Plan courses of action for continuous improvement in a variety of cases and settings

Title
Defend with Principles & Theories

Tags
176199, 3

Learning Outcome
Defend your chosen courses of action using quality principles and theories

Title
Apply Quality Tools & Analyses

Tags
176203, 1

Learning Outcome
Apply appropriate quality tools and analyses proficiently to address real-world needs

Title
Delivery Quality Improvement Projects

Tags
176294, 1

Learning Outcome
Deliver quality improvement projects that serve people and organizations

GSCM 403 - Purchasing and Supply Management

Course Information

Teaching Area (new)
GSCM

Course Number
403

Teaching Area
GSCM

Course Title
Purchasing and Supply Management

Course Description
Focuses on upstream supply chain activities of supplier selection, management, and development. Negotiation, costing, product development, and commodity analysis.

Department
Marketing and Global Supply Chain

When Taught
Fall

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Other Prerequisites
For Global Supply Chain majors only.

Learning Outcomes

Title
Strategic analysis, planning, an execution

Tags
176102, 2

Learning Outcome
Conduct a category study for a particular commodity in the the context of an existing company, including internal analysis, market analysis, strategy development, and plans for execution.

Title
Understanding and applying cost analysis tools

Tags
176195, 1

Learning Outcome
Understand direct and indirect costs, fixed, step, and variable costs, target costs, and various ways to perform cost analyses to drive continuous improvement.

Title
Ethical Professional Standards

Tags
176295, 0

Learning Outcome
Describe the ethical and professional standards expected among supply management professionals.

Title
Find, develop, and manage suppliers

Learning Outcome
Understand the critital steps in procurement process, including identifying what is needed, finding potential suppliers, negotiating with the chosen supplier, developing the right relationship with that supplier, and then managing the supplier so they can be successful.

GSCM 404 - Supply Chain Logistics

Course Information

Teaching Area (new)
GSCM

Course Number
404

Teaching Area
GSCM

Course Title
Supply Chain Logistics

Course Description
Integration of materials management (inbound transportation), physical distribution (outbound transportation), inventory, warehousing, facility location, customer service, packaging, and materials handling.

Department
Marketing and Global Supply Chain

When Taught
Fall

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Other Prerequisites
For Global Supply Chain majors only.

Learning Outcomes

Title
Apply Executive Decision Making Tools

Tags
176261, 3

Learning Outcome
Apply executive decision making tools

Title
Demonstrate Communication Proficiency

Tags
176260, 2

Learning Outcome
Demonstrate proficency in oral and written communication

Title
Work in Global Environments

Tags
176259, 1

Learning Outcome
Demonstrate ability to work in global environments

Title
Manage Logistics Ecosystems

Tags
176296, 0

Learning Outcome
Demonstrate mastery of managing logistics ecosystems (demand planning, inventory management, transportation management, warehousing, and location analysis)

GSCM 410 - Artificial Intelligence in Business Operations

Course Information

Course Number
410

Teaching Area
GSCM

Course Title
Artificial Intelligence in Business Operations

Course Description
Artificial Intelligence (AI) can impact business operations in substantial ways. This course provides students who do not have a technical (i.e., software engineering) background with a working knowledge of AI concepts, principles, tools, and applications. We review current types of AI systems and considerations for implementation. The course will prepare students to use AI on the job as well as direct others who manage the technical aspects of AI systems.

Department
Marketing and Global Supply Chain

When Taught
Winter

Credit Hours

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Learning Outcomes

Title
Explain AI Concepts and Types

Learning Outcome
Students will be able to explain fundamental concepts and types of AI models.

Title
Determine AI Use Cases

Learning Outcome
Students will determine business operation use cases for AI models.

Title
Articulate AI Implementation Steps

Learning Outcome
Students will able to articulate steps to implementing AI systems in business operations.

Title
Address AI Risks and Ethical Issues

Learning Outcome
Students will identify limitations, risks, and ethical issues of AI systems.

GSCM 411 - Global Business Negotiations

Course Information

Teaching Area (new)
GSCM

Course Number
411

Teaching Area
GSCM

Course Title
Global Business Negotiations

Course Description
Developing an effective negotiation framework for cross-national/cultural negotiation techniques relative to business and other life situations.

Department
Marketing and Global Supply Chain

When Taught
Winter

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Other Prerequisites
For Marriott School majors only.

Learning Outcomes

Title
Conduct Negotiations

Tags
176039, 2

Learning Outcome
Conduct a negotiation in a cultural setting other than the US.

Title
Impromptu Negotiating

Tags
176120, 5

Learning Outcome
Conduct an impromptu negotiation.

Title
Understanding Concepts

Tags
176152, 0

Learning Outcome
Understand and apply concepts of BATNA, ZOPA, etc.

Title
Integrative Negotiating

Tags
176172, 4

Learning Outcome
Conduct a successful integrative negotiation.

Title
Negotiating Strategies

Tags
176262, 3

Learning Outcome
Use negotiating strategies to strengthen your position.

Title
Cultural Factors

Tags
176297, 1

Learning Outcome
Understand and apply cultural factors to specific cases.

GSCM 412 - Operations Analytics

Course Information

Teaching Area (new)
GSCM

Course Number
412

Teaching Area
GSCM

Course Title
Operations Analytics

Course Description
Methods and tools necessary for analyzing and solving problems associated with global supply chain management.

Department
Marketing and Global Supply Chain

When Taught

Learning Outcomes

Title
Decision Modeling and Optimization

Tags
208226, 0, 1

Learning Outcome
Use optimization techniques to solve operational decision problems.

Title
Data Retrieval

Tags
177138, 1

Learning Outcome
Use current methods to retrive data.

Title
Data Wrangling and Analysis

Tags
177046, 2

Learning Outcome
Use data wrangling to manipulate data and find trends.

Title
Data-Backed Presenting

Learning Outcome
Use data to prepare and deliver effective presentations.

GSCM 414 - Sustainable Product and Project Life Cycle Management

Course Information

Teaching Area (new)
GSCM

Course Number
414

Teaching Area
GSCM

Course Title
Sustainable Product and Project Life Cycle Management

Course Description
Focus on managing products throughout their lifecycles. Explore product design through the end of the production cycle, their disposal, and recapture of materials. Apply project management to enable better management of resources, organizations, and processes.

Department
Marketing and Global Supply Chain

When Taught
Winter

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Other Prerequisites
Only for students admitted to the BYU Marriott School of Business

Learning Outcomes

Title
Apply Eternal Principles

Learning Outcome
Identify eternal principles from course materials, activities, and discussions and apply them to personal life and business decision-making.

Title
Explain Supply Chain's Impact

Learning Outcome
Explain how design, procurement, production processes, and logistics impact resource utilization and customer service.

Title
Understand Supply Chain's Role in Product Design

Learning Outcome
Understand the role that supply chain professionals play in product design to influence cost, repairability, and durability.

Title
Analyze Supply Chain Design

Learning Outcome
Analyze how supply chain design affects circular supply chains, including reverse logistics, product recovery, reuse, and customer service.

Title
Deliver Products and Services Sustainably

Learning Outcome
Integrate product design, procurement, production, and logistics to deliver products and services sustainably.

GSCM 419 - Customer Relationship Management

Course Information

Teaching Area (new)
GSCM

Course Number
419

Teaching Area
GSCM

Course Title
Customer Relationship Management

Course Description
Methods and principles for effective management of customer relationships within service businesses. Analyzing customer-interactive processes with regard to strategic innovation, performance measurement and improvement, process efficiency, interactive job design, service marketing, and service quality assurance.

Department
Marketing and Global Supply Chain

When Taught
Winter

Credit Hours

Min:

Learning Outcomes

Title
Identify Eternal Principles

Tags
176030, 2

Learning Outcome
Eternal principles: Identify principles from course materials, activities, and discussions that are eternal and impact our lives and business decisions

Title
Engage in Teamwork

Tags
176263, 0

Learning Outcome
Teamwork: Engage proactively as an individual and as a member of a team.

Title
Manage and Evaluate Risk

Tags
176264, 4

Learning Outcome
Risk Assessment: Manage and evaluate risk.

Title
Communicate Persuasively

Tags
176298, 1

Learning Outcome
Communication - Communicate persuasively.

Title
Solve Case Problems with Supply Chain Knowledge

Learning Outcome
Supply Chain: Use knowledge of Supply Chain theory, strategy, and practice to solve specific case problems and challenges.

GSCM 429 - Global Supply Chain Strategy

Course Information

No Requirements

Other Prerequisites
Completion of GSCM 412 or MBA 530; or by instructor permission.

Learning Outcomes

Title
Apply stochastic optimization techniques

Learning Outcome
Apply optimization techniques (which may include decision trees, descriptive simulation models, simulation software, etc.) to solve operational decision problems involving uncertainty.

Title
Use databases to store and retrieve data

Learning Outcome
Use databases (such as Microsoft Access) to store and retrieve Ops/GSCM data through linking, querying, and aggregating various databases.

Title
Perform advanced data analytics

Learning Outcome
Perform advanced data analytics using a combination of tools (which may include Excel functions, Pivot Tables, Data Tables, and VBA programming) to clean and prepare data, identify trends, and explore implications.

Title
Create executive-level dashboards

Learning Outcome
Create professional executive-level dashboards that communicate key organization metrics.

Learning Outcomes

Title
Operations Scope

Tags
176044, 0

Learning Outcome
Understand scope and importance of operating processes and decisions

Title
Quality Management

Tags
176101, 2

Learning Outcome
Understand key constructs in quality management

Title
Operations and Strategy

Tags
176207, 3

Learning Outcome
Understand link between operations and strategic management of the firm

Title
Skills

Tags
176300, 1

Learning Outcome
Demonstrate quantitative skills required to analyze operating processes

Title
Critical Assessment

Tags
176301, 4

Learning Outcome
Develop a point of view about an operational challenge and argue persuasively for it in a professional setting.

GSCM 585 - Scholarly Research in GSCM

Course Information

Teaching Area (new)
GSCM

Course Number
585

Teaching Area
GSCM

Course Title
Scholarly Research in GSCM

Course Description
Introduction to theory and methods that are foundational to scholarly research in global supply chain management. Understanding how to navigate previously published research, distinguish between speculation and verified truth, identify research opportunities and appropriate methods, develop research plans and proposals, and impact contemporary thought through publication. This course can help students tap into scholarly research, participate in scholarly research, and prepare to apply to GSCM PhD programs.

Learning Outcomes

Title
Communication Skills

Tags
195944, 1

Learning Outcome
In both written and spoken target language, communicate with reasonable accuracy about real-world activities with well-educated members of the target-culture accustomed to dealing with non-native speakers.

Title
Comprehension

Tags
195946, 2

Learning Outcome
Understand every-day written and verbal instructions. Comprehend concrete details and global meaning of intermediate-level written and spoken passages related to familiar topics that native speakers encounter routinely in their daily life.

Title
Cultural Knowledge

Tags
195947, 3

Learning Outcome
Discuss in the target language cultural practices related to every-day life in the target culture. Acquire basic background knowledge of important achievements related to the target culture (historical figures and events, major literary and artistic movements, government and religious institutions, etc.).

Title
General Education Requirements

Tags
195949, 4

Learning Outcome
Complete Languages of Learning and Global & Cultural Awareness for General Education.

Other Prerequisites
Students must be accepted into a GWS or other approved Study Abroad program prior to enrollment.

Note
This course will only be offered in conjunction with a GWS approved Study Abroad or similar Experiential Learning opportunity.

Learning Outcomes

Title
Women and Society

Learning Outcome
Students will demonstrate knowledge of the ways different institutions (such as religion, education, media, family, government and law), issues (gender-based violence, health, representation in the media, the workplace), and factors (race, ethnicity, class, sexuality, ability) intersect with and affect women's lives.

Title
Women’s Contributions

Learning Outcome
Students will demonstrate knowledge of the worldwide contributions of women (individually and collectively) to history, culture, politics, health, sciences, religions, family, etc.

Title
Effective Communication and Analysis

Learning Outcome
Students will read, write, and think analytically. They will conduct research using primary and secondary sources and communicate that research effectively in oral, written, and multi-media presentations.

Title
Women and Stewardship

Learning Outcome
Students will be afforded opportunities in and outside the classroom to define and cultivate their personal, civic, and spiritual stewardships.

Prerequisite

Prerequisites

Complete ALL of the following Courses:

- HINDI 202 - Second-Year Language Study: Hindi

Note
Teacher may waive prerequisite based on prior experience.

Learning Outcomes

Title
Analyze

Tags
196115, 1

Learning Outcome
Analyze target language morphology and syntax.

Title
Apply

Tags
196116, 2

Learning Outcome
Apply grammar rules with accuracy to a variety of advanced grammatical and communicative tasks.

Title
Independent Learning

Tags
196117, 3

Learning Outcome
Function as independent learners of the target language by using proper terms and appropriate resources for language analysis.

HINDI 330 - Advanced Language Proficiency Through Cultural Studies: Hindi

Course Information

Teaching Area (new)
HINDI

Course Number
330

Teaching Area
HINDI

Course Title
Advanced Language Proficiency Through Cultural Studies: Hindi

Course Description
Study of Hindi culture using interpersonal, presentational, and interpretive skills in the target language.

Department
Language Studies

When Taught
Contact Department

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Other Prerequisites
Hindi 202 or equivalent.

Note
Entry course for returned missionaries or others of equivalent language experience. Required course for obtaining language credit by examination. May fulfill the GE Languages of Learning requirement.

Learning Outcomes

Title
Communication Skills

Tags
196118, 1

Learning Outcome
In both written and spoken target language, communicate accurately with well-educated members of the target-culture about real-world activities.

Title
Comprehension

Tags
196119, 2

Learning Outcome
Understand detailed written and verbal instructions. Comprehend historical passages, newspaper and magazine articles, and broadcast news reports well educated native speakers encounter routinely in their daily life.

Title
Cultural Knowledge

Tags
196120, 3

Learning Outcome
Acquire background knowledge of important achievements related to the target culture (historical figures and events, major literary and artistic movements, government and religious institutions, etc.). Discuss in the target language cultural practices related to major life events in the target culture (birth, marriage, death, etc.).

Title
General Education Requirements

Tags
196121, 4

Learning Outcome
Complete Languages of Learning and Global & Cultural Awareness for General Education.

HINDI 340 - Introduction to Literature: Hindi

Course Information

Teaching Area (new)
HINDI

Course Number
340

Teaching Area
HINDI

Course Title
Introduction to Literature: Hindi

Course Description
Explore Hindi culture through stories, music, and history. Develop advanced proficiency using authentic materials, including film, literature, and other creative works.

Learning Outcomes

Title
Recognize and Analyze

Tags
196122, 1

Learning Outcome
Recognize and analyze the most important genres in target-language literature.

Title
Key Characteristics

Tags
196123, 2

Learning Outcome
Identify and discuss key characteristics of the most important literary movements in the target culture.

Title
Context

Tags
196124, 3

Learning Outcome
Place literature in a meaningful cultural and historical context.

Title
Language Skills

Tags
196125, 4

Learning Outcome
Improve target-language reading, writing, and speaking skills.

Complete ALL of the following Courses:

- HINDI 330 - Advanced Language Proficiency Through Cultural Studies: Hindi

Learning Outcomes

Title
Defined Career Purposes

Tags
196126, 1

Learning Outcome
Develop overall language and cultural competence needed to study and begin entry into a career agreed upon by the Center for Language Studies.

Title
Knowledge

Tags
196127, 2

Learning Outcome
Carry out research to identify, understand, and discuss standards, processes, people and cultural norms associated with the target career.

Title
Interpretive Competence

Tags
196128, 3

Learning Outcome
Understand, interpret and analyze advanced-level written and oral texts on topics related to the target career.

Title
Communicative Competence

Tags
196129, 4

Learning Outcome
Communicate effectively at the advanced-level in order to function in a variety of situations likely to be encountered when dealing with native speakers who are associated with the target career. This will include interpersonal communication and both written and oral presentational communication.

Title
Cultural Competence

Tags
196130, 5

Learning Outcome
Interact with cultural competence and understanding when dealing with native speakers who are associated with the target career.

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Note
Additional seats for specific sections may be available to Freshman Mentoring participants through envelopes. Also offered by BYU Independent Study; enroll anytime throughout year; one year to complete; additional tuition required; register at is.byu.edu.

Learning Outcomes

Title
Critical Analysis

Tags
182922, 1

Learning Outcome
Be able to analyze historical questions and issues clearly, assess historical information accurately, and distinguish between questionable and valid historical assertions

Title
Analytical Reading

Tags
182923, 2

Learning Outcome
Be able to read, analyze, and discuss both primary and secondary source documents dealing with world history (pre-1500 C.E.).

Title
Cultural Works and Values

Tags
182973, 5

Learning Outcome
Gain an appreciation of influential cultural works produced in a variety of pre-modern societies and through them come to a clearer understanding of the fundamental values held by past peoples-including, how they understood the natural world, what it meant to be human, and their relationship with the divine.

Title
Lifelong Learning

Tags
182974, 6

Learning Outcome
Recognize and be able to apply the tools necessary for a lifelong appreciation of the study of world history.

Title
Historical and Geographical Knowledge

Tags
183324, 1

Learning Outcome
Demonstrate a basic geographical knowledge of the world, and more importantly, develop the ability to discuss how geographical and environmental realities, as well as cross-regional interactions, have impacted historical development

Title
Historical Comparisons

Tags
183424, 1

Learning Outcome
Be able to identify major societies of the pre-1500 C.E. era and make historical comparisons between them, in regard to political systems, trade and economics, social structures, religious beliefs, and gender roles

Title
Analytical Writing

Tags
183378, 5

Learning Outcome
Improve the clarity and grace of their analytical writing.

- HIST 217 - The Family Historian's Craft

Learning Outcomes

Title
Research Methodology

Tags
182938, 1

Learning Outcome
Students will be able to identify and solve basic historical and genealogical problems in the United States through primary and secondary source research, using library, archival and technological resources

Title
Incorporate Historical Background

Tags
182939, 2

Learning Outcome
Students will be able to recognize and incorporate the historical background of the time and place in their genealogical research

Title
Evidentiary Analysis

Tags
182940, 3

Learning Outcome
Students will be able to utilize a significant range of skills and abilities in critical genealogical evidentiary analysis and be able to distinguish that from historical analysis

Title
Knowledge of Sources

Tags
183000, 4

Learning Outcome
Students will be able to demonstrate content knowledge of primary historical sources for the United States

Title
Effective Communication

Tags
183355, 1

Learning Outcome
Students will be able to produce genealogical research reports and narrative family histories and compiled lineages that are clear, precise and well-written;

Title
Apply Research Skills

Tags
183426, 4

Learning Outcome
Students will be able to apply research skills learned to the search for their own ancestors and to assist others in their searches in the United States;

Title
Using Genealogical Technology

Tags
183428, 0, 6

Learning Outcome
Students will be able to explain the roles of New.FamilySearch.org and other FamilySearch.org programs, integrating in the process the academic knowledge from this course with a testimony of the current direction of family history in the Chiurch of Jesus Christ of Latter-day Saints.

HIST 220 - The United States Through 1877

Course Information

Teaching Area (new)
HIST

Course Number
220

Teaching Area
HIST

Course Title
The United States Through 1877

Course Description
Discovery, colonization, American Revolution, estabishment of the Constitution, foreign affairs, westward expansion, slavery, sectionalism, Civil War, and reconstruction.

Department
History

When Taught
Fall; Winter; Spring; Summer.

Credit Hours

Min:
3

Fixed/Max:

Learning Outcomes

Title
Historical Knowledge of Middle East

Tags
182981, 1

Learning Outcome
Gain a historical consciousness by demonstrating a knowledge of major developments in Middle East and world history and understand key historical terms and theories.

Title
Effective Communication

Tags
183252, 2

Learning Outcome
Skillfully integrate data into a coherent argument expressed through a clear, well-written style and through oral communication.

Title
Research Literature

Tags
183348, 1

Learning Outcome
Acquire the ability to analyze historical questions and issues clearly, assess historical information accurately, and distinguish between questionable and valid historical assertions by using the historical method of research effectively by skillfully and honestly using primary and secondary sources.

Title
Faith and Reason

Tags
183449, 3

Learning Outcome
Demonstrate how faith and reason intersect.

HIST 242R - (Hist-NES 347R) Arab and Islamic Civilization.

Course Information

Teaching Area (new)
HIST

Course Number
242R

Teaching Area
HIST

Course Title
(Hist-NES 347R) Arab and Islamic Civilization.

Course Description
Social science/humanities core course covering Arab and Islamic civilization; historical evolution of Middle East to present. Overview of modern Palestinian society.

Department
History

When Taught
All Semesters/Terms

Credit Hours

Min:
1

Fixed/Max:
2

Note
Elective credit for major and minor in Near Eastern Studies. Offered at the Jerusalem Center for Near Eastern Studies only. Does not receive GE credit.

Learning Outcomes

Title
Historical Knowledge

Tags
183579, 1

Learning Outcome
Students will analyze the major historical events that pertain to the history of Arab and Islamic Civilization.

Title
Analysis of Texts

Tags
183580, 2

Learning Outcome
Students will read and analyze historical texts (primary and secondary sources) dealing with Arab and Islamic Civilization.

Title
Historical Context for the Present

Tags
183581, 3

Learning Outcome
Students will be able to explain the historical context for the current political, economic, and cultural situation in the modern Middle East.

HIST 243R - (Hist-NES 349R) Jewish Civilization.

Course Information

Teaching Area (new)
HIST

Course Number
243R

Teaching Area
HIST

Course Title
(Hist-NES 349R) Jewish Civilization.

Course Description
Social science/humanities core course; broad introduction to Jewish self-understanding and history, focusing on relationships among people, faith, and land.

Department
History

When Taught
All Semesters/Terms

Credit Hours

Min:
1

Fixed/Max:
2

Note
Elective credit for major and minor. Offered at the Jerusalem Center for Near Eastern Studies only. Does not receive GE credit.

Learning Outcomes

Title
Historical Knowledge

Tags
183582, 1

Learning Outcome
Students will gain an understanding of the major historical events in Jewish history.

Title
Historical Ties to the Present

Tags
183583, 2

Learning Outcome
Students will be able to link historical events to modern developments in Jewish self-understanding and culture.

HIST 244 - Jewish History: A.D. 70 to the Present

Course Information

Teaching Area (new)
HIST

Course Number
244

Teaching Area
HIST

Course Title
Jewish History: A.D. 70 to the Present

Course Description
Jewish diaspora, Jewish life in Europe; Yiddish culture; development of Zionism; emergence of modern Israel; Jewish-Christian relations; Jewish contributions to culture and society in the United States.

Department

Learning Outcomes

Title
Historical Knowledge of Jewish History

Tags
182930, 1

Learning Outcome
Gain a historical consciousness by demonstrating an understanding of major developments in Jewish and history, and understand key historical terms and theories.

Title
Critical Analysis

Tags
182931, 2

Learning Outcome
Acquire the ability to analyze historical questions and issues clearly, assess historical information accurately and distinguish between questionable and valid historical assertions.

Title
Recognize Anti-Semitism

Tags
182932, 3

Learning Outcome
Recognize anti-Semitic arguments.

Title
Understand Jewish Identity

Tags
182933, 4

Learning Outcome
Gain an understanding of the complexities of modern Jewish identity.

Title
Appreciate Jewish Contributions

Tags
182934, 5

Learning Outcome
Appreciate the contribution of Jewish people to the world.

Title
Analytical Writing

Tags
183290, 3

Learning Outcome
Skillfully integrate sources into a coherent argument expressed through a clear, well-written style and throrough oral communication.

Title
Effective and Ethical Research

Tags
183315, 2

Learning Outcome
Demonstrate proficiency in using the historical method of research effectively by skillfully and honestly using interdisciplinary prinary and secondary sources.

HIST 250 - Europe 1500 to the Present

Course Information

Teaching Area (new)
HIST

Course Number
250

Teaching Area
HIST

Course Title
Europe 1500 to the Present

Course Description
Overview of key political, cultural, economic and social developments in Europe during the early modern and modern periods, 1500—Present.

Department
History

When Taught
Fall

Recommended
WRTG 150

Learning Outcomes

Title
Historical knowledge of key events in European history

Tags
183500, 1

Learning Outcome
Demonstrate a solid understanding of key ideas, events and individuals in the political, social and cultural history of Europe from 1500 to the present.

Title
Geographical knowledge of Europe

Tags
183501, 2

Learning Outcome
Demonstrate a basic geographical knowledge of Europe, as well as an understanding of the complexities and limitations of the notion of European unity.

Title
Historical analysis of the growth of European unity

Tags
183502, 3

Learning Outcome
Trace and explain the transformation of Europe from the rivalries and divisions of the early modern period to its current state of union.

Title
Historiographical knowledge and analysis

Tags
183503, 4

Learning Outcome
Show the ability to analyze historical debates and questions with accuracy and balance.

Title
Reading and analysis of primary and secondary sources

Tags
183504, 5

Learning Outcome
Learn to read, analyze, and discuss both primary and secondary source documents dealing with European history.

Title
Historical writing

Tags
183505, 6

Learning Outcome
Refine the clarity and grace of analytical writing and speaking skills.

HIST 251 - Conquest and Colonization of Latin America.

Course Information

Teaching Area (new)
HIST

Course Number
251

Teaching Area
HIST

Course Title
Conquest and Colonization of Latin America.

Course Description
Pre-Columbian civilizations, Iberian exploration and conquest of the New World, and colonial development of Hispanic and Portuguese America from 1492 to 1823.

Department
History

When Taught
Fall

Credit Hours

Min:
3

Offered by BYU Independent Study; enroll anytime throughout the year; one year to complete; additional tuition required; register at is.byu.edu.

Learning Outcomes

Title
Historical Knowledge of Latin America

Tags
183069, 1

Learning Outcome
Students will be able to explain and analyze the major political, economic, social, religious, and cultural characteristics of Spanish and Portuguese colonialism in the Americas between 1492 and 1825.

Title
Research Literature

Tags
183271, 1

Learning Outcome
Students will be able to analyze and interpret primary source documents.

Title
Critical Analysis

Tags
183307, 3

Learning Outcome
Students will analyze historical questions and place them in historiographical context.

Title
Effective Communication

Tags
183414, 2

Learning Outcome
Students will gain experience in historical research and improve writing skills.

HIST 252 - Modern Latin America

Course Information

Teaching Area (new)
HIST

Course Number
252

Teaching Area
HIST

Course Title
Modern Latin America

Course Description
National period (1810 to present): independence, institutional development, culture, and inter-American relations.

Department
History

When Taught
Fall and Winter

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Note
Offered by BYU Independent Study; enroll anytime throughout the year; one year to complete; additional tuition required; register at is.byu.edu.

Learning Outcomes

Title
Historical Knowledge of Modern Latin America

Tags
182982, 1

Learning Outcome
Students will be exposed to the major economic, political, and cultural shifts that shaped the "modern" Latin American state in the nineteenth and twentieth century, as well as its variants, notably the cult of caudillo rule and its twentieth century offshoots

Title
Literature Survey and Analytical Writing

Tags
183070, 2

Learning Outcome
Students will either broaden their understanding of literature on one topic in Latin American history by way of an intensive literature survey or deepen their knowledge on a particular topic in Latin American history by way of an original research paper.

Title
Critical Discussions

Tags
183272, 2

Learning Outcome
Students will gain oral proficiency in discussing historiographical and thematic issues in modern Latin America during weekly discussion.

Title
Research Literature

Tags
183273, 1

Learning Outcome
Students will become conversant with major theoretical arguments and approaches to Latin American history in the contemporary era.

Title
Critical Analysis

Tags
183417, 4

Learning Outcome
Students will make connections between cultural and polotico-economic issues by way of a wide variety of course readings that expose students to literature, as well as traditional historical themes.

HIST 253 - Religion in Colonial Latin America

Course Information

Teaching Area (new)
HIST

Learning Outcomes

Title
Analytical Writing

Tags
183408, 3

Learning Outcome
Students will improve their ability to write clearly and organize evidence to build an argument

Title
Historical Knowledge of Modern Africa and its People

Tags
183635, 1

Learning Outcome
Students will gain a greater knowledge of major events, developments, and questions in modern African history and understand that African cultures and people have changed over time

Title
Critical Analysis

Tags
183636, 2

Learning Outcome
Students will improve their ability to weigh evidence, assess conflicting viewpoints, and evaluate arguments

Title
Self-examination through studies of race, identity, and liberation

Tags
183637, 4

Learning Outcome
Students will re-consider the way they interact with their own society and how Africa has related to the rest of the world by considering questions about identity, race, domination and liberation in African history

HIST 276 - Exploration of Teaching - Social Science

Prerequisites

Complete ALL of the following Courses:

- HIST 217 - The Family Historian's Craft

Learning Outcomes

Title
Competence in genealogical research reports

Tags
183561, 3

Learning Outcome
Students will be able to produce clear, well-written genealogical research reports demonstrating a high level of critical thinking in pedigree analysis and genealogical evidentiary analysis.

Title
Competence in writing compiled lineages

Tags
183562, 4

Learning Outcome
Students will be able to produce well-written compiled lineages that incorporate the historical background of the time, relating histories of individual families to larger historical processes.

Title
Knowledge of family history sources in northern US research

Tags
183632, 1

Learning Outcome
Students will be able to describe the key content and utility of major family history sources in northern US research, viz., census and vital records, church and town records, county histories, tax records, probate and other court records, land records, immigration sources, and compiled family histories, as well as related secondary-source indexes and databases.

Title
Familiarity with the Family History Library in Salt Lake City

Tags
183633, 2

Learning Outcome
Students will be able to conduct research in family history sources, primary and secondary, on film or otherwise, at the world's largest genealogical repository, the Family History Library in Salt Lake City.

Complete ALL of the following Courses:

- HIST 217 - The Family Historian's Craft

Learning Outcomes

Title
Critical Analysis

Tags
182954, 2

Learning Outcome
Students will be able to utilize a significant range of skills and abilities in critical genealogical evidentiary analysis and be able to distinguish that from historical analysis

Title
Incorporate Historical Background

Tags
183020, 1

Learning Outcome
Students will be able to recognize and incorporate the historical background of the time and place in their genealogical research.

Title
Genealogical Research

Tags
183081, 2

Learning Outcome
Students will be able to identify and solve basic historical and genealogical problems in Southern Europe, Quebec and Latin America through primary and secondary source research, using library, archival and technological resources

Title
Research Literature

Tags
183334, 3

Learning Outcome
Students will be able to demonstrate content knowledge of primary historical sources for Southern Europe, Quebec and Latin America.

Title
Effective Communication

Tags
183391, 1

Learning Outcome
Students will be able to produce genealogical research reports and narrative family histories and compiled lineages that are clear, precise and well-written

Title
Research Methods

Tags
183395, 4

Learning Outcome
Students will be able to apply research skills learned to the search for their own ancestors and to assist others in their searches in Southern Europe, Quebec and Latin America.

Title
Computer Programs

Tags
183240, 0, 6

Learning Outcome
Students will be able to explain the roles of New.FamilySearch.org and other FamilySearch.org programs, integrating in the process the academic knowledge from this course with a testimony of the current direction of family history in the Church of Jesus Christ of Latter-day Saints

Learning Outcomes

Title
Historical understanding

Tags
213865, 0, 1, 2023-08-29 09:25:59

Learning Outcome
Students will be able to outline major historical themes and controversies in women and gender history

Title
Recognizing agency

Tags
213866, 0, 2, 2023-08-29 09:26:01

Learning Outcome
Students will be able to recognize the ways that women exercised agency in specific historical contexts

Title
Evaluation

Tags
213867, 0, 3, 2023-08-29 09:26:02

Learning Outcome
Students will be able to evaluate women's contributions to society historically, culturally, economically, and politically as well as appreciate variations in women's experiences.

Title
Analysis and communication

Tags
213868, 0, 4, 2023-08-29 09:26:04

Learning Outcome
Students will be able to demonstrate analytical and communication skills through critical reading, discussion, and writing about sources by and about women and women's issues

Title
Present-day application

Tags
213869, 0, 5, 2023-08-29 09:26:06

Learning Outcome
Students will be able to apply historical thinking skills to engage contemporary and historical issues about women and women's issues

HIST 289 - Citizen Nation

Course Information

Course Number
289R

Teaching Area
HIST

Course Title
Citizen Nation

Course Description
Exploration of how American definitions of citizenship have evolved from the founding era to the 21st century. Examines the definition, meaning, and the rights, privileges, and responsibilities of citizenship.

Department
History

When Taught
Contact Department

Credit Hours

Fixed/Max:
3

Lecture Hours

Fixed:
3

Learning Outcomes

Title
Interpretative framework

Tags
213870, 0, 1, 2023-08-29 09:26:08

Learning Outcome
Students will be able to develop an interpretive framework for the concept of citizenship and how it has changed over time in the US

Title
Comparison and analysis

Tags
213871, 0, 2, 2023-08-29 09:26:09

Learning Outcome
Students will be able to compare and analyze key episodes in US history in light of dynamic, sometimes competing definitions of American citizenship

Title
Change over time

Tags
213872, 0, 3, 2023-08-29 09:26:11

Learning Outcome
Students will be able to trace the expansion of the boundaries of American citizenship

Title
Personal understanding

Tags
213873, 0, 4, 2023-08-29 09:26:13

Learning Outcome
Students will be able to craft a historically informed personal understanding of one’s own citizenship and current debates about citizenship

Title
Applied citizenship

Tags
213874, 0, 5, 2023-08-29 09:26:15

Learning Outcome
Students will be able to identify information from “credible, reliable and factual sources,” use wisdom to seek truth, and apply historical thinking skills to engage in 21st century citizenship and lifelong learning and service.

Learning Outcomes

Title
Historical Knowledge of Global Relationship with Nature

Tags
182935, 1

Learning Outcome
Students will become academically conversant with the major historical developments in our global relationship with nature.

Title
Historical Analysis

Tags
183288, 1

Learning Outcome
Students will be able to analyze and evaluate the content and meaning of primary sources, and through critical interpretation, draw reasonable conclusions.

Title
Analytical Writing

Tags
183351, 3

Learning Outcome
Students will be able to write history that is coherent and persuasive by following discipline’s norms for writing and careful documentation.

Title
Historical Research

Tags
183401, 2

Learning Outcome
Students will be able to formulate historical questions and answer them by careful and systematic research in primary and secondary sources.

HIST 292 - Food and History

Course Information

Teaching Area (new)
HIST

Course Number
292

Teaching Area
HIST

Course Title
Food and History

Course Description
History of tomatoes, potatoes, sugar, and spice. How food and foodways engage broader historical questions and illuminate aspects of human cultures.

Title
Research Methods

Tags
182983, 1

Learning Outcome
Students will refine and improve historical research, writing and analytical skills.

Title
Historical Knowledge of the Study of Food

Tags
183071, 2

Learning Outcome
Students will be able to discuss the theoretical underpinnings of the study of food, and will be able to discuss key aspects of the impact of food on human history.

Title
Effective Communication

Tags
183319, 2

Learning Outcome
Students will refine and improve oral presentation skills.

HIST 293 - World War II in History and Memory

Course Information

Teaching Area (new)
HIST

Course Number
293

Teaching Area
HIST

Course Title
World War II in History and Memory

Course Description
Explores the causes, flow, and the global significance of the Second World War, emphasizing U.S. experiences in the European and Pacific theatres. Fosters the skills necessary to analyze the war through the perspectives of military and political figures, the "Greatest Generation," and voices beyond the battlefields.

Learning Outcomes

Title
Historical Knowledge of Global Conflict of 1939 to 1945

Tags
182984, 1

Learning Outcome
Students will be able to explain and analyze the history and memory of the global conflict of 1939 to 1945.

Title
Research Literature

Tags
183245, 1

Learning Outcome
Students will be able to analyze and interpret primary and secondary source documents.

Title
Critical Interpretation

Tags
183361, 3

Learning Outcome
Students will be able to formulate historical arguments based on primary sources and place them in a historiographical context.

Title
Critical Analysis

Tags
183450, 2

Learning Outcome
Students will be able to interpret and discuss the meanings and history and memory.

HIST 294 - The Age of the French Revolution

Course Information

Simple Requisites

Prerequisites

Type
Prerequisite

Prerequisites

Earn a minimum GPA of 2.5 in the following:

- HIST 217 - The Family Historian's Craft

Learning Outcomes

Title
Research in Primary Sources

Learning Outcome
Students will competently find, use, and analyze primary sources created by governments and religious organizations.

Title
Research about Historical Context

Learning Outcome
Students will master secondary sources that place families in historical context.

Title
Genetic Genealogy

Learning Outcome
Students will understand how genetic genealogy is used in conjunction with “paper” research.

Title
Effective Communication

Learning Outcome
Students will write effectively and sensitively about their analysis and the biographies of those they research.

HIST 298 - Digital History

Course Information

Teaching Area (new)
HIST

Course Number
298

Teaching Area
HIST

Course Title
Digital History

Course Description
Exploration of digital technology and its potential to revolutionize the discipline of history, from the way research is conducted to methods for knowledge dissemination. Benefits, challenges, and impact of digital methods on the way historians envision and express what happened in the past.

All Semesters/Terms

Credit Hours

Min:
0.5

Fixed/Max:
6

Other Prerequisites
Department chair's and cooperative education coordinator's consent.

Note
An APPROVED Internship Application is required before adding.

Learning Outcomes

Title
Individual Learning Objectives

Tags
183253, 0

Learning Outcome
Together with internship and academic supervisors, students will develop individual learning objectives based on internship assignment or position

Title
Skill Application

Tags
183345, 1

Learning Outcome
Students will master the skills and abillities required during the internship experience.

Title
Writing and Application

Tags
183349, 2

Learning Outcome
Students will write interim and final reports demonstrating historical knowledge, analysis and application during the internship experience.

Historical Knoweldge of European Revolutions

Tags
182994, 1

Learning Outcome
Students will gain a historical consciousness by demonstrating knowledge about crisis and change in European societies.

Title
Critical Analysis

Tags
183338, 2

Learning Outcome
Students will understand the way evidence is used to construct historical arguments.

Title
Collaboration Experience

Tags
183423, 3

Learning Outcome
Students will gain experience collaborating with each other in formulating and carrying out a research project using historical research skills.

Title
Research Literature

Tags
183430, 1

Learning Outcome
Students will acquire the ability to evaluate and analyze historical documents

HIST 310 - The Automotive Age: History, Technology, Culture, and Environment

Course Information

Course Number
310

Teaching Area
HIST

Course Title
The Automotive Age: History, Technology, Culture, and Environment

Course Description
Explores the most consequential technology of the 20th century, the automobile. Topics may include the car's impacts on economic growth, civic life, human death, pop music, public transit, and non-human nature.

Department
History

When Taught
Contact Department

Credit Hours

Fixed/Max:
3

Lecture Hours

Fixed:
3

Learning Outcomes

Title
Knowledge of Competing Historiographical Approaches

Tags
213879, 0, 1, 2023-08-29 09:26:50

Learning Outcome
Students will describe the most significant global, historical work on the car and be able to place scholarship in various schools of thought or in their particular thematic approaches. They will become aware of what is known so they can ask questions and engage in research that will not simply reinvent the wheel, so to speak, but contribute to the field's advance.

Title
Creativity and Original Thinking

Tags
213880, 0, 2, 2023-08-29 09:26:52

Learning Outcome
Students will produce an original piece of historical research, using primary sources, to advance our knowledge about the social, technological, environmental, or cultural impacts of the automobile.

Title
Revision and Critique of Arguments

Tags
213881, 0, 3, 2023-08-29 09:26:53

Learning Outcome
Students will be able to effectively critique the strength and weakness of one's own arguments and do the same with generosity and constructive intent toward fellow students and scholars.

Title
Interdisciplinary Skills

Tags
213882, 0, 4, 2023-08-29 09:26:55

Learning Outcome
As the automobile's impact is so broad, students will develop interdisciplinary, synthetic, thinking skills, noting in readings, discussions, and their writings how technology, society, politics, art, and nature intersect and shape one another.

Title
Deeply Seeing the Mundane and Imagining Alternatives

Tags
213883, 0, 5, 2023-08-29 09:26:56

Learning Outcome
In the last century, the automobile and its infrastructure have become ubiquitous and hence almost invisible. Students will utilize this invisible ubiquity to demonstrate the power to see, analyze and deconstruct the world as it is, its hidden assumptions, and think radically about alternative presents and futures.

Learning Outcomes

Title
Trace Influence of Ideas

Tags
182996, 1

Learning Outcome
Relate and trace how ideas continue to influence societies and their institutions

Title
Historical Knowledge of Approaches to Intellectual History

Tags
182997, 2

Learning Outcome
Identify broadly how different approaches to intellectual history operate, e.g. Lovejoy, Cambridge School (Skinner), Berlin, Koselleck, Strauss, etc.

Title
Recognize the Development of Modern Thought

Tags
183074, 3

Learning Outcome
Awaken in you the realization of how certain modes of modern thought that you might have taken for granted as having existed "forever" can be seen as developments in response to specific historical circumstances.

Title
Conflict Resolution

Tags
183220, 4

Learning Outcome
Explain how ideas, when extended to their logical conclusions, may challenge your personal world view and consider, as well as articulate, how to resolve such conflicts.

Title
Analytical Writing

Tags
183322, 5

Learning Outcome
Write an intellectual history research paper.

Title
Recognize Historical Periodization

Tags
183370, 0

Learning Outcome
Recognize the usefulness, but also the problematic nature of historical periodization.

Title
Develop Interdsciplinary Thinking Skills

Tags
183422, 1

Learning Outcome
Develop interdisciplinary, synthetic, thinking skills, particularly in being able to see history in cultural artifacts and then identify and place these into discursive contexts.

Learning Outcomes

Title
Historical Knowledge of European Women since 1400

Tags
182941, 1

Learning Outcome
Students will be able to understand and explain major trends in European women's experiences and history since 1400

Title
Critical Interpretation

Tags
182942, 2

Learning Outcome
Students will interpret important shifts or trends in the experience of women and attitudes about gender. Students will apply this understanding to the legal, religious, and culture contexts for those shifts or trends

Title
Critical Analysis

Tags
182943, 3

Learning Outcome
Working in tandem with each other students will have opportunities to question, investigate, and interrogate contemporary attitudes to women and men's history and gender and how these affect interpretations of the past.

Title
Effective Research and Analysis

Tags
183308, 2

Learning Outcome
Students will read, analyze, and write about primary and secondary sources and explain their connections to one another

Title
Research Historiography

Tags
183323, 1

Learning Outcome
Students will be able to analyze and synthesize historiographyof women’s history, gender history, and feminism

HIST 319 - The Family in Europe

Title
Historical Knowledge of Mexico (Pre-Colombian-National Era)

Tags
183004, 1

Learning Outcome
Students will gain an understanding of the challenges Mexico faced during the transitions from pre-Colomiban empires to the colonial period, as well as from the colonial period to the national era.

Title
Historical Knowledge of Mexico (20th century)

Tags
183005, 2

Learning Outcome
Students will gain an understanding of the principle factors that created and transformed modern Mexican society, principally the Porfiriato, the Mexican Revolution, and the modern Mexican state structure (twentieth century).

Title
Analytical Writing

Tags
183268, 3

Learning Outcome
Students will explore the scholarship and sources for a single issue in Mexican history, producing a research paper based on primary and secondary sources

Title
Research Literature

Tags
183352, 2

Learning Outcome
By way of supplementary readings and writing assignments, students will gain a stronger understanding of the social andcultural issues in Mexican history that have been shaped by the nation's unique political and economic conditions.

Title
Critical Debates

Tags
183353, 4

Learning Outcome
Students will develop oral proficiency in debating controversialhistorical and contemporary issues during class discussion, including debates on decisive factors in the Spanish conquest, immigration, and bi-national solutions to drug trafficking.

Title
Evaluating information

Tags
183225, 7

Learning Outcome
Students will assess the role of observation, reasoning, revelation, and evaluating information in building faith and testimony of Christ and His restored gospel.

Title
Historical Literacy

Tags
183226, 5

Learning Outcome
Students will apply historical literacy strategies when engaged in historical inquiry or when conducting online research or using social media.

Title
Teaching Methods

Tags
183227, 11

Learning Outcome
Students will create lessons and use teaching methods that nurture young students' historical literacies and prepare young people for informed civic engagement.

Title
4-

Tags
183248, 3

Learning Outcome
Prospective teachers will consider the wide variety of textual genres that historians and archeologists use as evidence about the past.

Title
7-

Tags
183255, 6

Learning Outcome
Prospective teachers will explore instructional strategies that help students use historical evidence to support their independently developed historical interpretations.

Title
2-

Tags
183292, 1

Learning Outcome
Prospective teachers will identify instructional strategies that help students approach historical inquiry from a more mature epistemic stance.

Title
5-

Tags
183305, 4

Learning Outcome
Prospective teachers will consider second order concepts, or metaconcepts, that pupils must understand in order to become historically literate.

Title
3-

Tags
183358, 2

Learning Outcome
Prospective teachers will consider the heuristics historians use in engaging in historical inquiry and how students can be taught to use these heuristics.

Title
13-

Tags
183364, 12

Learning Outcome
Prospective teachers will explore options for curriculum mapping in developing a scope and sequence for a US history course.

Title
9-

Tags
183412, 8

Learning Outcome
Prospective teachers will create a series of text sets, including primary sources, that they will be able to use to build their students' historical literacies.

Title
10-

Tags
183420, 9

Learning Outcome
Prospective teachers will construct lesson plans and will execute these plans in elementary and/or secondary classrooms.

Title
11-

Tags
183433, 10

Learning Outcome
Prospective teachers will reflect on methods for improving their instructional activities.

Title
1-

Tags
183448, 0

Learning Outcome
Prospective teachers will identify methods for helping their pupils develop a more sophisticated understanding of the nature of hisotyr as a discipline.

Learning Outcomes

Title
Critical Analysis

Tags
182962, 1

Learning Outcome
Students will analyze and explain the cultural, historical, and legal context for documents, the scripts used in them, and the coverage and availability

Title
Transcription Methodology

Tags
183356, 2

Learning Outcome
Students will demonstrate transcription techniques and methodologies

Title
Document Translation

Tags
183365, 1

Learning Outcome
Students will read, transcribe, and where necessary, translate documents

Title
Historical Knowledge of Common Scripts

Tags
183403, 0

Learning Outcome
Students will learn the most common Latin scripts

HIST 430R - (Hist-Clscs) Topics in Ancient Greek History

Simple Requisites

Prerequisites

Type
Prerequisite

Prerequisites

Complete ALL of the following Courses:

- HIST 217 - The Family Historian's Craft

Learning Outcomes

Title
Compile Research Reports

Tags
183640, 2

Learning Outcome
Students will be able to write and/or compile a variety of analytical research reports, in preparation for potential clients and employers who will hire them to conduct research on ancestral families.

Title
Research Methods

Tags
183638, 0, 0

Learning Outcome
Students will learn the key methods of family history research in US or UK sources, to solve difficult research problems from the 1700s and 1800s.

Title
Analyze Sources

Tags
183639, 0, 1

Learning Outcome
Students will learn, on an advanced level, to analyze sources and read between the lines, to reconstitute complete families from records of the 1700s and 1800s in US or UK sources.

OR

Prerequisites

Complete ALL of the following Courses:

- HIST 276 - Exploration of Teaching - Social Science

Other Prerequisites

Fingerprinting and FBI clearance.

Note

Check with Hist 477 instructor for specific prerequisites for the major or minor program.

Learning Outcomes

Title
Learning-Centered Classrooms

Tags
183065, 1

Learning Outcome
Prospective teachers will consider the characteristics of learning-centered classrooms that are based on current theories of learning.

Title
Research-supported Teaching Methods

Tags
183066, 2

Learning Outcome
Students will study and apply research-supported teaching methods that foster students' content knowledge, content and literacy skills, and learning and democratic dispositions.

Title
Assessing Students

Tags
183229, 2

Learning Outcome
Students will consider variuos methods of assessing student learning.

Title
Teaching Resources

Tags
183276, 4

Learning Outcome
Students will consider various types of resources including texts, technology, primary source documents and litertaure that they might use to teach social studies to students with diverse backgrounds and learning styles.

Title
Teacher Work Sample

Tags
183392, 3

Learning Outcome
Students will be assisted in the preparation of the teacher work sample and a multiple text inquiry activity.

Title
Critical Analysis

Tags
183429, 5

Learning Outcome
Students will coordinate and reflect on clinical experiences.

Note
Offered by BYU Independent Study; enroll anytime throughout the year; one year to complete; additional tuition required; register at is.byu.edu.

Learning Outcomes

Title
Genealogical Research

Tags
182970, 1

Learning Outcome
Students will identify and clearly articulate a substantive family history research problem.

Title
Genealogical Analysis and Writing

Tags
183377, 1

Learning Outcome
Students will produce a written report, project or portfolio demonstrating knowledge of the studied material.

HIST 485 - Topical Readings Seminar

Course Information

Teaching Area (new)
HIST

Course Number
485

Teaching Area
HIST

Course Title
Topical Readings Seminar

Course Description
Reading, discussing, and writing about selected historical issues. Especially recommended for students going on to graduate programs in History.

Department
History

When Taught
Contact Department

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Lab Hours

Fixed:
0

Learning Outcomes

Title
Historical Knowledge

Tags
183058, 1

Learning Outcome
Students will increase their knowledge of the substantive theme of the course, which will rotate (the theme for Fall 2011, for instance, is Changes in Religious Cultures)

Title
Critical Analysis

Tags
183129, 2

Learning Outcome
Better understand how a work of History is put together, learn how to make a fair and detailed judgment of historical work (the act of criticism), all of which will make you better prepared to create History yourself

Title
Research Literature

Tags
183130, 3

Learning Outcome
Students will learn and practice fundamental analytical tools for analyzing secondary sources more deeply than is possible in most upper-level history courses

Title
Effective Communication

Tags
183289, 2

Learning Outcome
Students will, by learning more deeply how a work of history is put together, be better prepared for writing an original research paper in History 490 and for graduate school in either History or a related discipline

HIST 487 - Philosophies of History

Course Information

Teaching Area (new)
HIST

Course Number
487

Teaching Area
HIST

Course Title
Philosophies of History

Course Description
Fundamental problems and types of historical analysis and interpretation, philosophies of history, and work of outstanding historians.

Department

Fixed:
0

Learning Outcomes

Title
Historical Knowledge of Historical Writing

Tags
183131, 1

Learning Outcome
Demonstrate an understanding of major developments in the history of historical writing

Title
Identify Terms and Theories

Tags
183132, 2

Learning Outcome
Learn key historical terms and theories associated with the philosophy of history

Title
Critical Analysis

Tags
183133, 3

Learning Outcome
Distinguish between analytical and speculative philosophies of history

Title
Critical Debates

Tags
183134, 4

Learning Outcome
Consider how philosophies of history inform debates in public history and develop oral skills

Title
Historian's Craft and Religious Belief

Tags
183536, 5

Learning Outcome
Understand debates surrounding reconciling the historian's craft and religious belief and develop insights into how universities sponsored by religious institutions can contribute to higher education.

Components of Healthcare Law

Tags
214099, 0, 1, 2023-08-29 11:07:43

Learning Outcome
Identify and analyze the principles of law and ethics in the U.S. healthcare legal system as applied in healthcare organizations.

Title
Analyze Layers of Healthcare Law

Tags
214100, 0, 2, 2023-08-29 11:07:46

Learning Outcome
Analyze and debate the multifaceted layers that comprise the U.S. healthcare legal system, including patients' rights, confidentiality, liability, etc.

Title
Compare and Contrast Legal System

Tags
214101, 0, 3, 2023-08-29 11:07:48

Learning Outcome
Compare and contrast the variable components pertaining to the U.S. healthcare legal system.

HL 384R - Global Opportunities in Healthcare Leadership

Course Information

Course Number
384R

Teaching Area
HL

Course Title
Global Opportunities in Healthcare Leadership

Course Description
This study abroad course introduces students to global challenges and opportunities in healthcare leadership, exploring hospitals, technology, pharmaceuticals, and insurance. It examines cross-cultural differences in policy, administration, and care delivery to prepare leaders for international healthcare contexts.

Department
Business

When Taught
Spring Term

Credit Hours

Fixed/Max:
3

Learning Outcomes

Title
Analyze Global Healthcare Systems

Learning Outcome
Analyze how healthcare systems and delivery models differ across global regions and evaluate their impact on cost, quality, and access to care.

Title
Compare and Contrast Trends

Learning Outcome
Compare and contrast emerging global healthcare trends and interpret their implications for future global healthcare policy.

Title
Identify Global Leadership Strategies

HL 385R - Healthcare Research Hub

Course Information

Teaching Area (new)
MSB

Course Number
385R

Teaching Area
HL

Course Title
Healthcare Research Hub

Course Description
Collaborate with faculty, students, and industry partners around the world on healthcare research. Generate knowledge on relevant healthcare industry topics based on rigorous academic research partnered with industry leaders.

Department
Management

When Taught
Fall and Winter

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Learning Outcomes

Title
Investigate Healthcare Problems with Data

Learning Outcome
Investigate current healthcare-related problems using real data.

Title
Compose Research

Learning Outcome
Compose healthcare-related research papers based on current healthcare industry dilemmas.

Title
Present Research

Learning Outcome
Present research using the information and data collected and research throughout the course.

HL 386 - Financing the Healthcare System

Course Information

Teaching Area (new)
MSB

Course Number
386

Teaching Area
HL

Course Title
Financing the Healthcare System

Course Description
Overview of healthcare financing, examining providers, payers, employers, individuals, and government. Topics include benchmarking, best practices, peer review, risk and performance improvement, measurement, utilization, case management, technology assessment, and decision support for future healthcare leaders.

Department
Business

When Taught

Prerequisite

Type
Completion Requirement

Prerequisites

Complete ALL of the following Courses:

- HL 288 - Introduction to Healthcare Leadership

Learning Outcomes

Title
Health insurance knowledge

Tags
214102, 0, 1, 2023-08-29 11:07:50

Learning Outcome
Participate knowledgeably in an employer's health insurance decision.

Title
Policy challenges

Tags
214103, 0, 2, 2023-08-29 11:07:52

Learning Outcome
Articulate public policy challenges in healthcare from multiple perspectives.

Title
Policy evaluation

Tags
214104, 0, 3, 2023-08-29 11:07:54

Learning Outcome
Evaluate health policy proposals based on their merits and likely impact.

Title
Health insurance functional areas

Tags
214105, 0, 4, 2023-08-29 11:07:55

Learning Outcome
Identify major functional areas of health insurance and the management challenges associated with each.

Title
Policy statements

Tags
214106, 0, 5, 2023-08-29 11:07:57

Learning Outcome
Negotiate and draft policy statements.

HL 588 - Introduction to Healthcare Leadership

Course Information

Course Number
588

Teaching Area
HL

Course Title
Introduction to Healthcare Leadership

Course Description
A broad study of the many interconnected components of the healthcare industry, including medical technology, pharmaceuticals, hospital administration, healthcare policy, insurance, public health, etc. Introductory applications of various functional skills to healthcare.

Department
Business

When Taught
Fall and Winter

Credit Hours

Fixed/Max:
3

Lecture Hours

Fixed:
3

Learning Outcomes

Title
Understand the Healthcare Industry

Tags
214110, 0, 1, 2023-08-29 11:08:12

Learning Outcome
Demonstrate an understanding of the various components of the healthcare industry

Title
Apply Functional Specialties to Healthcare

Tags
214111, 0, 2, 2023-08-29 11:08:14

Learning Outcome
Apply functional specialties to challenges specific to the healthcare industry

Title
Work in Teams

Tags
214112, 0, 3, 2023-08-29 11:08:15

Learning Outcome
Demonstrate an ability to function in a team setting

Title
Articulate Healthcare Industry Complexities

Tags
214113, 0, 4, 2023-08-29 11:08:16

Learning Outcome
Articulate the most important complexities of the healthcare industry

HL 589R - Healthcare Leadership Lecture Series

Course Information

Teaching Area (new)
MSB

Course Number
589R

Teaching Area
HL

Course Title
Healthcare Leadership Lecture Series

Course Description
Top executives share insights about the healthcare industry and related career opportunities.

Department
Business

When Taught
Fall

Credit Hours

Min:
1

Fixed/Max:
1

Lecture Hours

Fixed:
1

Lab Hours

Fixed:

Learning Outcomes

Title
Healthcare Delivery

Learning Outcome
Evaluate effectiveness of healthcare delivery

Title
Practical Skills

Learning Outcome
Effectively apply practical skills learned from leading healthcare executives in both personal and professional interactions

Title
Healthcare Opportunities

Learning Outcome
Compare and contrasts the various fields/opportunities within the healthcare industry

Title
Networking

Learning Outcome
Productively create and/or enhance professional network with healthcare leaders

HL 599R - Healthcare Internship

Course Information

Teaching Area (new)
MSB

Course Number
599R

Teaching Area
HL

Course Title
Healthcare Internship

Course Description
Provide students with real-world experience in local hospitals to prepare for careers in healthcare management.

Department
Business

When Taught
All Semesters/Terms

Credit Hours

Min:
0.5

Fixed/Max:
3

Lecture Hours

Fixed:

Learning Outcomes

Title
Healthcare Career Oportunities

Learning Outcome
Explore and obtain information on healthcare career opportunities

Title
Theory in Healthcare Courses

Learning Outcome
Expand upon the theory and concepts taught in healthcare leadership courses

Title
Networking

Learning Outcome
Network with professionals and identify possible mentors

Title
Enrich future course work

Learning Outcome
Return with experiences that will enrich future course work

HLTH 100 - Introduction to Public Health

Course Information

Teaching Area (new)
HLTH

Course Number
100

Teaching Area
HLTH

Course Title
Introduction to Public Health

Course Description
Provides an overview of the field of public health. Introduces core disciplines and systems, explores career and graduate education pathways, and emphasizes professionalism, ethics, and service. Students also reflect on how public health principles connect with personal values, faith, and areas of interest.

Department
Public Health

When Taught
Fall, Winter, and Spring

Credit Hours

Fixed/Max:
1

Lecture Hours

Fixed:
1

Lab Hours

Fixed:
0

Learning Outcomes

Title
Define public health

Tags
206917, 1

Learning Outcome
Students will be able to define public health in terms of its functions, systems, essential services and value.

Title
History of public health

Tags
206918, 2

Learning Outcome
Students will be able to identify prominent events in the history of public health

Title
Ethical public health

Tags
206919, 3

Learning Outcome
Students will be able to describe the 12 principles of ethical public health practice.

Title
Public health system

Tags
206920, 4

Learning Outcome
Students will be able to describe the entities that contribute to the public health system.

Title
Public health services

Tags
206921, 5

Learning Outcome
Students will be able to articulate the 10 essential public health services.

Title
Public health disciplines

Tags
206922, 6

Learning Outcome
Students will be able to describe each of the public health disciplines: environmental/occupational health, epidemiology and health promotion.

Title
Public health careers

Tags
206923, 7

Learning Outcome
Students will understand the public health careers available, including opportunities for graduate education.

Title
Scientific articles

Tags
206924, 8

Learning Outcome
Students will understand the basic components of a scientific article.

Title
Scientific writing

Tags
206925, 9

Learning Outcome
Students will be able to effectively communicate scientific ideas in writing including appropriate citations and reference styles.

HLTH 101 - Health and the Human Body

Course Information

Course Number
101

Teaching Area
HLTH

Course Title
Health and the Human Body

Course Description
The course presents a holistic view of human health at the individual and population levels, including common functions and problems through a body-systems approach.

Department
Public Health

When Taught
Fall and Winter

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Learning Outcomes

Title
Human Health

Learning Outcome
Students will be able to describe practical aspects of human health from and individual and population level.

Title
Disease

Learning Outcome
Students will be able to discuss the principal diseases, injuries, and conditions that affect mankind across the lifetime, including how they are acquired, develop, alleviated, controlled, and prevented.

Title
Body Systems

Learning Outcome
Students will be able to identify and describe the organs and systems of the body, including location and function, as they related to common public health problems.

Title
Coping

Learning Outcome
Students will be able to describe how the body and mind cope with physical, biological, and life changes (e.g. healing, immune response, trauma, etc.)

Title
Stigma

Learning Outcome
Students will be able to analyze stigmas and cultural barriers common in human health.

Title
The Soul

Learning Outcome
Students will be able to describe the relationship between physical health and spiritual health in terms of the human soul (D&C 88:15) and the mission of public health; including stewardship for one's soul and responsibility toward others.

HLTH 196R - Public Health Practicum

Course Information

Course Number
196R

Teaching Area
HLTH

Course Title
Public Health Practicum

Course Description
Applied off-campus public health experience, which may include domestic or international agency work or shadowing. Typically completed early in a student's academic career, this practicum offers exposure to real-world public health practice that bridges classroom learning with practical applications. This course is not intended for public health internships (see HLTH 496R), mentored research (see HLTH 491R), campus-based engagement (see HLTH 396R), or study abroad / global health experiences (see HLTH 199R)..

Department
Public Health

When Taught
All Semesters/Terms

Credit Hours

Min:
0.5

Learning Outcomes

Title
Exposure

Learning Outcome
Students will gain understanding and appreciation for the practical aspects of public health.

Title
Networking

Learning Outcome
Students will build relationships with public health or interdisciplinary professionals and the communities they serve.

Title
Service

Learning Outcome
Students will serve diverse populations and gain insight by participating in real-world public health endeavors.

HLTH 199R - Global Health Experiences

Course Information

Course Number
199R

Teaching Area
HLTH

Course Title
Global Health Experiences

Course Description
An applied global health experience including domestic and international agency work or shadowing. Does NOT included mentored research.

Department
Public Health

When Taught
All Semesters/Terms

Credit Hours

Min:
0.5

Max:
6

Learning Outcomes

Title
Apply Concepts

Tags
213896, 0, 1, 2023-08-29 09:30:15

Learning Outcome
Apply public health concepts to agency work in domestic or international settings.

Title
Writing

Tags
213897, 0, 2, 2023-08-29 09:30:16

Learning Outcome
Demonstrate proficient writing skills by producing a summary paper at the conclusion of the applied experience.

Title
Team Member

Tags
213898, 0, 3, 2023-08-29 09:30:18

Learning Outcome
Function as a collaborative team member while participating in the applied experience.

HLTH 201 - Contemporary Issues for Student Athletes

Course Information

Teaching Area (new)
HLTH

Course Number
201

Teaching Area
HLTH

Course Title
Contemporary Issues for Student Athletes

Course Description
Eligibility issues for intercollegiate student athletes. Skills relating to academic performance and career selection.

Department
Public Health

When Taught
Fall and Winter

Credit Hours

Min:
2

Fixed/Max:
2

Lecture Hours

Fixed:
2

Lab Hours

Fixed:
0

Learning Outcomes

Title
Serving the community

Tags
203320, 4

Learning Outcome
Experience the positive benefits of serving in the community.

Title
Sport psychology

Tags
203340, 2

Learning Outcome
Learn the basic principles and skills of sport psychology that will enhance performance.

Title
Orientation

Tags
203345, 0

Learning Outcome
Orient new freshman student-athletes to BYU and the resources available for them in the Student Athlete Academic Center.

Title
Sport nutrition

Tags
203346, 3

Learning Outcome
Gain a better understanding of sports nutrition and its impact on performance.

Title
Basic life skills

Tags
203383, 1

Learning Outcome
Learn basics life skills that will enhance the BYU experience of each student-athlete and prepare them for life after college.

HLTH 312 - Introduction to Planning, Interventions, and Evaluation

Course Information

Teaching Area (new)
HLTH

Course Number
312

Teaching Area
HLTH

Course Title
Introduction to Planning, Interventions, and Evaluation

Course Description
Introduction to the public health intervention planning process; Includes health assessment, types of commonly used interventions, defining goals and objectives, and basic types of evaluation

Department
Public Health

When Taught
Fall and Winter

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Other Prerequisites
Major only. HLTH 210 may be taken prior to or concurrently with HLTH 312 and HLTH 316.

Learning Outcomes

Title
Program goals

Tags
208381, 0, 4

Learning Outcome
Students will be able to write program goals and objectives that are clear, specific, measurable, achievable, relevant, time bound (SMART).

Title
Program planning model

Tags
208379, 0, 1

Learning Outcome
Students will be able to apply the generalized program planning model to public health practice.

Title
Community assessment

Tags
208382, 0, 2

Learning Outcome
Students will be able to create a plan for community assessment and implement it using appropriate data sources.

Title
Priority Setting and Root Cause Analysis

Tags
209895, 0, 3

Learning Outcome
Students will be able to apply appropriate tools for identifying priority health issues and their root causes.

Title
Interventions

Tags
208383, 0, 5

Learning Outcome
Students will be able to identify evidence-based or promising public health interventions.

Title
Logic models

Tags
208384, 0, 6

Learning Outcome
Students will be able to develop logic models for public health interventions and evaluation.

Title
Evaluation

Tags
208385, 0, 7

Learning Outcome
Students will be able to differentiate between different types of program evaluation and study designs.

HLTH 313 - Introduction to Data Collection and Analysis

Course Information

Teaching Area (new)
HLTH

Course Number
313

Teaching Area
HLTH

Course Title
Introduction to Data Collection and Analysis

Course Description
Introduction to methods of collecting data in public health, identifying appropriate study designs and statistical analyses for specific public health research questions. \n

Department
Public Health

When Taught
Fall and Winter

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

3

Lab Hours

Fixed:
0

Learning Outcomes

Title
Data Sources and Uses

Tags
203504, 2

Learning Outcome
Students will distinguish between qualitative and quantitative data sources and uses.

Title
Data Collection

Tags
203505, 3

Learning Outcome
Students will explain the basic principles of qualitative and quantitative data collection and contrast various data collection methods.

Title
Analytic Procedures

Tags
203506, 4

Learning Outcome
Students will describe basic analytic procedures for qualitative and quantitative data sources.

Title
Data Visualization

Tags
203507, 5

Learning Outcome
Students will present data analysis results in text and graphically using principles of data visualization.

Title
Environmental and Spatial Data

Tags
203508, 6

Learning Outcome
Students will describe basic characteristics of environmental and spatial data, including collection and analysis considerations.

Title
Human Subjects Research

Tags
203509, 1

Learning Outcome
Students will describe the principles of human subjects research and the purpose of the IRB.

HLTH 314 - Health, Disease and Their Determinants, Part 1

Course Information

Teaching Area (new)
HLTH

Course Number
314

Teaching Area
HLTH

Course Title
Health, Disease and Their Determinants, Part 1

Course Description
An introduction to human health, disease, mental health, and injury and how biological, behavioral, socio-economic, and environmental factors impact health and contribute to health disparities, discussed from a population-wide approach integrating social and behavioral models and theories, descriptive epidemiology, and disease pathophysiology.

Department
Public Health

When Taught
Fall and Winter

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Recommended
HLTH 210

Learning Outcomes

Title
Multifaceted nature of health

Tags
206979, 1

Learning Outcome
Discuss and examine the multifaceted nature of health as influenced by biological, behavioral, socio-economic, and environmental determinants of health and disease, and the roles of gender, race, ethnicity, poverty, and other evolving demographics on population health.

Title
Health behaviors

Tags
206980, 2

Learning Outcome
Describe models and theories that explain and predict health behaviors, including those from the intrapersonal, interpersonal, and community/ ecological domains.

Title
Indicators of health

Tags
206981, 3

Learning Outcome
Identify and examine trends, factors, and key indicators of health and the leading causes of morbidity and mortality through a life course perspective.

Title
Health threats

Tags
206982, 4

Learning Outcome
Discuss the origin, transmission mechanisms, and dynamics of persistent, emerging, and re-emerging health threats, from the perspective of interactions among host, agents, and environment.

Title
Determinants health and wellness

Tags
206983, 5

Learning Outcome
Analyze the fundamental pathophysiological mechanisms, modesof disease transmission, and the physiological and cognitive processes that determine health and wellness and how these can be altered by disease.

HLTH 315 - Health, Disease and Their Determinants, Part 2

Course Information

Teaching Area (new)
HLTH

Course Number
315

Teaching Area
HLTH

Course Title
Health, Disease and Their Determinants, Part 2

Course Description
Persistent, emerging, and re-emerging population health problems and how evidence-based prevention and control strategies are applied in public health settings. Aims to expand on students' cumulative understanding of the descriptive epidemiology and pathophysiology of disease, injury, and mental health learned in HLTH 314. Origins of health disparities, and how social and behavioral sciences can contribute to providing effective intervention strategies. \n\n

Recommended

HLTH 210

Learning Outcomes

Title
Health threats

Tags
206996, 1

Learning Outcome
Discuss recent developments in emerging/re-emerging health threats within the context of prevention and control strategies.

Title
Health behavior and health behavior change

Tags
206997, 2

Learning Outcome
Explain how individual health behavior and health behavior change are influenced by policy, environmental engineering, communication strategies, educational interventions, health counseling, community mobilization, and access to services.

Title
Health Promotion

Tags
206998, 3

Learning Outcome
Discuss how public health promotes health and reduces the risk for diseases,injuries,health inequities, mental health problems, and adverse environmental exposures.

Title
Health behavior change theories

Tags
206999, 4

Learning Outcome
Understand and apply selected health behavior change theories to prevent disease at the individual, family, and community levels.

Title
Scientific literature

Tags
207000, 5

Learning Outcome
Interpret scientific literature relative to a specific disease, its risk factors, control strategies, and associated policies.

Title
Social and behavioral sciences

Tags
207001, 6

Learning Outcome
Discuss how social and behavioral sciences (psychology, anthropology, sociology, and economics) are applied to improve health outcomes.

HLTH 316 - Influencing Health through Health Systems and Policy

Course Information

Teaching Area (new)
HLTH

Course Number
316

Teaching Area
HLTH

Course Title
Influencing Health through Health Systems and Policy

Course Description
Health policy and systems from a global perspective. Emphasis on policy analysis and the political dimensions of health policymaking.

Department
Public Health

When Taught
Fall and Winter

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Other Prerequisites
HLTH 210 may be taken prior to or concurrently with HLTH 312 and HLTH 316.

Recommended
Hlth 314, Hlth 315

Learning Outcomes

Title
Policies, systems, and health services

Tags
206931, 1

Learning Outcome
Students will be able to describe how policies, systems, and health services affect the populations in a community

Title
Key terms, conceptual frameworks, and theories

Tags
206932, 0, 2

Learning Outcome
Students will be able to apply key terms, conceptual frameworks, and theories that relate to ways in which policies and systems are used to respond to public health problems.

Title
Stakeholders

Learning Outcome
Students will be able to compare and contrast the structures, functions, and aims of various stakeholders involved in the design and implementation of policy and system responses to public health problems

Title
Strategies

Learning Outcome
Students will be able combine various processes and methods to create strategies for influencing policy (including regulatory, legislative, and organizational) and systems change.

Title
Communicate

Learning Outcome
Students will be able to analyze policy options and construct policy memos to effectively communicate evidence-based recommendations to decision-makers in various contexts.

Title
Perspectives

Learning Outcome
Students will be able to challenge their own and others' preconceived ideas and assumptions to appreciate multiple perspectives regarding critical public health policy and systems debates.

Title
Teams

Learning Outcome
Students will be able to contribute to a high-functioning team and continually improve team performance to synthesize and present key health systems and policy ideas through course assignments

HLTH 320 - Advanced First Aid and Safety

Course Information

Teaching Area (new)
HLTH

Course Number
320

Teaching Area
HLTH

Course Title
Advanced First Aid and Safety

Course Description
In-depth coverage of first aid procedures for injuries and sudden illness. Leads to first aid and CPR certifications.

Department
Public Health

When Taught
Fall, Winter, Spring

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Learning Outcomes

Title
CPR, AED, Bandaging, and Splinting

Tags
203135, 1

Learning Outcome
Demonstrate the skills involving cardiopulmonary rescuitation (CPR), automated external defibrillation (AED), bandaging, and splinting.

Title
Importance of First Aid

Tags
203136, 2

Learning Outcome
Identify the importance of first aid and emergency care

Title
Emergency Decisions

Tags
203137, 4

Learning Outcome
Identify the decisions involved during an emergency.

Title
First Aid and Emergency Care Procedures

Tags
203138, 5

Learning Outcome
Describe proper first aid and emergency care procedures for specific emergency problems.

Title
Emergency Problems

Tags
203319, 2

Learning Outcome
Recognize specific emergency problems (i.e., heart attack, fracture, open wound, burn insect sting) through their signs and symptoms.

HLTH 322 - Environmental Health

Course Information

Teaching Area (new)
HLTH

Course Number
322

Teaching Area
HLTH

Course Title
Environmental Health

Course Description
Overview of environmental factors that affect human health. Major topics include stewardship; population dynamics and impacts; ecosystems and ecosystem management; biological, chemical, and physical hazards in outdoor, indoor, and workplace environments; and risk assessment. Connections to the gospel are made and encouraged.

Department
Public Health

When Taught
Fall and Winter

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

0

Recommended
HIth 100.

Learning Outcomes

Title
Environmental Health Issues

Tags
203139, 1

Learning Outcome
Students will be able to apply methods to understand and analyze major environmental health issues orally and in writing.

Title
Solutions

Tags
203140, 2

Learning Outcome
Students will be able to recommend potential solutions to major environmental health issues orally and in writing.

Title
Action

Tags
203142, 5

Learning Outcome
Students will be able to take action to improve environmental health locally

HLTH 324 - Occupational Health and Safety

Course Information

Teaching Area (new)
HLTH

Course Number
324

Teaching Area
HLTH

Course Title
Occupational Health and Safety

Course Description
In-depth focus on workplace health and safety through a multidisciplinary approach to the anticipation, recognition, evaluation, and prevention and control of workplace-related illnesses and injuries.

Department
Public Health

When Taught
Fall

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Recommended
Chem 105 and Math 110 or equivalent

Learning Outcomes

Title
OSHA

Learning Outcome
Students will be able to describe the purpose and scope of the Occupational Health and Safety Act as well as other relevant safety and health legislation and consensus standards.

Title
Violations

Learning Outcome
Students will be able to demonstrate competency in using the OSHA standards by identifying specific violations of current standards.

Title
Management

Learning Outcome
Students will be able to explain how the functions of management are utilized to assure safe conditions and practices through the development of specific programs as well as an overall safety and health program.

Title
Equipment Hazards

Learning Outcome
Students will be able to identify, evaluate, and develop loss control strategies to address the hazards associated with operating common manufacturing and construction equipment and process.

Title
Accident Investigation

Learning Outcome
Students will be able to discuss and demonstrate the elements involved in completing an accident investigation.

HLTH 330 - Principles and Practices of Health Promotion

Course Information

Teaching Area (new)
HLTH

Course Number
330

Teaching Area
HLTH

Course Title
Principles and Practices of Health Promotion

Course Description
Introduction to the health promotion profession, emphasizing current issues, professional preparation and employment, as well as the philosophy and foundations of professional practice in various settings.

Department
Public Health

When Taught
Fall, Winter, Spring

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:

HIth 100

Note
Also offered by BYU Independent Study; enroll anytime throughout year; one year to complete; additional tuition required; register at https://is.byu.edu/catalog/HLTH-330-M001.

Learning Outcomes

Title
Effective Communication

Tags
203235, 6

Learning Outcome
Identify techniques for enhancing communication in interactions with clients in health promotion settings.

Title
Health Promotion Solutions

Tags
203236, 7

Learning Outcome
Propose health promotion solutions to address health problems among various populations.

Title
Health Promotion Resources and Organizations

Tags
203334, 2

Learning Outcome
Identify organizations, resources, and professional journals associated with health promotion.

Title
Professional Opportunities

Tags
203341, 1

Learning Outcome
Identify professional opportunities available to health education/health promotion specialists in community, school, worksite, and health care settings.

Title
Health Specialist Roles and Responsibilities

Tags
203344, 1

Learning Outcome
Identify the roles and responsibilities for health education/health promotion specialists and opportunities for certifications and advanced study.

Title
Diverse Populations Health Promotion

Tags
203349, 4

Learning Outcome
Demonstrate awareness and sensitivity of the diverse and unique needs of various age group populations and cultural groups for health promotion.

Title
Health Promotion Overview

Tags
203394, 3

Learning Outcome
Provide an overview of theories, models, and initiatives used to guide decision-making in the planning and implementation of health promotion programs and health behavior change.

HLTH 332 - Technology in Health Promotion

Course Information

Teaching Area (new)
HLTH

Course Number
332

Hlth 330.

Learning Outcomes

Title
Socio-Behavioral Theories and Models

Tags
203498, 1

Learning Outcome

Students will understand and be able to use the prominent models and theories that are used in public health to predict and to understand human behavior.

Title
Prominent Theoretical Features and Constructs for Informing Practice

Tags
203499, 2

Learning Outcome

Students will be able to design interventions based upon health behavior theories and models.

HLTH 345 - Principles of Epidemiology

Course Information

Teaching Area (new)
HLTH

Course Number
345

Teaching Area
HLTH

Course Title
Principles of Epidemiology

Course Description
Applying analytical tools to study acute and chronic disease to facilitate investigation and control of epidemics.

Department

Simple Requisites

Prerequisites

Type
Prerequisite

Prerequisites

Complete ALL of the following Courses:

- HLTH 313 - Introduction to Data Collection and Analysis

Recommended
Stat 121

Learning Outcomes

Title
Theories of Disease Causation

Tags
203455, 1

Learning Outcome
Students will describe the theories of disease causation and apply these models to a variety of health conditions.

Title
Study Designs

Tags
203456, 2

Learning Outcome
Students will describe the major epidemiology study designs, their strengths and weaknesses and demonstrate understanding of conditions under which each study design is preferred. Students will apply this knowledge to a variety of health conditions.

Title
Measures of Disease Frequency

Tags
203457, 3

Learning Outcome
Students will define "measures of disease frequency" and identify common measures in epidemiology (incidence, prevalence & other health indicators). Students will demonstrate when each measure is appropriate, identify the correct equation, calculate and interpret the results

Title
Disease Distribution

Tags
203458, 4

Learning Outcome
Students will use measures of disease frequency to describe the pattern and distribution of disease.

Title
Measures of Association

Tags
203459, 5

Learning Outcome
Students will define "measures of association" and describe their purpose. Students will identify the most common measures of association (relative & absolute) in epidemiology, explain when each measure is appropriate, identify their formulas, calculate and interpret the results of each measure.

Title
Threats to Study Validity

Tags
203460, 6

Learning Outcome
Students will identify and define "Threats to Study Validity" (random error, bias, confounding, etc.). Students will evaluate epidemiologic research (conceptually and using basic analysis) for possible threats to study validity. Students will describe and perform strategies for testing and controlling for threats to study validity.

HLTH 381 - School Health Education Methods and Curriculum A

Course Information

Teaching Area (new)
HLTH

Course Number
381

Teaching Area
HLTH

Course Title
School Health Education Methods and Curriculum A

Course Description
Part A of methods and curriculum preparation; effective implementation of instruction related to substance abuse prevention, safety and injury prevention, and reproductive health for secondary students; unit and lesson planning, assessment of learner performance; practice teaching.

Department
Public Health

When Taught
Fall

Credit Hours

Min:

Learning Outcomes

Title
Best Methods

Tags
203144, 5

Learning Outcome
Evaluate possible teaching methods and select the best method(s) to use when teaching specific health content areas.

Title
Teacher Work Sample Applications

Tags
203145, 6

Learning Outcome
Apply a systematic instructional design process to lesson planning that utilizes Teacher Work Sample steps and provides sufficient detail and clarity for other educators to teach the lesson plan as designed and intended.

Title
Instructional Strategies

Tags
203337, 3

Learning Outcome
Identify and experiment with a variety of instructional strategies and teaching methods to enhance health teaching including those that emphasize active learning and skill development.

Title
Teaching Resources and Standards

Tags
203379, 0

Learning Outcome
Identify and apply teaching resources, national and state standards, and state frameworks for teaching health education.

Title
Risks, Concerns and Challenges

Tags
203382, 2

Learning Outcome
Identify health risks, concerns, and challenges confronting school-age youth and develop teaching materials for helping strategies.

Title
Classroom Environments

Tags
203393, 1

Learning Outcome
Identify and apply strategies for creating classroom environments conducive to optimal learning and emotional well-being.

HLTH 382 - School Health Education Methods and Curriculum B

Course Information

Prerequisites

Complete ANY of the following Courses:

- PETE 276R - Exploration of Teaching
- BIO 276 - Exploration of Teaching in Biological Sciences
- SFL 276R - Exploration of Teaching: Family and Consumer Sciences

Other Prerequisites
Students must complete the 276 Exploration of Teaching Course for their teaching MAJOR. Students in teaching majors not listed should contact the instructor for an add code.

Learning Outcomes

Title
Curriculum Planning

Tags
203147, 1

Learning Outcome
Students will be able to create a semester outline, unit maps, and lesson plans for a secondary school health education course based upon National School Health Education Standards and the Utah State Office of Education Core Curriculum.

Title
Effective Practices

Tags
203148, 2

Learning Outcome
Students will be able to demonstrate effective characteristics of health education.

Title
Professionalism

Tags
203149, 3

Learning Outcome
Students will be able to demonstrate professionalism in conduct, character, collaboration, and attitude.

Title
Practicum

Tags
203150, 4

Learning Outcome
Students will be able to qualify for student teaching field experience by completing a practicum and Teacher Work Sample, passing the Praxis exam, and successfully completing a student teaching application.

HLTH 383 - Mind/Body Health

Course Information

Teaching Area (new)
HLTH

Course Number
383

Teaching Area
HLTH

Course Title
Mind/Body Health

Course Description
Theories and research on the effect of emotions and attitudes on health: how negative emotions increase disease susceptibility and positive emotions encourage immune strength, health, and healing. Behavioral medicine and complementary and alternative health practices also presented.

Department
Public Health

When Taught
Fall, Winter, Spring

Credit Hours

Learning Outcomes

Title
Contributing Influences

Tags
203390, 1

Learning Outcome
Identify and evaluate the behavioral, social, and cultural thought processes that contribute to disease.(Learning activities: lecture, class discussion, research study reviews, exams)

Title
Mental Processes and Disease Development

Tags
203429, 1

Learning Outcome
Identify and understand the connection between mental processes/beliefs and how they contribute to chronic and infectious disease.
(Learning activities: lecture, class discussion, group presentations, videos)

HLTH 391R - Mentored Teaching in Public Health

Course Information

Course Number
391R

Teaching Area
HLTH

Course Title
Mentored Teaching in Public Health

Course Description
Collaborate with professors in teaching public health courses.

Department
Public Health

When Taught
All Semesters/Terms

Credit Hours

Min:
0.5

Learning Outcomes

Title
Teaching Skills

Learning Outcome
Students will develop skills in student-centered, faith-based classroom teaching through activities such as pre-class preparation, classroom instruction, curriculum design and development, assignment and assessment grading, student interactions and relationship building, communication, record-keeping, and other aspects of teaching.

Title
Content Mastery

Learning Outcome
Students will master course content and skills by assisting the professor in helping students learn.

Title
Christlike Attributes

Learning Outcome
Students will cultivate Christ-like attributes as a teacher, such as charity, virtue, integrity, knowledge, patience, humility, and diligence.

HLTH 396R - Campus Engagement

Course Information

Course Number
396R

Teaching Area
HLTH

Course Title
Campus Engagement

Course Description
Students will participate in public health-focused or public-health related engagements, such service learning, academic competitions, or leadership roles on campus.

Department
Public Health

When Taught
All Semesters/Terms

Credit Hours

Min:
0.5

Fixed/Max:
3

Note
An APPROVED applied experiences application is required before adding the course.

Learning Outcomes

Title
Application in Professional Settings

Learning Outcome
Students will be able to apply public health concepts in professional settings.

Title
Writing

Learning Outcome
Students will be able to write effectively for the public health profession.

Title
Collaboration & Leadership

Learning Outcome
Students will be able to function as collaborative team members by demonstrating communication, problem-solving, teamwork, or leadership skills.

Simple Requisites

Prerequisite

Type
Prerequisite

Complete ALL of the following Courses:
- HLTH 313 - Introduction to Data Collection and Analysis

Learning Outcomes

Title
Clinical Data Sources

Learning Outcome
Students will be able to explain how data are collected and transferred through US healthcare systems, and how those data can be ethically used to inform and improve public health.

Title
Data uses

Learning Outcome
Students will be able to describe the limitations, promises, and complexities inherent in clinically-reported data

Title
Analyze Clinical Data

Learning Outcome
Students will be able to analyze clinical data to assess population health by using statistical programming and methods, incorporating data visualization and interpreting data for public health stakeholders.

HLTH 420 - Injury and Violence Prevention

Course Information

Teaching Area (new)
HLTH

Course Number
420

Prerequisite

Prerequisites

Complete ALL of the following Courses:

- HLTH 100 - Introduction to Public Health

Learning Outcomes

Title
Injury Prevention

Tags
203151, 2

Learning Outcome
Define the terms used in the injury prevention field.

Title
Injury Analysis and Intervention

Tags
203152, 3

Learning Outcome
Describe the models used to analyze injuries and determine interventions.

Title
Injury Prevention Information Sources

Tags
203153, 4

Learning Outcome
Select valid sources of injury prevention information.

Title
Prevention Intervention Selection and Recommendation

Tags
203154, 5

Learning Outcome
Select and recommend proven and effective injury prevention interventions.

Title
Injury Impact

Tags
203335, 1

Learning Outcome
Describe the impact of injures on health and on society in terms of mortality, morbidity, disability, and cost.

HLTH 422 - Disaster Response and Emergency Preparedness

Course Information

Teaching Area (new)
HLTH

Course Number
422

Teaching Area
HLTH

Course Title
Disaster Response and Emergency Preparedness

Course Description
Key elements of public health preparedness and response to the variety of natural, technological, and man-made disasters occurring routinely on a global basis.

Department
Public Health

When Taught
Winter

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Recommended
Hlth 311, 420.

Learning Outcomes

Title
Hazards

Tags
203413, 1

Learning Outcome
Identify the major types of natural and manmade disasters, and describe how they affect public health, government and non-government roles in disaster situations, and how current laws governing emergency management have evolved in response to disaster events.

Title
Assessment

Tags
203414, 2

Learning Outcome
Be able to use risk assessment tools to identify organizational priorities for public health preparedness, response, and recovery activities.

Title
Management

Tags
203415, 3

Learning Outcome
Describe the emergency management cycle, leadership theories governing emergency management, and the incident command model used in emergency response operations.

Title
Communication

Tags
203416, 4

Learning Outcome
Communicate effectively, both orally and in writing, in the terminology of the emergency management discipline, and demonstrate ability to collaborate in a team setting to solve problems related to public health emergency management and disaster response.

HLTH 425 - Working with Vulnerable and Diverse Populations

Course Information

Teaching Area (new)
HLTH

Course Number
425

Teaching Area
HLTH

Course Title
Working with Vulnerable and Diverse Populations

Course Description
Developing skills and building competency in working effectively with vulnerable and diverse populations in domestic settings. Emphasis on cultural competency and cross-cultural communication skills, and their application in the variety of settings where health care and public health professionals work.

Department
Public Health

When Taught
Fall and Winter

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:

Recommended
MSB 288, ACC 588, MBA 588, IS 588, or MSB 588; A suggested pre-requisite exists for MSB students (MSB 288/MSB588) and does not apply to PH students

Learning Outcomes

Title
Personal Culture

Learning Outcome
Reflect on how one's own heritage, beliefs, and values affect culturally congruent public health and healthcare practices.

Title
Health Disparities

Learning Outcome
Identify historical events and societal perceptions underlying health disparities for diverse populations.

Title
Health Issues

Learning Outcome
Describe the major health issues, barriers, and facilitators affecting marginalized populations and explain how gospel-centered principles can inform compassionate public health responses.

Title
Systemic Influences

Learning Outcome
Analyze how culture, built environment, institutional practices, and policy impact equitable health services for vulnerable populations.

Title
Christlike Attributes

Learning Outcome
Develop Christlike attributes and effective communication skills for serving diverse individuals and groups.

HLTH 426 - Environmental Toxicology

Course Information

Teaching Area (new)
HLTH

Course Number
426

Teaching Area
HLTH

Course Title
Environmental Toxicology

Course Description
This course is designed for students who are interested in public health and environmental issues. Toxicology is a multidisciplinary experimental science that combines chemistry, biology, and physiology to determine whether substances we are exposed to in the environment are likely to harm our health. Students will learn how toxicology is used to understand how humans respond to chemicals in the environment. In addition, students will learn how toxicology is applied to protect human health through risk assessment.

Department
Public Health

When Taught
Winter

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Recommended
Chem 106, 107

Learning Outcomes

Title
Chemical Agents

Learning Outcome
Identify chemical properties and the biological processes which modulate the toxicokinetics of chemical agents of public health importance.

Title
Reactions

Learning Outcome
Explain the significance of biotransformation reactions as a determinant of the toxicokinetic and toxicodynamic activities of chemicals.

Title
Response to Chemical Agents

Learning Outcome
Describe molecular, cellular and pathophysiological responses resulting from exposure to chemical agents relevant to human health

Title
Susceptibility

Learning Outcome
Identify underlying susceptibility factors which contribute to the ability of chemicals to elicit bioeffects which contribute to human disease

Title
Chemical Testing

Learning Outcome
Explain the science underlying testing for the ability of chemicals to elicit adverse human health effects

Title
Risk Assessment

Learning Outcome
Put into perspective the role of toxicology in the risk assessment process

HLTH 428 - Occupational Exposure Assessment Lab

Course Information

Teaching Area (new)
HLTH

Course Number
428

Teaching Area
HLTH

Course Title
Occupational Exposure Assessment Lab

Course Description
Theory and application of occupational sampling methods that are used to evaluate chemical, biological, and physical exposures in the workplace. Focus on the quantitative and qualitative methods used to evaluate occupational exposures to suspended particulates, gaseous contaminants, noise and other physical agents, and biological agents; interpretation of sampling results; identification of appropriate control strategies to prevent hazardous exposures; and exposure assessment communication.

Department
Public Health

When Taught
Fall

Credit Hours

Min:

Type
Prerequisite

Complete ANY of the following Courses:

- HLTH 322 - Environmental Health
  AND HLTH 324 - Occupational Health and Safety
- GEOL 111 - Physical Geology
- PHSCS 137 - Energy, Climate, and the Environment
- PWS 150 - Environmental Biology
- GEOL 101 - Introduction to Geology
- CCE 102 - Sustainable Infrastructure

Recommended
Chem 105; Math 110, HLTH 428

Learning Outcomes

Title
Pollutants

Learning Outcome
Students will be able to describe particle and gas-phase pollutants in air that can adversely affect human health

Title
Health Guidelines

Learning Outcome
Students will be able to understand and interpret health guidelines related to air quality

Title
Exposure Assessments

Learning Outcome
Students will be able to conduct exposure assessments to evaluate indoor and outdoor pollution levels and biological contaminants

Title
Instruments

Learning Outcome
Students will be able to calibrate, maintain, and operate instruments used to evaluate air quality

Title
Control of Pollutants

Learning Outcome
Students will be able to identify strategies to control biological, chemical, and particulate pollutants in indoor and outdoor air.

Title
Teamwork

Learning Outcome
Students will be able to solve exposure-related problems by collaborating with others in a team setting.

Title
Communication

Learning Outcome
Students will be able to communicate scientific ideas effectively using both oral and written formats in the terminology of the Environmental Health discipline

HLTH 431 - Health Communication and Advocacy

Course Information

Teaching Area (new)
HLTH

Course Number
431

Teaching Area
HLTH

Course Title
Health Communication and Advocacy

Course Description
This course will study applied health communication strategies that inform individual and community decision-making aimed at enhancing health. It also embeds the role of advocacy by incorporating social networking and mobilization, interpersonal communication and negotiation, as well as the use of earned media and social platforms for generating public discourse.

Department
Public Health

When Taught
Fall and Winter

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Simple Requisites

Prerequisites

Type
Prerequisite

Prerequisites

Complete ALL of the following Courses:

- HLTH 312 - Introduction to Planning, Interventions, and Evaluation
  AND HLTH 316 - Influencing Health through Health Systems and Policy

Other Prerequisites
HLTH 100, HLTH 210. Majors only.

Learning Outcomes

Title
1. Communication skill development involving peer feedback

Tags
207163, 1

Learning Outcome
Enhance professional writing skills for audiences relevant to public health by learning new tools and communication strategies (interpersonal communication, mass media, new media, and team-building skills with linguistic and cultural proficiency), and by listening, reflection and data gathering, and both receiving and providing peer feedback.

Title
2. Promote appropriate communication

Tags
207164, 2

Learning Outcome
Select communication approaches for disseminating public health data and information, including social media, technology, modern mass media and community gatherings, to influence stakeholders, policy makers and their constituents on issues of public health importance.

Title
3. Audience sensitivity and Discipleship

Tags
207165, 3

Learning Outcome
Reflect personal interests and professional plans to be sensitive to the views of others, especially audiences most affected by a problem, by learning how people think, feel and act as a result of a communicated product or experience.

Title
4. Advocate for policy or environmental change

Tags
207167, 4

Learning Outcome
Identify relevant constituencies and appropriate advocacy strategies to influence decision makers regarding health-related policies, regulations, laws, or rules at organizational and community levels using health communication tools.

Title
5. Advocacy experience

Tags
207178, 5

Learning Outcome
Identify advocacy practices, including framing health issues, to advocate for policy change in compliance with local, state, and/or federal policies and procedure.

HLTH 434 - Applied Public Health Evaluation & Analytics

Course Information

Teaching Area (new)
HLTH

Course Number
434

Teaching Area
HLTH

Course Title
Applied Public Health Evaluation & Analytics

Course Description
Students will apply the public health evaluation framework to real-world programs, including designing data collection instruments and procedures, analyzing data, and effectively communicating findings to stakeholders.

Department
Public Health

When Taught

Prerequisite

Prerequisites

Complete ALL of the following Courses:

- HLTH 312 - Introduction to Planning, Interventions, and Evaluation
  AND HLTH 313 - Introduction to Data Collection and Analysis

Other Prerequisites
HLTH 210.

Learning Outcomes

Title
Evaluation Framework

Tags
203424, 4

Learning Outcome
Apply the public health evaluation framework to real-world programs.

Title
Instruments & Data Collection

Tags
203425, 5

Learning Outcome
Design evaluation instruments and data collection procedures informed by program goals and context, with a commitment to integrity and value-based evaluation.

Title
Software & Analysis

Tags
203426, 8

Learning Outcome
Use statistical software to analyze quantitative data and draw responsible, evidence-based conclusions.

Title
Secondary Data Analysis

Tags
203481, 3

Learning Outcome
Students will be able to conduct basic data management techniques and carry out statistical tests

Title
Data Visualization

Tags
203482, 6

Learning Outcome
Create clear and engaging data visualizations that communicate findings to diverse audiences with empathy.

Title
Communicate Findings

Tags
203483, 1

Learning Outcome
Communicate evaluation findings truthfully and persuasively, demonstrating compassion towards stakeholders and communities.

Title
Professionalism, Leadership, & Teamwork

Tags
203484, 9

Learning Outcome
Demonstrate Christ-centered professionalism, leadership, and teamwork in collaborative evaluation projects that reflect real-world practice.

Title
Reflection

Learning Outcome
Reflect on how research and evaluation skills can be applied to a future public health career, embracing the calling of a disciple scholar who integrates faith and learning

HLTH 436 - Sexual and Reproductive Health

Course Information

Teaching Area (new)
HLTH

Course Number
436

Teaching Area
HLTH

Course Title
Sexual and Reproductive Health

Course Description
Prepare public and school health professionals to educate individuals and communities about sexual health as defined by the World Health Organization. Includes discussion of healthy sexual behavior, male & female sexual anatomy & response, male & female fertility, contraception, menstruation, pregnancy, childbirth, sexual and gender minorities, gender-based violence, and sexually transmitted disease.

Department
Public Health

When Taught
Fall

Credit Hours

Min:

Learning Outcomes

Title
Sexual Health

Learning Outcome
Students will be able to discuss the definition and importance of sexual health consistent with the World Health Organization’s definition and within the scope of Public and School Health Practice

Title
Anatomy & Function

Learning Outcome
Students will be able to identify and describe the anatomy and function of male and female reproductive systems (including menstruation, pregnancy, childbirth, menopause, fertility, and infertility) and discuss maturation, puberty, and sexual function across the lifespan.

Title
Sexual Risks

Learning Outcome
Students will be able to explain the epidemiology of sexual health risk factors and conditions including sexually transmitted diseases, pregnancy related health outcomes, and gender-based violence to audiences within the scope of Public and School Health Practice.

Title
Professional Preparation

Learning Outcome
Students will be able to plan curriculum appropriate for teaching sexuality education consistent with policies for Utah Public Schools.

HLTH 440 - Introduction to Statistical Computing in Epidemiology (SAS)

Course Information

Teaching Area (new)
HLTH

Course Number
440

Teaching Area
HLTH

Course Title
Introduction to Statistical Computing in Epidemiology (SAS)

Course Description
Introduction to the basics of SAS and EXCEL focusing on the set of commands useful for data-reporting, data-management, formatting and graphics, and data-analysis. Topics include tables and regression models for epidemiologists (cumulative-incidence, case-control, and incidence rate data).

Data Management

Tags
203239, 1

Learning Outcome
Identify the principles of data management.

Title
Presentation of Data

Tags
203240, 2

Learning Outcome
Describe how/when to use tables, charts and graphs for data presentation.

Title
Charts & Graphs

Tags
203241, 3

Learning Outcome
Create tables, graphs and charts in Excel for presenting public health data.

Title
SAS

Tags
203242, 4

Learning Outcome
Use SAS to manipulate datasets provided by sources such as the Centers for Disease Control and Prevention.

Title
SAS Procedures

Tags
203243, 5

Learning Outcome
Use basic SAS procedures to explore, describe and analyze data, including proc contents, proc freq, proc means, proc univariate and proc print.

Title
Data Cleaning & Recoding

Tags
203244, 6

Learning Outcome
Clean and recode data to prepare it for analysis using a variety of data cleaning techniques. Document all cleaning and recoding using comments in the SAS program and external documentation (code books, data dictionaries etc.).

Title
Output

Tags
203245, 7

Learning Outcome
Create clear and documented output using labels, titles, and formats.

Title
Basic Analysis

Tags
203480, 8

Learning Outcome
Conduct basic analyses using SAS including frequencies, proportions, chi-square, relative risk, odds ratio & logistic regression.

HLTH 442 - Special Topics in Epidemiology

Course Information

Teaching Area (new)
HLTH

Course Number
442

Teaching Area
HLTH

Course Title
Special Topics in Epidemiology

Course Description
Topics include environmental epidemiology, statistical methods in epidemiology, social epidemiology, genetic epidemiology, categorical data analysis, applied longitudinal analysis, survival analysis, and life table methods.

Department
Public Health

When Taught
Winter

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Recommended
HIth 345, Stat 121.

Learning Outcomes

Title
Designs and Modeling

Tags
203249, 3

Learning Outcome
Describe Epidemiologic Study Designs and explain Statistical Modeling and Causal Inference

Title
Climate Issues

Tags
203333, 8

Learning Outcome
Describe how Climate Change can affect Health

Title
Contaminant Issues

Tags
203343, 6

Learning Outcome
Give examples of current health issues in Soil and Food Contaminants

Title
Air Issues

Tags
203347, 5

Learning Outcome
Give examples of current health issues in Indoor and Ambient Air Quality

Title
Water Issues

Tags
203348, 7

Learning Outcome
Give examples of current health issues in Water and Radiation

Title
Monitor

Tags
203363, 1

Learning Outcome
Show how Monitoring is accomplished in Environmental Health

Title
Mapping, GIS, Time Series

Tags
203373, 4

Learning Outcome
Describe Mapping, Geographic Information Systems and Time Series

Title
Elements of Assessment

Tags
203388, 0

Learning Outcome
Explain the Basic Elements of Research, Exposure and Outcome Assessment

Title
Challenges with Investigation

Tags
203389, 3

Learning Outcome
Explain challenges associated with investigating Disease Clusters

HLTH 447 - Introduction to Biostatistics

Course Information

Teaching Area (new)
HLTH

Course Number
447

Teaching Area
HLTH

Course Title
Introduction to Biostatistics

Course Description
Introduction to statistical concepts and analytical methods as applied to data encountered in biotechnology and biomedical sciences. Emphasis on the basic concepts of experimental design, quantitative analysis of data, and statistical inferences.

Department
Public Health

When Taught
Fall and Winter

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Simple Requisites

Prerequisites

Type
Prerequisite

Prerequisites

Complete ALL of the following Courses:

- HLTH 100 - Introduction to Public Health
  AND HLTH 313 - Introduction to Data Collection and Analysis

Recommended
HLTH 440 - Introduction to Statistical Computing in Epidemiology (SAS)

Learning Outcomes

Title
Concepts

Tags
203439, 1

Learning Outcome

Epidemiologic research questions can be translated into statistical questions that can be addressed using appropriate data and quantitative data analysis methods.
Data analysis should be informed by an understanding of the epidemiologic study design and data collection methods that gave rise to the data, and limitations of the data such as missingness, information bias, and selection bias.
Many epidemiologic research questions involve comparisons across groups, where associations between exposures and outcomes are likely confounded by other variables due to a lack of randomization of exposures in the study design. Standardization and regression are two methods of reducing confounding when estimating associations.
Biostatistical procedures rely on concepts of probability and probability distributions. Using these concepts, samples are used to estimate unknown population parameters, and precision of estimates is shown with confidence intervals.

Title
Procedures

Tags
203440, 2

Learning Outcome

Summarize nominal, ordinal, and numerical data in tables and graphs
Calculate sensitivity, specificity, positive and negative predictive values
Select a probability sample using random numbers
Standardize means, proportions, and rates across groups for comparison
Calculate point estimates, confidence intervals, and P values
Compare means using t tests and linear regression
Compare proportions using chi-square tests, logistic regression, and binary regression
Compare rates using Poisson regression
Calculate life tables and Kaplan-Meier curves for survival data
Compare survival times using log rank tests and Cox proportional hazards regression
Combine results from multiple studies using meta-analysis procedures

Title
Modes of Communication

Tags
203441, 3

Learning Outcome

Communicate research findings to a scientific audience in writing (primary focus)
Communicate research findings to a scientific audience orally (secondary focus)

Title
Concepts

Tags
210993, 0, 4

HLTH 449 - Epidemiologic Study Design & Analysis

Course Information

Teaching Area (new)
HLTH

Course Number
449

Teaching Area
HLTH

Course Title
Epidemiologic Study Design & Analysis

Course Description
Building on courses in epidemiologic methods (HLTH 345), data management (HLTH 440), and biostatistics (HLTH 447), HLTH 449: Epidemiologic Study Design and Analysis helps students identify appropriate study designs and statistical analyses for specific public health research questions and implement these design and analysis strategies using statistical software and epidemiologic datasets.

  AND HLTH 440 - Introduction to Statistical Computing in Epidemiology (SAS)
  AND HLTH 447 - Introduction to Biostatistics

Learning Outcomes

Title
Study Validity

Tags
208297, 0, 2

Learning Outcome
Describe and perform strategies for testing and controlling for threats to internal and external study validity.

Title
Assess Epidemiological Literature

Tags
208298, 0, 3

Learning Outcome
Critique assessment of selected papers in the epidemiological literature. These papers will represent analytic epidemiological study designs (case-control, cohort, experimental)

Title
Study Design

Tags
208296, 0, 1

Learning Outcome
Be familiar with the basic descriptive and analytic study designs and statistical measures used in epidemiological research.

HLTH 450 - Women's Health

Course Information

Teaching Area (new)
HLTH

Course Number
450

Teaching Area
HLTH

Course Title
Women's Health

Course Description
Overview of selected health topics affecting women's health status. Primary emphasis on steps to enhance personal health and fulfill divine roles from childhood through adulthood.

Department
Public Health

When Taught
Fall; Winter.

Credit Hours

Min:
3

Fixed/Max:

Learning Outcomes

Title
Women's Health Status

Tags
199722, 1

Learning Outcome
Recognize contributing factors and major health issues impacting women's health status.

Title
Divine Roles

Tags
199723, 2

Learning Outcome
Analyze methods for enhancing personal health and fulfilling divine roles from adolescence through adulthood.

Title
Improving Women's Health

Tags
199724, 3

Learning Outcome
Apply various strategies for improving women's health.

Title
Women's Health Professions

Learning Outcome
Describe a variety of professions that impact women's health.

HLTH 456 - Families and Public Health

Course Information

Teaching Area (new)
HLTH

Course Number
456

Teaching Area
HLTH

Course Title
Families and Public Health

Course Description
Introduction to families as producers of health in individuals and communities; discussion of family health theories; application of family impact principles and methods to the development of family-focused and effective public health programs.

Department
Public Health

When Taught
Fall

Credit Hours

Min:
3

HLTH 460 - Substance Use Disorders and the Individual, Family, and Community

Course Information

Teaching Area (new)
HLTH

Course Number
460

Teaching Area
HLTH

Course Title
Substance Use Disorders and the Individual, Family, and Community

Course Description
A public health approach to substance use disorders and mental health that emphasizes prevention science in addressing social determinants, risk and protective factors, bio-psycho-social effects, treatment, and the legal implications of drug use on the individual, family, and community. Students will learn new skills to assist them with future parenting and community involvement, and in preparation for public health career opportunities in the field of substance use disorder prevention and treatment.

Department
Public Health

When Taught
Fall, Winter, Spring

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Learning Outcomes

Title
Epidemiology of Substance Use Disorders

Tags
211199, 0, 1

Learning Outcome
Discuss the descriptive epidemiology of substance use disorders and the opioid crisis in the United States and the age-at-first use among at-risk individuals and communities.

Title
Risk and Protective Factors and Social Determinants of Substance Use Disorders

Tags
211200, 0, 2

Learning Outcome
Explain the underlying major social determinants, adverse childhood experiences (ACES), risk and protective factors for substance use disorders and mental health. Explain how marketing strategies of tobacco, alcohol, and pharmaceutical industries influence substance use.

Title
Co-occurrence of Mental Health and Substance Use Disorders

Tags
211201, 0, 3

Learning Outcome
Discuss how mental health disorders that affect thinking, mood, and behavior may co-exist with substance use disorders. Discuss how a dual diagnosis magnifies the complexity of prevention and treatment of substance use disorders.

Title
Substance Use Disorders and their Physical and Psychological Effects

Tags
211202, 0, 4

Learning Outcome
Identify the DSM 5 criteria for substance use disorders. Compare and contrast the various physical, psychological, and behavioral effects of the 10 classes of drugs that result in substance-related disorders.

Title
Individual, Family, and Community Impact.

Tags
211203, 0, 5

Learning Outcome
Analyze how substance use disorders affect the individual, family, and community. Discuss how families can access preventive and treatment resources, support groups, and other community resources.

Title
Prevention, Treatment, and Recovery Programs and Environmental Controls

Tags
211204, 0, 6

Learning Outcome
Explain the science behind evidence-based prevention, treatment, and recovery strategies, programs, and interventions at the individual, family, and community levels, including transforming one's environment to help with recovery. Explain how different community agencies respond to social concerns caused by substance misuse.

Title
Laws, Policies, and Regulations on Substance Use Disorders

Tags
211205, 0, 7

Learning Outcome
Identify and describe, city, state, and federal laws and policies addressing substance use disorders. Explain the importance of policy development in assessing the adequacy and appropriateness of protocols relevant to the prevention, diagnosis, treatment, and management of substance use disorders.

Title
Apply Skills to Build Emotional Resilience, Hope, Understanding, and Compassion

Tags
211207, 0, 8

Learning Outcome
Learn and apply personal and family skills that promote emotional resilience and the capacity to make healthy choices such as deeper listening skills, motivational interviewing, mindfulness, teaming, coalitions, genograms, ecomaps, and advocacy skills. Practice using words and descriptions that promote self-worth, hope, understanding, and compassion. List strategies to decrease stigma and shaming in ourselves and others.

HLTH 461 - Population Mental Health

Course Information

Course Number
461

Teaching Area
HLTH

Course Title
Population Mental Health

Course Description
Examines mental health conditions and explores the individual and population effects of mental illness, the importance of mental health to individual and society, as well as cultural and societal beliefs and stigmas related to mental health and mental health treatment.

Department
Public Health

When Taught
Fall and Winter

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Learning Outcomes

Title
Mental Health

Learning Outcome
Students will be able to compare and contrast mental illness and mental wellness.

Title
Socioecological Impacts

Learning Outcome
Students will be able to explain the bio/socioecological impacts on individual and population mental health.

Title
Communities and Mental Health

Learning Outcome
Students will be able to describe the bidirectional relationship between communities and mental health.

Title
Interventions

Learning Outcome
Students will be able to develop population-based interventions that promote mental health.

Title
Foundational Principles

Learning Outcome
Students will be able to apply foundational principles and knowledge of mental health to their personal lives and the efforts to live the gospel of Jesus Christ.

HLTH 466 - Health and the Aging Process

Course Information

Teaching Area (new)
HLTH

Course Number
466

Teaching Area
HLTH

Course Title
Health and the Aging Process

Course Description
Public health strategies to promote health and functional independence in the context of the inevitable consequence of aging.

Department
Public Health

When Taught
Winter

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Learning Outcomes

Title
Preventative Lifestyle Behaviors

Tags
203325, 6

Learning Outcome
Promote healthy lifestyle behaviors that help prevent premature aging, promote the health of the elderly, and contribute to the extension of the prime of life.

Title
Aging Physiology and Experimental Approaches

Tags
203328, 4

Learning Outcome
Understand the physiological aspects of aging and the experimental approaches used in studying the aging process.

Title
End-of-Life Decisions and Planning

Tags
203336, 7

Learning Outcome
Understand decision-making related to end-of-life planning.

Title
Disease Prevention and Health Promotion Among the Aging

Tags
203356, 2

Learning Outcome
Relate knowledge about the organic and infectious diseases, common disorders, and disabilities prevalent among the elderly to disease prevention and health promotion among the aged.

Title
Normal Aging Processes

Tags
203358, 1

Learning Outcome
Understand the physiological aspects of the normal aging process.

Title
Aging Pathology

Tags
203365, 1

Learning Outcome
Understand aging as a pathological process and the factors in both the external and internal milieu, this may contribute to premature aging.

Title
Health Programs and Services for the Aged

Tags
203374, 5

Learning Outcome
Identify and distinguish the federal, state, and community health programs and services for the aged, including medical care, hospitalization, extended care, rehabilitation, and health maintenance.

Title
Gerontology Research

Tags
203391, 3

Learning Outcome
Become exposed to professional literature pertaining to the biological, medical, and health aspects of aging including the use of clinical preventive services as noted by gerontology researchers.

HLTH 477R - Secondary Minor Student Teaching

Course Information

Teaching Area (new)
HLTH

Course Number
477R

Teaching Area
HLTH

Course Title
Secondary Minor Student Teaching

Course Description
Supervised, full-day, four week experience to develop and demonstrate competence in teaching minor area course content in the secondary classroom.

Department
Public Health

When Taught
Fall, Winter, Spring

Credit Hours

Min:
4

Fixed/Max:
4

Lecture Hours

Note
Also offered by BYU Independent Study; enroll anytime throughout year; one year to complete; additional tuition required; register at is.byu.edu.

Learning Outcomes

Title
Morbidity and Mortality in Women and Children: Epidemiology

Tags
203321, 5

Learning Outcome
Using principles of epidemiology, identify the leading causes of morbidity (sickness) and mortablity among women and children in the developing world and compare the burden of disease across different regions of the world.

Title
Health Behavior Strategies

Tags
203329, 7

Learning Outcome
Discuss successful, evidence-based strategies for changing behaviors and improving health.

Title
Culture and Optimal Health Behaviors

Tags
203339, 2

Learning Outcome
Explain how culture, our own and others, facilitates or hinders practicing optimal health behaviors.

Title
Health Program Monitoring, Evaluation, and Research

Tags
203350, 6

Learning Outcome
Describe how monitoring, evaluation, and applied research improve health programs.

Title
Maternal and Child Health Improvement

Tags
203351, 1

Learning Outcome
Idenitfy behaviors that improve maternal and child health and how they may be specific for particular groups.

Title
Nutrition and Disease Morbidity and Mortality

Tags
203353, 4

Learning Outcome
Discuss how undernutrition and overnutrition contribute to morbidity and mortality related to infectious and chronic disease.

Title
Global Disease Determinants

Tags
203378, 1

Learning Outcome
Discuss the determinants of global diseases and why inequalities and inequities exist.

Title
Morbidity and Mortality in Women and Children

Tags
203386, 3

Learning Outcome
Describe the leading causes of morbidity (sickness) and mortablity among women and children in the developing world.

HLTH 481 - Applied International Health

Course Information

Teaching Area (new)
HLTH

Course Number
481

Course Title
Applied International Health

Course Description
Engaging in an applied international health experience.

Department
Public Health

When Taught
Spring and Summer Terms

Credit Hours

Min:
1

Fixed/Max:
3

Learning Outcomes

Title
Applied International Health

Tags
203411, 1

Learning Outcome
Students will demonstrate knowledge in applied international health.

HLTH 482 - Medical Geography

Course Information

Teaching Area (new)
HLTH

Course Number
482

Teaching Area
HLTH

Course Title
Medical Geography

Course Description
Understanding how geographic locations influence health outcomes. Learning to identify geographic patterns of health and disease as a tool to improve overall understanding of disease etiology and development of effective prevention and control strategies. The course utilizes geographic information systems (GIS) to meet these goals. No prior experience with the software is required.

Department

Hlth 447

Learning Outcomes

Title
Location and Geographic Questions

Tags
208371, 0, 1

Learning Outcome
Understand how location influences health, and how asking geographic questions of health data can lead to improved disease prevention.

Title
Spatial Epidemiology Data

Tags
208372, 0, 2

Learning Outcome
Understand how we can use spatial epidemiology data to better understand etiologies and develop effective prevention methods.

Title
Basic Spatial Statistics

Tags
208373, 0, 3

Learning Outcome
Describe the procedures used in basic spatial statistics.

Title
Health Maps

Tags
208374, 0, 4

Learning Outcome
Independently create health maps using ESRI ArcMap software.

HLTH 491R - Mentored Research

Course Information

Teaching Area (new)
HLTH

Course Number
491R

Teaching Area

Learning Outcomes

Title
Conduct applied research

Tags
203238, 1

Learning Outcome
Experience at least one subset of research skills while conducting supervised public health research with a faculty member.

HLTH 492R - Directed Public Health Readings

Course Information

Teaching Area (new)
HLTH

Course Number
492R

Teaching Area
HLTH

Course Title
Directed Public Health Readings

Course Description
Self-paced reading and in-depth studying of public health topics.

Department
Public Health

When Taught
All Semesters/Terms

Credit Hours

Min:
1

Fixed/Max:
3

Learning Outcomes

Title
Public Health Readings

Tags
203412, 1

Learning Outcome
Students will deepen their understanding of public health by reading books and articles related to the subject.

HLTH 493 - Epidemiology Capstone

Course Information

Teaching Area (new)
HLTH

Course Number
493

Teaching Area
HLTH

Course Title
Epidemiology Capstone

Course Description
Culminating experience for public health epidemiology students. Students will develop an epidemiologic research question, identify an appropriate source of data to analyze, conduct a quantitative data analysis to address their research question, and write a structured report summarizing their research question, methodological approach, findings, and conclusions.

Department
Public Health

When Taught
Winter

Credit Hours

Type
Prerequisite

Prerequisites

Fulfill ANY of the following requirements:

Prerequisites

Complete ALL of the following Courses:

- HLTH 345 - Principles of Epidemiology
  AND HLTH 447 - Introduction to Biostatistics
  AND HLTH 449 - Epidemiologic Study Design & Analysis

OR

Prerequisites

Complete ALL of the following Courses:

- HLTH 345 - Principles of Epidemiology
  AND HLTH 440 - Introduction to Statistical Computing in Epidemiology (SAS)
  AND

OR

Prerequisites

Complete ALL of the following Courses:

- HLTH 345 - Principles of Epidemiology
  AND HLTH 440 - Introduction to Statistical Computing in Epidemiology (SAS)
  AND

Other Prerequisites

Can be concurrent with HLTH 312 and HLTH 316.

Learning Outcomes

Title
Literature Review

Tags
208346, 0, 2

Learning Outcome
Conduct a systematic review of published literature pertinent to their research question.

Title
Research Proposal

Tags
208347, 0, 3

Learning Outcome
Write a proposal outlining their background and rationale, research question, source of data, and data analysis plan.

Title
Research Question and Hypotheses

Tags
208345, 0, 1

Learning Outcome
Develop an epidemiologic research question and associated hypotheses.

Title
Quantitative Data Analysis

Tags
208348, 0, 4

Learning Outcome
Perform a quantitative data analysis to evaluate their research question.

Title
Manuscript

Tags
208349, 0, 5

Learning Outcome
Write a structured manuscript reporting their research findings.

Complete ALL of the following Courses:

- HLTH 330 - Principles and Practices of Health Promotion **AND** HLTH 431 - Health Communication and Advocacy

Other Prerequisites
HLTH 100, 210, 312, 313, 314, 315, 316.

Learning Outcomes

Title
Capstone Project

Tags
203501, 1

Learning Outcome
Design and execute a capstone project that demonstrates applied health promotion knowledge in collaboration with a community partner.

Title
NCHEC Areas of Responsibility

Tags
203502, 2

Learning Outcome
Select and develop professional quality deliverables that demonstrate competencies aligned with NCHEC Areas of Responsibility (e.g., needs assessment, intervention design, implementation, evaluation).

Title
Professional Competence

Tags
203503, 3

Learning Outcome
Apply public health theories, data, and evidence to guide project development and decisions making.

Title
Gospel-Centered Design

Learning Outcome
Apply gospel-centered principles-such as compassion, service, integrity, and stewardship-in the design and execution of the capstone project.

Title
Professional Skills

Learning Outcome
Demonstrate professional skills in communication, teamwork, planning, and critical thinking.

Title
Career Readiness

Learning Outcome
Demonstrate readiness for public health careers through development of professional materials and career planning strategies.

HLTH 495 - Health Science Capstone: Integrating Public Health and Primary Care

Course Information

Teaching Area (new)
HLTH

Course Number
495

Teaching Area
HLTH

Course Title
Health Science Capstone: Integrating Public Health and Primary Care

Course Description
HLTH495 is a combination of a lecture and an experiential-based capstone class that serves as the culminating course for public health students in the Health Science Emphasis. The course is intended to provide students with the opportunity to partner with the community in addressing real health issues that can benefit from a joint public health-primary care approach in addressing the social determinants of health.

Department
Public Health

When Taught

Complete ALL of the following Courses:

- HLTH 315 - Health, Disease and Their Determinants, Part 2 **AND** HLTH 316 - Influencing Health through Health Systems and Policy

Other Prerequisites
HLTH 210/HLTH 100, HLTH 312, HLTH 313, HLTH 440, HLTH 425

Learning Outcomes

Title
Upstream Health

Tags
210043, 0, 1

Learning Outcome
Discuss the benefits of an upstream approach to health compared to midstream and downstream interventions.

Title
U.S. Public Health & Health Care Systems: Structure, Functions, and Potential Points of Integration

Tags
210044, 0, 2

Learning Outcome
Describe the similarities and differences in the structures and functions of the U.S. Public Health System and the U.S. Health Care System and identify points where public health and primary care can integrate to improve population health.

Title
Social Determinants of Access to Health Care

Tags
210045, 0, 3

Learning Outcome
Identify actual community social determinants, including racism and bias, which can lead to inequities in the access, quality, and delivery of care.

Title
Levels of Public Health-Primary Care Integration

Tags
210046, 0, 4

Learning Outcome
Analyze current examples of partnerships between public health and primary care. Propose additional integration points to expand opportunities for interdisciplinary collaboration across sectors to improve population health.

Title
Health Care Financing & Reimbursement Methods

Tags
210047, 0, 5

Learning Outcome
Discuss how current financing and reimbursement methods impact cost, access, quality, and individual and population health. Analyze the impact of major health care reforms on Medicare, Medicaid, Children's Health Insurance Program (CHIP), and on accountable care organizations.

Title
Complex Care and Populations with Special Health Needs

Tags
210048, 0, 6

Learning Outcome
Evaluate the predisposing, enabling, and needs characteristics of vulnerable populations, which result in complex health care needs among women and children, minorities, immigrants, refugees, uninsured, and the homeless.

Title
Tools for Integration

Tags
210049, 0, 7

Learning Outcome
Apply integration tools in addressing real community needs and in facilitating a collaborative partnership between public health and primary care through GIS, community health needs assessment, electronic medical records, public health-oriented e-learning, mapping public health and clinical preventive medicine competencies, relationship with health departments, and others.

Title
Conceptual Framework for Public Health-Primary Care Integration

Tags
210050, 0, 8

Learning Outcome
Create and apply a conceptual framework for integrating public health and primary care in addressing real community needs.

Title
Community Needs-Based Project and Data Collection

Tags
210051, 0, 9

Learning Outcome
Design a data collection instrument (surveys, interviews, or interventions) regarding an identified community need(s)/problem(s) made worse by the existing social determinants of health. As a team, collect, analyze, present, and prepare a written report of your data to the class and to your community partner.

HLTH 496R - Academic Internship: Health Science

Learning Outcomes

Title
Professionalism

Tags
208191, 0, 2

Learning Outcome
Demonstrate professionalism at the internship site, including dress and grooming, collegiality, appropriateness, communication, and punctuality (preceptor evaluation).

Title
Professional Competence

Tags
208192, 0, 3

Learning Outcome
Demonstrate professional competence and ability to complete assigned tasks and meet the agency's expectations (preceptor evaluation).

Title
Ethical Standards

Tags
208193, 0, 4

Learning Outcome
Practice ethical standards appropriate to the internship site (preceptor evaluation).

Title
Hour Requirement

Tags
208194, 0, 5

Learning Outcome
Successfully complete the hour requirement for the internship (internship coordinator evaluation).

Title
Internship Deliverable

Tags
208195, 0, 6

Learning Outcome
Successfully complete the internship deliverable to the Internship Coordinator (internship coordinator evaluation).

Title
Competencies and Areas of Responsibility

Tags
208190, 0, 1

Learning Outcome
Show evidence of participation in competencies and areas of responsibility appropriate for your public health emphasis: (internship coordinator evaluation)

Health Science: a minimum of 1 of the Health Science emphasis-specific learning outcomes.

Learning Outcomes

Title
Communication Skills

Tags
196146, 1

Learning Outcome
In both written and spoken target language, communicate with reasonable accuracy about real-world activities with well-educated members of the target-culture accustomed to dealing with non-native speakers.

Title
Comprehension

Tags
196147, 2

Learning Outcome
Understand every-day written and verbal instructions. Comprehend concrete details and global meaning of intermediate-level written and spoken passages related to familiar topics that native speakers encounter routinely in their daily life.

Title
Cultural Knowledge

Tags
196148, 3

Learning Outcome
Discuss in the target language cultural practices related to every-day life in the target culture. Acquire basic background knowledge of important achievements related to the target culture (historical figures and events, major literary and artistic movements, government and religious institutions, etc.).

Title
General Education Requirements

Tags
196149, 4

Learning Outcome
Complete Languages of Learning and Global & Cultural Awareness for General Education.

  Instructor's consent.

Learning Outcomes

Title
Defined Special Purpose

Tags
196150, 1

Learning Outcome
Develop the overall language and cultural competence to meet the needs of a "special" purpose identified by the Center for Language Studies.

Title
Communication

Tags
196151, 2

Learning Outcome
Communicate effectively enough to function in a variety of situations likely to be encountered when dealing with native speakers associated with the special purpose. This may include interpersonal, interpretive, and presentational (written and oral) modes of communication.

Title
Cultural Competence

Tags
196152, 3

Learning Outcome
Interact with cultural competence and understanding when dealing with native speakers associated with the special purpose.

Learning Outcomes

Title
Defined Career Purposes

Tags
196164, 1

Learning Outcome
Develop overall language and cultural competence needed to study and begin entry into a career agreed upon by the Center for Language Studies.

Title
Knowledge

Tags
196165, 2

Learning Outcome
Carry out research to identify, understand, and discuss standards, processes, people and cultural norms associated with the target career.

Title
Interpretive Competence

Tags
196166, 3

Learning Outcome
Understand, interpret and analyze advanced-level written and oral texts on topics related to the target career.

Title
Communicative Competence

Tags
196167, 4

Learning Outcome
Communicate effectively at the advanced-level in order to function in a variety of situations likely to be encountered when dealing with native speakers who are associated with the target career. This will include interpersonal communication and both written and oral presentational communication.

Title
Cultural Competence

Tags
196168, 5

Learning Outcome
Interact with cultural competence and understanding when dealing with native speakers who are associated with the target career.

HONRS 120 - Intro to Interdisciplinary Thinking

Course Information

Teaching Area (new)
HONRS

Course Number
120

Teaching Area
HONRS

Course Title
Intro to Interdisciplinary Thinking

Course Description
Introduction to the Honors interdisciplinary curriculum. In this course students learn to consider big or "great questions," formulate and evaluate good research questions, and explore different disciplinary approaches to these questions through guest lectures and discussion. Students learn to identify various thinking patterns, and begin to explore interdisciplinary approaches to learning (preparation for HONRS Unexpected Connections sequence).

When Taught
Fall and Winter

Credit Hours

Min:
2

Fixed/Max:
2

Lecture Hours

Recommended
HONRS 110 should be completed prior to or concurrent with HONRS 120

Learning Outcomes

Title
Interdisciplinary Thinking

Tags
206620, 2

Learning Outcome
Recognize and articulate basic thinking patterns in a variety of disciplines.

Title
Great Question

Tags
206621, 4

Learning Outcome
Describe a Great Question/Root Problem in a selected discipline.

Title
Research Question

Tags
206622, 5

Learning Outcome
Develop and evaluate the value of a Research Question in a selected discipline.

Title
Research Plan

Tags
206623, 1

Learning Outcome
Make a preliminary Research Plan to address a research question using interdisciplinary thinking.

OR

Complete ALL of the following Courses:
- HONRS 120 - Intro to Interdisciplinary Thinking **AND** ELING 150 - First-Year Writing for International Students

Learning Outcomes

Title
GE Letters Outcomes

Tags
206580, 4

Learning Outcome
Students will 1. Demonstrate skills in critical reading as they analyze primary historical, philosophical, theological, or literary texts as artifacts worthy of study in themselves. 2. Demonstrate they can interpret and appreciate texts in their contexts, understanding a writer's cultural background, purpose, audience, and rhetorical strategies. 3. Show they can evaluate texts for their power to shape culture and their spiritual insight

Title
Interdisciplinary Approach

Tags
206588, 1

Learning Outcome
Recognize and understand the assumptions, methodologies and practices of two distinct disciplines.

Title
Making Connections

Tags
206589, 2

Learning Outcome
Apply two different disciplinary perspectives to examine issues, problems and questions in order to discover connections.

Title
Communication Skills

Tags
206590, 3

Learning Outcome
Clearly express concepts, ideas and conclusions through written, visual, oral, or other forms of communication.

Title
GE Biological Sciences Outcomes

Tags
206581, 5

Learning Outcome
Students will be able to: 1. Demonstrate an understanding of the basic scientific principles which undergird the scientific process, including the strengths and weaknesses of this process. 2. Appreciate the excitement of discovery that has accompanied important scientific developments. 3. Demonstrate how scientific methodology can be used to analyze real-world science-related problems. 4. Evaluate scientific data and claims in order to make rational decisions on public-policy science issues that affect their community. 5. Express their thoughts (in oral, graphical, and written formats) on scientific topics clearly, including appropriate use of basic scientific vocabulary and effective interpretation of quantitative data. 6. Reflect rationally upon the interface between science and religion.

Learning Outcomes

Title
Interdisciplinary Approach

Tags
206598, 1

Learning Outcome
Recognize and understand the assumptions, methodologies and practices of two distinct disciplines.

Title
Making Connections

Tags
206599, 2

Learning Outcome
Apply different disciplinary perspectives to examine issues, problems, and questions in order to discover connections.

Title
Communication Skills

Tags
206600, 3

Learning Outcome
Clearly express concepts, ideas and conclusions through written, visual, oral, or other forms of communication.

Title
GE Physical Sciences Outcomes

Tags
206601, 4

Learning Outcome
Students will be able to: 1. Demonstrate an understanding of the basic scientific principles which undergird the scientific process, including the strengths and weaknesses of this process. 2. Appreciate the excitement of discovery that has accompanied important scientific developments. 3. Demonstrate how scientific methodology can be used to analyze real-world science-related problems. 4. Evaluate scientific data and claims in order to make rational decisions on public-policy science issues that affect their community. 5. Express their thoughts (in oral, graphical, and written formats) on scientific topics clearly, including appropriate use of basic scientific vocabulary and effective interpretation of quantitative data. 6. Reflect rationally upon the interface between science and religion.

Title
GE Letters Outcomes

Tags
206602, 5

Learning Outcome
Students will 1. Demonstrate skills in critical reading as they analyze primary historical, philosophical, theological, or literary texts as artifacts worthy of study in themselves. 2. Demonstrate they can interpret and appreciate texts in their contexts, understanding a writer's cultural background, purpose, audience, and rhetorical strategies. 3. Show they can evaluate texts for their power to shape culture and their spiritual insight

Tags
206605, 3

Learning Outcome
Clearly express concepts, ideas and conclusions through written, visual, oral, or other forms of communication.

Title
GE Global & Cultural Awareness Outcomes

Tags
206582, 5

Learning Outcome
Students will: 1. Acquire informed awareness of a global culture outside their own, with the interplay of cultures, languages, and/or nations at an international level. 2. Experience thoughtful reflection on the above, as demonstrated in a structured, guided manner under the direction of a faculty member. Evidence of reflection implies written or spoken analysis that will include a consideration of the student's own responses to the culture or global issue, often involving comparison, and will demonstrate informed awareness. 3. Develop greater empathy and charity, and will begin to gain a global perspective by learning to see themselves from another's point of view.

GE Social Sciences Outcomes

Tags
206609, 4

Learning Outcome
1. Demonstrate foundational knowledge and skills in the methods of investigating, expressing, and evaluating concepts in the social sciences and the study of the Arts. 2. Apply sound and original thinking to address issues and problems in the world today. In so doing, demonstrate a mature understanding of the different roles that the social sciences and the arts play both in how we conceptualize and contextualize these issues and problems, and also in how we might deepen our understanding of and devise possible solutions for them. 3. Communicate effectively with diverse audiences on current issues and problems we face. 4. Model the disposition and character of an educated and faithful person. That is: 1. Take seriously both the course topic and your own responsibility to work towards solutions to current issues and problems. 2. Demonstrate the ability and the humility to learn from and collaborate productively with others who have backgrounds, views, or expertise different from your own. 3. Articulate thoughtfully how your spiritual faith influences your understanding of and response to questions relevant to biology, literature, and philosophy. 4. Examine and evaluate the strengths and weaknesses of your own ideas and arguments, as well as those of others, withholding final judgment until sufficient information has been gathered and relevant implications considered. Be able to recognize when that point has been reached.

Title
GE Art Outcomes

Tags
206584, 5

Learning Outcome
Students will: 1. Demonstrate an understanding of the elements, forms, aesthetic and compositional principles of at least one form of artistic expression (e.g., visual arts, dance, music, theatre, or film). 2. Become acquainted with a variety of representative works in at least one art form. 3. Demonstrate analytical literacy in at least one art form, meaning the ability to invoke the vocabulary, grammar, and theoretical models of the art form for the purpose of "reading" a work of art. 4. Develop the ability to recognize multiple possible interpretations of an art work, and identify the work's adherence to or departure from the genre's traditions and conventions. 5. Demonstrate the ability to engage in critical analysis of works of art, including an understanding of the historical and cultural factors that should inform an appreciation of such works.

175801, 0

Learning Outcome
Describe the common elements of employee benefits programs and explain how they are administered.

Title
Performance Evaluation

Tags
175807, 0

Learning Outcome
Develop and use a performance appraisal program to evaluate employee performance and describe the strengths and weaknesses of different appraisal methods.

Title
Pay Administration

Tags
175808, 0

Learning Outcome
Administer a pay system, such as calculating take-home and overtime pay, creating executive compensation packages, and adjusting pay levels for inflation.

Title
Wage Level Decisions

Tags
175809, 0

Learning Outcome
Determine wage levels and use wage surveys to assign fair wage rates.

Title
Financial Incentives

Tags
175810, 0

Learning Outcome
Use financial incentives to motivate employees through such programs as merit pay, individual or group bonuses, piece-rate incentives, commissions, bonuses, and profit sharing plans.

HRM 421 - HRM Implementation

Course Information

Teaching Area (new)
HRM

Course Number
421

Teaching Area
HRM

Course Title
HRM Implementation

Course Description
Integrative course on human resource management strategy formulation and implementation, including a field study. Topics include organizational alignment (HR structure and processes that fit the strategic goals of the organization), change management, and strategic leadership.

Department
Management

When Taught
Fall

Credit Hours

Min:

Prerequisite

Prerequisites

Complete ALL of the following Courses:
- HRM 402 - Human Resource Management

HRM 425 - Conflict Management

Course Information

Course Number
425

Teaching Area
HRM

Course Title
Conflict Management

Course Description
Conflict is inevitable, but opposition can strengthen us. This course explores conflict management through psychology, management theories, and scripture, teaching how to resolve issues while preserving relationships and becoming peacemakers in every aspect of life.

Department
Management

When Taught
Fall

Credit Hours

Fixed/Max:
3

Lecture Hours

Fixed:
3

Fee
Students will be expected to pay a fee that covers some of the exercises and cases that will be used in class

Learning Outcomes

Title
Recognize and Understand Conflict

Learning Outcome
Dissect a conflict itself to understand its nature, who is involved, and if resolution should be pursued

Title
Develop Conflict Management Strategies

Learning Outcome
Deploy a useful decision-tree model that helps you identify the most productive conflict management strategy to ensure a successful resolution of the conflict and motivates peace among negotiators

Title
Use Christlike Communication in Conflict

Learning Outcome
Communicate in a manner that builds on the Christ-centered leader model and specifically allows for the opportunity to express love, honor a counterpart's agency, and invite accountability

Title
Demonstrate Confidence in Conflict Situations

Learning Outcome
Gain confidence in conflict management skills through assessment of others' conflict resolution strategies in class, historical negotiations, and conflicts in scriptural materials

HRM 430 - Managing Belonging & Inclusion

Completion Requirement

Complete ANY of the following Courses:
- HRM 391 - Organizational Effectiveness
- HRM 401 - Organizational Effectiveness

Learning Outcomes

Title
Current Perspectives

Tags
213899, 0, 1, 2023-08-29 09:33:07

Learning Outcome
Describe current perspectives on belonging and inclusion in organizations

Title
Personal Identity

Tags
213900, 0, 2, 2023-08-29 09:33:09

Learning Outcome
Evaluate the aspects of personal identity and experiences that affect how a person interacts and engages with others in the workplace

Title
Workplace Relationships

Tags
213901, 0, 3, 2023-08-29 09:33:10

Learning Outcome
Propose ways to create and encourage workplace relationships across individual differences

Title
Individual Differences

Tags
213902, 0, 4, 2023-08-29 09:33:12

Learning Outcome
Identify the effects of individual differences on team dynamics and propose ways to successfully draw on individual differences

Title
Solutions

Tags
213903, 0, 5, 2023-08-29 09:33:13

Learning Outcome
Develop structural and/or cultural solutions to increasing company belonging and inclusion

Other Prerequisites
Hung 201 or foreign residence experience

Note
For returned missionaries and others with extensive Hungarian language experience. Required course for obtaining language credit by examination (Hung 101, 102, 201, 211R). Culminating course for Languages of Learning requirement.

Learning Outcomes

Title
Communication Skills

Tags
191521, 2

Learning Outcome
In both written and spoken target language, communicate accurately with well educated members of the target-culture about real-world activities.

Title
Comprehension

Tags
193093, 3

Learning Outcome
Understand detailed written and verbal instructions. Comprehend historical passages, newspaper and magazine articles, and broadcast news reports well educated native speakers encounter routinely in their daily life.

Title
Cultural Knowledge

Tags
193225, 5

Learning Outcome
Acquire background knowledge of important achievements related to the target culture (historical figures and events, major literary and artistic movements, government and religious institutions, etc.). Discuss in the target language cultural practices related to major life events in the target culture (birth, marriage, death, etc.).

Title
General Education

Tags
194904, 7

Learning Outcome
Complete language and cultural aspects of General Education "Languages of Learning" and "Global & Cultural Awareness" requirements.

HUNG 340 - Introduction to Literature: Hungarian

Learning Outcomes

Title
Prepare the students to go on their international experience

Tags
200159, 1

Learning Outcome
· Demonstrate a basic understanding of the people, worldview, culture (and language, where applicable) of the foreign setting in which the student studies.
· Recognize one's cultural presuppositions and biases through exposure to, and study of, foreign perspectives on one's own culture.

Title
Course Objectives

Tags
200177, 2

Learning Outcome

Prepare a foundation to become competent in understanding, communicating and interacting with the new cultural contexts experienced during time abroad,
Train students to be safe and to be ambassadors of BYU
Help students understand cultural, political and economic history of their host country
Provide a forum for directors to plan with their groups

Title
Practical Information

Learning Outcomes

Title
Current Research in International Studies

Tags
207002, 1

Learning Outcome
Students will gain and demonstrate and improved understanding of the latest research in a central issue in international studies, including its political, economic, cultural, and social implications.

Title
Effective Written Communication and Analysis

Tags
207003, 2

Learning Outcome
Studies will write critically and persuasively about the ideas presented in the class lectures.

IAS 302R - Seminar in International Studies

Course Information

Course Number
302R

Teaching Area
IAS

Course Title
Seminar in International Studies

Course Description
This course is a discussion seminar on a topic related to the theme of the Kennedy Center lecture series in the semester in which it is taught.

Department
International and Area Studies

When Taught
Fall and Winter

Credit Hours

Min:
1

Fixed/Max:
3

Learning Outcomes

Title
Critical Reasoning

Tags
213907, 0, 1, 2023-08-29 09:34:09

Learning Outcome
Students will learn critical reasoning, analysis, and discussion on complex topics

Title
Analytical Writing

Tags
213908, 0, 2, 2023-08-29 09:34:11

Learning Outcome
Students will write and receive feedback on analytical essays, strengthening their written communication skills

Title
Global Awareness

Tags
213909, 0, 3, 2023-08-29 09:34:12

Learning Outcome
Students will expand their contemporary and historical understanding of global issues

IAS 351R - Model United Nations Preparation

Course Information

Teaching Area (new)
IAS

Course Number
351R

Teaching Area
IAS

Course Title
Model United Nations Preparation

Course Description
Preparation for participating in MUN projects, on campus, in public schools, and at the United Nations in New York.

Department
International and Area Studies

When Taught
Fall and Winter

Credit Hours

Min:
3

Fixed/Max:
3

Lab Hours

Fixed:

Learning Outcomes

Title
MUN Preparation: Understand the framework for multilateral diplomacy

Learning Outcome
Students will demonstrate understanding of the process and politics of international organizations

Title
MUN Preparation: Explore the rationale for diplomacy

Learning Outcome
Students will understand how international law informs diplomacy and relates to international organization.

Title
MUN Preparation: Improve public speaking ability

Learning Outcome
Students will improve oratory ability by learning and demonstrating elements of effective public speaking.

Title
MUN Preparation: Improve policy writing ability

Learning Outcome
Students will demonstrate the ability to write policy papers and resolutions with regular feedback and various opportunities individually, in small groups and in large simulations.

Title
MUN Preparation: Improve research ability

Learning Outcome
Students will demonstrate effective research skills while learning about country policies and international topics in greater depth.

Title
MUN Preparation: Develop parliamentary procedure skills

Learning Outcome
Students will learn and effectively use beginning and intermediate parliamentary procedure in group settings.

Title
MUN Preparation: Expand leadership capacity

Learning Outcome
Students will explore the dynamics of leadership, including motivation, decision making, and group dynamics and will begin to demonstrate leadership abilities, especially in simulations/case study/small group activities.

Teaching Area
ICLND

Course Title
Second-Year Conversation

Course Description
Intermediate listening comprehension and speaking skills.

Department
Comparative Arts and Letters

When Taught
Contact Department

Credit Hours

Min:
0.5

Fixed/Max:
5

Other Prerequisites
Iclnd 102 or equivalent experience

Learning Outcomes

Title
Vocabulary

Tags
190273, 3

Learning Outcome
Students will speak in a way so as to be understood most of the time without difficulty by native speakers unaccustomed to dealing with non-native speakers.

Title
Fluency

Tags
190370, 2

Learning Outcome
Students will be able to use an appropriate variety of vocabulary related to autobiographical and concrete topics.

Title
Opinions

Tags
190514, 1

Learning Outcome
Students will be able to speak about autobiographical and concrete topics, initiate and maintain conversations by asking and responding to questions, and cope with gaps in knowledge.

Title
Description and Narration

Tags
190565, 0

Learning Outcome
Students will be able to describe and narrate in present, past and future times in the context of paragraph-level speech about autobiographical and concrete topics.

ICLND 311R - Third-Year Conversation

Course Information

Teaching Area (new)
ICLND

When Taught
Contact Department

Credit Hours

Min:
0.5

Fixed/Max:
5

Other Prerequisites
Iclnd 211R or equivalent experience

Learning Outcomes

Title
Opinions

Tags
190408, 1

Learning Outcome
Students will be able to relate current events, plots of books or movies, and state opinion.

Title
Pronunciation

Tags
190434, 4

Learning Outcome
Students will speak in a way so as to be understood without difficulty by speakers unaccustomed to dealing with non-native speakers.

Title
Description and Narration

Tags
190466, 0

Learning Outcome
Students will be able to describe and narrate in present, past and future times in the context of paragraph-level speech about autobiographical and concrete topics.

Title
Fluency

Tags
190500, 2

Learning Outcome
Students will be able to initiate and maintain fluent conversations and cope with gaps in knowledge in contexts related to concrete topics.

Title
Vocabulary

Tags
190570, 3

Learning Outcome
Students will be able to speak using an appropriate variety of vocabulary related to autobiographical and concrete topics as well as to current and other events.

ICLND 399R - Academic Internship

Course Information

Teaching Area (new)

Course Title
Academic Internship

Course Description
On-the-job experience in Icelandic.

Department
Comparative Arts and Letters

When Taught
Contact Department

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
0

Lab Hours

Fixed:
0

Other Prerequisites
Department's consent

Learning Outcomes

Title
Professional Experience

Tags
190630, 1

Learning Outcome
Improve professional experience and appreciation of cultural practices in an international context.

ICLND 429 - Old Icelandic Language and Literature

Course Information

Teaching Area (new)
ICLND

Course Number
429

Teaching Area
ICLND

Course Title
Old Icelandic Language and Literature

Course Description
Readings and exercises in Old Icelandic; introduction to Old Icelandic literature and its influence on later Icelandic culture.

Department
Language Studies

When Taught
Winter Odd Years

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Other Prerequisites
Iclnd 201 or equivalent experience

Note
Returned missionaries from Iceland or those with equivalent experience should enroll in ICLND 202.

Learning Outcomes

Title
Linguistic Skills

Tags
190035, 4

Learning Outcome
Students will build upon their previous knowledge of Icelandic (whether as a missionary or through Icelandic 202) by strengthening their understanding of its complex grammar. Students will also develop a clear understanding of the morphological, phonological, syntactic, and semantic differences between Old and Modern Icelandic.

Title
Reading and Analytic Skills

Tags
190420, 1

Learning Outcome
Students will develop the capacity to read and understand Old Icelandic texts with considerable facility and develop an appreciation for the richness and variety of Old Icelandic literature through close readings from a variety of sagas and poetry.

ICS 290R - International Cinema

Course Information

Teaching Area (new)
ICS

Course Number
290R

Teaching Area
ICS

Course Title
International Cinema

Course Description
Students will view significant films and discuss them in a seminar setting in order to increase cultural awareness, enrich language acquisition, enhance critical analysis abilities, and develop understanding of cinematic art.

When Taught
Fall and Winter

Credit Hours

Min:
1.5

Fixed/Max:
1.5

Lecture Hours

Fixed:

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Note
Additional seats for specific sections may be available to Freshman Mentoring participants through envelopes. Also offered by BYU Independent Study; enroll anytime throughout year; one year to complete; additional tuition required; register at is.byu.edu.

Learning Outcomes

Title
European and American cultural history

Tags
190228, 0

Learning Outcome
Demonstrate basic knowledge of European and American cultural history.

Title
Artistic Production, Methodologies and Techniques

Tags
190301, 1

Learning Outcome
Demonstrate basic knowledge of methods, techniques, and approaches used in the production of artistic artifacts

Title
Artistic Production, Methodologies and Techniques

Tags
190323, 0

Learning Outcome
Demonstrate basic knowledge of methods, techniques, and approaches used in the production of artistic artifacts

Title
European and American cultural history

Tags
190356, 0

Learning Outcome
Demonstrate basic knowledge of European and American cultural history.

Title
Critical Thinking and Writing

Tags
190421, 2

Learning Outcome
Demonstrate ability to analyze a cultural artifact, using terminology appropriate to the art form being studied, and evaluate its effectiveness as an expression of cultural values

Title
Critical Thinking and Writing

Tags
190423, 0

Learning Outcome
Demonstrate ability to analyze a cultural artifact, using terminology appropriate to the art form being studied, and evaluate its effectiveness as an expression of cultural values

IHUM 201 - Western Humanities 1: Antiquity to Renaissance

Course Information

Teaching Area (new)
IHUM

Course Number
201

Teaching Area
IHUM

Course Title
Western Humanities 1: Antiquity to Renaissance

Course Description
Western civilization from Greek antiquity to Renaissance from perspective of traditional humanistic values reflected in its arts and ideas. Examines fundamental questions about human experience, formative events in history, and value of important literary and artistic texts.

Department
Comparative Arts and Letters

When Taught
Fall; Winter; Spring; Summer.

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Note
Additional seats for specific sections may be available to Freshman Mentoring participants through envelopes. Also offered by BYU Independent Study; enroll anytime throughout year; one year to complete; additional tuition required; register at is.byu.edu.

Learning Outcomes

Title
Historical Events

Tags
190375, 0

Learning Outcome
Demonstrate factual knowledge of major Western European historical events from approximately 1200 BCE to the late Renaissance.

Title
Communication Skills

Tags
190248, 4

Learning Outcome
Improve communication skills through short writing assignments that require higher order thinking skills to connect cultural values discussed in class with daily experiences and evaluate their relevance to modern life.

Title
Analysis

Tags
190287, 3

Learning Outcome
Analyze the basic components of a literary work, a painting, or a building through the correct use of appropriate terminology and evaluative models

Title
Ideology vs. Artifacts

Tags
190492, 2

Learning Outcome
Explain the connections between dominant Western ideologies and cultural artifacts produced from approximately 1200 BCE to the late Renaissance.

Title
Figures and Movements

Tags
190512, 1

Learning Outcome
Demonstrate factual knowledge of major Western European figures and movements in philosophy, science, literature, art, architecture, and music from approximately 1200 BCE to the late Renaissance.

IHUM 202 - Western Humanities 2: Renaissance to the Present

Learning Outcomes

Title
Figures and Movements

Tags
190350, 1

Learning Outcome
Demonstrate factual knowledge of major Western European figures and movements in philosophy, science, literature, art, architecture, and music from approximately 1515 AD/CE to the modern period.

Title
Communication Skills

Tags
190368, 4

Learning Outcome
Construct cogent, lucid, and persuasive arguments in essays and short papers combining formal analysis of cultural artifacts with critical evaluation of the Western ideologies that helped produce them.

Title
Analysis

Tags
190416, 3

Learning Outcome
Analyze the basic components of a literary work, a painting, or a building through the correct use of appropriate terminology and evaluative models.

Title
Ideologies vs. Artifacts

Tags
190355, 2

Learning Outcome
Explain the connections between dominant Western ideologies and cultural artifacts produced from approximately 1515 AD/CE to the modern period

Title
Historical Events

Tags
190441, 0

Learning Outcome
Demonstrate factual knowledge of major Western European historical events from approximately 1515 AD/CE to the modern period.

Title
Writing

Tags
190568, 4

Learning Outcome
Construct cogent, lucid, and persuasive arguments in essays and short papers combining formal analysis of cultural artifacts with critical evaluation of the Western ideologies that helped produce them

IHUM 241 - Humanities of East Asia

Course Information

Teaching Area (new)
IHUM

Course Number
241

Teaching Area
IHUM

Course Title
Humanities of East Asia

Course Description
This course will introduce students to the humanities of Japan, China, and Korea, paying particular attention to the way visual art, architecture, ritual, film, literature, and other forms shed light on the religious traditions shared by these traditions.

Department
Comparative Arts and Letters

When Taught
Winter

Learning Outcomes

Title
Analyze Islamic Humanities

Tags
189363, 1

Learning Outcome
Analyze, using appropriate terminology and evaluative models, the key components of Islamic humanities.

Title
Non-Western Cultural Understanding

Tags
190252, 2

Learning Outcome
Demonstrate basic understanding of at least one culture in addition to North American and European cultures

Title
Patterns and Parallels in World Religions

Tags
190505, 0

Learning Outcome
To observe patterns and parallels that exist in all world religions in an effort to assess how religious beliefs and practices give meaning to people's lives everywhere

Title
Aesthetic/Intellectual Contributions of the Islamic World

Tags
190561, 3

Learning Outcome
to acquire a basic understanding and appreciation of the history, beliefs, practices, and aesthetic/intellectual contributions of the Islamic world in order to allow students to discuss Islam with accuracy and respect. It should be the aim of the student of comparative religion to explain another religious tradition sympathetically and intelligently so that an adherent of that faith would recognize that explanation as authentic and acceptable

Title
Comparative Religion

Tags
190567, 1

Learning Outcome
To gain a deeper awareness of one’s own religious tradition through a comparative (not competitive!) approach to the study of humanities and religion

IHUM 243 - Introduction to the Humanities of South Asia

Course Information

Teaching Area (new)
IHUM

Course Number
243

Teaching Area
IHUM

Course Title
Introduction to the Humanities of South Asia

Course Description
Ancient South Asia, the coming of Islam, the British Raj, and the modern arts of South Asia. Exposure to 1) basic philosophical and religious ideas that have shaped South Asian cultures, and 2) important works of art, literature, music, theater, and cinema produced by those cultures.

3

Lab Hours

Fixed:
0.5

Learning Outcomes

Title
Artifact Production Methodologies and Techniques

Tags
190336, 3

Learning Outcome
Broaden and deepen your knowledge of methods, techniques, and approaches used in the production of artistic artifacts

Title
Writing Exercises

Tags
190340, 4

Learning Outcome
Improve your writing skills through directed exercises

Title
Individual Counseling

Tags
190392, 2

Learning Outcome
Receive individualized counseling and direction for your Interdisciplinary Humanities major

Title
Critical Thinking and Analysis

Tags
190443, 0

Learning Outcome
Sharpen your analytical and critical thinking skills

Title
Vocabulary and Technical Terminology

Tags
190539, 1

Learning Outcome
Master vocabulary and technical terms used in the analysis of a variety of artistic artifacts

Title
Close Reading Skills

Tags
190564, 5

Learning Outcome
Learn and practice close reading skills for various disciplines in the humanities

IHUM 260 - Humanities of Latin America

Course Information

Teaching Area (new)
IHUM

Course Number
260

Teaching Area
IHUM

Course Title
Humanities of Latin America

Course Description
Achievements of Latin American culture regarding art, philosophy, literature, and music from the pre-Columbian era to the present.

Department
Comparative Arts and Letters

When Taught
Fall and Winter

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:

0

Learning Outcomes

Title
Critical Thinking and Analysis

Tags
190234, 0

Learning Outcome
Learn to think, speak, and write critically about literature (poetry, essay, short story, novel), painting, film, and music and to provide thoughtful and insightful interpretations of major works

Title
Non-Western Culture

Tags
190242, 4

Learning Outcome
Demonstrate basic understanding of at least one culture in addition to North American and European cultures

Title
Latin American Experience in the Arts

Tags
190318, 2

Learning Outcome
Develop an appreciation for the major racial, social, geographical, and historical challenges of Latin American experience as they are reflected thematically and formally in the arts

Title
Cultural Developments in Latin America

Tags
190403, 3

Learning Outcome
Gain a historical understanding of the major cultural developments in modern Latin America and respect for Latin American people and their cultures

Title
Culture and Latin American Identity

Tags
190426, 1

Learning Outcome
Understand the vital role culture plays in formulating and promoting Latin American identity and autonomy and in probing universal questions about human experience

Prerequisites

Type
Prerequisite

Prerequisites

Complete ALL of the following Courses:

- ILOCN 202 - Second-Year Language Study: Ilocano

Note
Teacher may waive prerequisite based on prior experience.

Learning Outcomes

Title
Analyze

Tags
196247, 1

Learning Outcome
Analyze target language morphology and syntax.

Title
Apply

Tags
196248, 2

Learning Outcome
Apply grammar rules with accuracy to a variety of advanced grammatical and communicative tasks.

Title
Independent Learning

Tags
196249, 3

Learning Outcome
Function as independent learners of the target language by using proper terms and appropriate resources for language analysis.

ILOCN 330 - Advanced Language Proficiency Through Cultural Studies: Ilocano

Course Information

Teaching Area (new)
ILOCN

Course Number
330

Teaching Area
ILOCN

Course Title
Advanced Language Proficiency Through Cultural Studies: Ilocano

Course Description
Study of Ilocano culture using interpersonal, presentational, and interpretive skills in the target language.

Department
Language Studies

Other Prerequisites
Ilocn 202 or equivalent.

Note
Entry course for returned missionaries or others of equivalent language experience. Required course for obtaining language credit by examination. May fulfill the GE Languages of Learning requirement.

Learning Outcomes

Title
Communication Skills

Tags
196250, 1

Learning Outcome
In both written and spoken target language, communicate accurately with well-educated members of the target-culture about real-world activities.

Title
Comprehension

Tags
196251, 2

Learning Outcome
Understand detailed written and verbal instructions. Comprehend historical passages, newspaper and magazine articles, and broadcast news reports well educated native speakers encounter routinely in their daily life.

Title
Cultural Knowledge

Tags
196252, 3

Learning Outcome
Acquire background knowledge of important achievements related to the target culture (historical figures and events, major literary and artistic movements, government and religious institutions, etc.). Discuss in the target language cultural practices related to major life events in the target culture (birth, marriage, death, etc.).

Title
General Education Requirements

Tags
196253, 4

Learning Outcome
Complete Languages of Learning and Global & Cultural Awareness for General Education.

Learning Outcomes

Title
Recognize and Analyze

Tags
196254, 1

Learning Outcome
Recognize and analyze the most important genres in target-language literature.

Title
Key Characteristics

Tags
196255, 2

Learning Outcome
Identify and discuss key characteristics of the most important literary movements in the target culture.

Title
Context

Tags
196256, 3

Learning Outcome
Place literature in a meaningful cultural and historical context.

Title
Language Skills

Tags
196257, 4

Learning Outcome
Improve target-language reading, writing, and speaking skills.

Learning Outcomes

Title
Defined Career Purposes

Tags
196258, 1

Learning Outcome
Develop overall language and cultural competence needed to study and begin entry into a career agreed upon by the Center for Language Studies.

Title
Knowledge

Tags
196259, 2

Learning Outcome
Carry out research to identify, understand, and discuss standards, processes, people and cultural norms associated with the target career.

Title
Interpretive Competence

Tags
196260, 3

Learning Outcome
Understand, interpret and analyze advanced-level written and oral texts on topics related to the target career.

Title
Communicative Competence

Tags
196261, 4

Learning Outcome
Communicate effectively at the advanced-level in order to function in a variety of situations likely to be encountered when dealing with native speakers who are associated with the target career. This will include interpersonal communication and both written and oral presentational communication.

Title
Cultural Competence

Tags
196262, 5

Learning Outcome
Interact with cultural competence and understanding when dealing with native speakers who are associated with the target career.

INDES 130 - Visual Literacy

Course Information

Teaching Area (new)
INDES

Course Number
130

Teaching Area
INDES

Course Title
Visual Literacy

Course Description
Introduction to designerly methods of visual literacy; including how designers think, practice, evaluate, and create persuasive, visual compositions. Manipulating visual elements to a goal. How to break down the persuasive qualities of a visual composition by creating both 2 and 3-dimensional abstract artifacts. Understanding and applying a well-designed line and space. One of four core design courses exploring aptitude for a career in design.

Department
Design

When Taught

Learning Outcomes

Title
Application

Tags
181026, 2

Learning Outcome
Students should be able to:Generate both rough and finished geometric and organic formsRecognize abstract three-dimensional elements in design context

Title
Understanding

Tags
181200, 0

Learning Outcome
Students should:Understand aesthetic principles as they relate to geometric and organic formsAnalyze formal qualities and articulate formal languages

INDES 233 - Presentation Methods for Industrial Design 2

Course Information

Teaching Area (new)
INDES

Course Number
233

Teaching Area
INDES

Course Title
Presentation Methods for Industrial Design 2

Course Description
Focus on appropriate communication methods in industrial design, increasing ability to create complex visual presentations. Use of 2D computer programs to render (form/material representation) and present product concepts with the emphasis on narrative development and the meaningful communication of an intended message.

Department
Design

Prerequisite

Prerequisites

Complete ALL of the following Courses:

- DESPX 231 - Visualization & Presentation Methods

Learning Outcomes

Title
Application

Tags
181370, 2

Learning Outcome
Student will be able to:

Apply design principles to page layout and composition to create a portfolio.
Apply verbal skills in developing and communicating a persuasive narrative.
Apply visual skills in presenting information in a clear, concise, and compelling way.
Produce effective renderings using vector and raster based computer packages.
Adjust, manipulate, combine, and retouch images using Raster based computer packages.
Produce complex presentations for industrial design using both vector and raster based packages in combination.

Title
Understanding

Tags
181534, 1

Learning Outcome
Student will:

Understand how to represent complex topics simply, clearly, and concisely using principles of information organization and effective presentation.
Understand principles of a good narrative.
Understand digital tools for the development of presentations and portfolio.
Understand the principles of building a strong visual representation of their work in a portfolio and for presentations.

INDES 300 - Advanced Prototyping Processes and Materials

Course Information

Teaching Area (new)
INDES

Course Number
300

Teaching Area
INDES

Course Title
Advanced Prototyping Processes and Materials

Course Description
Semi-functional mechanical prototyping. Includes time in the computer lab building the product to be constructed in the prototyping lab. Incorporation of fasteners, gears, threaded parts, snap features, tactile buttons and complex materials and assemblies in software. Printing, milling, cutting, assembling, and finishing these elements into a fully-functional working product prototype in the lab.

196309, 4

Learning Outcome
Communicate effectively at the advanced-level in order to function in a variety of situations likely to be encountered when dealing with native speakers who are associated with the target career. This will include interpersonal communication and both written and oral presentational communication.

Title
Cultural Competence

Tags
196310, 5

Learning Outcome
Interact with cultural competence and understanding when dealing with native speakers who are associated with the target career.

IP&T 286 - Instructional Technology in Teaching

Course Information

Teaching Area (new)
IP&T

Course Number
286

Teaching Area
IP&T

Course Title
Instructional Technology in Teaching

Course Description
Using instructional design, visual design, and differentiated staffing principles along with multimedia authoring systems, telecommunication, and other computer-based tools in the development of educational applications for secondary education settings.

Department
Instructional Psychology and Technology

When Taught
Fall and Winter

Credit Hours

Min:
1

Fixed/Max:
1

Lecture Hours

Fixed:
1

Learning Outcomes

Title
Understand Technologies

Tags
178397, 1

Learning Outcome
Understand how technologies can enhance teaching, professional work and communication, and personal professional development.

Title
Design

Tags
178398, 2

Learning Outcome
Develop the ability to design technology-enhanced activities and resources.

Title
Identify Resources

Tags
178399, 3

Learning Outcome
Identify resources to assist in learning how to integrate technologies in the future.

Title
Use New Technologies

Tags
178400, 4

Learning Outcome
Be motivated and confident in the ability to learn how to use new technologies in teaching.

IP&T 287 - Instructional Technology for Early Childhood Education

Course Information

Teaching Area (new)
IP&T

Course Number
287

Teaching Area
IP&T

Course Title
Instructional Technology for Early Childhood Education

Course Description
Using instructional design, visual design, and differentiated staffing principles, along with multimedia authoring systems, telecommunication, and other computer-based tools in the development of educational applications for early childhood, elementary, and special education settings.

Department
Instructional Psychology and Technology

When Taught
Fall and Winter

Credit Hours

Min:
2

Fixed/Max:
2

Lecture Hours

Fixed:
2

Learning Outcomes

Title
3. EFFECTIVE CONTENT-SPECIFIC TECHNOLOGY INTEGRATION

Tags
177887, 3

Learning Outcome
Student will strengthen their knowledge of ways to use technology in teaching core content areas (fine arts, language arts, math, science, & social studies) that lead to improved effectiveness, engagement, and/or efficiency.

Title
2. DISPOSITIONS TOWARD EDUCATIONAL TECHNOLOGY

Tags
177889, 2

Learning Outcome
Students will develop positive dispositions towards using educational technologies that can help improve student learning.

Title
1. TECHNOLOGICAL LITERACY

Tags
177891, 1

Learning Outcome
Students will increase their familiarity with and ability to use a wide range of educational technologies.

Title
5. ETHICAL AND SAFE USE OF TECHNOLOGY

Tags
177896, 5

Learning Outcome
Students will understand basic issues related to internet safety for children and create lessons that help children have positive, safe experiences with online technologies. Students will follow fairuse guidelines as they incorporate digital media into their teaching.

Title
4. TECHNOLOGY INTEGRATION IN EARLY CHILDHOOD SETTINGS

Tags
178354, 3

Learning Outcome
Students will strengthen their knowledge of technologies and teaching methods that can be used effectively with with young children in the K-2 elementary grades.

IP&T 334 - Integrating Technology in Early Childhood Education.

Course Information

Teaching Area (new)
IP&T

Course Number
334

Teaching Area
IP&T

Course Title
Integrating Technology in Early Childhood Education.

Course Description
Integrating instructional technology with early childhood education instructional strategies.

Department
Instructional Psychology and Technology

When Taught
Fall

Credit Hours

Other Prerequisites
Concurrent with El Ed 333.

Learning Outcomes

Title
5. ETHICAL AND SAFE USE OF TECHNOLOGY

Tags
178342, 4

Learning Outcome
Students will follow fairuse guidelines as they incorporate digital media into their teaching.

Title
3. EFFECTIVE CONTENT-SPECIFIC TECHNOLOGY INTEGRATION

Tags
178347, 2

Learning Outcome
Student will strengthen their knowledge of ways to use technology in teaching math and literacy that lead to improved effectiveness, engagement, and/or efficiency.

Title
4. TECHNOLOGY INTEGRATION IN REAL-WORLD SETTINGS

Tags
178350, 3

Learning Outcome
Students will practice their technology integration skills in real-world early childhood elementary level settings and learn to evaluate the strengths and weaknesses of their performance.

Title
1. TECHNOLOGICAL LITERACY

Tags
178351, 0

Learning Outcome
Students will increase their familiarity with and ability to use a wide range of educational technologies.

Title
2. DISPOSITIONS TOWARD EDUCATIONAL TECHNOLOGY

Tags
178360, 1

Learning Outcome
Students will develop positive dispositions towards using educational technologies that can help improve student learning.

IP&T 370 - Technology Use in Early Childhood Classrooms

Course Information

Teaching Area (new)
IP&T

Course Number
370

Teaching Area
IP&T

Course Title
Technology Use in Early Childhood Classrooms

Course Description
Students will develop knowledge, skills, and dispositions necessary to effectively integrate technology into real-world early childhood classrooms in developmentally appropriate ways.

Department
Instructional Psychology and Technology

When Taught
Fall and Winter

Credit Hours

Min:
2

Fixed/Max:
2

Lecture Hours

Fixed:
2

Lab Hours

Fixed:
0

Learning Outcomes

Title
Integrate technology

Tags
212650, 0, 1, 2022-12-20 16:59:36

Learning Outcome
Students will integrate technology into early childhood classrooms in developmentally appropriate ways.

Title
Teach computational thinking

Tags
212651, 0, 2, 2022-12-20 16:59:36

Learning Outcome
Students will teach computational thinking concepts in the early childhood classroom, including coding short programs.

Title
Use computer assisted learning tools

Tags
212652, 0, 3, 2022-12-20 16:59:36

Learning Outcome
Students will demonstrate how and when to use computer assisted learning tools as well as how to analyze the data from those tools for further learning.

IP&T 371 - Introduction to K-12 Educational Technology

Course Information

Teaching Area (new)
IP&T

Course Number
371

Teaching Area
IP&T

Course Title
Introduction to K-12 Educational Technology

Course Description
Teaching majors will learn ideas and skills for integrating technology effectively into their teaching in areas of Internet communication, multimedia development, mobile learning, and Web tools for teaching.

Department
Instructional Psychology and Technology

When Taught
Fall, Winter, Spring

Credit Hours

Min:
1

Fixed/Max:
1

Lecture Hours

Fixed:
1

Lab Hours

Fixed:
0

Learning Outcomes

Title
Discovering Educational Technologies

Tags
178513, 1

Learning Outcome
Students will develop the ability and disposition to improve their practice by learning from and with others and exploring proven and promising practices that leverage technology to improve student learning.

Title
Inspire Students

Tags
178514, 2

Learning Outcome
Student will inspire students to positively contribute to and responsibly participate in the digital world.

Title
Design Authentic, Learner-centered Activities

Tags
178515, 3

Learning Outcome
Students will design authentic, learner-driven activities and environments that recognize and accommodate learner variability.

IP&T 372 - Integrating Educational Technology in Elementary Education

Course Information

Teaching Area (new)
IP&T

Course Number
372

Teaching Area
IP&T

Course Title
Integrating Educational Technology in Elementary Education

Course Description
Students will develop the knowledge, skills, and dispositions to develop and integrate emerging technologies into elementary education.

Department
Instructional Psychology and Technology

When Taught
Fall, Winter, Spring

Credit Hours

Min:
1

Fixed/Max:
1

Lecture Hours

Fixed:
1

Lab Hours

Fixed:
0

Other Prerequisites
IP&T 371

Learning Outcomes

Title
Computational Thinking

Tags
178497, 1

Learning Outcome
Students will develop a working knowledge of core components of computational thinking: such as decomposition; gathering and analyzing data; abstraction; algorithm design; how computing impacts people and society, and its application as a cross- curricular skill.

Title
Coding

Tags
178498, 2

Learning Outcome
Students will demonstrate fundamental coding concepts (e.g., sequences, conditionals, variables) by coding short programs at the elementary level using modern software;

Title
Facilitate Technology

Tags
178500, 4

Learning Outcome
Students will facilitate active learning with technology to support student achievement of the ISTE Standards for Students.

Title
Data-driven Instruction

Tags
178501, 5

Learning Outcome
Students will use data to drive their instruction and support students in achieving their learning goals.

IP&T 373 - Teaching in K-12 Online and Blended Learning Contexts

Course Information

Teaching Area (new)
IP&T

Course Number
373

Teaching Area
IP&T

Course Title
Teaching in K-12 Online and Blended Learning Contexts

Course Description
Students will explore foundational concepts related to designing authentic data-driven learning activities in multiple modalities (in-person, online, and blended).

Department
Instructional Psychology and Technology

When Taught
Fall; Winter; Spring.

Credit Hours

Min:
1

Fixed/Max:
1

Lecture Hours

Fixed:
1

Lab Hours

Fixed:
0

Other Prerequisites
IP&T 371

Learning Outcomes

Title
Authentic Activities

Tags
178507, 0, 1

Learning Outcome
Students will design authentic, learner-driven activities and environments that recognize and accommodate learner variability.

Title
Facilitate Learning with Technology

Tags
178504, 0, 2

Learning Outcome
Students will demonstrate knowledge of how to teach with technology to support student achievement of the ISTE Standards for Students.

Title
Data practices

Tags
178505, 0, 3

Learning Outcome
Students will use data to design instruction and support students in achieving their learning goals.

IP&T 387 - Integrating Technology in Special Education 1

Course Information

Teaching Area (new)
IP&T

Course Number
387

Teaching Area
IP&T

Course Title
Integrating Technology in Special Education 1

Course Description
Integrating instructional technology with special education instructional strategies.

Department
Instructional Psychology and Technology

When Taught
Fall

Credit Hours

Min:
1

Fixed/Max:
1

Lecture Hours

Fixed:
1

Lab Hours

Fixed:
0

Other Prerequisites
Concurrent with CPSE 410.

Learning Outcomes

Title
Technological Literacy

Tags
178401, 1

Learning Outcome
Students will increase their familiarity with and ability to use a wide range of educational technologies.

Title
Positive Disposition Towards Educational Technology

Tags
178402, 2

Learning Outcome
Students will develop positive disposition towards using educational technologies that can help improve student learning.

Title
Effective Content-Specific Technology Integration

Tags
178403, 3

Learning Outcome
Students will strengthen their knowledge of ways to use technology in teaching core content areas (fine arts, language arts, math, science, & social studies) that lead to improved effectiveness, engagement, and/or efficiency.

Title
Technology Integration in Real-World Settings

Tags
178404, 4

Learning Outcome
Students will practice their technology integration skills in real-world special education settings and learn to evaluate the strengths and weaknesses of their performance.

Title
Ethical and Safe Use of Technology

Tags
178405, 5

Learning Outcome
Students will understand basic issues related to internet safety for children and create lessons that help children have positive, safe experiences with online technologies. Students will follow fairuse guidelines as they incorporate digital media into their teaching.

IP&T 420 - Design Psychology

Course Information

Teaching Area (new)
IP&T

Course Number
420

Teaching Area
IP&T

Course Title
Design Psychology

Course Description
This course will introduce students to fundamental principles of psychological research and how they influence design. In this course, students will learn how people think, basic human psychology, and factors to consider in designing for others. By the end of this course, students should be able to identify relevant factors that affect design as well as how those factors come into play in different design situations.

Learning Outcomes

Title
2. DISPOSITIONS TOWARD EDUCATIONAL TECHNOLOGY

Tags
178349, 1

Learning Outcome
Students will develop positive dispositions towards using educational technologies that can help improve student learning.

Title
1. TECHNOLOGICAL LITERACY

Tags
178355, 0

Learning Outcome
Students will increase their familiarity with and ability to use a wide range of educational technologies.

Title
5. ETHICAL AND SAFE USE OF TECHNOLOGY

Tags
178357, 4

Learning Outcome
Students will understand basic issues related to internet safety for children and create lessons that help children have positive, safe experiences with online technologies. Students will follow fairuse guidelines as they incorporate digital media into their teaching.

Title
4. TECHNOLOGY INTEGRATION IN REAL-WORLD SETTINGS

Tags
178358, 3

Learning Outcome
Students will practice their technology integration skills in real-world upper elementary level settings and learn to evaluate the strengths and weaknesses of their performance.

Title
3. EFFECTIVE CONTENT-SPECIFIC TECHNOLOGY INTEGRATION

Tags
178363, 2

Learning Outcome
Student will strengthen their knowledge of ways to use technology in teaching core content areas (fine arts, language arts, math, science, & social studies) that lead to improved effectiveness, engagement, and/or efficiency.

IP&T 461 - Design Evaluation

Course Information

Teaching Area (new)
IP&T

Course Number
461

Teaching Area
IP&T

Course Title
Design Evaluation

Course Description
Introduction to the field of evaluation and how it is used in instructional design and in the evaluation of educational products. Methods for conceptualizing and implementing evaluations, and practical guidelines for planning and completing an evaluation project.

Department
Instructional Psychology and Technology

When Taught
Fall

Credit Hours

IP&T

Course Title
Undergraduate Research Training

Course Description
Introduction of undergraduate students to the concepts of research and evaluation through practical experience.

Department
Instructional Psychology and Technology

When Taught
Fall and Winter

Credit Hours

Min:
0.5

Fixed/Max:
3

Learning Outcomes

Title
Forms of Inquiry

Tags
178229, 1

Learning Outcome
To learn some basic issues associated with research, evaluation, and other forms of inquiry

Title
Mentored Experience

Tags
178230, 2

Learning Outcome
To participate in a mentored inquiry experience with a faculty member.

Title
Conducting and Presenting Inquiry Studies

Tags
178356, 2

Learning Outcome
To develop some basic skills in conducting and presenting inquiry studies.

IP&T 487 - Integrating Technology in Special Education 2

Course Information

Teaching Area (new)
IP&T

Course Number

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Learning Outcomes

Title
Scholarly Writing Skills

Tags
178493, 1

Learning Outcome
Develop improved scholarly writing skills.

Title
Argumentation Skills

Tags
178494, 2

Learning Outcome
Develop improved logical argumentation skills.

Title
Publication Process

Tags
178495, 3

Learning Outcome
Understand the scholarly publication process (e.g., submission, peer review, revision).

Title
APA Style

Tags
178496, 4

Learning Outcome
Understand and apply the fundamentals of the APA style and formatting guidelines.

IP&T 515R - Special Topics in Instructional Psychology and Technology

Course Information

Teaching Area (new)
IP&T

Course Number
515R

Teaching Area
IP&T

Course Title
Special Topics in Instructional Psychology and Technology

Course Description
Becoming more familiar with key issues in the field of instructional psychology and technology.

Department
Instructional Psychology and Technology

When Taught
Fall, Winter, Spring

Credit Hours

Min:
0.5

Fixed/Max:
3

Learning Outcomes

Title
Authoring Tools

Tags
178449, 2

Learning Outcome
Students will become proficient in using industry-standard authoring tools to create interactive instruction.

Title
Creative Collaboration

Tags
178450, 1

Learning Outcome

Students will collaborate with a client to meet their needs for interactive instruction.

Title
This course is being discontinued so no learning outcomes will be listed.

Tags
178428, 1

Learning Outcome
This course is being discontinued so no learning outcomes will be listed.

Title
This course is being discontinued so no learning outcomes will be listed.

178430, 1

Learning Outcome
This course is being discontinued so no learning outcomes will be listed.

Title
This course is being discontinued so no learning outcomes will be listed.

Tags
178431, 1

Learning Outcome
This course is being discontinued so no learning outcomes will be listed.

Title
Scholarly Writing and Argumentation.

Tags
178451, 0

Learning Outcome
Students will work together to strengthen their skills in academic writing and argumentation areas by analyzing sources from the scholarly literature, completing writing assignments, offering feedback on other students' work, receiving feedback on their own, and completing a course project.

IP&T 520 - Foundations of Instructional Technology

Course Information

Teaching Area (new)
IP&T

Course Number
520

Teaching Area
IP&T

Course Title
Foundations of Instructional Technology

Course Description
Introduction to instructional psychology and technology theory and practice: psychological foundations of human performance technology and learning sciences. Current research issues, professional organization of the field, and ethical issues.

Department
Instructional Psychology and Technology

When Taught
Fall and Spring

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Learning Outcomes

Title
Current Issues

Tags
178231, 1

Learning Outcome
Understand the current issues, discussions, research, and debates in this field as well as comparable sister professions.

Title
History

Tags
178232, 2

Learning Outcome
Understand the history of the field of Instructional Technology, including the various trends, people, and issues that shaped it.

Title
Professional Trajectory

Tags
178233, 3

Learning Outcome
Clarify and define your own professional trajectory into your profession including your personal beliefs; the kind of career you are seeking; and the skills, knowledge, and characteristics you need to develop to be successful.

Title
Writing Skills

Tags
178234, 4

Learning Outcome
Begin to develop skills in literature analysis and scholarly writing.

Title
Online Presence

Tags
178235, 5

Learning Outcome
Create an initial professional web presence that you can develop during your career.

Title
Future Roles

Tags
178236, 6

Learning Outcome
Begin defining for yourself what the future of our field is or may be, and what your role may be in that future.

IP&T 531 - Introduction to Open Education

Course Information

Teaching Area (new)
IP&T

Course Number
531

Teaching Area
IP&T

Course Title
Introduction to Open Education

Course Description
Students will learn foundational concepts related to open education including the origins of intellectual property law and open licensing, and the impact of openness on teaching, learning, and scholarly publishing.

Department
Instructional Psychology and Technology

When Taught
Fall Even Years

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Learning Outcomes

Title
Understand Problems

Tags
178517, 2

Learning Outcome
Understand the key problems open education attempts to solve and the progress made to date on solving those problems

Title
Understand

Tags
178518, 1

Learning Outcome
Understand the underlying rationale for open education.

Title
Understanding Licensing

Tags
178519, 3

Learning Outcome
Understand the different categories of open licensing and the criteria associated with each.

IP&T 538 - Teaching in Online and Blended Learning Environments

Course Information

Teaching Area (new)
IP&T

Course Number
538

Teaching Area
IP&T

Course Title
Teaching in Online and Blended Learning Environments

Course Description
Students will explore foundational concepts related to online/blended learning and will learn to plan, develop, facilitate, and evaluate teaching and learning in these environments.

Department
Instructional Psychology and Technology

When Taught
Winter Even Years

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Learning Outcomes

Title
1. ARTICULATE KEY ISSUES FOR ONLINE/BLENDED TEACHING

Tags
178509, 1

Learning Outcome

Describe key issues and trends related to online/blended learning.
Describe key competencies needed for online/blended teaching.
Identify key concepts for effective online/blended teaching.

Title
2. EVALUATE ONLINE COURSES

Tags
178510, 2

Learning Outcome

Evaluate the quality of an online course design.

Title
3. DESIGN ONLINE/BLENDED COURSES

Tags
178511, 3

Learning Outcome

Design effective learner-content interactions for an online or blended course.
Design effective learner-community interactions for an online or blended course.
Design effective online assessments for an online or blended course.

Title
4. FACILITATE ONLINE ACTIVITIES

Tags
178512, 4

Learning Outcome

Effectively facilitate both synchronous and asynchronous online activities.

IP&T 560 - Instructional Product Development

Course Information

Teaching Area (new)
IP&T

Course Number
560

Teaching Area
IP&T

Course Title
Instructional Product Development

Course Description
Designing, developing, and troubleshooting instructional products using industry-standard tools.

Department
Instructional Psychology and Technology

When Taught
Fall

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Learning Outcomes

Title
Develop e-learning

Tags
178237, 1

Learning Outcome
Students will design and develop an e-learning program using a technology of the student's choice.

Title
Personal Learning Environment

Tags
178238, 2

Learning Outcome
Students will build a personal learning environment

Title
Online Community Integration

Tags
178239, 3

Learning Outcome
Students will become part of an online community of learners.

IP&T 564 - Instructional Design

Course Information

Teaching Area (new)
IP&T

Course Number
564

Teaching Area
IP&T

Course Title
Instructional Design

Course Description
Identifying instructional problems; specifying objectives, instructional strategies, and media; analyzing learning outcomes; developing instructional materials and assessment instruments; validating instructional systems.

Department
Instructional Psychology and Technology

When Taught
Fall and Winter

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Learning Outcomes

Title
Demonstrate design character

Tags
178452, 6

Learning Outcome
Explain how designers understand the world and take action differently than those in other traditions; critique your own or others' actions as examples of design thinking; identify the kind of design thinking you want to develop and the type of growth you need to experience while making progress towards such.

Title
Define the scope and parameters of the instructional design industry

Tags
178468, 1

Learning Outcome
Identify and explain the features of instructional products, common tools used by instructional designers, and current industry trends. Explain/ compare both traditional and emerging learning theories, instructional theories, instructional design models, and design processes.

Title
Assess instructional situations

Tags
178469, 4

Learning Outcome
Conduct basic approaches for analyzing audiences, uncovering stakeholder desires, determining instructional strategies and methods, etc.

Title
Create instructional design documentation and prototypes

Tags
178470, 5

Learning Outcome
Create artifacts that communicate your design intentions to others who will either approve them or help bring them into reality.

Title
Define an instructional design challenge

Tags
178471, 3

Learning Outcome
Evaluate design contexts and environments to determine the nature of an instructional design challenge.

IP&T 599R - Academic Internship

Course Information

Teaching Area (new)
IP&T

Course Number
599R

Teaching Area
IP&T

Course Title
Academic Internship

Course Description
Practicing skills learned and receiving evaluation and feedback from internship sponsors.

18

Other Prerequisites
Departmental consent

Note
An APPROVED Internship Application is required before adding.

Learning Outcomes

Title
Apply skills

Tags
178466, 3

Learning Outcome
Apply skills learned through coursework in a real-world setting, where you will receive evaluative feedback from internship sponsors.

Title
Develop expertise

Tags
178467, 4

Learning Outcome
Develop greater expertise in a sector of the IP&T industry, through hands-on, practical work.

IR 399R - Academic Internship: International

Course Information

Teaching Area (new)
IR

Course Number
399R

Teaching Area
IR

Course Title
Academic Internship: International

Course Description
Individualized work or volunteer experience in an international setting.

Department
International and Area Studies

When Taught
Contact Department

Credit Hours

Min:
0.5

Fixed/Max:
12

Lecture Hours

Fixed:
0

Lab Hours

Fixed:
0

Other Prerequisites
Acceptance into program; international relations major coordinator's consent

Note
Must be coordinated through International Study Programs.

Learning Outcomes

Title
Integrating Learning

Tags
200099, 0

Learning Outcome
Students will be able to connect and integrate their academic experiences and learning with their work experiences.

IS 110 - Spreadsheet Skills and Business Analysis

Course Information

Teaching Area (new)
IS

Course Number
110

Teaching Area
IS

Course Title
Spreadsheet Skills and Business Analysis

Course Description
Basic spreadsheet skills focusing on features in MS Excel such as basic functions, logic and reference functions, statistical functions, what-if analysis, and charting to solve complex business problems. No technical background is necessary.

Department
Information Systems

When Taught
All Semesters/Terms

Credit Hours

Min:
1

Fixed/Max:
1

Lecture Hours

Fixed:
1

Lab Hours

Fixed:
0

Note
This course can be completed with online instruction, attendance is optional. Also offered by BYU Independent Study; enroll anytime throughout year; one year to complete; additional tuition required; register at is.byu.edu.

Learning Outcomes

Title
Methods

Tags
175717, 0, 1

Learning Outcome

Build appropriate spreadsheet models of business problems to make rational, data-driven managerial recommendations effectively solving those problems.

Title
Critical Thinking

Tags
175718, 0, 2

Learning Outcome

Manipulate spreadsheet models of business problems to examine the robustness of proposed solutions to those solutions.

IS 111 - Introduction to AI in Business

Course Information

Course Number
111

Teaching Area
IS

Course Title
Introduction to AI in Business

Course Description
Foundational overview of generative artificial intelligence (GenAI) in business. Explore key GenAI technologies and skills—such as prompt engineering, custom agents, and multi-agent systems—and usage to improve decision-making, efficiency, and customer experiences.

Department
Information Systems

When Taught
Fall, Winter, and Spring

Credit Hours

Min:
1

Fixed/Max:
1

Lecture Hours

Fixed:
1

Learning Outcomes

Title
Identify and explain

Learning Outcome
Identify and explain core concepts of artificial intelligence and how they apply to business contexts.

Title
Demonstrate foundational skills

Learning Outcome
Demonstrate foundational skills in prompt engineering, custom agent creation, and multi-agent system design.

Title
Evaluate business use cases

Learning Outcome
Evaluate business use cases where AI technologies enhance decision-making, operational efficiency, and customer experience.

IS 115 - Introduction to Data Analytics in Python

Course Information

Teaching Area (new)
IS

Course Number
115

Teaching Area
IS

Course Title
Introduction to Data Analytics in Python

Course Description
Introduction to the field of data science, with a focus on analytics, using the most popular programming language in the discipline. Topics include introductions to: 1) Python programming, 2) data vizualization, 3) bivarate statistics and multivariate statistics, and 4) data-driven business decision-making.

Department
Information Systems

When Taught
Fall and Winter

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Note
No prior programming experience necessary.

IS 120 - Introduction to Web Development

Course Information

Teaching Area (new)
IS

Course Number
120

Teaching Area
IS

Course Title
Introduction to Web Development

Course Description
Hands-on introductory web development. Foundation in the basics of all websites: HTML5 and CSS, with a focus on accessibility and standards-compliant markup for SEO optimization. From building simple HTML5 web pages to building a small but fully responsive website using modern CSS layouts and media queries. Images on the web, including SVG images, image optimization, and introduction to CSS animations. Survey of modern web frameworks and libraries and introduction to the DOM to prepare students for future web development courses.

Prerequisites

Complete ALL of the following Courses:

- IS 110 - Spreadsheet Skills and Business Analysis

IS 199R - Academic Internship: Information Systems

Course Information

Teaching Area (new)
IS

Course Number
199R

Teaching Area
IS

Course Title
Academic Internship: Information Systems

Course Description
Approved on-the-job experience. Applying classroom theory and technology to actual problems; exploring career opportunities; learning role of information systems in business environment.

Department
Information Systems

When Taught
All Semesters/Terms

Credit Hours

Min:
0.5

Fixed/Max:
3

Other Prerequisites
Selection of information systems emphasis in Marriott School of Management.

Note
P/F grade.

IS 201 - Introduction to Information Systems

Course Information

Teaching Area (new)
IS

Course Number
201

Teaching Area
IS

Course Title
Introduction to Information Systems

Course Description
Create technology solutions to solve business problems. Learn database, analytics, automation, and programming skills useful to all business majors.

Department
Information Systems

When Taught
Fall; Winter; Spring; Summer.

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
1

Other Prerequisites
IS 110 or concurrent enrollment.

Note
Laptop required. Also offered by BYU Independent Study; enroll anytime throughout year; one year to complete; additional tuition required; register at is.byu.edu.

Learning Outcomes

Title
IS Concepts

Tags
206735, 1

Learning Outcome
Explain core IS concepts, such as data security, computing and networks, systems in business, and systems project management.

Title
Database

Tags
206737, 2

Learning Outcome
Design databases and query them to extract specific and nuanced data for business insights.

Title
Programming and Automation

Tags
206739, 0

Learning Outcome
Synthesize basic programming principles and apply them to automate complex and repetitive business tasks.

Title
Analyze and Visualize Data

Tags
206740, 3

Learning Outcome
Apply the tools used in modern businesses for analyzing and visualizing patterns in data to support better business decision making.

Title
Web

Learning Outcome
Demonstrate the fundamentals of web development by creating your own websites and hosting them online.

IS 302 - Introduction to Database Design and SQL for Non-Majors

Course Information

Teaching Area (new)
IS

Course Number
302

Teaching Area
IS

Course Title
Introduction to Database Design and SQL for Non-Majors

Course Description
Introduction to databases covering relational models, design, modeling, and SQL. Students build data models, write queries, apply standard notation, and design systems for their domain. Prior/concurrent completion of IS 201 or IS 303 recommended.

Department
Information Systems

When Taught
Fall and Winter

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Other Prerequisites
Prior/concurrent completion of IS 201 or IS 303 recommended.

Recommended
Not for freshmen. Must have completed at least 24 credits on campus.

Learning Outcomes

Title
Critical Thinking Skills

Tags
213910, 0, 1, 2023-08-29 09:39:30

Learning Outcome
Produce conceptual data models and solve relational algebra and SQL query problems using critical thinking skills.

Title
Written Communication

Tags
213911, 0, 2, 2023-08-29 09:39:31

Learning Outcome
Create conceptual and relational data models using standard symbols and notation for data modeling and relational database design.

Title
Group Work

Tags
213912, 0, 3, 2023-08-29 09:39:32

Learning Outcome
Collaborate effectively to complete data modeling projects.

IS 303 - Introduction to Computer Programming

Course Information

Teaching Area (new)
IS

Course Number
303

Teaching Area
IS

Course Title
Introduction to Computer Programming

Course Description
Object-oriented program design and development. Principles of algorithm formulation and implementation.

Department
Information Systems

When Taught
Winter

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Note
Laptop required.

Learning Outcomes

Title
Programming Fundamentals

Tags
208172, 2

Learning Outcome
Students will be able to write, run, and debug computer programs that use common control-flow structures, including sequence, selection, iteration, function calls, jump statements, and exception handling.

Title
Problem Solving

Tags
208173, 1

Learning Outcome
Students will be able to decompose small real-world problems and select appropriate control-flow structures to develop working solutions, especially to solve business needs.

Title
Object Oriented Principles

Tags
208174, 0

Learning Outcome
Students will be able to structure their code using object-oriented design principles, including aggregation, composition, inheritance, polymorphism, and different variable scopes.

Title
Safe Coding

Learning Outcome
Students will be able to implement some introductory safe coding practices into their programs, such as input validation, safe defaults, and exception handling.

Title
Accessing Data

Learning Outcome
Students will be able to read data from external sources, integrate it into the logic of their programs, and store data in accessible formats.

Title
Version Control

Learning Outcome
Students will employ version control and repository hosting software to manage their programs.

Title
Improved Learning Capabilities

Learning Outcome
Students will develop independent learning capabilities through principled use of AI and online programming resource

Title
Improve Decision Making

Learning Outcome
Students will be able to develop a working and deployed data-driven graphical interface that supports business processes and decision-making.

IS 315 - Introduction to Python Data Analytics (non majors)

Course Information

Teaching Area (new)
IS

Course Number
315

Teaching Area
IS

Course Title
Introduction to Python Data Analytics (non majors)

Course Description
Learn the python programming language in the Jupyter Notebook format. Using that skill,
learn to create the statistics and visualizations required for univariate and bivariate analyses. Also learn core data cleaning and automation techniques relevant to modern data analytics.

Department
Information Systems

When Taught
Fall; Winter.

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Other Prerequisites
IS minors only

Learning Outcomes

Title
Python Programming

Tags
213913, 0, 1, 2023-08-29 09:39:35

Learning Outcome
Program in the Python language with a focus on importing, cleaning, transforming, and exploring datasets

Title
Statistical Analysis

Tags
213914, 0, 2, 2023-08-29 09:39:37

Learning Outcome
Select, run, and interpret univariate and bivariate statistical analyses and visualizations.

Title
Data Storytelling

Tags
213915, 0, 3, 2023-08-29 09:39:39

Learning Outcome
Derive valuable insights from data and communicate a compelling story

IS 355 - Predictive AI (Machine Learning Foundations) for non-majors

Course Information

Teaching Area (new)
IS

Course Number
355

Teaching Area
IS

Course Title
Predictive AI (Machine Learning Foundations) for non-majors

Course Description
Learn to apply predictive artificial intelligence (a.k.a. machine learning) models to improve business applications and processes. This course teaches the process of building predictive AI pipelines in a standard framework.

Department
Information Systems

When Taught
Fall; Winter.

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Simple Requisites

Prerequisites

Type
Prerequisite

Prerequisites

Complete ANY of the following Courses:

- IS 115 - Introduction to Data Analytics in Python
  OR IS 505 - Introduction to Python Data Analytics (non majors)
  OR IS 315 - Introduction to Python Data Analytics (non majors)

Learning Outcomes

Title
Methods

Tags
213917, 0, 1, 2023-08-29 09:39:43

Learning Outcome
Build predictive AI models of all types based on appropriate assumptions and methods.

Title
Critical Thinking

Tags
213918, 0, 2, 2023-08-29 09:39:45

Learning Outcome
Interpret model results and make statistical inferences and predictions.

Title
Comparison

Tags
213919, 0, 3, 2023-08-29 09:39:47

Learning Outcome
Compare and dynamically select the best algorithms and features.

IS 365 - AI in Business

Course Information

Course Number
365

Teaching Area
IS

Course Title
AI in Business

Course Description
Learn to leverage generative AI for business innovation through hands-on projects in prompt engineering, templates, Custom GPTs, RAG, workflow automation, and coding—gaining practical skills to design and implement real-world AI solutions.

Department
Information Systems

When Taught
Winter

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Learning Outcomes

Title
Implementation

Learning Outcome
Design and execute complete generative AI solutions from prompt engineering through workflow automation and deployment.

Title
Technical Proficiency

Learning Outcome
Be able to code effectively with generative AI tools, customize models for specific business use cases, and integrate AI capabilities into existing systems.

Title
Strategic Application

Learning Outcome
Be able to evaluate business requirements and select appropriate generative AI approaches, frameworks, and tools to optimize organizational processes and outcomes.

IS 401 - Project management and systems design

Course Information

Teaching Area (new)
IS

Course Number
401

Teaching Area
IS

Course Title
Project management and systems design

Course Description
Concepts and skills related to the systems development life cycle, including project management, planning, investigation, requirements definition, and systems design.

Department
Information Systems

When Taught
Fall.

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Other Prerequisites
Acceptance into the Information Systems major; enrollment in an IS Core envelope.

Learning Outcomes

Title
SDLC

Tags
175751, 0

Learning Outcome
Utilize systems analysis and design techniques to understand and document project requirements.

Title
Project Management

Tags
175752, 1

Learning Outcome
Effectively plan and execute a real-world project using industry-relevant project management techniques.

IS 402 - Database Systems

Course Information

Teaching Area (new)
IS

Course Number
402

Teaching Area
IS

Course Title
Database Systems

Course Description
Master essential database concepts by learning SQL with a mainstream DBMS, applying normalization to reduce redundancy and errors, and using standard notation to design, model, and demonstrate both conceptual and relational databases effectively.

Department
Information Systems

When Taught
Fall

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Other Prerequisites
Acceptance into the Information Systems major; enrollment in an IS Core envelope

Learning Outcomes

Title
Database Concepts

Tags
175642, 0

Learning Outcome
Master essential database concepts.

Title
Group Work

Tags
175665, 3

Learning Outcome
Work well with one or more partners on a major data modeling assignment. On a larger team, complete a major project in the integrative exercise (INTEX).

Title
Develop Critical Thinking Skills

Tags
175741, 1

Learning Outcome
Develop critical thinking skills through producing conceptual data models and solving relational algebra and SQL query problems.

Title
Written Communication

Tags
175742, 2

Learning Outcome
Learn the standard symbols and notation for data modeling and relational database design. Demonstrate this knowledge in conceptual and relational data models.

IS 403 - Principles of Business Programming

Course Information

Teaching Area (new)
IS

Course Number
403

Teaching Area
IS

Course Title
Principles of Business Programming

Course Description
Programming business systems. Algorithms, data structures, programming patterns, and interfaces.

Department
Information Systems

When Taught
Fall

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Other Prerequisites
Acceptance into the Information Systems major; enrollment in an IS Core envelope

Learning Outcomes

Title
Course content

Tags
208176, 0, 1

Learning Outcome
Master fundamental programming concepts through the use of JavaScript/ Node/Express environment.

Title
Critical Thinking Skills

Learning Outcome
Develop critical thinking skills through solving programming problems in homework, on projects, and on tests.

Title
Object-oriented Programming Principles

Learning Outcome
Learn web development model view controller principles, data structures, and libraries. The subject matter of the course is object-oriented development in the JavaScript/Node/Express/PostgreSQL platform.

Title
Written Communication

Learning Outcome
Be able to identify the problem and solution and then implement a solution using software engineering practices. Learn the standard syntax for full-stack programs and other development tools. Demonstrate this knowledge by writing a significant number of programs and websites.

IS 404 - Information Technology Infrastructure

Course Information

Teaching Area (new)
IS

Course Number
404

Teaching Area
IS

Course Title
Information Technology Infrastructure

Course Description
Principles of cloud computing and data communications, local- and wide-area networks, hardware, software, media, standards, management, and business applications.

Department
Information Systems

When Taught
Winter.

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
3

Other Prerequisites
IS 414; Acceptance into the Information Systems major; enrollment in an IS Core envelope

Note
To register for the IS Core, choose "Add an envelope of classes."

Learning Outcomes

Title
Knowledge

Tags
175670, 1

Learning Outcome
Explain data communications and cloud computing in general, including specific capabilities to: 1) Understand the protocols and applications of TCP/IP networking, 2) Configure cloud services, and 3) converse competently about data communications issues and challenges

Title
Problem solving

Tags
175694, 2

Learning Outcome
Solve specific problems using their understanding gained during the course.

Title
Decision making

Tags
175672, 0, 0

Learning Outcome
Explain the business and technical decisions that drive organizations' use of data communications and cloud technologies

IS 411 - Systems Design and Implementation

Course Information

Teaching Area (new)
IS

Course Number
411

Teaching Area
IS

Course Title
Systems Design and Implementation

Course Description
Later phases of systems development life cycle. System architecture, user interfaces, system interface, and application design. Testing and integration. Object-oriented development.

Department
Information Systems

When Taught
Winter

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Simple Requisites

Prerequisites

Type
Prerequisite

Prerequisites

Complete ALL of the following Courses:

- IS 401 - Project management and systems design
  AND IS 402 - Database Systems
  AND IS 403 - Principles of Business Programming

Other Prerequisites
IS 414; be an information systems major; concurrent enrollment in same section as IS 404, 405, and 413.

Learning Outcomes

Title
System Design Concepts

Tags
175667, 0

Learning Outcome
Master essential system design concepts and patterns.

Title
Group Work for Design of Systems

Tags
175669, 3

Learning Outcome
Learn to work well as a member and leader of a team in developing designs on multiple projects.

Title
Producing System Designs

Tags
175673, 1

Learning Outcome
Develop critical thinking skills through producing sound system designs to solve specific business systems processing problems.

Title
Unified Modeling Language Notation

Tags
175700, 2

Learning Outcome
Learn the standard UML symbols and notation for system design.

IS 413 - Enterprise Application Development

Course Information

Teaching Area (new)
IS

Course Number
413

Teaching Area
IS

Course Title
Enterprise Application Development

Course Description
Client- and server-side programming. Internet and Web-based applications. Enterprise systems and architectures.

Department
Information Systems

When Taught
Winter

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Simple Requisites

Prerequisites

Type
Prerequisite

Prerequisites

Complete ALL of the following Courses:

- IS 403 - Principles of Business Programming

Other Prerequisites
IS 414; Acceptance into the Information Systems major; enrollment in an IS Core envelope

Learning Outcomes

Title
Develop Information Systems in Group Setting

Tags
175712, 0, 1

Learning Outcome
Create web apps using the .NET MVC Framework.

Title
Learn Enterprise System Development Principles

Tags
175697, 0, 4

Learning Outcome
Write Razor pages using the fundamentals of C#. Use libraries such as Bootstrap, JQuery, Angular etc. in the web apps.

Title
Work as Leaders and Group Members in Development Teams

Tags
175696, 0, 2

Learning Outcome
Work as a team to build and integrate a web app.

Title
Problem Solving

Tags
175660, 0, 3

Learning Outcome
Increase confidence in ability to "figure things out" on one's own.

IS 414 - Information Systems Security and Controls

Course Information

Teaching Area (new)
IS

Course Number
414

Teaching Area
IS

Course Title
Information Systems Security and Controls

Course Description
Concepts and techniques for securing information systems and applying controls to business processes.

Department
Information Systems

When Taught
Winter

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Other Prerequisites
Acceptance into the Information Systems major; enrollment in an IS Core envelope

Learning Outcomes

Title
Identify Information Security Threats and Vulnerabilities

Tags
175678, 0, 1

Learning Outcome
To become familiar with attack vectors that are commonly executed in attempting to access and compromise or steal data

Title
Attack Prevention and Detection

Tags
175624, 0, 2

Learning Outcome
Know modern methods of attack prevention and detection

Title
Information Security Principles

Tags
175636, 0, 0

Learning Outcome
understand confidentiality, authentication, availability, authentication, non-repudiation and apply these concepts in modern organizations

Title
Internal Controls of Business Processes

Tags
211554, 0, 3

Learning Outcome
Analyze a set of business processes and evaluate the appropriateness and deficiencies of internal controls

IS 415 - Exploratory Data Analysis

Course Information

Teaching Area (new)
IS

Course Number
415

Teaching Area
IS

Course Title
Exploratory Data Analysis

Course Description
Use the python programming language in a Jupyter Notebook format to learn the statistics and visualizations required for univariate and bivariate analyses. Learn to tell stories with data and create interactive dashboards.

Department
Information Systems

When Taught
Fall.

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Other Prerequisites
Majors only.

Learning Outcomes

Title
Statistical Analysis

Tags
212204, 0, 1

Learning Outcome
Select, run, and interpret univariate and bivariate statistical analyses and visualizations.

Title
Data Storytelling

Tags
212205, 0, 2

Learning Outcome
Derive valuable insights from data and communicate a compelling story

Title
Interactive Dashboard

Tags
212206, 0, 3

Learning Outcome
Create and derive value from an interactive deployed dashboard.

IS 455 - Predictive AI in Business (Machine Learning Foundations)

Course Information

Teaching Area (new)
IS

Course Number
455

Teaching Area
IS

Course Title
Predictive AI in Business (Machine Learning Foundations)

Course Description
Learn to apply predictive artificial intelligence (a.k.a. machine learning) models to improve business applications and processes. This course teaches the process of building predictive AI pipelines in a standard framework.

Department
Information Systems

When Taught
Winter.

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Simple Requisites

Prerequisites

Type
Prerequisite

Prerequisites

Complete ALL of the following Courses:

- IS 415 - Exploratory Data Analysis

Other Prerequisites
Acceptance into the Information Systems major

Learning Outcomes

Title
Methods

Tags
212273, 0, 1

Learning Outcome
Be able to execute all phases of a machine learning pipeline project

Title
Critical Thinking

Tags
212274, 0, 2

Learning Outcome
Be able to interpret model results and make statistical inferences and predictions

Title
Comparison

Tags
212275, 0, 3

Learning Outcome
Be able to deploy machine learning project results appropriately for a customer

IS 456 - Agentic AI in Business

Course Information

Course Number
456

Teaching Area
IS

Course Title
Agentic AI in Business

Course Description
Explore intelligent agents and applications, covering AI foundations, LLMs, agent types, RAG, multi-agent systems, tool use, and governance. Gain hands-on skills in prompt engineering, API integration, and designing agentic systems for business intelligence.

Department
Information Systems

When Taught
Winter

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Learning Outcomes

Title
AI Foundations

Learning Outcome
Describe key concepts related to generative artificial intelligence and agentic systems

Title
Process Alignment

Learning Outcome
Assess organizational processes and workflows and determine which ones align with agentic opportunities

Title
Applied Coding

Learning Outcome
Develop code that implements generative artificial intelligence and agentic components to solve business problems

Title
Search Methods

Learning Outcome
Compare and contrast keyword and semantic search

Title
Model Guidance

Learning Outcome
Guide large language models' performance through context engineering, retrieval augmented generation, and fine tuning

Title
Security Issues

Learning Outcome
Discuss key security issues facing agentic solutions

IS 490R - Mentored Research

Course Information

Teaching Area (new)
IS

Course Number
490R

Teaching Area
IS

Course Title
Mentored Research

Course Description
Mentored research opportunity; specific content will be determined in consultation between the student and the mentoring professor. Invitation only, although you may suggest the option to a professor.

Department
Information Systems

When Taught
Fall and Winter

Credit Hours

Min:
0.5

Fixed/Max:
3

Lab Hours

Fixed:
0

Other Prerequisites
Students must request admission to the course by contacting the instructor

Note
Students may complete this course a maximum of 2 times.

IS 501 - Business Information Systems

Course Information

Teaching Area (new)
IS

Course Number
501

Teaching Area
IS

Course Title
Business Information Systems

Course Description
Create technology solutions to solve business problems. Learn database, analytics, automation, and programming skills useful to all business majors.

Department
Information Systems

When Taught
Fall; Winter.

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Learning Outcomes

Title
IS Concepts

Learning Outcome
Explain core IS concepts, such as data security, computing and networks, systems in business, and systems project management.

Title
Database

Learning Outcome
Design databases and query them to extract specific and nuanced data for business insights.

Title
Programming and Automation

Learning Outcome
Apply programming principles to automate complex and repetitive business tasks.

Title
Analyze and Visualize Data

Learning Outcome
Utilize modern tools for analyzing and visualizing patterns in data to support better business decision making.

Title
Web

Learning Outcome
Create their own websites and host them online.

IS 505 - Introduction to Python Data Analytics (non majors)

Course Information

Teaching Area (new)
IS

Course Number
505

Teaching Area
IS

Course Title
Introduction to Python Data Analytics (non majors)

Course Description
Learn the python programming language in the Jupyter Notebook format. Using that skill, students will learn to create the statistics and visualizations required for univariate, bivariate, and limited multivariate analyses. Learn core data cleaning and automation techniques relevant to modern data analytics

Department
Information Systems

When Taught
Fall; Winter.

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Note
No prior programming experience necessary.

Learning Outcomes

Title
Python Programming

Learning Outcome
Program in the Python language with a focus on importing, cleaning, transforming, and exploring datasets

Title
Statistical Analysis

Learning Outcome
Select, run, and interpret univariate, bivariate, and multivariate statistical analyses and visualizations.

Title
Data Storytelling

Learning Outcome
Derive valuable insights from data and communicate a compelling story

IS 515 - Advanced Spreadsheets for Business Analysis

Course Information

Teaching Area (new)
IS

Course Number
515

Teaching Area
IS

Course Title
Advanced Spreadsheets for Business Analysis

Course Description
Focus on learning advanced functionality of spreadsheets to support business analysis and decision making. Topics covered include names, dates and times, debugging, arrays and array formulas, counting and summing techniques, pivot tables, data importing and cleaning, text manipulation, advanced decision making, and more.

Department
Information Systems

When Taught
Fall and Winter

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Other Prerequisites
IS 201; IS 201 or equivalent.

IS 520 - Business Programming and Spreadsheet Automation

Course Information

Teaching Area (new)
IS

Course Number
520

Teaching Area
IS

Course Title
Business Programming and Spreadsheet Automation

Course Description
Programming in Excel Visual Basic; automating common tasks; retrieving data from web servers; building optimization models and user forms.

Department
Information Systems

When Taught
Fall and Winter

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Other Prerequisites
IS 201 or equivalent or instructor's consent

Learning Outcomes

Title
Understand Basic Programming Concepts

Tags
175623, 1

Learning Outcome
Understand basic programming concepts such as variables, arrays, procedures, conditions, and control of flow statements

Title
Retrieve Data from Internet and Database Servers

Tags
175625, 2

Learning Outcome
Retrieve data from internet web servers and corporate database servers.

Title
Automate Repetitive Procedures in Excel

Tags
175638, 0

Learning Outcome
Automate repetitive procedures in Excel.

Title
Build Forms for Gathering User Input

Tags
175702, 4

Learning Outcome
Build forms for gathering user input

Title
Apply Programming Technology to Solve Business Problems

Tags
175707, 3

Learning Outcome
Apply programming technology to solve unstructured business problems.

IS 531 - Enterprise Infrastructure

Course Information

Teaching Area (new)
IS

Course Number
531

Teaching Area
IS

Course Title
Enterprise Infrastructure

Course Description
Principles of IT enterprise infrastructure management with an emphasis on cloud technologies, containers, Linux, and DevOps.

Department
Information Systems

When Taught
Fall.

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Other Prerequisites
Admission to MISM program; IS 404 or equivalent

Learning Outcomes

Title
Essential Concepts

Tags
175632, 0, 0

Learning Outcome
Demonstrate concepts in cloud infrastructure and devops.

Title
Linux

Tags
175704, 0, 1

Learning Outcome
Utilize Linux for operations.

Title
Containers

Tags
175705, 0, 2

Learning Outcome
Create and deploy customized containers for running applications.

Title
DevOps

Tags
175626, 0, 3

Learning Outcome
Explain principles of DevOps and build applications according to best practices.

IS 532 - Cloud Engineering and DevOps

Course Information

Course Number
532

Teaching Area
IS

Course Title
Cloud Engineering and DevOps

Course Description
Introduction to serverless infrastructure with AWS, teaching students to design and deploy applications using DevOps principles, communicate about infrastructure, and master tools like S3, CloudFront, Lambda, API Gateway, DynamoDB, IaC, and a chosen cloud topic.

Department
Information Systems

When Taught
Winter

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Simple Requisites

Prerequisites

Type
Prerequisite

Complete ALL of the following Courses:
- IS 404 - Information Technology Infrastructure

Learning Outcomes

Title
Knowledge

Learning Outcome
Deepen their understanding of topics in a seminar in information systems.

Title
Deploy serverless application

Learning Outcome
Design and deploy a serverless application on cloud-based infrastructure.

Title
Utilize Serverless DevOps

Learning Outcome
Use tools such as Infrastructure as Code in the Serverless Context.

Title
Certification Preparation

Learning Outcome
Partially prepared to pass the AWS Cloud Developer Associate Exam.

IS 533 - Advanced Data Communications

Course Information

Teaching Area (new)
IS

Course Number
533

Teaching Area
IS

Course Title
Advanced Data Communications

Course Description
Design, management, and strategic use of local area networks (LANs), wide area networks (WANs), intranets, and the Internet to solve business problems.

Department
Information Systems

When Taught
Fall

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Other Prerequisites
IS 404 or equivalent

Learning Outcomes

Title
Infrastructure Security Applications

Tags
175637, 3

Learning Outcome
Install, configure and secure and manage infrastructure security applications.

Title
Data Communications Competency

Tags
175639, 5

Learning Outcome
Converse competently with IT professionals who specialize in data communications. Understand and debate current data communications issues.

Title
Layer 3 Network Devices

Tags
175641, 2

Learning Outcome
Install, configure secure and manage layer 3 network devices such as routers and firewalls

Title
Layer 2 Network Infrastructure

Tags
175659, 1

Learning Outcome
Design, install and configure a secure layer 2 network infrastructure

Title
Secure Network Protocols

Tags
175676, 4

Learning Outcome
Design and configure secure network protocols.

Title
Basic Network Hardware

Tags
175708, 0

Learning Outcome
Set up and configure basic network hardware such as; cabling, switches, and routers.

IS 537 - Data Structures and Algorithms

Course Information

Teaching Area (new)
IS

Course Number
537

Teaching Area
IS

Course Title
Data Structures and Algorithms

Course Description
Programming concepts for IS majors pursuing careers in software development. Concepts include lists, stacks, queue, maps, and other structures; sorting and other algorithms; recursion; and computational complexity analysis.

Department
Information Systems

When Taught
Fall.

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Simple Requisites

Prerequisites

Type
Prerequisite

Prerequisites

Complete ALL of the following Courses:

- IS 403 - Principles of Business Programming

Learning Outcomes

Title
Essential Concepts

Tags
212732, 0, 1

Learning Outcome
Explain essential concepts in data structures and algorithms.

Title
Critical Thinking

Tags
212733, 0, 2

Learning Outcome
Develop critical thinking skills through solving programming problems.

Title
Written and Verbal Communication

Tags
212734, 0, 3

Learning Outcome
Identify the best data structure and algorithm to be used to solve a given problem and then implement and validate your solution. Be able to show that your solution is optimal with regard to specific measures of quality or suitability.

IS 540 - Spreadsheet and Database Automation Programming

Course Information

Teaching Area (new)
IS

Course Number
540

Teaching Area
IS

Course Title
Spreadsheet and Database Automation Programming

Course Description
Automating spreadsheets in Excel, interacting with password-protected web sites, writing code to conduct simulations, solving common database interface problems in Access, etc.

Department
Information Systems

When Taught
Winter

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Other Prerequisites
IS 202 or C S 142; or equivalent; or instructor's consent

Learning Outcomes

Title
Automate Repetitive Procedures in Excel

Tags
175631, 0

Learning Outcome
Automate repetitive procedures in Excel

Title
Understand Basic Programming Concepts

Tags
175658, 1

Learning Outcome
Understand basic programming concepts such as variables, arrays, procedures, conditions, and control of flow statements.

Title
Apply Programming Technology to Solve Business Problems

Tags
175689, 3

Learning Outcome
Apply programming technology to solve unstructured business problems.

Title
Build Forms for Gathering User Input

Tags
175698, 4

Learning Outcome
Build forms for gathering user input

Title
Retrieve data from internet and database servers

Tags
175703, 2

Learning Outcome
Retrieve data from internet web servers and corporate database servers.

IS 542 - Advanced Web Development

Course Information

Teaching Area (new)
IS

Course Number
542

Teaching Area
IS

Course Title
Advanced Web Development

Course Description
Web development techniques, emphasizing client-side programming, programming language details, and front-end libraries and frameworks.

Department
Information Systems

When Taught
Winter.

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Other Prerequisites
IS 403 or equivalent

Learning Outcomes

Title
Web Development

Tags
175653, 0

Learning Outcome
Design modern web application development.

Title
Programming Language

Tags
175655, 1

Learning Outcome
Program effectively in the JavaScript and/or TypeScript programming language(s) using best practices of web software engineering.

Title
Real-World Problems

Tags
175674, 5

Learning Outcome
Analyze and solve real world problems by exploring a web development framework such as Node/React as an implementation example and creating a dynamically generated website.

IS 543 - Mobile Platform Development

Course Information

Teaching Area (new)
IS

Course Number
543

Teaching Area
IS

Course Title
Mobile Platform Development

Course Description
Principles of mobile platforms. Application development for mobile platforms such as smart phones and tablets. Emphasizing best practices in user experience and programming.

Department
Information Systems

When Taught
Fall.

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Other Prerequisites
IS 413 or equivalent

Learning Outcomes

Title
Mobile Platforms

Tags
175746, 0, 0

Learning Outcome
Describe the features and upcoming trends of the common mobile platforms so that you can develop a credible and convincing mobile strategy for your organization.

Title
Human Interface Guidelines

Tags
175747, 0, 1

Learning Outcome
Discuss/explain human interface guidelines for mobile platforms generally, and the iOS platform specifically.

Title
Development Tools

Tags
175748, 0, 2

Learning Outcome
Recognize and apply tools required for iOS application development.

Title
Robust Apps

Tags
175749, 0, 3

Learning Outcome
Develop a robust iOS application.

Title
Web Services

Tags
175750, 0, 4

Learning Outcome
Design and implement a mobile application that uses a web services API.

IS 545 - Machine Learning for Business

Course Information

Course Number
545

Teaching Area
IS

Course Title
Machine Learning for Business

Course Description
This intermediate course provides students with a practical overview of machine learning techniques using Python. Emphasizing real-world applications, the course covers essential algorithms such as linear and logistic regression, decision trees, clustering, and neural networks. Students will develop skills to analyze complex business data, build predictive models, and interpret model outputs to make data-driven decisions. Students will also learn how to build recommendation engines and perform text and image processing.

Department
Information Systems

When Taught
Winter

Credit Hours

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Simple Requisites

Prerequisites

Type
Prerequisite

Prerequisites

Complete ANY of the following Courses:

- IS 315 - Introduction to Python Data Analytics (non majors)
  OR IS 505 - Introduction to Python Data Analytics (non majors)

Learning Outcomes

Title
Apply Machine Learning Algorithms to Business Problems

Learning Outcome
Select and implement machine learning algorithms for various business contexts, such as forecasting, customer segmentation, and risk assessment.

Title
Develop and Evaluate Predictive Models

Learning Outcome
Build, train, and validate machine learning models in Python, assessing model performance using metrics like accuracy, precision, and recall.

Title
Analyze and Preprocess Business Data

Learning Outcome
Utilize Python libraries to clean, preprocess, and visualize business data, preparing it for use in machine learning models.

Title
Interpret Model Outputs for Decision-Making

Learning Outcome
Translate complex model outputs into actionable insights for strategic business decisions, ensuring alignment with business goals and ethical considerations.

IS 550 - MISM Capstone Introduction

Course Information

Teaching Area (new)
IS

Course Number
550

Teaching Area
IS

Course Title
MISM Capstone Introduction

Course Description
Presentations by faculty and professionals to make students aware of the latest developments in the field. Prepare a capstone project proposal.

Department
Information Systems

When Taught
Fall

Credit Hours

Min:
1

Fixed/Max:
1

Lecture Hours

Fixed:
1

Lab Hours

Fixed:
0

Other Prerequisites
Final year in MISM.

Learning Outcomes

Title
Project planning and scheduling

Tags
175720, 2

Learning Outcome
Design a schedule for your capstone project that reflects and understanding of the overall scope of the work, the time required in each of the major phases, and the resources needed to complete the work.

Title
Developing a feasible proposal

Tags
175721, 1

Learning Outcome
Draft and clear and feasible proposal for your capstone project. Describe the business problem you trying to solve as well as the IS tools you will apply to your solution. Include a high-level design of the system you will working on.

IS 551 - User Experience Design and Technical Leadership

Course Information

Teaching Area (new)
IS

Course Number
551

Teaching Area
IS

Course Title
User Experience Design and Technical Leadership

Course Description
Leadership in a technical field, and user experience design in the context of web and mobile application development.

Department
Information Systems

When Taught
Fall

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Other Prerequisites
Admission to a Marriott School graduate program.

Learning Outcomes

Title
3. Design and implement user interfaces.

Tags
175755, 3

Learning Outcome
Using a team-based, iterative focus, design and build graphical user interfaces for Web applications. Document and present the process, end-result, and lessons learned.

Title
5. Develop a personal leadership strategy.

Tags
175756, 5

Learning Outcome
Establish and document your personal leadership strategy for a career in a technical field.

Title
1. Build the case for IT-enabled organizational change.

Tags
175757, 1

Learning Outcome
Prepare a written report building the strategic case for IT-enabled organizational change.

Title
2. Discuss technical change management with professionals.

Tags
175758, 2

Learning Outcome
Analyze actual change situations drawing on the principles of effective technical change management and leadership through discussions with professionals.

Title
4. Create a toolkit of user-centered design best practices.

Tags
175759, 4

Learning Outcome
Build a set of best practices for developing user interfaces.

IS 552 - MISM Capstone Project

Course Information

Teaching Area (new)
IS

Course Number
552

Teaching Area
IS

Course Title
MISM Capstone Project

Course Description
Development and completion of capstone project integrating information systems knowledge previously gained in the MISM program

Department
Information Systems

When Taught
Winter

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Other Prerequisites
Admission to MISM.

Learning Outcomes

Title
Contribute to Team

Tags
175679, 3

Learning Outcome
Contribute to your project team through timely communication and assume responsibility for your assigned role.

Title
Learn Consulting Tools & Techniques

Tags
175680, 0

Learning Outcome
Learn the tools and techniques used during a consulting engagement, including diagnosis, planning, and problem solving.

Title
Apply Management & IT/IS Knowledge

Tags
175682, 1

Learning Outcome
Apply many of the project management, IT/IS, teamwork, and business knowledge that you have learned in the course of your graduate education.

Title
Demonstrate Effective Oral & Written Communication

Tags
175699, 4

Learning Outcome
Demonstrate through a final written and oral report to the client that you are able to communicate effectively, both orally and in writing.

Title
Apply Management Consulting Skills

Tags
175701, 2

Learning Outcome
Apply management consulting skills to consulting situations.

IS 554 - Investigative and Forensic Data Analysis

Course Information

Course Number
554

Teaching Area
IS

Course Title
Investigative and Forensic Data Analysis

Course Description
This course develops investigative data analysis skills through a practical framework, staged inquiry, and a comprehensive project, with assignments reinforcing discussions to build both a forensic mindset and strong analytical abilities.

Department
Information Systems

When Taught
Fall

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Learning Outcomes

Title
Analytical Process

Learning Outcome
Articulate and follow a structured investigative analytical process.

Title
Data Modeling

Learning Outcome
Build complex data models that incorporate multiple logic paths.

Title
Findings & Reporting

Learning Outcome
Produce well-developed findings and communicate them effectively in reports.

Title
Documentation

Learning Outcome
Create clear, well-organized supporting documentation.

IS 555 - Data Science Workflows for Organizations

Course Information

Teaching Area (new)
IS

Course Number
555

Teaching Area
IS

Course Title
Data Science Workflows for Organizations

Course Description
End-to-end data science workflows using R, with a focus on strategy, team management, and real-world experience. Students will become thoughtful, detail-oriented, utility-focused data professionals who appreciate the grit required to deliver real-world, meaningful value through data assets.

Department
Information Systems

When Taught
Winter

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Simple Requisites

Prerequisite

Type
Prerequisite

Prerequisite

Complete ALL of the following Courses:

- IS 455 - Predictive AI in Business (Machine Learning Foundations)
  OR IS 505 - Introduction to Python Data Analytics (non majors)

Learning Outcomes

Title
Collaborate

Tags
175691, 0, 1

Learning Outcome
Collaborate in a team setting to effectively create, evaluate, maintain, and update an end-to-end machine learning model pipeline that produces value in the problem space

Title
Methods

Tags
175628, 0, 0

Learning Outcome
Assemble, store, manipulate, visualize, and refresh a real-world dataset that informs a meaningful problem space

Title
Ethics

Tags
175685, 0, 2

Learning Outcome
Identify (and be conversational about) sources of bias, performance issues, and ethical and regulatory considerations, and explain how these will affect stakeholders and others.

Title
Evaluate

Learning Outcome
Defend model choice in terms of algorithm, validity, performance, and practical relevance to both data-savvy and non-technical stakeholders

IS 556 - Data Engineering

Course Information

Course Number
556

Teaching Area
IS

Course Title
Data Engineering

Course Description
Learn modern data engineering by designing pipelines, building APIs, and managing data across storage systems—gaining hands-on experience with technologies and mastering the full ETL lifecycle in a data warehouse.

Department
Information Systems

When Taught
Winter

Credit Hours

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Learning Outcomes

Title
Understand the key processes involved in data engineering

Learning Outcome
Explain the fundamental role of data engineering within a broader technology strategy and chart a clear data engineering career path.

Title
Design and implement efficient data pipelines

Learning Outcome
Demonstrate familiarity with the standard technologies, platforms, and tools used to accomplish data ingestion, storage, and orchestration in a data engineering context

Title
Design and implement a modern data warehouse

Learning Outcome
Using code-based ETL tools, demonstrate how to design, implement, and collaborate on a data warehouse that follows current industry best-practices

Title
Build and deploy robust APIs

Learning Outcome
Demonstrate how to build, document, and deploy a state-of-the-art API endpoint

IS 560 - Information Security Management.

Course Information

Teaching Area (new)
IS

Course Number
560

Teaching Area
IS

Course Title
Information Security Management.

Course Description
How technology, organizations, and people interact to create secure information systems. Topics include data encryption, physical security, information security policies, and security awareness and training.

Department
Information Systems

When Taught
Fall

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Other Prerequisites
I Sys 404 or equivalent.

Learning Outcomes

Title
Learning Methods of Attack Prevention and Detection

Tags
175645, 2

Learning Outcome
To learn modern methods of attack prevention and detection: antivirus, firewalls, intrusion detection, and system hardening

Title
Working Knowledge of Methods of Protecting Data

Tags
175652, 0

Learning Outcome
To gain a working knowledge of modern methods of protecting data: encryption, hashing, confidentiality, authentication, integrity, non-repudiation, certificates, and IP security.

Title
Familiarity with Attack Vectors

Tags
175688, 1

Learning Outcome
To become familiar with attack vectors that are commonly executed in attempting to access and compromise or steal data

Title
Learn Methods of Threat Modeling

Tags
175706, 3

Learning Outcome
To learn state-of-the-art methods of threat modeling.

IS 562 - Information Systems Product Management

Course Information

Teaching Area (new)
IS

Course Number
562

Teaching Area
IS

Course Title
Information Systems Product Management

Course Description
Product management techniques from gathering requirements, choosing a solution, and planning its implementation.

Department
Information Systems

When Taught
Fall and Winter

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Other Prerequisites
Admission to a Marriott School graduate program.

Learning Outcomes

Title
Define a problem

Tags
213924, 0, 1, 2023-08-29 09:40:39

Learning Outcome
Perform qualitative and quantitative research to understand and define problems

Title
Plan a solution

Tags
213925, 0, 2, 2023-08-29 09:40:42

Learning Outcome
Ideate, prototype, and test a solution and make a plan to implement it

IS 565 - Digital Forensics for Organizations

Course Information

Teaching Area (new)
IS

Course Number
565

Teaching Area
IS

Course Title
Digital Forensics for Organizations

Course Description
Digital forensics from an organizational perspective, covering the three functions of digital forensics performed by businesses: employee abuse investigations, incident response, and electronic discovery.

Complete ANY of the following Courses:

- IS 414 - Information Systems Security and Controls
  OR CYBER 366 - Defensive Cybersecurity
  OR C S 465 - Computer Security

Fee
200

Learning Outcomes

Title
Digital Evidence

Tags
175651, 0, 0

Learning Outcome
Properly acquire, analyze, and interpret digital evidence.

Title
Threat intelligence

Tags
175681, 0, 1

Learning Outcome
Leverage intelligence and threat detection techniques.

Title
Vulnerabilities

Tags
175629, 0, 2

Learning Outcome
Identify, address, and recommend preventative measures for vulnerabilities.

Title
Incident response

Tags
175644, 0, 3

Learning Outcome
Effectively respond to and recover from incidents.

Title
Communicate findings

Tags
212192, 0, 4

Learning Outcome
Communicate findings to various stakeholders

IS 566 - Advanced Database Management

Course Information

Teaching Area (new)
IS

Course Number
566

Teaching Area
IS

Course Title
Advanced Database Management

Course Description
This course explores advanced concepts in database management systems, focusing on complex database architectures, data modeling, and performance optimization. Topics include transaction management, distributed databases, data warehousing, and advanced SQL programming. Through practical applications and case studies, students will gain hands-on experience in designing, managing, and optimizing large-scale databases, with an emphasis on scalability, reliability, and security.

Prerequisite

Prerequisites

Complete ALL of the following Courses:

- IS 402 - Database Systems

Learning Outcomes

Title
Design and Implement Complex Database Solutions

Learning Outcome
Apply advanced data modeling techniques to design robust databases for complex applications, ensuring data integrity and scalability.

Title
Optimize Database Performance

Learning Outcome
Analyze and optimize database performance using indexing, query optimization, and transaction management strategies.

Title
Manage Distributed and NoSQL Databases

Learning Outcome
Demonstrate proficiency in managing distributed and NoSQL databases, addressing data consistency and replication challenges.

Title
Ensure Data Security and Integrity

Learning Outcome
Implement security protocols and access control measures to safeguard data, applying best practices in database security and compliance.

IS 567 - Cybersecurity and Penetration Testing

Course Information

Teaching Area (new)
IS

Course Number
567

Teaching Area
IS

Course Title
Cybersecurity and Penetration Testing

Course Description
Advanced computer systems security, vulnerabilities and exploits, system and network attacks, ethical hacking and penetration testing. Also cyber security, cyber weapons, and advanced persistent threats along with legal and regulatory requirements for security and privacy.

Learning Outcomes

Title
Cybersecurity Assessments

Tags
214697, 0, 1

Learning Outcome
Plan and conduct cybersecurity assessments, including penetration tests and risk evaluations, using standard methodologies.

Title
Legal and Ethical Behavior

Tags
214698, 0, 2

Learning Outcome
Apply legal and ethical principles while adopting an attacker's perspective to identify and exploit system vulnerabilities responsibly.

Title
Tools & Techniques

Tags
214699, 0, 3

Learning Outcome
Select and use appropriate tools to perform reconnaissance, scanning, exploitation, and post-exploitation tasks. Analyze and interpret results to guide next steps and achieve assessment objectives.

Title
Communicate Results and Remediation

Tags
214700, 0, 4

Learning Outcome
Create professional reports and presentations that clearly communicate technical findings, risks, and recommendations to both technical and non-technical audiences.

Title
Teamwork and Project Management

Learning Outcome
Collaborate effectively in a team to plan, execute, and present a cybersecurity project.

Title
Character Development

Learning Outcome
Become more like our Savior by engaging in reflective practices to foster growth in key character areas such as curiosity, persistence, and effective communication.

Prerequisites

Complete ALL of the following Courses:

- IS 571 - Introduction to Academic Research in Information Systems

Other Prerequisites
Instructor's consent.

Recommended
Stat 121

Learning Outcomes

Title
Expose Students to Leading Theory in IS

Tags
175635, 3

Learning Outcome
To expose students to some of the leading rigorous theory in IS.

Title
Teach Students Process of Science & Theory-based IS Research

Tags
175643, 0

Learning Outcome
To teach potential IS Ph.D. students about the process of science and theory-based IS research.

Title
Provide Real-life Academic Research Experience

Tags
175683, 2

Learning Outcome
To provide students with real-life academic research experience with a real project.

Title
Help Students Learn Forms of IS Research

Tags
175710, 1

Learning Outcome
To help potential IS Ph.D. students learn about various forms of Information Systems (IS) research.

IS 581 - Managing a Software Startup

Course Information

Teaching Area (new)
IS

Course Number
581

Teaching Area
IS

Course Title
Managing a Software Startup

Course Description
Focuses on managing the people, processes, and infrastructure that promote a scalable, sustainable, and sellable software product. Additional focus on decisions faced by the chief technology officer, tech founder, or other tech lead in helping build a new venture. Gain practical managerial and technical experience utilizing a lean-startup approach to implement a tech strategy and architecture for a software startup. Major topics include managing product innovation, managing the dev methodology, managing tech team, designing architecture, managing security, and supporting sales.\n

Learning Outcomes

Title
Explain Roles

Tags
214701, 0, 1

Learning Outcome
Students will be able to discuss the responsibilities of CTOs, tech leaders, and tech founders for software startups

Title
Methods

Tags
214702, 0, 2

Learning Outcome

Students will be able to organize and manage the development methodology in a startup

Title
Collaboration

Tags
214703, 0, 3

Learning Outcome

Students will be able to explain techniques to manage a tech team and culture in a collaborative development environment

Title
Design

Tags
214704, 0, 4

Learning Outcome

Students will be able to design a robust, scalable, and reliable architecture for a commercial software product

Title
Security

Tags
214705, 0, 5

Learning Outcome

Students will be able to assess and manage the security in a software startup

Title
Market

Tags
214706, 0, 6

Learning Outcome

Students will be able to appropriately engage in Marketing / Sales as a Tech Lead

IS 582 - Tech Strategy and Leadership

Course Information

Teaching Area (new)
IS

Course Number
582

Teaching Area
IS

Course Title
Tech Strategy and Leadership

Course Description
Explores responsibilities and career paths of senior IT leaders. Topics include leadership, strategy, cost of IT, value of IT, etc. Instructional delivery consists of lectures, case discussions, student presentations, and in-class exercises. \n \n

Department
Information Systems

When Taught
Winter

Title
Career paths

Tags
214694, 0, 1

Learning Outcome

Students will be able to explain the career paths of senior IT executives

Title
Decision Making

Tags
214695, 0, 2

Learning Outcome

Students will apply decision making frameworks specific to the different areas of concern for senior IT management

Title
Strategic Approaches

Tags
214696, 0, 3

Learning Outcome

Students will develop strategic approaches to the use of IT in business for operational excellence and competitive advantage

IS 585R - Healthcare Research Hub

Course Information

Teaching Area (new)
IS

Course Number
585R

Teaching Area
IS

Course Title
Healthcare Research Hub

Course Description
Collaborate with faculty, students, and industry partners around the world on healthcare research. Generate knowledge on relevant healthcare industry topics based on rigorous academic research partnered with industry leaders.

Department
Information Systems

When Taught
Fall and Winter

Credit Hours

Min:

Learning Outcomes

Title
Investigate Healthcare Problems with Data

Learning Outcome
Investigate current healthcare-related problems using real data.

Title
Compose Research

Learning Outcome
Compose healthcare-related research papers based on current healthcare industry dilemmas.

Title
Present Research

Learning Outcome
Present research using the information and data collected and researched throughout the course.

IS 588 - Healthcare Industry Dynamics

Course Information

Teaching Area (new)
IS

Course Number
588

Teaching Area
IS

Course Title
Healthcare Industry Dynamics

Course Description
A broad study of the many interconnected components of the healthcare industry, including medical technology, pharmaceuticals, hospital administration, healthcare policy, insurance, public health, etc. Introductory applications of various functional skills to healthcare (e.g., accounting, data analytics, ethics, finance, human resources, information systems, marketing, operations, organizational behavior, strategy, supply chain management, and other specializations).

Learning Outcome
Become familiar with the major intellectual and artistic traditions of Italy from the Baroque Period to modern times by identifying the chronology and main characteristics of each period listed in the syllabus.

Title
Form, Composition, and Meaning in the Arts

Tags
192192, 3

Learning Outcome
Apply critical concepts, theory, and history to the texts, music, artifacts, and works of art listed in the syllabus to discover, interpret, and evaluate their multiple meanings.

Title
Critical and Aesthetic Judgment

Tags
192193, 5

Learning Outcome
Develop critical skills and informed aesthetic judgment to discuss and analyze the music, architecture, and works of art listed in the syllabus, paying particular attention to their historical or social setting and their place in shaping culture.

Title
Research and Effective Communication in Italian

Tags
192361, 7

Learning Outcome
Locate and evaluate resources relevant to course assignments and apply appropriate methods of investigation (e.g., formulate hypotheses, make valid arguments, use evidence, cope with ambiguity, evaluate competing interpretations), and communicate findings coherently both orally and in writing.

Teaching Area
ITAL

Course Title
Multicultural Italy

Course Description
Examination of the seismic cultural changes occurring in contemporary Italy through the literature that has been produced by and about migrants entering Europe since the 1990s. How this growing field of literature both charts and contributes to the re-definition of the nation occurring in Italy. Students will analyze literature by migrant authors in several genres - autobiography, short story, poetry, theater, and novels (including a comic murder mystery) - through the theoretical lenses of post-colonialism and feminism in order to confront the issues of racism, national and individual identity construction, and the concept of "otherness."

Prerequisites

Complete ALL of the following Courses:

- JAPAN 301 - Japanese Reading and Culture

Note
Offered by BYU Independent Study; enroll anytime throughout the year; one year to complete; additional tuition required; register at is.byu.edu.

Learning Outcomes

Title
Communication

Tags
211699, 0, 1

Learning Outcome
Based on readings at an intermediate-high level, students will be able to use Japanese at a level approach advanced to narrate and describe key concepts in Japanese history and culture. Students will be able to discuss these topics extensively in conversational settings using detailed and precise language, and to write about them in short essays. Students will also be able to articulate how their communication abilities enable them to contribute meaningfully to personal and professional communities.

Title
Cultural Navigation

Tags
211700, 0, 2

Learning Outcome
Based on readings and in-class discussions, students will demonstrate an understanding of Japanese values and perspectives by describing foundational events in Japanese history and key concepts of Japanese culture. Students will also be able to articulate how such understandings enable them to handle culturally and linguistically diverse situations, encourage greater unity and belonging among all of God's children.

Learning Outcomes

Title
Analyzing Japanese Grammar

Tags
189442, 0, 1, 2021-11-03 10:14:18

Learning Outcome
Students will be able to identify correct use of major parts of speech in Japanese including nouns, verbs, adjectives, particles, auxiliaries, and honorifics. They will also be able to explain fundamental aspects of formal Japanese grammar including subjects and topics, tense and aspect, transitivity, case marking, embedded sentences, passives, and causatives.

Title
Applying linguistic theory

Tags
208327, 0, 1, 2021-11-03 10:14:18

Learning Outcome
Students will be able to use formal theories and principles from Japanese linguistics to determine the grammaticality of Japanese sentences, to correct common learner errors, and to improve the complexity of sentences they are able to produce in Japanese.

Title
Developing professional competencies

Tags
189443, 0, 2, 2021-11-03 10:14:18

Learning Outcome
Students will be able to articulate how knowledge and analysis of formal Japanese grammar helps to make sense of new information, communicate more effectively, and strengthen bonds among all of God's children.

Prerequisites

Complete ALL of the following Courses:

- JAPAN 302 - Readings in Japanese History and Culture

Learning Outcomes

Title
Appropriate use of Japanese in Context

Tags
189445, 0, 1

Learning Outcome
Students will be able to use theories from pragmatics and sociolinguistics to explain appropriate and inappropriate use of Japanese in a variety of common social contexts including popular media, formal informational presentations, informal interactions, and institutional settings. These explanations will show sensitivity to the importance of both linguistic correctness and cultural appropriateness.

Title
Analyzing Japanese conversations

Tags
189446, 0, 2

Learning Outcome
Students will be able to analyze natural conversations to generate evidence-based descriptions of

how meaning is created in context by linguistic elements such as honorifics, sentence-final particles, epistemic markers, and affective markers,
how Japanese conversations are interactionally organized, including turn-taking and turn-response, and
how Japanese users sequentially structure common social actions such as thanking, apologizing, requesting, and inviting.

Title
Intercultural communication and interaction

Tags
208328, 0, 3

Learning Outcome
Students will be able to identify common areas of miscommunication between Americans and Japanese, and articulate important cultural assumptions and perspectives that contribute to them. Through this, they will develop a more informed awareness of linguistic and cultural diversity, including how such diversity supports our common identity as Children of God and Disciples of Christ.

Prerequisites

Complete ALL of the following Courses:
- KICHE 201 - Second-Year Language Study: K'iche

Note
Teacher may waive prerequisite based on prior experience. Culminating course for GE Languages of Learning requirement. Not an entry course for returned missionaries

Learning Outcomes

Title
Communication Skills

Tags
196543, 1

Learning Outcome
In both written and spoken target language, communicate with reasonable accuracy about real-world activities with well-educated members of the target-culture accustomed to dealing with non-native speakers.

Title
Comprehension

Tags
196545, 2

Learning Outcome
Understand every-day written and verbal instructions. Comprehend concrete details and global meaning of intermediate-level written and spoken passages related to familiar topics that native speakers encounter routinely in their daily life.

Title
Cultural Knowledge

Tags
196546, 3

Learning Outcome
Discuss in the target language cultural practices related to every-day life in the target culture. Acquire basic background knowledge of important achievements related to the target culture (historical figures and events, major literary and artistic movements, government and religious institutions, etc.).

Title
General Education Requirements

Tags
196547, 4

Learning Outcome
Complete Languages of Learning and Global & Cultural Awareness for General Education.

Instructor's consent.

Learning Outcomes

Title
Defined Special Purpose

Tags
196550, 1

Learning Outcome
Develop the overall language and cultural competence to meet the needs of a "special" purpose identified by the Center for Language Studies.

Title
Communication

Tags
196553, 2

Learning Outcome
Communicate effectively enough to function in a variety of situations likely to be encountered when dealing with native speakers associated with the special purpose. This may include interpersonal, interpretive, and presentational (written and oral) modes of communication.

Title
Cultural Competence

Tags
196555, 3

Learning Outcome
Interact with cultural competence and understanding when dealing with native speakers associated with the special purpose.

Learning Outcome
Communication: I can know the audience(s) for my writing, appreciate nuances in words and ideas (i.e. specialized vocabulary and terminology), and be conscious of form and conventions. Navigate Cultures: I can possess a deeper understanding of the Korean experience and evolving national identity, informed by such things as language, history, art, and cultural traditions and practices. Information Literacy: I can assess and interpret information to pose or solve a problem and follow the rules of a community in the citation of my sources, recognizing that such behavior confers some measure of reliability and legitimacy.

4

Lab Hours

Fixed:
0

Other Prerequisites
Admission to law school

Learning Outcomes

Title
Rules and Standards

Tags
200294, 1

Learning Outcome
Understand the distinction between bright line “rules” and more general “standards” like reasonableness.

Title
Counter-arguments

Tags
200349, 5

Learning Outcome
Develop greater ability to offer counter-arguments and dissect claims and assertions regarding a particular law or policy.

Title
Critical Thinking

Tags
200373, 7

Learning Outcome
Be able to think critically about competing approaches to compensating persons who suffer injuries in our society.

Title
Reading Judicial Opinions

Tags
200425, 0

Learning Outcome
Learn how to read judicial opinions with an eye on the relationship between a case’s procedural posture and its substantive outcome.

Title
Common Legal Arguments

Tags
200571, 3

Learning Outcome
Recognize common legal arguments such as efficiency, fairness, distributional, precedent, slippery slope, problematic incentives, etc.

Title
Basic Understanding

Tags
200626, 6

Learning Outcome
Gain a basic understanding of the law of torts (personal injury), including the basic elements of, and defenses to, intentional torts, negligence, and strict liability.

Title
Roles

Tags
200628, 2

Learning Outcome
Have a greater understanding of the relative roles of jury, trial court and appellate court, particularly including the distinction between questions of law and fact and the concept of a standard of review.

Title
Differences

Tags
200644, 4

Learning Outcome
Understand the difference between the common law, statutes, and constitutional law.

LAW 510 - Contracts

Course Information

Teaching Area (new)
LAW

Course Number
510

Teaching Area
LAW

Course Title
Contracts

Course Description
Examination of the promises enforced by law, and the nature of the protection given. Inquiry made into the formation, performance, and discharge of contracts; their assignment, termination, and modification; and the variety, scope, and limitations on remedies. Attention will be given to Article 2 of the Uniform Commercial Code.

When Taught
Contact Department

Credit Hours

Min:
4

Fixed/Max:
4

Lecture Hours

Fixed:
4

Lab Hours

Other Prerequisites
Admission to law school

Note
For Law students only.

Learning Outcomes

Title
Contract Enforcement

Tags
200260, 2

Learning Outcome
Students will be able to determine the steps necessary to enforce a contract.

Title
Defenses

Tags
200531, 5

Learning Outcome
Students will understand basic defenses to contract formation and enforcement and identify facts that support such defenses.

Title
Equitable Remedy

Tags
200586, 4

Learning Outcome
Students will understand how to obtain an equitable remedy or calculate damages.

Title
Contract interpretation

Tags
200645, 1

Learning Outcome
Students will be able to interpret a contract.

Title
Breach of Contract

Tags
200650, 3

Learning Outcome
Students will be able to recognize an anticipatory repudiation and a breach of contract.

Title
Enforceable Promise

Tags
200673, 0

Learning Outcome
Students will be able to apply the legal requirements to create an enforceable promise based on:a. offer, acceptance, consideration, and satisfaction of the statute of frauds,b. promissory estoppel, orc. quasi-contract and moral obligation theories.

LAW 515 - Civil Procedure

4

Fixed/Max:
4

Lecture Hours

Fixed:
4

Lab Hours

Fixed:
0

Other Prerequisites
Admission to law school

Learning Outcomes

Title
Legal Analysis and Reasoning

Tags
200258, 1

Learning Outcome
Students will develop and in class will practice by class Socratic discussion and case briefing skills of good legal analysis, reasoning, problem solving, and advocacy.

Title
Effective Communication

Tags
200414, 3

Learning Outcome
Students will be able to communicate effectively regarding civil procedure issues orally (in class) and in writing (on the final exam and any possible short-report assignment).

Title
Civil Procedure Issues

Tags
200459, 4

Learning Outcome
Students will be able to recognize and address issues that arise in Civil Procedure that implicate relevant ethical, moral, and religious principles.

Title
Basic Research

Tags
200511, 2

Learning Outcome
Students will know how to perform basic research regarding issues concerning the Federal Rules of Civil Procedure.

Title
Fundamental Principles

Tags
200562, 0

Learning Outcome
Students will understand the fundamental principles of American Civil Procedure including the rules, principles, and statutes governing the assertion of jurisdiction (subject matter jurisdiction and jurisdiction over the person or thing), the basic elements, principles and requirements of the Federal Rules of Civil Procedure (including pleadings, parties, motions, discovery, etc.), a few variations on or from those rules in state procedural practices, basic American principles of judgment recognition and judgment (primarily claim and issue preclusion rules), and the basic principles of the Erie doctrine regarding application of state laws and rules in federal court.

Title
Dispute Resolution

Tags
200592, 5

Learning Outcome
Students will understand the value and use of non-adversary alternative dispute resolution procedures and their integration with and use in resolving disputes concerning procedural rules, discovery, etc.

Title
Lifelong Learning

Tags
200647, 6

Learning Outcome
Students will increase their ability and desire to engage in lifelong learning and service in their application, practice and use of the rules of civil procedure.

LAW 520 - Property

Learning Outcomes

Title
Perspectives

Tags
200307, 6

Learning Outcome
Appreciate the significance of property law from various perspectives, including economic efficiency, underprivileged, and feminist perspectives.

Title
Foundational Concepts

Tags
200336, 0

Learning Outcome
Students will receive an introduction to the most foundational concepts in property law.

Title
Case Interpretation

Tags
200366, 3

Learning Outcome
Learn to interpret cases in a common law system.

Title
Technical Rules

Tags
200374, 7

Learning Outcome
Develop skills for applying technical rules of property transfer.

Title
Legal Rules

Tags
200481, 4

Learning Outcome
Learn to understand, formulate and question legal rules using public policy analysis.

Title
Analytical Skills

Tags
200524, 1

Learning Outcome
Students will develop analytical skills required of law students and lawyers.

Title
Prediction

Tags
200594, 5

Learning Outcome
Develop ability to predict arguments and outcomes in scenarios where legal rules are not fully resolved.

Title
Self-directed Learner

Tags
200601, 2

Learning Outcome
Students will become self-directed learners of the law.

LAW 525 - Criminal Law

Other Prerequisites
Admission to law school

Learning Outcomes

Title
Theories of Constitutional Interpretation

Tags
200443, 1

Learning Outcome
Students will appreciate the competing theories of constitutional interpretation.

Title
Allocation of Governmental Authority

Tags
200567, 0

Learning Outcome
Students will have a thorough understanding of the Constitution’s allocation of governmental authority and of the powers and limitations of each of the three branches of government.

Title
Principles of Federalism

Tags
200642, 2

Learning Outcome
Students will be able to demonstrate knowledge of the principles of federalism and an understanding of the role of the States in our constitutional scheme.

LAW 535 - Legislation and Regulation

Course Information

Teaching Area (new)
LAW

Course Number
535

Teaching Area
LAW

Course Title
Legislation and Regulation

Course Description
Introduction to lawmaking in the modern statutory and administrative state. Examining the way Congress and administrative agencies adopt binding rules of law (statues and regulations, respectively) and the way the implementing institutions - courts and administrative agencies - interpret and apply these laws. Considering the theories and justifications behind modern legislative and regulatory behavior, the incentives that influence the behavior of various actors, and the legal rules that help structure the relationships among Congress, the agencies, and the courts.

When Taught
Winter

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Identify and describe the constitutional rules and doctrines that protect core individual liberties and fundamental rights

Title
Learn Rules Guaranteeing Equal Treatment

Learning Outcome
Identify and describe the constitutional rules and doctrines that guarantee equal treatment for all of God's children, regardless of race, sex, and other personal attributes

Title
Apply Rules to Facts

Learning Outcome
Apply these rules and doctrines to specific factual situations and assess the competing arguments for and against specific individual rights' claims under the Constitution

Title
Apply Tools of Interpretation

Learning Outcome
Identify and apply tools of constitutional interpretation to make arguments about individual rights and liberties

Title
Assess Policy Implications

Learning Outcome
Assess the policy and normative implications of the Constitution's rights and liberties

Title
Identify Divinely-Inspired Principles

Learning Outcome
Identify the divinely-inspired principles reflected in the Constitution's rights and liberties provisions, including the Constitution's commitment to equal justice and human dignity

Title
Discuss Sensitive Questions

Learning Outcome
Discuss sensitive constitutional and legal questions about faith, family, religion, race, and gender in a rigorous and faith-based environment

LAW 545 - Introduction to Legal Research and Writing

Course Information

Teaching Area (new)
LAW

Course Number
545

Teaching Area
LAW

Course Title
Introduction to Legal Research and Writing

Course Description
Introduction to tools and techniques essential to law practice and legal scholarship: legal analysis, research using print sources, and objective writing. Student will write three predictive office memoranda based on library research and complete a series of legal research quizzes and a legal research final exam.

When Taught
Contact Department

Other Prerequisites
Admission to law school

Note
For Law students ONLY.

Learning Outcomes

Title
Fact Pattern

Tags
200382, 3

Learning Outcome
Identify legal issues and relevant facts from a fact pattern.

Title
Reasoning

Tags
200406, 2

Learning Outcome
Identify and articulate the reasoning behind a rule and its application as explained within a court opinion.

Title
Research Skills

Tags
200429, 0

Learning Outcome
Identify legal sources in various formats and understand how each contributes to legal research, devise a research strategy, and conduct effective, efficient, and thorough research

Title
Citations

Tags
200445, 6

Learning Outcome
Properly cite to a legal authority.

Title
Communication

Tags
200489, 5

Learning Outcome
Communicate in “plain English” to avoid legalese, unnecessary jargon, and other styles that call attention to the writing itself or in other ways obscure or detract attention from your meaning.

Title
Legal Rules

Tags
200557, 1

Learning Outcome
Identify legal rules and principles from a series of cases, synthesize the individual rules or principles into a complete rule, break the synthesized rule down into its component parts, and explain the relationship between them.

Title
Write a Proof

Tags
200665, 4

Learning Outcome
Write a complete and coherent proof of a conclusion of law that gives the reader the conclusion, states the rules that govern that conclusion, explains and analyzes those rules and shows how they operate, and applies them to the facts of your case.

LAW 546 - Introduction to Advocacy

Course Information

Teaching Area (new)
LAW

Course Number
546

Teaching Area
LAW

Course Title
Introduction to Advocacy

Course Description
Focuses on appellate legal writing and oral advocacy. Student will prepare an appellate brief and orally argue the case. Also includes training for online legal databases and introduction to administrative law and legislative history research.

When Taught

Complete ALL of the following Courses:

- LAW 545 - Introduction to Legal Research and Writing

Other Prerequisites
Admission to law school.

Learning Outcomes

Title
Fundamentals

Tags
200342, 0

Learning Outcome
Students will learn the fundamentals of legal research, writing, and analysis, and will produce high quality legal documents, including an appellate brief, and revise your own and critique classmates’ work.

Title
Citations

Tags
200350, 9

Learning Outcome
Properly cite to a legal authority.

Title
Communication

Tags
200375, 8

Learning Outcome
Communicate in “plain English” to avoid legalese, unnecessary jargon, and other styles that call attention to the writing itself or in other ways obscure or detract attention from your meaning.

Title
Fact Statement

Tags
200405, 11

Learning Outcome
Identify determinative, contextual, and coincidental facts from a fact pattern, and arrange the necessary facts into a logical and objective fact statement.

Title
Legal Research

Tags
200431, 2

Learning Outcome
Complete effective, efficient, and thorough legal research.

Title
Legal rules

Tags
200502, 1

Learning Outcome
Identify legal rules and principles from a series of cases, synthesize the individual rules or principles into a complete rule, break the synthesized rule down into its component parts, and explain the relationship between them.

Title
Reasoning

Tags
200520, 3

Learning Outcome
Identify and articulate the reasoning behind a rule and its application as explained within a court opinion.

Title
Appellate Brief

Tags
200547, 12

Learning Outcome
For the Appellate Brief thespecific learning outcomes are:to formulate a persuasive, critical legal theory limited to the legal and factual issues identified by the Court in its Orderto identify, understand, and apply the correct standard of appellate review in this caseto analyze and synthesize the relevant authority in light of the facts of the caseto criticize and synthesize the legal argument of the opposing side and to develop your argument in response to the opposing sideto devise and implement a coherent and effective research strategyto correctly attribute and cite legal authorityto demonstrate professional style, grammar, and organizationto edit another associate's work and receive critique of your own work

Title
Oral Argument

Tags
200575, 13

Learning Outcome
For the Oral Argument the specific learning outcomes are:to understand the process and procedure for an appellate oral argumentto know how to speak publicly so your judicial audience will understand.to develop analytical listening and observation skills.to be able to construct, organize, and deliver an effective appellate oral argumentto be able to answer questions from judges about the substance of the argument, underlying legal principles, and application to hypothetical fact scenarios

Title
Strengths & Weaknesses

Tags
200578, 10

Learning Outcome
Identify organizational, analytical, and communication strengths and weaknesses within another author’s work.

Title
Results

Tags
200599, 6

Learning Outcome
Apply the reasoning drawn from precedent cases to the facts of your case to show your reader why and how that reasoning should lead to the same or a different result.

Title
Analogies & Distinctions

Tags
200615, 5

Learning Outcome
Draw meaningful analogies or make relevant distinctions between the facts of precedent cases and the facts of your client’s case.

Title
Conclusion of Law

Tags
200633, 4

Learning Outcome
Write a complete and coherent proof of a conclusion of law that shows your reader the conclusion you predict, states the rules that govern that conclusion, explains and analyzes those rules and shows how they operate, and applies them to the facts of your case.

Title
Legal Issues

Tags
200666, 7

Learning Outcome
Identify legal issues from a fact pattern, and devise and implement a research strategy to locate authority you need to solve the problem.

Learning Outcomes

Title
Job Search Strategy

Tags
200271, 2

Learning Outcome
Students will develop the skills to create and implement a job search strategy, including enhancing interviewing skills and creating professional marketing materials.

Title
Successful Job Search

Tags
200530, 0

Learning Outcome
Students will be able to understand, explain and utilize the tools to implement a successful job search.

Title
Networking

Tags
200539, 3

Learning Outcome
Students will develop networking skills through class instruction and by providing networking opportunities.

Title
Career Path

Tags
200573, 1

Learning Outcome
Students will be able to determine their career path, including self evaluation and career identification.

Title
Professionalism

Tags
200608, 4

Learning Outcome
Students will be able to understand, explain and utilize the tools that enhance professionalism and develop professional etiquette skills.

LAW 553 - 1L Academies

Course Information

Course Number
553

Teaching Area
LAW

Course Title
1L Academies

Course Description
This course is an experiential capstone to the 1L Professional Development series. Students will travel to participate in an intensive exploration of an area of law led by BYU faculty and hosted by a law firm with relevant expertise.

Department
Law School

When Taught
Winter

Credit Hours

Min:
0.5

Fixed/Max:
1

Other Prerequisites
Law 552 Fall and Winter Semester

Learning Outcomes

Title
Career planning

Learning Outcome
Students will gain insight into a specific practice area that will inform career decisions related to their 2L summer and beyond.

Title
Practical application

Learning Outcome
Students will see the connection between the 1L Professional Development Series (along with their academic classes) and the skills and attributes needed to succeed in practice.

Title
Networking skills

Learning Outcome
Students will learn how to navigate different types of networking settings through law firm receptions, panel discussions, lunches, and other interactions with law firm attorneys.

Title
Practice area exposure

Learning Outcome
Students will receive training in a particular field and see firsthand the type of work attorneys in that field do.

Title
Geographic exposure

Learning Outcome
Students will learn what life is like in a given city or region by engaging with locals.

Title
Professional expectations

Learning Outcome
Students will increase understanding of professional norms and obligations in a big law setting and/or particular practice area.

Learning Outcome
1. Describe the services offered by the Life Sciences Student Services and when those services might be applied to your circumstances.2. Describe your understanding of what advising is and how you might benefit from the regular use of it.3. Design a curriculum plan to meet your career goals in the eight or nine semesters you have to graduate from BYU. Be able to articulate why this is important to you, the university, and other students.4. Demonstrate the ability to utilize MYMAP by organizing your major and general education courses for next semester.5. Articulate your personal and educational goals as you understand them this semester.6. Define proper classroom etiquette, and identify behaviors in your paragraph that show respect for faculty and presenters.7. Become acquainted with either an academic advisor or a faculty member this semester by visiting them at least three times.8. Deconstruct or evaluate high school learning strategies.9. Evaluate at least two majors in the College of Life Sciences that interest you by describing the discipline, the learning outcomes, courses required, and possible careers or post-graduate opportunities. If you have learned that none of our majors fit you, explain why.10. Describe the various university resources and what services they have for students.11. Describe BYU's unique campus culture.

Learning Outcome
Complete basic syntactic analyses using knowledge ofparts of speechconstituent structuregrammatical relations

Title
Terminology and Formalisms

Tags
198226, 2

Learning Outcome
Describe the results of analyses using appropriate terminology and formalisms.

Title
Basic Morphological Analysis

Tags
198290, 1

Learning Outcome
Complete basic morphological analyses using knowledge ofbasic word formation processesthe distinction between inflection and derivation and common inflectional categoriesproperties of the interfaces of morphology with phonology and syntax

LING 230 - Meaning in Language

Course Information

Teaching Area (new)
LING

Course Number
230

Teaching Area
LING

Course Title
Meaning in Language

Course Description
Introduction to the analysis of meaning in words, grammar, and discourse.

Department
Linguistics

When Taught
Fall and Winter; Spring: Contact Department

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Simple Requisites

Prerequisites

Type
Prerequisite

Prerequisites

Complete ALL of the following Courses:

- LING 201 - Introduction to Linguistics (Modern)

Learning Outcomes

Title
Application of Semantic and Pragmatic Procedures

Tags
198075, 0

Learning Outcome
Conduct semantic and pragmatic analyses and explications of natural human language at the lexical, grammatical, discourse and metaphorical levels applying a variety of semantic and pragmatic analytical procedures

Title
Semantic and Pragmatic Theories

Tags
198139, 1

Learning Outcome
Critique contemporary approaches to semantic and pragmatic analyses by becoming familiar with semantic and pragmatic theories.

Title
Writing about Meaning

Tags
198161, 2

Learning Outcome
Argue for a particular semantic or pragmatic explication through producing papers and project reports.

LING 240 - Linguistic Tools 1

Course Information

Teaching Area (new)
LING

Course Number
240

Teaching Area
LING

Course Title
Linguistic Tools 1

Course Description
Introduction to quantitative and qualitative research methods in linguistics.

Department
Linguistics

When Taught
Fall and Winter; Spring: Contact Department

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Type
Prerequisite

Prerequisites

Complete ALL of the following Courses:

- LING 201 - Introduction to Linguistics (Modern)

Learning Outcomes

Title
Data Collection Techniques

Tags
198133, 1

Learning Outcome
Be able to collect linguistic data using interviews, surveys, experiments, corpora, etc

Title
Description of Results

Tags
198151, 3

Learning Outcome
Be able to describe the results of linguistic research using appropriate terminology and rhetorical strategies (i.e., talk and write like a linguist).

Title
Application of Tools for Data Analysis

Tags
198320, 2

Learning Outcome
Be able to use appropriate tools to analyze linguistic data.

Title
Hypothesizing

Tags
198321, 0

Learning Outcome
Be able to formulate testable hypotheses concerning language.

LING 299R - Academic Internship: English Language Teaching

Course Information

Teaching Area (new)
LING

Course Number
299R

Teaching Area
LING

Course Title
Academic Internship: English Language Teaching

Course Description
Students with focused training teach specific English skills to speakers of other languages in the U.S. or abroad.

Department
Linguistics

When Taught
Contact Department

Credit Hours

Min:
1

Fixed/Max:
9

Lecture Hours

0

Simple Requisites

Prerequisites

Type
Prerequisite

Prerequisites

Complete ALL of the following Courses:

- LING 377R - Basic Training in TESOL

Learning Outcomes

Title
Provide service to English language learners

Tags
198329, 0

Learning Outcome
Provide service to English language learners in various, real-world settings

Title
Apply concepts in real situations

Tags
198330, 1

Learning Outcome
Apply linguistic and pedagogical concepts learned in TESOL basic training coursework in real world situations.

Title
Develop confidence and satisfaction

Tags
198331, 2

Learning Outcome
Develop feelings of confidence and satisfaction from experience teaching English as a second language.

LING 310 - Phonetics

Course Information

Teaching Area (new)
LING

Course Number
310

Teaching Area
LING

Course Title
Phonetics

Course Description
General inventory of speech sounds possible in language, from both an acoustic and articulatory point of view.

Department
Linguistics

When Taught
Fall

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Simple Requisites

Prerequisites

Type
Prerequisite

Prerequisites

Complete ALL of the following Courses:

- LING 201 - Introduction to Linguistics (Modern)
  AND LING 210 - Sounds of Language

Learning Outcomes

Title
Producing and Transcribing Sounds

Tags
198209, 1

Learning Outcome
Produce and transcribe approximately 100 of the sounds of the world’s languages and describe the articulatory and acoustic properties of these sounds.

Title
Phonetic Systems

Tags
198213, 6

Learning Outcome
Recognize the phonetic systems of several languages and how and why the languages are organized the way they are.

Title
Transcribing and Explaining Phonetic Processes

Tags
198215, 2

Learning Outcome
Transcribe and explain the phonetic processes common to languages of the world.

Title
Field Work in Phonetics

Tags
198234, 3

Learning Outcome
Perform field work in phonetics—learning to record and acoustically analyze phonetics data.

LING 315 - Phonology

Course Information

Teaching Area (new)
LING

Course Number
315

Teaching Area
LING

Course Title
Phonology

Course Description
Study of natural language sound systems from a variety of theoretical perspectives.

Department
Linguistics

When Taught
Winter

Prerequisites

Complete ALL of the following Courses:

- LING 201 - Introduction to Linguistics (Modern)
  AND LING 220 - Structure in Language

Recommended
LING 240 or ELING 273 recommended prerequisites

Learning Outcomes

Title
Morphological Analysis

Tags
198345, 1

Learning Outcome
Use a theoretical model to complete a morphological analysis at an intermediate level using appropriate methods and techniques.

Title
Present Results

Tags
198346, 2

Learning Outcome
Present the results of morphological analyses showing awareness of foundational issues in theories of morphology.

LING 325 - Syntax

Course Information

Teaching Area (new)
LING

Course Number
325

Teaching Area
LING

Course Title
Syntax

Course Description
Theoretical comparison and contrast of different sentence types. Methods of argument to develop and critique generative theories of lexical categories, grammatical roles, and syntactic structure.

Department
Linguistics

When Taught
Winter

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Simple Requisites

Prerequisites

Type
Prerequisite

Prerequisites

Complete ALL of the following Courses:

- LING 201 - Introduction to Linguistics (Modern) **AND** LING 220 - Structure in Language

Learning Outcomes

Title
Application and Relevance

Tags
198080, 7

Learning Outcome
Apply these outcomes to English and investigate their relevance to other languages.

Title
Argue and Support

Tags
198121, 6

Learning Outcome
In writing and speaking, argue for (or against) particular theory dependent interpretations of structure, and support the argument with empirical evidence.

Title
Theory and Analysis Application

Tags
198270, 4

Learning Outcome
Understand and apply a theoretical framework and analytical techniques to determine and describe constituents.

Title
Recognizing and Classifying Constituents

Tags
198306, 2

Learning Outcome
Recognize and classify different types of constituents, including phrases and sentences.

LING 332 - Semantics

Course Information

Teaching Area (new)
LING

Course Number
332

Teaching Area
LING

Course Title
Semantics

Course Description
Theory and analysis of natural language semantics from a variety of theoretical perspectives.

Department
Linguistics

When Taught
Fall

- LING 201 - Introduction to Linguistics (Modern)
  AND LING 230 - Meaning in Language

OR

Prerequisites

Complete ALL of the following Courses:

- **AND** LING 201 - Introduction to Linguistics (Modern)

Learning Outcomes

Title
Understand and Apply Theoretical Framework and Analytical Techniques

Tags
198362, 1

Learning Outcome
Understand and apply a theoretical framework and analytical techniques to account for meanings of morphemes, words, phrases, clauses and sentences as determined by intrinsic language form and structure.

Title
Complete a Semantic Analysis

Tags
198363, 2

Learning Outcome
Use a theoretical model to complete a semantic analysis at an intermediate level using appropriate methods and techniques.

Title
Present Results of Semantic Analyses

Tags
198364, 3

Learning Outcome
Present the results of semantic analyses, showing awareness of foundational issues in theories of semantics.

LING 335 - Pragmatics

Course Information

Teaching Area (new)
LING

Course Number
335

Teaching Area
LING

Course Title
Pragmatics

Course Description
Theory and analysis of pragmatics from a variety of theoretical perspectives.

Department
Linguistics

When Taught
Winter

Credit Hours

Prerequisites

Complete ALL of the following Courses:

- **AND** LING 201 - Introduction to Linguistics (Modern)

Learning Outcomes

Title
Understand and Apply a Theoretical Framework and Analytical Techniques

Tags
198365, 1

Learning Outcome
Understand and apply a theoretical framework and analytical techniques to account for meanings of words and sentences as determined by their active use in a social or practical context.

Title
Complete a Pragmatic Analysis

Tags
198366, 2

Learning Outcome
Use a theoretical model to complete a pragmatic analysis at an intermediate level using appropriate methods and techniques.

Title
Present Results

Tags
198367, 3

Learning Outcome
Present the results of pragmatic analyses, showing awareness of foundational issues in theories of pragmatics.

LING 360 - (Ling-DigHT) Programming for Text Processing and Analysis

Course Information

Teaching Area (new)
LING

Course Number
360

Teaching Area
LING

Course Title
(Ling-DigHT) Programming for Text Processing and Analysis

Course Description
Development of computer applications for research in language and literature (text processing, retrieval, and analysis) in one or more programming languages (e.g., Perl, Python, etc.).

Department
Linguistics

When Taught
Fall and Winter

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Simple Requisites

Prerequisite

Type
Prerequisite

Prerequisite

Complete ANY of the following Courses:

- C S 110 - How to Program
  OR C S 111 - Introduction to Computer Science
  OR DIGHT 210 - Programming in the Humanities 1

Other Prerequisites
Or Instructor Consent due to previous programming experience

Learning Outcomes

Title
Understanding of Unicode

Learning Outcome
Students will have an advanced understanding of Unicode and its advantages over ASCII and other text encoding standards.

Title
Locate Complex Patterns and Make Substitutions

Learning Outcome
Students will be able to locate complex patterns and make substitutions within texts for the purpose of manipulating and analyzing texts and corpora.

Title
Practical Problems

Learning Outcome
Students will solve practical problems in text processing, e.g., text encoding conversion, reading/writing files, and corpus management.

Title
Programming Skill

Learning Outcome
Students will apply basic programming skills using data structures, control flow statements, and regular expressions.

Title
Python

Learning Outcome
Students will use existing Python packages as well as develop their own to process and manipulate texts, extract linguistic data, and generate data visualizations.

Title
Formatting Best Practices

Learning Outcome
Students will apply code formatting standards to produce well-organized, readable, maintainable code.

LING 361 - Speech Processing

Course Information

Teaching Area (new)
LING

Course Number
361

Teaching Area
LING

Course Title
Speech Processing

Course Description
Analyzing and manipulating speech data. Developing software applications that include speech recognition and/or speech generation.

Department
Linguistics

When Taught
All Semesters/Terms

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

  OR DIGHT 210 - Programming in the Humanities 1

Recommended
Ling 360.

Learning Outcomes

Title
Speech Processing

Tags
198079, 1

Learning Outcome
Understand the basics of phonetic, phonological, and lexical aspects of speech processing.

Title
Speech-related Processing

Tags
198164, 4

Learning Outcome
Use common data structures and formats in speech-related processing.

Title
Speech-based Processing Programs

Tags
198235, 1

Learning Outcome
Design and implement speech-based processing programs using widely available speech toolkits.

Title
Current Advancements

Tags
198284, 3

Learning Outcome
Become familiar with current advancements and research in speech processing

LING 377R - Basic Training in TESOL

Course Information

Teaching Area (new)
LING

Course Number
377R

Teaching Area
LING

Course Title
Basic Training in TESOL

Course Description
Basic preparation to teach English to speakers of other languages in particular settings.

Department
Linguistics

When Taught
Contact Department

Credit Hours

Min:
1

Fixed/Max:
3

Other Prerequisites
Planned participation in IAS- or U.S.-based English teaching experience

Note
Especially for international service volunteers who plan to teach ESL or EFL.

LING 399R - Academic Internship: Linguistics

Course Information

Teaching Area (new)
LING

Course Number
399R

Teaching Area

Course Title
Academic Internship: Linguistics

Course Description
On-the-job experience and education related to linguistics.

Department
Linguistics

When Taught
Contact Department

Credit Hours

Min:
0.5

Fixed/Max:
9

Lecture Hours

Fixed:
0

Lab Hours

Fixed:
0

Other Prerequisites
Program coordinator's consent

Note
An APPROVED Internship Application is required before adding.

Learning Outcomes

Title
Apply academic coursework to the world

Tags
198177, 0

Learning Outcome
Students will learn to apply concepts learned in their academic classes to everyday, practical, linguistic situations outside the university.

Title
Enrich classroom concepts through work experience

Tags
198184, 1

Learning Outcome
Interns' real-world work experiences will enhance and enrich their understanding of academic concepts they learned in university classes.

LING 401 - Preparation for Graduate Studies in Linguistics

Course Information

Teaching Area (new)
LING

Course Number
401

Teaching Area
LING

Course Title
Preparation for Graduate Studies in Linguistics

Course Description
Introduction to phonology, phonetics, morphology, syntax, semantics, and pragmatics for students not majoring in linguistics, but planning to study linguistics in graduate school.

Department
Linguistics

When Taught
Summer Term

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Learning Outcomes

Title
Understand the field

Tags
198409, 1

Learning Outcome
Be familiar with the major subfields of linguistics and the main topics of interest within each subfield.

Title
Analytical skills

Tags
198410, 2

Learning Outcome
Demonstrate understanding of phonological, morphological, and syntactic structure and learn basic techniques of phonological, morphological, and syntactic analysis.

  OR C S 111 - Introduction to Computer Science
  OR DIGHT 210 - Programming in the Humanities 1

Other Prerequisites
Or instructor consent because of previous programming experience

Recommended
Ling 240.

Learning Outcomes

Title
Describe and Use Tools

Tags
198337, 1

Learning Outcome
Describe and use state-of-the-art tools developed for linguistic research.

Title
Evaluate and Discuss Research

Tags
198338, 2

Learning Outcome
Evaluate and discuss research literature relating to linguistic tools and methods.

Title
Apply Current Resources and Methods

Tags
198339, 3

Learning Outcome
Apply current resources and methods in a programming, experiment, or annotation project.

Title
Present and Report Linguistic Research

Tags
198340, 4

Learning Outcome
Present and report linguistic research results using appropriate discipline-specific strategies.

LING 445 - Introduction to Psycholinguistics

Course Information

Complete ALL of the following Courses:

- LING 201 - Introduction to Linguistics (Modern) **AND** ELING 273 - Introduction to English Linguistic Research Methods

Learning Outcomes

Title
Discuss Basic Psycholinguistics

Tags
198359, 1

Learning Outcome
Discuss basic terminology, theories, and issues of psycholinguistics.

Title
Know Area-Specific Findings

Tags
198360, 2

Learning Outcome
Know the basic findings in each area of psycholinguistics (including comprehension, production, acquisition, and language disorders).

Title
Respond to Research

Tags
198361, 3

Learning Outcome
Read and critically respond to psycholinguistic research and articles.

LING 449R - Mentored Research in Linguistics

Course Information

Course Number
449R

Teaching Area
LING

Course Title
Mentored Research in Linguistics

Course Description
Under the direction of a faculty mentor, students conduct primary research, collaborate on research teams, and participate in research group meetings.

Department
Linguistics

When Taught
All Semesters/Terms

Credit Hours

Min:
1

Fixed/Max:
3

Lecture Hours

Fixed:
0

Lab Hours

Fixed:
3

Other Prerequisites
Permission of Instructor

Learning Outcomes

Title
Knowledge of Literature

Learning Outcome
Students will understand linguistic concepts and theories through assigned and self-selected readings and the development of a literature synthesis.

Title
Collaboration

Learning Outcome
Students will collaborate effectively with peers and faculty in a research group setting and in weekly research group meetings.

Title
Gain Research Skills

Learning Outcome
Students will demonstrate essential research skills such as data collection, analysis, and interpretation using professional research methodologies and/or equipment.

Title
Communication of Research

Learning Outcome
Students will contribute to the advancement of knowledge in the field of linguistics through local presentations, a major research product, and/or professional presentations and publications.

LING 450 - Introduction to Historical-Comparative Linguistics

Course Information

Teaching Area (new)
LING

Course Number
450

Teaching Area
LING

Course Title
Introduction to Historical-Comparative Linguistics

Course Description
Theory and method of language change via comparison of daughter languages and reconstruction of their ancestral language: phonological, morphological, semantic, and lexical.

Department
Linguistics

When Taught
Fall and Winter

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Simple Requisites

Prerequisites

Type
Prerequisite

Prerequisites

Complete ALL of the following Courses:

- LING 201 - Introduction to Linguistics (Modern)
  AND LING 210 - Sounds of Language
  AND LING 220 - Structure in Language

Learning Outcomes

Title
Explanation of Changes

Tags
198111, 2

Learning Outcome
Students will be able to explain how and why linguistic changes occur in phonology, morphology, syntax, semantics, and the lexicon.

Title
Comparitive method and Internal Reconstruction

Tags
198112, 1

Learning Outcome
Students will be able to apply the comparative method and internal reconstruction in order to hypothesize earlier states of a language and to examine the relatedness of different languages.

Title
Factors that affect Linguistic Change

Tags
198274, 3

Learning Outcome
Students will be able to explain how linguistic change is affected by language contact and psychological, physical, social, and cultural factors.

Title
Using Corpora, Texts, and Lexicons

Tags
198292, 4

Learning Outcome
Students will be able to use corpora, texts, and lexicons in order to obtain data on, and answer questions about, language change.

LING 452 - Introduction to Sociolinguistics

Prerequisite

Prerequisite

Complete ANY of the following Courses:

- LING 240 - Linguistic Tools 1
  OR ELING 273 - Introduction to English Linguistic Research Methods

Learning Outcomes

Title
Understand Relationship between Language Use and Society

Tags
198356, 1

Learning Outcome
Understand the relationship between language use and society with respect to regional, social, ethnic and contextual variation.

Title
Conduct Sociolinguistic Research

Tags
198357, 2

Learning Outcome
Conduct research into a wide range of sociolinguistic variation.

Title
Impart Sociolinguistic Knowledge

Tags
198358, 3

Learning Outcome
Impart knowledge of sociolinguistics and related research in presentations and papers.

LING 460 - Typology

Course Information

Teaching Area (new)
LING

Course Number
460

Teaching Area
LING

Course Title
Typology

Course Description
Introduction to the study of language universals and linguistic typology.

Department
Linguistics

When Taught
Fall Contact Dept.; Winter Contact Dept.; Spring; Summer.

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Recommended
Ling 220.

Learning Outcomes

Title
Identify Universals

Tags
198341, 1

Learning Outcome
Identify different kinds of universals (formal, substantive, implicational, syntactic, lexical, morphological).

Title
Apply Typological Concepts

Tags
198342, 2

Learning Outcome
Apply typological concepts to specific languages.

Title
Understand Arguments

Tags
198343, 3

Learning Outcome
Understand arguments for and against language universals.

LING 461 - First Language Acquisition

Course Information

Course Number
461

Teaching Area
LING

Course Title
First Language Acquisition

Course Description
First language acquisition examines how children learn their first language and also how children learn multiple languages at the same time. The course examines the theories, issues, and major findings in the field of first language acquisition. It addresses how language development is influenced by what language the child is learning.

Department
Linguistics

When Taught
Fall

Credit Hours

Fixed/Max:
3

Lecture Hours

Fixed:
3

Learning Outcomes

Title
Main Theories

Tags
213963, 0, 1, 2023-08-29 10:38:13

Learning Outcome
Students will be able to discuss the main theories related to First Language Acquisition

Title
Basic processes and stages

Tags
213964, 0, 2, 2023-08-29 10:38:14

Learning Outcome
Understand the basic processes and stages of First Language Acquisition

Title
Stages of language development

Tags
213965, 0, 3, 2023-08-29 10:38:16

Learning Outcome
Analyze the language use and development of children at various stages of language development

Title
Articulate and discuss research

Tags
213966, 0, 4, 2023-08-29 10:38:18

Learning Outcome
Articulate and discuss research in First Language Acquisition that will cumulate in a formal research paper.

LING 462 - Second Language Acquisition

Course Information

Course Number
462

Teaching Area
LING

Course Title
Second Language Acquisition

Course Description
Second Language acquisition examines how a second language is learned. The course examines the typical development of a second language in terms of phonological, lexical, semantic, pragmatic and syntactic development. The course will also examine factors that influence second language acquisition such as the person's age at the time of acquisition, motivation, language aptitude and teaching methods.

The objective of this course is to help students learn the theories, issues, and major findings in the field of second language acquisition.

Department
Linguistics

When Taught
Winter

Credit Hours

Fixed/Max:
3

Lecture Hours

Fixed:
3

Learning Outcomes

Title
Theories and practices

Tags
213967, 0, 1, 2023-08-29 10:38:19

Learning Outcome
Discuss main theories and practices related to Second Language Acquisition

Title
Basic processes and stages

Tags
213968, 0, 2, 2023-08-29 10:38:21

Learning Outcome
Understand the basic processes and stages of Second Language Acquisition

Title
Stages of language devlopment

Tags
213969, 0, 3, 2023-08-29 10:38:22

Learning Outcome
Analyze the language use and development of learners at various stages of language development

Title
Articulate and discuss research

Tags
213970, 0, 4, 2023-08-29 10:38:24

Learning Outcome
Articulate and discuss research in Second Language Acquisition that will cumulate in a formal research paper.

Teaching Area
LING

Course Title
Language Teaching Methods: MTC

Course Description
Instructional methods and strategies for teaching second and foreign languages at the Missionary Training Center (MTC).

Department
Linguistics

When Taught
Contact Department

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Learning Outcomes

Title
Connect methodological theory and practice

Tags
198085, 0

Learning Outcome
Students who are teaching language classes at the Missionary Training Center will connect methodological theory learned in this class with real-world practice.

LING 480 - Problems in Translation

Course Information

Teaching Area (new)
LING

Course Number
480

Teaching Area
LING

Course Title
Problems in Translation

Course Description
History, theory, and practice of human and machine translation.

Department
Linguistics

When Taught
Fall and Winter

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Other Prerequisites
Ling 230 and proficiency in a second language.

Learning Outcomes

Title
Bi-text Corpora

Tags
198089, 1

Learning Outcome
Create a bi-text corpus and derive translation memory and terminology from that bi-text corpus.

Title
Translation Project

Tags
198115, 3

Learning Outcome
Use machine translation, translation memory, and terminology in conjunction with a translation environment tool to complete a translation project according to the project’s specifications.

Title
Specifications for Translation Projects

Tags
198208, 1

Learning Outcome
Define a set of specifications for a translation project based on text type, audience, and purpose.

Title
The Future of Translation Technology

Tags
198212, 0

Learning Outcome
Discuss the possible future of translation technology, including future applications of existing technology and future development of new technologies, drawing on class assignments and a personal project.

LING 485 - Corpus Linguistics

Course Information

Teaching Area (new)
LING

Course Number
485

Teaching Area
LING

Course Title
Corpus Linguistics

Course Description
Using large collections of texts for research and teaching; focusing on variation (by dialect, genre, time, author, etc.) in language.

Department
Linguistics

When Taught
Fall and Winter

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Simple Requisites

Prerequisites

Type
Prerequisite

Prerequisites

Fulfill ANY of the following requirements:

Prerequisites

Complete ALL of the following Courses:

OR

Prerequisites

Complete ALL of the following Courses:

- LING 240 - Linguistic Tools 1

Learning Outcomes

Title
Corpus design methods

Tags
198149, 0, 0

Learning Outcome
Students will evaluate, design, and collect corpora based on principles of statistical sampling for their areas of interest

Title
Analysis

Tags
198254, 0, 1

Learning Outcome
Students will use quantitative (e.g., frequency, collocation, keyword) and qualitative techniques (e.g., concordance analysis) to analyze patterns in language across text types and across time using flexible queries

Title
Applications within linguistics

Tags
198311, 0, 1

Learning Outcome
Students will apply corpus methods to address problems across many sub-disciplines of linguistics.

Title
Applied linguistics

Tags
198224, 0, 2

Learning Outcome
Students will apply corpus methods to address real world problems, such as in language teaching, language learning, language assessment, editing, law, computational linguistics, lexicography, and even in gospel study.

LING 495R - Senior Capstone

Course Information

Teaching Area (new)
LING

Course Number
495R

Teaching Area
LING

Course Title
Senior Capstone

Course Description
Integrative, culminating experience for linguistics majors; topics vary.

Department
Linguistics

When Taught
Fall; Winter; Spring; Summer Contact Department.

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Simple Requisites

Prerequisite

Type
Prerequisite

Complete ANY of the following Courses:

- LING 240 - Linguistic Tools 1
  OR ELING 273 - Introduction to English Linguistic Research Methods
  OR LING 198 - Career Explorations in Linguistics

Other Prerequisites
Ling 198, Ling 210, Ling 220 & Ling 230.

Learning Outcomes

Title
Demonstrate Integration of Knowledge and Communicate Results

Tags
198344, 4

Learning Outcome
Students will demonstrate that they can integrate their knowledge of core and applied areas of linguistics to produce a linguistic artifact (grammar, lexicon, corpus, experiment, survey, etc), and communicate the results in writing or speaking.

LING 498 - Career Preparation for Linguistics, Applied English Linguistics, and Editing & Publishing Majors.

Course Information

Teaching Area (new)
LING

Course Number
498

Teaching Area
LING

Course Title
Career Preparation for Linguistics, Applied English Linguistics, and Editing & Publishing Majors.

Course Description
Finding and interpreting job advertisements related to linguistics. Explaining skills of linguistics major to employers. Students should take near the end of their major.

Department
Linguistics

When Taught
Fall

Credit Hours

Min:
1

Fixed/Max:
1

Lecture Hours

Fixed:
1

Lab Hours

Fixed:
0

Simple Requisites

Prerequisites

Type
Prerequisite

Prerequisites

Complete ANY of the following Courses:

- LING 198 - Career Explorations in Linguistics
  OR LING 201 - Introduction to Linguistics (Modern)
  OR ELING 223 - Introduction to the English Language

Recommended
One of the following: Ling 310, 315, 320, 325, 332, 335, 362

Learning Outcomes

Title
Interpreting Job advertisements

Tags
213971, 0, 1, 2023-08-29 10:38:33

Learning Outcome
Student will be able to find and interpret job advertisements as they relate to their linguistics or editing degree.

Title
Present linguistics skills to employers

Tags
213972, 0, 2, 2023-08-29 10:38:35

Learning Outcome
Students will be able to explain how linguistic skills relate to a job and contribute to a company.

Title
General job-hunting preparation

Tags
213973, 0, 3, 2023-08-29 10:38:38

Learning Outcome
Understanding and preparation for job interviews, resume creation, and career fairs

LING 501 - Advanced Research and Writing Techniques for Second Language Writers

Course Information

Teaching Area (new)
LING

Course Number
501

Teaching Area
LING

Course Title
Advanced Research and Writing Techniques for Second Language Writers

Course Description
Non-native English speaking students will develop research and writing techniques necessary for graduate-level writing.

Department
Linguistics

When Taught
Winter

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Other Prerequisites
For graduate international ESL students.

Learning Outcomes

Title
Organize ideas in English writing

Tags
198150, 0

Learning Outcome
Non-native English-speaking students will gain or increase their ability to organize their ideas into a well-constructed written response in English.

Title
Identify audience, purpose, and strategies in English writin

Tags
198245, 1

Learning Outcome
Identify the audience, purpose, and strategies for a given writing assignment in English and write accordingly.

Title
Structures and vocabulary

Tags
198310, 2

Learning Outcome
Express ideas using well-formed structures and vocabulary acceptable in English academic writing.

LING 542 - Field Methods in Linguistics

Course Information

Teaching Area (new)
LING

Course Number
542

Teaching Area
LING

Course Title
Field Methods in Linguistics

Course Description
Documenting an unfamiliar language by interacting with a native speaker.

Department
Linguistics

When Taught
Contact Department

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Simple Requisites

Prerequisites

Type
Prerequisite

Prerequisites

Complete ALL of the following Courses:

- LING 201 - Introduction to Linguistics (Modern)
  AND LING 210 - Sounds of Language
  AND LING 220 - Structure in Language

Learning Outcomes

Title
Linguistic Data

Tags
198420, 1

Learning Outcome
In this course you will learn to:

elicit,
organize,
analyze, and
describe

linguistic data from a native speaker of a language unfamiliar to you.

LING 545 - Psycholinguistics

Course Information

Teaching Area (new)
LING

Course Number
545

Teaching Area
LING

Course Title
Psycholinguistics

Course Description
Research and theory behind how the mind interprets, stores, retrieves, and produces language. Anatomical structures and physiological processes of the brain dealing with language.

Department
Linguistics

When Taught
Contact Department

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Learning Outcomes

Title
Read/Respond to Research Articles

Tags
198159, 2

Learning Outcome
Read and critically respond to psycholinguistic research and articles.

Title
Psycholinguistics Basics

Tags
198188, 1

Learning Outcome
Discuss basic terminology, theories, and issues of psycholinguistics.

Title
Findings in Each Area

Tags
198248, 1

Learning Outcome
Know the basic findings in each area of psycholinguistics (including comprehension, production, acquisition, and language disorders).

Title
Experimental Research

Tags
198266, 3

Learning Outcome
Create and participate in psycholinguistic experimental research.

LING 550 - Sociolinguistics.

Course Information

Teaching Area (new)
LING

Course Number
550

Teaching Area
LING

Course Title
Sociolinguistics.

Course Description
Research and theory of how language functions in culture and society; focus on development, typology, and description of the relationship between language and society.

Department
Linguistics

When Taught
Contact Department

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

No Requirements

Learning Outcomes

Title
Knowledge

Tags
198076, 1

Learning Outcome
Understand the relationship between language use and society with respect to regional, social, ethnic and contextual variation.

Title
Research

Tags
198141, 1

Learning Outcome
Conduct research into a wide range of sociolingusitic variation

Title
Profess

Tags
198238, 2

Learning Outcome
Impart knowledge of sociolinguistics and related research in presentations and papers

LING 551 - Anthropological Linguistics

Course Information

Teaching Area (new)
LING

Course Number
551

Teaching Area
LING

Course Title
Anthropological Linguistics

Course Description
Language in culture and society: development, typology, and description.

Department
Linguistics

When Taught
Contact Department

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Other Prerequisites
Ling 220 and Ling 230; or equivalent.

Learning Outcomes

Title
Contextualize Varieties of Language

Tags
198086, 2

Learning Outcome
Through readings, weekly exercises and discussions they will acquire the metalinguistic concepts necessary for contextualizing varieties of language.

Title
Transcription Sessions

Tags
198126, 3

Learning Outcome
In class transcription sessions will address the representation of linguistic data, and how that representation may affect one's assessments of semantic intent.

Title
Analysis of Linguistic Data in Social Contexts

Tags
198178, 1

Learning Outcome
Upon completion of this course students will be equipped with the conceptual tools to think about and analyze linguistic data in social contexts of use.

Title
Familiarity with Foundational Texts

Tags
198308, 1

Learning Outcome
Student will become conversant with foundational texts which inform our cultural understanding and use of language.

LING 558 - Historical-Comparative Linguistics

Course Information

Teaching Area (new)
LING

Course Number
558

Teaching Area
LING

Course Title
Historical-Comparative Linguistics

Course Description
Learning theory and method of language change via comparing daughter languages and reconstructing ancestral languages. Language universals and typology.

Department
Linguistics

When Taught
Contact Department

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Other Prerequisites
Ling 450 or equivalent

Learning Outcomes

Title
Application of Typological Concepts

Tags
198155, 1

Learning Outcome
Students will learn how to apply typological concepts to specific languages during in-class and out of class exercises.

Title
Influential Linguistics Typology Concepts

Tags
198160, 1

Learning Outcome
Students will have achieved an understanding of the most influential concepts of Linguistics typology, including the different kinds of universals (formal, substantive, implicational, syntactic, lexical, morphological).

Title
Arguments Against Language Universals

Tags
198297, 2

Learning Outcome
Students will become conversant with the arguments against language universals.

LING561 - Neurolinguistics

Course Information

Course Number
561

Teaching Area
LING

Course Title
Neurolinguistics

Course Description
Overview of topics in neurolinguistics, such as what areas of the brain are involved in language acquisition and processing, how we store and access words, how we build sentences and form dependencies, how we process discourse, how emotion is involved in language, how we learn and process a second language, neural mechanisms involved in social interaction and language use, and methods used in neurolinguistic research.

Department
Linguistics

When Taught
Contact Department

Credit Hours

Fixed/Max:
3

Lecture Hours

Fixed:
3

Other Prerequisites
Any intro linguistics, psychology, or neuroscience course

Learning Outcomes

Title
Neurolinguistic knowledge

Tags
213974, 0, 1, 2023-08-29 10:40:05

Learning Outcome
Demonstrate understanding of basic principles of brain biology/physiology and of key theories of language processing and the brain

Title
Neurolinguistic methods

Tags
213975, 0, 2, 2023-08-29 10:40:07

Learning Outcome
Demonstrate understanding of how different brain imaging techniques work (EEG, fNIRS, MEG, fMRI) and what they can tell us about language acquisition and processing, and be able to collect and/or analyze one type of data

Title
Research evaluation

Tags
213976, 0, 3, 2023-08-29 10:40:09

Learning Outcome
Be able to critically read and evaluate primary literature and to synthesize studies in neurolinguistics.

Title
Research design and presentation

Tags
213977, 0, 4, 2023-08-29 10:40:11

Learning Outcome
Be able to design research to test theories of language processing/ acquisition and the brain. Be able to effectively present research in writing and speaking.

LING 580R - Problems in Linguistics and Applied Linguistics

Course Information

Teaching Area (new)
LING

Course Number
580R

Teaching Area
LING

Course Title
Problems in Linguistics and Applied Linguistics

Course Description
Advanced research in language acquisition, sociolinguistics, psycholinguistics, linguistics field study, applied linguistics.

Department
Linguistics

When Taught
Contact Department

Credit Hours

Min:
1

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Learning Outcomes

Title
Overview

Tags
198314, 1

Learning Outcome
Each section of Ling 580R could have different learning outcomes from other sections and other semesters. Therefore, each instance of Ling 580R must be evaluated separately.

LING 581 - Natural Language Processing

Course Information

Teaching Area (new)
LING

Course Number
581

Teaching Area
LING

Course Title
Natural Language Processing

Course Description
Intensive overview of natural language processing, including computational techniques, hands-on experience with linguistic technologies and corpora, language modeling approaches, and readings from current research.

Department
Linguistics

When Taught
Fall and Winter

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Simple Requisites

Prerequisite

Type
Prerequisite

Complete ANY of the following Courses:
- C S 110 - How to Program
- C S 111 - Introduction to Computer Science
- DIGHT 210 - Programming in the Humanities 1

Learning Outcomes

Title
NLP Tools

Tags
198172, 1

Learning Outcome
Students will be able to demonstrate by hands-on experience how to use NLP tools in the performance of linguistically interesting tasks.

Title
NLP-related Computation

Tags
198187, 2

Learning Outcome
Students will be able to demonstrate application of a novel, nonontrivial programming approach to solving some aspect of NLP-related computation.

Title
Computational Techniques

Tags
198252, 3

Learning Outcome
Students will be able to recognize and describe how computational techniques are used successfully in various areas of natural language processing.

Title
Current Research Literature and Trends

Tags
198282, 4

Learning Outcome
Students will read, understand, discuss, and assess current research literature and trends in the relevant areas.

LING 585 - Research in Corpus Linguistics

Course Information

Teaching Area (new)
LING

Course Number
585

Teaching Area
LING

Course Title
Research in Corpus Linguistics

Course Description
Design and use of corpora for research with a focus on variation in language (by register, dialect, time, author, etc.).

Department
Linguistics

When Taught
Winter

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Learning Outcomes

Title
Corpus design methods

Tags
212474, 0, 1

Learning Outcome
Students will evaluate, design, and collect corpora based on principles of statistical sampling for their areas of interest

Title
Analysis

Tags
212475, 0, 2

Learning Outcome
Students will use quantitative (e.g., frequency, collocation, keyword) and qualitative techniques (e.g., concordance analysis) to analyze patterns in language across text types and across time using flexible queries

Title
Academic engagement

Tags
212476, 0, 3

Learning Outcome
Students will become familiar with primary literature in the field of corpus linguistics and engage with the strengths and weaknesses of the field

Title
Communication

Tags
212477, 0, 4

Learning Outcome
Students will communicate about corpus linguistics (e.g., by leading discussions and producing professional presentations, reports, and academic research articles)

Title
Applications within linguistics

Tags
212478, 0, 5

Learning Outcome
Students will apply corpus methods to address problems across sub-disciplines of linguistics

Title
Applied linguistics

Tags
212479, 0, 6

Learning Outcome
Students will apply corpus methods to address real world problems, such as in language teaching, language learning, language assessment, editing, law, computational linguistics, lexicography, and even in gospel study

LING589R - Corpus Linguistics Topics

Course Information

Course Number
589R

Teaching Area
LING

Course Title
Corpus Linguistics Topics

Course Description
Studies in specialized topics within corpus linguistics.

Department
Linguistics

When Taught
Contact Department

Credit Hours

Fixed/Max:
3

Lecture Hours

Fixed:
3

Learning Outcomes

Title
Language Structure

Tags
213978, 0, 1, 2023-08-29 10:40:13

Learning Outcome
Demonstrate knowledge of linguistic structures or artifacts highlighted within the chosen topic. Effectively communicate in speech or writing the insights and findings coming from the study of the topic.

LING 590R - Readings in Linguistics

Course Information

Teaching Area (new)
LING

Course Number
590R

Teaching Area
LING

Course Title
Readings in Linguistics

Course Description
Individual study of current linguistic literature. Occasional discussion sessions with instructor and other class members.

Department
Linguistics

When Taught
Fall Contact Dept.; Winter Contact Dept.; Spring; Summer.

Credit Hours

Min:
1

Fixed/Max:
3

Lab Hours

Fixed:
0

Other Prerequisites
Instructor's consent

Note
Pass/fail grade only.

Learning Outcomes

Title
Study assigned readings

Tags
198201, 0

Learning Outcome
Individual advanced students will study and report on assigned readings under the direction of a professor

Title
Complete individual projects

Tags
198216, 1

Learning Outcome
Advanced students will study and complete individual projects under the direction of a professor

LING 599R - Academic Internship: Linguistics

Course Information

Teaching Area (new)
LING

Course Number
599R

Teaching Area
LING

Course Title
Academic Internship: Linguistics

Course Description
On-the-job experience under faculty supervision, with department approval.

Department
Linguistics

When Taught
All Semesters/Terms

Credit Hours

Min:
1

Fixed/Max:
9

Lecture Hours

Fixed:
9

Lab Hours

Fixed:
0

Learning Outcomes

Title
Apply academic coursework to the world

Tags
198322, 0

Learning Outcome
Students will learn to apply concepts learned in their academic classes to everyday, practical, linguistic situations outside the university.

Title
Enhance classroom concepts through work experience

Tags
198323, 1

Learning Outcome
Interns' real-world work experiences will enhance and enrich their understanding of academic concepts they learned in university classes.

LINGC 220 - Linguistic Computing Programming 1

Course Information

Teaching Area (new)
LINGC

Course Number
220

Teaching Area
LINGC

Course Title
Linguistic Computing Programming 1

Course Description
Computer programming for language applications: data types, character representation, flow of control, file input/output, string manipulation.

Department
Linguistics

When Taught
Contact Department

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Other Prerequisites
LingC 200 or C S 100 or equivalent experience

Learning Outcomes

Title
Manipulating Digital Information

Tags
198134, 1

Learning Outcome
Be able to manipulate digital information using algorithms written in a programming language. This includes an ability to understand and write assignment statements, loops, conditionals, and functions.

Title
Creating Simple Graphical User Interfaces

Tags
198173, 3

Learning Outcome
Be able to create a simple graphical user interface for a software application.

Title
Computing Algorithms

Tags
198334, 1

Learning Outcome
Understand what a computing algorithm is, as opposed to instructions intended for a human who has agency.

LINGC 489R - Linguistic Computing Project

Course Information

Teaching Area (new)
LINGC

Course Number
489R

Teaching Area
LINGC

Course Title
Linguistic Computing Project

Course Description
Applying principles from other courses to a substantial research or development project. Students work individually with faculty and technical advisors.

Department
Linguistics

When Taught
Contact Department

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Other Prerequisites
Any 300-level linguistic computing course

Learning Outcomes

Title
Language-related Software Application

Tags
198289, 1

Learning Outcome
Design and implement a language-related software application that satisfies the requirements of a faculty or staff member, drawing on the expertise of a faculty or staff technical advisor.

LINGC 490R - Current Topics and Issues

Course Information

Teaching Area (new)
LINGC

Course Number
490R

Teaching Area
LINGC

Course Title
Current Topics and Issues

Course Description
Individual or group study of current issues and developments in linguistic computing. Extended readings; research or project required.

Department
Linguistics

When Taught
Contact Department

Credit Hours

Min:
3

Fixed/Max:
3

Lab Hours

Fixed:
0

Other Prerequisites
Instructor's consent

Learning Outcomes

Title
Knowledge

Tags
198371, 1

Learning Outcome
Students will deepen understanding and skills as outlined in individualized contract between student and professor.

LINGC 496R - Academic Internship: Linguistic Computing

Course Information

Teaching Area (new)
LINGC

Course Number
496R

Teaching Area
LINGC

Course Title
Academic Internship: Linguistic Computing

Course Description
On-the-job experience in publishing production (print or electronic), courseware/ software development, museum/collection/textbase management, language/ linguistics research, or other application of linguistic computing.

Department
Linguistics

When Taught
Contact Department

Credit Hours

Min:
1

Fixed/Max:
3

Lab Hours

Fixed:
0

Other Prerequisites
LingC 300-level course or equivalent experience

Learning Outcomes

Title
Language-related Software Activites

Tags
198299, 1

Learning Outcome
Participate in the language-related software activities of an off-campus organization, satisfying the requirements of the internship supervisor and the BYU faculty member in charge of the internship course.

LITHU 100 - Language Study: Lithuanian

Course Information

Teaching Area (new)
LITHU

Course Number
100

Teaching Area
LITHU

Course Title
Language Study: Lithuanian

Course Description
Survival-level conversation, reading, listening, and culture skills in Lithuanian.

Department
Language Studies

When Taught
Contact Department

Credit Hours

Min:
2

Fixed/Max:
2

Lecture Hours

Fixed:
2

Lab Hours

Fixed:

Learning Outcomes

Title
Speaking

Tags
197444, 1

Learning Outcome
Speak target language well enough to ask for instructions and to carry out simple, routine survival-type transactions.

Title
Social Situations

Tags
197446, 2

Learning Outcome
Function appropriately in familiar, routine social situations in the target culture.

Title
Follow Instructions

Tags
197448, 3

Learning Outcome
Understand spoken and written target language well enough to follow simple instructions.

LITHU 101 - First-Year Lithuanian

Course Information

Teaching Area (new)

1

Other Prerequisites
Foreign residency experience

Note
Credit by examination only.

Learning Outcomes

Title
Comprehension

Tags
193257, 2

Learning Outcome
Understand written and spoken target language relating to familiar topics.

Title
Speaking

Tags
193266, 1

Learning Outcome
Speak the target language well enough to satisfy immediate needs related to basic social situations, simple transactions, basic food and lodging, and routine travel.

Title
Writing

Tags
193273, 3

Learning Outcome
In the target language, write short, simple messages consisting of structurally-accurate sentences on familiar topics.

Title
Culture

Tags
193283, 4

Learning Outcome
Function appropriately in routine, familiar situations in the target culture.

Prerequisite

Prerequisites

Complete ALL of the following Courses:

- LITHU 102 - First-Year Lithuanian

Note
Credit by examination only. Teacher may waive prerequisite based on prior experience.

Learning Outcomes

Title
Vocabulary

Tags
193325, 2

Learning Outcome
Broaden vocabulary for both reception (listening and reading comprehension) and production (speaking and writing).

Title
Elaboration

Tags
193334, 1

Learning Outcome
Create structurally-accurate, elaborated utterances and begin to group utterances into paragraphs and narratives. Do this in present, past and future time.

Title
Grammar

Tags
193343, 3

Learning Outcome
Review and increase understanding of basic language structures.

Title
Culture

Tags
193352, 4

Learning Outcome
Discuss in the target language common products and practices related to every-day life in the target culture.

Learning Outcomes

Title
Defined Career Purposes

Tags
197665, 1

Learning Outcome
Develop overall language and cultural competence needed to study and begin entry into a career agreed upon by the Center for Language Studies.

Title
Knowledge

Tags
197666, 2

Learning Outcome
Carry out research to identify, understand, and discuss standards, processes, people and cultural norms associated with the target career.

Title
Interpretive Competence

Tags
197667, 3

Learning Outcome
Understand, interpret and analyze advanced-level written and oral texts on topics related to the target career.

Title
Communicative Competence

Tags
197668, 4

Learning Outcome
Communicate effectively at the advanced-level in order to function in a variety of situations likely to be encountered when dealing with native speakers who are associated with the target career. This will include interpersonal communication and both written and oral presentational communication.

Title
Cultural Competence

Tags
197669, 5

Learning Outcome
Interact with cultural competence and understanding when dealing with native speakers who are associated with the target career.

Learning Outcome
This course is not offered on BYU campus, but is available only through BYU Independent Study.Elementary logic, real number system, equations and inequalities (linear, polynomial, rational, and radical expressions), graphing, function notation, inverse functions, exponential functions, systems of equations, variations. 56 lessons, 2 assignment submissions, all instructor-graded; 4 proctored midcourse exams, all computer-graded Speedback; proctored computer-graded final exam.For more detailed information, visit the Math 97 Independent Study website.

MATH 102 - Quantitative Reasoning

Course Information

Teaching Area (new)
MATH

Course Number
102

Teaching Area
MATH

Course Title
Quantitative Reasoning

Course Description
Practicing and applying quantitative reasoning: personal finance, consumer statistics, etc.

Department
Mathematics

When Taught
Fall and Winter

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Note
For students who do not need developmental algebra for subsequent courses. Also offered by BYU Independent Study; enroll anytime throughout year; one year to complete; additional tuition required; register at is.byu.edu.

Learning Outcomes

Title
Practicing and applying quantitative reasoning

Tags
204854, 0

Learning Outcome
For students who do not need developmental algebra for subsequent courses. For more detailed information, visit the Math 102 Wiki page.

MATH 109 - Precalculus

Course Information

Teaching Area (new)
MATH

Course Number
109

Teaching Area
MATH

Course Title
Precalculus

Course Description
Functions, trigonometric functions and their graphs, trigonometric identities, solving trigonometric equations, equations of lines, slope-intercept and point-slope form of a line, secant lines and average rates of change, rates of change in the sciences, graphical introduction to limits.

Department
Mathematics

When Taught
Fall Term 2; Winter Term 2.

Credit Hours

Min:
1

Fixed/Max:
1

Lecture Hours

Fixed:
1

Lab Hours

Fixed:
0

Other Prerequisites
Not for students with Math 112 credit.

Recommended
Concurrent enrollment in Math 110. \nMath 97 or Algebra II in high school

MATH 110 - College Algebra

Course Information

Teaching Area (new)
MATH

Course Number
110

Teaching Area
MATH

Course Title
College Algebra

Course Description
Functions, polynomials, theory of equations, exponential and logarithmic functions, matrices, systems of linear equations, permutations, combinations, binomial theorem.

Department
Mathematics

When Taught
All Semesters/Terms

Credit Hours

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
1

Other Prerequisites
Math 97 or equivalent (see Independent Study).

Note
Offered by BYU Independent Study; enroll anytime throughout the year; one year to complete; additional tuition required; register at is.byu.edu.

Learning Outcomes

Title
Functions, polynomials, theory of equations, etc.

Tags
204851, 1

Learning Outcome
This course prepares students to take courses in calculus, statistics, mathematics for elementary education majors, and other areas where algebra skills are required. Fluent skills in algebra are necessary for success in any area that uses mathematical analysis. The mastery of college algebra requires well-developed skills, clear conceptual understanding, and the ability to model phenomena in a variety of settings. College Algebra develops the concepts of graphing functions, polynomial and rational functions, exponential and logarithmic functions, conic sections, solving systems of equations, the binomial theorem, permutations, combinations, and probability. This course contributes to all the expected learning outcomes of the Mathematics BS degree. For more detailed information, visit the Math 110 Wiki page.

Title
Exponential and Logarithmic Functions

Tags
204857, 2

Learning Outcome
Exponential functionsLogarithmic functionsProperties of LogarithmsLogarithmic and exponential equationsCompound interestExponential growth and decay

Title
Functions and their graphs

Tags
204869, 0, 0

Learning Outcome

Graph functions using horizontal and vertical shifts
Graph functions using compressions and stretches
Graph functions using reflections about the x-axis or y-axis
Form composite functions and find the domain
Determine the inverse of a function
Graph an inverse function from the graph of a function

Title
Polynomial and Rational Functions

Tags
204861, 0, 1

Learning Outcome

Quadratic functions
Polynomial functions
Rational functions
Polynomial and rational inequalities
The real zeros of a polynomial function
Complex zeros and the Fundamental Theorem of Algebra
The Intermediate Value Theorem.
The inequalities |x-a|<b and a-b<x<a+b

Title
Systems of Equations and Inequalities

Tags
204867, 0, 4

Learning Outcome

Solve systems of linear equations using substitution and elimination. Detect systems that have infinitely many solutions or no solutions.
Solve systems of non-linear equations using substitution and elimination, including systems with multiple solutions.

Title
Sequences and Induction

Tags
204855, 0, 5

Learning Outcome

Find terms in a sequence using a formula and a recursive definition.
Given terms in a sequence that follow a pattern, produce a formula for the sequence.
Find a formula for terms in an arithmetic sequence and be able to add the terms of a finite arithmetic sequence.
Find a formula for the terms in a geometric sequence and be able to find the sum of finite and infinite geometric series.

Title
Counting and Probability

Tags
204866, 0, 6

Learning Outcome

Count the number of ways in which a sequence of events can occur (the Rule of Product).
Compute probabilities based on equally likely outcomes.
Compute probabilities of complements of events and unions of disjoint events.
Compute the probability of a sequence of independent events.

MATH 111 - Trigonometry

Course Information

Teaching Area (new)
MATH

Course Number
111

Teaching Area
MATH

Course Title
Trigonometry

Course Description
Circular functions, triangle relationships, identities, inverse trig functions, trigonometric equations, vectors, complex numbers, DeMoivre's theorem.

Department
Mathematics

When Taught
Fall, Winter, Spring

Credit Hours

Min:
2

Fixed/Max:
2

Lecture Hours

Fixed:
2

Lab Hours

Fixed:
0

Other Prerequisites
Math 110 or equivalent

Note
Also offered by BYU Independent Study; enroll anytime throughout year; one year to complete; additional tuition required; register at is.byu.edu.

Learning Outcomes

Title
Circular functions, triangle relationships, identities, etc.

Tags
204875, 1

Learning Outcome
Students should gain familiarity and proficiency with the basic theorems of trigonometry. For more detailed information, visit the Math 111 Wiki page.

MATH 112 - Calculus 1

Course Information

Teaching Area (new)
MATH

Course Number
112

Teaching Area
MATH

Course Title
Calculus 1

Course Description
Differential and integral calculus: limits; continuity; the derivative and applications; extrema; the definite integral; fundamental theorem of calculus; L'Hopital's rule.

Department
Mathematics

When Taught
All Semesters/Terms

Credit Hours

Min:
4

Fixed/Max:
4

Lecture Hours

Fixed:
5

Lab Hours

Fixed:
0

Note
Additional seats for specific sections may be available to Freshman Mentoring participants through envelopes. Also offered by BYU Independent Study; enroll anytime throughout year; one year to complete; additional tuition required; register at is.byu.edu. Students will be required to take a pretest which will be available online during the first week of the semester. Students will receive information about the pretest from their instructors on the first day of class.

Learning Outcomes

Title
Differential and integral calculus

Tags
204918, 1

Learning Outcome
This course is designed for students majoring in the mathematical and physical sciences, engineering, or mathematics education and for students minoring in mathematics or mathematics education. Calculus is the foundation for most of the mathematics studied at the university level. The mastery of calculus requires well-developed skills, clear conceptual understanding, and the ability to model phenomena in a variety of settings. Calculus 1 develops the concepts of limit, derivative, and integral, and is fundamental for many fields of mathematics. This course contributes to all the expected learning outcomes of the Mathematics BS. For more detailed information, visit the Math 112 Wiki page.

MATH 113 - Calculus 2

Course Information

Teaching Area (new)
MATH

Course Number
113

Teaching Area
MATH

Course Title
Calculus 2

Course Description
Techniques and applications of integration; sequences, series, convergence tests, power series; parametric equations; polar coordinates.

Department
Mathematics

When Taught
Fall; Winter; Spring-Summer; Spring; Summer.

Credit Hours

Min:
4

Fixed/Max:
4

Lecture Hours

Fixed:
5

Lab Hours

Fixed:
0

Other Prerequisites
Math 112.

Note
Additional seats for specific sections may be available to Freshman Mentoring participants through envelopes. Also offered by BYU Independent Study; enroll anytime throughout year; one year to complete; additional tuition required; register at is.byu.edu.

Learning Outcomes

Title
Techniques and applications of integration, etc.

Tags
204919, 1

Learning Outcome
This course is designed for students majoring in the mathematical and physical sciences, engineering, or mathematics education and for students minoring in mathematics or mathematics education. Calculus is the foundation for most of the mathematics studied at the university level. The mastery of calculus requires well-developed skills, clear conceptual understanding, and the ability to model phenomena in a variety of settings. Calculus 2 develops techniques of integration, applications of integration, infinite sequences and series, parametric curves, polar coordinates, and conic sections. This course contributes to all the expected learning outcomes of the Mathematics BS. For a more detailed course description, visit the Math 113 Wiki page.

MATH 116 - Essentials of Calculus

Course Information

Teaching Area (new)
MATH

Course Number
116

Teaching Area
MATH

Course Title
Essentials of Calculus

Course Description
Review of algebra, graph of line, slope. Limits and derivatives (standard functions, compositions of such functions), derivative for polynomials, exponentials, logarithms. Product, quotient and chain rule. Optimization (extrema), application to business problems. Newton's method.

Department
Mathematics

When Taught
Spring and Summer Terms

Credit Hours

Min:
1

Fixed/Max:
1

Lecture Hours

Fixed:
2

Lab Hours

Fixed:
0

Other Prerequisites
Math 110.

Note
Also offered by BYU Independent Study; enroll anytime throughout year; one year to complete; additional tuition required; register at is.byu.edu.

Learning Outcomes

Title
A brief overview of differential calculus

Tags
204856, 1

Learning Outcome
Students receive a brief overview of differential calculus. Topics covered include limits, derivatives, and applications of differentiation to optimization of functions.For more detailed information visit the Math 116 Wiki page.

MATH 118 - Finite Mathematics

Course Information

Teaching Area (new)
MATH

Course Number
118

Teaching Area
MATH

Course Title
Finite Mathematics

Course Description
Language of set theory, counting and combinations. Probability theory, elementary stochastic processes, conditional probabilities. Repeated experiments, random variables, expectation, variance, linear equations, matrix algebra, application to economics or similar. Linear programming. Markov chains including applications.

Department
Mathematics

When Taught
Fall; Winter; Spring; Summer.

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Other Prerequisites
Math 110.

Note
NOTE: Additional seats for specific sections may be available to Freshman Mentoring participants. NOTE: Also offered by BYU Independent Study; enroll anytime throughout year; one year to complete; additional tuition required; register is.byu.edu

Learning Outcomes

Title
The basic elements and applications of finite mathematics

Tags
204871, 1

Learning Outcome
Prepares students for a broad range of applications in business, the life sciences, and the social sciences.For more detailed information visit the Math 118 Wiki page.

MATH 191 - Seminar in Mathematics 1

Course Information

Teaching Area (new)
MATH

Course Number

Learning Outcomes

Title
Students should be familiar with the following items:

Tags
204920, 1

Learning Outcome

Scholarships, undergraduate research, departmental activities, and summer programs available to BYU mathematics majors.
Career options available to mathematics majors;
Several current research topics in mathematics; and
Aspects of the culture of the mathematics community.

For more information, visit the Math 191 Wiki page.

MATH 213 - Elementary Linear Algebra

Course Information

Teaching Area (new)
MATH

Course Number
213

Teaching Area
MATH

Course Title
Elementary Linear Algebra

Course Description
Concepts and applications of linear systems, matrices, vectors and vector spaces, linear transformations, determinants, inner product spaces, eigenvalues, and eigenvectors.

Department
Mathematics

When Taught
All Semesters/Terms

Credit Hours

Min:
2

Fixed/Max:
2

Lecture Hours

Fixed:
2

Lab Hours

Fixed:
0

Other Prerequisites
Math 112.

Learning Outcomes

Title
Distinguish

Tags
212369, 0, 1

Learning Outcome
Students will be able to distinguish between true and plausibly-sounding false propositions about matrices and vectors.

Title
Construct

Tags
212370, 0, 2

Learning Outcome
Students will be able to construct examples and counterexamples illustrating relations between different elementary linear-algebraic concepts.

Title
Categorize

Tags
212371, 0, 3

Learning Outcome
Students will be able to categorize matrices according to their properties.

Title
Calculate

Tags
212372, 0, 4

Learning Outcome
Students will be able to calculate precisely and efficiently, choosing appropriate methods.

MATH 215 - Computational Linear Algebra

Course Information

Teaching Area (new)
MATH

Course Number
215

Teaching Area
MATH

Course Title
Computational Linear Algebra

Course Description
Practical linear algebraic computations and applications.

Department
Mathematics

When Taught
Fall and Winter

Credit Hours

Min:
1

Fixed/Max:
1

Lecture Hours

Fixed:
0

Lab Hours

Fixed:
1

Other Prerequisites
Math 112.

Recommended
Concurrent or previous enrollment in Math 213 or Math 313

Learning Outcomes

Title
Solve

Tags
212373, 0, 1

Learning Outcome
Students will be able to solve large-scale linear-algebraic problems.

Title
Apply

Tags
212374, 0, 2

Learning Outcome
Students will be able to apply matrices and vectors to analyze scientific and technological systems.

Title
Implement

Tags
212375, 0, 3

Learning Outcome
Students will be able to implement linear-algebraic techniques in suitable computing environments.

MATH 290 - Fundamentals of Mathematics

Course Information

Teaching Area (new)
MATH

Course Number
290

Teaching Area
MATH

Course Title
Fundamentals of Mathematics

Course Description
Achieving maturity in mathematical communication. Introduction to mathematical proof; methods of proof; analysis of proof; induction; logical reasoning.

Department
Mathematics

When Taught
Fall, Winter, Spring

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Other Prerequisites
Math 112 or concurrent enrollment with instructor's consent.

Learning Outcomes

Title
Achieving maturity in mathematical communication.

Tags
204923, 1

Learning Outcome
This course is aimed at students majoring in mathematical and physical sciences, and engineering, and students minoring in mathematics or mathematical education. Calculus is the foundation for most of the mathematics studied at the university level. The mastery of calculus requires well-developed manipulative skills, clear conceptual understanding, and the ability to model phenomena in a variety of settings. Calculus of several variables extends the concepts of limit, integral, and derivative from one dimension to higher dimensional settings and is therefore fundamental for many fields of mathematics. This course contributes to all the expected learning outcomes of the Mathematics BS degree. For more detailed information visit the Math 314 Wiki page.

MATH 320 - Algorithm Design and Optimization 1

Course Information

Teaching Area (new)
MATH

Course Number
320

Teaching Area
MATH

Course Title
Algorithm Design and Optimization 1

Course Description
A treatment of algorithms used to solve problems. Topics include complexity and data, approximation theory, recursive algorithms, linear optimization, unconstrained optimization, constrained optimization, global optimization.

Department
Mathematics

When Taught
Fall and Winter

  AND MATH 341 - Theory of Analysis 1

OR

Prerequisites

Complete ALL of the following Courses:

- **AND** MATH 314 - Calculus of Several Variables
  AND MATH 341 - Theory of Analysis 1

Other Prerequisites
concurrent enrollment in Math 321, 344.

Note
Students who register for MATH 320 must also register for the same section of MATH 344 and register for MATH 321 and MATH 345.

Learning Outcomes

Title
Introduction to Algorithms and Approximation

Tags
205015, 1

Learning Outcome
Coverage of the fundamentals of algorithm analysis including, convergence, stability, mathematics for algorithm analysis, data structures, probability, and introductory statistics. Discrete optimization and algorithms employing stochastic guessing are investigated. Additionally, students will learn about approximation methods including Fourier series and wavelets. For detailed information about desired learning outcomes visit the Math 320 Wiki page.

MATH 321 - Algorithm Design and Optimization 1 Laboratory

Course Information

Teaching Area (new)
MATH

Course Number
321

Teaching Area
MATH

Course Title
Algorithm Design and Optimization 1 Laboratory

Course Description
Programming algorithms and using functions to implement the optimization algorithms taught in Math 320. Applications presented. Developing models and applying results of computations to the application domain.

Department
Mathematics

When Taught
Fall and Winter

Credit Hours

Min:
1

Fixed/Max:
1

Lecture Hours

Fixed:
0

Lab Hours

Methods and theory of ordinary differential equations.

Tags
204924, 1

Learning Outcome
This course is aimed at students majoring in mathematical and physical sciences and mathematical education. The main purpose of the course is to introduce students to the theory and methods of ordinary differential equations. The course content contributes to all the expected learning outcomes of the Mathematics BS. For more detailed information visit the Math 334 Wiki page.

MATH 341 - Theory of Analysis 1

Course Information

Teaching Area (new)
MATH

Course Number
341

Teaching Area
MATH

Course Title
Theory of Analysis 1

Course Description
Rigorous treatment of calculus of a single real variable: topology, order, completeness of real numbers; continuity, differentiability, integrability, and convergence of functions.

Department
Mathematics

When Taught
Fall, Winter, Summer

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

No Requirements

Other Prerequisites
Math 113 and Math 290.

Learning Outcomes

Title
Prove

Tags
204925, 0, 1, 2023-03-29 12:21:59

Learning Outcome
Students will be able to prove central results from single-variable analysis, as well as other results with similar derivations.

Title
Distinguish

Tags
212865, 0, 2

Learning Outcome
Students will be able to distinguish between true and plausibly-sounding false propositions in the language of single-variable analysis.

Title
Construct

Tags
212866, 0, 3

Learning Outcome
Students will be able to construct examples and counterexamples illustrating relations between different concepts from single-variable analysis.

Title
Categorize

Tags
212867, 0, 4

Learning Outcome
Students will be able to categorize structures in single-variable analysis according to their properties.

MATH 342 - Theory of Analysis 2

Course Information

Teaching Area (new)
MATH

Course Number
342

Teaching Area
MATH

Course Title
Theory of Analysis 2

Course Description
Rigorous treatment of calculus of several real variables; metric spaces, geometry and topology of Euclidean space, differentiation implicity function theorem, integration on sets and manifolds.

Department
Mathematics

When Taught
Fall and Winter

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:

Simple Requisites

Prerequisites

Type
Completion Requirement

Complete ALL of the following Courses:

- MATH 213 - Elementary Linear Algebra
  AND MATH 341 - Theory of Analysis 1
  AND MATH 314 - Calculus of Several Variables

Learning Outcomes

Title
Rigorous treatment of calculus of several real variables.

Tags
204926, 1

Learning Outcome
Math 342 is the multivariable sequel to Math 341. It provides a rigorous treatment of multivariable calculus. Unlike the case with Math 341, Math 342 students are not required to have had an introductory course in the subject matter, so Math 342 needs to treat both computation and theory in some depth. For more detailed information visit the Math 342 Wiki page.

MATH 344 - Mathematical Analysis 1

Course Information

Teaching Area (new)
MATH

Course Number
344

Teaching Area
MATH

Course Title
Mathematical Analysis 1

Course Description
Development of theory of vector spaces, linear maps, inner product spaces, spectral theory, metric space topology, differentiation, contraction mappings and convex analysis.

205013, 1

Learning Outcome
Development of the theory of vector spaces, linear maps, inner product spaces, spectral theory and metric space topology. For a detailed description of desired learning outcomes visit the Math 344 Wiki page.

MATH 345 - Mathematical Analysis 1 Laboratory

Course Information

Teaching Area (new)
MATH

Course Number
345

Teaching Area
MATH

Course Title
Mathematical Analysis 1 Laboratory

Course Description
Programming algorithms to implement the key mathematical methods taught in Math 344. Applications presented. Developing models and applying results of computations to the application domain.

Department
Mathematics

When Taught
Fall and Winter

Credit Hours

Min:
1

Fixed/Max:
1

Lecture Hours

Fixed:
0

Lab Hours

Fixed:
2

Other Prerequisites
C S 111 or equivalent; concurrent enrollment in Math 344.

Note
Students who register for MATH 345 must also register for MATH 320, MATH 321, and MATH 344.

Learning Outcomes

Title
Essential Python and numerical linear algebra

Tags
205016, 1

Learning Outcome
Students will learn the fundamentals of Python and program algorithms to implement the key linear algebra methods taught in Math 344. Applications will be presented, and students will develop models and apply the results of the computations to the application domain.

MATH 346 - Mathematical Analysis 2

Course Information

Teaching Area (new)
MATH

Course Number
346

Teaching Area
MATH

Course Title
Mathematical Analysis 2

Course Description
Theory of Riemann-Darboux integration, calculus on curves and surfaces, complex integration, spectral calculus, generalized inverses of matrices, basic matrix perturbation theory, groups of permutations and matrices. Time permitting, exterior calculus and differential forms.

Department
Mathematics

When Taught
Fall and Winter

Complete ALL of the following Courses:

- MATH 345 - Mathematical Analysis 1 Laboratory

Other Prerequisites
concurrent enrollment in Math 346.

Learning Outcomes

Title
Expectations

Tags
204947, 1

Learning Outcome
Students will be able to relate the concepts covered in Math 346 to specific aspects of many applications. They will be able to use software to do the computations that are central to these concepts, and will be able to interpret and apply the results of those computations in the contexts in which the models originated.

MATH 350 - Combinatorics & Graph Theory

Course Information

Course Number
350

Teaching Area
MATH

Course Title
Combinatorics & Graph Theory

Course Description
A proof-based introduction to discrete mathematics, including substantial treatment of both enumerative combinatorics and graph theory. Activities include writing and reading proofs, considering examples and counterexamples, and categorizing discrete mathematical structures.

Department
Mathematics

When Taught
Contact Department

Credit Hours

Fixed/Max:

- MATH 290 - Fundamentals of Mathematics

Learning Outcomes

Title
Prove

Tags
213979, 0, 1, 2023-08-29 10:43:34

Learning Outcome
Students will be able to prove central results from discrete mathematics, as well as other results with similar derivations.

Title
Distinguish

Tags
213980, 0, 2, 2023-08-29 10:43:35

Learning Outcome
Students will be able to distinguish between true and plausibly-sounding false propositions in the language of discrete mathematics.

Title
Construct

Tags
213981, 0, 3, 2023-08-29 10:43:36

Learning Outcome
Students will be able to construct examples and counterexamples illustrating relations between different concepts from discrete mathematics.

Title
Categorize

Tags
213982, 0, 4, 2023-08-29 10:43:39

Learning Outcome
Students will be able to categorize discrete mathematical structures according to their properties.

MATH 352 - Introduction to Complex Analysis

Course Information

Teaching Area (new)
MATH

Course Number
352

Teaching Area
MATH

Course Title
Introduction to Complex Analysis

Course Description
Complex algebra, analytic functions, integration in the complex plane, infinite series, theory of residues, conformal mapping.

Department
Mathematics

When Taught
Fall, Winter, Summer

Credit Hours

Min:
3

Fixed/Max:
3

Complete ALL of the following Courses:

- MATH 290 - Fundamentals of Mathematics
  AND MATH 314 - Calculus of Several Variables

Other Prerequisites
Math 341 or concurrent enrollment

Learning Outcomes

Title
Mastery of Concepts

Tags
204810, 2

Learning Outcome
Students will master complex numbers, limits, analytic functions, elementary functions in the complex plane, contour integrals, Taylor series, Laurent series, isolated singularities, residue theory and applications, and conformal mappings.

Title
Complex algebra, analytic functions, infinite series, etc.

Tags
204927, 1

Learning Outcome
This course is aimed at graduates majoring in mathematical and physical sciences and engineering. In addition to being an important branch of mathematics in its own right, complex analysis is an important tool for differential equations (ordinary and partial), algebraic geometry and number theory. Thus it is a core requirement for all mathematics majors. It contributes to all the expected learning outcomes of the Mathematics BS degree.For more detailed information visit the Math 352 Wiki page.

MATH 362 - Survey of Geometry

Course Information

Teaching Area (new)
MATH

Course Number
362

Teaching Area
MATH

Course Title
Survey of Geometry

Course Description
Logical and historical development of Euclidean and non-Euclidean geometry, transformations and symmetry; relationships among axiomatic systems; use of software and other geometric models; proofs and Van Hiele levels.

Department
Mathematics

When Taught
Fall, Winter, Spring

Credit Hours

Min:

Type
Prerequisite

Prerequisites

Complete ALL of the following Courses:

- MATH 290 - Fundamentals of Mathematics

Learning Outcomes

Title
Knowing and Learning Geometry

Tags
204853, 1

Learning Outcome
Students understand central objects, concepts, relationships, definitions, and theorems of Euclidean geometry, how adolescents come to understand these, and the canonical examples and alternative approaches germane to teaching secondary school geometry.

Title
Multiple Geometries

Tags
204858, 3

Learning Outcome
Students understand and can describe the relationships among neutral, Euclidean, and non-Euclidean geometries in terms of fundamental geometric concepts, objects, and properties (particularly parallelism), and can use the fundamental properties of axiom systems and models to provide convincing arguments about these relationships.

Title
Communicating Geometric Ideas and Arguments

Tags
204862, 2

Learning Outcome
Students can communicate geometric ideas effectively using a variety of appropriate representations and can construct valid proofs of geometric theorems within a given axiom system.

MATH 371 - Abstract Algebra 1.

  AND MATH 290 - Fundamentals of Mathematics

Learning Outcomes

Title
Groups, group homomorphisms, rings, ideals, and polynomials.

Tags
204929, 1

Learning Outcome
This course is aimed at undergraduate mathematics and mathematics education majors. It is a first course in abstract algebra. In addition to being an important branch of mathematics in its own right, abstract algebra is now an essential tool in number theory, geometry, topology, and, to a lesser extent, analysis. Thus it is a core requirement for all mathematics majors. Outside of mathematics, algebra also has applications in cryptography, coding theory, quantum chemistry, and physics. For more detailed information visit the Math 371 Wiki page.

MATH 372 - Abstract Algebra 2.

Course Information

Teaching Area (new)
MATH

Course Number
372

Teaching Area

Learning Outcomes

Title
Fields, Galois theory, solvability of polynomials by radicals

Tags
204930, 1

Learning Outcome
Students should achieve mastery of the topics listed in the minimal learning outcomes on the Math 372 Wiki page. This means that they should know all relevant definitions, correct statements of the major theorems (including their hypotheses and limitations), and examples and non-examples of the various concepts. The students should be able to demonstrate their mastery by solving non-trivial problems related to these concepts, and by proving simple (but non-trivial) theorems about the below concepts, related to, but not identical to, statements proven by the text or instructor.

MATH 380 - Mathematical Foundations of Data Science

Course Information

Teaching Area (new)

Learning Outcome
Students should gain a familiarity with how the disciplines of mathematics and biology can complement each other. Increasingly, mathematics is used to understand complex biological systems. Without some familiarity with the mathematical techniques, it is difficult to know how to interpret the results. In this class, a variety of applications to medicine and biology will be studied, highlighting the different mathematical techniques. The objective of the class is not only to introduce the students to various applications and methods but also to help determine the strengths and weaknesses of different methods. For more detailed information visit the Math 425 Wiki page.

Prerequisites

Complete ALL of the following Courses:

- MATH 334 - Ordinary Differential Equations
  AND MATH 346 - Mathematical Analysis 2
  AND MATH 323 - Algorithm Design and Optimization 2 Laboratory

Other Prerequisites
concurrent enrollment in Math 437.

Learning Outcomes

Title
Introduction to the modeling and qualitative theory of differential equations

Tags
205022, 1

Learning Outcome
Introduction to the modeling and qualitative theory of differential equations, both ordinary and partial. Specific topics include: existence/uniqueness of ordinary differential equations (ODE), stability theory for smooth continuous dynamical systems, modeling with ODEs, bifurcation theory, modeling with partial differential equations (PDE), method of characteristics, parabolic operators and viscous effects, conservation laws, Sturm-Liouville operators, eigenfunction expansions, and Green's functions.
For detailed information about desired learning outcomes visit the Math 436 Wiki page.

MATH 437 - Modeling with Dynamics and Control 1 Laboratory

Title
Overview

Tags
204946, 2

Learning Outcome
This course is designed to prepare students to solve linear algebra problems arising from many applications such as mathematical models of physical or engineering processes. Students are introduced to modern concepts and methodologies in numerical linear algebra, with particular emphasis on the methods that can be used to solve very large-scale problems. In-depth discussion of theoretical aspects such as stability and convergence will be used to enhance student understanding of the numerical methods. Students will also be required to perform some programming and computation so as to gain experience in implementing and observing the numerical performance of the various numerical methods. For more detailed information visit the Math 510 Wiki page.

Overview

Tags
204951, 2

Learning Outcome
This course is designed to prepare students to solve mathematical models represented by initial or boundary value problems involving partial differential equations that cannot be solved directly using standard mathematical techniques but are amenable to a computational approach. Numerical solution of partial differential equations has important applications in many application areas. Students are introduced to the discretization methodologies, with particular emphasis on the finite difference method, that allows the construction of accurate and stable numerical schemes. In-depth discussion of theoretical aspects such as stability analysis and convergence will be used to enhance the students' understanding of the numerical methods. Students will also be required to perform some programming and computation so as to gain experience in implementing the schemes and to be able to observe the numerical performance of the various numerical methods. For more detailed information visit the Math 511 Wiki page

Learning Outcome
Students should understand the topics listed in the minimal learning outcomes on the Math 547 Wiki page. As evidence of that understanding, students should be able to demonstrate mastery of all relevant vocabulary, familiarity with common examples and counterexamples, knowledge of the content of the major theorems, and ability to make direct application of those results to related problems, including calculations.

MATH 553 - Foundations of Topology 1

Course Information

Teaching Area (new)
MATH

Course Number
553

Teaching Area
MATH

Course Title
Foundations of Topology 1

Course Description
An introduction to the topology of the plane and algebraic topology: simplicial complexes, CW-complexes, the fundamental group, classification of covering spaces, homotopy, Seifer-van Kampen Theorem, Jordan Curve Theorem, and Invariance of Domain.

Department
Mathematics

When Taught
Fall

Credit Hours

Other Prerequisites
Math 341 or equivalent.

Learning Outcomes

Title
Overview

Tags
204888, 2

Learning Outcome

Set Theory
Topological Spaces
Continuous Functions
Connectedness
Compactness
Tychonoff Theorem
Countability and Separation Axioms
Countable basis
Countable dense subsets
Normal spaces
Urysohn Lemma
Tietze Extension Theorem
Metrization
Complete Metric Spaces

Title

204977, 1

Learning Outcome
Students should know all relevant definitions, correct statements of the major theorems (including their hypotheses and limitations), and examples and non-examples of the various concepts. The students should be able to demonstrate their mastery by solving non-trivial problems related to these concepts, and by proving simple (but non-trivial) theorems about the concepts below, related to, but not identical to, statements proven by the text or instructor. For more detailed information visit the Math 553 Wiki page.

MATH 554 - Foundations of Topology 2

Course Information

Teaching Area (new)
MATH

Course Number
554

Teaching Area
MATH

Course Title
Foundations of Topology 2

Course Description
An introduction to the topology of manifolds with particular emphasis on low dimensions: topological and smooth manifolds; smooth maps; tangent spaces; vector fields and flows; Sard's Theorem; Morse Theory; classification of compact manifolds in dimensions 1 and 2; and theory of 3 dimensional manifolds.

Department
Mathematics

When Taught
Winter Even Years

Learning Outcomes

Title
Communication Skills

Tags
197817, 1

Learning Outcome
In both written and spoken target language, communicate with reasonable accuracy about real-world activities with well-educated members of the target-culture accustomed to dealing with non-native speakers.

Title
Comprehension

Tags
197818, 2

Learning Outcome
Understand every-day written and verbal instructions. Comprehend concrete details and global meaning of intermediate-level written and spoken passages related to familiar topics that native speakers encounter routinely in their daily life.

Title
Cultural Knowledge

Tags
197819, 3

Learning Outcome
Discuss in the target language cultural practices related to every-day life in the target culture. Acquire basic background knowledge of important achievements related to the target culture (historical figures and events, major literary and artistic movements, government and religious institutions, etc.).

Title
General Education Requirements

Tags

Instructor's consent.

Learning Outcomes

Title
Defined Special Purpose

Tags
197821, 1

Learning Outcome
Develop the overall language and cultural competence to meet the needs of a "special" purpose identified by the Center for Language Studies.

Title
Communication

Tags
197822, 2

Learning Outcome
Communicate effectively enough to function in a variety of situations likely to be encountered when dealing with native speakers associated with the special purpose. This may include interpersonal, interpretive, and presentational (written and oral) modes of communication.

Title
Cultural Competence

Tags
197823, 3

Learning Outcome
Interact with cultural competence and understanding when dealing with native speakers associated with the special purpose.

Learning Outcomes

Title
Time Management

Tags
176807, 9

Learning Outcome
Independently manage time and workload for a variety of tasks.

Title
Financial Statements

Tags
176842, 0

Learning Outcome
Construct and interpret both a balance sheet and an income statement.

Title
Solving Problems in a Group Setting.

Tags
176865, 6

Learning Outcome
Discuss accounting issues and solve accounting problems in a time-constrained group setting.

Title
Using Excel Spreadsheets

Tags
176871, 5

Learning Outcome
Construct and use simple Excel spreadsheets in a financial accounting setting.

Title
Statement of Cash Flows

Tags
176872, 1

Learning Outcome
Construct and interpret a statement of cash flows.

Title
Financial Accounting Internationalization

Tags
176879, 8

Learning Outcome
Track the ongoing internationalization of financial accounting.

Title
Ethical Problems

Tags
176915, 7

Learning Outcome
Intelligently discuss the ethical dimensions of a variety of accounting-related business problems.

Title
Applying Financial Accounting Rules

Tags
176918, 2

Learning Outcome
Apply the financial accounting rules that exist in the following areas.a. Revenue recognitionb. Inventoryc. Compensation (including pensions and options)d. Long-term assets (including impairment)e. Bondsf. Leases (including the financial ratio impact of operating leases)g. Stockholders’ equity (including accumulated other comprehensive income)h. Investment securities (including derivatives)i. Fair value accountingj. Foreign currency transactions and translation

Title
Time Value of Money

Tags
176921, 4

Learning Outcome
Employ the time value of money in a financial accounting context.

Title
Online Learning Resources

Tags
176924, 6

Learning Outcome
Be able to use online learning resources.

MBA 502 - Managerial Accounting 1

Title
Evaluating IT Investments

Tags
176868, 1

Learning Outcome
Set priorities for activities in an IT function. Learn a structured process for evaluating potential systems investments.

Title
Analyze IT Outsourcing/Off-shoring

Tags
176923, 3

Learning Outcome
Analyze the pros and cons of IT outsourcing/off-shoring.

Title
Relevance of IT for Business Leaders

Tags
176929, 2

Learning Outcome
Describe the relevance of IT for business leaders.

Title
Strategic Planning Using IT

Tags
176947, 0

Learning Outcome
Take part in strategic planning using IT in business contexts where IT plays an important role. Understand the competitive implications of information technology.

MBA515 - Experience Design

Course Information

Course Number
515

Teaching Area
MBA

Course Title
Experience Design

Course Description
Methodologies to design and deliver high quality experiences focused on achieving specific outcomes by being curious, empathetic and creative.

Department
Business

When Taught
Winter

Credit Hours

Fixed/Max:
3

Lecture Hours

Fixed:
2.5

Learning Outcomes

Title
Curiosity and Creativity

Learning Outcome
Students will become more curious and creative as they redefine their personal concepts of curiosity and creativity and develop increased competence by engaging in a variety of individual and group projects.

Title
Conceptualize and Analyze Experiences

Learning Outcome
Students will be able to conceptualize and analyze experiences utilizing key experience design concepts such as structured experiences, experience phases, experience types, experiencescape elements, and experience related theories.

Title
Human Centered Design

Learning Outcome
Students will be able to apply the design thinking process to develop innovative solutions to address their most pressing personal and professional challenges.

Title
Experience Design

Learning Outcome
Students will be able to design intentional experiences using experience mapping, narrative structure, touchpoint design, and other experience-based tools.

Title
Christlike Design

Learning Outcome
Students will be able to integrate gospel methodology into their experience design work.

MBA 520 - Business Finance

Course Information

Simple Requisites

Prerequisite

Type
Prerequisite

Prerequisites

Fulfill ANY of the following requirements:

Prerequisites

Complete ALL of the following Courses:

- MBA 501 - Corporate Financial Reporting
  AND MBA 520 - Business Finance

OR

Prerequisites

Complete ALL of the following Courses:

- ACC 310 - Principles of Accounting 2
  AND FIN 401 - Advanced Financial Management

Learning Outcomes

Title
Valuation

Learning Outcome
Utilize various model types in an Excel-based financial model in order to value public companies.

Title
Data

Learning Outcome
Translate publicly available company data into a working, dynamic financial model in Excel.

Title
Scenario Analysis

Learning Outcome
Analyze impacts of different model scenarios and justify assumptions that drive a financial model.

Title
Advanced Excel

Learning Outcome
Demonstrate advanced use of Microsoft Excel, including extensive use of keyboard shortcuts, complex functions, and forecasting tools.

MBA525 - Financial Statement Analysis

Course Information

Course Number
525

Teaching Area
MBA

Course Title
Financial Statement Analysis

Course Description
Focus on using corporate financial statements to make business and investment decisions. Learn to use accounting information in a variety of decision contexts, including strategic ratio analysis, earnings quality analysis, credit risk analysis, building pro forma financial statements and security valuation. Emphasis will be given to practical applications and cultivating your analytical skills.

Learning Outcomes

Title
Strategy

Tags
214003, 0, 1, 2023-08-29 10:50:58

Learning Outcome
Assess the firm and its strategy within the context of its industry.

Title
Analysis

Tags
214004, 0, 2, 2023-08-29 10:50:59

Learning Outcome
Analyze company performance and financial position using ratio analyses and other analytical procedures.

Title
Assess Quality

Tags
214005, 0, 3, 2023-08-29 10:51:01

Learning Outcome
Utilize the tools and techniques used to assess the “quality” of firms reported earnings and financial position.

Title
Financial information

Tags
214006, 0, 4, 2023-08-29 10:51:02

Learning Outcome
Application of financial information in equity markets.

Title
Forecast

Tags
214007, 0, 5, 2023-08-29 10:51:04

Learning Outcome
Develop the ability to forecast financial performance and to build pro forma financial statements.

Title
Communication

Tags
214008, 0, 6, 2023-08-29 10:51:06

Learning Outcome
Communicate the results of technical analyses verbally and in writing.

Title
Deal with Ambiguity

Tags
214009, 0, 7, 2023-08-29 10:51:07

Learning Outcome
Overcome “controlled” ambiguity.

MBA 529 - Strategic Logistics Management

Course Information

Teaching Area (new)
MBA

Course Number
529

Teaching Area
MBA

Course Title
Strategic Logistics Management

Course Description
Applying and integrating logistics-related topics, including materials management, physical distribution, inventory management, warehousing, logistics network design, customer service, packaging, and materials handling.

When Taught
Winter

Credit Hours

Min:
3

Fixed/Max:
3

Note
Primarily for 1st year OBHR track MBA students to help them prepare for their internships. Other graduate students who are interested in change management are also welcome.

Learning Outcomes

Title
Diagnosing Performance

Tags
176989, 0

Learning Outcome
Diagnose the key characteristics of individuals, organizations, and organizational subunits that influence their performance

Title
Analyzing Performance Gaps

Tags
176990, 1

Learning Outcome
Investigate and identify the root causes of performance gaps at the individual, subunit, and organizational levels

Title
Improving Performance

Tags
176991, 2

Learning Outcome
Design interventions to ameliorate performance gaps and evaluate the likelihood that an intervention will successfully meet its objectives

Title
Evaluating Interventions

Tags
176992, 3

Learning Outcome
Evaluate the effectiveness of an intervention after implementation.

MBA 538 - Advanced People Analytics

Course Information

Course Number
538

Teaching Area
MBA

Course Title
Advanced People Analytics

Course Description
Examine how the use of data can improve people processes across the organization and the employee lifecycle. Focus on how managers can use analytics to make more effective people-related decisions.

Title
Preparing managers for family/work issues

Tags
207193, 1

Learning Outcome
Effectively deal with work/family issues in the workplace.

Title
Academic Scholarship

Tags
207194, 2

Learning Outcome
Understand the distinguishing features of "academic scholarship."

Title
Theoretical Contribution

Tags
207195, 3

Learning Outcome
Understand what theory is and isn't and what constitutes a theoretical contribution.

Title
Role of Theory

Tags
207196, 4

Learning Outcome
Understand the role of theory in different kinds of scholarly investigations.

Title
Understanding work/family research

Tags
207197, 5

Learning Outcome
Be intelligent consumers of work/family research.

Title
Theoretical Argument Modeling

Tags
207198, 6

Learning Outcome
Model a theoretical argument.

Title
Teaching others to deal with work/family issues

Tags
207199, 7

Learning Outcome
Effectively teach others to deal with work/family issues in a variety of settings.

Title
Organizational Behavior Theory and Research

Tags
207200, 8

Learning Outcome
Understand the difference between behavior in organizations and behavior of organizations and the implications for organizational behavior theory and research.

"Play to Strength"

Tags
176747, 3

Learning Outcome
Use hierarchical values maps to specify a “play to strength” marketing strategy.

Title
Conjoint Analysis

Tags
176787, 4

Learning Outcome
Use conjoint analysis to design a new product or service.

Title
Target Segments and Product Positioning.

Tags
176811, 2

Learning Outcome
Use factor analysis, partial correlation analysis, and means analysis to build quantitative hierarchical value maps to better understand the segment(s) we target and how to position product.

Title
Factor and Cluster Analysis

Tags
176849, 0

Learning Outcome
Use factor analysis and cluster analysis to uncover and understand the segments in a marketplace.

MBA 554 - Internet Marketing

Course Information

Teaching Area (new)
MBA

Course Number

Learning Outcomes

Title
Creative Brief

Tags
176762, 1

Learning Outcome
Develop ability to create and communicate critical components of a creative brief.

Title
Marketing Communications

Tags
176796, 0

Learning Outcome
Develop critical skills to plan, develop, and evaluate marketing communications.

Title
Financial Impact

Tags
176820, 2

Learning Outcome
Become proficient in calculating the financial impact of marketing communications and trade promotions on the firm.

Title
Social, Legal, Ethical

Tags
176848, 3

Learning Outcome
Understand the social, legal, and ethical considerations involved in the promotional planning process.

MBA 560 - Business Analytics

Course Information

Teaching Area (new)
MBA

Course Number
560

Teaching Area
MBA

Course Title
Business Analytics

Course Description
This course helps novice analysts become good and good analysts better, empowering all students—even non–data scientists—to interpret reports, dive into analytics, and make informed, data-driven decisions for better business insights.

Department
Business

When Taught
Winter

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Learning Outcomes

Title
Introduce Business Analytics

Learning Outcome
Understand how to apply various tools and techniques depending on the business problem and the data available

Title
Research Design

Learning Outcome
Demonstrate an ability to design research studies to address business problems

Title
Data Visualization

Learning Outcome
Use the appropriate data visualization technique to summarize and understand data

Title
Statistical Testing

Learning Outcome
Understand and use statistical testing as it applies to business problems

Title
Advanced Modeling

Learning Outcome
Create advanced statistical models such as regression, clustering, conjoint analysis, and text analytics

Title
Advanced Software

Learning Outcome
Use advanced data analytics software such as Microsoft Excel, Qualtrics, SQL, PowerBI, and AI-based analysis

MBA570 - Entrepreneurial Innovation

Course Information

Course Number
570

Teaching Area
MBA

Course Title
Entrepreneurial Innovation

Course Description
Management of the class of business problems characterized by uncertainty. Design and execute experiments to dispel uncertainty. Learning by experience with entrepreneurial innovations. Find an unknown need, solve it, and validate the innovation with target customers.

Department
Business

When Taught
Winter

Credit Hours

Fixed/Max:
1.5

Lecture Hours

Fixed:
1.5

Learning Outcomes

Title
Experiment

Tags
214013, 0, 1, 2023-08-29 10:51:13

Learning Outcome
Design and conduct experiments to dispel uncertainty about customer needs and solutions.

Title
Unknown Needs

Tags
214014, 0, 2, 2023-08-29 10:51:19

Learning Outcome
Gather ethnographic data about people and exercise empathy to identify unknown, unmet needs

Title
Creative Solutions

Tags
214015, 0, 3, 2023-08-29 10:51:21

Learning Outcome
Generate creative ideas for solutions to customer needs

Title
Prototype

Tags
214016, 0, 4, 2023-08-29 10:51:22

Learning Outcome
Test the efficacy of solutions to solve customer needs with prototypes

MBA572 - Entrepreneurial Analytics

Course Information

Course Number
572

Teaching Area
MBA

Course Title
Entrepreneurial Analytics

Course Description
Analysis of expected profitability of startups. Students collect and analyze data to estimate customer demand, cost, and profit and then make decisions to help startups profitably enter and compete in markets.

Department
Business

When Taught
Winter

Credit Hours

Fixed/Max:
3

Lecture Hours

Fixed:

Learning Outcomes

Title
Experiment

Tags
214017, 0, 1, 2023-08-29 10:51:24

Learning Outcome
Design and execute experiments to test hypotheses about customer pains and solution.

Title
Estimate expected profitability

Tags
214018, 0, 2, 2023-08-29 10:51:28

Learning Outcome
Calculate expected profitability of an innovation based on analysis of customer demand, revenue, cost, and competition.

Title
Launch / No launch

Tags
214019, 0, 3, 2023-08-29 10:51:29

Learning Outcome
Decide whether to launch a new venture based on analysis of profit and entry barriers.

MBA 574 - Creating the Virtuous Organization

Course Information

Teaching Area (new)
MBA

Course Number
574

Teaching Area
MBA

Course Title
Creating the Virtuous Organization

Course Description
This course explores the role of business in creating a Zion community, using the lens of organizational virtue as a starting point. Students will actively engage in creating thought leadership for incorporating principles of Zion-patterned governance in business and market institutions, as well as engaging readings on this topic from a variety of religious, scholarly, and popular sources. Students will apply their work to contemporary issues in the practice of business management and work to build a cohesive school of thought that can be shared with a variety of internal and external audiences.

Learning Outcomes

Title
Analyzing Competitive Situations

Tags
176760, 1

Learning Outcome
Use strategy concepts and models of strategic management presented in class to analyze the competitive situation facing a firm.

Title
Achieving a Competitive Advantage

Tags
176845, 2

Learning Outcome
Apply the models of strategic management presented in the course to arrive at recommendations that will help organizations achieve and sustain competitive advantage.

Title
Communicating Conclusions

Tags
176854, 3

Learning Outcome
Persuasively communicate analytical conclusions and recommendations in verbal and written form.

Title
Role of the Business Leader

Tags
176952, 4

Learning Outcome
Appreciate the roles, responsibilities, and potential influence of business leaders in the strategy process.

Title
Models of Strategic Management

Tags
176976, 0

Learning Outcome
Understand the concepts and models of strategic management presented in the course.

MBA 581 - Competitive Strategy and Analysis

Course Information

Teaching Area (new)
MBA

Course Number
581

Teaching Area
MBA

Course Title
Competitive Strategy and Analysis

Course Description
The application of??various tools in micro-economic theory (demand, cost, production, oligopoly, game, etc.), strategic frameworks (strategic groups, portfolio analysis, diagnostic tools, etc.), and statistical analysis (regression, factor, cluster, etc.) to provide students with a broad exposure to the kinds of strategic analysis that yield key insights for managers engaged in the work of strategy. Applications fall into categories of competition, customers, costs, and capabilities.??Beyond the development of analytical skills, the course also aims to provide practice in delivering strategic insights to managers by assigning students to work on a project for a company of their choosing.

When Taught
Winter

MBA 584 - Introduction to Global Management

Course Information

Teaching Area (new)
MBA

Course Number
584

Teaching Area
MBA

Course Title
Introduction to Global Management

Course Description
Global management frameworks such as national culture, the CAGE model of distances or differences (cultural, administrative, geographic and economic), a "flat" vs. "spiky" world, and applying such to functional areas of business (marketing, HR, finance, etc.).

When Taught
Winter

Credit Hours

Min:
1.5

Fixed/Max:
1.5

Lecture Hours

Fixed:
2

Lab Hours

Fixed:
0

Learning Outcomes

Title
CAGE Framework

Tags
207201, 1

Learning Outcome
Apply the leading frameworks of international business context, such as national culture, the CAGE model of distance, a "flat" vs. "spiky" world, as well as taxonomies of emerging/powerful markets such as BRIC, MIST/MINT countries, etc. Recognize and share current events in world business that illustrate this framework (and the content of the rest of the learning outcomes).

Title
Characteristics of a Global Industry

Tags
207202, 2

Learning Outcome
Understand the complexities of expansion, in general, into global markets--that is, the pitfalls and opportunities that companies face as they seek new, foreign customers for their products and services.

Title
Foreign Markets

Tags
207203, 3

Learning Outcome
Deepen and apply global learning to functional areas of business such as finance (e.g. foreign exchange), marketing (e.g. new product development worldwide), supply chain (e.g. outsourcing and offshoring) and human resource management (e.g. global teams and expatriate assignments). Understand how the concepts of culture, political systems, etc. apply to the various aspects of managing a business.

Title
Managing Multi-National Enterprises (MNE)

Tags
207204, 4

Learning Outcome
Integrate knowledge from other core courses in the MBA program that span across functional areas (e.g., ethics, strategy, etc.) to learn how global management fits into a "putting it all together" approach to running a cross-national enterprise.

MBA 588 - Healthcare Industry Dynamics

Course Information

Teaching Area (new)
MBA

Course Number
588

Teaching Area
MBA

Course Title
Healthcare Industry Dynamics

Course Description
A broad study of the many interconnected components of the healthcare industry, including medical technology, pharmaceuticals, hospital administration, healthcare policy, insurance, public health, etc. Introductory applications of various functional skills to healthcare (e.g., accounting, data analytics, ethics, finance, human resources, information systems, marketing, operations, organizational behavior, strategy, supply chain management, and other specializations).

When Taught
Winter

Credit Hours

Min:
3

Fixed/Max:
3

Fixed:
3

Lab Hours

Fixed:
0

Learning Outcomes

Title
Understand the Healthcare Industry

Tags
214708, 0, 1

Learning Outcome
Demonstrate an understanding of the various components of the healthcare industry

Title
Apply Functional Specialties to Healthcare

Tags
214709, 0, 2

Learning Outcome
Apply functional specialties to challenges specific to the healthcare industry

Title
Work in Teams

Tags
214710, 0, 3

Learning Outcome
Demonstrate an ability to function in a team setting

Title
Articulate Healthcare Industry Complexities

Tags
214711, 0, 4

Learning Outcome
Articulate the most important complexities of the healthcare industry

MBA 593R - Management Seminar

Course Information

Teaching Area (new)
MBA

MBA 595 - Razor's Edge: Intentional Principles for Leading and Thriving

Course Information

Teaching Area (new)
MBA

Course Number
595

Teaching Area
MBA

Course Title
Razor's Edge: Intentional Principles for Leading and Thriving

Course Description
Preparing students to intentionally thrive on three levels: 1) personally, 2) in their family, and 3) as business leaders. Review of the literature around the myths of happiness, and exploration of motivation (self-determination theory) and positive psychology (positive emotion, engagement, relationships, meaning and achievement). Implications of technology, nature, essentialism, GRIT, and physical and spiritual well-being. A 2-day learning adventure provides an experiential context to live and experience the principles studied in a real world context. Each student creates a plan to thrive.

When Taught
Fall and Winter

Credit Hours

Min:

Learning Outcomes

Title
Foundational Theories

Tags
207205, 1

Learning Outcome
Demonstrate a working knowledge of relevant theory and research in motivation and positive psychology.

Title
Applications

Tags
207206, 2

Learning Outcome
Apply principles from motivation and positive psychology to intentionally thrive on a personal, family and professional level.

Title
Implications

Tags
207207, 3

Learning Outcome
Become a leader who can intentionally create engaging work environments and thriving corporate cultures.

MBA 598R - Curricular Practical Training

MBA

Course Title
Academic Internship

Course Description
Supervised experience for MBA students in business-related work. Opportunity to connect learning with practical field application.

Department
Business

When Taught
Fall and Winter

Credit Hours

Min:
0.5

Fixed/Max:
3

Other Prerequisites
Application and approval required

Recommended
Visit BYU Marriott MBA Program in W437 TNRB

Note
An APPROVED Internship Application is required before adding. Students must contact the Internship Office immediately after registering to learn about class requirements.

Learning Outcomes

Title
Networking

Learning Outcome
Network with professionals and identify possible mentors.

Title
Enrich future course work

Learning Outcome
Return with experiences that will enrich future course work.

Title
Professional competence

Learning Outcome
Demonstrate professional competence and ability to complete assigned tasks and meet the company's expectations

MDT 161 - Voice Technique 1

Course Information

Type
Prerequisite

Prerequisites

Complete ALL of the following Courses:
- MUSIC 113 - Beginning Piano Techniques 1

Other Prerequisites
Music dance theatre (MDT) major status. Placement exam

Learning Outcomes

Title
Sight Reading

Learning Outcome
Students will confidently sight read any new piece of music placed in their hands.

Title
Piano Skills

Learning Outcome
Students will accompany themselves from the chord symbols in sheet music

Title
Accompanying Skills

Learning Outcome
Students will 'fill in" at the piano whenever the accompanist is absent.

Title
Accompaniment Styles

Learning Outcome
Students will create functional, pleasant accompaniments to their vocals using chord symbols.

Title
Self Confidence

Learning Outcome
Students will discover a new level of confidence based on increased competence.

Title
Class Discussion

Learning Outcome
Through class discussion students will examine BYU's core values and how they can be applied in future career paths.

MDT 300 - Musical Theatre History

Course Information

Teaching Area (new)

Prerequisites

Complete ALL of the following Courses:

- MDT 229 - Musical Scene Study
- MDT 290 - Music Theory for MDT Majors

Enroll in the following Courses:

- MUSIC 360R - Performance Instruction: Contemporary Voice

Other Prerequisites
BFA MDT major status

Learning Outcomes

Title
Outcome 1

Learning Outcome
Text analysis and performance: students will demonstrate their knowledge and contemporary response to historical performance practices in performance projects and presentations.

Title
Outcome 2

Learning Outcome
Self-directing: students will balance the demands of integrating introductory directing, music directing and choreography skills in performances.

Title
Outcome 3

Learning Outcome
Professionalism: students will practice professional work habits of dependability, punctuality, preparation, collaboration and the ability to make independent choices.

ME EN 101 - Static Systems in Mechanical Engineering

Course Information

Teaching Area (new)
ME EN

Course Number
101

Teaching Area
ME EN

Course Title
Static Systems in Mechanical Engineering

Course Description
Analysis and design of static systems; real world problem solving; forces, moments, and vectors, equilibrium; external and internal forces; centroids and inertia; mechanical engineering fundamentals.

Department
Mechanical Engineering

When Taught
Fall, Winter, Spring

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Simple Requisites

Prerequisites

Type
Prerequisite

Prerequisites

Complete ALL of the following Courses:

- MATH 112 - Calculus 1
  AND PHSCS 121 - Introduction to Newtonian Mechanics

Learning Outcomes

Title
Forces and Moments

Tags
180755, 2

Learning Outcome
1. An understanding of forces and moments and an ability to perform mathematical manipulation of them using vector analysis.

Title
Free Body Diagrams

Tags
180756, 1

Learning Outcome
2. An ability to construct free-body diagrams and to calculate the reactions necessary to ensure static equilibrium for particles and rigid bodies.

Title
Systems of Forces and Moments

Tags
180757, 3

Learning Outcome
3. An understanding of the analysis of systems of forces and moments and distributed loads and an ability to determine internal forces and moments in members.

Title
Problem Solving

Tags
180758, 5

Learning Outcome
4. An ability to use a structured problem-solving approach (SAFER) to solve problems and use computing tools to explore solutions by changing variables.

Title
Calculating Centroids and Moments of Inertia

Tags
180759, 6

Learning Outcome
5. An ability to calculate centroids and moments of inertia of 2-D and 3-D objects.

Title
Friction

Tags
180761, 10

Learning Outcome
6. An understanding of friction and how to model it in static systems.

Title
Design Process

Tags
180828, 4

Learning Outcome
7. An understanding of the basic design process, including professional and ethical responsibilities, and an ability to apply that process to design, build, and test a static structure to meet competing constraints.

Title
Real World Applications

Tags
180829, 8

Learning Outcome
8. An ability to describe the ME EN Real-world Problem Solving Process and to transform real world scenarios (using the 5 P's) into analyzable statics problems.

Title
Communication

Tags
180830, 9

Learning Outcome
9. An ability to effectively communicate the results, and objectives of an engineering analysis or design to others through a full report using the IMRaD approach and to write a cohesive "Introduction."

Title
Mechanical Engineering Career Development

Tags
180760, 0, 7

Learning Outcome
10. An understanding of Mechanical Engineering as a discipline and how statics principles relate to core ME EN topics and to becoming an influential engineer.

ME EN 191 - New Student Seminar

Course Information

Teaching Area (new)
ME EN

Course Number
191

Teaching Area
ME EN

Course Title
New Student Seminar

Course Description
Topics of special interest to new mechanical engineering majors.

Department
Mechanical Engineering

When Taught
Fall and Winter

Credit Hours

Min:
0.5

Fixed/Max:
0.5

Lecture Hours

Fixed:
1

Lab Hours

Fixed:
0

Note
Required of all first-semester freshman and transfer students.

Learning Outcomes

Title
Discipline of ME

Tags
180831, 0

Learning Outcome
1. Students will be familiar with the discipline of mechanical engineering, including several sub-disciplines.

Title
Outcomes

Tags
180832, 1

Learning Outcome
2. Students will be familiar with the mechanical engineering program at BYU, including outcomes, advising opportunities, facilities and application process.

Title
Career Opportunities

Tags
180833, 2

Learning Outcome
3. Students will understand types of career opportunities in mechanical engineering and procedures for securing an internship.

Title
Design Process

Tags
180834, 3

Learning Outcome
4. Students will be introduced to the design process, including meeting customer needs from within the context of function, safety, aesthetics, manufacturability, etc.

Title
AIMS

Tags
180835, 4

Learning Outcome
5. Students will appreciate the value of being independent learners, taking responsibility for their education, and exemplifying the aims of a BYU education.

Title
Technical Writing

Tags
180836, 5

Learning Outcome
6. Students will be able to use the acronym IMRaD to describe the elements of technical writing.

ME EN 199R - Academic Internship: International Students

Course Information

Teaching Area (new)
ME EN

Course Number
199R

Teaching Area
ME EN

Course Title
Academic Internship: International Students

Course Description
Credit is given for the documentation of work done during during an internship that is approved and provides practical experience in Mechanical Engineering.

Department
Mechanical Engineering

When Taught
Fall; Winter; Spring; Summer.

Credit Hours

Fixed/Max:
0.5

Lecture Hours

Fixed:
0

Lab Hours

Fixed:
0

Other Prerequisites
Consent of both department internship coordinator and international office advisor.

Note
An APPROVED Internship Application required before adding. Follow the Department Pre-registration Instructions prior to Internship Application.

Learning Outcomes

Title
Converting Thought into Understanding

Tags
180556, 3

Learning Outcome
Student demonstrates the ability to use reflective thinking to convert professional experience into academic understanding.

Title
Professional Communication

Tags
180667, 2

Learning Outcome
Student demonstrates professional communication skills (report).

Title
Professional Experiences

Tags
180700, 1

Learning Outcome
Student acquires professional experiences in the discipline.

ME EN 204 - Dynamics

Course Information

Course Number
204

Teaching Area
ME EN

Course Title
Dynamics

Course Description
Concepts of dynamics applied to particles, systems of particles, rigid bodies, vibration systems, and nonrigid particle systems.

Department
Mechanical Engineering

When Taught
Fall, Winter, Spring

Credit Hours

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:

Completion Requirement

Complete ALL of the following Courses:
- ME EN 101 - Static Systems in Mechanical Engineering

Learning Outcomes

Title
Kinematics of Particles

Tags
214020, 0, 1, 2023-08-29 10:51:38

Learning Outcome
1. Understand the kinematics of particles and analyze rectilinear and curvilinear particle motion using appropriate coordinate systems.

Title
Newton's Laws of Motion

Tags
214021, 0, 2, 2023-08-29 10:51:40

Learning Outcome
2. Understand and apply Newton's Laws to solve for the motion of particles and systems of particles in appropriate coordinate systems.

Title
Work and Energy

Tags
214022, 0, 3, 2023-08-29 10:51:41

Learning Outcome
3. Apply the principles of Work and Energy to solve problems involving particles and systems of particles.

Title
Impulse and Momentum

Tags
214023, 0, 4, 2023-08-29 10:51:43

Learning Outcome
4. Apply the principles of Impulse and Momentum to solve problems, including collisions of particles.

Title
Motion of Rigid Bodies

Tags
214024, 0, 5, 2023-08-29 10:51:45

Learning Outcome
5. Determine the motion of rigid bodies in translation, rotation about a fixed axis, and general planar motion.

Title
Real-world Application

Tags
214025, 0, 6, 2023-08-29 10:51:46

Learning Outcome
6. Apply the laws of dynamics to real-world engineering problems, and draw parallels with spiritual laws to bless your life and career.

Title
Technical Writing

Learning Outcome
7. Develop and write an effective methods section for a technical report.

ME EN 231 - Leadership in a Global Context

Course Information

Teaching Area (new)
ME EN

Course Number
231

Teaching Area
ME EN

Course Title
Leadership in a Global Context

Course Description
Principles of individual and organizational leadership in a global context. Emphasis on developing self-awareness, interpersonal skills, high-performance teams, integrity, vision and strategy. Driving forces for globalization. Valuing and leveraging diversity.

Department
Mechanical Engineering

When Taught
Fall, Winter, Spring

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Note
Sophomore standing strongly encouraged.

Learning Outcomes

Title
Leadership

Tags
209578, 0, 3

Learning Outcome
1. Describe the principles of the Christ-Centered Leadership Model and how they can be applied in their personal life and projected professional environment to further the AIMS of a BYU education.

Title
Professional Responsibility and Integrity

Tags
209579, 0, 4

Learning Outcome
2. Demonstrate an understanding of ethics, character, and professional responsibility and practice in their personal life and projected professional environment.

Title
Self-awareness

Tags
209580, 0, 5

Learning Outcome
3. Describe the importance of key interpersonal competencies (e.g. goal setting, effective verbal and written communication, conflict resolution, influencing others, team-building) necessary for leadership in personal and team contexts.

Title
Personality Types

Tags
209582, 0, 7

Learning Outcome
4. Apply and document a self-assessment process to understand their individual personality traits intrinsic preferences/biases, leadership strengths and weaknesses, personal leadership style, and how others perceive them.

Title
Interpersonal Skills

Tags
209583, 0, 8

Learning Outcome
5. Select one personal, one organizational, and one global awareness skill for improvement and describe how they assessed their progress.

Title
Team Development

Tags
209584, 0, 9

Learning Outcome
6. Practice CCL principles to communicate effectively with a range of audiences.

Title
Diversity

Tags
209585, 0, 10

Learning Outcome
7. Demonstrate an ability to function effectively on a team whose members together provide leadership, create a collaborative environment, establish goals, plan tasks, and meet objectives, contributing to a culture of mutual trust, commitment and accountability.

Title
Vision, Goals, Strategy, Plan

Tags
209586, 0, 11

Learning Outcome
8. Articulate the benefits of belonging, diversity, experience, and skills that individuals bring to a team.

Title
Globalization

Tags
209576, 0, 1

Learning Outcome
9. Describe how cultural factors shape leadership practices, communication, teamwork, and decision-making across global economic, environmental, and social context.

Title
Cultural Influences

Tags
209577, 0, 2

Learning Outcome
10. Understand and apply an appropriate social science process to collect, analyze, and interpret social or behavioral data while recognizing sources of bias that affect ethical decision-making.

ME EN 250 - Science of Engineering Materials

Course Information

Teaching Area (new)
ME EN

Course Number
250

Teaching Area
ME EN

Course Title
Science of Engineering Materials

Course Description
Principles and properties of solid materials and their behavior as applied to engineering.

Department
Mechanical Engineering

When Taught
Fall, Winter, Spring

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Simple Requisites

Prerequisites

Type
Prerequisite

Prerequisites

Complete ALL of the following Courses:

- CHEM 105 - General College Chemistry 1 with Lab (Integrated)
- MATH 112 - Calculus 1

Learning Outcomes

Title
General Material Characteristics

Tags
180510, 0

Learning Outcome
1. Describe the characteristic behaviors and uses of the primary classes of materials (metals, ceramics, polymers, composites)

Title
Structure-Property Relationships

Tags
180514, 2

Learning Outcome
2. Predict the impact that bonding, atomic structure, and defects will have on material properties.

Title
Mechanical Properties and Testing

Tags
180542, 5

Learning Outcome
3. Identify mechanical properties from a stress-strain diagram and describe how processing and changes in structure alter the stress-strain response.

Title
Failure Processes

Tags
180562, 4

Learning Outcome
4. Describe how each basic class of materials can fail by common processes, such as fracture, fatigue, or corrosion.

Title
Phase Diagrams

Tags
180598, 1

Learning Outcome
5. Determine the equilibrium mass fraction and phase compositions from a binary phase diagram and describe characteristics of the microstructure that is likely present.

Title
Phase Transformation

Tags
180698, 3

Learning Outcome
6. Describe how the rates of phase transformations in metals are affected by the processes of diffusion, nucleation, and growth.

Title
Real World Problems

Tags
180837, 7

Learning Outcome
7. Develop engineering problem statements for real-world materials problems using the BYU ME Problem Solving Process.

Title
Materials Selection

Tags
180838, 8

Learning Outcome
8. Select an appropriate material for a real-world application by identifying relevant material property requirements and materials that fulfill them.

Title
Influential Engineer

Tags
180734, 0, 6

Learning Outcome
9. Demonstrate the ability for lifelong service as an influential engineer by solving real world problems considering the economic, environmental and social impact of your decisions.

Title
Writing Communication

Learning Outcome
10. Present and interpret the results of materials data through high-quality figures, tables and lab reports.

ME EN 251 - Discovering the Field of Materials Science

Course Information

Teaching Area (new)
ME EN

Course Number
251

Teaching Area
ME EN

Course Title
Discovering the Field of Materials Science

Course Description
New: Interdisciplinary interactions within the materials science discipline. Mapping the path through a materials science minor. Exposure to facilities and experiential learning opportunities on campus. Preparation for post-baccalaureate employment or education in materials science.

Department
Mechanical Engineering

When Taught
Contact Department

Credit Hours

Recommended
ME EN 250 or CH EN 378

Note
There are no pre-requisites needed for this course

ME EN 272 - Engineering Graphics--Principles and Applications

Course Information

Teaching Area (new)
ME EN

Course Number
272

Teaching Area
ME EN

Course Title
Engineering Graphics--Principles and Applications

Course Description
Comprehensive applications of CAD-based national (ANSI) and international (ISO) graphics standards, including coordinate and geometric dimensioning and tolerancing practices, manufacturing, and product verification procedures.

Department
Mechanical Engineering

When Taught
Fall, Winter, Spring

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
2

Lab Hours

Fixed:
2

Other Prerequisites
Me En professional program for Me En students; or non-Me En major in Engineering and Technology.

Learning Outcomes

Title
Modeling Techniques

Tags
180575, 7

Learning Outcome
1. Understand and use solid and surface modeling techniques found in a modern commercial CAD package.

Title
Create CAD Models

Tags
180614, 6

Learning Outcome
2. Create CAD models of parts/assemblies from Engineering Drawings.

Title
Design Using CAD

Tags
180653, 1

Learning Outcome
3. Use CAD to design and model complex parts/assemblies.

Title
Engineering Drawings

Tags
180762, 4

Learning Outcome
4. Understand, read and create engineering drawings composed of multiple views with standard dimensioning and tolerancing nomenclature.

Title
Mechanical Fits

Tags
180763, 3

Learning Outcome
5. Understand how mating parts should fit together and how to specify limits of fit on an engineering drawing.

Title
Top-Down and Bottom-Up Design

Tags
180764, 2

Learning Outcome
6. Understand and use top-down and bottom-up CAD modeling the approaches and processes used in component and assembly modeling.

Title
Collaboration

Tags
180765, 5

Learning Outcome
7. Collaborate with teammates to learn how to apply CAD tools to design modeling projects.

Title
Communication

Tags
180839, 8

Learning Outcome
8. Communicate the results from CAD work using design packages, renderings, annotated renderings, and animations.

Title
Divine Assistance

Learning Outcome
9. Learn to work in concert with divine assistance to creatively and efficiently accomplish difficult engineering design tasks.

Title
Lifelong Learning and Service

Learning Outcome
10. Understand how effective and thoughtful design can be used to meet the needs of specific groups of people.

ME EN 273 - Introduction to Scientific Computing and Computer-Aided Engineering

Course Information

Teaching Area (new)
ME EN

Course Number
273

Teaching Area
ME EN

Course Title
Introduction to Scientific Computing and Computer-Aided Engineering

Course Description
Computer programming for engineers taught in context of solving physical systems using numerical methods. Student will program solutions using the C++ language, spreadsheets, symbolic solvers, etc.

Department
Mechanical Engineering

When Taught
Fall, Winter, Spring

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
2

Lab Hours

Fixed:
3

Simple Requisites

Prerequisites

Type
Prerequisite

Prerequisites

Complete ALL of the following Courses:

- MATH 113 - Calculus 2

Other Prerequisites
Math 302 or 314 or concurrent.

Learning Outcomes

Title
Linear Systems of Equations

Tags
180588, 3

Learning Outcome
3. Solve linear systems of equations using Gauss elimination, LU decomposition and/or matrix inversion. Understand the concept of matrix condition number.

Title
Modern Numerical Methods

Tags
180708, 2

Learning Outcome
2. Find roots of equations using various modern numerical methods.

Title
Basic Curve Fitting Algorithms

Tags
180714, 4

Learning Outcome
4. Be able to implement basic curve fitting algorithms, including least-squares regression.

Title
Role of Numerical Solutions

Tags
180720, 1

Learning Outcome
1. Understand the role of numerical solutions in the engineering process of design and analysis. Understand how integers and real numbers are stored inside the computer. Understand the limitations associated with numerical solutions, including accuracy due to approximations and round-off error.

Title
Methods for Approximating Derivatives

Tags
180766, 5

Learning Outcome
5. Implement forward and central difference methods for approximating derivatives and the trapezoidal and Simpson's 1/3 rule for numerical integration; estimate round-off and truncation error.

Title
Ordinary Differential Equations

Tags
180767, 6

Learning Outcome
6. Solve simple ordinary differential equations (initial value and boundary value problems) using basic numerical techniques.

Title
Fundamentals of Software Packages

Tags
180768, 8

Learning Outcome
8. Use commercially available software packages, including Excel and MATLAB, to perform basic numerical tasks (calculate equations, graph data, perform curve-fitting, solve linear systems of equations, and manipulate matrices).

Title
C++ Programming

Tags
180840, 7

Learning Outcome
7. Using C++, write programs which use control statements and looping constructs, employ 1D and 2D arrays, call functions, and read and write to data files. Understand classes and pointers at a basic level.

Title
Real World Applications Solving: Explore

Tags
180841, 9

Learning Outcome
9. Learn the BYU ME methodology for exploring the solution space of engineering problems.

Title
Written Communication

Tags
180842, 11

Learning Outcome
11. Effectively communicate the methods and results of scientific computing through extended abstracts or executive summaries.

Title
Real-world Problem Solving: Communicate

Tags
180843, 10

Learning Outcome
10. Be introduced to the importance of clear, concise, and convincing communication and apply these principles in technical reports.

ME EN 275 - Computational Methods in Engineering

Course Information

Course Number
275

Teaching Area
ME EN

Course Title
Computational Methods in Engineering

Course Description
Numerical methods and statistics for engineers, implemented using software and computer programming

Department
Mechanical Engineering

When Taught
Fall, Winter, Spring

Credit Hours

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
2

Simple Requisites

Prerequisites

Type
Completion Requirement

Complete ANY of the following Courses:
- MATH 113 - Calculus 2
  AND C S 110 - How to Program
- MATH 113 - Calculus 2
  AND C S 111 - Introduction to Computer Science

Other Prerequisites
Math 302 or Math 314 or concurrent

Learning Outcomes

Title
Title: Fundamentals of Numerical Methods

Tags
214026, 0, 1, 2023-08-29 10:51:57

Learning Outcome
1. Students will apply fundamental principles of numerical methods (including round-off error, truncation error, and convergence) and a knowledge of methodological advantages and limitations to solve engineering problems.

Title
Numerical Methods – Approximating Integrals and Derivatives

Tags
214027, 0, 2, 2023-08-29 10:51:59

Learning Outcome
2. Students will apply numerical methods fundamentals to appropriately compute approximations of integrals and derivatives.

Title
Numerical Methods – Solving Equations

Tags
214028, 0, 3, 2023-08-29 10:52:00

Learning Outcome
3. Students will apply numerical methods fundamentals to solve non-linear equations and systems of linear equations.

Title
Numerical Methods – Approximating Solutions of Ordinary Differential Equations

Tags
214029, 0, 4, 2023-08-29 10:52:02

Learning Outcome
4. Students will apply numerical methods fundamentals to appropriately compute approximate solutions to ordinary differential equations.

Title
Fundamentals of Statistics

Tags
214030, 0, 5, 2023-08-29 10:52:03

Learning Outcome
5. Students will apply fundamental concepts of statistics (including randomness and uncertainty) and a knowledge of methodological advantages and limitations to solve engineering problems.

Title
Statistics – Descriptions of Data

Tags
214031, 0, 6, 2023-08-29 10:52:04

Learning Outcome
6. Students will apply statistical fundamentals to appropriately describe data distributions using measures of central tendency, spread, and data visualization techniques.

Title
Statistics – Estimating Data Patterns

Tags
214032, 0, 7, 2023-08-29 10:52:06

Learning Outcome
7. Students will apply statistical fundamentals and generalized linear regression to obtain and assess least-squares approximations to data sets.

Title
Statistics – Estimating Statistical Significance

Tags
214033, 0, 8, 2023-08-29 10:52:08

Learning Outcome
8. Students will apply statistical fundamentals to calculate confidence intervals, perform basic hypothesis testing (t-test, paired t-test, etc.), and correctly interpret p-values.

Title
Programming Languages

Tags
214034, 0, 9, 2023-08-29 10:52:09

Learning Outcome
9. Using Excel, MATLAB, and Python, students will perform numerical/statistical analyses using their own code as well as packages/libraries while demonstrating best practices in programming techniques.

Title
Real-World Problem Solving – Explore

Tags
214035, 0, 10, 2023-08-29 10:52:10

Learning Outcome
10. Students will learn the BYU ME methodology for exploring the solution space of engineering problems.

Title
Real-World Problem Solving – Communicate

Tags
214036, 0, 11, 2023-08-29 10:52:15

Learning Outcome
11. Students will be introduced to the importance of clear, concise, and convincing communication and apply these principles by writing effective technical memos.

ME EN 291 - Job Finding Skills

Course Information

Teaching Area (new)
ME EN

Course Number
291

Teaching Area
ME EN

Course Title
Job Finding Skills

Course Description
The purpose of this course is to help students find success in life by learning detailed effective strategies for job finding. The course will teach students efficient techniques to obtain professional employment and will provide information on career planning, interviewing, and professionalism expected in the workplace, including ethics, diversity, and communications.

Lab Hours

Fixed:
1

Simple Requisites

Prerequisites

Type
Prerequisite

Prerequisites

Fulfill ANY of the following requirements:

Prerequisites

Complete ALL of the following Courses:

- MATH 303 - Mathematics for Engineering 2
  AND ME EN 321 - Thermodynamics
  AND ME EN 335 - Dynamic System Modeling and Analysis

OR

Prerequisites

Complete ALL of the following Courses:

- MATH 334 - Ordinary Differential Equations
  AND ME EN 321 - Thermodynamics
  AND ME EN 335 - Dynamic System Modeling and Analysis

Learning Outcomes

Title
Fluid Properties

Tags
180459, 1

Learning Outcome
1. Understand viscosity as a fluid property and be able to compute shear stress involving Newtonian fluids. Understand the phenomena of surface tension and cavitation.

Title
Pressure in Fluids

Tags
180537, 0

Learning Outcome
2. Understand variation in pressure in a static gas or liquid, and be able to compute hydrostatic forces and moments.

Title
Flowing Fluids

Tags
180735, 2

Learning Outcome
3. Be able to evaluate the local, convective, and total acceleration and understand pressure distributions normal to and parallel to streamlines. Be able to appropriately apply Bernoulli's principle and recognize the limitations of it.

Title
Conservation of Mass

Tags
180736, 3

Learning Outcome
4. Be able to apply the integral form of the conservation of mass for steady and unsteady flow situations with uniform or two-dimensional velocity distributions. Recognize and be able to utilize the differential form of conservation of mass.

Title
Global Force/Momentum Balances

Tags
180737, 5

Learning Outcome
5. Be able to apply the integral form of the linear momentum principle and apply global force/momentum balances for stationary and constant velocity frames of reference with uniform or two-dimensional velocity distributions. Recognize the Navier-Stokes equations and solve them for simplified viscous flows.

Title
Dimensional Analysis

Tags
180738, 6

Learning Outcome
6. Be able to determine appropriate dimensionless variables for a given dynamical situation and predict prototype behavior based on similitude, and understand the pitfalls of modelling.

Title
Mechanical Energy Equation

Tags
180739, 7

Learning Outcome
7. Understand the mechanical energy equation and be able to apply it to laminar and turbulent flow with minor and major losses through pipe networks.

Title
Velocity Distributions, Form Drag and Flow Separation

Tags
208077, 9

Learning Outcome
8. Be able to model velocity distributions in flat plate boundary layers in laminar and turbulent flows and to predict skin friction drag. Understand the phenomena of flow separation and its impact on the total drag.

Title
Real World Problem Solving

Tags
208078, 8

Learning Outcome
9. Be able to benefit the world by ethically applying the principles of fluid dynamics through structured techniques (e.g. the 5 Ps of problem definition and SAFER) to solve real-world problems.

Title
Investigate Phenomena and Communicate Results

Tags
208079, 10

Learning Outcome
10. Be able to present results of fluid dynamic phenomena graphically in terms of appropriate dimensionless variables and effectively communicate results.

Title
Divine Assistance

Learning Outcome
11. Be able to recognize that the spirit can influence learning and engineering problem solving and that living gospel principles enables becoming influential engineers who embrace lifelong learning and service.

ME EN 321 - Thermodynamics

Course Information

Teaching Area (new)
ME EN

Course Number
321

Teaching Area
ME EN

Course Title
Thermodynamics

Course Description
Fundamentals of thermal energy and work; principle of state, conservation of mass, conservation of energy, increase of entropy principle; application to thermal and mechanical processes.

Department
Mechanical Engineering

When Taught
Fall, Winter, Spring

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Simple Requisites

Prerequisites

Type
Prerequisite

Prerequisites

Complete ALL of the following Courses:

- CHEM 105 - General College Chemistry 1 with Lab (Integrated)
  AND PHSCS 123 - Introduction to Waves, Optics, and Thermodynamics

Learning Outcomes

Title
Problem Solving

Tags
180846, 0, 1, 2019-09-03 12:19:25

Learning Outcome
1. Each student can use structured techniques to develop engineering problem statements based on real-world applications and to solve engineering problems.

Title
Writing

Tags
180847, 0, 2, 2019-09-03 12:19:25

Learning Outcome
2. Each student can write a technical theory section, a results and discussion of results section and create a figure consistent with specified guidelines.

Title
Thermodynamic Systems

Tags
180848, 0, 3, 2019-09-03 12:19:25

Learning Outcome
3. Each student can characterize the material comprising a thermodynamic system, use the state postulate to fix the state of a system and obtain thermodynamic properties using appropriate methods. Each student can use properties and boundary interactions to describe processes and can sketch processes on thermodynamic diagrams.

Title
1st Law Analysis

Tags
180849, 0, 4, 2019-09-03 12:19:25

Learning Outcome
4. Each student can use conservation of mass and conservation of energy to model open and closed systems undergoing transient and steady processes.

Title
2nd Law Analysis

Tags
180850, 0, 5, 2019-09-03 12:19:25

Learning Outcome
5. Each student can identify irreversibilities and determine whether a process may be approximated as reversible, internally reversible or externally reversible. Each student can use the entropy balance equation to model open and closed systems undergoing transient and steady processes.

Title
Engineering Devices

Tags
180851, 0, 6, 2019-09-03 12:19:25

Learning Outcome
6. Each student can describe the operation of engineering devices and the models typically used to represent these devices.

Title
Cycles

Tags
180852, 0, 7, 2019-09-03 12:19:25

Learning Outcome
7. Each student can list the devices and describe the processes executed in power and refrigeration cycles. Each student can build thermodynamic models to analyze and evaluate cycles and to draw conclusions regarding their performance.

Title
Ethical and Professional Responsibility

Tags
209299, 0, 9, 2019-09-03 12:19:25

Learning Outcome
8. Each student recognizes the role of thermodynamics in addressing economic and environmental concerns related to energy and can make informed judgements consistent with ethical and professional responsibilities

ME EN 330 - Design of Mechatronic Systems

Course Information

Teaching Area (new)
ME EN

Course Number
330

Teaching Area
ME EN

Course Title
Design of Mechatronic Systems

Course Description
Microcontroller-based mechatronic systems comprised of mechanical, electrical, and software subsystems. Electronics, printed circuit board design, microcontroller programming and interfacing, and mechanical prototyping.

Department
Mechanical Engineering

When Taught
Fall, Winter, Spring

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Simple Requisites

Prerequisites

Type
Completion Requirement

Fulfill ANY of the following requirements:

Complete ALL of the following Courses:
- EC EN 301 - Elements of Electrical Engineering.
  AND ME EN 273 - Introduction to Scientific Computing and Computer-Aided Engineering

OR

Complete ALL of the following Courses:

- EC EN 301 - Elements of Electrical Engineering.
  AND ME EN 275 - Computational Methods in Engineering

Other Prerequisites

concurrent enrollment in Me En 335.

Learning Outcomes

Title
Microcontroller Architectures, Memory, and Peripherals

Tags
180796, 0, 2

Learning Outcome
1. Students should have an understanding of microcontroller architectures, memory, and peripherals, including timers, counters, interrupts, and analog-to-digital converters.

Title
Programming Microcontrollers

Tags
180769, 0, 3

Learning Outcome
2. Students should be able to program microcontrollers using a high-level programming language and event-driven programming techniques.

Title
Integrating Circuits and Sensors

Tags
180770, 0, 4

Learning Outcome
3. Students should be able to interface digital and analog circuits and sensors with a microcontroller.

Title
Analog-to-Digital and Digital-to-Analog

Tags
180771, 0, 5

Learning Outcome
4. Students should understand analog-to-digital and digital-to-analog conversion and be able to program a microcontroller to read analog voltages.

Title
Serial and Parallel Communication Options

Tags
180772, 0, 6

Learning Outcome
5. Students should understand basic serial and parallel communication options for microcontrollers.

Title
Electromechanical Actuators

Tags
180773, 0, 7

Learning Outcome
6. Students should gain familiarity with various electromechanical actuators, including DC motors, stepper motors, solenoids, and servomotors. Students should understand the function and performance characteristics (torque/speed curves) of DC motors, and should be able to select a motor for a specific application.

Title
Driving Motors

Tags
180784, 0, 8

Learning Outcome
7. Students should be able to interface motors with a microcontroller and implement motor driver circuits.

Title
Pulse-Width Modulation

Tags
180774, 0, 9

Learning Outcome
8. Students should be able to implement pulse-width modulation as a method for controlling motors.

Title
Real World Design and Prototyping Tools

Tags
180775, 0, 10

Learning Outcome
9. Students should be able to use real-world design and prototyping tools, including printed circuit board design software, breadboards, soldering, and mechanical prototyping tools.

Title
Data Sheets

Tags
180785, 0, 11

Learning Outcome
10. Students should be able to read data sheets and select electronic components to meet design requirements.

Title
Design and Implement a Mechatronic System

Tags
180776, 0, 12

Learning Outcome
11. Students should be able to design and implement a complete mechatronic system that integrates micro-controllers, electronic components, and mechanical components.

ME EN 335 - Dynamic System Modeling and Analysis

Course Information

Teaching Area (new)
ME EN

Course Number
335

Prerequisites

Complete ALL of the following Courses:

- ME EN 275 - Computational Methods in Engineering **AND** EC EN 301 - Elements of Electrical Engineering. **AND** CE 204 - Engineering Mechanics--Dynamics

Other Prerequisites

pre- or concurrent enrollment in MATH 303 OR MATH 334

Learning Outcomes

Title
Mechanical Systems

Tags
180461, 2

Learning Outcome
1. Students should have a knowledge of fundamental systems concepts required to develop lumped element models for basic mechanical systems, including inertia, compliance, dissipation, and power sources, and obtain equations of motion for linear motion and fixed-axis rotation.

Title
Electrical Systems

Tags
180465, 1

Learning Outcome
2. Students should have a knowledge of fundamental systems concepts required to develop lumped element models for basic electrical systems, including inductance, capacitance, resistance, power sources and amplifiers.

Title
Basic Fluid Systems

Tags
180613, 3

Learning Outcome
3. Students should have a knowledge of fundamental systems concepts required to develop lumped element models for basic fluid systems, including inertance, capacitance, resistance, and pumps.

Title
Multi-domain Modeling

Tags
180629, 0

Learning Outcome
4. Students should have a knowledge of fundamental concepts of multi-domain modeling of electromechanical and fluid/mechanical systems and be able to develop lumped element models of these mixed systems.

Title
Simulation Software

Tags
180741, 4

Learning Outcome
5. Students should know how to place equations of motion into state variable form, and to develop a simulation for basic non-linear and linear systems using appropriate simulation software.

Title
Transfer Functions and Poles

Tags
180742, 5

Learning Outcome
6. Students should know how to manipulate a system of linear differential equations to obtain transfer functions and poles (eigenvalues).

Title
Interpret Poles

Tags
180743, 6

Learning Outcome
7. Students should understand first and second-order systems and know how to interpret poles (eigenvalues) to define natural frequencies, damping ratios, time constants, and the natural response, step response, and impulse response of a system.

Title
Frequency Response

Tags
180744, 7

Learning Outcome
8. Students should understand the concept of frequency response. They should understand the relationship between transfer functions and frequency response, and should be able to obtain frequency response plots for their system models.

Title
Real World Application

Tags
180858, 0, 8

Learning Outcome
9. Students should strengthen their ability to learn throughout their lives by 1) transforming real-world dynamic systems into an engineering problem and 2) developing and analyzing a lumped-element model to solve the engineering problem.

Title
Writing

Tags
213174, 0, 9

Learning Outcome
10. Students should write an effective full technical report in the IMRaD format.

ME EN 340 - Heat Transfer

Course Information

Teaching Area (new)
ME EN

Course Number
340

Teaching Area
ME EN

Course Title
Heat Transfer

Course Description
Conservation principles; Fundamentals of conduction, convection and radiation; Problem solving

Department
Mechanical Engineering

When Taught
Fall

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
1

Simple Requisites

Prerequisites

Type
Prerequisite

Prerequisites

Complete ALL of the following Courses:

- ME EN 321 - Thermodynamics

Learning Outcomes

Title
Student Development

Tags
180874, 0, 0

Learning Outcome
1. Each Student can deepen their faith in God, appreciating divine patterns, as they learn and apply heat transfer principles.

Title
Problem Solving Methods

Tags
180873, 0, 1

Learning Outcome
2. Each student can seek inspired solutions to real world scenarios by identifying heat transfer modes, applying fundamental laws and conservation principles of mass and energy with appropritae approximations, and solving to quantify heat transfer rates using a systematic method.

Title
Conduction

Tags
180872, 0, 2

Learning Outcome
3. Each student can describe the physical mechanisms involved in conduction heat transfer and use Fourier's law to model the conduction heat rate. Each student can apply conservation principles to contrl volumes that result in differential equations, apply appropriate boundary conditions, solve the heat diffusion equation for simplified scenarios using analytical and/or numerical methods and apply these solutions in appropriate modeling scenarios

Title
Convection

Tags
180871, 0, 3

Learning Outcome
4. Each student can describe the physical phenomena associated with convection, use non-dimensioal parameters and empirical correlations to predict local and average convective heat transfer coefficiets for laminar or turbulent flows. Each student can apply Newton's law of cooling to calculate external or interanl, forced of free convection heat transfer.

Title
Radiation

Tags
180870, 0, 4

Learning Outcome
5. Each student can describe the physical mechanisms involved in radiation heat transfer and apply appropriate relations to model intesity and radiative heat flux to/from a surface. Each student can determine total, hemispherical radiative properties of a surface from spectral, directional quantities, apply appropriate models to obtain the net radiative heat rate at a serface and determine the radiative heat exchange between diffuse, gray surfaces form an enclosure.

Title
Communication and Impact

Learning Outcome
6. Each student can clearly describe their methodology for qualtifying heat transfer and effectively communicate organized conclusions and recommendations. Students can effectively articulate the broader implications of their work in ways that support societal well-being and environmental stewardship.

ME EN 351 - Fundamentals of Biomedical Engineering

Course Information

Teaching Area (new)
ME EN

Course Number
351

Teaching Area
ME EN

Course Title
Fundamentals of Biomedical Engineering

Course Description
This course introduces the fundamental principles and topics of Biomedical Engineering, including Biomechanical Engineering, Biochemical Engineering, Bioinstrumentation, and Medical Imaging.

Department
Mechanical Engineering

When Taught
Winter

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Simple Requisites

Prerequisites

Type
Prerequisite

Prerequisites

Fulfill ANY of the following requirements:

Prerequisites

Complete ALL of the following Courses:

- CHEM 105 - General College Chemistry 1 with Lab (Integrated)
  AND MATH 113 - Calculus 2
  AND PHSCS 121 - Introduction to Newtonian Mechanics

OR

Prerequisites

Complete ALL of the following Courses:

- CHEM 105 - General College Chemistry 1 with Lab (Integrated)
  AND MATH 113 - Calculus 2
  AND PHSCS 106 - General Physics 2

Other Prerequisites
Freshman-level Understanding of Biology (for example: BIO 100, BIO 103, MMBIO 221, or PDBIO 120).

ME EN 362 - Engineering Measurements

Course Information

Teaching Area (new)
ME EN

Course Number
362

Teaching Area
ME EN

Course Title
Engineering Measurements

Course Description
Fundamental concepts of measurement systems, characteristics of sensor signals, data acquisition, sensors, uncertainty analysis.

Department
Mechanical Engineering

When Taught
Fall, Winter, Summer

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
2

Lab Hours

Fixed:
3

Simple Requisites

Prerequisites

Type
Prerequisite

Prerequisites

Complete ALL of the following Courses:

- ME EN 330 - Design of Mechatronic Systems
  AND ME EN 335 - Dynamic System Modeling and Analysis

Other Prerequisites
Engl 316 or concurrent enrollment.

Learning Outcomes

Title
Measurement Concepts and Calibration

Tags
180777, 0, 1

Learning Outcome
Students will be familiar with concepts of measurement such as accuracy, precision, bias error, random error, and static sensitivity. Students will be able to calibrate a measurement system.

Title
Spectral Analysis

Tags
180778, 0, 2

Learning Outcome
Students will understand the basics of spectral analysis and how to interpret the frequency content of a signal.

Title
Time and Frequency Response

Tags
180779, 0, 3

Learning Outcome
Students will understand the concepts of time and frequency response and will be able to apply these concepts to analyze measurement systems.

Title
Data Acquisition and Signal Conditioning

Tags
180780, 0, 4

Learning Outcome
Students will gain experience with data acquisition and signal conditioning. Students will understand the sampling process, how aliasing can occur, and how it can be prevented.

Title
Experience with Sensors

Tags
180782, 0, 6

Learning Outcome
Through laboratory exercises and projects, students will gain hands-on experience with a variety of sensors, such as strain gages, thermocouples, pressure transducers, and optical sensors

Title
Uncertainty Analysis

Tags
180859, 0, 7

Learning Outcome
Students will be able to perform a basic uncertainty analysis for a measurement system

Title
Learning to Write about Experimental Results

Tags
180781, 0, 5

Learning Outcome
Students will learn to write a summary and conclusion section of a report, and demonstrate their ability to write a full formal report to document experimental results.

Title
Practice Documenting Experimental Results

Learning Outcome
Students will practice clear, concise, and convincing communication by writing a memo report and a full formal report. The full report will include an uncertainty analysis from measured data.

Title
Real World Application

Learning Outcome
Students will apply measurement procedures to real world problems.

ME EN 372 - Mechanical System Design Fundamentals

Course Information

Teaching Area (new)
ME EN

Course Number
372

Teaching Area
ME EN

Course Title
Mechanical System Design Fundamentals

Course Description
Static and dynamic stress and failure analysis for mechanical systems.

Department
Mechanical Engineering

When Taught
Fall, Winter, Spring

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
2

Lab Hours

Fixed:
3

Simple Requisites

Prerequisites

Type
Prerequisite

Prerequisites

Complete ALL of the following Courses:

- CCE 203 - Engineering Mechanics--Mechanics of Materials **AND** ME EN 250 - Science of Engineering Materials

Recommended
Me En 273

Learning Outcomes

Title
Free Body and Shear/Moment Diagrams

Tags
180746, 0, 2, 2021-08-27 08:13:34

Learning Outcome
1. Students should be able to draw free-body diagrams of machine components. They should be able to determine the applied loads and calculate the reaction forces and moments. They should be able to draw shear-moment diagrams.

Title
Static and Fatigue Combined Loadings

Tags
180748, 0, 4, 2021-08-27 08:13:34

Learning Outcome
2. Students should be able to calculate stresses in and the life of machine components due to combined static and fatigue loads.

Title
Estimate Deflection

Tags
180749, 0, 5, 2021-08-27 08:13:34

Learning Outcome
3. Estimate the deflection of structural members under combined loading.

Title
Application of Static Failure Theories

Tags
180750, 0, 6, 2021-08-27 08:13:34

Learning Outcome
4. Students should be able to select appropriate static failure theories and be able to apply these theories to predict failure loads and safety factors for various materials and loading conditions

Title
Stress Analysis

Tags
180751, 0, 7, 2021-08-27 08:13:34

Learning Outcome
5. Students should be able to analyze the stresses in pressure vessels, press fits, bolts, and bolted joints.

Title
Buckling Prediction

Tags
180752, 0, 8, 2021-08-27 08:13:34

Learning Outcome
6. Students should be able to calculate buckling predictions for statically loaded compression members.

Title
FEA Software

Tags
180745, 0, 1, 2021-08-27 08:13:34

Learning Outcome
7. Students should be able to use commercial FEA software to create models of simple structures and machine components. They should be able to demonstrate decision making using FEA results for engineering applications.

Title
Structured Problem Solving

Tags
180675, 0, 10, 2021-08-27 08:13:34

Learning Outcome
8. Students should gain experience using the BYU ME structured problem-solving technique to solve real-world machine design engineering problems. They should develop skills to explore solutions to these problems.

Title
Real World Applications and Lifelong Learning

Tags
180747, 0, 3, 2021-08-27 08:13:34

Learning Outcome
9. Students should demonstrate independent leaning by applying machine design and analysis concepts to real-world problems and document the analysis by creating abstracts introductions, discussions and figures.

ME EN 382 - Manufacturing Processes

Course Information

Teaching Area (new)
ME EN

Course Number
382

Teaching Area
ME EN

Course Title
Manufacturing Processes

Course Description
Common manufacturing processes, including technological limitations and economic considerations. Influence of product design on process selection and manufacturing efficiency.

Department
Mechanical Engineering

When Taught
Fall, Winter, Summer

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
2

Lab Hours

Fixed:
3

Simple Requisites

Prerequisites

Type
Prerequisite

Prerequisites

Complete ALL of the following Courses:

- ME EN 250 - Science of Engineering Materials
  AND ME EN 272 - Engineering Graphics--Principles and Applications

Learning Outcomes

Title
Classification of Manufacturing Processes

Tags
212726, 0, 1

Learning Outcome
1. Recognize and develop familiarity with a variety of manufacturing processes and how they are classified.

Title
Selection of Manufacturing Processes

Tags
180677, 0, 2

Learning Outcome
2. Select appropriate manufacturing processes based on their characteristics and capabilities for a given part design.

Title
Design for Manufacturing

Tags
180520, 0, 3

Learning Outcome
3. Make practical design recommendations to improve the manufacturability of component parts based on manufacturing process knowledge.

Title
Process Physics

Tags
212727, 0, 4

Learning Outcome
4. Justify your design and process selection decisions based on a qualitative understanding of the key physical phenomena of manufacturing processes.

Title
Hands-On Experience

Tags
212728, 0, 5

Learning Outcome
5. Begin to develop good engineering judgment about the capabilities of various processes by (i) performing various manufacturing processes with real process equipment and (ii) designing, building, and testing a working prototype.

Title
Character Building

Tags
180535, 0, 6

Learning Outcome
6. Build Christlike character through effective teamwork.

Title
Writing & Presentation of Engineering Reports

Tags
180460, 0, 7

Learning Outcome
7. Demonstrate the ability to write a professional quality report (including an Executive Summary) and deliver a professional oral presentation as a team.

Title
Impact on Society

Tags
180608, 0, 8

Learning Outcome
8. Demonstrate an understanding of the impact of manufacturing processes on society.

ME EN 412 - Applications of Fluid Dynamics

Course Information

Teaching Area (new)
ME EN

Course Number
412

Teaching Area
ME EN

Course Title
Applications of Fluid Dynamics

Course Description
Control volume analysis; introduction to CFD; boundary layers; lift and drag, airfoils; pumps, propellers, compressors, turbines; hydroelectric and wind power generation; real world applications.

Department
Mechanical Engineering

When Taught
Winter

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Simple Requisites

Prerequisites

Type
Prerequisite

Prerequisites

Complete ALL of the following Courses:
- ME EN 312 - Fluid Mechanics

Learning Outcomes

Title
Governing Equations

Tags
180786, 0

Learning Outcome
1.Understand and be able to apply conservation of mass, momentum, and energy in differential and integral form to fluid dynamics problems.

Title
External Flow

Tags
180787, 1

Learning Outcome
2. Be able to predict lift and drag for bodies in external flow fields using computational and empirical methods. Understand important viscous behavior like boundary layer growth, transition, separation, and wake development and their implications for performance and design.

Title
Compressible Flow

Tags
180788, 2

Learning Outcome
3. Be able to solve quasi-one-dimensional compressible flow problems including the effects of area change and Mach number. Understand the behavior of shocks and expansion fans.

Title
Turbomachines

Tags
180789, 3

Learning Outcome
4. Be able to predict performance and understand fundamental design principles for various turbomachinery applications (e.g, jet engines, wind turbines, propellers, compressors).

Title
Computational Fluid Dynamics

Tags
180790, 4

Learning Outcome
5. Become familiar with the basic terminology and methods of CFD including equation discretization, mesh generation, boundary conditions, convergence behavior, and post-processing. Be able to use CFD software to simulate basic fluid flow applications.

ME EN 415 - Flight Vehicle Design

Course Information

Teaching Area (new)
ME EN

Course Number
415

Teaching Area
ME EN

Course Title
Flight Vehicle Design

Course Description
Fundamental principles for designing flight vehicles (e.g., airplanes and rockets) including introductions to aerodynamics, structures, stability, propulsion, and performance. A combination of theory, computational methods, and a design project.

Department
Mechanical Engineering

When Taught
Fall

Credit Hours

Min:

- ME EN 312 - Fluid Mechanics

Learning Outcomes

Title
Aerodynamic Design

Tags
180471, 3

Learning Outcome
1. Aerodynamic design of an airplane.

Title
Performance Requirement Design

Tags
180531, 2

Learning Outcome
2. Designing an airplane with specific performance requirements.

Title
Stable and Controlled Flight Design

Tags
180534, 1

Learning Outcome
3. Designing an airplane for stable and controlled flight.

Title
Propulsion System Design

Tags
180649, 0

Learning Outcome
4. Designing an airplane propulsion system.

Title
Structural Design

Tags
180673, 4

Learning Outcome
5. Airplane structural design.

ME EN 422 - Applied Thermodynamics

Course Information

Teaching Area (new)
ME EN

Course Number
422

Teaching Area
ME EN

Course Title
Applied Thermodynamics

Course Description
Applied engineering thermodynamics including air and steam power cycles, thermodynamic relations, and introduction to combustion and equilibrium chemical reactions.

Department
Mechanical Engineering

When Taught
Winter

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
1

Simple Requisites

Prerequisites

Type
Prerequisite

Prerequisites

Complete ALL of the following Courses:

- ME EN 321 - Thermodynamics

Learning Outcomes

Title
Problem Solving

Tags
180797, 0

Learning Outcome
1. Each student can identify issues related to thermodynamics in real world problems, use basic concepts and fundamental laws to construct thermodynamic models, apply mathematical principles to solve these models, draw conclusions based on these solutions and formulate sound recommendations based on these conclusions.

Title
Concepts and Laws of Thermodynamics

Tags
180798, 1

Learning Outcome
2. Each student can select a system, identify the heat, work, exergy and mass flow interactions occurring between the system and its surroundings and build models of steady-flow devices and transient thermodynamic systems.

Title
Thermodynamic Property Relationships

Tags
180799, 2

Learning Outcome
3. Each student can use thermodynamic concepts and laws to develop relationships between observable thermodynamic properties and thermodynamic properties that cannot be directly measured.

Title
Gas Power Cycles

Tags
180800, 3

Learning Outcome
4. Each student can use the basic concepts and fundamental laws of thermodynamics to model the performance of various gas power cycles. Each student can evaluate the impact of modifications such as reheat, regeneration and intercooling on the efficiency and net power produced by a gas power cycle and draw conclusions regarding the implementation of these modifications.

Title
Jet Propulsion Cycles

Tags
180801, 4

Learning Outcome
5. Each student can use the basic concepts and fundamental laws of thermodynamics to analyze, evaluate and draw conclusions regarding the performance of jet propulsion cycles.

Title
Vapor Power Cycles

Tags
180802, 5

Learning Outcome
6. Each student can use the basic concepts and fundamental laws of thermodynamics to analyze, evaluate and draw conclusions regarding the performance of Rankine cycles, geothermal power cycles, and combined cycles.

Title
Refrigeration Cycles

Tags
180803, 6

Learning Outcome
7. Each student can use the basic concepts and fundamental laws of thermodynamics to analyze, evaluate and draw conclusions regarding the performance of vapor-compression refrigeration cycles, absorption refrigeration cycles, multistage refrigeration cycles and cascade refrigeration cycles.

Title
Alternative Energy Systems

Tags
180804, 7

Learning Outcome
8. Each student can use the concepts and laws of thermodynamics to analyze and evaluate renewable energy systems and to draw conclusions regarding the performance of these systems.

Title
Psychometrics

Tags
180805, 8

Learning Outcome
9. Each student can calculate the properties of mixtures of air and water vapor to analyze, evaluate and draw conclusions regarding the performance of evaporative cooling systems, cooling towers, humidifiers and dehumidifiers.

ME EN 423 - Global Perspectives on Energy and the Environment

Course Information

Teaching Area (new)
ME EN

Course Number
423

Teaching Area
ME EN

Course Title
Global Perspectives on Energy and the Environment

Course Description
This course helps students appreciate the interconnection between energy and the environment and develops understanding of renewable energy technologies being deployed world-wide. The course includes course work at BYU, visits to energy sites in Utah, and travel and site visits in Europe. The travel study gives students experience with global renewable energy companies.

Prerequisites

Complete ALL of the following Courses:
- ME EN 321 - Thermodynamics

Learning Outcomes

Title
Engine Parts and Functionality

Tags
180563, 3

Learning Outcome
1. Be able to name parts found in common internal combustion engines given their picture and location on an engine. Be able to classify an engine type based on pictures of the components.

Title
Performance Metrics

Tags
180585, 1

Learning Outcome
2. The ability to calculate industrial standard internal combustion engine performance metrics.

Title
Engine Cycle and Thermodynamic Modeling

Tags
180596, 0

Learning Outcome
3. Be able to produce a zero dimensional model of a four strokes internal combustion engine assuming constant specific heats, variable heat release, no heat transfer, and ideal gas exchange processes.

Title
Fundamentals of Combustion and Engine Performance

Tags
180597, 4

Learning Outcome
4. Understand the fundamentals of combustion. Be able to perform energy balance calculations on heat released, flame temperature, flame stoichiometry, and flame speed. Be able to predict how engine design parameters and fuel properties impact engine performance.

Title
Pollutant Formation and Control

Tags
180601, 2

Learning Outcome
5. Understand how the major pollutants of internal combustion engines are formed and controlled. Be able to name the major pollutants in an internal combustion engine and explain how the physical processes of formation and how engine design parameters impact these pollutants.

Title
Design Strategies

Learning Outcome
6. Qualitatively explain the impact of design parameters such as compression ratio, intake geometry, piston shape, spark location, etc. on engine performance parameters such as torque, power, efficiency, and emissions.

Title
Society Cost and Benefits

Learning Outcome
7. Be able to express the positive and negative impacts of IC engines on society and our Heavenly Fathers plan to bring to pass the immortality and eternal life of man.

ME EN 426 - Gas Turbine and Jet Engine Design

Course Information

Teaching Area (new)
ME EN

Course Number
426

Teaching Area
ME EN

Course Title
Gas Turbine and Jet Engine Design

Course Description
Design and synthesis of land-based and aircraft gas turbines utilizing fluid flow and thermodynamic fundamentals. Extensive discussion of turbojet, turbofan, and turboprop engines.

Department
Mechanical Engineering

When Taught
Winter

Credit Hours

Min:
3

Fixed/Max:

Learning Outcomes

Title
Fluid Mechanic and Thermodynamic Principles

Tags
180499, 0

Learning Outcome
1. Apply basic fluid mechanic and thermodynamic principles to understand how gas turbine engines operate.

Title
Cycle Performance

Tags
180623, 4

Learning Outcome
2. Develop ability to analyze and predict the cycle performance of gas turbine engines.

Title
Components, Purpose and Performance

Tags
180646, 1

Learning Outcome
3. Learn the components of gas turbine engines and their purpose. Understand how the performance of individual components contributes to the overall performance of the engine.

Title
Analyze and Predict Performance of Individual Components

Tags
180647, 3

Learning Outcome
4. Learn how to analyze and predict the performance of individual gas turbine engine components

Title
Application of Principles

Tags
180682, 2

ME EN 431 - (Me En-EC En 483) Design of Control Systems

Course Information

Fulfill ANY of the following requirements:

Prerequisites

Complete ALL of the following Courses:
- ME EN 335 - Dynamic System Modeling and Analysis

OR

Prerequisites

Complete ALL of the following Courses:
- EC EN 380 - Signals and Systems

Learning Outcomes

Title
Simulation Models

Tags
180541, 0

Learning Outcome
1. The ability to develop (nonlinear) mathematical models of complex dynamic systems.

Title
Final Value Theorem

Tags
180584, 1

Learning Outcome
2. Ability to use the final value theorem to predict steady state behavior.

Title
Design Models

Tags
180637, 3

Learning Outcome
3. The ability to simplify those models into linear transfer function and state space representations.

Title
Using Equations and Functions

Tags
180498, 0, 5

Learning Outcome
4. Ability to model dynamic systems using differential equations, transfer functions, and state space equations.

Title
Design of PID Control

Learning Outcome
5. The ability to design PID controllers for systems described by linear time-invariant models.

Title
State Space Techniques

Learning Outcome
6. Ability to design feedback systems using state space techniques.

Title
Design of Loopshaping Control

Learning Outcome
7. The ability to use loopshaping techniques to design frequency domain controllers for systems described by linear time-invariant models.

Title
Using Software to Simulate Dynamics and Control

Learning Outcome
8. Ability to simulate dynamic systems and feedback controllers using modern programming languages.

ME EN 437 - Kinematics

Course Information

Teaching Area (new)
ME EN

Course Number
437

Teaching Area
ME EN

Course Title
Kinematics

Course Description
Relative motion of links in mechanisms; velocities and accelerations of machine parts; rolling contact; cams; synthesis of mechanisms. Includes computer-aided engineering techniques.

Department
Mechanical Engineering

When Taught
Fall

Complete ALL of the following Courses:

- ME EN 275 - Computational Methods in Engineering
  AND CE 204 - Engineering Mechanics--Dynamics

Learning Outcomes

Title
Position

Tags
180482, 0

Learning Outcome
1. Determine the position of mechanisms.

Title
Dynamics

Tags
180519, 2

Learning Outcome
3. Calculate the dynamics of mechanisms.

Title
Analyze

Tags
180536, 4

Learning Outcome
5. Analyze the performance of non-linkage mechanisms such as cams and gears.

Title
Velocity and Acceleration

Tags
180544, 1

Learning Outcome
2. Analyze the velocity and acceleration of mechanisms.

Title
Synthesize

Tags
180665, 3

Learning Outcome
4. Synthesize mechanisms to perform specified tasks.

ME EN 450 - Engineering Materials: Selection for Design

Course Information

Teaching Area (new)
ME EN

Course Number
450

Teaching Area
ME EN

Course Title
Engineering Materials: Selection for Design

Course Description
Instruction emphasizes optimal materials selection techniques, practical materials-focused design, and an overview of commonly used engineering materials. These methods are applied in a practical design experience involving materials selection and manufacturing of a real product.

Department
Mechanical Engineering

When Taught
Fall

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Simple Requisites

Prerequisites

Type
Prerequisite

Prerequisites

Complete ALL of the following Courses:

- ME EN 250 - Science of Engineering Materials

Other Prerequisites
ME EN 372 pre-req or concurrently

Learning Outcomes

Title
Real World Problems

Tags
209322, 1

Learning Outcome
From a real-world problem, determine design requirements that incorporate relevant materials properties.

Title
Materials Selection

Tags
209323, 2

Learning Outcome
Learn and apply standard materials selections techniques to first identify classes of materials and then down select to specific materials that that meet material property requirements, keeping in mind the necessary processing and manufacturing techniques that will accompany the selected material.

Title
Engineering Materials

Tags
180878, 3

Learning Outcome
Compile a list of and become familiar with commonly used Engineering Materials and their applications, and understand basic structural and physical characteristics from which their properties are derived.

Title
Capstone Materials Experience

Tags
180879, 4

Learning Outcome
Combine knowledge in real world problems, materials selection, and engineering materials to design and manufacture an engineering product.

ME EN 455 - Materials Science Seminar

Course Information

Teaching Area (new)
ME EN

Course Number
455

Teaching Area
ME EN

Course Title
Materials Science Seminar

Course Description
Students will attend department or college seminars that pertain to the materials science discipline. This will expand their breadth and scope of materials science and help prepare them for graduate school or employment in materials science.\n

Department
Mechanical Engineering

When Taught
Fall and Winter

Credit Hours

Min:
0.5

Fixed/Max:
0.5

Lecture Hours

Fixed:

Simple Requisites

Prerequisites

Type
Prerequisite

Prerequisites

Complete ALL of the following Courses:
- ME EN 250 - Science of Engineering Materials

Learning Outcomes

Title
Micromechanics

Tags
180464, 4

Learning Outcome
1. Develop an understanding of the role of constituents in overall response of composite lamina (micromechanics).

Title
Macromechanics

Tags
180593, 1

Learning Outcome
2. Develop an understanding of how a set of laminae with different orientations affect the overall laminate properties and response (macromechanics).

Title
Elastic and Strength Properties

Tags
180630, 0

Learning Outcome
3. Analyze elastic and strength properties, and elastic response, of orthotropic and anisotropic materials having both continuous and discontinuous reinforcements.

Title
Classical Lamination Theory

Tags
180683, 2

Learning Outcome
4. Use Classical Lamination Theory to assess the role of ply orientation on overall axial, bending and twisting elastic deformation of laminates under applied loads.

Title
Failure Theories

Tags
180707, 3

Learning Outcome
5. Use failure theories for multiaxial loading to determine if a laminate composite will fail for known loading and use this knowledge to design failure resistant structures.

ME EN 461 - (Me En-Phscs) Introduction to Acoustics

Course Information

Teaching Area (new)
ME EN

Course Number
461

Teaching Area
ME EN

Course Title
(Me En-Phscs) Introduction to Acoustics

Course Description
Mathematical descriptions of physical phenomena in generation, propagation, and reception of acoustic waves. Fundamental acoustical instrumentation and analysis techniques. Application of physical principles and mathematical models to realistic problems.\n \n

Department
Mechanical Engineering

When Taught
Winter

Prerequisite

Prerequisites

Complete ALL of the following Courses:

- ME EN 372 - Mechanical System Design Fundamentals

Learning Outcomes

Title
Failure Prevention

Tags
180571, 3

Learning Outcome
1. Students will gain an increased understanding of failure prevention.

Title
Analysis Tools

Tags
180600, 2

Learning Outcome
2. Students will gain an increased understanding of finite element analysis tools.

Title
Basic Machine Components

Tags
180617, 0

Learning Outcome
3. Students will develop an understanding of basic machine components.

Title
Mechanical Design and Documentation

Tags
180642, 1

Learning Outcome
4. Students will gain experience in mechanical design, including creating documentation.

ME EN 473 - Interdisciplinary Electro-Mechanical Innovation

Course Information

Course Number
473

Teaching Area
ME EN

Course Title
Interdisciplinary Electro-Mechanical Innovation

Course Description
This course introduces and practices the fundamental concepts of interdisciplinary market-pull innovation and entrepreneurship in a mentored setting. Interdisciplinary student teams conceive of and develop an internet-connected physical product. The double diamond innovation model is used, with an emphasis on prototyping and testing.

Department
Mechanical Engineering

When Taught
Fall and Winter

Credit Hours

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Other Prerequisites
Application required. Application is followed by portfolio submission and interview for subset of applicants.

Recommended
ME EN272, and 273, or 275.

Learning Outcomes

Title
Generating and testing ideas

Tags
214038, 0, 1, 2023-08-29 10:52:53

Learning Outcome
Collaboratively design and test ideas for a new venture centered on electro-mechanical design, and limit the options to a single, implementable design.

Title
Applying the innovation process to create prototypes

Tags
214039, 0, 2, 2023-08-29 10:52:55

Learning Outcome
Apply the innovation process to advance ideas from concepts to customer-validated electro-mechanical prototypes

Title
Working in an interdisciplinary team

Tags
214040, 0, 3, 2023-08-29 10:52:57

Learning Outcome
Demonstrate the ability to work effectively in an interdisciplinary team--working through the phases of both electro-mechanical product development, and interdisciplinary team development.

Title
Design Thinking

Tags
214041, 0, 4, 2023-08-29 10:52:58

Learning Outcome
Combine empathy for the context of a problem, creativity in devising electro-mechanical solutions to that problem, and rationality to analyze how well the created solutions solve the problem and fit the context.

Title
Problem Solving

Tags
214042, 0, 5, 2023-08-29 10:53:00

Learning Outcome
Become more independent with conceptualizing and actualizing solutions to various challenges facing the current industry.

ME EN 475 - Integrated Product and Process Design 1

Course Information

Teaching Area (new)
ME EN

Course Number
475

Teaching Area
ME EN

Course Title
Integrated Product and Process Design 1

Course Description
Comprehensive two-semester design experience from conception to manufacturing planning and prototype. Product development process. Economic and manufacturing considerations. Intellectual property agreement required.

Department
Mechanical Engineering

When Taught
Fall

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
2

Lab Hours

Fixed:
3

Simple Requisites

Prerequisites

Type
Prerequisite

Prerequisites

Fulfill ANY of the following requirements:

Prerequisites

Complete ALL of the following Courses:

- ME EN 330 - Design of Mechatronic Systems
  AND ME EN 372 - Mechanical System Design Fundamentals
  AND ME EN 382 - Manufacturing Processes

OR

Prerequisites

Complete ALL of the following Courses:

- MFGEN 331 - Metals Processes
  AND MFGEN 355 - Plastics Materials and Processing
  AND MFGEN 333 - Industrial Automation

Other Prerequisites
Senior standing (fewer than 30 hours remaining in the program) in mechanical engineering, manufacturing engineering, industrial design, or related disciplines with instructor's consent. For ME EN majors: ME EN 335; ME EN 312 or concurrent enrollment; ME EN 362 or concurrent enrollment

Note
ME EN 475 and 476 must be taken in consecutive fall and winter semesters. **Before you can register for ME EN 475/6 you will need to complete pre-registration information. Please see https://www.me.byu.edu/capstone for instructions.**

Learning Outcomes

Title
Six Stages of Product Development

Tags
180753, 1

Learning Outcome
1. Understand the six stages of development through which designs evolve.

Title
Design Evolution

Tags
180793, 2

Learning Outcome
2. Understand how the requirements, tests, and design evolve through each stage of development.

Title
Design Desirability and Transferability

Tags
180794, 4

Learning Outcome
4. Understand how artifact checks, performance testing, and validation testing are used to ensure the desirability and transferability of the design at each stage of development.

Title
Skills in Product Development, Reporting and Presentation

Tags
180795, 5

Learning Outcome
5. Develop skills in project planning, idea generation, prototyping, developing engineering models, and conveying information both in writing and orally.

Title
Network of Design Activities

Tags
180886, 3

Learning Outcome
3. Understand how a design network is used to cause the product information to evolve, and how the map can be customized for specific development projects.

Title
Organizational Policies

Tags
180887, 6

Learning Outcome
6. Understand how to work within organizational policies to accomplish important goals.

Title
Project Teamwork

Tags
180888, 7

Learning Outcome
7. Demonstrate the ability to use effective team processes, communication, and conflict resolution skills to enhance team synergy, provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.

Title
Analysis and Communication

Tags
180889, 8

Learning Outcome
8. As a part of a team, use a real-world problem solving process to develop, solve, and explore appropriate engineering models for your project, and effectively communicate the results of this analysis.

Title
Engineering Design

Tags
180754, 0, 9

Learning Outcome
9. Apply the understanding and skills from other outcomes while working with a project sponsor in a team setting to produce desirable and transferable product information through design, building, and testing, while considering public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.

ME EN 476 - Product Development 2 - Capstone

Course Information

Teaching Area (new)
ME EN

Course Number
476

Prerequisite

Prerequisites

Fulfill ANY of the following requirements:

Prerequisites

Complete ALL of the following Courses:

- ME EN 312 - Fluid Mechanics
  AND ME EN 340 - Heat Transfer
  AND ME EN 362 - Engineering Measurements

OR

Prerequisites

Complete ALL of the following Courses:

- MFGEN 340 - Quality Systems in Manufacturing
  AND MFGEN 401 - Data Analysis

Other Prerequisites
Me En 475. Senior standing (fewer than 30 hours remaining in the program) in mechanical engineering, manufacturing engineering, industrial design, or related disciplines with instructor's consent.

Note
ME EN 475 and 476 must be taken in consecutive fall and winter semesters. **Before you can register for ME EN 475/6 you will need to complete pre-registration information. Please see https://www.me.byu.edu/capstone for instructions.**

Learning Outcomes

Title
Skills in Product Development Economics and Drawing Review

Tags
180876, 1

Learning Outcome
1. Develop skills in product development economics and engineering drawing review and checking.

Title
Crucial Design Skills

Tags
180890, 2

Learning Outcome
2. Develop and demonstrate a deep understanding in some of the following crucial design skill areas: Planning, Discovering, Creating, Representing, Modeling, Prototyping, Experimenting, Evaluating, Deciding, Conveying.

Title
Team Synergy

Tags
180891, 5

Learning Outcome
3. Demonstrate the ability to use effective team processes, communication, and conflict resolution skills to enhance team synergy, provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.

Title
Analysis and Communication

Tags
180892, 6

Learning Outcome
4. As a part of a team, use a real-world problem solving process to develop, solve, and explore appropriate engineering models for your project, and effectively communicate the results of this analysis.

Title
Ethics and Professionalism

Tags
208692, 8

Learning Outcome
6. Recognize ethical and professional responsibilities in engineering situations and make informed decisions, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.

Title
Project Deliverables

Tags
180893, 7

Learning Outcome
5. Apply the understanding and skills from ME EN/EC EN 475 and the other outcomes from ME EN/EC EN 476 while working with a project sponsor in a team setting to produce desirable and transferable designs, while considering public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.

ME EN 479 - Singapore International Product Design and Development

Course Information

Teaching Area (new)
ME EN

Course Number
479

Teaching Area
ME EN

Course Title
Singapore International Product Design and Development

Course Description
Fundamental concepts of international product development. Introduction to a structured design process. Experience working in international, multi-cultural engineering teams. Lectures, design projects, and industrial site visits in Singapore.

Department
Mechanical Engineering

When Taught
Spring Term

Credit Hours

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Learning Outcomes

Title
Product Development Process

Learning Outcome
1. Students should know how to employ a structured approach to the product development process

Title
International Teams

Learning Outcome
2. Students should gain experience in working in international, multi-cultural design teams

Title
Cultural Factors in Product Development

Learning Outcome
3. Students should gain appreciation for a foreign culture and recognize the role of cultural factors in product development

Title
Design and Prototyping

Learning Outcome
4. Students should gain hands-on design and prototyping experience

Title
Design Communication

Learning Outcome
5. Students should gain experience in communicating design work through oral presentations and written reports.

ME EN 482 - Manufacturing Systems Analysis and Design

Course Information

Teaching Area (new)
ME EN

Course Number
482

Teaching Area
ME EN

Course Title
Manufacturing Systems Analysis and Design

Course Description
Analysis, synthesis, and control of processing and assembly operations; mathematical modeling of manufacturing processes; systems integration; applying conservation principles to processing and assembly operations.

Department
Mechanical Engineering

When Taught
Contact Department

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Other Prerequisites
MeEn 250, 282; or equivalents

Learning Outcomes

Title
Flexible Manufacturing Centers and Systems

Tags
180550, 3

Learning Outcome
Students will understand the control processes used in Flexible Manufacturing Centers and Systems.

Title
Part Processing Requirements

Tags
180570, 1

Learning Outcome
Students will be able to estimate the force and power (energy/time) requirements to process conventional parts, using modern tools and machines.

Title
Information Synthesis

Tags
180648, 4

Learning Outcome
Students will be able to select and review technical paper(s) relating to a course subject area, digest relevant course information, and correlate the results with the mathematical models discussed in the course, also rendering good judgment as to whether the paper is useful to modern manufacturing methods.

Title
Material Bahavior

Tags
180650, 0

Learning Outcome
Students will apply fundamental mathematical models to understand and estimate material behavior in manufacturing processes.

Title
Electronics Manufacturing

Tags
180686, 2

Learning Outcome
Students will understand the importance of and tools used in electronics manufacturing.

ME EN 494R - Global Engineering Outreach Projects

OR

Prerequisites

Complete ALL of the following Courses:

- CE 321 - Structural Analysis

Learning Outcomes

Title
Outcome 1

Tags
209469, 0, 1

Learning Outcome
1. Calculate stresses in machine components due to combined static and fatigue loads.

Title
Outcome 2

Tags
209470, 0, 2

Learning Outcome
2. Compute shear centers and stresses in beams with non-symmetric cross sections.

Title
Outcome 3

Tags
209471, 0, 3

Learning Outcome
Compute stresses in nonlinear materials and materials under plastic deformation.

Title
Outcome 4

Tags
209472, 0, 4

Learning Outcome
Calculate torsional stress in noncircular cross sections, open sections, and multi compartment cross sections.

Title
Outcome 5

Tags
209473, 0, 5

Learning Outcome
Calculate contact stresses using closed form expressions and FEA.

Title
Outcome 6

Tags
209474, 0, 6

Learning Outcome
Use commercial FEA software to create models of structures and components. Demonstrate decision making using FEA results for engineering application.

Title
Outcome 7

Tags
209475, 0, 7

Learning Outcome
Design and analyze beams on elastic foundations.

Title
Outcome 8

Tags
209476, 0, 8

Learning Outcome
Apply stress and deflection analysis concepts to a real-world problem and document the analysis through well designed figures and graphic.

ME EN 504 - (Me En-CE En) Computer Structural Analysis and Optimization

Course Information

Teaching Area (new)
ME EN

Course Number
504

Teaching Area
ME EN

Course Title
(Me En-CE En) Computer Structural Analysis and Optimization

Course Description
Matrix stiffness method for 1D, 2D, and 3D skeletal structure classes. Implementing the matrix stiffness method as a computer program. Nonlinear second-order structural analysis. Structural optimization techniques including stress-ratio method, gradient-based methods, and genetic algorithms.

OR

Prerequisites

Complete ALL of the following Courses:

- CE 321 - Structural Analysis **AND** MATH 213 - Elementary Linear Algebra

Learning Outcomes

Title
Execute Structural Software

Tags
180456, 9

Learning Outcome
Prepare input for linear analysis, nonlinear pushover analysis, gradient-based size optimization, and genetic-based size/shape/topology optimization programs for plane frames.

Title
Stress Ratio and Exhaustive Search

Tags
180504, 6

Learning Outcome
Determine the number of FLOPS and perform the calculations for stress ratio optimization and exhaustive search, and construct design space plots if possible.

Title
Matrix Vector Operations

Tags
180524, 5

Learning Outcome
Determine the number of FLOPS and perform the calculations for matrix-vector operations including triangularization, backsubstitution, Newton-Raphson iteration, and inverse iteration.

Title
Member Stiffness and Force

Tags
180591, 0

Learning Outcome
Construct global and local member stiffness matrices and force vectors for any skeletal class and any distributed loading.

Title
Structure Stiffness and Force

Tags
180624, 1

Learning Outcome
Construct structure matrices and vectors for both force and support displacement loads exploiting symmetry/antisymmetry and deformation assumptions.

Title
Second Order Analysis

Tags
180697, 4

Learning Outcome
Derive first/second order equilibrium/compatibility equations, buckling loads/displacements, and structure elastic/geometric stiffness matrices for small trusses and single-member frames.

Title
Genetic Algorithms

Tags
180704, 8

Learning Outcome
Determine the number of FLOPS and perform the calculations for genetic algorithms with penalty/segregation fitness, tournament/roulette selection, point/uniform/blend crossover, dynamic mutation, and ranking/scoring/maximin fitness.

Title
Optimality Criteria Algorithms

Tags
180706, 7

Learning Outcome
Determine the number of FLOPS and perform the calculations for finite difference / virtual work sensitivity analysis, Kuhn-Tucker condition evaluation, and optimality criteria algorithm.

Title
Member Results

Tags
180709, 2

Learning Outcome
Construct member displacement vectors and free-body diagrams for any skeletal class.

Title
Analysis Program Organization

Tags
180711, 3

Learning Outcome
Write down the basic organization and calling structure of a structural analysis program, and complete the pseudo-code for structure level routines.

ME EN 505 - Applied Engineering Math

Course Information

Teaching Area (new)
ME EN

Course Number
505

Teaching Area

Other Prerequisites
or equivalent

Learning Outcomes

Title
Superposition

Tags
180458, 3

Learning Outcome
Applying the principle of superposition to PDE's with nonhomogeneities.

Title
Cartesian and Cylindrical Coordinates

Tags
180489, 4

Learning Outcome
Solution of PDE's in Cartesian and Cylindrical coordinates.

Title
Notation

Tags
180586, 0

Learning Outcome
Use of index or tensor notation in mathematical analysis of the equations that govern continuum mechanics.

Title
Transforms and Series

Tags
180644, 2

Learning Outcome
Applying Fourier transforms and series to the solution of PDE's and analysis of data.

Title
Separation of Variables

Tags
180664, 1

Learning Outcome
Employing separation of variables to the solution of classical (heat, Laplace, and wave equations) PDE's.

ME EN 507 - (Me En-CE En) Linear Finite Element Methods

Course Information

Teaching Area (new)
ME EN

Course Number
507

Teaching Area
ME EN

Course Title
(Me En-CE En) Linear Finite Element Methods

Course Description
Linear static finite element analysis of elastic solids; problem formulation, finite element discretization, and equation solving; stability, interpolation theory, and error estimates. Introduction to underlying continuum mechanics principles. Isogeometric analysis as a generalization of classical finite element analysis; basic principles of analysis-suitable computational geometry. Introduction to the industrial practice of finite element modeling leveraging commercial packages. Topics include CAD preprocessing, an overview of the mesh generation process and simulation model setup, and how to effectively use appropriate solution strategies for a given problem. Application domains include strength and durability, vibrations, transient structural dynamics, and multi-physics problems.

Other Prerequisites
CE En 321 or Me En 372 or equivalent

Learning Outcomes

Title
Application

Tags
180470, 2

Learning Outcome
Students will be able to apply the theory of structural vibrations to problems in civil or mechanical engineering.

Title
SDOF Systems

Tags
180561, 0

Learning Outcome
Students will be able to determine the response of single degree-of-freedom (SDOF) systems in free and forced vibration, with and without damping.

Title
MDOF Systems

Tags
180655, 1

Learning Outcome
Students will be able to determine the response of multi degree-of-freedom (MDOF) and continuous systems in free and forced vibration, with and without damping.

ME EN 510 - Compressible Fluid Flow

Course Information

Teaching Area (new)
ME EN

Course Number
510

Teaching Area
ME EN

Course Title
Compressible Fluid Flow

Course Description
One-dimensional analysis of compressible flow with area change, friction, heat transfer, shock waves, and combined effects, including experimental methods.

Department
Mechanical Engineering

When Taught
Fall

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
1.5

Simple Requisites

Prerequisites

Type
Prerequisite

Prerequisites

Complete ALL of the following Courses:

- ME EN 312 - Fluid Mechanics

Other Prerequisites
Me En 312 or equivalent

Learning Outcomes

Title
Characteristics of Various Flows

Tags
180512, 2

Learning Outcome
Understand characteristics of isentropic flow, normal shock waves, oblique shock waves, Prandtl-Meyer flow, Fanno (friction) flow, Rayleigh (heat transfer) flow, and multidimensional flow.

Title
Governing Equations and Basic Principles for Compressibility

Tags
180609, 0

Learning Outcome
Understand how to start from governing equations and basic principles to solve problems where it is desired to account for compressibility.

Title
Concepts for Solving and Analyzing Compressibility Problems

Tags
180792, 1

Learning Outcome
Learn concepts needed to solve and analyze problems that account for compressibility in both internal and external flow applications.

Title
Applications, Problem Solving, and Analyzation of Results

Tags
180676, 0, 3

Learning Outcome
Discover applications where compressibility is important, how to solve problems, and analyze results. Communicate results through technical reports and presentations.

ME EN 512 - Intermediate Fluid Dynamics

Course Information

Teaching Area (new)
ME EN

Course Number
512

Teaching Area
ME EN

Course Title
Intermediate Fluid Dynamics

Course Description
Fluid transport properties, review of integral analysis, Navier-Stokes equations, exact and similarity solutions, boundary layers, vorticity, jets and wakes.

Department
Mechanical Engineering

When Taught
Fall

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Simple Requisites

Prerequisites

Type
Prerequisite

Prerequisites

Complete ALL of the following Courses:

- ME EN 312 - Fluid Mechanics

Other Prerequisites
or instructor's consent, Me En 505 previous or concurrent enrollment.

Recommended
Me En 505 or equivalent

Learning Outcomes

Title
Integral Methods

Tags
180515, 0

Learning Outcome
Advanced ability to employ Integral Methods for modeling fluid flow phenomena.

Title
Solutions and Methods for Analyzing

Tags
180573, 2

Learning Outcome
Understand a range of solutions and methods to analyze the Navier-Stokes equations for both simplified and complex flow fields.

Title
Modeling Specific Phenomena

Tags
180687, 3

Learning Outcome
Be able to model specific fluid flow phenomena such as creeping flows, laminar boundary layers, shear layers, jets, and wakes.

Title
Navier-Stokes Equations

Tags
180689, 1

Learning Outcome
Be able to derive the Navier-Stokes equations from an advanced understanding of fluid kinematics.

ME EN 515 - Aerodynamics

Course Information

Teaching Area (new)
ME EN

Course Number
515

Teaching Area
ME EN

Course Title
Aerodynamics

Course Description
Predict aerodynamic forces and moments, like lift and drag, for 2D airfoils, 3D wings, and rotating blades across a range of Mach and Reynolds numbers. Utilize modern computational and aerodynamic methods.

Department
Mechanical Engineering

When Taught
Winter Even Years

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Simple Requisites

Prerequisites

Type
Prerequisite

Prerequisites

Complete ANY of the following Courses:

- ME EN 412 - Applications of Fluid Dynamics
  OR ME EN 510 - Compressible Fluid Flow
  OR ME EN 512 - Intermediate Fluid Dynamics

Learning Outcomes

Title
Flow Similarity

Tags
209798, 0, 1

Learning Outcome
Effectively use non-dimensional force coefficients and parameters in aerodynamic modeling and prediction.

Title
Incompressible Aerodynamics

Tags
209799, 0, 2

Learning Outcome
Apply potential flow theory and thin-airfoil theory to estimate forces and moments of an airfoil.

Title
Finite Wings

Tags
209800, 0, 3

Learning Outcome
Compute lift-dependent drag and span efficiency of finite wings, and demonstrate an understanding of the relationships between wing design and its aerodynamic performance.

Title
Viscous Aerodynamics

Tags
209801, 0, 4

Learning Outcome
Apply integral momentum boundary layer equations and empirical methods for laminar and turbulent boundary layers to estimate transition, separation, drag, and stall.

Title
Compressible Aerodynamics

Tags
209802, 0, 5

Learning Outcome
Demonstrate an understanding of the physical processes causing wave drag and be able to estimate wave drag.

Title
Propellers

Tags
209803, 0, 6

Learning Outcome
Predict thrust, power required, and efficiency and demonstrate an understanding of the relationships between propeller design and its aerodynamic performance.

Title
Computational Fluid Dynamics

Tags
209804, 0, 7

Learning Outcome
Use CFD software to simulate basic aerodynamic applications.

ME EN 521 - Intermediate Thermodynamics

Course Information

Teaching Area (new)
ME EN

Course Number
521

Teaching Area
ME EN

Course Title
Intermediate Thermodynamics

Course Description
Review of first and second law analysis; exergy; equations of state and other thermodynamic relations; properties of mixtures and multiphase systems; chemical reactions and equilibrium.

Department
Mechanical Engineering

When Taught
Winter Even Years

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Simple Requisites

Prerequisites

Type
Prerequisite

Prerequisites

Complete ALL of the following Courses:

- ME EN 321 - Thermodynamics

Recommended
Me En 422

Learning Outcomes

Title
First Law Analysis

Tags
180679, 0, 0

Learning Outcome
1. Each student will use conservation of mass and conservation of energy to analyze systems undergoing steady and transient processes. Each student will draw conclusions and make recommendations based on result of their evaluations.

Title
Second Law Analysis

Tags
180528, 0, 1

Learning Outcome
2. Each student will understand the concept of entropy and its statistical definition. Each student will apply the entropy balance equation or the exergy balance equation to systems undergoing steady and transient processes. Each student will draw conclusions and make recommendations regarding the efficiency of these processes.

Title
Thermodynamic Property Relationships

Tags
180589, 0, 2

Learning Outcome
3. Each student will use the state postulate and equations of state to determine relationships between properties of systems in thermodynamic equilibrium. Each student will develop relationships between measurable thermodynamic properties (P,v,T,cp) and key thermodynamic properties that cannot be directly measured (u,h,s). Each student will apply these principles in the analysis of single phase systems and in the analysis of two-phase, two-component mixtures.

Title
Applications

Tags
180474, 0, 3

Learning Outcome
4. Each student will use basic concepts and fundamental laws to analyze energy systems, power cycles and refrigeration cycles. Each student will draw conclusions regarding their performance and critically analyze possible ways to improve their performance.

ME EN 522 - Combustion

Course Information

Teaching Area (new)
ME EN

Course Number
522

Teaching Area
ME EN

Course Title
Combustion

Course Description
Introduction to first- and second-law ideal gas combustion systems along with elementary models of homogeneous and heterogeneous premixed and/or diffusion flames.

Department
Mechanical Engineering

When Taught
Winter Odd Years

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Simple Requisites

Prerequisites

Type
Prerequisite

Prerequisites

Fulfill ANY of the following requirements:

Prerequisites

Complete ALL of the following Courses:

- CHEM 105 - General College Chemistry 1 with Lab (Integrated)
  AND ME EN 340 - Heat Transfer

OR

Prerequisites

Complete ALL of the following Courses:

- CBE 373 - Chemical and Biological Engineering Thermodynamics.
  AND CBE 376 - Heat and Mass Transfer

Learning Outcomes

Title
Global Impact of Combustion Processes

Tags
180484, 0

Learning Outcome
Students will understand and appreciate the global impact of combustion processes and the wide breadth of applications.

Title
Evaluation of Systems

Tags
180574, 2

Learning Outcome
Students will be able to evaluate combustion systems using conservation of mass, energy, and heat transfer.

Title
System Analysis and Combustion Design

Tags
180592, 3

Learning Outcome
Students will be able to perform basic combustion calculations involved in system analysis and combustion design.

Title
Thermodynamic Evaluation

Tags
180681, 1

Learning Outcome
Students will be able to perform thermodynamic evaluations of combustion processes including heat release, heat of formation, temperature, and equilibrium calculations.

Title
Reaction Mechanisms

Learning Outcome
Students will understand reaction mechanisms and be able to perform calculations involving chemical kinetic reactions.

Title
Flame Types

Learning Outcome
Students will understand the physical phenomena of various flame types and apply them to commercially relevant systems.

ME EN 523 - (Me En-CE En) Aircraft Structures

Course Information

Teaching Area (new)
ME EN

Course Number
523

Teaching Area
ME EN

Course Title
(Me En-CE En) Aircraft Structures

Course Description
Requirements, objectives, loads, materials, and tools for design of airframe structures; static behavior of thin-wall structures; durability and damage tolerance; certification and testing. Airframe component team design project.

Department
Mechanical Engineering

When Taught

Complete ALL of the following Courses:

- CCE 304 - Civil Engineering Materials: Metals, Woods, and Composites
  AND CE 321 - Structural Analysis

OR

Prerequisites

Complete ALL of the following Courses:

- ME EN 250 - Science of Engineering Materials **AND** ME EN 372 - Mechanical System Design Fundamentals

ME EN 531 - Aerospace Structural Dynamic Testing

Course Information

Course Number
531

Teaching Area
ME EN

Course Title
Aerospace Structural Dynamic Testing

Course Description
Strategies for identifying mathematical models of dynamic systems from time and frequency response measurements, experiment design, digital data acquisition methods and modern sensors. Eigenvalue problems for lumped parameter systems and corresponding experimental modal analysis methods. Introduction to signal processing, the fast Fourier transform, and correlation of measurements with finite element models.

Department
Mechanical Engineering

When Taught
Winter Even Years

Credit Hours

Fixed/Max:
3

Lecture Hours

Fixed:
2

Lab Hours

Fixed:
1

Simple Requisites

Prerequisites

Type
Prerequisite

Prerequisites

Complete ANY of the following Courses:

- ME EN 335 - Dynamic System Modeling and Analysis **OR** PHSCS 321 - Mechanics

Learning Outcomes

Title
Analysis

Learning Outcome
Students will be able to find the natural frequencies, damping ratios and shapes of the modes of a dynamic system from a system of linear differential equations.

Title
Fourier Transform

Learning Outcome
Students will be able to use the fast Fourier transform to identify the frequency content in a signal and to solve for the steady-state and transient response of a linear system.

Title
Digital Data Acquisition

Learning Outcome
Students will be able to use modern data acquisition software to acquire measurements while avoiding aliasing and leakage.

Title
Experimental Modal Analysis

Learning Outcome
Students will be able to extract the natural frequencies, damping ratios and mode shapes from a set of frequency response functions.

Title
Test Design

Learning Outcome
Students will understand how to design a modal test, including selecting the locations of measurement sensors and input forces.

Title
Vibration Sensors

Learning Outcome
Students will be able to explain the advantages and disadvantages of common vibration sensors including: piezoelectric accelerometers, laser doppler vibrometers and strain gauges.

Title
Model Correlation

Learning Outcome
Students will employ the modal assurance criterion and cross-orthogonality to compare measured modes with those from a finite element model.

Title
Nonlinear Dynamics

Learning Outcome
Students will recognize some of the distortions that indicate the presence of nonlinearities in a dynamic measurement.

ME EN 534 - Dynamics of Mechanical Systems

Course Information

Teaching Area (new)
ME EN

Course Number
534

Teaching Area
ME EN

Course Title
Dynamics of Mechanical Systems

Course Description
Hamiltonian and Lagrangian dynamics, generalized coordinates, linear and angular momentum, Euler angles, rigid-body motions, and gyroscopic effects. Theory taught with applications integrated.

Department
Mechanical Engineering

When Taught
Winter

Credit Hours

Min:
3

Fixed/Max:
3

Type
Prerequisite

Prerequisites

Complete ALL of the following Courses:

- ME EN 335 - Dynamic System Modeling and Analysis

Learning Outcomes

Title
Lagrangian Method

Tags
180505, 2

Learning Outcome
Derive equations of motion of particles and rigid bodies using the method of Lagrange.

Title
Newton's Laws

Tags
180525, 1

Learning Outcome
Derive equations of motion of particles and systems of particles using Newton’s laws.

Title
Newtonian-Eulerian Methods

Tags
180622, 3

Learning Outcome
Derive equations of motion of rigid bodies using Newton-Euler methods.

Title
Numerical Solutions

Tags
180627, 4

Learning Outcome
Develop numerical solutions of equations of motion to simulate the motion of particles and rigid bodies.

Title
Kinematics

Tags
180657, 0

Learning Outcome
Describe two- and three-dimensional kinematics of particles and rigid bodies.

ME EN 535 - Mechanical Vibrations

Course Information

Teaching Area (new)
ME EN

Course Number
535

Teaching Area
ME EN

Course Title
Mechanical Vibrations

Course Description
Introduction to energy methods for system modeling, eigenvalues and mode shapes, frequency response, and spectral characterization of vibrations.

Department
Mechanical Engineering

When Taught
Fall Even Years

Credit Hours

Min:
3

Fixed/Max:
3

Prerequisites

Complete ALL of the following Courses:

- ME EN 335 - Dynamic System Modeling and Analysis

Other Prerequisites
or equivalent

Learning Outcomes

Title
Outcome 1:

Tags
209455, 0, 1

Learning Outcome
Model and analyze free and forced single and multi-degree of freedom systems.

Title
Outcome 2:

Tags
209456, 0, 2

Learning Outcome
Apply vibration theory to the designs of structures, engineering systems, and devices.

Title
Outcome 3:

Tags
209457, 0, 3

Learning Outcome
Model and analyze free and forced continuous systems.

Title
Outcome 4:

Tags
209458, 0, 4

Learning Outcome
Perform normal mode analysis and use mode superposition methods.

Title
Outcome 5:

Tags
209459, 0, 5

Learning Outcome
Perform modal analysis and harmonic response analysis using FEA.

Title
Outcome 6:

Tags
209460, 0, 6

Learning Outcome
Apply multiple damping models and use multiple methods to measure damping in structures.

Title
Outcome 7:

Tags
209461, 0, 7

Learning Outcome
Apply vibration analysis concepts to a real-world problem and document the analysis through well designed figures and graphics.

ME EN 536 - Autonomous Aircraft Guidance, Navigation, and Control

Course Information

Course Number
536

Teaching Area
ME EN

Course Title
Autonomous Aircraft Guidance, Navigation, and Control

Course Description
Dynamics of fixed-wing aircraft flight, stability, and control derivatives, longitudinal and lateral control design; state-space control strategies for aircraft; and autonomous aircraft applications.

Department
Mechanical Engineering

When Taught
Winter Odd Years

Credit Hours

Fixed/Max:
3

Lecture Hours

3

Lab Hours

Fixed:
0

Simple Requisites

Prerequisites

Type
Prerequisite

Prerequisites

Complete ALL of the following Courses:

- ME EN 431 - (Me En-EC En 483) Design of Control Systems **OR** EC EN 483 - (EC En-Me En 431) Design of Control Systems.

Learning Outcomes

Title
Aircraft Dynamics and Motion Simulation

Learning Outcome
An understanding of aircraft dynamics including coordinate frames, aircraft state variables, dynamics, and aerodynamics. The ability to simulate aircraft motion using nonlinear moderate-fidelity models and simplified linear models.

Title
Aircraft Control Techniques and Autopilots

Learning Outcome
An understanding of common aircraft control techniques, such as successive loop closure, and how they apply to the design of longitudinal and lateral-directional autopilots.

Title
Aircraft Dynamics and Motion Simulation

Learning Outcome
An understanding of aircraft dynamics including coordinate frames, aircraft state variables, dynamics, and aerodynamics. The ability to simulate aircraft motion using nonlinear moderate-fidelity models and simplified linear models.

Title
State Estimators

Learning Outcome
The ability to design and implement estimators, including Kalman filters, to estimate aircraft states.

Title
Aircraft Control Techniques and Autopilots

Learning Outcome
An understanding of common aircraft control techniques, such as successive loop closure, and how they apply to the design of longitudinal and lateral-directional autopilots.

Title
State Estimators

Learning Outcome
The ability to design and implement estimators, including Kalman filters, to estimate aircraft states.

Title
Path Planning and Path Following Algorithms

Learning Outcome
An understanding of path planning and path following algorithms suitable for unmanned aircraft and the ability to implement them in an aircraft simulation.

Title
Path Planning and Path Following Algorithms

Learning Outcome
An understanding of path planning and path following algorithms suitable for unmanned aircraft and the ability to implement them in an aircraft simulation.

ME EN 537 - Robotics - Kinematics, Dynamics, and Control

Course Information

Teaching Area (new)
ME EN

Course Number
537

Teaching Area
ME EN

Course Title
Robotics - Kinematics, Dynamics, and Control

Course Description
In this course, we cover forward and inverse kinematics for serial robot manipulators, converting joint velocities to end-effector velocity, Lagrangian and Newton-Euler treatment of robot dynamics, basic robot manipulator control techniques, and an introduction to open questions in research on serial robot manipulation.

Department
Mechanical Engineering

When Taught
Fall

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Simple Requisites

Prerequisites

Type
Prerequisite

Prerequisites

Complete ALL of the following Courses:

- ME EN 335 - Dynamic System Modeling and Analysis

Recommended
ME EN 431

Learning Outcomes

Title
SO(3) and SE(3) spaces

Tags
180814, 0, 1

Learning Outcome
Students will be able to define the orientation of rigid body using the rotation group SO(3). They will also be able to describe rigid body translation and rotation using homogeneous transformation matrices and the Euclidean group SE(3).

Title
Serial Linkage Kinematics

Tags
180815, 0, 2

Learning Outcome
Students will be able to compute forward and inverse kinematic solutions for serial robot arms.

Title
Serial Linkage Dynamics

Tags
180813, 0, 3

Learning Outcome
Students will be able to derive the dynamic equations for a rigid serial manipulator using recursive Newton-Euler and Euler-Lagrange methods. Students will be able to apply these equations for numerical simulation and common control methods.

Title
Joint Space vs. Cartesian Space

Tags
180816, 0, 4

Learning Outcome
Students will understand the difference between joint space and Cartesian space and be able to use appropriate mathematical methods to move from one space to the other for both kinematics and dynamics.

Title
Robot Control

Tags
180812, 0, 5

Learning Outcome
Students will be able to implement and simulate performance for fundamental feedback control methods for serial robot arms.

Title
Applications, Terminology, and Open Questions in Robotics

Tags
180817, 0, 6

Learning Outcome
Students will learn about common robot applications and terminology, and then apply what they learn to solve an open question in the field or implement a demonstration for a final course project.

ME EN 538 - Compliant Mechanisms

Course Information

Teaching Area (new)
ME EN

Course Number
538

Teaching Area
ME EN

Course Title
Compliant Mechanisms

Course Description
Design and analysis of compliant mechanisms and compliant structures. Large-deflection analysis/force displacement relationships; mechanisms synthesis.

Department
Mechanical Engineering

When Taught
Fall

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Prerequisite

Prerequisites

Complete ALL of the following Courses:

- ME EN 372 - Mechanical System Design Fundamentals

Other Prerequisites
Me En 475 or concurrent enrollment; or instructor's consent

Learning Outcomes

Title
Failure

Tags
180453, 2

Learning Outcome
Analyze, predict and prevent failure of compliant mechanisms.

Title
Task-Specific Design

Tags
180486, 4

Learning Outcome
Design compliant mechanisms for specified tasks.

Title
Fundamentals of Compliant Mechanisms

Tags
180513, 0

Learning Outcome
Understand the fundamentals of compliant mechanisms, including flexibility vs. strength and displacement loads vs. force loads.

Title
Force-Displacement Relationships

Tags
180615, 3

Learning Outcome
Analyze the force-displacement relationships for compliant mechanisms.

Title
Nonlinear Deflections

Tags
180694, 1

Learning Outcome
Analyze the large, nonlinear deflections of flexible members.

ME EN 540 - Intermediate Heat and Mass Transfer

Course Information

Teaching Area (new)
ME EN

Course Number
540

Teaching Area
ME EN

Course Title
Intermediate Heat and Mass Transfer

Course Description
Analytical approaches to conduction, convection, and radiation heat transfer. Introduction to mass transfer.

Department
Mechanical Engineering

When Taught
Winter Odd Years

Prerequisites

Type
Prerequisite

Prerequisites

Complete ALL of the following Courses:

- ME EN 340 - Heat Transfer

Other Prerequisites
or equivalent; concurrent enrollment in Me En 505.

Learning Outcomes

Title
Conduction Heat Transfer

Tags
212585, 0, 9

Learning Outcome
Each student can develop engineering models of multi-dimensional steady and multi-dimensional transient conduction heat transfer scenarios and solve them analytically and numerically.

Title
Convection Heat Transfer

Tags
212586, 0, 10

Learning Outcome
Each student can develop engineering models of convection heat transfer scenarios using analytical approaches based on boundary layer theory for internal and external flows. Each student can apply empirical Nusselt number correlations when analytical solutions are not possible.

Title
Radiation Heat Transfer

Tags
212587, 0, 11

Learning Outcome
Each student can develop engineering models of radiation heat flux for real surfaces from intensity and radiation surface exchange for gray and spectrally selective surfaces.

Title
Mass Transfer

Tags
212588, 0, 12

Learning Outcome
Each student can develop engineering models of mass transfer by analogy with heat transfer.

Title
Advanced Solution Methodology

Tags
212589, 0, 13

Learning Outcome
Each student can implement advanced engineering mathematical methods to develop models of and obtain solutions to conduction, convection and radiation heat transfer problems and to mass transfer problems.

ME EN 541 - Computational Fluid Dynamics and Heat Transfer

Prerequisite

Prerequisites

Complete ALL of the following Courses:

- ME EN 312 - Fluid Mechanics
  AND ME EN 340 - Heat Transfer

Other Prerequisites
or instructor's consent

Learning Outcomes

Title
Pressure-Velocity Coupling

Tags
180468, 3

Learning Outcome
Understand concepts of control volume methods for pressure-velocity coupling.

Title
Verification and Validation Practices

Tags
180480, 1

Learning Outcome
Apply computational verification and validation practices for fluid flow and heat transfer codes.

Title
Turbulence Closure Problem

Tags
180538, 5

Learning Outcome
Understand the basic concept of the turbulence closure problem and how it leads to turbulence models.

Title
Numerical Analysis

Tags
180638, 0

Learning Outcome
Understand the fundamental concepts and techniques used in the numerical analysis of fluid flow and heat transfer.

Title
Finite Difference and Control Volume Methods

Tags
180656, 2

Learning Outcome
Solve 1D diffusion and convection-diffusion fluid flow and heat transfer problems using finite difference and control volume methods.

Title
Commercial Codes

Tags
180717, 4

Learning Outcome
Have a necessary foundation for setting up and analyzing fluid flow and heat transfer problems using commercial codes.

ME EN 550 - (Me En-EC En) Microelectromechanical Systems (MEMS).

Course Information

Teaching Area (new)
ME EN

Course Number
550

Teaching Area
ME EN

Course Title
(Me En-EC En) Microelectromechanical Systems (MEMS).

Course Description
Design, fabrication, and applications of MEMS. Mechanical properties governing their design and reliability and the processing technologies used to fabricate them.

Other Prerequisites
or equivalent.

Learning Outcomes

Title
Tools and Processes

Tags
180462, 1

Learning Outcome
2. Be familiar with the tools and processes used in micromaching of microelectromechanical systems (MEMS).

Title
Analyze and Design

Tags
180557, 2

Learning Outcome
3. Use principles of physics to analyze and design MEMS, including sensors and actuators.

Title
Mechanical Performance

Tags
180718, 0

Learning Outcome
1. Use mechanics principles to analyze the mechanical performance of microsystems.

ME EN 552 - Neuromechanics of Movement

Course Information

Teaching Area (new)
ME EN

Course Number
552

Teaching Area
ME EN

Course Title
Neuromechanics of Movement

Course Description
Biomechanics and neural control of human movement. Principles of mechanical engineering (system dynamics, control) and physiology (motor neuroscience, musculoskeletal biomechanics) are combined to model and simulate how humans plan, control, learn, and adapt their movements.

Department
Mechanical Engineering

When Taught
Fall

Learning Outcomes

Title
Simulate Human Movement

Tags
209449, 0, 3

Learning Outcome
3. Use programming and numerical methods to simulate human movement.

Title
Nervous and Musculoskeletal Systems Interaction

Tags
209447, 0, 1

Learning Outcome
1. Understand how the nervous and musculoskeletal systems interact during movement.

Title
Apply Basic Principles to Model Human Movement

Tags
209448, 0, 2

Learning Outcome
2. Apply basic principles of system dynamics, robotics, and control to model human movement.

Title
Motor Learning and Planning

Tags
209450, 0, 4

Learning Outcome
4. Understand, model, and/or simulate motor learning and planning.

Title
Motor Control

Tags
209451, 0, 5

Learning Outcome
5. Learn, create, and share a hands-on project related to motor control.

ME EN 553 - Mechanical Behavior of Materials

Prerequisites

Complete ALL of the following Courses:

- **AND** ME EN 250 - Science of Engineering Materials

Learning Outcomes

Title
Crystal Structure and Material Defects

Tags
214044, 0, 1, 2023-08-29 10:53:54

Learning Outcome
Identify and describe the influence of crystal structure and material defects on tensile and fracture properties.

Title
Stress Concentration

Tags
214045, 0, 2, 2023-08-29 10:53:57

Learning Outcome
Describe the effects of a stress concentration as well as its influence on the fracture and fatigue life of a structural member.

Title
Griffith Crack Criteria

Tags
214046, 0, 3, 2023-08-29 10:53:59

Learning Outcome
Describe the principles of the Griffith Crack Criteria and its application to brittle materials, and its extension to ductile materials.

Title
Failure Design Philosophy

Tags
214047, 0, 4, 2023-08-29 10:54:09

Learning Outcome
Describe the Failure Design Philosophy and apply it to materials selection in an engineering application.

Title
Member Life Prediction

Tags
214048, 0, 5, 2023-08-29 10:54:10

Learning Outcome
Predict the life of a structural member of known material properties given the loading conditions and a known flaw size.

Title
Impact of Microstructure Features

Tags
214049, 0, 6, 2023-08-29 10:54:12

Learning Outcome
Describe the impact of various microstructure features on tensile, fracture and fatigue properties.

Title
Class Selection

Tags
214050, 0, 7, 2023-08-29 10:54:13

Learning Outcome
Select an appropriate material class given functional requirements, fatigue and fracture.

ME EN 554 - Kinetics of Materials

Course Information

Teaching Area (new)
ME EN

Course Number
554

Teaching Area
ME EN

Course Title
Kinetics of Materials

Course Description
A unified treatment of kinetic processes in materials,including transport, chemical reactions, phase transformations, and microstructure evolution. Emphasis is placed on crystalline materials, but application to glasses, polymers and other material systems are discussed throughout. Specific topics include: kinetic theory of gases,rate theory, reaction kinetics, irreversible thermodynamics,diffusion in a broad spectrum of material classes (both atomistic mechanisms and phenomenological/continuum level models), influence of defects of diffusion, evolution of surfaces, phase transformations (solidification, nucleation and growth, spinodal decomposition), coarsening, grain growth, and morphological instabilities. \n

Prerequisites

Type
Prerequisite

Prerequisites

Complete ALL of the following Courses:

- CHEM 105 - General College Chemistry 1 with Lab (Integrated)

AND ME EN 250 - Science of Engineering Materials

Other Prerequisites
Or Instructor Consent

Learning Outcomes

Title
1. Irreversible Thermodynamics

Tags
209485, 0, 1

Learning Outcome
Use the coupling between generalized forces (gradients of intensive thermodynamic variables) and generalized fluxes (of extensive thermodynamic variables) to predict the response of materials to changing conditions.

Title
2. Rate Theory & Activated Processes

Tags
209486, 0, 2

Learning Outcome
Apply the principles of rate theory (rate constants, equilibrium constants, etc.) and activated processes (energy barriers, etc.) to model various kinetic phenomena.

Title
3. Diffusion

Tags
209487, 0, 3

Learning Outcome
Describe diffusion mechanisms in various classes of materials and use appropriate models to make predictions.

Title
4. Discontinuous Phase Transformations

Tags
209488, 0, 4

Learning Outcome
Understand the mechanisms of discontinuous phase transformations (solidification, nucleation and growth, etc.), the characteristics of resulting microstructures, and be able to apply existing models for these kinetic phenomena.

Title
5. Continuous Phase Transformation

Tags
209489, 0, 5

Learning Outcome
Understand the mechanisms of continous phase transformation (spinodal decomposition, ordering, etc.), the characteristics of resulting microstructures, and be able to apply existing models for these kinetic phenomena.

Title
6. Shape Evolution

Tags
209490, 0, 6

Learning Outcome
Predict how the macroscopic shape and microstructure of materials will evolve under various conditions based on principles of driving forces and mechanisms of shape evolution (coarsening, grain growth, sintering, morphological instabilities, etc.).

Title
7. Micro-to Macro-

Tags
209491, 0, 7

Learning Outcome
Predict macroscopic (e.g. thermodynamics) behavior from models of atomic and/or microscopic phenomena and mechanisms.

ME EN 555 - Biomechanical Engineering

Course Information

Teaching Area (new)
ME EN

Course Number

Learning Outcomes

Title
Physiologic Systems

Tags
180472, 4

Learning Outcome
Utilize mechanical engineering principles to evaluate the mechanics of physiologic systems in the human body.

Title
Hard and Soft Tissues

Tags
180495, 0

Learning Outcome
Describe the structure, function, mechanical properties, and active remodeling of hard and soft tissues.

Title
Ethics

Tags
180530, 5

Learning Outcome
Develop an approach for resolving ethical dilemmas related to biomedical engineering.

Title
Finite Deformation Analysis

Tags
180533, 3

Learning Outcome
Apply finite deformation analysis to compute soft tissue strains based on marker motion.

Title
Skeletal Dynamics and Joint Reaction Forces

Tags
180618, 2

Learning Outcome
Compute skeletal dynamics and joint reaction forces during human locomotion.

Title
Muscles

Tags
180636, 1

Learning Outcome
Describe muscle structure, muscle force sharing, passive and active muscle response.

Title
Independent Research Project

Tags
209068, 0, 6

Learning Outcome
Propose, develop, present, and write a technical paper on a short team research project related to biomechanics.

ME EN 556 - Materials Modeling: Methods in Atomistic, Mesoscale, and Continuum Simulations

Course Information

Teaching Area (new)
ME EN

Course Number
556

Teaching Area
ME EN

Course Title
Materials Modeling: Methods in Atomistic, Mesoscale, and Continuum Simulations

Course Description
Theory and application of various computer simulations to model, understand, and predict the properties of real materials. Specific topics include: first-principles atomistic models, empirical potential atomistic models, mesoscale models, and continuum finite element analysis.

Recommended
CHEM 467

Learning Outcomes

Title
Diverse Modeling Techniques

Tags
180880, 1

Learning Outcome
1. Gain an understanding of the different materials modeling techniques as well as an appreciation for their strengths, weaknesses and limitations.

Title
Physical Phenomena

Tags
180881, 4

Learning Outcome
2. Describe the various physical phenomena governing material behavior at different length scales, either in terms of continuum, thermodynamic descriptions or discrete particles and their interactions.

Title
Continuum Techniques

Tags
180882, 5

Learning Outcome
3. Use FEA techniques to model continuum phenomena and develop a system of equations for their evolution.

Title
First principles Techniques

Tags
180883, 6

Learning Outcome
4. Gain an understanding of the quantum mechanical nature of atomic interactions.

Title
Atomistic Techniques

Tags
180884, 2

Learning Outcome
5. Develop the equations and code to simulate atomistic interactions, and run commercial scale simulations.

Title
Mesoscale Techniques

Tags
180885, 3

Learning Outcome
6. Simulate intermediate scale phenomena using an appropriate mesoscale model.

ME EN 557 - Materials in Extreme Environments

Course Information

Learning Outcomes

Title
Phase Diagrams

Tags
180501, 2

Learning Outcome
Be able to draw, describe and use phase diagrams associated with commonly used engineering materials.

Title
Point and Line Defects

Tags
180516, 1

Learning Outcome
Describe the interactions of point and line defects and their effects on mechanical properties.

Title
Thermodynamics of Nucleation

Tags
180532, 5

Learning Outcome
Describe the thermodynamics and prevalence of both homogeneous and heterogeneous nucleation.

Title
Hardening Mechanisms

Tags
180564, 7

Learning Outcome
Describe the theory behind the different hardening mechanisms of solid materials.

Title
Characterization Techniques

Tags
180594, 0

Learning Outcome
Describe common material characterization techniques and their strengths and limitations.

Title
Isothermal Transformations

Tags
180603, 6

Learning Outcome
Describe the effect of nucleation and growth kinetics on isothermal transformations.

Title
Diffusion

Tags
180631, 4

Learning Outcome
Model non-steady state diffusion in solid materials and predict the difference as a function of time, temperature and species.

Title
Evolution of Microstructure

Tags
180652, 3

Learning Outcome
Describe/model the evolution of microstructure under non-steady state conditions.

ME EN 561 - (Me En-Phscs) Fundamentals of Acoustics.

Learning Outcomes

Title
Sound

Tags
214684, 0, 1

Learning Outcome

Understand physical phenomena underlying sound propagation including energy, intensity, plane waves, standing waves/normal modes, Helmholtz resonators, reflection, transmission, refraction, and absorption. Apply the acoustic wave equation in one, two, and three dimensional systems.

Title
Communication

Tags
214686, 0, 2

Learning Outcome

Communicate effectively with others in the class as you work together to learn the material and solve problems. Practice respect and professionalism in your communications both oral and written as you work in groups on the assignments.

Course Title
Design for Additive Manufacturing

Course Description
This course explores the past, present, and future of additive manufacturing (AM), including how it enables mass customization and increased design complexity. Lab experiences focus on preparing 3D models, operating several types of AM systems, and post processing finished parts. Students apply "Design for AM" principles to adapt existing part designs for AM and design new products that capitalize on the possibilities only available through AM.

Learning Outcomes

Title
Medical device design life cycle

Learning Outcome
Explain in detail each step of the medical device design life cycle and apply it correctly to a course project.

Title
Ethics, standards, regulation, and quality control

Learning Outcome
Correctly navigate ISO standards, safety, ethical, the regulatory frameworks, and quality controls and apply them correctly to design case studies or scenarios.

Title
Innovative approaches

Learning Outcome
Apply innovative approaches such as bio-inspired design and adaptive design for specific populations (e.g. male, female, age-specific populations) in case studies and/or a course project.

Title
Intellectual property

Learning Outcome
Understand intellectual property (IP) considerations involved in medical device design and estimate an IP pathway and timeline for an example project.

Title
Practical experience

Learning Outcome
Demonstrate competence in device specification, execution, validation, and verification on a medical industry-relevant project.

Learning Outcomes

Title
Programming Proficiency

Tags
180526, 0, 0, 2019-09-24 13:48:11

Learning Outcome
Develop skills in programming applied to systems engineering problems and CAD applications.

Title
Optimization and Integration Software

Tags
180567, 0, 1, 2019-09-24 13:48:11

Learning Outcome
Use and program optimization and integration frameworks to optimize programmatic systems engineering and CAD/CAE applications.

Title
Advanced Systems Design Models

Tags
180467, 0, 2, 2019-09-24 13:48:11

Learning Outcome
Learn and demonstrate the use of advanced systems design models such as discrete event simulation, agent based Modeling, system dynamics, and surrogate modeling techniques for rapid systems design space exploration.

Title
Visualization and Decision-Making Techniques

Tags
180693, 0, 3, 2019-09-24 13:48:11

Learning Outcome
Understand and apply visualization and decision making techniques for multi-dimensional spaces for systems-level decision analysis and optimization.

Title
Systems Analysis Principles

Tags
180639, 0, 4, 2019-09-24 13:48:11

Learning Outcome
Understand and apply basic systems analysis principles and techniques such as feasibility studies, requirements development, Monte Carlo simulations, life cycle cost analysis, complexity, Lean Six Sigma, system-of-systems, game theory, risk assessment, uncertainty analysis, etc.

Title
Proof-of-Concept

Tags
180492, 0, 5, 2019-09-24 13:48:11

Learning Outcome
Develop a proof-of-concept for an industry or research sponsored systems engineering application.

Title
Collaboration

Tags
180554, 0, 6, 2019-09-24 13:48:11

Learning Outcome
Work in collaboration with fellow teammates to accomplish both the learning of the technique and the executing of the systems engineering project.

Learning Outcomes

Title
Effects of Globalization

Tags
180559, 4

Learning Outcome
Understand how globalization affects us.

Title
Outsourcing

Tags
180580, 3

Learning Outcome
Understand why outsourcing is such a big deal with companies.

Title
Global Product Development Issues

Tags
180583, 0

Learning Outcome
Understand issues associated with a global product development including developing product needs in unfamiliar cultures, managing distributed design teams and manufacturing at remote and/or distributed sites. Appreciate first-hand how global companies approach these issues.

Title
Global Product Development Challenges

Tags
180641, 2

Learning Outcome
Appreciate the challenges in managing product development across different countries, cultures and languages, and how companies apply appropriate tools and processes to address these challenges.

Title
Integrated Nature of a Global Economy

Tags
180670, 6

Learning Outcome
Appreciate the integrated nature of business, engineering, law and other disciplines in a global economy.

Title
Global Design Strategies

Tags
180678, 1

Learning Outcome
Understand design strategies in a global environment.

Title
Design and Manufacturing Capabilities in Other Countries

Tags
180705, 5

Learning Outcome
Understand the design and manufacturing capabilities of other countries and how companies leverage these capabilities (work with, deal with, manage) in a cross cultural team environment.

ME EN 585 - Deep Learning for Engineers

Course Information

Course Number
585

Teaching Area
ME EN

Course Title
Deep Learning for Engineers

Course Description
Design and implement neural networks in an engineering context. Focus on unique architectures and approaches for engineers which incorporate prior physical knowledge, domain constraints, and established scientific algorithms.

Other Prerequisites
Scientific Computing

Learning Outcomes

Title
Mathematical Foundations

Learning Outcome
Explain and apply the mathematical foundations of deep learning, including backpropagation, optimization, and cross-validation.

Title
Architectures

Learning Outcome
Design and implement engineering-focused architectures such as physics-informed neural networks (PINNs), neural ODEs, neural Koopman models, convolutional networks, graph networks, Kolmogorov-Arnold networks, and neural operators.

Title
Incorporate Physics

Learning Outcome
Develop and train models that integrate prior knowledge, domain constraints, physical laws, differential equations, and/or other engineering and mathematical relationships.

Title
Evaluate Model Suitability

Learning Outcome
Evaluate and verify model performance measures such as accuracy, uncertainty, generalization, interpretability, and scalability.

Title
Assess Emerging Methods

Learning Outcome
Critically assess contemporary research in deep learning for scientific and engineering domains, including emerging architectures and methodologies.

Title
Engineering Project

Learning Outcome
Formulate and execute a research or engineering project using advanced deep learning methods, demonstrating creativity, rigor, and domain relevance.

Title
Software Tools

Learning Outcome
Utilize modern software tools and frameworks (e.g., PyTorch) and hardware accelerators (e.g., GPUs) to build scalable and reproducible deep learning workflows.

Course Title
Special Topics in Mechanical Engineering

Department
Mechanical Engineering

When Taught
All Semesters/Terms

Credit Hours

Min:
0.5

Fixed/Max:
18

Lecture Hours

Fixed:
2

Lab Hours

Fixed:
0

Other Prerequisites
Departmental consent.

Learning Outcomes

Title
Topic Understanding

Tags
180669, 0

Learning Outcome
Students will develop an understanding of a timely topic in mechanical engineering.

ME EN 634 - Autonomous Aircraft Guidance, Navigation, and Control

Course Information

Teaching Area (new)
ME EN

Course Number
536

Teaching Area
ME EN

Course Title
Autonomous Aircraft Guidance, Navigation, and Control

Course Description
Dynamics of fixed-wing aircraft flight, stability, and control derivatives, longitudinal and lateral control design; state-space control strategies for aircraft; and autonomous aircraft applications.

Department
Mechanical Engineering

When Taught
Winter Odd Years

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Simple Requisites

Prerequisites

Type
Completion Requirement

Complete ANY of the following Courses:

- ME EN 431 - (Me En-EC En 483) Design of Control Systems **OR** EC EN 483 - (EC En-Me En 431) Design of Control Systems.

Learning Outcomes

Title
Aircraft Dynamics and Motion Simulation

Tags
214051, 0, 1, 2023-08-29 10:55:04

Learning Outcome
An understanding of aircraft dynamics including coordinate frames, aircraft state variables, dynamics, and aerodynamics. The ability to simulate aircraft motion using nonlinear moderate-fidelity models and simplified linear models.

Title
Aircraft Control Techniques and Autopilots

Tags
214052, 0, 2, 2023-08-29 10:55:06

Learning Outcome
An understanding of common aircraft control techniques, such as successive loop closure, and how they apply to the design of longitudinal and lateral-directional autopilots.

Title
State Estimators

Tags
214053, 0, 3, 2023-08-29 10:55:08

Learning Outcome
The ability to design and implement estimators, including Kalman filters, to estimate aircraft states.

Title
Path Planning and Path Following Algorithms

Tags
214054, 0, 4, 2023-08-29 10:55:10

Learning Outcome
An understanding of path planning and path following algorithms suitable for unmanned aircraft and the ability to implement them in an aircraft simulation.

ME EN 655 - Advanced Biomechanical Engineering

Course Information

Course Number
655

Teaching Area
ME EN

Course Title
Advanced Biomechanical Engineering

Course Description
Advanced mechanics of biological systems. A continuum mechanics-based approach to the structure, function, mechanical response, and active remodeling of hard and soft tissues of the body.

Department
Mechanical Engineering

When Taught
Fall

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Simple Requisites

Prerequisite

Type
Prerequisite

Complete ANY of the following Courses:
- ME EN 351 - Fundamentals of Biomedical Engineering
- CBE 351 - Fundamentals of Biomedical Engineering

Other Prerequisites
Must have graduate standing in the university

Note
Only ME EN 555 or ME EN 655 (not both) can be applied towards graduation requirements

Learning Outcomes

Title
Hard and Soft Tissues

Learning Outcome
Describe the structure, function, mechanical properties, and active remodeling of hard and soft tissues.

Title
Muscles

Learning Outcome
Describe muscle structure, muscle force sharing, passive and active muscle response.

Title
Skeletal Dynamics and Joint Reaction Forces

Learning Outcome
Compute skeletal dynamics and joint reaction forces during human locomotion.

Title
Finite Deformation Analysis

Learning Outcome
Apply finite deformation analysis to compute soft tissue strains based on marker motion.

Title
Physiologic Systems

Learning Outcome
Utilize mechanical engineering principles to evaluate the mechanics of physiologic systems in the human body.

Title
Ethics

Learning Outcome
Develop an approach for resolving ethical dilemmas related to biomedical engineering.

Title
Independent Research Project

Learning Outcome
Propose, develop, present, and write a technical paper on a research project related to biomechanical engineering

Title
Research Mentoring

Learning Outcome
Mentor a team of graduate and undergraduate students on a research project related to biomechanical engineering

Title
Divine Design

Learning Outcome
Develop an appreciation for God the Creator by studying the engineering design principles that can be observed in the hierarchical structure, systematic integration, metamaterials, stress remodeling response, and dynamic mechanical behavior of the human body.

MESA 201 - Introduction to Middle East Studies

Course Information

Teaching Area (new)
MESA

Course Number
201

Teaching Area
MESA

Course Title
Introduction to Middle East Studies

Course Description
Introduction to Middle East from historical, art/literary, and various social science perspectives, including introduction to disciplinary methodologies and major issues of interest.

Department
International and Area Studies

When Taught
Fall

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Learning Outcomes

Title
Introduction to the Study of the Middle East

Tags
200122, 0

Learning Outcome
This course identifies major areas of study necessary to understand the culture, context, and areas of current concern in the Middle East and poses questions as to how we may go about learning.

MESA 250 - Introduction to the Religion of Islam

Course Information

Teaching Area (new)
MESA

Course Number
250

Teaching Area
MESA

Course Title
Introduction to the Religion of Islam

Course Description
Exploring the rise of Islam, the life of Muhammad, basic beliefs and practices, major figures and movements, and contemporary political and social issues.

Department
International and Area Studies

When Taught
Winter

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Learning Outcomes

Title
Introduction to Religion of Islam

Tags
200115, 0

Learning Outcome
Study of the sources, history, principles of religion, law, and practice from the founding of Islam until the present period.

MESA 300 - Professional Development in International Studies

Course Information

Teaching Area (new)
MESA

Course Number
300

Teaching Area
MESA

Course Title
Professional Development in International Studies

Course Description
Focus on the following topics, with application to training in Middle East Studies: career exploration, internship planning, graduate school exploration and planning, developing a professional resume and web presence, and career networking.??Students will attend several career-related lectures of their choosing, and complete assignments designed to support their professional development after graduation.

Department
International and Area Studies

When Taught
Fall and Winter

Credit Hours

Min:
1

Fixed/Max:
1

Lecture Hours

Fixed:
1

Lab Hours

Fixed:
0

Recommended
MESA 201; MESA 201; Students should take this course during their second or third year in the major.

MESA 320 - The Qur'an in English

Course Information

Teaching Area (new)
MESA

Course Number
320

Teaching Area
MESA

Course Title
The Qur'an in English

Course Description
Students examine and assess interpretations of the Qur'an in English, studying the historical, theological, and literary aspects of the Qur'anic text. \n\n

Department
International and Area Studies

Type
Prerequisite

Prerequisites

Complete ALL of the following Courses:

- MESA 250 - Introduction to the Religion of Islam

Learning Outcomes

Title
MESA 350 Contemporary Islam

Tags
200112, 0

Learning Outcome
Class on issues which face contemporary Muslims throughout world.

MESA 380 - Middle Eastern Field Studies

Course Information

Teaching Area (new)
MESA

Course Number
380

Teaching Area
MESA

Course Title
Middle Eastern Field Studies

Course Description
Topics include the history, archeology, religion, society, and politics of the region. Visit key sites described in both the Old and New Testaments, monuments of the Hebrew and Roman worlds, as well as sites of historical and contemporary social and political relevance. Assess the rich historical and spiritual legacy of biblical Israel, patterns of political and social development in the 20th century, including the founding of the state of Israel. Examine the history of the Israeli-Palestinian conflict, contemporary domestic social and political issues in Israel and Palestine, attempts at conflict resolution, and opportunities for future political development.

Department

ARAB 300

Recommended
MESA 201. ARAB 300.

Note
This is a two-week course designed for Study Abroad.

MESA 398R - Directed Middle East Study

Course Information

Teaching Area (new)
MESA

Course Number
398R

Teaching Area
MESA

Course Title
Directed Middle East Study

Course Description
Study and research in the Middle East.

Department
International and Area Studies

When Taught
Contact Department

Credit Hours

Min:
1

Fixed/Max:
3

Other Prerequisites
Instructor's consent; Middle East Studies/Arabic coordinator's consent

Learning Outcomes

Title
Directed Reading

Tags
200109, 0

Learning Outcome
This course is for students who wish to follow a well-defined, advanced course of study achieved through readings, research and critique supervised by a professor.

MESA 399R - Academic Internship

Course Information

Teaching Area (new)
MESA

Course Number
399R

Teaching Area
MESA

Course Title
Academic Internship

Course Description
Individualized work or volunteer experience in the Middle East or with an organization dealing with the Middle East. Must be coordinated through International Study Programs or the Washington Seminar and with the consent of the Middle East Studies/Arabic coordinator.

Department
International and Area Studies

When Taught
Contact Department

Credit Hours

Min:
1

Fixed/Max:
3

Other Prerequisites
Middle East Studies/Arabic coordinator's consent

Note
An APPROVED Internship Application is required before adding.

Learning Outcomes

Title
Professional Knowledge

Tags
200144, 1

Learning Outcome
The students will utilize a significant range of skills and abilities in a professional setting.

Fulfill ANY of the following requirements:

Prerequisites

Complete ALL of the following Courses:

- ARAB 302 - Newspaper Arabic
  AND POLI 200 - Political Inquiry

OR

Prerequisites

Complete ALL of the following Courses:

- ARAB 302 - Newspaper Arabic
  AND HIST 200 - The Historian's Craft.

Learning Outcomes

Title
Capstone Seminar MESA 495R

Tags
200113, 0

Learning Outcome
The Capstone Seminar is the final course in the major. It combines in-depth research on a narrow topic with a research, analysis and writing of a substantive research paper in multiple drafts utilizing peer reviews at two stages, an oral presentation of findings, and research utilizing Arabic sources.

MFGEN 130 - Introduction to Manufacturing Engineering

Course Information

Teaching Area (new)
MFGEN

Course Number
130

Teaching Area
MFGEN

Course Title
Introduction to Manufacturing Engineering

Course Description
Students will gain an understanding of manufacturing engineering as an integrated discipline that connects materials, processes, design, quality, and sustainability. The course also covers the diverse career paths available to manufacturing engineers after graduation.

Department
Manufacturing Engineering

When Taught
Fall and Winter

Credit Hours

Min:
1

Fixed/Max:
1

Lecture Hours

Fixed:
1

Lab Hours

Fixed:
1

Learning Outcomes

Title
Manufacturing Concepts I

Tags
208603, 0, 3

Learning Outcome
Objective: Students will understand the four pillars of manufacturing and the role of each pillar in the manufacturing discipline: 1. Materials and Manufacturing Processes, 2. Product, Tooling and Assembly Engineering, 3. Manufacturing Systems and Operations, and 4. Manufacturing Competitiveness. 7. New Knowledge

Title
Manufacturing Concepts II

Tags
208604, 0, 4

Learning Outcome
Students will become familiar with the discipline of manufacturing engineering, including sub-disciplines and career opportunities available to graduates of the program. Link to Program Outcomes: 7. New Knowledge

Title
Manufacturing Curriculum and Program Structure

Tags
181275, 1

Learning Outcome
Students will become familiar with the manufacturing engineering program at BYU, including curriculum, advisement resources, faculty members, and undergraduate research opportunities.

MFGEN 140 - Manufacturing Design

Course Information

Course Number
140

Teaching Area
MFGEN

Course Title
Manufacturing Design

Course Description
This course will introduce students to a manufacturing engineering design process, technical sketching, parametric modeling and design, tolerance specification, documentation drawing and assembly modeling.

Department
Manufacturing Engineering

When Taught
Fall and Winter

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
2

Lab Hours

Fixed:
2

Learning Outcomes

Title
Communication

Learning Outcome
Students will communicate ideas and concepts through technical sketches.

Title
Manufacturing Concepts, 1

Learning Outcome
Students will interpret the design intent of an engineering drawing through reading and understanding the dimensions and tolerances. 2.

Title
Manufacturing Concepts, 2

Learning Outcome
Students will apply the appropriate dimensions and tolerances, coordinate and geometric, to a part/engineering drawing to represent the desired function/form/fit.

Title
Manufacturing Design

Learning Outcome
Students will use CAD tools to create three-dimensional models of parts and assemblies, and their associated engineering drawings.

MFGEN 220 - Material Removal

Course Information

Teaching Area (new)
MFGEN

Course Number
220

Teaching Area
MFGEN

Course Title
Material Removal

Course Description
Methods and procedures to shape materials using basic machine tools; cutting theory, tool selection, metrology methods, and machine operation. Introduction to computer numerical control.

Department
Manufacturing Engineering

When Taught
Fall

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
2

Lab Hours

Fixed:
3

Simple Requisites

Prerequisites

Type
Prerequisite

Prerequisites

Complete ALL of the following Courses:

- MFGEN 140 - Manufacturing Design
  AND MATH 111 - Trigonometry
  AND MFGEN 130 - Introduction to Manufacturing Engineering

Other Prerequisites
MFGEN 130 and MFGEN 140 can be taken concurrently

Learning Outcomes

Title
Safety

Tags
181238, 0

Learning Outcome
Students will apply appropriate shop safety principles and precautions while working in a manufacturing environment. (Student Outcome 1)

Title
Machining Processes

Tags
181282, 1

Learning Outcome
Students will apply correct principles of cutting metals and non-metals with various machine tools and a variety of cutting tools. (Student Outcome 1) 1. Metrology 2. Speeds and Feeds 3. Hand Tools 4. Engine Lathe 5. Manual Mills 6. Drilling 7. Saws 8. CNC Programming for Mills

MFGEN 230 - Computer-Aided Manufacturing

Course Information

Teaching Area (new)
MFGEN

Course Number
230

Teaching Area
MFGEN

Course Title
Computer-Aided Manufacturing

Course Description
Manual and computer-assisted programming of computer numerical controlled (CNC) equipment. Developing CNC programs to manufacture parts for high production.

Department
Manufacturing Engineering

When Taught
Winter

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
2

Lab Hours

Fixed:

Prerequisite

Prerequisites

Complete ALL of the following Courses:

- MFGEN 220 - Material Removal

Learning Outcomes

Title
Safety

Tags
181013, 0

Learning Outcome
Students will apply appropriate shop safety principles and precautions while working in a manufacturing environment. (Student Outcome 1)

Title
Machining Processes

Tags
181169, 1

Learning Outcome
Students will apply correct principles of cutting metals and non-metals with various machine tools and a variety of cutting tools. (Student Outcome 1) 1. Metrology 2. Speeds and Feeds

Title
CAD/CAM/CNC

Tags
181278, 2

Learning Outcome
Students will apply correct principles related to G&M code programming. (Student Outcome 1) 1. Manual programming - Mill, Wire EDM, Lathe 2. CAM programming

Title
Design

Tags
181154, 3

Learning Outcome
Students will apply the design process while solving manufacturing related problems. (Student Outcome 7)

MFGEN 291 - Manufacturing Leadership

Course Information

Teaching Area (new)
MFGEN

Course Number
291

Teaching Area
MFGEN

Course Title
Manufacturing Leadership

Course Description
Lectures on personal and professional development, ethics, global leadership, and belonging. An emphasis on resumes and internship preparation will be included.

Department
Manufacturing Engineering

When Taught
Fall

Credit Hours

Fixed/Max:
1

Lecture Hours

Fixed:
1

Learning Outcomes

Title
Leadership

Tags
181335, 1

Learning Outcome
Students will understand that the essence of leadership is to build people through development of individual talents and fastering life-long growth and learning.

Title
Responsibility

Tags
181040, 2

Learning Outcome
Students will understand their personal role in life-long professional, ethical, global, cultural and social responsibilities.

Title
Lifelong Learning

Tags
181127, 3

Learning Outcome
Students will understand their personal role in staying current in technical fields and life-long learning.

MFGEN 318 - Manufacturing Electronics and Microsystems

Course Information

Teaching Area (new)
IT&C

Course Number
318

Teaching Area
MFGEN

Course Title
Manufacturing Electronics and Microsystems

Course Description
Basics of electricity; behavior and manufacture of resistors, inductors, capacitors, transformers; motors; manufacture of transistors, ICs, MCMs, circuit boards. Computers; digital communications; networking.

Department
Electrical and Computer Engineering

When Taught
Winter

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
2

Lab Hours

Fixed:
3

Simple Requisites

Prerequisites

Type
Prerequisite

Prerequisites

Complete ALL of the following Courses:

- PHSCS 121 - Introduction to Newtonian Mechanics

Learning Outcomes

Title
Use of Electrical Energy

Tags
214055, 0, 1, 2023-08-29 10:56:37

Learning Outcome
Understand and be able to effectively and safely use electrical energy in manufacturing.

Title
Analog and Digital Devices

Tags
214056, 0, 2, 2023-08-29 10:56:43

Learning Outcome
Define and be able to use analog and digital devices in manufacturing applications.

Title
Analog and Digital Devices

Tags
214057, 0, 3, 2023-08-29 10:56:44

Learning Outcome
Be able to design manufacturing processes for electronic/microsystem-based products.

Title
Processes for Electronic/Microsystem Products

Tags
214058, 0, 4, 2023-08-29 10:56:45

Learning Outcome
Be able to design manufacturing processes for electronic/microsystem-based products.

Title
Advantages and Limitations

Tags
214059, 0, 5, 2023-08-29 10:57:01

Learning Outcome
Identify advantages and limitations of manufacturing process relevant for electronics and microsystems.

Title
Cost Analysis

Tags
214060, 0, 6, 2023-08-29 10:57:05

Learning Outcome
Be able to perform cost analyses of manufacturing processes related to electronic/microsystem-based products.

Title
Method Evaluation

Tags
214061, 0, 7, 2023-08-29 10:57:15

Learning Outcome
Be able to evaluate manufacturing methods with respect to product specifications.

Title
Life Cycle Analysis

Tags
214062, 0, 8, 2023-08-29 10:57:16

Learning Outcome
Be able to analyze the life cycle of electronic/microsystem products.

MFGEN 331 - Metals Processes

Course Information

Teaching Area (new)
MFGEN

Course Number
331

Teaching Area
MFGEN

Course Title
Metals Processes

Course Description
Capabilities and applications of common metal-processing methods, including relationships between part design, material, and process parameters.

Department
Manufacturing Engineering

When Taught
Fall.

Credit Hours

Min:
4

Fixed/Max:
4

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
3

Simple Requisites

Prerequisites

Type
Prerequisite

Prerequisites

Complete ALL of the following Courses:

- ME EN 250 - Science of Engineering Materials
  AND MFGEN 230 - Computer-Aided Manufacturing

Recommended
CE En 203 is strongly recommended

Learning Outcomes

Title
Material Properties of Metals

Tags
208605, 0, 1

Learning Outcome
Students will understand the effect of metals processes on the microstructure and mechanical properties of metal alloys and be able to design processes to produce desired properties.

Title
Design Project

Tags
208606, 0, 2

Learning Outcome
Students will design a part or assembly and manufacture it using metals processes.

Title
Metals Processes

Tags
206730, 0

Learning Outcome
Students will understand and apply principles of welding and joining, casting, and metal forming to the manufacture of individual parts and/or assemblies.

MFGEN 333 - Industrial Automation

Course Information

Teaching Area (new)
MFGEN

Course Number
333

Teaching Area
MFGEN

Course Title
Industrial Automation

Course Description
Application of sensors, actuators, robotics, part feeding and assembly, PLCs, pneumatic and hydraulic control, for justifying industrial automation.

Department
Manufacturing Engineering

When Taught
Fall

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
2

Lab Hours

Fixed:
2

Simple Requisites

Prerequisites

Type
Prerequisite

Prerequisites

Complete ANY of the following Courses:

- C S 110 - How to Program
  OR C S 111 - Introduction to Computer Science

Learning Outcomes

Title
Automation System and Process Design

Tags
181089, 2

Learning Outcome
Students will understand and apply fundamental design methodologies for the selection of appropriate automation processes and equipment.

Title
Variation

Tags
181064, 3

Learning Outcome
Students will learn the impact of part variation on automated production.

Title
Programming

Tags
181061, 4

Learning Outcome
Students will demonstrate ability to program industrial robots and PLCs that communicate with industrial hardware for control of automated systems.

Title
Communication

Tags
181132, 5

Learning Outcome
Students will establish effective written communication skills through technical reports.

MFGEN 340 - Quality Systems in Manufacturing

Course Information

Teaching Area (new)
MFGEN

Course Number
340

Teaching Area
MFGEN

Course Title
Quality Systems in Manufacturing

Course Description
Tools and principles of quality in manufacturing systems based on the Six Sigma process. Basic tools, variation, loss function, cost of quality, SPC, DOE, and FMEA. Comprehensive project required.

Department
Manufacturing Engineering

When Taught
Fall

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
2

Lab Hours

Fixed:
3

Simple Requisites

Prerequisites

Type
Prerequisite

Prerequisites

Complete ALL of the following Courses:

- STAT 121 - Introduction to Statistical Data Analysis

Other Prerequisites
or concurrent enrollment.

Learning Outcomes

Title
Variation

Tags
181179, 4

Learning Outcome
Students will assess the nature, types, and impact of variation.

Title
System Improvement

Tags
181197, 7

Learning Outcome
Students will understand and implement system improvement concepts.

Title
Quality and Capability

Tags
181119, 0, 5

Learning Outcome
Students will be able to effectively define, measure, analyze, improve, and control quality and capability.

MFGEN 355 - Plastics Materials and Processing

Course Information

Teaching Area (new)
MFGEN

Course Number
355

Teaching Area
MFGEN

Course Title
Plastics Materials and Processing

Course Description
Understanding plastic materials, properties, and uses. Survey of plastic-manufacturing processes. Designing plastic products and manufacturing systems.

Department
Manufacturing Engineering

When Taught
Contact Department

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

3

Simple Requisites

Prerequisites

Type
Prerequisite

Prerequisites

Fulfill ANY of the following requirements:

Prerequisites

Complete ALL of the following Courses:
- ME EN 250 - Science of Engineering Materials
  OR MFGEN 230 - Computer-Aided Manufacturing

OR

Prerequisites

Complete ALL of the following Courses:
- CBE 378 - Science of Engineering Materials
  OR ME EN 382 - Manufacturing Processes

Fulfill ANY of the following requirements:

Complete ALL of the following Courses:
- MFGEN 230 - Computer-Aided Manufacturing
  OR CBE 378 - Science of Engineering Materials

OR

Complete ALL of the following Courses:
- ME EN 382 - Manufacturing Processes
  OR ME EN 250 - Science of Engineering Materials

Other Prerequisites
or instructor's consent.

Learning Outcomes

Title
Materials

Tags
181334, 1

Learning Outcome
Students will understand the behavior, properties, and science of plastic materials and use that knowledge to select appropriate materials for a given application or process.

Title
Processes

Tags
181327, 2

Learning Outcome
Students will understand a variety of manufacturing processes for plastics and be able to select the appropriate process for a given task, and be able to trouble shoot such processes.

Title
Design

Tags
181324, 3

MFGEN 372 - Design for X

Course Information

Teaching Area (new)
MFGEN

Course Number
372

Teaching Area
MFGEN

Course Title
Design for X

Course Description
Design methodologies and guidelines for products and systems. Design for Manufacturing, Design for Assembly, Design for Sustainability, Design for Usability, and other related topics. Concurrent engineering skills for engaging design, manufacturing, and systems engineers in multidisciplinary teams.

Department
Manufacturing Engineering

When Taught
Winter

Credit Hours

Learning Outcomes

Title
Manufacturing Processes

Tags
208598, 0, 1

Learning Outcome
Students will understand the basic principles and limitations of common manufacturing processes and how they affect the manufacturability of a design.

Title
Product Design Theory

Tags
208599, 0, 2

Learning Outcome
Students will understand how Design for Manufacturing & Assembly methods can aid in concurrent engineering practices.

Title
Product Design Practical

Tags
208600, 0, 3

Learning Outcome
Students will apply Design for X methods in product design.

Title
Quality and Continuous Improvement

Tags
208601, 0, 4

Learning Outcome
Students will evaluate the influence of design principles on quality, performance, and cost.

Title
Communication

Tags
208602, 0, 5

Learning Outcome
Make, communicate, and defend design decisions based on Design for X methods.

MFGEN 381 - Lean Manufacturing & System Design

Course Information

Teaching Area (new)
MFGEN

Course Number
381

Teaching Area
MFGEN

Course Title
Lean Manufacturing & System Design

Course Description
Basic elements, planning and integration issues of manufacturing systems. Analyzing product specifications and production requirements for manufacturing concepts and practices involved in process planning and manufacturing system design. Designing a manufacturing system can be as complex and crucial to the success of a company as the design of the products being made. Equipment selection and justification; facility layout and material-handling system design; process-improvement techniques. Lean manufacturing principles will be used within the context of each topic in this course.

MFGEN

Course Title
Junior Seminar

Course Description
Lectures on professionalism, leadership, and career and life success.

Department
Manufacturing Engineering

When Taught
Fall Term 1.

Credit Hours

Min:
0.5

Fixed/Max:
0.5

Lecture Hours

Fixed:
0.5

Lab Hours

Fixed:
0

Other Prerequisites
MFG 291; junior standing.

Learning Outcomes

Title
Ethics and Professionalism

Tags
208636, 0, 1

Learning Outcome
Students will demonstrate an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.

Title
Communication

Tags
181361, 1

Learning Outcome
Students will demonstrate an ability to communicate effectively with a range of audiences.

MFGEN 399R - Academic Internship

Course Information

Teaching Area (new)
MFGEN

Course Number
399R

Teaching Area
MFGEN

Course Title
Academic Internship

Course Description
Working in teams to solve problems encountered in industry. Project management and reporting under guidance of industry supervisor and department faculty.

Prerequisite

Prerequisites

Complete ALL of the following Courses:
- STAT 121 - Introduction to Statistical Data Analysis

Learning Outcomes

Title
Statistics & Data Analysis Tools

Tags
208594, 0, 1

Learning Outcome
Students will understand the roles of descriptive & inferential statistics in manufacturing and demonstrate the ability to collect and analyze data according to statistical best practices.

Title
Design of Experiments

Tags
208595, 0, 2

Learning Outcome
Students will understand the advantages of controlled factorial experiments and demonstrate the ability to set up and draw conclusions from factorial experiments.

Title
Regression Analysis

Tags
208596, 0, 3

Learning Outcome
Students will understand and be able to correctly use ANOVA, simple and multiple linear regression, and model fit assessment tools.

Title
Semester Project

Tags
208597, 0, 4

Learning Outcome
Students will apply data analysis best practices to an open-ended engineering problem and professionally communicate the experiment, analysis, and recommendations.

MFGEN 431 - Tool Design

Course Information

Teaching Area (new)
MFGEN

Course Number
431

Teaching Area
MFGEN

Course Title
Tool Design

Course Description
Designing special tooling for manufacturing processes using solids-modeling design systems.

Department
Manufacturing Engineering

Complete ALL of the following Courses:

- MFGEN 230 - Computer-Aided Manufacturing
  AND MFGEN 331 - Metals Processes

Learning Outcomes

Title
Design of Tooling

Tags
181163, 1

Learning Outcome
Students will understand and be able to apply correct principles when designing tooling to be used in manufacturing operations.

Sheet Metal Punch and Die
Functional Gage
Drill Jig
Mill Fixture

Title
Cost Analysis

Tags
181143, 2

Learning Outcome
Students will understand and be able to apply correct principles related to cost analysis and estimation when designing tooling.

Title
Design Process

Tags
181221, 0

Learning Outcome

Students will understand and be able to apply the design process while solving manufacturing related problems.

MFGEN 433 - Introduction to Smart Manufacturing

Course Information

Teaching Area (new)
MFGEN

Course Number
433

Teaching Area
MFGEN

Course Title
Introduction to Smart Manufacturing

Course Description
Integrating industrial connectivity with real-time performance visibility and issue identification, development of task-based interfaces for a connected assembly line, use of digital processes for increasing production flexibility, and utilizing augmented reality work descriptions.

Department
Manufacturing Engineering

When Taught
Winter

Credit Hours

Min:
3

Fixed/Max:

Prerequisite

Complete ALL of the following Courses:

- MFGEN 333 - Industrial Automation

Other Prerequisites
Ore equivalent experience, see instructor

Learning Outcomes

Title
Equipment

Tags
208639, 0, 3

Learning Outcome
Students will demonstrate capability in connecting equipment, sensors, and controllers

Title
Communication

Tags
208640, 0, 4

Learning Outcome
Students will demonstrate how to communicate real-time information from sensors and equipment, and will create alerts and dashboards to convey changing information.

Title
Digital Design Implementation

Tags
208641, 0, 2

Learning Outcome
Students will understand how to implement digital design throughout the manufacturing process.

Title
Design Theory

Tags
208638, 0, 1

Learning Outcome
Students will understand Smart Manufacturing Principles, Design, and Equipment Selection.

Title
Applications

Tags
208744, 0, 5

MFGEN 435 - Application of Sensors and Instrumentation for Manufacturing

Course Information

Course Number
435

Teaching Area
MFGEN

Course Title
Application of Sensors and Instrumentation for Manufacturing

Course Description
An introduction to industrial sensors and data acquisition. Students will learn about and gain experience with different sensors, how they work, what they measure, how to use them, and how to make sense of the data.

Department
Manufacturing Engineering

When Taught
Winter

Credit Hours

Fixed/Max:
3

Lecture Hours

Fixed:
2

Lab Hours

Fixed:
2

Simple Requisites

Prerequisites

Type
Completion Requirement

Complete ALL of the following Courses:
- MFGEN 333 - Industrial Automation
- STAT 201 - Statistics for Engineers and Scientists

Other Prerequisites
Or equivalent with instructors approval

Learning Outcomes

Title
1. Familiarity with industrial sensors.

Tags
214063, 0, 1, 2023-08-29 10:58:47

Learning Outcome
Students will be competent with a wide variety of common industrial sensors and know how they work. Students will be able to look up relevant data from sensor spec sheets, including useful operating ranges, resolution, lag, and errors associated with each sensor. (Learning outcome 6- Experimentation).

Title
2. Sensor behavior.

Tags
214064, 0, 2, 2023-08-29 10:58:51

Learning Outcome
Students will be aware of the limitations and proper usage of each sensor and how this affects the measurements. Students will mathematically describe sensor responses to various input, including 0th, 1st, and 2nd order systems, amplitude ratios, and frequency responses. (Learning outcomes 1, 6- Complex Engineering Problems, Experimentation).

Title
3. Data acquisition.

Tags
214065, 0, 3, 2023-08-29 10:58:52

Learning Outcome
Students will be familiar with different data acquisition techniques and equipment, and be able to evaluate the quality and reliability of sensor output; including how to use correct sampling frequencies, filter data signals, and make decisions based on sensor data. (Learning outcome 7- New Knowledge).

MFGEN 440 - Six Sigma for Manufacturing

Course Information

Teaching Area (new)
MFGEN

Course Number
440

Teaching Area
MFGEN

Course Title
Six Sigma for Manufacturing

Course Description
Principles of Six Sigma applied to manufacturing. Includes the DMAIC improvement methodology, tools of statistical analysis, project management, and related lean principles.

Prerequisites

Type
Completion Requirement

Complete ALL of the following Courses:
- ME EN 382 - Manufacturing Processes
  AND MFGEN 355 - Plastics Materials and Processing

Other Prerequisites
Equivalent to MFGEN 355 with instructors approval

Learning Outcomes

Title
Materials

Tags
181053, 0

Learning Outcome
Understand the behavior, properties, and science of composite materials and use that knowledge to select appropriate materials for a given application or process.

Title
Manufacturing

Tags
181170, 2

Learning Outcome
Understand a variety of manufacturing processes for composites and be able to select the appropriate process for a given task, and be able to trouble shoot such processes.

Title
Product and Process Design

Tags
181051, 3

Learning Outcome
Understand the design of composite products and the equipment, tooling, and environment for their economical manufacture.

MFGEN 479 - Innovation and Entrepreneurship

Course Information

Teaching Area (new)
MFGEN

Course Number
479

Teaching Area
MFGEN

Course Title
Innovation and Entrepreneurship

Course Description
Develop ideas into a business model. Learn product development. Entrepreneurial concepts and practices. Strategic planning and global competitiveness.

Department
Manufacturing Engineering

When Taught
Fall

Learning Outcomes

Title
Entrepreneurial Team

Tags
181217, 1

Learning Outcome
Students will participate effectively on an entrepreneurial founding team.

Title
Business Evaluation

Tags
181108, 2

Learning Outcome
Students will evaluate business ideas, opportunities, and plans.

Title
Financial Planning

Tags
181252, 3

Learning Outcome
Students will plan the financial structure and needs of a new business.

Title
Terminology

Tags
181167, 4

Learning Outcome
Students will understand and apply entrepreneurial terminology to the entrepreneurial and investment ecosystems.

Title
Start-up Strategies

Tags
181100, 5

Learning Outcome
Students will formulate strategies to overcome common start-up business challenges.

Title
Business Plan

Tags
181234, 6

Learning Outcome
Students will prepare an effective written business plan and and communicate it through an oral presentation.

MFGEN 481 - Manufacturing Systems and Simulation

Course Information

Teaching Area (new)
MFGEN

Course Number
481

Teaching Area
MFGEN

Course Title
Manufacturing Systems and Simulation

Course Description
Advanced elements, planning and integration issues of manufacturing systems, including modeling and simulation of manufacturing operations. How to apply simulation to validate lean processes that eliminate waste, learn the basics of queuing theory, basic statistical analysis by analyzing raw data and fitting that data to the proper distribution, how to run multi-scenario experiments that are statistically correct by running multiple replications to provide valid confidence intervals of performance. \n

208642, 0, 1

Learning Outcome
Students will understand key manufacturing metrics and how they are influenced.

Title
Process Planning

Tags
208643, 0, 2

Learning Outcome
Students will develop a detailed process plan.

Title
Production and Inventory Control

Tags
208644, 0, 3

Learning Outcome
Students will understand the principles and techniques of production and inventory control.

Title
Process Improvement

Tags
208645, 0, 4

Learning Outcome
Students will apply process improvement techniques to improve process performance.

Title
Simulation

Tags
208646, 0, 5

Learning Outcome
Students will set up, run, and evaluate discrete event simulations of manufacturing environments.

MFGEN 490R - Special Problems in Manufacturing Engineering

Course Information

Teaching Area (new)
MFGEN

Course Number
490R

Teaching Area
MFGEN

Course Title
Special Problems in Manufacturing Engineering

Course Description
Students work under the mentoring of a faculty member to complete mutually agreed upon learning objectives and assignments in special topics and problems in manufacturing.

Department

Learning Outcomes

Title
IT applications in manufacturing

Tags
181008, 3

Learning Outcome
Understand the major IT applications used in a manufacturing enterprise.

Title
Database Management

Tags
181056, 2

Learning Outcome
Be able to create and use a simple database management system

Title
Business Analytics

Tags
181062, 5

Learning Outcome
Be able to manipulate and analyze data using Excel

Title
IT deployment

Tags
181123, 6

Learning Outcome
Understand how to specify, evaluate and implement IT systems in manufacturing

Title
Computer hardware, software and networking

Tags
181158, 1

Learning Outcome
Understand the basics of computers, languages, architectures and networking

Title
IT integration

Tags
181162, 4

Learning Outcome
Understand the issues associated with IT integration

Title
Enterprise Architecture

Tags
181258, 0

Learning Outcome
Understand how to design and interpret and enterprise architecture

MFGEN 550 - Friction Stir Technologies

Course Information

Course Number
550

Teaching Area
MFGEN

Course Title
Friction Stir Technologies

Course Description
Fundamentals of solid-state, friction stir technologies; their application, design, characterization and simulation.

Prerequisite

Fulfill ANY of the following requirements:

Prerequisite

Complete ALL of the following Courses:

- ME EN 250 - Science of Engineering Materials
  AND MFGEN 230 - Computer-Aided Manufacturing

OR

Prerequisite

Complete ALL of the following Courses:

- ME EN 250 - Science of Engineering Materials
  AND ME EN 382 - Manufacturing Processes

Learning Outcomes

Title
Solid-state processes

Learning Outcome
Students will demonstrate that friction stir technologies are solid-state processes that produce superior microstructures compared to fusion welding.

Title
Coupled thermo-mechanical behavior

Learning Outcome
Students will demonstrate the interactions and connectivity between frictional heating, temperature dependent material properties, and input parameters through numerical simulation of friction stir welding.

Title
Process Application

Learning Outcome
Students will practice application of linear friction stir welding and processing in various metals, refill friction stir spot welding in aluminum alloys, and additive friction stir deposition of aluminum alloys.

Title
Process-Material Interactions

Learning Outcome
Students will be able to analyze and explain how initial material properties and temper conditions influence post-weld mechanical and microstructural properties.

MFGEN 556 - Modeling and Simulation of Composites Manufacturing

Learning Outcomes

Title
Additive Manufacturing Processes

Tags
212256, 0, 1

Learning Outcome
Students will understand the seven categories of additive manufacturing processes, their basic physics, and tradeoffs in key criteria such as resolution, material compatibility, build rates, and properties.

Title
Experiential Learning

Tags
212257, 0, 2

Learning Outcome
Students will demonstrate proficiency in printing parts with one or more types of additive manufacturing processes including setup, operation, part removal and post processing.

Title
Design for AM

Tags
212258, 0, 3

Learning Outcome
Students will apply knowledge of AM process categories and general design guidelines to generate designs that leverage process strengths and minimize process limitations.

Title
Input Data Analysis

Tags
181050, 2

Learning Outcome
Be able to collect and analyze input data for use in a simulation study

Title
Simulation project management

Tags
181066, 1

Learning Outcome
Know how to plan and conduct a simulation study

Title
Mfg Metrics and Drivers

Tags
181086, 0

Learning Outcome
Understand key manufacturing system performance metrics and associated drivers

Title
Simulation Presentation

Tags
181174, 6

Learning Outcome
Be able to present a simulation study and make a compelling recommendation

Title
Output Analysis

Tags
181192, 5

Learning Outcome
Be able to analyze simulation output and draw appropriate conclusions

Title
Simulation experimentation

Tags
181220, 4

Learning Outcome
Be able to design and conduct simulation experiments

Title
Simulation Modeling

Tags
181233, 3

Learning Outcome
Be able to construct an accurate computer model of a manufacturing system

Type
Prerequisite

Prerequisites

Complete ALL of the following Courses:

- SFL 290 - Critical Inquiry and Research Methods

Recommended
Upper-division SFL course

Learning Outcomes

Title
Theory and Research

Tags
182428, 1

Learning Outcome
Under the direction of a mentoring professor, students will critically examine, investigate, and integrate the literture for a topic of interest in marriage, family, and human development.

Title
Learning Data Management

Tags
182429, 2

Learning Outcome
Students will learn the basics of entering, cleaning, and manipulating data in SPSS.

Title
Learning Sampling

Tags
182430, 3

Learning Outcome
Students will learn the importance of adequate sampling methods in social science research as well as the common forms of bias that such sampling can create.

Title
Learning Measurement Design

Tags
182431, 4

Learning Outcome
Students will learn the basics of item/scale creation as well as how social scientists create measurement and operationalize constructs.

Title
Learning Applied Statistics

Tags
182432, 5

Learning Outcome
Students will learn how to run, interpret, and write about a variety of basic applied statistical techniques including t-tests, ANOVAs, regression, factor analysis, and cluster analysis.

Title
Learning to Write-up Research

Tags
182433, 6

Learning Outcome
Students will learn how to write research results in APA formatting.

Title
Learning the Reserach Process

Tags
182434, 7

Learning Outcome
Students will continue to develop their understanding of the research process and will understand how scholars go from a research question to a completed and published research article.

MFHD 514 - Theories of Human Development and Family Science

Learning Outcomes

Title
Outcome 1

Tags
182439, 1

Learning Outcome
Understand theory construction and testing, and the relationship between theory, method, and practice in advancing knowledge.

Title
Outcome 2

Learning Outcome
Identify key assumptions, concepts, and propositions of major family theories.

Title
Outcome 3

Learning Outcome
As disciple-scholars, critically evaluate family theories from both scholarly and gospel perspectives and gain an appreciation for diverse perspectives.

Title
Outcome 4

Learning Outcome
Use theory effectively to guide your own family life research and writing, and evaluate the use of theory in other research.

Title
Outcome 5

Learning Outcome
Identify ways to strengthen diverse families through Christlike application of family theories.

Title
Outcome 6

Learning Outcome
Apply family theories to personal, spiritual, and professional development.

Learning Outcome
Outcome 5 – Member of a TeamWillingly subordinates self-interest to the needs of the team.Cadets will be put into tactical situations weekly enabling leadership to identify selfless service to othersCadets displaying selfless service (aka putting needs of others above their own) will be recognized during the AARsCadets who are observed showing signs of only caring about themselves will be counselled by faculty

Title
Communicates effectively

Tags
41359, 8

Learning Outcome
Outcome 10- LeadershipCommunicates effectively.CDT will receive briefings and shown through multimedia various means of communicating in a military environment.CDT will demonstrate proficiency in military writing and briefings through various writing assignments and briefings.Additional training as required.

Title
Familiar with moving tactically while under fire

Tags
41368, 1

Learning Outcome
Outcome 2 – Individual ProficiencyFamiliar with moving tactically while under fireCadets will be briefed on tactical movement techniques and be members of small unit teams that execute tactical movements.CDTs will be able to follow basic instructions from their small unit leaders.CDTs will receive guidance and additional training turning lab periods.

Title
Leadership

Tags
41377, 0

Learning Outcome
Recall and describe the three stages of team developmentIllustrate significant traits and behaviors of historical military leaders

Title
Proficient at maintaining self and equipment in a field envi

Tags
41384, 3

Learning Outcome
Outcome 4 – Individual ProficiencyProficient at maintaining self and equipment in a field environmentWeekly pre-lab inspection of equipment and self, conducted by peersDeficiencies will be identified and reported up the chain of commandDeficient Cadets will be counselled by peer and faculty

Title
Personal Development

Tags
41386, 2

Learning Outcome
Deliver a formal information briefingList the types and elements of interpersonal communication

Title
Officership

Tags
41391, 3

Learning Outcome
Distinguish and Describe rank, structure, duties, and traditionsExplain the nine Principles of War

Title
Familiar with land navigation

Tags
41394, 0

Learning Outcome
Outcome 1 – Individual ProficiencyFamiliar with land NavigationOnline interactive program and quiz and a practical exercise (graded) during LabCadets must score 80% or higher on the quiz and find at least 75% of the Land Nav points at LabCadets who fail to achieve the standards will be partnered up with more proficient Cadets and be retested during our FTX

Title
Physically ready to handle the rigors of combat

Tags
41406, 2

Learning Outcome
Outcome 3 – Individual ProficiencyPhysically ready to handle the rigors of combatCDTs will perform physical fitness training three times weekly throughout the semester and participate in a 48 hour field training exercise.Each CDT will score a minimum of 60 points in each PT event.Those failing to meet these standards will conduct remedial PT an additional two times per week.

Learning Outcomes

Title
Can discuss critically the role of the Army officer as train

Tags
41298, 6

Learning Outcome
O7 – Roles of NCOs OsCan discuss critically the role of the Army officer as trainer and leaderWritten book review on an Army officer of their choice, highlighting both good and bad leadership traits Cadets must score 80% or higher on the book review, which will be read and graded by their instructor Cadets who fail to achieve the standard will receive their graded book review back and be asked to rewrite it

Title
Tactics and Techniques

Tags
41300, 4

Learning Outcome
Distinguish between the different types of Army plans and ordersDemonstrate terrain analysis and route planning skillsExplain and remember the five-paragraph format for an operations orderDescribe the characteristics and techniques of defensive operationsExplain how squads and platoons plan for and conduct patrolsList and describe the five aspects of military terrain using (OAKOC)Interpret and formulate an operation order

Title
Accepts sacrifices required as a servant to the nation

Tags
41309, 7

Learning Outcome
O7 – Roles of NCOs OsCan discuss critically the role of the Army officer as trainer and leaderWritten book review on an Army officer of their choice, highlighting both good and bad leadership traits Cadets must score 80% or higher on the book review, which will be read and graded by their instructor Cadets who fail to achieve the standard will receive their graded book review back and be asked to rewrite itO8 – Roles of NCOs OsAccepts sacrifices required as a servant to the nation

Title
Officership

Tags
41322, 3

Learning Outcome
Describe the history of terrorism and the basic US antiterrorism policyExplain and state the relationship between leadership, values, and officership

Title
Judged by subordinates as capable, confident and trustworthy

Tags
41335, 9

Learning Outcome
O10 - LeadershipJudged by subordinates as capable, confident and trustworthyCadets will conduct written peer evaluations on each other as part of their midterm and final examsCadets must receive an overall peer evaluation rating of 70% or higherCadets who fail to reach 70% will be counselled by their MS instructor and plan a course of action for the rest of the semester

Title
Familiar with land navigation

Tags
41337, 0

Learning Outcome
Outcome 1 – Individual ProficiencyFamiliar with land NavigationOnline interactive program and quiz and a practical exercise (graded) during LabCadets must score 80% or higher on the quiz and find at least 75% of the Land Nav points at LabCadets who fail to achieve the standards will be partnered up with more proficient Cadets and be retested during our FTX

Title
Understand the roles and capabilities of a brigade combat te

Tags
41343, 4

Learning Outcome
O5 – Tactical Problem SolverUnderstands the roles and capabilities of a brigade combat team in combatIn-class quiz on small team organization and proper movement techniques as well as practical app during LABCadets must score 80% or higher and physically demonstrate moving as part of a team during LABCadets who fail to achieve the standard will be counselled and retested at LAB by their peers and Cadet mentors/ evaluators

Title
Solve tactical problems using principles that underlie doctr

Tags
41350, 1

Learning Outcome
Outcome 2 – Tactical Problem SolverSolve tactical problems using principles that underlie doctrine and war fightingQuizzes and multiple tactical problems at leadership labsCDT utilizes proper Army doctrine for several different tactical problems that he/she will faceCDT will receive feedback after every lab and proper techniques as well as errors will be highlighted

Title
Leads by example

Tags
41355, 8

Learning Outcome
O9 – LeadershipLeads by exampleCadets will receive leadership opportunities and be observed weekly during tactics Lab and recognized during After Action ReviewsCadets must demonstrate basic leadership skills while working as a member of a team, squad or platoonCadets who fail to lead in positive ways will be counselled by their Cadet evaluators and on-scene faculty members

Title
Personal Development

Tags
41362, 2

Learning Outcome
Practice effective writing techniques in accordance with the Army standard for effective writingExplain how to set goals and manage time at the team levelDevelop team mission statement and goalsExplain and know ways to establish priorities and avoid distracters

Title
Physically ready to handle the rigors of combat

Tags
41363, 2

Learning Outcome
Outcome 3 – Individual ProficiencyPhysically ready to handle the rigors of combatCDTs will perform physical fitness training three times weekly throughout the semester and participate in a 48 hour field training exercise.Each CDT will score a minimum of 60 points in each PT event.Those failing to meet these standards will conduct remedial PT an additional two times per week.

Title
Values and Ethics

Tags
41375, 1

Learning Outcome
Explain the Army Values and the Army’s Consideration of Others (CO2) programIdentify and asses the goals of the Army CO2 program (eight areas)Analyze the relationship between Army values, leadership, and CO2

Title
Lives the Army values

Tags
41376, 10

Learning Outcome
O11 – CharacterLives the Army ValuesWill write a comparative essay on one of their personal heroes and how they demonstrated the Army ValuesCadets must score 80% on their essay, which will be read, marked up and returned to them by their instructorCadets who fail to achieve the standard will be asked to rewrite their essay and resubmit it to their instructor

Title
Understands, can explain and takes proper actions on contact

Tags
41385, 3

Learning Outcome
O4 – Member of a TeamUnderstands, can explain and takes proper actions on contactIn-class quiz on actions on contact as well as tactical operations during weekly labs that will require reacting to direct and indirect enemy contactCadets must score 80% or higher on the quiz and will need to react properly during tactics lab or risk being “shot” by the enemyCadets who fail to achieve the standards will receive one on one training by their Cadets peers and or their Cadet mentors

Title
Demonstrate Resilience

Tags
41392, 11

Learning Outcome
O12 – CharacterDemonstrate ResilienceCadets will conduct a multi-day Field Training Exercise during which they will asked to conduct graded tactical operations on little or no sleep and in austere mountainous conditionsCadets must demonstrate the ability to stay positive, work as a member of a team and complete (or at least attempt) each task or mission despite poor eating and sleeping conditionsCadets who fail to demonstrate resilience during training will be counselled and asked to continue training with a new perspective. If they refuse to complete training they will not get full credit for the FTX

Title
Leadership

Tags
41401, 0

Learning Outcome
Explain the situational, transformational, and adaptive leadership theories and their relationship to the Army Leadership Requirements ModelIllustrate dimensions of transformational and situational leadershipDescribe methods of assessing leadership stylesExplain your personal approach to leadership

Title
Communicate plans effectively

Tags
41405, 5

Learning Outcome
O6 – Tactical Problem SolverCommunicates plans effectivelyCadets will each get to brief an operational plan/ order in-class and be evaluated by their peersCadets must score 80% or higherCadets who score below 80% will receive counselling and receive a second chance to brief

MIL S 320 - Adaptive Team Leadership

Learning Outcomes

Title
Understands the roles of officers and NCOs in the Army

Tags
41304, 2

Learning Outcome
Outcome 3 – Understands the roles of officers and NCOs in the ArmyKnows enough about the various branches to make an informed decision when selecting oneEach CDT will choose a branch and research, then present a five minute “Military Information Brief” on what they learned about the branch they chose to the other CDTs in the classCDTs overall understand most Army branches, particularly those that were of initial interest to themNo change

Title
Demonstrates Self Confidence

Tags
41312, 9

Learning Outcome
Outcome 10- CharacterDemonstrates Self ConfidenceCDT will have multiple opportunities during leadership labs and class work in which he/she can project self-confidenceCDTs will demonstrate more confidence as the semester goes on and they have an opportunity to be placed in leadership roles in a myriad of different situationsAdditional one on one counseling as necessary

Title
Leads by example

Tags
41313, 3

Learning Outcome
Outcome 4 – LeadershipLeads by exampleWill have multiple opportunities to lead junior CDTs as well as peers both during leadership lab and other eventsCDT realizes that setting the example in what they do and how they conduct themselves has a larger impact on their ability to lead rather than by simply giving guidance to othersThis will be continually reinforced throughout the school year, no change needed

Title
Proficient at land navigation

Tags
41321, 10

Learning Outcome
Outcome 11- Individual ProficiencyProficient at land navigationCDT will be given multiple opportunities to conduct land navigation at local coursesCDT will demonstrate proficiency at land navigation by the end of the semester in both day and night time conditionsAdditional volunteer land navigation courses will be offered that CDTs who are lacking at this skill will be strongly encouraged to attend

Title
Willingly subordinates self-interest to the needs of the tea

Tags
41326, 0

Learning Outcome
Outcome 1 – Member of a TeamWillingly subordinates self-interest to the needs of the teamCadet will have to spend several hours outside of the classroom to ensure that junior Cadets are prepared for leadership labs and various other ROTC functionsCDTs understand that he must put the needs of his Squad/Platoon before the needs of himself/herself to ensure overall mission successContinued evaluation and feedback during practical exercises in field as well as “garrison operations”

Title
Proficient with tactical communications

Tags
41327, 11

Learning Outcome
Outcome 12- Individual ProficiencyProficient with tactical communicationsCDT will communicate via radio to higher level leadership with various military reports in a tactical situationCDT will follow proper formatting of tactical communications and send reports in a timely mannerAdditional one on one instruction will be given as needed

Title
Committed to physical fitness

Tags
41330, 7

Learning Outcome
Outcome 8- CharacterCommitted to physical fitnessCDT will take multiple physical fitness tests and conduct other physically demanding eventsCDT will understand that physical fitness is more than an event you conduct but a lifestyle changeAdditional physical training as necessary

Title
Communicates plans effectively

Tags
41334, 1

Learning Outcome
Outcome 2 – Tactical Problem SolverCommunicates plans effectivelyCadet will be given tactical scenarios in which they will have to develop a plan for their team and communicate that plan to their teammatesCDTs will receive real time feedback on if they had a solid plan and how well others understood that plan during leadership labsThis may lead to expanding either the Operations Order Process or further review of tactics based on the CDTs performance

Title
Ensures subordinates and unit are prepared for the mission

Tags
41360, 5

Learning Outcome
Outcome 6- LeadershipEnsures subordinates and unit are prepared for the missionCDT will receive orders concerning upcoming events from higher level leadership and ensure that order is passed down to other team membersCDT will effectively conduct the orders process and brief his team. He will also conduct back briefs and inspections to ensure his/her team members are preparedAdditional one on one counseling as necessary

Title
Coaches subordinates effectively and provides them with usef

Tags
41369, 6

Learning Outcome
Outcome 7- LeadershipCoaches subordinates effectively and provides them with useful feedbackWhile in leadership roles, CDTs will have multiple opportunities to coach, teach, and mentor junior level CDTsCDT will conduct after action reviews of leadership labs with team as well as counseling team members on a consistent basis

Title
Accepts accountability for self and unit

Tags
41372, 4

Learning Outcome
Outcome 5 – LeadershipAccepts accountability for self and unitCDT will be given multiple leadership opportunities in which they are responsible not only for their success or failures but those of their team as wellCadets will take ownership of teams actions, will give praise to their team for mission success but will take ownership of team failures and attempt to correct what when wrongPlace a large emphasis on this during end of semester counseling

Title
Lives the Army values

Tags
41380, 8

Learning Outcome
Outcome 9- CharacterLives the Army ValuesCDT will be continually assessed on living his life in accordance with the Army Values which are: Loyalty, Duty, Respect, Selfless Service, Honor, Integrity, and Personal CourageCDT realizes that Army values are not just what is done while on “Army Time” but a code in which you live your lifeAdditional counseling as needed. Cadet me be removed from the program for “serious” infractions of these values

MIL S 321 - Leadership in Changing Environments

Title
Solve tactical problems using principles that underlie doctr

Tags
41291, 1

Learning Outcome
Outcome 2 – Tactical Problem SolverSolve tactical problems using principles that underlie doctrine and war fightingQuizzes and multiple tactical problems at leadership labsCDT utilizes proper Army doctrine for several different tactical problems that he/she will faceCDT will receive feedback after every lab and proper techniques as well as errors will be highlighted

Title
Judged by subordinates as capable, confident, and trustworth

Tags
41306, 5

Learning Outcome
Outcome 6- LeadershipJudged by subordinates as capable, confident, and trustworthyCDT will lead subordinates through multiple tactical and garrison events throughout the semester in which subordinates will react to their leaders ability to lead them successfullyCDT realizes that leadership and management are two very different things and that if you aren’t capable, confident, and trustworthy no one will want to followAdditional one on one counseling as necessary

Title
Allows subordinates latitude in how to accomp. a mission & h

Tags
41314, 6

Learning Outcome
Outcome 7- LeadershipAllows subordinates latitude in how to accomplish a mission and holds them accountableCDT will have multiple teams work for him at a time in which he will have to issue general guidance rather than direct instructionCDT will understand that micromanagement leads to decreased productivity and does very little to develop subordinatesAdditional one on one counseling as necessary

Title
Demonstrates commitment to personal and professional growth

Tags
41318, 9

Learning Outcome
Outcome 10- CharacterDemonstrates commitment to personal and professional growthCDTs will talk one on one with instructor at the beginning of the semester to lay out plans on how the CDT plans on growing both personally and professionally throughout the semesterCDT will take the additional out of classroom time necessary to ensure their success with those they lead as well as other academic, physical, and spiritual needsCDTs will talk one on one with instructor at the end of the semester to asses if plan worked and what still needs to set new goals

Title
Proficient at maintaining self and equipment in a field envi

Tags
41320, 11

Learning Outcome
Outcome 12- Individual ProficiencyProficient at maintaining self and equipment in a field environmentCDT will spend 2-4 days in a “field” environment towards the end of the semesterCDT will perform the necessary steps to take care of themselves in addition to all equipment that they are responsible for in an austere environmentSupervised heavily by instructors, CDTs will receive guidance and “on the spot” corrections as necessary

Title
Demonstrates self-discipline

Tags
41347, 7

Learning Outcome
Outcome 8- CharacterDemonstrates self-disciplineCDT will have multiple opportunities to show self-discipline during physical training, leadership labs, and other ROTC eventsCDT will understand that you are not self-disciplined in a few aspects of your life, but rather either you are a self-disciplined individual or you are notAdditional one on one counseling as necessary

Title
Demonstrates the fundamentals of the assault rifle

Tags
41361, 10

Learning Outcome
Outcome 11- Individual ProficiencyDemonstrates the fundamentals of the assault rifleCDT will load, shoot, change magazines, correct malfunctions, disassemble and reassemble an Army type assault rifle in a safe mannerCDT understands the importance in handling firearms in a safe manner and gains confidence in doing soNo Change

Title
Leads by example

Tags
41371, 3

Learning Outcome
Outcome 4 – LeadershipLeads by exampleWill have multiple opportunities to lead junior CDTs as well as peers both during leadership lab and other eventsCDT realizes that setting the example in what they do and how they conduct themselves has a larger impact on their ability to lead rather than by simply giving guidance to othersThis will be continually reinforced throughout the school year, no change needed

Title
Performs successfully under stress

Tags
41374, 8

Learning Outcome
Outcome 9- CharacterPerforms successfully under stressCDT will be placed in a multitude of “controlled” stressful environments during labs and a field training exerciseCDT is able to rely on training and a solid knowledge base to know what actions must be takenCDT will receive feedback after every lab and proper techniques as well as errors will be highlighted

Title
Understands, can explain and takes appropriate actions on co

Tags
41395, 0

Learning Outcome
Outcome 1 – Member of a TeamUnderstands, can explain, and takes appropriate actions on contactCDT will make “enemy” contact during leadership labs on a weekly basisCDT acts appropriately given the size of the enemy force, their location, the rules of engagement, and the terrain around themCDT will receive feedback after every lab and proper techniques as well as errors will be highlighted

Title
Cares for and is actively involved in the success of subordi

Tags
41396, 4

Learning Outcome
Outcome 5 – LeadershipCares for and is actively involved in the success of subordinatesCDT will have multiple opportunities to help and assist subordinates in ROTC, academic, and life successCDT understands that individual achievement truly mean very little if those that work for you are unable to complete necessary tasks in numerous aspects of lifeThis will be continually reinforced throughout the school year, no change needed

Title
Understands the roles of officers and NCOs in the Army

Tags
41399, 2

Learning Outcome
Outcome 3 – Understands the roles of officers and NCOs in the ArmyAccepts sacrifices required as a servant to the NationCDT will take a quiz on selfless-service and perform local community service during the semesterCDT understands that as a leader you are truly a servant to those you lead as well as to the Nation as a wholeAdditional one on one counseling as necessary

Learning Outcomes

Title
Demonstrate ability to build and sustain multi-functional te

Tags
41297, 4

Learning Outcome
5. Team Building and Collaboration. Demonstrates the ability to build and sustain multi-functional teams in a complex, uncertain environment and able to accomplish the mission within the commander’s intent.Demonstrate personal example while in leadership positionsGroup projects: Battle Analysis and present Army training in classroom settingGenerally Cadets demonstrate this outcome by the end of the course.Sustain

Title
Apply principles of lifelong learning and continued educatio

Tags
41302, 7

Learning Outcome
8. Lifelong Learning. Applies the principles of lifelong learning and continued education ensuring personal, professional, and organizational improvement.Professional reading reflectionsLeadership Seminar participation and reflectionsNCO and Officer ForumsPerformance counseling – set goals in all areas of fitness, track progress and assess including incorporating peer feedbackCadets demonstrate good habits of personal lifelong learning and development through consistent setting and achieving goals in all areas over the course of the AY.Add alumni follow up assessments on lifelong learning habits carried over from MS 420 and MS 421 into their professional lives as officers in the US Army 1 year after commissioning

Title
Apply adaptive decisions in a complex and ambiguous environm

Tags
41331, 3

Learning Outcome
4. Adaptability & initiative. Able to apply agile and adaptive decisions in a complex and ambiguous environment.Plan, coordinate, execute, assess, and provide feedback during tactical training events (FTX, leadership lab, PT)Battle Analysis Over the course of the semester and multiple iterations approx. 75% of Cadets demonstrate adaptability to changing situations and 80% demonstrate initiative within the commanders intentStart each MON class with a leader challenge designed to have students apply initiative and adaptability in a real world situation and then discuss various ways to accomplish the mission

Title
Analyze and synthesize the communication process

Tags
41353, 6

Learning Outcome
7. Communication & Engagement (oral, written, and negotiation). Analyzes and synthesizes the communication process in order to use effectively as a leader.Professional Reading reflectionsCombat Leadership Seminar participation and reflectionsOPORDs and FRAGOs as part of 8 step training modelPresent Army standard training in classBattlefield Staff Ride presentationsBattle AnalysisCadets in general produce a minimum of 6 Army memorandums, 2-4 tactical orders in writing and conduct a minimum of 5 oral presentations. The number of products is generally about right to correct bad habits and gain confidence in oral presentation capability. They still lack quality after action reviews (feedback) in writing and orally to assessed CadetsSustain current requirements with expanded feedback sessions to produce leaders who are focused on developing others without beating them down. PE on AARs in class followed by weekly exercises after leadership labs and PT class sessions to improve quality of AARs

Title
Analyze ambiguous situations and develop situations

Tags
41354, 2

Learning Outcome
3. Critical Thinking & Problem Solving. Recognizes and analyzes ambiguous situations, and develops solutions to tactical, ethical, and leadership problems facing a newly commissioned officer.Leader Challenge exercisesProfessional Reading ReflectionsBattle AnalysisBear River Battlefield Staff Ride PEPlan, coordinate, execute, assess, and provide feedback during tactical training events (FTX, leadership lab, PT)Cadets demonstrate critical thinking through analysis of problems, however lack creativity in their solutions, instead focusing on traditional proven solutionsIncrease the use of leader challenges and more detailed battle analysis and analysis of professional reading to expose students to a greater variety of moral / ethical / tactical situations resulting in more creative solutions

Title
Synthesize all aspects of Army Values and Warrior Ethos

Tags
41357, 0

Learning Outcome
1. Character and Accountability. Synthesizes all aspects of Army Values and Warrior Ethos and demonstrates the courage, character, physical and mental toughness and values required to succeed as an Army OfficerWarrior Ethos QuizBattle Analysis PresentationBattle of Bear River Presentations and Staff RideDemonstrate personal example while in leadership positionsStudents can define, understand and demonstrate the Army values and Warrior ethos in their daily lives. Some struggle to demonstrate commitment as the semester continues as demonstrated by inconsistent meeting of suspenses / attendanceClearly articulate expectations in writing and verbally during initial counseling to include a commitment resulting in at least cheerful cooperation leading to heartfelt commitment and creative excitement

Title
Demonstrate ability to plan, prepare & execute platoon-level

Tags
41381, 1

Learning Outcome
2. Professional competence. Demonstrates the ability to plan, prepare, and execute platoon-level training strategies including individual and collective tasks to enable mission accomplishment.Application of 8 step training model during weekly Company training meetingsPE – Assistant S3 as Lab OICPlan and execute Leadership Lab, FTX, MS III FTX, PTCadets demonstrate significant improvement in this area during the course of the yearSustain current method

Title
Demonstrate leader responsibilities in the Comprehensive Sol

Tags
41400, 8

Learning Outcome
9. Comprehensive Fitness. Demonstrate leader responsibilities in the Comprehensive Soldier Fitness program to reduce and manage stress (spiritual, psychological, physical).Plan, coordinate, execute, assess and provide feedback for a unit physical fitness programPerformance counseling – set goals in all areas of fitness, track progress and assess including incorporating peer feedbackCadets generally demonstrate consistent improvement in the 5 dimensions of Comprehensive Soldier Fitness, stress management techniques, physical fitness improvement and resiliencySustain current programs especially in stress management, spiritual and physical fitness. Continue to focus on resiliency and toughness through regularly challenging Cadets to push themselves to their limits

Title
Assess the impacts of cultural differences on military opera

Tags
41404, 5

Learning Outcome
6. Cultural Competence. Assess the impacts of cultural differences on military operations and anticipate the consequences of the Army’s interaction with disparate stake holdersProfessional Reading reflectionsBattle AnalysisBear River Battlefield Staff RideCultural application to various real world situations (current events discussions)PE at Leadership LabCadets generally recognize the importance of understanding foundational cultural concepts and cross cultural competency.Continue to use leadership challenges which require application of local cultural conceptsReinforce foreign language and foreign cultural understanding through the order of merit list and CULP integrationRequire participation in multi-cultural center event

MIL S 425R - Tactical Leadership (Ranger Challenge)

Course Information

Teaching Area (new)
MIL S

Course Number
425R

Teaching Area
MIL S

Course Title
Tactical Leadership (Ranger Challenge)

Course Description
Emphasis on fitness and tactical proficiency. Participation on University Ranger Challenge Team. Requires commitment and endurance. Provides insight into advanced Army professional training.

Department
Military Science

When Taught
Fall and Winter

Credit Hours

Min:
2

Fixed/Max:
2

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
16

Other Prerequisites
Current enrollment in AROTC program

Learning Outcomes

Title
Winning

Tags
41319, 3

Learning Outcome
Outcome 4:WinningThe Ranger Challenge Team, selected from the top 11 enrolled in the class, placed 1st overall in the Brigade Ranger Challenge Competition in Colorado. As the winner of the Brigade Competition, the team was selected to participate in the Sandhurst Cup at West Point Military Academy. The BYU Ranger Challenge team placed 14 out of 54 Participating teams from all over the world at the Sandhurst Cup.Competition is one of the key drivers for active learning in this tactical leadership class. The students are more focused, they work harder, and they put in more hours in order to achieve higher standards on individual and collective skill-sets for the benefit of the team.

Title
Leader Development

Tags
41328, 0

Learning Outcome
Outcome 1:Leader DevelopmentStudents are given training guidance, mandatory training/class timeline, and expected outcomes from the instructor (CPT Young). From there it becomes the responsibility of the students to asses their available resources, identify their key training tasks, and build a detailed event timeline with a comprehensive training outline. Classes/training for each block of instruction/skill-set is supervised by class leadership and delegated to other students to become subject mater experts for their respective skill-sets and train the other students in the class.The students demonstrated solid leadership, good work ethic, and developed quality training. However, their training was not always nested within the initial guidance given by the instructor (CPT Young). This resulted in inefficiencies in lines of effort that were not focused on intended outcomes.Instructors’ (CPT Young) initial guidance needs to be more specific and focused. Execution needs more supervision without crossing the threshold of diminishing an active learning environment.

Title
Building Relationships and Camaraderie

Tags
41364, 2

Learning Outcome
Outcome 3:Building Relationships and CamaraderieDuring the class students work through the dynamics of peer leadership, working together as a team, competition with other teams, and professional interaction/ coordination with foreign nations.The BYU Ranger Challenge team organized, synchronized, panned, and executed within the organization with effective conflict management and communication. During the Sandhurst Cup, an International competition at West Point Military Academy, the BYU Ranger Challenge team built lasting relationships with other US military organizations and foreign nations.

Title
Showcasing Military Skills and Excellence

Tags
41402, 1

Learning Outcome
Outcome 2:Show-casing Military Skills and ExcellenceThe Ranger Challenge class (425R) allows students to enhance their military skills and show-case their efforts in high visibility culminating and evaluated events.Students enrolled in 425R demonstrate a greater understanding of leadership, tactics, and techniques by practical application throughout all classes, training exercises, and events within the BYU ROTC organization.BYU ROTC public affairs need to synchronize more effectively with campus and local media in order to not only show-case the achievements of the Ranger Challenge team within the ROTC organization, but also extend visibility to other student organizations across campus and the local community.

MKTG 201 - Marketing Management

Course Information

Learning Outcomes

Title
Job-Hunting Skills

Tags
176132, 6

Learning Outcome
Gain skills and confidence that will separate you from your competitors in a job hunt.

Title
Marketing Research Processes

Tags
176151, 0

Learning Outcome
Understand and implement the marketing research process.

Title
Backward Marketing Research

Tags
176169, 1

Learning Outcome
Understand and implement “backward” marketing research.

Title
Research and Recommendations

Tags
176202, 5

Learning Outcome
Formulate answers to research objectives and make meaningful business recommendations.

Title
Analytic Methods

Tags
176212, 4

Learning Outcome
Understand and implement basic analytic methods.

Title
Researching Techniques

Tags
176338, 2

Learning Outcome
Understand and employ qualitative and quantitative research techniques and visualize data.

Title
Survey Methodology

Tags
176339, 3

Learning Outcome
Identify appropriate questions for survey research. Design and implement a survey methodology to maximize response and response accuracy. Apply intuition for statistical inference in analyzing survey data.

Title
Market Simulator

Tags
177167, 7

Learning Outcome
Design and run a conjoint study, including using a market simulator.

Title
Findings

Tags
177168, 8

Learning Outcome
Interpret findings from data analysis and make marketing recommendations.

MKTG 402 - Consumer Behavior

Title
Sales Leadership Skills

Learning Outcome
Use leadership skills that will influence personal and professional life.

MKTG 414 - Entrepreneurial Marketing

Course Information

Teaching Area (new)
MKTG

Course Number
414

Teaching Area
MKTG

Course Title
Entrepreneurial Marketing

Course Description
Marketing strategies for start-up companies. Topics include marketing to investors, internal marketing, and how to market products/services without a marketing budget.

Department
Marketing and Global Supply Chain

When Taught
Fall

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Other Prerequisites
For Marriott School majors only.

Learning Outcomes

Title
Basic Entrepreneurial Skills

Tags
176271, 0

Learning Outcome
Market entrepreneurially - make "competitive angles" that make competitors irrelevant.

Title
Marketing Tactics

Tags
176272, 1

Learning Outcome
Introduce new products and formulate marketing tactics for startup companies on a limited budget.

Title
Marketing Consultant Skills

Tags
176273, 2

Learning Outcome
Have the mindset, qualitative skills, and quantitative skills to be a marketing consultant for startup firms.

MKTG 415 - Digital Marketing

Course Information

Teaching Area (new)
MKTG

Course Number
415

Teaching Area
MKTG

Course Title
Digital Marketing

Course Description
Digital marketing is broad and varied, so rather than digging deeply into one topic (e.g., search engine optimization) and ignoring all other topics, this class will cover a wide variety of digital marketing topics. Students will customize their experience by choosing between two different "tracks" in the course: a strategic emphasis or tactical emphasis.\n \n

Department
Marketing and Global Supply Chain

When Taught
Fall and Winter

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:

Other Prerequisites
For Marriott School majors only.

Note
MKTG 415 is held online, not in a classroom. A large majority of the class sessions are "asynchronous" videos that you can watch whenever you want. A few of the class sessions are students presenting the results of their group work, and those sessions will be "synchronous" Zoom sessions held at the appointed class time.

Learning Outcomes

Title
Web design (from a marketing perspective)

Tags
211335, 0, 3

Learning Outcome
Learn to apply the principles of web design to generate a high level of conversion from website visitors.

Title
Building web traffic

Tags
211336, 0, 4

Learning Outcome
Apply the principles of search engine optimization (SEO) and search engine marketing (i.e., paid search) to build web traffic.

Title
Content marketing

Tags
211337, 0, 5

Learning Outcome
Apply the principles of engagement and brand building when creating and evaluating online content that the firm will share online.

Title
Additional digital marketing skills

Tags
211338, 0, 6

Learning Outcome
Gain skills in additional digital marketing areas, including the following: conversion rate optimization, online reputation management, email and SMS marketing, crowdsourcing, and affiliate marketing.

Title
Digital marketing software tools

Tags
211339, 0, 7

Learning Outcome
Learn to use a variety of industry-leading software tools for digital marketing tasks.

Fundamental Marketing Strategies

Tags
176291, 0

Learning Outcome
Understand fundamental marketing strategies and tactics as demonstrated via classroom discussion, individual and team assessments, and peer-to-peer training presentations. For example:

Analyze current and potential markets to determine their market attractiveness
Apply appropriate marketing strategies based on market attractiveness and relative firm strength
Calculate and apply Break-even, Net Marketing Contribution, Marketing ROI, Marketing ROS to assigned cases and examples.

Title
Integrating Marketing Training

Tags
176292, 1

Learning Outcome
Integrating previous marketing training into a systematic whole by applying that knowledge to case analysis. For example:

Creating integrated product positioning by carefully combining all four Ps of the marketing mix
Interpreting the results of a conjoint market research study and using those insights to create marketing strategy
Understanding that customers are often different than I am and they need to be understood in their own voice and on their own terms

MKTG 455 - Marketing & Brand Consulting

Course Information

Course Number
455

Teaching Area
MKTG

Course Title
Marketing & Brand Consulting

Course Description
Marketing consulting projects with real clients, from business development to project execution and delivery.

Department
Marketing and Global Supply Chain

When Taught
Winter

Credit Hours

Fixed/Max:
3

Learning Outcomes

Title
Consulting Skills

Learning Outcome
Develop consulting skills including business problem elicitation, pitching, project management, presenting ,and socializing results.

Title
Agency Frameworks

Learning Outcome
Address client needs while applying agency frameworks.

Title
Collaboration

Learning Outcome
Collaborate across internal team structures, set appropriate expectations with clients, and deliver results that have business impact.

MKTG 490R - Topics in Marketing

Course Information

Teaching Area (new)
MKTG

Course Number
490R

Teaching Area
MKTG

Course Title
Topics in Marketing

Department
Marketing and Global Supply Chain

When Taught
All Semesters/Terms

Credit Hours

Min:
0.5

Fixed/Max:
3

Lab Hours

Fixed:
0

Other Prerequisites
By permission only.

MKTG 585R - Pre-PhD Marketing Seminar-Research Topics and Methods

Course Information

Teaching Area (new)
MKTG

Course Number
585R

Teaching Area
MKTG

Course Title
Pre-PhD Marketing Seminar-Research Topics and Methods

Course Description
Introduction to theory, methods, and areas of research in marketing, with a goal of helping students prepare to apply to marketing PhD programs. Introduces the philosophy of science and research as applied to the study of marketing. Methods and theory that are foundational to the study and practice of marketing. \n\n

Department
Marketing and Global Supply Chain

When Taught
Winter

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Recommended
MKTG 201, 401, 402, 403

MMBIO 102 - Introduction to Clinical Laboratory Techniques

Course Information

Teaching Area (new)
MMBIO

Course Number
102

Teaching Area
MMBIO

Course Title
Introduction to Clinical Laboratory Techniques

Course Description
Hospital laboratory techniques.

Department
Microbiology and Molecular Biology

When Taught
Fall and Winter

Credit Hours

Min:
1

Fixed/Max:
1

Lecture Hours

Fixed:
0

Lab Hours

Fixed:
3

Learning Outcomes

Title
Techniques

Tags
201967, 0

Learning Outcome
Describe and carry out basic clinical laboratory techniques

Title
Careers

Tags
201972, 1

Learning Outcome
List and evaluate careers in clinical laboratory sciences

MMBIO 110R - Extremophiles: Life in Extreme Environments

Course Information

Teaching Area (new)
MMBIO

Course Number
110R

Teaching Area
MMBIO

Course Title
Extremophiles: Life in Extreme Environments

Course Description
A field trip-based investigation of microbial life in extreme environments. Field trips to Yellowstone National Park, Great Salt Lake, and to a water treatment plant will investigate thermophiles, halophiles, and methanogens, respectively.

Department
Microbiology and Molecular Biology

When Taught
Fall

Credit Hours

Min:
1

Fixed/Max:
1

Lecture Hours

Fixed:
1

Lab Hours

Fixed:
3

Learning Outcomes

Title
Life in Extreme Environments

Tags
202037, 1

Learning Outcome
Students will deepen their appreciation of microbial life by investigating extreme environments in which microorganisms have evolved to grow and thrive.

MMBIO 121 - General Biology: Health and Disease

Course Information

Teaching Area (new)
MMBIO

Course Number
121

Teaching Area
MMBIO

Course Title
General Biology: Health and Disease

Course Description
An overview of the living world and how it functions and adapts in the context of human health and disease.

Department
Microbiology and Molecular Biology

When Taught
Fall and Winter

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Note
Also offered by BYU Independent Study; enroll anytime throughout year; one year to complete; additional tuition required; register at is.byu.edu.

Learning Outcomes

Title
General biology with a focus on health and disease

Tags
202038, 1

Learning Outcome
Students will develop a solid undertanding of general biological principles in context of relevant topics in health and biology.

MMBIO 122 - General Biology: Health and Disease Laboratory

Course Information

Teaching Area (new)
MMBIO

Course Number
122

Teaching Area
MMBIO

Course Title
General Biology: Health and Disease Laboratory

Course Description
Laboratory exercises using both prokaryotic and eukaryotic organisms to demonstrate the scientific process and to examine microbial growth, control of microbial growth, metabolism, genetics, evolution, disease transmission, infection, and immunology.

Department
Microbiology and Molecular Biology

When Taught
Fall and Winter

Credit Hours

Min:
1

Fixed/Max:
1

Lecture Hours

Fixed:
0

Lab Hours

Fixed:
2

Recommended
Concurrent enrollment or completion of either MMBIO121 or CELL120

MMBIO 151 - Microbiology for Majors

Course Information

Teaching Area (new)
MMBIO

Course Number
151

Teaching Area
MMBIO

Course Title
Microbiology for Majors

Course Description
Principles of prokaryotic biology emphasizing cell structure, function, and metabolism. Introduction to bacterial genetics, microbial diversity, and microbial ecology.

Department
Microbiology and Molecular Biology

When Taught
Fall; Winter.

Credit Hours

Min:
4

Fixed/Max:
4

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
3

Simple Requisites

Prerequisites

Type
Prerequisite

Prerequisites

Fulfill ANY of the following requirements:

Prerequisites

Complete ALL of the following Courses:

- MMBIO 121 - General Biology: Health and Disease

OR

Prerequisites

Complete ALL of the following Courses:

- BIO 130 - Biology

OR

Prerequisites

Complete ALL of the following Courses:

- CELL 120 - Science of Biology

Other Prerequisites

Chem 105 or concurrent enrollment.

Learning Outcomes

Title
Making Informed Judgements

Tags
201873, 4

Learning Outcome
Students will be able to make informed judgments on tests, lab reports, and lab presentations by applying and integrating appropriate microbiological knowledge. *Relates to Program Learning Outcome: "Communicate scientific information using both oral and written methods"

Title
Complexity, Diversity and Purposes of Life

Tags
201878, 5

Learning Outcome
Students will be able to reflect on the complexity, diversity and purposes of life by examining the physiology, ecology, and genetics of microorganisms. *Relates to Program Learning Outcome: "Reflect/discuss/explore how faith in the Lord and Christ-like living are affected by an understanding of fundamental biological principles"

Title
Microbes

Tags
201888, 1

Learning Outcome
Students will be able to distinguish between eukaryotes, prokaryotes, and viruses by comparing and contrasting their various structures and functions. *Relates to Program Learning Outcome: "Exhibit mastery of four of the following six principal areas of the discipline" five of which are microbial physiology, microbial genetics, microbial ecology, medical microbiology, and virology

Title
Microbiology Tools and Technique

Tags
201929, 2

Learning Outcome
Students will be able to discuss and use the fundamental tools utilized by microbiologists, including aseptic technique, streaking for isolation, and performing growth experiments. *Relates to Program Learning Outcome: "Exhibit mastery of four of the following six principal areas of the discipline" three of which are microbial physiology, microbial genetics, microbial ecology

Title
Research Design, Data Collection, and Analysis

Tags
202001, 3

Learning Outcome
Students will be able to design and carry out research studies, including formulating questions and testable hypotheses, implementing appropriate experimental protocols, and collecting and analyzing data, and drawing appropriate conclusions. *Relates to Program Learning Outcome: “Devise experiments with appropriate hypotheses and controls.”

MMBIO 162R - Careers in Biomedical Sciences

Course Information

Teaching Area (new)
MMBIO

Course Number
162R

Teaching Area
MMBIO

Course Title
Careers in Biomedical Sciences

Course Description
Lectures and field trips surveying career choices.

Department
Microbiology and Molecular Biology

When Taught
Winter

Credit Hours

Min:
1

Fixed/Max:
1

Learning Outcomes

Title
Career preparation

Tags
187151, 1

Learning Outcome
Students should be able to make informed decisions about career paths in Microbiology

Title
Career preparation

Tags
201958, 0

Learning Outcome
Students should be able to make informed decisions about career paths in Microbiology

MMBIO 194 - Phage Hunters: Discovery

Course Information

Teaching Area (new)
MMBIO

Course Number
194

Teaching Area
MMBIO

Course Title
Phage Hunters: Discovery

Course Description
Phage isolation and characterization.

Department
Microbiology and Molecular Biology

When Taught
Fall

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
1

Lab Hours

Fixed:
6

Note
Freshmen or sophomore students preferred. Requires two semester commitment.

Learning Outcomes

Title
Laboratory Equipment

Tags
201907, 3

Learning Outcome
Use standard microbiology laboratory equipment correctly.

Title
Aseptic Technique

Tags
201940, 1

Learning Outcome
Use proper aseptic techniques for the transfer and handling of microorganisms and instruments.

Title
Media and Test Systems

Tags
201962, 2

Learning Outcome
Use appropriate microbiological media and test systems.

Title
Experimental Protocol and Data Analysis

Tags
202004, 4

Learning Outcome
Follow an experimental protocol, collect and organize data in a systematic fashion, present data in anappropriate form, assess the validity of the data, and draw appropriate conclusions based on the results.

Title
Analyzing, Troubleshooting and Experimental Design

Tags
202076, 5

Learning Outcome
Analyze experimental data, draw conclusions and troubleshoot problems. Design appropriate experiments given the results

Title
Characterize bacteriophages using standard morphological, genomic and proteomic approaches.

Tags
202077, 6

Learning Outcome
Understand and utilize scientific methods used to study and compare bacteriophages, including electron microscopy, DNA sequencing, DNA annotation, Genomic and proteomic comparison, mass spectrometry and phylogenetic techniques such as ANI, phylogenetic trees and dot plot analysis.

Title
Communicating science

Tags
202078, 7

Learning Outcome
Learn about the different methods of presenting scientific findings, including scientific blogs, posters, abstracts, manuscripts and presentations. Learn to write and critique scientific blogs

MMBIO 195 - Phage Hunters: Comparative Genomics

Course Information

Teaching Area (new)
MMBIO

Course Number
195

Teaching Area
MMBIO

Course Title
Phage Hunters: Comparative Genomics

Course Description
Phage genome annotation. Focus on experimental design and data analysis.

Department
Microbiology and Molecular Biology

When Taught
Winter

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
1

Lab Hours

Fixed:
6

Note
Freshmen or sophomore students preferred. Requires two semester commitment.

Learning Outcomes

Title
Research Presentation

Tags
201859, 6

Learning Outcome
Prepare and deliver a research presentation (oral and poster)

Title
Research Abstract

Tags
201869, 5

Learning Outcome
Prepare an abstract for a presentation of research data

Title
Research Reading and Writing

Tags
201900, 7

Learning Outcome
Gain experience in research writing and reading of scientific papers

Title
DNA Preparation

Tags
201913, 1

Learning Outcome
Prepare DNA for sequencing

Title
Bioinformatic Software

Tags
201919, 3

Learning Outcome
Learn how to use bioinformatics software for the following:DNA sequence alignment (Consed)Primer design (Primer3)Assessing ORFs for gene calls (GBrowse, Glimmer and GeneMark)Homology assessment (BLAST and Phamerator)Annotation (Apollo)Comparative analysis (positional and functional)

Title
Archiving Samples

Tags
201925, 2

Learning Outcome
Archive phage samples and DNA samples (submit archived phage to HHMI)

Title
GenBank

Tags
201999, 4

Learning Outcome
Analyze, annotate and prepare to submit genome to GenBank (submit if possible)

MMBIO 221 - General Microbiology

Course Information

Teaching Area (new)
MMBIO

Course Number
221

Teaching Area
MMBIO

Course Title
General Microbiology

Course Description
Microbial world, emphasizing communicable diseases, their causes and control.

Department
Microbiology and Molecular Biology

When Taught
Fall and Winter

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Other Prerequisites
Any biology course

Recommended
Any chemistry course

Note
Recommended for students seeking a liberal education in microbiology who do not have the prerequisites to take the more advanced courses. Also offered by BYU Independent Study; enroll anytime throughout year; one year to complete; additional tuition required; register at https://is.byu.edu/catalog/MMBIO-221-M003

Learning Outcomes

Title
0

Tags
201860, 0

Learning Outcome

Explain and discuss the ways by which microbiologists study microorganisms.

Title
2

Tags
201898, 3

Learning Outcome

Propose microbial solutions to global problems.

Title
4

Tags
201930, 1

Learning Outcome

Discuss the principle infectious diseases that affect mankind, including how they are transmitted, treated, controlled and prevented.

Title
1

Tags
201949, 2

Learning Outcome

Differentiate between the types of microorganisms by identifying relevant structure and their function in the biosphere.

Title
3

Tags
201995, 4

Learning Outcome

Describe how the human body defends itself against infectious agents.

Title
Immunity and Microbiology

Tags
201892, 2

Learning Outcome
Describe how the human body defends itself against infectious agents.

Title
Classify Microorganisms

Tags
201939, 0

Learning Outcome
Differentiate between the types of microorganisms by identifying relevant structure and their function in the biosphere.

Title
Microbial Solutions

Tags
201943, 3

Learning Outcome
Propose microbial solutions to global problems.

Title
Microbiology Techniques

Tags
201997, 1

Learning Outcome
Explain and discuss the ways by which microbiologists study microorganisms.

MMBIO 222 - General Microbiology Laboratory

Course Information

Teaching Area (new)
MMBIO

Course Number
222

Teaching Area
MMBIO

Course Title
General Microbiology Laboratory

Department
Microbiology and Molecular Biology

When Taught
Fall, Winter, Spring

Credit Hours

Min:
1

Fixed/Max:
1

Lecture Hours

Fixed:
0

Lab Hours

Fixed:
2

Other Prerequisites
MMBio 221 or concurrent enrollment

Learning Outcomes

Title
Aseptic Technique

Tags
201903, 1

Learning Outcome
Use proper aseptic techniques int he handling and transfer of microbiological specimens

Title
Media

Tags
201936, 2

Learning Outcome
Use standard microbiological media to culture and identify common microbiological specimens

Title
Equipment

Tags
201977, 3

Learning Outcome
Use standard microbiology laboratory equipment correctly

Title
Microscopy

Tags
201991, 0

Learning Outcome
Use the bright field microscope to view and interpret microbiological specimens

Title
Microorganisms in life

Tags
202010, 5

Learning Outcome
Integrate information and skills gained int eh course to make informed judgements about the role of microorganisms in everyday life

Title
Experimental procedure

Tags
202014, 4

Learning Outcome
Follow an experimental protocol, collect and organize data, present data in an appropriate form, assess the validity of the data, and draw appropriate comclusions based on the results

Title
Safety

Tags
202020, 6

Learning Outcome
Use accepted safety protocols when handling microbiological specimens and chemicals

MMBIO 240 - Molecular Biology

Course Information

Teaching Area (new)
MMBIO

Course Number
240

Teaching Area
MMBIO

Course Title
Molecular Biology

Course Description
Fundamentals of protein and nucleic acid structure and their function in the context of the classical experiments that have informed our current models of biology at the molecular level.

Department
Microbiology and Molecular Biology

When Taught
Fall, Winter, Spring

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Simple Requisites

Prerequisite

Type
Prerequisite

Prerequisite

Complete ALL of the following Courses:

- BIO 130 - Biology
  OR MMBIO 121 - General Biology: Health and Disease
  OR CELL 120 - Science of Biology

Recommended
Chem 105 or Chem 111

Note
Also offered by BYU Independent Study; enroll anytime throughout year; one year to complete; additional tuition required.

Learning Outcomes

Title
Effective Collaboration

Tags
201880, 3

Learning Outcome
Collaborate with other students to solve challenging problems, to clarify ideas and concepts, and to learn from one another in a spirit of cooperation and integrity

Title
Molecular Functions, Structures, Processes, and Mechanisms

Tags
201905, 0

Learning Outcome
Describe and compare the functions and molecular structures of DNA, RNA, and protein, and explain the processes and regulatory mechanisms governing the synthesis of each.

Title
Molecular Biology Techniques

Tags
201948, 1

Learning Outcome
Explain a variety of molecular biology techniques, and interpret experimental results obtained using the various methods.

Title
Problem Solving

Tags
201988, 2

Learning Outcome
Solve unfamiliar problems by applying the information and principles mastered through Learning Outcomes 1 and 2

MMBIO 241 - Molecular and Cellular Biology Laboratory

Course Information

Teaching Area (new)
MMBIO

Course Number
241

Teaching Area
MMBIO

Course Title
Molecular and Cellular Biology Laboratory

Course Description
Molecular and cellular biology techniques laboratory.

Department
Microbiology and Molecular Biology

When Taught
Fall and Winter

Credit Hours

Min:
1

Fixed/Max:
1

Lecture Hours

Fixed:
0

Lab Hours

Fixed:
3

Other Prerequisites
MMBio 240 or concurrent enrollment

Note
Registration questions? Call MMBIO advisor at 801-422-4293.

Learning Outcomes

Title
Ethics and Integrity

Tags
201857, 1

Learning Outcome
Practice ethics and integrity by working with groups and following lab rules.*Relates to Program Learning Outcome: A commitment to professional integrity and ethical behavior consistent with themission of the university.

Title
Experimental Design

Tags
201986, 2

Learning Outcome
Learn the basics of experimental design, how to formulate a hypothesis, what controls to use, how to interpret experimental data.*Relates to Program Learning Outcome: Devise experiments with appropriate hypothesis and controls.

Title
Scientific Communication

Tags
202003, 3

Learning Outcome
Practice scientific communication through written lab questions, exams and oral presentations.*Relates to Program Learning Outcome: Devise experiments with appropriate hypothesis and controls.

Title
Laboratory Techniques and Practices

Tags
202022, 4

Learning Outcome
Learn molecular biology laboratory techniques through practical laboratory exercises. Techniques include, spectrophotometry,isolation of DNA and protein, quantification of DNA and protein, techniques used to purify or detect specific proteins, such aschromatography, western blot and ELISA, DNA fingerprinting, polymerase chain reaction and enzyme assays.*Relates to Program Learning Outcome: Knowledge of principles and techniques of molecular and cellular biology.

MMBIO 250 - Careers in Genetic Counseling

Course Information

Course Number
250

Teaching Area
MMBIO

Course Title
Careers in Genetic Counseling

Course Description
This course is to orient students to the genetic counseling profession. It has three main portions: 1. the discussion of the scientific aspect of genetic diseases and inheritance; 2. Principles of counseling focusing on genetic counseling, and 3. Guest speakers to discuss career tracks, admissions, and many practical aspects of the profession. It will be a discussion and group experience-based course for the most part.

Department
Microbiology and Molecular Biology

When Taught
Fall

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Learning Outcomes

Title
Introduce Students to the Genetic Counseling Profession

Learning Outcome
Students will have the opportunity to talk to genetic counselors and have their questions answered

Title
Genetics Knowledge

Learning Outcome
Students will be able to describe the basics of DNA, mutation, heredity patterns, and other factors associated with the inheritance and function of genetic diseases

Title
Counseling skills

Learning Outcome
Students will practice counseling skills associated with genetic counseling using case studies

MMBIO 261 - Infection and Immunity

Course Information

Teaching Area (new)
MMBIO

Course Number
261

Teaching Area
MMBIO

Course Title
Infection and Immunity

Course Description
Principles of infectious organisms (principally bacteria and viruses), the diseases they cause, and the role of host immune responses in health and disease.

Department
Microbiology and Molecular Biology

When Taught
Fall, Winter, Spring

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Learning Outcomes

Title
Immune Defense

Tags
201996, 3

Learning Outcome
Expand the student's understanding microbial invaders and their pathogenic mechanisms and acknowledge the miracle of immunedefense. Develop good study habits through participation in group study sessions.• Relates to Program Learning Outcome: “Reflect/ discuss/explore how faith in the Lord and Christ-like living are affected by anunderstanding of fundamental biological processes.” As well as develop a “commitment to professional integrity and ethical behaviorconsistent with the mission of the university and accepted standards of professional conduct.”

Title
Immune System

Tags
202011, 1

Learning Outcome
Understand foundational information about viruses, bacteria and the immune system by studying and reflecting on the topic.• Relates to Microbiology and Molecular Biology Program Learning Outcome: "Exhibit mastery of four of the following six principalareas of the discipline” three of which are medical microbiology, virology, and immunology; and to prepare the student for “furthereducation and/or employment in teaching, basic research, or the health professions.”

Title
Scientific Communication

Tags
202016, 2

Learning Outcome
Engage in discussions about virology, immunology, and medical microbiology concepts and research to become confident in discussingthese topics in writing or speech.• Relates to Microbiology and Molecular Biology Program Learning Outcome: “Communicate scientific information using both oral and written methods.”

MMBIO 294R - Mentored Research

Course Information

Teaching Area (new)
MMBIO

Course Number
294R

Teaching Area
MMBIO

Course Title
Mentored Research

Course Description
Introduction to mentored research in the fields of Microbiology and Molecular Biology.

Department
Microbiology and Molecular Biology

When Taught
All Semesters/Terms

Credit Hours

Min:
0.5

Fixed/Max:
3

Other Prerequisites
Mentor's consent.

MMBIO 360 - Bacterial Genetics

Course Information

Teaching Area (new)
MMBIO

Course Number
360

Teaching Area
MMBIO

Course Title
Bacterial Genetics

Course Description
How DNA governs complex bacterial functions. Classical and modern approaches to gene discovery, including genetic screens, gene mapping, targeted genetic manipulations, and analyzing gene activity.

Department
Microbiology and Molecular Biology

When Taught
Fall

Credit Hours

Min:
4

Prerequisite

Prerequisites

Fulfill ANY of the following requirements:

Prerequisites

Complete ALL of the following Courses:
- MMBIO 151 - Microbiology for Majors

OR

Prerequisites

Complete ALL of the following Courses:

- MMBIO 221 - General Microbiology
  AND MMBIO 222 - General Microbiology Laboratory

Learning Outcomes

Title
Scientific Communication

Tags
201901, 4

Learning Outcome
Each student will communicate understanding in both written and verbal formats.

Title
Literature Analysis and Critique

Tags
201951, 3

Learning Outcome
Each student will become proficient at the analysis, interpretation, and critique of the scientific literature associated with this discipline

Title
Religion, Philosophy, and Microbiology

Tags
201978, 5

Learning Outcome
Each student will have the opportunity to explore the religious, philosophical, and personal aspects of the discipline

Title
Microbial Ecology

Tags
202002, 1

Learning Outcome
Each student will have a clear understanding and mastery of the discipline of microbial ecology.

Title
Experimental Design

Tags
201952, 0, 2, 2020-08-20 07:33:51

Learning Outcome
Each student will design and execute original experiments with appropriate hypotheses and controls

MMBIO 364 - Bacterial Pathogenesis.

Course Information

Teaching Area (new)
MMBIO

Course Number
364

Teaching Area
MMBIO

Course Title
Bacterial Pathogenesis.

Course Description
Fundamental principles of bacterial pathogenesis, emphasizing the molecular interactions of medically important bacteria and their hosts.

Department
Microbiology and Molecular Biology

When Taught
Winter

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:

Prerequisite

Prerequisites

Complete ALL of the following Courses:

- MMBIO 151 - Microbiology for Majors
  AND MMBIO 240 - Molecular Biology
  AND MMBIO 261 - Infection and Immunity

Learning Outcomes

Title
Molecular Tools and Techniques

Tags
201891, 5

Learning Outcome
Have a basic proficiency in the major current molecular tools and techniques used in bacterial pathogenesis research.

Title
Research Reporting

Tags
201895, 3

Learning Outcome
Effectively report in writing the results of your own laboratory research

Title
Research Evaluation

Tags
201926, 2

Learning Outcome
Read, understand, and evaluate research published in the area of bacterial pathogenesis.

Title
Major Bacterial Pathogens

Tags
201947, 1

Learning Outcome
Recognize the diseases caused by major bacterial pathogens and understand the features of pathogenic bacteria that enable them to cause disease

Title
Working with Infectious Bacteria

Tags
202028, 4

Learning Outcome
Work safely and effectively with infectious bacteria.

MMBIO 365 - Bacterial Pathogenesis Laboratory

Course Information

Teaching Area (new)
MMBIO

Course Number
365

Teaching Area
MMBIO

Course Title
Bacterial Pathogenesis Laboratory

Course Description
Laboratory investigation of processes of bacterial pathogenesis.

3

Lab Hours

Fixed:
0

Simple Requisites

Prerequisites

Type
Prerequisite

Prerequisites

Complete ALL of the following Courses:

- MMBIO 240 - Molecular Biology
  AND PWS 340 - Genetics

Learning Outcomes

Title
Identify genomic techniques

Tags
214072, 0, 1, 2023-08-29 11:04:16

Learning Outcome
Students will be able to identify the appropriate technique for a genetic analysis by understanding the following about various techniques: how they work, what they are used for, and what their respective advantages and disadvantages are

Title
Genome Sequences

Tags
214073, 0, 2, 2023-08-29 11:04:18

Learning Outcome
Students will be able to describe how genomes are sequenced.

Title
Evaluate emerging technologies

Tags
214074, 0, 3, 2023-08-29 11:04:21

Learning Outcome
Students will be able to interpret, assess, and critically evaluate the quality and veracity of new results and techniques in genomics by learning and critically applying their understanding of the biological principles on which current techniques are based

Title
Communicate effectively

Tags
214075, 0, 4, 2023-08-29 11:04:25

Learning Outcome
Students will be able to communicate technical science to an expert or lay audience by understanding the concepts underlying genomics tools and summarizing these tools orally and in writing, in both technical and non-technical terms

Title
Genomic Experiments

Learning Outcome
Students will complete a series of exercises with data representing genomic experiments (analysis and interpret).

Title
Genomic Features

Learning Outcome
Students will understand techniques and concepts to assess genomic features such as methylation, gene expression, etc.

MMBIO 385 - Phage Genetics

Course Information

Teaching Area (new)
MMBIO

Course Number
385

Teaching Area
MMBIO

Course Title
Phage Genetics

Course Description
Phage genetics with student-designed experiments.

Department
Microbiology and Molecular Biology

When Taught
Contact Department

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
1

Lab Hours

Fixed:
6

Simple Requisites

Prerequisites

Type
Prerequisite

Prerequisites

Complete ALL of the following Courses:

- MMBIO 194 - Phage Hunters: Discovery
  AND MMBIO 195 - Phage Hunters: Comparative Genomics

Other Prerequisites
By instructor permission only.

MMBIO 390R - Readings in Molecular Biology

Course Information

Teaching Area (new)
MMBIO

Course Number
390R

Teaching Area
MMBIO

Course Title
Readings in Molecular Biology

Course Description
Selected readings in molecular biology.

Department
Microbiology and Molecular Biology

When Taught
Fall and Winter

Credit Hours

Min:
1

Fixed/Max:
1

Lecture Hours

1

Lab Hours

Fixed:
0

Simple Requisites

Prerequisites

Type
Prerequisite

Prerequisites

Complete ALL of the following Courses:

- MMBIO 240 - Molecular Biology

Recommended
PDBio 360

Learning Outcomes

Title
Critical Analysis

Tags
201865, 2

Learning Outcome
Gain experience in critically evaluating the current literature in molecular biology.

Title
Current Literature and Techniques

Tags
201928, 1

Learning Outcome
Become familiar with the current literature and techniques in molecular biology

Title
Scientific Communication

Tags
202017, 3

Learning Outcome
Gain confidence in scientific presentations and discussions.

MMBIO 399R - Academic Internship

Course Information

Teaching Area (new)
MMBIO

Course Number
399R

Teaching Area
MMBIO

Course Title
Academic Internship

Course Description
Approved experiential learning.

Department
Microbiology and Molecular Biology

When Taught
All Semesters/Terms

Credit Hours

Min:
1

Fixed/Max:
9

Lecture Hours

Fixed:
0

Lab Hours

Fixed:
40

Other Prerequisites
Mentor's consent

Note
An APPROVED Internship Application is required before adding.

Learning Outcomes

Title
Experimental analysis

Tags
201890, 1

Learning Outcome
Students will analyze experimental results and draw conclusions.

Title
Effective communication

Tags
201992, 0, 2

Learning Outcome
Students will communicate with supervisors and colleagues outside of the university environment. They will present their scientific research.

Title
Experimental design and experience

Tags
201974, 0, 0

Learning Outcome
Students will be able to design and perform experiments using the latest techniques.

MMBIO 405 - Basic Laboratory Operations in Medical Laboratory Science

Course Information

Teaching Area (new)
MMBIO

Course Number
405

Teaching Area
MMBIO

Course Title
Basic Laboratory Operations in Medical Laboratory Science

Course Description
Basic laboratory process and procedures.

Department
Microbiology and Molecular Biology

When Taught
Fall and Winter

Credit Hours

Min:
1

Fixed/Max:
1

Lecture Hours

Fixed:
0

Lab Hours

Fixed:
3

Other Prerequisites
Medical Laboratory Science program acceptance.

MMBIO 406 - Clinical Chemistry

Course Information

Teaching Area (new)
MMBIO

Course Number
406

Teaching Area
MMBIO

Course Title
Clinical Chemistry

Course Description
Laboratory diagnosis of disorders involving the major systems of the human body with clinical chemistry.\n

Department
Microbiology and Molecular Biology

When Taught
Fall

Credit Hours

Min:
4

Fixed/Max:
4

Lecture Hours

Fixed:
2

Lab Hours

Fixed:
6

Other Prerequisites
Medical laboratory science program acceptance

MMBIO 407 - Clinical Microbiology

Course Information

Teaching Area (new)
MMBIO

Course Number
407

Teaching Area
MMBIO

Course Title
Clinical Microbiology

Course Description
Approaches to laboratory diagnosis of infectious diseases.

Department
Microbiology and Molecular Biology

When Taught
Fall

Credit Hours

Min:
5

Fixed/Max:
5

Lecture Hours

Fixed:
2

Lab Hours

Fixed:
6

Simple Requisites

Prerequisites

Type
Prerequisite

Prerequisites

Complete ALL of the following Courses:

- MMBIO 261 - Infection and Immunity

Other Prerequisites
Admission to the Medical Laboratory Science program.

Learning Outcomes

Title
Laboratory tests and diagnostics

Tags
201863, 0

Learning Outcome
Gain familiarity with the medically important bacteria and fungi by performing the full range of clinical laboratory tests in Microbiology (Prepare, examine and interpret gram stained smears of microorganisms, streak appropriate media for isolation of microorganisms, interpret stains, growth patterns, and biochemical reactions to aid in the identification of microbial organisms) and play a role in the development and evaluation of test systems and interpretive algorithms

Title
Test Systems Development and Evaluation

Tags
201914, 1

Learning Outcome
Have diverse responsibilities in areas of analysis and clinical decision-making, regulatory compliance with applicable regulations, education, and quality assurance/performance. Demonstrate improvement wherever laboratory testing is researched, developed, or performed. Be able to design experiments, with appropriate controls, to test various hypotheses in clinical Microbiology.

Title
Information Processing and Management Systems

Tags
201922, 4

Learning Outcome
Possess basic knowledge, skills, and relevant experiences for the following:Communications to enable consultative interactions with members of the healthcare team, external relations, customer service, and patient educationFinancial, operations, marketing, and human resource management of the clinical laboratory to enable cost-effective, high-quality, value-added laboratory servicesInformation management to enable effective, timely, accurate, and cost-effective reporting of laboratory-generated information

Title
Effective Communication

Tags
201968, 2

Learning Outcome
Possess basic knowledge, skills, and relevant experiences for the following:Communications to enable consultative interactions with members of the healthcare team, external relations, customer service, and patient educationFinancial, operations, marketing, and human resource management of the clinical laboratory to enable cost-effective, high-quality, value-added laboratory servicesInformation management to enable effective, timely, accurate, and cost-effective reporting of laboratory-generated information

Title
Laboratory Management and Organization

Tags
201993, 3

Learning Outcome
Possess basic knowledge, skills, and relevant experiences for the following:Communications to enable consultative interactions with members of the healthcare team, external relations, customer service, and patient educationFinancial, operations, marketing, and human resource management of the clinical laboratory to enable cost-effective, high-quality, value-added laboratory servicesInformation management to enable effective, timely, accurate, and cost-effective reporting of laboratory-generated information

MMBIO 409 - Hematology

Course Information

Teaching Area (new)
MMBIO

Course Number
409

Teaching Area
MMBIO

Course Title
Hematology

Course Description
The normal physiology of blood and the pathophysiology of anemias, leukemias, and coagulation disorders.

Department
Microbiology and Molecular Biology

When Taught

Prerequisite

Prerequisites

Complete ALL of the following Courses:

- MMBIO 240 - Molecular Biology
  AND MMBIO 241 - Molecular and Cellular Biology Laboratory
  AND PWS 340 - Genetics

MMBIO 412 - Immunohematology

Course Information

Teaching Area (new)
MMBIO

Course Number
412

Teaching Area
MMBIO

Course Title
Immunohematology

Course Description
Theory and practice of blood banking.

Department
Microbiology and Molecular Biology

When Taught
Winter

Credit Hours

Min:
4

Fixed/Max:
4

Lecture Hours

Fixed:
2

Lab Hours

Fixed:
6

Other Prerequisites
Medical Laboratory Science program acceptance.

Learning Outcomes

Title
MMBio 412, Clinical Immunohematology Course Outcomes

Tags
210066, 0, 1

Learning Outcome
#1 – Discuss and demonstrate the proper collection, handling, and processing of clinical samples for Immunohematology testing.
#2 - Accurately perform immunohematology tests for the diagnosis of various conditions and interpret the results. Demonstrate competency in areas of analysis and clinical decision-making, regulatory compliance, and quality assurance/performance improvement associated with immunohematology testing.
#3 – Demonstrate competency in the methodologies commonly used in immunohematology testing, including: ABO/Rh testing, Antibody screening tests, antibody identification, antigen typing, quality control, fetal screen, crossmatch, proper labelling of blood for transfusion, blood component preparation and therapy, absorption, and elution techniques.
#4 – Describe the disease processes associated with immunohematology and our role as medical laboratory scientists in meeting the needs of our patients including trauma, hemolytic anemia's, pregnancy, hemolytic disease of the fetus and newborn, surgical blood loss, adverse affects of transfusion, and component preparation/therapy.
* Outcomes will be measured using lecture exams, laboratory exercises, laboratory practical exams. Also upon completion of the MLS program our students take a MLS certification exam administered by the American Society for Clinical Pathology Board of Certification which covers immunohematology.

Perform the full range of clinical laboratory tests in immunohematology.
Link to Program Outcomes: Laboratory Tests and Diagnostics, Critical Thinking
Bottom of Form
Top of Form
Have responsibilities in areas of analysis and clinical decision-making, regulatory compliance with applicable regulations, education, and quality assurance/performance improvement wherever laboratory testing is researched, developed, or performed *Relates to Program Learning Outcome: #2
Link to Program Outcomes: Critical Thinking
Bottom of Form
Top of Form
Possess basic knowledge, skills, and relevant experiences for the following:

Communications to enable consultative interactions with members of the healthcare team, external relations, customer service, and patient education
Financial, operations, marketing, and human resource management of the clinical laboratory to enable cost-effective, high-quality, value-added laboratory services
Information management to enable effective, timely, accurate, and cost-effective reporting of laboratory-generated information

*Relates to Program Learning Outcome: #3, 4, 5
Link to Program Outcomes: Effective Communication, Laboratory Management and Organization, Information Processing and Management Systems

MMBIO 418 - Medical Parasitology

Course Information

Teaching Area (new)
MMBIO

Course Number
418

Teaching Area
MMBIO

Course Title
Medical Parasitology

Course Description
Pathogenesis, diagnosis, and epidemiology of human parasitic diseases.

Department
Microbiology and Molecular Biology

When Taught
Fall

Credit Hours

Min:
2

Fixed/Max:
2

Lecture Hours

Fixed:
2

Simple Requisites

Prerequisites

Type
Prerequisite

Prerequisites

Complete ALL of the following Courses:

- MMBIO 240 - Molecular Biology
  AND MMBIO 261 - Infection and Immunity

Learning Outcomes

Title
Experimental Design

Tags
201875, 2

Learning Outcome
Be able to design experiments, with appropriate controls, to test various hypotheses in parasitology.*Relates to Program Learning Outcome: Devise experiments with appropriate hypotheses and controls.

Title
Parasites and Pathogenesis

Tags
201944, 1

Learning Outcome
Gain familiarity with the medically important parasites. This includes understanding parasite host range as well as pathology and mechanisms of pathogenesis.*Relates to Program Learning Outcome: Exhibit mastery of medical microbiology

Title
Critical Reading and Analysis

Tags
201969, 3

Learning Outcome
Read and critically interpret current scientific literature in the field of parasitology.*Relates to Program Learning Outcome: Devise experiments with appropriate hypotheses and controls.

Title
Alleviating Suffering

Tags
202025, 4

Learning Outcome
Students should gain an understanding of their role and responsibility in alleviating suffering caused by parasitic diseases.*Relates to Program Learning Outcome: Reflect/discuss/explore how faith in the Lord and Christ-like living are affected by an understanding of fundamental biological principles.

MMBIO 419 - Clinical Parasitology Laboratory

Course Information

Teaching Area (new)
MMBIO

Course Number
419

Teaching Area
MMBIO

Course Title
Clinical Parasitology Laboratory

Course Description
Pathogenesis, diagnosis, and epidemiology of human parasitic diseases laboratory.

Department
Microbiology and Molecular Biology

When Taught
Fall

Credit Hours

Min:
1

Fixed/Max:
1

Lecture Hours

Fixed:
0

Lab Hours

1

Note
For Medical Laboratory Science majors only.

Learning Outcomes

Title
Parasites and Pathogenesis

Tags
210062, 0, 1

Learning Outcome
Gain familiarity with the medically important parasites. This includes understanding parasite host range as well as pathology and mechanisms of pathogenesis.*Relates to Program Learning Outcome: Exhibit mastery of medical microbiology

Title
Experimental Design

Tags
210063, 0, 2

Learning Outcome
Be able to design experiments, with appropriate controls, to test various hypotheses in parasitology.*Relates to Program Learning Outcome: Devise experiments with appropriate hypotheses and controls.

Title
Critical Reading and Analysis

Tags
210064, 0, 3

Learning Outcome
Read and critically interpret current scientific literature in the field of parasitology.*Relates to Program Learning Outcome: Devise experiments with appropriate hypotheses and controls.

Title
Alleviating Suffering

Tags
210065, 0, 4

Learning Outcome
Students should gain an understanding of their role and responsibility in alleviating suffering caused by parasitic diseases.*Relates to Program Learning Outcome: Reflect/discuss/explore how faith in the Lord and Christ-like living are affected by an understanding of fundamental biological principles.

MMBIO 441 - Advanced Molecular Biology

Course Information

Teaching Area (new)
MMBIO

Course Number
441

Teaching Area
MMBIO

Course Title
Advanced Molecular Biology

Course Description
Molecular biology of gene structure and expression in prokaryotic and eukaryotic organisms.

Department
Microbiology and Molecular Biology

When Taught
Fall

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Simple Requisites

Prerequisites

Type
Prerequisite

Complete ALL of the following Courses:
- MMBIO 240 - Molecular Biology

Learning Outcomes

Title
Current Research Presentation

Tags
201953, 3

Learning Outcome
Present current research from the scientific literature.*Relates to Program Learning Outcomes: Communicate scientific information using oral methods; interpret, analyze and critique experiments from the primary scientific literature. Presenting research findings through effective oral and written presentations.

Title
Principles of Molecular Biology

Tags
202031, 1

Learning Outcome
Learn molecular biology principles through study, lecture, and class discussion. An emphasis will be on understanding the experiments used to learn these principles.
*Relates to Program Learning Outcome: Knowledge of principles and techniques of molecular and cellular biology preparing students for further education and/or employment.

Title
Experimental Design and Data Interpretation

Tags
202032, 2

Learning Outcome
Apply the principles learned to design experiments and properly interpret experimental data.
*Relates to Program Learning Outcome: Proficiency in formulating research projects

Title
Integrity and Ethical Behavior

Tags
202033, 4

Learning Outcome
Demonstrate integrity and ethical behavior during all class work.
*Relates to Program Learning Outcome: Commitment to professional integrity and ethical behavior consistent with the mission of the University.

MMBIO 442 - Advanced Molecular Biology Laboratory

Course Information

Teaching Area (new)
MMBIO

Course Number
442

Teaching Area
MMBIO

Course Title
Advanced Molecular Biology Laboratory

Course Description
Laboratory to accompany MMBio 441.

Department
Microbiology and Molecular Biology

When Taught
Winter

Credit Hours

Min:
2

Fixed/Max:
2

Lecture Hours

Fixed:
0

Lab Hours

Fixed:
6

Simple Requisites

Prerequisites

Type
Prerequisite

Prerequisites

Complete ALL of the following Courses:

- MMBIO 241 - Molecular and Cellular Biology Laboratory

Other Prerequisites
MMBio 441 or concurrent enrollment.

Learning Outcomes

Title
Experimental Design

Tags
201876, 2

Learning Outcome
Apply the techniques to design experiments with appropriate hypotheses and controls and properly interpret experimental data*Relates to Program Learning Outcome: Devise experiments with appropriate hypothesis and controls

Title
Scientific Communication

Tags
201935, 3

Learning Outcome
Practice scientific communication and record-keeping through the completion of a laboratory notebook and answering written and oral questions and presentations.*Relates to Program Learning Outcome: Demonstrate Communication skills in presenting research findings through effective oral and written presentations.

Title
Independent Experiments

Tags
201937, 4

Learning Outcome
Design and carry out independent experiments*Relates to Program Learning Outcome: Devise experiments with appropriate hypothesis and controls

Title
Laboratory Techniques

Tags
201989, 1

Learning Outcome
Learn molecular biology laboratory techniques through hands-on experience. Techniques will include DNA and RNA isolation, PCR, microRNA isolation, northern blotting, RFLP analysis, site-directed mutagenisis, protein extraction and EMSA.*Relates to Program Learning Outcome: Knowledge of principles and techniques of molecular and cellular biology

MMBIO 461 - Advanced Bacterial Physiology

Course Information

Teaching Area (new)
MMBIO

Course Number
461

Teaching Area
MMBIO

Course Title
Advanced Bacterial Physiology

Course Description
Principles of prokaryotic physiology, including cell structure and function, gene regulation, and biochemical processes; focusing on the unique aspects of prokaryotic biology.

Department
Microbiology and Molecular Biology

When Taught
Winter

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Simple Requisites

Prerequisites

Type
Prerequisite

Prerequisites

Fulfill ANY of the following requirements:

Prerequisites

Complete ALL of the following Courses:
- MMBIO 151 - Microbiology for Majors

OR

Prerequisites

Complete ALL of the following Courses:
- MMBIO 221 - General Microbiology

Recommended
MMBio 240

Learning Outcomes

Title
Scientific Review

Tags
201861, 3

Learning Outcome
Students will write a scientific review article on a topic of their choice related to microbial physiology.

Title
Microbial Physiology

Tags
201982, 1

Learning Outcome
Students will demonstrate an advanced understanding of selected topics in microbial physiology (cell structure, growth, biosynthesis, transport, etc.) through their participation in classroom discussions, writing assignments and oral presentations.

Title
Critical Thinking, Research, and Reporting

Tags
202026, 2

Learning Outcome
Students will demonstrate the ability to read, comprehend and communicate current research in microbial physiology by making Powerpoint presentations to the class.

MMBIO 463 - Immunology

Course Information

Teaching Area (new)
MMBIO

Course Number
463

Teaching Area
MMBIO

Course Title
Immunology

Course Description
Advanced concepts of immunological processes.

Department
Microbiology and Molecular Biology

When Taught
Fall and Winter

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Simple Requisites

Prerequisites

Type
Prerequisite

Prerequisites

Complete ALL of the following Courses:

- MMBIO 240 - Molecular Biology
  AND MMBIO 261 - Infection and Immunity

Learning Outcomes

Title
Scientific Communication and Presentation

Tags
201894, 4

Learning Outcome
Engage in discussions about concepts in immunology and research. Present a PowerPoint on a particular immunological topic. Engage in a question and answer session on the content. Write an easy on a chosen subject relating to recent immunological advances.*Relates to Program Learning Outcome: Communicate scientific information using both oral and written methods.

Title
Divine Design of the Immune System

Tags
201920, 5

Learning Outcome
Develop a deep appreciation for our Heavenly Father and his love for each of us by engaging in studying how he designed the immune system to protect his children from disease.*Relates to Program Learning Outcome: Reflect/ discuss/ explore how faith in the Lord, and Christ like living are affected by an understanding of the fundamental biological processes.

Title
Research Evaluation

Tags
201970, 3

Learning Outcome
Read and understand current publications in Immunology and be able to discuss and critically evaluate experiments and data*Relates to Program Learning Outcome: Devise experiments with appropriate hypotheses and controls.

Title
Advanced Immunology

Tags
201979, 1

Learning Outcome
Understanding advanced concepts of Immunology by studying and reflecting on the subject.*Relates to Program Learning Outcome: Exhibit mastery of four of the principle areas of the discipline

Title
Experimental Design and Evaluation

Tags
202023, 2

Learning Outcome
Understands experimental designs used in immunology research and determine the soundness of the immunological data.*Relates to Program Learning Outcome: Devise experiments with appropriate hypotheses and controls.

MMBIO 465 - Virology

Course Information

Teaching Area (new)
MMBIO

Course Number
465

Teaching Area
MMBIO

Course Title
Virology

Course Description
Basic principles of virology, emphasizing selected molecular aspects of virus life cycles and disease processes.

Department
Microbiology and Molecular Biology

When Taught
Fall and Winter

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Simple Requisites

Prerequisites

Type
Prerequisite

Prerequisites

Complete ALL of the following Courses:

- MMBIO 240 - Molecular Biology
  AND MMBIO 261 - Infection and Immunity

Learning Outcomes

Title
Virology Fundamentals

Tags
201868, 1

Learning Outcome
Be able to answer basic questions about Virology: Why are viruses organized as they are? How do viruses replicate? How do viruses cause disease? What are the interactions between viruses and the host immune system? How to prevent/treat/cure viral infections? How can viruses be used as tools to study biological processes and for gene transfer? How can an understanding of viruses help you in your future career? *Relates to Program Learning Outcome: “Exhibit mastery of four of the principal areas of the discipline”, one of which is Virology.

Title
Alleviating Human Suffering

Tags
201887, 4

Learning Outcome
Understand how research of viruses “by study and also by faith” can lead to alleviation of human disease and suffering.*Relates to Program Learning Outcome: “Reflect/discuss/explore how faith in the Lord and Christ-like living are affected by an understanding of fundamental biological processes”

Title
Experimental Tools

Tags
201911, 2

Learning Outcome
Understand experimental tools used to study viruses (these are broadly applicable to molecular biology, cell biology, and microbiology) and be able to develop experiments and interpret data.*Relates to Program Learning Outcomes: “Devise experiments with appropriate hypotheses and controls” and “Interpret experiments from primary scientific literature”

Title
Scientific Writing

Tags
201946, 3

Learning Outcome
Write about a current, pressing issue in the field of Virology.*Relates to Program Learning Outcome: “Communicate scientific information”

MMBIO 466 - Virology Laboratory

Course Information

Teaching Area (new)
MMBIO

Course Number
466

Teaching Area
MMBIO

Course Title
Virology Laboratory

Course Description
Laboratory exercises illustrating in vitro behavior of selected viruses. Developing laboratory skills for virus studies.

Department
Microbiology and Molecular Biology

When Taught
Winter

Credit Hours

Min:
1

Fixed/Max:
1

Lecture Hours

Fixed:
0

Lab Hours

Fixed:
3

Other Prerequisites
MMBio 261; or MMBio 465 or concurrent enrollment

Learning Outcomes

Title
Viral Cultures

Tags
201883, 1

Learning Outcome
Be able to gain hands-on experience in the ability to characterize various aspects of viral infections based upon cultured eukaryotic cells.

Title
Serological Tests

Tags
201924, 3

Learning Outcome
Be able to determine if a human has been previously exposed to a specific virus by perform serological tests.

Title
Stock Titrating

Tags
201961, 2

Learning Outcome
Be able to titrate virus stocks.

MMBIO 467 - Immunology Lab

Course Information

Teaching Area (new)
MMBIO

Course Number
467

Teaching Area
MMBIO

Course Title
Immunology Lab

Course Description
Laboratory exercises in advanced concepts of immunological processes.

Department
Microbiology and Molecular Biology

When Taught
Fall

Credit Hours

Min:
1

Fixed/Max:
1

Lecture Hours

Fixed:
0

Lab Hours

Fixed:
3

Other Prerequisites
MMBio 261; or 463 or concurrent enrollment

Learning Outcomes

Title
Lab Notebook

Tags
201921, 1

Learning Outcome
Maintain a research lab book with experimental protocol, data, and discussion of results.

Title
Immunology Concepts

Tags
201964, 2

Learning Outcome
Understand advanced laboratory concepts of Immunology by completing protocols and experiments

Title
Experimental Design and Analysis

Tags
201975, 3

Learning Outcome
Understand experimental design used in immunology research and determine the soundness of immunological data according to the design and controls used in the experiment.

Title
Experimental Data

Tags
201987, 4

Learning Outcome
Obtain and interpret experimental data.

Title
Mentoring and Collaboration

Tags
202034, 5

Learning Outcome
Expand the student's understanding of immunology research and acknowledge the miracle of immunological processes.Develop good social skills through participation in laboratory experiments with other students.

MMBIO 471 - Applied and Industrial Microbiology

Course Information

Teaching Area (new)
MMBIO

Course Number
471

Teaching Area
MMBIO

Course Title
Applied and Industrial Microbiology

Course Description
Science of the microbiological tests performed in various industries. Sterilization, aseptic processing, pharmaceutical, manufacturing, water treatment, and food microbiology.

Department
Microbiology and Molecular Biology

When Taught
Fall

Credit Hours

Min:
2

Fixed/Max:
2

Lecture Hours

Fixed:
2

Lab Hours

Fixed:
0

Other Prerequisites
MMBIO students only. Juniors, seniors, & graduate students only.

MMBIO 490R - Molecular Biology Seminar

Course Information

Teaching Area (new)
MMBIO

Course Number
490R

Teaching Area
MMBIO

Course Title
Molecular Biology Seminar

Course Description
Critical examination of current literature and research in molecular biology.

Department
Microbiology and Molecular Biology

When Taught
Fall and Winter

Credit Hours

Min:
1

Fixed/Max:
1

Lecture Hours

Fixed:
1

Lab Hours

Fixed:
0

Other Prerequisites
MMBio 441 or concurrent enrollment; senior status.

Learning Outcomes

Title
Network with current researchers

Tags
201867, 1

Learning Outcome
Network and talk to prominent researchers in the field

Title
Current research

Tags
201881, 0

Learning Outcome
Describe the current research in the field of molecular biology

Title
Research Analysis

Tags
201918, 2

Learning Outcome
Analyze current research and experimental design.

MMBIO 491 - Concept Applications in Laboratory Medicine

Course Information

Teaching Area (new)
MMBIO

Course Number
491

Teaching Area
MMBIO

Course Title
Concept Applications in Laboratory Medicine

Course Description
Case presentations of various medical disorders.

Department
Microbiology and Molecular Biology

When Taught
Fall and Winter

Credit Hours

Min:
1

Fixed/Max:
1

Lecture Hours

Fixed:

Other Prerequisites
Acceptance into medical laboratory science program

Learning Outcomes

Title
Data and Symptom Interpretation

Tags
201984, 1

Learning Outcome
This course is designed to allow the student to interpret, evaluate, and correlate laboratory data and clinical symptoms pertaining to specific disease states. Each week several students will present case study presentations covering current lecture content. For example, week two covers carbohydrate metabolism and related disease processes so the assigned students will present patient data focusing on a specific disease such as diabetes mellitus, including symptoms, laboratory findings and treatment.

Title
Attendance

Tags
202013, 2

Learning Outcome
To receive a passing grade for this course, it is expected that the student will attend all weekly sessions ON TIME with no more than one excused absence permitted and present at least one case study during the semester. Class will be held on each Friday of the semester at 9 a.m.

MMBIO 493R - Curriculum and Instruction Practicum

Course Information

Teaching Area (new)
MMBIO

Course Number
493R

Teaching Area

By instructor permission only.

Recommended
MMBIO 240; MMBIO 221; MMBIO 151

MMBIO 494R - Advanced Mentored Research

Course Information

Teaching Area (new)
MMBIO

Course Number
494R

Teaching Area
MMBIO

Course Title
Advanced Mentored Research

Course Description
Advanced mentored research in microbiology and molecular biology topics.

Department
Microbiology and Molecular Biology

When Taught
All Semesters/Terms

Credit Hours

Min:
0.5

Fixed/Max:
3

Other Prerequisites
Mentor's consent.

Learning Outcomes

Title
Research Experience

Tags
201866, 1

Learning Outcome
Perform current techniques and carry out experiments in a professional manner. Gather data and evaluate results.

Title
Scientific Communication-Research

Tags
201896, 2

Learning Outcome
Properly notate work and results in a scientific notebook. Participate in the preparation of scientific papers and presentations.

Title
Experimental design

Tags
201923, 3

Learning Outcome
Develop, design and troubleshoot experimental procedures.

Title
Mentoring and collaboration

Tags
201941, 4

Learning Outcome
Form relationships with a research mentor and other students in the lab. Begin networking and professional activities.

Title
Scientific Communication-primary literature

Tags
201971, 5

Learning Outcome
Read, and use primary literature to design experiements and advance a project. Present and evaluate articles from the primary literature

MMBIO 496R - Clinical Experience

Course Information

Teaching Area (new)
MMBIO

Course Number
496R

Teaching Area
MMBIO

Course Title
Clinical Experience

Course Description
Students will perform the full range of clinical laboratory tests in an affiliated clinical facility. A variable option of 16 to 24 weeks with a minimum of one semester of enrollment.

Department
Microbiology and Molecular Biology

When Taught
All Semesters/Terms

Credit Hours

Min:
1

Prerequisite

Prerequisites

Complete ALL of the following Courses:

- MMBIO 406 - Clinical Chemistry
  AND MMBIO 409 - Hematology

Note
An APPROVED Internship Application is required before adding.

Learning Outcomes

Title
Clinical experience

Tags
201990, 0, 0

Learning Outcome
Upon completion of the MMBio 496R Internship the student will be able to:

Perform the full range of clinical laboratory tests. *Relates to Program Learning Outcome: #1
Competently fulfill diverse responsibilities in areas of analysis and clinical decision-making, regulatory compliance with applicable regulations, education, and quality assurance/performance improvement wherever laboratory testing is researched, developed, or performed *Relates to Program Learning Outcome: #2
Utilize basic knowledge, skills, and relevant experiences in the following medical laboratory contexts:
Communications to enable consultative interactions with members of the healthcare team, external relations, customer service, and patient education
Financial, operations, marketing, and human resource management of the clinical laboratory to enable cost-effective, high-quality, value-added laboratory services
Information management to enable effective, timely, accurate, and cost-effective reporting of laboratory-generated information *Relates to Program Learning Outcome: #3, 4, 5

Learning Outcomes

Title
Biosafety awareness

Tags
201884, 0

Learning Outcome
Understand the procedures, practices, and facilities required for biosafety levels 1-4.

Title
Bioterrorism

Tags
201942, 1

Learning Outcome
Understand the basic parameters of bioterrorism and the current threats

Title
CDC classification

Tags
201976, 2

Learning Outcome
Understand the current CDC classification of select agents.

Title
Select agent biology

Tags
201980, 3

Learning Outcome
Understand the basic biological characteristics of each select agent, their virulence mechanisms, and their interaction with various hosts.

Title
Students' choice

Tags
202007, 5

Learning Outcome
_____ _____ (Individual – Please write your own in the space above)

Title
Bioweapons

Tags
202008, 4

Learning Outcome
Understand how select agents have been used and could be used as bioweapons.

MMBIO 522 - Flow Cytometry

Course Information

Teaching Area (new)
MMBIO

Course Number
522

Learning Outcomes

Title
Scientific Literacy

Tags
214076, 0, 1, 2023-08-29 11:05:18

Learning Outcome
Students will read and comprehend reports in the current scientific literature regarding microbiology, molecular biology, and bioinformatic research.

Title
Scientific Presentation

Tags
214077, 0, 2, 2023-08-29 11:05:24

Learning Outcome
Students will develop skills in making effective scientific presentations using high standards of clarity, relevance, and logic.

Title
Scientific Literature Review

Tags
214078, 0, 3, 2023-08-29 11:05:25

Learning Outcome
Students will develop the skills to be confident in exploring scientific literature and finding unanswered scientific questions, even outside of your expertise.

Learning Outcomes

Title
Communication Skills

Tags
197852, 1

Learning Outcome
In both written and spoken target language, communicate with reasonable accuracy about real-world activities with well-educated members of the target-culture accustomed to dealing with non-native speakers.

Title
Comprehension

Tags
197853, 2

Learning Outcome
Understand every-day written and verbal instructions. Comprehend concrete details and global meaning of intermediate-level written and spoken passages related to familiar topics that native speakers encounter routinely in their daily life.

Title
Cultural Knowledge

Tags
197854, 3

Learning Outcome
Discuss in the target language cultural practices related to every-day life in the target culture. Acquire basic background knowledge of important achievements related to the target culture (historical figures and events, major literary and artistic movements, government and religious institutions, etc.).

Title
General Education Requirements

Tags
197855, 4

MTHED 101 - Introduction to Mathematics Education

Course Information

Teaching Area (new)
MTHED

Course Number
101

Teaching Area
MTHED

Course Title
Introduction to Mathematics Education

Course Description
Introduction to the field of mathematics education. Background on the nature of mathematics, its teaching and learning. Program and teacher certification requirements are also discussed.

Department
Mathematics Education

When Taught
Fall Term 1; Winter Term 1.

Credit Hours

Min:
0.5

Fixed/Max:
0.5

Lecture Hours

Learning Outcomes

Title
Mathematical Learners

Tags
205147, 1

Learning Outcome
Students understand that all learners can learn mathematics and should be viewed as legitimate mathematical thinkers.

Title
Mathematics Instruction

Tags
205148, 2

Learning Outcome
Students recognize that mathematics instruction is best done when learners are placed in problem solving, sense making situations that allow them to reason and collaborate with their peers.

Title
Mathematics

Tags
205149, 3

Learning Outcome
Students have an understanding that mathematics is about problem solving and sense making rather than about solving procedures.

MTHED 177 - Critical Review of School Mathematics

Course Information

Teaching Area (new)
MTHED

Course Number
177

Teaching Area
MTHED

Course Title
Critical Review of School Mathematics

Course Description
Strengthen understanding of middle-school mathematics with an emphasis on multiplicative structures, proportionality and linearity; gain awareness as mathematics learners in learning communities; learn how to support collaborative communities as teachers.

Department
Mathematics Education

When Taught
Fall and Winter

Credit Hours

Min:
3

Type
Prerequisite

Prerequisites

Complete ALL of the following Courses:

- MATH 112 - Calculus 1

Recommended
Math 113 recommended for Mathematics Education pre-majors

Learning Outcomes

Title
Mathematical Exploration

Tags
205028, 2

Learning Outcome
Students can engage in meaningful mathematical exploration, are willing and able to approach and solve challenging mathematics problems, and can reflect on their own learning to make inferences about how adolescents learn mathematics.

Title
Mathematical Understanding

Tags
205029, 3

Learning Outcome
Students know and can describe what it means to understand mathematics relationally, can demonstrate mathematical understanding by creating and evaluating conceptually-oriented mathematical explanations, and can explain why conceptually-oriented mathematics instruction is essential for supporting adolescents' learning of mathematics.

Title
Mathematics

Tags
207314, 1

Learning Outcome
Students have a deep understanding of select central concepts of middle school mathematics, with significant attention to multiplicative structures, proportionality and linearity, as well as core representations, canonical examples, and alternative algorithms germane to teaching these select concepts. Other learning outcomes in the course are situated in the mathematics of multiplicative structures, proportionality and linearity.

Simple Requisites

Prerequisites

Type
Prerequisite

Prerequisites

Fulfill ANY of the following requirements:

Prerequisites

Complete ALL of the following Courses:

- MATH 213 - Elementary Linear Algebra
  AND MATH 290 - Fundamentals of Mathematics
  AND MTHED 177 - Critical Review of School Mathematics

OR

Prerequisites

Complete ALL of the following Courses:

- MATH 290 - Fundamentals of Mathematics
  AND
  AND MTHED 177 - Critical Review of School Mathematics

Other Prerequisites
FBI fingerprint and background clearance.

Learning Outcomes

Title
Mathematical Practices

Tags
205031, 1

Learning Outcome
Students understand authentic mathematical practices and use them to engage in meaningful mathematical exploration and reflect on their own use of these practices to make inferences about how adolescents might engage in mathematical tasks.

Title
Philosophy of Teaching and Learning Mathematics

Tags
205032, 2

Learning Outcome
Students articulate a philosophy of teaching and learning mathematics based on the professional standards for teaching mathematics, the moral dimensions of teaching, and the INTASC standards.

Title
Aligning Curriculum and Instructional Goals

Tags
205033, 3

Learning Outcome
Students can use curriculum guides such as the NCTM content standards or the Common Core State Standards to trace the K-12 development of a select central concept of mathematics as a means for planning instruction appropriate to a particular grade level and topic.

Title
Analyzing Classroom Instruction

Tags
205034, 4

Learning Outcome
Students can analyze and describe the mathematical experiences of adolescents in terms of the tasks, discourse and learning environments they observe in public school classrooms, and can reconcile the theoretical principles of their university experience with the reality of a secondary classroom.

Title
The Equity Principle

Tags
207316, 5

Learning Outcome
Students identify a range of positions that are available to adolescents in particular mathematics classrooms. Students understand what it means to believe that "all adolescents can learn mathematics."

MTHED 277 - Task Design for Student Learning

Course Information

Teaching Area (new)
MTHED

Course Number
277

Teaching Area
MTHED

Course Title
Task Design for Student Learning

Course Description
Strengthen understanding of high-school mathematics, with an emphasis on algebra and functions, in the context of selecting, modifying, and creating tasks that support students' development of both conceptual understanding and procedural fluency.

Department
Mathematics Education

When Taught
Fall and Winter

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Complete ALL of the following Courses:

- MTHED 177 - Critical Review of School Mathematics
  AND MTHED 276 - Exploration of Mathematics Teaching

Learning Outcomes

Title
Mathematics

Tags
205094, 5

Learning Outcome
Students have a deep understanding of select central concepts of high school mathematics with a significant attention to algebra and functions, as well as core representations, canonical examples, and alternative algorithms germane to teaching these concepts. Other learning outcomes in the course are situated in the mathematics of algebra and functions.

Title
Task Analysis

Tags
207303, 0

Learning Outcome
Students can use their knowledge of mathematics and how adolescents learn mathematics to analyze the intentionality of the task (e.g., cognitive demand, equitable practices, representations including models, context).

Title
Task Design for Learning

Tags
207304, 1

Learning Outcome
Students understand how mathematical tasks can support adolescents' development of conceptual understanding and procedural fluency, and can use that understanding to design mathematical tasks that allow adolescents to use their prior knowledge and experiences to develop understanding of particular concepts and procedures.

Title
Task Design for Promoting Belonging

Tags
207305, 2

Learning Outcome
Students understand that adolescents' sense of belonging in mathematics grows when teachers, peers, themselves, and mathematical tasks position them as capable, valued contributors, building on the strengths, experiences, and perspectives they bring.

Title
Task Design for Personal Growth and Stewardship

Tags
207306, 3

Learning Outcome
Students recognize and can explain how the thoughtful use of mathematical tasks can enable them to reflect on and improve their instruction, and how such use can nurture and empower adolescents to draw upon their divine potential, intelligence, and capabilities to learn and do mathematics.

Title
Identifying Concepts and Procedures

Tags
207307, 4

Learning Outcome
Students can analyze a specific mathematical standard, a task, and a section in a textbook or curricular unit to identify and describe the important mathematical concepts and procedures related to that standard, task, or unit.

MTHED 278 - Assessment of Student Learning

Course Information

Teaching Area (new)
MTHED

Course Number
278

Teaching Area
MTHED

Course Title
Assessment of Student Learning

Course Description
Strengthen understanding of high-school mathematics, with an emphasis on transformational geometry and trigonometry, in the context of creating and critiquing formative and summative assessments that support students' development of both conceptual understanding and procedural fluency.

Department
Mathematics Education

When Taught
Fall and Winter

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Simple Requisites

Prerequisites

Prerequisite

Prerequisites

Complete ALL of the following Courses:

- MTHED 177 - Critical Review of School Mathematics
  AND MTHED 276 - Exploration of Mathematics Teaching
  AND MTHED 277 - Task Design for Student Learning

Note
MthEd 277 to be completed or concurrent enrollment in.

Learning Outcomes

Title
Mathematics

Tags
207308, 1

Learning Outcome
Students have a deep understanding of select central concepts of high school mathematics, with significant attention to transformational geometry and trigonometry, as well as core representations, canonical examples, and alternative algorithms germaine to teaching these concepts. Other learning outcomes in the course are situated in the mathematics of transformational geometry and trigonometry.

Title
Interpreting Evidence of Student Mathematical Thinking Individually and Collectively

Tags
207309, 2

Learning Outcome
Students can interpret evidence of mathematical thinking as demonstrated in written or spoken discourse to make claims about individual or collective student understanding. Students use this analysis to reflect on possible changes to instructional practice that will improve student learning.

Title
Assessment for Learning

Tags
207310, 3

Learning Outcome
Students can analyze, modify and develop formative assessments that provide meaningful evidence and insight into adolescents' understanding of particular concepts and skills. Students can use a variety of assessment strategies (e.g., hinge questions, interviews, show me) to support adolescents' development of both conceptual understanding and procedural fluency.

Title
Unpacking Standards to Write Learning Goals and Align Assessment

Tags
207311, 4

Learning Outcome
Students can unpack standards to identify key mathematical concepts and skills, allowing them to write measurable and observable learning goals that are logically sequenced within a learning trajectory.

Title
Assessment Design for Promoting Belonging

Tags
207312, 5

Learning Outcome
Students can analyze assessments for what mathematical discourse and literacies are privileged and for what features might discriminate against certain populations. Students will modify assessments to promote access for a wide range of adolescent identities.

Title
Strengths and Limitations of Different Assessment Strategies

Tags
207313, 6

Learning Outcome
Students can examine the strengths and limitations of different assessment methods (e.g., homework, retakes, standards-based grading, accommodations) in supporting adolescents' development of conceptual and procedural fluency.

Title
Spiritual Stewardship

Learning Outcome
Students can describe how assessment practices in mathematics education are related to principles within the restored gospel of Jesus Christ by connecting to principles of mercy, justice, and grace.

Title
Assessment of Learning

Learning Outcome
Students can analyze, modify and develop formative assessments that provide meaningful evidence and insight into adolescents' understanding of particular concepts and skills. Students can use a variety of assessment strategies (e.g., hinge questions, interviews, show me) to support adolescents' development of both conceptual understanding and procedural fluency.

MTHED 300 - History and Philosophy of Mathematics.

Course Information

Teaching Area (new)
MTHED

Course Number
300

Teaching Area
MTHED

Course Title
History and Philosophy of Mathematics.

Course Description
Historical development of important mathematical ideas and philosophies; implications for the mathematical curriculum.

Department
Mathematics Education

When Taught
Fall, Winter, Spring

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Simple Requisites

Prerequisites

Type
Prerequisite

Prerequisites

Complete ALL of the following Courses:

- MATH 113 - Calculus 2

Learning Outcomes

Title
Historical Development of Concepts and Practices

Tags
205090, 2

Learning Outcome
Students understand and can describe the historical development of concepts and practices central to school mathematics, including numeration, arithmetic, algebra, geometry, calculus, and probability.

Title
Origin and Nature of Mathematics

Tags
205100, 0

Learning Outcome
Students understand and can describe the major approaches—cultural, philosophical, and psychological—to explaining the origin and nature of mathematics and its relation to understanding and modeling the physical world.

Title
Historical Periods and Contributions

Tags
205125, 1

Learning Outcome
Students understand and can describe the major historical periods of development of mathematical thought, as well as the contributions of various cultures and individuals within those periods.

Title
Social Contexts of Mathematics

Tags
207317, 3

Learning Outcome
Students recognize that mathematics and mathematical practices are human constructs that are socially situated and malleable across different social contexts. Students understand current school mathematics privileges certain mathematics (i.e. White European male) over other kinds of mathematics.

MTHED 301 - Teaching Statistics and Probability

Course Information

Teaching Area (new)
MTHED

Course Number
301

Teaching Area
MTHED

Course Title
Teaching Statistics and Probability

Course Description
Exploration of important conceptual underpinnings, common misconceptions and students' ways of thinking, appropriate use of technology, and instructional practices to support and assess the learning of probability and statistics.

Department
Mathematics Education

When Taught
Fall and Winter

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Simple Requisites

Prerequisites

Type
Prerequisite

Prerequisites

Complete ALL of the following Courses:

- MTHED 177 - Critical Review of School Mathematics
  AND STAT 121 - Introduction to Statistical Data Analysis

Recommended
MthEd 276

Note
A score of 5 on the AP Statistics Exam may substitute for the Stat 121 prerequisite.

Learning Outcomes

Title
Designing a Study and Sampling

Tags
205138, 1

Learning Outcome
Students understand the advantages and disadvantages of study design and sampling design so that they can design an empirical study to effectively answer research questions.

Title
Summarizing and Representing

Tags
205139, 2

Learning Outcome
Students can evaluate and justify the use of different measures of central tendency, different measures of dispersion and different data representations depending on the nature of the data and purpose of the measure or representation.

Title
Testing Claims and Drawing Conclusions

Tags
205140, 3

Learning Outcome
Students can explain the underlying ideas of various statistical tests, articulate how real-world questions relate to these tests, explain how these tests are used to make claims, predictions, and conclusions, and identify common misconceptions or theoretical issues in interpreting the results of these tests.

Title
Probability

Tags
205141, 4

Learning Outcome
Students can identify probabilistic situations, model probabilistic situations using multiple representations, understand and calculate theoretical and empirical probabilities, identify common misconceptions about probability, and predict and explain the shape of sampling distributions given population distributions.

Title
Student Statistical Thinking

Tags
205142, 5

Learning Outcome
Students are familiar with K-12 students' initial conceptions and misconceptions of probability and statistical concepts and know many instructional principles and strategies to help students overcome misconceptions and to develop robust concepts in these fields.

Title
Probability and Statistics for Social Justice

Tags
207318, 6

Learning Outcome
Students understand the ways that statistics have been used to support or suppress a socially just society as well as why an understanding of statistics and probability is essential in every day life. Students use probabilistic and statistical reasoning to investigate social issues and identify inequities.

MTHED 305 - Basic Concepts of Mathematics

Course Information

Teaching Area (new)
MTHED

Course Number
305

Teaching Area
MTHED

Course Title
Basic Concepts of Mathematics

Course Description
Concept-oriented exploration of counting, number, and operations in relation to children's learning.

Department
Mathematics Education

When Taught
Fall, Winter, Spring

Credit Hours

Min:
2

Fixed/Max:
2

Lecture Hours

- MTHED 276 - Exploration of Mathematics Teaching

OR

Prerequisites

Complete ALL of the following Courses:

- MTHED 277 - Task Design for Student Learning

Learning Outcomes

Title
Mathematics

Tags
205064, 0

Learning Outcome
Students have a deep understanding of select central concepts in secondary mathematics as well as core representations, canonical examples, and alternative algorithms germane to teaching these select concepts.

Title
Instructional Design and Technology

Tags
205084, 3

Learning Outcome
Students understand the affordances and constraints of technology in teaching mathematics and can apply this knowledge to design learning opportunities involving the use of technology to support adolescents' mathematical learning.

Title
Mathematical Exploration with Technology

Tags
205091, 1

Learning Outcome
Students can use technology to engage in meaningful mathematical exploration and can reflect on their own learning to make inferences about how adolescents learn mathematics with technology.

Title
Mathematical Communication

Tags
205135, 2

Learning Outcome
Students can articulate and represent their mathematical thinking in technological environments in ways that are appropriate for their intended audience.

Title
Equitable Technology Use

Tags
207319, 4

Learning Outcome
Students understand the ways in which technology and access to technology can both increase and decrease opportunities for diverse learners.

MTHED 362 - Survey of Geometry

Course Information

Teaching Area (new)
MTHED

Course Number
362

Teaching Area
MTHED

Course Title
Survey of Geometry

Course Description
Logical and historical development of Euclidean and non-Euclidean geometry, transformations and symmetry; relationships among axiomatic systems; use of software and other geometric models; proofs and Van Hiele levels.

Department
Mathematics Education

When Taught
Fall, Winter, Spring

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Simple Requisites

Prerequisites

Type
Prerequisite

Prerequisites

Complete ALL of the following Courses:

- MATH 290 - Fundamentals of Mathematics

Learning Outcomes

Title
Understanding What and Who Mathematics Privileges

Tags
207320, 1

Learning Outcome
Students describe the affordances and constraints of an axiomatic approach to doing mathematics and recognize that an axiomatic approach is just one way to do mathematics. Students understand that who counts as a mathematician is dependent on the ways in which mathematics is defined and recognize who has privileges associated with the status of "mathematician."

MTHED 377 - Mathematics Teaching in the Public Schools

Course Information

Teaching Area (new)
MTHED

Course Number
377

Teaching Area
MTHED

Course Title
Mathematics Teaching in the Public Schools

Course Description
Developing skill in designing and implementing lesson plans that include high-cognitive demand tasks; anticipating, monitoring, and building on student mathematical thinking; and orchestrating mathematical discussions that lead to student understanding of fundamental mathematics concepts.

Department
Mathematics Education

When Taught
Fall and Winter

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
2

Simple Requisites

Prerequisites

Type
Prerequisite

Prerequisites

Complete ALL of the following Courses:

- MTHED 277 - Task Design for Student Learning
  AND MTHED 278 - Assessment of Student Learning

Other Prerequisites
Departmental consent

Note

Contact the department undergraduate coordinator, Dan Siebert (dsiebert@mathed.byu.edu), to get permission to add this course.

Learning Outcomes

Title
Mathematics

Tags
205035, 1

Learning Outcome
Students understand the central concepts, tools of inquiry, and structures of the discipline of mathematics as well as core representations, canonical examples, and alternative algorithms germane to teaching secondary school mathematics.

Title
Task Analysis and Design

Tags
205036, 2

Learning Outcome
Students can analyze a task, a section in a textbook or curricular unit, or a specific mathematical topic to identify and describe the related important mathematical concepts and procedures, and can design relevant tasks that foster conceptual understanding, procedural fluency, and authentic mathematical practices.

Title
Developing Lesson Plans

Tags
205037, 3

Learning Outcome
Students understand how to create lesson plans that involve meaningful tasks in the context of a given unit, that anticipate student thinking and how the lesson might build on that thinking, and that articulate how they will orchestrate each phase of the lesson (launch, explore, discuss, unpack).

Title
Orchestrating Lessons

Tags
205038, 4

Learning Outcome
Students can use their lesson plans to engage adolescents in the day's activities (launch), facilitate meaningful exploration of mathematics (explore), orchestrate discussion that builds on and extends adolescents' emerging mathematical conceptions (discuss) and ensure the important mathematical concepts and procedures related to the goals of the lesson are made explicit (unpack).

Title
Assessing Mathematical Learning

Tags
205039, 5

Learning Outcome
Students understand how to design and use formative assessment that monitors the learner's progress, informs instructional decisions, and engages adolescents in assessing their own mathematical learning.

Title
Professionalism

Tags
205040, 6

Learning Outcome
Students demonstrate their professionalism through maintaining appropriate relationships and behavior in the MthEd 377 classroom setting; improving practice through reflection and by providing, soliciting and incorporating feedback; and contributing to the professional learning community of the classroom.

Title
Teaching Mathematics for Social Justice

Tags
207321, 7

Learning Outcome
Students understand how to provide adolescents with opportunities to use mathematics to promote a socially just society and can modify learning materials to promote access for a wide range of adolescent identities.

MTHED 378 - Practicum in Mathematics Education

Course Information

Teaching Area (new)
MTHED

Course Number
378

Teaching Area
MTHED

Course Title
Practicum in Mathematics Education

Course Description
Observing secondary mathematics classrooms as a means of reflecting on teaching practices that support student learning of fundamental mathematical concepts, including use of high-cognitive demand tasks and orchestration of mathematical discussions as well as eliciting, making sense of, and building on student mathematical thinking.

Department
Mathematics Education

When Taught
Fall and Winter

Credit Hours

Min:
1

Fixed/Max:
1

Lecture Hours

Fixed:
0

Lab Hours

Fixed:
3

Other Prerequisites
Concurrent enrollment in MthEd 377

Learning Outcomes

Title
Instructional Design for Mathematics Learning

Tags
205041, 2

Learning Outcome
Students understand how to design learning environments and mathematical experiences that engage all adolescents in the exploration and development of mathematical ideas, as well as how to effectively foster these environments and orchestrate these experiences by promoting conceptual understanding, procedural fluency, and authentic mathematical practices.

Title
Analyzing Classroom Instruction

Tags
205042, 3

Learning Outcome
Students can analyze and describe the mathematical experiences of adolescents in terms of the tasks, discourse and learning environments they observe in public school classrooms, and can reconcile the theoretical principles of their university experience with the reality of a secondary classroom.

Title
Professionalism

Tags
205043, 4

Learning Outcome
Students demonstrate their professionalism through maintaining appropriate relationships and behavior in the school setting, and improve their practice through reflection and by providing, soliciting and incorporating feedback.

Title
Understanding of Mathematics Learners

Tags
205110, 0

Learning Outcome
Students understand that adolescents develop mathematical knowledge by building on prior knowledge and experience; that adolescents differ cognitively, linguistically, socially, emotionally, and physically; and that adolescents learn best when given regular opportunities to reason about and make sense of mathematics in an environment of high expectations and strong support.

Title
Examining Privilege and Oppression in Mathematics Classes

Tags
207322, 5

Learning Outcome
Students identify and influence the mathematical and social positions held by each adolescent in a particular classroom. Students will recognize how systemic oppression and privilege is evident in mathematics classrooms and examine their own teaching to identify practices that privilege or oppress individual adolescents.

MTHED 476 - Secondary Student Teaching in Mathematics

Teaching Area (new)
MTHED

Course Number
476

Teaching Area
MTHED

Course Title
Secondary Student Teaching in Mathematics

Course Description
Capstone, field-based, semester-long experience in teaching mathematics to secondary students; demonstrating proficiency in all program standards. Seminar required.

Department
Mathematics Education

When Taught
Fall and Winter

Credit Hours

Min:
12

Fixed/Max:
12

Other Prerequisites
Completion of all course work or departmental approval. FBI fingerprint and background clearance.

Learning Outcomes

Title
Student Teaching

Tags
205145, 1

Learning Outcome

Mathematics
Students understand the central concepts, tools of inquiry, and structures of the discipline of mathematics as well as core representations, canonical examples, and alternative algorithms germane to teaching secondary school mathematics.
Understanding of Mathematics Learners
Students understand that adolescents develop mathematical knowledge by building on prior knowledge and experience; that adolescents differ cognitively, linguistically, socially, emotionally, and physically; and that adolescents learn best when given regular opportunities to reason about and make sense of mathematics in an environment of high expectations and strong support.
Instructional Design for Mathematics Learning
Students understand how to design learning environments and mathematical experiences that engage all adolescents in the exploration and development of mathematical ideas, as well as how to effectively foster these environments and orchestrate these experiences by promoting conceptual understanding, procedural fluency, and authentic mathematical practices.
Assessment of Mathematics Learning
Students understand how to design and use formative and summative assessments that monitor the learner's progress, inform instructional decisions, and engage adolescents in assessing their own mathematical learning.
Professionalism
Students demonstrate their professionalism through maintaining appropriate relationships and behavior in the school setting, and by seeking opportunities to improve practice and advance the profession through reflecting on practice, soliciting and incorporating feedback, and contributing to professional, school, and community organizations.
Spiritual StewardshipStudents seek integrity between their personal and professional lives consistent with the restored gospel of Jesus Christ by recognizing all learners as children of God and striving to nurture their divine potential; applying gospel-centered principles of teaching and learning to family relationships, gospel service, and involvement in the community; and serving as examples of a Christ-centered life within their spheres of influence.

MTHED 477R - Secondary Minor Student Teaching

Learning Outcomes

Title
Knowledge

Tags
205143, 1

Learning Outcome
Students will deepen their understanding of readings math education.

Title
Developing Professionalism

Tags
205083, 2

Learning Outcome
Students recognize that there is an extensive body of literature on the learning and teaching of mathematics; can identify important authors, papers, issues, findings, theories, and limitations in a subfield of the literature; and recognize and value the need to remain current with developments in the field of mathematics education.

Title
Applying Knowledge of Mathematics Education

Tags
205136, 1

Learning Outcome
Students have a deeper understanding of important issues and/or research in the field of mathematics education, and can use this new understanding to reevaluate their past and present experiences in mathematics classrooms, make connections to other important issues and problems in mathematics education, function more effectively in their role as an undergraduate research assistant, and/or reimagine their future experiences as a mathematics teacher.

MTHED 496 - Academic Internship: Secondary Mathematics Education

Course Information

Teaching Area (new)
MTHED

Course Number
496

Teaching Area
MTHED

Course Title
Academic Internship: Secondary Mathematics Education

Course Description
Capstone, field-based, semester-long experience in teaching mathematics to secondary students; demonstrating proficiency in all program standards. Seminar required.

Department
Mathematics Education

When Taught
Fall

Credit Hours

Min:
12

Fixed/Max:
12

Other Prerequisites
Completion of all course work or departmental approval. FBI fingerprint and background check.

Note
An APPROVED Internship Application is required before adding.

Learning Outcomes

Title
Course Outcomes

Tags
205146, 1

Learning Outcome
Mathematics
Students understand the central concepts, tools of inquiry, and structures of the discipline of mathematics as well as core representations, canonical examples, and alternative algorithms germane to teaching secondary school mathematics.
Understanding of Mathematics Learners
Students understand that adolescents develop mathematical knowledge by building on prior knowledge and experience; that adolescents differ cognitively, linguistically, socially, emotionally, and physically; and that adolescents learn best when given regular opportunities to reason about and make sense of mathematics in an environment of high expectations and strong support.
Instructional Design for Mathematics Learning
Students understand how to design learning environments and mathematical experiences that engage all adolescents in the exploration and development of mathematical ideas, as well as how to effectively foster these environments and orchestrate these experiences by promoting conceptual understanding, procedural fluency, and authentic mathematical practices.
Assessment of Mathematics Learning
Students understand how to design and use formative and summative assessments that monitor the learner's progress, inform instructional decisions, and engage adolescents in assessing their own mathematical learning.
Professionalism
Students demonstrate their professionalism through maintaining appropriate relationships and behavior in the school setting, and by seeking opportunities to improve practice and advance the profession through reflecting on practice, soliciting and incorporating feedback, and contributing to professional, school, and community organizations.
Spiritual StewardshipStudents seek integrity between their personal and professional lives consistent with the restored gospel of Jesus Christ by recognizing all learners as children of God and striving to nurture their divine potential; applying gospel-centered principles of teaching and learning to family relationships, gospel service, and involvement in the community; and serving as examples of a Christ-centered life within their spheres of influence.

MTHED 497R - Research in Mathematics Education

Course Information

Teaching Area (new)
MTHED

Course Number
497R

Teaching Area
MTHED

Course Title
Research in Mathematics Education

Course Description
Undergraduate research experience. Faculty-supervised research. Written and oral presentation of findings required.

Department
Mathematics Education

When Taught
Contact Department

Credit Hours

Min:
1

Fixed/Max:
3

Lecture Hours

Fixed:
0

Recommended
MthEd 177, 276, and 277

Learning Outcomes

Title
Engaging in Research

Tags
205074, 0

Learning Outcome
Students have a deeper understanding of the nature, design, and methods of research in the field of mathematics education; can make valuable contributions under limited supervision to the data collection and/or data analysis stages of faculty-directed mathematics education research; and can communicate their understanding of research in general, as well as of this specific research, through a scholarly oral or written report.

Title
Relating to Research

Tags
205105, 2

Learning Outcome
Students can identify their personal strengths and weaknesses in regards to conducting research in mathematics education, and have a sense for whether or not they would like to pursue more research opportunities through graduate study.

Title
Applying Understanding from Research

Tags
205113, 1

Learning Outcome
Students have a deeper understanding of a key issue or problem in the field of mathematics education, and can use this new understanding to reevaluate their past and present experiences in mathematics classrooms, make connections to other important issues and problems in mathematics education, function more effectively in their role as an undergraduate research assistant, and/or reimagine their future experiences as a mathematics teacher.

MTHED 500 - (MthEd-Chem-C S-Geol-Math-Phscs-Stat) Business Practices for Science and Mathematics Majors

Other Prerequisites
Strong background in undergraduate mathematics; instructor's consent

Learning Outcomes

Title
Problem Solving as a Process

Tags
205055, 2

Learning Outcome
Students understand general approaches to and a variety of heuristics in the problem solving process and can apply these to solve various problems in mathematics as well as other areas of life.

Title
Professionalism

Tags
205065, 4

Learning Outcome
Students recognize the key role that problem solving plays in the field of mathematics as well as in the learning of school mathematics. They see the valuable insights provided by the literature on the teaching and learning of mathematics through problem solving, and feel a desire to continually seek opportunities to improve their ability to teach mathematics through problem solving and promote better instruction in schools by incorporating problem solving as a process for learning mathematics.

Title
Spiritual Stewardship

Tags
205093, 5

Learning Outcome
Students strive to follow the example of Jesus Christ in both their personal and professional lives, seek consistency between their understanding of our trials here on earth as related to the restored gospel of Jesus Christ and principles of mathematical problem solving processes. Graduates use this enriched understanding problem solving as a method for teaching and learning mathematics by giving all students the agency and opportunity to solve mathematical problems on their own.

Title
Scholarship in Problem Solving

Tags
205116, 0

Learning Outcome
Students understand and can evaluate important issues, current and historical trends, theories, paradigms of research, and research findings in the field of mathematical problem solving, as well as their implications for the teaching and learning of problem solving explicitly and implicitly in the public schools, mathematics teacher development, and participation in mathematics education scholarship.

Title
Critical Stance

Tags
205123, 1

Learning Outcome
Students can apply principles of quality research to analyze and critique research on the mathematical process of problem solving, and understand the affordances and constraints of research paradigms and methodologies in this body of research.

Title
Teaching Through Problem Solving

Tags
205133, 3

Learning Outcome
Students understand the pitfalls of teaching problem solving as a distinct content area of mathematics and the benefits of using problem solving as a process in the teaching of all mathematics. They understand how to design instruction to teach mathematics through problem solving.

MTHED 562 - Euclidean Geometry: Content, Learning, and Teaching

Course Information

Teaching Area (new)
MTHED

Course Number
562

Teaching Area
MTHED

Course Title
Euclidean Geometry: Content, Learning, and Teaching

Course Description
Euclidean geometry, including classical problems, polyhedra, transformations, congruence, similarity, integer geometry, minimization; technology in geometry, Van Hiele levels, role of proof, and high school curriculum.

Department
Mathematics Education

When Taught
Contact Department

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Other Prerequisites
MthEd 362 or equivalent

Learning Outcomes

Title
Critical Stance

Tags
205053, 1

Learning Outcome
Students can apply principles of quality research to analyze and critique research on the teaching and learning of geometry, and understand the affordances and constraints of research paradigms and methodologies in this body of research.

Title
Scholarship

Tags
205062, 0

Learning Outcome
Students understand and can evaluate the role of proof in geometry and in mathematics in general, the theories of how students progress through the van Hiele levels in learning geometry and how these two topics are related. They can use this knowledge to evaluate current instructional, curricular, and policy recommendations of leaders in mathematics education regrading the teaching of geometry in the public schools.

Title
Professionalism

Tags
205081, 4

Learning Outcome
Students recognize the key role that geometry should play in school mathematics and the valuable insights provided by the literature on the teaching and learning of geometry, and feel a desire to continually seek opportunities to improve their own teaching of geometry and promote better instruction of geometry in the schools by seeking to adapt the instruction to the van Hiele level of the students.

Title
Spiritual Stewardship

Tags
205085, 5

Learning Outcome
Students strive to follow the example of Jesus Christ in both their personal and professional lives, seek consistency between their understanding of the restored gospel of Jesus Christ and principles of geometry teaching and learning, and use this enriched understanding of teaching and learning to nurture the divine potential of all in their spheres of influence.

Title
Euclidean Geometry

Tags
205088, 2

Learning Outcome
Students understand the central concepts, conditions, definitions, theorems, assumptions, structure and extensions of high school (Euclidean) geometry. They can use these understandings to prove general cases of geometric theorems and apply these theorems to solve problems in Euclidean geometry.

Title
Teaching

Tags
205129, 3

Learning Outcome
Students can assess the van Hiele level at which their students are operating and design tasks and lessons to move learners to a higher van Hiele level, eventually to the level of deduction and proof. Throughout the instruction at different van Hiele levels, students can continually evaluate the role that proof is playing for the learners and understand how to adjust their instruction to ensure that proof activities are meaningful. Students can use their knowledge of the van Hiele levels, proof, and the NCTM Standards to evaluate geometry curriculum for appropriate sequencing.

MTHED 590 - Foundational Issues in Learning Mathematics

Course Information

Teaching Area (new)
MTHED

Course Number
590

Teaching Area
MTHED

Course Title
Foundational Issues in Learning Mathematics

Course Description
Introduction to research in mathematics learning; mathematical thinking; cognitive, social, and philosophical approaches to describing mathematics learning.

Department
Mathematics Education

When Taught
Fall

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Other Prerequisites
Teaching certificate or completion of student teaching

Learning Outcomes

Title
Scholarship

Tags
205061, 0

Learning Outcome
Students understand and can evaluate important issues, trends, theories, paradigms of research, and research findings in the field of mathematics education, as well as their implications for the teaching and learning of mathematics in the public schools, mathematics teacher development, and participation in mathematics education scholarship.

Title
Identifying and Situating Research Problems

Tags
205063, 1

Learning Outcome
Students understand the importance of situating research problems and questions in the literature, and can identify important research problems and relate them to appropriate issues, trends, theories, paradigms, and findings in the literature.

Title
Becoming a Professional

Tags
205070, 3

Learning Outcome
Students perceive themselves as emerging scholars and leaders in the field, and feel responsibility for and commitment to their own growth and the growth of the field.

Title
Spiritual Stewardship

Tags
205073, 4

Learning Outcome
Students strive to follow the example of Jesus Christ in both their personal and professional lives, seek consistency between their understanding of the restored gospel of Jesus Christ and principles of mathematics teaching and learning, and use this enriched understanding of teaching and learning to nurture the divine potential of all in their spheres of influence.

Title
Applying Scholarship to Teaching

Tags
205082, 2

Learning Outcome
Students can use their understanding of the important issues, trends, theories, paradigms, and findings in the field of mathematics to evaluate, reflect on, and improve their mathematics instruction.

Complete ALL of the following Courses:

- MTHED 590 - Foundational Issues in Learning Mathematics

Learning Outcomes

Title
Applying Research to Teaching

Tags
205048, 3

Learning Outcome
Students understand how to meaningfully apply research on teaching and learning mathematics in their teaching and use scholarly inquiry as a lens to reflect on that teaching.

Title
Spiritual Stewardship

Tags
205049, 5

Learning Outcome
Students strive to follow the example of Jesus Christ in both their personal and professional lives, seek consistency between their understanding of the restored gospel of Jesus Christ and principles of mathematics teaching and learning studied in this course, and use this enriched understanding of teaching and learning to nurture the divine potential of all in their spheres of influence.

Title
Scholarship

Tags
205050, 0

Learning Outcome
Students understand and can evaluate important issues, trends, theories, paradigms of research, and research findings in the field of mathematics education, as well as their implications for the teaching and learning of mathematics in the public schools, mathematics teacher development, and participation in mathematics education scholarship.

Title
Research

Tags
205052, 1

Learning Outcome
Graduates understand research methods in mathematics education and can a) locate an interesting and important problem; b) conduct a literature review to situate the problem; c) develop a conceptual framework; d) establish focused research questions; e) choose and implement appropriate methods for collecting and analyzing data; f) address issues of research quality such as validity, reliability, and significance; and g) effectively communicate their work both orally and in writing.

Title
Critical Stance

Tags
205077, 2

Learning Outcome
Students understand the affordances and constraints of research paradigms and methodologies commonly used in mathematics education research and can analyze and critique research on teaching and learning mathematics according to principles of quality research.

Title
Professionalism

Tags
205097, 4

Learning Outcome
Students have developed knowledge and beliefs that enable and compel them to continually seek opportunities to improve their own practice, keep abreast of advances and developments in the field both locally and nationally, and provide leadership in professional, school, and community organizations.

MTHED 598R - Topics in Mathematics Education

Title
Spiritual Stewardship

Tags
205087, 5

Learning Outcome
Students strive to follow the example of Jesus Christ in both their personal and professional lives, seek consistency between their understanding of the restored gospel of Jesus Christ and principles of mathematics teaching and learning studied in this course, and use this enriched understanding of teaching and learning to nurture the divine potential of all in their spheres of influence.

Title
Teaching

Tags
205089, 3

Learning Outcome
Students can use their understanding of the research on the topic of study to evaluate, reflect on, and improve their own teaching.

Title
Scholarship

Tags
205107, 0

Learning Outcome
Students understand and can evaluate important issues, trends, theories, paradigms of research, and research findings in the field of mathematics education related to the particular topic of study, as well as their implications for the teaching and learning of mathematics in the public schools, mathematics teacher development, and/or participation in mathematics education scholarship.

Title
Mathematics

Tags
205114, 2

Learning Outcome
Students understand mathematical content that illustrates important issues in the research on the topic of study.

Title
Critical Stance

Tags
205118, 1

Learning Outcome
Students can apply principles of quality research to analyze and critique research on the topic of study, and understand the affordances and constraints of research paradigms and methodologies in this body of research.

Title
Professionalism

Tags
205127, 4

Learning Outcome
Students recognize the key role that the topic of study plays in the learning and teaching of mathematics, and feel a desireto continually seek opportunities to improve their own practice, keep abreast of advances and developments in the field both locally and nationally, and/or provide leadership in professional, school, and community organizations.

MUSIC 100 - Music Fundamentals

Course Information

Teaching Area (new)
MUSIC

Course Number
100

Teaching Area
MUSIC

Course Title
Music Fundamentals

Course Description
Organizational systems of music, their notation and aural patterns.

Department
Music

When Taught
Fall and Winter

Credit Hours

Min:
2

Fixed/Max:
2

Lecture Hours

Fixed:
2

Lab Hours

Fixed:
0

Other Prerequisites
Nonmusic major status

Note
Required for music minor.

Learning Outcomes

Title
Music Fundamentals

Tags
187924, 0

Learning Outcome
Students will learn the fundamentals of music theory and harmony. This course also helps prepare them for the music major aural skills test.

MUSIC 101 - Introduction to Music

Course Information

Teaching Area (new)
MUSIC

Course Number
101

Teaching Area
MUSIC

Course Title
Introduction to Music

Course Description
Designed to aid nonmusic majors in developing skills needed for listening to music creatively. Emphasis on masterworks of Western music from major style periods.

Department
Music

When Taught
Fall; Winter; Spring.

Credit Hours

Min:
3

Fixed/Max:
3

Lecture Hours

Fixed:
3

Lab Hours

Fixed:
0

Other Prerequisites
Nonmusic major status

Note
Additional seats for specific sections may be available to Freshman Mentoring participants through envelopes. Also offered by BYU Independent Study; enroll anytime throughout year; one year to complete; additional tuition required; register at is.byu.edu.

Learning Outcomes

Title
Intro to Music

Tags
187857, 0

Learning Outcome

By listening to music, learning about the historical development of music, learning about its composers, participating in in-class discussions, attending concerts, and by acquiring a vocabulary and knowledge of music terms and concepts, students will be capable of identifying practically any piece of classical music by time period and genre. Students will also possess a much greater understanding of musical forms, genres and styles.

MUSIC 111R - Basic Vocal Skills

Course Information

Teaching Area (new)
MUSIC

Course Number
111R

Teaching Area
MUSIC

Course Title
Basic Vocal Skills

Course Description
Class instruction in voice for nonmusic majors.

Department
Music

When Taught
All Semesters/Terms

Credit Hours

Min:
2

Fixed/Max:
2

Lecture Hours

Fixed:
2

Lab Hours

Fixed:
0

Note
Accompanist fee not included.

Learning Outcomes

Title
Performance

Tags
187686, 0

Learning Outcome
Students will prepare four songs and perform memorized a minimum of three times throughout the semester.

Title
Vocal Technique

Tags
187827, 1

Learning Outcome
Students will learn to understand the structure and function of the vocal instrument through: flexibly aligned posture; low, flexible breath management; consistent, projected flow phonation; freedom of vocal mechanism, including mouth and jaw; emerging resonance; emerging musicianship -- including dynamics, legato, accuracy; text and diction.

MUSIC 113 - Beginning Piano Techniques 1

Course Information

Teaching Area (new)
MUSIC

Course Number
113

Teaching Area
MUSIC

Course Title
Beginning Piano Techniques 1

Course Description
Class instruction in piano for nonmusic majors.

Department
Music

When Taught
Fall, Winter, Spring

Credit Hours

Min:
2

Fixed/Max:
2

Lecture Hours

Fixed:
2

Lab Hours

Fixed:
0

Note
Also offered by BYU Independent Study; enroll anytime throughout year; one year to complete; additional tuition required; register at is.byu.edu.

Learning Outcomes

Title
Technique

Tags
187642, 2

Learning Outcome
Students will be able to play technical exercises such as the Five Finger Position, major and minor triads, major and minor sales and major and minor cadences.

Title
Accompaniment Skills

Tags
187654, 1

Learning Outcome
Students will be able to play chords in blocked and broken positions and use them to accompany melodies.

Title
Music Theory

Tags
187702, 0

Learning Outcome
Students will understand basic concepts of music theory including related terms and symbols, note and key names, key signatures and time signatures, and counting.

Title
Improvisation

Tags
187803, 3

Learning Outcome
Students will be able to improvise simple melodies and play chords with them.

Title
Rehearsal parts

Tags
187843, 6

Learning Outcome
Students will be able to play individual part of ensembles.

Title
Sight Reading

Tags
187870, 4

Learning Outcome
Students will sight read easier music.

Title
Musicality

Tags
187919, 5

Learning Outcome
Students will play repertoire pieces as assigned with all dynamics and articulations.

MUSIC 114R - Beginning Piano Techniques 2

Course Information

Teaching Area (new)
MUSIC

Course Number
114R

Teaching Area
MUSIC

Course Title
Beginning Piano Techniques 2

Course Description
Continuation of Music 113.

Department
Music

When Taught
Fall, Winter, Spring

Credit Hours

Min:
2

Fixed/Max:
2

Lecture Hours

Fixed:
2

Lab Hours

Fixed:
0

Other Prerequisites
Music 113 or instructor's consent

Note
Also offered by BYU Independent Study; enroll anytime throughout year; one year to complete; additional tuition required; register at is.byu.edu.

Learning Outcomes

Title
114R

Tags
187863, 0

Learning Outcome

Students will be able to:

Understand concepts of music theory including triads and inversions and the quality of seventh chords, sixteenth notes and other rhythms.

Title
Sight Reading

Tags
188002, 4

Learning Outcome

Sight read easier music.

Title
Improvising

Tags
188003, 3

Learning Outcome

Improvise simple melodies and play triads and seventh chords with them.

Title
Scales and Arpeggios

Tags
188004, 2

Learning Outcome

Be able to play technical exercises such as major and minor scales and arpeggios.

Title
Triads

Tags
188005, 1

Learning Outcome

Be able to play triads, triad inversions and seventh chords in blocked and broken positions and use them to accompany melodies.

Title
Performance

Tags
188006, 7

Learning Outcome

Play individual parts of ensembles fluently.

Title
Dynamics and Articulations

Tags
188007, 6

Learning Outcome

Play repertoire pieces as assigned with all dynamics and articulations.

Title
Style Characteristics

Tags
188008, 5

Learning Outcome

Understand and be able to discuss the style characteristics of composers and music from the four standard periods of music.

MUSIC 115 - Basic Organ Skills

Course Information

Teaching Area (new)
MUSIC

Course Number
115

Teaching Area
MUSIC

Course Title
Basic Organ Skills

Course Description
Class instruction in organ for nonmusic majors.

Department
Music

When Taught
Fall, Winter, Spring

Credit Hours

Min:
2

Fixed/Max:
2

Lecture Hours

Fixed:
2

Lab Hours

Fixed:
0

Learning Outcomes

Title
Repertoire

Tags
187629, 5

Learning Outcome
To experience (primarily through listening) a wide range of organ repertoire with three main goals: 1) identify registrational characteristics, 2) identify pieces of interest for future learning, and 3) distinguish between that which might be appropriate for worship and that which is appropriate for concert use.

Title
Hymn Playing

Tags
187638, 0

Learning Outcome
Students will be able to prepare and play four-part hymns to a high standard.

Title
Listen

Tags
187644, 2

Learning Outcome
Students will be able to listen in both practice and performance for perfect legato, precise releases, and independence of line.

Title
Technique

Tags
187647, 3

Learning Outcome
Students will be able to use the standard legato manual and pedal techniques fluently, and to play simple pedal parts in combination with elementary manual parts.

Title
Registration

Tags
187726, 1

Learning Outcome
Students will be able to know and apply basic principles of organ registration and construction.

Title
Practice

Tags
188273, 4

Learning Outcome
Students will learn to use efficient practice techniques.

MUSIC 116R - Organ Techniques and Literature

Course Information

Teaching Area (new)
MUSIC

Course Number
116R

Teaching Area
MUSIC

Course Title
Organ Techniques and Literature

Course Description
Continuation of Music 115.

Department
Music

When Taught
Fall and Winter

Credit Hours

Min:
2

Fixed/Max:
2

Lecture Hours

Fixed:
2

Lab Hours

Fixed:
0

Other Prerequisites
Music 115 or instructor's consent

Learning Outcomes

Title
Practice techniques

Tags
187603, 6

Learning Outcome
Cultivate more efficient practice techniques.

Title
Registration

Tags
187608, 2

Learning Outcome
Understand and apply more advanced principles of organ registration.

Title
Technique

Tags
187618, 4

Learning Outcome
Develop fluency in manual techniques, including finger independence, redistribution, finger crossings, glissando, and substitution; and develop greater fluency in pedal playing.

Title
Expression

Tags
187675, 3

Learning Outcome
Understand basics of touch, phrasing and articulation, and to know how to utilize them to enhance the expressiveness of a piece of music.

Title
Repertoire

Tags
187741, 1

Learning Outcome
Learn at least two organ pieces this semester. Also, experience a wide range of organ repertoire with four main goals: associate selected organ masterworks with their respective composers, regions, and time periods; identify registrational characteristics; identify pieces of interest for future learning; and distinguish between that which might be appropriate for worship and that which is appropriate for concert use.

Title
Accompanying

Tags
187760, 5

Learning Outcome
Develop basic accompanying skills on the organ.

Title
Hymn Playing

Tags
187954, 0

Learning Outcome
Understand and be able to employ various advanced hymn playing techniques.

MUSIC 117 - Basic Guitar Skills

Course Information

Teaching Area (new)
MUSIC

Course Number
117

Learning Outcomes

Title
118R

Tags
187793, 0

Learning Outcome
Building upon Music 117, students will hone their basic guitar skills to an intermediate level of self-accompaniment.

MUSIC 123 - Harp Preparation for Large Ensemble

Course Information

Course Number
123

Teaching Area
MUSIC

Course Title
Harp Preparation for Large Ensemble

Course Description
Develop skills necessary to play harp in a large ensemble.

Department
Music

When Taught
Fall

Credit Hours

Fixed/Max:
1

Lecture Hours

Fixed:
1

Learning Outcomes

Title
Preparation

Tags
214114, 0, 1, 2023-08-29 11:10:07

Learning Outcome
Students will be able to competently prepare their parts for large ensemble rehearsals.

Title
Communication

Tags
214115, 0, 2, 2023-08-29 11:10:08

Learning Outcome
Students will be able to professionally communicate with the large ensemble director and other members of the ensemble.

Title
Students will be able to perform with a high level of musicianship as part of their large ensemble. Title

Career Options

Tags
187693, 1

Learning Outcome
Students will become acquainted with possible career options in musiceducation, and will examine the joys, demand, benefits, and potential hazards inherent in each option. They will also identify critical personal attributes and skills necessary for success in each option.

MUSIC 184 - Improvisation

Course Information

Course Number
184

Teaching Area
MUSIC

Course Title
Improvisation

Course Description
A general introduction to style-neutral musical improvisation.

Department
Music

When Taught
Fall and Winter

Credit Hours

Min:
1

Fixed/Max:
1

Lecture Hours

Fixed:
1

Other Prerequisites
Music major status, pre-music major status, or instructor approval

Learning Outcomes

Title
Solo Improvisation

Learning Outcome
Students will be able to improvise music on their instrument or voice with or without a prompt.

Title
Collaborative Improvisation

Learning Outcome
Students will be able to improvise collaboratively with other musicians.

Title
Expression

Learning Outcome
Students will become more expressive and creative in all of their music-making activities.

Title
Confidence

Learning Outcome
Students will gain skills to overcome performance anxiety with regard to improvisation.

Title
Performance Challenges

Learning Outcome
Students will be able to respond creatively to performance challenges (such as mistakes or mishaps) in real time.

Title
Fluency

Learning Outcome
Students will become more fluent as creators / composers.

MUSIC 186 - Songwriting 1

Course Information

Teaching Area (new)
MUSIC

Course Number
186

Teaching Area
MUSIC

Course Title
Songwriting 1

Course Description
Songwriting for present-day music publishing industry; basic songwriting theory; form, content, and style.

Department
Music

When Taught
Fall and Winter

Credit Hours

Min:
2

Fixed/Max:
2

Lecture Hours

Fixed:
2

Lab Hours

Fixed:
0

Other Prerequisites
Basic music reading and keyboard skills

Learning Outcomes

Title
Songwriting

Tags
187685, 1

Learning Outcome
Students study such topics as creativity itself, writing techniques, and the importance of collaboration. By the end of the semester each student will have completed several preparatory assignments in addition to a culminating creative song project. The students will receive an introduction to a working MIDI-technology studio. Parallel to these assignments are readings about the models of the music business: music publishing, record labels, legal concepts, the copyright law, etc. Quizzes and a final exam measure retention of these concepts. Students who master the principles advanced will be able to function creatively and to manage others involved in the creation of commercial songs.

Learning Outcome
Students will be able to accurately transcribe diatonic melodies that contain large leaps and diatonic arpeggiations.

Title
Harmonic dictation

Tags
212134, 0, 2

Learning Outcome
Students will be able to accurately transcribe the outer voices and identify the harmonies in diatonic chord progressions.

Title
Rhythmic dictation

Tags
212135, 0, 3

Learning Outcome
Students will be able to accurately transcribe rhythms involving sextuple division, syncopation, and less common beat values.

Title
Error detection

Tags
212136, 0, 4

Learning Outcome
Students will be able to correctly identify errors in longer melodies, rhythm patterns, and diatonic chord progressions.

MUSIC 195 - Music Theory 1

Course Information

Teaching Area (new)

Other Prerequisites
Acceptance as a music major.

Learning Outcomes

Title
Fundamentals

Tags
187319, 0, 1

Learning Outcome
Students will demonstrate a mastery of music fundamentals (scales, key signatures, intervals, and triads).

Title
Part writing

Tags
212295, 0, 2

Learning Outcome
Students will be able to part-write using root-position and first inversion triads and dominant seventh inversions.

Title
Analysis

Tags
212296, 0, 3

Learning Outcome
Students will be able to analyze passages of music involving root-position and first inversion triads and dominant seventh inversions.

Complete ALL of the following Courses:

- MUSIC 195 - Music Theory 1

Learning Outcomes

Title
Part writing

Tags
187859, 0, 1

Learning Outcome
Students will be able to part-write using all diatonic triads and seventh chords, secondary dominants, and modulations to closely related keys

Title
Analysis

Tags
212297, 0, 2

Learning Outcome
Students will be able to analyze passages of music involving all diatonic triads and seventh chords, secondary dominants, and modulations to closely related keys

Title
Form

Tags
212298, 0, 3

Learning Outcome
Students will be able to identify and describe sentences and period structures and demonstrate an understanding of binary and ternary form

Title
Composition

Tags
212299, 0, 4

Learning Outcome
Students will be able to compose a ternary form piece that modulates to a closely related key

MUSIC 197 - Sight Singing 1

Course Information

Teaching Area (new)
MUSIC

Course Number
197

Teaching Area
MUSIC

Course Title
Sight Singing 1

Course Description
Development of aural skills through sight singing, rhythm reading, and improvisation; emphasis on learning solfège, counting syllables, conducting patterns, and hand signs in the performance of diatonic melodies in major and minor keys and basic rhythms in simple and compound meters.

Department
Music

When Taught
Fall

Learning Outcomes

Title
Sight singing

Tags
212137, 0, 1

Learning Outcome
Students will demonstrate the ability to sight-read diatonic melodies that arpeggiate tonic and dominant in any major or minor key.

Title
Rhythm reading

Tags
212138, 0, 2

Learning Outcome
Students will demonstrate the ability to accurately perform rhythms with duple divisions, dots, ties, triplets, and duplets in simple and compound meters while conducting.

Title
Improvisation

Tags
212139, 0, 3

Learning Outcome
Students will demonstrate the ability to improvise idiomatic melodic and rhythmic patterns in response to a given call.

Additional seats for specific sections may be available to Freshman Mentoring participants through envelopes. Offered by BYU Independent Study; enroll anytime throughout the year; one year to complete; additional tuition required; register at is.byu.edu.

Learning Outcomes

Title
Music 201 - Honors

Tags
187753, 0

Learning Outcome
Music 201 surveys music, the visual arts, and literature from ancient history to the beginning of the baroque period, giving emphasis whenever possible to the subject of music. As comprehension of musical scores constitutes an important part of the lectures and the exams, the ability to read music will help you excel in this course. Students who cannot read music will find it more difficult to do well.

Title
Foundational Knowledge

Tags
206524, 0

Learning Outcome
Demonstrate foundational knowledge and skills in the methods of investigating, expressing, and evaluating concepts in the Arts, with a focus on music, from Ancient Greece to ca. 1720.

Title
Communication

Tags
206545, 1

Learning Outcome
Communicate effectively through writing with diverse audiences about music, culture and the arts from Ancient Greece to ca. 1720.

Title
Cultural Awareness

Tags
206547, 2

Learning Outcome
Identify and describe the major cultural ideas and styles from the Western cultural tradition from Ancient Greece to ca. 1720.

Title
Life-long Learning

Tags
206553, 3

Learning Outcome
Demonstrate the skills and abilities needed for a life-long critical and evaluative pursuit of art, literature, music, and philosophy

Piano skills determined by entrance diagnostic exam; music major status

Learning Outcomes

Title
221 Functional Piano Skill

Tags
187321, 1

Learning Outcome
At the end of this class, students should be able to:
Play major and minor cadences using tonic, sub-dominant and dominant chords in all keys at a tempo of 80, one chord per beat.

Title
Harmonize Melodies

Tags
187322, 2

Learning Outcome
Harmonize melodies using the assigned accompaniment patterns demonstrating an ability to use chords in root and inverted positions.

Title
Melodies by Ear

Tags
187323, 3

Learning Outcome
Play common melodies by ear using assigned chordal accompaniments.

Title
Improvise Melody

Tags
187324, 4

Learning Outcome
Improvise a melody with the right hand while playing the assigned chordal accompaniment with the left hand.

Title
Major and Harmonic Minor Scales

Tags
187325, 5

Learning Outcome
Play the major and harmonic minor scales that begin on the white keys for one octave up and down the keyboard at a tempo of 100 – two notes per beat.

Title
Sight Reading

Tags
187326, 6

Learning Outcome
Be able to sight read given examples with a minimum of mistakes and hesitations.

Title
Perform Assigned Repertoire

Tags
187327, 7

Learning Outcome
Perform assigned repertoire demonstrating an ability to play expressively while observing all terms and symbols, and fingering, at a tempo appropriate for the piece.

Title
Accompaniment to Solos

Tags
187328, 8

Learning Outcome
Perform assigned accompaniments to solos demonstrating an ability to follow the performance of the soloist.

MUSIC 222 - Functional Piano Skills 2

C- or higher in Music 221; music major status

Learning Outcomes

Title
222 Functional Piano Skills

Tags
187329, 1

Learning Outcome
Continuing to build upon skills gained from Mus 221, students will also be able to:
Play the assigned progressions in all keys up to four sharps and four flats at a tempo of 88 per half note.

Title
Harmonize Melodies

Tags
187330, 2

Learning Outcome
Harmonize given melodies using the assigned accompaniment pattern and chord symbols demonstrating ease in moving from chord to the next.

Title
Common Melodies by Ear

Tags
187331, 3

Learning Outcome
By ear, play a common melodies with the right hand as assigned. With the left hand, play a chordal accompaniment using the assigned accompaniment pattern.

Title
Improvisation

Tags
187332, 4

Learning Outcome
Improvise a melody with the right hand while playing the assigned chordal accompaniment with the left hand.

Title
Major and Harmonic Minor Scales

Tags
187333, 5

Learning Outcome
Play major and harmonic minor scales that begin on the white keys for two octaves up and down the keyboard at a tempo of 120 – two notes per beat.

Title
Major and Minor Arpeggios

Tags
187334, 6

Learning Outcome
Play major and minor arpeggios that begin on the white keys for two octaves up and down the keyboard at a tempo of 120 – two notes per beat.

Title
Sight reading

Tags
187335, 7

Learning Outcome
Be able to sight read given examples with a minimum of mistakes and hesitations.

Title
Perform Assigned Repetoire

Tags
187336, 8

Learning Outcome
Perform assigned repertoire demonstrating an ability to play expressively while observing all terms and symbols, and fingering, at a tempo appropriate for the piece.

Title
Perform a Hymn

Tags
187337, 9

Learning Outcome
Perform a hymn of your choice from the LDS hymnbook or from a standard hymnbook from another denomination.

Title
Accompaniment to Solos

Tags
187338, 10

Learning Outcome
Perform accompaniments to solos as assigned demonstrating an ability to follow the performance of the soloist.

Title
Score Reading Example

Tags
187339, 11

Learning Outcome
Prepare a score reading example that relates to your major instrument. Play the line of your instrument and one other line of a differing and transposing instrument.

MUSIC 223 - Jazz Harp Techniques

Course Information

Learning Outcomes

Title
Practical Hands-On Experience

Tags
187759, 3

Learning Outcome
This course focuses on basic audio principles. Students will begin to use studio technology in labs for this course where they can benefit from hands-on experience.

Title
Audio Technology

Tags
187975, 2

Learning Outcome
Student will become familiar with basic audio principles, including fundamentals of hearing, psycho-acoustics, microphones, speakers, mixing consoles, patch bays, signal processing, etc.

Title
Technology

Tags
188033, 1

Learning Outcome
Students are introduced to the basics of hardware and software technology used in commerical music production. They will demonstrate a working knowledge of sequencing and notation programs.

Learning Outcomes

Title
Audio Technology

Tags
188308, 2

Learning Outcome
Students gain a more intermediate level of familiarity with recording equipment, recording and mixing strategies, and software tools.

Title
Audio Production

Tags
188310, 3

Learning Outcome
Students continue to develop additional proficiency in audio and music production techniques by applying various concepts in a number of scenarios.

Title
Practical Hands-On Experience

Tags
188311, 4

Learning Outcome
This course is project based, and involves hands on learning both in class and outside of class while working on a variety of assignments. Students also go on a number of field trips, providing an opportunity to see first hand how professional music and sound facilities function and how various pieces of equipment are used to accomplish certain objectives.

Title
Career Sampler

Tags
188309, 0, 1

Learning Outcome
Building on the knowledge and skillsets gained in Music 251, this class provides an opportunity for students to be introduced to different areas within commercial music. The student gets a chance to briefly expereince what it's like to be a film composer, a post-production audio engineer, music producer, studio owner, and a variety of other areas. Students increase their level of technological competency and ability to execute different types of projects and gain additional skills associated with each area.

Keyboard Foundations - 264

Tags
187871, 1

Learning Outcome
The goal of 264/265 is to give students a strong introduction to various musical skills that they will very likely come across in the professional world. Many of these skills will draw on the student’s knowledge of music theory and become the concrete application of that knowledge.As keyboard players –they are expected to have the strongest working knowledge of harmony, as the instrument is polyphonic in nature – not homophonic. The ability to see many notes and instantly divide them into harmonic groupings is crucial and a common denominator for nearly every aspect of this class. Sometimes this grouping skill will include adding or subtracting notes from the page, or supplying notes that are only notated by a symbol. Very often students can play their performance repertoire wonderfully, but are virtually helpless and intimidated when attempting to add or subtract some of their own notes when not written specifically on the page. This tendency represents incomplete musicianship - it is instead only well trained muscles. The outcomes for this course include sight reading, modulation, score reading, figured bass, transposition and improvisation. After discussing other items that would be considered foundational material for keyboard players in 2012, it was decided that added emphasis would be given to the history of great pianists.

Learning Outcomes

Title
Improvisation and Movement

Tags
187655, 2

Learning Outcome
Students will Improvise on piano and drums, patterns to guide young children’ s movement leading toawareness of rhythms, meters, and formal structures.

Title
Teaching Strategies

Tags
187683, 6

Learning Outcome
Students will demontrate different strategies to effectively teach children using the teaching/learning processes explored in class.

Title
Folk Song Analysis

Tags
187689, 0

Learning Outcome
Students will analyze folk songs according to tone sets, scale types, rhythm patterns, and formal structures and create an organized index/retrieval system based on such analysis.

Title
Dictation, Melody, and Rhythm

Tags
187714, 4

Learning Outcome
Students will take from dictation, folk song melodies and rhythms, and sing with accuracy intervals, pentatonic scales, and modes.

Title
Pitch and Intonation

Tags
187798, 1

Learning Outcome
Students will demonstrate ability to sing children' s songs with accurate pitch and intonation.

Title
Developmentally Appropriate Learning

Tags
187799, 5

Learning Outcome
Students will be able to explain how children learn, and how they learn music, including an understanding of development ateach age, windows of opportunity for learning certain things, and ages and stages of growth.

Title
Accompanying

Tags
187806, 3

Learning Outcome
Students will demonstrate ability to accompany on autoharp or guitar, children’ s folk and traditional songs, showing anunderstanding of keys and chord patterns.

Title
Technology in Music Education

Tags
187944, 7

Learning Outcome
Students will demonstrate growth in knowledge of the use of technology in music education. In this class you will be asked toa. use finale to input music for flash cardsb. use the web to investigate music program offerings for young childrenc. use the web to locate businesses that specialize in early childhood music books, instruments,and other equipment for music development and explorationd. create a song index retrieval system you can use throughout your education career,e. review interactive music teaching computer programs available for children

Prerequisite

Prerequisites

Complete ALL of the following Courses:

- MUSIC 271 - Musicality in the Elementary School

Learning Outcomes

Title
Developmentally Appropriate Learning

Tags
187607, 7

Learning Outcome
Students will be able to explain how children learn, and how they learn music, including an understanding of development ateach age, windows of opportunity for learning certain things, and ages and stages of growth.

Title
Dictation, Melody, and Rhythm

Tags
187610, 6

Learning Outcome
Students will take from dictation, folk song melodies and rhythms, and sing with accuracy intervals, pentatonic scales, and modes.

Title
Improvisation and Movement

Tags
187622, 4

Learning Outcome
Students will Improvise on piano and drums, patterns to guide young children’ s movement leading toawareness of rhythms, meters, and formal structures.

Title
Pitch and Intonation

Tags
187717, 3

Learning Outcome
Students will demonstrate ability to sing children’ s songs with accurate pitch and intonation.

Title
Technology in Music Education

Tags
187749, 1

Learning Outcome
Students will demonstrate growth in knowledge of the use of technology in music education. In this class you will be asked toa. use finale to input music for flash cardsb. use the web to investigate music program offerings for young childrenc. use the web to locate businesses that specialize in early childhood music books, instruments,and other equipment for music development and explorationd. create a song index retrieval system you can use throughout your education career,e. review interactive music teaching computer programs available for children

Title
Folk Song Analysis

Tags
187829, 2

Learning Outcome
Students will analyze folk songs according to tone sets, scale types, rhythm patterns, and formal structures and create an organized index/retrieval system based on such analysis.

Title
Teaching Strategies

Tags
187836, 8

Learning Outcome
Students will demontrate different strategies to effectively teach children using the teaching/learning processes explored in class.

Title
Accompanying

Tags
187985, 5

Learning Outcome
Students will demonstrate ability to accompany on autoharp or guitar, children’ s folk and traditional songs, showing anunderstanding of keys and chord patterns.

MUSIC 273A - Percussion Techniques

FBI fingerprint and background clearance. Successfully complete the Technology Skills Assessment

Learning Outcomes

Title
Teaching Process

Tags
214120, 0, 1, 2023-08-29 11:14:23

Learning Outcome
Students will learn about and execute basic skills of lesson planning and teaching processes, i.e., developing learning objectives, using effective instructional strategies, sequencing instruction, assessing learning, and delivering instruction.

Title
Organizing Instruction

Tags
214121, 0, 2, 2023-08-29 11:14:25

Learning Outcome
Students will utilize national standards and expanded music literacy concepts to organize instructional content.

Title
Musical Skills

Tags
214122, 0, 3, 2023-08-29 11:14:38

Learning Outcome
Students will demonstrate basic skills related to two new instruments and to singing.

Title
Theory of Music Teaching

Tags
214123, 0, 4, 2023-08-29 11:14:40

Learning Outcome
Students will deepen their awareness of and thinking about educational theories underlying music instruction.

Title
Attitudes and Behaviors

Tags
214124, 0, 5, 2023-08-29 11:14:48

Learning Outcome
Students will develop professional attitudes and behaviors needed for success in the music education major and in the music teaching profession.

MUSIC 278 - Foundations of Music Teaching and Learning

Course Information

Learning Outcomes

Title
Music Literature Analysis

Tags
214126, 0, 1, 2023-08-29 11:15:11

Learning Outcome
Students will analyze music literature (songs and recordings) for teaching developmentally appropriate music concepts.

Title
Teaching Strategies

Tags
214127, 0, 2, 2023-08-29 11:15:14

Learning Outcome
Students will implement appropriate teaching strategies for teaching elementary general music.

Title
Orff, Dalcroze, MMCP, etc. Pedagogies

Tags
214128, 0, 3, 2023-08-29 11:15:16

Learning Outcome
Students will apply ideas from the music pedagogies of Orff, Dalcroze, Kodaly, SongWorks, etc. in elementary music lesson plans and teaching experiences.

Title
Child Musical Development

Tags
214129, 0, 4, 2023-08-29 11:15:18

Learning Outcome
Students will develop music learning activities that are consistent with what they learn about child development and musical development, and determine appropriat means for assessing student musical learning.

MUSIC 282 - Foundations of Teaching Vocalists in Ensembles

Type
Prerequisite

Prerequisites

Complete ALL of the following Courses:

- MUSIC 196 - Music Theory 2

Learning Outcomes

Title
Voice Function

Tags
213236, 0, 1

Learning Outcome
Identify basic anatomy and articulate how the voice functions.

Title
Principle-Based Voice Instruction

Tags
213237, 0, 2

Learning Outcome
Articulate and demonstrate healthy vocal technique and choral habits required for successful performance, and incorporate principle-based vocal instruction in a choral rehearsal setting.

Title
Score Analysis

Tags
213238, 0, 3

Learning Outcome
Analyze choral scores in preparation to teach. This will include identifying textual, formal, and other salient features of the piece, singing and playing through all the parts, marking your score and conducting, deciding how to introduce a piece, predicting challenges in a piece, and writing an 8 week rehearsal plan.

Title
Rehearsal Strategies

Tags
213239, 0, 4

Learning Outcome
Discuss, plan, and implement diverse rehearsal/teaching strategies in a peer-teaching setting

Title
Effective Conducting

Tags
213240, 0, 5

Learning Outcome
Demonstrate principles of effective communication through conducting.

Title
Course Purpose

Learning Outcome
The purpose of this course is to provide a foundation for best practices in teaching vocalists in choral ensembles. It is hoped that you will improve your individual singing and choral rehearsal techniques, as well as score analysis and conducting skills.

Learning Outcomes

Title
Performing on a Band and Orchestra Instrument

Tags
213220, 0, 1

Learning Outcome
Demonstrate the ability to play with expression simple tunes, with proper playing position, tone quality, intonation, and rhythmic accuracy on a selected band and orchestra instrument.

Title
Spiritually Strengthening

Tags
213219, 0, 6, 2024-01-06 13:09:23

Learning Outcome
Discover ways to appropriately teach by the Spirit in a secular educational setting (D&C 50:13-22).

Title
The Role of Instrumental Music Instruction

Tags
213222, 0, 3, 2024-01-06 13:09:28

Learning Outcome
Demonstrate an enthusiasm for and understanding of the role of instrumental (band and orchestra) instruction in the K-12 school music curriculum as ameans of realizing a comprehensive music education.

Title
Professionalism

Tags
213223, 0, 4, 2024-01-06 13:09:32

Learning Outcome
Develop professional skills, traits, and behaviors expected of a professional music educator.

Title
Diagnosing Technical and Aural Problems

Tags
213221, 0, 2, 2024-01-06 13:09:36

Learning Outcome
Demonstrate ability to diagnose technical problems and propose remedial strategies. This includes developing and improving aural skills for effective band and string teaching.

Music Business

Tags
188077, 1

Learning Outcome
Music 286 is required in the Commercial Music major and is a recommended elective for all music majors. In the vernacular of the day, we teach, "Don't do the music business; be a music business." The course stresses that all musicians need a business plan, and is taught in a manner relevant for all musicians. The semester's work includes exposure to a variety of guest lectures, and creation of personal semester projects, including research, which take the form of a personal business plan. Retention of material is measured with quizzes and a final exam.

Prerequisites

Complete ALL of the following Courses:

- MUSIC 301 - History of Western Music: Overview

Recommended
Music 201, Music 202

Note
The course will be offered every Fall, but only every other Winter semester.

Learning Outcomes

Title
Identify Stylistic Elements

Tags
188089, 1

Learning Outcome
Identify simple elements of the major historical art music styles in the Classic Period.

Title
Demonstrate Familiarity

Learning Outcome
Demonstrate familiarity with selected representative musical works from these historical periods.

Title
Use Appropriate Terminology

Learning Outcome
Use appropriately the terminology associated with the study of these repertories.

Title
Think, Speak, and Write

Learning Outcome
Think, speak, and write clearly and effectively about the music from this time period.

Type
Prerequisite

Complete ALL of the following Courses:

- MUSIC 293 - Aural Skills 3
  AND MUSIC 295 - Music Theory 3
  AND MUSIC 297 - Sight Singing 3

Learning Outcomes

Title
Intersections

Learning Outcome
Identify and examine the intersections between the Western art-music tradition and the transformational uses of these repertoires in popular culture, mass media, and digital media.

Title
Lenses

Learning Outcome
Demonstrate an understanding of the multiple, overlapping analytical and critical “lenses” through which this repertoire can be viewed and assessed.

Title
Terminology

Learning Outcome
Use appropriately the terminology associated with this kind of study, including modes of discourse drawn from cultural studies, American studies, sociology, semiotics, reception theory, ethnomusicology, and other relevant disciplines.

Title
Engagement

Learning Outcome
Demonstrate through effective writing, oral presentation, and other creative media an ability to engage deeply with transformational musical expressions that cross traditional cultural divides between so-called “high” and “low” art.

Learning Outcomes

Title
Music, Values, and "Cross-Domain Mapping"

Tags
188072, 5

Learning Outcome
Students will articulate how a culture's values can be embodied and discerned within musical practices.
Students will learn how music's organizational principles (see the previous learning outcome) can be mapped onto various non-musical aspects of that culture. In other words, students will be able to observe and articulate how the way a music sounds relates to what that music means. Some areas of exploration related to this learning outcome could include:

musical practices in various cultures that project power and legitimacy within political contexts
musical practices in various cultures that reinforce social cohesion in a community context
musical practices in various cultures that convey reverence or worship in a religious context

In discussions, assignments, and essays, students will use this concept of "cross-domain mapping" to articulate the connection between sound and meaning in various musical contexts. They will also use this as a basis to for written self-reflection:

How does the music the students themselves use in personal, social, and religious contexts resonate with their personal, community, and religious beliefs and values?
How do LDS musical practices, for example, reflect, shape, and strengthen Mormon identity?

Title
Ethnomusicology as a Path to Cultural Understanding

Tags
188073, 6

Learning Outcome
Students will be able to articulate and demonstrate how the discipline of ethnomusicology and the scholarly methods it entails foster cross-cultural awareness, understanding, and empathy.
Students will fulfill this objective by reading about the history and practices of ethnomusicology as an academic discipline, studying the methods and ethical considerations applied in ethnomusicological fieldwork, writing about their findings in assignments and exam essays, and completing a review of a scholarly monograph based on ethnomusicological fieldwork. Students will articulate in a written essay how the goals, methodologies, and ethical standards of the discipline of ethnomusicology align with the purposes and outcomes articulated in BYU's Global and Cultural Awareness Foundation Document.

Title
Music and Global Change

Tags
188074, 7

Learning Outcome
Students will demonstrate an understanding of the ways in which music reflects and contributes to large-scale international and intercultural changes.
Students will examine the ways in which major changes such as colonial and postcolonial political shifts, international economic developments, new media technologies, shifting social norms, religious proselytizing, etc., affect and are affected by musical practices. Students will demonstrate an understanding of musical culture as a continual interplay of tradition, hybridization, retrenchment, and change, and will be able to draw on various specific musical case studies to reflect on the complex cultural issues globalism raises. These case studies could include such things as:

How various historical encounters, from the Silk Road to the Crusades to the World Fairs of the late 19th and 20th centuries, contributed to musical cross-pollination.
How a Colombian soap opera helped turn a little-known provincial folk music style into an international phenomenon.
How the advent of the recording industry in India dramatically changed the role of women in Indian classical music.
How a Tibetan folk musician living in the U.S. balances his sense of stewardship over his tradition with the desire to broaden his audience.
How members of the LDS Church throughout the world navigate the relationship between local traditional culture and shared LDS culture through the musical celebrations that precede temple dedications.
Etc.

Title
Understanding of Non-Western Musical Practices

Tags
188076, 4

Learning Outcome
Students will be able to demonstrate an understanding of the methods of musical creativity in several non-Western cultures, including various approaches to melodic, rhythmic, timbral, and formal organization.
They will also be able to identify various musical instruments as well as the methods through which various cultures conceptualize and taxonomize instruments, and be able to show an understanding of how various modes of musical transmission (oral tradition, notation, media) affect musical practices over time.

MUSIC 308 - History of Jazz

Note
Graduate students should register for 620R.

Learning Outcomes

Title
Studio Experience

Learning Outcome
Students will gain valuable professional skills and experience by being a part of an ensemble that is patterned after a real recording and performing studio orchestra.

Title
Sight Reading

Learning Outcome
Students will learn how to play to a click track, and will improve their sight-reading ability significantly since the ensemble involves very little outside practice, focusing on the ability to read and record a piece of music in one or two sittings.

Title
Genres and Styles

Learning Outcome
Students will be exposed to multiple genres and styles and gain proficiency in learning to effectively use appropriate techniques associated with different musical genres.

Title
Professionalism

Learning Outcome
Students will learn studio professionalism and appropriate communication, attitudes and interaction skills by interfacing with all members of the studio orchestra and music production teams.

Folk Music Learning Outcomes

Tags
187706, 0

Learning Outcome

Folk Music students will learn to be team players as ensembles members. All Folk Music students are required to perform at least one time per semester. As students become better team players in their respective ensembles they will also learn management, leadership, and music performance, and music arranging skills. These skills will help them to proliferate music in their future lives and families.

MUSIC 330R - Steel Band

2

Other Prerequisites
Director's consent

Note
Graduate students should register for 630R.

Learning Outcomes

Title
MUS 330R - Steel Band

Tags
188067, 0

Learning Outcome
Students should be exposed to music outside the Western European tradition. Most of the music performed in this ensemble includes Calypso and Soca styles from the island nation of Trinidad and Tobago. We will sometimes include a pop or classical number, but most of the time we will focus on "groove" music. This means that having a conductor will be rare and the student is expected to listen and learn how to contribute to that "groove".

MUSIC 331R - Jazz Combos

Course Information

Teaching Area (new)
MUSIC

Course Number
331R

Teaching Area

Learning Outcomes

Title
Young Ambassador Show Band

Tags
187918, 0

Learning Outcome
The goal of the Young Ambassadors Show Band is that each member will:· Develop, improve, and hone their technique and skill on their respective instruments· Expand their talents and abilities as a performing artist· Broaden their knowledge of, and facility in performing differing styles of popular and jazz music idioms· Increase their ability to communicate, through performing, their love for and joy of music· Deepen their awareness of how their efforts, talents and abilities can touch and inspire the lives of those whom they meet, or for whom they perform, and realize more profoundly how such efforts, talents and abilities can assist the Lord in His work.

Title
Knowledge

Tags
188209, 1

Learning Outcome
Students will deepen their understanding of how music and show band are related.

Learning Outcomes

Title
Performance Routines

Tags
187667, 2

Learning Outcome
Students will play typical introductions, endings, solo backgrounds, texture routines characteristic of traditional jazz styles

Title
Improvisation

Tags
187845, 1

Learning Outcome
Each student will improvise solos in the style of the early jazz masters who play his or her instrument.

Title
Style

Tags
188000, 0

Learning Outcome
Students will perform traditional jazz, improvising within the traditional jazz tutti texture. Each student will demonstrate the roll of his or her instrument within the context of traditional jazz.

Title
25 Standard "Dixieland" tunes

Tags
188068, 3

Learning Outcome
Students will demonstrate the ability to play 25 "Dixieland Standards." These are among the most commonly performed tunes that are played by professional "Dixieland" bands at casual performance engagements (gigs). Standard tunes:

Avalon
Basin Street Blues
Big Butter and Egg Man
Black and Blue
Bourbon Street Parade
Do You Know What it Means
High Society
I Can't Give You Anything But Love
I Found A New Baby
Indiana (Back Home Again in)
Ja Da
Just A Closer Walk With Thee
Muskrat Ramble
Royal Garden Blues
St. James Infirmary
St. Louis Blues
Struttin' With Some Barbecue
Sweet Georgia Brown
That's A Plenty
Tin Roof Blues
Twelfth Street Rag
Up a Lazy River
When the Saints Go Marching In
When You're Smiling
Won't You Come Home Bill Bailey

MUSIC 336R - Balinese Gamelan

Course Information

Teaching Area (new)
MUSIC

Course Number
336R

Teaching Area
MUSIC

Course Title
Balinese Gamelan

Course Description
Playing and performing on the Balinese gamelan (percussion) instruments.

Department
Music

When Taught
Fall and Winter

Credit Hours

Min:
1

Fixed/Max:
1

Lecture Hours

Fixed:
2

Lab Hours

Fixed:
0

Note
Graduate students should register for 636R.

Learning Outcomes

Title
Mental and Technical Skill

Tags
188015, 1

Learning Outcome
Students participating in Gamelan will learn the mental and technical skills required to memorize and perform works from the traditional Balinese gamelan repertoire, including becoming proficient on one or more of the instruments in the ensemble.

Title
Social and Religious Culture

Tags
188016, 2

Learning Outcome
Students will also use music as a window into the relationship between Balinese musical practice and Balinese social and religious culture, and, more broadly, develop a deep appreciation for this music's profound contribution to the life experience.

Title
Interconnected Global Society

Tags
188017, 3

Learning Outcome
In the spirit of BYU's global mission and the breadth of educational experience advocated in BYU's guiding documents, successful students in gamelan will develop a greater understanding of and respect for music and traditions outside of their native experience. This respect will better prepare them to represent BYU and the Church in an increasingly interconnected global society.

Learning Outcomes

Title
Ensemble Playing

Tags
188019, 0

Learning Outcome
Skills to Develop in 344r:
1. Understand how to best balance their playing with another instrument and comprehend how that balance evolves to meet the needs of different instruments.
2. Understand how to communicate musical ideas through body language.
3. Develop musical "ESP". This is achieved when a pianist works with the same person over a long period of time, and develops better sensitivity. The pianist and soloist can sense changes in tempi, phrasing, and dynamics through concentrated listening, needing almost no visual contact.
4. Understand the subtext of the score.
5. Develop a genuine appreciation for the art of the accompanist.

MUSIC 345R - Percussion Ensemble

Course Information

Teaching Area (new)
MUSIC

Course Number
345R

Teaching Area
MUSIC

Course Title
Percussion Ensemble

Department
Music

When Taught
Fall and Winter

Credit Hours

Min:
1

Fixed/Max:
1

Lecture Hours

Fixed:
0

Lab Hours

Fixed:
2

Other Prerequisites
Director's consent

Note
Graduate students should register for 645R.

Learning Outcome
To expose students to the music written for percussion ensemble, to help students develop technique(s) on a myriad of instruments while contributing musically, and to present musical situations with and without a conductor. The percussion parts in a percussion ensemble differ drastically from those found in traditional orchestral and band percussion scores in that most performers must be not only rhythmically proficient, but melodically, harmonically and texturally expressive.
