gospel are reflected in history.

Title
Historical Analysis

Learning Outcome
Analyze past events, people, and societies with nuance, recognizing context, change, continuity, and complexity. This allows for the translation of historical understanding into action that strengthens family, community, and society, reflecting BYU's mission of generous service.

Title
Effective Historical Research

Learning Outcome
Demonstrate proficiency in using the historical method of research effectively by skillfully and honestly using primary and secondary sources along with the ability to evaluate multiple perspectives, question assumptions, and construct reasoned interpretations based on evidence.

Title
Data Integration and Effective Communication

Learning Outcome
Skillfully integrate data into a coherent argument expressed through a clear, well-written style and through oral communication.

Program Requirements

The History Department requires a minimum of 24 hours of history credit to be taken in residence at BYU's Provo campus for this degree program. BYU Independent Study courses do not count toward residency. These hours may also go toward BYU's 30-hour residency requirement for graduation.

Requirement 1 — Complete 1 Course

NOTE: For majors, Hist 200 should be completed prior to elective courses. It must be completed no later than the sophomore year or in the first semester/term after the major is declared. Hist 200 and 490 combined satisfy the University Core Advanced Written and Oral Communications requirement.

HIST200 Historian's Craft - Historian's Craft 3.0

Requirement 2 — Complete 4 Courses

NOTE:University Core Civilization courses (201/202) offered by other departments can substitute for their History equivalents (HIST 201 and/or HIST 202). A score of a 4 or higher on the AP United States History Exam can substitute for either HIST 220 or HIST 221. A score of 4 or higher on the AP World History Modern Exam can substitute for HIST 202. For each course in Requirement 3 substituted by either AP exam credit or other department Civilization credit, History Majors are required to take an additional 3.0 credit course from the list in Requirement 3.

NOTE: Students are strongly encouraged to take a freshman college-level writing course (WRTG 150), regardless of their AP test scores.

HIST201 World Civilization to 1500 - World Civilization to 1500 3.0

HIST202 World Civilization from 1500 - World Civilization from 1500 3.0

HIST220 U S Through 1877 - U S Through 1877 3.0

HIST221 U S Since 1877 - U S Since 1877 3.0

Requirement 3 — Complete 21 hours

Complete seven electives (21 total hours) from the approved list. Seek faculty advice in choosing electives. Complete three electives (9 hours) by taking at least one course in three of the following options. Majors are urged to focus their remaining four electives on a single theme, region, or period. NOTE: No more than 6 combined hours of 299R, 390R, 495R, and 498R will count toward elective credit. NOTE: Depending on topic, History 288 and 390R may satisfy one of the regional option requirements or elective credit more generally.

Option 3.1 — Complete up to 15 hours

AFRICA

HIST260 Early Africa - Early Africa 3.0

HIST261 Modern Africa - Modern Africa 3.0

HIST336 History and Reconciliation - History and Reconciliation 3.0

HIST339 African Social Change - African Social Change 3.0

HIST345 Islam in Africa - Islam in Africa

HIST366 Slavery in Africa & Atlantic - Slavery in Africa & Atlantic 3.0

Option 3.2 — Complete up to 15 hours

ASIA

HIST231 Intro to East Asian History - Intro to East Asian History 3.0

Learning Outcomes

Title
Subject Matter

Learning Outcome
Candidates can identify the core concepts, tools of inquiry, and standards associated with the history curricula taught in secondary classrooms and can create learning experiences that make these concepts meaningful for students.

Title
Learner and Learning

Learning Outcome
Candidates can describe how young people learn and develop, acknowledging individual and cultural differences, in order to create environments that motivate collaborative learning.

Title
Instructional Strategies

Learning Outcome
Candidates use a variety of instructional strategies to encourage students' development of critical thinking, problem solving, and performance skills, and use assessments to inform instruction.

Title
Professional Development

Learning Outcome
Candidates continually reflect on and evaluate their teaching practices, actively seek opportunities to grow professionally, engage in ethical behavior, and collaborate with stakeholders (students, parents, and other professionals in the learning community).

Title
Utah Effective Teaching Standards

Learning Outcome
Demonstrate basic competency in the Utah Effective Teaching Standards as established by Utah Teacher Education Assessment and Accreditation Council and the Utah State Board of Education

Program Requirements

Licensure: This program meets the educational requirements designed to lead to an occupationally required professional license or certificate in the state of Utah. Students pursuing occupations requiring a license or certificate in a state other than Utah should contact the appropriate BYU academic advisement center as well as the licensing agency in the state where they intend to work to seek information and guidance regarding licensure and certification requirements.

This major is designed to prepare students to teach in public schools. In order to graduate with this major, students are required to complete Utah State Office of Education licensing requirements. To view these requirements go to https://www.schools.utah.gov/curr/licensing or contact the Education Advisement Center, 350 MCKB, 801-422-3426.

The History Department requires a minimum of 18 hours of history credit to be taken in residency at BYU's Provo campus for this degree program. BYU Independent Study courses do not count toward residency. These hours may also go toward BYU's 30-hour residency requirement for graduation.

For students accepted into the major after December 16, 2019, grades below C in any required coursework in a teaching major or teaching minor will not be accepted. Teacher candidates must maintain a cumulative GPA of 2.7 or higher once admitted into the program and to qualify for student teaching. For additional details on admission and retention requirements for teaching majors and teaching minors, see Educator Preparation Program Requirements in the Undergraduate Catalog.

Requirement 1 — Complete 1 Course

Complete the following course in fulfillment of the University Core First-Year Writing requirement.

WRTG150 Writing & Rhetoric - Writing & Rhetoric 3.0

Requirement 2 — Complete 1 Course

NOTE: For majors, Hist 200 should be taken prior to elective courses. It must be completed no later than the sophomore year or in the first semester/term after the major is declared. Hist 200 and 490 combined satisfy the University Core Advanced Written and Oral Communications requirement.

HIST200 Historian's Craft - Historian's Craft 3.0

Requirement 3 — Complete 4 Course

NOTE: University Core Civilization courses (201/202) offered by other departments can substitute for their History equivalents (HIST 201 and/or HIST 202). A score of a 4 or higher on the AP United States History Exam can substitute for either HIST 220 or HIST 221. A score of 4 or higher on the AP World History Modern Exam can substitute for HIST 202. For each course in Requirement 3 substituted by either AP exam credit or other department Civilization credit, History Teaching Majors are required to take an additional 3.0 credit course from the list in Requirement 7.

HIST201 World Civilization to 1500 - World Civilization to 1500 3.0

HIST202 World Civilization from 1500 - World Civilization from 1500 3.0

HIST220 U S Through 1877 - U S Through 1877 3.0

HIST221 U S Since 1877 - U S Since 1877 3.0

Requirement 4 — Complete 1 Courses

Students are encouraged to take HIST 201, HIST 202, HIST 220, HIST 221 prior to enrollment in HIST 276. Note: FBI fingerprint and background clearance MUST be completed PRIOR to enrolling in HIST 276.

HIST276 Exploration of Tchg-Soc Sci - Exploration of Tchg-Soc Sci - *You may take up to 4.0 credit hours* 4.0

Requirement 5 — Complete 1 Course

HIST364 Utah - Utah 3.0

Requirement 6 — Complete 1 of 2 Courses

HIST397 US Historical Literacies - US Historical Literacies 3.0

HIST399 Democratic Class Design - Democratic Class Design 3.0

Requirement 7 — Complete 12 hours

Students must not present all their preparation in a single region. Complete no more than 2 electives (6.0 credit hours) in any of the following regional or thematic options. NOTE: No more than 6 combined hours of 299R, 495R, and 498R will count toward elective credit. HIST 397 and HIST 399 CANNOT double-count toward requirements 6 and 7.1.

Option 7.1 — Complete 9 hours

Option 7.1.1 — Complete up to 6 hours

HIST495R Directed Research - Directed Research - *You may take once* 3.0

HIST498R Directed Readings - Directed Readings - *You may take once* 0.5v

Requirement 8 — Complete 1 Course

Capstone course:

HIST490 Capstone Research Seminar - Capstone Research Seminar 3.0

A teaching minor is strongly recommended.

Requirement 9 — Complete 2 Requirements

Contact the Education Advisement Center, 350 MCKB, 801- 422-3426, to schedule the final interview to clear the licensing component of your secondary teaching major. You should be registered for your last semester at BYU prior to the scheduled appointment.

NOTE: FBI fingerprint and background clearance MUST be completed PRIOR to enrolling in HIST 276R, HIST 478, HIST 476R, and HIST 496R.

NOTE: Admittance to the major is required BEFORE enrolling in HIST 477 and 478. HIST 477 and 478 must be taken concurrently.

Requirement 9.1 — Complete 6 Courses

CPSE402 Educ Stdnts w/Disablts in ScEd - Educ Stdnts w/Disablts in ScEd 2.0

HIST395 Teach Tech Soc Studies - Teach Tech Soc Studies 2.0

HIST477 Hist & Soc Sci Tchng Methods - Hist & Soc Sci Tchng Methods 3.0

HIST478 Practicum in Secondary Educ - Practicum in Secondary Educ 1.0

SC ED353 Multicultural Educ - Multicultural Educ 2.0

SC ED375 Ad Dev & Class Mgmt - Ad Dev & Class Mgmt 3.0

Requirement 9.2 — Complete 12 hours

HIST476 Student Teaching - HT and SST - Student Teaching - HT and SST - *Must be taken for 12.0 credit hours* 1.0v

HIST496R Acad Internship--HT and SST - Acad Internship--HT and SST - *Must be taken for 12.0 credit hours* 12.0

Note: it is the student's responsibility to be sure that the Praxis test has been taken and that BYU has received the test scores, that their fingerprint background clearance is current, and that state licensing fees have been paid prior to graduation. Students are strongly discouraged from working another job during the time of their student teaching/internship. In addition, students must pass the PPAT assessment to graduate and receive a teaching license. Students will also be responsible for any additional requirements imposed by the state prior to their graduation. To confirm the status of these requirements contact the Education Advisement Center, 350 MCKB, 801-422-3426. Graduation and Utah licensure cannot be processed until these requirements have been completed.

Family History - Genealogy (BA)

Program Information

Minimum Credit Hours
51.5

Maximum Credit Hours
54

Major Academic Plan
MAPS - BA in Family History - Genealogy 2026-2027.docx

Learning Outcomes

Title
Effective Genealogical Research and Analysis

Learning Outcome
Inspired by Restoration truths about the great worth of souls, students will demonstrate respect for the divinity and humanity of each person they study. Students will also develop their character and spiritual fortitude as they carefully consider how living people will be affected by their work. Using primary and secondary sources, students will incorporate genealogical and historical knowledge in the following ways: analyzing genealogical questions and issues clearly, assessing genealogical information accurately, distinguishing different levels of evidence, and distinguishing between questionable and valid genealogical and historical assertions.

Title
Historical Knowledge and Analysis

Learning Outcome
Demonstrate historical consciousness by applying knowledge of major developments in human history and by understanding key historical terms, theories, and interpretive frameworks. Students analyze historical questions, assess historical information accurately. Students will situate family history within broader historical context thus fostering empathy, perspective, and spiritual insights.

Title
Data Integration and Effective Communication

Learning Outcome
Skillfully integrate diverse forms of data into coherent written arguments presented in clear, precise written and oral communication. Students will share knowledge responsibly in professional, community, academic, and church settings, supporting lifelong learning and service beyond the university.

Program Requirements

Requirement 1 — Complete 1 Course

Complete the following in fulfillment of the University Core First-Year Writing requirement. Note: Waivers based on Advanced Placement (AP) or other test scores do not apply to this requirement. Students with AP credit for Engl 115 should take Wrtg 150.

WRTG150 Writing & Rhetoric - Writing & Rhetoric 3.0

Requirement 2 — Complete 2 Courses

Note: A score of 4 or higher on the AP World History Modern Exam can substitute for HIST 202. If Hist 202 is substituted by AP exam credit, Family History Majors are required to take an additional 3.0 credit course from the list in Requirement 10 or 11.

HIST201 World Civilization to 1500 - World Civilization to 1500 3.0

HIST202 World Civilization from 1500 - World Civilization from 1500 3.0

Requirement 3 — Complete 2 Courses

Complete the following (Hist 205 may be used as partial fulfillment of the University Core Religion requirement):

HIST205 Intro Fam Hist Doctr Prac - Intro Fam Hist Doctr Prac 2.0

HIST206R Regional and Thematic Fam Hist - Regional and Thematic Fam Hist- *You may take once* 1.0

Requirement 4 — Complete 1 Course

Note 1: Hist 217 should be completed no later than the sophomore year or in the first semester/term after the major is declared. Majors should consult with the family history coordinator soon after declaring.

Note 2: Students must complete Hist 217 with a grade of C or higher in order to satisfy this requirement.

Note 3: Hist 217 is a pre-requisite for Hist 218, Hist 280-Hist 287, Hist 296, Hist 381, Hist 388, and Hist 439

HIST217 Family Historian's Craft - Family Historian's Craft 3.0

Requirement 5 — Complete 3 Courses

Note: A score of a 4 or higher on the AP United States History Exam can substitute for HIST 220. If Hist 220 is substituted by AP exam credit, Family History Majors are required to take an additional 3.0 credit course from the list in Requirement 10 or 11.

HIST200 Historian's Craft - Historian's Craft 3.0

HIST218 Fam & Law in Amer Hist - Fam & Law in Amer Hist 3.0

HIST220 U S Through 1877 - U S Through 1877 3.0

Requirement 6 — Complete 1 of 4 Courses

HIST280 N US Family History Research - N US Family History Research 3.0

HIST281 S US Family History Research - S US Family History Research 3.0

HIST282 Colonial US Fam Hist Research - Colonial US Fam Hist Research 3.0

HIST296 African Amer Fam Hist Research - African Amer Fam Hist Research 3.0

Courses cannot double count in requirements 6, 7, and 8.

Requirement 7 — Complete 1 of 9 Courses

Research courses:

HIST280 N US Family History Research - N US Family History Research 3.0

HIST281 S US Family History Research - S US Family History Research 3.0

HIST282 Colonial US Fam Hist Research - Colonial US Fam Hist Research 3.0

General Studies (BGS): History Emphasis

Program Information

Minimum Credit Hours
33

Maximum Credit Hours
33

Major Academic Plan
MAPS - BGS in General Studies - History 2026-2027.docx

Learning Outcomes

Title
Aims of a BYU Education

Learning Outcome
Describe how coursework in the BGS program has contributed to the aims of a BYU education: Spiritually strengthening, Character building, Intellectually enlarging, Preparing for lifelong learning and service.

Title
American and World History

Learning Outcome
Gain a historical consciousness by demonstrating knowledge of major developments in American and world history and understand key historical terms and theories

Title
Historical Research Methods

Learning Outcome
Demonstrate basic proficiency in using the historical method of research

Title
Effective Writing

Learning Outcome
Write effectively about historical topics.

Program Requirements

Have 27 hours of campus residency.

Complete a minimum of 10 hours in the emphasis after formal admission to the BGS program.

Thirty of the 120 hours must be 300-level or above courses.

Students must earn a minimum 2.0 BYU grade point average, a minimum 2.0 cumulative grade point average, and a minimum 2.0 emphasis grade point average.

The program must be completed in eight years or less.

All emphasis courses taken after admission to BGS must be BYU courses.

Requirement 1 —Complete 1 Course

Prerequisite course (must be completed before taking any other courses, includes preparing academic plan which must be approved before proceeding):

STDEV100 Essential College Skills - Essential College Skills 1.0

Requirement 2 —Complete 4 Courses

Core courses:

HIST201 World Civilization to 1500 - World Civilization to 1500 3.0

HIST202 World Civilization from 1500 - World Civilization from 1500 3.0

HIST220 U S Through 1877 - U S Through 1877 3.0

HIST221 U S Since 1877 - U S Since 1877 3.0

Requirement 3 —Complete 18 hours

HIST217 Family Historian's Craft - Family Historian's Craft 3.0

HIST251 Con & Col Lat Amer - Con & Col Lat Amer 3.0

HIST252 Modern Latin Amer - Modern Latin Amer 3.0

Family & Consumer Sciences Education (BS)

Program Information

Minimum Credit Hours
70

Maximum Credit Hours
70

Major Academic Plan
MAPS - BS in Family & Consumer Sciences Education 2026-2027.docx

Learning Outcomes

Title
Instructional Design and Reflection

Learning Outcome
Identify and use a variety of instructional strategies and tools of inquiry in Family and Consumer Sciences to create learning experiences that encourage students' development of critical thinking, problem solving, and performance skills.

Title
General Teacher Preparation Competency

Learning Outcome
Demonstrate mastery of Utah General Teacher Preparation Competencies through the BYU Teacher Candidate Assessment (TCA), while integrating characteristics of Christlike teaching.

Title
Family and Consumer Sciences Content

Learning Outcome
Demonstrate an understanding of the core concepts and principles associated with the Family and Consumer Sciences curricula taught in secondary classrooms (related to child development, family studies, foods and nutrition, clothing, home management, and interior design).

Program Requirements
Licensure: This program meets the educational requirements designed to lead to an occupationally required professional license or certificate in the state of Utah. Students pursuing occupations requiring a license or certificate in a state other than Utah should contact the appropriate BYU academic advisement center as well as the licensing agency in the state where they intend to work to seek information and guidance regarding licensure and certification requirements.

At least 18 hours of major credit must be taken in residency at BYU.

For students accepted into the major after December 16, 2019, grades below C in any required coursework in a teaching major or teaching minor will not be accepted. Teacher candidates must maintain a cumulative GPA of 2.7 or higher once admitted into the program and to qualify for student teaching. For additional details on admission and retention requirements for teaching majors and teaching minors, see Educator Preparation Program Requirements in the Undergraduate Catalog.

Students must request to be added to the pre-teaching major initially. Upon completing some basic requirements, they will be eligible to apply for the teaching major.

Students must complete SFL 276R prior to applying for the teaching major.

Requirement 1 —Complete 1 Course

Complete the following human development course:

SFL210 Human Development - Human Development 3.0

Requirement 2 —Complete 2 Courses

Complete the following early childhood learning experiences practice with lab concurrently:

SFL221 Foundations of DAP - Foundations of DAP 1.0

SFL222 DAP Practicum - DAP Practicum 3.0

Requirement 3 —Complete 1 Course

Complete the following consumer and the market, family finance, family resource management courses:

SFL260 Family Finance - Family Finance 3.0

Requirement 4 —Complete 1 Course

Complete the following nutrition through the life cycle course:

NDFS100 Essentials of Human Nutrition - Essentials of Human Nutrition 3.0

Requirement 5 —Complete 2 Courses

Complete the following food preparation and meal management courses:

SFL110 Food Preparation in the Home - Food Preparation in the Home 2.0

SFL215 Advanced Food Preparation - Advanced Food Preparation 3.0

Requirement 6 —Complete 2 Courses

Complete the following food science with lab courses:

NDFS175 Intro Food Science - Intro Food Science 3.0

NDFS251 Essentials of Food Sci Lab - Essentials of Food Sci Lab 1.0

Requirement 7 —Complete 1 Course

Complete the following introduction to housing and interior design course:

SFL102 Introduction to Interiors - Introduction to Interiors 3.0

49

Maximum Credit Hours
49

Major Academic Plan
MAPS - BS in Family Life - Human Development 2026-2027.docx

Learning Outcomes

Title
Human Development Content and Theory

Learning Outcome
Demonstrate understanding of major concepts, theories, and research findings in substantive areas of human development.

Title
Research and Evaluation Methodologies

Learning Outcome
Critically evaluate and/or use the various methodologies used in human development research.

Title
Effective Writing and Analysis

Learning Outcome
Write professional research papers on human development questions that demonstrate an ability to synthesize and critically evaluate research related to specific theories and/or substantive areas.

Program Requirements

The School of Family Life requires a minimum of 18 hours of upper-division major course work to be taken in residency at BYU for this degree program. (This requirement includes taking at least 12 hours minimum of the human development core in residency at BYU.) These hours may also go toward BYU's 30-hour residency requirement for graduation.

Requirement 1 —Complete 1 of 2 Options

Complete one of the following tracks:

Option 1.1 —Complete 4 Requirements

HUMAN DEVELOPMENT TRACK

Requirement 1.1.1 —Complete 12 Courses

SFL101 Intro to SFL - Intro to SFL 1.0

SFL160 Intro to Family Processes - Intro to Family Processes 3.0

SFL200 Strengthening Marriage/Family - Strengthening Marriage/Family 3.0

SFL210 Human Development - Human Development 3.0

SFL290 Critical Inquiry&Research Meth - Critical Inquiry&Research Meth 3.0

SFL305 Applied Stats/Data Management - Applied Stats/Data Management 3.0

SFL315 Effective Writing & Presenting - Effective Writing & Presenting 3.0

SFL331 Infant Dev in the Family - Infant Dev in the Family 3.0

SFL333 Adolescent Dev in Fam & Soc - Adolescent Dev in Fam & Soc 3.0

SFL334 Adult Development & Aging - Adult Development & Aging 3.0

SFL351 Social Development - Social Development 3.0

SFL354 Cross-Cultural Fam & Hum Dev - Cross-Cultural Fam & Hum Dev 3.0

Requirement 1.1.2 —Complete 9 hours

Note: Courses taken beyond the required 9 credit hours may count towards the 3 credit hour elective requirement below.

SFL240 Parenting & Child Guidance - Parenting & Child Guidance 3.0

SFL352 Perception Cognition Language - Perception Cognition Language 3.0

ECE355 Language Development - Language Development 3.0

SFL356 Gender Development in Families - Gender Development in Families 3.0

SFL358 Media, Fam & Human Dev - Media, Fam & Human Dev 3.0

SFL449 Biological Fndtns of Human Dev - Biological Fndtns of Human Dev 3.0

Requirement 1.1.3 —Complete 1 Requirement

Requirement 1.1.3.1 —Complete 3 hours

SFL399R Academic Internship - Academic Internship - *You may take once* 1.0v

SFL403R Rsrch/Creative Works Practicum - Rsrch/Creative Works Practicum - *You may take once* 0.5v

SFL453 Moral Development - Moral Development 3.0

SFL490 Adv Issues in Human Dev - Adv Issues in Human Dev 3.0

Note 1: If SFL 453 is not used to fulfill the capstone requirement, it may be used to fulfill three credit hours of the nine credit hour requirement above. If SFL 490 is not used to fulfill the capstone requirement, it may be used to fulfill three credit hours of the nine credit hour requirement above.

Note 2: For SFL 399R and 403R, human development-related experiences are preferred. Only three credit hours of 399R or 403R may count toward the degree requirements. Additional credits may, however, count towards the overall 120 credit hour graduation requirement.

Requirement 1.1.4 —Complete 3 hours

Any course you complete in SFL may only be counted once. If you have any confusion about whether or not you have fulfilled your SFL major requirements, it is your responsibility to go to the advisement center.

HLTH456 Families and Public Health - Families and Public Health 3.0

Minimum Credit Hours
49

Maximum Credit Hours
49

Major Academic Plan
MAPS - BS in Family Life - Family Studies 2026-2027.docx

Learning Outcomes

Title
Marriage and Family Content and Theory

Learning Outcome
Demonstrate understanding of major concepts, theories, and research results in substantive areas related to marriage and family.

Title
Research and Evaluation Methodologies

Learning Outcome
Critically evaluate and/or use the various methodologies used in marriage and family studies research.

Title
Effective Writing and Analysis

Learning Outcome
Write professional research papers on marriage and family studies questions that demonstrate an ability to synthesize and critically evaluate research related to specific theories and/or substantive areas.

Program Requirements
The School of Family Life requires a minimum of 18 hours of SFL upper-division course work to be taken in residency at BYU for this degree program. These hours may also go toward BYU's 30-hour residency requirement for graduation.

Students who do not plan to pursue a graduate program beyond the bachelor's degree should take other courses that will enhance their employment opportunities. Consult a faculty advisor or your academic advisor for suggested minors, majors, and skills. Students are encouraged to take student development courses related to career planning in their junior or senior year.

Requirement 1 —Complete 7 Courses

Complete the following School of Family Life core before taking other courses in the major:

SFL101 Intro to SFL - Intro to SFL 1.0

SFL160 Intro to Family Processes - Intro to Family Processes 3.0

SFL200 Strengthening Marriage/Family - Strengthening Marriage/Family 3.0

SFL210 Human Development - Human Development 3.0

SFL290 Critical Inquiry&Research Meth - Critical Inquiry&Research Meth 3.0

SFL305 Applied Stats/Data Management - Applied Stats/Data Management 3.0

SFL315 Effective Writing & Presenting - Effective Writing & Presenting 3.0

Requirement 2 —Complete 1 Course

Family studies upper-division core course:

SFL354 Cross-Cultural Fam & Hum Dev - Cross-Cultural Fam & Hum Dev 3.0

Requirement 3 —Complete 3 Courses

Family science core courses:

SFL335 Family Adaptation&Resiliency - Family Adaptation&Resiliency 3.0

SFL336 Theories in Fam Perspective - Theories in Fam Perspective 3.0

SFL460 Advanced Family Processes - Advanced Family Processes 3.0

Requirement 4 —Complete 1 of 2 Options

Complete one of the following 2 tracks:

Option 4.1 —Complete 3 Requirements

FAMILY STUDIES TRACK

Requirement 4.1.1 —Complete 9 hours

Note: SFL 395R and 403R may only be taken once each.

Program Requirements

This minor is designed to prepare students to teach in public schools. A teaching minor may only be received by students graduating with a teaching major. In order to graduate with this minor, students are required to complete Utah State Office of Education licensing requirements. To view these requirements, go to http://education.byu.edu/ess/licensing.html or contact Education Student Services, 350 MCKB, (801) 422-3426.

For students accepted into the major after December 16, 2019, grades below C in any required coursework in a teaching major or teaching minor will not be accepted. Teacher candidates must maintain a cumulative GPA of 2.7 or higher once admitted into the program and to qualify for student teaching. For additional details on admission and retention requirements for teaching majors and teaching minors, see Educator Preparation Program Requirements in the Undergraduate Catalog. For details on admission and retention requirements for teaching majors and teaching minors, see Educator Preparation Program (EPP) Requirements.

Requirement 1 — Complete 1 Course

Complete the following human development course:

SFL210 Human Development - Human Development 3.0

Requirement 2 — Complete 2 Courses

Complete the following early childhood learning experiences practice with lab:

SFL221 Foundations of DAP - Foundations of DAP 1.0

SFL222 DAP Practicum - DAP Practicum 3.0

Requirement 3 — Complete 2 Courses

Complete the following nutrition through the life cycle or food preparation course:

NDFS100 Essentials of Human Nutrition - Essentials of Human Nutrition 3.0

SFL110 Food Preparation in the Home - Food Preparation in the Home 2.0

Requirement 4 — Complete 1 Course

Complete the following introduction to housing and interior design course:

SFL102 Introduction to Interiors - Introduction to Interiors 3.0

Requirement 5 — Complete 1 Course

Complete the following basic clothing construction and alterations course:

SFL185R Basic Sewing Techniques - Basic Sewing Techniques - *You may take once* 3.0

Requirement 6 — Complete 1 Course

Complete the following clothing selection and psychology of clothing course:

SFL280 Dynamics of Clothing - Dynamics of Clothing 3.0

Requirement 7 — Complete 3 hours

Elective courses:

NDFS175 Intro Food Science - Intro Food Science 3.0

NDFS251 Essentials of Food Sci Lab - Essentials of Food Sci Lab 1.0

SFL202 Design in the Home - Design in the Home 3.0

SFL215 Advanced Food Preparation - Advanced Food Preparation 3.0

SFL260 Family Finance - Family Finance 3.0

SFL287 Intermed Sewing Techniques - Intermed Sewing Techniques 3.0

SFL356 Gender Development in Families - Gender Development in Families 3.0

SFL382 Textiles - Textiles 3.0

SFL400 Addiction Recovery Healing - Addiction Recovery Healing 3.0

Requirement 8 — Complete 3 Courses

Complete the following courses:

SFL377 Tchg Mthds in Fam&Cons Sci Ed - Tchg Mthds in Fam&Cons Sci Ed 3.0

SFL378 Practicum in Secondary Educ - Practicum in Secondary Educ 1.0

SFL379 Class & Lab management - Class & Lab management 1.0

Requirement 9 — Complete 1 Course

SFL476 Student Teaching - Student Teaching 12.0

Note: Fingerprinting and FBI clearance must be completed before registration in SFL 276R.

Civic Engagement Leadership (Minor)

Program Information

Minimum Credit Hours
18

Maximum Credit Hours
18

Learning Outcomes

Title
Leadership

Learning Outcome
Develop leadership skills in their discipline or career as a community leader.

Title
Community Development

Learning Outcome
Apply knowledge from their diverse major classes toward community development

Title
Community Projects

Learning Outcome
Organize real-world group and individual projects that improve a local community.

Title
Building Relationships

Learning Outcome
Build relationships with mentors, speakers, and other students who are civically engaged.

Title
Making Positive Changes

Learning Outcome
Navigate political arenas to make positive changes in their communities.

Program Requirements

Requirement 1 — Complete 2 Courses

FHSS300 Leadership Projects - Leadership Projects 2.0

FHSS400 Civic Engage Leadership - Civic Engage Leadership 3.0

Requirement 2 — Complete 13 hours

Complete 13 credit hours from the following (3.0 credit hours must be outside your major). Note: Only 3 credit hours of internship may be used toward fulfilling this requirement. Note: Hlth 431 and 439 are options only for Public Health students. Course electives not listed but with significant civic engagement content may also be counted with approval from the Director of Civic Engagement.

1. Understand Political Science and Its Subfields

Learning Outcome
Demonstrate advanced understanding of the discipline of political science including familiarity with each of the four major subfields: American politics comparative politics international relations and political philosophy.

Title
2. Employ Rigorous Research Methods

Learning Outcome
Use rigorous methods of research design and analysis to answer political questions including multiple research methodologies

Title
3. Write and Speak with Originality and Clarity

Learning Outcome
Write and speak with originality and clarity providing reasons and evidence to support claims usingproper citation of source material.

Title
4. Think Critically and Analytically about Politics

Learning Outcome
Think critically and analytically about government political processes and political theories including the components of a good society.

Title
5. Collaborate Effectively

Learning Outcome
Collaborate effectively with others including participation in political processes and engagement on issues of political importance.

Program Requirements

The Political Science Department requires a minimum of 27 hours of political science courses to be taken in residency at BYU for this degree program (BYU Independent Study courses do not meet this requirement). These hours may also go toward BYU's 30-hour residency requirement for graduation.

Requirement 1 —Complete 1 of 3 Options

Introduction to the Major.

Option 1.1 —Complete 2 Requirements

Requirement 1.1.1 —Complete 1 Course

POLI210 Principles of Amer. Politics - Principles of Amer. Politics 3.0

Requirement 1.1.2 —Complete 1 of 4 Courses

POLI150 Comparative Governmnt&Politics - Comparative Governmnt&Politics 3.0

POLI170 Intro International Politics - Intro International Politics 3.0

POLI250 Principles of Comprtv Politics - Principles of Comprtv Politics 3.0

POLI270 Principles of Intl Relations - Principles of Intl Relations 3.0

Option 1.2 —Complete 2 Requirements

Requirement 1.2.1 —Complete 1 Course

POLI250 Principles of Comprtv Politics - Principles of Comprtv Politics 3.0

Requirement 1.2.2 —Complete 1 of 4 Courses

POLI110 Amer Government & Politics - Amer Government & Politics 3.0

POLI170 Intro International Politics - Intro International Politics 3.0

POLI210 Principles of Amer. Politics - Principles of Amer. Politics 3.0

POLI270 Principles of Intl Relations - Principles of Intl Relations 3.0

Option 1.3 —Complete 2 Requirements

Requirement 1.3.1 —Complete 1 Course

POLI270 Principles of Intl Relations - Principles of Intl Relations 3.0

Requirement 1.3.2 —Complete 1 of 4 Courses

POLI110 Amer Government & Politics - Amer Government & Politics 3.0

POLI150 Comparative Governmnt&Politics - Comparative Governmnt&Politics 3.0

POLI210 Principles of Amer. Politics - Principles of Amer. Politics 3.0

POLI250 Principles of Comprtv Politics - Principles of Comprtv Politics 3.0

Requirement 2 —Complete 1 of 3 Courses

Political Philosophy.

POLI201 Western Political Heritage 1 - Western Political Heritage 1 3.0

POLI202 Western Political Heritage 2 - Western Political Heritage 2 3.0

POLI367 Contemporary Political Theory - Contemporary Political Theory 3.0

Requirement 3 —Complete 1 Course

Introductory Research and Writing. (Note: This course is a prerequisite to many other courses and should be taken as soon as possible.)

POLI200 Political Inquiry - Political Inquiry 4.0

Requirement 4 —Complete 1 of 5 Courses

Research Project. (Note: This course should be taken as soon as possible after POLI 200 because it will provide skills for many other courses. In combination with POLI 200, it fulfills the University Core Advanced Written and Oral Communication requirement.)

POLI360 Research Proj Political Theory - Research Proj Political Theory 3.0

POLI310 Research Proj: Amer Politics - Research Proj: Amer Politics 3.0

POLI330 Research Proj: Public Policy - Research Proj: Public Policy 3.0

POLI350 Research Proj: Comp Politics - Research Proj: Comp Politics 3.0

POLI370 Resrch Proj: Intrnl Relations - Resrch Proj: Intrnl Relations 3.0

Requirement 5 —Complete 2 Requirements

Analytical and Professional Skills.

Requirement 5.1 —Complete 1 Course

(Note: POLI 328 should be taken as soon as possible after POLI 200 because it will provide skills for many other courses. It fulfills the University Core Languages of Learning requirement.)

POLI300 Statistical Analysis - Statistical Analysis 4.0

Requirement 5.2 —Complete 3 hours

ANTHR442 Ethnographic Research Design - Ethnographic Research Design 3.0

C S111 Intro to Computer Science - Intro to Computer Science 3.0

C S142 Intro to Computer Programming - Intro to Computer Programming 3.0

ECON478 Game Theory & Economics - Game Theory & Economics 3.0

Major Academic Plan
MAPS - BA in Political Science - Global Development 2026-2027.docx

Learning Outcomes

Title
1. Understand Political Science and Its Subfields

Learning Outcome
Demonstrate advanced understanding of the discipline of political science including familiarity with each of the four major subfields: American politics comparative politics international relations and political philosophy.

Title
2. Employ Rigorous Research Methods

Learning Outcome
Use rigorous methods of research design and analysis to answer political questions including multiple research methodologies

Title
3. Write and Speak with Originality and Clarity

Learning Outcome
Write and speak with originality and clarity providing reasons and evidence to support claims usingproper citation of source material.

Title
4. Think Critically and Analytically about Politics

Learning Outcome
Think critically and analytically about government political processes and political theories including the components of a good society.

Title
5. Collaborate Effectively

Learning Outcome
Collaborate effectively with others including participation in political processes and engagement on issues of political importance.

Program Requirements

The Political Science Department requires a minimum of 27 hours of political science courses to be taken in residency at BYU for this degree program (BYU Independent Study courses do not meet this requirement). These hours may also go toward BYU's 30-hour residency requirement for graduation.

Requirement 1 —Complete 1 of 3 Options

Introduction to the Major.

Option 1.1 —Complete 2 Requirements

Requirement 1.1.1 —Complete 1 Course

POLI210 Principles of Amer. Politics - Principles of Amer. Politics 3.0

Requirement 1.1.2 —Complete 1 of 4 Courses

POLI150 Comparative Governmnt&Politics - Comparative Governmnt&Politics 3.0

POLI170 Intro International Politics - Intro International Politics 3.0

POLI250 Principles of Comprtv Politics - Principles of Comprtv Politics 3.0

POLI270 Principles of Intl Relations - Principles of Intl Relations 3.0

Option 1.2 —Complete 2 Requirements

Requirement 1.2.1 —Complete 1 Course

POLI250 Principles of Comprtv Politics - Principles of Comprtv Politics 3.0

Requirement 1.2.2 —Complete 1 of 4 Courses

POLI110 Amer Government & Politics - Amer Government & Politics 3.0

POLI170 Intro International Politics - Intro International Politics 3.0

POLI210 Principles of Amer. Politics - Principles of Amer. Politics 3.0

POLI270 Principles of Intl Relations - Principles of Intl Relations 3.0

Option 1.3 —Complete 2 Requirements

Requirement 1.3.1 —Complete 1 Course

POLI270 Principles of Intl Relations - Principles of Intl Relations 3.0

Requirement 1.3.2 —Complete 1 of 4 Courses

POLI110 Amer Government & Politics - Amer Government & Politics 3.0

POLI150 Comparative Governmnt&Politics - Comparative Governmnt&Politics 3.0

POLI210 Principles of Amer. Politics - Principles of Amer. Politics 3.0

POLI250 Principles of Comprtv Politics - Principles of Comprtv Politics 3.0

Requirement 2 —Complete 1 of 3 Courses

Political Philosophy.

POLI201 Western Political Heritage 1 - Western Political Heritage 1 3.0

POLI202 Western Political Heritage 2 - Western Political Heritage 2 3.0

POLI367 Contemporary Political Theory - Contemporary Political Theory 3.0

Requirement 3 —Complete 1 Course

Introductory Research and Writing. (Note: This course is a prerequisite to many other courses and should be taken as soon as possible.)

POLI200 Political Inquiry - Political Inquiry 4.0

Requirement 4 —Complete 1 of 5 Courses

Research Project. (Note: This course should be taken as soon as possible after POLI 200 because it will provide skills for many other courses. In combination with POLI 200, it fulfills the University Core Advanced Written and Oral Communication requirement.)

POLI360 Research Proj Political Theory - Research Proj Political Theory 3.0

POLI310 Research Proj: Amer Politics - Research Proj: Amer Politics 3.0

POLI330 Research Proj: Public Policy - Research Proj: Public Policy 3.0

POLI350 Research Proj: Comp Politics - Research Proj: Comp Politics 3.0

POLI370 Resrch Proj: Intrnl Relations - Resrch Proj: Intrnl Relations 3.0

Requirement 5 —Complete 2 Requirements

Analytical and Professional Skills.

Requirement 5.1 —Complete 1 Course

(Note: POLI 328 should be taken as soon as possible after POLI 200 because it will provide skills for many other courses. It fulfills the University Core Languages of Learning requirement.)

POLI300 Statistical Analysis - Statistical Analysis 4.0

Requirement 5.2 —Complete 3 hours

1. No double-counting of courses across requirements.

2. POLI 101R and POLI 297R do not count toward the major or any minor offered by the department.

3. Only 6 hours of POLI 399R (internship credit) may count toward the major.

4. No cooperative education (internship) credit from other universities or colleges will be accepted toward the major.

5. All students are strongly encouraged to complete an internship. Established programs are available through Washington Seminar, Utah State Legislature, or the Kennedy Center. [Students should contact the Political Science Internship Director (945 KMBL, 801-422-2168) at least 60-90 days before the anticipated internship start date or before beginning the search for an internship.]

6. Only 6 hours of POLI 497R (Mentored Research) may count toward the major.

7. We strongly encourage students to take POLI 398 , a career lecture series course.

Political Science: Political Strategy (BA)

Program Information

Minimum Credit Hours

Maximum Credit Hours
44

Major Academic Plan

MAPS - BA in Political Science - Political Strategy 2026-2027.docx

Learning Outcomes

Title
1. Understand Political Science and Its Subfields

Learning Outcome
Demonstrate advanced understanding of the discipline of political science including familiarity with each of the four major subfields: American politics comparative politics international relations and political philosophy.

Title
2. Employ Rigorous Research Methods

Learning Outcome
Use rigorous methods of research design and analysis to answer political questions including multiple research methodologies

Title
3. Write and Speak with Originality and Clarity

Learning Outcome
Write and speak with originality and clarity providing reasons and evidence to support claims usingproper citation of source material.

Title
4. Think Critically and Analytically about Politics

Learning Outcome
Think critically and analytically about government political processes and political theories including the components of a good society.

Title
5. Collaborate Effectively

Learning Outcome
Collaborate effectively with others including participation in political processes and engagement on issues of political importance.

Program Requirements

The Political Science Department requires a minimum of 27 hours of political science courses to be taken in residency at BYU for this degree program (BYU Independent Study courses do not meet this requirement). These hours may also go toward BYU's 30-hour residency requirement for graduation.

Requirement 1 —Complete 1 of 3 Options

Introduction to the Major.

Option 1.1 —Complete 2 Requirements

Requirement 1.1.1 —Complete 1 Course

POLI210 Principles of Amer. Politics - Principles of Amer. Politics 3.0

Requirement 1.1.2 —Complete 1 of 4 Courses

POLI150 Comparative Governmnt&Politics - Comparative Governmnt&Politics 3.0

POLI170 Intro International Politics - Intro International Politics 3.0

POLI250 Principles of Comprtv Politics - Principles of Comprtv Politics 3.0

POLI270 Principles of Intl Relations - Principles of Intl Relations 3.0

Option 1.2 —Complete 2 Requirements

Requirement 1.2.1 —Complete 1 Course

POLI250 Principles of Comprtv Politics - Principles of Comprtv Politics 3.0

Requirement 1.2.2 —Complete 1 of 4 Courses

POLI110 Amer Government & Politics - Amer Government & Politics 3.0

POLI170 Intro International Politics - Intro International Politics 3.0

POLI210 Principles of Amer. Politics - Principles of Amer. Politics 3.0

POLI270 Principles of Intl Relations - Principles of Intl Relations 3.0

Option 1.3 —Complete 2 Requirements

Requirement 1.3.1 —Complete 1 Course

POLI270 Principles of Intl Relations - Principles of Intl Relations 3.0

Requirement 1.3.2 —Complete 1 of 4 Courses

POLI110 Amer Government & Politics - Amer Government & Politics 3.0

POLI150 Comparative Governmnt&Politics - Comparative Governmnt&Politics 3.0

POLI210 Principles of Amer. Politics - Principles of Amer. Politics 3.0

POLI250 Principles of Comprtv Politics - Principles of Comprtv Politics 3.0

Requirement 2 —Complete 1 of 3 Courses

Political Philosophy.

POLI201 Western Political Heritage 1 - Western Political Heritage 1 3.0

POLI202 Western Political Heritage 2 - Western Political Heritage 2 3.0

POLI367 Contemporary Political Theory - Contemporary Political Theory 3.0

Requirement 3 —Complete 1 Course

Introductory Research and Writing. (Note: This course is a prerequisite to many other courses and should be taken as soon as possible.)

POLI200 Political Inquiry - Political Inquiry 4.0

Requirement 4 —Complete 1 of 5 Courses

Research Project. (Note: This course should be taken as soon as possible after POLI 200 because it will provide skills for many other courses. In combination with POLI 200, it fulfills the University Core Advanced Written and Oral Communication requirement.)

POLI360 Research Proj Political Theory - Research Proj Political Theory 3.0

POLI310 Research Proj: Amer Politics - Research Proj: Amer Politics 3.0

POLI330 Research Proj: Public Policy - Research Proj: Public Policy 3.0

POLI350 Research Proj: Comp Politics - Research Proj: Comp Politics 3.0

POLI370 Resrch Proj: Intrnl Relations - Resrch Proj: Intrnl Relations 3.0

Requirement 5 —Complete 2 Requirements

Analytical and Professional Skills.

Requirement 5.1 —Complete 1 Course

(Note: POLI 328 should be taken as soon as possible after POLI 200 because it will provide skills for many other courses. It fulfills the University Core Languages of Learning requirement.)

POLI300 Statistical Analysis - Statistical Analysis 4.0

Requirement 5.2 —Complete 3 hours

ANTHR442 Ethnographic Research Design - Ethnographic Research Design 3.0

C S111 Intro to Computer Science - Intro to Computer Science 3.0

C S142 Intro to Computer Programming - Intro to Computer Programming 3.0

ECON478 Game Theory & Economics - Game Theory & Economics 3.0

ECON 488 - Applied Econometrics 3.0 - *This course is no longer offered.*

Major Academic Plan

MAPS - BA in Political Science - Research and Analysis 2026-2027.docx

Learning Outcomes

Title
1. Understand Political Science and Its Subfields

Learning Outcome
Demonstrate advanced understanding of the discipline of political science including familiarity with each of the four major subfields: American politics comparative politics international relations and political philosophy.

Title
2. Employ Rigorous Research Methods

Learning Outcome
Use rigorous methods of research design and analysis to answer political questions including multiple research methodologies

Title
3. Write and Speak with Originality and Clarity

Learning Outcome
Write and speak with originality and clarity providing reasons and evidence to support claims usingproper citation of source material.

Title
4. Think Critically and Analytically about Politics

Learning Outcome
Think critically and analytically about government political processes and political theories including the components of a good society.

Title
5. Collaborate Effectively

Learning Outcome
Collaborate effectively with others including participation in political processes and engagement on issues of political importance.

Program Requirements

The Political Science Department requires a minimum of 27 hours of political science courses to be taken in residency at BYU for this degree program (BYU Independent Study courses do not meet this requirement). These hours may also go toward BYU's 30-hour residency requirement for graduation.

Requirement 1 —Complete 1 of 3 Options

Introduction to the Major.

Option 1.1 —Complete 2 Requirements

Requirement 1.1.1 —Complete 1 Course

POLI210 Principles of Amer. Politics - Principles of Amer. Politics 3.0

Requirement 1.1.2 —Complete 1 of 4 Courses

POLI150 Comparative Governmnt&Politics - Comparative Governmnt&Politics 3.0

POLI170 Intro International Politics - Intro International Politics 3.0

POLI250 Principles of Comprtv Politics - Principles of Comprtv Politics 3.0

POLI270 Principles of Intl Relations - Principles of Intl Relations 3.0

Option 1.2 —Complete 2 Requirements

Requirement 1.2.1 —Complete 1 Course

POLI250 Principles of Comprtv Politics - Principles of Comprtv Politics 3.0

Requirement 1.2.2 —Complete 1 of 4 Courses

POLI110 Amer Government & Politics - Amer Government & Politics 3.0

POLI170 Intro International Politics - Intro International Politics 3.0

POLI210 Principles of Amer. Politics - Principles of Amer. Politics 3.0

POLI270 Principles of Intl Relations - Principles of Intl Relations 3.0

Option 1.3 —Complete 2 Requirements

Requirement 1.3.1 —Complete 1 Course

POLI270 Principles of Intl Relations - Principles of Intl Relations 3.0

Requirement 1.3.2 —Complete 1 of 4 Courses

POLI110 Amer Government & Politics - Amer Government & Politics 3.0

POLI150 Comparative Governmnt&Politics - Comparative Governmnt&Politics 3.0

POLI210 Principles of Amer. Politics - Principles of Amer. Politics 3.0

POLI250 Principles of Comprtv Politics - Principles of Comprtv Politics 3.0

Requirement 2 —Complete 1 of 3 Courses

Political Philosophy.

POLI201 Western Political Heritage 1 - Western Political Heritage 1 3.0

POLI202 Western Political Heritage 2 - Western Political Heritage 2 3.0

POLI367 Contemporary Political Theory - Contemporary Political Theory 3.0

Requirement 3 —Complete 1 Course

Introductory Research and Writing. (Note: This course is a prerequisite to many other courses and should be taken as soon as possible.)

POLI200 Political Inquiry - Political Inquiry 4.0

Requirement 4 —Complete 1 of 5 Courses

Research Project. (Note: This course should be taken as soon as possible after POLI 200 because it will provide skills for many other courses. In combination with POLI 200, it fulfills the University Core Advanced Written and Oral Communication requirement.)

POLI310 Research Proj: Amer Politics - Research Proj: Amer Politics 3.0

POLI330 Research Proj: Public Policy - Research Proj: Public Policy 3.0

POLI350 Research Proj: Comp Politics - Research Proj: Comp Politics 3.0

POLI360 Research Proj Political Theory - Research Proj Political Theory 3.0

POLI370 Resrch Proj: Intrnl Relations - Resrch Proj: Intrnl Relations 3.0

Requirement 5 —Complete 2 Requirements

Analytical and Professional Skills.

Requirement 5.1 —Complete 1 Course

(Note: POLI 328 should be taken as soon as possible after POLI 200 because it will provide skills for many other courses. It fulfills the University Core Languages of Learning requirement.)

POLI300 Statistical Analysis - Statistical Analysis 4.0

Requirement 5.2 —Complete 3 hours

ANTHR442 Ethnographic Research Design - Ethnographic Research Design 3.0

Requirement 1.1.1 —Complete 1 Course

POLI210 Principles of Amer. Politics - Principles of Amer. Politics 3.0

Requirement 1.1.2 —Complete 1 of 4 Courses

POLI150 Comparative Governmnt&Politics - Comparative Governmnt&Politics 3.0

POLI170 Intro International Politics - Intro International Politics 3.0

POLI250 Principles of Comprtv Politics - Principles of Comprtv Politics 3.0

POLI270 Principles of Intl Relations - Principles of Intl Relations 3.0

Option 1.2 —Complete 2 Requirements

Requirement 1.2.1 —Complete 1 Course

POLI250 Principles of Comprtv Politics - Principles of Comprtv Politics 3.0

Requirement 1.2.2 —Complete 1 of 4 Courses

POLI110 Amer Government & Politics - Amer Government & Politics 3.0

POLI170 Intro International Politics - Intro International Politics 3.0

POLI210 Principles of Amer. Politics - Principles of Amer. Politics 3.0

POLI270 Principles of Intl Relations - Principles of Intl Relations 3.0

Option 1.3 —Complete 2 Requirements

Requirement 1.3.1 —Complete 1 Course

POLI270 Principles of Intl Relations - Principles of Intl Relations 3.0

Requirement 1.3.2 —Complete 1 of 4 Courses

POLI110 Amer Government & Politics - Amer Government & Politics 3.0

POLI150 Comparative Governmnt&Politics - Comparative Governmnt&Politics 3.0

POLI210 Principles of Amer. Politics - Principles of Amer. Politics 3.0

POLI250 Principles of Comprtv Politics - Principles of Comprtv Politics 3.0

Requirement 2 —Complete 1 of 3 Courses

Political Philosophy.

POLI201 Western Political Heritage 1 - Western Political Heritage 1 3.0

POLI202 Western Political Heritage 2 - Western Political Heritage 2 3.0

POLI367 Contemporary Political Theory - Contemporary Political Theory 3.0

Requirement 3 —Complete 1 Course

Introductory Research and Writing. (Note: This course is a prerequisite to many other courses and should be taken as soon as possible.)

POLI200 Political Inquiry - Political Inquiry 4.0

Requirement 4 —Complete 1 of 5 Courses

Research Project. (Note: This course should be taken as soon as possible after POLI 200 because it will provide skills for many other courses. In combination with POLI 200, it fulfills the University Core Advanced Written and Oral Communication requirement.)

POLI360 Research Proj Political Theory - Research Proj Political Theory 3.0

POLI310 Research Proj: Amer Politics - Research Proj: Amer Politics 3.0

POLI330 Research Proj: Public Policy - Research Proj: Public Policy 3.0

POLI350 Research Proj: Comp Politics - Research Proj: Comp Politics 3.0

POLI370 Resrch Proj: Intrnl Relations - Resrch Proj: Intrnl Relations 3.0

Requirement 5 —Complete 2 Requirements

Analytical and Professional Skills.

Requirement 5.1 —Complete 1 Course

(Note: POLI 300 should be taken as soon as possible after POLI 200 because it will provide skills for many other courses. It fulfills the University Core Languages of Learning requirement.)

POLI300 Statistical Analysis - Statistical Analysis 4.0

Requirement 5.2 —Complete 3 hours

ANTHR442 Ethnographic Research Design - Ethnographic Research Design 3.0

C S111 Intro to Computer Science - Intro to Computer Science 3.0

C S142 Intro to Computer Programming - Intro to Computer Programming 3.0

ECON478 Game Theory & Economics - Game Theory & Economics 3.0

ECON 488 - Applied Econometrics 3.0 - *This course is no longer offered*

FIN201 Principles of Finance - Principles of Finance 3.0

GEOG212 Intro to GIS - Intro to GIS 3.0

IS201 Intro to Information Systems - Intro to Information Systems 3.0

PHIL205 Intro to Logic/Crit Thinking - Intro to Logic/Crit Thinking 3.0

POLI301 Data Visualization - Data Visualization 3.0

POLI302 Experimental Research Methods - Experimental Research Methods 3.0

POLI303 Qualitative Methods - Qualitative Methods 3.0

POLI304 Game Theory in Pol Sci - Game Theory in Pol Sci 3.0

POLI305 Survey Research Methods - Survey Research Methods 3.0

POLI306R Topics in Pol Sci Methods - Topics in Pol Sci Methods - *You may take once* 1.0v

POLI332 Public Policy Analysis - Public Policy Analysis 3.0

POLI367 Contemporary Political Theory - Contemporary Political Theory 3.0

POLI420 Const Law-Am Federal System - Const Law-Am Federal System 3.0

POLI421 Const Law-Rights & Immunities - Const Law-Rights & Immunities 3.0

POLI428 Advanced Statistical Analysis - Advanced Statistical Analysis 3.0

POLI465 Philosophy of Social Sciences - Philosophy of Social Sciences 3.0

STAT234 Methods of Survey Sampling - Methods of Survey Sampling 3.0

Requirement 6 —Complete 21 hours

POLI301 Data Visualization - Data Visualization 3.0

POLI302 Experimental Research Methods - Experimental Research Methods 3.0

POLI303 Qualitative Methods - Qualitative Methods 3.0

POLI304 Game Theory in Pol Sci - Game Theory in Pol Sci 3.0

POLI305 Survey Research Methods - Survey Research Methods 3.0

POLI306R Topics in Pol Sci Methods - Topics in Pol Sci Methods - *You may take once* 1.0v

POLI311 State Government and Politics - State & Local Govt & Politics 3.0

POLI312 American Judicial Politics - American Judicial Politics 3.0

POLI313 Interest Groups - Interest Groups 3.0

POLI314 U S Presidency - U S Presidency 3.0

POLI315 Congress & Legislative Process - Congress & Legislative Process 3.0

POLI316 American Political Parties - American Political Parties 3.0

POLI599R Graduate Internship - Graduate Internship - *You may take once* 0.5v

1. POLI 101R and POLI 297R do not count toward the major or any minor offered by the department.

2. Only 6 hours of POLI 399R (internship credit) may count toward the major.

3. No cooperative education (internship) credit from other universities or colleges will be accepted toward the major.

4. All students are strongly encouraged to complete an internship. Established programs are available through Washington Seminar, Utah State Legislature, or the Kennedy Center. [Students should contact the Political Science Internship Director (945 KMBL, 801-422-2168), at least 60-90 days before the anticipated internship start date or before beginning the search for an internship.]

5. Only 6 hours of POLI 497R (Mentored Research) may count toward the major.

6. We strongly encourage students to take POLI 398, a career lecture series course.

Psychology (BS)

Program Information

Minimum Credit Hours
52

Maximum Credit Hours
52

Major Academic Plan
MAPS - BS in Psychology 2026-2027.docx

Learning Outcomes

Title
A. Knowledge of the Discipline

Learning Outcome
Students will be able to recognize and articulate basic fundamental knowledge of major psychological concepts, perspectives, and historical trends. Students will be able to apply psychological concepts in order to solve personal and social issues.

Title
B. Effective Research and Writing

Learning Outcome
Understand and apply basic research methods in psychology including data analysis and interpretation, research design, psychometric methods, and the writing of results in the light of previous findings. (Competency Outcome)

Title
C. Experiential Learning

Learning Outcome
Apply the principles of psychology in an internship setting (399R), a teaching (410R) or community service setting (420R), or in a mentored-research setting (430R) before graduation.

Program Requirements

At least 36 of the total major credits must be 300-level or above. (Students can enroll in 500-level courses on a space-available basis.)

The Psychology Department requires a minimum of 23 hours of psychology major credit to be taken in residence at BYU for this degree program. These hours may also go toward BYU's 30-hour residency requirement for graduation.

A maximum of 15 hours may be taken as Independent Study (only 8 of which may count as departmental residence hours).

Requirement 1 —Complete 5 Courses

PSYCH111 Psychological Science - Psychological Science 3.0

PSYCH210 History of Psychology - History of Psychology 3.0

PSYCH307 Writing Within Psychology - Writing Within Psychology 3.0

PSYCH308 Psychological Statistics - Psychological Statistics 4.0

PSYCH310 Research Design & Analysis - Research Design & Analysis 3.0

Note: All students are encouraged to take Psych 101: Orientation to the Psychology Major. Students considering application to graduate study are strongly encouraged to take Psych 200.

Requirement 2 — Complete 1 of 2 Courses

Psych 310 is a prerequisite for Psych 312R and Psych 313.

PSYCH312R Advanced Methods - Advanced Methods - *You may take once* 3.0

PSYCH313 Psychometrics - Psychometrics 3.0

Requirement 3 — Complete 1 of 3 Courses

PSYCH320 Developmental Psych: Childhood - Developmental Psych: Childhood 3.0

PSYCH321 Develpmntl Psych: Adolescence - Develpmntl Psych: Adolescence 3.0

PSYCH322 Developmental Psych: Adulthood - Developmental Psych: Adulthood 3.0

Requirement 4 — Complete 1 of 2 Courses

PSYCH342 Psychopathology - Abnormal Psychology 3.0

PSYCH343 Child Psychopathology - Child Psychopathology 3.0

Requirement 5 — Complete 3 Courses

PSYCH350 Intro to Social Psychology - Intro to Social Psychology 3.0

PSYCH375 Cognition - Cognition 3.0

PSYCH381 Behavioral Neurobiology - Behavioral Neurobiology 3.0

Requirement 6 — Complete 1 of 2 Courses

Health & Well-being issues courses:

PSYCH349 Intro to Positive Psychology - Intro to Positive Psychology 3.0

PSYCH356 Intro to Health Psychology - Intro to Health Psychology 3.0

Requirement 7 — Complete 1 of 4 Courses

Multicultural issues courses:

ANTHR101 Culture and Human Experience - Culture and Human Experience 3.0

PSYCH305 Multicultural Psychology - Multicultural Psychology 3.0

SFL354 Cross-Cultural Fam & Hum Dev - Cross-Cultural Fam & Hum Dev 3.0

SOC113 Multicultural America - Multicultural America 3.0

Requirement 8 — Complete 1 of 4 Courses

Gender issues courses:

GWS222 Intro Global Women's Studies - Intro Global Women's Studies 3.0

POLI472 Intrnl Political Econ of Women - Intrnl Political Econ of Women 3.0

PSYCH306 Psychology of Gender - Psychology of Gender 3.0

SOC367 Soc of Gender - Soc of Gender 3.0

Requirement 9 —Complete 6 hours

Complete 6 credit hours of elective courses not completed above.

PSYCH305 Multicultural Psychology - Multicultural Psychology 3.0

PSYCH306 Psychology of Gender - Psychology of Gender 3.0

PSYCH311 Critical Issues in Psychology - Critical Issues in Psychology 3.0

PSYCH312R Advanced Methods - Advanced Methods - *You may take once* 3.0

PSYCH313 Psychometrics - Psychometrics 3.0

PSYCH321 Develpmntl Psych: Adolescence - Develpmntl Psych: Adolescence 3.0

PSYCH322 Developmental Psych: Adulthood - Developmental Psych: Adulthood 3.0

PSYCH330 Organizational Psychology - Organizational Psychology 3.0

PSYCH388 Drugs, Reward and Addiction - Drugs, Reward and Addiction 3.0

PSYCH390R Special Topics in Psychology - Special Topics in Psychology - *You may take once* 3.0

SOC W200 Intro to Social Work - Intro to Social Work 3.0

SOC W331 Social Welfare Policy - Social Welfare Policy 3.0

SOC W360 Social Wk Practice/Individuals - Social Wk Practice/Individuals 3.0

Requirement 10 —Complete 1 of 4 Courses

Capstone seminars.

PSYCH410R Capstone: Teaching Assistant - Capstone: Teaching Assistant 1.0v

PSYCH420R Capstone: Comms & Tech - Capstone: Comms & Tech 3.0

PSYCH430R Capstone: Research - Capstone: Research 3.0

PSYCH496R Capstone: Internship - Capstone: Internship 0.5v

To enroll in capstone seminars, students must have completed Requirements 1 and 8. Students must also have 90+ credit hours.

General Studies (BGS): Psychology Emphasis

Program Information

Minimum Credit Hours
33

Maximum Credit Hours
33

Major Academic Plan
MAPS - BGS in General Studies - Psychology 2026-2027.docx

Learning Outcomes

Title
Psychology Theory

Learning Outcome
Identify the major theoretical approaches in psychology & how they apply to human behavior

Title
BGS General Learning Outcome - Aims of a BYU Education

Learning Outcome
Describe how their coursework in the BGS program has contributed to the aims of a BYU education: Spiritually strengthening Character building Intellectually enlarging Preparing for lifelong learning and service.

Title
Human Development

Learning Outcome
Identify the stages of human development & factors that influence it

Title
Psychological Science and the Gospel of Jesus Christ

Learning Outcome
Describe possible connections between psychological science & the principles and values of the restored gospel of Jesus Christ

Program Requirements

Have 27 hours of campus residency.

Complete a minimum of 10 hours in the emphasis after formal admission to the BGS program.

Thirty of the 120 hours including 15 hours in the emphasis must be 300-level or above courses.

Students must earn a minimum 2.0 BYU grade point average, a minimum 2.0 cumulative grade point average, and a minimum 2.0 emphasis grade point average.

The program must be completed in eight years or less.

All emphasis courses taken after admission to BGS must be BYU courses.

Requirement 1 —Complete 1 Course

Prerequisite course (must be completed before taking any other courses, includeds preparing academic plan which must be approved before proceeding):

STDEV100 Essential College Skills - Essential College Skills 1.0

Requirement 2 —Complete 2 Requirements

Core courses:

Requirement 2.1 —Complete 5 Courses

PSYCH111 Psychological Science - Psychological Science 3.0

PSYCH210 History of Psychology - History of Psychology 3.0

PSYCH308 Psychological Statistics - Psychological Statistics 4.0

PSYCH350 Intro to Social Psychology - Intro to Social Psychology 3.0

PSYCH381 Behavioral Neurobiology - Behavioral Neurobiology 3.0

Requirement 2.2 —Complete 1 of 2 Courses

PSYCH320 Developmental Psych: Childhood - Developmental Psych: Childhood 3.0

PSYCH342 Psychopathology - Psychopathology 3.0

Requirement 3 —Complete 11 hours

Complete 11 hours from the following (including any courses not used for core above). BYU undergraduate courses (including Salt Lake Center classes) in psychology may be used to fill emphasis electives.

ANTHR101 Culture and Human Experience - Culture and Human Experience 3.0

PSYCH306 Psychology of Gender - Psychology of Gender 3.0

PSYCH307 Writing Within Psychology - Writing Within Psychology 3.0

PSYCH330 Organizational Psychology - Organizational Psychology 3.0

PSYCH338 Sport Psychology - Sport Psychology 3.0

PSYCH341 Personality - Personality 3.0

PSYCH353 Restored Gospel and Psychology - Latter-day Saint Perspectives 3.0

PSYCH358 Leadership Development - Leadership Development 3.0

PSYCH 361 - Principles of Learning 3.0 - *This course is no longer available*

PSYCH 365 - Motivation 3.0 - *This course is no longer available*

Requirement 4 —Complete 1 Course

Complete a capstone experience (last course to be completed):

STDEV490 BGS Capstone - BGS Capstone 2.0

Sociology (Minor)

Program Information

Minimum Credit Hours
15

Maximum Credit Hours
15

Learning Outcomes

Title
Apply the sociological perspective

Learning Outcome
Students will explain the social dimensions of individuals, families, groups, communities, organizations, and societies, apply sociological theories to individual or collective phenomena, and communicate about them effectively.

Title
Navigate diversity

Learning Outcome
Students will describe a diversity of perspectives on race, class, and/or gender in local and global contexts, apply those perspectives to individual or collective phenomena, and communicate about them effectively.

Program Requirements

Requirement 1 —Complete 1 of 3 Courses

SOC111 Introductory Sociology - Introductory Sociology 3.0

SOC112 Current Social Problems - Current Social Problems 3.0

SOC113 Multicultural America - Multicultural America 3.0

Requirement 2 — Complete 1 of 4 Courses

Social diversity and inequality courses:

SOC222 Intro Global Women's Studies - Intro Global Women's Studies 3.0

SOC322 Class Inequality - Class Inequality 3.0

SOC223 Sociology of Race & Ethnicity - Sociology of Race & Ethnicity 3.0

SOC367 Soc of Gender - Soc of Gender 3.0

Requirement 3 — Complete 9 hours

(No double counting within the minor is allowed). Note: Students interested in a sociology minor that emphasizes the research and analysis component of the major may select among the following courses as electives: Soc 300, 307, 404, or 405. Students are cautioned that Soc 404 and 405 have several prerequisites, which will require additional courses beyond the 15 hour minimum for a minor. Soc 307 is currently open only to majors; students interested in the sociology minor may add the course with the instructor's consent.

NURS333 End-of-Life Care - End-of-Life Care 3.0

SOC222 Intro Global Women's Studies - Intro Global Women's Studies 3.0

SOC300 Methods of Research in Soc - Methods of Research in Soc 3.0

SOC301 Applied Social Rsrch Methods - Applied Social Rsrch Methods 3.0

SOC302 Evaluation Research - Evaluation Research 3.0

SOC307 Data Analysis & Presentation - Data Analysis & Presentation 3.0

SOC310 Social Inquiry - Social Inquiry 3.0

SOC311 Contemporary Soc Theory - Contemporary Soc Theory 3.0

SOC318 Adol Dev Fam & Soc - Adol Dev Fam & Soc 3.0

SOC221 Innovation, AI, and Society - Innovation, AI, and Society 3.0

SOC322 Class Inequality - Class Inequality 3.0

SOC223 Sociology of Race & Ethnicity - Sociology of Race & Ethnicity 3.0

SOC325 Intro to Sociology of Religion - Intro to Sociology of Religion 3.0

SOC326 Sociology of Education - Sociology of Education 3.0

SOC 327 - Soc of LDS Church & People 3.0 - *This course is no longer offered.*

SOC228 Sociology of Sport - Sociology of Sport 3.0

SOC329 Medical Sociology - Medical Sociology 3.0

SOC330 Cultural Sociology - Cultural Sociology 3.0

SOC339 Social Orgnztn & Change - Social Orgnztn & Change 3.0

SOC340 Soc of International Develpmnt - Soc of International Develpmnt 3.0

SOC345 World Populations - World Populations 3.0

SOC350 Intro to Social Psychology - Intro to Social Psychology 3.0

SOC360 Intro to Family Sociology - Intro to Family Sociology 3.0

SOC361 Theoretical Foundations Family - Theoretical Foundations Family 3.0

SOC365 Sociology of Aging - Sociology of Aging 2.0

SOC367 Soc of Gender - Soc of Gender 3.0

SOC370 Urban Sociology - Urban Sociology 3.0

SOC380 Deviance & Social Control - Deviance & Social Control 3.0

SOC283 Juvenile Delinquency - Juvenile Delinquency 3.0

SOC390R Special Topics - Special Topics - *You may take once* 0.5v

SOC399R Academic Internship - Academic Internship - *You may take once* 0.5v

SOC404 Qualitative Research Methods - Qualitative Research Methods 3.0

SOC405 Regression Analysis - Regression Analysis 3.0

SOC420 Understanding Modern Societies - Understanding Modern Societies 3.0

SOC421 Sociology of Organizations - Sociology of Organizations 3.0

SOC422 Inequality & Society - Inequality & Society 3.0

SOC423 Sociology of Immigration - Sociology of Immigration 3.0

SOC424 Political Sociology - Political Sociology 3.0

SOC425 Markets & Society - Markets & Society 3.0

SOC426 Sociology of Work & Occupation - Sociology of Work & Occupation 3.0

SOC450 The Family & Social Change - The Family & Social Change 3.0

SOC455R Senior Experience Part 1 - Senior Experience Part 1 - *You may take once* 3.0

SOC456R Senior Experience Part 2 - Senior Experience Part 2 - *You may take once* 3.0

SOC460 Issues in Family Sociology - Issues in Family Sociology 3.0

SOC481 Crime, Justice, & Corrections - Crime, Justice, & Corrections 3.0

SOC490R Special Topics in Sociology - Special Topics in Sociology - *You may take once* 1.0v

SOC495R Directed Reading in Sociology - Directed Reading in Sociology - *You may take once* 1.0v

SOC497R Directed Research in Sociology - Directed Research in Sociology - *You may take once* 1.0v

MAPS - BA in Sociology 2026-2027.docx

Learning Outcomes

Title
Apply the sociological perspective

Learning Outcome
Graduates will explain the social dimensions of individuals, families, groups, communities, organizations, and societies, apply sociological theories to individual or collective phenomena, and communicate about them effectively.

Title
Navigate diversity

Learning Outcome
Graduates will describe a diversity of perspectives on race, class, and/or gender in local and global contexts, apply those perspectives to individual or collective phenomena, and communicate about them effectively.

Title
Research proficiently

Learning Outcome
Graduates will use qualitative and quantitative research methods (e.g., interviews, focus groups, surveys, coding, statistical modeling), apply them to answer questions, and communicate about them effectively.

Title
Be prepared for post-graduation life

Learning Outcome
Graduates will be ready for graduate school or careers by participating in experiential learning opportunities as students.

Title
Live faithfully

Learning Outcome
Graduates will be prepared spiritually for their personal and professional pursuits by integrating faith and reason in their academic studies.

Program Requirements

The Sociology Department requires a minimum of 24 hours of sociology major courses to be taken in residence at BYU for this degree program. These hours may also go toward BYU's 30-hour residency requirement for graduation.

Requirement 1 —Complete 1 of 3 Courses

Introductory courses (to be completed preferably in sophomore year or earlier):

SOC111 Introductory Sociology - Introductory Sociology 3.0

SOC112 Current Social Problems - Current Social Problems 3.0

SOC113 Multicultural America - Multicultural America 3.0

Requirement 2 —Complete 5 Courses

Core courses:

SOC200 Professional Dev in Sociology - Professional Dev in Sociology 1.0

SOC300 Methods of Research in Soc - Methods of Research in Soc 3.0

SOC307 Data Analysis & Presentation - Data Analysis & Presentation 3.0

SOC310 Social Inquiry - Social Inquiry 3.0

STAT121 Intro to Stat Data Analysis - Intro to Stat Data Analysis 3.0

Note: Students must declare a sociology major before registering for Soc 307; students must complete these four courses with a C- or better grade.

Requirement 3 —Complete 1 of 4 Courses

Diversity courses:

SOC222 Intro Global Women's Studies - Intro Global Women's Studies 3.0

SOC322 Class Inequality - Class Inequality 3.0

SOC223 Sociology of Race & Ethnicity - Sociology of Race & Ethnicity 3.0

SOC367 Soc of Gender - Soc of Gender 3.0

Requirement 4 —Complete 1 of 2 Courses

Advanced methods courses:

SOC404 Qualitative Research Methods - Qualitative Research Methods 3.0

SOC405 Regression Analysis - Regression Analysis 3.0

Requirement 5 —Complete 1 of 2 Options

Complete one of the following options in order to fulfill the GE Advabced Written and Oral Communication requirement:

Option 5.1 —Complete 2 Courses

SOC455R Senior Experience Part 1 - Senior Experience Part 1 - *You may take once* 3.0

SOC456R Senior Experience Part 2 - Senior Experience Part 2 - *You may take once* 3.0

Option 5.2 —Complete 1 Course

WRTG312 Persuasive Writing - Persuasive Writing 3.0

Requirement 6 —Complete 6 hours

SOC420 Understanding Modern Societies - Understanding Modern Societies 3.0

SOC421 Sociology of Organizations - Sociology of Organizations 3.0

SOC422 Inequality & Society - Inequality & Society 3.0

SOC423 Sociology of Immigration - Sociology of Immigration3.0

SOC424 Political Sociology - Political Sociology 3.0

SOC425 Markets & Society - Markets & Society 3.0

SOC426 Sociology of Work & Occupation - Sociology of Work & Occupation 3.0

SOC450 The Family & Social Change - The Family & Social Change 3.0

SOC460 Issues in Family Sociology - Issues in Family Sociology 3.0

SOC481 Crime, Justice, & Corrections - Crime, Justice, & Corrections 3.0

SOC490R Special Topics in Sociology - Special Topics in Sociology - *You may take once* 1.0v

Requirement 7 —Complete 18 hours

Complete 18 credit hours of 300-level or above Sociology courses. (No double counting within the major is allowed.)

Option 7.1 —Complete 18 hours

NURS333 End-of-Life Care - End-of-Life Care 3.0

SOC W200 Intro to Social Work - Intro to Social Work 3.0

SOC222 Intro Global Women's Studies - Intro Global Women's Studies 3.0

SOC301 Applied Social Rsrch Methods - Applied Social Rsrch Methods 3.0

SOC302 Evaluation Research - Evaluation Research 3.0

SOC311 Contemporary Soc Theory - Contemporary Soc Theory 3.0

SOC318 Adol Dev Fam & Soc - Adol Dev Fam & Soc 3.0

SOC221 Innovation, AI, and Society - Innovation, AI, and Society 3.0

SOC322 Class Inequality - Class Inequality 3.0

SOC223 Sociology of Race & Ethnicity - Sociology of Race & Ethnicity 3.0

SOC325 Intro to Sociology of Religion - Intro to Sociology of Religion 3.0

SOC326 Sociology of Education - Sociology of Education 3.0

SOC 327 - Soc of LDS Church & People - *This class is no longer available for registration.* 3.0

SOC228 Sociology of Sport - Sociology of Sport 3.0

SOC329 Medical Sociology - Medical Sociology 3.0

SOC330 Cultural Sociology - Cultural Sociology 3.0

SOC339 Social Orgnztn & Change - Social Orgnztn & Change 3.0

SOC340 Soc of International Develpmnt - Soc of International Develpmnt 3.0

SOC345 World Populations - World Populations 3.0

SOC350 Intro to Social Psychology - Intro to Social Psychology 3.0

SOC360 Intro to Family Sociology - Intro to Family Sociology 3.0

SOC361 Theoretical Foundations Family - Theoretical Foundations Family 3.0

SOC365 Sociology of Aging - Sociology of Aging 2.0

SOC367 Soc of Gender - Soc of Gender 3.0

SOC370 Urban Sociology - Urban Sociology 3.0

SOC380 Deviance & Social Control - Deviance & Social Control 3.0

SOC283 Juvenile Delinquency - Juvenile Delinquency 3.0

SOC390R Special Topics - Special Topics - *You may take once* 0.5v

SOC399R Academic Internship - Academic Internship - *You may take once* 0.5v

SOC404 Qualitative Research Methods - Qualitative Research Methods 3.0

SOC405 Regression Analysis - Regression Analysis 3.0

SOC423 Sociology of Immigration - Sociology of Immigration 3.0

SOC495R Directed Reading in Sociology - Directed Reading in Sociology - *You may take once* 1.0v

SOC497R Directed Research in Sociology - Directed Research in Sociology - *You may take once* 1.0v

SOC524 Politicl Sociology - Politicl Sociology 3.0

SOC525 Sociology of Religion - Sociology of Religion 2.0

SOC 527 - LDS Church&People - *This class is no longer available for registration.* 3.0

SOC528 Sociology of Rural Communities - Sociology of Rural Communities 3.0

SOC565 Individual & Fam in Later Yr - Individual & Fam in Later Yr 3.0

SOC590R Special Topics - Special Topics - *You may take once* 0.5v

SOC595R Directed Readings - Directed Readings - *You may take once* 0.5v

SOC598R Pro-Seminar - Pro-Seminar - *You may take once* 1.0

Students are strongly encouraged to participate in one or two semesters (up to 9 credit hours) of professional experience including academic internships (on-campus, domestic, or international) and research with a faculty member (Soc 497R). Students may apply up to a total of 9 professional experience credit hours toward the sociology elective requirement. Suggested courses include MSB 494R (On-Campus Experiential Projects), IAS 397R (Topics in IAS), IAS 399R (Academic Internship: International), Poli 399R (Academic Internship), Soc 399R (Academic Internship), Soc 497R (Directed Research in Sociology).

Economics (Minor)

Program Information

Minimum Credit Hours
18

Maximum Credit Hours
18

Learning Outcomes

Title
Economic Problem Solving

Learning Outcome
Conceptualize a wide range of constrained optimization problems in economics and related fields and apply formal mathematical analysis to evaluate these problems.

Title
Econometric Analysis

Learning Outcome
Use data to estimate behavioral models, test hypotheses, and measure quantitative relationships; apply mathematical statistics to econometric analysis.

Title
Career Preparation

Learning Outcome
Qualify for careers in economics, business, finance, law, public policy, and related disciplines.

Title
Graduate Studies Preparation

Learning Outcome
Qualify to pursue graduate studies in economics, business, finance, law, public policy, and related disciplines.

Program Requirements

Requirement 1 — Complete 3 Courses

Complete the following with a grade of C- or better.

ECON110 Econ Principles & Problems - Econ Principles & Problems 3.0

ECON380 Intermediate Micro Theory 1 - Intermediate Micro Theory 1 3.0

ECON381 Intermed Macroeconomics - Intermed Macroeconomics 3.0

Econ 378 & 380 require Math 112 as a prerequisite. Math 112 must be completed with a grade of C- or above.

Requirement 2 — Complete 9 hours

ECON199R Academic Internship - Academic Internship - *You may take once* 0.5v

ECON210 Career Prep - Career Prep 1.0

ECON213R Topics Econ Analys - Topics Econ Analys - *You may take once* 0.5v

ECON230 Econ Development & Growth - Econ Development & Growth 3.0

ECON257 Intrnl Trade & Fin - Intrnl Trade & Fin 3.0

ECON378 Statistics for Economists - Statistics for Economists 3.0

ECON382 Intermediate Micro Theory 2 - Intermediate Micro Theory 2 3.0

ECON388 Intro to Econometrics - Intro to Econometrics 3.0

ECON413R Topics in Economic Theory - Topics in Economic Theory - *You may take once* 0.5v

ECON420 Antitrust Law&Reg - Antitrust Law&Reg 3.0

ECON421 Law and Economics - Law and Economics 3.0

ECON431 Economic Development - Economic Development 3.0

ECON432 Economic Growth - Economic Growth 3.0

ECON440 Natrl Resources & Envir Econ - Natrl Resources & Envir Econ 3.0

ECON442 Behavioral Economics - Behavioral Economics 3.0

ECON450 Financial Economics - Financial Economics 3.0

ECON453 Monetary Theory & Policy - Monetary Theory & Policy 3.0

ECON458 International Trade Theory - International Trade Theory 3.0

ECON459 International Monetary Theory - International Monetary Theory 3.0

ECON461 Economics of Education - Economics of Education 3.0

ECON463 Economics of the Labor Market - Economics of the Labor Market 3.0

ECON465 Health Economics - Health Economics 3.0

ECON468 Urban Economics - Urban Economics 3.0

ECON474 Topics in Economic History - Topics in Economic History 3.0

ECON475 Public Economics - Public Economics 3.0

ECON476 Industrial Organization - Industrial Organization 3.0

ECON477 Political Economics - Political Economics 3.0

ECON478 Game Theory & Economics - Game Theory & Economics 3.0

ECON 482 - Welfare Economics - *This course is no longer available for registration and will count only if you completed it while it was offered. Please see your college advisement center for possible substitutions.* 3.0

ECON484 Machine Learning for Econ - Machine Learning for Econ 3.0

ECON 486 - Mathematical Economics - *This course is no longer available for registration and will count only if you completed it while it was offered. Please see your college advisement center for possible substitutions.* 3.0

ECON 488 - Applied Econometrics 3.0

ECON490 Senior Paper - Senior Paper 1.0

ECON498R Readings in Economics - Readings in Economics - *You may take once* 0.5v

ECON580 Advanced Micro Theory 1 - Advanced Micro Theory 1 3.0

ECON581 Adv Macroeconomics - Adv Macroeconomics 3.0

ECON582 Advanced Micro Theory 2 - Advanced Micro Theory 2 3.0

ECON 586 - Adv Mathematics for Economists - *This course is no longer available for registration and will count only if you completed it while it was offered. Please see your college advisement center for possible substitutions.* 3.0

ECON588 Advanced Econometrics - Advanced Econometrics 3.0

Learning Outcomes

Title
Preparation for Graduate Studies

Learning Outcome
Program graduates will be prepared and qualified to pursue graduate studies in economics, business, finance, law, public policy and related disciplines.

Title
Career Preparation

Learning Outcome
Program graduates will be prepared and qualified to pursue careers in economics, business, finance, law, public policy and related disciplines.

Title
Economic Problem Solving

Learning Outcome
Program graduates will be able to conceptualize a wide range of constrained optimization problems in economics and related fields and will be able to apply formal mathematical analysis to evaluate these problems.

Title
Econometric Analysis

Learning Outcome
Program graduates will be able to conduct basic econometric analysis including using data to estimate behavioral models, test hypotheses and measure quantitative relationships; they will have a basic understanding of mathematical statistics that underlies applied econometric analysis.

Program Requirements

Requirement 1 — Complete 1 Requirement

Requirement 1.1 —Complete 1 of 2 Courses

Note: A grade of C- or better is required.

MATH112 Calculus 1 - Calculus 1 4.0

MATH113 Calculus 2 - Calculus 2 4.0

Note 1: Deferred students are encouraged to take a refresher math course such as EngT 295R before or concurrent with Econ 378, 380, or 381.

Note 2: For students contemplating graduate work in economics, the 500-level economics courses plus Math 113, 213, 215, and 314 are strongly recommended.

Note 3: Students may take the Math 112 challenge exam to satisfy the Math 112 requirement. Please visit the Mathematics Department for more information.

Requirement 2 — Complete 1 of 3 Courses

ECON210 Career Prep - Career Prep 1.0

STDEV317 Job Search Strategies - Job Search Strategies 2.0

STDEV318 Graduate School Preparation - Graduate School Preparation 2.0

Requirement 3 —Complete 7 Courses

Complete the following with a grade of C- or better:

ECON110 Econ Principles & Problems - Econ Principles & Problems 3.0

ECON378 Statistics for Economists - Statistics for Economists 3.0

ECON380 Intermediate Micro Theory 1 - Intermediate Micro Theory 1 3.0

ECON381 Intermed Macroeconomics - Intermed Macroeconomics 3.0

ECON382 Intermediate Micro Theory 2 - Intermediate Micro Theory 2 3.0

ECON388 Intro to Econometrics - Intro to Econometrics 3.0

ECON398 Applied Econometrics - Applied Econometrics 3.0

Requirement 4 —Complete 12 hours

Complete 12 credit hours from the following courses:

ECON413R Topics in Economic Theory - Topics in Economic Theory - *You may take 5 times* 0.5v

ECON420 Antitrust Law&Reg - Antitrust Law&Reg 3.0

ECON421 Law and Economics - Law and Economics 3.0

ECON431 Economic Development - Economic Development 3.0

ECON432 Economic Growth - Economic Growth 3.0

ECON440 Natrl Resources & Envir Econ - Natrl Resources & Envir Econ 3.0

Learning Outcomes

Title
Internal Accounting Tools

Tags
174921, 1

Learning Outcome
Construct and use internal accounting tools such as budgets, product cost reports, breakeven analysis, and non-routine decision analyses.

Title
Financial Statements

Tags
174930, 0

Learning Outcome
Construct and interpret a balance sheet and income statement.

Title
Managing Workloads

Tags
174971, 6

Learning Outcome
Manage workload in a self-paced learning environment.

Title
Ethical Dimensions of Business Problems

Tags
174998, 4

Learning Outcome
Intelligently discuss the ethical dimensions of a variety of accounting-related business problems.

Title
Computer-Aided Tools

Tags
175000, 5

Learning Outcome
Use computer-aided learning tools and online learning resources.

Title
Financial Accounting Rules

Tags
175031, 3

Learning Outcome
Apply the financial accounting rules that exist in the following areas: revenue recognition, inventory, compensation, long-term assets, bonds, and leases.

Title
Analyzing Transactions

Tags
175034, 2

Learning Outcome
Analyze transactions, record those transactions, and then use the accounting cycle to generate accounting reports.

- ACC 201 - Principles of Financial Accounting

Note
Offered by BYU Independent Study; enroll anytime throughout the year; one year to complete; additional tuition required; register at is.byu.edu.

Learning Outcomes

Title
Analyzing Transactions

Tags
174928, 2

Learning Outcome
Analyze transactions, record those transactions, and then use the accounting cycle to generate accounting reports.

Title
Computer-Aided Learning Tools

Tags
174953, 5

Learning Outcome
Use computer-aided learning tools and online learning resources.

Title
Managing Workloads

Tags
174974, 6

Learning Outcome
Manage workload in a self-paced learning environment.

Title
Statement of Cash Flows

Tags
174990, 0

Learning Outcome
Construct and interpret a statement of cash flows, including operating cash flows, investing cash flows, and financing cash flows.

Title
Internal Accounting Tools

Tags
175004, 1

Learning Outcome
Construct and use internal accounting tools such as budgets, product cost reports, breakeven analysis, and nonroutine decision analyses.

Title
Ethics in Business

Tags
175008, 4

Learning Outcome
Intelligently discuss the ethical dimensions of a variety of accounting-related business problems.

Title
Financial Accounting Rules

Tags
175010, 3

Learning Outcome
Apply the financial accounting rules that exist in the area of inventory for a manufacturing company.

ACC 241 - Business Law in the Environment

Course Information

Teaching Area (new)
ACC

Course Number
241

Teaching Area
ACC

Course Title
Business Law in the Environment

Course Description
Introduction to legal principles and institutions affecting business.

Department
Accountancy

When Taught
All Semesters/Terms

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Other Prerequisites
Marriott School of Management major status

Note
Also offered by BYU Independent Study; enroll anytime throughout year; one year to complete; additional tuition required; register at is.byu.edu.

Learning Outcomes

Title
Sources, Courts, Jurisdiction, Crimes, and Torts

Tags
175048, 0

Learning Outcome
Demonstrate a working knowledge of and the ability to analyze issues of law applied to relevant facts for the following topics: sources of law, courts and their procedures, jurisdiction, crimes, and torts.

Title
Ethical Principles

Tags
175049, 3

Learning Outcome
Apply ethical principles to legal problems.

Title
Contract Formation, Defects in Agreement, Statue of Frauds, Parole Evidence rule and Third Party Rights

Tags
175050, 1

Learning Outcome
Demonstrate a working knowledge of and the ability to analyze issues of law applied to relevant facts for: contract formation, defects in agreement, the statute of frauds and the parole evidence rule, third party rights, and breach/ remedies.

Title
Agency Formation and Termination, Partnerships, LLC's, Corporate Formation and Operation

Tags
175051, 2

Learning Outcome
Demonstrate a working knowledge of and the ability to analyze issues of law applied to relevant facts for: agency formation and termination, partnerships, LLC's, and corporate formation and operation.

Complete ALL of the following Courses:

- ACC 200 - Principles of Accounting

Note
For non-business majors. Offered by BYU Independent Study; enroll anytime throughout the year; one year to complete; additional tuition required; register at is.byu.edu.

Learning Outcomes

Title
Learning Objective

Tags
175085, 0, 1

Learning Outcome
Construct and interpret both a balance sheet and income statement that include elements more advanced than the basic items typically introduced in the first accounting course.

Title
Learning Objective

Tags
175086, 0, 2

Learning Outcome
Construct and interpret a statement of cash flows.

Title
Learning Objective

Tags
175087, 0, 3

Learning Outcome
Apply the financial accounting rules that exist in the following areas:
a. Revenue recognition
b. Inventory
c. Long-term assets
d. Bonds
e. Leases
f. Stockholders' equity
g. Investment securities

Title
Learning Objective

Tags
175088, 0, 4

Learning Outcome
Employ the time value of money in a financial accounting context.

Title
Learning Objective

Tags
175089, 0, 5

Learning Outcome
Apply managerial accounting concepts in the following areas:
a. Use the concepts of financial leverage and operating leverage to assess a company's riskiness.
b. Perform cost-volume-profit analysis using regresssion to identify the fixed and variable components of a mixed cost and in multiple-product settings.
c. Track product costs through a manufacturing process.
d. identify problems through the use of cost variance analysis.

Title
Learning Objective

Tags
175090, 0, 6

Learning Outcome
Independently manage time and workload for a variety of tasks.

Learning Outcomes

Title
Evaluate Ethical Considerations

Tags
175062, 0, 1

Learning Outcome
Apply ethical considerations to financial reporting issues including understanding of the relevant regulations related to sustainability disclosures (integrity in action).

Title
Tools

Tags
175063, 0, 2

Learning Outcome
Be able to use the FASB Accounting Standards Codification to understand and apply U.S. GAAP (excellence).

Title
Data Analytics

Tags
208227, 0, 4

Learning Outcome
Use innovative data analytic tools to improve financial accounting estimates and the quality of financial information (exposure to cutting edge tools and critical thinking skills).

Title
Teams

Tags
175064, 0, 3

Learning Outcome
Work effectively within a team (Christlike leadership and respect for all).

Title
Apply Financial Accounting Procedures

Tags
175061, 0, 0

Learning Outcome
Apply financial accounting standards and concepts to various business situations (excellence).

Title
Apply the Marriott Values

Learning Outcome
Apply the Marriott Values to class and team interactions to improve learning and the Junior Core experience for yourself and others (Christlike leadership and excellence).

Title
Effective Communication

Learning Outcome
Demonstrate effective communication skills (via class discussion) and the ability to discuss subject matter even in ad hoc discussions for which a formal presentation has not been prepared (i.e., be able to answer questions posed in class) (excellence).

Title
Meet Deadlines

Learning Outcome
Meet regularly scheduled deadlines (excellence).

ACC 405 - Fundamentals of Taxation.

Course Information

Course Number
405

Learning Outcomes

Title
Learning Outcomes

Tags
174956, 0

Learning Outcome
Demonstrate a basic knowledge of fundamental federal income taxation principles

Title
Learning Outcomes

Tags
174999, 3

Learning Outcome
Demonstrate working skills in using information technologies commonly expected of entry level professionals in taxation

Title
Learning Outcomes

Tags
175002, 1

Learning Outcome
Work effectively in groups to solve unstructured tax problems related to taxation.

Title
Learning Outcomes

Tags
175021, 2

Learning Outcome
Demonstrate an ability to communicate at a professional level in both writing and verbal presentations.

ACC 406 - Financial Statement Auditing

Course Information

Teaching Area (new)
ACC

Course Number
406

Teaching Area
ACC

Course Title
Financial Statement Auditing

Course Description
This course develops and uses a framework for making judgments in a financial statement auditing context. The audit judgment framework includes a deep understanding of concepts such as the audit risk model, audit evidence, audit sampling and others. This framework is applied to most of the financial statement accounts found in a typical business including revenue, receivables, payables, inventory, fixed assets and other accounts. Other topics covered include professional ethics for accountants and the legal and professional environment affecting financial statement audits.

Department
Accountancy

When Taught
Fall

Credit Hours

Min:
3

Fixed/Max:

Learning Outcomes

Title
Key Concepts

Tags
175111, 0

Learning Outcome
Identify, define and apply the key concepts related to the financial statement auditing process and the audit of internal control

Title
Auditing Process

Tags
175113, 2

Learning Outcome
Combine knowledge of the auditing process with analytical reasoning to reach justifiable auditing decisions.

Title
Audit Strategies

Tags
175114, 3

Learning Outcome
Develop audit strategies for several of the major financial statement cycles

Title
Professional Ethics

Tags
175115, 4

Learning Outcome
Identify, define and apply the basic concepts underlying professional ethics

Title
Audit Practice

Tags
175112, 0, 1

Learning Outcome
Perform basic audit analyses using software used in audit practice

Title
Auditors Environment

Tags
175116, 0, 5

Learning Outcome
Identify and define the primary components of the environment in which auditors operate.

ACC 407 - Accounting Technology

Course Information

Teaching Area (new)
ACC

Course Number
407

Teaching Area
ACC

Course Title
Accounting Technology

Course Description
Develop skills and abilities to use current technologies in accounting. Learn new ways of thinking to enhance technological readiness.

Department
Accountancy

When Taught
Winter

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Learning Outcomes

Title
Responsible use of Technology

Learning Outcome
Exercise wisdom and discernment in the use of emerging accounting technologies, developing the capacity to employ them responsibly and with integrity.

Title
Database Querying

Learning Outcome
Design, organize, and query accounting data to reveal insights and meaning.

Title
Clean Data

Learning Outcome
Bring coherence to complex and messy accounting data in ways that reflect both intellectual rigor and integrity.

Title
Learning for service to others

Learning Outcome
Develop technology skills that serve both professional success and Christ-centered discipleship, using them to bless individuals, strengthen communities, and advance the work of the Lord.

ACC 408 - Critical Thinking in Accounting

Course Information

Teaching Area (new)
ACC

Course Number
408

Teaching Area
ACC

Course Title
Critical Thinking in Accounting

Course Description
Equip students with relevant critical thinking and professional judgment knowledge and skills to think critically and evaluate information objectively using approaches such as structured problem solving, research and analysis, design thinking, and good judgment processes.

Department
Accountancy

When Taught
Winter Term 1.

Credit Hours

Min:
1.5

Fixed/Max:
1.5

Lecture Hours

Fixed:
1.5

Lab Hours

Fixed:
0

Other Prerequisites
Admission to School of Accountancy.

Learning Outcomes

Title
Structured Problem Solving

Learning Outcome
Students will be able to explain the components of good judgment in accounting and apply judgment frameworks to solve problems relevant to accounting professionals.

Title
Bias Mitigation

Learning Outcome
Students will be able to identify, explain, and mitigate biases that can affect even the most experienced accounting professionals during the decision-making process and be able to identify biases that are particularly problematic in an accounting context.

Title
Judgment Perspectives

Learning Outcome
Students will be able to apply the power of different judgment frames to achieve success in decision making as future accounting professionals.

Title
Mental Models

Learning Outcome
Students will be able to apply several basic mental models helpful to problem solving in accounting and decide which model should be used in a given scenario.

Title
Group Judgment

Learning Outcome
Students will be able to identify and explain the pitfalls of group judgment in the context of an audit "fraud brainstorming" meeting, and apply techniques to increase the effectiveness of group decision making in an accounting context.

ACC 409 - Integrated Topics in Accounting

Course Information

Teaching Area (new)
ACC

Passing grade in ACC 401, ACC 403, ACC 406.

Learning Outcomes

Title
Team Strategy

Learning Outcome
Work in a team setting to define a strategy for addressing a complex issue, make assignments, document the preparation and review of work, come to agreement, and summarize findings and conclusions.

Title
Synthesize Learnings

Learning Outcome
Synthesize learnings from independent Junior Core courses to facilitate understanding of complex issues and identify intersections of the knowledge obtained.

Title
Qualitative and Quantitative Description

Learning Outcome
Describe, both qualitatively and quantitatively, the uncertainty associated with fair value measurements used in accounting.

Title
Common Methods of Valuation

Learning Outcome
Use basic methods of valuation such as discounted cash flow analysis and identify the key assumptions that impact any estimate of fair value, the impacts on accounting, and decision usefulness and auditability.

Title
Recommendation Writing and Presentation

Learning Outcome
Provide specific, well-supported findings and recommendations, both in writing and in a professional meeting in situations such as the following: A. Findings of assurance or attest engagements B. Impairment assessment of a business C. Identification of accounting issues and opportunities in a business setting.

Title
Increase Faith in Jesus Christ and His Gospel

Learning Outcome
Identify how principles of accounting illustrate or illuminate principles of the gospel and their application to our personal journey's of faith in Jesus Christ.

Learning Outcomes

Tags
174933, 0, 2

Learning Outcome
Develop the ability to apply tools from the philosophy of science to effectively critique actual research papers.

Title
Learning Outcomes

Tags
174929, 0, 3

Learning Outcome
Communicate complex topics relating to academic research both orally and in writing.

ACC 517 - Academic Archival Research Design

Course Information

Teaching Area (new)
ACC

Course Number
517

Teaching Area
ACC

Course Title
Academic Archival Research Design

Course Description
Accounting research using archival methodologies. Focus on reading, interpreting, critiquing, and designing archival research. Designed for those planning to enter a PhD program.

Department
Accountancy

When Taught
Winter

Credit Hours

Min:
1.5

Fixed/Max:
1.5

Lecture Hours

Fixed:
1.5

Lab Hours

Fixed:
0

Other Prerequisites
SOA director's consent.

Recommended
Acc 516; Acc 518

Learning Outcomes

Title
Program

Tags
174962, 0, 0

Learning Outcome
Program in SAS

Title
Extract Data

Tags
174920, 0, 1

Learning Outcome
Extract data from the Compustat and CRSP databases

Title
Research

Tags
175041, 0, 2

Learning Outcome
Perform archival academic research

ACC 518 - Academic Experimental Research Design

Course Information

Teaching Area (new)
ACC

Course Number
518

Teaching Area
ACC

Course Title
Academic Experimental Research Design

Course Description
In-depth study of accounting research using experimental methodologies. Focus on reading, interpreting, critiquing, and designing experimental research. Designed for those planning to enter a PhD program.

Department
Accountancy

When Taught
Winter

Credit Hours

Min:
1.5

Fixed/Max:
1.5

Lecture Hours

Fixed:
1.5

Lab Hours

Fixed:
0

Other Prerequisites
SOA director's consent.

Learning Outcomes

Title
Become Better

Tags
208228, 0, 1

Learning Outcome
Be better spiritually and professionally.

Title
Experimental Accounting Research

Tags
208229, 0, 2

Learning Outcome
Understand the basics of experimental accounting research, including: terminology, design, and major areas of research.

Title
Research Ideas

Tags
208230, 0, 3

Learning Outcome
Demonstrate the ability to generate and articulate research ideas

Title
Develop Proposals

Tags
208231, 0, 4

Learning Outcome
Develop experimental research proposals and instruments.

Title
Academic Careers

Tags
208232, 0, 5

Learning Outcome
Improve their knowledge and understanding of doctoral study and academic careers.

ACC 522 - Advanced Taxation

Course Information

Teaching Area (new)
ACC

Course Number
522

Teaching Area
ACC

Course Title
Advanced Taxation

Course Description
Tax laws as they apply to selected tax entities, with an introduction to tax research methodology.

Department
Accountancy

When Taught
Fall

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Other Prerequisites
Marriott School Graduate Core

Learning Outcomes

Title
Business Entities

Tags
174970, 0, 0

Learning Outcome
Describe and discuss important tax and nontax factors involved in selecting the entity type for a particular business.

Title
Book-Tax Differences

Tags
175029, 0, 1

Learning Outcome
Determine common corporate book-tax differences in accounting for various corporate transactions and reconcile the book and taxable income of a corporation.

Title
Tax Provision

Tags
174979, 0, 2

Learning Outcome
Compute a corporation's income tax provision under the ASC 740 rules and understand the proper financial statement disclosure for a corporation's income tax expense related items.

Title
Flow-Through Entities

Tags
174932, 0, 3

Learning Outcome
Describe and discuss important tax and nontax issues relevant to corporate and flow-through entities.

ACC 523 - Tax Research Methodology

Course Information

Teaching Area (new)
ACC

Course Number
523

Teaching Area
ACC

Course Title
Tax Research Methodology

Course Description
In-depth treatment of research and procedures emphasizing communication and presentation of findings.

Department
Accountancy

When Taught
Fall

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
6

Other Prerequisites
Admission to MAcc

Learning Outcomes

Title
Research

Tags
175037, 0, 0

Learning Outcome
Research tax questions using resource databases.

Title
Tax Law

Tags
175014, 0, 1

Learning Outcome
Interpret/apply tax law.

Title
Communication

Tags
175035, 0, 2

Learning Outcome
Communicate with clients and supervisors.

ACC 525 - Advanced Accounting Analytics - Professional

Course Information

Teaching Area (new)
ACC

Course Number
525

Teaching Area
ACC

Course Title
Advanced Accounting Analytics - Professional

Course Description
Build foundational skills in advanced data analytic tools and techniques including obtaining, modifying and analyzing data; understanding statistical concepts in accounting settings; and making data-driven decisions.

Department
Accountancy

When Taught
Fall.

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

0

Other Prerequisites
Admission to MAcc.

Learning Outcomes

Title
Build Zion

Tags
174922, 0

Learning Outcome
Build Zion by becoming better spiritually and professionally.

Title
Database

Tags
175022, 1

Learning Outcome
Demonstrate proficiency in building and using a basic database.

Title
Data Visualization

Tags
174976, 2

Learning Outcome
Demonstrate proficiency in using software to visualize data.

Title
RPA

Tags
175013, 3

Learning Outcome
Understand and have the ability to create bots (i.e., robotic process automation).

ACC 526 - Advanced Accounting Analytics for Tax

Course Information

Course Number
526

Teaching Area
ACC

Course Title
Advanced Accounting Analytics for Tax

Course Description
Apply an analytic mindset to problems. Learn advanced data analytic tools and techniques including extracting, transforming, and loading data; querying databases; visualizing data; and applying statistical concepts in accounting settings.

Department
Accountancy

When Taught
Fall

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Other Prerequisites
Admission to the MAcc.

Learning Outcomes

Title
Build Zion

Learning Outcome
Build Zion by becoming better spiritually and professionally.

Title
Database

Learning Outcome
Build and use a basic database.

Title
Data Visualization

Learning Outcome
Demonstrate proficiency in using software to visualize data.

Title
Robotic Process Automation

Learning Outcome
Develop the ability to create bots (i.e. robotic process automation).

ACC 530 - Advanced Financial Statement Auditing

Course Information

Teaching Area (new)
ACC

Course Number
530

Teaching Area
ACC

Course Title
Advanced Financial Statement Auditing

Course Description
Accounting methodology, professional auditing standards, and current issues.

Department
Accountancy

When Taught
Fall

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Other Prerequisites
Admission to MAcc; Acc 515 or equivalent

Learning Outcomes

Title
Auditing Concepts

Tags
175020, 0, 0

Learning Outcome
Use auditing concepts and variables (e.g., client acceptance, risk assessment, materiality, understanding and testing of internal controls, analytical procedures, substantive audit testing, documentation of evidence, and completing an audit engagement) to make audit planning, testing, and evaluation decisions.

Title
Application of Concepts

Tags
174943, 0, 1

Learning Outcome
Apply auditing and assurance concepts to real-world case studies.

Title
Sampling

Tags
174966, 0, 2

Learning Outcome
Apply statistical sampling concepts to auditing tests of controls, transactions, and balances.

Title
Audit Software

Tags
174960, 0, 3

Learning Outcome
Demonstrate basic proficiency with an auditing software package that is widely used in practice.

Title
Teams

Tags
174911, 0, 4

Learning Outcome
Collaborate in teams to solve problems and present findings in both written and oral forms.

Title
Current Issues

Tags
174963, 0, 5

Learning Outcome
Examine issues currently facing the profession (e.g., regulation, new standards, fair value, legal liability, independence, competition, new services)

Title
Ethical dilemmas

Tags
175030, 0, 7

Learning Outcome
Deliberate on the spiritual and ethical implications of dilemmas faced by accounting professionals.

Title
Professional Judgment

Tags
175032, 0, 6

Learning Outcome
Examine characteristics of good professional judgment as well as common threats to good judgment.

ACC 531 - Advanced Management Accounting

Course Information

Teaching Area (new)
ACC

Course Number
531

Teaching Area
ACC

Course Title
Advanced Management Accounting

Course Description
Advanced concepts, including the role of accounting in strategic and operational decision-making.

Department
Accountancy

When Taught
Winter Term 1.

Credit Hours

Min:
1.5

Fixed/Max:
1.5

Lecture Hours

Fixed:
1.5

Lab Hours

Fixed:
0

Other Prerequisites
Marriott School Graduate Core; Acc 515 or equivalent.

Learning Outcomes

Title
Unstructured settings

Tags
174936, 0, 0

Learning Outcome
Use management accounting knowledge and research skills to recommend a costing approach in an unstructured setting.

Title
OROS Quick Software

Tags
175024, 0, 1

Learning Outcome
Use OROS Quick Software to build an activity-based cost system.

Title
Activity-Based Costing

Tags
174919, 0, 2

Learning Outcome
Assess customer profitability and revenue management using activity-based costing

Title
Theory of Constraints

Tags
175033, 0, 3

Learning Outcome
Use theory of constraints to analyze business processes

Title
Communication

Tags
174912, 0, 4

Learning Outcome
Communicate the results of analysis verbally and in writing

Title
Teams

Tags
175039, 0, 5

Learning Outcome
Work well in teams

ACC 532 - Sustainability Reporting for Accountants

Course Information

Course Number
532

Teaching Area
ACC

Course Title
Sustainability Reporting for Accountants

Course Description
Explore worldwide sustainability trends and essential non-financial metrics for environmental, social, and governance frameworks and reporting requirements. Develop skills in accounting for and reporting of sustainable practices to add value and meet shifting market needs.

Department
Accountancy

When Taught
Fall

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Learning Outcomes

Title
Develop Christlike leadership qualities

Learning Outcome
Students will gain an increased awareness of commitment to personal stewardship over the earth and its inhabitants.

Title
Sustainability Concepts

Learning Outcome
Students will be able to discuss fundamental principles and concepts of sustainability in business practices.

Title
Stakeholder Perspectives

Learning Outcome
Students will be able to Infer and analyze the diverse perspectives of stakeholders related to sustainability to make informed accounting decisions that balance the interests of all. regulatory bodies, to make informed accounting decisions that balance the interests of all relevant parties.

Title
Measurement of Sustainability Related Disclosures

Learning Outcome
Students will be able to recognize the challenges of identifying measurable metrics management to evaluate the governance, environmental and social impacts of business operations, using relevant indicators and reporting frameworks.

Title
Integrating Sustainability into Accounting Practices

Learning Outcome
Students will be able to incorporate sustainability factors into traditional accounting processes.

ACC 540 - Advanced Professional Financial Accounting

Course Information

Teaching Area (new)
ACC

Course Number
540

Teaching Area
ACC

Course Title
Advanced Professional Financial Accounting

Course Description
Advanced financial accounting topics including pensions, earnings per share, accounting changes, and deferred income taxes.

Department
Accountancy

When Taught
Winter

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Learning Outcomes

Title
Assessment

Tags
174986, 0, 0

Learning Outcome
Assess firm strategy, profitability, financial position, credit risk, and earnings quality.

Title
Forecasting

Tags
175028, 0, 1

Learning Outcome
Forecast financial performance and to build pro forma financial statements.

Title
Valuation Models

Tags
174954, 0, 2

Learning Outcome
Understand and implement common accounting-based valuation models.

ACC 542 - Measurement in Accounting

Course Information

Teaching Area (new)
ACC

Course Number
542

Teaching Area
ACC

Course Title
Measurement in Accounting

Course Description
Case-based course that examines measurement issues in accounting. Focuses on techniques and approaches used in practice for measuring financial instruments, acquisitions, revenue recognition, and asset impairments, among others. Also focuses on measurements used by entities to report Environmental-Social-Governance (ESG) and Sustainability matters.

Department
Accountancy

When Taught
Winter

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Simple Requisites

Prerequisites

Type
Prerequisite

Prerequisites

Complete ALL of the following Courses:

- ACC 515 - Accounting Research Seminar
  AND ACC 530 - Advanced Financial Statement Auditing

Other Prerequisites
Admission to MAcc

Learning Outcomes

Title
Measurement

Tags
213308, 0, 1, 2023-08-28 12:55:14

Learning Outcome
Improve their understanding of measurement concepts and how they apply to accounting situations.

Title
Alternative measurement

Tags
213309, 0, 2, 2023-08-28 12:55:16

Learning Outcome
Recognize, evaluate, compare, and generate alternative measurement attributes that could reasonably be used in real-world situations under current financial reporting standards..

Title
Implement Measurement

Tags
213310, 0, 3, 2023-08-28 12:55:18

Learning Outcome
Implement measurement approaches in common scenarios such as revenue recognition, goodwill, allocation of purchase prices in acquisitions, asset impairment, fair value measurements, stock compensation, securitization models, loan loss reserves, and relief from royalty.

Title
Measurement Approaches

Tags
213311, 0, 4, 2023-08-28 12:55:20

Learning Outcome
Examine and critique measurement approaches used in ESG and Sustainability reporting frameworks.

ACC 545 - International Accounting and Multinational Enterprises

Course Information

Teaching Area (new)
ACC

Course Number
545

Teaching Area
ACC

Course Title
International Accounting and Multinational Enterprises

Course Description
Accounting from an international perspective: flow of information in multiple currencies, complying with reporting requirements, setting budgets and monitoring performance, and controlling corporate assets through reports and audits.

Department
Accountancy

When Taught
Spring Term

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Learning Outcomes

Title
Convergence forces

Tags
174916, 1

Learning Outcome
Describe the forces of convergence of accounting standards

Title
Compare GAAP and IFRS

Tags
174964, 3

Learning Outcome
Compare U.S. GAAP and IFRS for the following accounting issues: intangibles, consolidation, segment reporting, and foreign currency transactions and translation.

Title
MNEs

Tags
174965, 4

Learning Outcome
Explain how MNEs deal with the issue of foreign exchange risk management, corporate governance, performace evaluation and control, auditing, and taxation.

Title
Accounting differences

Tags
174993, 0

Learning Outcome
Identify the major reasons accounting differs around the world.

Title
IFRS pros and cons

Tags
175009, 2

Learning Outcome
Evaluate the pros and cons of adopting IFRS for financial reporting in capital markets worldwide.

ACC 550 - Forensic Accounting and Fraud Examination

Course Information

Teaching Area (new)
ACC

Course Number
550

Teaching Area
ACC

Course Title
Forensic Accounting and Fraud Examination

Course Description
Use hands-on cases to 1) develop a forensic mindset and 2) implement data analytics in forensic accounting settings, including financial statement fraud.

Department
Accountancy

When Taught
Winter

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Learning Outcomes

Title
Forensic Accounting Discovery

Tags
213312, 0, 1, 2023-08-28 12:55:28

Learning Outcome
Explain principles, concepts, and tools specific to forensic accounting.

Title
Malfeasance Discovery

Tags
213313, 0, 2, 2023-08-28 12:55:29

Learning Outcome
Employ the methods used by forensic accountants to prevent and detect malfeasance and understand risk.

Title
Understand Forms of Malfeasance

Tags
213314, 0, 3, 2023-08-28 12:55:32

Learning Outcome
Explain forms of malfeasance and risk in the accounting setting.

Title
Prevention and Detection of Financial Statement Fraud

Learning Outcome
Demonstrate how to prevent and detect financial statement fraud.

ACC 551 - Risk Assurance and Information Technology Audit

Course Information

Course Number
551

Teaching Area
ACC

Course Title
Risk Assurance and Information Technology Audit

Course Description
Provide an introduction to IT infrastructure and controls/processes to mitigate security and financial risks associated with IT management. Assists in preparing students for the 2024 CPA exam “Information Systems and Controls (ISC)”.

Department
Accountancy

When Taught
Winter

Credit Hours

Fixed/Max:
1.5

Lecture Hours

Fixed:
1.5

Learning Outcomes

Title
IT risks

Tags
213316, 0, 1, 2023-08-28 13:17:08

Learning Outcome
Identify common information technology (IT) risks that threaten financial integrity and security.

Title
Process development

Tags
213317, 0, 2, 2023-08-28 13:17:15

ACC 552 - Introduction to Cyber Risk Assessment in Accounting

Course Information

Course Number
552

Teaching Area
ACC

Course Title
Introduction to Cyber Risk Assessment in Accounting

Course Description
Introduction to cyber risks and mitigations in accounting from a hacker's point of view. Assists in preparing students for the 2024 CPA exam “Information Systems and Controls (ISC)”.

Department
Accountancy

When Taught
Winter

Credit Hours

Fixed/Max:
1.5

Lecture Hours

Fixed:
1.5

Learning Outcomes

Title
OIT threats

Tags
213319, 0, 1, 2023-08-28 13:24:32

Learning Outcome
Describe threats and attacks from both offensive (hacker/black hat) and defensive (organizational IT) points of view.

Title
Security risk

Tags
213320, 0, 2, 2023-08-28 13:24:33

Learning Outcome
Identify potential for IT security risk based on real-world scenarios.

Title
Assessment

Tags
213321, 0, 3, 2023-08-28 13:24:35

Learning Outcome
Assess IT security risk using qualitative and quantitative means.

Title
Presentation

Tags
213322, 0, 4, 2023-08-28 13:24:36

Learning Outcome
Present and discuss IT risks to a simulated board / C-suite.

Title
CPA topics

Tags
213323, 0, 5, 2023-08-28 13:24:39

Learning Outcome
Identify “Information Systems and Controls” (ISC) topics covered in the CPA exam.

ACC 553 - Applied Accounting Technology

Course Information

Course Number
553

Teaching Area
ACC

Course Title
Applied Accounting Technology

Course Description
Deepen understanding of the application of technology to perform, document, test, attest, and automate accounting procedures and controls through hands-on use of industry leading and emerging technologies.

Department
Accountancy

When Taught
Spring Term

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Other Prerequisites
Admission to School of Accountancy

Learning Outcomes

Title
Applying Technology to Accounting

Learning Outcome
Demonstrate the application of technology to accounting procedures and controls.

Title
Understanding of Accounting Automation

Learning Outcome
Explain steps to automate manual accounting procedures and controls.

Title
Awareness of Emerging Technologies

Learning Outcome
Synthesize emerging technologies and the applications to accounting procedures and controls.

Title
Accounting Technology Selection

Learning Outcome
Specify how to select and apply the appropriate technology to effectively solve business problems.

ACC 554 - Enterprise Resource Planning in Accounting

Course Information

Course Number
554

Teaching Area
ACC

Course Title
Enterprise Resource Planning in Accounting

Course Description
Hands-on experience with ERP systems and user applications of key business functions. Students will learn the logic of how to use ERP systems to create budgets, analyze variances, close the books, and generate and interpret management reports.

Department
Accountancy

When Taught
Fall

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Other Prerequisites
Admission to School of Accountancy

Learning Outcomes

Title
Entering and Storing Data within an ERP

Learning Outcome
Students will be able to explain how financial data is entered and stored in an ERP system to facilitate research tasks.

Title
Contrasting and Comparing Various ERP systems

Learning Outcome
Students will be able to identify the similarities and differences and the strengths and weaknesses of various ERP systems.

Title
Developing Budgets

Learning Outcome
Students will be able to develop budgets, run reports, and research variances in ERP systems.

Title
Utilizing ERP Reports to Accomplish Business Functions

Learning Outcome
Students will be able to work with ERP reports effectively to accomplish various capacities in the profession via hands-on experiences.

Title
ERP System Type Discovery

Learning Outcome
Students will be able to utilize different ERP systems they will likely encounter in various capacities in the profession via hands-on experiences.

ACC 555 - Applied Accounting Analytics

Course Information

Teaching Area (new)
ACC

Course Number
555

Teaching Area
ACC

Course Title
Applied Accounting Analytics

Course Description
Apply advanced data analytic tools and techniques including obtaining, modifying and analyzing data; applying statistical concepts in accounting settings; and making data-driven decisions in complex business scenarios.

Department
Accountancy

When Taught
Fall

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Other Prerequisites
Admission to MAcc

Learning Outcomes

Title
Identify the target audience

Learning Outcome
Identify the target audience. Learn techniques for data preparation, formatting and cleaning. Use visual data exploration methods to understand data.

Title
Identify appropriate business analytics methods

Learning Outcome
Identify appropriate business analytics methods given the requirements and constraints imposed by the data and the principle questions. Communicate findings with clarity, accessibility and readability.

Title
Identify patterns

Learning Outcome
Learn to identify patterns, trends, and differences from data across categories, space, and time.

Title
Communication

Learning Outcome
Tell stories with data that connect with your audience.

Title
Technical competency

Learning Outcome
To develop students' technical competency in business analytics.

ACC 556 - Database Analysis and Design

Course Information

Teaching Area (new)
ACC

Course Number
556

Teaching Area
ACC

Course Title
Database Analysis and Design

Course Description
Concepts and techniques of database system development. Focal areas include: structures, integrity, retrieval, manipulation, validation and analysis.

Department
Accountancy

When Taught
Fall

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Other Prerequisites
Admission to a Marriott School graduate program

Learning Outcomes

Title
Analyze Data and Propose Structures

Tags
175100, 0

Learning Outcome
Analyze data requirements and propose data structures to meet these requirements.

Title
Database Calls

Tags
174945, 0, 1

Learning Outcome
Integrated database calls into simple applications.

Title
Data Structures

Tags
174941, 0, 2

Learning Outcome
Extract, transform and present data from data structures

ACC 557 - Management Consulting and Projects

Course Information

Teaching Area (new)
ACC

Course Number
557

Teaching Area
ACC

Course Title
Management Consulting and Projects

Course Description
Projects-oriented course where students get hands-on experience performing consulting jobs for businesses in Utah. Class includes both in-class instruction and business experience.

Department
Accountancy

When Taught
Fall

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Other Prerequisites
Admission to MAcc

Learning Outcomes

Title
Management Consulting

Tags
174957, 0, 0

Learning Outcome
Identify the field of management consulting and the role of a management consultant.

Title
Tools and Techniques

Tags
174924, 0, 1

Learning Outcome
Learn the tools and techniques used during a consulting engagement; including diagnosis, planning, and problem solving.

Title
Consulting Skills

Tags
174918, 0, 2

Learning Outcome
Apply management consulting skills to consulting situations.

Title
Team

Tags
174926, 0, 3

Learning Outcome
Contribute to your project team through timely communication and assuming responsibility for your assigned role.

Title
Communication

Tags
175036, 0, 4

Learning Outcome
Demonstrate through a final written and oral report to the client that you are able to communicate effectively, both orally and in writing.

Title
Ethical Principles

Tags
174950, 0, 5

Learning Outcome
Understand and apply ethical principles to consulting situations.

ACC 558 - Accounting Technology Hub

Course Information

Course Number
558

Teaching Area
ACC

Course Title
Accounting Technology Hub

Course Description
Develop and post technology challenges on TechHub.training, focusing on essential accounting tools such as Excel, Alteryx, and Tableau. Engage in peer mentoring, enhance technical writing, communication skills, and website design for a global audience.

Department
Accountancy

When Taught
Fall and Winter

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Learning Outcomes

Title
Community Resource

Learning Outcome
Develop and add to a free, publicly-available community resource that helps others in the community with technology skills.

Title
Technology Skills

Learning Outcome
Demonstrate increased skill sets in accounting technologies.

Title
Writing and Communication Skills

Learning Outcome
Demonstrate effective technology writing and verbal communication skills.

ACC 559 - Corporate Governance

Course Information

Course Number
559

Teaching Area
ACC

Course Title
Corporate Governance

Course Description
How corporate boards are led, focusing especially on the role of the director, the rights of shareholders, the compensation of executives, and the challenge boards face in balancing the needs of shareholders, managers, and other stakeholders.

Department
Accountancy

When Taught
Winter

Credit Hours

Min:
3

Lecture Hours

Fixed:
3

Learning Outcomes

Title
Mapping the corporate governance landscape

Learning Outcome
Demonstrate an understanding of corporate governance issues, shareholder rights, shareholder advocacy firms and how they affect corporations in America and other countries.

Title
Decision making on corporate boards

Learning Outcome
become familiar with and be able to make corporate board decisions regarding corporate governance, legal issues, executive compensation, financial oversight, financing issues, and business strategy.

Title
Structure of Organizations

Learning Outcome
Understand systems thinking in corporate governance

Title
Critical Skill Development

Learning Outcome
Become familiar with and develop critical skills that will make you a successful professional in dealing with corporate governance

Title
Boards of Directors

Learning Outcome
Know how boards of directors and boards of advisors function and how they provide oversight of and advisory services to management.

ACC 560 - Special Problems in Federal Taxation

Course Information

Simple Requisites

Prerequisite

Type
Prerequisite

Complete ALL of the following Courses:
- ACC 561 - Corporate Taxation 1

Learning Outcomes

Title
Solutions to tax issues

Tags
175096, 1

Learning Outcome
Generate a reasonable solution to various tax issues and substantiate the solution with relevant tax authority.

Title
Corporate formations, liquidations, acquisitions, and divestitures

Tags
175102, 0

Learning Outcome
Identify relevant issues relating to corporate formations, liquidations, taxable and tax deferred corporate acquisitions, and corporate divestitures when given various data-rich scenarios.

Title
Teamwork

Tags
175103, 2

Learning Outcome
Work effectively with a team to practice responding, given support from a tax-expert, to a real-world restructuring scenario.

Title
Professional Presentation

Tags
175104, 3

Learning Outcome
Deliver a professional presentation of a restructuring plan to a client in a way that makes complex issues understandable and that demonstrates an ability to think independently.

Title
Federal Tax Income

Tags
174946, 0, 0

Learning Outcome
Properly compute an individual's federal taxable income and alternative minimum taxable income.

Title
Individual Federal Tax Liability

Tags
175038, 0, 1

Learning Outcome
Properly compute an individual's federal income tax liability, self-employment tax liability, and alternative minimum tax liability.

Title
Tax Underpayment Penalty

Tags
174967, 0, 3

Learning Outcome
Determine the amount of a taxpayer's estimated tax underpayment penalty.

Title
Tax Consequences of Investments

Tags
174913, 0, 4

Learning Outcome
Determine the tax consequences of various types of investments and investment expenses, including investment interest expense.

Title
Gift and Estate Tax Liability

Tags
174917, 0, 5

Learning Outcome
Determine a taxpayer's federal gift and estate transfer tax liability

Title
Retirement Plans

Tags
208233, 0, 6

Learning Outcome
Determine taxpayer's allowed contributions to various retirement plans and provide tax relevant advice to taxpayers about dealing with retirement plans.

ACC 566 - Tax Accounting Methods and Accounting for Income Taxes

Course Information

Teaching Area (new)
ACC

Course Number
566

Teaching Area

Learning Outcomes

Title
Understand the Healthcare Industry

Tags
214708, 0, 1

Learning Outcome
Demonstrate an understanding of the various components of the healthcare industry

Title
Apply Functional Specialties to Healthcare

Tags
214709, 0, 2

Learning Outcome
Apply functional specialties to challenges specific to the healthcare industry

Title
Work in Teams

Tags
214710, 0, 3

Learning Outcome
Demonstrate an ability to function in a team setting

Title
Articulate Healthcare Industry Complexities

Tags
214711, 0, 4

Learning Outcome
Articulate the most important complexities of the healthcare industry

9

Other Prerequisites
Internship coordinator's consent

Note
An APPROVED Internship Application is required before adding.

Learning Outcomes

Title
Networking

Tags
174934, 3

Learning Outcome
Network with professionals and identify possible mentors.

Title
Enrich future course work

Tags
174935, 4

Learning Outcome
Return with experiences that will enrich future course work.

Title
Accounting Career Opportunities

Tags
174977, 1

Learning Outcome
Explore and obtain information on accounting career opportunities.

Title
Theory in business courses

Tags
175001, 2

Learning Outcome
Expand upon the theory and concepts taught in accounting and business courses.

Title
Role of accounting and finance in business

Tags
175023, 0

Learning Outcome
Learn through experience the role of accounting and finance in business.

ACINT 199R - Academic Internship

Learning Outcomes

Title
Research and Writing

Tags
191336, 11

Learning Outcome
Form a research strategy, independently locate relevant digital and print sources, and draw upon these to develop an effective written argument pertinent to the literature and cultures of the American West.

Title
Writing

Tags
191337, 14

Learning Outcome
Produce polished, competent, formal writing, free from distracting errors in mechanics, syntax, and formatting, and in accordance with MLA formatting and citation guidelines.

Title
One

Tags
199826, 1

Learning Outcome
Students will be able to cite major texts of western American literature and theory to support logical arguments about western literature and culture.

Title
Two

Tags
199833, 2

Learning Outcome
Students will be able to place a variety of western literary texts within historical, religious, environmental, social, and literary contexts, considering the American West as a distinct US region and as an engine in the construction of broader American and international cultures.

Title
Three

Tags
199835, 3

Learning Outcome
Students will be able to persuasively communicate their mastery of major historical and conceptual themes and issues that are distinctive to the study of the American West demonstrating competence with written conventions of the field.

Learning Outcomes

Title
One

Tags
199871, 0

Learning Outcome
In this course, students will gain insights into the field of American Studies that will orient them as they, outside of class, create and tweak their plans of study and pursue extra-curricular activities. These insights into the discipline of American Studies will also help students to maintain a sense of themselves as American Studies majors even as they are enrolled in courses taught in other disciplines.

Title
Two

Tags
199872, 1

Learning Outcome
Through a series of readings, discussions, and writing assignments, this course affords students a view of American Studies as a coherent field with its own disciplinary history and preoccupations. These activities will also help students gain a knowledge of the ways in which the field of American Studies has been interdisciplinary, drawing intellectual energy from history, literary studies, anthropology, feminist studies, and other fields

Title
Three

Tags
199873, 2

Learning Outcome
In this course, students will think systematically about the ways American Studies scholars analyze various aspects of American culture. Students will also put these thoughts into practice

Title
Four

Tags
199874, 3

Learning Outcome
American Studies graduates will be able to formulate both their oral and written arguments coherently, support them clearly, and communicate them effectively to their audiences using correct conventions of language and some stylistic flair-all according to the best practices of the variety of disciplines and situations in which they are engaged. In this course, students will present oral arguments; they will also write two formal papers.

Complete ALL of the following Courses:

- AM ST 303 - Introduction to American Studies

Learning Outcomes

Title
Analyze Rigorously

Tags
199875, 1

Learning Outcome
Students will be able to read critically and analyze a variety of cultural texts and artifacts using the theoretical approaches central to the field of American Studies. Students will develop the skills necessary to analyze their peers' writing and their own writing with an eye towards composition and revision.

Title
Communicate Persuasively

Tags
199876, 2

Learning Outcome
Students will construct a conference length (8-10 page) paper employing purposeful rhetorical moves, responsible research strategies, and American Studies methods to develop a coherent and logical argument that makes a significant claim. Students will mature as writers as they devise productive and flexible individual and collaborative processes of writing, including methods for gathering evidence, organizing their argument, prewriting, drafting, revising, editings, proofreading, and peer reviewing.

Title
Engage Disciplinarily and Interdisciplinarily

Tags
199877, 0

Learning Outcome
Students will be able to define American Studies as a distinct discipline with its own intellectual history, analytical strategies, and scholarly methodologies even as they draw from and converse with other disciplines examining the American experience.

Prerequisites

Complete ALL of the following Courses:

- AM ST 303 - Introduction to American Studies
  AND AM ST 304 - American Studies Methodologies and Writing Practices

Other Prerequisites
Senior status or program coordinator's consent

Learning Outcomes

Title
Engage Disciplinarily and Interdisciplinarily

Tags
199759, 1

Learning Outcome
Through class discussions and writing activities, students will be able to demonstrate a fluency in the disciplinary trends of American Studies, an understanding of the field's inherent interdisciplinarity, and an ability to draw upon knowledge that they have acquired in courses taken in other disciplines.

Title
Analyze Rigorously

Tags
199760, 2

Learning Outcome
Students will be able to demonstrate high proficiency in reading critically and analyzing primary historical, secondary historical, theoretical, and critical texts. Students will exhibit this high proficiency through engaging in the methods central to the field of American Studies: textual analysis, archive building, institutional contextualization, and theorizing.

Title
Communicate Persuasively

Tags
199761, 3

Learning Outcome
Capstone participants will be able to formulate both their oral and written arguments coherently, support them clearly, and communicate them effectively to their audiences using correct conventions of language, style, and the best practices of the discipline.

Title
Work Independently

Tags
199762, 4

Learning Outcome
Students will be able to develop their own research project (formulate a sophisticated research question, independently conduct primary and secondary research, and employ the writing skills they have developed over the course of the major) in order to write an original 15–20 page research paper in the last third of the course.

Title
Engage Disciplinarily and Interdisciplinarily

Tags
199802, 1

Amharic 201

Learning Outcomes

Title
Communication Skills

Learning Outcome
Communicate in both the written and spoken Amharic with reasonable accuracy about real-world activities with well-educated members of the target culture who are accustomed to dealing with non-native speakers.

Title
Comprehension

Learning Outcome
Demonstrate understanding of everyday written and verbal instructions. Demonstrate comprehension of concrete details and global meaning of intermediate-level written and spoken passages related to familiar topics that native speakers encounter routinely in their daily life.

Title
Cultural Knowledge

Learning Outcome
Discuss in Amharic cultural practices related to everyday life in the target culture. Acquire basic background knowledge of important achievements related to the target culture (historical figures and events, major literary and artistic movements, government, and religious institutions, etc.).

Title
Intro to and Challenges within ANES Scholarship

Tags
199925, 2

Learning Outcome
Introduce students to the issues in the study of the Ancient Near East that have an impact on understanding the Hebrew Bible and the New Testament, including a discussion on the challenges "believing" students face, LDS in particular. This will include a discussion of some of the ethical issues in current scholarship.

Title
Developing ANES skills

Tags
199926, 3

Learning Outcome
Help students critically read, discuss, research and write about ancient texts with methodological rigor and academic integrity.

Title
Survey ANES history, culture and major texts

Tags
200130, 4

Learning Outcome
Introduce students to the field of Ancient Near Eastern Studies, including the historical and geographical breadth from 3000 b.c.e. down to 600 c.e., the development of the field of study, the major texts and their standard editions, research skills, major terms, and employment possibilities.

ANES 301 - Methods and Sources for the Study of the Hebrew Bible

Course Information

Course Number
301

Teaching Area
ANES

Course Title
Methods and Sources for the Study of the Hebrew Bible

Course Description
This class is an introduction to the academic study of the Hebrew Bible (Old Testament) designed for ANES majors and minors. It considers the historical context, cultural setting, literary framing, and content of key biblical writings, as well as various disciplinary and faith-informing approaches taken to these writings within the field of biblical studies.

Simple Requisites

Prerequisite

Type
Prerequisite

Prerequisite

Complete ALL of the following Courses:

- ANES 201 - Introduction to Ancient Near Eastern Studies

Learning Outcomes

Title
Methodological Competency

Learning Outcome
In this course, students will learn the basic sources, methods, and issues involved in an academic study of the Hebrew Bible (Old Testament). These will include an introduction to the authorship, audience, historical setting, literary framing, and content of key biblical writings; a history and evaluation of disciplinary approaches to these writings; and an overview of critical methodologies that are often used to study biblical texts. Such introductory topics will help orient students in achieving the broader learning outcomes of their ANES major or minor, including being able to read and interpret biblical texts within their historical, cultural, and literary contexts in a way that will prepare students for future studies within the discipline.

Title
Analytical Thinking and Writing

Learning Outcome
To further help students prepare for future studies within the discipline, students in this course will develop critical thinking and analytical writing skills by producing a series of short assessment papers on the topics they are studying throughout the semester. While not full research papers (which will be expected later in their studies within the major or minor), these assignments will assist students in understanding, evaluating, and forming their own perspectives on the key texts, methodologies, and academic approaches to the study of the Hebrew Bible.

Title
Spiritual Development

Learning Outcome
In this course, students will learn to navigate the academic study of the Hebrew Bible in a faith-informing way that will be spiritually strengthening and help them on their journey of becoming lifelong “disciple-scholars.” This will occur as such faith-informing approaches to the academic material are modelled to them by their instructor, as well as through in-class discussions about ways to integrate disciplinary approaches to biblical texts with constructive perspectives on the nature, role, and scripture within the community of faith.

  AND ANES 302 - Methods and Sources for the Study of the Greek New Testament
  AND GREEK 201 - Intermediate Greek

Learning Outcomes

Title
Research Design and Analysis

Learning Outcome
The primary focus of this course will be to provide students with an opportunity to conduct in-depth research in an area of their specialty within the ANES major. To accomplish this, students will plan, research, write, revise, and rewrite a paper of 12–15 pages on a topic of their choice that will demonstrate their familiarity with the discipline of Ancient Near Eastern Studies and their potential to produce original scholarly contributions within the field. This paper will also demonstrate their ability to interpret and analyze relevant primary sources, their proficiency in the relevant ancient languages, and their capacity for critical thinking. It is hoped that this process will help students refine their research and writing abilities, as well as prepare them for application to graduate school and a future career in the academy.

Title
Professional Development

Learning Outcome
A second emphasis of this course will be to prepare students to navigate the academic discipline through discussing the process of applying to graduate school, participating and presenting their research in professional associations, and looking forward to the job market. This emphasis will be supported by having students complete a modest series of exercises that will encourage them to identify potential graduate programs and professional associations, prepare an academic Curriculum Vita and a personal statement, and present their paper in a peer reviewed conference setting.

Title
Personal and Spiritual Resilience

Learning Outcome
A third objective of this course will be to help students maintain their mental, emotional, and spiritual health as they embark on an academic career. This will be encouraged through a series of readings and discussions relating to such issues as achieving work-life balance, dealing with “imposter syndrome,” and experiencing faith transitions in the process of pursuing higher education. The latter topic in particular will be considered by surveying the encounter of faith traditions and higher biblical criticism (including among Jewish, Catholic, and Protestant scholars), the history of Latter-day Saint engagement with biblical scholarship, and the journey of becoming a “disciple-scholar.” It is hoped that this aspect of the course will provide students with resources, tools, and perspectives that will help them navigate the rigors of academic life while maintaining a healthy framework for their personal and spiritual lives.

ANES 430R - Advanced Topics in Ancient Near Eastern Studies

Course Information

Teaching Area (new)
ANES

Course Number

Complete ANY of the following Courses:

- ANES 201 - Introduction to Ancient Near Eastern Studies
  AND ANES 301 - Methods and Sources for the Study of the Hebrew Bible
  AND ANES 395 - Junior Seminar in Ancient Near Eastern Studies
- ANES 201 - Introduction to Ancient Near Eastern Studies
  AND ANES 302 - Methods and Sources for the Study of the Greek New Testament
  AND ANES 395 - Junior Seminar in Ancient Near Eastern Studies

Learning Outcomes

Title
Research Design and Writing

Learning Outcome
The primary focus of this course will be to provide students with an opportunity to conduct in-depth research in an area of their specialty within the ANES major. To accomplish this, students will work closely with an appointed ANES-affiliated faculty member with relevant content expertise to plan, research, write, revise, and rewrite a paper of 20 pages on a topic of their choice that will demonstrate their familiarity with the discipline of Ancient Near Eastern Studies and their potential to produce original scholarly contributions within the field. This paper will also demonstrate their ability to interpret and analyze relevant primary sources, their proficiency in the relevant ancient languages, and their capacity for critical thinking. It is hoped that this process will help students refine their research and writing abilities, as well as prepare them for application to graduate school and a future career in the academy.

Title
Spiritual Development

Learning Outcome
A second focus of this course will be to help students—as they work under the close supervision of their appointed faculty member—develop the ability to integrate academic inquiry and spiritual discipleship through considering models of academically sound and faith-informing scholarship.

ANTHR 101 - Culture and Human Experience

Learning Outcomes

Title
Culture and Social Life

Tags
181701, 1

Learning Outcome
Learn to identify culture as a way of interpreting experience; that culture informs both social life and individual psychology, shaping and coloring how people perceive and act in the world.

Title
Character Development

Tags
181900, 2

Learning Outcome
Recognize the strength that comes from doing hard things, including how to effectively identify key points from lots of reading material.

Title
Human Cultural Diversity

Tags
181901, 3

Learning Outcome
The Aims of a BYU Education stipulates that students cultivate an informed awareness of the peoples, cultures, languages, and nations of the world. This class will fulfill the Global and Cultural Awareness requirement by acquiring informed awareness of either a) cultures outside their own, or b) the interplay of cultures, languages, and/or nations at an international level.

Title
Critical Thinking Methods

Learning Outcome
Grasp the social scientific principles and reasoning involved in ethnography, and recognize the value, limitations, and ethical implications of this way of making sense of social conduct.

Learning Outcomes

Title
Learning Objectives

Tags
181911, 1

Learning Outcome
This course helps students to learn the basic scientific principles which undergird the scientific process, including the strengths and weaknesses of this process. At the same time, students will learn to appreciate the excitement of discovery that has accompanied important scientific developments while engaging with global cultures whose developments have changed the face of humankind throughout time. Students will learn how scientific methodology can be used to analyze real world problems, including societal issues that can be informed by studies of past cultures. Students will become adept at evaluating scientific data and claims in order to make informed decisions on public-policy science issues that affect their community.

Title
Learning Outcomes

Tags
181912, 2

Learning Outcome
This course also helps students cultivate an informed awareness of the peoples, cultures, languages, and nations of the world, gaining a greater understanding and appreciation of the varieties of human experience across time and space. This understanding is vital to fulfilling the Lord's injunction to understand "things both in heaven and in the earth, and under the earth; things which have been, things which are…things which are abroad; the wars and the perplexities of the nations, and the judgements which are on the land; and a knowledge also of countries and of kingdoms" (D&C 88:79).

Title
Course Objectives

Tags
181913, 3

Learning Outcome
As students complete the course they will learn to communicate their thoughts on various social and scientific topics clearly and meaningfully. Assignments, activities, and discussions include opportunities for students to practice the appropriate use of basic scientific vocabulary and effective interpretation of quantitative data, as well as reflect rationally upon the interface between science, society, and religion. Through the intensive study of examples of peoples in times and places other than their own, students will gain a greater awareness of global cultures outside of their own, thus helping them to develop greater empathy and charity for people in other parts of the world today.

Infectious Disease

Learning Outcome
Describe what infectious diseases are as well as the details of plague, smallpox, HIV/AIDS and tuberculosis

Title
Disease and Adaptation

Learning Outcome
Explain how infectious diseases have shaped human evolution, including the various ways humans have adapted and continue to adapt to infectious diseases

Title
Disease and Culture

Learning Outcome
Explain how culture influences how infectious diseases are situated, contextualized and dealt with within individual societies

Title
Disease Impacts

Learning Outcome
Describe how infectious diseases influence human societies

ANTHR 344 - Culture, Language, and History of Korea

Course Information

Teaching Area (new)
ANTHR

Course Number
344

Teaching Area
ANTHR

Course Title
Culture, Language, and History of Korea

Course Description
Culture, language, and history of Korea. Understanding aspects of Korean culture, such as the particular form of collectivism that is common in Korean culture. Study of Korean history, both recent and long-past, as a way to understand Korean culture today. Study of basic fundamental structures of the Korean language (including the alphabet) to better understand how culture is inflected by language.

Archaeology of the Native Cultures of North America and Nort

Tags
181676, 1

Learning Outcome
Students will gain an introductory level comprehension of the diverse cultural developments of North American indigenous peoples as well as selected examples from Canada and Northern Mexico through the study of archaeological evidence and material culture.

Title
Hands-On Exposure to Native American Material Culture

Tags
181677, 2

Learning Outcome
Students will gain a more in-depth comprehension of the diversity and complexity of data sets regarding archaeological evidence via material cultural remains by hands-on interactions with the collections of the Museum of Peoples and Cultures at BYU.

Title
Critical Thinking, Research, Analysis, and Writing

Tags
181678, 3

Learning Outcome
Through course assignments, students will increase their skills in critical thinking, research, analysis, and writing. Emphasis will be placed on writing in the discipline.

Learning Outcomes

Title
Understanding Human Cultures

Tags
181888, 1

Learning Outcome
Through course assignments, students will gain a deeper appreciation of the human condition and develop a more penetrating vision of the human experience, an enhanced understanding of human beings and being human.

Title
Symbols and Culture

Tags
181889, 2

Learning Outcome
Through course assignments, students will develop a better understanding of the nature of signs and symbols and of the part they play in perception and experience, of their role in refiguring reality.

Title
Writing and Critical Thinking

Tags
181890, 3

Learning Outcome
Through course assignments, students will develop an increased ability to think soundly, to write clear and insightful entries in an intellectual journal, and to writie an effective final essay.

Prerequisites

Complete ALL of the following Courses:

- ANTHR 239 - Intro to Medical/Psychological Anthropology

Note
This course requires ANTHR 239 or instructor approval to enroll.

Learning Outcomes

Title
Research Skills

Tags
181813, 3

Learning Outcome
Students will learn to analyze medical and psychological data from a person-centered ethnographic standpoint by engaging with readings and conducting a course project analyzing some medical/psychocultural phenomenon and writing up the results.

Title
Critical Reasoning

Tags
181814, 2

Learning Outcome
Students will learn to critique the philosophical and theoretical assumptions inherent in various approaches to understanding human experience and medical/psychological intersubjectivity.

Title
Social Theory

Tags
181815, 1

Learning Outcome
Through this course students will develop a critique of both the overemphasis on macro-level 'structure' and 'culture' in mainstream anthropology, as well as the overly individualistic emphasis in medical and psychology fields on micro-processes and the health and 'psyches' of individuals. Students will gain an appreciation for the extent to which 'body', 'mind' and 'culture' co-constitute one another in various dimensions of human experience.

ANTHR 442 - Ethnographic Research Design and Methods

Course Information

Teaching Area (new)
ANTHR

Course Number
442

Teaching Area
ANTHR

Course Title
Ethnographic Research Design and Methods

Course Description
This course has two related foci. First, students will practice the methods of ethnographic research, including best practices for participant observation interviewing, among other methods. To this end, students will conduct a mini-ethnography over the course of the semester. Second, students will develop and write a research proposal for the research they will carry out in their field schools. This research proposal will include a research question, a review of the literature that will motivate the research question, a description of the site where the research will be carried out, and an outline of the methods to be used in data collection and analysis. Students will be able to explain ethical research practices and they may need to pursue IRB approval as well.

Learning Outcomes

Title
Research Design and Methods

Tags
181844, 1

Learning Outcome
Through this course, students will learn principles of good research design, and will be trained in a variety of methods for social science research. By the end of this course, students will have used this training to develop a proosal for a theoretically innovative research project, including laying out valid and reliable methods for answering the research question. By the end of this course, students will have developed the ability to effectivey critique research designs and assess the relative validity and reliability of other research projects. This includes the skills to critically assess the connections between evidence and theoretical claims in social science research.

Field School Skills and Knowledge

Tags
181860, 1

Learning Outcome
Students who are enrolled for the required Spring capstone Field School in either the American Southwest/Great Basin or in Petra, Jordan will gain critical skills necessary for archaeological field work, analysis, and cultural immersion.

Title
Field School Preparation Skills

Tags
181829, 0

Learning Outcome
-Students will prepare for their excavation training and experience at a BYU-sponsored dig through course assignments which will include:
1. Course readings that give students a general introduction to the history, cultural contexts, and archaeological research related to the site of the Department's Field School.
2. Through class discussion, students will be prepared to live compatably with the host culture and nation in which the archaeological site under excavation resides.
3. Course exercises and readings that will prepare each student to recognize the various strata-graphic levels of the cultural deposits they will be excavating in Field School.
4. Course discussion, exercises, and readings will give each student a working knowledge of the major archaeological methodologies and theories that will be employed in the Field School projects.
5 Students will gain a basic knowledge of how to research, plan, and prepare a major archaeological excavation field project.

189618, 2

Learning Outcome
Comprehend simple but longer written and audio/video texts on an expanded range of familiar topics.

Title
Social Interaction with Arabs

Tags
189619, 1

Learning Outcome
Demonstrate expanding ability to socially interact with Arabs appropriately.

Title
Foundational Structures

Tags
189622, 5

Learning Outcome
Significantly increase control of foundational structures (verb conjugations, complex sentence types).

Title
Formal and Vernacular Arabic

Tags
189629, 4

Learning Outcome
Demonstrate increasing ability to appropriately employ formal and vernacular Arabic.

Title
Conversation Tasks

Tags
189634, 1

Learning Outcome
Converse successfully with native speakers of Arabic about likes/dislikes, home/school, health, schedule, plans, and accomplish basic tasks such as shopping.

Title
Writing Descriptive Prose and Narrative Events

Tags
189648, 3

Learning Outcome
Write descriptive prose and narrate events occuring in the past, present and future.

ARAB 201 - Second-Year Arabic

4

Fixed/Max:
4

Lecture Hours

Fixed:
5

Lab Hours

Fixed:
0

Other Prerequisites
Arab 102 or equivalent experience

Learning Outcomes

Title
Speaking

Tags
189349, 1

Learning Outcome
Speak Colloquial Arabic at the ACTFL intermediate low level. Show an elementary ability to distinguish between Colloquial and Standard Arabic in word choice and pronunciation.

Title
Reading

Tags
189350, 2

Learning Outcome
Read and understand simple written Standard Arabic texts at the ACTFL intermediate low level.

Title
Listening

Tags
189351, 3

Learning Outcome
Understand spoken conversations and dialogues in Standard and Colloquial Arabic at the ACTFL intermediate low level.

Title
Foundational Structures

Tags
189352, 4

Learning Outcome
Show a mastery of basic verb conjugations, idaafa, and other basic structures, with some familiarity with more advanced structures (passive, active and passive participles, relative clauses, diptotes and other vowelling issues).

Title
Cultural Competency

Tags
189839, 5

Learning Outcome

Students will become familiar with key elements of expectations and norms of a variety of Arab societies.

Arab 201 or equivalent experience

Learning Outcomes

Title
Writing

Tags
189824, 4

Learning Outcome
Write short essays, journal entries and notes at the ACTFL Intermediate Mid level, demonstrating emerging ability in aspects of Advanced-level writing.

Title
Foundational Structures

Tags
189825, 5

Learning Outcome
Demonstrate mastery of verb conjugations (including passive) and other basic structures, as well as a developing familiarity with some high frequency constructions typically used in more formal registers. Demonstrate ability to vowel simple texts accurately and a developing ability to vowel more complicated texts.

Title
Vocabulary Mastery

Tags
189826, 6

Learning Outcome
Demonstrate a mastery of basic Arabic vocabulary, both vernacular and formal (approximately 2500 words).

Title
Speaking

Tags
189827, 1

Learning Outcome
Speak Arabic at the ACTFL Intermediate Mid level. Show a developing ability to distinguish between vernacular and formal Arabic in word choice and pronunciation and emerging ability in aspects of Advanced-level speaking.

Title
Reading

Tags
189828, 2

Learning Outcome
Read and understand simple written Arabic texts at the ACTFL Intermediate Mid level. Show developing ability in aspects of Advanced-level reading, such as understanding front-page news articles on familiar topics.

Title
Listening

Tags
189829, 3

Learning Outcome
Understand spoken conversations, monologues, and media in vernacular and formal Arabic at the ACTFL Intermediate Mid level, demonstrating emerging ability in aspects of Advanced-level listening.

Title
Cultural Competency

Tags
189840, 7

Learning Outcome
Students will become familiar with key elements of the expectations and norms of a variety of Arab societies and develop an expanded awareness of the complex interplay between Arabo-Islamic Civilization and the West in the past.

Prerequisites

Type
Prerequisite

Prerequisites

Complete ALL of the following Courses:

- ARMEN 201 - Second-Year Language Study: Armenian

Note
Teacher may waive prerequisite based on prior experience. Culminating course for GE Languages of Learning requirement. Not an entry course for returned missionaries

Learning Outcomes

Title
Communication Skills

Tags
195701, 1

Learning Outcome
In both written and spoken target language, communicate with reasonable accuracy about real-world activities with well-educated members of the target-culture accustomed to dealing with non-native speakers.

Title
Comprehension

Tags
195707, 2

Learning Outcome
Understand every-day written and verbal instructions. Comprehend concrete details and global meaning of intermediate-level written and spoken passages related to familiar topics that native speakers encounter routinely in their daily life.

Title
Cultural Knowledge

Tags
195711, 3

Learning Outcome
Discuss in the target language cultural practices related to every-day life in the target culture. Acquire basic background knowledge of important achievements related to the target culture (historical figures and events, major literary and artistic movements, government and religious institutions, etc.).

Title
General Education Requirements

Tags
195715, 4

Learning Outcome
Complete Languages of Learning and Global & Cultural Awareness for General Education.

ARMEN 305 - Language Skills Development: Armenian

Course Information

Teaching Area (new)
ARMEN

Course Number
305

Teaching Area
ARMEN

Course Title
Language Skills Development: Armenian

Course Description
Increasing proficiency in one or more of the following Armenian language and culture skills: speaking, listening, reading, writing, cultural awareness.

Department
Language Studies

When Taught
Contact Department

Credit Hours

Min:
1

Fixed/Max:
4

Other Prerequisites
Instructor's consent.

Learning Outcomes

Title
Defined Special Purpose

Tags
195722, 1

Learning Outcome
Develop the overall language and cultural competence to meet the needs of a "special" purpose identified by the Center for Language Studies.

Title
Communication

Tags
195727, 2

Learning Outcome
Communicate effectively enough to function in a variety of situations likely to be encountered when dealing with native speakers associated with the special purpose. This may include interpersonal, interpretive, and presentational (written and oral) modes of communication.

Title
Cultural Competence

Tags
195732, 3

Learning Outcome
Interact with cultural competence and understanding when dealing with native speakers associated with the special purpose.

ARMEN 321 - Advanced Grammar: Armenian

Course Information

Teaching Area (new)
ARMEN

Course Number
321

Teaching Area
ARMEN

Course Title
Advanced Grammar: Armenian

Course Description
Advance your Armenian through interactive grammar and syntax review. Engage in readings, discussions, and real-world tasks to build confidence and accuracy.

Department
Language Studies

When Taught
Contact Department

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Learning Outcomes

Title
Analyze

Tags
195736, 1

Learning Outcome
Analyze target language morphology and syntax.

Title
Apply

Tags
195737, 2

Learning Outcome
Apply grammar rules with accuracy to a variety of advanced grammatical and communicative tasks.

Title
Independent Learning

Tags
195740, 3

Learning Outcome
Function as independent learners of the target language by using proper terms and appropriate resources for language analysis.

ARMEN 330 - Advanced Language Proficiency Through Cultural Studies: Armenian

Course Information

Teaching Area (new)
ARMEN

Course Number
330

Teaching Area
ARMEN

Course Title
Advanced Language Proficiency Through Cultural Studies: Armenian

Course Description
Study of Armenian using interpersonal, presentational, and interpretive skills in the target language.

Department
Language Studies

When Taught
Contact Department

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Other Prerequisites
Armen 202 or equivalent.

Note
Entry course for returned missionaries or others of equivalent language experience. Required course for obtaining language credit by examination. May fulfill the GE Languages of Learning requirement.

Learning Outcomes

Title
Communication Skills

Tags
195743, 1

Learning Outcome
In both written and spoken target language, communicate accurately with well-educated members of the target-culture about real-world activities.

Title
Comprehension

Tags
195744, 2

Learning Outcome
Understand detailed written and verbal instructions. Comprehend historical passages, newspaper and magazine articles, and broadcast news reports well educated native speakers encounter routinely in their daily life.

Title
Cultural Knowledge

Tags
195745, 3

Learning Outcome
Acquire background knowledge of important achievements related to the target culture (historical figures and events, major literary and artistic movements, government and religious institutions, etc.). Discuss in the target language cultural practices related to major life events in the target culture (birth, marriage, death, etc.).

Title
General Education Requirements

Tags
195746, 4

Learning Outcome
Complete Languages of Learning and Global & Cultural Awareness for General Education.

Type
Prerequisite

Prerequisites

Complete ALL of the following Courses:

- ARMEN 330 - Advanced Language Proficiency Through Cultural Studies: Armenian

Learning Outcomes

Title
Defined Career Purposes

Tags
195751, 1

Learning Outcome
Develop overall language and cultural competence needed to study and begin entry into a career agreed upon by the Center for Language Studies.

Title
Knowledge

Tags
195752, 2

Learning Outcome
Carry out research to identify, understand, and discuss standards, processes, people and cultural norms associated with the target career.

Title
Interpretive Competence

Tags
195753, 3

Learning Outcome
Understand, interpret and analyze advanced-level written and oral texts on topics related to the target career.

Title
Communicative Competence

Tags
195754, 4

Learning Outcome
Communicate effectively at the advanced-level in order to function in a variety of situations likely to be encountered when dealing with native speakers who are associated with the target career. This will include interpersonal communication and both written and oral presentational communication.

ART 101 - Introduction to Art and Drawing

Course Information

Teaching Area (new)
ART

Course Number
101

Teaching Area
ART

Course Title
Introduction to Art and Drawing

Course Description
Readings, aesthetic topics, basic drawing and compositional techniques and concepts.

Department
Art

When Taught
Fall; Winter; Spring; Summer.

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
2

Lab Hours

Fixed:
4

Other Prerequisites
Some sections will be reserved for Freshman/Sophomore students or Art minors.

Learning Outcomes

Title
Skill Development

Tags
54784, 0, 0, 2021-07-26 11:18:55

Learning Outcome
Students will exhibit fundamental knowledge and skill in a variety of media

Title
Aesthetic Sensibilities

Tags
54783, 0, 1

Learning Outcome
Students will develop perceptive and inventive skills using various art media as a means to developing a personal voice.

Title
Historical and Contemporary Context

Tags
54782, 0, 2

Learning Outcome
Students will become familiar with the work of artists both past and present

ART 102 - Introduction to Art: 2D

Course Information

Teaching Area (new)
ART

Course Number
102

Teaching Area
ART

Course Title
Introduction to Art: 2D

Course Description
Formal and conceptual consideration of design and composition using a variety of media and systems.

Department
Art

When Taught
Fall; Winter; Spring Odd Yrs.; Summer Even Yrs..

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
2

Lab Hours

Fixed:
4

Other Prerequisites
Pre-major Art, Pre-major Art Education, or Art Education Minor status

Recommended
Concurrent enrollment in ART 133 and ART 226

Learning Outcomes

Title
Spatial Skills

Learning Outcome
Students will comprehend and apply perceptual systems for representing and organizing space and form.

Title
Technical Skills

Learning Outcome
Students will be introduced to a variety of techniques, mediums and craft approaches in creating perceptual objects.

Title
Individual Approach

Learning Outcome
Students will initiate the development of personal concepts and explore creative problem solving

Title
Contextual Awareness

Learning Outcome
Students will articulate connections between their own work and historic and contemporary artmaking

ART 104 - Introduction to Sculpture for Non-Majors

Course Information

Teaching Area (new)
ART

Course Number
104

Teaching Area
ART

Course Title
Introduction to Sculpture for Non-Majors

Course Description
Basic sculpture processes and concepts, including lecture, demonstrations, lab time, slide lectures, some art historical material.

Department
Art

When Taught
Fall and Winter

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
2

Lab Hours

Fixed:
4

Note
Fee.

Learning Outcomes

Title
Skill Development

Tags
65056, 2

Learning Outcome
Students will learn the sculptural basics of carving, casting and fabrication in relation to original art work.

Title
Evaluate

Tags
66068, 3

Learning Outcome
Students will learn to evaluate their own sculptural works and that of others through regularly scheduled critiques. Work will be compared to contemporary and traditional standards of thought and practice applied to 3 dimensional art.

Title
Context

Tags
66069, 0

Learning Outcome
Students will develop an understanding of conceptual and formal trends in contemporary sculpture through lectures, images and other means.

ART 105 - Introduction to Ceramics for Non-Majors

Course Information

Teaching Area (new)
ART

Course Number
105

Teaching Area
ART

Course Title
Introduction to Ceramics for Non-Majors

Course Description
Basic throwing, hand-building skills, vocabulary, and technique for non-art majors, including lecture, demonstrations, lab time, slide lectures, some art historical material.

Department
Art

When Taught
Fall; Winter; Spring; Summer.

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
2

Lab Hours

Fixed:
4

Fee
35

Note
Fee.

Learning Outcomes

Title
Composition and Design

Tags
66062, 2

Learning Outcome
Students will learn the basics of ceramic forming techniques and design considerations.

Title
Clay Properties, Vocabulary, and Surface

Tags
66066, 1

Learning Outcome
Students will demonstrate a grasp of the fundamental properties of clay and glaze process. Students will learn applicable vocabulary to discuss surface options and issues they encounter in the formation of ceramic art.

Title
Evaluate

Tags
66067, 3

Learning Outcome
Students will learn to evaluate their own sculptural works and that of others through regularly scheduled critiques. Work will be compared to contemporary and traditional standards of thought and practice applied to 3 dimensional art.

Title
Context

Tags
66058, 0, 0

Learning Outcome

Students will explore examples of historical and contemporary ceramic art and process through lectures, images and other means.

ART 110 - Painting for Non-Majors

Course Information

Teaching Area (new)
ART

Course Number
110

Teaching Area
ART

Course Title
Painting for Non-Majors

Course Description
Paint media such as watercolor and acrylic will be presented; primary focus will be on oils. Course will explore both traditional and current modes of painting. Emphasis will be placed on developing a strong work ethic, development of a personal vocabulary in paint, and the exploration of a variety of painting processes.

Department
Art

When Taught
Fall; Winter.

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
2

Lab Hours

Fixed:
4

Learning Outcomes

Title
Painting Production

Tags
54476, 1

Learning Outcome
Students will increase their confidence as painters through the production of a significant body of paintings.

Title
History & Context

Tags
105805, 2

Learning Outcome

Students will gain a basic understanding of the history of painting and trends in contemporary painting.

Title
Painting Materials

Tags
105806, 3

Learning Outcome

Students will gain a basic understanding of the materials, techniques and terminology of oil painting.

Title
Color

Tags
105807, 4

Learning Outcome

Students will gain an understanding of color theory and color mixing as they related to painting.

ART 120 - Watercolor for Non-Majors

Course Information

Teaching Area (new)
ART

Course Number
120

Teaching Area
ART

Course Title
Watercolor for Non-Majors

Course Description
Introduction to aqueous media.

Department
Art

When Taught
Fall; Winter.

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
2

Lab Hours

Fixed:
4

Learning Outcomes

Title
Painting Production

Tags
185992, 1

Learning Outcome
Students will increase their confidence as painters through the production of a significant body of paintings.

Title
History & Context

Tags
185993, 2

Learning Outcome
Students will gain a basic understanding of the history of watercolor painting and trends in contemporary watercolor painting.

Title
Painting Materials

Tags
185994, 3

Learning Outcome
Students will gain a basic understanding of the materials, techniques and terminology of watercolor painting.

Title
Color

Tags
185995, 4

Learning Outcome
Students will gain an understanding of color theory and color mixing as they related to watercolor painting.

ART 122 - Printmaking for Non-Majors

Course Information

Teaching Area (new)
ART

Course Number
122

Teaching Area
ART

Course Title
Printmaking for Non-Majors

Course Description
Introduction to the basic materials, techniques, process, history, and aesthetics of intaglio, lithography, and relief printmaking processes.

Department
Art

When Taught
Winter

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
2

Lab Hours

Fixed:
4

Fee
75

Note
Fee.

Learning Outcomes

Title
Printmaking Concepts, Theories, and History

Tags
64703, 1

Learning Outcome
Students will Demonstrate an understanding of the basic concepts, theories, and history of intaglio, relief and lithographic printmaking.

Title
Printmaking Techniques and Process

Tags
64704, 2

Learning Outcome
Students will demonstrate an understanding of the basic techniques and processes of intaglio, relief and lithographic printmaking as introduced in class.

Title
Application of Skills and Techniques

Tags
64705, 3

Learning Outcome
Students will appropriately apply basic printmaking skills and techniques as introduced in class to make intaglio, relief and lithographic prints.

Title
Print Evaluation

Tags
64706, 4

Learning Outcome
Students will be able to evaluate prints based on professional criteria and standards introduced in class.

Title
Aesthetic Awareness and Sensibilities

Tags
64707, 5

Learning Outcome
Students will demonstrate increased aesthetic awareness and sensibilities, particularly as they relate to printmaking, and successfully apply these in their art making.

ART 130 - Bookbinding

Course Information

Teaching Area (new)
ART

Course Number
130

Teaching Area
ART

Course Title
Bookbinding

Course Description
Traditional approaches to hand bookbinding.

Department
Art

When Taught
Fall; Winter; Spring.

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
2

Lab Hours

Fixed:
4

Note
Fee.

Learning Outcomes

Title
Non-Traditional Book Structures

Tags
54083, 0

Learning Outcome
Students will discuss and explore the construction of non-traditional book forms, using both traditional and non-traditional bookmaking materials.Old: Through exposure to many examples of artists' books, students will discuss and identify new ideas of what constitutes a Book and how non-traditional and re-purposed materials may successfully be used to create a book structure.

Title
Historical Bookbinding Types

Tags
54260, 0

Learning Outcome
Students will be able to identify the historic roots and time periods of various book forms from both western and eastern history.

Title
Expression and Creativity

Tags
54649, 0

Learning Outcome
Students will incorporate self-expression and creativity in their bookbinding projects.

Title
Bookbinding Skills & Techniques

Tags
54713, 0

Learning Outcome
Students will demonstrate proficiency in the use of basic bookbinding techniques, tools and equipment.

ART 133 - Introduction to Art: 3D

Course Information

Teaching Area (new)
ART

Course Number
133

Teaching Area
ART

Course Title
Introduction to Art: 3D

Course Description
Three-dimensional concepts, theories, and issues using a variety of media and processes. Readings, writings, and participation in course work exhibitions required.

Department
Art

When Taught
Fall; Winter; Summer.

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
2

Lab Hours

Fixed:
4

Other Prerequisites
Pre-major Art, Pre-major Art Education, Art Education Minor, or Art Minor status.

Recommended
Concurrent enrollment in ART 102 and ART 226

Note
Fee.

Learning Outcomes

Title
Spatial Skills

Learning Outcome
Students will comprehend and apply perceptual systems for representing and organizing space and form.

Title
Technical Skills

Learning Outcome
Students will be introduced to a variety of techniques, mediums and craft approaches in creating perceptual objects

Title
Individual Approach

Learning Outcome
Students will initiate the development of personal concepts and explore creative problem solving

Title
Contextual Awareness

Learning Outcome
Students will articulate connections between their own work and historic and contemporary artmaking

ART 200 - Studio Techniques for Art History

Course Information

Teaching Area (new)
ART

Course Number
200

Teaching Area
ART

Course Title
Studio Techniques for Art History

Course Description
Introduction to art techniques, materials, and practices directed toward art history majors.

Department
Art

When Taught
Fall and Winter

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
2

Lab Hours

Fixed:
4

Fee
75

Note
Fee.

Learning Outcomes

Title
Western Art History and Techniques

Tags
54201, 1

Learning Outcome
Students will become familiar with processes and techniques historically used in the Western tradition. These include drawing, oil painting, watercolor, fresco, tempera, addative and subtractive scupture, casting, ceramics and printmaking.

Title
Effective Communication

Tags
54347, 1

Learning Outcome
Students will become able to describe these processes and techniques, verbally and in writing.

ART 210 - New Genres and Interdisciplinary Projects

Course Information

Teaching Area (new)
ART

Course Number
210

Teaching Area
ART

Course Title
New Genres and Interdisciplinary Projects

Course Description
Developing an artistic voice while exploring new genres of art making including installation, digital, time-based, performance, sound, and technology-based work. Includes an introduction to hybridized, collaborative, and cross-disciplinary art projects.

Department
Art

When Taught
Fall; Winter.

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
2

Lab Hours

Fixed:
4

Simple Requisites

Prerequisites

Type
Prerequisite

Prerequisites

Complete ALL of the following Courses:

- ART 133 - Introduction to Art: 3D
  AND ART 226 - Approaches to Artmaking

Other Prerequisites
Acceptance to a Department of Art degree program.

Learning Outcomes

Title
Non-Traditional Approaches

Tags
54613, 3

Learning Outcome
Students will expand their art practice by engaging in a variety of non-traditional approaches to art production, while incorporating a conceptual framework in their exploration.

Title
New Genre Art Practices

Tags
54704, 1

Learning Outcome
Students will develop a basic understanding of New Genre art practices and their origins, including relevant themes and concerns.

Title
Production

Tags
54705, 2

Learning Outcome
Students will produce a body of work demonstrating a developing understanding and engagement with the themes and concepts explored in class.

ART 215 - Painting Fundamentals

Course Information

Teaching Area (new)
ART

Course Number
215

Teaching Area
ART

Course Title
Painting Fundamentals

Course Description
Fundamentals in oil painting and aqueous media.

Department
Art

When Taught
Fall and Winter

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
2

Lab Hours

Fixed:

Prerequisites

Type
Completion Requirement

Complete ALL of the following Courses:
- ART 102 - Introduction to Art: 2D
  AND ART 226 - Approaches to Artmaking

Other Prerequisites
Acceptance to a Department of Art degree program.

Learning Outcomes

Title
Intuition in Drawing

Tags
54393, 3

Learning Outcome
Students will strengthen perceptive and inventive drawing skills.

Title
Figure Drawing History

Tags
54419, 1

Learning Outcome
Students will become familiar with the work of artists both past and present who implement the use of the human figure in art making.

Title
Figure Drawing Skills

Tags
54420, 0

Learning Outcome
Students will exhibit fundamental knowledge and skills in drawing the human figure.

Title
Drawing Materials and Tools

Tags
54599, 2

Learning Outcome
Students will exhibit fundamental skills in using a variety of art making tools.

ART 225 - Printmaking Fundamentals

Fee
25

Learning Outcomes

Title
Aesthetic Awareness and Sensibilities

Tags
54280, 4

Learning Outcome
Students will demonstrate increased aesthetic awareness and sensibilities, particularly as they relate to printmaking, and successfully apply these in their art making.

Title
Print Evaluation

Tags
54418, 3

Learning Outcome
Students will be able to evaluate prints based on professional criteria and standards introduced in class.

Title
Printmaking Concepts, Theories, and History

Tags
170197, 0

Learning Outcome
Students will demonstrate an understanding of the basic concepts, theories, and history of intaglio, relief, screen, and lithographic printmaking.

Title
Printmaking Techniques and Process

Tags
170198, 1

Learning Outcome
Students will demonstrate an understanding of the basic techniques and processes of intaglio, relief, screen, and lithographic printmaking as introduced in class.

Title
Application of Skills and Techniques

Tags
170199, 2

Learning Outcome
Students will appropriately apply basic printmaking skills and techniques as introduced in class to make intaglio, relief, screen, and lithographic prints.

ART 226 - Approaches to Artmaking

Concurrent enrollment in ART 102 and ART 226

ART 240 - Print and Web Design for Studio Artists

Course Information

Teaching Area (new)
ART

Course Number
240

Teaching Area
ART

Course Title
Print and Web Design for Studio Artists

Course Description
Introduction to web and print design for art majors. Students will apply skills and concepts gained in the first-year Core program to design problems. This course builds on art students' studio art training and provides a broad introduction to the methods, concepts, and tools of web and print design that students can apply in studio art making, in promoting their work and careers, and in professional contexts.

Simple Requisites

Prerequisites

Type
Prerequisite

Prerequisites

Complete ALL of the following Courses:

- ART 102 - Introduction to Art: 2D
  AND ART 226 - Approaches to Artmaking

Other Prerequisites
Acceptance to an art program, either Art BA, Art Ed BA, or Art BFA.

Learning Outcomes

Title
Design Fundamentals and Processes

Tags
208253, 0, 1

Learning Outcome
Students will implement the steps that guide a designer to effective solutions, will apply compositional skills to design problems, and will learn and apply fundamentals of 2D design such as grid systems and the basics of typography.

Title
Technical Proficiency

Tags
208254, 0, 2

Learning Outcome
Students will become proficient in the technical fundamentals of print and web design and production.

Title
Professional Practices

Tags
208255, 0, 3

Learning Outcome
Students will employ professional practices in supporting their art by developing materials such as a portfolio website and will become aware of professional opportunities for studio artstis to deploy their art skills in commercial contexts.

ART 260 - Photography Fundamentals

Type
Completion Requirement

Complete ALL of the following Courses:
- ART 102 - Introduction to Art: 2D
  AND ART 226 - Approaches to Artmaking

Other Prerequisites
Acceptance into an Art or Art Education major

Learning Outcomes

Title
Specialization and Proficiency

Tags
186040, 1

Learning Outcome
Students will develop essential camera skills and a basic knowledge of editing software.

Title
Photography in Contemporary Art

Tags
186041, 2

Learning Outcome
Students will gain an understanding of the role of photography within the contemporary art dialogue, including a familiarity with a range of prominent artists, key concepts, and movements related to the medium.

Title
Personal Art Development

Tags
186042, 3

Learning Outcome
Students will develop new strategies for art making while addressing conceptual concerns in their work.

ART 310 - Installation

Learning Outcomes

Title
Develop a Body of Work

Tags
54195, 2

Learning Outcome
Students will produce a body of work demonstrating an active engagement with the themes and concepts explored in class, while also reflecting their personal voice.

Title
Production

Tags
54271, 5

Learning Outcome
Students will produce a body of work demonstrating an active engagement with the themes and concepts explored in class, while also reflecting their personal voice.

Title
Effective Writing and Communication

Tags
54388, 6

Learning Outcome
Students will develop the ability to successfully discuss their ideas and artistic intentions in both academic and non-academic settings.

Title
Conceptual Articulation

Tags
54412, 3

Learning Outcome
Students will develop the ability to successfully discuss their ideas and artistic intentions in both academic and non-academic settings.

Title
New Genre Fundamentals

Tags
54445, 4

Learning Outcome
Students will develop an in-depth understanding of New Genre art practices and their origins, including a familiarity with prominent artists, key works, significant movements and relevant themes.

Title
Background of New Genre

Tags
104589, 1

Learning Outcome
Students will develop an in-depth understanding of New Genre art practices and their origins, including a familiarity with prominent artists, key works, significant movements and relevant themes.

Prerequisite

Prerequisites

Complete ALL of the following Courses:

- ART 215 - Painting Fundamentals
  AND ART 220 - Introduction to Drawing and Figure Drawing

Other Prerequisites
Students wishing to focus primarily on figure painting should complete Art 327 as a prerequisite.

Learning Outcomes

Title
Observation

Tags
186033, 1

Learning Outcome

Create a significant body of work that demonstrates a skill and understanding for how the human form is described in painting. This includes training in both traditional and inventive art processes.

Title
Historical Context

Tags
186034, 2

Learning Outcome
2. Become familiar with the work of artists both past and present who implement the use of the human figure in art making.

Title
Self-Assessment

Tags
186035, 3

Learning Outcome
3. Critically examine their artwork and its relationship to spiritual values and ethical issues relevant to art.

Title
Self-direction

Tags
186036, 4

Learning Outcome
4. Create a self-guided project based on a concept that incorporates the human form through a medium of their choice.

- ART 226 - Approaches to Artmaking

Learning Outcomes

Title
Current Trends

Tags
186013, 1

Learning Outcome
Students will strengthen their awareness of contemporary art at a local, regional, national, and international level through lectures and discussions.

Title
Personal Perspective

Tags
186014, 2

Learning Outcome
Students will expand and develop their perspectives on art and aesthetics, and strengthen their own commitments and ideas related to art. Students will broaden their understanding of art and the context in which it exists.

Title
Career Development

Tags
186015, 3

Learning Outcome
Students will gain a greater awareness of the variety of studio practices and art related opportunities available upon graduation.

ART 480R - Advanced Studio

Course Information

Teaching Area (new)
ART

Course Number
480R

Teaching Area
ART

Course Title
Advanced Studio

Course Description
Individual development of art issues in advanced studio environment. Writing a proposal accompanied by a readings list.

4

Other Prerequisites
At least two 300-level art studio courses, one of which is in the area of the proposed project.

Learning Outcomes

Title
Self-Directed Research

Tags
186037, 1

Learning Outcome
Students will examine art past and present through self-directed research and critical dialogue, and form a personal awareness of their place as artists within this larger context.

Title
Self-Directed Work

Tags
186038, 2

Learning Outcome
Students will create work and develop their art and ideas through readings, research, critical discourse, and hard work.

Title
Spirituality and Ethics in Art

Tags
186039, 3

Learning Outcome
Students will critically examine spiritual values and ethical issues relevant to art

ART 490 - BA Exit Portfolio

Learning Outcomes

Title
Final Exhibition

Tags
54165, 2

Learning Outcome
Students will complete and install exhibition of final project.

Title
Materials Preparation

Tags
54222, 1

Learning Outcome
Students will prepare all required materials for final exhibition, including written documents, artwork, and any framing, hanging, and/or installation materials needed for final exhibition.

Title
Exit Interview

Tags
54327, 3

Learning Outcome
Students will complete exit interview with advisory committee.

Title
Exit Portfolio

Tags
54563, 4

Learning Outcome
Students will prepare and submit all required materials for exit portfolio.

ARTED 276 - Introduction to K-12 Art and Design Education

Course Information

Teaching Area (new)
ARTED

Course Number
276

Teaching Area
ARTED

Course Title
Introduction to K-12 Art and Design Education

Course Description
Art and design methods with field-based teaching experience intended to help prospective teachers understand the demands and opportunities associated with teaching K-12 students in a variety of educational contexts.

Department
Art

When Taught
Fall; Winter.

Credit Hours

Fixed/Max:
3

Lecture Hours

Fixed:
4

Lab Hours

Fixed:
1

Other Prerequisites
FBI fingerprinting and background clearance. Art major status, pre-art education major/minor status; Design or Media Arts Studies major status.

Learning Outcomes

Title
Analyze Teaching and Learning in Context

Tags
54084, 3

Learning Outcome
Evaluate a variety of learning styles and how those relate to your own curricular understandings and the observations obtained in school sites. Video record one lesson to view and analyze and review with peers. Conduct an interview with a child regarding their perceptions of art and create a summary analysis of the data collected. Analyze case study incidences regarding the moral dimensions of teaching.

Title
Professional Organization Participation

Tags
54102, 0

Learning Outcome
Join the National Art Education Association as a student member. Participate as an active and contributing member of the BYU NAEA Student Chapter. Participate in local and regional organizations and structures, such as SWAP, Evening for Educators, Utah Art Education Association, museum and community art education events and activities.

Title
Observe & Analyze Diverse Teaching Sites

Tags
54184, 1

Learning Outcome
Participate in a visit to a charter school, a school for children with physical and mental challenges, and an alternative school. Participate in visits to schools (elementary specialist, middle level, high school, and 2 schools of the student's choice), prepare observations in each setting, teach an art lesson at assigned settings, conduct peer evaluations, and complete journal entries with reflective entries.

Title
Construct Relevant Curricular Materials

Tags
54362, 2

Learning Outcome
Create an instructional resource file. Create a presentation on an art education method and create a guide sheet. Create school newsletter, bulletin board display and an instructional resource aid. Generate lesson plans in relation to observations, school cultures, district and state mandates, and contemporary educational theory.

Title
K-12 Education Admission

Tags
54598, 4

Learning Outcome
Complete admission requirements to be admitted into the K-12 education program.

ARTED 326 - Art for Elementary Teachers

Course Information

Teaching Area (new)
ARTED

Course Number
326

Teaching Area
ARTED

Course Title
Art for Elementary Teachers

Course Description
Preservice preparation designed to help art educators and elementary classroom teachers understand the visual arts and develop skills necessary for implementing an arts integrated approach for art education.

Department
Art

When Taught
Fall; Winter; Spring; Summer.

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:

Learning Outcomes

Title
Artistic Literacy: The Spiritual Dimensions of Art

Tags
65554, 3

Learning Outcome
Students will explore the complexity of human perception and expression in the visual arts and experience the redemptive power and profound humanizing growth that accompanies engagement with art. They will have significant aesthetic experiences that will change they way they see the world and transform their teaching.

Title
Art and Teaching: Curriculum

Tags
65555, 4

Learning Outcome
Art Curricula: Students will design elementary arts integrated curricula that is sensitive to diverse cultures and special needs children that are developmentally appropriate for the elementary age child. They will gain an understanding of the development and artistic potential of children and will gain competencies in effective teaching methods that integrate the visual arts using a variety of different artistic methods and media.

Title
Art and Teaching: Advocacy

Tags
65556, 5

Learning Outcome
Students will articulate why art education is important through clear and concise writing. They will recognize the need to teach art to children and realize they do not need to be master artists to provide students with the opportunities and direction they need to create art.

Title
Artistic Literacy: Viewing Artworks

Tags
138003, 2

Learning Outcome
Through their study, description, interpretation, and aesthetic evaluations of artwork, students will develop skills in critical analysis, aesthetic judgment, and an appreciation of the importance of historical and cultural context in studying art. Students will become acquainted with a variety of representative works in at least one art form, demonstrate analytical literacy in at least one art form, meaning the ability to invoke the vocabulary, grammar, and theoretical models of the art form for the purpose of "reading" a work of art, and develop the ability to recognize multiple possible interpretations of an art work, and identify the work's adherence to or departure from the genre's traditions and conventions.

Title
Artistic Literacy: Making Artworks

Tags
138004, 1

Learning Outcome
Grounded in an understanding of its underlying principles of the visual arts, students will become direct participants and makers of art. Students will gain artistic confidence grounded in their own experiences working in artistic media. Students will demonstrate an understanding of the elements, forms, aesthetic and compositional principles of at least one form of artistic expression and develop increased creative imagination and independent thought by directly engaging with the art form as a performer or maker.

Title
Visual Arts Resources

Tags
138005, 6

Learning Outcome
Students will use available arts resources, including art museums as a part of their curriculum and teaching. They will be inspired to deepen their artistic knowledge and skills and continue to study art throughout their lives.

Prerequisites

Complete ALL of the following Courses:

- ARTED 276 - Introduction to K-12 Art and Design Education

Learning Outcomes

Title
New Media and Technology

Tags
54139, 0

Learning Outcome
Investigate artists and educators who utilize new media and technology in their practices.

Title
New and Social Media Use

Tags
54178, 0

Learning Outcome
Utilize new and social media in your own artistic creation.

Title
Course Design

Tags
54277, 4

Learning Outcome
Design professional and elegant course materials and learning opportunities after reviewing a variety of open source and commercial software options.

Title
Curriculum Planning with New and Social Media

Tags
54638, 0

Learning Outcome
Construct curricular plans to use new and social media in pedagogical sites (classrooms, online learning, communities beyond the schoolroom, etc).

ARTED 378 - K-12 Classroom Management, 3D Methods, and Community Arts Practicum

Learning Outcomes

Title
Classroom Management

Tags
54234, 3

Learning Outcome
Investigate and implement a variety of classroom management practices particular to art education classes in schools (art supply management, art classroom safety and legal considerations will be included.)

Title
National, State, and Local Requirements

Tags
54403, 2

Learning Outcome
Consider the National Standards in Art Education and state and local core requirements in art as foundations for research content, instructional design, production and presentation.

Title
Curriculum Planning

Tags
54437, 4

Learning Outcome
Create curricula and documents such as the two lesson plans for teaching in schools, Classroom Management Handbook and the TWS contextual factors, Professional Portfolio with Vitae and Rationale for teaching art to use for implementation in student teaching and lifelong education service.

Title
Teacher Observations

Tags
54504, 0

Learning Outcome
Experience observing and teaching in elementary and secondary school settings prior to the student teaching semester.

Title
Student Teacher Preparation

Tags
54621, 1

Learning Outcome
Participate in BYU McKay School of Ed Secondary Education transition and student teacher preparation by using INTASC standards, PIBS self-assessment and LiveTEXT enrollment.

Title
Diversity in Learning Environments

Tags
54667, 5

Learning Outcome
Respect diversity in the schools and value the establishment of learning environments where future artstudents can actively learn and create to their fullest potential.

ARTED 380 - Museum Art Education

Learning Outcomes

Title
Contemporary Art Critique and Writing

Tags
54400, 4

Learning Outcome
Students will learn about the works of many contemporary artists, write critical responses to a number of artworks, share responses with fellow students, and discuss and defend their written work. They will develop critical thinking and writing skills, including description, analysis, interpretation, and explication of form, meaning, and value with respect to works of art.

Title
Spirituality

Tags
137508, 0

Learning Outcome
Students will gain a deep appreciation for power of the visual arts, including contemporary art, to evoke understanding and compassion. They will be inspired as they increase their understanding of the spiritual dimensions of art.
Critically reflect on the student's own creative works in relation to various researched audiences, publics and discourses, balancing the interrelationships among the individual, others, and Deity. They will gain insight into how to judge artwork in the context of gospel principles and develop inner richness, a sanctuary of the mind, and spiritual insight.

Title
Literacy

Tags
137509, 0

Learning Outcome
Investigate a variety of practices and methodologies used by contemporary artists, pedagogues, and critics to discover multiple meanings, and to interpret, critically appreciate, and respond to works of contemporary art. They will gain an appreciation of the importance of historical and cultural contexts of art.

Title
Lively Engagement

Tags
137510, 3

Learning Outcome
Students will expand their knowledge of contemporary artists, write critical responses to a number of artworks, share responses with fellow students, and discuss and defend their written work. They will develop critical thinking and writing skills, including description, analysis, interpretation, and explication of form, meaning, and value with respect to works of art.
The student will apply contemporary practices and conversations to the student's own artistic investigations, engagements, and works in a sophisticated and professional manner, in relation to various discourses and feedback (from the teacher, literature, classmates' interpretations, etc).

Title
Personal Appreciation Aesthetics and Artistic Practice

Tags
137512, 3

Learning Outcome
Both students and instructor will broaden their personal aesthetic perspectives and develop a deep appreciation of the myriad aspects of contemporary art. Students will gain artistic confidence that is grounded in their own experience working in artistic media.

ARTED 450 - Advanced Secondary Studio Teaching Methods for Art Educators

Complete ALL of the following Courses:

- ARTED 276 - Introduction to K-12 Art and Design Education

Learning Outcomes

Title
Curricula and Artistry in the context of Contemporary Art

Tags
104795, 3

Learning Outcome
Students will become familiar with a few influential contemporary artists and determine how these artists might inform their own artistry and teaching practice.

Title
Studio Practice and Art Education

Tags
104801, 4

Learning Outcome
Each student will gain greater confidence in their own artistic voice and how their personal artistry can inform their teaching and stimulate the learning of their students. They will gain experience in mediums they are not familiar with that might be required in schools or that might inform their own teaching practice.

Title
Educator Preparation Program Outcomes

Tags
104802, 5

Learning Outcome
Students will fulfill licensure requirements for secondary methods of art education. This course is part of your preparation for licensure in a major or minor that is part of the BYU Educator Preparation Program (EPP). This course will help you fulfill the EPP Outcomes required for accreditation. Advisors in Education Student Services (350 MCKB/801-422-3426) can answer questions you have about the licensure requirements for your teaching major or minor.

Title
Teaching in a Variety of Contexts

Tags
104803, 6

Learning Outcome
Students will demonstrate sound teaching practices in various contexts.

Title
Curriculum Design, Standards, and Current Practices in Art Education

Tags
104805, 1

Learning Outcome
Students will become familiar with current issues in art education including educational standards and make decisions about how their own curriculum and teaching will work within the constraints of standards, current practices and social issues. Students will apply their study and experiences in the course to constructing art curricula that reflect current theory and practice in the field and the requirements of the Teaching Work Sample.

Title
Spiritual Dimensions of Art and Education

Tags
185991, 1

Learning Outcome
Students will gain insight into the spiritual dimension of the artist and teacher.

ARTED 476R - Art Secondary and Elementary Student Teaching

Course Information

Teaching Area (new)
ARTED

Course Number
476R

Teaching Area
ARTED

Course Title
Art Secondary and Elementary Student Teaching

Course Description
Capstone, field-based, semester-long experience in teaching elementary and secondary students; demonstrating proficiency in all program standards. Seminar required.

Department
Art

When Taught
Fall and Winter

Credit Hours

Min:
1

Fixed/Max:
12

Other Prerequisites
Prior application; requires a major GPA of 3.00, at least a C grade in all major and minor courses; FBI fingerprint background clearance.

Learning Outcomes

Title
EPP Requirements

Tags
186059, 1

Learning Outcome
Complete the requirements established by BYU's Department of Visual Arts, the Department of Teacher Education and the Utah State Office of Education including the PRAXIS Test for Art.

Title
Mentoring Teacher

Tags
186060, 2

Learning Outcome
Meet the expectations of the co-operating teacher and administration of the sponsoring school.

Title
Standards

Tags
186061, 3

Learning Outcome
Become familiar with and apply National Core Standards for Visual Arts Education and the Utah Effective Teaching standards to planning and teaching.

Title
Professionalism

Tags
186062, 4

Learning Outcome
Exhibit professionalism in each school setting and the seminar by being consistently punctual and prepared for each assigned day of commitment.

Title
Teacher Work Sample Professional Portfolio

Tags
186063, 5

Learning Outcome
Complete the Teacher Work Sample in (TWS)--exemplary in content and presentation, proofread, on time. Submit TWS on My Link. Complete Professional Teaching Portfolio

Title
Communities of Practice

Tags
186064, 6

Learning Outcome
Continue to be engaged with professional literature and participate in professional organizations.

Learning Outcomes

Title
Social Justice and Ecological Beliefs

Tags
54119, 0

Learning Outcome
Scrutinize personal beliefs and practices regarding social justice and ecological concerns in art education in relation to one's mentors and peers.

Title
Educator Preparation Program Outcomes

Tags
54152, 6

Learning Outcome
This course is part of your preparation for licensure in a major or minor that is part of the BYU Educator Preparation Program (EPP). This course will help you fulfill the EPP Outcomes required for accreditation. Advisors in Education Student Services (350 MCKB/801-422-3426) can answer questions you have about the licensure requirements for your teaching major or minor. This includes becoming familiar with the UETS and TWS so as to be able to pass with at least a basic competency level in each criteria.

Title
Self-Evaluation

Tags
54213, 5

Learning Outcome
Self-evaluate behavior, in relation to art education faculty observations, using the Professional Disposition Instrument (PDI) and Professional and Interpersonal Behavior Rating Scale (PIBS).

Title
Curriculum and Personal Beliefs and Practices

Tags
54439, 0

Learning Outcome
Analyze how these personal beliefs and practices relate to conceptualizations in contemporary curriculum discourse.

Title
Curriculum Planning

Tags
54464, 0

Learning Outcome
Construct curricular materials and resources that reflect contemporary practice among artists, researchers, teacher, and learners.

Title
Curriculum Theory and Practice

Tags
54591, 0

Learning Outcome
Investigate and respond to historic and contemporary definitions, theories, and practices of curriculum through reading, reflection, discussion, and development.

Learning Outcomes

Title
Effective Communication

Tags
54197, 3

Learning Outcome
Students will become capable of refined oral expression and presentational abilities.

Title
Writing About the Arts

Tags
54243, 4

Learning Outcome
Students will master several art historical modes of writing, including abstracts, practicums, and annotated bibliographies.

Title
Art History in Contemporary Society

Tags
54311, 5

Learning Outcome
Students will gain an appreciation for the meaningfulness and relevancy of the discipline of art history in contemporary society.

Title
Critical Thinking

Tags
54319, 2

Learning Outcome
Students will acquire an enhanced ability to think critically about the arts.

Title
Western Art Historiography

Tags
54416, 1

Learning Outcome
Students will become familiar with the historiography of western art history.

Title
Art Theory

Tags
54708, 1

Learning Outcome
Students will become acquainted with the major theoretical approaches used in art history.

Learning Outcomes

Title
Critical Professional Skills in Art History

Tags
199719, 0, 2

Learning Outcome
Students will develop professional skills related to written and oral communication, which includes the cultivation of research competencies and critical thinking tools, as well as relationships with women professionals in the visual arts that facilitates the transition from the university to the workplace. This will be accomplished through course assignments, including reading responses, the research project and presentation, reflective essays, and the LDS women in the arts mentorship program.

Title
Information Literacy: Feminist Art History

Tags
199718, 0, 1

Learning Outcome
Students will acquire a foundation of the key issues, individuals, and institutions and a firm grasp of the central issues and debates related to women in the visual arts, c. 1789 to the present, by means of extensive primary and secondary source readings and class lecture and discussion.

Title
Cultural Navigation: Course Relevancy

Tags
199720, 0, 3

Learning Outcome
Students will strengthen their ability to identify concepts, practices, and patterns in the history of women in art and culture that inform contemporary gender politics and ability to apply these in their various spheres of influences (self, family, church and civic communities), as well as a deepened commitment to the advancement of women in the arts in a variety of settings. This will be fostered in class discussions, reading responses, and reflective writing assignment.

- ARTHC 202 - World Civilization Since 1500

Learning Outcomes

Title
European History: 1780 to 1900

Tags
199962, 1

Learning Outcome
Students will acquire a solid foundation in the historical context of the art of Europe from c.1780 until 1900. Students will be able to articulate the characteristics of the styles, processes, and ideologies and philiosophies of key artists and movements, including Neoclassicism, Romanticism, Realism, Impressionism and Post-Impressionism, Symbolism, and other modernist movements in France, Italy, Britain, Switzerland, Austria, and Germany. Students will become conversant with selected works of art in terms of style, patronage, reception, and meaning of individual works of art and the artists or movements that spawned them. They will be able to trace the trajectory of future influence of key works of art from this period.

Title
Art Research and Writing

Tags
199963, 2

Learning Outcome
Students will develop art historical research skills by conducting advanced research focused on a single work of art within long nineteenth century. Students will apply methodological approaches acquired in ARTHC 300 to their topic. Students will situate their informed, original ideas within the best art historical publications on their subject. Students will demonstrate familiarity with advanced research skills and best research practices as taught by the course professor and supported the HBLL Art History research guides. Students will apply the formatting of an acceptable style guide with exactness to the completed research paper.

Title
American Art History: Prehistoric to 1876

Tags
199763, 3

Learning Outcome
Students will acquire a solid foundation in the historical context of the art and architecture of the United States of America from the prehistoric cultures on the North American Continent (Mississippian, Anasazi . . .) to 1876. Through a socio-historical approach, students will gain an understanding of the ways in which events like the arrival of Columbus, the American Revolution, the expansion of the West, and the Civil War, shaped and were shaped by the visual arts of the new nation. Students will also be able to articulate the characteristics of the styles, processes, ideologies, and philosophies of key artists and movements, including Rococo, Neo-Classicism, and Romanticism as they pertain to American art. Students will become conversant with selected works of art in terms of style, patronage, reception, and meaning of individual works of art and the artists or movements that spawned them. They will be able to trace the trajectory of future influence of key works of art from this period.

Title
Art Research and Writing

Learning Outcomes

Title
Critical professional skills

Tags
54431, 0, 2

Learning Outcome
Students will develop and refine central skills in the field of contemporary art, including critical thinking, sophisticated research, creative and persuasive arguments and evidence, effective means of argumentation, as well as those necessary to produce professional-level written products and verbal-visual presentations.

Title
Knowledge of ideas, issues, individuals, institutions

Tags
137955, 0, 1

Learning Outcome
Students will acquire a solid foundation in the historical context of post-WWII art and architecture. Students will be able to articulate the characteristics of the styles, processes, and ideologies and philiosophies of key artists and movements, including Abstract Expressionism, Postwar European Art, Pop Art, Minimalism, Earth Art, Body Art, Neo-Pop, Neo-Expressionism, YBA. They will also be able to discuss major developments associated with pluralism, globalization, and intersectionality in art, with an emphasis on the European and American theaters prior to 1980, and the global theater thereafter. Students will become conversant with selected works of art in terms of style, patronage, reception, and meaning of individual works of art and the artists or movements that spawned them. Additionally they will be able to see how contemporary art builds upon its antecedents.

Title
Conversancy in theory & criticism

Tags
54489, 0, 1

Learning Outcome
Students will become conversant with the criticism of leading figures in post-WWII art world, and the roles of criticism in the development of the field of contemporary art. They will also develop critical skills necessary to engage in verbal and written discourse vis-a-vis contemporary art in a variety of spaces, including the classroom, museums & galleries, and civic and social spaces.

Title
Course relevancy

Tags
212230, 0, 3

Learning Outcome
Students will be able to discern the relevancies of contemporary art to their personal goals and professional ambitions, as well as to the Aims of a BYU Education (spiritually strenghtening, intellectually enlarging, character building, and commitment to lifelong learning & service) and to their development as disciples of Jesus Christ.

Note
An APPROVED Internship Application is required before adding.

Learning Outcomes

Title
Experience in the Field

Tags
139424, 0

Learning Outcome
Internships will provide students experience and training in the art world (museum, gallery, art organization, auction house, library/archive, etc.). Students are expected to complete at least 140 hours of employment.

Title
Reporting

Tags
191195, 1

Learning Outcome
Student will deliver biweekly reflections to the internship coordinator, in which they record hours of employment, report their activities, and reflect on their experience according to prearranged prompts.
At the end of their internship students are also required to submit a final report of their internship to the coordinator, detailing their experience, skills acquired, advice for future interns, and the challenges they encountered and overcame.

Title
Off Campus Experience

Tags
191196, 2

Learning Outcome
Completed internships fulfill the Art History "Off-Campus Requirement" (ARTHC 496R) required for graduation.

Prerequisites

Complete ALL of the following Courses:

- ARTHC 300 - Theory, Methodology, and Historiography of Art History

Other Prerequisites
Senior standing.

Recommended
ArtHC 350, ArtHC 355

Learning Outcomes

Title
Art History Business Capstone

Tags
54778, 1

Learning Outcome
The purpose of this course will be to provide a firm understanding of the various professional fields associated with the discipline of Art History. Topics of discussion will include, but are not limited to, the museum, the commercial gallery, conservation and technical art history, art law, ethics, connoisseurship, government organizations, auction houses, etc.
This course serves the Art History Business Track (Professional Track) along with ACC 200, BUS M 201, and BUS M 241. To complete the Track students need to take three of the four courses listed above.

ARTHC 498 - Senior Thesis/Capstone Experiences

Course Information

Teaching Area (new)
ARTHC

Course Number
498

Teaching Area
ARTHC

Course Title
Senior Thesis/Capstone Experiences

Course Description
Capstone project including a professional quality research paper and a public presentation of this paper. Participation in at least one intensive learning environment beyond the classroom, i.e., a BYU Art History Study Abroad program; an art museum, auction house or gallery internship; or two art history field trips.

Department
Comparative Arts and Letters

When Taught
Fall and Winter

Simple Requisites

Prerequisites

Type
Prerequisite

Prerequisites

Complete ALL of the following Courses:

- ARTHC 300 - Theory, Methodology, and Historiography of Art History

Other Prerequisites
senior standing

Note
Internships at major art institutions usually require an internship at a regional or university art museum as a prerequisite.

Learning Outcomes

Title
Art History Theory

Tags
54192, 1

Learning Outcome
Students will be able to articulate and employ sophisticated theoretical models used by art historians.

Title
Preparing Research Papers for Publication

Tags
54307, 1

Learning Outcome
Student will refine a previously researched paper according to the publication standards of a specific art history journal.

Title
Professional Presentation

Tags
54676, 2

Learning Outcome
Students will develop a professional style of public presentation.

ARTHC 500 - Art in Theory: Spectatorship

Course Information

Teaching Area (new)
ARTHC

Course Number
500

Teaching Area
ARTHC

Course Title
Art in Theory: Spectatorship

Course Description
Review and critique of major theoretical approaches in art history, emphasizing the philosophical relationship between viewer and object.

Department
Comparative Arts and Letters

When Taught
Fall

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
2

Lab Hours

Fixed:
0

Other Prerequisites
Graduate status

Note
An APPROVED Internship Application is required before adding.

Learning Outcomes

Title
Art Criticism

Tags
54253, 1

Learning Outcome
ARTHC 500Students will acquire a solid grasp of the major writers and theories on spectatorship in the arts, and they will gain an increased awareness of the complexities of visual representation. Students will develop an expanded confidence in their ability to identify issues related to spectatorship when confronting a work of art. They will also develop an appreciation for the meaningfulness and relevancy of the arts and art criticism in contemporary society.

Title
Historical Research

Tags
54401, 1

Learning Outcome
Students will develop art historical research skills by conducting advanced research focused on theoretical approaches to a single work of art. They will develop an enhanced ability to think and write critically about theoretical applications in art history. Students will acquire professional presentation skills as they learn to clearly organize information, draw meaningful conclusions, and effectively use visual materials. Students will also develop persuasive oral skills through the practice of classroom presentations.

ARTHC 505 - Art in Theory: Language

Course Information

Teaching Area (new)
ARTHC

Course Number
505

Teaching Area
ARTHC

Course Title
Art in Theory: Language

Course Description
Review and critique of major theoretical approaches in art history, emphasizing the recent interest in language and semiotics.

Department
Comparative Arts and Letters

When Taught
Winter

Credit Hours

Min:
3

Fixed/Max:
3

Learning Outcomes

Title
Theoretical Applications

Tags
54338, 1

Learning Outcome
Students develop an enhanced ability to think and write critically about theoretical applications in art history. This will be accomplished in part by the students studying the intellectual career of a single theory-driven art historian.

Title
Application of Literary Theory

Tags
54507, 1

Learning Outcome
Students will acquire a solid grasp of application of literary theory to art history beginning the Semiotics of de Saussure and concluding with Derrida’s Deconstruction. Students will also develop an appreciation for the relevance of the arts and art criticism in contemporary society.

Learning Outcomes

Title
Knowledge of ideas, issues, individuals, institutions

Tags
212232, 0, 2

Learning Outcome
Students will acquire a solid foundation in the historical context of post-WWII art and architecture. Students will be able to articulate the characteristics of the styles, processes, and ideologies and philiosophies of key artists and movements, including Abstract Expressionism, Postwar European Art, Pop Art, Minimalism, Earth Art, Body Art, Neo-Pop, Neo-Expressionism, YBA. They will also be able to discuss major developments associated with pluralism, globalization, and intersectionality in art, with an emphasis on the European and American theaters prior to 1980, and the global theater thereafter. Students will become conversant with selected works of art in terms of style, patronage, reception, and meaning of individual works of art and the artists or movements that spawned them. Additionally they will be able to see how contemporary art builds upon its antecedents.

Title
Critical professional skills

Tags
212233, 0, 3

Learning Outcome
Students will develop and refine central skills in the field of contemporary art, including critical thinking, sophisticated research, creative and persuasive arguments and evidence, effective means of argumentation, as well as those necessary to produce professional-level written products and verbal-visual presentations.

Title
Course relevancy

Tags
212234, 0, 4

Learning Outcome
Students will be able to discern the relevancies of contemporary art to their personal goals and professional ambitions, as well as to the Aims of a BYU Education (spiritually strenghtening, intellectually enlarging, character building, and commitment to lifelong learning & service) and to their development as disciples of Jesus Christ.

Title
Conversancy in role of theory & criticism

Tags
212231, 0, 1

Learning Outcome
Students will become conversant with the criticism of leading figures in post-WWII art world, and the roles of criticism in the development of the field of contemporary art. They will also develop critical skills necessary to engage in verbal and written discourse vis-a-vis contemporary art in a variety of spaces, including the classroom, museums & galleries, and civic and social spaces.

Note
Required of all Asian Studies majors early in the program.

Learning Outcomes

Title
Factual Knowledge

Tags
199950, 2

Learning Outcome
The student can identify countries and major geographic features of Asia on a map. The student can relate basic facts about the history, economics, politics, society and cultures of the countries of Asia.

Title
Effective Research and Writing

Tags
200126, 0

Learning Outcome
The student will be able to apply effective search strategies to locate and to evaluate information on Asia in all formats (print, electronic, microform, video, DVD) and of all types (books, articles, reference materials, etc.). The student will be able to employ proper research skills to carry out research on a topic related to Asia and present results in oral and written academic reports.

Title
Character Development

Learning Outcome
By completing ASIAN 200, you will become a more informed global citizen with greater empathy, and appreciation for Asian peoples, cultures, societies, and nations. You will develop a deeper understanding of the core values and historical developments that inform the contemporary actions of Asian peoples and Asian governments. Furthermore, you will come to understand the struggles and successes experienced by the citizens of various Asian countries in the recent past and how Asian peoples and their leaders are coping with present challenges.

Title
Library Literacy

Learning Outcome
By completing a research paper on a topic of your own choosing (approved by the instructor) you will be introduced to the excellent digital and print resources available in the library. Learning to use these resources will help you develop information literacy and information management skills that you will need to effectively pursue your own research questions in the future.

Title
Asian Literary Traditions

Tags
199951, 2

Learning Outcome
Gain familiarity with Asian literary traditions, particularly India, China, and Japan.

Title
Critical Analysis and Writing

Tags
199952, 3

Learning Outcome
Demonstrate strong critical reading, writing, and analytical skills across linguistic and national traditions.

Title
Comparative Literary Analysis

Tags
200101, 0

Learning Outcome
Apply basic concepts of comparative literary analysis to course texts.

ASIAN 495 - Capstone in Asian Studies

Course Information

Teaching Area (new)
ASIAN

Course Number
495

Teaching Area
ASIAN

Course Title
Capstone in Asian Studies

Course Description
Learning research and writing skills necessary to prepare and present major senior research paper.

Department
International and Area Studies

When Taught
All Semesters/Terms

Credit Hours

Min:
1

Fixed/Max:
1

Lab Hours

Fixed:
0

Other Prerequisites
Senior status or program coordinator's consent.

Note
Most all major requirements should be completed before registering for this course.

Learning Outcomes

Title
Effective Research, Analysis and Writing

Tags
199953, 1

Learning Outcome
In this course, you will learn how to complete a significant research project using appropriate methods of research, analysis, and a professional standard of writing. In doing so, you will draw heavily from your knowledge from previous courses.

Title
Factual Knowledge

Tags
199954, 2

Learning Outcome
You will do this by studying a specialized topic in Asian Studies under the guidance of a professor. Thus, you will deepen your familiarity with a sub-field within Asian Studies and Asian Studies more broadly.

Title
Effective Oral Communication

Tags
199955, 3

Learning Outcome
You will also learn how to present your findings in a high-quality oral presentation, and how to give and receive appropriate feedback within a community of scholars.

ASL 101 - First-Year American Sign Language, Part 1

Course Information

Teaching Area (new)
ASL

Course Number
101

Teaching Area
ASL

Course Title
First-Year American Sign Language, Part 1

Course Description
The first in a series of five courses. Focuses on developing basic language skills in ASL that reflect a Novice High level. Deaf culture and linguistic aspects of ASL will be taught.

Department
Language Studies

When Taught
Fall and Winter

Credit Hours

Min:
4

Fixed/Max:
4

Note
Intended for students with little or no experience in ASL.
Students are required to register for a 0-credit Conversation Lab.

Learning Outcomes

Title
Communication

Tags
193075, 2

Learning Outcome
Students can express self in conversations on very familiar topics using a variety of words, phrases, and simple sentences that have been highly practiced and memorized.

Title
Function

Tags
193105, 4

Learning Outcome
Students can ask highly predictable and formulaic questions and respond to such questions by listing, naming, and identifying.

Title
Content

Tags
193128, 5

Learning Outcome
Students can function in some personally relevant contexts on topics related to basic biographical information and the immediate environment.

Title
Format

Tags
193151, 3

Learning Outcome
Students can understand and produce highly practiced words, phrases, and some sentences.

Teaching Area (new)
BCLNO

Course Number
201

Teaching Area
BCLNO

Course Title
Second-Year Language Study: Bicolano

Course Description
Intermediate speaking, listening, reading, and writing skills in Bicolano.

Department
Language Studies

When Taught
Contact Department

Credit Hours

Min:
4

Fixed/Max:
4

Lecture Hours

Fixed:
5

Lab Hours

Fixed:
1

Simple Requisites

Prerequisites

Type
Prerequisite

Prerequisites

Complete ALL of the following Courses:

- BCLNO 102 - First-Year Language Study: Bicolano

Note
Teacher may waive prerequisite based on prior experience.

Learning Outcomes

Title
Elaboration

Tags
196411, 1

Learning Outcome
Create structurally-accurate, elaborated utterances and begin to group utterances into paragraphs and narratives. Do this in present, past and future time.

Title
Vocabulary

Tags
196412, 2

Learning Outcome
Broaden vocabulary for both reception (listening and reading comprehension) and production (speaking and writing).

Title
Grammar

Tags
196413, 3

Learning Outcome
Review and increase understanding of basic language structures.

Title
Culture

Tags
196414, 4

Learning Outcome
Discuss in the target language common products and practices related to every-day life in the target culture.

BCLNO 202 - Second-Year Language Study: Bicolano

Course Information

Teaching Area (new)
BCLNO

Course Number
202

Teaching Area
BCLNO

Course Title
Second-Year Language Study: Bicolano

Course Description
Continued emphasis on Bicolano communication skills, vocabulary building, and cultural awareness.

Department
Language Studies

When Taught
Contact Department

Credit Hours

Min:
4

Fixed/Max:
4

Lecture Hours

Fixed:
5

Lab Hours

Fixed:
1

Simple Requisites

Prerequisites

Type
Prerequisite

Prerequisites

Complete ALL of the following Courses:

- BCLNO 201 - Second-Year Language Study: Bicolano

Note
Teacher may waive prerequisite based on prior experience. Culminating course for GE Languages of Learning requirement. Not an entry course for returned missionaries

Learning Outcomes

Title
Communication Skills

Tags
196415, 1

Learning Outcome
In both written and spoken target language, communicate with reasonable accuracy about real-world activities with well-educated members of the target-culture accustomed to dealing with non-native speakers.

Title
Comprehension

Tags
196416, 2

Learning Outcome
Understand every-day written and verbal instructions. Comprehend concrete details and global meaning of intermediate-level written and spoken passages related to familiar topics that native speakers encounter routinely in their daily life.

Title
Cultural Knowledge

Tags
196417, 3

Learning Outcome
Discuss in the target language cultural practices related to every-day life in the target culture. Acquire basic background knowledge of important achievements related to the target culture (historical figures and events, major literary and artistic movements, government and religious institutions, etc.).

Title
General Education Requirements

Tags
196418, 4

Learning Outcome
Complete Languages of Learning and Global & Cultural Awareness for General Education.

BCLNO 305 - Language Skills Development: Bicolano

Course Information

Teaching Area (new)
BCLNO

Course Number
305

Teaching Area
BCLNO

Course Title
Language Skills Development: Bicolano

Course Description
Increasing proficiency in one or more of the following Bicolano language and culture skills: speaking, listening, reading, writing, cultural awareness.

Department
Language Studies

When Taught
Contact Department

Credit Hours

Min:
1

Fixed/Max:
4

Other Prerequisites
Instructor's consent.

Learning Outcomes

Title
Defined Special Purpose

Tags
196419, 1

Learning Outcome
Develop the overall language and cultural competence to meet the needs of a "special" purpose identified by the Center for Language Studies.

Title
Communication

Tags
196420, 2

Learning Outcome
Communicate effectively enough to function in a variety of situations likely to be encountered when dealing with native speakers associated with the special purpose. This may include interpersonal, interpretive, and presentational (written and oral) modes of communication.

Title
Cultural Competence

Tags
196421, 3

Learning Outcome
Interact with cultural competence and understanding when dealing with native speakers associated with the special purpose.

BCLNO 321 - Advanced Grammar: Bicolano

Course Information

Teaching Area (new)
BCLNO

Course Number
321

Teaching Area
BCLNO

Course Title
Advanced Grammar: Bicolano

Course Description
Systematic review of grammar and syntax of Bicolano.

Department
Language Studies

When Taught
Contact Department

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Prerequisites

Type
Prerequisite

Prerequisites

Complete ALL of the following Courses:

- BCLNO 202 - Second-Year Language Study: Bicolano

Note
Teacher may waive prerequisite based on prior experience.

Learning Outcomes

Title
Analyze

Tags
196422, 1

Learning Outcome
Analyze target language morphology and syntax.

Title
Apply

Tags
196423, 2

Learning Outcome
Apply grammar rules with accuracy to a variety of advanced grammatical and communicative tasks.

Title
Independent Learning

Tags
196424, 3

Learning Outcome
Function as independent learners of the target language by using proper terms and appropriate resources for language analysis.

BCLNO 330 - Advanced Language Proficiency Through Cultural Studies: Bicolano

Course Information

Teaching Area (new)
BCLNO

Course Number
330

Teaching Area
BCLNO

Course Title
Advanced Language Proficiency Through Cultural Studies: Bicolano

Course Description
Study of Bicolano culture using interpersonal, presentational, and interpretive skills in the target language.

Department
Language Studies

When Taught
Contact Department

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Other Prerequisites
Bclno 202 of equivalent.

Note
Entry course for returned missionaries or others of equivalent language experience. Required course for obtaining language credit by examination. May fulfill the GE Languages of Learning requirement.

Learning Outcomes

Title
Communication Skills

Tags
196428, 1

Learning Outcome
In both written and spoken target language, communicate accurately with well-educated members of the target-culture about real-world activities.

Title
Comprehension

Tags
196429, 2

Learning Outcome
Understand detailed written and verbal instructions. Comprehend historical passages, newspaper and magazine articles, and broadcast news reports well educated native speakers encounter routinely in their daily life.

Title
Cultural Knowledge

Tags
196431, 3

Learning Outcome
Acquire background knowledge of important achievements related to the target culture (historical figures and events, major literary and artistic movements, government and religious institutions, etc.). Discuss in the target language cultural practices related to major life events in the target culture (birth, marriage, death, etc.).

Title
General Education Requirements

Tags
196434, 4

Learning Outcome
Complete Languages of Learning and Global & Cultural Awareness for General Education.

Prerequisites

Complete ALL of the following Courses:

- BCLNO 330 - Advanced Language Proficiency Through Cultural Studies: Bicolano

Note
Teacher may waive prerequisite based on prior experience.

Learning Outcomes

Title
Recognize and Analyze

Tags
196437, 1

Learning Outcome
Recognize and analyze the most important genres in target-language literature.

Title
Key Characteristics

Tags
196440, 2

Learning Outcome
Identify and discuss key characteristics of the most important literary movements in the target culture.

Title
Context

Tags
196442, 3

Learning Outcome
Place literature in a meaningful cultural and historical context.

Title
Language Skills

Tags
196443, 4

Learning Outcome
Improve target-language reading, writing, and speaking skills.

BCLNO 350 - Advanced Language Study for Career Purposes: Bicolano

Course Information

Teaching Area (new)
BCLNO

Course Number
350

Teaching Area

Prerequisites

Complete ALL of the following Courses:

- BCLNO 330 - Advanced Language Proficiency Through Cultural Studies: Bicolano

Learning Outcomes

Title
Defined Career Purposes

Tags
196444, 1

Learning Outcome
Develop overall language and cultural competence needed to study and begin entry into a career agreed upon by the Center for Language Studies.

Title
Knowledge

Tags
196445, 2

Learning Outcome
Carry out research to identify, understand, and discuss standards, processes, people and cultural norms associated with the target career.

Title
Interpretive Competence

Tags
196446, 3

Learning Outcome
Understand, interpret and analyze advanced-level written and oral texts on topics related to the target career.

Title
Communicative Competence

Tags
196447, 4

Learning Outcome
Communicate effectively at the advanced-level in order to function in a variety of situations likely to be encountered when dealing with native speakers who are associated with the target career. This will include interpersonal communication and both written and oral presentational communication.

Title
Cultural Competence

Tags
196449, 5

Learning Outcome
Interact with cultural competence and understanding when dealing with native speakers who are associated with the target career.

BIO 100 - Principles of Biology

Course Information

Teaching Area (new)
BIO

Course Number
100

Teaching Area
BIO

Course Title
Principles of Biology

Course Description
Introductory course for general education students.

Department
Biology

When Taught
All Semesters/Terms

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Note
Additional seats for specific sections may be available to Freshman Mentoring participants. NOTE: Also offered by BYU Independent Study; enroll anytime throughout year; one year to complete; additional tuition required.

Learning Outcomes

Title
Biology Literacy

Tags
201313, 1

Learning Outcome
Students will acquire basic literacy in the language of science and biology as evidenced by their ability to: Explain the foundational assumptions underlying science and evaluate the strengths and limitations of science as a human endeavor. Describe basic principles and concepts of biology using appropriate vocabulary. Describe data represented textually, numerically, and graphically, and infer a conclusion from the data. Plan and perform a simple experiment, actual or simulated; draw conclusions, and; communicate the results.

Title
Scientific Reasoning

Tags
201314, 2

Learning Outcome
Students will exercise sound scientific reasoning as evidenced by their ability to: Evaluate scientific evidence and claims at the level of a well-informed layperson in order to make rational decisions on public-policy science issues. Develop intellectual abilities and character traits of sound judgment and effective communication.

Title
Personal Responsibility

Tags
201315, 3

Learning Outcome
Students will accept responsibility for personal and public stewardship as evidenced by their ability to: Integrate sound scientific reasoning with reasoning and methods from other disciplines to address real-world biology-related issues and concerns. Reflect on how literacy in biology and sound scientific reasoning combine with reasoning and methods from other disciplines to increase their ability to act responsibly as stewards and citizens in their own families, communities and the world.

BIO 120 - Field Biology

Course Information

Teaching Area (new)
BIO

Course Number
120

Teaching Area
BIO

Course Title
Field Biology

Course Description
Field Biology is an introduction to the methods of outdoor field research and curation of natural history specimens. Students will learn basic methods of fieldwork. Topics include an introduction to common plant and animal species and communities of Utah, documentation of field notes, and specimen collection and curation. Instruction will be primarily through extended field trips.

Department
Biology

When Taught
Fall and Spring

Credit Hours

Min:
3

Recommended
BIO 100 or BIO 130

Learning Outcomes

Title
Learning Theory

Learning Outcome
Students will be able to compare theories of behaviorism, cognitivism, and constructivism and apply principles from these learning theories to support teaching and learning in their role as teaching assistants.

Title
Instructional Strategies

Learning Outcome
Students will be able to use instructional strategies that pertain to their role and develop lesson plans that use these strategies to remediate students who need individual help and teach large group review sessions.

Title
Diagnosing Misconceptions

Learning Outcome
Students will be able to identify common misconceptions about core biology concepts and implement strategies to identify what misconceptions might be held by individual students they are trying to help.

Title
Classroom Expectations

Learning Outcome
Students will be able to identify and apply various classroom management strategies and demonstrate an understanding of how to aid in student engagement, support student learning, and handle student concerns while maintaining a respectful learning atmosphere.

Title
Professionalism and Ethics

Learning Outcome
Students will demonstrate an understanding of the importance of professionalism and ethical behavior in an educational setting and how following policies and procedures protects them and the students they serve.

Title
Time Management

Learning Outcome
Students will create plans to utilize their time by identifying and engaging struggling students.

BIO 130 - Biology

Course Information

Teaching Area (new)
BIO

Course Number
130

Teaching Area
BIO

Course Title
Biology

Course Description
General biology course with laboratory for biology majors. Introduction to disciplines in the life sciences including methods for scientific inquiry, biochemical dynamics, cell structure and function, evolutionary theory, bioenergetics, and ecological interactions.

Department
Biology

When Taught
Fall; Winter.

Credit Hours

Min:
4

Fixed/Max:
4

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
1

Note
For Permission to Add codes please email biosecretary@byu.edu Additional seats for specific sections may be available to Freshman Mentoring participants through envelopes.

Learning Outcomes

Title
Scientific Process Skills

Tags
200973, 2

Learning Outcome
Students will demonstrate an understanding of the basic scientific principles which undergird the scientific process, including the strengths and weaknesses of this process.

Title
Scientific Discovery

Tags
200974, 3

Learning Outcome
Students will appreciate the excitement of discovery that has accompanied important scientific developments.

Title
Scientific Applicability

Tags
200975, 4

Learning Outcome
Students will demonstrate how scientific methodology can be used to analyze real-world science-related problems.

Title
Data Evaluation

Tags
200976, 5

Learning Outcome
Students will be able to evaluate scientific data and claims in order to make rational decisions on public-policy science issues that affect their community.

Title
Scientific Expression

Tags
200977, 6

Learning Outcome
Students will be able to express their thoughts (in oral, graphical, and written formats) on scientific topics clearly, including appropriate use of basic scientific vocabulary and effective interpretation of quantitative data.

Title
Science and Religion

Tags
200978, 7

Learning Outcome
Students will be able to reflect rationally upon the interface between science and religion.

Title
Scientific Reasoning

Tags
200979, 8

Learning Outcome
Students will demonstrate sound scientific reasoning ability.

Title
Scientific Literacy

Tags
201386, 1

Learning Outcome
Students will demonstrate basic literacy in the language of science and an understanding of the foundational theories of biology (i.e., be able to formulate appropriate hypotheses and predictions to test specific biological phenomena and use appropriate vocabulary to do so)
o Atomic Molecular Theory
o Cell Theory
o Theories of Photosynthesis, Fermentation, and Cellular Respiration
o Cell Division and Meiotic Theories
o Chromosomal and Mendelian Theories of Inheritance
o Watson and Crick's Theory of DNA Structure and Replication
o Protein Synthesis Theory
o Darwin's Theory of Natural Selection
o Hardy-Weinberg Theory
o Ecosystem Theory
o Population Growth Theory
o Competitive Exclusion and Behavioral Theory

BIO 160 - Artificial Intelligence in Medicine

Course Information

Course Number
160

Teaching Area
BIO

Course Title
Artificial Intelligence in Medicine

Course Description
Artificial Intelligence (AI) has become a major driver of medical advances, improving diagnosis, treatment and therapeutics. Future health-care professionals must be familiar with the goals, methods and limitations of AI and machine learning. This course examines how these techniques can drive innovation and improve medical care.

Department
Biology

When Taught
Winter

Credit Hours

Min:
1

Fixed/Max:
1

Lecture Hours

Fixed:
1

Lab Hours

Fixed:
0

Learning Outcomes

Title
Identify medical applications of AI

Learning Outcome
Students will be able to identify AI and machine learning of many varieties in current medical practice and medical research.

Title
Evaluate Potential

Learning Outcome
Students will evaluate emerging uses of machine learning in medicine by assessing potential limitations and sources of bias. Students will be able to contrast various metrics of accuracy and critique how a deficiency in an aspect of accuracy might impact the practical utility and broad application of an AI method.

Title
AI and Agency

Learning Outcome
Students will be able to defend appropriate uses of AI in their life, in a way that preserves agency and personal responsibility for learning and growth. (Elder Bednar - Things as they really are 2.0)

Title
Creativity

Learning Outcome
Students will propose new medical AI technology. They will defend the utility and define the scope of their proposed method with a clear training goal, and the proposed AI methodology that they believe can achieve their goal. They will demonstrate the feasibility of their approach by citing currently available datasets and/or methods to create new datasets of sufficient size and complexity to achieve the training goal.

BIO 165 - Introduction to Bioinformatics

Course Information

Teaching Area (new)
BIO

Course Number
165

Teaching Area
BIO

Course Title
Introduction to Bioinformatics

Course Description
This course introduces the field of bioinformatics at an introductory level. Students learn about the field and gain experience with computer programming at a level that provides a foundation for future learning.

Department
Biology

When Taught
Fall and Winter

Credit Hours

Fixed/Max:
2

Lecture Hours

Fixed:
2

Lab Hours

Fixed:
0

Other Prerequisites
BIO 100 or BIO 130 or CELL 120 or MMBIO 121 or concurrent enrollment

Note
Also offered by BYU Independent Study; enroll anytime throughout year; one year to complete; additional tuition required; register at is.byu.edu.

Learning Outcomes

Title
Python programming

Tags
201379, 0, 1

Learning Outcome
Students will be able to design and implement Python programs that parse, validate, transform, and summarize biological data from several file formats (e.g., FASTA/FASTQ, VCF, GFF/GTF, etc.), producing outputs that conform to a given schema.

Title
Applications within biology

Tags
201378, 0, 2

Learning Outcome
Students will be able to communicate how computational methods transform biological data into findings across various domains.

Title
Spiritually strengthening

Tags
210564, 0, 3

Learning Outcome
Students will be able to recognize and articulate Christlike attributes demonstrated by their peers during collaborative work, explain how these attributes contribute to collective learning, and reflect on their own character development by identifying personal strengths and areas for growth.

Title
Character building

Learning Outcome
Students will be able to leverage technology, including emerging tools such as artificial intelligence, to enhance the efficiency and effectiveness of their learning and work. When applying technology to academic or professional tasks, students will demonstrate discernment by upholding ethical standards and academic integrity.

BIO 166 - Bioinformatics Skills: Workflows

Course Information

Course Number
166

Teaching Area
BIO

Course Title
Bioinformatics Skills: Workflows

Course Description
Students will learn concepts and skills related to operating systems generally, the Linux operating system, and using computational workflows to execute bioinformatics software.

Department
Biology

When Taught
Winter Term 1

Credit Hours

Fixed/Max:
1

Lecture Hours

Fixed:
1

Lab Hours

0

Simple Requisites

BIO 165

Type
Prerequisite

Complete ALL of the following Courses:
- BIO 165 - Introduction to Bioinformatics

Learning Outcomes

Title
Linux skills

Learning Outcome
Students will be able to effectively use Linux tools to query, navigate, and manipulate biological data in text files.

Title
Software depencencies

Learning Outcome
Students will be able to execute existing bioinformatics tools at the command line and ensure that library dependencies are available.

Title
Computational workflows

Learning Outcome
Students will be able to construct and execute multi-threaded bioinformatics workflows in a high-performance computing environment.

Title
Interpersonal skills

Learning Outcome
Students will practice Christ-like collaboration through paired programming assignments.

BIO 194 - Introduction to Mentored Research

Course Information

Prerequisite

Prerequisites

Fulfill ANY of the following requirements:

Prerequisites

Complete ALL of the following Courses:

- CELL 120 - Science of Biology

OR

Prerequisites

Complete ALL of the following Courses:
- BIO 130 - Biology

OR

Prerequisites

Complete ALL of the following Courses:
- MMBIO 121 - General Biology: Health and Disease

Learning Outcomes

Title
Clade Animalia Evolution

Tags
201007, 1

Learning Outcome
Students will be able to discuss the broad patterns of the evolution of the clade Animalia, emphasizing the relationships among major sub-clades (phyla), the unique biological attributes that define these clades, and the novel changes in morphology over major transitions (unicellular to multicellular; acoelomate to pseudocoelomate to coelomate body plans, bilaterial vs radial symmetry, origins of exoskeletons, gill slits, notochord, crania & vertebral columns, etc.).

Title
Phylogenetic Systematics

Tags
201008, 2

Learning Outcome
Students will develop the skills necessary to understand the terminology of phylogenetic systematics and methods used to recover the "tree of life", the logic behind the hierarchy (i.e., the only possible outcome of the process of "descent with modification"), and critically apply evolutionary reasoning, including the use of phylogeny and tree-thinking, to formulate and test hypotheses that explain biological diversity.

Title
Intellectual Tools

Tags
201009, 3

Learning Outcome
Students will have the intellectual tools to continue to explore related topics with confidence and understanding throughout their lives, and a deeper appreciation for the diversity of life on earth.

BIO 230 - Biological Diversity: Plants

Course Information

Teaching Area (new)
BIO

Course Number
230

Teaching Area
BIO

Course Title
Biological Diversity: Plants

Course Description
Comparative organization and evolutionary significance of morphological, physiological, reproductive, and ecological differences in fungi, algae, and principal groups of land plants. Laboratory included.

Complete ALL of the following Courses:

- MMBIO 121 - General Biology: Health and Disease

Learning Outcomes

Title
Discuss Connections

Tags
208243, 0, 1

Learning Outcome
Students will be able to discuss similarities, differences, and evolutionary connections between cyanobacteria, algae, bryophytes, non-seed vascular plants, gymnosperms, flowering plants, and fungi with respect to their lifecycles, characteristic morphologies, and biological roles

Title
Evolutionary Logic

Tags
208244, 0, 2

Learning Outcome
Students will develop the skills necessary to understand and critically apply evolutionary logic, including the use of phylogeny and tree-thinking to formulate and test hypotheses that explain biological diversity.

Title
Explore Related Topics

Tags
208245, 0, 3

Learning Outcome
Students will be able to continue to explore related topics with confidence and understanding throughout their lives.

BIO 235 - Field Botany

Course Information

Learning Outcomes

Title
Knowledge of Plant Biology

Tags
201013, 0, 1

Learning Outcome
Demonstrate a mastery of plant morphology and associated terminology by successfully using a taxonomic key to identify native and cultivated trees and shrubs.

Title
Taxonomic Identification

Tags
201014, 0, 2

Learning Outcome
Use the most recent scientific and common names to correctly identify approximately 200 different plant species using distinguishing characteristics both in the field and with collected specimens.

Title
Build a Natural History Collection

Tags
201015, 0, 3

Learning Outcome
Build and document a botanical natural history collection by collecting and preparing a scientifically useful plant specimen with the necessary label information.

BIO 242 - Curation of Biodiversity Collections

Course Information

Course Number
242

Teaching Area
BIO

Course Title
Curation of Biodiversity Collections

Course Description
Rationale, methods, and standards of curation for organismal specimens across the tree of life with an emphasis on physical preservation, responsible specimen use & loans, database standards, and digitization methods for electronic dissemination of specimen data.

Department
Biology

When Taught
Winter Term 1

Credit Hours

Learning Outcomes

Title
Role of Biodiversity

Learning Outcome
Students will be able to articulate the relevance of biodiversity collections in specimen-based research and species conservation.

Title
Responsibilities and Methodologies

Learning Outcome
Students will develop skills pertaining to responsibilities and methodologies used in contemporary specimen curation and data management.

Title
Data Management

Learning Outcome
Students will gain experience with data standards and databases used for specimen data and biodiversity collection management.

Title
Comparisons

Learning Outcome
Students will be able to discuss diverse methodologies for specimen curation required across multiple organismal groups, based on inherent differences in organisms.

Title
Career Preparation

Learning Outcome
Students will prepare a CV demonstrating knowledge of common skills desired of curators/collection managers of natural history collections.

Title
Life-long Learning

Learning Outcome
Students will gain foundational knowledge that can enhance their passion and commitment to stewardship of earth's natural resources.

BIO 250 - Evolutionary Medicine

Course Information

Teaching Area (new)
BIO

Course Number
250

Teaching Area
BIO

Course Title
Evolutionary Medicine

Course Description
Evolutionary medicine is the field of study of how Darwinian principles can be applied to understand problems in medicine and public health. Students will learn foundational principles of evolution including genetic processes of adaptation and genetic drift, the origin of life, and the hominin fossil record. With this foundational understanding, students will explore modern examples of evolution and human health problems.

Prerequisite

Prerequisites

Fulfill ANY of the following requirements:

Prerequisites

Complete ANY of the following Courses:

- BIO 130 - Biology
  OR CELL 120 - Science of Biology
  OR MMBIO 121 - General Biology: Health and Disease

Note
Preference will be given to students in the Biology, Biodiversity & Conservation, and Bioinformatics majors.

Learning Outcomes

Title
Statistical Programming

Learning Outcome
Students will be able to write computer code at an intermediate level using statistical software.

Title
Statistical Analyses

Learning Outcome
Students will be able to identify appropriate statistical tests for a diverse range of biological data types, perform those statistical tests, and draw appropriate conclusions from the outputs.

Title
Machine Learning

Learning Outcome
Students will be able to apply basic machine-learning techniques to biological data and draw appropriate conclusions from the outputs.

Title
Visualization

Learning Outcome
Students will be able to prepare publication-quality graphics.

Title
Research Design

Learning Outcome
Students will be able to design a well-powered (in a statistical sense) research experiment.

BIO 276 - Exploration of Teaching in Biological Sciences

Course Information

Teaching Area (new)
BIO

Course Number
276

Teaching Area
BIO

Course Title
Exploration of Teaching in Biological Sciences

Course Description
Field-based initial teaching experience directed at helping prospective teachers experience demands and opportunities associated with teaching secondary students.

Department
Biology

When Taught
Fall

Credit Hours

Min:
3

Fixed/Max:
3

Simple Requisites

Prerequisites

Type
Prerequisite

Prerequisites

Complete ALL of the following Courses:

- BIO 220 - Biological Diversity: Animals
  AND BIO 230 - Biological Diversity: Plants
  AND CHEM 105 - General College Chemistry 1 with Lab (Integrated)

Other Prerequisites
major GPA of 2.85 or higher, FBI fingerprint and background clearance; previous application required

Learning Outcomes

Title
Lesson Development

Tags
201216, 1

Learning Outcome
Design and develop simple lessons containing the essential components; objectives, procedures, and evaluation.

Title
Effective Teaching and Planning

Tags
201252, 2

Learning Outcome
Model both effecive teaching and lesson planning by teaching lessons that exhibit your abilities to use inquiry-based lessons and demonstrate both the hierarchy of learning and strategies for teaching students with diverse learning styles.

Title
Effective Teacher Characteristics

Tags
201271, 1

Learning Outcome
Identify and demonstrate the characteristics of effective teachers.

BIO 310 - Comparative Animal Physiology

Course Information

Teaching Area (new)
BIO

Course Number
310

Teaching Area
BIO

Course Title
Comparative Animal Physiology

Course Description
We will compare different animals' anatomical and physiological solutions to organismal needs (e.g., energy metabolism, sensory processes, reproduction, etc.) considering their different environments and evolutionary pressures.

Department
Biology

When Taught
Winter

Credit Hours

Min:
4

Fixed/Max:
4

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
3

Simple Requisites

Prerequisite

Type
Prerequisite

Complete ALL of the following Courses:
- BIO 130 - Biology

Learning Outcomes

Title
Compare and contrast species

Learning Outcome
Students will be able to compare and contrast the physiology of a wide variety of animal species and make inferences about their evolutionary relatedness.

Title
Relate structure to function

Learning Outcome
Students will be able to relate the structure of tissues, organs, and organ systems to their functions.

Title
Apply foundational principles

Learning Outcome
Students will be able to apply foundational principles of cellular biology and biochemistry from introductory biology to new contexts in animal physiology and identify emergent properties that arise from physiological systems.

Title
Propose hypotheses

Learning Outcome
Students will be able to popose hypotheses to explain physiological phenomena and draw conclusions from primary data.

Title
Predict changes

Learning Outcome
Students will be able to predict both short-term and long-term changes in animal physiology due to changing environments.

BIO 316 - Advanced Scientific Writing and Communication

Course Information

Teaching Area (new)
BIO

Course Number
316

Teaching Area
BIO

Course Title
Advanced Scientific Writing and Communication

Course Description
The effective process of written, oral, and visual scientific communication and development of communication skills for scientific and professional audiences. Employment of appropriate research tools and processes in identifying and evaluating sources, and following professional conventions in written and oral communication.

Department
Biology

When Taught
Fall and Winter

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Simple Requisites

Prerequisites

Type
Prerequisite

Prerequisites

Complete ALL of the following Courses:
- WRTG 150 - Writing and Rhetoric

Note
This course is designed for students in Biology majors who have participated in mentored research and have data that can be written about. Some students collected the data previously; other students are provided the data by their mentors. If given data by a mentor, a student could be concurrently enrolled in mentored research or they could have just started working in a lab. Data could also be from a past internship. The pre-requisite is having access to data (with some results) and a scientific mentor.

BIO 350 - Ecology

Course Information

Teaching Area (new)
BIO

Course Number
350

Teaching Area
BIO

Course Title
Ecology

Course Description
Distribution and abundance of organisms and their interactions with the physical and biotic components of the earth.

Department
Biology

When Taught
Fall and Winter

Fulfill ANY of the following requirements:

Prerequisites

Complete ALL of the following Courses:

- CELL 120 - Science of Biology

OR

Prerequisites

Complete ALL of the following Courses:

- BIO 130 - Biology

OR

Prerequisites

Complete ALL of the following Courses:

- MMBIO 121 - General Biology: Health and Disease

Learning Outcomes

Title
Environmental Stewardship

Tags
201021, 4

Learning Outcome

Foster and promote environmental stewardship within your realm of influence and your community.

Title
Organizational Processes

Tags
201019, 0, 2

Learning Outcome

Predict impacts on organization of the biotic world due to changes in energetics in the ecosystem, population dynamics, and species interactions.

Title
Writing

Tags
201020, 0, 3

Learning Outcome

Use writing as a way of synthesizing and solidifying critical thought.

Title
Human Well-Being

Tags
201022, 0, 5

Learning Outcome

Draw connections between ecology and issues regarding human well-being

Title
Physical Processes

Tags
201018, 0, 1

Learning Outcome

Use an understanding of the major physical processes that form and characterize the biosphere, including global scale energy flow, the carbon cycle, climate, and soil formation, to solve ecological problems.

Title
Ecology Connectivity

Tags
201023, 0, 6

Learning Outcome

Connect ecology to other fields of study

Title
Conservation

Tags
209894, 0, 7

Learning Outcome

Communicate the reality of consequences of human activities, including climate change and the Holocene mass extinction.

BIO 362 - Computational Cancer Biology

Course Information

Teaching Area (new)
BIO

Course Number
362

Teaching Area
BIO

Course Title
Computational Cancer Biology

Course Description
Examine the altered cellular phenotypes of cancer through a computational exploration of molecular and clinical data, comparing and contrasting different cancer types.

Department
Biology

When Taught
Fall.

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Simple Requisites

Prerequisites

Type
Prerequisite

Prerequisites

Complete ALL of the following Courses:

- BIO 130 - Biology
  AND BIO 264 - Statistical Analysis for Biologists

Note
If students have taken other course(s) that involved computer programming and statistics but have not completed BIO 264, they should contact the instructor to evaluate whether they are prepared to take the course.

Learning Outcomes

Title
Evaluate phenotypic impact

Tags
213157, 0, 1, 2023-08-15 10:43:03

Learning Outcome
Students will be able to evaluate phenotypic impact of genetic mutations in cancer.

Title
Compare and contrast multi-omics data

Tags
213158, 0, 2, 2023-08-15 10:43:03

Learning Outcome
Students will be able to compare and contrast the value and appropriate uses for multi-omics data.

Title
Self-directed learning

Tags
213159, 0, 3, 2023-08-15 10:43:03

Learning Outcome
Students will be able to discuss, analyze and evaluate original scientific research on cancer. From these resources they will be able to generate their own hypotheses and questions, gather data, and evaluate their hypotheses.

Title
FAIR research practices

Tags
213160, 0, 4, 2023-08-15 10:43:03

Learning Outcome
Students will be able to plan and conduct reproducible and transparent research.

BIO 364 - Bioinformatics Algorithms

Course Information

Teaching Area (new)
BIO

Course Number
364

Teaching Area
BIO

Course Title
Bioinformatics Algorithms

Course Description
In this course, students learn theory and concepts of bioinformatics algorithms that are used in the field. They gain experience implementing these algorithms and applying them. These algorithms are used in diverse biological disciplines, including genome assembly, phylogenetics, multiple sequence alignment, next-generation sequencing read mapping, gene-expression analysis, and mass-spectrometry analysis.

BIO 368 - (Bio-MMBio-PWS) Genomics

Course Information

Teaching Area (new)
BIO

Course Number
368

Teaching Area
BIO

Course Title
(Bio-MMBio-PWS) Genomics

Course Description
Current analysis of genes and genomes; computational approaches for interpreting genomic data, including genome sequencing and annotation, gene expression and the transcriptome, functional genomics, metagenomics, and genetic variation and SNPs.

Department
Biology

When Taught
Fall and Winter

Credit Hours

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Simple Requisites

Prerequisites

Type
Prerequisite

Prerequisites

Complete ALL of the following Courses:

- MMBIO 240 - Molecular Biology
  AND PWS 340 - Genetics

Learning Outcomes

Title
Identify genomic techniques

Tags
213376, 0, 1, 2023-08-28 14:04:20

Learning Outcome
Students will be able to identify the appropriate technique for a genetic analysis by understanding the following about various techniques: how they work, what they are used for, and what their respective advantages and disadvantages are.

Title
Genomic Experiments

Tags
213377, 0, 2, 2023-08-28 14:04:23

Learning Outcome
Students will complete a series of exercises with data representing genomic experiments (analysis and interpret).

Title
Genome Sequences

Tags
213378, 0, 3, 2023-08-28 14:04:25

Learning Outcome
Students will describe how genomes are sequenced.

Title
Evaluate emerging technologies

Tags
213379, 0, 4, 2023-08-28 14:04:26

Learning Outcome
Students will be able to interpret, assess, and critically evaluate the quality and veracity of new results and techniques in genomics by learning and critically applying their understanding of the biological principles on which current techniques are based.

Title
Genomic Features

Learning Outcome
Students will understand techniques and concepts to assess genomic features such as methylation, gene expression, etc.

Title
Communicate effectively

Learning Outcome
Students will be able to communicate technical science to an expert or lay audience by understanding the concepts underlying genomics tools and summarizing these tools orally and in writing, in both technical and non-technical terms.

BIO 370 - Bioethics

Course Information

Teaching Area (new)
BIO

Course Number
370

Teaching Area
BIO

Course Title
Bioethics

Course Description
In-depth lecture and small group discussion of varied bioethical issues. LDS Church positions emphasized when appropriate.

Department
Biology

When Taught
Fall

Credit Hours

Min:
2

Fixed/Max:
2

Lecture Hours

Fixed:
1

Lab Hours

Fixed:
3

Other Prerequisites
Introductory biology course

Learning Outcomes

Title
Philosophical Underpinnings of Bioethics and Bioethical Issues

Tags
200980, 1

Learning Outcome
Students will understand the ethical and philosophical underpinnings of bioethics and to develop ethical intuitions on bioethical issues.

Title
Terminology, Vocabulary, and Objectives

Tags
200981, 2

Learning Outcome
Students will learn the terminology, vocabulary, and objectives of bioethics.

Title
Bioethical Decisions

Tags
200982, 3

Learning Outcome
Students will understand the tools and approaches needed to make a bioethical decision and to communicate that decision in rationally informed way

Title
Bioethical Primary Literature

Tags
200983, 4

Learning Outcome
Students will understand the bioethical primary literature, to understand how to read case studies, and familiarity with the major issues being discussed in bioethics today.

BIO 375 - Plant Development and Morphology

Course Information

Teaching Area (new)
BIO

Course Number
375

Teaching Area
BIO

Course Title
Plant Development and Morphology

Course Description
Principles of development and morphology as applied to flowering plants from the seed to flowering

Department
Biology

When Taught
Fall Odd Yrs..

Type
Prerequisite

Prerequisites

Complete ALL of the following Courses:

No selection provided

Recommended
Bio 230

Learning Outcomes

Title
Basic Understanding of Plant Morphology

Tags
201294, 1

Learning Outcome
Students will be able to analyze and describe modifications associated with plant adaptations and identify homologies underlying convergent organs using the principles of plant morphology.

Title
Evaluate Primary Literature

Tags
201295, 2

Learning Outcome
Students will be able to read and critically evaluate the conclusions from primary scientific literature on plant development and morphology.

Title
Morphological changes over time

Tags
201296, 3

Learning Outcome
Students will be able to apply morphological principles by documenting morphological change over the entire life cycle of an annual plant.

Title
Appreciating plant diversity

Learning Outcome
Students will gain an appreciation for the diversity of plant form and function and their contribution to both human flourishing and natural ecosystems.

BIO 377 - Teaching Methods and Instruction in Biology

Course Information

Teaching Area (new)
BIO

Course Number
377

Teaching Area

Course Title
Teaching Methods and Instruction in Biology

Course Description
Developing meaningful and engaging instruction for secondary students in biological sciences; developing critical thinking, problem solving, literacy, and democratic character; assessing learner performance.

Department
Biology

When Taught
Fall

Credit Hours

Min:
3

Fixed/Max:
3

Simple Requisites

Prerequisites

Type
Prerequisite

Prerequisites

Complete ALL of the following Courses:
- BIO 276 - Exploration of Teaching in Biological Sciences

Other Prerequisites
concurrent enrollment in Bio 378, 379, Sc Ed 380; major GPA of 2.85 or higher.

Learning Outcomes

Title
Learning Theories

Tags
201217, 1

Learning Outcome
Students will demonstrate an understanding of key learning theories by explaining how students learn.

Title
Lesson Development

Tags
201237, 3

Learning Outcome
Students will develop effective unit and lesson plans to promote science learning.

Title
Pedagogical Practices

Tags
201243, 1

Learning Outcome
Students will demonstrate proper pedagogical practices in a biological teaching setting.

BIO 378 - Practicum in Biology Teaching

Other Prerequisites
Concurrent enrollment in Bio 377, 379, Sc Ed 380.

Learning Outcomes

Title
Best Teaching Practices

Tags
201210, 1

Learning Outcome
Students will be able to identify best practices in teaching.

Title
Mentoring Involvement

Tags
201225, 1

Learning Outcome
Students will show active involvement with mentor teacher in creating and teaching lessons, grading papers, or any other classroom work.

Title
Teaching Practices

Tags
201233, 2

Learning Outcome
Students will be able to identify practices that they can incorporate into their own teaching.

BIO 379 - Classroom Management and Laboratory Safety

Course Information

Teaching Area (new)
BIO

Course Number
379

Teaching Area
BIO

Course Title
Classroom Management and Laboratory Safety

Course Description
Current theory, research, and application in classroom management; creating positive teacher-student and peer relationships; developing optimal learning environments.

Department
Biology

When Taught
Fall

Credit Hours

Min:
1

Fixed/Max:
1

Lecture Hours

Other Prerequisites
Concurrent enrollment in Bio 377, 378, Sc Ed 380

Learning Outcomes

Title
Optimal Learning Environment

Tags
201244, 1

Learning Outcome
Students will integrate current theory, research, and application in classroom management to create an optimal learning environment.

Title
Laboratory Safety

Tags
201253, 2

Learning Outcome
Students will demonstrate an understanding of proper laboratory safety protocols.

Title
Classroom Management

Tags
201269, 1

Learning Outcome
Students will demonstrate appropriate and effective classroom management strategies.

BIO 392R - Preveterinary Preceptorship

Course Information

Teaching Area (new)
BIO

Course Number
392R

Teaching Area
BIO

Course Title
Preveterinary Preceptorship

Course Description
Supervised on-the-job exposure to veterinary medicine under a clinical setting, supplemented with academic assignments.

Department
Biology

When Taught

Fixed:
5

Learning Outcomes

Title
Preceptorship Skill Mastery

Tags
201073, 1

Learning Outcome
Skills student should master during the preveterinary medicine preceptorship experience:Husbandry: feeding, sanitation, handling, breed recognitionRestraint of animals for examination, treatment and radiographyLogging medical data and recording information in patient chartsGrooming for medical reasonsObserve and recognize normal and abnormal body functions and vital signsConcepts of animal welfare and humane treatment of animalsIntroduce methods and explain necessity of animal population controlObtain knowledge of and competency with routine preventive medicine including vaccination protocols, parasite identification-treatment-prevention, routine physical examination, geriatric health care

Title
Activity Observation and Participation

Tags
201074, 2

Learning Outcome
The student should observe and participate in these activities:Client-doctor relations and dialogue; demonstration of veterinary ethics and integrity; diagnostic thought process and rationalePatent examination; administration of medication and therapy; collection of body fluids and specimensMedical record information entryClinical diagnostic laboratory techniquesDeveloping and interpreting radiographsSurgical suite protocols:preparation of instrument packs, drapes, surgical gownsaseptic techniqueanesthesia administration and monitoringsurgical preparation of patientsurgery protocols and surgical assistanceintensive and post-operative nursing careEuthanasia

Title
Hospital Areas

Tags
201075, 3

Learning Outcome
Areas of hospital student should receive exposure to:Kennel and quarantine wardsTreatment areasSurgery and examination roomsOffice proceduresTelephone etiquetteLaboratory and pharmacyLibrary search and literature review of clinical case information and current treatments based on veterinary research

BIO 399R - Academic Internship

Course Information

Teaching Area (new)
BIO

Course Number
399R

BIO

Course Title
Academic Internship

Course Description
This course provides credit for students engaged in internship opportunities within the university or with research or industry groups outside of the university. Students will gain practical skills through mentored experiences in authentic environments.

Department
Biology

When Taught
All Semesters/Terms

Credit Hours

Min:
0.5

Fixed/Max:
6

Other Prerequisites
Mentor's consent or verified external internship

Note
An APPROVED Internship Application is required before adding.

BIO 410 - Conservation Biology

Course Information

Course Number
410

Teaching Area
BIO

Course Title
Conservation Biology

Course Description
This course will explore key biological frameworks, including the history of conservation biology, patterns of biodiversity, causes of extinction and population decline, methods for population restoration, conservation genetics, and the role of conservation in sustaining ecosystem services. We will also study the human aspects of conservation, covering topics such as values and ethics in conservation, conservation economics and sustainable development.

Type
Prerequisite

Complete ALL of the following Courses:
- BIO 350 - Ecology

Learning Outcomes

Title
Evaluation

Learning Outcome
Students will be able to evaluate the key factors that have shaped the historical development of conservation and the fundamental scientific principles underlying it.

Title
Integration

Learning Outcome
Students will be able to integrate the ecological and evolutionary processes that are vital for effective biodiversity conservation.

Title
Conservation and Management Strategies

Learning Outcome
Students will be able to analyze case studies and propose actionable solutions by applying knowledge of key conservation strategies to preserve biodiversity.

Title
Theories and Methods

Learning Outcome
Students will be able to describe the scientific process in the context of conservation biology, emphasizing the importance of theories and the methods used to test hypotheses.

Title
Interdisciplinarity

Learning Outcome
Students will be able to articulate how the biological, social sciences, and humanities intersect and influence conservation programs and initiatives.

Title
Stewardship

Learning Outcome
Students will be able to embrace their spiritual responsibility of stewardship, fostering a commitment to care for the Earth for future generations.

BIO 420 - Evolutionary Biology

Course Information

Teaching Area (new)
BIO

Course Number

Prerequisite

Prerequisites

Complete ALL of the following Courses:

- PWS 340 - Genetics

Other Prerequisites
BIO 350

Recommended
BIO 220 or BIO 230 and BIO 350

Learning Outcomes

Title
History and Development

Tags
200984, 1

Learning Outcome
Students will be able to describe the history and development of evolutionary thought.

Title
Evidence for Evolution

Tags
200985, 2

Learning Outcome
Students will be able to list and describe the evidence for evolution and its required corollaries.

Title
Processes of Evolution

Tags
200986, 3

Learning Outcome
Students will be able to describe the mechanisms by which evolution occurs. Provide detailed explanations of the the processes of evolution by mutation, migration, genetic drift, non-random mating, and natural selection.

Title
Adaptation

Tags
200987, 4

Learning Outcome
Students will be able to explain adaptation, providing examples from several different fields of biology (e.g., cell biology, physiology, conservation biology, bioinformatics, medicine, behavior, etc.).

Title
Life on Earth

Tags
200988, 5

Learning Outcome
Students will be able to describe the history of life on earth. Identify major evolutionary transitions over time, and explain the tools and evidence that support current hypotheses of the history of life.

BIO 430 - Plant Classification and Identification

Course Information

Teaching Area (new)
BIO

Course Number
430

Teaching Area
BIO

Course Title
Plant Classification and Identification

Course Description
Principles of plant systematics, taxonomy, and classification, emphasizing family recognition by sight, terminology, and use of identification keys to the temperate flora.

Department
Biology

When Taught
Fall

Credit Hours

Min:
4

Fixed/Max:
4

Lecture Hours

Fixed:

Prerequisites

Complete ALL of the following Courses:

- BIO 230 - Biological Diversity: Plants

Other Prerequisites
or instructor's consent

Learning Outcomes

Title
Sight Identification

Tags
208249, 0, 1

Learning Outcome
Students will identify by sight 43 families of flower plants, five families of gymnosperms, and several families of fern allies by recognizing differentiating features for each family.

Title
Vocabulary

Tags
208246, 0, 2

Learning Outcome
Students will apply correct vocabulary for describing plant parts and be able to deduce the meaning of new terms based on knowledge of common roots, prefixes, and suffixes.

Title
Key Use

Tags
210880, 0, 3

Learning Outcome
Students will use keys and manuals to correctly identify unknown plants to species, demonstrating understanding of the primary features essential for identification within major plant groups, and how keys work.

Title
Modern Systematics

Tags
208248, 0, 5

Learning Outcome
Students will articulate the significance of monophyly in the creation of modern classification systems.

Title
Taxonomic Tools

Tags
210881, 0, 4

Learning Outcome
Students will demonstrate proficiencey with online databases and herbarium resources to research plant names, authorship, dates of publication, distributions, and other essential taxonomic information.

Title
Links to Other Biological Fields

Tags
208250, 0, 6

Learning Outcome
Students will be able to discsss the relevance and linkages between plant systematics and biological fields such as conservation biology, ecology, evolution, and other comparative sciences.

BIO 441 - Entomology

Course Information

Teaching Area (new)
BIO

Course Number
441

Teaching Area
BIO

Course Title
Entomology

Course Description
External morphology, natural history, evolution, distribution, and phylogeny of insects. Insect collection required.

Department
Biology

When Taught
Fall

Credit Hours

Min:
4

Fixed/Max:
4

Lecture Hours

Fixed:
2

Lab Hours

Fixed:
3

Other Prerequisites
Bio 220 or equivalent.

Learning Outcomes

Title
Application of Basic Principles

Learning Outcome
Students will be able to describe basic principles of insect morphology and their major innovations in the context of insect systematics and apply these principles to insect diversity.

Title
Read, Manipulate, Draw, and Explain Phylogenies

Learning Outcome
Students will be able to outline current hypotheses of insect phylogeny at the ordinal level, synapomorphies that support them, and explain the data for newly proposed hypotheses.

Title
Key-based Identification

Learning Outcome
Using identification keys, students will be able to identify morphological features of both internal and external body structures to successfully “key out” insects at the ordinal and family level.

Title
Visual Identification

Learning Outcome
Students will be able to identify common insect orders and families by memory through visual inspection.

Title
Wonder, Perspective, and Appreciation

Learning Outcome
Students will be able to articulate their perspectives on the beauty, diversity, and complexity of insects and their places in the natural world.

Title
Creation and Diversity

Learning Outcome
Student will also be able to tell the story as to why God may have an inordinate fondness for insects, and how this story relates to their own view of creation.

Title
Functional Relationships

Learning Outcome
Students will be able to apply standard methodologies to collect specimens, record life history traits in specific variable habitats, and contextualize their place as major players in diverse ecosystems around the world.

Title
Collection and Curation

Learning Outcome
Students will create a large, professional curated insect collection drawn from insects they collect, pin, label, and organize.

BIO 443 - Ichthyology

Prerequisites

Complete ALL of the following Courses:

- BIO 220 - Biological Diversity: Animals

Learning Outcomes

Title
Museum Curation

Tags
201045, 0, 1

Learning Outcome
Develop and maintain a biological museum collection, as well as defend their utility in modern day science.

Title
Scientific Literature

Tags
201046, 0, 2

Learning Outcome
Research, synthesize, and present arguments from current scientific literature.

Title
Specimen Observation

Tags
201047, 0, 3

Learning Outcome
Use scientific keys and multiple digital tools to identify and record observations of biological specimens in the field.

Title
Species Identification

Tags
201048, 0, 4

Learning Outcome
Identify all Utah herps to species, common U.S. herps to Genus, and herps worldwide to Family.

Title
Species Conservation

Tags
201049, 0, 5

Learning Outcome
Design conservation solutions for the major issues threatening reptile and amphibian groups at all taxonomic levels.

BIO 447 - Mammalogy

Course Information

Teaching Area (new)
BIO

Course Number
447

Teaching Area
BIO

Course Title
Mammalogy

Course Description
Mammalian diversity, evolution, distribution, and natural history. Two three-day field trips required.

Department
Biology

When Taught
Contact Department

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
2

Lab Hours

3

Simple Requisites

Prerequisites

Type
Prerequisite

Prerequisites

Fulfill ANY of the following requirements:

Prerequisites

Complete ALL of the following Courses:

- BIO 220 - Biological Diversity: Animals

OR

Prerequisites

Complete ALL of the following Courses:

- PWS 344 - Natural History of Wildlife

Learning Outcomes

Title
Utah Mammals

Tags
201062, 1

Learning Outcome
Be able to recognize the more common species of Utah mammals based on external and skull features

Title
Identify Mammal Orders

Tags
201063, 2

Learning Outcome
Be able to recognize and identify most orders of mammals based on features of the skull

Title
Evolutionary History

Tags
201064, 3

Learning Outcome
Understand the evolutionary history of mammals and the modern diversity of mammalian orders

Title
Original Scientific Literature

Tags
201065, 4

Learning Outcome
Enhance skills directed toward understanding and interpreting original scientific literature dealing with mammalian biology

BIO 450 - Capstone in Biodiversity and Conservation

Course Information

Teaching Area (new)
BIO

Course Number
450

Teaching Area
BIO

Course Title
Capstone in Biodiversity and Conservation

Course Description
Students will apply principles of biodiversity and conservation to complete a complex project that integrates their disciplinary understanding to address a broad issue in conservation or biodiversity research. This culminating experience will allow students to create a project that will facilitate their transition into a post baccalaureate environment.

Department
Biology

When Taught
Fall

Credit Hours

Prerequisite

Prerequisites

Fulfill ANY of the following requirements:

Prerequisites

Complete ALL of the following Courses:

- BIO 220 - Biological Diversity: Animals
  AND BIO 350 - Ecology

OR

Prerequisites

Complete ALL of the following Courses:

- BIO 230 - Biological Diversity: Plants
  AND BIO 350 - Ecology

Recommended

ENGL 316; ENGL 316

Learning Outcomes

Title
Conservation in Ecological Processes

Tags
200994, 1

Learning Outcome
Apply an understanding of ecological processes to conservation of populations, species, and ecosystems.

Title
Environmental Stewardship

Tags
200995, 2

Learning Outcome
Foster and promote environmental stewardship within your realm of influence and your community.

Title
Scientific Method and Analytical Thinking

Tags
200996, 3

Learning Outcome
Demonstrate the ability to apply the scientific method and analytical thinking to ecological and conservation issues.

Title
Synthesizing Literature for Conservation Biology

Tags
200997, 4

Learning Outcome
Demonstrate the ability to synthesize literature relevant to a topic in conservation biology

Title
Scientific Term Paper

Tags
200998, 5

Learning Outcome
Demonstrate the ability to write a scientific term paper

BIO 452 - Marine Biology

Course Information

Teaching Area (new)
BIO

Course Number
452

Teaching Area
BIO

Course Title
Marine Biology

Course Description
Principles of physical and biological oceanography, biodiversity, and ecology of numerous ocean habitats.

Department
Biology

When Taught
Winter Even Years

Credit Hours

Fixed/Max:
3

Lecture Hours

Fixed:
3

Simple Requisites

Prerequisites

Type
Prerequisite

Prerequisites

Fulfill ANY of the following requirements:

Prerequisites

Complete ALL of the following Courses:

OR

Prerequisites

Complete ALL of the following Courses:

- BIO 220 - Biological Diversity: Animals

OR

Prerequisites

Complete ALL of the following Courses:

- BIO 230 - Biological Diversity: Plants

Learning Outcomes

Title
Marine Life Identification

Tags
209783, 0, 2

Learning Outcome
Students will be able to identify major groups of organisms that live in the oceans by analyzing their biology, ecology and adaptations for life in the oceans.

Title
Solve Complex Problems

Tags
209782, 0, 1

Learning Outcome
Students will be able to use a knowledge of the physical, chemical, and biological processes central to life in the oceans to solve complex problems facing marine ecosystems.

Title
Foster Environmental Stewardship

Tags
209784, 0, 3

Learning Outcome
Students will be able to foster and promote environmental stewardship through defending the role that humans play in determining the health of the oceans and the life they contain.

Title
Critical Thinking and Writing

Tags
209785, 0, 4

Learning Outcome
Students will be able to think and write critically as a way of synthesizing scientific information.

BIO 455 - Plant Ecology

Course Information

Teaching Area (new)
BIO

Course Number
455

Teaching Area
BIO

Course Title
Plant Ecology

Course Description
Fundamental principles governing interactions among plants and their environments with respect to their success. Students will be able to apply their knowledge to land management, conservation and agriculture.

Department
Biology

When Taught
Winter Even Yrs..

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Simple Requisites

Prerequisites

Type
Prerequisite

Prerequisites

Complete ALL of the following Courses:

- BIO 230 - Biological Diversity: Plants
  AND BIO 350 - Ecology

Learning Outcomes

Title
Physiological Ecology of Plants

Tags
201371, 1

Learning Outcome
Students will demonstrate mastery of topics including plant water relations, photosynthesis, energy balance, nutrient uptake strategies, cold tolerance, ecotypic differentiation as they relate to important processes including seed germination, competition, allelopathy, herbivory, symbioses, etc.

Title
Population biology of plants

Tags
201372, 2

Learning Outcome
Students will apply principles of self-thinning, reproduction, female investment, intraspecific competition to explain population regulation in plants.

Title
Community ecology

Tags
201373, 3

Learning Outcome
Students will apply principles of symbiotic nutrient uptake strategies, other symbioses, pollination, inter-specific competition, herbivory, succession to describe community assembly and regulation in plant communities.

Title
Global change biology

Tags
201374, 4

Learning Outcome
Students will apply principles of physics and chemistry to explain the underlying theory of climate change. They will also describe the interactions between plant ecology and climate change.

Title
Agricultural ecology

Tags
201375, 5

Learning Outcome
Students will apply principles of nutrient fluxes, carbon cycling, and energy use to illustrate the ecology of food production.

BIO 463 - Genetics of Human Disease

Course Information

Teaching Area (new)
BIO

Course Number
463

Teaching Area
BIO

Course Title
Genetics of Human Disease

Course Description
Examining the application of genetics to understanding and treatment of human disease. Functional consequences of mutations; use of model organisms; linkage and association analysis of complex traits; pharmacogenetics; ethical considerations.

Department
Biology

When Taught
Winter

Credit Hours

Min:
3

Fixed/Max:

Lab Hours

Fixed:
0

Simple Requisites

Prerequisites

Type
Prerequisite

Prerequisites

Complete ALL of the following Courses:

- PWS 340 - Genetics

Learning Outcomes

Title
Genetic Variants

Tags
200999, 1

Learning Outcome
Understand and explain the different types of genetic variants, how they can be typed and how they can be used to understand the genetic architecture of human disease.

Title
Linkage Disequilibrium

Tags
201000, 2

Learning Outcome
Understand linkage disequilibrium in the human genome and the role it plays in the search for genetic risk factors for human disease

Title
Basic Statistics and Software

Tags
201001, 3

Learning Outcome
Understand and use basic statistics and software for analyzing the correlation between genetic markers and risk for disease.

Title
Model Organisms and the Genetics of Human Disease

Tags
201002, 4

Learning Outcome
Understand and explain how model organisms contribute to our understanding of the genetics of human disease.

Title
Acquiring and Presenting Information about Genetics of a Human

Tags
201003, 5

Learning Outcome
Demonstrate the ability to obtain, aggregate and present information about the current knowledge of the genetics of a human disease.

BIO 465 - Capstone in Bioinformatics

Course Information

Teaching Area (new)
BIO

Course Number
465

Teaching Area
BIO

Course Title
Capstone in Bioinformatics

Course Description
Students will apply principles of bioinformatics to complete a complex project that integrates their disciplinary understanding to address a broad, integrative computational problem. This culminating experience will allow students to create a project that will facilitate their transition into a post baccalaureate environment.

Department
Biology

When Taught
Winter

Prerequisite

Prerequisites

Complete ALL of the following Courses:
- BIO 364 - Bioinformatics Algorithms

Learning Outcomes

Title
Evaluate research

Tags
201293, 0, 3

Learning Outcome

Students will demonstrate proficiency in reading, interpreting, and discussing primary scientific literature.

Title
Perform bioinformatics research

Tags
201360, 0, 4

Learning Outcome

Students will design and execute an original research study using bioinformatics software and techniques to answer a specific research question.

Title
Present research

Tags
201361, 0, 5

Learning Outcome

Students will demonstrate mastery of elementary scientific communication by describing research results and conclusions in written and oral form at a level that would be acceptable for presentation at an academic conference.

Title
Work together as a team

Tags
214859, 0, 6

Learning Outcome

Students will demonstrate proficiency in delegation, communication, honesty and compassion as they work together with peers in a team to achieve their project goals.

BIO 470 - History and Philosophy of Biology

Course Information

Teaching Area (new)
BIO

Course Number
470

Teaching Area
BIO

Course Title
History and Philosophy of Biology

Course Description
Development of fundamental generalizations of biology; nature of science; applications to major philosophical issues of current science.

Prerequisites

Type
Prerequisite

Prerequisites

Complete ALL of the following Courses:

- BIO 350 - Ecology

Learning Outcomes

Title
History of Biology

Tags
201066, 1

Learning Outcome
Students will demonstrate an understanding of the history of biology. This will include an understanding of the major figures and the historical development of modern biology. This will include having read original texts from the periods covered (Aristotle to Current Biology).

Title
Philosophical Issues

Tags
201067, 2

Learning Outcome
Students will also have an understanding of principal philosophical issues confronting modern biology, including major research trends in philosophy of biology. The students will also have a grasp of what 'science' is, how it is practiced, and what expectations for knowledge can be justified using science.

Title
Primary Literature

Tags
201068, 3

Learning Outcome
Students will have the ability to read and write about the primary literature both on the history, and the philosophy, of science. They will have a grasp of the terminology used in philosophy, and how philosophy of biology is currently practiced. Writing will be emphasized.

BIO 476 - Biology Student Teaching

Course Information

Teaching Area (new)
BIO

Course Number
476

Teaching Area
BIO

Course Title
Biology Student Teaching

Course Description
Field-based, semester-long experience in teaching secondary students; demonstrating proficiency in all program standards. Seminar (Sc Ed 490R) required.

Department
Biology

When Taught
Winter

Credit Hours

Min:
12

Fixed/Max:
12

Lecture Hours

Fixed:
0

Lab Hours

Fixed:
0

Other Prerequisites
Completion of all course work or departmental approval; major GPA of 2.85; at least a C in Sc Ed 377.

Note
Permission to add the class may be obtained at Education Student Services in 120 MCKB.

Learning Outcomes

Title
INTASC Principles

Tags
201069, 1

Learning Outcome
Students will integrate all ten principles of the Interstate New Teacher Assessment and Support Consortium (INTASC) in the design of an instructional unit.

Title
INTASC Goals

Tags
201070, 2

Learning Outcome
Students will demonstrate the ten goals and standards of the Interstate New Teacher Assessment and Support consortium.

Title
Confidence in Teaching

Tags
201071, 3

Learning Outcome
Students will demonstrate increased competence and confidence in their teaching abilities.

Title
Classroom Management

Tags
201072, 4

Learning Outcome
Students will demonstrate appropriate classroom management techniques in a public school setting.

BIO 496R - Secondary Teaching Internship

Course Information

Teaching Area (new)
BIO

Course Number
496R

Teaching Area
BIO

Course Title
Secondary Teaching Internship

Course Description
Culminating experience for students in the Biological Sciences Education major. Student participate in an internship teaching experience in a public school setting within one of the five BYU partnership districts. The internship requires students to complete a full school year of teaching in the assigned public school.

Department
Biology

When Taught
Fall and Winter

Credit Hours

Min:
12

Fixed/Max:
12

Lecture Hours

Fixed:
0

Other Prerequisites
Prior application; requires a total GPA of 3.00, at least a C grade in all major and minor courses; FBI fingerprint background clearance.

Note
An APPROVED Internship Application is required before adding.

BIO 497 - Field Exam and Exit Survey

Course Information

Course Number
497

Teaching Area
BIO

Course Title
Field Exam and Exit Survey

Course Description
This course will allow students to reflect on the meaningful learning opportunities they have experienced at BYU, how those experiences have shaped their education, and what role experiential learning has played in their intellectual, professional, and spiritual development. This opportunity for broader reflection is a crucial culminating activity as students prepare for graduation. Students will be reminded of the importance of lifelong learning and will take the ETS Biology Major Field Exam. This national exam evaluates the students' learning and retention of major scientific concepts in the fields of molecular biology, cell biology, organismal biology, population biology, and analytical skills.

Department
Biology

When Taught
Fall, Winter, and Spring

Credit Hours

Min:
0

Fixed/Max:
0

Learning Outcomes

Title
Literature Databases

Tags
201127, 1

Learning Outcome
Create personalized literature databases and use these to correctly cite and format bibliographic information.

Title
Effective CV

Tags
201128, 2

Learning Outcome
Generate an effective CV that targets their next level of employment.

Title
Collaboration

Tags
201129, 3

Learning Outcome
Optimize opportunities available to them at scientific meetings to establish collaborative networks with other students, postdocs and faculty.

Title
Poster and Presentation

Tags
201130, 4

Learning Outcome
Prepare an effective poster and oral presentation.

Title
Grant Proposal

Tags
201131, 5

Learning Outcome
Prepare and submit a competitive grant proposal.

Title
Publication Preperation

Tags
201132, 6

Learning Outcome
Prepare publication quality illustrations, figures, charts & graphs and eventually a manuscript for publication.

Title
Media Communcation

Tags
201133, 7

Learning Outcome
Communicate their ideas effectively and appropriately through electronic media.

Title
Lesson Plans

Tags
201134, 8

Learning Outcome
Devise an active learning lesson plan for effectively teaching a biological principle.

BIO 510 - Biological Systematics for Curation

Course Information

Teaching Area (new)
BIO

Course Number
510

Teaching Area
BIO

Course Title
Biological Systematics for Curation

Course Description
Principles, methods, and tools of taxonomy and systematics as applied to species delimitation, specimen-based research, nomenclatural codes with additional emphasis on curation of biological specimens.

Department
Biology

When Taught
Winter

Learning Outcomes

Title
Species

Tags
201079, 1

Learning Outcome
Students will be able to discuss species as the fundamental unit of biodiversity and the difference between species definitions and criteria used to delimit species.

Title
Classification

Tags
201080, 2

Learning Outcome
Students will be able to discuss basic philosophies of classification and the relationship between classification, phylogeny, and nomenclature.

Title
Nomenclatural Codes

Tags
201081, 3

Learning Outcome
Students will demonstrate understanding of nomenclatural codes and their relationship to specimen-based research products such new species descriptions, monographs, floras, and faunas via preparation of a hypothetical species description and annotation of published works.

Title
Research Tools

Tags
201082, 4

Learning Outcome
Students will gain practical, hands-on experience with a variety of specimen-based research tools.

BIO 511 - Lichenology

Course Information

Teaching Area (new)
BIO

Course Number
511

Teaching Area
BIO

Course Title
Lichenology

Course Description
Classification, morphology, and ecology on lichens. Field trip required.

Learning Outcomes

Title
Working Knowledge

Tags
201089, 2

Learning Outcome
Develop a working knowledge of lichen biology.

Title
Air Quality

Tags
201090, 3

Learning Outcome
Demonstrate an understanding of the role of lichens as biomonitors of air quality.

Title
Basic Skills

Tags
201091, 4

Learning Outcome
Develop basic skills for collecting, processing, and identifying lichens.

Title
Genetic Patterns

Tags
201092, 5

Learning Outcome
Develop basic skills with:
- Thin-layer chromatography – lichen secondary chemistry.
- Molecular techniques – to characterize genetic patterns and relationships at the population level.

Title
Publication Preparation

Tags
201093, 6

Learning Outcome
Prepare research manuscripts for review and publication consideration.

Title
Research Proposal

Tags
201094, 7

Learning Outcome
Present a research proposal for a project using lichens as air quality biomonitors.

Title
Research

Tags
201234, 1

Learning Outcome
Research and characterize the nature of the lichen symbiosis.

BIO 517 - Publishing in Peer-Reviewed Journals

BIO

Course Title
Symbiosis

Course Description
For graduate and upper-level undergraduate students, an introduction to the differences and commonalities among a diverse range of symbioses involving animals, plants, fungi and prokaryotes and the ways in which they influence biological communities. Topics include the human gut microbiome, mycorrhizas, plant-rhizobium symbiosis, plant-insect symbioses, marine invertebrate-bacterial symbioses, ant symbioses, lichens and soil crusts.

Other Prerequisites
Undergraduates must have taken a course with an advanced writing component, such as BIO 316, PWS 316, WRTG 316, or BIO 420. Undergraduates must have taken BIO 350. They must have taken an evolutionary biology course, either BIO 250 or BIO 420.

There are no prerequisites for graduate students.

Learning Outcomes

Title
Fundamental concepts

Learning Outcome
Students will be able to use the evidence-based principles of science communication to determine when and how to communicate with various audiences.

Title
Presentation

Learning Outcome
Students will be able to transform raw data into appropriate visual representations (e.g., bar charts, scatter plots, heatmaps) that accurately convey scientific meaning.

Title
Tools

Learning Outcome
Students will demonstrate proficiency with tools like Adobe Illustrator and BioRender.

Title
Criticism

Learning Outcome
Students will be able to critique scientific figures for clarity, bias, and potential misinterpretation.

Title
Analysis

Learning Outcome
Students will be able to analyze different audiences and adapt scientific messages to their needs.

Title
Usage

Learning Outcome
Students will be able to explain the key principles of clarity, accuracy, and accessibility (diverse audiences) in scientific figures.

Title
Responsibility

Learning Outcome
Students will be able to evaluate and apply ethical principles in presenting scientific data, avoiding sensationalism or bias

Title
Charity

Learning Outcome
Students will be able to approach communication with humility and a desire to establish common ground.

Title
Communication

Learning Outcome
Students will be able to apply storytelling, framing, and other techniques to make complex science accessible and considerate of cultural factors without compromising content or accuracy.

Title
Pedagogy

Learning Outcome
Students will be able to apply evidence-based pedagogical techniques to design an appropriate lesson to communicate a scientific topic.

Title
Teach reconciliation

Learning Outcome
Students will demonstrate the ability to teach a published model of reconciliation between science and religion as it relates to any scientific topic.

BIO 530 - Advanced Genetic Analysis

Course Information

BIO

Course Number
530

Teaching Area
BIO

Course Title
Advanced Genetic Analysis

Course Description
Close examination of core genetic principles as presented in both classic and current literature with the goal of understanding current uses of genetics to examine gene function. Emphasis given to the experimental basis of transmission genetics (transfer of information between generations) as presented in classic studies and contemporary uses of genetic analysis to define gene function in current literature.

Learning Outcomes

Title
Appreciation for Diversity

Tags
201106, 1

Learning Outcome
Develop an appreciation for the diversity of the living aquatic insect world.

Title
Becoming Better Stewards

Tags
201107, 2

Learning Outcome
Learn to become better stewards of the earth and its living inhabitants.

Title
Understanding

Tags
201108, 3

Learning Outcome
Understanding of all aquatic biology.

BIO 550 - Behavioral Ecology

Course Information

Teaching Area (new)
BIO

Course Number
550

Teaching Area
BIO

Course Title
Behavioral Ecology

Course Description
Students in Behavioral Ecology will study the biological mechanisms and evolutionary causes and consequences of a range of animal behaviors. The course will be geared towards helping students to gain a broad perspective of the range of factors that influence animal behavior and to provide students with the tools conduct, evaluate, and understand research on the ecology of animal behavior. We will cover a broad range of topics that are central to the field of behavioral ecology, including the economics of behavioral decisions, predator-prey arms races, resource competition, group living, reproductive selection and conflict, parental care, mating systems, social behaviors, cooperation and altruism, and communication. Each of these topics will be examined from an evolutionary and ecological perspective, with a focus on helping students first to understand the underlying theory and concepts, and second to grasp the research techniques and approaches used to increase knowledge in this field.

Complete ALL of the following Courses:

- BIO 350 - Ecology

Learning Outcomes

Title
Scientific Literacy

Tags
209786, 0, 1

Learning Outcome
Students will be able to read primary scientific literature addressing animal behavior, interpret data presented therein, and synthesize an argument about the evolution of animal behavior

Title
Hypotheses About Animal Behavior

Tags
209787, 0, 2

Learning Outcome
Form hypotheses regarding the causes and consequences of organismal behavior

Title
Data Collection

Tags
209788, 0, 3

Learning Outcome
Collect the appropriate data required to test hypotheses about the causes and consequences of behavior.

Title
Data Analysis

Tags
209789, 0, 4

Learning Outcome
Critically analyze data to test hypotheses about the causes and consequences of behavior

Title
Writing

Tags
209790, 0, 5

Learning Outcome
Write journal-style reports detailing scientific findings

Title
Scientific Communication

Tags
209791, 0, 6

Learning Outcome
Present scientific findings orally to a group of peers

BIO 555 - Evolutionary and Ecological Modeling

Course Information

Teaching Area (new)

Senior status in bioinformatics program or graduate status; Stat 511, 512, or equivalent; instructor's consent.

Learning Outcomes

Title
Theoretical Understanding of Modeling

Tags
201365, 1

Learning Outcome
Stuents will gain a theoretical understanding of the role of modeling.

Title
Modeling in Evolution and Ecology

Tags
201366, 2

Learning Outcome
Students will understand the role that modeling plays in evolution and ecology

Title
Building Models

Tags
201367, 3

Learning Outcome
Students will be able to build, test, and run models based on their area of research and interest.

- BIO 350 - Ecology
  AND CHEM 106 - General College Chemistry 2

Learning Outcomes

Title
Processes

Tags
201109, 1

Learning Outcome
Students will be able to describe key physical, chemical, and biological processes in aquatic ecosystems.

Title
Constraints

Tags
201110, 2

Learning Outcome
Students will be able to predict how organisms will respond and adapt to physical and chemical constraints.

Title
Diagnosis

Tags
201111, 3

Learning Outcome
Students will be able to diagnose environmental problems related to lakes and apply scientific knowledge to find solutions.

Title
Data Analysis and Interpretation

Tags
201112, 4

Learning Outcome
Students will be able to analyze, interpret, and synthesize limnological data in a written report.

Title
Effective Communication

Tags
201113, 5

Learning Outcome
Students will be able to effectively communicate their synthesis of limnological data through written reports and oral presentations.

Title
Environmental Stewardship

Learning Outcome
Students will be able to draw connections between limnology and issues regarding human well-being, focusing on our stewardship of God's creations.

BIO 557 - Stream and Wetland Ecology

Learning Outcomes

Title
Streams and Wetlands

Tags
201114, 1

Learning Outcome
Develop an understanding of streams and wetlands within the broader context of ecology and conservation.

Title
Conservation Issues

Tags
201115, 2

Learning Outcome
Become familiar with the major conservation issue in streams and wetlands and the underlying ecological concepts.

Title
Current Literature

Tags
201116, 3

Learning Outcome
Initial exposure to the current literature.

Title
Critical Thinking

Tags
201117, 4

Learning Outcome
Develop skills related to critical thinking. That is, learn how to: a) read critically and summarize information, b) draw conclusions and synthesize information to develop new questions and hypotheses, and c) design experiments or comparative studies. It is important to start early to learn how to think, read, and write critically.

Complete ANY of the following Courses:

- BIO 264 - Statistical Analysis for Biologists
  OR BIO 665 - R Programming Essentials

Note
This course is intended for undergraduate students and graduate students. Students who have not taken the prerequisite may contact the instructor for consent to take the course.

Learning Outcomes

Title
Fundamental concepts

Learning Outcome
Students will be able to explain fundamental concepts of machine learning, describe key differences between machine-learning approaches, and identify common machine learning terminology and concepts used in biological applications.

Title
Data processing

Learning Outcome
Students will be able to describe and apply data preprocessing and feature engineering techniques to biological data.

Title
Supervised learning

Learning Outcome
Students will be able to describe the principles of supervised learning and its applications in biological classification and regression tasks and apply these techniques.

Title
Unsupervised learning

Learning Outcome
Students will be able to describe the principles of unsupervised learning and its applications in biological data clustering and dimensionality reduction and apply these techniques.

Title
Neural networks

Learning Outcome
Students will be able to implement and train neural networks for biological research tasks.

Title
Responsible use

Learning Outcome
Students will be able to describe and apply strategies to mitigate bias and ensure responsible machine learning practices in biological applications.

Title
Primary literature

Learning Outcome
Students will be able to critically evaluate primary literature on machine learning related to diverse biological subfields, including genomics, ecology, and medicine.

Learning Outcomes

Title
Speaking

Tags
193251, 1

Learning Outcome
Speak the target language well enough to satisfy immediate needs related to basic social situations, simple transactions, basic food and lodging, and routine travel.

Title
Comprehension

Tags
193253, 2

Learning Outcome
Understand written and spoken target language relating to familiar topics.

Title
Writing

Tags
193269, 3

Learning Outcome
In the target language, write short, simple messages consisting of structurally-accurate sentences on familiar topics.

Title
Culture

Tags
193278, 4

Learning Outcome
Function appropriately in routine, familiar situations in the target culture.

Complete ALL of the following Courses:

- BULGN 102 - First-Year Bulgarian

Note
Teacher may waive prerequisite based on prior experience.

Learning Outcomes

Title
Vocabulary

Tags
193321, 2

Learning Outcome
Broaden vocabulary for both reception (listening and reading comprehension) and production (speaking and writing).

Title
Elaboration

Tags
193329, 1

Learning Outcome
Create structurally-accurate, elaborated utterances and begin to group utterances into paragraphs and narratives. Do this in present, past and future time.

Title
Grammar

Tags
193338, 3

Learning Outcome
Review and increase understanding of basic language structures.

Title
Culture

Tags
193347, 4

Learning Outcome
Discuss in the target language common products and practices related to every-day life in the target culture.

- BULGN 201 - Second-Year Bulgarian

Note
Teacher may waive prerequisite based on prior experience.

Learning Outcomes

Title
Conversation

Tags
193357, 1

Learning Outcome
Speak comfortably about predictable, familiar topics related to daily activities; this includes the ability to Initiate, maintain, and close simple conversations and to ask and respond to simple questions.

Title
Survival Transactions

Tags
193367, 2

Learning Outcome
Carry out "survival" transactions (shopping, getting directions, ordering meals, etc.)

Title
Pronunciation and Accuracy

Tags
194559, 3

Learning Outcome
Be understood by native speakers accustomed to dealing with non-native speakers.

Learning Outcomes

Title
Defined Special Purpose

Tags
196474, 1

Learning Outcome
Develop the overall language and cultural competence to meet the needs of a "special" purpose identified by the Center for Language Studies.

Title
Communication

Tags
196479, 2

Learning Outcome
Communicate effectively enough to function in a variety of situations likely to be encountered when dealing with native speakers associated with the special purpose. This may include interpersonal, interpretive, and presentational (written and oral) modes of communication.

Title
Cultural Competence

Tags
196483, 3

Learning Outcome
Interact with cultural competence and understanding when dealing with native speakers associated with the special purpose.

Other Prerequisites
Bulgn 201 or foreign residence experience.

Note
Required course for obtaining language credit by examination (Bulgn 101, 102, 201, 211R). Culminating course for Languages of Learning requirement.

Learning Outcomes

Title
General Education Requirements

Tags
193915, 4

Learning Outcome
Complete language and cultural aspects of General Education "Languages of Learning" and "Global & Cultural Awarness" requirements.

Title
Communication skills

Tags
199965, 1

Learning Outcome
In both written and spoken target language, communicate accurately with well educated members of the target-culture about real-world activities.

Title
Comprehension

Tags
199966, 2

Learning Outcome
Understand detailed written and verbal instructions. Comprehend historical passages, newspaper and magazine articles, and broadcast news reports well educated native speakers encounter routinely in their daily life.

Title
Cutlural Knowledge

Tags
199967, 3

Learning Outcome
Acquire background knowledge of important achievements related to the target culture (historical figures and events, major literary and artistic movements, government and religious institutions, etc.). Discuss in the target language cultural practices related to major life events in the target culture (birth, marriage, death, etc.).

Title
Defined Career Purposes

Tags
196520, 1

Learning Outcome
Develop overall language and cultural competence needed to study and begin entry into a career agreed upon by the Center for Language Studies.

Title
Knowledge

Tags
196525, 2

Learning Outcome
Carry out research to identify, understand, and discuss standards, processes, people and cultural norms associated with the target career.

Title
Interpretive Competence

Tags
196528, 3

Learning Outcome
Understand, interpret and analyze advanced-level written and oral texts on topics related to the target career.

Title
Communicative Competence

Tags
196531, 4

Learning Outcome
Communicate effectively at the advanced-level in order to function in a variety of situations likely to be encountered when dealing with native speakers who are associated with the target career. This will include interpersonal communication and both written and oral presentational communication.

Title
Cultural Competence

Tags
196536, 5

Learning Outcome
Interact with cultural competence and understanding when dealing with native speakers who are associated with the target career.

C S 110 - How to Program

Course Information

Teaching Area (new)
C S

Course Number
110

Teaching Area
C S

Course Title
How to Program

Course Description
Introduction to programming and computer science for those with no prior programming experience. Focuses on the basic aspects of programming, with an emphasis on core principles. Labs provide a supportive environment to learn how to program with peers. Weekly discussions will introduce some of the many ways computer science interacts with society. Programming assignments will demonstrate how to use computing in a variety of disciplines. \n

Department
Computer Science

When Taught
Fall, Winter, Spring

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
2

Note
Designed for those with no prior experience in programming

Learning Outcomes

Title
Programming

Learning Outcome
Demonstrate the ability to independently write small programs (about 150 lines of code) to solve meaningful problems. Students will develop the discipline to translate requirements into orderly solutions, a process that is spiritually strengthening as they learn to bring order out of chaos.

Title
Basic Programming Constructs

Learning Outcome
Effectively use basic programming constructs, including variables, statements, expressions, and control. Mastering these fundamental tools is intellectually enlarging, providing students with a rigorous framework for logical reasoning.

Title
Abstraction and Decomposition

Learning Outcome
Develop the ability to use functions to manage complexity and describe programs as a flow of actions. This systematic approach to problem-solving fosters a character building resilience, as students learn to tackle daunting challenges with patience and precision.

Title
Algorithms and Data Structures

Learning Outcome
Effectively utilize basic algorithms and data structures to represent and store data. Students will view the efficient use of these tools as a form of stewardship, preparing them for a life of lifelong learning and service in an increasingly technical world.

Title
Testing and Debugging

Learning Outcome
Use simple tests and debuggers to identify and correct errors. This iterative process of refinement encourages honesty and humility, ensuring that students' technical growth is matched by their commitment to integrity.

C S 111 - Introduction to Computer Science

Course Information

Teaching Area (new)
C S

Course Number
111

Teaching Area
C S

Course Title
Introduction to Computer Science

Course Description
Teaches how to design, develop, reason about, and test programs. Topics include higher-order functions, object-oriented programming, recursion, algorithms, data structures, decomposition, interpreters, and regular expressions.

Department
Computer Science

When Taught
All Semesters/Terms

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
2

Other Prerequisites
CS 110 or equivalent prior programming experience

Recommended
Prior programming experience should include statements, variables, control flow (if/while), and functions

Learning Outcomes

Title
Design

Learning Outcome
Design and develop moderate to medium-sized programs, using both object-oriented and functional paradigms. Students will approach the creative process of software design as a spiritually strengthening endeavor, learning to bring structure and purpose to complex systems.

Title
Confidence

Learning Outcome
Demonstrate increased confidence in the ability to design, develop, and test programs. This growing self-reliance is character building, as students recognize their potential to master difficult skills and contribute meaningfully to their communities.

Title
Algorithms

Learning Outcome
Effectively use basic algorithms including recursion, merge sort, and others. Students will engage in the intellectually enlarging study of algorithmic efficiency, recognizing the elegance and order inherent in well-designed computational logic.

Title
Data Structures and Abstraction

Learning Outcome
Use data structures, modules, classes, and functions to organize information and behavior within a program. This mastery over data and complexity prepares students for lifelong learning by providing them with the mental frameworks necessary to adapt to a constantly evolving technical landscape.

Title
Modules & Libraries

Learning Outcome
Independently read documentation for external python packages and extend program functionality. This autonomy encourages a habit of lifelong learning, teaching students how to seek out and apply new knowledge to solve real-world problems.

Title
Testing and Debugging

Learning Outcome
Write unit tests and use debuggers to identify the source of bugs. The iterative process of identifying and correcting errors is a character building exercise that fosters humility, persistence, and a commitment to integrity and truth.

Title
Computing and Service

Learning Outcome
Write programs that accomplish tasks relevant to computer science, such as data visualization or internet protocols. Students will view these technical applications as a means of service, using their intellectually enlarging skills to address the needs of a global society.

Other Prerequisites
Knowledge of algebra

Learning Outcomes

Title
Understand the importance of the following concepts

Tags
204455, 2

Learning Outcome
AbstractionDebugging and Assurance of CorrectnessProgram Development (analysis, specification, design, implementation, testing)

Title
Write programs whose complexity reaches a few hundred lines

Tags
204487, 1

Learning Outcome
Use the rudiments of the environment and the resources available to help them program (editors, basic computer architecture, compilers, libraries, reference manuals, on-line help).

Develop programs from an English description.

Write programs on their own, independent of "hand holding" by a TA or an instructor (typically a dozen or so).

Understand and use the basic programming constructs: types (built in types, basic provided types including arrays and strings, type construction), values (constants,variables, assignment statements, and expressions), control structures (sequential flow, conditional statements, and loops), and I/O (basic output to the screen and input from the keyboard, and file I/O).

Understand and use objects (value representation, applicable operations, hidden implementations).

Implement basic recursive algorithms.

Describe and use the basic ideas of some of the more advanced programming constructs,including exceptions, inheritance, and polymorphism.

C S 180 - Introduction to Data Science

Course Information

Teaching Area (new)
C S

Course Number
180

Teaching Area
C S

Course Title
Introduction to Data Science

Course Description
This course is a broad, interdisciplinary look at the field of data science, and how to derive insight from data. It will develop technical skills (including some python programming, statistics, linear algebra, machine learning, data cleaning and visualization) as well as data literacy (mental frameworks for decomposing data science problems, critical thinking about potential conclusions of an analysis, and potential pitfalls of overreliance on unreliable data).

Department
Computer Science

When Taught
Fall and Winter

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Other Prerequisites
CS 110 or equivalent prior programming experience

Recommended
Prior programming experience should include statements, variables, control flow (if/while), and functions

Learning Outcomes

Title
Derive Insight

Learning Outcome
Students will be able to use state-of-the-art data science oriented languages and toolkits to derive insight from data. This process is spiritually strengthening as students learn to discern truth and hidden patterns within complex information.

Title
Think Critically

Learning Outcome
Students will be able to think critically about conclusions drawn from data and its analysis. This rigorous evaluation of evidence is intellectually enlarging, training the mind to look beyond surface-level assumptions.

Title
Apply principles and methodologies

Learning Outcome
Students will be able to apply general data science principles and methodologies to novel data science problems. This adaptability fosters a foundation for lifelong learning, ensuring students can continue to solve evolving problems throughout their careers.

Title
Solve problems

Learning Outcome
Students will be able to combine ideas from mathematics, statistics, machine learning, and computer science to solve data science problems. The synthesis of these diverse fields is intellectually enlarging and prepares students to use their talents in professional and community service.

Title
Build predictive models

Learning Outcome
Students will build basic predictive models. The creation and refinement of these models is a character building exercise, requiring integrity in data handling and a commitment to producing honest, reliable results.

C S 191 - Exploring Computer Science

Course Information

Course Number
191

Teaching Area
C S

Course Title
Exploring Computer Science

Course Description
Introduction to the discipline of computer science and its fields. Lectures will provide an accessible introduction to the fields of computer science for those who are new to the discipline.

Department
Computer Science

When Taught
Fall and Winter

Credit Hours

Min:
0.5

Fixed/Max:
0.5

Lecture Hours

Fixed:
0.5

Lab Hours

Fixed:
0

Recommended
Recommend during freshman year, first semester after transferring to BYU, first semester after transferring from another major, or while enrolled in CS 110 or CS 111

Learning Outcomes

Title
Breadth of Computer Science

Learning Outcome
Students will be able to describe the breadth of the computer science field and identify various career paths. This exploration is intellectually enlarging, as it expands their understanding of how technology shapes the modern world and where they might best contribute.

Title
Success Strategies

Learning Outcome
Students will be able to identify and apply strategies for success in the computer science major. Developing these habits of discipline and focus is character building, preparing students to meet the rigorous demands of the program with integrity.

Title
Academic Planning

Learning Outcome
Students will be able to create a graduation plan that aligns with their career goals. This process encourages lifelong learning by teaching students to take ownership of their educational journey and prepare for a future of purposeful growth.

Title
Community and Stewardship

Learning Outcome
Students will be able to identify and participate in the computer science community. Engaging with peers and mentors in a supportive environment is spiritually strengthening, as it fosters a sense of belonging and a commitment to serving others through their technical talents.

Title
Ethics and Impact

Learning Outcome
Students will be able to discuss the ethical and social implications of computing. Critically evaluating the influence of technology on society is intellectually enlarging and essential for developing the character needed to act as a responsible global citizen.

C S 199R - Academic Internship

Course Information

Teaching Area (new)
C S

Course Number
199R

Teaching Area
C S

Course Title
Academic Internship

Course Description
Internships or cooperative education experiences with organizations outside BYU.

Department
Computer Science

When Taught
Contact Department

Credit Hours

Min:
0.5

Fixed/Max:
3

Lecture Hours

Fixed:
0

Lab Hours

Fixed:
0

Note
An APPROVED Internship Application is required before adding.

Learning Outcomes

Title
Provide Work Experience

Tags
204414, 0

Learning Outcome
Students will develop familiarity with industrial software development and analysis.

C S 201R - Topics in Computer Science

Course Information

Teaching Area (new)
C S

Course Number
201R

Teaching Area
C S

Course Title
Topics in Computer Science

Course Description
Undergraduate level subjects as announced before each semester.

Department
Computer Science

When Taught
Fall

Credit Hours

Min:
1

Fixed/Max:
3

Lab Hours

Fixed:
0

Other Prerequisites
Instructor's consent.

Learning Outcomes

Title
Data gathering

Tags
204488, 2

Learning Outcome
Because 201R is an experiment course, data on how well the course accomplished the outcomes will be gathered. This will usually be in the form of surveys, exam scores, and project scores.

Title
Experimental course

Tags
204497, 1

Learning Outcome
A 201R course is used by a professor who is teaching an experimental course. Learning outcomes will vary for the course, but these outcomes are evaluated during the vetting process (through the department undergraduate curriculum committee) before the professor is allowed to teach the course. At this level, typical learning outcomes involve computing practice and fundamental theory.

C S 202 - Software Engineering Lab 1

Course Information

Teaching Area (new)
C S

Course Number
202

Teaching Area
C S

Course Title
Software Engineering Lab 1

Course Description
The first of three experiential learning labs that will provide students with hands-on experience with various tools, technologies, and techniques that software engineers use in practice. In addition to hands-on lab experiences, this course contains lecture and assigned reading content that will provide an understanding of what a software engineering career is and what roles and responsibilities are available to software engineers.

Department
Computer Science

When Taught
Fall and Winter

Credit Hours

Min:
1

Fixed/Max:
1

Lecture Hours

2

Simple Requisites

Prerequisites

Type
Prerequisite

Prerequisites

Complete ALL of the following Courses:

- C S 142 - Introduction to Computer Programming
  OR C S 111 - Introduction to Computer Science

Other Prerequisites
With instructor consent, may be taken concurrently with C S 203 and 204.

Note
C S 202, 203, and 204 are designed to be taken in sequence

Learning Outcomes

Title
Definition and roles

Learning Outcome
Understand the scope of software engineering and the various roles within a professional career. This overview is intellectually enlarging, as students learn how diverse technical talents contribute to a unified, purposeful mission.

Title
UI Design and Modeling

Learning Outcome
Use modeling tools to create wireframe, screenflow, and UML diagrams (Class, Sequence, Activity). Mastering these visual languages is intellectually enlarging, allowing students to conceptualize and communicate complex truths with clarity.

Title
Code Reviews

Learning Outcome
Understand the utility of code reviews and engage in the evaluation of peer work. This collaborative process is character building, as it requires students to practice both humility in receiving feedback and kindness in offering it.

Title
Documentation and Coding Style

Learning Outcome
Understand the importance of software documentation and use tools to enforce consistent coding styles. Maintaining these standards is a form of stewardship and character building, reflecting a commitment to order, precision, and the needs of future developers.

Title
Source Control

Learning Outcome
Gain experience using source control tools to manage project history. This practice teaches the value of lifelong learning, as students learn to navigate the evolution of a project and preserve work for the benefit of those who follow.

Title
Debugging

Learning Outcome
Develop the ability to debug software from the command line and within an IDE. The persistence required to identify and resolve errors is spiritually strengthening, as students learn that through patience and trial, they can overcome confusion and find correct solutions.

C S 203 - Software Engineering Lab 2

Course Information

Teaching Area (new)
C S

Course Number
203

Teaching Area
C S

Course Title
Software Engineering Lab 2

Course Description
The second of three experiential learning labs that will provide students with hands-on experience with various tools, technologies, and techniques that software engineers use in practice. The lab experiences in this course build on those learned in CS 202 and focus on tools and techniques for source code testing, automated source code analysis, and source code build and dependency management.

Department
Computer Science

When Taught
Fall and Winter

Prerequisites

Complete ALL of the following Courses:

- C S 202 - Software Engineering Lab 1
  AND C S 235 - Data Structures and Algorithms

Other Prerequisites
With instructor consent, may be taken concurrently with C S 202 and 204.

Note
C S 202, 203, and 204 are designed to be taken in sequence.

Learning Outcomes

Title
Testing

Learning Outcome
Understand the basic concepts and approaches used by software engineers to test software, and use testing frameworks to write automated unit tests and assess coverage. This commitment to verification is character building, as it requires students to prioritize technical integrity and honesty over convenience.

Title
Analysis

Learning Outcome
Use static analysis, code profiling, and performance tools to identify and correct potential problems and bottlenecks. This rigorous evaluation is intellectually enlarging, teaching students to look deeply into the efficiency and health of their systems.

Title
Refinement and Excellence

Learning Outcome
Apply testing and analysis results to iteratively improve software quality. This process of constant refinement is spiritually strengthening, as students learn the value of persistence and the satisfaction found in striving for professional excellence.

C S 204 - Software Engineering Lab 3

Course Information

Teaching Area (new)
C S

Course Number
204

Teaching Area
C S

Course Title
Software Engineering Lab 3

Course Description
The third of three experiential learning labs that will provide students with hands-on experience with various tools, technologies, and techniques that software engineers use in practice. The lab experiences in this course build on those learned in CS 202 and CS 203 and focus on tools and techniques for cloud development and Agile programming.

Department

Complete ALL of the following Courses:

- C S 203 - Software Engineering Lab 2
  AND C S 240 - Advanced Software Construction

Other Prerequisites
With instructor consent, may be taken concurrently with C S 202 and 203.

Note
 C S 202, 203, and 204 are designed to be taken in sequence.

Learning Outcomes

Title
Virtual Machines

Learning Outcome
Set up virtual maSet up virtual machines and application containers to run applications for different operating systems on a single host, and know the difference between them. This mastery of varied environments is intellectually enlarging, as it allows students to navigate and understand the diverse architectural truths of modern computing.chines and application containers to run applications for different operating systems on a single host.

Title
Cloud Computing

Learning Outcome
Provision a simple web server on AWS and gain experience with its services. Students will recognize that the ability to scale and deploy resources globally is a powerful tool for service and lifelong learning, enabling them to address the needs of a global community.

Title
Deployment

Learning Outcome
Use a tool to build a simple deployment pipeline. Learning to automate the delivery of software is character building, as it requires the discipline to create reliable, repeatable processes that ensure the integrity of the final product.

Title
Dependency Injection

Learning Outcome
Understand the benefits of dependency injection and gain familiarity with a framework that utilizes it. This practice of decoupling components is intellectually enlarging, teaching students to design systems with a level of flexibility and order that reflects deep logical principles.

Title
Object-relational Mapping

Learning Outcome
Gain experience with an object-relational mapping framework. Successfully bridging the gap between disparate data models is spiritually strengthening, as it fosters the persistence and clarity of thought needed to harmonize complex and seemingly conflicting systems.

C S 224 - Introduction to Computer Systems

Course Information

Teaching Area (new)
C S

Course Number
224

Teaching Area
C S

Course Title
Introduction to Computer Systems

Course Description
How a computer works to execute sequential code: low level data representation and abstraction, the relationship between C and assembly, computer architecture and pipelining, the memory hierarchy, dynamic memory allocation, and linking.\n

Department
Computer Science

When Taught
Fall, Winter, Summer

Credit Hours

Type
Prerequisite

Prerequisites

Complete ALL of the following Courses:

- C S 235 - Data Structures and Algorithms

Other Prerequisites
or instructor's consent.

Learning Outcomes

Title
C programming memory model

Tags
180230, 0

Learning Outcome
Write programs that use pointers to pass by reference and manipulate data. Students will demonstrate how variables are connected to specific memory locations, an intellectually enlarging exercise that reveals the rigorous logical structure underlying high-level abstractions.

Title
Command line

Tags
180280, 4

Learning Outcome
Work fluently in a command-line environment to edit, compile, run, and debug C programs. Developing this technical autonomy is character building, as it requires the discipline and persistence to master a demanding professional environment.

Title
Machine representation of programs

Tags
180318, 5

Learning Outcome
Represent and manipulate information at a machine level. This deep dive into the foundational "bits and bytes" of computing is intellectually enlarging, providing students with a clearer understanding of the fundamental truths of digital information.

Title
Machine code

Tags
180319, 1

Learning Outcome
Read and analyze machine code, focusing on the runtime stack for storage and control transfer. This intricate analysis fosters character building through the patience and precision required to understand how a processor executes complex instructions.

Title
Processor architecture

Tags
180357, 3

Learning Outcome
Explain how machine code is assembled and how binary code moves through a sequential micro-architecture. Understanding these core principles facilitates lifelong learning, giving students a conceptual foundation that remains constant even as specific technologies evolve.

Title
Caches

Tags
204282, 1

Learning Outcome
Demonstrate how processors find data in a cache and how hit rates impact code performance. Students will view the optimization of these resources as a form of stewardship, a spiritually strengthening pursuit of excellence in using one's talents to create efficient, impactful solutions.

C S 235 - Data Structures and Algorithms

Course Information

Teaching Area (new)
C S

Course Number
235

Teaching Area
C S

Course Title
Data Structures and Algorithms

Course Description
Fundamental data structures and algorithms of computer science; basic algorithm analysis; recursion; sorting and searching; lists, stacks, queues, trees, hashing; object-oriented data abstraction.

Department
Computer Science

When Taught
Fall, Winter, Spring

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fulfill ANY of the following requirements:

Prerequisites

Complete ALL of the following Courses:

- C S 142 - Introduction to Computer Programming

OR

Prerequisites

Complete ALL of the following Courses:

- C S 111 - Introduction to Computer Science

Learning Outcomes

Title
Data Computing Fundamentals

Tags
204285, 1

Learning Outcome
Utilize fundamental data types including lists, stacks, queues, priority queues, sets, maps, and trees. This mastery of organizational structures is intellectually enlarging, as students learn to apply precise logical frameworks to represent complex information.

Title
Implementing Fundamental Data Types

Tags
204286, 2

Learning Outcome
Understand and implement major techniques for data storage, such as linked lists, binary search trees, hashing, and heaps. This deep dive into technical implementation is character building, requiring the meticulous attention to detail and personal integrity necessary to build reliable systems.

Title
Select Data Structures

Tags
204287, 3

Learning Outcome
Properly select and use data structures from language-provided libraries. Making these informed choices is a form of stewardship, helping students develop the wisdom to use available resources effectively in a life of service.

Title
Analysis

Tags
204288, 4

Learning Outcome
Classify the runtime complexity of algorithms using Big O notation. This ability to evaluate efficiency is intellectually enlarging, providing a rigorous mathematical lens through which to view the physical constraints of computation.

Title
Recursion

Tags
204289, 5

Learning Outcome
Understand and apply recursive logic to solve complex problems. Mastering this powerful mental model is spiritually strengthening, as students learn to find elegant, simple truths within layered and repetitive challenges.

Title
Usage of Algorithms

Tags
204290, 6

Learning Outcome
Make informed decisions regarding sorting and searching algorithms in specific contexts. This evaluative skill fosters a capacity for lifelong learning, equipping students with the critical thinking needed to adapt to new technologies and methodologies.

Title
Program Writing

Tags
204291, 7

Learning Outcome
Write substantial programs requiring approximately 500 lines of code. The endurance required to complete these projects is character building, fostering the resilience and work ethic needed to see significant commitments through to completion.

C S 236 - Discrete Structures

Course Information

Teaching Area (new)
C S

Course Number
236

Teaching Area
C S

Course Title
Discrete Structures

Course Description
Introduction to grammars and parsing; predicate and propositional logic; proof techniques; sets, functions, relations, relational data model; graphs and graph algorithms.

Prerequisites

Complete ALL of the following Courses:

- C S 235 - Data Structures and Algorithms

Learning Outcomes

Title
Write Code From Diverse Program Components

Tags
204292, 2

Learning Outcome
Demonstrate the ability to build large programs by writing and integrating code from a diverse spectrum of program components. This collaborative and technical integration is spiritually strengthening, as students learn to harmonize different parts into a purposeful, unified whole.

Title
Mathematical Structures and Logic

Tags
204417, 2

Learning Outcome
Understand and be conversant with basic discrete mathematical structures, including finite state machines, grammars, and propositional calculus. Mastering these abstract concepts is intellectually enlarging, providing a rigorous foundation for logical reasoning and clarity of thought.

Title
Problem Solving with Discrete Math

Learning Outcome
Write complex programs by using mathematical concepts-such as set algebra for databases or graphs for query processing-as the basis for solving problems. This application of theory to practice fosters a capacity for lifelong learning, allowing students to approach novel challenges with a versatile and proven toolkit.

Title
Systematic Design Process

Learning Outcome
Incrementally build sophisticated programs through a systematic design process based on discrete mathematics. This methodical approach is character building, as it requires the discipline and patience to follow a structured path toward a reliable solution.

Title
Maintainable Design and Stewardship

Learning Outcome
Design solutions for programming problems and justify the designs as maintainable and extendable. Taking responsibility for the long-term viability and readability of one's code is a form of character building stewardship, ensuring that your work serves as a reliable foundation for those who follow.

C S 240 - Advanced Software Construction

Course Information

Teaching Area (new)
C S

Course Number
240

Teaching Area
C S

Course Title
Advanced Software Construction

Course Description
Advanced software development with an object-oriented focus. Design, implementation, and testing of medium-sized programs including a server program.

Department
Computer Science

When Taught
All Semesters/Terms

Credit Hours

Fixed/Max:
4

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
1

Simple Requisites

Prerequisites

Type
Prerequisite

Prerequisites

Complete ALL of the following Courses:

- C S 235 - Data Structures and Algorithms

Other Prerequisites
or instructor's consent.

Learning Outcomes

Title
Construction

Tags
213392, 0, 1, 2023-08-29 07:26:47

Learning Outcome
Learn to construct a medium-scale server program with data persistence in a principled way by applying relevant engineering techniques such as up-front design, quality code construction, unit testing, assertions, and error handling.

Title
Design

Tags
213393, 0, 2, 2023-08-29 07:26:49

Learning Outcome
Learn and apply basic software design principles such as single responsibility, low coupling, avoidance of code duplication and information/data hiding to create modular code.

Title
Databases

Tags
213394, 0, 3, 2023-08-29 07:26:51

Learning Outcome
Learn and apply the basics of relational database design, modeling and programmatic access.

Title
Security

Tags
213395, 0, 4, 2023-08-29 07:26:52

Learning Outcome
Learn and apply basic security principles and concepts.

Title
Testing

Tags
213396, 0, 5, 2023-08-29 07:26:53

Learning Outcome
Learn to validate a program's behavior against its specification using testing practices.

Title
Tools

Tags
213397, 0, 6, 2023-08-29 07:26:55

Learning Outcome
Use modern software tools including integrated development environments, testing frameworks, debuggers, version control, and documentation processing tools.

C S 252 - Introduction to Computational Theory

Course Information

Teaching Area (new)
C S

Course Number
252

Teaching Area
C S

Course Title
Introduction to Computational Theory

Course Description
Finite state automata, regular languages, lexical analysis; push-down automata, context-free languages, parsing; Turing machines and unrestricted grammars; computability complexity, NP-completeness.

Department
Computer Science

When Taught
Fall and Winter

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Other Prerequisites
C S 236 or concurrent enrollment.

Learning Outcomes

Title
Understand Computing Paradigms

Tags
204297, 3

Learning Outcome
Understand the three computing paradigms (DFAs, PDA, Turing Machine) and their language-based equivalents. This study of the theoretical limits of computation is intellectually enlarging, as it reveals the fundamental laws and orderly patterns that govern all digital information.

Title
Categorize Problems

Tags
204298, 4

Learning Outcome
Categorize problems into one of the existing paradigms. This analytical process is character building, requiring the mental discipline and precision to correctly identify the inherent nature and constraints of a given challenge.

Title
Understand Paradigms

Tags
204421, 1

Learning Outcome
Understand the difference between and limitations of paradigms. Recognizing these boundaries fosters a sense of humility and spiritually strengthening wonder at the vastness of knowledge yet to be discovered and the complexity of the created world.

Title
Decidable and Tractable

Learning Outcome
Understand the difference between computable (decidable) and practically computable (tractable). Distinguishing between what is theoretically possible and what is practically achievable is intellectually enlarging, providing a realistic framework for professional decision-making.

Title
Solutions to Problems

Learning Outcome
Design and justify solutions to problems of decidability and tractability. Engaging with these deep, unresolved questions in computer science encourages a commitment to lifelong learning, as students prepare to contribute to the ongoing search for truth in their field.

C S 256 - Introduction to Human Computer Interaction

Course Information

Course Number
256

Teaching Area
C S

Course Title
Introduction to Human Computer Interaction

Course Description
Design user experiences with technology that make a meaningful difference in people’s lives. Methods to establish user needs, derive designs, assess tradeoffs, and report results. Develop and iterate prototypes with feedback from representative users.

Department
Computer Science

When Taught
Fall and Winter

Credit Hours

Fixed/Max:
3

Lab Hours

Fixed:
2

Learning Outcomes

Title
Meet user needs

Tags
213398, 0, 1, 2023-08-29 07:26:58

Learning Outcome
Analyze users and their environments for the purpose of designing to meet their needs. This empathetic approach to technology is spiritually strengthening, as students learn to look outside themselves and focus on the welfare and experiences of others.

Title
Create human-centered designs

Tags
213399, 0, 2, 2023-08-29 07:26:59

Learning Outcome
Apply an iterative human-centered design cycle to create, develop, and evaluate technology user experiences. Engaging in this cycle of feedback and refinement is character building, fostering the humility to accept critique and the persistence to improve one's work for the benefit of the end user.

Title
Analyze user interfaces

Tags
213400, 0, 3, 2023-08-29 07:27:00

Learning Outcome
Describe and analyze user interfaces for best-practice approaches, including diverse form factors and accessibility issues. Ensuring that technology is inclusive and usable for all is intellectually enlarging, as it challenges students to consider a wide range of human perspectives and physical requirements.

Title
Document user experiences

Tags
213401, 0, 4, 2023-08-29 07:27:02

Learning Outcome
Present and document user experience findings and project results using technical writing and presentation standards. Mastering the art of clear, professional communication facilitates lifelong learning, equipping students with the tools to share knowledge and advocate for better design throughout their professional lives.

C S 260 - Web Programming

Course Information

Teaching Area (new)
C S

Course Number
260

Teaching Area
C S

Course Title
Web Programming

Course Description
Introduction to building and deploying full stack web applications using core technologies, frameworks, protocols, and development tools.

Department
Computer Science

When Taught
Fall and Winter

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Prerequisites

Type
Prerequisite

Prerequisites

Complete ANY of the following Courses:

- C S 142 - Introduction to Computer Programming
  OR C S 111 - Introduction to Computer Science

Learning Outcomes

Title
Full-Stack Web Application Development

Learning Outcome
Design and implement interactive, full-stack web applications using modern web technologies, applying computational thinking and user-centered design to solve meaningful problems that serve others.

Title
Web Architecture

Learning Outcome
Design and reason about web architectures, including client-server communication, APIs, authentication, real-time interaction, and data persistence, with an awareness of the responsibility to build systems that meet present needs and continue to serve well as those needs change over time.

Title
AI-Augmented Development

Learning Outcome
Use AI tools as a collaborative partner to support design, implementation, debugging, and learning, while critically evaluating their outputs for correctness and maintainability.

Title
Security and Societal Impact

Learning Outcome
Apply secure coding practices and evaluate the ethical implications of web technologies, including privacy, accessibility, and eternal impact of the systems they build.

Title
Deployment and Application Management

Learning Outcome
Deploy and manage web applications, demonstrating responsibility for reliability, performance, and the experience of real users in production environments.

C S 270 - Introduction to Machine Learning

Course Information

Course Number
270

Teaching Area
C S

Course Title
Introduction to Machine Learning

Course Description
Understand the fundamental models of machine learning, such as neural networks, decision trees, data mining, clustering, Bayesian learning, ensembles, reinforcement learning, and deep learning. Work with data and machine learning tools in real world applications.

Department
Computer Science

When Taught
Fall and Winter

Credit Hours

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Simple Requisites

Prerequisites

Type
Completion Requirement

Prerequisites

Fulfill ANY of the following requirements:

Prerequisites

Complete ALL of the following Courses:
- C S 111 - Introduction to Computer Science
  AND MATH 112 - Calculus 1

OR

Prerequisites

Complete ALL of the following Courses:
- C S 142 - Introduction to Computer Programming
  AND MATH 112 - Calculus 1

Learning Outcomes

Title
Machine Learning Paradigms

Learning Outcome
Identify the different types of machine learning (supervised, unsupervised, reinforcement) and the various types of problems they solve. This broad survey is intellectually enlarging, as it expands the mind's ability to categorize and approach complex, real-world phenomena through a computational lens.

Title
Model Implementation

Learning Outcome
Implement and apply several different machine learning models to a variety of datasets. The technical rigor required to move from theory to a working model is character building, fostering the work ethic and precision necessary to produce reliable, high-quality results.

Title
Performance Evaluation

Learning Outcome
Select and use appropriate evaluation metrics to assess the performance of a machine learning model. This practice of objective self-critique is spiritually strengthening, as it teaches students to value truth and accuracy over preconceived notions or desired outcomes.

Title
Feature Engineering

Learning Outcome
Apply basic feature engineering and data preprocessing techniques to prepare data for machine learning models. This careful preparation of information is a form of stewardship, encouraging students to handle data with the integrity and respect required for honest analysis.

Title
Algorithm Logic

Learning Outcome
Explain the underlying mathematical and logical principles of various machine learning algorithms. Developing a deep understanding of these foundational "laws" of learning provides a bedrock for lifelong learning, allowing students to stay grounded as new and more complex models emerge.

Title
Impact and Ethics

Learning Outcome
Discuss the ethical and societal implications of machine learning, including bias, fairness, and transparency. Grappling with these human-centric challenges is intellectually enlarging and essential for developing the character needed to use advanced technology for the benefit of all.

C S 291 - Careers in Computer Science

Course Information

Course Number
291

Teaching Area
C S

Course Title
Careers in Computer Science

Course Description
Career advising for students in computer science. Advice on resumes, applications, and interviews for internships, full-time jobs, and graduate school. Opportunities to network with other students and with employers.

Department
Computer Science

When Taught
Fall and Winter

Credit Hours

Min:
0.5

Fixed/Max:
0.5

Lecture Hours

Fixed:
0.5

Lab Hours

Fixed:
0

Simple Requisites

Prerequisite

Type
Prerequisite

Prerequisite

Complete ALL of the following Courses:

- C S 111 - Introduction to Computer Science
  AND C S 191 - Exploring Computer Science

Other Prerequisites
Recommend during freshman year or second semester after transferring to BYU

Learning Outcomes

Title
Career Path Discovery

Learning Outcome
Evaluate diverse career opportunities in computer science and identify paths that align with personal strengths and interests. This broad exploration is intellectually enlarging, as students recognize the vast potential for technology to solve global challenges.

Title
Professional Preparation

Learning Outcome
Create professional artifacts, including a resume and an online presence, that accurately reflect technical skills and personal integrity. Developing these tools is character building, requiring an honest and disciplined assessment of one's own progress and goals.

Title
Ethics and Professionalism

Learning Outcome
Analyze ethical scenarios and professional standards common in the technology industry. Engaging with these complex issues is intellectually enlarging and essential for developing the character needed to act as a principled leader in the workplace.

Title
Networking and Community

Learning Outcome
Interact with industry professionals and alumni to build a supportive professional network. Developing these relationships is spiritually strengthening, as students learn to seek mentors and find ways to serve others within their professional community.

Title
Continuous Growth

Learning Outcome
Formulate a long-term plan for professional development and skill acquisition. Establishing this proactive approach to career management fosters a habit of lifelong learning, ensuring students remain adaptable in a rapidly changing technical landscape.

Title
Industry Awareness

Learning Outcome
Identify current trends, required skills, and the social impact of various sectors within the computer science industry. This awareness is intellectually enlarging, helping students understand their future role as stewards of powerful technology.

C S 301R - Topics in Computer Science

Course Information

Teaching Area (new)
C S

Course Number
301R

Teaching Area
C S

Course Title
Topics in Computer Science

Course Description
Undergraduate-level topics as announced.

Department
Computer Science

When Taught
Fall

Credit Hours

Min:
1

Fixed/Max:
3

Lab Hours

Fixed:
0

Other Prerequisites
Instructor's consent

Learning Outcomes

Title
Data gathering

Tags
204489, 2

Learning Outcome
Because 301R is an experiment course, data on how well the course accomplished the outcomes will be gathered. This will usually be in the form of surveys, exam scores, and project scores.

Title
Experimental course

Tags
204496, 1

Learning Outcome
A 301R course is used by a professor who is teaching an experimental course. Learning outcomes will vary for the course, but these outcomes are evaluated during the vetting process (through the department undergraduate curriculum committee) before the professor is allowed to teach the course. At this level, typical learning outcomes involve computing practice, critical thinking, and more advanced theory.

C S 312 - Algorithm Design and Analysis

Course Information

Teaching Area (new)
C S

Course Number
312

Teaching Area
C S

Course Title
Algorithm Design and Analysis

Course Description
A study of the design and analysis of algorithms as solutions to problems, including dynamic programming, linear programming, greedy algorithms, divide-and-conquer algorithms, graph algorithms, and intelligent search algorithms.

Department
Computer Science

When Taught
Fall and Winter

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Simple Requisites

Prerequisites

Type
Prerequisite

Prerequisites

Complete ALL of the following Courses:

- C S 236 - Discrete Structures
  OR BIO 364 - Bioinformatics Algorithms

Learning Outcomes

Title
Design novel algorithms

Tags
204498, 3

Learning Outcome
Formulate unfamiliar problems in mathematical terms and select appropriate algorithmic paradigms-such as dynamic programming, greedy algorithms, or divide-and-conquer-to design effective solutions. This process of creating order from complexity is spiritually strengthening, as it mirrors the application of divine laws to solve intricate problems.

Title
Analyze asymptotic behavior

Tags
204500, 1

Learning Outcome
Analyze the worst-case time and space complexity of algorithms and compare these findings with empirical results. This rigorous evaluation of efficiency is intellectually enlarging, providing students with the analytical depth to distinguish between surface-level performance and fundamental constraints.

Title
Evaluate computational efficiency

Tags
204502, 4

Learning Outcome
Distinguish between problems and their solutions while categorizing them into complexity classes like P, NP, and NP-Complete. Understanding these boundaries is intellectually enlarging and helps students exercise stewardship by focusing their talents on problems that are practically solvable.

Title
Prove algorithmic correctness

Tags
204499, 0, 2

Learning Outcome
Construct formal proofs to verify that a subset of the algorithms considered in the course function correctly under all conditions. This commitment to provable truth is character building, fostering the integrity and precision required to stand behind one's work with total honesty.

Title
Implement complex solutions

Tags
204501, 0, 5

Learning Outcome
Independently implement selected algorithms using Python to solve motivating, real-world applications. The persistence required to move from abstract theory to a working implementation is character building, while the ability to adapt these solutions to new contexts prepares students for a life of lifelong learning.

C S 324 - Systems Programming

Course Information

Teaching Area (new)
C S

Course Number
324

Teaching Area
C S

Course Title
Systems Programming

Course Description
Systems programming principles and concepts, including Linux systems programming, multiprocessing, concurrency, exceptional control flow, caching, sockets, protocols, and non-blocking I/O.

Department
Computer Science

When Taught
Fall and Winter

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

3

Lab Hours

Fixed:
0

Simple Requisites

Prerequisites

Type
Prerequisite

Prerequisites

Complete ALL of the following Courses:

- C S 224 - Introduction to Computer Systems

Learning Outcomes

Title
Master Linux Systems Programming

Learning Outcome
Utilize Linux APIs and command-line tools to develop software that interacts directly with the operating system. This technical fluency is intellectually enlarging, as it provides students with a comprehensive understanding of the intricate layers between hardware and software.

Title
Implement Multiprocessing and Concurrency

Learning Outcome
Write programs that manage multiple processes and concurrent execution flows. Mastering the coordination of these simultaneous actions is character building, requiring the patience and precision to handle the complexities of "exceptional control flow" with total accuracy.

Title
Optimize Performance through Caching

Learning Outcome
Analyze the impact of caching on system performance and implement strategies to minimize latency. Students will view this optimization of computational resources as a form of stewardship, ensuring their work is a model of professional excellence and efficiency.

Title
Utilize Network Sockets and I/O

Learning Outcome
Develop network-based applications using sockets and non-blocking I/O to facilitate communication between distributed systems. This ability to connect disparate systems is spiritually strengthening, as it prepares students to build tools that foster global communication and service.

Title
Analyze and Refine Systems

Learning Outcome
Perform deep analysis of system-level behavior and refine code to meet rigorous performance standards. This iterative process of discovery and correction encourages lifelong learning, providing students with the investigative mindset needed to master new technologies as they emerge.

C S 329 - Quality Assurance and Developer Operations

Course Information

Teaching Area (new)
C S

Course Number
329

Teaching Area
C S

Course Title
Quality Assurance and Developer Operations

Course Description
Comprehensive production software testing, deployment, and management strategies, focusing on automation, security, quality assurance, continuous integration/deployment, scalability, and resilience.

Department
Computer Science

When Taught
Fall and Winter

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Simple Requisites

Prerequisites

Type
Prerequisite

Prerequisites

Complete ALL of the following Courses:

- C S 260 - Web Programming

Learning Outcomes

Title
Automated Testing (Quality)

Learning Outcome
Implement comprehensive automated testing strategies, including unit, UI, E2E, performance, and load testing. This commitment to rigorous verification is character building, as it requires the professional honesty to expose weaknesses and ensure the integrity of the final product.

Title
CI/CD Pipeline Construction (Deployment)

Learning Outcome
Deploy various automated CI/CD pipeline strategies to reliably deliver software that is resilient, scalable, and secure. Students will view the creation of these robust delivery systems as a form of stewardship, utilizing their technical talents to provide consistent and dependable service to others.

Title
System Monitoring and Correction (Management)

Learning Outcome
Monitor system health, detect anomalies, and implement automated corrections to maintain stability. This proactive management of complex environments is intellectually enlarging, providing students with the analytical skills to maintain order within sophisticated digital infrastructures.

Title
Bridging Knowledge Gaps (Curious)

Learning Outcome
Characterize and address personal gaps in understanding related to DevOps techniques and principles. This practice of self-directed inquiry fosters a habit of lifelong learning, ensuring that students remain capable of adapting to new technical paradigms.

Title
Architectural Innovation (Creative)

Learning Outcome
Discuss and generate alternative DevOps designs to solve specific organizational challenges. Engaging in this creative process is intellectually enlarging, as it challenges students to apply diverse engineering principles to find the most effective and elegant solutions.

Title
Collaborative Problem Solving (Collaborative)

Learning Outcome
Work effectively as a team to discover and mitigate DevOps design weaknesses. This collaborative effort is spiritually strengthening, as students learn to combine their individual strengths to achieve a unified goal and support the growth of their peers.

Title
Principled Application (Christlike)

Learning Outcome
Strive for divine inspiration in the application of technical capabilities toward celestial pursuits. This integration of faith and craft is spiritually strengthening, helping students recognize their professional work as a means to contribute to a higher purpose.

C S 330 - Concepts of Programming Languages

Course Information

Teaching Area (new)
C S

Course Number
330

Teaching Area
C S

Course Title
Concepts of Programming Languages

Course Description
Principles and concepts characterizing high-level computer programming languages, process and data abstration, encapsulation, inheritance, functional programming, logic programming, scanners, and parsers.

Department
Computer Science

When Taught
Fall and Winter

Credit Hours

Min:
3

Fixed/Max:
3

Completion Requirement

Fulfill ANY of the following requirements:

Complete ALL of the following Courses:
- C S 236 - Discrete Structures
  AND C S 260 - Web Programming

OR

Complete ALL of the following Courses:
- C S 236 - Discrete Structures
  AND C S 224 - Introduction to Computer Systems

OR

Complete ALL of the following Courses:
- MATH 290 - Fundamentals of Mathematics
  AND C S 235 - Data Structures and Algorithms

Learning Outcomes

Title
Language Design and Vocabulary

Tags
204299, 2

Learning Outcome
Apply the formal vocabulary of programming language design, syntax, and semantics to evaluate how different languages structure logic and data. This foundational study is intellectually enlarging, as it reveals the underlying principles and orderly laws that govern all computational expression.

Title
Non-Imperative Paradigms

Tags
204435, 0

Learning Outcome
Write functional and logic-based programs using non-imperative language paradigms. Mastering these alternative ways of thinking is spiritually strengthening, as it encourages students to look beyond familiar habits and find elegant, diverse solutions to complex problems.

Title
Semantic Analysis

Learning Outcome
Analyze the behavior and execution models of various programming languages to understand how they manage state, scope, and memory. This rigorous technical investigation is character building, requiring the precision and mental discipline to understand exactly how a system will behave under specific conditions.

Title
Syntactic Structure

Learning Outcome
Define and implement the grammar and syntax rules for a custom language or DSL. This creative process is intellectually enlarging and provides a base for lifelong learning, equipping students with the tools to build their own specialized abstractions as technology evolves.

Title
Comparative Evaluation

Learning Outcome
Evaluate and justify the selection of a programming language for a specific task based on its strengths and limitations. Making these informed judgments is a form of stewardship, preparing students to use the most effective tools to provide meaningful service in their professional lives.

C S 340 - Software Design

Course Information

Teaching Area (new)
C S

Course Number
340

Teaching Area
C S

Course Title
Software Design

Course Description
Use design, development, testing and refactoring techniques to build and evolve reliable, maintainable and scalable software systems. Covers a wide range of design patterns and principles. Also introduces students to software architecture and architectural patterns.

Department
Computer Science

When Taught
Fall and Winter

Credit Hours

- C S 240 - Advanced Software Construction
  AND C S 260 - Web Programming

Learning Outcomes

Title
Software Design Principles

Tags
204300, 2

Learning Outcome
Apply fundamental principles of effective software design to create systems that are modular, extensible, and robust. This pursuit of structural excellence is intellectually enlarging, as students master the abstract logic required to organize complex digital realities.

Title
Design Judgement

Tags
204449, 1

Learning Outcome
Evaluate technical requirements to determine when and how to apply specific design patterns. Cultivating this professional discernment is character building, as it requires the wisdom to balance competing priorities with integrity and foresight.

Title
Document and Communicate Designs

Tags
204301, 3

Learning Outcome
Utilize professional standards to effectively document and communicate software architectures to diverse stakeholders. Developing these communication skills facilitates lifelong learning, ensuring students can share their insights and collaborate effectively throughout their careers.

Title
Cloud Computing Technologies

Tags
209863, 4

Learning Outcome
Implement sophisticated software designs using modern cloud computing platforms. Utilizing these powerful global resources is spiritually strengthening, as students learn to act as capable stewards who can deploy solutions to serve and bless a worldwide community.

C S 345 - Operating Systems Design

Course Information

Teaching Area (new)
C S

Course Number

Prerequisite

Prerequisites

Complete ALL of the following Courses:

- C S 224 - Introduction to Computer Systems
  AND C S 240 - Advanced Software Construction

Learning Outcomes

Title
Operating System Fundamentals

Tags
204305, 1

Learning Outcome
Describe the core components of an operating system and their implementation across general-purpose, real-time, and embedded applications. Understanding these essential building blocks is intellectually enlarging, as it reveals the sophisticated architecture required to manage modern computing environments.

Title
Process and Resource Management

Tags
204306, 2

Learning Outcome
Define and manage processes, threads, asynchronous signals, and competitive system resource allocation. Mastering the coordination of these elements is character building, requiring the precision and discipline to ensure systems remain stable and fair under heavy demand.

Title
Shell Implementation

Tags
204307, 3

Learning Outcome
Demonstrate how a shell works by creating a functional command-line interface. This exercise in providing a gateway for human-machine interaction is spiritually strengthening, as it empowers students to build tools that facilitate order and productivity.

Title
Scheduling and Multi-Tasking

Tags
204308, 4

Learning Outcome
Outline and implement standard scheduling algorithms for multi-tasking environments. Students will view the efficient allocation of processor time as a form of stewardship, ensuring that system resources are utilized to provide the best possible service to users.

Title
Concurrency and Mutual Exclusion

Tags
204309, 5

Learning Outcome
Apply mutual exclusion principles, including semaphore construction, to manage concurrent programming challenges. This rigorous logical practice is intellectually enlarging and fosters the integrity needed to prevent data corruption and ensure system truthfulness.

Title
Memory and File Systems

Tags
204310, 6

Learning Outcome
Explain the implementation of system memory management and file systems. This deep understanding of how information is preserved and accessed provides a foundation for lifelong learning, allowing students to adapt to new storage and memory paradigms as they evolve.

Title
Comparative OS Analysis

Tags
204311, 7

Learning Outcome
Evaluate the strengths and features of various contemporary operating systems. This broad perspective is intellectually enlarging, helping students become discerning professionals who can choose the right tools for complex technical challenges.

Title
Full OS Construction

Tags
204312, 8

Learning Outcome
Implement a functional, pre-emptive, multi-tasking operating system in C, including a scheduler, file manager, and synchronization components. The persistence and vision required to complete this comprehensive project are character building, leaving students with the confidence to tackle any large-scale engineering feat in their future careers.

C S 355 - Interactive Graphics and Image Processing

Course Information

Teaching Area (new)
C S

Course Number
355

Teaching Area
C S

Course Title
Interactive Graphics and Image Processing

Course Description
Introduces basic concepts of computer graphics and image processing. Includes characteristics of physical cameras and displays; color models; basic image processing algorithms: 2D and 3D homogeneous coordinate transformations; fundamentals of 3D rendering geometry; lighting and shading: image warping and texture mapping; and frequency-domain processing.

Complete ALL of the following Courses:

- C S 240 - Advanced Software Construction
  AND MATH 213 - Elementary Linear Algebra
  AND MATH 215 - Computational Linear Algebra

Learning Outcomes

Title
Mathematics and Geometry

Tags
204458, 1

Learning Outcome
Apply and implement fundamental mathematical concepts-including linear algebra, points, vectors, and matrices-to manipulate numeric data. This rigorous application of mathematical truth is intellectually enlarging, as it reveals the precise geometric laws that govern digital space.

Title
Graphical User Interfaces

Tags
204459, 2

Learning Outcome
Develop modern graphical user interfaces by implementing event handling and Model-View-Controller architectures. Building these intuitive gateways for human interaction is spiritually strengthening, as it empowers students to create tools that facilitate clear communication and productivity.

Title
2D Drawing, Viewing, and Selection

Tags
204460, 3

Learning Outcome
Implement 2D transformations and coordinate compositions to render and manipulate simple shapes. Mastering these foundational techniques is character building, requiring the meticulous attention to detail and patience necessary to ensure visual accuracy and system reliability.

Title
3D Rendering Geometry

Tags
204461, 4

Learning Outcome
Construct 3D perspective renderings using libraries like OpenGL and implement custom shading techniques. This creative process is intellectually enlarging, as students learn to simulate the complexity of the physical world through sophisticated computational models.

Title
Basic Image Processing

Tags
204462, 5

Learning Outcome
Implement point, neighborhood, and image-to-image operations to enhance and filter digital media. Students will view the ability to clarify and improve information as a form of stewardship, utilizing their technical skills to provide high-quality visual resources.

Title
Geometric Operations on Images

Tags
204463, 6

Learning Outcome
Execute image warping using backward-mapping approaches to transform digital assets. The persistence required to master these complex spatial mappings fosters character building, encouraging students to solve difficult problems with resilience.

Title
Color Models

Tags
204464, 7

Learning Outcome
Utilize the language and principles of common color models to represent and manipulate digital light. This deeper understanding of how we perceive and reproduce the world is spiritually strengthening, fostering an appreciation for the beauty and order inherent in our environment.

Title
Continuous Innovation

Learning Outcome
Research and apply emerging graphics techniques to solve novel visualization challenges. This proactive approach to staying current in a fast-moving field establishes a habit of lifelong learning, preparing students for a career of constant discovery.

C S 356 - Advanced Techniques in Human Computer Interaction

Course Information

Teaching Area (new)
C S

Course Number
356

Teaching Area
C S

Course Title
Advanced Techniques in Human Computer Interaction

Course Description
This class combines designing the user experience with implementing the technology. Students learn website design, information architecture, and how to design for the broader ecosystem of use. Finally, students will learn principles specifically relevant to website design and information architecture. Web design is one of the most common UX jobs and so this makes their skills highly marketable.

Learning Outcomes

Title
Analyze the Context of a Design Problem

Tags
213402, 0, 1, 2023-08-29 07:30:01

Learning Outcome
Students will learn how to analyze secondary data related to their design problem in order to understand the context in which people are using a given technology. Namely, this class goes beyond just interviewing users and to analyzing multiple sources of data that helps them understand the context in which the users are using the technology. This could include analyzing bug report, comments on social media, Q&A forums, other documentation about the topic, interview transcripts from multiple sets of stakeholders (e.g., users v. non users). This deep analytical dive is intellectually enlarging, training the mind to discern subtle patterns and truths within complex human behaviors.

Title
Design the Different Stakeholders.

Tags
213403, 0, 2, 2023-08-29 07:30:02

Learning Outcome
Students will be able to apply methods such as Personas to represent multiple stakeholders who are affected by the technology. This will allow them to analyze the characteristics of and segment the target population. This empathetic modeling is character building, as it requires students to look beyond their own perspectives and advocate for the needs of a diverse global community.

Title
Apply Advanced Design Principles

Tags
213404, 0, 3, 2023-08-29 07:30:04

Learning Outcome
Understand and apply design patterns and theories of information to the design of an online systerm. Mastering these high-level frameworks is intellectually enlarging and provides a foundation for lifelong learning, allowing students to adapt their craft as interface paradigms evolve.

Title
Implement Functional Prototype

Tags
213405, 0, 4, 2023-08-29 07:30:05

Learning Outcome
Students will be able to specify and implement/create a functional prototype that improves on the user experience of the design problem. The discipline required to move from an abstract concept to a working, high-fidelity tool is character building, fostering the persistence and technical integrity needed for professional success.

Title
Evaluate Design Improvement

Tags
213406, 0, 5, 2023-08-29 07:30:06

Learning Outcome
Students will be able to compare different designs to determine which has a better user experience using techniques such as A/B testing. This could be comparing the existing website that they have been analyzing, with a newly proposed/implemented website design for the same organization. This iterative process of testing and refinement is spiritually strengthening, teaching students to embrace a humble, truth-seeking approach to their own work.

Title
Design effective computing experiences for people

Learning Outcome
Designing effective computing experience for people requires the ability to: Create solutions for real problems that people encounter, Design a computing experience that is visually and interactively pleasing, Iteratively refine design prototypes. This pursuit of design excellence is spiritually strengthening, as students learn to use their creative agency to improve the lives and daily experiences of others.

C S 393 - Collaborative Problem Solving

Learning Outcomes

Title
Demonstrate problem solving

Learning Outcome
Students will be able to solve problems quickly to enable them to be competitive in technical Interviews. This pursuit of technical mastery is intellectually enlarging, sharpening the mind to identify optimal solutions under pressure.

Title
Collaborative Synthesis

Learning Outcome
Collaborate with peers to decompose and solve multi-faceted technical challenges. This teamwork is spiritually strengthening, as students learn to value diverse perspectives and support one another in achieving a unified goal.

Title
Build problem-solving strategies

Learning Outcome
Students will build on the algorithms and problem-solving strategies that they were taught and had limited practice with in CS 312. learning primarily through targeted practice. The persistence required to master these difficult concepts is character building, as it fosters the resilience and work ethic needed to overcome significant obstacles.

Title
Technical Stewardship

Learning Outcome
Communicate algorithmic logic and design decisions clearly and ethically. Students will view the ability to solve problems effectively as a form of stewardship, preparing them for a life of service where their skills can be used to bless others.

Title
Adaptable Expertise

Learning Outcome
Independently research and implement novel algorithmic approaches to unfamiliar problems. Establishing this habit of self-directed discovery facilitates lifelong learning, ensuring students remain capable of solving the "next generation" of technical hurdles.

- C S 240 - Advanced Software Construction
  AND WRTG 316 - Technical Communication

Learning Outcomes

Title
Integrate Gospel Principles

Tags
204314, 2

Learning Outcome
Synthesize connections between the restored gospel of Jesus Christ and the challenges of a professional career. This reflective practice is spiritually strengthening, as students learn to harmonize their technical labor with their eternal identity and purpose.

Title
Critique Evolving Technologies

Tags
204315, 3

Learning Outcome
Analyze and evaluate complex ethical dilemmas resulting from emerging technologies through rigorous written analysis and group debate. Developing this critical lens is intellectually enlarging, training the mind to look beyond surface-level utility to discern the deeper impact of innovation on human dignity.

Title
Synthesize Historical Context

Tags
204316, 4

Learning Outcome
Apply insights from the history of computing to anticipate future industry shifts and prepare for the challenges of tomorrow. This historical perspective fosters a commitment to lifelong learning, helping students recognize that their education must be a continuous, active pursuit in a rapidly changing world.

Title
Formulate Professional Integrity

Tags
204416, 1

Learning Outcome
Construct a personal framework for ethical decision-making that prioritizes honesty, transparency, and accountability in the workplace. Committing to these high standards is character building, preparing students to act with unwavering integrity regardless of professional or social pressure.

Title
Advocate for Societal Good

Learning Outcome
Communicate and present technical ideas in a persuasive, professional manner that advocates for the ethical use of technology. Mastering these communication skills equips students for a life of service, enabling them to use their expertise to bless their families, communities, and the world.

Learning Outcomes

Title
Market Discernment

Tags
204317, 1

Learning Outcome
Analyze market dynamics and technical trends to identify genuine opportunities for impactful innovation. This rigorous investigation is intellectually enlarging, training the mind to find truth and value within complex social and economic systems.

Title
Venture Composition

Learning Outcome
Compose a comprehensive business plan for a proposed software company. This act of purposeful creation is spiritually strengthening, as students learn to transform a visionary idea into an organized and functional reality.

Title
Management Stewardship

Learning Outcome
Formulate a leadership strategy that prioritizes ethical integrity and the professional growth of team members. Committing to these standards is character building, preparing students to act as responsible stewards of human and technical resources.

Title
Adaptive Strategy

Learning Outcome
Construct financial and operational models that ensure the long-term viability and flexibility of an enterprise. This focus on sustainable growth encourages lifelong learning, equipping students with the foresight to navigate the evolving challenges of the global marketplace.

C S 412 - Linear Programming and Convex Optimization

Course Information

Course Title
Linear Programming and Convex Optimization

Course Description
Optimization, problem formulation, and solution algorithms, including simplex and interior point methods. Applications from control, data mining, finance, game theory, learning, network flow, operations research, and statistical estimation.

or instructor's consent.

Learning Outcomes

Title
Mathematical Foundations

Tags
204318, 1

Learning Outcome
Develop a fluency in the mathematical foundations needed to pose optimization problems, including an appreciation for the role of convexity in characterizing solvable problems. This rigorous conceptualizing is intellectually enlarging, training the mind to identify the structured, solvable essence within complex situations.

Title
Simplex Method

Tags
204319, 2

Learning Outcome
Develop a fluency with the Simplex Method as a solution technique to Linear Programming problems. Understand how it exploits the linear nature of the problem to yield good average-case performance while failing to be efficient in the worst-case. Navigating these computational realities is character building, as it requires the meticulous logic and persistence to handle large-scale data with total accuracy.

Title
Duality Theory

Tags
204320, 4

Learning Outcome
Understand the meaning of weak and strong duality and their role in the design and verification of algorithmic solutions to optimization problems. Students will find this exploration spiritually strengthening as they observe the inherent balance and profound symmetry that governs mathematical truth.

Title
Sensitivity Analysis

Tags
204396, 5

Learning Outcome
Be able to characterize how to perturb the data of an existing problem so that its solution remains optimal for the new, perturbed problem. Developing this predictive foresight fosters a capacity for lifelong learning, enabling students to adapt their strategies as environments and information evolve.

Title
Interior Point Methods

Tags
204454, 4

Learning Outcome
Develop a fluency with interior point methods for solving Linear Programming problems and understand how these solutions may be extended to solve nonlinear, convex optimization problems. Expanding one's technical repertoire in this way is intellectually enlarging, providing a more comprehensive understanding of the universal principles of optimization.

Title
Applications

Learning Outcome
Explore the role of Linear and Convex Programming in a variety of applications, including 1) Finance, 2) Game Theory, 3) Regression, and 4) Computer Networking. This practical application of high-level theory is a form of stewardship, preparing students to use their specialized talents in meaningful service to their professions and communities.

C S 416 - Advanced Algorithms

Course Information

Course Number
416

Teaching Area
C S

Course Title
Advanced Algorithms

Course Description
Advanced Algorithms and Problem Solving topics including combinatorics, prime number theory, network flow and matching, computational geometry, randomized algorithms, advanced dynamic programming, algorithms and data structures for strings, trees, graphs and sequences.

Department
Computer Science

When Taught
Fall and Winter

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Simple Requisites

Prerequisites

Type
Prerequisite

Complete ALL of the following Courses:
- C S 312 - Algorithm Design and Analysis

Learning Outcomes

Title
Intractable Landscapes

Learning Outcome
Map the boundaries of computational possibility by proving the NP-completeness of diverse, real-world problems. This rigorous mapping of human and technical limits is intellectually enlarging, as it defines the scope of what is solvable within the physical laws of our universe.

Title
Principled Approximations

Learning Outcome
Construct and verify approximation algorithms that provide guaranteed performance for computationally "hard" problems. Navigating these intractable spaces with high-quality, albeit non-optimal, results is character building, requiring the professional humility and persistence to find the "best possible" path when perfection is out of reach.

Title
Probabilistic Insights

Learning Outcome
Harness randomness to design randomized algorithms that achieve efficiency and simplicity beyond the reach of deterministic approaches. Discovering the elegant order and reliable truth found within probabilistic logic is spiritually strengthening, as it reveals the sophisticated patterns governing seemingly chaotic systems.

Title
Dynamic Resource Evaluation

Learning Outcome
Apply amortized analysis and competitive ratios to guarantee the efficiency of online algorithms and evolving data structures over time. Developing these advanced analytical toolsets fosters a capacity for lifelong learning, providing students with enduring frameworks to evaluate the performance of technologies that have yet to be invented.

Title
Scalable Parallelism

Learning Outcome
Architect parallel algorithms that distribute complex workloads across multiple processing units to solve large-scale societal challenges. This commitment to the efficient use of shared computational power is a form of stewardship, preparing students to use their technical talents in meaningful service to a global community.

C S 418 - Bioinformatics Algorithms

Course Information

Course Number
418

Teaching Area
C S

Course Title
Bioinformatics Algorithms

Course Description
Students are introduced to bioinformatics algorithms, which are used to study diverse areas of biology. They gain experience implementing many of these algorithms and understand how these algorithms are leveraged to analyze biological datasets.

Department
Computer Science

When Taught
Fall

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Simple Requisites

Prerequisites

Type
Prerequisite

Complete ALL of the following Courses:
- C S 240 - Advanced Software Construction

Recommended
Foundational statistical inference class

Learning Outcomes

Title
Characteristics of Bioinformatics Algorithms

Learning Outcome
Students will be able to compare, evaluate, and justify the heuristics, limitations, and advantages of different algorithmic approaches used to analyze diverse types of biological data.

Title
Bioinformatic Algorithm Implementation

Learning Outcome
Students will be able to design, implement, and debug bioinformatics algorithms in Python and validate their outputs against expected results.

Title
Primary Literature

Learning Outcome
Students will be able to critically read, interpret, and evaluate peer-reviewed publications that describe bioinformatics methods, including identifying research questions, algorithmic approaches, and key findings.

Title
Character Building

Learning Outcome
Students will be able to recognize and articulate Christlike attributes demonstrated by their peers during collaborative work, explain how these attributes contribute to collective learning, and reflect on their own character development by identifying personal strengths and areas for growth.

Title
Lifelong Learning

Learning Outcome
Students will be able to leverage technology to enhance the efficiency and effectiveness of their learning and work. When applying technology to academic or professional tasks, students will demonstrate discernment by upholding ethical standards and academic integrity.

C S 428 - Software Engineering

Course Information

Teaching Area (new)
C S

Course Number
428

Teaching Area
C S

Course Title
Software Engineering

Course Description
Analysis, design, implementation, and testing of significant software systems.

Department
Computer Science

When Taught
Contact Department

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

0

Simple Requisites

Prerequisites

Type
Prerequisite

Prerequisites

Complete ALL of the following Courses:

- C S 340 - Software Design

Learning Outcomes

Title
Group Dynamics

Tags
204321, 1

Learning Outcome
Contribute effectively to a high-functioning development team to navigate the complexities of a significant project. Learning to value the strengths of others and foster collaborative unity is spiritually strengthening, as students practice the charity and selflessness required to build a Zion-like community.

Title
Software Engineering Fundamentals

Tags
204322, 2

Learning Outcome
Apply systematic engineering practices-including requirements analysis, architectural modeling, and rigorous testing-to ensure the production of reliable, high-quality software. Mastering these logical frameworks is intellectually enlarging, providing students with the cognitive depth to manage the inherent chaos of large-scale systems.

Title
Software Ethics

Tags
204323, 3

Learning Outcome
Evaluate the profound societal and moral impacts of software development through the lens of professional standards and personal values. This commitment to principled discernment is character building, equipping students with the integrity to prioritize human welfare and honesty in their future professional service.

C S 430 - Formal Verification

Course Information

Course Number
430

Teaching Area
C S

Course Title
Formal Verification

Course Description
Introduction to mathematical formalization and techniques to rigorously establish properties of data structures, functions, and whole programs, including imperative features. Students use a proof assistant embedding several languages including an advanced functional
language.

Department
Computer Science

When Taught
Fall

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Simple Requisites

Prerequisites

Type
Prerequisite

Complete ANY of the following Courses:
- C S 330 - Concepts of Programming Languages
  OR MATH 290 - Fundamentals of Mathematics

Learning Outcomes

Title
Formal Specification

Learning Outcome
Construct formal specifications for complex computer systems using mathematical logic. This rigorous process is intellectually enlarging, as it requires students to translate abstract requirements into precise, unambiguous structures that reveal the fundamental nature of a system.

Title
Property Verification

Learning Outcome
Use formal verification tools to prove critical properties and invariants of system specifications. This pursuit of absolute correctness is spiritually strengthening, as it teaches students to value and seek after provable truths that mirror the consistency of divine laws.

Title
Verification Toolsets

Learning Outcome
Apply a diverse range of automated tools, such as Model Checkers, SAT solvers, SMT solvers, and Theorem Provers, to identify system vulnerabilities. Mastering these advanced instruments is character building, requiring the patience and meticulous attention to detail necessary to ensure that mission-critical systems are truly safe and reliable.

Title
Correctness and Stewardship

Learning Outcome
Evaluate the correctness of digital infrastructures to prevent catastrophic failures in real-world applications. Developing the ability to verify that a system does exactly what it is intended to do is a form of stewardship, preparing students for a life of service where they protect the welfare and security of their communities.

C S 431 - Algorithmic Languages and Compilers

Course Information

Teaching Area (new)
C S

Course Number
431

Teaching Area
C S

Course Title
Algorithmic Languages and Compilers

Course Description
Formal description of algorithmic languages and techniques used in their compilation: semantics, ambiguities, procedures, replication, iteration, recursion.

Department
Computer Science

When Taught
Contact Department

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Simple Requisites

Prerequisites

Type
Prerequisite

Prerequisites

Complete ALL of the following Courses:

- C S 340 - Software Design

Learning Outcomes

Title
Compiler Engineering

Tags
204324, 1

Learning Outcome
Construct a complete, functional compiler that translates a high-level Java subset into executable machine code for an embedded microprocessor. The grit and persistence required to engineer this complex system from the ground up is character building, reinforcing a commitment to professional excellence and technical resilience.

Title
Algorithmic Integration

Tags
204325, 2

Learning Outcome
Incorporate sophisticated data structures and algorithms-including tree traversals, graph-based analysis, and formal proof systems-to manage the intricate stages of code translation. This deep dive into the mechanics of language is intellectually enlarging, as it demands a rigorous and comprehensive architecture of thought.

Title
Cross-Domain Synthesis

Tags
204326, 3

Learning Outcome
Synthesize and adapt compiler design patterns and optimization techniques to solve unconventional problems in diverse software domains. Developing this versatile mindset prepares students for lifelong learning, providing them with a permanent toolkit to navigate future technical evolutions.

Title
Mental model of compilation

Tags
204327, 4

Learning Outcome
Evaluate and refine application-level code by predicting its low-level transformation into machine instructions or bytecode. Mastering this "under-the-hood" perspective is spiritually strengthening, as it reveals the hidden order and consistent laws that govern the translation of abstract thought into physical action.

C S 450 - Computer Vision

Course Information

Teaching Area (new)
C S

Course Number
450

Teaching Area
C S

Course Title
Computer Vision

Course Description
Introduction to principles, algorithms, and techniques that allow computers to analyze images and video, including feature detection, image classification, object detection and recognition, segmentation, and 3D perception.

Department
Computer Science

When Taught
Winter

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Simple Requisites

Prerequisites

Type
Prerequisite

Prerequisites

Complete ALL of the following Courses:

- C S 270 - Introduction to Machine Learning
  AND C S 312 - Algorithm Design and Analysis
  AND MATH 213 - Elementary Linear Algebra
  AND MATH 215 - Computational Linear Algebra

Recommended
C S 355 and
Stat 121 or Stat 201

Learning Outcomes

Title
Introduction to Digital Signal and Image Processing

Learning Outcome
Understand and apply the following: Sampling and quantization of image information Camera properties and the acquisition of images Mathematics of image-space transformations Fourier transforms and filtering

Title
Digital Foundations

Learning Outcome
Digitize physical signals by implementing sampling and quantization strategies to create accurate digital representations. Mastering this translation from the physical to the digital is intellectually enlarging, as it challenges students to bridge the gap between continuous reality and discrete data.

Title
Image Acquisition

Learning Outcome
Model the acquisition process by characterizing camera properties and sensor behaviors. Developing this technical depth is character building, fostering the meticulous attention to detail and professional integrity required for reliable data collection.

Title
Spatial Transformations

Learning Outcome
Execute image-space transformations to manipulate and reproject visual perspectives through rigorous mathematical logic. Students will find this practice spiritually strengthening as they witness the elegant, consistent laws of geometry that bring order to our visual environment.

Title
Frequency Domain Analysis

Learning Outcome
Synthesize Fourier transforms and frequency filters to extract clarity and meaning from complex visual information. Acquiring this profound analytical lens fosters a capacity for lifelong learning, providing a versatile toolkit that remains relevant across a career of evolving signal processing technologies.

C S 452 - Database Modeling Concepts

Course Information

Teaching Area (new)
C S

Course Number
452

Teaching Area
C S

Course Title
Database Modeling Concepts

Course Description
Database models: relational, deductive, object-oriented. Integrity constraints, query languages, database design.

Department
Computer Science

When Taught
Fall, Winter, and Spring

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Simple Requisites

Prerequisites

Type
Prerequisite

Prerequisites

Complete ALL of the following Courses:

- C S 240 - Advanced Software Construction

Learning Outcomes

Title
Database Design

Tags
204328, 1

Learning Outcome
Be able to design and develop relational database applications. This includes conceptual modeling and normalization theory.

Title
Current Challenges

Tags
204329, 2

Learning Outcome
Be familiar with some of the current challenges facing database professionals.

Title
Data Considerations

Tags
204330, 3

Learning Outcome
SQL - Become competent at querying SQL across leetcode problems (MySQL and PostgreSQL) AI - Agentic AI, retrieval augmented generation, and semantic search. High Velocity Data Systems - Recovery, scale out, resilience, availability, consistent hashing, NoSQL, data change notifications, and consistent stateful distributed systems relevant today Large Data Systems - Introduction to Spark, Kusto, Kafka, Data Warehousing, ETL Data Security - Theory, RLS on Supabase

Title
Motivation

Tags
204331, 4

Learning Outcome
- Students will reflect on why God has led them to be in this class and learn these concepts. - Students will explore potential applications of class-relevant technology that could bless the world - that they could be a part of. - Students will choose an area of deep study and rigoursly and with much effort and dedication build something worth sharing.

C S 453 - Fundamentals of Information Retrieval

Course Information

Teaching Area (new)
C S

Course Number
453

Teaching Area
C S

Course Title
Fundamentals of Information Retrieval

Course Description
Concepts and terminology of information retrieval (IR) systems. Design methodologies and issues. Fundamental IR models examined: Boolean, Vector Space, Probabilistic models, and evaluation strategies.

Department
Computer Science

When Taught
Spring Term

Credit Hours

Min:
3

Fixed/Max:
3

Prerequisite

Prerequisites

Complete ALL of the following Courses:

- C S 240 - Advanced Software Construction

Learning Outcomes

Title
Understand and evaluate fundamental IR models

Tags
204466, 3

Learning Outcome

Boolean
Vector Space
Probabilistic

Title
Query Construction

Tags
204469, 5

Learning Outcome
Represent user's information needs, refine user's queries, and construct query results using snippets and categories

Title
Query Processing

Tags
204470, 4

Learning Outcome
Extract, parse, index, and classify source information for query processing

Title
Machine Learning

Tags
204471, 6

Learning Outcome
Categorize, cluster, and filter query results using various supervised and unsupervised learning strategies

Title
Analysis

Tags
204472, 7

C S 455 - Computer Graphics

Course Information

Teaching Area (new)
C S

Course Number
455

Teaching Area

Type
Completion Requirement

Complete ALL of the following Courses:

- C S 355 - Interactive Graphics and Image Processing
  AND MATH 213 - Elementary Linear Algebra
  AND MATH 215 - Computational Linear Algebra

Learning Outcomes

Title
Understanding fundamental principles of computer graphics

Tags
204439, 1

Learning Outcome
Students will be proficient in basic computer graphics algorithms such as modeling, trnasformations and rendering.Students will design and code solutions to several programming problems in graphics using algorithms and data structures.In addition, sutudents will use these techniques to program a large semester project.

C S 456 - Mobile and Ubiquitous Human-Computer Interaction

Course Information

Teaching Area (new)
C S

Course Number
456

Teaching Area
C S

Course Title
Mobile and Ubiquitous Human-Computer Interaction

Course Description
Iterative user experience design for mobile and ubiquitous computing with an emphasis on conceptualization and prototyping in specific contexts. Complete an open-ended project from initial design through functional prototype, with design and critique sessions.

Department
Computer Science

When Taught
Winter

Credit Hours

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Simple Requisites

Prerequisites

Type
Prerequisite

Prerequisites

Complete ALL of the following Courses:

- C S 356 - Advanced Techniques in Human Computer Interaction

Learning Outcomes

Title
Develop Effective User Interfaces

Tags
213407, 0, 1, 2023-08-29 07:30:25

Learning Outcome
Understand and apply the following: Multiple mechanisms for receiving information from people and presenting information to people. The geometry of basic shapes and how to use the geometry to solve basic interaction problems. Algorithms for user interface layout management. Models for specifying and evaluating user input dialogs. This outcome is Intellectually Enlarging, requires "rigorous" mental discipline and the application of mathematical and algorithmic "depth" to create professional-grade software.

Title
Needs analysis

Tags
213408, 0, 2, 2023-08-29 07:30:26

Learning Outcome
Conduct inductive research to characterize the specific needs of a user community. This supports Lifelong Learning and Service by training students to use technical skills to "go forth to serve" and improve the lives of others.

Title
Mobile sensors

Tags
213409, 0, 3, 2023-08-29 07:30:28

Learning Outcome
Implement mobile phone applications that use sensors found in a mobile phone. This focuses on "the commonality of all disciplines" by bridging hardware engineering with software development, broadening the student's technical perspective.

Title
Screenless applications

Tags
213410, 0, 4, 2023-08-29 07:30:29

Learning Outcome
Design and implement screenless interaction models using small portable computers. This is Spiritually Strengthening as it explores "calm computing" that respects user agency and reduces the digital distractions that can "smother the soul."

Title
Theory

Tags
213411, 0, 5, 2023-08-29 07:30:36

Learning Outcome
Evaluate current trends in ubiquitous computing by critiquing them through the lens of HCI theories. This builds Character by requiring "integrity and modest" judgment when assessing the social and ethical impact of "always-on" technology.

Title
Evaluation of prototypes

Learning Outcome
Assess the strengths and weaknesses of an interactive system by organizing and executing user-centric evaluations. This is Character Building, as students must practice "humility and honesty" when receiving and acting upon critical user feedback.

C S 460 - Computer Communications and Networking

Course Information

Teaching Area (new)
C S

Course Number
460

Teaching Area
C S

Course Title
Computer Communications and Networking

Course Description
Introduction to data communications and computer networking. Communications fundamentals, computer networks, software, architecture, telecommunications, regulation, standards.

Department
Computer Science

When Taught
Fall

Prerequisites

Type
Prerequisite

Prerequisites

Complete ALL of the following Courses:

- C S 235 - Data Structures and Algorithms

Learning Outcomes

Title
Internet Architecture

Tags
204332, 1

Learning Outcome
Analyze the fundamental principles of Internet architecture to explain how modularity and layering support global scalability; this fulfills the Intellectually Enlarging aim by providing a "broadening" perspective on how complex global systems are organized through rigorous logical frameworks.

Title
Internet Design

Tags
204333, 2

Learning Outcome
Diagram and evaluate the functional flow of data through the Internet stack, from the transport layer down to the physical layer; this outcome is Intellectually Enlarging as it requires students to master technical "depth" and understand the "commonality of disciplines" between software logic and physical transmission.

Title
Internet Implementation

Tags
204334, 3

Learning Outcome
Construct and simulate functional transport, routing, and MAC protocols to solve real-world data transmission challenges; this supports the Character Building aim by requiring the "sustained effort" and "integrity" needed to debug complex systems and achieve technical excellence.

Title
Internet Research

Tags
204335, 4

Learning Outcome
Critique contemporary research papers in computer networking to identify emerging trends and potential societal impacts; this fosters Lifelong Learning and Service by developing the ability to "keep pace with the rapidly advancing" field and maintaining a "lively curiosity" regarding technological change.

Title
Scholarly Communication

Tags
204336, 5

Learning Outcome
Demonstrate the ability to effectively conduct, describe and report on an experimental research project in the area of computer networking. this advances the Character Building aim as students must practice "honesty" in reporting data and "responsibility" in communicating technical truths to their peers.

C S 462 - Large-Scale Distributed System Design

Course Information

Teaching Area (new)
C S

Course Number
462

Teaching Area
C S

Course Title
Large-Scale Distributed System Design

Course Description
Principles and concepts of designing and building distributed systems. Introduction to architectures for distributed computation. Reliability, availability, and scalability of large applications. Cloud computing and APIs.

Department
Computer Science

When Taught
Contact Department

Credit Hours

Complete ALL of the following Courses:

- C S 324 - Systems Programming

OR

Prerequisites

Complete ALL of the following Courses:

Other Prerequisites

or equivalent experience.

Note

Students are allowed 1 repeat of each C S undergraduate course (all 100-, 200-, 300- or 400-level courses). This includes all students who received any grade including those who withdraw (receive a "W" grade) from a C S course. Students must wait 1 semester/term before being allowed to take a course they have failed twice. Petitions for exceptions to the policy can be completed at cs.byu.edu/undergraduate-handbook/retake-policy-cs-courses/.

Learning Outcomes

Title
Computational Practice

Tags
204507, 1

Learning Outcome
Students can implement programming projects that display knowledge of a variety of distributed system architectural styles. Some of these assignments represent significant programming projects with wide leeway in design and implementation choices. Students will analyze problems, determine solutions within an assigned architectural style, and successfully implement those solutions. Students will design and implement projects both individually and as part of a team. Students will use cloud-based systems to run and implement assignments Students will manage a cloud-based Web server and properly configure it. this fulfills the Intellectually Enlarging aim by requiring students to master the technical "depth" and rigorous logic necessary for scalable system design.

Title
Computational Theory

Tags
204508, 2

Learning Outcome
Students will understand the proper use of distributed and decentralized architectures and algorithms including RESTful APIs Hierarchical vs heterarchical system architectures MapReduce Distributed Hash Tables Event-driven system Peer-to-peer architectures including Paxos, gossip protocols, and blockchain Students will understand theoretical concepts and limitations of distributed systems including network practicalities such as latency, bandwidth, topology, cost, heterogeneity, security CAP theorem distributed transactions serialization identity and naming cryptography simultaneity This outcome is Intellectually Enlarging as it bridges the "commonality of disciplines" between abstract mathematics and physical network realities like latency and security.

Title
Critical Thinking and Communication

Tags
204509, 3

Learning Outcome
Students will interact with peers in meaningful discussion, lead discussions in peer groups, prepare written reports, and make oral presentations. This advances the Character Building aim by requiring students to practice "honesty" in their reporting and "responsibility" in communicating technical truths to their colleagues.

Title
Ethics and Computing

Tags
204510, 4

Learning Outcome
Students will be presented with societal outcomes of technological choices in distributed and decentralized systems, analyze those outcomes, explore possible alternatives from different choices, and present their findings in small groups. This aligns with the Spiritually Strengthening aim by challenging students to ensure technology serves others without becoming a digital distraction that "smothers the soul."

C S 465 - Computer Security

Course Information

Teaching Area (new)
C S

Course Number
465

Teaching Area
C S

Course Title
Computer Security

Course Description
Provides a broad introduction to computer security. Topics include operating system security, software security, cryptography, authentication, web security, and threat modeling.

Department
Computer Science

When Taught
Fall and Winter

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

- C S 224 - Introduction to Computer Systems
  AND C S 260 - Web Programming

OR

Prerequisite

Complete ALL of the following Courses:

- EC EN 224 - Introduction to Computer Systems
  AND C S 260 - Web Programming

Learning Outcomes

Title
Build a system

Learning Outcome
Implement a cryptographic algorithm from a standards specification to ensure data integrity and confidentiality. This fulfills the Intellectually Enlarging aim by requiring the rigorous mental discipline and technical "depth" necessary to master complex mathematical standards.

Title
Break and fix a system

Learning Outcome
Demonstrate how attackers compromise real-world systems and construct specific defenses to prevent these attacks. This outcome is Character Building as it requires students to maintain "integrity and responsibility" while handling powerful tools that could be used for harm.

Title
Ethical Security Analysis

Learning Outcome
This aligns with the Spiritually Strengthening aim by challenging students to build technology that protects individuals rather than creating damaging digital environments.

Title
Vulnerability Research

Learning Outcome
Analyze contemporary security vulnerabilities and critique the effectiveness of current industry patches and protocols. This fosters Lifelong Learning and Service by developing the ability to "keep pace with the rapidly advancing" threats in the cybersecurity landscape.

C S 466 - Blockchain Technologies

Course Information

Course Number
466

Teaching Area
C S

Course Title
Blockchain Technologies

Course Description
Technical underpinnings of blockchain-based systems, including cryptocurrency, smart contracts, decentralized finance (De-Fi), and Web3. Explores which problems are suitable for a blockchain-based solution and discusses arguments in favor and against blockchain systems.

Department
Computer Science

When Taught
Winter

Credit Hours

Fixed/Max:
3

Lecture Hours

Fixed:
3

Simple Requisites

Untitled Requirement

Type
Completion Requirement

Complete ALL of the following Courses:
- C S 312 - Algorithm Design and Analysis

Learning Outcomes

Title
Implementation

Tags
213412, 0, 1, 2023-08-29 07:30:45

Learning Outcome
Design and Design and implement a simple blockchain, a Merkle tree, and a proof-of-work algorithm. This fulfills the Intellectually Enlarging aim by requiring students to master the technical "depth" and rigorous logic necessary to build decentralized systems.a simple blockchain, a Merkle tree, and a proof-of-work algorithm.

Title
Problem Fit

Tags
213413, 0, 2, 2023-08-29 07:30:47

Learning Outcome
Given a problem, articulate why it may or may not be a good fit for a blockchain. This outcome is Intellectually Enlarging as it requires a "broadening" of perspective to understand how technical solutions must align with real-world needs.

Title
Smart Contract Security

Tags
213414, 0, 3, 2023-08-29 07:30:48

Learning Outcome
Understand smart contract security by breaking and fixing Solidity smart contracts. This supports the Character Building aim by requiring students to maintain high standards of "integrity and responsibility" while handling financial and cryptographic protocols.

Title
Trade-offs

Tags
213415, 0, 4, 2023-08-29 07:30:50

Learning Outcome
Present arguments for and against cryptocurrency systems. This aligns with the Spiritually Strengthening aim by challenging students to consider how technology affects human agency and whether it fosters a community of "brotherly love" or creates digital environments that distract from higher priorities.

C S 470 - Introduction to Artificial Intelligence

Course Information

Teaching Area (new)
C S

Course Number
470

Teaching Area
C S

Course Title
Introduction to Artificial Intelligence

Course Description
Introduction to core areas of artifical intelligence; intelligent agents, problem solving and search, knowledge-based systems and inference, planning, uncertainty, learning, and perception.

Type
Prerequisite

Prerequisites

Fulfill ANY of the following requirements:

Prerequisites

Complete ALL of the following Courses:

- C S 312 - Algorithm Design and Analysis
  AND MATH 215 - Computational Linear Algebra
  AND STAT 121 - Introduction to Statistical Data Analysis

OR

Prerequisites

Complete ALL of the following Courses:

- C S 312 - Algorithm Design and Analysis
  AND MATH 215 - Computational Linear Algebra
  AND STAT 201 - Statistics for Engineers and Scientists

OR

Prerequisites

Complete ALL of the following Courses:

- C S 312 - Algorithm Design and Analysis
  AND STAT 121 - Introduction to Statistical Data Analysis

Learning Outcomes

Title
Recognize problems that can use AI methods

Tags
204339, 1

Learning Outcome
from business, medicine, robotics, gaming, and machine learning. This fulfills the Intellectually Enlarging aim by providing a "broadening" perspective on how computational intelligence can be applied across diverse human disciplines.

Title
Identify the component elements of the problem

Tags
204340, 2

Learning Outcome
Does it require basic control? Does it involve uncertain reasoning? Does it have a simple goal, sophisticated utility, or multiple attributes? Does it require sequential choice or planning? How may decision makers are involved? This outcome is Intellectually Enlarging as it requires the "rigorous" mental discipline and analytical depth needed to understand the underlying structure of intelligent behavior.

Title
Formalize the problem in a way that is amenable to a solution

Tags
204341, 3

Learning Outcome
What is the internal representation? What performance criteria are relevant? What is the nature of the environment? What are the actuators? What are the sensors? What are the agent's utilities? How is uncertainty represented? This supports the Character Building aim by requiring "sustained effort" and technical "integrity" in translating abstract goals into precise, functional implementations.

Title
Be able to analyze, implement, and experiment with several A

Tags
204342, 4

Learning Outcome
Uninformed, informed, constraint-satisfaction, hill-climbing, and stochastic (e.g., genetic algorithms) search Markov provesses, Bayes rule, Bayes nets, Hidden Markov Models, Grid Filters, and Kalman Filters Expected utility theory Multi-attribute utility theory Sequential choice under uncertainty: value and policy iteration Minimax solutions from game theory: alpha-beta pruning This advances the Intellectually Enlarging aim by bridging theoretical mathematics with practical engineering to master the "commonality of disciplines."

Title
Analyze and communicate solution quality

Tags
204343, 5

Learning Outcome
Determine whether your solution is correct Express the quality of your solution Value the need to communicate your solution to others This advances the Character Building aim as students must practice "honesty" in reporting experimental results and "responsibility" in communicating the impact of their technical findings to others.

C S 471 - Voice User Interfaces

Course Information

Teaching Area (new)
C S

Course Number
471

Teaching Area
C S

Course Title
Voice User Interfaces

Course Description
Methods and development platforms for Voice User Interfaces. Principles of effective design; differences from visual or menu-based interfaces' mechanics of automatic speech recognition, intent detection, slot filling, dialog state tracking, text generation, and knowledge representation.

Department
Computer Science

When Taught
Winter

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:

Prerequisites

Complete ALL of the following Courses:

- C S 312 - Algorithm Design and Analysis
  AND STAT 121 - Introduction to Statistical Data Analysis

Learning Outcomes

Title
Recognize

Tags
204344, 2

Learning Outcome
You will be able to recognize when machine learning and data mining tools are applicable.

Title
Execute

Tags
204511, 3

Learning Outcome
You will be able to plan and execute successful machine learning and data mining projects, including selecting an adequate process for your specific task and avoiding the main machine learning pitfalls.

Title
Use Effective Machine Learning Techniques

Tags
204512, 1

Learning Outcome
You will learn the basic theory and models used in machine learning

C S 473 - Advanced Machine Learning

Course Information

Course Number
473

Teaching Area
C S

Course Title
Advanced Machine Learning

Course Description
Understand the fundamental models of machine learning, such as neural networks, decision trees, data mining, clustering, Bayesian learning, ensembles, reinforcement learning, and deep learning. Work with data and machine learning tools in real world applications.

Department
Computer Science

When Taught
Fall and Winter

Credit Hours

Complete ALL of the following Courses:

- C S 270 - Introduction to Machine Learning
  AND MATH 213 - Elementary Linear Algebra
  AND MATH 215 - Computational Linear Algebra

Learning Outcomes

Title
Machine Learning Expertise

Learning Outcome
Students will be able to implement machine learning models and learning algorithms.

Title
Mathematical and Statistical Expertise

Learning Outcome
Students will be able to create new machine learning models using tools from math and stats.

Title
Lifelong learning

Learning Outcome
Students will be able to read academic literature and incorporate ideas into their own toolbox.

C S 474 - Introduction to Deep Learning

Course Information

Teaching Area (new)
C S

Course Number
474

Teaching Area
C S

Course Title
Introduction to Deep Learning

Course Description
Understand theory and practice of deep learning, drawing material from machine vision, machine translation, dynamical systems, audio processing, neural computing and human perception. Learn supporting mathematical concepts, including linear algebra, stochastic optimization, and hardware acceleration.

Department
Computer Science

When Taught
Fall and Winter

- C S 312 - Algorithm Design and Analysis
  OR C S 472 - Introduction to Machine Learning
  OR MATH 320 - Algorithm Design and Optimization 1

Learning Outcomes

Title
Analyze Deep Learning

Learning Outcome
Theory and practice of modern deep learning and associated software frameworks. A broad look at the field, drawing on material from machine vision, machine translation, dynamical systems, audio processing, neural computing and human perception. Supporting mathematical concepts are also covered, including linear algebra, stochastic optimization, and hardware acceleration. This fulfills the Intellectually Enlarging aim by requiring students to master technical "depth" and rigorous logic across diverse computational domains.

C S 477R - Secondary Minor Student Teaching

Course Information

Teaching Area (new)
C S

Course Number
477R

Teaching Area
C S

Course Title
Secondary Minor Student Teaching

Course Description
Supervised, full-day, four week experience to develop and demonstrate competence in teaching minor area course content in the secondary classroom.

Department
Computer Science

When Taught
Fall, Winter, Spring

Credit Hours

Min:
4

Fixed/Max:

Completion Requirement

Prerequisites

Complete ALL of the following Courses:

- C S 240 - Advanced Software Construction
  AND C S 270 - Introduction to Machine Learning

Other Prerequisites
Reading ability in a language other than English.

Recommended
CS 474 or Ling 581 or similar exposure to MT or NLP technologies.

Learning Outcomes

Title
MT Technology Evolution

Tags
213416, 0, 1, 2023-08-29 07:30:54

Learning Outcome
Students will understand how the challenges of producing quality translations have been addressed by past and present technologies

Title
Building blocks of MT Technology

Tags
213417, 0, 2, 2023-08-29 07:30:56

Learning Outcome
Students will be able to prepare data to be used to train MT systems, apply and interpret quality metrics to MT output, and implement basic MT-related algorithms

Title
MT Tools and Platforms

Tags
213418, 0, 3, 2023-08-29 07:30:57

Learning Outcome
Students will be able to identify and use available platforms and tools to create MT systems for selected languages

Title
MT Applications

Tags
213419, 0, 4, 2023-08-29 07:30:59

Learning Outcome
Students will be able to create and incorporate MT systems and/or MT-related functionality in a selected scenario or application

Title
Advanced MT algorithms

Tags
213420, 0, 5, 2023-08-29 07:31:00

Learning Outcome
Students will become familiar with and be able to implement and use basic versions of certain more advanced MT algorithms used in current MT research

C S 480 - Software Engineering Capstone 1

Course Information

- C S 312 - Algorithm Design and Analysis

Learning Outcomes

Title
Formally reason about concurrent systems and executions

Tags
204353, 1

Learning Outcome
Formally reason about concurrent systems and executions. This aligns with the Intellectually Enlarging aim by developing the rigorous mental discipline and logical precision required to master abstract system properties.

Title
Define correctness in concurrent systems

Tags
204354, 2

Learning Outcome
Define basic correctness principles of concurrent systems including deadlock, live-lock, safety, and general liveness.

Title
Analyze concurrent objects for correctness

Tags
204355, 3

Learning Outcome
Use tools to analyze concurrent objects for correctness and performance

Title
Learn best-practices for spin locks and monitors

Tags
204356, 4

Learning Outcome
Learn best-practices for spin locks and monitors

Title
Discuss wait-free versus lock-free implementations

Tags
204357, 5

Learning Outcome
Compare and contrast wait-free and lock-free properties in concurrent objects

Title
Understand and use concurrent data structures

Tags
204358, 6

Learning Outcome
Understand and use concurrent data structures

Title
Correctly use barriers and fences

Tags
204359, 7

Learning Outcome
Correctly use barriers and fences

Title
Have working knowledge of tools and techniques for testing c

Tags
204360, 8

Learning Outcome
Have working knowledge of tools and techniques for testing concurrent programs

Title
Be familiar to libraries to support concurrent programming i

Tags
204361, 9

Learning Outcome
Be familiar to libraries to support concurrent programming in C, C , C#, and Java

Title
Describe future trends in multi-processor programming

Tags
204362, 10

Learning Outcome
Describe future trends in multi-processor programming. This advances the Spiritually Strengthening goal as it encourages students to consider how technological progress can be steered toward noble purposes that respect individual agency and human connection.

C S 493R - Computing Competitions

Course Information

Teaching Area (new)
C S

Course Number
493R

Teaching Area
C S

Course Title
Computing Competitions

Course Description
Students work in teams to prepare for and compete in computer science competitions in areas such as programming, data science, and ethical hacking.

Department
Computer Science

When Taught
Winter

Credit Hours

Min:
3

Fixed/Max:
3

C S 497R - Undergraduate Research

Course Information

Teaching Area (new)
C S

Course Number
497R

Teaching Area
C S

Course Title
Undergraduate Research

Course Description
Students receive course credit for doing undergraduate research under the supervision of a faculty mentor.

Department
Computer Science

When Taught
All Semesters/Terms

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
0

Other Prerequisites
Students must turn in signed research agreement at least 1 business day before add/drop deadline in order to receive permission-to-add code. Research agreement form can be found at http://cs.byu.edu or in the CS Department office.

Learning Outcomes

Title
Students will gain research skills

Learning Outcome
Students work in a laboratory and develop research skills. This supports the Character Building aim by requiring students to collaborate and work together in the lab environment.

C S 498R - Undergraduate Special Projects

Course Information

Teaching Area (new)
C S

Course Number
498R

C S

Course Title
Undergraduate Special Projects

Course Description
Students identify an interesting problem in computer science and solve it with the aid of faculty members.

Department
Computer Science

When Taught
All Semesters/Terms

Credit Hours

Min:
1

Fixed/Max:
3

Simple Requisites

Prerequisites

Type
Prerequisite

Prerequisites

Complete ALL of the following Courses:
- C S 240 - Advanced Software Construction

Note
If taken for less than 3 credits this course may not count as a CS elective. See approval form on the CS Department web site at https://cs.byu.edu/. Project proposals must be submitted by the last day of class of the prior semester or term. Students are allowed 1 repeat of each CS undergraduate course (all 100-, 200-, 300- or 400-level courses). This includes all students who received any grade including those who withdraw (receive a "W" grade) from a CS course. Students must wait 1 semester/term before being allowed to take a course they have failed twice. Petitions for exceptions to the policy can be completed at cs.byu.edu/undergraduate-handbook/retake-policy-cs-courses/.

Learning Outcomes

Title
Capstone Experience in a Special Topic

Tags
204495, 1

Learning Outcome
Students will propose, execute, and report a capstone project in an area that they choose in consultation with a professor. Each project is approved by the Undergraduate Curriculum Committee. This supports the Character Building aim by requiring students to collaborate and work with a professor who can mentor them.

C S 500 - (C S-Chem-Geol-Math-MthEd-Phscs-Stat) Business Career Essentials in Science and Math

1.5

Lab Hours

Fixed:
0

Learning Outcomes

Title
Project Management

Tags
204391, 0

Learning Outcome
Learn the basics of project management and understand why this is important to business success

Title
Business Presentations and Writing

Tags
204409, 3

Learning Outcome
Learn the basics of effective business presentations and writing

Title
Technology Readiness

Tags
204426, 2

Learning Outcome
Understand the different levels of technology readiness and the process of moving a project through these levels to completion

C S 501R - Advanced Topics in Computer Science

Course Information

Teaching Area (new)
C S

Course Number
501R

Teaching Area
C S

Course Title
Advanced Topics in Computer Science

Course Description
Advanced undergraduate- and graduate-level subjects as announced before each semester.

Department
Computer Science

When Taught
Fall

Credit Hours

Min:
1

Fixed/Max:
3

Lab Hours

Fixed:
0

Other Prerequisites
Instructor's consent

Learning Outcomes

Title
Advanced topic in Computer Science

Tags
204352, 1

Learning Outcome
Students will learn a topic in Computer Science not covered by the regular curriculum. This fulfills the Intellectually Enlarging aim by requiring rigorous mental discipline and the rapid application of computer science theory to practical challenges.

C S 502 - Job Search Strategies

Course Information

Teaching Area (new)
C S

Course Number
502

Teaching Area
C S

Course Title
Job Search Strategies

Course Description
Course will assist graduating students in identifying and connecting to potential employers.

Type
Prerequisite

Prerequisites

Complete ALL of the following Courses:

- MATH 213 - Elementary Linear Algebra
  AND MATH 215 - Computational Linear Algebra

Recommended
C S 312 and 412; Math 334; or equivalents

Learning Outcomes

Title
Systems Concepts

Tags
204404, 4

Learning Outcome
Understand system concepts of stability, controllability, observability, minimality, behavior, and structure.

Title
Representation

Tags
204477, 0

Learning Outcome
Understand various mathematical representations of systems. This outcome is Intellectually Enlarging as it requires students to bridge abstract mathematics with physical reality.

Title
Four Basic Problems

Tags
204478, 1

Learning Outcome
Understand the four basic problems: Model Reduction (i.e. Approximation), System Identification (i.e. Learning), Control (i.e. Decision Making), and Verification/Validation, and how they impact each other.

Title
Hankel Singular Values

Tags
204479, 2

Learning Outcome
Understand Hankel singular values and their role in balanced truncation as an approximation to optimal model reduction.

Title
LMIs

Tags
204480, 3

Learning Outcome
Understand Linear Matrix Inequalities and their role in various identification and control problems.

Title
Small Gain

Tags
204481, 5

Learning Outcome
Understand the role of the Small Gain Theorem and Passivity in providing guarantees of algorithm correctness in spite of model uncertainty.

C S 556 - Research Methods and Study Design in Human-Computer Interaction

Course Information

Course Number
556

Teaching Area
C S

Course Title
Research Methods and Study Design in Human-Computer Interaction

Course Description
Understand and use qualitative and quantitative methods for human-computer interaction research, such as interviews, observations, surveys, and measurements. Learn to choose study designs, analyze data, and consider ethical implications of involving human participants in research.

Department
Computer Science

When Taught
Winter

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Simple Requisites

Prerequisites

Type
Prerequisite

Prerequisites

Complete ALL of the following Courses:

- C S 356 - Advanced Techniques in Human Computer Interaction

Other Prerequisites
Prior experience in user experience or human-computer interaction.

Learning Outcomes

Title
Research Methodologies

Learning Outcome
Students will be able to choose between qualitative and quantitative research methods in human-computer interaction.

Title
Logical Approaches

Learning Outcome
Students will be able to choose between inductive and deductive research methods in human-computer interaction.

Title
Decision-Making

Learning Outcome
Students will be able to discuss decisions made in research study design.

Title
Ethical Compliance

Learning Outcome
Students will be able to successfully navigate the institutional review board application process to ensure research compliance.

Title
Method Assessment

Learning Outcome
Students will critically assess study methods presented in published peer-reviewed HCI research.

C S 574 - Transformer Models for Natural Language Processing

Course Information

Course Number
574

Teaching Area
C S

Course Title
Transformer Models for Natural Language Processing

Course Description
Understand and learn how to use state of the art transformer language models for many Natural Language Processing and Understanding tasks, such as text classification, text generation, question answering, machine translation, and many other tasks.

Department
Computer Science

Prerequisites

Complete ALL of the following Courses:

- C S 472 - Introduction to Machine Learning
  AND C S 312 - Algorithm Design and Analysis

Learning Outcomes

Title
Architectural Foundations

Learning Outcome
Construct and explain the internal mechanics of transformer architectures including self-attention mechanisms and positional encoding. This fulfills the Intellectually Enlarging aim by requiring the rigorous mental discipline and mathematical depth needed to master state-of-the-art models.

Title
Model Implementation

Learning Outcome
Develop and fine-tune large-scale language models for specific downstream tasks such as abstractive summarization or sentiment analysis. This outcome is Character Building because it demands "sustained effort" and professional integrity when handling massive datasets and intensive computational resources.

Title
Ethical Deployment

Learning Outcome
Evaluate the ethical implications of generative AI including algorithmic bias and truthfulness to propose responsible deployment strategies. This aligns with the Spiritually Strengthening aim by encouraging students to use technology in ways that protect human dignity and honor the agency of all individuals.

C S 575 - Introduction to Graph Data Science

Course Information

Course Number
575

Teaching Area
C S

Course Title
Introduction to Graph Data Science

Course Description
Use graph structures to explore labeled data and discover network relationships within the data. Understand network relationships, learn graph models of common network structures, identify network communities and influential members, and work with knowledge graphs.

Department
Computer Science

When Taught
Winter

Credit Hours

Fixed/Max:
3

Lecture Hours

Fixed:
3

Simple Requisites

Prerequisites

Type
Completion Requirement

Complete ALL of the following Courses:
- C S 312 - Algorithm Design and Analysis

Other Prerequisites
Linear Algebra

Learning Outcomes

Title
Network Algorithms

Tags
213421, 0, 1, 2023-08-29 07:32:13

Learning Outcome
Students will be able to implement and use Barabasi-Albert, Watts-Strogatz, Erdos-Renyi, and affiliation network-based algorithms. This fulfills the Intellectually Enlarging aim by requiring the rigorous mental discipline and technical depth necessary to model complex global systems.

Title
Graph Theory Foundations

Tags
213422, 0, 2, 2023-08-29 07:32:16

Learning Outcome
Students will be able to implement and use graph theory concepts applicable to networks: adjacency matrix, adjacency matrix, adjacency lists, graph Laplacian, algebraic connectivity, spectral graph properties. This outcome is Intellectually Enlarging while combining abstract linear algebra and practical data science.

Title
Diffusion Dynamics

Tags
213423, 0, 3, 2023-08-29 07:32:18

Learning Outcome
Simulate the spread of information or disease across a network by modeling simple and complex contagion processes. This aligns with the Spiritually Strengthening aim by challenging students to understand how influence travels through communities and to consider their role in promoting uplifting connections.

Title
Network Metrics

Tags
213424, 0, 4, 2023-08-29 07:32:19

Learning Outcome
Students will apply graph metrics to understand diffusion dynamics: clustering, density, diameter, algebraic connectivity, degree distribution, distance, modularity, assortativity. This supports the Character Building aim by requiring the technical integrity and "sustained effort" needed to accurately assess the health and structure of a social or physical network.

Title
Agent-Based Modeling

Tags
213425, 0, 5, 2023-08-29 07:32:21

Learning Outcome
Students will be able to implement agent-based models over networks. This fosters Lifelong Learning and Service by training students to use their knowledge to "go forth to serve" by predicting and solving real-world challenges in public health or social organization.

Title
Network Mitigation and Promotion

Tags
213426, 0, 6, 2023-08-29 07:32:22

Learning Outcome
Students will be able to mitigate/promote network effects by identifying communities, removing edges, adding edges, choosing early adopters. This advances the Character Building aim as students must exercise "responsibility" and ethical judgment when making decisions that impact the connectivity and agency of a digital or local community.

C S 580 - Theory of Predictive Modeling

Course Information

Teaching Area (new)
C S

Course Number
580

Teaching Area
C S

Course Title
Theory of Predictive Modeling

Course Description
Mathematical, computational, and philosophical foundations of machine learning, control, and physical modeling. Introduction to system identification, causality, uncertainty, model approximation, and information geometry.

Department

Note
Survival-level conversation, reading, listening, and culture skills in the target language.

Learning Outcomes

Title
Speaking

Tags
195499, 1

Learning Outcome
Speak target language well enough to ask for instructions and to carry out simple, routine survival-type transactions.

Title
Social Situations

Tags
195500, 2

Learning Outcome
Function appropriately in familiar, routine social situations in the target culture.

Title
Follow Instructions

Tags
196650, 3

Learning Outcome
Understand spoken and written target language well enough to follow simple instructions.

Title
Comprehension

Tags
196658, 1

Learning Outcome
Understand written and spoken target language relating to familiar topics.

Title
Speaking

Tags
196659, 2

Learning Outcome
Speak the target language well enough to satisfy immediate needs related to basic social situations, simple transactions, basic food and lodging, and routine travel.

Title
Writing

Tags
196660, 3

Learning Outcome
In the target language, write short, simple messages consisting of structurally-accurate sentences on familiar topics.

Title
Culture

Tags
196661, 4

Learning Outcome
Function appropriately in routine, familiar situations in the target culture.

Note
Teacher may waive prerequisite based on prior experience.

Learning Outcomes

Title
Elaboration

Tags
196676, 1

Learning Outcome
Create structurally-accurate, elaborated utterances and begin to group utterances into paragraphs and narratives. Do this in present, past and future time.

Title
Vocabulary

Tags
196677, 2

Learning Outcome
Broaden vocabulary for both reception (listening and reading comprehension) and production (speaking and writing).

Title
Grammar

Tags
196683, 3

Learning Outcome
Review and increase understanding of basic language structures.

Title
Culture

Tags
196686, 4

Learning Outcome
Discuss in the target language common products and practices related to every-day life in the target culture.

CAKCQ 202 - Second-Year Language Study: Cakchiquel

Prerequisites

Complete ALL of the following Courses:

- CAKCQ 201 - Second-Year Language Study: Cakchiquel

Note
Teacher may waive prerequisite based on prior experience. Culminating course for GE Languages of Learning requirement. Not an entry course for returned missionaries.

Learning Outcomes

Title
Communication Skills

Tags
196693, 1

Learning Outcome
In both written and spoken target language, communicate with reasonable accuracy about real-world activities with well-educated members of the target-culture accustomed to dealing with non-native speakers.

Title
Comprehension

Tags
196694, 2

Learning Outcome
Understand every-day written and verbal instructions. Comprehend concrete details and global meaning of intermediate-level written and spoken passages related to familiar topics that native speakers encounter routinely in their daily life.

Title
Cultural Knowledge

Tags
196695, 3

Learning Outcome
Discuss in the target language cultural practices related to every-day life in the target culture. Acquire basic background knowledge of important achievements related to the target culture (historical figures and events, major literary and artistic movements, government and religious institutions, etc.).

Title
General Education Requirements

Tags
196697, 4

Learning Outcome
Complete Languages of Learning and Global & Cultural Awareness for General Education.

CAKCQ 305 - Language Skills Development: Cakchiquel

Course Information

Teaching Area (new)
CAKCQ

Course Number
305

Teaching Area
CAKCQ

Course Title
Language Skills Development: Cakchiquel

Course Description
Increasing proficiency in one or more of the following Cakchiquel language and culture skills: speaking, listening, reading, writing, cultural awareness.

Department
Language Studies

When Taught
Contact Department

Credit Hours

Min:
1

Fixed/Max:
4

Other Prerequisites
Instructor's consent.

Learning Outcomes

Title
Defined Special Purpose

Tags
196711, 1

Learning Outcome
Develop the overall language and cultural competence to meet the needs of a "special" purpose identified by the Center for Language Studies.

Title
Communication

Tags
196713, 2

Learning Outcome
Communicate effectively enough to function in a variety of situations likely to be encountered when dealing with native speakers associated with the special purpose. This may include interpersonal, interpretive, and presentational (written and oral) modes of communication.

Title
Cultural Competence

Tags
196715, 3

Learning Outcome
Interact with cultural competence and understanding when dealing with native speakers associated with the special purpose.

CAKCQ 321 - Advanced Grammar: Cakchiquel

Course Information

Teaching Area (new)

Note
Teacher may waive prerequisite based on prior experience.

Learning Outcomes

Title
Analyze

Tags
196802, 1

Learning Outcome
Analyze target language morphology and syntax.

Title
Apply

Tags
196803, 2

Learning Outcome
Apply grammar rules with accuracy to a variety of advanced grammatical and communicative tasks.

Title
Independent Learning

Tags
196804, 3

Learning Outcome
Function as independent learners of the target language by using proper terms and appropriate resources for language analysis.

CAKCQ 330 - Advanced Language Proficiency Through Cultural Studies: Cakchiquel

Other Prerequisites
Cakcq 202 or equivalent.

Note
Entry course for returned missionaries or others of equivalent language experience. Required course for obtaining language credit by examination. May fulfill the GE Languages of Learning requirement.

Learning Outcomes

Title
Communication Skills

Tags
196724, 1

Learning Outcome
In both written and spoken target language, communicate accurately with well-educated members of the target-culture about real-world activities.

Title
Comprehension

Tags
196725, 2

Learning Outcome
Understand detailed written and verbal instructions. Comprehend historical passages, newspaper and magazine articles, and broadcast news reports well educated native speakers encounter routinely in their daily life.

Title
Cultural Knowledge

Tags
196727, 3

Learning Outcome
Acquire background knowledge of important achievements related to the target culture (historical figures and events, major literary and artistic movements, government and religious institutions, etc.). Discuss in the target language cultural practices related to major life events in the target culture (birth, marriage, death, etc.).

Title
General Education Requirements

Tags
196728, 4

Learning Outcome
Complete Languages of Learning and Global & Cultural Awareness for General Education.

Teacher may waive prerequisite based on prior experience.

Learning Outcomes

Title
Recognize and Analyze

Tags
196729, 1

Learning Outcome
Recognize and analyze the most important genres in target-language literature.

Title
Key Characteristics

Tags
196733, 2

Learning Outcome
Identify and discuss key characteristics of the most important literary movements in the target culture.

Title
Context

Tags
196735, 3

Learning Outcome
Place literature in a meaningful cultural and historical context.

Title
Language Skills

Tags
196737, 4

Learning Outcome
Improve target-language reading, writing, and speaking skills.

Learning Outcomes

Title
Defined Career Purposes

Tags
196739, 1

Learning Outcome
Develop overall language and cultural competence needed to study and begin entry into a career agreed upon by the Center for Language Studies.

Title
Knowledge

Tags
196741, 2

Learning Outcome
Carry out research to identify, understand, and discuss standards, processes, people and cultural norms associated with the target career.

Title
Interpretive Competence

Tags
196742, 3

Learning Outcome
Understand, interpret and analyze advanced-level written and oral texts on topics related to the target career.

Title
Communicative Competence

Tags
196743, 4

Learning Outcome
Communicate effectively at the advanced-level in order to function in a variety of situations likely to be encountered when dealing with native speakers who are associated with the target career. This will include interpersonal communication and both written and oral presentational communication.

Title
Cultural Competence

Tags
196744, 5

Learning Outcome
Interact with cultural competence and understanding when dealing with native speakers who are associated with the target career.

196794, 4

Learning Outcome
Discuss in the target language common products and practices related to every-day life in the target culture.

CATLN 202 - Second-Year Language Study: Catalan

Course Information

Teaching Area (new)
CATLN

Course Number
202

Teaching Area
CATLN

Course Title
Second-Year Language Study: Catalan

Course Description
Continued emphasis on Catalan communication skills, vocabulary building, and cultural awareness.

Department
Language Studies

When Taught
Contact Department

Credit Hours

Min:
4

Fixed/Max:
4

Lecture Hours

Fixed:
5

Lab Hours

Fixed:
1

Simple Requisites

Prerequisites

Type
Prerequisite

Prerequisites

Complete ALL of the following Courses:

- CATLN 201 - Second-Year Language Study: Catalan

Note
Teacher may waive prerequisite based on prior experience. Culminating course for GE Languages of Learning requirement. Not an entry course for returned missionaries.

Learning Outcomes

Title
Communication Skills

Tags
196795, 1

Learning Outcome
In both written and spoken target language, communicate with reasonable accuracy about real-world activities with well-educated members of the target-culture accustomed to dealing with non-native speakers.

Title
Comprehension

Tags
196796, 2

Learning Outcome
Understand every-day written and verbal instructions. Comprehend concrete details and global meaning of intermediate-level written and spoken passages related to familiar topics that native speakers encounter routinely in their daily life.

Title
Cultural Knowledge

Tags
196797, 3

Learning Outcome
Discuss in the target language cultural practices related to every-day life in the target culture. Acquire basic background knowledge of important achievements related to the target culture (historical figures and events, major literary and artistic movements, government and religious institutions, etc.).

Title
General Education Requirements

Tags
196798, 4

Learning Outcome
Complete Languages of Learning and Global & Cultural Awareness for General Education.

CATLN 305 - Language Skills Development: Catalan

Course Information

Teaching Area (new)
CATLN

Course Number
305

Teaching Area
CATLN

Course Title
Language Skills Development: Catalan

Course Description
Increasing proficiency in one or more of the following Catalan language and culture skills: speaking, listening, reading, writing, cultural awareness.

Department
Language Studies

When Taught
Contact Department

Credit Hours

Min:
1

Fixed/Max:
4

Other Prerequisites
Instructor's consent.

Learning Outcomes

Title
Defined Special Purpose

Tags
196799, 1

Learning Outcome
Develop the overall language and cultural competence to meet the needs of a "special" purpose identified by the Center for Language Studies.

Title
Communication

Tags
196800, 2

Learning Outcome
Communicate effectively enough to function in a variety of situations likely to be encountered when dealing with native speakers associated with the special purpose. This may include interpersonal, interpretive, and presentational (written and oral) modes of communication.

Title
Cultural Competence

Tags
196801, 3

Learning Outcome
Interact with cultural competence and understanding when dealing with native speakers associated with the special purpose.

CATLN 321 - Advanced Grammar: Catalan

Course Information

Teaching Area (new)
CATLN

Course Number
321

Teaching Area
CATLN

Course Title
Advanced Grammar: Catalan

Course Description
Systematic review of grammar and syntax of Catalan.

Department
Language Studies

When Taught

Prerequisite

Prerequisites

Complete ALL of the following Courses:

- CATLN 202 - Second-Year Language Study: Catalan

Note
Teacher may waive prerequisite based on prior experience.

Learning Outcomes

Title
Analyze

Tags
196805, 1

Learning Outcome
Analyze target language morphology and syntax.

Title
Apply

Tags
196806, 2

Learning Outcome
Apply grammar rules with accuracy to a variety of advanced grammatical and communicative tasks.

Title
Independent Learning

Tags
196807, 3

Learning Outcome
Function as independent learners of the target language by using proper terms and appropriate resources for language analysis.

CATLN 330 - Advanced Language Proficiency Through Cultural Studies: Catalan

Course Information

Teaching Area (new)
CATLN

Course Number
330

Teaching Area
CATLN

Course Title
Advanced Language Proficiency Through Cultural Studies: Catalan

Course Description
Study of Catalan culture using interpersonal, presentational, and interpretive skills in the target language.

Department
Language Studies

When Taught
Contact Department

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Other Prerequisites
Catln 202 or equivalent.

Note
Entry course for returned missionaries or others of equivalent language experience. Required course for obtaining language credit by examination. May fulfill the GE Languages of Learning requirement.

Learning Outcomes

Title
Communication Skills

Tags
196808, 1

Learning Outcome
In both written and spoken target language, communicate accurately with well-educated members of the target-culture about real-world activities.

Title
Comprehension

Tags
196809, 2

Learning Outcome
Understand detailed written and verbal instructions. Comprehend historical passages, newspaper and magazine articles, and broadcast news reports well educated native speakers encounter routinely in their daily life.

Title
Cultural Knowledge

Tags
196810, 3

Learning Outcome
Acquire background knowledge of important achievements related to the target culture (historical figures and events, major literary and artistic movements, government and religious institutions, etc.). Discuss in the target language cultural practices related to major life events in the target culture (birth, marriage, death, etc.).

Title
General Education Requirements

Tags
196811, 4

Learning Outcome
Complete Languages of Learning and Global & Cultural Awareness for General Education.

Complete ALL of the following Courses:

- CATLN 330 - Advanced Language Proficiency Through Cultural Studies: Catalan

Note
Teacher may waive prerequisite based on prior experience.

Learning Outcomes

Title
Recognize and Analyze

Tags
196812, 1

Learning Outcome
Recognize and analyze the most important genres in target-language literature.

Title
Key Characteristics

Tags
196813, 2

Learning Outcome
Identify and discuss key characteristics of the most important literary movements in the target culture.

Title
Context

Tags
196814, 3

Learning Outcome
Place literature in a meaningful cultural and historical context

Title
Language Skills

Tags
196815, 4

Learning Outcome
Improve target-language reading, writing, and speaking skills.

Prerequisite

Prerequisites

Complete ALL of the following Courses:

- CATLN 330 - Advanced Language Proficiency Through Cultural Studies: Catalan

Learning Outcomes

Title
Defined Career Purposes

Tags
196816, 1

Learning Outcome
Develop overall language and cultural competence needed to study and begin entry into a career agreed upon by the Center for Language Studies.

Title
Knowledge

Tags
196817, 2

Learning Outcome
Carry out research to identify, understand, and discuss standards, processes, people and cultural norms associated with the target career.

Title
Interpretive Competence

Tags
196818, 3

Learning Outcome
Understand, interpret and analyze advanced-level written and oral texts on topics related to the target career.

Title
Communicative Competence

Tags
196819, 4

Learning Outcome
Communicate effectively at the advanced-level in order to function in a variety of situations likely to be encountered when dealing with native speakers who are associated with the target career. This will include interpersonal communication and both written and oral presentational communication.

Title
Cultural Competence

Tags
196820, 5

Learning Outcome
Interact with cultural competence and understanding when dealing with native speakers who are associated with the target career.

CBE 170 - Introduction to Chemical and Biological Engineering

Course Information

Teaching Area (new)
CH EN

Course Number
170

Teaching Area
CBE

Course Title
Introduction to Chemical and Biological Engineering

Course Description
Introduction to fundamental principles of chemical and biological engineering and development of problem-solving skills through in-class activities, laboratory experiments, and a hands-on design project.

Department
Chemical and Biological Engineering

When Taught
Fall and Winter

Credit Hours

Min:
2

Fixed/Max:
2

Lecture Hours

Fixed:
1

Lab Hours

Fixed:
2

Recommended
Chem 105 or Chem 111

Note
The prerequisites may be taken concurrent with the course. Check with the department.

Learning Outcomes

Title
Teamwork and Leadership (ABET Student Outcome 5)

Tags
179479, 2

Learning Outcome
Students will function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.

Title
Experimentation and Analysis (ABET Student Outcome 6)

Tags
179480, 3

Learning Outcome
Students will be able to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.

Title
Technical Presentation (BYU Course Objective)

Tags
179485, 5

Learning Outcome
Students will be able to give effective, well-organized oral presentations to a technical audience about course subject matter.

Title
Success in Learning (BYU Course Objective)

Tags
179487, 7

Learning Outcome
Students will identify the practices needed to succeed as a chemical engineering student and decide whether to continue in the program.

Title
Written Reports (BYU Course Objective)

Tags
179488, 8

Learning Outcome
Students will be able to communicate effectively in written formats about course subject matter.

Title
Problem Definition (BYU Course Objective)

Tags
179489, 9

Learning Outcome
Students will identify and explain the value of the types of problems that chemical engineers solve.

Title
Critical Thinking (BYU Course Objective)

Tags
179484, 0, 4

Learning Outcome
Students will exhibit critical and creative thinking skills for analysis and evaluation of problems and cause-effect relationships.

Title
Physical Phenomena (BYU Course Objective)

Tags
179486, 0, 6

Learning Outcome
Students will explain fundamental physical principles of chemical engineering observed through hands-on design projects, in-class activities, and laboratory experiments. The selected principles will pertain to material and energy balances, fluid mechanics, heat transfer, chemical reaction engineering, and separations.

CBE 191 - Global Impact of Chemical and Biological Engineers

Course Information

Teaching Area (new)
CH EN

Course Number
191

Teaching Area
CBE

Course Title
Global Impact of Chemical and Biological Engineers

Course Description
Chemical and biological engineers use their skills to understand the physical world, solve problems, and meet societal needs in a variety of areas. These include developing sustainable sources of energy, fuels, food, water, and chemicals, while pioneering improved medicines, medical diagnostics, advanced materials, electronic devices, and chemical processes. In this course, faculty and visiting experts will share their problem-solving experiences and provide career guidance, helping students find areas of chemical and biological engineering most interesting to them.

Department
Chemical and Biological Engineering

When Taught
Fall and Winter

Credit Hours

Min:
0.5

Fixed/Max:
0.5

Lecture Hours

Fixed:
1

Lab Hours

Fixed:
0

Note
College Lecture attendance required.

Learning Outcomes

Learning Outcome
Students will explain the role of chemical and biological engineers in solving critical societal challenges.

Learning Outcome
Students will describe multiple career options and potential job functions in chemical and biological engineering

Title
Life-long Learning (BYU Course Objective)

Learning Outcome
Students will plan a course schedule for timely graduation.

CBE 199R - Academic Internship

Course Information

Teaching Area (new)
CH EN

Course Number
199R

Teaching Area
CBE

Course Title
Academic Internship

Course Description
Work experience evaluated by supervisor and posted on student's transcript.

Department
Chemical and Biological Engineering

When Taught
Contact Department

Credit Hours

Min:
0.5

Fixed/Max:
3

Other Prerequisites
Consent of department internship coordinator.

Note
An APPROVED Internship Application required before adding.

Learning Outcomes

Title
Professional Communication

Tags
179351, 2

Learning Outcome
Student demonstrates professional communication skills (report).

Title
Professional Experiences

Tags
179394, 1

Learning Outcome
Student acquires professional experiences in the discipline.

Title
Converting Experience into Understanding

Tags
179424, 3

Learning Outcome
Student demonstrates the ability to use reflective thinking to convert professional experience into academic understanding.

CBE 263 - Computational Tools for Chemical and Biological Engineers

Course Information

Teaching Area (new)
CH EN

Course Number
263

Teaching Area
CBE

Course Title
Computational Tools for Chemical and Biological Engineers

Course Description
Use of spreadsheets, advanced equation-solving packages, and structured languages to solve engineering problems. Introduction to chemical and biological process principles.

Department
Chemical and Biological Engineering

When Taught
Fall, Winter, Spring

Credit Hours

Min:
2

Fixed/Max:
2

Lecture Hours

Fixed:
2

Lab Hours

Fixed:
0

Simple Requisites

Prerequisites

Type
Prerequisite

Prerequisites

Complete ALL of the following Courses:

- CBE 170 - Introduction to Chemical and Biological Engineering **AND** MATH 113 - Calculus 2

Other Prerequisites
or concurrent enrollment.

Note
College Lecture attendance required.

Learning Outcomes

Title
Unit Conversions (BYU Course Objective)

Tags
179494, 1

Learning Outcome
Students will be able to perform unit conversions.

Title
Dimensional Consistency (BYU Course Objective)

Tags
179495, 2

Learning Outcome
Students will be able to ensure dimensional consistency when evaluating equations.

Title
Spreadsheets (BYU Course Objective)

Tags
179496, 3

Learning Outcome
Students will be able to use spreadsheets and structured programming (e.g., loops, arrays, conditionals, functions) to solve foundational mathematical problems (e.g., curve fitting, integration, solving equations, etc.).

Title
Complex Numerical Problems (BYU Course Objective)

Tags
179497, 4

Learning Outcome
Students will be able to combine spreadsheet and/or programming elements to solve complex numerical engineering problems.

Title
Estimation and Reasonableness (BYU Course Objective)

Tags
179498, 5

Learning Outcome
Students will be able to make order of magnitude estimates, assess reasonableness of solutions, and select appropriate levels of solution sophistication.

CBE 273 - Chemical and Biological Process Principles

Course Information

Prerequisites

Fulfill ANY of the following requirements:

Prerequisites

Complete ALL of the following Courses:

- CBE 170 - Introduction to Chemical and Biological Engineering
  AND CHEM 112 - Principles of Chemistry 2
  AND PHSCS 121 - Introduction to Newtonian Mechanics

OR

Prerequisites

Complete ALL of the following Courses:

- CBE 170 - Introduction to Chemical and Biological Engineering
  AND CHEM 106 - General College Chemistry 2
  AND PHSCS 121 - Introduction to Newtonian Mechanics

Other Prerequisites

Math 113
Ch En 263 or concurrent enrollment.

Note

College Lecture attendance required.

Learning Outcomes

Title
Engineering Design (ABET Student Outcome 2)

Tags
179517, 1

Learning Outcome
Students will be able to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.

Title
Teamwork and Leadership (ABET Student Outcome 5)

Tags
179518, 2

Learning Outcome
Students will function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.

Title
Unit Conversions (BYU Course Objective)

Tags
179519, 3

Learning Outcome
Students will be able to perform unit conversions.

Title
Dimensional Consistency (BYU Course Objective)

Tags
179520, 4

Learning Outcome
Students will be able to ensure dimensional consistency when evaluating equations.

Title
Critical Thinking (BYU Course Objective)

Tags
179521, 5

Learning Outcome
Students will exhibit critical and creative thinking skills for analysis and evaluation of problems and cause-effect relationships.

Title
Engineering Intuition (BYU Course Objective)

Tags
179522, 6

Learning Outcome
Students will be able to make order of magnitude estimates, assess reasonableness of solutions, and select appropriate levels of solution sophistication.

Title
Work and Unit Ops (BYU Course Objective)

Tags
179523, 11

Learning Outcome
Students will be able to estimate the work of pumps, turbines, and/or compressors using energy balances (e.g. W=ΔH).

Title
Designing Multi-unit Processes (BYU Course Objective)

Tags
179524, 12

Learning Outcome
Students will be able to design multiple-unit processes.

Title
Ethics

Tags
179526, 14

Learning Outcome
Students will be introduced to the AIChE code of ethics.

Title
Process Variables (BYU Course Objective)

Tags
179527, 15

Learning Outcome
Students will understand process variables (e.g., P, T, flow rate, conc.) including procedures and equipment for their measurement.

Title
Material Balances (BYU Course Objective)

Tags
179528, 16

Learning Outcome
Students will be able to set up and solve steady state material balances.

Title
Energy Balances (BYU Course Objective)

Tags
179529, 17

Learning Outcome
Students will be able to set up and solve steady state energy balances (1st law of thermodynamics) for closed and open systems.

Title
Transient Mass Balances (BYU Course Objective)

Tags
179530, 18

Learning Outcome
Students will be able to set up and solve transient mass balances.

Title
Fluid Statics (BYU Course Objective)

Tags
179533, 21

Learning Outcome
Students will be able to solve simple fluid statics problems (e.g. manometers).

Title
Phase Equilibrium (BYU Course Objective)

Tags
179534, 7

Learning Outcome
Students will be able to apply solution thermodynamics fundamentals to solve phase equilibrium problems including bubble point, dew point and flash calculations.

Title
Material Balances with Reactions (BYU Course Objective)

Tags
179535, 8

Learning Outcome
Students will understand and be able to use the extent of reaction in material balances for systems involving chemical reactions.

Title
Heat Properties (BYU Course Objective)

Tags
179558, 10

Learning Outcome
Students will understand and be able to apply the concepts of heat capacity, latent heat, heat of reaction, heat of combustion, and heat of formation.

Title
Phase Diagrams (BYU Course Objective)

Tags
207581, 13

Learning Outcome
Students will be able to read and understand phase diagrams and use these to determine physical phenomena.

Title
Pure-component Phase Behavior (BYU Course Objective)

Tags
209016, 0, 9

Learning Outcome
Students will be able to solve problems related to pure-component phase behavior including vapor pressure, critical point, freezing line, triple point, etc.

Title
Molecular-level Understanding (BYU Course Objective)

Tags
179531, 0, 19

Learning Outcome
Students will be able to analyze how molecular- and continuum-scale phenomena lead to macroscopic behavior, processes, and properties (e.g., how molecular motion explains temperature and pressure, how intermolecular forces relate to phase changes, and how conservation laws underpin material, energy balances, etc.).

Title
Thermodynamic Properties (BYU Course Objective)

Tags
179532, 0, 20

Learning Outcome
Students will be able to calculate internal energy, enthalpy, and entropy at system conditions assuming ideal behavior.

CBE 285 - Chemical and Biological Process and Fluids Lab

Course Information

Teaching Area (new)
CH EN

Course Number
285

Teaching Area
CBE

Course Title
Chemical and Biological Process and Fluids Lab

Course Description
Fundamentals laboratory course covering topics from Material and Energy Balances and Fluid Mechanics.

Department
Chemical and Biological Engineering

When Taught
Winter

Credit Hours

Min:
0.5

Fixed/Max:
0.5

Lecture Hours

Fixed:
0

Lab Hours

Fixed:
1

Simple Requisites

Prerequisites

Type
Prerequisite

Prerequisites

Complete ALL of the following Courses:

- CBE 273 - Chemical and Biological Process Principles

Other Prerequisites
Concurrent enrollment in CH EN 374

Learning Outcomes

Title
Process Variables (BYU Course Objective)

Tags
207563, 4

Learning Outcome
Students will understand process variables (e.g., P, T, flow rate, conc.) including procedures and equipment for their measurement.

Title
Process Equipment (BYU Course Objective)

Tags
207564, 6

Learning Outcome
Students will be able to explain and operate real process equipment.

Title
Critical Thinking (BYU Course Objective)

Tags
207712, 2

Learning Outcome
Students will exhibit critical and creative thinking skills for analysis and evaluation of problems and cause-effect relationships.

Title
Engineering Intuition (BYU Course Objective)

Tags
207713, 3

Learning Outcome
Students will be able to make order of magnitude estimates, assess reasonableness of solutions, and select appropriate levels of solution sophistication.

Title
Experimentation and Analysis (ABET Student Outcome 6)

Tags
207727, 1

Learning Outcome
Students will be able to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.

Title
Molecular-level Understanding (BYU Course Objective)

Tags
207714, 0, 5

Learning Outcome
Students will understand how fluid phenomena interact and impact a flow and its design and measurement (e.g., molecular viscosity gives rise to friction, requiring pumping power; how turbulent motions impact placement of measurement devices, etc.).

CBE 291 - Career Skills 1

Course Information

Tags
179536, 1

Learning Outcome
Students will be able to communicate effectively with a range of audiences.

Title
Interviewing (BYU Course Objective)

Tags
179537, 4

Learning Outcome
Students will be able to be interviewed effectively.

Title
Job Search Skills (BYU Course Objective)

Tags
179538, 5

Learning Outcome
Students will understand how to obtain professional employment.

Title
Knowledge and Learning (ABET Student Outcome 7)

Tags
179539, 2

Learning Outcome
Students will be able to acquire and apply new knowledge as needed, using appropriate learning strategies.

Title
Resumes (BYU Course Objective)

Tags
179541, 0, 3

Learning Outcome
Students will be able to evaluate the effectiveness of a resume and be able to create their own resume that effectively promotes their achievements in technical, interpersonal and leadership areas.

Learning Outcomes

Title
Engineering Design (ABET Student Outcome 2)

Tags
179542, 1

Learning Outcome
Students will be able to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.

Title
Teamwork and Leadership (ABET Student Outcome 5)

Tags
179544, 3

Learning Outcome
Students will function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.

Title
Critical Thinking (BYU Course Objective)

Tags
179545, 4

Learning Outcome
Students will exhibit critical and creative thinking skills for analysis and evaluation of problems and cause-effect relationships.

Title
Engineering Intuition (BYU Course Objective)

Tags
179547, 5

Learning Outcome
Students will be able to make order of magnitude estimates, assess reasonableness of solutions, and select appropriate levels of solution sophistication.

Title
HAZCOM (BYU Course Objective)

Tags
179549, 7

Learning Outcome
Students will be able to to pass the HAZCOM test.

Title
Making Ethical Decisions (BYU Course Objective)

Tags
179551, 10

Learning Outcome
Students will be able to describe a procedure for making and implementing ethical decisions and effectively apply the procedure to ethical problems of practical interest.

Title
Integrity (BYU Course Objective)

Tags
179552, 11

Learning Outcome
Students will be able to define integrity, and demonstrate understanding of how it applies to their lives and how to develop it through practice.

Title
Effective Teams (BYU Course Objectives)

Tags
179553, 12

Learning Outcome
Students will understand teamwork principles including: recognition of team members' strengths and weaknesses; importance of effective communication skills; recognition of unique contributions of team members; and the need to facilitate team members' development.

Title
Effective Leadership (BYU Course Objectives)

Tags
179554, 13

Learning Outcome
Students will understand what it means to be a leader and the importance of self-awareness in leadership, and how to develop a vision, establish goals, formulate a strategy, and develop a plan consistent with that strategy.

Title
Ethical and Professional Responsibilities (ABET Student Outcome 4)

Tags
207643, 2

Learning Outcome
Students will be able to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.

Title
Codes of Ethics (BYU Course Objective)

Tags
179550, 0, 9

Learning Outcome
Students will understand and commit to practice the AIChE code of ethics.

Title
Safety (BYU Course Objective)

Tags
179546, 0, 6

Learning Outcome
Students will understand the need for safe engineering practices; demonstrate knowledge of pertinent safety laws and regulations (including RAGAGEPs); understand and have a basic knowledge of how safety considerations are incorporated into engineering design.

Title
Risk Assessment and Mitigation (BYU Course Objective)

Tags
179548, 0, 8

Learning Outcome
Students will be able to apply principles of risk management, Hazards and Operability Studies (HAZOPS), Layers of Protection Analysis (LOPA), and fault-tree analyses in process design.

207716, 3

Learning Outcome
Students will be able to make order of magnitude estimates, assess reasonableness of solutions, and select appropriate levels of solution sophistication.

Title
Experimentation and Analysis (ABET Student Outcome 6)

Tags
207726, 1

Learning Outcome
Students will be able to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.

Title
Molecular-level Understanding (BYU Course Objective)

Tags
207717, 0, 5

Learning Outcome
Students will be able to explain how molecular and continuum phenomena give rise to macroscopic behavior, processes, and properties.

CBE 351 - Fundamentals of Biomedical Engineering

Course Information

Teaching Area (new)
CH EN

Course Number
351

Teaching Area
CBE

Course Title
Fundamentals of Biomedical Engineering

Course Description
This course introduces the fundamental principles and topics of Biomedical Engineering, including Biomechanical Engineering, Biochemical Engineering, Bioinstrumentation, and Medical Imaging.

Department
Chemical and Biological Engineering

When Taught
Winter

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Simple Requisites

Prerequisites

Type
Prerequisite

Prerequisites

Fulfill ANY of the following requirements:

Prerequisites

Complete ALL of the following Courses:

- CHEM 105 - General College Chemistry 1 with Lab (Integrated)
  AND MATH 113 - Calculus 2
  AND PHSCS 121 - Introduction to Newtonian Mechanics

OR

Prerequisites

Complete ALL of the following Courses:

- CHEM 105 - General College Chemistry 1 with Lab (Integrated)
  AND MATH 113 - Calculus 2
  AND PHSCS 106 - General Physics 2

Other Prerequisites

Freshman-level Understanding of Biology (for example: BIO 100, BIO 103, MMBIO 221, or PDBIO 120).

CBE 373 - Chemical and Biological Engineering Thermodynamics.

Course Information

Teaching Area (new)

CH EN

Course Number

373

Teaching Area

CBE

Course Title

Chemical and Biological Engineering Thermodynamics.

Course Description

First and second laws of thermodynamics as applied to behavior of real fluids; physical and chemical equilibrium.

Department

Chemical and Biological Engineering

When Taught

Winter

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Simple Requisites

Prerequisites

Type
Prerequisite

Prerequisites

Complete ALL of the following Courses:

- CBE 273 - Chemical and Biological Process Principles
  AND CHEM 467 - Physical Chemistry for Engineers

Note

College Lecture attendance required.

Learning Outcomes

Title
Complex Problem Solving (ABET Student Outcome 1)

Tags
207568, 1

Learning Outcome
Students will be able to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.

Title
Engineering Design (ABET Student Outcome 2)

Tags
207569, 2

Learning Outcome
Students will be able to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.

Title
Knowledge and Learning (ABET Student Outcome 7)

Tags
207570, 3

Learning Outcome
Students will be able to acquire and apply new knowledge as needed, using appropriate learning strategies.

Title
Critical Thinking (BYU Course Objective)

Tags
207571, 4

Learning Outcome
Students will exhibit critical and creative thinking skills for analysis and evaluation of problems and cause-effect relationships.

Title
Engineering Intuition (BYU Course Objective)

Tags
207572, 5

Learning Outcome
Students will be able to make order of magnitude estimates, assess reasonableness of solutions, and select appropriate levels of solution sophistication.

Title
Single-stage Flash (BYU Course Objective)

Tags
207573, 6

Learning Outcome
Students will be able to set up and solve single-stage flash calculations.

Title
Power and Refrigeration Cycles (BYU Course Objective)

Tags
207575, 8

Learning Outcome
Students will be able to design Rankine power and compression refrigeration cycles.

Title
Material Balances (BYU Course Objective)

Tags
207576, 9

Learning Outcome
Students will be able to set up and solve steady state material balances.

Title
Energy Balances (BYU Course Objective)

Tags
207577, 10

Learning Outcome
Students will be able to set up and solve steady state energy balances (1st law of thermodynamics) for closed and open systems.

Title
Transient Energy Balances (BYU Course Objective)

Tags
207579, 12

Learning Outcome
Students will be able to set up and solve transient energy balances (1st law of thermodynamics).

Title
Transient Mass Balances (BYU Course Objective)

Tags
207580, 11

Learning Outcome
Students will be able to set up and solve transient mass balances.

Title
Phase Equilibrium Calculations (BYU Course Objective)

Tags
207582, 13

Learning Outcome
Students will be able to apply solution thermodynamics fundamentals to solve phase equilibrium problems including bubble point, dew point and flash calculations.

Title
Chemical Reaction Equilibrium (BYU Course Objective)

Tags
207583, 14

Learning Outcome
Students will understand the fundamental principles of chemical reaction equilibria including extent of reaction, equilibrium constant and its temperature-dependence, equilibrium conversion.

Title
Sensible Heat Effects (BYU Course Objective)

Tags
207584, 15

Learning Outcome
Students will understand and be able to apply the concepts of heat capacity, latent heat, heat of reaction, heat of combustion, and heat of formation.

Title
Entropy (BYU Course Objective)

Tags
207585, 16

Learning Outcome
Students will understand the concept of entropy and the second law of thermodynamics and be able to apply the second law to closed and open systems.

Title
Solution Thermodynamics Fundamentals (BYU Course Objective)

Tags
207586, 17

Learning Outcome
Students will understand the fundamental concepts of solution thermodynamics including chemical potential, fugacity, activity, partial molar properties, ideal solutions, and excess properties.

Title
Phase Diagrams (BYU Course Objective)

Tags
207587, 18

Learning Outcome
Students will be able to read and understand phase diagrams and use these to determine physical phenomena.

Title
Thermodynamic Properties (BYU Course Objective)

Tags
207590, 21

Learning Outcome
Students will be able to calculate internal energy, enthalpy, entropy, Helmholtz energy, and Gibbs energy at system conditions assuming both ideal and non-ideal behavior.

Title
Pumps, Turbines, Compressors (BYU Course Objective)

Tags
207649, 7

Learning Outcome
Students will be able to perform design calculations for pumps, turbines, and/or compressors (e.g., involving DeltaH, DeltaS, work, heat, efficiencies).

Title
Molecular-level Understanding (BYU Course Objective)

Tags
207589, 0, 20

Learning Outcome
Students will be able to explain how molecular and continuum phenomena give rise to macroscopic behavior, processes, and properties.

Title
Pure-component Phase Behavior (BYU Course Objective)

Tags
207588, 0, 19

Learning Outcome
Students will be able to solve problems related to pure-component phase behavior including vapor pressure, critical point, freezing line, triple point, etc.

CBE 374 - Fluid Mechanics

Course Information

Teaching Area (new)
CH EN

Course Number
374

Teaching Area
CBE

Course Title
Fluid Mechanics

Course Description
Basic mass, momentum, and energy relations of fluid flow; design of fluid-handling systems and equipment.

Department
Chemical and Biological Engineering

When Taught
Fall and Winter

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Simple Requisites

Prerequisites

Type
Prerequisite

Prerequisites

Fulfill ANY of the following requirements:

Prerequisites

Complete ALL of the following Courses:

- CBE 263 - Computational Tools for Chemical and Biological Engineers
  AND CBE 273 - Chemical and Biological Process Principles
  AND MATH 302 - Mathematics for Engineering 1

OR

Prerequisites

Complete ALL of the following Courses:

- CBE 263 - Computational Tools for Chemical and Biological Engineers
  AND CBE 273 - Chemical and Biological Process Principles
  AND MATH 314 - Calculus of Several Variables

Other Prerequisites
Admission to professional program.

Recommended
Concurrent enrollment in Ch En 311

Note
College Lecture attendance required.

Learning Outcomes

Title
Complex Problem Solving (ABET Student Outcome 1)

Tags
179555, 1

Learning Outcome
Students will be able to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.

Title
Engineering Design (ABET Student Outcome 2)

Tags
179556, 2

Learning Outcome
Students will be able to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.

Title
Knowledge and Learning (ABET Student Outcome 7)

Tags
179557, 3

Learning Outcome
Students will be able to acquire and apply new knowledge as needed, using appropriate learning strategies.

Title
Dimensional Analysis and Dimensionless Numbers (BYU Course Objective)

Tags
179559, 4

Learning Outcome
Students will be able to nondimensionalize equations, will understand the significance of dimensional analysis, and will be able to interpret the physical significance of dimensionless numbers.

Title
Critical Thinking (BYU Course Objective)

Tags
179560, 5

Learning Outcome
Students will exhibit critical and creative thinking skills for analysis and evaluation of problems and cause-effect relationships.

Title
Engineering Intuition (BYU Course Objective)

Tags
179561, 6

Learning Outcome
Students will be able to make order of magnitude estimates, assess reasonableness of solutions, and select appropriate levels of solution sophistication.

Title
Flow System Design (BYU Course Objective)

Tags
179562, 7

Learning Outcome
Students will be able to use a mechanical energy balance and/or the concepts of system demand and pump supply curves to design flow systems involving pipes, valves, fittings and/or pumps.

Title
Pumps and Valves (BYU Course Objective)

Tags
179563, 8

Learning Outcome
Students will have a practical understanding of the function and use of pumps and valves and be able to make design decisions accordingly.

Title
Fluid Statics (BYU Course Objective)

Tags
179564, 9

Learning Outcome
Students will be able to solve simple fluid statics problems.

Title
Momentum Balances (BYU Course Objective)

Tags
179565, 10

Learning Outcome
Students will be able to solve simple fluid statics problems.

Title
Advanced Fluid Mechanics Concepts (BYU Course Objective)

Tags
179566, 11

Learning Outcome
Students will understand and be able to use advanced fluid mechanical concepts including boundary-layer theory, non-Newtonian flow, and turbulent flow.

Title
External Flow (BYU Course Objective)

Tags
179567, 12

Learning Outcome
Students will understand qualitatively how external flow around objects affects drag and be able to calculate drag forces and terminal velocities.

Title
Compressible Flow (BYU Course Objective)

Tags
179568, 13

Learning Outcome
Students will understand basic concepts relating to compressible flow including Mach numbers and choked flow.

Title
Non-Newtonian Fluids (BYU Course Objective)

Tags
179569, 14

Learning Outcome
Students will be able to calculate the the pressure drop in flow systems involving pipes and pumps for non-Newtonian fluids.

Title
Chemical Properties (BYU Course Objective)

Tags
179570, 15

Learning Outcome
Students will understand the physical/chemical behaviors of materials.

CBE 376 - Heat and Mass Transfer

Course Information

Teaching Area (new)
CH EN

Course Number
376

Teaching Area
CBE

Course Title
Heat and Mass Transfer

Course Description
Heat and mass transfer, including conduction, convection, radiation, diffusion; steady and unsteady state systems; transport analogies; design applications.

Department
Chemical and Biological Engineering

When Taught
Winter

Credit Hours

Min:
3

Fixed/Max:
3

3

Lab Hours

Fixed:
0

Simple Requisites

Prerequisites

Type
Prerequisite

Prerequisites

Complete ALL of the following Courses:

- CBE 311 - Chemical and Biological Engineering and Society-Health, Safety, and the Environment
  AND CBE 374 - Fluid Mechanics

Learning Outcomes

Title
Complex Problem Solving (ABET Student Outcome 1)

Tags
207591, 1

Learning Outcome
Students will be able to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.

Title
Engineering Design (ABET Student Outcome 2)

Tags
207592, 2

Learning Outcome
Students will be able to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.

Title
Teamwork and Leadership (ABET Student Outcome 5)

Tags
207593, 3

Learning Outcome
Students will function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.

Title
Knowledge and Learning (ABET Student Outcome 7)

Tags
207594, 4

Learning Outcome
Students will be able to acquire and apply new knowledge as needed, using appropriate learning strategies.

Title
Dimensional Analysis and Dimensionless Numbers (BYU Course Objective)

Tags
207595, 5

Learning Outcome
Students will be able to nondimensionalize equations, will understand the significance of dimensional analysis, and will be able to interpret the physical significance of dimensionless numbers.

Title
Critical Thinking (BYU Course Objective)

Tags
207596, 6

Learning Outcome
Students will exhibit critical and creative thinking skills for analysis and evaluation of problems and cause-effect relationships.

Title
Engineering Intuition (BYU Course Objective)

Tags
207597, 7

Learning Outcome
Students will be able to make order of magnitude estimates, assess reasonableness of solutions, and select appropriate levels of solution sophistication.

Title
Shell and Tube Heat Exchanger Design (BYU Course Objective)

Tags
207598, 8

Learning Outcome
Students will be able to design shell & tube heat exchangers to meet specific needs.

Title
Material Balances (BYU Course Objective)

Tags
207599, 9

Learning Outcome
Students will be able to set up and solve steady state material balances.

Title
Energy Balances (BYU Course Objective)

Tags
207600, 10

Learning Outcome
Students will be able to set up and solve steady state energy balances.

Title
Transient Energy Balances (BYU Course Objective)

Tags
207601, 11

Learning Outcome
Students will be able to set up and solve transient energy balances.

Title
Heat Transfer Modes, Qualitative (BYU Course Objective)

Tags
207602, 12

Learning Outcome
Students will understand conduction, convection, and radiation qualitatively.

Title
Heat Transfer with Resistances (BYU Course Objective)

Tags
207603, 13

Learning Outcome
Students will be able to steady-state solve heat transfer problems involving one or more resistances.

Title
Transient Heat Transfer (BYU Course Objective)

Tags
207604, 14

Learning Outcome
Students will be able to solve simple transient heat transfer problems.

Title
Convective Transfer Coefficients (BYU Course Objective)

Tags
207605, 15

Learning Outcome
Students will be able to determine convective heat and mass transfer coefficients from correlations.

Title
Diffusive Mass Transfer (BYU Course Objective)

Tags
207606, 16

Learning Outcome
Students will be able to solve steady-state diffusive mass transfer problems.

Title
Convective Mass Transfer (BYU Course Objective)

Tags
207607, 17

Learning Outcome
Students will be able to solve steady-state convective mass transfer problems.

Title
Radiation (BYU Course Objective)

Tags
207608, 18

Learning Outcome
Students will be able to solve heat transfer problems involving radiation.

Title
Behaviors of Materials (BYU Course Objective)

Tags
207610, 20

Learning Outcome
Students will understand the physical/chemical behaviors of materials.

Title
Materials Selection (BYU Course Objective)

Tags
207611, 21

Learning Outcome
Students will be able to select materials, based on their properties and behaviors, for a given application.

Title
Molecular-level Understanding (BYU Course Objective)

Tags
207609, 0, 19

Learning Outcome
Students will be able to explain how molecular and continuum phenomena give rise to macroscopic behavior, processes, and properties.

CBE 378 - Science of Engineering Materials

Course Information

Teaching Area (new)
CH EN

Course Number
378

Teaching Area
CBE

Course Title
Science of Engineering Materials

Course Description
Fundamental principles of solid materials and their properties and behavior in engineering applications of metals, polymers, ceramics, and glasses.

Department
Chemical and Biological Engineering

When Taught
Fall; Spring.

Credit Hours

Prerequisites

Complete ALL of the following Courses:

- CHEM 357 - Industrial Organic Chemistry
  OR CHEM 351 - Organic Chemistry 1

Learning Outcomes

Title
Complex Problem Solving (ABET Student Outcome 1)

Tags
179572, 1

Learning Outcome
Students will be able to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.

Title
Engineering Design (ABET Student Outcome 2)

Tags
179573, 2

Learning Outcome
Students will be able to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.

Title
Knowledge and Learning (ABET Student Outcome 7)

Tags
179574, 3

Learning Outcome
Students will be able to acquire and apply new knowledge as needed, using appropriate learning strategies.

Title
Critical Thinking (BYU Course Objective)

Tags
179575, 4

Learning Outcome
Students will exhibit critical and creative thinking skills for analysis and evaluation of problems and cause-effect relationships.

Title
Engineering Intuition (BYU Course Objective)

Tags
179576, 5

Learning Outcome
Students will be able to make order of magnitude estimates, assess reasonableness of solutions, and select appropriate levels of solution sophistication.

Title
Phase Diagrams (BYU Course Objective)

Tags
179577, 6

Learning Outcome
Students will be able to read and understand phase diagrams and use these to determine physical phenomena.

Title
Mechanical Properties (BYU Course Objective)

Tags
179579, 8

Learning Outcome
Students will understand the mechanical behavior of materials.

Title
Physical/Chemical Property (BYU Course Objective)

Tags
179580, 9

Learning Outcome
Students will understand the physical/chemical behaviors of materials.

Title
Electronic Properties (BYU Course Objective)

Tags
179581, 10

Learning Outcome
Students will understand the electronic behavior of materials.

Title
Molecular-level Interactions (BYU Course Objective)

Tags
179578, 0, 7

Learning Outcome
Students will be able to explain how molecular and continuum phenomena give rise to macroscopic behavior, processes, and properties.

Title
Materials Selection (BYU Course Objective)

Tags
179582, 0, 11

Learning Outcome
Students will be able to select materials, based on their properties and behaviors, for a given application (e.g. understand the causes of corrosion and mitigation strategies).

CBE 385 - Thermodynamics and Transport Lab

Course Information

Teaching Area (new)
CH EN

Course Number
385

Teaching Area
CBE

Course Title
Thermodynamics and Transport Lab

Course Description
Fundamentals laboratory course covering topics from Thermodynamics and Heat & Mass Transfer.

Department
Chemical and Biological Engineering

When Taught
Winter

Other Prerequisites
Concurrent enrollment in CH EN 373 and CH EN 376

Learning Outcomes

Title
Process Variables (BYU Course Objective)

Tags
207613, 4

Learning Outcome
Students will understand process variables (e.g., P, T, flow rate, conc.) including procedures and equipment for their measurement.

Title
Process Equipment (BYU Course Objective)

Tags
207614, 6

Learning Outcome
Students will be able to explain and operate real process equipment.

Title
Critical Thinking (BYU Course Objective)

Tags
207718, 2

Learning Outcome
Students will exhibit critical and creative thinking skills for analysis and evaluation of problems and cause-effect relationships.

Title
Engineering Intuition (BYU Course Objective)

Tags
207719, 3

Learning Outcome
Students will be able to make order of magnitude estimates, assess reasonableness of solutions, and select appropriate levels of solution sophistication.

Title
Experimentation and Analysis (ABET Student Outcome 6)

Tags
207725, 1

Learning Outcome
Students will be able to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.

Title
Molecular-Level Understanding (BYU Course Objective)

Tags
207720, 0, 5

Learning Outcome
Students will be able to explain how molecular and continuum phenomena give rise to macroscopic behavior, processes, and properties.

Complete ALL of the following Courses:

- CBE 273 - Chemical and Biological Process Principles **AND** MATH 334 - Ordinary Differential Equations

Learning Outcomes

Title
Complex Problem Solving (ABET Student Outcome 1)

Tags
207615, 1

Learning Outcome
Students will be able to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.

Title
Engineering Design (ABET Student Outcome 2)

Tags
207616, 2

Learning Outcome
Students will be able to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.

Title
Knowledge and Learning (ABET Student Outcome 7)

Tags
207617, 3

Learning Outcome
Students will be able to acquire and apply new knowledge as needed, using appropriate learning strategies.

Title
Dimensionless Numbers (BYU Course Objective)

Tags
207618, 4

Learning Outcome
Students will be able to describe the physical significance behind dimensionless numbers and how these relate to system behavior.

Title
Critical Thinking (BYU Course Objective)

Tags
207619, 5

Learning Outcome
Students will exhibit critical and creative thinking skills for analysis and evaluation of problems and cause-effect relationships.

Title
Engineering Intuition (BYU Course Objective)

Tags
207620, 6

Learning Outcome
Students will be able to make order of magnitude estimates, assess reasonableness of solutions, and select appropriate levels of solution sophistication.

Title
Reactor Sizing and Performance (BYU Course Objective)

Tags
207621, 7

Learning Outcome
Students will be able to size and do performance calculations on single, isothermal plug-flow, CSTR, and batch reactors for a single homogeneous or heterogeneous reaction.

Title
Multiple Reactor Design (BYU Course Objective)

Tags
207622, 8

Learning Outcome
Students will be able to design systems of multiple isothermal reactors.

Title
Sizing Reactors for Serial and Parallel Reactions (BYU Course Objective)

Tags
207623, 9

Learning Outcome
Students will be able to select and size isothermal reactors for series and/or parallel reactions.

Title
Non-Isothermal Reactor Design (BYU Course Objective)

Tags
207624, 10

Learning Outcome
Students will be able to select and size non-isothermal reactors.

Title
Material Balances (BYU Course Objective)

Tags
207625, 11

Learning Outcome
Students will be able to set up and solve steady state material balances.

Title
Energy Balances (BYU Course Objective)

Tags
207626, 12

Learning Outcome
Students will be able to set up and solve steady state energy balances.

Title
Fundamentals of Kinetics (BYU Course Objective)

Tags
207627, 13

Learning Outcome
Students will understand fundamentals of kinetics including definitions of rate and forms of rate expressions and relationships between moles, concentration, extent of reaction and conversion.

Title
Competing Reactions Kinetics (BYU Course Objective)

Tags
207628, 14

Learning Outcome
Students will understand the kinetics of competing reactions and their influence on product yield and selectivity.

Title
Chemical Equilibrium (BYU Course Objective)

Tags
207630, 16

Learning Outcome
Students will understand the relationship between forward and reverse rates and chemical equilibrium.

Title
Mass and Heat Transfer Effects on Catalytic Systems (BYU Course Objective)

Tags
207631, 17

Learning Outcome
Students will understand the effects of mass and heat transfer, particularly pore diffusion, on heterogeneous catalytic systems.

Title
Rate Expressions from Mechanisms (BYU Course Objective)

Tags
207632, 18

Learning Outcome
Students will be able to develop rate expressions from elementary step mechanisms using steady-state and quasi-equilibrium approximations.

Title
Rate Expressions from Experiments (BYU Course Objective)

Tags
207633, 15

Learning Outcome
Students will be able to determine rate expressions by analyzing reactor data including integral and differential analysis on constant- and variable-volume systems.

Title
Sensible Heat Effects (BYU Course Objective)

Tags
207634, 19

Learning Outcome
Students will understand and be able to apply the concepts of heat capacity, latent heat, heat of reaction, heat of combustion, and heat of formation.

Title
Molecular-level Understanding (BYU Course Objective)

Tags
207635, 0, 20

Learning Outcome
Students will be able to explain how molecular and continuum phenomena give rise to macroscopic behavior, processes, and properties.

CBE 391 - Career Skills 2

Course Information

Teaching Area (new)
CH EN

Course Number
391

Teaching Area
CBE

Course Title
Career Skills 2

Course Description
Technical and business presentation skills.

Department
Chemical and Biological Engineering

When Taught
Fall Term 1; Fall Term 2; Winter Term 1; Winter Term 2.

Credit Hours

Min:
0.5

Fixed/Max:
0.5

Lecture Hours

Fixed:
1

Lab Hours

Fixed:
0

Other Prerequisites
Admission to professional program

Learning Outcomes

Title
Communication (ABET Student Outcome 3)

Tags
179583, 1

Learning Outcome
Students will be able to communicate effectively with a range of audiences.

Title
Technical Presentations (BYU Course Objective)

Tags
179584, 2

Learning Outcome
Students will be able to give effective, well-organized oral presentations to a technical audience.

Title
Business Presentations (BYU Course Objective)

Tags
179585, 3

Learning Outcome
Students will be able to give effective, well-organized oral presentations to a business audience.

CBE 400 - Creative Skills in Chemical and Biological Engineering

Course Information

Teaching Area (new)
CH EN

Course Number
400

Teaching Area
CBE

Course Title
Creative Skills in Chemical and Biological Engineering

Course Description
Applications in creativity and technical knowledge from prior course work to solution of relevant, open-ended problems.

Department
Chemical and Biological Engineering

When Taught
Fall

Credit Hours

Min:
1

Fixed/Max:
1

Lecture Hours

1

Lab Hours

Fixed:
0

CBE 410 - Principles of Petroleum Engineering

Course Information

Teaching Area (new)
CH EN

Course Number
410

Teaching Area
CBE

Course Title
Principles of Petroleum Engineering

Course Description
Petroleum engineering principles including a review of rock and fluid properties, material balance in oil and gas reservoirs, fluid flow in porous media, hydrocarbon production, and refining operations.

Department
Chemical and Biological Engineering

When Taught
Winter

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Simple Requisites

Prerequisites

Type
Prerequisite

Prerequisites

Complete ALL of the following Courses:

- CBE 373 - Chemical and Biological Engineering Thermodynamics.
  AND CBE 374 - Fluid Mechanics

Learning Outcomes

Title
Oil Recovery

Tags
179354, 5

Learning Outcome
Students will be able to evaluate reservoirs for oil and gas recovery

Title
Reservoir Displacement

Tags
179361, 1

Learning Outcome
Students will understand the displacement process in reservoirs

Title
Production Rates

Tags
179363, 4

Learning Outcome
Students will be able to perform a history match on actual production data and predict future production rates

Title
Fluid Flow Equations

Tags
179365, 3

Learning Outcome
Students will use fluid flow equations to calculate pressure drops and flow rates of oil and gas in porous media

Title
Oil & Gas Values

Tags
179389, 0

Learning Outcome
Students will be able to calculate values of initial oil and gas in place

Title
Primary Production

Tags
179429, 2

Learning Outcome
Students will be able to estimate future production from oil and gas reservoirs under primary production

Title
Petroleum Refining

Learning Outcome
Students will be able to explain the major unit operations used in modern petroleum refineries

CBE 412 - Introductory Nuclear Engineering

Course Information

Teaching Area (new)
CH EN

Course Number
412

Teaching Area
CBE

Course Title
Introductory Nuclear Engineering

Course Description
This is an introductory, multidisciplinary nuclear engineering course covering a range of topics pertinent to nuclear engineering, including particle physics, neutron theory, nuclear reactor design, medical applications, and societal impacts of nuclear power.

Department
Chemical and Biological Engineering

When Taught
Winter

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Simple Requisites

Prerequisites

Type
Prerequisite

Prerequisite

Fulfill ALL of the following requirements:

Prerequisite

Complete ALL of the following Courses:

- MATH 303 - Mathematics for Engineering 2
  OR MATH 334 - Ordinary Differential Equations

AND

Prerequisite

Complete ALL of the following Courses:

- CHEM 106 - General College Chemistry 2
  OR CHEM 112 - Principles of Chemistry 2

Other Prerequisites
or equivalent.

Recommended
Ch En 376 or equivalent

Learning Outcomes

Title
Fuel and Waste Management

Tags
179375, 2

Learning Outcome
Students will be able to describe generally accepted fuel and waste management practices, applicable nuclear regulations, fuel and waste processing methods, accident histories and root causes, and career opportunities in nuclear engineering.

Title
Nuclear Physics

Tags
179406, 0

Learning Outcome
Students will have competent and well-supported command of the following: nuclear physics, particle and atom physics, mass and energy interconversion, radioactive decay processes, and interactions of particles and radiation with matter.

Title
Reactor Design & Safety

Tags
179411, 1

Learning Outcome
Students will be able to perform reactor design and safety analyses using fundamentals of fission reactions and fuels for Generation I-IV designs, with distinguishing safety and security features for various reactor types (fast, breeder, thermal, other) by quantitatively approximating temperature and heat release profiles during reactor control.

CBE 426 - Machine Learning for Engineers

Course Information

Course Number
426

Teaching Area
CBE

Course Title
Machine Learning for Engineers

Course Description
Machine Learning for Engineers combines mathematical details with several case studies that provide an intuition for machine learning with methods for classification, regression, and dimensionality reduction. A second phase of the course is a hands-on group project. The engineering problems and theory guide the student towards a working fluency in state-of-the-art methods implemented in Python.

Department
Chemical and Biological Engineering

When Taught
Winter Even Years

Credit Hours

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Simple Requisites

Prerequisites

Type
Completion Requirement

Complete ALL of the following Courses:
- CBE 263 - Computational Tools for Chemical and Biological Engineers

Other Prerequisites
Or equivalent Python programming course

Learning Outcomes

Title
Understand relationships and assess data quality

Tags
213442, 0, 1, 2023-08-29 07:58:54

Learning Outcome
Students will be able to visualize data to understand relationships and assess data quality.

Title
Create machine learning algorithms

Tags
213443, 0, 2, 2023-08-29 07:58:55

Learning Outcome
Students will be able to apply linear algebra, statistics, and optimization techniques to create machine learning algorithms.

Title
Plan applications to achieve engineering and business objectives

Tags
213444, 0, 3, 2023-08-29 07:58:57

Learning Outcome
Students will understand engineering and business objectives to plan applications.

Title
Assess data information content and predictive capability

Tags
213445, 0, 4, 2023-08-29 07:59:00

Learning Outcome
Students will be able to assess data information content and predictive capability.

Title
Detect overfitting and improve prediction

Tags
213446, 0, 5, 2023-08-29 07:59:01

Learning Outcome
Students will be able to detect overfitting and implement strategies to improve prediction.

CBE 433 - Energy Engineering

Course Information

Teaching Area (new)
CH EN

Course Number
433

Teaching Area
CBE

Course Title
Energy Engineering

Course Description
Science and engineering of energy production including fossil fuels, nuclear, and renewable. Meeting the challenges of future energy needs of the U.S. and the world.

Department
Chemical and Biological Engineering

When Taught
Fall

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Simple Requisites

Prerequisites

Type
Prerequisite

Prerequisites

Complete ALL of the following Courses:

- CBE 373 - Chemical and Biological Engineering Thermodynamics.
  AND CBE 374 - Fluid Mechanics
  AND CBE 376 - Heat and Mass Transfer

Other Prerequisites
or equivalents.

Recommended
Junior standing in an engineering major

Learning Outcomes

Title
Energy Use

Tags
179465, 0

Learning Outcome
Students will be able to explain the history of energy use and past energy supply issues and explore current and probable future issues with energy use.

Title
Sources & Cost of Energy

Tags
179466, 1

Learning Outcome
Students will be able to describe current, conventional sources of energy, their availability, and current costs.

Title
Alternate Energy Sources

Tags
179467, 2

Learning Outcome
Students will be able to describe alternate sources of energy, their technical feasibility, and relative cost.

Title
Principals of Energy Processing

Tags
179468, 3

Learning Outcome
Students will be able to explain the technical working principles of major energy processing systems (gas and wind turbines, boilers, heat engines, solar cells, bioenergy, gasification, wave and tidal power and energy storage).

Title
Role of Energy

Tags
179469, 4

Learning Outcome
Students will appreciate of the role of energy in society, and how energy affects life styles and political and economic stability.

Title
Energy Use Patterns

Tags
179470, 5

Learning Outcome
Students will be able to evaluate personal, household, and industrial energy use patterns, and understand ways to minimize the environmental and societal impacts of energy usage, including criteria pollutant management, options and implications for managing climate change, and energy resource issues.

Title
Energy Career Opportunities

Tags
179471, 6

Learning Outcome
Students will understand current and potential future energy career opportunities.

CBE 436 - Process Control and Dynamics

Course Information

Teaching Area (new)
CH EN

Course Number
436

Teaching Area
CBE

Course Title
Process Control and Dynamics

Course Description
Process systems, associated control systems, and instrumentation. Use of Laplace transforms and complex variables.

Department
Chemical and Biological Engineering

When Taught
Fall

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Simple Requisites

Prerequisites

Type
Prerequisite

Prerequisites

Complete ALL of the following Courses:

- CBE 376 - Heat and Mass Transfer
  AND CBE 386 - Chemical Reaction Engineering

Learning Outcomes

Title
Complex Problem Solving (ABET Student Outcome 1)

Tags
179586, 1

Learning Outcome
Students will be able to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.

Title
Engineering Design (ABET Student Outcome 2)

Tags
179587, 2

Learning Outcome
Students will be able to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.

Title
Knowledge and Learning (ABET Student Outcome 7)

Tags
179589, 5

Learning Outcome
Students will be able to acquire and apply new knowledge as needed, using appropriate learning strategies.

Title
Critical Thinking (BYU Course Objective)

Tags
179590, 3

Learning Outcome
Students will exhibit critical and creative thinking skills for analysis and evaluation of problems and cause-effect relationships.

Title
Engineering Intuition (BYU Course Objective)

Tags
179591, 6

Learning Outcome
Students will be able to make order of magnitude estimates, assess reasonableness of solutions, and select appropriate levels of solution sophistication.

Title
Feedback Control Equipment (BYU Course Objective)

Tags
179592, 7

Learning Outcome
Students will be able to design a simple feedback loop to control process equipment.

Title
Transient Mass, Species, and Energy Balances (BYU Course Objective)

Tags
179593, 9

Learning Outcome
Students will be able to set up and solve transient mass, species, and energy balances.

Title
Process Control Terminology and Strategies (BYU Course Objective)

Tags
179594, 10

Learning Outcome
Students will be able to define process control terminology and understand the following control strategies: feed-back control, feed-forward control, and cascade control; as well as the difference between linear and nonlinear systems.

Title
Fitting Linear Models (BYU Course Objective)

Tags
179595, 11

Learning Outcome
Students will be able to fit data from step or pulse tests to linear models.

Title
Closed-loop Behavior (BYU Course Objective)

Tags
179596, 12

Learning Outcome
Students will be able to predict the closed-loop behavior and evaluate the stability of simple control loops.

Title
Historical Data (BYU Course Objective)

Tags
179597, 13

Learning Outcome
Students will be able to identify process dynamics, and improve control strategies, using historical process data.

Title
Electrical Circuit Analysis (BYU Course Objective)

Tags
179598, 14

Learning Outcome
Students will be able to analyze and solve direct current (DC) and alternating current (AC) circuit problems, applying Kirchhoff's Laws, Ohm's Law, and understanding impedance in chemical and biochemical systems.

Title
Sensors and Process Monitoring (BYU Course Objective)

Tags
179599, 15

Learning Outcome
Students will be able to describe, select, and integrate electrical sensors and signal conditioning techniques for monitoring processes in industrial and medical settings. This includes understanding how to appropriately measure key process variables such as temperature, pressure, flow rate, mixture composition, and liquid level.

Title
Motor and Drive Applications (BYU Course Objective)

Tags
179600, 16

Learning Outcome
Students will be able to explain the operating principles of DC and AC motors and associated control systems, as applied to pumps, valves, and chemical and biochemical process equipment.

Title
Electrical Safety in Chemical Engineering (BYU Course Objective)

Tags
179601, 17

Learning Outcome
Students will demonstrate knowledge of electrical safety measures, including grounding, intrinsically safe circuits, and protection methods for hazardous environments in chemical and biochemical plants.

Title
Feedback Control Loop Tuning (BYU Course Objective)

Tags
179603, 8

Learning Outcome
Students will be able to tune a single feedback control loop.

CBE 445 - Separations and Process Control Lab

Course Information

Teaching Area (new)
CH EN

Course Number
445

Teaching Area
CBE

Course Title
Separations and Process Control Lab

Course Description
Fundamentals laboratory course covering topics from Separations and Process Control.

Department
Chemical and Biological Engineering

When Taught
Fall

Credit Hours

Min:
0.5

Fixed/Max:
0.5

Lecture Hours

Fixed:
0

Lab Hours

Fixed:
1

Other Prerequisites
Concurrent enrollment in CH EN 436 and CH EN 476

Learning Outcomes

Title
Process Variables (BYU Course Objective)

Tags
207637, 4

Learning Outcome
Students will understand process variables (e.g., P, T, flow rate, conc.) including procedures and equipment for their measurement.

Title
Process Equipment (BYU Course Objective)

Tags
207638, 6

Learning Outcome
Students will be able to operate a process control system and understand the components of such a system.

Title
Critical Thinking (BYU Course Objective)

Tags
207721, 2

Learning Outcome
Students will exhibit critical and creative thinking skills for analysis and evaluation of problems and cause-effect relationships.

Title
Engineering Intuition (BYU Course Objective)

Tags
207722, 3

Learning Outcome
Students will be able to make order of magnitude estimates, assess reasonableness of solutions, and select appropriate levels of solution sophistication.

Title
Experimentation and Analysis (ABET Student Outcome 6)

Tags
207724, 1

Learning Outcome
Students will be able to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.

Title
Molecular-level Understanding (BYU Course Objective)

Tags
207723, 0, 5

Learning Outcome
Students will be able to explain how molecular and continuum phenomena give rise to macroscopic behavior, processes, and properties.

CBE 451 - Chemical and Biological Engineering Capstone I: Process Design

Course Information

Teaching Area (new)
CH EN

Course Number
451

Teaching Area
CBE

Course Title
Chemical and Biological Engineering Capstone I: Process Design

Course Description
Design of chemical and biological engineering processes and plants; requiring application of unit operations, chemical and biological process principles, economic analysis. Synthesis and optimization of chemical and biological processes.

Department
Chemical and Biological Engineering

When Taught
Winter

Credit Hours

Min:
4

Fixed/Max:
4

Lecture Hours

Fixed:
4

Lab Hours

Fixed:
0

Simple Requisites

Prerequisites

Type
Prerequisite

Prerequisites

Complete ALL of the following Courses:

- CBE 378 - Science of Engineering Materials
  AND CBE 436 - Process Control and Dynamics
  AND CBE 476 - Separations

Note
College Lecture attendance required.

Learning Outcomes

Title
Engineering Design (ABET Student Outcome 2)

Tags
207640, 2

Learning Outcome
Students will be able to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.

Title
Communication (ABET Student Outcome 3)

Tags
207641, 3

Learning Outcome
Students will be able to communicate effectively with a range of audiences.

Title
Ethical and Professional Responsibilities (ABET Student Outcome 4)

Tags
207642, 4

Learning Outcome
Students will be able to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.

Title
Teamwork and Leadership (ABET Student Outcome 5)

Tags
207644, 5

Learning Outcome
Students will function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.

Title
Simulation Software (BYU Course Objective)

Tags
207645, 6

Learning Outcome
Students will be able to use commercial process simulation software (e.g. Chemcad, HYSYS, Aspen, etc).

Title
Materials Selection (BYU Course Objective)

Tags
207659, 11

Learning Outcome
Students will be able to select materials, based on their properties and behaviors, for a given application.

Title
Complex Problems (ABET Student Outcome 1)

Tags
212011, 0, 1

Learning Outcome
Students will be able to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.

Title
Turbines and Compressors (BYU Course Objective)

Tags
207648, 0, 7

Learning Outcome
Students will be able to perform design calculations for turbines and compressors in power and refrigeration cycles.

Title
Risk Management (BYU Course Objective)

Tags
207651, 0, 8

Learning Outcome
Students will be able to apply principles of risk management, Hazards and Operability Studies (HAZOPS), Layers of Protection Analysis (LOPA), and fault-tree analyses in process design.

Title
Oral Presentations (BYU Course Objective)

Tags
207653, 0, 9

Learning Outcome
Students will be able to communicate effectively in oral presentations to technical and business audiences.

Title
Written Reports (BYU Course Objective)

Tags
207655, 0, 10

Learning Outcome
Students will be able to communicate effectively in short and long written formats (email, memo, journal article, technical report, etc.).

Title
Critical Thinking (BYU Course Objective)

Tags
212012, 0, 12

Learning Outcome
Students will exhibit critical and creative thinking skills for analysis and evaluation of problems and cause-effect relationships.

Title
Engineering Intuition (BYU Course Objective)

Tags
212013, 0, 13

Learning Outcome
Students will be able to make order of magnitude estimates, assess reasonableness of solutions, and select appropriate levels of solution sophistication.

Title
Safety and Environment in Design (BYU Course Objective)

Tags
207652, 0, 15

Learning Outcome
Students will have a working knowledge of safety and environmental regulations and be able to incorporate safety and environmental considerations into engineering design.

Title
Value of Money (BYU Course Objective)

Tags
212014, 0, 16

Learning Outcome
Students will be able to use concepts of interest, compounding, time value of money, annuities, and inflation in performing economic analyses.

Title
Capital Costs

Tags
212015, 0, 17

Learning Outcome
Students will be able to estimate costs in capital ventures, including capital costs, operating costs, cash flow, and profit.

Title
Profitability (BYU Course Objective)

Tags
212016, 0, 18

Learning Outcome
Students will be able to evaluate project profitability using equivalence methods (e.g., net present value) and rate-of-return methods (e.g., internal rate of return).

Title
Multiple-Unit Process Design (BYU Course Objective)

Tags
207650, 0, 19

Learning Outcome
Students will be able to design multiple-unit processes-for fluid flow, heat transfer, reactions, and separations-to produce desired products at specified purities.

Title
Flow Systems (BYU Course Objective)

Tags
207646, 0, 20

Learning Outcome
Students will be able to design flow systems involving pumps, valves, piping, and fittings.

Title
Phase Behavior (BYU Course Objective)

Tags
212017, 0, 21

Learning Outcome
Students will be able to solve problems related to pure-component phase behavior including vapor pressure, critical point, freezing line, triple point, etc.

Title
Phase Equilibrium (BYU Course Objective)

Tags
212018, 0, 22

Learning Outcome
Students will be able to apply solution thermodynamics fundamentals to solve phase equilibrium problems.

Title
Chemical Reactions (BYU Course Objective)

Tags
212019, 0, 23

Learning Outcome
Students will be able to apply the fundamental principles of chemical reactions including conversion, extent of reaction, and equilibrium.

Title
Reactor Design (BYU Course Objective)

Tags
212020, 0, 24

Learning Outcome
Students will be able to design isothermal and non-isothermal chemical reactors.

Title
Separation Processes (BYU Course Objective)

Tags
212021, 0, 25

Learning Outcome
Students will be able to design separations process units including tray-type and packed columns.

Title
Material and Energy Balances (BYU Course Objective)

Tags
207656, 0, 26

Learning Outcome
Students will be able to set up and solve steady state material and energy balances.

Title
Heat Transfer Processes (BYU Course Objective)

Tags
207647, 0, 27

Learning Outcome
Students will be able to design process units for heat transfer.

Title
Professional Commitment (BYU Course Objective)

Tags
212022, 0, 14

Learning Outcome
Students will be committed to safe and environmentally responsible engineering.

CBE 461 - Chemical and Biological Engineering Capstone II: Projects

Course Information

Teaching Area (new)
CH EN

Course Number
461

Teaching Area
CBE

Course Title
Chemical and Biological Engineering Capstone II: Projects

Course Description
Experiential learning in complex problem solving of industrial scale projects.

Department
Chemical and Biological Engineering

When Taught
Winter

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Simple Requisites

Prerequisites

Type
Prerequisite

Prerequisites

Complete ALL of the following Courses:

- CBE 436 - Process Control and Dynamics
  AND CBE 476 - Separations

Other Prerequisites
CBE 479 preferred as a prerequisite, but concurrent enrollment allowed

Learning Outcomes

Title
Complex Problems (ABET Student Outcome 1)

Tags
212023, 0, 1

Learning Outcome
Students will be able to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.

Title
Engineering Design (ABET Student Outcome 2)

Tags
212024, 0, 2

Learning Outcome
Students will be able to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.

Title
Communication (ABET Student Outcome 3)

Tags
212025, 0, 3

Learning Outcome
Students will be able to communicate effectively with a range of audiences.

Title
Teamwork & Leadership (ABET Student Outcome 5)

Tags
212026, 0, 4

Learning Outcome
Students will function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.

Title
Experimentation & Analysis (ABET Student Outcome 6)

Tags
212027, 0, 5

Learning Outcome
Students will be able to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.

CBE 476 - Separations

Course Information

Teaching Area (new)
CH EN

Course Number
476

Teaching Area
CBE

Course Title
Separations

Course Description
Stage operations, distillation, extraction, and absorption; design applications.

Department
Chemical and Biological Engineering

When Taught
Fall

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Prerequisite

Prerequisites

Complete ALL of the following Courses:

- CBE 373 - Chemical and Biological Engineering Thermodynamics.
  AND CBE 376 - Heat and Mass Transfer

Note
College Lecture attendance required.

Learning Outcomes

Title
Complex Problem Solving (ABET Student Outcome 1)

Tags
179501, 1

Learning Outcome
Students will be able to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.

Title
Engineering Design (ABET Student Outcome 2)

Tags
179502, 2

Learning Outcome
Students will be able to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.

Title
Knowledge and Learning (ABET Student Outcome 7)

Tags
179503, 3

Learning Outcome
Students will be able to acquire and apply new knowledge as needed, using appropriate learning strategies.

Title
Process Simulator (BYU Course Objective)

Tags
179504, 5

Learning Outcome
Students will be able to use commercial process simulation software (e.g. Chemcad, HYSYS, Aspen, etc).

Title
Material Balances (BYU Course Objective)

Tags
179505, 13

Learning Outcome
Students will be able to set up and solve steady state material balances.

Title
Energy Balances (BYU Course Objective)

Tags
179506, 14

Learning Outcome
Students will be able to set up and solve steady state energy balances.

Title
Thermodynamics of Mixtures (BYU Course Objective)

Tags
179507, 15

Learning Outcome
Students will understand the fundamental concepts of solution thermodynamics including chemical potential, fugacity, activity, partial molar properties, ideal solutions, and excess properties.

Title
Phase Diagrams (BYU Course Objective)

Tags
179508, 16

Learning Outcome
Students will be able to read and understand phase diagrams and use these to determine physical phenomena.

Title
Dimensionless Numbers (BYU Course Objective)

Tags
179510, 4

Learning Outcome
Students will be able to describe the physical significance behind dimensionless numbers and how these relate to system behavior.

Title
Flash Calculations (BYU Course Objective)

Tags
179511, 8

Learning Outcome
Students will be able to set up and solve single-stage flash calculations.

Title
Tray-type Columns (BYU Course Objective)

Tags
179512, 9

Learning Outcome
Students will be able to design tray-type columns (e.g., number of trays, tray efficiency, column height, column diameter, product specs) and packed columns (e.g., height of column, packing material, column diameter, flooding velocity).

Title
Liquid-Liquid Extraction (BYU Course Objective)

Tags
179513, 10

Learning Outcome
Students will be able to design systems for liquid-liquid extraction.

Title
Batch Distillation (BYU Course Objective)

Tags
179514, 11

Learning Outcome
Students will be able to solve binary batch distillation design problems with and without rectifying stages.

Title
Critical Thinking (BYU Course Objective)

Tags
179515, 6

Learning Outcome
Students will exhibit critical and creative thinking skills for analysis and evaluation of problems and cause-effect relationships.

Title
Engineering Intuition (BYU Course Objective)

Tags
179516, 7

Learning Outcome
Students will be able to make order of magnitude estimates, assess reasonableness of solutions, and select appropriate levels of solution sophistication.

Title
Azeotropes (BYU Course Objective)

Tags
179571, 12

Learning Outcome
Students will be able to design separation processes involving systems that form azeotropes or are only partially miscible in each other.

Title
Molecular-level Understanding (BYU Course Objective)

Tags
179509, 0, 17

Learning Outcome
Students will be able to explain how molecular and continuum phenomena give rise to macroscopic behavior, processes, and properties.

CBE 479 - Unit Operations Laboratory

Course Information

Teaching Area (new)
CH EN

Course Number
479

Teaching Area
CBE

6

Simple Requisites

Prerequisites

Type
Prerequisite

Prerequisites

Complete ALL of the following Courses:

- CBE 376 - Heat and Mass Transfer
  AND CBE 386 - Chemical Reaction Engineering
  AND WRTG 316 - Technical Communication

Recommended
CH EN 391, STAT 121

Learning Outcomes

Title
Communication (ABET Student Outcome 3)

Tags
207660, 1

Learning Outcome
Students will be able to communicate effectively with a range of audiences.

Title
Teamwork and Leadership (ABET Student Outcome 5)

Tags
207662, 2

Learning Outcome
Students will function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.

Title
Experimentation and Analysis (ABET Student Outcome 6)

Tags
207663, 3

Learning Outcome
Students will be able to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.

Title
Safe Engineering Practice (BYU Course Objective)

Tags
207664, 9

Learning Outcome
Students will understand the need for safe engineering practices; demonstrate knowledge of pertinent safety laws and regulations; understand and have a basic knowledge of how safety considerations are incorporated into engineering design.

Title
Technical Presentations (BYU Course Objective)

Tags
207665, 10

Learning Outcome
Students will be able to give effective, well-organized oral presentations to a technical audience.

Title
Written Reports (BYU Course Objective)

Tags
207666, 11

Learning Outcome
Students will be able to communicate effectively in short and long written formats.

Title
Process Variables (BYU Course Objective)

Tags
207668, 13

Learning Outcome
Students will understand process variables (e.g., P, T, flow rate, conc.) including procedures and equipment for their measurement.

Title
Process Control System (BYU Course Objective)

Tags
207669, 14

Learning Outcome
Students will be able to operate a process control system and understand the components of such a system.

Title
Process Equipment (BYU Course Objective)

Tags
207670, 15

Learning Outcome
Students will be able to explain and operate real process equipment.

Title
Engineering Statistics (BYU Course Objective)

Tags
207671, 16

Learning Outcome
Students will understand basic engineering statistics.

Title
Pumps and Valves (BYU Course Objective)

Tags
207707, 4

Learning Outcome
Students will be able to design flow systems involving pumps, valves, piping, and fittings.

Title
Shell and Tube Heat Exchanger Design (BYU Course Objective)

Tags
207708, 5

Learning Outcome
Students will be able to design shell & tube heat exchangers to meet specific needs.

Title
Pumps, Turbines, Compressors (BYU Course Objective)

Tags
207709, 8

Learning Outcome
Students will be able to perform design calculations for pumps.

Title
Reactor Sizing and Performance (BYU Course Objective)

Tags
207710, 6

Learning Outcome
Students will be able to size and do performance calculations on single, isothermal plug-flow, CSTR, and batch reactors for a single homogeneous or heterogeneous reaction.

Title
Sizing Reactors for Serial and Parallel Reactions (BYU Course Objective)

Tags
207711, 7

Learning Outcome
Students will be able to select and size isothermal reactors for series and/or parallel reactions.

Title
Codes of Ethics (BYU Course Objective)

Tags
207667, 0, 12

Learning Outcome
Students will understand and commit to practice the AIChE code of ethics.

CBE 481 - Introduction to Semiconductor Processing

Course Information

Teaching Area (new)
CH EN

Course Number
481

Teaching Area
CBE

Course Title
Introduction to Semiconductor Processing

Course Description
Introduction to unit operations related to silicon-based semiconductor processing. Topics include substrate preparation, photolithography, doping, etching, deposition, CMP, interconnects, and device basics.

Department
Chemical and Biological Engineering

When Taught

Type
Prerequisite

Prerequisites

Fulfill ALL of the following requirements:

Prerequisites

Complete ALL of the following Courses:

- CHEM 106 - General College Chemistry 2
  OR CHEM 112 - Principles of Chemistry 2

AND

Prerequisites

Complete ALL of the following Courses:

- MATH 334 - Ordinary Differential Equations
  OR MATH 303 - Mathematics for Engineering 2

AND

Prerequisites

Complete ALL of the following Courses:

- EC EN 452 - Experiments in Integrated Circuit Development

Other Prerequisites
Junior standing in chemical engineering.

CBE 491 - Networking for Career Advancement

Course Information

Teaching Area (new)
CH EN

Course Number
491

Teaching Area
CBE

Course Title
Networking for Career Advancement

Course Description
Examination of the job seeking process, with a focus on the most time-effective approaches to launching a career. Prioritizing time, setting goals, and effectively creating a strategic network within the desired career field. Tailored for those seeking a job directly after graduation.

Department
Chemical and Biological Engineering

When Taught

Learning Outcomes

Title
Broad Education

Tags
179397, 0

Learning Outcome
Students will gain a broad understanding of engineering fundamentals and practices.

CBE 495R - Global Engineering Outreach Projects

Course Information

Teaching Area (new)
CH EN

Course Number
495R

Teaching Area
CBE

Course Title
Global Engineering Outreach Projects

Course Description
Humanitarian-based engineering and technology project development involving multi-disciplinary teams.

Department
Chemical and Biological Engineering

When Taught
Fall and Winter

Credit Hours

Min:
0.5

Fixed/Max:
3

Other Prerequisites
Engineering or technology major enrolled in upper-division major courses; instructor's consent.

CBE 496 - Academic Internship Thesis

Course Information

Teaching Area (new)
CH EN

Course Number
496

Teaching Area
CBE

Course Title
Academic Internship Thesis

Course Description
Experiential learning in complex problem solving through an industrial internship or co-op. Thesis writing.

Department
Chemical and Biological Engineering

When Taught
Fall; Winter; Spring.

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Other Prerequisites
Concurrent enrollment in CH EN 199R is permissible with department approval.

Note
An APPROVED Internship Application is required before adding.

Learning Outcomes

Title
Complex Problems (ABET Student Outcome 1)

Learning Outcome
Students will be able to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.

Title
Engineering Design (ABET Student Outcome 2)

Learning Outcome
Students will be able to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.

Title
Communication (ABET Student Outcome 3)

Learning Outcome
Students will be able to communicate effectively with a range of audiences.

Title
Experimentation & Analysis (ABET Student Outcome 6)

Learning Outcome
Students will be able to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.

CBE 498R - Undergraduate Research

Instructor's consent.

Learning Outcomes

Title
Complex Problems (ABET Student Outcome 1)

Learning Outcome
Students will be able to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.

Title
Engineering Design (ABET Student Outcome 2)

Learning Outcome
Students will be able to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.

Title
Communication (ABET Student Outcome 3)

Learning Outcome
Students will be able to communicate effectively with a range of audiences.

Title
Experimentation & Analysis (ABET Student Outcome 6)

Learning Outcome
Students will be able to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.

CBE 512 - Nuclear Reactor Transient Modeling

Course Information

Teaching Area (new)
CH EN

Course Number
512

Teaching Area
CBE

Course Title
Nuclear Reactor Transient Modeling

Course Description
This course focuses on the thermal-hydraulic assessment of nuclear reactor design basis and beyond design basis transients using state-of-the-art computer code. Instruction will focus on both instruction in using this code and study of design basis accidents for both standard and advanced reactor concepts.

Prerequisites

Complete ALL of the following Courses:

- CHEM 463 - Physical Chemistry 2

Other Prerequisites

or concurrent enrollment.

Learning Outcomes

Title
Basics of Molecular Modeling

Tags
179446, 1

Learning Outcome
Students will understand and be conversant with the basic principles of molecular modeling. These include simple stochastic and deterministic simulations, the fundamental equations of statistical mechanics, computational chemistry, and molecular simulation Understand and be conversant with the basic principles of molecular modeling.

Title
Relating Molecular Concepts to Observables

Tags
179447, 2

Learning Outcome
Students will develop an intuitive thinking pattern that relates observable phenomena to molecular concepts.

Title
Calculate Thermophysical Properties

Tags
179448, 3

Learning Outcome
Students will be able to calculate a wide variety of thermophysical properties from fundamental molecular concepts using QSPR correlations, computational chemistry, molecular simulation, and statistical mechanics.

Title
Real Fluid Properties from Simulations

Tags
179449, 4

Learning Outcome
Students will understand the fundamental relations of statistical mechanics and how to apply them (analytically) to ideal gases and how to use them to evaluate real-fluid properties from molecular simulations.

Title
Developing, Running, and Interpreting Molecular Simulations

Tags
179450, 5

Learning Outcome
Students will be able to put together, run, and interpret the results of Monte Carlo and molecular dynamics simulations to study phenomena and/or properties.

Title
Obtaining Molecular Properties from Quantum Chemistry Calculations

Tags
179451, 6

Learning Outcome
Students will be able to use modern quantum chemical software to optimize molecular geometries and obtain molecular properties and descriptors using a model chemistry.

CBE 518 - Biomedical Engineering Principles

Course Information

Teaching Area (new)
CH EN

Course Number
518

Teaching Area
CBE

Course Title
Biomedical Engineering Principles

Course Description
Application of chemical and biological engineering principles to model physiologic systems and to solve medical problems.

Department
Chemical and Biological Engineering

When Taught
Winter odd years, Spring even years

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Simple Requisites

Prerequisites

Type
Prerequisite

Prerequisites

Complete ALL of the following Courses:

- CBE 374 - Fluid Mechanics
  AND CBE 376 - Heat and Mass Transfer

Other Prerequisites
or equivalent.

Learning Outcomes

Title
Oxygen & Carbon Dioxide Transfer

Tags
179331, 12

Learning Outcome
Students will be able to mathematically estimate the transfer of oxygen and carbon dioxide in the lungs and in artificial oxygenators.

Title
Total-body Mass Balances

Tags
179370, 0

Learning Outcome
Students will be able to formulate total-body mass balances including the major incoming and outgoing components for the human body.

Title
Transport Characterisitics

Tags
179383, 1

Learning Outcome
Students will be able to discuss the transport characteristics of biological membranes in terms of permeability and to estimate the ion flux, electrochemical potential, or chemical species concentrations associated with a particular environment.

Title
Bioethics

Tags
179400, 13

Learning Outcome
Students will be able to discuss the foundational principles of bioethics and the legal and sociological factors that affect their implementation.

Title
Mechanical Behavior

Tags
179403, 4

Learning Outcome
Students will be able to analyze the mechanical behavior of physiological tissue and biomaterials in terms of stress-strain behavior, viscoelasticity, and motion.

Title
Man-made Flow Systems

Tags
179410, 3

Learning Outcome
Students will be able to describe and to numerically predict major aspects of the humancirculatory system and the behavior of blood in physiologic and man-made flow systems.

Title
Biomaterials

Tags
179412, 5

Learning Outcome
Students will be able to describe the general classes of biomaterials and how they address requirements in various biomedical applications.

Title
Time Behavior of Chemical Species

Tags
179419, 9

Learning Outcome
Students will be able to formulate the equations to describe the time behavior of a chemical species for given physiological model, transport, and reaction assumptions.

Title
Medical Imaging

Tags
179425, 7

Learning Outcome
Students will be able to describe the major types of medical imaging and the advantages and disadvantages of each.

Title
Tissue Engineering Processes

Tags
179432, 6

Learning Outcome
Students will be able to describe the basic processes of tissue engineering and the associated cell growth and transport issues.

Title
Neuroprosthetic Device

Tags
179438, 2

Learning Outcome
Students will be able to discuss the factors important to the effectiveness of a neuroprosthetic device.

Title
Biosensors

Tags
179440, 8

Learning Outcome
Students will be able to describe several common strategies used in biosensors and to explain the need for such sensors.

Title
Drug Delivery Systems

Tags
179441, 10

Learning Outcome
Students will be able to describe several medical circumstances for which drug delivery systems would be advantageous and to formulate the equations to describe the release of a drug into a patient under such circumstances.

Title
Hemodialysis

Tags
179443, 11

Learning Outcome
Students will be able to describe the clinical requirements for hemodialysis and to mathematically estimate the rate of removal of metabolic products by normal kidneys and during hemodialysis.

CBE 519 - Biochemical Engineering

Course Information

Teaching Area (new)
CH EN

Course Number
519

Teaching Area

Other Prerequisites

or concurrent enrollment.

Learning Outcomes

Title
Biotechnology Applications

Tags
179452, 1

Learning Outcome
Students will be able to identify, recognize, and appreciate engineering contributions in biotechnology applications.

Title
Tools of Biochemical Engineering

Tags
179453, 2

Learning Outcome
Students will be familiar with the tools of biochemical engineering (PCR, rDNA technology, protein engineering, protein display, fermentation, etc.).

Title
Protein Drugs

Tags
179454, 3

Learning Outcome
Students will understand how protein drugs are discovered, produced, and purified.

Title
Enzyme and Metabolic Engineering

Tags
179455, 4

Learning Outcome
Students will understand the role of enzyme and metabolic engineering in synthetic biology.

Title
Bioreactors

Tags
179456, 5

Learning Outcome
Students will utilize material balances to evaluate and optimize cell growth and substrate/product utilization in bioreactors.

Title
Recovery and Purification

Tags
179457, 6

Learning Outcome
Students will apply engineering principles to recover and purification techniques of bioprocess.

Title
Literature

Tags
179458, 7

Learning Outcome
Students will be able to read and understand primary literature articles

CBE 522 - Combustion

Course Information

Teaching Area (new)
CH EN

Course Number
522

Teaching Area
CBE

Course Title
Combustion

Course Description
Fundamentals of transport processes in reacting flow systems with specific applications of various combustion processes.

Department
Chemical and Biological Engineering

When Taught
Winter Even Years

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:

Prerequisites

Fulfill ANY of the following requirements:

Prerequisites

Complete ALL of the following Courses:

- CBE 373 - Chemical and Biological Engineering Thermodynamics.
  AND CBE 376 - Heat and Mass Transfer

OR

Prerequisites

Complete ALL of the following Courses:

- CHEM 105 - General College Chemistry 1 with Lab (Integrated)
  AND ME EN 340 - Heat Transfer
  AND ME EN 422 - Applied Thermodynamics

Learning Outcomes

Title
Global Impact of Combustion Processes

Learning Outcome
Students will understand and appreciate the global impact of combustion processes and the wide breadth of applications.

Title
Evaluation of Systems

Learning Outcome
Students will be able to evaluate combustion systems using conservation of mass, energy, and heat transfer.

Title
System Analysis and Combustion Design

Learning Outcome
Students will be able to perform basic combustion calculations involved in system analysis and combustion design.

Title
Thermodynamic Evaluation

Learning Outcome
Students will be able to perform thermodynamic evaluations of combustion processes including heat release, heat of formation, temperature, and equilibrium calculations.

Title
Reaction Mechanisms

Learning Outcome
Students will understand reaction mechanisms and be able to perform calculations involving chemical kinetic reactions.

Title
Flame Types

Learning Outcome
Students will understand the physical phenomena of various flame types and apply them to commercially relevant systems.

CBE 528 - Industrial Catalytic Processes

Course Information

Teaching Area (new)
CH EN

Course Number
528

Teaching Area
CBE

Course Title
Industrial Catalytic Processes

Course Description
Fundamentals of catalytic chemistry and materials; applications to important industrial catalytic processes. Includes catalyst materials and preparation, catalyst characterization, fixed-bed reactor design, and catalyst deactivation.

Department

Learning Outcomes

Title
Process Chemistry

Tags
179367, 1

Learning Outcome
Students will learn the key aspects of the process chemistry, kinetics, mechanisms, catalyst deactivation, reactor design and process design of 13 globally-significant catalytic processes.

Title
Key Industrial Catalytic Processes

Tags
179404, 0

Learning Outcome
Students will learn about key industrial catalytic processes in the production of chemicals, refining of petroleum, and control of the environment.

Title
Catalysis Principles

Tags
179407, 2

Learning Outcome
Students will apply principles of catalysis to derivation of rate expressions and reactor design calculations for a few processes.

CBE 531 - Thermodynamics of Multicomponent Systems

Course Information

Teaching Area (new)
CH EN

Course Number
531

Teaching Area
CBE

Course Title
Thermodynamics of Multicomponent Systems

Course Description
Fundamental concepts and applications in first and second laws, equilibrium and stability, phase equilibrium, and homogeneous and heterogeneous chemical equilibrium.

Department
Chemical and Biological Engineering

When Taught
Fall

OR

Prerequisites

Complete ALL of the following Courses:

- CHEM 463 - Physical Chemistry 2

Other Prerequisites
or concurrent enrollment.

Learning Outcomes

Title
Pure-Fluid Calculations & Relationships

Tags
179266, 0, 4

Learning Outcome
Students will be able to calculate properties of pure fluids (e.g., vapor pressure, molar volumes, etc.) using correlations and equations of state; calculate the properties of mixtures using ideal mixing properties and excess properties; show relationships between pure-fluid properties (e.g., Clapeyron Equation); and determine partial molar enthalpies, volumes, and entropies from experimental data and from equations for excess Gibbs energy.

Title
Phase Equilibrium

Tags
179267, 0, 6

Learning Outcome
Students will be able to write down the basic equations for vapor-liquid equilibrium using the gamma and phi methods; find vapor-liquid equilibrium phase compositions, dew points, and bubble points for binary systems with ideal gas phase using the method; calculate, at a given temperature, pressure, and feed composition, liquid and vapor compositions and amounts vaporized using the gamma and phi methods; calculate liquid-liquid compositions using excess Gibbs energy equations; and calculate solid-liquid solubilities.

Title
Open Systems & Pure Fluids

Tags
179387, 0, 2

Learning Outcome
Students will be able to perform 1st and 2nd law analysis of heat and work interactions for open systems and calculate process variables for pure fluids using equations of state, departure functions, and corresponding states.

Title
Pure-Fluid Calculations & Relationships

Tags
179415, 0, 3

Learning Outcome
Students will demonstrate use of correlations and equations of state properties of pure fluids (e.g., vapor pressure, molar volumes, etc.); utilize ideal mixing properties and excess properties in calculating the properties of mixtures; and show relationships between pure-fluid properties (e.g., Clapeyron Equation) and determine partial molar enthalpies, volumes, and entropies from various methods (e.g., experimental data and from equations for excess Gibbs energy).

Title
Phase Equilibrium

Tags
179398, 0, 5

Learning Outcome
Students will demonstrate proficiency with the basic equations for vapor-liquid equilibrium using fugacity/fugacity coefficients and activity/activity coefficients; find vapor-liquid equilibrium phase compositions, dew points, and bubble points for binary systems with ideal gas phase using those parameters; compute liquid-vapor equilibrium in binary systems and utilize gamma and phi methods at a given temperature, pressure, and feed composition, liquid and vapor compositions and amounts vaporized; utilize liquid-liquid equilibrium equations; and determine solid-liquid solubility.

Title
Chemical Equilibrium

Tags
179444, 0, 7

Learning Outcome
Students will know and use the relationship among heats of formation, absolute entropy and Gibbs energy of formation; know and use the relationship between Gibbs energy of formation and the equilibrium constant; and use the equilibrium distribution of reacting ideal gas mixtures, equilibrium compositions and temperature for a given heat interaction (e.g., adiabatic, isothermal, or given heat leak) for a given feed composition, pressure, and initial temperature and real fluids.

Title
Fundamental Understanding

Tags
211249, 0, 1

Learning Outcome
Students will be able to articulate how individual molecular and quantum behaviors are related to classical thermodynamics and demonstrate how the variables from the fundamental laws of thermodynamics are related to each other.

CBE 533 - Transport Phenomena

Complete ALL of the following Courses:

- CBE 376 - Heat and Mass Transfer
  AND MATH 447 - Introduction to Partial Differential Equations

Other Prerequisites
ChEn 476 or concurrent enrollment

Recommended
Math 447

Learning Outcomes

Title
Conservation Laws

Tags
179268, 0, 1

Learning Outcome
Students will be able to derive the equations of change for total mass, species mass, momentum, and energy from conservation principles for Cartesian or orthogonal curvilinear coordinate systems.

Title
Dimensional Analysis

Tags
179269, 0, 2

Learning Outcome
Students will be able to apply the principles of dimensional analysis to the equations of change to generate terms containing dimensionless parameters such as Re, Pr, Sc, Gr, and Pe.

Title
Physical Intuition

Tags
211189, 0, 3

Learning Outcome
Students will understand the origin and physical meaning of terms in the equations of change and when and how to use appropriate simplifying assumptions for a given engineering problem.

Title
Vectors and Tensors

Tags
179270, 0, 4

Learning Outcome
Students will be able to interpret and manipulate transport equations and corresponding solutions that are expressed using vector and tensor notation in Cartesian or orthogonal curvilinear coordinate systems.

Title
Solutions to the Equations of Change

Tags
179271, 0, 5

Learning Outcome
Students will be able to generate analytic solutions to the equations of change using various techniques.

Title
Transport Properties

Tags
179273, 0, 7

Learning Outcome
Students will be able to explain the molecular origins of observed transport properties and predict the transport properties from traditional theories.

Title
Transport Applications

Tags
179274, 0, 8

Learning Outcome
Students will be exposed to one or more advanced topics in transport phenomena including interfacial transport, fluid turbulence, multicomponent energy and mass transfer, electrolyte transport, and buoyancy-driven transport.

Title
Innovation

Tags
179276, 0, 10

Learning Outcome
Students will be able to analyze the viability of proposed solutions to engineering problems in terms of transport processes and apply knowledge of transport processes to generate new solutions to engineering problems.

CBE 535 - Kinetics and Catalysis

Course Information

Teaching Area (new)
CH EN

Prerequisites

Type
Prerequisite

Prerequisites

Complete ALL of the following Courses:

- CBE 386 - Chemical Reaction Engineering

Learning Outcomes

Title
Elementary Reactions and Ideal Reactors

Tags
179277, 0, 1

Learning Outcome
Students will be able to describe principles of chemical reactions, including elementary reactions and stoichiometry; identify and utilize general properties of rate laws associated with elementary reactions; derive material and energy balances for ideal reactors from first principles, including transient plug flow reactors and gas expansion; derive the pressure drop equation and estimate pressure drop parameters for packed bed reactors; apply principles of rate laws, material and energy balances, pressure drop, extent of reaction, and conversion for solving steady state and unsteady state ideal reactor design problems; and incorporate computational tools, including Python, to solve the design problems.

Title
Theory of Chemical Kinetics

Tags
179278, 0, 2

Learning Outcome
Students will demonstrate an in-depth theoretical understanding of collision theory (CT) and transition-state theory (TST) associated with bimolecular reactions; calculate partition functions for TST; estimate pre-exponential factors from CT and TST for homogeneous bimolecular reactions; recognize constraints of CT and TST; and utilize databases to assess accuracy of predictions and to estimate steric factors.

Title
Rate Laws

Tags
179279, 0, 3

Learning Outcome
Students will be able to derive rate laws from a sequence of elementary steps for a homogeneous chain reaction or a heterogeneous catalytic reaction; utilize principles of steady state approximation (SSA), rate limiting step (RLS), most abundant species intermediate (MASI), and Langmuir-Hinshelwood mechanisms in deriving rate laws; recognize constraints and limitations of these methods; identify principles and guidelines for measuring rate data; and fit rate data to obtain rate law parameters and associated statistical confidence levels of these parameters.

Title
Catalysis

Tags
179280, 0, 4

Learning Outcome
Students will understand molecular processes involved in adsorption/ desorption of molecules on a solid surface; derive rate laws for heterogeneous catalysis; calculate catalyst properties based on BET analysis and mercury porosimetry; estimate Knudsen diffusion coefficients and predict effective diffusion coefficients; calculate concentration and temperature gradients in various catalyst geometries and estimate isothermal and non-isothermal effectiveness factors associated with internal and external transport resistances; and utilize the above principles to predict the operation of catalytic reactors.

Title
Non-ideal Reactors

Tags
179281, 0, 5

Learning Outcome
Students will be able to identify factors that lead to non-ideal reactors; utilize residence time distribution (RTD) tools to characterize non-ideal reactors; utilize methods to predict RTDs for reactors in series, reactors in parallel, and reactors with dead space or channeling; apply zero-parameter models (segregation and maximum mixedness) and one-parameter models (tank-in-series and dispersion) to predict outputs of non-ideal reactors for single and multiple reactions; and for the one-parameter models, demonstrate methods for determining the parameter used in the models.

CBE 536 - Machine Learning and Dynamic Optimization

Course Information

Teaching Area (new)
CH EN

Course Number
536

Teaching Area
CBE

Course Title
Machine Learning and Dynamic Optimization

Course Description
Machine Learning and Dynamic Optimization is a graduate level course on the theory and applications of numerical solutions of time-varying systems with a focus on engineering design and real-time control applications. Concepts taught in this course include physics-based and empirical modeling, machine learning classification and regression, nonlinear programming, estimation, and advanced control methods such as model predictive control.

or equivalent.

CBE 561 - Electrochemical Methods and Applications

Course Information

Course Number

561

Teaching Area

CBE

Course Title

Electrochemical Methods and Applications

Course Description

This course develops the fundamental (thermodynamics, kinetics, and mass transfer) and practical aspects of electrochemistry involved in electroanalytical methods, like voltammetry and chronoamperometry, and applications, such as batteries and electrorefining.

Department

Chemical and Biological Engineering

When Taught

Winter Even Years

Credit Hours

Fixed/Max:
3

Simple Requisites

Prerequisite

Type

Prerequisite

Prerequisite

Fulfill ANY of the following requirements:

Prerequisite

Complete ALL of the following Courses:

- MATH 113 - Calculus 2
  AND CHEM 105 - General College Chemistry 1 with Lab (Integrated)

OR

Prerequisite

Complete ALL of the following Courses:

- MATH 113 - Calculus 2
  AND CHEM 111 - Principles of Chemistry 1

Learning Outcomes

Title
Electrochemical Theory and Processes

Learning Outcome
Students will be able to apply electrochemical theory and principles to the measurement and analysis of electrochemically active species in solutions

Title
Physical Principles of Electrochemical Systems

Learning Outcome
Students will be able to identify and quantify the influence of physical properties on electrochemical behavior

Title
Interpretation of Electrochemical Data

Learning Outcome
Students will be able to determine physical properties from electrochemical data through observation and rigorous analysis

Title
Chemical Conditions Influence on Electrochemistry

Learning Outcome
Students will be able to qualitatively and quantitatively demonstrate the interplay between chemical conditions and electric current and potential

Title
Electrochemistry Applications

Learning Outcome
Students will be able to use their understanding of electrochemical theory and principles to evaluate tradeoffs in electrochemical technologies

Title
Intellectual and Spiritual Inquiry

Learning Outcome
Students will develop their learning, critical thinking, and analytical skills through rigorous scholarship and the integration of faith and reason. They will be prepared to navigate uncertainties through inquiry, learning, and faith.

CBE 578 - Polymer Science and Engineering

Course Information

Teaching Area (new)
CH EN

Course Number
578

Teaching Area
CBE

Course Title
Polymer Science and Engineering

Course Description
Foundation science and theory of polymer chemistry and physics and their implications in engineering applications. Topics include polymerization chemistry, structure-property relationships, polymer physics, and transport properties.

Department
Chemical and Biological Engineering

When Taught
Winter Even Years

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Simple Requisites

Prerequisites

Type
Prerequisite

Prerequisites

Complete ALL of the following Courses:

- CBE 378 - Science of Engineering Materials

Other Prerequisites
or equivalent.

Learning Outcomes

Title
Manufacturing Processes

Tags
179328, 5

Learning Outcome
Students can name various manufacturing processes and can do simple formulation of manufacturing processes to build things from polymers.

Title
Polymer Configuration & Conformation

Tags
179347, 1

Learning Outcome
Students recognize the roles that polymer configuration and conformation have upon polymer physical and chemical properties.

Title
Polymer Scenario or Application

Tags
179350, 8

Learning Outcome
For a given scenario or application, students can propose various polymers that meet the requirements, identify the monomers required to make the polymers, and design the industrial polymerization and manufacturing processes to produce the desired object for the application.

Title
Polymer & Monomer Identification

Tags
179374, 0

Learning Outcome
Students can name polymers and identify the monomers from which the polymers are built.

Title
Chain Polymerizations

Tags
179388, 2

Learning Outcome
Students can describe the mechanisms of chain polymerizations, and can predict reaction rates and polymer chain lengths.

Title
Step Polymerizations

Tags
179413, 3

Learning Outcome
Students can describe the mechanisms of step polymerizations, and can predict reaction rates and polymer chain lengths.

Title
Industrial Scale Polymerization Processes

Tags
179420, 7

Learning Outcome
Students can analyze industrial scale polymerization processes and evaluate the advantages and disadvantages of various processes.

Title
Polymer Recycling

Tags
179430, 6

Learning Outcome
Students recognize the principles of polymer recycling and can select appropriate recycle or reuse methods to balance economics and environmental responsibility.

Title
Polymer Design

Tags
179431, 4

Learning Outcome
Based on tabulated mechanical properties, students can design polymer structures to sustain engineering loads, and can predict deformations under load.

CBE 593R - Special Topics - Intermediate

Course Information

Teaching Area (new)
CH EN

Course Number
593R

Teaching Area
CBE

Course Title
Special Topics - Intermediate

Course Description
Special topics for advanced undergraduate students and for graduate students.

Department
Chemical and Biological Engineering

When Taught
Contact Department

Credit Hours

Min:
1

Fixed/Max:
3

Other Prerequisites
Instructor's consent

Learning Outcomes

Title
Non-curricular Knowledge

Tags
179436, 0

Learning Outcome
Students will develop knowledge and skills about topics addressed at the appropriate level but not regularly taught as part of the department curriculum

CBE 618 - Advanced Biomedical Engineering

Course Information

Course Number
618

Teaching Area
CBE

Course Title
Advanced Biomedical Engineering

Course Description
Advanced application of chemical engineering principles to model physiologic systems and to solve medical problems.

Department
Chemical and Biological Engineering

When Taught
Winter

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Simple Requisites

Prerequisite

Type
Prerequisite

Complete ANY of the following Courses:
- CBE 351 - Fundamentals of Biomedical Engineering
- ME EN 351 - Fundamentals of Biomedical Engineering

Other Prerequisites
Must have graduate standing in university

Note
Only CBE 518 or CBE 618 (not both) can be applied towards graduation requirements

Learning Outcomes

Title
Total-body Mass Balances

Learning Outcome
Students will be able to formulate total-body mass balances including the major incoming and outgoing components for the human body.

Title
Transport Characteristics

Learning Outcome
Students will be able to discuss the transport characteristics of biological membranes in terms of permeability and to estimate the ion flux, electrochemical potential, or chemical species concentrations associated with a particular environment.

Title
Neuroprosthetic Device

Learning Outcome
Students will be able to discuss the factors important to the effectiveness of a neuroprosthetic device.

Title
Man-made Flow Systems

Learning Outcome
Students will be able to describe and to numerically predict major aspects of the humancirculatory system and the behavior of blood in physiologic and man-made flow systems.

Title
Mechanical Behavior

Learning Outcome
Students will be able to analyze the mechanical behavior of physiological tissue and biomaterials in terms of stress-strain behavior, viscoelasticity, and motion.

Title
Biomaterials

Learning Outcome
Students will be able to describe the general classes of biomaterials and how they address requirements in various biomedical applications.

Title
Tissue Engineering Processes

Learning Outcome
Students will be able to describe the basic processes of tissue engineering and the associated cell growth and transport issues.

Title
Medical Imaging

Learning Outcome
Students will be able to describe the major types of medical imaging and the advantages and disadvantages of each.

Title
Biosensors

Learning Outcome
Students will be able to describe several common strategies used in biosensors and to explain the need for such sensors.

Title
Time Behavior of Chemical Species

Learning Outcome
Students will be able to formulate the equations to describe the time behavior of a chemical species for given physiological model, transport, and reaction assumptions.

Title
Drug Delivery Systems

Learning Outcome
Students will be able to describe several medical circumstances for which drug delivery systems would be advantageous and to formulate the equations to describe the release of a drug into a patient under such circumstances.

Title
Hemodialysis

Learning Outcome
Students will be able to describe the clinical requirements for hemodialysis and to mathematically estimate the rate of removal of metabolic products by normal kidneys and during hemodialysis.

Title
Oxygen & Carbon Dioxide Transfer

Learning Outcome
Students will be able to mathematically estimate the transfer of oxygen and carbon dioxide in the lungs and in artificial oxygenators

Title
Bioethics

Learning Outcome
Students will be able to discuss the foundational principles of bioethics and the legal and sociological factors that affect their implementation.

Title
Independent Research Project

Learning Outcome
Propose, develop, present, and write a technical paper on a research project related to biochemical engineering

Title
Research Mentoring

Learning Outcome
Mentor a team of graduate and undergraduate students on a research project related to biochemical engineering

CCE 101 - Introduction to Civil and Construction Engineering

Course Information

Teaching Area (new)
CCE

Course Number
101

Teaching Area
CCE

Course Title
Introduction to Civil and Construction Engineering

Course Description
Introduction to Civil Engineering, Construction Management, and Facility and Property Management, including careers in the professions and courses and curriculum of the majors. Freshman projects and teamwork.

Department
Civil and Construction Engineering

When Taught
Fall and Winter

Credit Hours

Min:
1

Fixed/Max:
1

Lecture Hours

Fixed:
1

Lab Hours

Fixed:
0

Learning Outcomes

Title
1. Teamwork

Learning Outcome
Participate on a student team to complete assigned tasks.

Title
2. Information Discovery

Learning Outcome
Discover and digest information from the internet, the literature, and interviews about assigned civil engineering subjects.

Title
3. Engineering Ethics

Learning Outcome
Understand the meaning and importance of ethical and professional responsibilities in engineering situations, and make an informed judgment considering the impact of global, economic, environmental, and societal contexts.

CCE 102 - Sustainable Infrastructure

Course Information

Teaching Area (new)
CCE

Course Number
102

Teaching Area
CCE

Course Title
Sustainable Infrastructure

Course Description
Sustainability in built environments and infrastructure with a focus on global challenges and solutions.

Department
Civil and Construction Engineering

When Taught
Fall and Winter

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Learning Outcomes

Title
Infrastructure and Society

Learning Outcome
Describe how civil infrastructure and the built environment can foster (or inhibit) a sustainable society, including efforts to achieve United Nations Sustainable Development Goals.

Title
Project Decision Frameworks

Learning Outcome
Apply decision frameworks to evaluate projects from a life-cycle perspective, considering trade-offs and impacts of the built environment on society and the natural world.

Title
Engineering Economics

Learning Outcome
Apply the principle of time value of money to identify financially sustainable infrastructure investment decisions.

Title
Ethical Stewardship (ABET Student Outcome 4)

Learning Outcome
Recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts. (CE / ABET Student Outcome 4)

Title
Teamwork (ABET Student Outcome 5)

Learning Outcome
Function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives. (CE / ABET Student Outcome 5)

CCE 103 - Engineering Mechanics--Statics.

Course Information

Teaching Area (new)
CCE

Course Number
103

Teaching Area
CCE

Course Title
Engineering Mechanics--Statics.

Course Description
Concepts of mechanics: force systems in equilibrium, resultants, friction, centroids, utilization of vector algebra, simple trusses, shear and bending moment diagrams, moments of inertia.

Department
Civil and Construction Engineering

When Taught
Fall and Winter

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Simple Requisites

Prerequisites

Type
Prerequisite

Prerequisites

Complete ALL of the following Courses:

- MATH 112 - Calculus 1

Learning Outcomes

Title
1. Units

Learning Outcome
Be able to manipulate basic engineering units in both the International and US Customary Systems of Units in engineering analysis and be able to convert between the two.

Title
2. Vector Notation

Learning Outcome
Be able to perform basic vector operations using standard vector notation.

Title
3. Free-Body Diagrams

Learning Outcome
Be able to conceptualize and draw a conventional free-body diagram which identifies and applies all known and unknown forces.

Title
4. Forces

Learning Outcome
Understand the nature of forces(s) and their manipulation in engineering analysis, including moments, couples, transmissibility and resultants.

Title
5. Equilibrium

Learning Outcome
Understand the conditions for equilibrium for both a particle and a rigid body.

Title
6. Axial Forces

Learning Outcome
Be able to determine the axial forces in the members of a statically determinant truss.

Title
7. Center of Gravity

Learning Outcome
Be able to calculate the center of gravity for 2 and 3 dimensional rigid bodies.

Title
8. Shear Force and Bending Moment Diagrams

Learning Outcome
Be able to both calculate and draw diagrams for the internal shear forces and bending moments in straight, statically determinant beams.

Title
9. Friction

Learning Outcome
Understand the nature of friction and be able to solve problems involving friction and shear on horizontal and inclined planes.

Title
10. Centroids

Learning Outcome
Be able to use calculus to compute centroids of lines, areas and volumes.

Title
11. (1) Problem Solving

Learning Outcome
An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics. (ABET EAC Student Outcome 1) An ability to identify, formulate, and solve broadly defined technical or scientific problems by applying knowledge of mathematics and science and/or technical topics to areas relevant to the discipline. (ABET ANSAC Student Outcome 1)

CCE 112 - Engineering Drafting

Course Information

Teaching Area (new)
CCE

Course Number
112

Teaching Area
CCE

Course Title
Engineering Drafting

Course Description
Structural and component drafting, emphasizing computer-automated (CAD) systems. Concepts include applied and descriptive geometry, multiview representation, sectional views, dimensional practices, and axonometric sketching.

Department
Civil and Construction Engineering

When Taught
Fall and Winter

Credit Hours

Min:
2

Fixed/Max:
2

Lecture Hours

Fixed:
2

Lab Hours

Fixed:
0

Learning Outcomes

Title
Software Acquisition and Installation

Learning Outcome
Understand and explain software licensing models and how to obtain and install software.

Title
File Management

Learning Outcome
Demonstrate an ability to download technical files from web-based repositories, store the files onto local and shared computing networks, and open and edit files in engineering software.

Title
Technical Documentation

Learning Outcome
Demonstrate an ability to obtain useful guidance from software documentation and online help forums, including appropriate use of generative AI.

Title
Design

Learning Outcome
Perform engineering design or analysis using software.

Title
Engineering Visualization

Learning Outcome
Produce a visualization that communicates the results of an engineering design or analysis. (CE / ABET Outcome 3)

Title
Fundamental drafting concepts

Learning Outcome
Represent 3D geometry in 2D using plan views, section views, and elevation views. Understand use of plan sets for construction bid documents.

Title
2D Drafting using AutoCAD

Learning Outcome
Draw, edit, and visualize objects using AutoCAD. Create annotations and titles and prepare visualizations for printing.

Title
3D Design using AutoCAD Civil 3D

Learning Outcome
Draw, edit, and visualize objects using Civil 3D. Use styles and settings to display information.

Title
3D Modeling and 2D Plan Production using Revit

Learning Outcome
Draw, edit, and visualize objects using Revit. Create and modify schedules and create sheets and place views on sheets.

CCE 113 - Construction Modeling

Course Information

Teaching Area (new)
CCE

Course Number
113

Teaching Area
CCE

Course Title
Construction Modeling

Course Description
Developing architectural plans using Building Information Modeling; floor, foundation, plot, elevations, sections, and details. Renderings and other advanced modeling techniques.

Department
Civil and Construction Engineering

When Taught
Fall and Winter

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
2

Lab Hours

Fixed:
3

Note
Fee.

CCE 114 - Geomatics

Course Information

Teaching Area (new)
CCE

Course Number
114

Teaching Area
CCE

Course Title
Geomatics

Course Description
“Use of surveying and GPS measurements, earth observations, and online databases within geographic information system (GIS) software to organize, visualize, and analyze geospatial data used in civil, environmental, and construction engineering problems and projects.”

Department
Civil and Construction Engineering

When Taught
Fall and Winter

Credit Hours

Min:
2

Fixed/Max:
2

Lecture Hours

Fixed:
2

Lab Hours

Fixed:
0

Learning Outcomes

Title
Software Acquisition and Installation

Learning Outcome
Understand and explain software licensing models and how to obtain and install software.

Title
File Management

Learning Outcome
Demonstrate an ability to download technical files from web-based repositories, store the files onto local and shared computing networks, and open and edit files in engineering software.

Title
Technical Documentation

Learning Outcome
Demonstrate an ability to obtain useful guidance from software documentation and online help forums, including appropriate use of generative AI.

Title
Design

Learning Outcome
Perform engineering design or analysis using software.

Title
Engineering Visualization

Learning Outcome
Produce a visualization that communicates the results of an engineering design or analysis. (CE / ABET Outcome 3)

Title
Acquiring Spatial Data

Learning Outcome
Locate, understand, and retrieve spatial data from government and other repositories using metadata.

Title
Data Models

Learning Outcome
Describe all common spatial data formats and data models and select an appropriate data model for a specific use.

Title
Projections and Coordinate Systems

Learning Outcome
Select an appropriate geographic projection for use in engineering-specific problems and describe the key characteristics of different common coordinate and geographic projection systems.

Title
Spatial Data Analysis

Learning Outcome
Use geographic information system tools for spatial analysis, understanding and design of engineering systems.

CCE 122 - Surveying

Course Information

Course Number
122

Teaching Area
CCE

Course Title
Surveying

Course Description
Land surveying in the context of construction and engineering measurements. Laboratory activities using modern surveying tools and methods.

Department
Civil and Construction Engineering

When Taught
Fall and Winter

Credit Hours

Min:
1

Fixed/Max:
1

Lecture Hours

Fixed:
1

Lab Hours

Fixed:
2

Learning Outcomes

Title
Engineering Measurements

Learning Outcome
Use specialized equipment to measure the natural or built environment.

Title
Error Analysis

Learning Outcome
Compute errors, precision, and accuracy of engineering measurements.

Title
Data Stewardship

Learning Outcome
Produce laboratory or field notes documenting procedures, conditions, raw data, and derivative data.

Title
Experiments and Data

Learning Outcome
An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions. (CE - ABET Outcome 6) An ability to develop and conduct experiments or test hypotheses, analyze and interpret data and use scientific judgment to draw conclusions (CFM – ABET Outcome 3)

CCE 194R - Special Topics in Civil and Construction Engineering

Course Information

Course Number
194R

Teaching Area
CCE

Course Title
Special Topics in Civil and Construction Engineering

Course Description
Directed studies in Civil and Construction Engineering related to professional practice

Department
Civil and Construction Engineering

When Taught
All Semesters/Terms

Credit Hours

Min:
1

Fixed/Max:
3

Learning Outcomes

Title
Special Topics

Learning Outcome
Students in the course will learn topics outside the standard curriculum that allows the student to broaden their education as it relates to Civil and Construction Engineering.

CCE 203 - Engineering Mechanics--Mechanics of Materials

Course Information

Teaching Area (new)
CCE

Course Number
203

Teaching Area
CCE

Course Title
Engineering Mechanics--Mechanics of Materials

Course Description
Fundamental concepts of elastic stress and strain, including transformations and stress-strain relations; beam/column theories (axial, flexure, torsion, and shear loads and deformations); shear and bending moment relationships; column stability; and cylindrical and spherical pressure vessels.

Department
Civil and Construction Engineering

When Taught
Fall and Winter

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Simple Requisites

Prerequisites

Type
Prerequisite

Prerequisites

Fulfill ANY of the following requirements:

Prerequisites

Complete ALL of the following Courses:

- CCE 103 - Engineering Mechanics--Statics.
- PHSCS 105 - General Physics 1
  OR PHSCS 121 - Introduction to Newtonian Mechanics

OR

Prerequisites

Complete ALL of the following Courses:

- ME EN 101 - Static Systems in Mechanical Engineering

Learning Outcomes

Title
Stresses

Learning Outcome
Students will be able to calculate and transform axial stress (e.g., Mohr's Circle), shear stress, bearing stress, thermal stress, bending stress, and combined stress.

Title
Strains

Learning Outcome
Students will be able to calculate strain, transform strain (e.g. Mohr's Circle), apply stress-strain relations (e.g., Hooke's Law), and solve statically indeterminate problems.

Title
Deflections

Learning Outcome
Students will be able to analyze deflections due to axial, torsion, bending, and shear loads, and manipulate relations between shear and bending moment.

Title
Beam/Column Design

Learning Outcome
Students will be able to design beams and columns to carry specified axial, flexure, and shear loads, and predict their deformation and elastic stability (i.e., buckling).

Title
Pressure Vessels

Learning Outcome
Students will be able to predict stresses in pressure vessels.

CCE 231 - Foundations of Global Leadership

Course Information

Teaching Area (new)
CCE

Course Number
231

Teaching Area
CCE

Course Title
Foundations of Global Leadership

Course Description
Foundational principles and practices of individual and organizational leadership in a global context from an integrated moral, technical and social perspective. Emphasis on developing integrity, valuing and leveraging diversity, acquiring and applying leadership skills.

Department
Civil and Construction Engineering

When Taught
Fall and Winter

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

CCE 270 - Computational Methods

Course Information

Teaching Area (new)
CCE

Course Number
270

Teaching Area
CCE

Course Title
Computational Methods

Course Description
Computational techniques for solving problems in civil engineering and construction.

Department
Civil and Construction Engineering

When Taught
Fall and Winter

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Prerequisites

Complete ALL of the following Courses:
- CCE 102 - Sustainable Infrastructure
  AND CCE 113 - Construction Modeling

OR

Prerequisites

Complete ALL of the following Courses:
- CCE 102 - Sustainable Infrastructure
  AND CCE 114 - Geomatics

Learning Outcomes

Title
Computing Basics

Learning Outcome
Acquire an understanding of basic computer science concepts such as files, file extensions, file organization, programming languages, editors, and related software programs.

Title
Engineering Computations

Learning Outcome
Develop the ability to apply basic spreadsheet and programming skills to solve civil and construction engineering problems by using and understanding concepts such as functions, variables, solution methods, and formulas. (CE / ABET Student Outcome 1)

Title
Computer Programming

Learning Outcome
Develop the ability to use spreadsheets or programming languages to automate tasks and create solutions for civil and construction engineering analysis and design.

CCE 304 - Civil Engineering Materials: Metals, Woods, and Composites

Course Information

Teaching Area (new)
CE

Course Number
304

Teaching Area
CCE

Course Title
Civil Engineering Materials: Metals, Woods, and Composites

Course Description
Molecular basis and mechanical behavior of civil engineering structural materials; failure theories; laboratory testing.

Department
Civil and Construction Engineering

When Taught
Fall Term 1; Winter Term 1.

Credit Hours

Min:
1.5

Fixed/Max:
1.5

Lecture Hours

Fixed:
2

Lab Hours

Fixed:
3

Simple Requisites

Prerequisites

Type
Prerequisite

Prerequisites

Fulfill ANY of the following requirements:

Complete ALL of the following Courses:
- CCE 270 - Computational Methods
  AND CCE 203 - Engineering Mechanics--Mechanics of Materials
  AND STAT 201 - Statistics for Engineers and Scientists

OR

Complete ALL of the following Courses:
- CCE 270 - Computational Methods
  AND CCE 203 - Engineering Mechanics--Mechanics of Materials
  AND STAT 121 - Introduction to Statistical Data Analysis

Learning Outcomes

Title
Wood and Steel

Learning Outcome
Be able to extract basic material properties of wood, aluminum and steel from simple mechanical tests.

Title
Communication

Learning Outcome
Develop an ability to communicate effectively.

Title
Experimentation and Data Interpretation

Learning Outcome
Develop an ability to design and conduct civil engineering experiments, as well as to analyze and interpret data.

Title
Failure Mechanisms

Learning Outcome
Observe and understand the failure mechanisms of isotropic and orthotropic materials.

Title
Composites

Learning Outcome
Understand basic characteristics of fiber-reinforced plastic composite materials.

Title
Application

Learning Outcome
Develop an ability to apply knowledge of structural engineering.

Title
Failure Theories

Learning Outcome
Be able to apply the maximum normal stress, maximum shear stress, and octahedral shear stress failure theories.

CCE 306 - Civil Engineering Materials: Concrete, Masonry, and Asphalt

Course Information

Teaching Area (new)
CCE

Course Number
306

Teaching Area
CCE

Course Title
Civil Engineering Materials: Concrete, Masonry, and Asphalt

Course Description
Composition, engineering behavior, and construction of concrete, masonry, and asphalt; laboratory testing.

Department
Civil and Construction Engineering

When Taught
Fall Term 2; Winter Term 2.

Credit Hours

Min:
1.5

Fixed/Max:
1.5

Lecture Hours

Fixed:
2

Lab Hours

Fixed:
2

OR

Prerequisites

Complete ALL of the following Courses:

- CCE 203 - Engineering Mechanics--Mechanics of Materials **AND** STAT 121 - Introduction to Statistical Data Analysis **AND** CCE 270 - Computational Methods

Learning Outcomes

Title
Aggregates

Learning Outcome
Understand properties, behavior, and use of aggregates.

Title
Portland Cement

Learning Outcome
Understand manufacturing, properties, behavior, and use of portland cement.

Title
Portland Cement Concrete

Learning Outcome
Understand production, properties, placement, behavior, and use of portland cement concrete.

Title
Masonry

Learning Outcome
Understand production, properties, placement, behavior, and use of masonry units.

Title
Asphalt Cement

Learning Outcome
Understand manufacturing, properties, behavior, and use of asphalt cement.

Title
Asphalt Concrete

Learning Outcome
Understand production, properties, placement, behavior, and use of asphalt concrete.

Title
Laboratory Testing and Data Analysis

Learning Outcome
Be able to perform selected laboratory test procedures on aggregate-based materials and be able to analyze and interpret experimental laboratory test data.

Title
Report Preparation

Learning Outcome
Be able to prepare professional technical reports documenting laboratory investigations of material properties.

CE 199R - Academic Internship

Course Information

Teaching Area (new)
CE

Course Number
199R

Teaching Area
CE

Course Title
Academic Internship

Course Description
Work experience evaluated by supervisor and posted on student's transcript.

Department
Civil and Construction Engineering

When Taught
All Semesters/Terms

Credit Hours

Min:
0.5

Fixed/Max:
3

Note
An APPROVED Internship Application is required before adding. Internship credits are not required in the Civil Engineering major and are reserved for International Students working domestically off campus.

CE 204 - Engineering Mechanics--Dynamics

Course Information

Teaching Area (new)
CE

Course Number
204

Teaching Area
CE

Course Title
Engineering Mechanics--Dynamics

Course Description
Concepts of dynamics applied to particles, systems of particles, rigid bodies, vibration systems, and nonrigid particles systems.

Department
Civil and Construction Engineering

When Taught
Fall, Winter, Spring

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Simple Requisites

Type
Prerequisite

Prerequisites

Fulfill ANY of the following requirements:

Prerequisites

Complete ALL of the following Courses:

- CCE 103 - Engineering Mechanics--Statics.

OR

Prerequisites

Complete ALL of the following Courses:

- ME EN 101 - Static Systems in Mechanical Engineering

CE 232 - Fluid Mechanics

Course Information

Teaching Area (new)
CE

Course Number
232

Teaching Area
CE

Course Title
Fluid Mechanics

Course Description
Fluid properties, fluid statics and dynamics, viscous flow, boundary layers, concepts of pipe and open-channel flow.

Department
Civil and Construction Engineering

When Taught
Fall and Winter

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
2

Lab Hours

Fixed:
3

Simple Requisites

Prerequisites

Type
Prerequisite

Prerequisites

Complete ALL of the following Courses:

- CCE 103 - Engineering Mechanics--Statics.
  AND PHSCS 121 - Introduction to Newtonian Mechanics

Other Prerequisites

Learning Outcomes

Title
Experiments

Learning Outcome
Be able to setup, perform, evaluate and report on several elementary hydraulic experiments, including: static pressure force, impulse forces from a fluid jet, energy losses in pipe flow, minor energy losses in pipe systems, and flow over weirs in open channels.

Title
Calculations

Learning Outcome
Be able to perform basic calculations for static pressures and forces in fluids.

Title
Fundamental equations

Learning Outcome
Understand conservation of mass, energy, and momentum principles as applied to fluid flow situations, and be able to apply them to flow analysis problems.

Title
Drag and Lift

Learning Outcome
Understand the concepts of drag and lift and be able to apply both to solve introductory problems of forces and dynamics.

Title
Pressure Pipes

Learning Outcome
Understand alternate standard approaches and formulas, and be able to analyze and design pressure pipe systems.

Title
Water Resources Engineering

Learning Outcome
Understand standard approach and formulas, and be able to analyze and design open-channel flow systems.

Title
Pumps

Learning Outcome
Understand the basic elements of pump and turbine flow, and be able to analyze and select the pump needed for situations involving fluid pumping.

CE 271 - Civil Engineering Communication

Course Information

Teaching Area (new)
CE

Course Number
271

Teaching Area
CE

Course Title
Civil Engineering Communication

Course Description
Written and oral communication in the civil engineering discipline. Includes resumes, emails, public-facing documents, memos, literature reviews, professional letters, reports, meetings, interviews, and presentations. This course satisfies the BYU GE Advanced Written and Oral Communication requirement.

Department
Civil and Construction Engineering

When Taught
Fall and Winter

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Simple Requisites

Prerequisite

Type
Prerequisite

Complete ALL of the following Courses:
- CCE 102 - Sustainable Infrastructure
  AND WRTG 150 - Writing and Rhetoric

Learning Outcomes

Title
Disciplinary Genre

Learning Outcome
Write common civil engineering genres for both technical and non-technical audiences.

Title
Research

Learning Outcome
Identify and evaluate credible sources, integrate them into engineering-specific writing, and reference them appropriately and ethically.

Title
Writing Process

Learning Outcome
Apply principles of planning, outlining, drafting, revising, editing, and proofreading to communicate effectively and clearly in both written and oral formats, and in individual and collaborative contexts.

Title
Document Organization

Learning Outcome
Select appropriate organizational structure, format, and style for texts.

Title
Disciplinary Conventions

Learning Outcome
Employ standard civil engineering writing conventions such as acronyms, jargon, etc.

Title
Writing Mechanics

Learning Outcome
Demonstrate skills in editing, syntax, grammar, punctuation, and spelling.

Title
Peer Review

Learning Outcome
Evaluate the writing of others and provide appropriate and Christlike feedback to facilitate revision.

CE 291R - Civil Engineering Seminar

Course Information

Teaching Area (new)
CE

Course Number
291R

Teaching Area
CE

Course Title
Civil Engineering Seminar

Course Description
Activities of civil engineering; principles and methods involved in solving civil engineering problems.

Department
Civil and Construction Engineering

When Taught
Fall and Winter

Credit Hours

Min:
0.5

Fixed/Max:
0.5

Lecture Hours

Fixed:
1

Lab Hours

Fixed:
0

Note
College Lecture attendance required.

Learning Outcomes

Title
Professional Engineer

Learning Outcome
Continue developing an understanding of the process required to become a professional engineer

Title
Lifelong Learning

Learning Outcome
Continue developing an understanding of the importance of lifelong learning and know how to obtain learning experiences that will benefit their future careers

Title
Teams

Learning Outcome
Work in and begin learning how to lead teams in civil engineering related projects that benefit the community

Title
Ethical Behavior

Learning Outcome
Continue developing an understanding of ethical behavior in civil engineering and be able to cite examples of good ethical behavior.

Title
Career

Learning Outcome
Continue developing an understanding of contemporary issues in civil engineering as illustrated by projects presented by practicing engineers

CE 321 - Structural Analysis

Course Information

Teaching Area (new)
CE

Course Number
321

Teaching Area
CE

Course Title
Structural Analysis

Course Description
Methods of statics. Influence line diagrams. Method of virtual work. Plastic hinge analysis. Flexibility (force) method, stiffness (displacement) method, and moment distribution method for analysis of indeterminate beams, trusses, and frames. Introduction to computer structural analysis.

Department
Civil and Construction Engineering

When Taught
Fall; Winter.

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Simple Requisites

Prerequisites

Type
Prerequisite

Prerequisites

Complete ALL of the following Courses:

- CCE 203 - Engineering Mechanics--Mechanics of Materials
- CCE 270 - Computational Methods

Learning Outcomes

Title
Force Equilibrium

Tags
207278, 0, 1

Learning Outcome
Apply Newton's laws of force equilibrium to determine axial forces, shear forces, and bending moments of statically determinate trusses, beams, and frames.

Title
Idealization/Modeling

Tags
207494, 0, 0

Learning Outcome
Be able to identify loads, components, and connections of a structure and make assumptions about how to model them for structural analysis. Understand the repercussions of assumptions made for the Bernoulli-Euler beam theory.

Title
Principle of Virtual Work

Learning Outcome
Apply calclulus and the principle of virtual work to determine displacements in statically determinate beams, trusses, and frames.

Title
Analysis of Indeterminate Structures

Learning Outcome
Identify degrees of indeterminacy and degrees of freedom in beams, frames, and trusses. Apply the force method and the stiffness method for analysis of indeterminate structures.

Title
Computer Analysis

Learning Outcome
Apply computational techniques to evaluate structural phenomena; use both code and commercial software.

CE 331 - Hydrology

Course Information

Teaching Area (new)
CE

Course Number
331

Teaching Area
CE

Course Title
Hydrology

Course Description
Waters of the earth, their occurrence, circulation, and distribution. Relationships among precipitation, evaporation, infiltration, transpiration, groundwater, and stream runoff.

Department
Civil and Construction Engineering

When Taught
Winter.

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
2

Lab Hours

Fixed:
3

Simple Requisites

Prerequisites

Type
Prerequisite

Prerequisites

Complete ALL of the following Courses:

- CE 232 - Fluid Mechanics
- CCE 270 - Computational Methods

Learning Outcomes

Title
Hydrologic Cycle

Learning Outcome
Understand and apply climatological principles relating to the hydrologic cycle and its occurrence and interaction with the biosphere of the earth.

Title
Precipitation & Runoff

Learning Outcome
Understand and solve problems for precipitation/runoff situations; including generation of the flow rates at desired points in a watershed.

Title
Design & Hydrographs

Learning Outcome
Design and make calculations of flowrate hydrographs, reservoir storage, well flow and drawdown, and water demand relationships in streams and in the groundwater.

Title
Statistical Methods

Learning Outcome
Design and apply statistical methods to generate hydrologic intensity and frequency distributions.

CE 341 - Elementary Soil Mechanics

Course Information

Teaching Area (new)
CE

Course Number
341

Teaching Area
CE

Course Title
Elementary Soil Mechanics

Course Description
Fundamental soil properties in the context of civil engineering and construction. Soil classification systems, stresses from gravitational and surface loads, shear strength, soil compaction theory, seepage of fluid through soil, bearing capacity analysis of foundations and settlement/consolidation theory.

Department
Civil and Construction Engineering

When Taught
Fall and Winter

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
2

Lab Hours

Fixed:
3

Simple Requisites

Prerequisites

Type
Prerequisite

Prerequisites

Complete ALL of the following Courses:

- CCE 203 - Engineering Mechanics--Mechanics of Materials
- CCE 270 - Computational Methods
- CE 232 - Fluid Mechanics

Learning Outcomes

Title
Experimentation and Data Interpretation

Learning Outcome
Perform basic laboratory tests on soils including seive analysi, Atterberg limits, compaction, direct shear, triaxial shear and consolidation. Be able to perform the basic calculations associated wtih laboratory tests on soils.

Title
Communicate Geotech Test Results Effectively

Learning Outcome
Communicate results of geotechnical tests effectively and explain their meaning in a clear and concise manner.

Title
Perform Experiments and Report Results as Teams

Learning Outcome
Collaborate with team members to lead, establish experiment goals, perform experiments, and prepare the results in report format.

Title
Soil classification/Soil Mineralogy

Learning Outcome
Perform fundamental calculations and analyses including weight-volumen relationships and soil classification. Understand influence of soil structure and mineralogy on soil behavior.

Title
Fluid flow in Soil

Learning Outcome
Understand basic principles of flow through porous media including Darcy's law, the equation of continuity, seepage forces and flow nets.

Title
Stress analysis in soil

Learning Outcome
Understand how stresses are transferred through soils. Compute both geostatic stress (total stress, effective stress, and pore pressures) and induced stresses due to point, line and area loads.

Title
Consolidation theory

Learning Outcome
Understand basic consolidation theory. Compute the amoun of settlement and the time required for settlement under a given load.

Title
Shear strength of soil

Learning Outcome
Understand shear strength principles including Mohr-Coloumb failure criterion. Perform basic caluclations related to shear strength analyis.

Title
Lateral earth pressures

Learning Outcome
Analyze lateral earth pressures under at-rest, active and passive conditions.

Title
Bearing capacity

Learning Outcome
Perform bearing capacity analysis for spread footings of various shapes. Understand how bearing capacity equations are used in foundation design.

CE 351 - Introduction to Environmental Engineering

Course Information

Course Number
351

Teaching Area
CE

Course Title
Introduction to Environmental Engineering

Course Description
An introduction to the engineering of drinking water, wastewater, air pollution and solid waste treatment practices.

Department
Civil and Construction Engineering

When Taught
Fall

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Simple Requisites

Prerequisites

Type
Completion Requirement

Complete ALL of the following Courses:

- CHEM 105 - General College Chemistry 1 with Lab (Integrated)
- CCE 270 - Computational Methods

Learning Outcomes

Title
Mass and Energy Balances

Tags
213427, 0, 1, 2023-08-29 07:33:01

Learning Outcome
Perform mass balances and energy balances pertinent to environmental engineering, including aqueous chemical reactions.

Title
Water and Air Quality

Tags
213428, 0, 2, 2023-08-29 07:33:05

Learning Outcome
Describe water and air quality characteristics, as well as their respective standards.

Title
Process Analysis

Tags
213429, 0, 3, 2023-08-29 07:33:06

Learning Outcome
Analyze treatment processes for water, wastewater, air, and solid waste and apply common guidance to design their components.

Title
Sustainability

Tags
213430, 0, 4, 2023-08-29 07:33:07

Learning Outcome
Discuss the concept of an ecosystem and how laws, ethics, and professional responsibilities influence environmental engineering practices therein.

Title
Experiments and Data

Learning Outcome
An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions. (CE Program Outcome 6)

Title
Problem Solving applying Math and Science

Learning Outcome
An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics. (CE Program Outcome 1)

CE 361 - Transportation Engineering

Course Information

Teaching Area (new)
CE

Course Number
361

Teaching Area
CE

Course Title
Transportation Engineering

Course Description
Introductory topics in transportation systems engineering, planning, and design including traffic engineering and operations, highway engineering, pavement design and management, and multimodal transportation systems.

Department
Civil and Construction Engineering

When Taught
Fall and Winter

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Simple Requisites

Prerequisites

Type
Prerequisite

Prerequisites

Fulfill ANY of the following requirements:

Prerequisites

Complete ALL of the following Courses:

- STAT 121 - Introduction to Statistical Data Analysis **AND** CCE 270 - Computational Methods

OR

Prerequisites

Complete ALL of the following Courses:

- STAT 201 - Statistics for Engineers and Scientists **AND** CCE 270 - Computational Methods

Learning Outcomes

Title
Engineering problem solving

Tags
213431, 0, 1, 2023-08-29 07:33:08

Learning Outcome
Identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics. (ABET / Program outcome 1)

Title
Transportation systems

Tags
213432, 0, 2, 2023-08-29 07:33:13

Learning Outcome
Analyze transportation challenges in a social, political, technological, and historical context and identify potential solutions using sustainable and multimodal approaches.

Title
Traffic engineering

Tags
213433, 0, 3, 2023-08-29 07:33:14

Learning Outcome
Evaluate intersection and highway levels of service, operations, and capacity using principles in the Highway Capacity Manual.

Title
Highway engineering

Tags
213434, 0, 4, 2023-08-29 07:33:16

Learning Outcome
Specify roadway controls and design highway curves using national design guides.

Title
Pavement engineering

Tags
213435, 0, 5, 2023-08-29 07:33:17

Learning Outcome
Design pavements using the AASHTO Pavement Design Guide and manage pavement networks using principles of pavement preservation and life cycle cost analysis.

CE 414 - Engineering Applications of GIS

Course Information

Teaching Area (new)
CE

Course Number
414

Teaching Area
CE

Course Title
Engineering Applications of GIS

Course Description
Introduction to GIS concepts. Data acquisition and GIS database formulation. Applications of GIS to civil engineering.

Department
Civil and Construction Engineering

When Taught
Fall

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Learning Outcomes

Title
1. Synthesis and Integration

Learning Outcome
Integrate topics from various civil engineering disciplines to solve realistic problems

Title
2. Database Management

Learning Outcome
Obtain and evaluate appropriate input information from databases, handbooks, correlation, experiments and literature

Title
3. Locating Geographic Data

Learning Outcome
Know where to locate, and how to prepare geographic datasets for use in a GIS

Title
4. GIS Spatial Analysis

Learning Outcome
Use GIS tools and scripts for spatial analysis, understanding and design of engineering systems

Title
5. Map Generation

Learning Outcome
Produce professional maps and technical reports from geographic data for use in written and oral presentations

Title
6. GIS Customization

Learning Outcome
Customize, or use customized scripts to solve engineering-specific problems with GIS

Title
7. Professional Communication

Learning Outcome
Compose professional documents in a clear, concise, and effective manner

CE 421 - Structural Steel Design

Course Information

Teaching Area (new)
CE

Course Number
421

Teaching Area
CE

Course Title
Structural Steel Design

Course Description
Design of steel tension members, compression members, beams, beam-columns; elastic and inelastic lateral-torsional buckling; welds and structural fasteners.

Department
Civil and Construction Engineering

When Taught
Winter

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Simple Requisites

Prerequisites

Type
Prerequisite

Prerequisites

Complete ALL of the following Courses:

- CCE 304 - Civil Engineering Materials: Metals, Woods, and Composites
  AND CE 321 - Structural Analysis

Learning Outcomes

Title
1. AISC Specification

Learning Outcome
Students will understand the theory behind, and have a working familiarity of, the AISC specification.

Title
2. Tension Members

Learning Outcome
Students will be able to design steel tension members.

Title
8. Design and Contemporary Issues

Learning Outcome
An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare as well as global, cultural, social, environmental, and economic factors.

Title
3. Compression Members

Learning Outcome
Students will be able to design steel compression members.

Title
4. Beams

Learning Outcome
Students will be able to design in tension and compression steel beams and composite beams.

Title
5. Beam-Columns

Learning Outcome
Students will be able to design steel beam-columns.

Title
6. Connections

Learning Outcome
Students will be able to design concentrically loaded bolted and welded connections.

Title
7. AISC Code

Learning Outcome
Students will have a working familiarity with the AISC Code.

CE 424 - Reinforced Concrete Design

Course Information

Teaching Area (new)
CE

Course Number
424

Teaching Area
CE

Course Title
Reinforced Concrete Design

Course Description
Theory and design of reinforced concrete, including columns, beams, slabs, and footings; elastic and ultimate-strength methods of analysis.

Department
Civil and Construction Engineering

When Taught
Fall

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Simple Requisites

Prerequisites

Type
Prerequisite

Prerequisites

Complete ALL of the following Courses:

- CCE 306 - Civil Engineering Materials: Concrete, Masonry, and Asphalt
  AND CCE 304 - Civil Engineering Materials: Metals, Woods, and Composites
  AND CE 321 - Structural Analysis

CE 427 - International Megastructures

Course Information

Teaching Area (new)
CE

Course Number
427

Teaching Area
CE

Course Title
International Megastructures

Course Description
Skyscraper analysis and design. Introduction to analysis and design of suspension, cable-stayed, arch, and prestressed girder bridges. Economic, social, and environmental design criteria for megastructures. International experience to study megastructures in China or elsewhere. Interaction with professionals.

Department
Civil and Construction Engineering

Prerequisites

Complete ALL of the following Courses:
- CE 321 - Structural Analysis

Other Prerequisites
instructor's consent.

CE 433 - Hydraulic Engineering

Course Information

Teaching Area (new)
CE

Course Number
433

Teaching Area
CE

Course Title
Hydraulic Engineering

Course Description
Application of fluid mechanics principles to analysis and design of hydraulic structures and systems.

Department
Civil and Construction Engineering

When Taught
Winter

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Simple Requisites

Prerequisites

Type
Prerequisite

Prerequisites

Complete ALL of the following Courses:
- CE 232 - Fluid Mechanics

Learning Outcomes

Title
Energy & Momentum

Learning Outcome
Apply energy and momentum principles to fluid flow situations, and be able to solve problems for forces in static and moving fluids.

Title
Pipe and Open Channel Systems

Learning Outcome
Apply standard energy approaches and formulas, and be able to solve for and design pressure pipe and open channel systems.

Title
Pumps and Turbines

Learning Outcome
Understand the basic elements of pump and turbine flow, and be able to analyze and select the pump needed for pressurizing situations.

Title
Design and evaluate common facilities

Learning Outcome
Generate and apply the analytical and design approaches to common water facilities such as culverts, spillways, pipe networks, sewer systems, canals, and scour and sediment transport.

CE 439 - Water Resources Study Abroad

Course Information

Teaching Area (new)
CE

Course Number
439

Teaching Area
CE

Course Title
Water Resources Study Abroad

Course Description
BYU students team with engineers and engineering students from other countries to work on water resources projects of consequence. Collaboration with international teams occurs electronically through the semester with a 1-3 week visit to the country assigned.

Department
Civil and Construction Engineering

When Taught
Winter odd years, Spring even years

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Other Prerequisites
Enrollment by Instructor Approval

Recommended
CE 431 or 433; CE 471 (Fall semester)

CE 442 - Foundation Engineering

Course Information

Teaching Area (new)
CE

Course Number
442

Teaching Area
CE

Course Title
Foundation Engineering

Course Description
Soil investigation, bearing capacity and settlement, design of spread footings, combined footings, mat foundations, pile foundations, and drilled shafts.

Department
Civil and Construction Engineering

When Taught
Fall

Credit Hours

Min:
3

Fixed/Max:
3

Other Prerequisites
Chem 105.

CE 453 - Water and Wastewater Treatment Design

Course Information

Teaching Area (new)
CE

Course Number
453

Teaching Area
CE

Course Title
Water and Wastewater Treatment Design

Course Description
Analysis, selection, and design of drinking water and wastewater treatment facilities.

Department
Civil and Construction Engineering

When Taught
Winter

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Simple Requisites

Prerequisites

Type
Prerequisite

Prerequisites

Complete ALL of the following Courses:

- CE 351 - Introduction to Environmental Engineering

Learning Outcomes

Title
Principles

Learning Outcome
Set up and solve chemical, biological, hydraulic, and thermodynamic equations or models necessary to design water and wastewater treatment processes.

Title
Regulations

Learning Outcome
Cite major water quality regulations and technical references.

Title
Experiments

Learning Outcome
Perform, document, and interpret basic experiments necessary to design treatment processes.

Title
Alternatives

Learning Outcome
Select treatment alternatives according to given water quality and project constraints.

Title
Design

Learning Outcome
Design treatment components and processes using standard guidance.

CE 461 - Geometric Design of Highways

Course Information

Teaching Area (new)
CE

Course Number
461

Teaching Area
CE

Course Title
Geometric Design of Highways

Course Description
Designing visual aspects of highways: highway classification, design controls and criteria, design elements, vertical and horizontal alignment, cross section, intersections, interchanges, capacity analysis.

Department
Civil and Construction Engineering

When Taught
Fall

Credit Hours

Min:
3

Fixed/Max:
3

Prerequisite

Prerequisites

Earn at least 12 credits from the following:

- CE 321 - Structural Analysis
  OR CE 331 - Hydrology
  OR CE 341 - Elementary Soil Mechanics
  OR CE 351 - Introduction to Environmental Engineering
  OR CE 361 - Transportation Engineering
  OR CCE 304 - Civil Engineering Materials: Metals, Woods, and Composites
  OR CCE 306 - Civil Engineering Materials: Concrete, Masonry, and Asphalt

Complete at least 1 of the following courses:

- CE 424 - Reinforced Concrete Design
  OR CE 421 - Structural Steel Design
  OR CE 433 - Hydraulic Engineering
  OR CE 442 - Foundation Engineering
  OR CE 453 - Water and Wastewater Treatment Design
  OR CE 461 - Geometric Design of Highways

Note
Must be taken during the final semester in the program (fall or winter). If graduating in spring or summer term, CE 472 should be taken in the winter semester prior to graduation.

Learning Outcomes

Title
Civil Engineering Design

Learning Outcome
Formulate solutions and designs for complex civil engineering problems.

Title
Consider Constraints

Learning Outcome
Integrate topics from multiple civil engineering disciplines while considering realistic constraints.

Title
Team Work

Learning Outcome
Work effectively in a team environment including planning, meeting, managing, designing, writing, and presenting.

Title
Communication

Learning Outcome
Communicate effectively through professional documents and presentations.

Title
Ethics

Learning Outcome
Prepare for ethical and successful professional employment.

CE 494R - Special Topics in Civil Engineering

Course Information

Course Number
494R

Teaching Area
CE

Course Title
Special Topics in Civil Engineering

Course Description
Directed studies in Civil and Construction Engineering related to professional practice.

Department
Civil and Construction Engineering

When Taught
All Semesters/Terms

Credit Hours

Min:
1

Fixed/Max:
3

Learning Outcomes

Title
Special Topics

Learning Outcome
Students in the course will learn topics outside the standard curriculum that allows the student to broaden their education as it relates to Civil Engineering.

CE 495R - Global Engineering Outreach Projects

Course Information

Teaching Area (new)
CE

Course Number
495R

Teaching Area
CE

Course Title
Global Engineering Outreach Projects

Course Description
Humanitarian-based engineering and technology project development involving multi-disciplinary teams.

Department
Civil and Construction Engineering

When Taught
Fall and Winter

Credit Hours

Min:
0.5

Fixed/Max:
3

Other Prerequisites
Engineering or technology major enrolled in upper-division major courses; instructor's consent.

CE 498R - Directed Studies in Civil Engineering

Course Information

Teaching Area (new)
CE

Structures

Learning Outcome
Students will be able to analyze one-dimensional structures (e.g. rods, beams), two-dimensional structures (e.g. grids, membranes, plates, planar trusses and frames), and three-dimensional structures (e.g. space trusses and frames).

Title
Geometric nonlinearity

Learning Outcome
Students will be able to capture small and large displacements, account for flexural and shear deformations, second-order effects, and geometric imperfections.

Title
Material nonlinearity

Learning Outcome
Students will be able to simulate small and large strain response of materials (e.g. steel, concrete), the nonlinear response of connections (e.g. panel zones, dowel-type connections), and know how to use concentrated (phenomenological) and distributed (fiber) plasticity models.

Title
Applications

Learning Outcome
Students will be able to run nonlinear static (pushover) analyses and nonlinear dynamic (response history) analyses of lateral force resisting systems in buildings.

CE 505 - Portland Cement Concrete Mixture Design and Analysis

Course Information

Teaching Area (new)
CE

Course Number
505

Teaching Area
CE

Course Title
Portland Cement Concrete Mixture Design and Analysis

Course Description
Properties and testing of freshly mixed and hardened concrete and constituent materials; concrete mixture design and analysis; concrete construction practices; laboratory experimentation.

Department
Civil and Construction Engineering

When Taught

CE 507 - (CE - Me En) Linear Finite Element Methods

Course Information

Teaching Area (new)
CE

Course Number
507

Teaching Area
CE

Course Title
(CE - Me En) Linear Finite Element Methods

Course Description
Linear static finite element analysis of elastic solids; problem formulation, finite element discretization, and equation solving; stability, interpolation theory, and error estimates. Introduction to underlying continuum mechanics principles. Isogeometric analysis as a generalization of classical finite element analysis; basic principles of analysis-suitable computational geometry. Introduction to the industrial practice of finite element modeling leveraging commercial packages. Topics include CAD preprocessing, an overview of the mesh generation process and simulation model setup, and how to effectively use appropriate solution strategies for a given problem. Application domains include strength and durability, vibrations, transient structural dynamics, and multi-physics problems.

Prerequisite

Complete ALL of the following Courses:
- CE 321 - Structural Analysis

Learning Outcomes

Title
Risk analysis

Learning Outcome
Students will be able to calculate structural reliability using a probabilistic risk analysis.

Title
Design dead and live loads

Learning Outcome
Students will be able to calculate design dead loads and live loads. Students will be able to apply live load reduction.

Title
Snow loads

Learning Outcome
Students will be able to determine the ground snow load. Students will be able to calculate the flat roof snow load and account for drifting and aerodynamic shade.

Title
Wind and tornado loads

Learning Outcome
Students will know the difference between straight-line wind and tornadic wind. Students will be able to determine basic wind speed and calculate the design pressures for both the main wind force resisting system and components and cladding loads. They will understand the basis for and be able to determine tornado loads.

Title
Seismic loads

Learning Outcome
Students will be able to determine mapped spectral accelerations used in design. Students will be able to determine the response modification factor, deflection amplification factor, and system overstrength factor. Students will be able to calculate seismic base shear, seismic story forces, and diaphragm design forces.

CE 521 - Seismic Design of Steel Buildings

Course Information

Teaching Area (new)
CE

Course Number
521

Teaching Area
CE

Course Title
Seismic Design of Steel Buildings

Course Description
Background and development of AISC specification, AISC seismic provisions, and relevant provisions in ASCE 7: design of steel braced frames and steel moment resisting frames; design of diaphragms and collectors; design of steel buildings.

Learning Outcomes

Title
Materials

Learning Outcome
Students will understand structural concrete theory.

Title
Flexure

Learning Outcome
a. Students will be able to design prestressed concrete beams in flexure.

Title
Shear

Learning Outcome
a. Students will be able to design prestressed concrete beams in shear.

Title
Prestress Losses

Learning Outcome
a. Students will be able to estimate prestress losses and understand their effects.

Title
End Zone Reinforcement

Learning Outcome
a. Students will be able to design end zone reinforcement and correctly predict transfer of stresses between strand and concrete.

CE 525 - Bridge Structures

Course Information

Teaching Area (new)
CE

Course Number
525

Teaching Area
CE

Course Title
Bridge Structures

Course Description
Design of composite, continuous beam, and girder bridges, including piers, abutments, floor systems, and bearings; field trips to observe bridge construction and fabrication.

Learning Outcomes

Title
Applied Hydrology

Learning Outcome
Apply fundamental principles of hydrology in hydrologic and hydraulic models.

Title
Model Formulation

Learning Outcome
Know how to apply different hydrologic modeling formulation to solve design and analysis problems.

Title
Data Resources

Learning Outcome
Know where to find digital and other data resources required for hydrologic model development.

Title
Modeling Limitations

Learning Outcome
Understand the limitations and uses of traditional lumped parameter models as well as more advanced physics based models.

Title
Communicating Model Results

Learning Outcome
Interpret and describe hydrologic modeling results in written reports.

Title
Teamwork

Learning Outcome
Work together with teammates to develop hydrologic models.

Title
Modern Hydrologic Modeling Tools

CE532 - Urban Water Infrastructure

Course Information

Course Number
532

Teaching Area
CE

Course Title
Urban Water Infrastructure

Course Description
Purposes and features of municipal drinking water, wastewater, irrigation, and storm water systems. Analysis of their capacity and demand. Overview of their planning, design, construction, and operation.

Learning Outcomes

Title
Purposes and Features

Learning Outcome
Describe the purposes and features of municipal drinking water, wastewater, stormwater, and irrigation systems.

Title
Capacity and Demand

Learning Outcome
Analyze the capacity and demand of these systems relative to a defined level of service.

Title
Alternatives

Learning Outcome
Evaluate and recommend capital, operational, and policy alternatives to resolve performance deficiencies.

Title
Participants

Learning Outcome
Describe the roles of participants from the private, public, and academic sectors in supporting water infrastructure.

CE 533 - Advanced Hydraulic Routing

Course Information

Teaching Area (new)
CE

Course Number
533

Teaching Area
CE

Course Title
Advanced Hydraulic Routing

Course Description
Study of the equations of motion governing unsteady, two-dimensional water flow in open channels; computer solutions of the equations.

- CE 414 - Engineering Applications of GIS
  AND CE 331 - Hydrology

Learning Outcomes

Title
Data Life Cycle

Learning Outcome
Be able to describe the data life cycle.

Title
Dimensionality of a dataset

Learning Outcome
Be able to determine the dimensionality of a dataset, including the scale triplet of support, spacing extent for both space and time.

Title
Data Sharing

Learning Outcome
Be able to generate metadata and describe datasets to support data sharing.

Title
Data Discovery

Learning Outcome
Know how to discover and access data from major data sources.

Title
Common Data Models

Learning Outcome
Know how to store, retrieve, and use data from common data models used in Hydrology.

Title
Develop Data Models

Learning Outcome
Be able to develop data models to represent, organize, and store data.

Title
Relational Databases

Learning Outcome
Design and use relational databases to organize, store, and manipulate data.

Title
Software Systems

Learning Outcome
Know how to query, aggregate, and pivot data using Structured Query Language (SQL), Excel, R, and other software systems.

Title
Reproducible Data Visualizations

Learning Outcome
Know how to create reproducible data visualizations

Title
Computer Code

Learning Outcome
Be able to write and execute computer code to automate difficult and repetitive data related tasks.

Title
Manipulate and Transform Data

Learning Outcome
Know how to manipulate data and transform it across file systems, flat files, databases, programming languages, etc.

Title
Web Services Data

Learning Outcome
Know how to retrieve and use data from web services.

Title
Hydrology and Engineering Data

Learning Outcome
Be able to organize data in a variety of platforms and systems common in hydrology and engineering

Title
Water Quality Modeling

Learning Outcome
Prepare data to support hydrologic, water resources, and/or water quality modeling.

CE 535 - Hydraulic Design of Channels and Control Structures

Course Information

Teaching Area (new)
CE

Course Number
535

Teaching Area
CE

Course Title
Hydraulic Design of Channels and Control Structures

Course Description
Design of water conveyance channels and control structures, including siphons, chutes, weirs, flumes, dams, spillways, and outlet works.

Learning Outcomes

Title
Theory

Learning Outcome
Apply policy theories, including stages model and multiple streams, to water policy analysis. Recognize working assumptions for the five categories of policy tools.

Title
Water rights

Learning Outcome
Differentiate riparian and prior appropriation rights. Define the parameters that constitute a water right. Explain water marketing options.

Title
Water quality

Learning Outcome
Summarize the history and purposes of the U.S. Clean Water Act, determine what waters are under its authority, and explain how it is administered today.

Title
Drinking water

Learning Outcome
Summarize the history and purposes of the U.S. Safe Drinking Water Act, determine what systems are under its authority, and explain how it is administered today.

Title
Water rates

Learning Outcome
Compute water bills with multiple rate structures. Analyze effectiveness of conservation rates based on customer equity, revenue maintenance, and water savings.

CE 540 - Geo-Environmental Engineering

Course Information

Teaching Area (new)
CE

Course Number
540

Teaching Area
CE

Course Title
Geo-Environmental Engineering

Course Description
Hazardous waste statutes and regulations; introduction to hazardous waste treatment, storage, disposal, and monitoring techniques. Geotechnical aspects of environmental engineering. Topics include municipal and hazardous solid waste landfill design and characterization and remediation techniques for contaminated soil and groundwater.

Department
Civil and Construction Engineering

Learning Outcomes

Title
Darcy's Law

Learning Outcome
Be able to apply Darcy's law to solve basic problems related to flow through porous media.

Title
Groundwater Flow

Learning Outcome
Understand the governing equations for 2D and 3D groundwater flow, including what simplifying assumptions are used in the derivation of the equations.

Title
Flow Nets

Learning Outcome
Be able to create and interpret graphical solutions (flow nets) to the governing equations.

Title
Well Equations

Learning Outcome
Be able to apply analytical solutions to the governing equations, including well equations.

Title
Construction Dewatering

Learning Outcome
Be able to apply analytical solutions to construction dewatering problems.

Title
Finite Difference Analysis

Learning Outcome
Understand the finite difference solution and be able to create finite difference solutions in Excel.

Title
Finite Element Equations

Learning Outcome
Understand how the finite element method works and how the finite element equations are formulated.

Title
Software Application

Learning Outcome
Be able to apply finite element software to solve complex seepage analysis problems.

Title
Limit Equilibrium Method

Learning Outcome
Understand the basic concepts of the limit equilibrium method of slope stability.

Title
Slope Stability Application

Learning Outcome
Be able to apply slope stability charts for simple problems.

Title
Slope Stability Software Application

Learning Outcome
Be able to apply slope stability software (such as UTEXAS) for common slope stablility problems.

Title
Special Case Analysis

Learning Outcome
Be able to solve special cases of slope stability including, reinforced slopes, rapid drawdown, and seismic conditions.

CE 545 - Geotechnical Analysis of Earthquake Phenomena

Course Information

Teaching Area (new)
CE

Course Number
545

Teaching Area
CE

Course Title
Geotechnical Analysis of Earthquake Phenomena

Course Description
Earthquake magnitude and intensity; design ground motions, elementary dynamics of structures; response spectra; building code provisions; liquefaction and ground failure.

Department
Civil and Construction Engineering

When Taught
Winter.

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Simple Requisites

Prerequisites

Type
Prerequisite

Prerequisites

Complete ALL of the following Courses:

- CE 341 - Elementary Soil Mechanics

Other Prerequisites
or equivalents.

Learning Outcomes

Title
Understand Earthquakes

Learning Outcome
Understand the origin of earthquakes and the nature of seismic waves; characterize faults and seismic sources; quantify the "size" of an earthquake in terms of magnitude and intensity; quantify earthquake ground motions in terms of engineering parameters.

Title
Attenuation Relationships

Learning Outcome
Use attenuation relationships to predict ground motions; perform deterministic and probabilistic seismic hazard analyses

Title
Dynamic Response SDOF Structures

Learning Outcome
Determine the dynamic response of single-degree-of-freedom structures subject to base shaking; understand, develop and apply response spectra

Title
Site Response Analysis

Learning Outcome
Perform site response analyses; understand the effect of different soil types on ground response and damping

Title
Seismic Codes

Learning Outcome
Understand the philosophy and general seismic design provisions found in design codes developed/distributed as part of the National Earthquake Hazard Reduction Program (NEHRP) and the International Building Code (IBC)

Title
Liquefaction and Ground Failure

Learning Outcome
Understand the mechanism associated with liquefaction and ground failure; perform liquefaction triggering, lateral spread, and settlement analyses.

Title
Seismic Slope Stability

Learning Outcome
Evaluate seismic slope stability and deformation; estimate seismic earth pressures

CE 547 - Groundwater Modeling

Course Information

Teaching Area (new)
CE

Course Number
547

Teaching Area
CE

Course Title
Groundwater Modeling

Course Description
Computer simulation of groundwater flow systems; modeling theory, numerical methods, data management, boundary conditions, calibration, and stochastic analysis.

Department
Civil and Construction Engineering

When Taught
Fall.

Credit Hours

Min:
3

Fixed/Max:

Learning Outcomes

Title
Darcy's Law

Learning Outcome
Be able to apply Darcy's law to solve basic problems related to flow through porous media.

Title
Groundwater Flow Equations

Learning Outcome
Understand the governing equations for 2D and 3D groundwater flow, including what simplifying assumptions are used in the derivation of the equations.

Title
Conceptual Modeling

Learning Outcome
Be able to develop conceptual models of groundwater flow systems, including properly formulated boundary conditions.

Title
MODFLOW Background

Learning Outcome
Understand the basic structure and organization of the MODFLOW model.

Title
MODFLOW Input

Learning Outcome
Be able to select the appropriate MODFLOW packages for a particular problem and develop the package input.

Title
MODFLOW Problem Solving

Learning Outcome
Understand issues related to MODFLOW solvers and be able to solve common instability issues.

Title
MODFLOW GIS Application

Learning Outcome
Be able to apply GIS data to develop regional groundwater simulations with MODFLOW.

Title
Model Calibration

Learning Outcome
Be able to calibrate groundwater models using both manual approaches and automated tools such as the PEST code.

Title
Flow Direction Analysis

Learning Outcome
Be able to analyze flow directions using particle tracking.

Title
Stochastic Simulation

Learning Outcome
Be able to perform stochastic simulations and analyze uncertainty.

Title
Transient Simulation

Learning Outcome
Be able to perform transient simulations.

Title
Groundwater in ArcGIS

Learning Outcome
Be able to do basic groundwater analysis tasks in ArcGIS.

CE 553 - Mechanical Behavior of Materials

Course Information

Teaching Area (new)
CE

Course Number
553

Teaching Area
CE

Course Title
Mechanical Behavior of Materials

Course Description
Engineering methods for modeling deformation, fracture and fatigue of materials, including metals, polymers, composites and ceramics. Deformation modes include elastic, plastic, viscoelastic and creep.

Department
Civil and Construction Engineering

When Taught
Winter

Credit Hours

Prerequisites

Type
Prerequisite

Prerequisites

Complete ALL of the following Courses:

- CE 351 - Introduction to Environmental Engineering
  AND CE 361 - Transportation Engineering

Learning Outcomes

Title
Climate change and air pollution science

Learning Outcome
Understand transportation's contribution to climate change and urban air pollution.

Title
System tools

Learning Outcome
Use system tools to estimate climate and air quality impacts of transportation.

Title
Vehicle energy demand

Learning Outcome
Calculate energy demand from vehicles using the road-load equation.

Title
Vehicle emission control

Learning Outcome
Understand formation of vehicle emissions and emission control technologies.

Title
Vehicle emission models

Learning Outcome
Estimate vehicle emissions using EPA's MOVES model.

Title
Emissions data

Learning Outcome
Understand and analyze real-world vehicle emissions data.

Title
Life-cycle analysis

Learning Outcome
Conduct a life-cycle emissions analysis.

Title
Policies and regulations

Learning Outcome
Understand climate, air quality and transportation policies and regulations in the United States.

Title
Research

Learning Outcome
Conduct a research project that addresses a question regarding transportation's impact on air quality and/or climate change.

CE 562 - Traffic Engineering: Characteristics and Operations

Course Information

Teaching Area (new)
CE

Course Number
562

Teaching Area
CE

Course Title
Traffic Engineering: Characteristics and Operations

Course Description
Traffic stream characteristics, traffic flow theory, traffic control devices, capacity and level of service, warrants, signal timing and optimization, signal coordination.

Department
Civil and Construction Engineering

When Taught
Fall

Credit Hours

Min:

Prerequisites

Complete ALL of the following Courses:

- CE 361 - Transportation Engineering

Other Prerequisites
or instructor's consent.

Learning Outcomes

Title
Analysis software

Learning Outcome
Analyze and interpret travel behavior data using summary statistics, graphics, and statistical models constructed in open-source, script-based software.

Title
Travel demand models

Learning Outcome
Develop and calibrate the functional steps of a trip-based travel demand model including inputs, common mathematical forms, and outputs.

Title
Planning analysis

Learning Outcome
Apply travel demand models to evaluate transportation plans and policies. Calculate benefits to individuals and households in terms of access to opportunity, choice utility, and travel time savings.

Title
Planning discussions

Learning Outcome
Discuss relevant transportation planning concepts in the context of legal, institutional, and funding frameworks.

CE 566 - Pavement Management

Course Information

Teaching Area (new)
CE

Course Number
566

Teaching Area

OR

Prerequisite

Complete ALL of the following Courses:

- CCE 270 - Computational Methods
  AND STAT 201 - Statistics for Engineers and Scientists

Other Prerequisites
Recommended concurrent enrollment: STAT 511

Learning Outcomes

Title
R programming language

Learning Outcome
Read, manipulate, plot, summarize, and analyze data in R.

Title
Statistical analysis

Learning Outcome
Apply statistical methods to infer significant relationships, including t-tests, linear regression, and non-parametric methods.

Title
Data prediction

Learning Outcome
Develop robust predictive models that do not over-fit sample data, including generalized additive models and regression trees.

Title
Application

Learning Outcome
Analyze a dataset and present your results a report with embedded R code that contains text, plots, and numerical results.

CE 575 - (CE - Me En) Optimization Techniques in Engineering

- CEBU 102 - First-Year Language Study: Cebuano

Note
Teacher may waive prerequisite based on prior experience.

Learning Outcomes

Title
Elaboration

Tags
196858, 1

Learning Outcome
Create structurally-accurate, elaborated utterances and begin to group utterances into paragraphs and narratives. Do this in present, past and future time.

Title
Vocabulary

Tags
196861, 2

Learning Outcome
Broaden vocabulary for both reception (listening and reading comprehension) and production (speaking and writing).

Title
Grammar

Tags
196863, 3

Learning Outcome
Review and increase understanding of basic language structures.

Title
Culture

Tags
196864, 4

Learning Outcome
Discuss in the target language common products and practices related to every-day life in the target culture.

CEBU 202 - Second-Year Language Study: Cebuano

Prerequisite

Prerequisites

Complete ALL of the following Courses:

- CEBU 201 - Second-Year Language Study: Cebuano

Note
Teacher may waive prerequisite based on prior experience. Culminating course for GE Languages of Learning requirement. Not an entry course for returned missionaries.

Learning Outcomes

Title
Communication Skills

Tags
196850, 1

Learning Outcome
In both written and spoken target language, communicate with reasonable accuracy about real-world activities with well-educated members of the target-culture accustomed to dealing with non-native speakers.

Title
Comprehension

Tags
196851, 2

Learning Outcome
Understand every-day written and verbal instructions. Comprehend concrete details and global meaning of intermediate-level written and spoken passages related to familiar topics that native speakers encounter routinely in their daily life.

Title
Cultural Knowledge

Tags
196853, 3

Learning Outcome
Discuss in the target language cultural practices related to every-day life in the target culture. Acquire basic background knowledge of important achievements related to the target culture (historical figures and events, major literary and artistic movements, government and religious institutions, etc.).

Title
General Education Requirements

Tags
196855, 4

Learning Outcome
Complete Languages of Learning and Global & Cultural Awareness for General Education.

CEBU 305 - Language Skills Development: Cebuano

CEBU

Course Number
305

Teaching Area
CEBU

Course Title
Language Skills Development: Cebuano

Course Description
Increasing proficiency in one or more of the following Cebuano language and culture skills: speaking, listening, reading, writing, cultural awareness.

Department
Language Studies

When Taught
Contact Department

Credit Hours

Min:
1

Fixed/Max:
4

Other Prerequisites
Instructor's consent.

Learning Outcomes

Title
Defined Special Purpose

Tags
196846, 1

Learning Outcome
Develop the overall language and cultural competence to meet the needs of a "special" purpose identified by the Center for Language Studies.

Title
Communication

Tags
196847, 2

Learning Outcome
Communicate effectively enough to function in a variety of situations likely to be encountered when dealing with native speakers associated with the special purpose. This may include interpersonal, interpretive, and presentational (written and oral) modes of communication.

Title
Cultural Competence

Tags
196848, 3

Learning Outcome
Interact with cultural competence and understanding when dealing with native speakers associated with the special purpose.

CEBU 321 - Advanced Grammar: Cebuano

Course Information

Teaching Area (new)
CEBU

Course Number
321

Teaching Area
CEBU

Course Title
Advanced Grammar: Cebuano

Course Description
Advance your Cebuano through interactive grammar and syntax review. Engage in readings, discussions, and real-world tasks to build confidence and accuracy. Fulfills the language component of the Language Certificate.

Department
Language Studies

When Taught
Contact Department

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Learning Outcomes

Title
Analyze

Tags
196840, 1

Learning Outcome
Analyze target language morphology and syntax.

Title
Apply

Tags
196843, 2

Learning Outcome
Apply grammar rules with accuracy to a variety of advanced grammatical and communicative tasks.

Title
Independent Learning

Tags
196844, 3

Learning Outcome
Function as independent learners of the target language by using proper terms and appropriate resources for language analysis.

CEBU 330 - Advanced Language Proficiency Through Cultural Studies: Cebuano

Cebu 202 or equivalent.

Note
Entry course for returned missionaries or others of equivalent language experience. Required course for obtaining language credit by examination. May fulfill the GE Languages of Learning requirement.

Learning Outcomes

Title
Communication Skills

Tags
196833, 1

Learning Outcome
In both written and spoken target language, communicate accurately with well-educated members of the target-culture about real-world activities.

Title
Comprehension

Tags
196834, 2

Learning Outcome
Understand detailed written and verbal instructions. Comprehend historical passages, newspaper and magazine articles, and broadcast news reports well educated native speakers encounter routinely in their daily life.

Title
Cultural Knowledge

Tags
196836, 3

Learning Outcome
Acquire background knowledge of important achievements related to the target culture (historical figures and events, major literary and artistic movements, government and religious institutions, etc.). Discuss in the target language cultural practices related to major life events in the target culture (birth, marriage, death, etc.).

Title
General Education Requirements

Tags
196838, 4

Note
Teacher may waive prerequisite based on prior experience.

Learning Outcomes

Title
Recognize and Analyze

Tags
196828, 1

Learning Outcome
Recognize and analyze the most important genres in target-language literature.

Title
Key Characteristics

Tags
196829, 2

Learning Outcome
Identify and discuss key characteristics of the most important literary movements in the target culture.

Title
Context

Tags
196830, 3

Learning Outcome
Place literature in a meaningful cultural and historical context.

Title
Language Skills

Tags
196831, 4

Learning Outcome
Improve target-language reading, writing, and speaking skills.

CEBU 350 - Advanced Language Study for Career Purposes: Cebuano

Complete ALL of the following Courses:

- CEBU 330 - Advanced Language Proficiency Through Cultural Studies: Cebuano

Learning Outcomes

Title
Defined Career Purposes

Tags
196821, 1

Learning Outcome
Develop overall language and cultural competence needed to study and begin entry into a career agreed upon by the Center for Language Studies.

Title
Knowledge

Tags
196822, 2

Learning Outcome
Carry out research to identify, understand, and discuss standards, processes, people and cultural norms associated with the target career.

Title
Interpretive Competence

Tags
196823, 3

Learning Outcome
Understand, interpret and analyze advanced-level written and oral texts on topics related to the target career.

Title
Communicative Competence

Tags
196824, 4

Learning Outcome
Understand, interpret and analyze advanced-level written and oral texts on topics related to the target career.

Title
Communicative Competence

Tags
196825, 5

Learning Outcome
Communicate effectively at the advanced-level in order to function in a variety of situations likely to be encountered when dealing with native speakers who are associated with the target career. This will include interpersonal communication and both written and oral presentational communication.

Title
Cultural Competence

Tags
196827, 6

Learning Outcome
Interact with cultural competence and understanding when dealing with native speakers who are associated with the target career.

CELL 120 - Science of Biology

Course Information

Teaching Area (new)
CELL

Course Number
120

Teaching Area
CELL

Course Title
Science of Biology

Course Description
General biology course designed for biological science majors, emphasizing the scientific method, cell theory, biochemical unity, the central dogma, bioenergetics, reproduction, and evolutionary theory. Examples of these biological principles will focus on whole organism biology such as physiology, neuroscience, and developmental biology examples.

Department
Cell Biology and Physiology

When Taught
Fall, Winter, Spring

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Note
Additional seats for specific sections may be available to Freshman Mentoring participants through envelopes. NOTE: Also offered by BYU Independent Study; enroll anytime throughout year; one year to complete; additional tuition required; register at is.byu.edu.

Learning Outcomes

Title
Scientific Method

Tags
202565, 0, 0, 2021-06-02 13:21:53

Learning Outcome
Understand and be able to use the scientific method: 1. Think critically about the purposes and objectives of scientific studies and data. 2. Become observant of and curious about patterns and processes in living things. 3. Ask essential, specific, answerable questions about observations. 4. Form hypotheses about biological patterns and processes that are testable.

Title
Foundational Concepts

Tags
202648, 0, 0, 2021-06-02 13:21:53

Learning Outcome
Understand well the following foundational concepts: 1. Cell theory and biological compartments 2. Chemistry of life (biochemical unity, central dogma) 3. Bioenergetics (biotransformation of energy) 4. Reproduction (fission, mitosis, meiosis) 5. Evolutionary theory

CELL 205 - Human Biology

- CELL 220 - Human Anatomy (with lab)

Note
NOTE: Course should be taken during a student's second or third year and before courses in physiology and developmental biology. NOTE: Students must register for a both a lecture section and a lab section.

CELL 349R - Cell Biology and Physiology Teaching Experience

Course Information

Teaching Area (new)
CELL

Course Number
349R

Teaching Area
CELL

Course Title
Cell Biology and Physiology Teaching Experience

Course Description
Undergraduate student lecture or laboratory teaching assistantship, or other activities that provide students hands-on curriculum design, teaching, and mentoring experiences.

Department
Cell Biology and Physiology

When Taught
All Semesters/Terms

Credit Hours

Min:
1

Fixed/Max:
3

Other Prerequisites
For TA experience, have earned a B or above in the specific Cell Biology and Physiology course; instructor's consent.

Learning Outcomes

Title
Teaching Experience

Tags
211379, 0, 1, 2021-09-05 08:38:20

Learning Outcome
Students will demonstrate content mastery and communication skills in teaching course material to other students.

Title
Mentoring Relationship

Tags
211380, 0, 2, 2021-09-05 08:38:20

Learning Outcome
Students will develop a close professional relationship with the course instructor.

Title
Constructive Feedback

Tags
211381, 0, 3, 2021-09-05 08:38:20

Learning Outcome
Students will respond to constructive feedback from students and the faculty mentor.

CELL 360 - Cell Biology

Course Information

Teaching Area (new)
CELL

Course Number
360

Teaching Area
CELL

Course Title
Cell Biology

Course Description
Fundamentals of cell structure and function with reference to analytical methods used by cell biologists. Practice in designing, executing, and interpreting relative experiments.

Department
Cell Biology and Physiology

When Taught
Fall, Winter, Spring

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
1

Simple Requisites

Prerequisites

Type
Prerequisite

Prerequisites

Fulfill ANY of the following requirements:

Prerequisites

Complete ALL of the following Courses:
- MMBIO 240 - Molecular Biology

OR

Prerequisites

Complete ALL of the following Courses:
- CHEM 381 - Fundamentals of Biochemistry

OR

Prerequisites

Complete ALL of the following Courses:
- CHEM 481 - Biochemistry.

CELL 362 - Advanced Physiology

Course Information

Teaching Area (new)
CELL

Course Number
362

Teaching Area
CELL

Course Title
Advanced Physiology

Course Description
Integrated approach to organ system and cellular physiology. Problem solving/ calculations.

Department
Cell Biology and Physiology

When Taught
Fall, Winter, Spring

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Prerequisites

Complete ALL of the following Courses:
- CHEM 481 - Biochemistry.

OR

Prerequisites

Complete ALL of the following Courses:
- CHEM 381 - Fundamentals of Biochemistry

Recommended
Phscs 106 or Phscs 220

Note
Requires background in chemistry and molecular biology. Students without this background should take CELL 305. CELL 362 does NOT include a laboratory experience. Student's needing a physiology lab experience should enroll in CELL 363 (Advanced Physiology Laboratory) in addition to CELL 362.

CELL 363 - Advanced Physiology Laboratory

Course Information

Teaching Area (new)
CELL

Course Number
363

Teaching Area
CELL

Course Title
Advanced Physiology Laboratory

Course Description
Experiments and exercises emphasizing problem solving and calculations in human physiology.

Department
Cell Biology and Physiology

When Taught
Fall, Winter, Spring

Credit Hours

Min:
1

Fixed/Max:
1

Lecture Hours

Fixed:
0

Lab Hours

Fixed:
3

Other Prerequisites
CELL 305; or CELL 362 or concurrent enrollment; or instructor's consent.

CELL 365 - Pathophysiology

Course Information

Teaching Area (new)
CELL

Course Number
365

Teaching Area
CELL

Course Title
Pathophysiology

Course Description
Variations in physiological mechanisms that account for development of common disturbances in normal control and activities of body's organs and organ systems.

Department
Cell Biology and Physiology

When Taught
Fall, Winter, Spring

Credit Hours

Min:
4

Fixed/Max:
4

Lecture Hours

CELL 399R - Academic Internship: Cell Biology and Physiology

Course Information

Teaching Area (new)
CELL

Course Number
399R

Teaching Area
CELL

Course Title
Academic Internship: Cell Biology and Physiology

Course Description
On-the-job experience in off-campus laboratories with a focus related to cell biology or physiology.

Department
Cell Biology and Physiology

When Taught
All Semesters/Terms

Credit Hours

Min:
1

Fixed/Max:
9

Other Prerequisites
Consent of internship coordinator.

Note
An APPROVED Internship Application is required before adding.

Learning Outcomes

Title
Research Proficiency

Tags
202514, 0, 1, 2021-09-05 08:38:41

Learning Outcome
Students will demonstrate research proficiency.

Title
Research Experience

Tags
202610, 0, 1, 2021-09-05 08:38:41

Learning Outcome
Students will demonstrate that they have learned how to establish a research experience with an extramural provider.

CELL 444 - BIO-Innovation and -Entrepreneurship 1

Course Information

Teaching Area (new)
CELL

Course Number
444

Teaching Area
CELL

Course Title
BIO-Innovation and -Entrepreneurship 1

Course Description
Students work as a team of consultants for external client life sciences tech companies. Students will develop the materials, strategy, organization, and rationale for successfully attracting investor capital to that business. At the end of the semester, students will know how create and grow a business around an existing foundation technology.

Department
Cell Biology and Physiology

When Taught
Fall

Credit Hours

Min:
2

Fixed/Max:
2

Lecture Hours

CELL 450R - Readings and Discussion in Cell Biology and Physiology

Course Information

Teaching Area (new)
CELL

Course Number
450R

Teaching Area
CELL

Course Title
Readings and Discussion in Cell Biology and Physiology

Course Description
Close interaction between small groups of students and instructor on topics in cell biology and physiology. Topics vary.

Department
Cell Biology and Physiology

When Taught
Contact Department

Credit Hours

Min:
1

Fixed/Max:
2

Learning Outcomes

Title
Literature Evaluation

Tags
211382, 0, 1, 2021-09-05 08:38:56

Learning Outcome
Students will develop skills in reading, evaluating, and critiquing current scientific papers.

Title
Communication Skills

Tags
211383, 0, 2, 2021-09-05 08:38:56

Learning Outcome
Students will develop interpersonal skills in scientific communication by working closely with department faculty and graduate students, and presenting information in small group settings.

Title
Experimental Application

Tags
211384, 0, 3, 2021-09-05 08:38:56

Learning Outcome
Students will learn how to design experiments to address important scientific questions in their fields of interest.

CELL 455R - Cell Biology and Physiology Seminar

Course Information

Teaching Area (new)
CELL

Course Number
455R

Teaching Area
CELL

Course Title
Cell Biology and Physiology Seminar

Course Description
Seminar (research) presentations for undergraduates in cell biology and physiology.

Department
Cell Biology and Physiology

When Taught
Fall and Winter

Credit Hours

Min:
0.5

Fixed/Max:
0.5

Lecture Hours

Fixed:

Lab Hours

Fixed:
0

Learning Outcomes

Title
Scientific Seminar Presentation

Tags
202527, 0, 1, 2021-09-05 08:39:12

Learning Outcome
Students will be able to demonstrate the format, organization, and presentation of a typical scientific seminar.

Title
Scientific Etiquette

Tags
202591, 0, 1, 2021-09-05 08:39:12

Learning Outcome
Students will demonstrate the proper etiquette of scientific interactions by participating in question/answer periods following each seminar.

CELL 484 - Human Embryology

Course Information

Teaching Area (new)
CELL

Course Number
484

Teaching Area
CELL

Course Title
Human Embryology

Course Description
Developmental milestones of prenatal life: etiology of congenital malformations, emphasizing molecular and cellular changes and their functional consequences.

Department
Cell Biology and Physiology

When Taught
Fall

Credit Hours

Min:
3

Fixed/Max:
3

Prerequisite

Complete ALL of the following Courses:

- CELL 295R - Introductory Undergraduate Research in Cell Biology and Physiology

Learning Outcomes

Title
Experiment Design

Tags
202589, 0, 1, 2021-09-05 08:39:35

Learning Outcome
Students will demonstrate an understanding of hypothesis development and the design of experiments to test hypothesis.

Title
Independent Experiments

Tags
202617, 0, 1, 2021-09-05 08:39:35

Learning Outcome
Students will independently carry out laboratory experiments.

Title
Data Analysis

Tags
202620, 0, 2, 2021-09-05 08:39:35

Learning Outcome
Students will analyze experimental data and, where appropriate, perform statistical analysis.

CELL 498 - Advanced Senior Research Project

Course Information

Teaching Area (new)
CELL

Course Number
498

Teaching Area
CELL

Course Title
Advanced Senior Research Project

Course Description
Special project course for advanced Cell Biology and Physiology research students. Engaging in scientific research as specified in an approved research proposal. Comprehensive written work of research required.

Department
Cell Biology and Physiology

When Taught
Contact Department

Credit Hours

Min:
3

Fixed/Max:
3

Other Prerequisites
Instructor's consent must be obtained during previous semester.

CELL 520R - Advanced Topics in Clinical Human Anatomy

Course Information

Teaching Area (new)
CELL

Course Number
520R

Teaching Area
CELL

Course Title
Advanced Topics in Clinical Human Anatomy

Course Description
Applied clinical anatomy lectures and lab exercises.

Complete ALL of the following Courses:

- CELL 220 - Human Anatomy (with lab)

Other Prerequisites
Or equivalent.

Learning Outcomes

Title
Foundational Knowledge of Anatomy

Tags
211385, 0, 1, 2021-09-05 08:40:02

Learning Outcome
Students will describe the structures and explain the functional relationships of the course-specific systems.

Title
Application and Integration of Anatomic Knowledge

Tags
211386, 0, 2, 2021-09-05 08:40:02

Learning Outcome
Students will translate their basic science knowledge of the course-specific systems toward analyzing and solving clinical cases

Title
Learning How to Learn

Tags
211387, 0, 3, 2021-09-05 08:40:02

Learning Outcome
Students will use the essential skills of literature search and critique, case study evaluation, and experimental method in anatomic problem solving.

CELL 550R - Advanced Topics in Cell Biology and Physiology

Course Information

Teaching Area (new)
CELL

Course Number
550R

Teaching Area
CELL

Course Title
Advanced Topics in Cell Biology and Physiology

Course Description
Advanced undergraduate or graduate-level course in topics relating to cell biology and physiology. Topics vary. 550R courses have a defined curriculum, including graded assignments and exams. Expectations and learning outcomes will be specified in the syllabus.

Department
Cell Biology and Physiology

When Taught
Contact Department

Credit Hours

Min:
1

Fixed/Max:
4

Other Prerequisites
Instructor's consent.

Learning Outcomes

Title
Advanced Understanding of Scientific Principles

Tags
211388, 0, 1, 2021-09-05 08:40:18

Learning Outcome
Students will demonstrate an advanced understanding of scientific principles, ideas, methods, techniques, and trends in modern cell biology and physiology.

Title
Critical Analysis of Scientific Literature

Tags
211389, 0, 2, 2021-09-05 08:40:18

Learning Outcome
Students will read, interpret, evaluate, and discuss cell biology and physiology research papers.

Title
Synthesis Project

Tags
211390, 0, 3, 2021-09-05 08:40:18

Learning Outcome
Students will produce a competent and clearly composed scientific synthesis project (review paper, research proposal, poster presentation, or oral presentation).

CELL 561 - Physiology of Drug Mechanisms

Course Information

Teaching Area (new)
CELL

Prerequisite

Type
Prerequisite

Prerequisites

Complete ANY of the following Courses:

- CELL 305 - Human Physiology
  OR CELL 362 - Advanced Physiology

Learning Outcomes

Title
Foundations of aging

Learning Outcome
Students will be able to identify and explain the foundational biological aspects of human aging.

Title
Cellular processes

Learning Outcome
Students will be able to explain the cellular aging process and how it contributes to the physiological and functional changes in old age.

Title
Disease and aging

Learning Outcome
Students will be able to describe the cause and progression of diseases related to human aging.

Title
Evaluate scientific literature

Learning Outcome
Students will be able to critically evaluate the current scientific literature on aging biology.

Title
Recommend lifestyle approaches

Learning Outcome
Students will be able to recommend lifestyle approaches to healthy aging by applying an understanding of the molecular basis of current therapeutic approaches to healthy aging.

CELL 582 - Developmental Genetics

Course Information

Teaching Area (new)
CELL

Course Number
582

Teaching Area

Learning Outcomes

Title
Know the Major

Tags
181389, 0, 1, 2021-04-30 14:20:49

Learning Outcome
Understand the scope of the CFM major.

Title
Construction Documents

Tags
181377, 0, 3, 2021-04-30 14:20:49

Learning Outcome
Read and understand construction documents (plans and specs).

Title
Modeling

Tags
181376, 0, 4, 2021-04-30 14:20:49

Learning Outcome
Understand the basics of Building Information Modeling (BIM).

Title
Mathematics

Tags
181390, 0, 5, 2021-04-30 14:20:49

Learning Outcome
Perform basic construction math.

Title
Projects

Learning Outcome
Understand the basic project processes of design, estimating, scheduling, and site selection.

CFM 120 - Methods 1 - Structural Systems

Course Information

Teaching Area (new)
CFM

Course Number
120

Teaching Area
CFM

Course Title
Methods 1 - Structural Systems

Course Description
Basics of structural components in buildings. The content of this course will help the students understand the importance of these components, and how they are installed in buildings. This brief component overview will look at the materials, processes, and applicable building code basics in buildings.

Department
Civil and Construction Engineering

When Taught
Fall and Winter

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
3

Fee
20

Learning Outcomes

Title
Structural Systems

Learning Outcome
IdentifIdentify and analyze various types of structural systems commonly used in construction, including their components and functions.

Title
Structural Integrity

Learning Outcome
Evaluate the structural integrity and stability of different building types and materials, considering factors such as gravity loads, lateral forces, and environmental impacts.

Title
Structural Loads

Learning Outcome
Describe the principles and theories underlying the behavior of structural systems under different loading conditions.

Title
Building Codes

Learning Outcome
Assess the impact of building codes, regulations, and standards on the design and construction of structural systems, ensuring compliance with legal and safety requirements.

Title
Design

Learning Outcome
Apply mathematical and computational techniques to analyze and design structural systems, considering factors such as material strength, stability, and safety.

CFM 199R - Technical Internship

Course Information

Teaching Area (new)
CFM

Course Number
199R

Teaching Area
CFM

Course Title
Technical Internship

Course Description
Cooperative education and related technical on-the-job work experience.

Department
Civil and Construction Engineering

When Taught
All Semesters/Terms

Credit Hours

Min:
1

Fixed/Max:
1

Lecture Hours

Fixed:
0

Lab Hours

Fixed:
0

Note
An APPROVED Internship Application is required before adding. Follow the Department Pre-registration Instructions prior to Internship Application

Learning Outcomes

Title
Application

Tags
181290, 0, 1

Learning Outcome
Gain facilities management experience by applying FM principles in a technical internship.

Title
Communication

Tags
181291, 0, 2

Learning Outcome
Demonstrate professional communication skills in a report.

Title
Reflection

Tags
181292, 0, 3

Learning Outcome
Use reflective thinking to convert professional experience into academic understanding.

CFM 210 - Fundamentals of Facility and Property Management

Course Information

Teaching Area (new)
CFM

Course Number
210

Teaching Area
CFM

Course Title
Fundamentals of Facility and Property Management

Course Description
Overview of the profession of facility and property managaement, including space regulations, finance, project management, and other current practices.

Department
Civil and Construction Engineering

When Taught
Fall and Winter

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Learning Outcomes

Title
Competencies

Tags
181293, 0, 1

Learning Outcome
Identify and explain the basic competencies of facility and property management, and FPM markets and associations.

Title
Space Planning

Tags
210953, 0, 2

Learning Outcome
Create a space plan from customer requirements.

Title
Systems

Tags
210954, 0, 3

Learning Outcome
Categorize the most common approaches to HVAC, plumbing, and fire systems.

Title
Contracts

Tags
210955, 0, 4

Learning Outcome
Contrast the structures of the three main service and outsourcing contracts.

Title
Scope Document

Tags
210956, 0, 5

Learning Outcome
Develop a scope document for the commonly required elements of operations and maintenance in an office building.

Title
Asset Register

Tags
210957, 0, 6

Learning Outcome
Create a capital asset register.

Title
Operating Budget

Learning Outcome
Develop a zero-based operating budget.

Title
Facility and Property Management

Learning Outcome
Contrast facility management and property management in terms of management and financial goals.

Title
Sustainability

Learning Outcome
Analyze sustainability trends and evaluate effective implementation in FM practice.

Title
Requirements

Learning Outcome
Distinguish between standards, codes, and laws.

CFM 220 - Methods 2 - Building Systems

Course Information

Teaching Area (new)
CFM

Course Number
220

Teaching Area
CFM

Course Title
Methods 2 - Building Systems

Course Description
Building Systems is an introduction to the electrical, plumbing, and HVAC systems in buildings. The content of this course will help the students understand how these systems operate and how they contribute to our personal comfort and productivity. This brief systems overview will look at the infrastructure that provides the public utility services we need and how we use those utilities in our buildings, including history, design, materials, equipment, fixtures, etc.

Department
Civil and Construction Engineering

When Taught
Fall and Winter

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
3

Learning Outcomes

Title
Building Systems Construction

Learning Outcome
Demonstrate knowledge of quality MEP construction processes associated with effectively managing the workforce and trade coordination.

Title
Building Systems Components

Learning Outcome
Identify and explain electrical, plumbing, mechanical, controls, and fire suppression components and their application in building systems.

Title
Standards and Codes

Learning Outcome
Interpret applicable standards and safety practices of the industry and apply codes to MEP installation.

Title
Testing and Inspection

Learning Outcome
Summarize testing and inspection requirements of building systems.

Title
Design

Learning Outcome
Design the critical building systems of a single-family home that meets code requirements.

CFM 291R - Undergraduate Seminar

Course Information

Teaching Area (new)
CFM

Course Number
291R

Teaching Area
CFM

Course Title
Undergraduate Seminar

Course Description
Topics or issues in Construction and Facilities Management are presented and discussed.

Department
Civil and Construction Engineering

When Taught
Fall and Winter

Credit Hours

Min:
0.5

Fixed/Max:
0.5

Lecture Hours

Fixed:
1

Lab Hours

Fixed:
0

Note
Required each semester for undergraduate majors who are not enrolled in 491R. School lecture series attendance required.

Learning Outcomes

Title
Industry Exposure

Tags
181414, 0, 1

Learning Outcome
Participate in industry seminars that discuss the skills needed and opportunities available in the construction industry.

Title
Relationships

Tags
181413, 0, 2

Learning Outcome
Develop relationships and camaraderie by partipating in Consruction Management activities.

Title
Service

Tags
181415, 0, 3

Learning Outcome
Develop responsibility to family, church, and community by serving others.

CFM 305 - Concrete, Masonry, and Asphalt Methods

Teaching Area (new)
CFM

Course Number
305

Teaching Area
CFM

Course Title
Concrete, Masonry, and Asphalt Methods

Course Description
Managing concrete, masonry, and asphalt construction including estimating, controls, quality, and safety.

Department
Civil and Construction Engineering

When Taught
Fall Term 1; Winter Term 1.

Credit Hours

Min:
1.5

Fixed/Max:
1.5

Lecture Hours

Fixed:
1

Lab Hours

Fixed:
2

Simple Requisites

Prerequisites

Type
Prerequisite

Prerequisites

Fulfill ANY of the following requirements:

Prerequisites

Complete ALL of the following Courses:

- CCE 203 - Engineering Mechanics--Mechanics of Materials **AND** STAT 121 - Introduction to Statistical Data Analysis

OR

Prerequisites

Complete ALL of the following Courses:

- CCE 203 - Engineering Mechanics--Mechanics of Materials **AND** STAT 201 - Statistics for Engineers and Scientists

CFM 311 - Estimating Processes

Course Information

Teaching Area (new)
CFM

Course Number
311

Teaching Area
CFM

Course Title
Estimating Processes

Course Description
The application of a basic understanding of construction materials and methods to effectively compile, organize, and analyze all items that influence and contribute to the total cost of construction projects. This includes maximizing estimating labor, materials, equipment, indirect costs, and subcontractor bidding processes effectively through software and computer integration.

Department
Civil and Construction Engineering

When Taught
Fall and Winter

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Simple Requisites

Prerequisites

Type
Prerequisite

Prerequisites

Complete ALL of the following Courses:

- CFM 105 - Fundamentals of Construction and Facilities Management
  AND CCE 270 - Computational Methods

Learning Outcomes

Title
Lifecycle

Learning Outcome
Synthesize data and information from various sources to understand basic life-cycle cost analysis.

Title
Ethics

Learning Outcome
Understand ethical dilemmas associated with estimating in the built environment.

Title
Drawings and Specifications

Learning Outcome
Analyze and interpret construction drawings and specifications as they pertain to quantity take-offs.

Title
Quality

Learning Outcome
Compare and contrast quality levels and pricing of various construction materials and methods.

Title
Technology

Learning Outcome
Utilize advanced technology applications to create accurate and organized estimates.

CFM 312 - Construction Scheduling and Cost Control

Course Information

Teaching Area (new)
CFM

Course Number
312

Teaching Area
CFM

Course Title
Construction Scheduling and Cost Control

Course Description
Planning, scheduling, and monitoring construction projects, including development and implementation of critical path networks, management controls, and reporting mechanisms. Modern scheduling software is also applied through a culminating portfolio project.

Department
Civil and Construction Engineering

When Taught
Fall and Winter

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Simple Requisites

Prerequisites

Type
Prerequisite

Prerequisites

Complete ALL of the following Courses:

- CFM 105 - Fundamentals of Construction and Facilities Management

Learning Outcomes

Title
Scheduling

Tags
181471, 0, 1

Learning Outcome
Construct, interpret, and assess Critical Path Method (CPM) schedules across diverse sectors demonstrating both technical proficiency and a commitment to ethical, effective project leadership.

Title
Resources

Tags
181469, 0, 3

Learning Outcome
Integrate resource management (labor, equipment, cost) into project schedules and perform resource analysis and leveling using industry best practices to ensure responsible stewardship of time and materials.

Title
Design

Tags
181470, 0, 4

Learning Outcome
Design, develop, and control residential, commercial, industrial, infrastructure, or engineering scheduling projects.

Title
Float + Risk

Tags
181467, 0, 5

Learning Outcome
Identify, classify, and utilize float types (total, free, shared, and independent) to optimize project performance and minimize risk throughout the life cycle of a project.

Title
Communication

Tags
181468, 0, 6

Learning Outcome
Develop and apply a variety of scheduling formats, including linear schedules, line of balance charts, bar charts, short interval plans, and network diagrams, to communicate time-based project data clearly and efficiently.

Title
Software

Learning Outcome
Effectively use industry-standard scheduling software tools to create, analyze, and revise construction schedules, cultivating technological fluency and a mindset of continual professional growth.

CFM 317R - ASC Competition

Course Information

Teaching Area (new)
CFM

Course Number
317R

Teaching Area
CFM

Course Title
ASC Competition

Course Description
A culminating experience, emphasizing the application of knowledge and skills gained through students' undergraduate careers. Students participate in an industry-sponsored competition organized by the Associated Schools of Construction (ASC). Preparation for, and participation in the competition deepens an understanding of real-world challenges toward solution-finding in the built environment.

Department
Civil and Construction Engineering

When Taught
Fall

Credit Hours

Prerequisite

Prerequisites

Complete ALL of the following Courses:

- CFM 105 - Fundamentals of Construction and Facilities Management

Learning Outcomes

Title
Integrate Knwledge and Practice

Tags
181547, 1

Learning Outcome
Apply theoretical concepts, technical skills, and emerging technologies to develop innovative and practical solutions to real-world challenges in construction and facilities management.

Title
Demonstrate Leadership and Collaboration

Tags
181548, 2

Learning Outcome
Work effectively in diverse teams, exhibiting leadership, communication, and ethical decision-making to achieve project goals and foster professional relationships.

Title
Encourage Lifelong Learning and Stewardship

Tags
181549, 3

Learning Outcome
Critically and reflectively evaluate experiences to enhance individual growth, promote sustainable practices, and contribute to the betterment of communities and the built environment.

CFM 318R - NAHB Competition

Course Information

Teaching Area (new)
CFM

Course Number
318R

Teaching Area
CFM

Course Title
NAHB Competition

Course Description
A culminating experience, emphasizing the application of knowledge and skills gained through students' undergraduate careers. Students participate in an industry-sponsored competition organized by the National Association of Home Builders (NAHB). Preparation for, and participation in the competition deepens an understanding of real-world challenges toward solution-finding in the built environment.

Title
Demonstrate Leadership and Collaboration

Learning Outcome
Work effectively in diverse teams, exhibiting leadership, communication, and ethical decision-making to achieve project goals and foster professional relationships.

Title
Encourage Lifelong Learning and Stewardship

Learning Outcome
Critically and reflectively evaluate experiences to enhance individual growth, promote sustainable practices, and contribute to the betterment of communities and the built environment.

CFM 320 - Advanced Building Systems

Course Information

Teaching Area (new)
CFM

Course Number
320

Teaching Area
CFM

Course Title
Advanced Building Systems

Course Description
Understanding and managing large MEP systems; utility infrastructure planning and development, performing system assessments; performing energy, sustainability, and retro-commissioning cost-benefit analysis; understanding system outputs, metering, and costs; code compliance and problem solving.

Department
Civil and Construction Engineering

When Taught
Fall

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
2

Simple Requisites

Prerequisites

Type
Prerequisite

Prerequisites

Complete ALL of the following Courses:
- CFM 220 - Methods 2 - Building Systems

Learning Outcomes

Title
Analyze and Design Building Systems

Tags
181133, 0, 1

Learning Outcome
Students will be able to analyze the specific requirements of a construction project and design appropriate Mechanical, Electrical, and Plumbing (MEP) systems that meet project needs efficiently and sustainably.

Title
Evaluate Energy Efficiency

Tags
181202, 0, 3

Learning Outcome
Students will demonstrate the ability to evaluate and implement energy-efficient strategies in building systems, taking into account current industry standards and sustainable building practices.

Title
Optimize System Outputs

Tags
181120, 0, 4

Learning Outcome
Students will be capable of optimizing building system outputs, including heating, cooling, ventilation, and lighting, to maximize performance and comfort while minimizing energy consumption and operational costs.

Title
Budgeting and Cost Estimation

Tags
181222, 0, 2

Learning Outcome
Develop skills in estimating the costs associated with installing, operating, and maintaining large building systems and perform cost-benefit analyses for retro-commissioning projects.

Title
Infrastructure Planning

Tags
181151, 0, 6

Learning Outcome
Understand the planning and development of utility infrastructure within the context of a construction project, including connections to power grids, water supply, and waste management.

Title
Condition Assessment and Maintenance Planning

Tags
181037, 0, 7

Learning Outcome
Students will learn how to conduct condition assessments of existing building systems, identify maintenance needs, and develop maintenance plans to ensure system longevity and reliability.

Title
Code Compliance and Regulations

Tags
181271, 0, 8

Learning Outcome
Demonstrate a deep understanding of relevant MEP codes and regulations, interpreting and applying them to ensure that all systems meet legal requirements and safety standards.

Title
Technology Integration

Learning Outcome
Integrate the latest technological advancements in building systems, such as Building Information Modeling (BIM) and Building Automation Systems (BAS), into project planning and management.

Title
Sustainability and Environmental Impact

Learning Outcome
Recognize and address the environmental impact of building systems, incorporating sustainable practices and technologies to reduce energy consumption and minimize the carbon footprint of construction projects.

CFM 333 - Sustainable Design and Architecture

Course Information

Course Number
333

Teaching Area
CFM

Course Title
Sustainable Design and Architecture

Course Description
The application of fundamental architectural design processes, combined with key principles of sustainability, to design buildings for various commercial, residential, and institutional uses. The course includes elements of architectural design theory, building form-finding, integrating projects with the natural environment and community infrastructure/services, evaluating building envelopes and internal systems, analyzing embodied and operational carbon loads, and building life-cycle assessments.

Department
Civil and Construction Engineering

When Taught
Fall and Winter

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Learning Outcomes

Title
Design Systems

Learning Outcome
Design buildings as integrated systems, synthesizing program, circulation, scale, form, precedent, and contextual constraints into coherent architectural solutions.

Title
Sustainable Decision Making

Learning Outcome
Analyze site, climate, and regulatory contexts to guide sustainable decisions in building siting, massing, access, and spatial organization.

Title
Communication

Learning Outcome
Communicate architectural design professionally through clear, accurate drawings, models, diagrams, and presentations that convey design intent and sustainability.

Title
Sustainable Strategies

Learning Outcome
Integrate sustainability principles into building form and systems, applying passive strategies, envelope design, and material assemblies to support coherent sustainability strategies.

Title
Lifecycle

Learning Outcome
Evaluate environmental performance and consider life-cycle impacts of design choices, including embodied carbon and material tradeoffs, to inform responsible architectural decisions.

CFM 340 - Operations and Maintenance

Course Information

Teaching Area (new)
CFM

Course Number
340

Teaching Area
CFM

Course Title
Operations and Maintenance

Course Description
Acquisition, operation, maintenance, and disposal of building systems, structures, permanent interiors, furniture, and equipment; grounds and other exterior elements.

Department
Civil and Construction Engineering

When Taught
Winter

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Simple Requisites

Prerequisites

Type
Prerequisite

Prerequisites

Complete ALL of the following Courses:

- CFM 210 - Fundamentals of Facility and Property Management

Learning Outcomes

Title
Maintenance

Tags
181321, 0, 1

Learning Outcome
Identify and explain processes and procedures associated with maintenance of building interior and exterior structures.

Title
Systems

Tags
210963, 0, 2

Learning Outcome
Identify and explain management processes associated with building energy systems and building control and emergency communication systems.

Title
Waste

Tags
210964, 0, 3

Learning Outcome
Describe custoidal and waste disposal processes.

Title
Grounds

Tags
210965, 0, 4

Learning Outcome
Describe processes for maintaining grounds, parking, and landscaping.

Title
Operations

Tags
210966, 0, 5

Learning Outcome
Create and demonstrate how to implement standards, practices, policies, and procedures for fundamental FM systems and processes.

Title
Cost

Tags
210967, 0, 6

Learning Outcome
Analyze building operating costs and capital expenditures.

Title
Diagnostics and Assessment

Tags
210968, 0, 7

Learning Outcome
Perform building diagnostics and needs assessments.

CFM 342 - Earthwork and Construction Equipment

Course Information

Teaching Area (new)
CFM

Course Number
342

Teaching Area
CFM

Course Title
Earthwork and Construction Equipment

Course Description
Introduction to basic soil properties and earthwork construction processes. Interpreting and using heavy civil construction documents including civil construction plansets, specifications, and geotechnical reports. Solving cost, cycle time, and productivity for earthwork construction equipment.

Department
Civil and Construction Engineering

When Taught
Fall and Winter

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Learning Outcomes

Title
Soils

Learning Outcome
Identify and explain basic soil properties, behavior and testing processes, and construction application.

Title
Earthwork Estimating

Learning Outcome
Apply mass-haul principles for selecting equipment and determining haul distances and quantities.

Title
Civil Construction Documents

Learning Outcome
Interpret and use civil construction drawings, specifications, and geotechnical reports.

Title
Equipment Productivity

Learning Outcome
Solve cost, cycle time, and productivity for earthwork construction equipment.

Title
Civil Construction Safety

Learning Outcome
Explain safety practices associated with soils and equipment.

CFM 345 - Construction Safety Management

Course Information

Teaching Area (new)
CFM

Course Number
345

Teaching Area
CFM

Course Title
Construction Safety Management

Course Description
Protecting the lives and well being of employees is a value. Students learn safety requirements and responsibilities in construction; the cost and impact of accidents; accident investigation; safety inspection; hazards analysis; record keeping; and instituting a culture of safety.

Department
Civil and Construction Engineering

When Taught
Fall and Winter

Credit Hours

Min:
2

Fixed/Max:
2

Lecture Hours

Fixed:
2

Lab Hours

Fixed:
0

Learning Outcomes

Title
Safety

Tags
181448, 0, 1

Learning Outcome
Collaborate as a team to create a comprehensive construction safety program using OSHA regulations and course materials-developing practical solutions that promote a culture of safety, accountability, and care for others.

Title
OSHA Navigation and Regulatory Compliance

Tags
181446, 0, 2

Learning Outcome
Demonstrate proficiency in navigating OSHA's 29 CFR 1926 construction standards to evaluate project compliance-cultivating attention to detail, professional responsibility, and a commitment to ethical practice.

Title
Safety Risk

Tags
181447, 0, 3

Learning Outcome
Identify and assess safety risks on construction sites through observation, analysis, and application of industry best practices-preparing students to proactively protect life and health in their future roles.

Title
Financial Impacts of Safety

Learning Outcome
Analyze how Experience Modification Rates (EMRs) and workers' compensation insurance premiums affect construction company profitability-demonstrating the link between safety, stewardship, and sound financial management.

CFM 385 - Construction Contracts and Law

Course Information

Teaching Area (new)
CFM

Course Number
385

Teaching Area
CFM

Course Title
Construction Contracts and Law

Course Description
Contractual literacy and the role of contracts in communication, risk assignment, legal compliance, and setting expectations between parties. Related themes of liability analysis, ethics, negotiation and conflict resolution are also explored. Key legislation and government organizations/agencies are reviewed related to construction, development, and associated businesses.

Department
Civil and Construction Engineering

When Taught
Fall and Winter

Credit Hours

Min:
2

Fixed/Max:
2

Lecture Hours

Fixed:
2

Lab Hours

Fixed:
0

Learning Outcomes

Title
Contracts

Learning Outcome
Analyze and anticipate the impact of contract language on roles, responsibilities, and performance across various project delivery methods.

Title
Stakeholders

Learning Outcome
Identify and engage with authorities having jurisdiction over construction and development activities, considering labor, safety, environmental, and anti-discrimination laws; and applying respectful, informed interaction to support compliant, responsible project delivery.

Title
Risk

Learning Outcome
Identify and manage legal risks and liabilities while fostering professional, respectful, and ethical relationships in complex construction environments.

Title
Communication

Learning Outcome
Translate legal frameworks-including constraints, precedence, and jurisdictional authority-into practical guidance for legal and non-legal professionals.

Title
Ethics

Learning Outcome
Demonstrate integrity and ethical reasoning in responding to legal and business dilemmas, cultivating a strong moral foundation.

CFM 399R - Capstone Internship

Course Information

Teaching Area (new)
CFM

Course Number
399R

Teaching Area
CFM

Course Title
Capstone Internship

Course Description
Cooperative education and related facility and property management on-the-job work experience. Project report required for IFMA Facility Management Professional (FMP) designation.

Department
Civil and Construction Engineering

When Taught
All Semesters/Terms

Credit Hours

Min:
1

Fixed/Max:
1

Lecture Hours

Fixed:
0

Lab Hours

Fixed:

Simple Requisites

Prerequisites

Type
Prerequisite

Prerequisites

Complete ALL of the following Courses:

- CFM 210 - Fundamentals of Facility and Property Management

Other Prerequisites
This course requires departmental approval. See cet-interns.groups.et.byu.net for more information

Note
Students are required to complete at least 8 of the 15 possible learning outcomes and demonstrate completion in their final paper. Follow the Department Pre-registration Instructions prior to Internship Application. An APPROVED Internship Application required before adding.

Learning Outcomes

Title
Application

Tags
181541, 0, 1

Learning Outcome
Apply content learned in the FPM program in a professional setting with an external company.

Title
Communication

Tags
210969, 0, 2

Learning Outcome
Demonstrate professional communication skills in a closeout report.

Title
Analysis

Tags
210970, 0, 3

Learning Outcome
Analyze issues discovered in a job setting and suggest improvement ideas.

CFM 400 - Managing High Performance Buildings

Course Information

Teaching Area (new)
CFM

Course Number
400

Teaching Area
CFM

Course Title
Managing High Performance Buildings

Course Description
Evolving technologies, energy performance, codes, safety, and financial expectations for high performance buildings. Prepare capital and operating budgets with a focus on Total Cost of Ownership financial modeling.

Department
Civil and Construction Engineering

When Taught
Winter

Credit Hours

Min:
3

Fixed/Max:
3

Type
Prerequisite

Prerequisites

Fulfill ALL of the following requirements:

Complete ALL of the following Courses:
- CFM 311 - Estimating Processes
  AND CFM 320 - Advanced Building Systems

AND

Complete ALL of the following Courses:

- M COM 320 - Management Communication
  OR CE 271 - Civil Engineering Communication
  OR WRTG 316 - Technical Communication

Learning Outcomes

Title
Critical Environment

Tags
181528, 0, 1

Learning Outcome
Assess mission criticality, risk, and the need for redundancy in the critical environment across a broad range of industries.

Title
Analysis

Tags
210971, 0, 2

Learning Outcome
Analyze problems with data center support infrastructure and devise potential solutions.

Title
Design Concepts

Tags
210972, 0, 3

Learning Outcome
Contrast the most common data center support infrastructure design concepts with normal building systems.

Title
Air Quality

Tags
210973, 0, 4

Learning Outcome
Differentiate how air quality is controlled in critical environments.

Title
Hospitals

Tags
210974, 0, 5

Learning Outcome
Articulate how the FM requirements for the critical environment in hospitals differ from those for other critical environments.

CFM 411 - Pre-Construction Services

Course Information

Teaching Area (new)
CFM

Course Number
411

Teaching Area
CFM

Course Title
Pre-Construction Services

Course Description
Managing preconstruction services including: Building Information Modeling (BIM), competitive bidding strategies, bid analysis, document management, site work, quantity takeoff, and cost estimation.

Department
Civil and Construction Engineering

When Taught
Fall and Winter

Credit Hours

Min:
3

- WRTG 316 - Technical Communication

OR

Complete ALL of the following Courses:
- CFM 311 - Estimating Processes
- CE 271 - Civil Engineering Communication

Learning Outcomes

Title
Preconstruction

Tags
181308, 0, 1

Learning Outcome
Provide value to a project by way of relationship management, bidding strategies, cost modeling, logistics planning, risk identification + mitigation, constructability, and effective oral/written communication.

Title
Technology

Tags
181309, 0, 2

Learning Outcome
Use cutting-edge technologies to bring added value to a project.

Title
Quantity Takeoffs

Tags
181310, 0, 3

Learning Outcome
Perform accurate quantity takeoffs using construction drawings and specifications for different stages of a project (i.e. conceptual, schematic, design, CDs).

Title
Bid Analysis

Tags
181311, 0, 4

Learning Outcome
Understand scopes of work to enable analysis and leveling of subcontractor bids.

Title
Ethics

Tags
181312, 0, 5

Learning Outcome
Understand ethical issues that may occur during preconstruction activities and how to deal with them.

CFM 415 - Construction Project Management and Control

Course Information

Teaching Area (new)
CFM

Course Number
415

Teaching Area
CFM

Course Title
Construction Project Management and Control

Course Description
Managing and controlling construction projects. Planning, startup procedures, inspections, progress measurements, field reports, change order and submittal processing, equipment management, and project closeout.

Department
Civil and Construction Engineering

When Taught
Fall and Winter

Credit Hours

Min:
3

- CFM 311 - Estimating Processes
  AND WRTG 316 - Technical Communication

OR

Prerequisites

Complete ALL of the following Courses:

- CFM 311 - Estimating Processes
  AND CE 271 - Civil Engineering Communication

Learning Outcomes

Title
Time, Planning, and Cost Management

Tags
181473, 0, 1

Learning Outcome
Evaluate time dependencies, plan project schedules, and apply cost control techniques such as Earned Value Analysis to monitor budgets and project performance.

Title
Leadership and Team Dynamics

Tags
181476, 0, 2

Learning Outcome
Apply principles of effective leadership and team collaboration by analyzing roles, performance appraisals, and strategies for building cohesive, high-performing teams.

Title
Project Lifecycle and Delivery Methods

Tags
181482, 0, 3

Learning Outcome
Understand the full construction project life cycle-from conception through closeout-and compare project delivery methods, identifying key milestones and their impact on project success.

Title
Subcontract and Procurement Management

Tags
181479, 0, 4

Learning Outcome
Manage subcontracts and purchasing processes by creating and evaluating subcontracts, purchase orders, and communication tools that promote fairness, efficiency, and professionalism.

Title
Labor and Legal Issues in Construction

Tags
181475, 0, 5

Learning Outcome
Examine how labor unions, contractor relationships, and legal frameworks influence construction practice, and develop strategies for navigating these issues ethically and responsibly.

Title
Construction Documents and Change Management

Tags
181481, 0, 6

Learning Outcome
Analyze construction drawings, specifications, and change orders to understand how documentation and revisions affect project execution and cost forecasting.

Title
Ethical and Professional Decision Making

Tags
181477, 0, 7

Learning Outcome
Evaluate ethical dilemmas in project management and apply principles of integrity, stewardship, and Christlike leadership in resolving real-world challenges.

CFM 420 - Commercial Real Estate Management

Course Information

Teaching Area (new)
CFM

Course Number
420

Teaching Area

  OR CE 271 - Civil Engineering Communication
  OR WRTG 316 - Technical Communication

Learning Outcomes

Title
Commercial Rental Properties

Tags
181323, 0, 1

Learning Outcome
Define and explain lease and mortgage types, property valuation, operational and financial management of rental properties, and the role of the property manager in creating value.

Title
Mortgages

Tags
210975, 0, 2

Learning Outcome
Develop a mortgage schedule and assess the impact of various payment strategies on term and interest paid.

Title
Cost-Benefit Analysis

Tags
210976, 0, 3

Learning Outcome
Perform a cost-benefit analysis for a rental building upgrade using the income capitalization approach.

Title
Profit and Loss

Tags
210977, 0, 4

Learning Outcome
Create a profit and loss statement for a rental complex and analyze the impact of operational changes to the property's financial situation.

Title
Rent Concessions

Tags
210978, 0, 5

Learning Outcome
Evaluate the impact of granting rent concessions in different ways.

Title
Property Value

Tags
210979, 0, 6

Learning Outcome
Analyze the current situation of a residential complex and develop a management strategy to increase the property's value.

Title
Management

Tags
210980, 0, 7

Learning Outcome
Contrast the management of residential properties with office buildings and shopping centers.

CFM 425 - Construction Accounting

Course Information

Teaching Area (new)
CFM

Course Number
425

Teaching Area
CFM

Course Title
Construction Accounting

Course Description
Cost and managerial accounting topics for construction companies, including break-even analysis, ratio analysis, capital budgeting, job cost systems, master budgets pricing and decision-making, allocating costs.

Department
Civil and Construction Engineering

When Taught
Fall

Credit Hours

Min:
3

Prerequisite

Prerequisites

Complete ALL of the following Courses:

- ACC 200 - Principles of Accounting

Learning Outcomes

Title
Payroll

Tags
181487, 1

Learning Outcome
Understand payroll management and labor burden issues in the construction industry.

Title
Basic Financial Knowledge

Tags
181488, 0

Learning Outcome
Understand basic financial statements and double-entry accounting theory in the construction industry.

Title
Accounting

Tags
181489, 2

Learning Outcome
Understand managerial accounting theory, including how to interpret financial statements using ratio analysis, break-even analysis, trend analysis, etc.

Title
Accounting Controls

Tags
181490, 3

Learning Outcome
Understand internal accounting controls in construction companies.

Title
Computers & Accounting

Tags
181491, 4

Learning Outcome
Ability to use a computer-accounting program, understand the relationship between the different accounting modules, and generate managerial financial reports.

Title
Revenue Recognition

Tags
181492, 5

Learning Outcome
Understand revenue recognition options for construction companies.

CFM 426 - Real Estate Development

Course Information

Teaching Area (new)
CFM

Course Number
426

Teaching Area
CFM

Course Title
Real Estate Development

Course Description
The iterative processes of real estate development, including market analysis, coordination with local governments, designing development concepts, estimating and financial forecasting, identifying and engaging stakeholders, sequencing the timing of development activities to create project schedules, considering sales/marketing within the process, and communicating development plans and proposals (written and oral) to various audiences.

Type
Prerequisite

Prerequisites

Fulfill ANY of the following requirements:

Complete ALL of the following Courses:
- CFM 311 - Estimating Processes
  AND M COM 320 - Management Communication

OR

Complete ALL of the following Courses:
- CFM 311 - Estimating Processes
  AND WRTG 316 - Technical Communication

OR

Complete ALL of the following Courses:
- CFM 311 - Estimating Processes
  AND CE 271 - Civil Engineering Communication

Learning Outcomes

Title
Market Analysis

Tags
181494, 0, 2

Learning Outcome
Conduct market studies, needs assessments, and demographic analysis in real estate development planning.

Title
Public Governance in Development

Tags
181495, 0, 3

Learning Outcome
Understand public processes and analyze municipal planning and zoning ordinances, procedures, and other regulations.

Title
General Arrangement Design

Tags
181497, 0, 4

Learning Outcome
Create a project general arrangement plan that addresses site constraints (topography, open water, climate exposures, etc.), infrastructure, traffic flows, adjacent buildings and services (urban planning), zoning ordinance requirements.

Title
Estimating

Tags
181496, 0, 6

Learning Outcome
Analyze development activities and estimate associated soft and hard costs.

Title
Financial Forecasting

Tags
210948, 0, 7

Learning Outcome
Apply basic principles of TVM to evaluate financial performance of developments and create basic project financial pro formas.

Title
Financial Planning

Learning Outcome
Understand how development projects are financed, and create a project finance plan.

Title
Stakeholders Engagement and Management

Learning Outcome
Analyze stakeholder interests and impacts in development, and create engagement and management plans.

Title
Scheduling

Learning Outcome
Organize the sequence of development activities and create a project schedule.

Title
Communication

Learning Outcome
Communicate complex ideas and proposals clearly and persuasively to both specialized and non-specialized audiences, utilizing various mediums such as written reports, oral presentations, and visual aids.

CFM 433 - Design Studio

Course Information

Course Number
433

Teaching Area
CFM

Course Title
Design Studio

Course Description
The design studio course engages students in comprehensive design projects, emphasizing critical thinking, sustainable practices, and social awareness in architectural design. Students explore diverse typologies and scales, employing advanced digital tools and interdisciplinary perspectives. The course integrates hands-on exercises, design critiques, and real-world insights to foster a holistic understanding of contemporary architectural practice and the societal impact of design decisions. By the end of the course, students will have a significant portfolio contribution and the skills necessary for further graduate studies in architecture.

Prerequisite

Prerequisites

Fulfill ANY of the following requirements:

Prerequisites

Complete ALL of the following Courses:

- CFM 333 - Sustainable Design and Architecture
  AND CFM 311 - Estimating Processes
  AND M COM 320 - Management Communication

OR

Prerequisites

Complete ALL of the following Courses:

- CFM 333 - Sustainable Design and Architecture
  AND CFM 311 - Estimating Processes
  AND WRTG 316 - Technical Communication

OR

Prerequisites

Complete ALL of the following Courses:

- CFM 333 - Sustainable Design and Architecture
  AND CFM 311 - Estimating Processes
  AND CE 271 - Civil Engineering Communication

Learning Outcomes

Title
Programing

Learning Outcome
Synthesize advanced design concepts and theories into innovative architectural solutions that respond to complex programmatic and contextual challenges.

Title
Sustainability

Learning Outcome
Apply sustainable design principles and practices to address environmental, social, and cultural considerations in architectural projects.

Title
Contextual Design

Learning Outcome
Assess and integrate site-specific conditions, including physical, cultural, and socio-economic factors, into the design process to create contextually responsive architectural interventions.

Title
Architectural Decision Making

Learning Outcome
Critically analyze and evaluate the implications of design decisions on the built environment, considering the social, cultural, and ethical responsibilities of architects.

Title
Digital Modeling

Learning Outcome
Utilize advanced digital modeling and representation techniques to effectively communicate design ideas and concepts.

Title
Iterative Design

Learning Outcome
Incorporate feedback from peers, faculty, and industry professionals to iteratively refine and improve design solutions throughout the creative process.

Title
Portfolio

Learning Outcome
Develop a professional-level design portfolio showcasing a range of design projects that reflect an understanding of architectural principles, processes, and innovative solutions.

Title
Individual Growth

Learning Outcome
Reflect on personal design philosophies and approaches, demonstrating a commitment to ongoing learning and professional development.

CFM 442 - Civil Infrastructure Construction

Course Information

Course Number
442

Teaching Area
CFM

Course Title
Civil Infrastructure Construction

Course Description
Develop a project bid proposal for a heavy civil project, including the project estimate, schedule, and risk analysis. Utilize heavy civil contract documents including civil infrastructure plan sets, specifications, and geotechnical reports.

Department
Civil and Construction Engineering

When Taught

- M COM 320 - Management Communication
  OR WRTG 316 - Technical Communication

Learning Outcomes

Title
Horizontal Infrastructure

Learning Outcome
Explain the types, roles, and effects of horizontal infrastructure on society.

Title
Contract Documents

Learning Outcome
Demonstrate understanding of a heavy civil construction project using contract documents.

Title
Cost Estimating

Learning Outcome
Calculate project quantities for materials, labor, and equipment.

Title
Scheduling

Learning Outcome
Develop a project schedule including phasing, critical path, and trade coordination.

Title
Project Risk

Learning Outcome
Identify and assess project risk.

Title
Project Proposal

Learning Outcome
Develop a bid package for a heavy civil construction project.

CFM 445 - Construction Company Operations and Management

Course Information

Learning Outcomes

Title
Ethics + Leadership

Tags
181500, 0, 1

Learning Outcome
Apply ethics and integrity to various leadership, management, and professional situations.

Title
Human Resources Management

Tags
181501, 0, 2

Learning Outcome
Evaluate critical human resource performance and needs and strategically plan to improve performance.

Title
Managerial Accounting/Finance

Tags
181502, 0, 3

Learning Outcome
Identify, develop, and implement effective business strategy by analyzing managerial accounting statements and evaluating company financial performance.

Title
Risk

Tags
181503, 0, 4

Learning Outcome
Evaluate company risk and develop a plan to manage and mitigate identified risk.

Title
Strategic Planning

Tags
181504, 0, 5

Learning Outcome
Create a comprehensive business plan including necessary objectives, market analysis, resources, structure, and strategy for successful funding.

CFM 450 - Virtual Design & Construction

0

Note
College Lecture attendance required.

Learning Outcomes

Title
Develop Professional Application Materials

Tags
181512, 2

Learning Outcome
Create and refine a professional resume, and LinkedIn profile tailored to the industry.

Title
Interviewing Skills

Tags
181514, 0, 3

Learning Outcome
Explain how to prepare for and participate in job interviews for professional positions.

Title
Apply Business Etiquette and Professional Conduct Standards

Tags
181508, 0, 4

Learning Outcome
Understand appropriate business etiquette in networking, workplace communication, and professional interactions within the industry.

Title
Evaluate Employment Opportunities

Tags
181511, 0, 5

Learning Outcome
Understand how to analyze and compare job offers, considering compensation, benefits, company culture, career growth potential, and alignment with personal and professional goals.

Title
Demonstrate Career Experience

Tags
181510, 0, 6

Learning Outcome
Demonstrate an ability to succeed in the construction and facilities management industries through work experience.

CFM 494R - Special Problems in Construction and Facilities Management

Title
Construction company financial management

Tags
181519, 0

Learning Outcome
Understand and apply management concepts and financial strategies needed to successfully grow and enhance profitability of a construction company.

CFM 560 - Leadership in the Built Environment

Course Information

Course Number
560

Teaching Area
CFM

Course Title
Leadership in the Built Environment

Course Description
This course focuses on the application of Leadership theory and principles to the Owner, Architecture, Engineering, Contractor industry (i.e., the Built Environment). Students will consider key strategies for designing, facilitating, and managing OAEC teams to identify and maximize value in the delivery of projects. Project delivery methods, procurement methods, and contracting approaches will be analyzed and compared for project specific optimization. Additionally, ethics and associated decision making will be analyzed and experienced within a leadership framework.

  AND CFM 445 - Construction Company Operations and Management

OR

Complete ALL of the following Courses:

- CE 271 - Civil Engineering Communication
  AND CFM 445 - Construction Company Operations and Management

Learning Outcomes

Title
Team Management

Learning Outcome
Create team design and team building strategies to accomplish primary project objectives.

Title
Leadership Theory

Learning Outcome
Understand and knowledgeably discuss various leadership approaches and their strengths and weaknesses. Students will also analyze their own personal approach to leadership and design an improvement strategy for growth in this area.

Title
Ethics

Learning Outcome
Identify ethical challenges and navigate the associated analysis and decision-making process.

Title
Industry Trends

Learning Outcome
Identify current industry challenges and communicate developed potential solutions.

Title
Project Risk

Learning Outcome
Assess project needs/circumstances in order to consult on ideal project delivery methods, contracting methods and procurement methods.

CFM 570 - Infrastructure Asset Management

Course Information

Course Number
570

Teaching Area
CFM

Course Title
Infrastructure Asset Management

Course Description
Explore how infrastructure is planned, delivered, operated, and maintained. Analyze challenges associated with infrastructure asset management. Evaluate the infrastructure life cycle, including strategic planning, investment and funding, decision making and prioritization, innovative design and construction processes, and long-term maintenance. Explore principles and practice of infrastructure asset management and resilient design, construction, and operation. The broad themes of sustainability and multi-disciplinary solutions are incorporated throughout the course.

Title
Infrastructure Systems

Learning Outcome
Explain elements and operational procedures of public infrastructure systems.

Title
Management

Learning Outcome
Explain asset management principles and processes for infrastructure systems.

Title
Resiliency

Learning Outcome
Determine risk and vulnerability of public infrastructure systems.

Title
Sustainability

Learning Outcome
Develop a sustainability plan using the Envision Rating System for an infrastructure project.

Title
Asset Management Plan

Learning Outcome
Develop an infrastructure asset management plan for an infrastructure system.

CFM 580 - Sustainable Community Development

Course Information

Course Number
580

Teaching Area
CFM

Course Title
Sustainable Community Development

Course Description
Explore the principles, strategies, and practices of sustainable communities and their development. Students will evaluate a wide spectrum of stakeholders and their varied contexts, perspectives and objectives from an interdisciplinary approach. students will critically examine the complex interactions between social, economic, environmental, and cultural factors that influence the creation and maintenance of resilient and vibrant communities. The course emphasizes both theoretical frameworks and practical approaches to address challenges and opportunities associated with developing sustainable communities. Students will engage in case studies, hands-on projects, directed readings, and discussions that encourage innovative thinking and collaboration.

  AND CFM 426 - Real Estate Development

OR

Complete ALL of the following Courses:
- CE 271 - Civil Engineering Communication
  AND CFM 426 - Real Estate Development

Learning Outcomes

Title
Key Concepts

Learning Outcome
Understand fundamental concepts, principles, and theories related to sustainable community development, including ecological integrity, social equity, economic vitality, cultural diversity, and resilience.

Title
Stakeholders & SDGs

Learning Outcome
Identify and evaluate communities and stakeholders, including unique perspectives across various global and temporal contexts, and incorporate insights from global progress toward the UN sustainable development goals (SDGs).

Title
Complex Systems

Learning Outcome
Analyze the intricate interplay between social, economic, environmental, and cultural systems within communities to identify potential points of intervention for sustainable development initiatives.

Title
Utilize Data and Research

Learning Outcome
Gather, analyze, and interpret relevant data and research findings to inform decision-making, and to develop evidence-based community development strategies.

Title
Development Actions

Learning Outcome
Evaluate past and current development actions, analyze long-term objectives against intended and unintended consequences,

Title
Planning

Learning Outcome
Create holistic development plans that balance competing current community needs and resources with future community interests, acknowledging trade-offs and designing flexibility/adaptability for changing environmental, social, and technical conditions.

Title
Stewardship & Ethics

Learning Outcome
Apply principles of stewardship and ethical decision-making in prioritizing responsible care of people and resources to support global flourishing, and fosters a sense of collective responsibility and intergenerational equity.

CFM 594R - Special Topics in Construction Management

Recommended
PhyS 100 or equivalent

Note
For nonscience and nonmedical majors. Offered by BYU Independent Study; enroll anytime throughout the year; one year to complete; additional tuition required; register at https://is.byu.edu/catalog/CHEM-100-M002.

Learning Outcomes

Title
Problem solving

Tags
204092, 1

Learning Outcome
Students will be able to make basic quantitative calculations regarding a number of chemical concepts in preparation for more rigorous, college-level chemistry courses.

Title
Chemistry principles

Tags
204143, 0

Learning Outcome
Students will be able to view the world around them in chemical terms. Students will use the concepts of atoms, molecules, and their properties to understand a variety of phenomena.

CHEM 101 - Introductory General Chemistry

Course Information

Teaching Area (new)
CHEM

Course Number
101

Teaching Area
CHEM

Course Title
Introductory General Chemistry

Course Description
Atomic and molecular structure, periodic relationships, states of matter, chemical reactions and stoichiometry, acids and bases.

Department
Chemistry and Biochemistry

When Taught
Fall; Winter; Spring; Summer.

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Other Prerequisites
Math 97 or equivalent

Note
Primarily for nonscience majors who require a broad introduction to general chemistry. Students seeking a chemistry course only to fulfill a GE requirement should enroll in Chem 102. Additional seats for specific sections may be available to Freshman Mentoring participants through registration envelopes.

Learning Outcomes

Title
Big Picture

Tags
204038, 0

Learning Outcome

Students will be able to view the world around them in chemical terms. Students will use the concepts of atoms, molecules, and their properties to understand a variety of phenomena.

Title
Problem Solving

Tags
204142, 1

Learning Outcome

Students will be able to make qualitative and/or quantitative predictions regarding a number of chemical concepts including chemical reactions and stoichiometry, calorimetry, osmosis, gases, acid/base chemistry, chemical equilibria, and radioactivity.

CHEM 102 - Concepts of Chemistry

Course Information

Teaching Area (new)
CHEM

Course Number
102

Teaching Area
CHEM

Course Title
Concepts of Chemistry

Course Description
The chemical nature of the world and the process of scientific inquiry. Application to critical scientific issues facing society.

Department
Chemistry and Biochemistry

When Taught
Contact Department

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Note
Fulfills a GE physical science requirement, but will not count as a chemistry prerequisite toward any major or minor. Note: Completion of a college chemistry class disqualifies you from taking this class. Note: This class is intended for non-science majors only.

Learning Outcomes

Title
Critical thinking about scientific claims

Tags
204005, 1

Learning Outcome
Students will demonstrate the ability to distinguish between reliable and questionable scientific claims as related to current, relevant issues facing society.

Title
Science and religion

Tags
204012, 2

Learning Outcome
Students will discuss intelligently the relationship between modern science and religious belief.

Title
Chemistry principles

Tags
204060, 0

Learning Outcome
Students will be able to view the world around them in chemical terms. Students will use the concepts of atoms, molecules, and their properties to understand a variety of phenomena.

CHEM 105 - General College Chemistry 1 with Lab (Integrated)

Course Information

Teaching Area (new)
CHEM

Course Number
105

Teaching Area
CHEM

Course Title
General College Chemistry 1 with Lab (Integrated)

Course Description
Atomic and molecular structure including bonding and periodic properties of the elements; reaction energetics, electrochemistry, acids and bases, inorganic and organic chemistry. Includes an exploratory laboratory component.

Department
Chemistry and Biochemistry

When Taught
All Semesters/Terms

Credit Hours

Min:
4

Fixed/Max:
4

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
3

Other Prerequisites
Math 110 (or equivalent) or concurrent enrollment.

Note
Primarily for students in engineering and biological sciences. Three lectures per week plus recitation sections and exploratory lab assignments. Registering for a given section (other than an online section) will automatically register you for the lecture and the recitation. Additional seats for specific sections may be available to Freshman Mentoring participants through envelopes. Offered by BYU Independent Study; enroll anytime throughout the year; one year to complete; additional tuition required; register at is.byu.edu.

Learning Outcomes

Title
Chemistry fundamentals

Tags
205911, 1

Learning Outcome
Students will demonstrate a familiarity with the basic vocabulary and concepts of chemistry.

Title
Quantitative laws

Tags
205912, 2

Learning Outcome
Students will demonstrate a qualitative and basic quantitative understanding of the fundamental chemical laws which govern the material substances in our universe and which express how one variable in nature depends on another.

Title
Problem solving

Tags
205913, 3

Learning Outcome
Students will demonstrate the ability to manipulate quantitative descriptors of natural phenomena expressed both in the form of equations and of proportionalities, and solve chemistry problems using these skills.

Title
Chemical Phenomenon

Tags
205914, 4

Learning Outcome
A successful Chemistry 105 students describes chemical phenomenon by first focusing on properties of the elements at the atomic level. Chemistry 105 students will gain a knowledge base of reactivity patterns of elements and compounds.

Title
Field of Study

Tags
205915, 5

Learning Outcome
Chemistry 105 students will be able to use their chemistry experience, knowledge, and skills to better understand and work in their own field of study.

CHEM 106 - General College Chemistry 2

- CHEM 111 - Principles of Chemistry 1

Note
Three lectures and one recitation per week. Registering for a given section will automatically register you for the lecture and the recitation.

Learning Outcomes

Title
Mastery of Chemistry Fundamentals

Tags
205916, 1

Learning Outcome
Students will demonstrate an expanded mastery of the concepts that were learned in Chemistry 105 including: kinetics, chemical equilibrium, acids and bases, solubility and complexation equilibrium, electrochemistry, thermodynamics, organic, biochemistry, and nuclear chemistry.

Title
Problem Solving

Tags
205917, 2

Learning Outcome
Students will demonstrate the ability to solve mathematical problems, typically using algebra, in kinetics, chemical equilibrium, acids and bases, solubility and complexation equilibrium, electrochemistry, and thermodynamics.

CHEM 107 - General College Chemistry Laboratory

Course Information

Teaching Area (new)
CHEM

Course Number
107

Teaching Area
CHEM

Course Title
General College Chemistry Laboratory

Course Description
Chemical properties, chemical reactions, collection and interpretation of data, preparation of reports.

Department
Chemistry and Biochemistry

When Taught
All Semesters/Terms

Credit Hours

Min:
1

Fixed/Max:
1

Lecture Hours

Fixed:
0

Lab Hours

Fixed:
3

Simple Requisites

Prerequisites

Type
Completion Requirement

Prerequisites

Complete ANY of the following Courses:

- CHEM 105 - General College Chemistry 1 with Lab (Integrated)
  OR CHEM 111 - Principles of Chemistry 1

Other Prerequisites
Chem 106 or Chem 112 or concurrent enrollment

Note
Required for most students needing one year of general chemistry. Students taking the Chem 107 laboratory will be charged for non-returnable materials plus the cost of any breakage.

Learning Outcomes

Title
Observation and Inference

Tags
214914, 0, 4

Learning Outcome
Students will demonstrate the ability to carefully observe the outcomes of experiments, use that evidence to make inferences about molecular-level events, and communicate that information using the symbolic notation of chemistry.

Title
Laboratory Techniques and Safety

Tags
214915, 0, 5

Learning Outcome
Students will demonstrate skill at basic laboratory and safety techniques including measuring mass and liquid volumes, transferring chemicals, using a centrifuge, employing appropriate personal protective equipment, and disposing of waste materials properly.

Title
Scientific Practices

Tags
204267, 0, 3

Learning Outcome
Students will develop proficiency as scientists by asking questions, planning and carrying out experiments, analyzing and interpreting data, using models, constructing explanations, supporting arguments with evidence, and clearly and effectively communicating the results of their experiments.

CHEM 111 - Principles of Chemistry 1

Course Information

Teaching Area (new)
CHEM

Course Number
111

Teaching Area
CHEM

Course Title
Principles of Chemistry 1

Course Description
Stoichiometry, kinetic-molecular theory, thermodynamics, states of matter, solutions and equilibria, electrochemistry, structure and bonding, chemical reactions, kinetics.

Department
Chemistry and Biochemistry

When Taught
Fall

Credit Hours

Min:
4

Fixed/Max:
4

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
3

Other Prerequisites
Math 110 or equivalent.

Recommended
High school chemistry, physics, and introductory calculus or concurrent enrollment in Math 112

Note
Tutorial included.

Learning Outcomes

Title
Molecular Models

Tags
203873, 2

Learning Outcome
Students will demonstrate the ability to use valence shell and molecular orbital models of bonding to predict molecular shapes, reactivity, and spectroscopic properties.

Title
Application of Chemical Thermodynamics

Tags
203874, 3

Learning Outcome
Students will demonstrate the ability to use core concepts of chemical thermodynamics, with emphasis on the first and second laws, to predict physical changes and reaction outcomes based on Gibbs energies.

Title
Application of Kinetic Theory of Gases

Tags
203875, 4

Learning Outcome
Students will be able to apply the kinetic theory of gases, including properties of ideal gases and interactions that lead to non-ideal behavior, to predict gas behavior with varied temperature, pressure and volume.

Title
Application of Quantum Mechanics to Atomic Theory

Tags
204070, 0

Learning Outcome
Students will apply concepts of the quantum mechanical nature of light and matter to explain observations that originally led to the development of atomic theory.

CHEM 112 - Principles of Chemistry 2

Course Information

Teaching Area (new)
CHEM

Course Number
112

Teaching Area
CHEM

Course Title
Principles of Chemistry 2

Course Description
Continuation of Chem 111.

Department
Chemistry and Biochemistry

When Taught
Winter

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
2

Simple Requisites

Prerequisites

Type
Completion Requirement

Complete ANY of the following Courses:

- CHEM 111 - Principles of Chemistry 1
  OR CHEM 105 - General College Chemistry 1 with Lab (Integrated)

Note
Tutorial included.

Learning Outcomes

Title
Applying Thermodynamics to Equilibria and Entropy

Tags
203876, 1

Learning Outcome
Students will be able to use thermodynamic principles and their application to physical and chemical equilibria to calculate entropic and enthalpic contributions to physical changes and reactions and predict equilibria given entropic and enthalpic changes.

Title
Applying Acid-Base Theory

Tags
203877, 2

Learning Outcome
Students will be able to apply acid-base theory, including interactions of strong and weak acids and bases, to determination of pH values of solutions, calculating buffering capacity and performance of acid-base titrations. They will be able to use structural features of molecules to estimate acid and base strength.

Title
Electrochemistry

Tags
203878, 3

Learning Outcome
Students will demonstrate an understanding of electrochemistry in designing simple electrodes and will use reduction/oxidation potentials to characterize electrodes.

Title
Applying Transition State Theory to Reactions

Tags
203879, 4

Learning Outcome
Students will be able to apply transition state theory to reaction kinetics. Students will be able to model mathematically rates of multiple reaction types.

Title
Periodic Table Principles

Tags
203880, 5

Learning Outcome
Students will be able to apply the periodic nature of the elements to classify elements and identify the compositions of inorganic salts.

CHEM 113 - Introductory General Chemistry Laboratory

Course Information

Teaching Area (new)
CHEM

Course Number
113

Teaching Area
CHEM

Course Title
Introductory General Chemistry Laboratory

Course Description
Principles and techniques of chemical measurements. Concepts introduced in general chemistry lecture courses reinforced.

Department
Chemistry and Biochemistry

When Taught
Fall and Winter

Credit Hours

Min:
2

Fixed/Max:
2

Lecture Hours

Fixed:
0

Lab Hours

Fixed:
6

Simple Requisites

Prerequisites

Type
Completion Requirement

Complete ANY of the following Courses:

- CHEM 111 - Principles of Chemistry 1
  OR CHEM 105 - General College Chemistry 1 with Lab (Integrated)

Other Prerequisites
Chem 112 or Chem 106 or concurrent enrollment (preferred). Chem 201 or concurrent enrollment.

Note
Students will be charged for non-returnable materials and the cost of any breakage. Attendance at both the lecture and lab is required.

Learning Outcomes

Title
Precise Quantitative Measurements

Tags
203881, 1

Learning Outcome
Perform precise quantitative measurements using volumetric glassware, analytical balances, and electrochemical and spectrophotometric instrumentation.

Title
Application of Chem 111 and Chem 112 to Laboratory Measureme

Tags
203882, 2

Learning Outcome
Apply concepts of quantum mechanics, kinetics, equilibrium and thermodynamics taught in Chem 111 and Chem 112 to laboratory measurements.

Title
Separation and Classification of Inorganic Cations and Anion

Tags
203883, 3

Learning Outcome
Apply a basic understanding of descriptive chemistry introduced in Chem 112 to the separation and classification of inorganic cations and anions.

Title
Record Laboratory Procedures

Tags
203884, 4

Learning Outcome
Record laboratory procedures and results neatly and concisely in a laboratory notebook

Title
Report Experimental Results

Tags
203885, 5

Learning Outcome
Report experimental results in a manner that gives proper attention to sources of experimental error.

CHEM 195 - Introduction to Chemistry and Biochemistry

Course Information

Teaching Area (new)
CHEM

Course Number
195

Teaching Area
CHEM

Course Title
Introduction to Chemistry and Biochemistry

Course Description
Impact of chemistry and biochemistry on science and society. Overview of areas of chemistry and undergraduate research. Benefits of a chemistry or biochemistry degree for jobs, graduate or professional school.

Department
Chemistry and Biochemistry

When Taught
Winter

Credit Hours

Min:
0.5

Fixed/Max:
0.5

Lecture Hours

Fixed:
1

Lab Hours

Fixed:
0

Learning Outcomes

Title
Value of Degree

Tags
204002, 2

Learning Outcome
Students will recognize the value of a chemistry and biochemistry degree and the range of opportunities for degree holders.

Title
Societal Impact

Tags
204045, 0

Learning Outcome
Students will appreciate the impact of chemistry and biochemistry on society.

Title
Areas

Tags
204178, 1

Learning Outcome
Students will understand the distinctions between the main areas of chemistry and biochemistry.

Title
Research options

Tags
204180, 3

Learning Outcome
Students will be aware of options to do undergraduate research.

CHEM 201 - Chemical Handling and Safe Laboratory Practices

Course Information

Teaching Area (new)
CHEM

Course Number
201

Teaching Area
CHEM

Course Title
Chemical Handling and Safe Laboratory Practices

Course Description
Safe handling of chemicals and safe practices in chemistry laboratories.

Department
Chemistry and Biochemistry

When Taught
Fall and Winter

Credit Hours

Min:
0.5

Fixed/Max:
0.5

Lecture Hours

Fixed:
1

Lab Hours

Fixed:
0

Learning Outcomes

Title
Regulations

Tags
203886, 1

Learning Outcome
Discuss regulations that govern a chemists activities: OSHO, EPA, DOT, CDC, NRC, and state agencies and specifically, the OSHA Laboratory Standard CFR 29 1910.1450 and EPA RCRA regulations (CFR 40) requiring "cradle to grave" responsibility

Title
Chemical hazards

Tags
203887, 2

Learning Outcome
Identify chemical hazard classes and follow administrative guidelines to work safely in a laboratory environment and properly store and dispose of chemicals. These guidelines include regulated exposure limits PEL, STEL, IDLH, Ceiling and other measurable standards, such as the TLV, LD50, LC50, SADT, and guidelines for use of compressed gases and cryogenic materials.

Title
Protective equipment

Tags
203888, 3

Learning Outcome
Demonstrate usage of protective equipment available for chemical exposure.

Title
Accidents

Tags
203889, 4

Learning Outcome
Respond to laboratory accidents, such as spills, fires, and cuts, and clean up a mercury spill.

Title
Fire safety

Tags
203890, 5

Learning Outcome
Recognize fire hazards and put out a fire using an ABC fire extinguisher.

Title
Biological and radiological safety

Tags
203891, 6

Learning Outcome
Discuss biological and radiological safety, including biosafety levels, management of biological waste, lasers, and radionuclides.

CHEM 227 - Principles of Chemical Analysis

Course Information

Teaching Area (new)
CHEM

Course Number
227

Teaching Area
CHEM

Course Title
Principles of Chemical Analysis

Course Description
Principles of quantitative analysis, introductory instrumental methods, and computer applications to chemical analysis.

Department
Chemistry and Biochemistry

When Taught
Fall; Spring.

Credit Hours

Min:
4

Fixed/Max:
4

Lecture Hours

Fixed:
2

Lab Hours

Fixed:
6

Simple Requisites

Prerequisites

Type
Prerequisite

Prerequisites

Complete ALL of the following Courses:

- CHEM 113 - Introductory General Chemistry Laboratory

Recommended
Chem 201 or concurrent enrollment.

Note
Cost for non-returnable materials and breakage will be charged to the student account at the end of the semester. Students are required to attend both the lecture and the lab.

Learning Outcomes

Learning Outcome
Demonstrate skill in performing precise, careful, basic laboratory operations such as sample preparation, calibration techniques, spectrophotometry, electrochemical analysis, titrimetric and chromatographic methods

Learning Outcome
Explain basic measurement methods and devices

Learning Outcome
Show proficiency in reporting scientific results in numerical, graphical, and written formats, and be able to explain the ethical standards for such reports

Learning Outcome
Show proficiency in using computer programs for data analysis

Learning Outcome
Apply basic statistics to data analysis including, confidence intervals, t-test, linear regression, propagation of error, sampling statistics and signal-noise enhancement

Learning Outcome
Critically evaluate experiments and data with respect to theory and models

Learning Outcome
Apply knowledge to new problems, including the design and validation of new analytical methods

CHEM 285 - Introductory Bio-organic Chemistry

Course Information

Teaching Area (new)
CHEM

Course Number
285

Teaching Area
CHEM

Course Title
Introductory Bio-organic Chemistry

Course Description
Principles of organic chemistry and biochemistry relating to biomolecule structure and function.

Department
Chemistry and Biochemistry

When Taught
Fall, Winter, Spring

Credit Hours

Min:
4

Fixed/Max:
4

Lecture Hours

Fixed:
4

Lab Hours

Fixed:
0

Other Prerequisites
Chem 101 or equivalent

Learning Outcomes

Title
Organic Functional Groups

Tags
204084, 1

Learning Outcome
Students will understand the structure and reactivity of organic functional groups, such as alcohols, aldehydes, carboxylic acids, and amides. For example, students will learn that aldehydes and ketones typically undergo addition reactions.

Title
Biomolecules

Tags
204115, 2

Learning Outcome
Students will understand the structure and reactivity of the biomolecules that have those functional groups. For example, students will be able to demonstrate that carbohydrates are aldehydes and ketones that undergo addition reactions to form hemiacetals and polysaccharides with acetal linkages.

Title
Metabolism of Carbohydrates, Lipids and Proteins

Tags
204118, 0

Learning Outcome
Students will understand the metabolism of carbohydrates, lipids, and proteins in humans. They will be able to describe in structures and words the metabolism of sugars through the pathways of glycolysis, the citric acid cycle, and the electron transport chain.

CHEM 297R - Research Training Experience

Course Information

Teaching Area (new)
CHEM

Course Number
297R

Teaching Area
CHEM

Course Title
Research Training Experience

Course Description
Developing competence in methods of research, safe practices, and application of classroom knowledge to research problems leading to confidence and independence in research work.

Department
Chemistry and Biochemistry

When Taught
All Semesters/Terms

Credit Hours

Min:
0.5

Fixed/Max:
0.5

Other Prerequisites
Instructor's consent, and Chem 201 or concurrent enrollment or special safety training

Learning Outcomes

Title
Research skills

Tags
204136, 0

Learning Outcome
The student will develop the fundamental skills necessary to participate in mentored research in future semesters with a specific research group under the tutelage of a faculty member.

CHEM 331 - Guided Learning for Chemistry Instruction

Course Information

Teaching Area (new)
CHEM

Course Number
331

Teaching Area
CHEM

Course Title
Guided Learning for Chemistry Instruction

Course Description
Methods for guiding the learning of high school chemistry students, including modeling of instruction and practice in preparing and conducting demonstrations.

Department
Chemistry and Biochemistry

When Taught
Winter

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Simple Requisites

Prerequisites

Type
Prerequisite

Prerequisites

Fulfill ANY of the following requirements:

Prerequisites

Complete ALL of the following Courses:

- CHEM 107 - General College Chemistry Laboratory

OR

Prerequisites

Complete ALL of the following Courses:

- CHEM 113 - Introductory General Chemistry Laboratory

Recommended
Chem 201

Learning Outcomes

Title
Chemistry Fundamentals

Tags
203971, 2

Learning Outcome
Enrich and supplement the chemical principles and concepts learned in university chemistry courses to fully understand basic chemical principles.

Title
Pedagogy and Teaching Chemistry

Tags
203972, 1

Learning Outcome
Develop and broaden an understanding of the explanations of natural phenomena with chemistry principles to encourage student interest in the world around them.

Title
Laboratory and Problem Solving Skills

Tags
203973, 3

Learning Outcome
Develop and refine a variety of laboratory and problem solving strategies: dimensional analysis, microscale chemistry, Virtual ChemLab, and inquiry methods.

CHEM 351 - Organic Chemistry 1

Course Information

Teaching Area (new)
CHEM

Course Number
351

Teaching Area
CHEM

Course Title
Organic Chemistry 1

Course Description
Fundamentals of bonding, structure, and reactions of organic compounds, including molecular geometry, polarity, conformation, isomerism, functional groups, stereochemistry, reactions and reaction mechanisms, and spectroscopy.

Department
Chemistry and Biochemistry

When Taught
Fall, Winter, Spring

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
1

Simple Requisites

Prerequisites

Type
Prerequisite

Prerequisites

Fulfill ANY of the following requirements:

Prerequisites

Complete ALL of the following Courses:

- CHEM 105 - General College Chemistry 1 with Lab (Integrated)

OR

Prerequisites

Complete ALL of the following Courses:

- CHEM 111 - Principles of Chemistry 1

Note
Primarily for majors in chemical engineering and the biological sciences. Registering for a given section will automatically register you for both the lecture and the recitation.

Learning Outcomes

Title
Recognizing and Naming Classes

Tags
204111, 0

Learning Outcome
Recognize functional group classes commonly encountered in organic chemistry and name representative molecules from each class using IUPAC rules for organic nomenclature.

Title
Structure and Reactivity Prediction

Tags
205919, 2

Learning Outcome
Predict structure and reactivity of alkanes, alkenes, alkynes, aromatic hydrocarbons, alcohols, ethers, epoxides, and alkylhalides based on such factors as carbon atom hybridization, bond length, bond strength, and bond polarity.

Title
Curved Arrow Mechanisms

Tags
205920, 3

Learning Outcome
Recognize and provide curved arrow mechanisms for the following types of organic reactions: additions, substitutions, and eliminations.

Title
Energetically-Preferred Conformations

Tags
205921, 4

Learning Outcome
Predict the energetically preferred conformation for straight-chain and branched alkanes, and for substituted cycloalkanes.

Title
R and S Configurations/Distinguishers

Tags
205922, 5

Learning Outcome
Determine R and S configurations for chiral molecules and distinguish between enantiomers, diastereomers, meso compounds, and conformational isomers.

Title
Mass Spectra Determining Molecule Structure

Tags
205923, 6

Learning Outcome
Interpret 1H NMR, 13C NMR, IR, UV, and mass spectra and use these data to determine the structure of organic molecules.

Title
Relative Energy Prediction

Tags
205924, 7

Learning Outcome
Predict the relative energies of reactive intermediates such as radicals, carbocations, and carbanions, based on structural considerations such as orbital hybridization, hyperconjugation, and resonance stabilization.

CHEM 351M - Organic Chemistry 1 - Majors

Course Information

Teaching Area (new)
CHEM

Course Number
351M

Teaching Area
CHEM

Course Title
Organic Chemistry 1 - Majors

Course Description
Fundamentals of bonding, structure, and reactions of organic compounds, including molecular geometry, polarity, conformation, isomerism, functional groups, stereochemistry, reactions and reaction mechanisms, and spectroscopy. Chem 351M provides a more in-depth treatment of the above topics than Chem 351.

Department
Chemistry and Biochemistry

When Taught
Fall

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:

Prerequisite

Prerequisites

Fulfill ANY of the following requirements:

Prerequisites

Complete ALL of the following Courses:

- CHEM 105 - General College Chemistry 1 with Lab (Integrated)

OR

Prerequisites

Complete ALL of the following Courses:

- CHEM 111 - Principles of Chemistry 1

Note

For majors in chemistry and biochemistry.

Learning Outcomes

Title
Recognizing and Naming Classes

Tags
203900, 1

Learning Outcome
Recognize functional group classes commonly encountered in organic chemistry and name representative molecules from each class using IUPAC rules for organic nomenclature.

Title
Curved Arrow Mechanisms

Tags
203901, 3

Learning Outcome
Recognize and provide curved arrow mechanisms for the following types of organic reactions: additions, substitutions, and eliminations.

Title
Energetically-Preferred Conformations

Tags
203902, 4

Learning Outcome
Predict the energetically preferred conformation for straight-chain and branched alkanes, and for substituted cycloalkanes.

Title
Relative Energy Prediction

Tags
203903, 7

Learning Outcome
Predict the relative energies of reactive intermediates such as radicals, carbocations, and carbanions, based on structural considerations such as orbital hybridization, hyperconjugation, and resonance stabilization.

Title
Structure and Reactivity Prediction

Tags
204008, 2

Learning Outcome
Predict structure and reactivity of alkanes, alkenes, alkynes, aromatic hydrocarbons, alcohols, ethers, epoxides, and alkylhalides based on such factors as carbon atom hybridization, bond length, bond strength, and bond polarity.

Title
R and S Configurations/Distinguishers

Tags
204055, 5

Learning Outcome
Determine R and S configurations for chiral molecules and distinguish between enantiomers, diastereomers, meso compounds, and conformational isomers.

Title
Mass Spectra Determining Molecule Structure

Tags
204082, 6

Learning Outcome
Interpret 1H NMR, 13C NMR, IR, UV, and mass spectra and use these data to determine the structure of organic molecules.

CHEM 352 - Organic Chemistry 2

Course Information

Teaching Area (new)
CHEM

Course Number
352

Teaching Area
CHEM

Course Title
Organic Chemistry 2

Course Description
Emphasis on organic reactions, reaction mechanisms, synthesis, and spectroscopy building on the foundation of Chem 351, including carbonyl chemistry, and chemistry of aromatic compounds, organic acids and bases, polymers, and biomolecules.

Department
Chemistry and Biochemistry

When Taught
All Semesters/Terms

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
1

Simple Requisites

Prerequisites

Type
Prerequisite

Prerequisites

Fulfill ANY of the following requirements:

Prerequisites

Complete ALL of the following Courses:
- CHEM 351 - Organic Chemistry 1

OR

Prerequisites

Complete ALL of the following Courses:
- CHEM 357 - Industrial Organic Chemistry

Note
Primarily for majors in chemical engineering and the biological sciences.

Learning Outcomes

Title
Recognize and Predict Reactivity

Tags
204023, 2

Learning Outcome
Recognize and predict the reactivity of the following reactive species and/or reactive intermediates: Grignard reagents, Wittig reagents, organolithiums, diorganocuprates, enols, enolates, aryl diazonium ions, and benzynes.

Title
Recognize and Predict Structure/Reactivity

Tags
204063, 3

Learning Outcome
Recognize and predict the structure and reactivity of the following classes of biologically important organic molecules: carbohydrates, amino acids, proteins, and lipids.

Title
Curved Arrow Mechanisms

Tags
204080, 1

Learning Outcome
Recognize and provide curved arrow mechanisms for the following types of organic reactions: electrophilic & nucleophilic aromatic substitution, nucleophilic carbonyl addition, nucleophilic acyl substitution, carbonyl condensation, [4 2] cycloaddition, and substitution ato a carbonyl.

Title
Predict Structure and Reactivity

Tags
204128, 0

Learning Outcome
Predict structure and reactivity of aldehydes, ketones, carboxylic acids, esters, anhydrides, amides, b-ketocarbonyl containing compounds, amines, and phenols.

CHEM 352M - Organic Chemistry 2 - Majors

Course Information

Teaching Area (new)
CHEM

Course Number
352M

Teaching Area
CHEM

Course Title
Organic Chemistry 2 - Majors

Course Description
Emphasis on organic reactions, reaction mechanisms, synthesis, and spectroscopy building on the foundation of Chem 351M, including carbonyl chemistry, the chemistry of aromatic compounds, organic acids and bases, polymers, and biomolecules. Chem 352M provides a more in-depth treatment of the above topics than Chem 352.

Department
Chemistry and Biochemistry

Learning Outcomes

Title
Predict Structure and Reactivity

Tags
203904, 1

Learning Outcome
Predict structure and reactivity of aldehydes, ketones, carboxylic acids, esters, anhydrides, amides, b-ketocarbonyl containing compounds, amines, and phenols.

Title
Recognize and Predict Reactivity

Tags
203905, 3

Learning Outcome
Recognize and predict the reactivity of the following reactive species and/or reactive intermediates: Grignard reagents, Wittig reagents, organolithiums, diorganocuprates, enols, enolates, aryl diazonium ions, and benzynes.

Title
Recognize and Predict Structure/Reactivity

Tags
203906, 4

Learning Outcome
Recognize and predict the structure and reactivity of the following classes of biologically important organic molecules: carbohydrates, amino acids, proteins, and lipids.

Title
Curved Arrow Mechanisms

Tags
204137, 2

Learning Outcome
Recognize and provide curved arrow mechanisms for the following types of organic reactions: electrophilic & nucleophilic aromatic substitution, nucleophilic carbonyl addition, nucleophilic acyl substitution, carbonyl condensation, [4 2] cycloaddition, and substitution ato a carbonyl.

CHEM 353 - Organic Chemistry Laboratory--Nonmajors.

Course Information

Teaching Area (new)
CHEM

Course Number
353

Teaching Area
CHEM

Course Title
Organic Chemistry Laboratory--Nonmajors.

Course Description
Physical and chemical properties, isolation and purification, characterization, syntheses.

Department
Chemistry and Biochemistry

When Taught
All Semesters/Terms

Credit Hours

Min:
1

Fixed/Max:
2

Lecture Hours

Fixed:
0

Lab Hours

Fixed:

Type
Prerequisite

Prerequisites

Fulfill ANY of the following requirements:

Prerequisites

Complete ALL of the following Courses:

- CHEM 351 - Organic Chemistry 1

OR

Prerequisites

Complete ALL of the following Courses:

- CHEM 357 - Industrial Organic Chemistry

Other Prerequisites
Concurrent enrollment in Chem 352 or Chem 352M strongly preferred.

Note
For predentistry, premedicine, and other majors who do not intend to take Chem 455.

Learning Outcomes

Title
Traditional Organic Reactions

Tags
204042, 0

Learning Outcome
Perform a broad range of traditional organic reactions at the micro scale including: nucleophilic carbonyl additions, hydroboration, nucleophilic acyl substitution, electrophilic aromatic substitution, [4 2] cycloaddition, and photochemical alkene isomerization.

Title
Form Conclusions

Tags
204120, 2

Learning Outcome
Make correct conclusions about the outcome of experiments after collecting basic physical data, and after providing unambiguous interpretation of the necessary spectra.

Title
Organic Chemistry Techniques

Tags
204138, 1

Learning Outcome
Implement fundamental organic chemistry techniques for carrying out basic experiments, and purifying products, at the micro scale including: extraction, distillation, recrystalization, column chromatography, and TLC.

CHEM 354 - Organic Chemistry Laboratory--Majors

Course Information

Teaching Area (new)
CHEM

Course Number
354

Teaching Area
CHEM

Course Title
Organic Chemistry Laboratory--Majors

Course Description
Physical and chemical properties, manipulative skills, isolation and purification, characterization and identification, syntheses.

Department
Chemistry and Biochemistry

When Taught
Fall; Winter; Spring.

204021, 0

Learning Outcome
Perform a broad range of traditional organic reactions at the micro scale including: nucleophilic carbonyl additions, hydroboration, nucleophilic acyl substitution, electrophilic aromatic substitution, [4 2] cycloaddition, and photochemical alkene isomerization.

Title
Form Conclusions

Tags
204027, 2

Learning Outcome
Make correct conclusions about the outcome of experiments after collecting basic physical data, and after providing unambiguous interpretation of the necessary spectra.

Title
Organic Chemistry Techniques

Tags
204171, 1

Learning Outcome
Implement fundamental organic chemistry techniques for carrying out basic experiments, and purifying products, at the micro scale including: extraction, distillation, recrystalization, column chromatography, and TLC.

CHEM 357 - Industrial Organic Chemistry

Course Information

Teaching Area (new)
CHEM

Course Number
357

Teaching Area
CHEM

Course Title
Industrial Organic Chemistry

Course Description
Fundamentals of organic compound bonding, shape, structure, conformations, acidity, properties, kinetics, thermodynamics, reactions, and reaction mechanisms. Emphasis on organic reactions related to industrial chemistry processes.

Department
Chemistry and Biochemistry

When Taught
Fall

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Simple Requisites

Prerequisites

Type
Prerequisite

Prerequisites

Fulfill ANY of the following requirements:

Prerequisites

Complete ALL of the following Courses:

- CHEM 105 - General College Chemistry 1 with Lab (Integrated)
  AND CHEM 106 - General College Chemistry 2

OR

Prerequisites

Complete ALL of the following Courses:

- CHEM 111 - Principles of Chemistry 1
  AND CHEM 112 - Principles of Chemistry 2

CHEM 381 - Fundamentals of Biochemistry

Course Information

Teaching Area (new)
CHEM

Course Number
381

Teaching Area
CHEM

Course Title
Fundamentals of Biochemistry

Course Description
This course provides a foundation for chemistry and biochemistry majors in the fundamentals of biochemistry. Topics include: chemical and physical forces in biological systems; structure and chemistry of biomolecules; DNA/RNA polymerization, metabolism, and transcription; protein translation, structure, and modification; lipid structure and function; metabolism.

Department
Chemistry and Biochemistry

When Taught
Winter

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Simple Requisites

Prerequisites

Type
Prerequisite

Prerequisites

Complete ALL of the following Courses:

- CHEM 351M - Organic Chemistry 1 - Majors

Recommended
Concurrent enrollment in or completion of Chem 352M recommended. For Biochemistry majors, concurrent enrollment in Chem 384 recommended.

Note
For chemistry and biochemistry majors only.

Learning Outcomes

Title
Equilibrium and Energetics

Learning Outcome
Describe how control of chemical equilibria is critical to biological systems and is used for energy transformation.

Title
Structure/Function Relationships

Learning Outcome
Recognize how macromolecular structure determines function and regulation occurs by modifying these structures in a signal dependent fashion.

Title
Biological Information Storage

Learning Outcome
Identify the chemical foundations of dynamic biological information storage and how this is connected to phenotype.

Title
Measurement and Analysis

Learning Outcome
Use objective measurement, quantitative analysis and clear communication to investigate the chemical processes of life.

CHEM 384 - Biochemistry Methods

Course Information

Teaching Area (new)
CHEM

Course Number
384

Teaching Area
CHEM

Course Title
Biochemistry Methods

Course Description
This course teaches basic laboratory skills and methods necessary for biochemistry research.

Department
Chemistry and Biochemistry

When Taught
Winter Term 2.

Credit Hours

Min:
1

Fixed/Max:
1

Lecture Hours

Fixed:
0

Lab Hours

Fixed:
3

Simple Requisites

Prerequisites

Type
Prerequisite

Prerequisites

Complete ALL of the following Courses:

- CHEM 227 - Principles of Chemical Analysis
  AND CHEM 201 - Chemical Handling and Safe Laboratory Practices

Other Prerequisites
Concurrent enrollment in or completion of Chem 381M.

Note
For chemistry and biochemistry majors only.

CHEM 391 - Technical Writing Using Chemical Literature

Course Information

Teaching Area (new)
CHEM

Course Number
391

Teaching Area
CHEM

Course Title
Technical Writing Using Chemical Literature

Course Description
Intensive technical writing course based on chemical literature sources.

Department
Chemistry and Biochemistry

When Taught
Fall and Winter

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Type
Prerequisite

Prerequisites

Fulfill ANY of the following requirements:

Prerequisites

Complete ALL of the following Courses:

- CHEM 227 - Principles of Chemical Analysis
  AND CHEM 351M - Organic Chemistry 1 - Majors

OR

Prerequisites

Complete ALL of the following Courses:

- CHEM 227 - Principles of Chemical Analysis
  AND CHEM 351 - Organic Chemistry 1

Note

Fulfills GE Advanced Writing requirement.

Learning Outcomes

Title
Communicate Results

Tags
203910, 1

Learning Outcome
Communicate the results of scientific experiments in oral reports, technical graphics, and written reports.

Title
Research Literature

Tags
203911, 2

Learning Outcome
Search the chemical literature for published works relevant to a project of interest, and to read and understand technical literature related to the discipline.

Title
Apply Classroom Knowledge in Research Laboratory

Tags
203912, 3

Learning Outcome
Draw on classroom knowledge to contribute to solutions of problems encountered in a research laboratory.

Title
Post-Graduate Opportunities

Tags
203913, 4

Learning Outcome
Make informed choices among post-graduate opportunities for work or further education.

Title
Ethics

Tags
204057, 5

Learning Outcome
Understand professional and scientific ethics.

CHEM 397R - Mentored Outreach and Service Learning

Course Information

Teaching Area (new)
CHEM

Course Number
397R

Teaching Area
CHEM

Course Title
Mentored Outreach and Service Learning

Course Description
Develop or practice experiments, activities, and demonstrations for community outreach. Develop leadership and communication skills to support community engagement with chemistry and science.

Department
Chemistry and Biochemistry

When Taught
Fall, Winter, Spring

Credit Hours

Min:
0.5

Fixed/Max:

Prerequisites

Fulfill ANY of the following requirements:

Prerequisites

Complete ALL of the following Courses:

- CHEM 354 - Organic Chemistry Laboratory--Majors

OR

Prerequisites

Complete ALL of the following Courses:

- CHEM 353 - Organic Chemistry Laboratory--Nonmajors. **AND** CHEM 201 - Chemical Handling and Safe Laboratory Practices

Note
For chemistry and other science majors.

Learning Outcomes

Learning Outcome
Critically evaluate literature references, in particular experimental reaction details including reagents, starting materials, solvent, temperature, apparatus, stoichiometry, and scale. Adapt and modify known procedures to design and execute new reactions to obtain desired products on small and moderate scales (mgg).

Learning Outcome
Monitor and evaluate the successful completion of reactions using TLC with various solvents and modes, solvent changes and co-spot interpretation.

Learning Outcome
Work up reactions using the appropriate organic and aqueous system based on polarity and acid/base properties including drying and solvent removal operations.

Learning Outcome
Perform basic purification operations using recrystallization, distillation, chromatography with proper choice of solvents, techniques, mode of operation, etc. based on the properties of the product compound.

Learning Outcome
Evaluate purity and identification of structures using hands on operation of NMR, IR, MS, and polarimetry.

Learning Outcome
Prepare sample, set up and obtain routine 1D 1H and 13C NMR spectra showing adequate signal locking, shimming, formatting, data processing, spectra interpretation with complete peak assignment.

Learning Outcome
Demonstrate understanding of NMR theory including magnetic field resonance, radio frequency pulse sequences, shift, splitting, polarization transfer, signal correlation, 2D experiments including homo and heterocorrelation spectroscopy, COSY, HSQC, NOESY, and multiple bond techniques, HMBC, TOCSY

Learning Outcome
Demonstrate understanding of MS theory including ionization techniques, EI, CI, FAB, ES, MALDI, detection techniques, fragmentation patterns of functional groups, molecular ion, base peak, isotopes, N-rule.

Learning Outcome
Demonstrate understanding of polarimetry theory including plane polarized light, interaction with chiral compounds, optical rotation and determination of enantiomeric excess.

Learning Outcome
Write clear lab reports including clear experimental detail, operation, characterization, interpretation, evaluation, and conclusions.

CHEM 460 - Mathematics for Physical Chemistry

Course Information

Teaching Area (new)
CHEM

Course Number
460

Teaching Area
CHEM

Course Title
Mathematics for Physical Chemistry

Course Description
Instruction in the mathematics relevant for physical chemistry, particularly in multivariable calculus, differential equations, and series expansions. Other topics, such as linear algebra, will be revisited in the context of physical chemistry. Computational software, such as Matlab, will be used to solve complex problems with numerical methods.

Department
Chemistry and Biochemistry

Simple Requisites

Prerequisites

Type
Prerequisite

Prerequisites

Fulfill ANY of the following requirements:

Prerequisites

Complete ALL of the following Courses:

- CHEM 351M - Organic Chemistry 1 - Majors
  AND PHSCS 220 - Introduction to Electricity and Magnetism

OR

Prerequisites

Complete ALL of the following Courses:

- CHEM 351 - Organic Chemistry 1
- PHSCS 220 - Introduction to Electricity and Magnetism

Learning Outcomes

Title
Wave Functions and Operators

Tags
203957, 1

Learning Outcome
Demonstrate understanding of wave functions and operators, including solving for eigenvalues and expectation values

Title
Interpret and Extract Information on Molecular Shape

Tags
203958, 4

Learning Outcome
Apply quantum models of molecules to interpret spectra and extract information on molecular shape

Title
Solve for Simple Bonding Orbitals

Tags
203959, 6

Learning Outcome
Solve for simple bonding orbitals using valence bond, linear combinations of atomic orbitals and symmetry adapted linear combinations

Title
Solve for the Partition Function of Molecular Systems

Tags
203960, 7

Learning Outcome
Solve for the partition function of molecular systems, including translational, rotational, vibrational and electronic energies

Title
Characterize Molecular Properties

Tags
204041, 5

Learning Outcome
Characterize molecular properties by solving for molecular symmetry

Title
Approximation Techniques

Tags
204075, 3

Learning Outcome
Apply approximation techniques (variation and perturbation) to relate model system to real chemical systems

Title
Properties of Model Systems

Tags
204181, 2

Learning Outcome
Solve for properties of model systems, including particle in a box, harmonic oscillator, rigid rotor, Hydrogen-like atoms

CHEM 463 - Physical Chemistry 2

Course Information

Teaching Area (new)
CHEM

Course Number
463

Teaching Area
CHEM

Course Title
Physical Chemistry 2

Course Description
Thermodynamics and equilibria, states of matter, kinetic-molecular theory, kinetics, statistical mechanics.

Department
Chemistry and Biochemistry

When Taught
Winter

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Simple Requisites

Prerequisites

Type
Prerequisite

Prerequisites

Complete ALL of the following Courses:

- CHEM 462 - Physical Chemistry 1

Learning Outcomes

Title
Find Connections

Tags
203961, 1

Learning Outcome
Demonstrate connections between molecular interactions and equations of state

Title
Laws of Thermodynamics

Tags
203962, 4

Learning Outcome
Apply the laws of thermodynamics to physical and chemical processes, including phase transitions, mixtures, chemical equilibrium, and electrochemical processes

Title
Analyze and Interpret Data

Tags
203963, 5

Learning Outcome
Analyze and interpret experimental data to draw conclusions about physical and chemical processes

Title
Describe Chemical Reactions

Tags
203995, 3

Learning Outcome
Describe the kinetics of chemical reactions in terms of molecular mechanisms and empirical rate laws

Title
Understand and Use Molecular Models

Tags
204161, 2

Learning Outcome
Describe physical and chemical phenomena in terms of molecular and bulk models and understand the limitations of these models

CHEM 464 - Physical Chemistry Laboratory 1

Course Information

Teaching Area (new)
CHEM

Course Number
464

Teaching Area
CHEM

Course Title
Physical Chemistry Laboratory 1

Course Description
Experiments in areas of physical chemistry, including quantum mechanics, spectroscopy, thermodynamics, kinetics, and statistical mechanics; computer manipulation of data; report preparation and presentation.

Department
Chemistry and Biochemistry

When Taught
Winter.

Credit Hours

Min:
1

Fixed/Max:
1

Lecture Hours

Fixed:
0

Lab Hours

Fixed:
3

Simple Requisites

Prerequisites

Type
Prerequisite

Complete ALL of the following Courses:

- CHEM 462 - Physical Chemistry 1
  AND CHEM 201 - Chemical Handling and Safe Laboratory Practices
  AND CHEM 227 - Principles of Chemical Analysis

Note
May be taken before, after, or concurrent (preferred) with Chem 465.

Learning Outcomes

Learning Outcome
Collect quantitative data using a variety of instruments, including calorimeters and spectrometers

Learning Outcome
Fit collected data to mathematical models and extract molecular and bulk parameters

Learning Outcome
Prepare and present clear graphs and tables, showing data from experiments

Learning Outcome
Write clear lab reports in standard scientific journal format

Learning Outcome
Prepare and give high quality oral presentations

CHEM 465 - Physical Chemistry Laboratory 2

Course Information

Teaching Area (new)
CHEM

Course Number
465

Teaching Area
CHEM

Course Title
Physical Chemistry Laboratory 2

Course Description
Additional experiments in physical chemistry (see Chem 464 for subjects); computer manipulation of data; report preparation and presentation.

Department
Chemistry and Biochemistry

When Taught
Winter.

Credit Hours

Min:
1

Fixed/Max:
1

Lecture Hours

Fixed:
0

Lab Hours

Fixed:
3

Simple Requisites

Prerequisites

Type
Completion Requirement

Complete ALL of the following Courses:

- CHEM 462 - Physical Chemistry 1
  AND CHEM 201 - Chemical Handling and Safe Laboratory Practices
  AND CHEM 227 - Principles of Chemical Analysis

Note
May be taken before, after, or concurrent (preferred) with Chem 464.

Learning Outcomes

Learning Outcome
Collect quantitative spectroscopic data using a variety of instruments, including FT-IR, UV/Vis

Learning Outcome
Fit collected data to physical chemical mathematical models and extract molecular parameters

Learning Outcome
Perform molecular computations on the molecules in laboratory experiments

Learning Outcome
Prepare and present clear graphs and tables, showing data from experiments

Learning Outcome
Write clear lab reports in standard scientific journal format

CHEM 467 - Physical Chemistry for Engineers

Course Information

Teaching Area (new)
CHEM

Course Number
467

Teaching Area
CHEM

Course Title
Physical Chemistry for Engineers

Course Description
Quantum mechanics, atomic and molecular structure, spectroscopy, computational methods, statistical mechanics, thermodynamics and equilibria, states of matter, kinetic-molecular theory, kinetics.

Department
Chemistry and Biochemistry

When Taught
Fall

Credit Hours

Min:
3

Fixed/Max:
3

Type
Prerequisite

Prerequisites

Fulfill ANY of the following requirements:

Prerequisites

Complete ALL of the following Courses:

- MATH 302 - Mathematics for Engineering 1
  AND PHSCS 121 - Introduction to Newtonian Mechanics

OR

Prerequisites

Complete ALL of the following Courses:

- MATH 314 - Calculus of Several Variables
  AND PHSCS 121 - Introduction to Newtonian Mechanics

Other Prerequisites

Chem 357 or Chem 351 should be taken prior to or concurrent with this course.

Recommended

Ch En 263

Note

For chemical engineering majors and other interested students in fields of engineering and physical science.

Learning Outcomes

Title
Fundamentals

Tags
204000, 0

Learning Outcome
understand the fundamentals of classical thermodynamics, quantum mechanics, reaction kinetics, and statistical mechanics, including foundational principles, key mathematical relationships and derivations, at a deeper, more rigorous level than Chem 111H and 112.

Title
Relate

Tags
204077, 1

Learning Outcome
be able to relate atomic/molecular properties and interactions to bulk properties and vice versa.

Title
Analyze

Tags
204083, 5

Learning Outcome
be able to analyze and interpret experimental data to draw conclusions about chemical processes from a wide range of disciplines, including chemistry, biology, engineering and geology.

Title
Interpret

Tags
204094, 2

Learning Outcome
be able to interpret atomic and molecular spectra in terms of quantum mechanical models.

Title
Develop and Use

Tags
204101, 6

Learning Outcome
be able to develop and use models, both conceptual and mathematical, of physical and chemical phenomena and understand the limitations of these models.

Title
Apply

Tags
204163, 4

Learning Outcome
be able to apply the laws of thermodynamics to physical and chemical processes.

Title
Describe

Tags
204176, 3

Learning Outcome
be able to describe the kinetics of chemical reactions in terms of molecular mechanisms and empirical rate laws.

CHEM 468 - Biophysical Chemistry

Course Information

Teaching Area (new)
CHEM

Course Number
468

Teaching Area
CHEM

Course Title
Biophysical Chemistry

Course Description
Applications of physical chemistry to biological systems. Spectroscopic applications, computational methods, structural biochemistry, thermodynamics, equilibria, statistical mechanics, transport properties, kinetics, quantum mechanics.

Department
Chemistry and Biochemistry

When Taught
Fall

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

3

Lab Hours

Fixed:
0

Simple Requisites

Prerequisites

Type
Prerequisite

Prerequisites

Fulfill ANY of the following requirements:

Prerequisites

Complete ALL of the following Courses:

- CHEM 481 - Biochemistry.
  AND PHSCS 220 - Introduction to Electricity and Magnetism

OR

Prerequisites

Complete ALL of the following Courses:

- PHSCS 220 - Introduction to Electricity and Magnetism
  AND CHEM 381 - Fundamentals of Biochemistry

Note
For biochemistry (BS) majors and those interested in the health professions or biochemistry.

Learning Outcomes

Title
Fundamental Concepts in Four Principal Areas

Tags
203917, 1

Learning Outcome
Describe conceptually the fundamental concepts in the four principal areas of physical chemistry: classical thermodynamics, statistical thermodynamics kinetics and quantum mechanics

Title
Define and Manipulate Concepts Mathematically

Tags
203918, 2

Learning Outcome
Define mathematically the concepts outlined in 1) and manipulate the fundamental and derived equations associated with these concepts

Title
Use Skills to Calculate or Predict Conditions

Tags
203919, 3

Learning Outcome
Use the above skills to calculate or predict the equilibrium conditions or direction of spontaneous biochemical processes that are involved in metabolism or energy transfer events given appropriate thermodynamic data and initial system conditions

Title
Mathematical and Graphical Techniques

Tags
203920, 4

Learning Outcome
Employ mathematical and graphical techniques on enzyme kinetic data to extract key parameters and to identify inhibition mechanisms

Title
Solve Schroedinger Equation Problems

Tags
203921, 5

Learning Outcome
Solve simple Schroedinger equation problems (e.g., particle in a box), identify boundary conditions, and explain the significance of boundary conditions on the observance of quantized effects

Title
Predictions of Behavior

Tags
203922, 6

Learning Outcome
Relate the simple Hamiltonians from above to biological molecules and systems and generalize from the simple results to make predictions regarding behavior in the biological systems

Title
Nature of Electronic Energy Levels

Tags
203923, 7

Learning Outcome
Identify the nature of electronic energy levels in key photoactive biological molecules and use spectroscopic data to probe these levels

Title
Apply Concepts to Photosynthesis and Vision

Tags
203924, 8

Learning Outcome
Apply fundamental concepts of electronic structure and reaction kinetics to the steps in photosynthesis and vision

Title
Physical Chemistry Perspectives Lead to Deeper Understanding

Tags
203925, 9

Learning Outcome
Provide examples in which physical chemistry perspectives have enabled a deeper more complete understanding of the structure and function of biological molecules and complex biological systems

CHEM 477R - Secondary Minor Student Teaching

Course Information

Teaching Area (new)
CHEM

Course Number
477R

Teaching Area
CHEM

Course Title
Secondary Minor Student Teaching

Course Description
Supervised, full-day, four week experience to develop and demonstrate competence in teaching minor area course content in the secondary classroom.

Department
Chemistry and Biochemistry

When Taught
Fall, Winter, Spring

Credit Hours

Min:
4

Fixed/Max:
4

Lecture Hours

Fixed:
0

Lab Hours

Fixed:
0

Other Prerequisites
Sc Ed 377R or minor area equivalent; admittance to teaching major; FBI fingerprint background clearance.

CHEM 481 - Biochemistry.

Course Information

Teaching Area (new)
CHEM

Course Number
481

Teaching Area
CHEM

Course Title
Biochemistry.

Course Description
First-semester biochemistry. Molecular components of cells, chemical structure and function, enzymes, metabolic transformations, photosynthesis.

Department
Chemistry and Biochemistry

When Taught
Fall, Winter, Spring

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Simple Requisites

Prerequisites

Type
Prerequisite

Prerequisites

Complete ALL of the following Courses:

- CHEM 352 - Organic Chemistry 2

Other Prerequisites
Completion of CELL 120 or BIO 130 or MMBIO 121.

Note
For students in biological sciences and others who contemplate pursuing advanced degrees, including medicine.

Learning Outcomes

Title
Interpret and Critique Experimental Data

Tags
204010, 20

Learning Outcome
Interpret and critique experimental data relating to biochemical models

Title
Explain How Structure Determines Biological Function

Tags
204028, 14

Learning Outcome
Explain how the structure of biomolecules such as proteins, nucleic acids, lipids, and carbohydrates determines their biological function

Title
Mastery of Key Concepts

Tags
204034, 13

Learning Outcome
Demonstrate mastery of key concepts in the Biochemistry subdiscipline and articulate the relationships between chemistry and biology. This outcome is elaborated in outcomes 2-5 below

Title
Understanding Reactivity in Metabolic Pathways

Tags
204040, 17

Learning Outcome
Push arrows to predict and understand reactivity in metabolic pathways

Title
Communicate in Writing

Tags
204043, 18

Learning Outcome
Communicate scientific ideas clearly to other specialists in writing

Title
Energy from Metabolic Reaction

Tags
204166, 16

Learning Outcome
Understand how energy is generated from metabolic reaction pathways

Title
Research

Tags
204186, 19

Learning Outcome
Identify and understand primary research articles relevant to a specific biochemical question of current interest

Title
Enzymes Catalyze Reactions

Tags
204190, 15

Learning Outcome
Describe how enzymes catalyze reactions in terms of thermodynamics, kinetics, and mechanistic strategies

CHEM 482 - Mechanisms of Molecular Biology

Course Information

Teaching Area (new)
CHEM

Course Number
482

Teaching Area
CHEM

Course Title
Mechanisms of Molecular Biology

Course Description
Second-semester biochemistry. Nucleic acid biochemistry and molecular biology: nucleotide metabolism, chromosome and chromatin structure, DNA structure and replication, RNA transcription and gene expression, protein synthesis and regulation, eukaryotic gene systems, signal transduction.

Department
Chemistry and Biochemistry

When Taught
Fall

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Simple Requisites

Prerequisites

Type
Prerequisite

Prerequisites

Complete at least 1 of the following courses:

- CHEM 381 - Fundamentals of Biochemistry
  OR CHEM 481 - Biochemistry.

Learning Outcomes

Title
Maintain

Tags
204014, 9

Learning Outcome
Maintain faith through challenges and ethical boundaries in reporting and interpreting data.

Title
Design

Tags
204018, 2

Learning Outcome
Design a DNA cloning strategy, explain controls necessary, and write procedural plan.

Title
Determine

Tags
204029, 1

Learning Outcome
Determine how to perform and interpret an electrophoresis separation of DNA fragments, southern blot, restriction map, polymerase chain reaction, and a DNA sequencing reaction with necessary controls.

Title
Interacts

Tags
204072, 8

Learning Outcome
Determine with what a protein interacts: Interpret gel shift assays, Chromatin Immunoprecipitation, DNA footprinting, and yeast two hybrid reporter assays.

Title
Techniques

Tags
204087, 4

Learning Outcome
Determine when and how to use techniques that involve RNA: Northern blots, quantitative PCR, microarrays, S1 nuclease and primer extension mapping of the transcriptional start with appropriate controls.

Title
Interpret

Tags
204103, 7

Learning Outcome
Determine where a protein is localized in a tissue or cell: interpret a western blot, protein fusion assays.

Title
Mechanism

Tags
204106, 3

Learning Outcome
Draw and explain the mechanism of RNA transcription and how RNA is processed, spliced, and regulated. Understand the basic mechanisms of transcriptional regulation using the example of transcription of genes necessary for cholesterol synthesis.

Title
Draw and Explain

Tags
204108, 0

Learning Outcome
Draw the structure of DNA, determine the topology of a plasmid, explain the chemical sequence of events that occur during DNA replication and draw structural changes that occur due to mutation.

Title
Sequence

Tags
204135, 5

Learning Outcome
Determine the sequence of amino acids in a protein from a series of nucleotides.

Title
Process

Tags
204185, 6

Learning Outcome
Draw and explain the process of protein translation and how it is regulated.

CHEM 483 - Bioenergetics and Metabolism

Course Information

Course Number
483

Teaching Area
CHEM

Course Title
Bioenergetics and Metabolism

Course Description
An advanced discussion of the biochemical processes allowing anabolism and catabolism, including the regulation of the metabolic pathways within individual cells and across tissues in complex organisms. Recent developments in analytical methods, genetics of disease, and data analysis will be considered.

Department
Chemistry and Biochemistry

When Taught
Winter

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Simple Requisites

Prerequisite

Type
Prerequisite

Complete ALL of the following Courses:
- CHEM 482 - Mechanisms of Molecular Biology

Recommended
Chem 586 should be taken concurrently

Learning Outcomes

Title
Bonding and Structure

Learning Outcome
Recognize how bonding patterns and stereochemistry define the reactions used in metabolism.

Title
Enzyme Catalysis

Learning Outcome
Describe and analyze enzymatic catalysis in terms of energetics and reaction mechanisms.

Title
Structure/Function Relationships

Learning Outcome
Identify fundamental principles tying protein structure/function relationships to nutrient availability and cellular energetic status resulting in pathway-level regulation of metabolism.

Title
Metabolism Between Tissues

Learning Outcome
Use fundamentals of enzyme structure modification, substrate and product partitioning and secondary messengers to anticipate reactions and flow of metabolism between the tissues of complex organisms.

Title
Analyze and Interpret Data

Learning Outcome
Critically analyze, interpret, and make predictions from written, mathematical and/or graphical experimental data.

CHEM 489 - Structural Biochemistry

Course Information

Teaching Area (new)
CHEM

Course Number
489

Teaching Area
CHEM

Course Title
Structural Biochemistry

Course Description
Molecular structures of proteins, RNA and DNA as determinants of biological function. Topics include thermodynamics of folding and binding, structural determination, spectroscopy, modeling, protein recognition.

Department
Chemistry and Biochemistry

When Taught
Winter

Credit Hours

Min:
3

Fixed/Max:
3

Complete ALL of the following Courses:

- CHEM 468 - Biophysical Chemistry

Learning Outcomes

Title
Relate Structure to Biological Function

Tags
203928, 2

Learning Outcome
Relate the structure of a macromolecule to its biological function

Title
Structural Information for Biological Macromolecules

Tags
203929, 3

Learning Outcome
Describe how X-ray crystallography, nuclear magnetic resonance, cryogenic electron microscopy, and circular dichroism techniques give structural information for biological macromolecules

Title
Communicate Orally and In Writing

Tags
203930, 4

Learning Outcome
Communicate scientific ideas (e.g. structure-function relationships) clearly and concisely to others orally and in writing, and use ethical standards in oral and written presentations

Title
Work With Peers

Tags
203931, 5

Learning Outcome
Work with peers to answer scientific questions

Title
Motifs and Symmetries in Macromolecular Structures

Tags
204067, 1

Learning Outcome
Identify motifs and symmetries in macromolecular structures and chemical interactions that maintain structural integrity

CHEM 495 - Senior Seminar

Course Information

Teaching Area (new)
CHEM

Course Number
495

Teaching Area
CHEM

Course Title
Senior Seminar

Course Description
Research topics presented by faculty and visiting scientists. Completion of undergraduate portfolio.

Department
Chemistry and Biochemistry

When Taught
Fall and Winter

Credit Hours

Min:
0.5

Fixed/Max:
0.5

Lecture Hours

Fixed:
1

Lab Hours

Fixed:
0

Simple Requisites

Prerequisites

Type
Prerequisite

Prerequisites

Complete ALL of the following Courses:

- CHEM 594R - General Seminar

Note
Required of all seniors in all chemistry and biochemistry degree programs the last semester in residence. Note: Check the seminar schedule at chem.byu.edu for current schedule and updates. Attendance at a minimum of 10 seminars is required.

Learning Outcomes

Title
Become Familiar With Current Research

Tags
203932, 1

Learning Outcome
Become familiar with a variety of current research areas by listening to numerous visiting researchers describe their recent research results.

Title
Prepare for Seminar Presentations

Tags
203933, 2

Learning Outcome
Prepare for seminar presentations by reading literature articles written by visiting speakers before attending the presentation.

Title
Write Summaries of Research Papers

Tags
203934, 3

Learning Outcome
Improve science-writing skills by writing summaries of research papers.

Title
Reflect on BYU Education

Tags
203935, 5

Learning Outcome
Reflect on your BYU education and evaluate how it helps you achieve your goals.

Title
Notes in Presentations

Tags
204047, 4

Learning Outcome
Take notes in presentations attended to record thoughts and ideas for future reference.

CHEM 496R - Academic Internship: Chemistry and Biochemistry

Course Information

Teaching Area (new)
CHEM

Course Number
496R

Teaching Area
CHEM

Course Title
Academic Internship: Chemistry and Biochemistry

Course Description
Research experience in an industrial, academic, or government laboratory in collaboration with a BYU faculty colleague/supervisor.

Department
Chemistry and Biochemistry

When Taught
All Semesters/Terms

Credit Hours

Min:
0.5

Fixed/Max:
6

Other Prerequisites
Instructor's consent; Chem 201 or concurrent enrollment or special safety training

Note
An APPROVED Internship Application is required before adding.

Learning Outcomes

Title
Internship

Tags
204079, 0

Learning Outcome
The student will carry out a successfull internship connecting classroom principles to real-world applications.

Title
Internship report

Tags
204125, 1

Learning Outcome
The students will provide a written report or oral presentation explaining the technical work performec in the internship and its connection to the chemistry curriculum.

CHEM 497R - Mentored Learning in Chemistry/Biochemistry

Course Information

Teaching Area (new)
CHEM

Course Number
497R

Teaching Area
CHEM

Course Title
Mentored Learning in Chemistry/Biochemistry

Course Description
Undergraduate research experience under the direction of a faculty mentor.

Department
Chemistry and Biochemistry

When Taught
All Semesters/Terms

Credit Hours

Min:
1

Fixed/Max:
1

Other Prerequisites
Instructor's consent, and Chem 201 or concurrent enrollment or special safety training

Recommended
CHEM 297R; CHEM 297R

Learning Outcomes

Title
Mentored research
