The minor in Arabic consists of four courses in Arabic language beyond the elementary level plus two additional courses:

- 01:013:201 Crossroads: Classical Literatures of Africa, the Middle East, and South Asia (3)
- 01:013:221 Introduction to the Literatures of the Middle East (3)

African, Middle Eastern, and South Asian Languages and Literatures 013 (SAS)

Learning Objectives and Requirements for Hindi Minor (505)

Learning Objectives and Requirements for Hindi Minor (505)

Learning Objectives

The objective of the Hindi minor is to develop listening, speaking, writing, and reading skills in Hindi to the advanced level, as based on the guidelines of the American Council for the Teaching of Foreign Languages (ACTFL).

Requirements

The minor program in Hindi consists of 20 credits, which must be completed with a grade of C or better in each course.

The minor in Hindi consists of four courses in Hindi language beyond the elementary level plus two additional courses:

- 01:013:201 Crossroads: Classical Literatures of Africa, the Middle East, and South Asia (3)
- 01:013:221 Introduction to the Literatures of the Middle East (3)

African, Middle Eastern, and South Asian Languages and Literatures 013 (SAS)

Learning Objectives and Requirements for Languages and Literatures Minor (013)

Learning Objectives and Requirements for Languages and Literatures Minor (013)

Learning Objectives

Students in the languages and literatures minor will demonstrate familiarity with a cross-section of the classical literatures of Africa, the Middle East, and South Asia, and a broad understanding of the modern literatures of one of the three regions. They will also develop listening, speaking, writing, and reading skills in one of the languages of their chosen region of study (Africa/the Middle East/South Asia) at a proficiency level of intermediate-low or higher, based on the guidelines of the American Council for the Teaching of Foreign Languages (ACTFL).

Requirements

The languages and literatures minor consists of 18-20 credits, which must be completed with a grade of C or better in each course.

- Two courses beyond the elementary 100 level in one of the languages offered by the department.
- 01:013:201 Crossroads: Classical Literatures of Africa, the Middle East, and South Asia (3)
- One of the following three courses, as appropriate to the chosen language of study:
  01:013:211 Introduction to the Literatures of Africa (3) or
  01:013:221 Introduction to the Literatures of the Middle East (3) or
  01:013:231 Introduction to the Literatures of South Asia (3)
- Six elective credits of additional literature, sociolinguistics, or linguistics courses at the 300 level or above, offered through AMESALL, by cross-listing through other departments, or with the approval of the department chair.

Learning Objectives and Requirements for Persian Minor (013P or 723)

Learning Objectives and Requirements for Persian Minor (013P or 723)

Learning Objectives

The objective of the Persian minor is to develop listening, speaking, writing, and reading skills in Persian language to the intermediate mid level, as based on the guidelines of the American Council for the Teaching of Foreign Languages (ACTFL).

Requirements

The minor in Persian consists of 20-22 credits hours, which must be completed with a minimum grade of C.

Minors must take four Persian language courses (14-16 credits). They must also take EITHER:

- Two 300-level Persian language courses (6 credits), OR
- 01:013:201: Crossroads: Classical Literatures of Africa, the Middle East, and South Asia (3), and *either* 01:013:203 Language and Society (3), *or* 01:013:221 Introduction to the Literatures of the Middle East (3)

Learning Objectives and Requirements for Turkish Minor (013T or 973)

Learning Objectives and Requirements for Turkish Minor (013T or 973)

Learning Objectives

The objective of the Turkish minor is to develop listening, speaking, writing, and reading skills in Turkish language to the intermediate mid level, as based on the guidelines of the American Council for the Teaching of Foreign Languages (ACTFL).

Requirements

The minor in Turkish consists of 20-22 credits, which must be completed with a minimum grade of C.

Minors must take four Turkish language courses (14-16 credits). They must also take EITHER:

- Two 300 level Turkish language (6 credits), OR
- 01:013:201 Crossroads: Classical Literatures of Africa, the Middle East, and South Asia (3), and *either* 01:013:203 Language and Society (3), *or* 01:013:221 Introduction to the Literatures of the Middle East (3)

Certificate in Translation

Certificate in Translation

The translation certificate in African, Middle Eastern, and South Asian languages and literatures (AMESALL) consists of 18 credits, completed with a grade of B or better in each course. The requirements for the translation certificate program are:

1. Two courses beyond the intermediate level in any of the languages offered through AMESALL or the equivalent level as determined by placement testing
2. 01:013:203 Language and Society in Africa, the Middle East, and South Asia (3)
3. 01:013:304 Introduction to Translation Studies (3)
4. 01:013:403 Translation Practicum I (3), or equivalent
    a. 403a: Arabic
    b. 403b: Hindi
    c. 403c: Swahili
    d. 403d: Persian
    e. 321: Independent Language Practicum

5. 01:013:404 Translation Practicum II (3), or equivalent
    a. 404a: Arabic
    b. 404b: Hindi
    c. 404c: Swahili
    d. 404d: Persian
    e. 321: Independent Language Practicum

Credits earned in any of the above courses can also be used to fulfill the requirements of the minor or major in African, Middle Eastern, and South Asian languages and literatures. 01:013:203 Language in Society in Africa, the Middle East, and South Asia (3) is regularly offered in the fall semester, and 01:013:304 Introduction to Translation Studies (3) is regularly offered in the spring semester. The language practicum courses are offered according to student interest. If you are interested in pursuing the translation certificate, but a practicum course if not being offered in the language of your choice, please contact one of our full-time faculty members about taking 01:013:321 Independent Study: Language Practicum (3) to fulfill the certificate requirements.

In order to enroll in the translation certificate program, please contact the AMESALL department administrator, Michele Frishberg (mf532@amesall.rutgers.edu), with your name, RUID, and anticipated year of graduation (class). The translation certificate program is also available to nonmatriculating students (i.e., those not enrolled in a degree program).

Courses

Courses

01:013:110 ***Introduction to Aramaic (3)***
Introduces students to study of Aramaic, including Aramaic portions of the Bible, by developing reading comprehension and vocabulary.
Credit not given for both this course and 01:563:145 or 01:685:145.

01:013:111 ***The Bible in Aramaic (3)***
Introduction to Aramaic through biblical literature, including Aramaic Bible passages and vernacular translations into various Aramaic dialects, with a focus on Syriac version.
In English. Credit not given for this course an 01:53:146 or 01:840:123.

01:013:120 ***Literary Egypt (3)***
Introduction to the works of Egypt's Nobel Laureate Naguib Mahfouz (1911-2006) dealing with conflict between tradition and modernity, faith and freedom, ambition and social mobility, and existential crisis of individuals in a corrupt and suffocating society.
Credit not be given for this course and 01:074:120.

01:013:130 ***Comics in the Middle East (3)***
Introduction to the study of comics and graphic narratives in the Middle East. Genres and media include the comic strip, graphic novel, satirical cartoon, graffiti, and internet memes. We will also look at parallels between modern sequential art and premodern graphic narratives, such as illuminated manuscripts, and examine connections with

American and Japanese comics. No previous knowledge of Middle Eastern literatures or languages required. All readings are in English.
Credit not given for both this course and 01:685:130.

01:013:140-141 *Elementary Arabic I,II (4,4)*
Introductory course in Modern Standard Arabic (MSA) for beginner students. Course emphasizes development of oral and written proficiency.
Prerequisite for 141: 01:013:140, 01:074:140, or placement test. Credit not given for both this course and 01:013:145, 01:013:148-149, 01:074:140-141, or 01:074:148-149.

01:013:143-144 *Arabic Lab I,II (1,1)*
Instructor-guided laboratory practicum for improving oral proficiency practice in aural/oral skills and communication styles. Evaluation of pronunciation and fluency.
Corequisite: 01:013:140-141. Not open to students with any level of prior knowledge of spoken and/or written Arabic.

01:013:145 *Accelerated Arabic (4)*
Introductory Arabic course designed for heritage learners, meaning those who have some proficiency in written or spoken Arabic. Covers all material in 01:013:140-141 Elementary Arabic I and II (4,4).
Credit not given for both this course and 01:013:140, 01:013:141, 01:013:148, 01:013:149, 01:074:140, 01:074:141, 01:074:145, 01:074:148, or 01:074:149.

01:013:148-149 *Elementary Arabic for Arabic Speakers I,II (4,4)*
Introduction to Modern Standard Arabic (MSA) for students who have prior knowledge of Arabic script and spoken dialects, but not enough competencies to speak, read, or write MSA.
Credit not given for both this course and 01:013:140-141, 01:013:145, or 01:074:140-141.

01:013:152-153 *Elementary Modern Hebrew I,II (4,4)*
Speaking, reading, and writing; oral-aural and written exercises.
Prerequisite: Placement test to determine level of language competence. Not open for credit to students who have had two or more years of secondary school Hebrew. Credit not given for both these courses and 01:563:101-102 or 01:685:101-102.

01:013:154-155 *Biblical Hebrew I,II (3,3)*
Introduction to Biblical Hebrew, with a focus on basic grammar and lexicon, leading to reading ability and comprehension of simple narrative prose texts.
Credit not given for both this course and 01:563:141-142.

01:013:156 *Hebrew Review and Continuation (4)*
Development of primary language skills.
Prerequisites: Previous exposure to Hebrew and placement into Hebrew 121. Credit not given for both this course and 01:563:121. Prerequisite: 01:013:152.

01:013:160-161 *Elementary Hindi I,II (4,4)*
Introduction to sound, grammar, and writing system of Hindi; practice and exercises in speaking, reading, and writing. Continuation of Elementary Hindi I; practice and exercises in speaking, reading, and writing.
Prerequisite for 161: 01:013:160. 01:505:160, or placement. Credit not given for both this course and 01:505:160-161.

01:013:162-163 *Elementary Urdu I,II (4,4)*
Introduction to Urdu, focusing on development of elementary-level proficiency in all four language skills.

01:013:176 ***Elementary Persian I (4)***
Introduction to Persian, focusing on development of elementary-level proficiency in all four language skills.
Credit not given for both this course and 01:723:176.

01:013:177 ***Elementary Persian II (4)***
Builds on skills acquired in Elementary Persian I. Focus on Persian orthography, spelling, grammar, vocabulary, and the four language skills. Emphasis on actively using the language for interpersonal, interpretive, and presentational modes of communication.
Prerequisite: 01:013:176 or 01:723:176 or placement exam. Credit not given for this course and 01:723:177.

01:013:186-187 ***Elementary Swahili I,II (4,4)***
Introduction to Swahili, focusing on development of elementary-level proficiency in all four language skills.

01:013:188 ***Introduction to Syriac (3)***
Introduction to reading and writing in Classical Syriac (Aramaic), with focus on understanding basic Syrian grammar and writing simple short texts in Syriac.

01:013:190-191 ***Elementary Turkish I,II (4,4)***
Introduction to Turkish, focusing on development of elementary-level proficiency in all four language skills.
Credit not given for both this course and 01:973:190-191.

01:013:192-193 ***Elementary Twi I,II (4,4)***
Introduction to Twi, focusing on development of elementary-level proficiency in all four language skills.
Credit not given for both this course and 01:974:192-193.

01:013:201 ***Crossroads: Classical Literatures of Africa, the Middle East, and South Asia (3)***
Survey of classical literary traditions of Africa, the Middle East, and South Asia in comparative context.
Credit not given for both this course and 01:685:204.

01:013:202 ***Cinemas of Africa and Asia (3)***
Survey of the cinemas of Africa, the Middle East, and South Asia.

01:013:203 ***Language and Society in Africa, the Middle East, and South Asia (3)***
This course is about language in society. It introduces language within its social context with special reference to African, Middle Eastern, and South Asian speech communities. It examines the interaction and inter-sectionality of language and variables such as power, class, ethnicity, gender, and education. It also looks at the range of articulations of politico-linguistic problems and challenges, including language conflicts, linguistic inequalities, and minority language rights.

01:013:204 ***Introduction to Discourse Analysis (3)***
Introduction to theories, approaches, and methodologies for the study of socially situated language use. Multidisciplinary examination of written and spoken languages/texts to understand the linguistic qualities of language use and the impact of discourse on people's beliefs, attitudes, assumptions, actions, interactions, and social behaviors.

01:013:205 ***Cultural Forces in International Politics (3)***
Exploration of cultural forces in world politics, with a focus on language and literature as important factors in the shaping of political relations across cultures and nations.

01:013:206 ***Banned Books (4)***
Global history of censorship with a focus on the political and cultural contexts of countries like the USA, Niger, Egypt, and India. How ideas in great books have been suppressed through debates about sedition, blasphemy, obscenity, and sexuality and strategies that people used to undermine that suppression, such as book smuggling, underground markets, exile, and translation.
Credit not given for this course and 01:195:206.

01:013:208 ***Jewish-Muslim Relations: History and Culture (3)***
Surveys the cultural history of Jewish-Muslim relations from the seventh century up to our present. Analyzes this important and unique aspect of Jewish and Muslim pasts and the place of the Jews in the cultural history of Islam. Course taught in English.
Credit not given for both this course and 01:508:208 or 01:563:208.

01:013:210 ***World Literature and Social Change (3)***
Critical investigation of diverse fiction from a global perspective with a particular ficus on social change in Africa, the Middle East, and South Asia.

01:013:211 ***Introduction to the Literatures of Africa (3)***
Literatures of Africa from their origins to the present.

01:013:217 ***African Immigrant Literature (3)***
A historical survey of the literary works of several writers from various parts of Africa living in Europe and the USA.
Taught in English.

01:013:220 ***Introduction to the Qur'an (3)***
Academic study of the Qur'an including the origin of the Qur'an, its role as a cultural and historical phenomenon; various controversies and disputes that have revolved around the Qur'an; different schools of thought regarding interpretation of the Qur'an; and development interpretative schools over time as the needs and understandings of any given society have developed. Taught in English. No prior knowledge of the Arabic or of the Qur'an is required.
Credit not given for both this course and 01:840:229.

01:013:221 ***Introduction to the Literatures of the Middle East (3)***
Literatures of the Middle East from their origins to the present.
Credit not given for both this course and 01:195:221 or 01:685:221.

01:013:225 ***Global Arabic (3)***
Traces the historical development of Arabic as a global language, the various meaning Arabic has come to acquire in various parts of the world, and the functions it has come to serve in different periods and different global spaces. Arabic's iterations with other languages and their sociolinguistic implications.
Taught in English. Credit not given for this course and 01:685:225.

01:013:226 ***Rhythms of Resistance: Global Hip Hop (3)***
Explores how hip hop is used across different cultural, linguistic, and geographical localities as an artistic technology for framing issues of racial, gender, sexual, political, economic, health, and philosophical concern.

01:013:229 ***War and Literature in the Arab World (3)***
Examines war and literature through a multifaceted approach, exposing diverse experiences and perspectives that shape creative process of writing during times of high conflict and crisis. No previous knowledge of Middle Eastern languages or literatures assumed.

01:013:231 ***Introduction to the Literatures of South Asia (3)***
Literatures of South Asia from their origins to the present.
Credit not given for both this course and 01:195:243. All works studied in translation.

01:013:232 ***Women Writers of South Asia (3)***
Survey of recent writings by women from a variety of cultural, linguistic, and regional areas of South Asia.
Credit not given for both this course and 01:195:232 or 01:988:232.

01:013:240-241 ***Intermediate Arabic I,II (4,4)***
Continued development of oral and written proficiency. Elementary literary material. Detailed exploration of the underlying linguistic structures of the language.
Prerequisites: 01:013:141, 01:013:145, 01:074:141, 01:074:145, or placement. Credit not given for both this course and 01:074:240-241.

01:013:243 ***Classical Arabic (3)***
Introduction to classical and Qur'anic Arabic.
Prerequisites: 01:013:141 or 01:074:141 or equivalent.

01:013:244 ***Egyptian Arabic I (3)***
Introduction to Egyptian Arabic or masri, most widely spoken of Arabic vernaculars, with focus in speaking, listening, writing, and reading, with an eye to future study in Egypt.
Credit not given for both this course and 01:074:244.

01:013:245 ***Arabic Graphic Narratives (3)***
Introduction to Arabic graphic narratives (comics, graphic novels, newspaper cartoons, graffiti, and internet memes) in global context in translation. No previous knowledge of Middle Eastern languages or literatures assumed.

01:013:252-253 ***Intermediate Modern Hebrew I,II (4,4)***
Development of language skills; selected readings.
Prerequisite: 01:013:152, 01:685:102, 01:563:102, or placement. Credit not given for both these courses and 01:563:131-132 or 01:685:131-132.

01:013:260-261 ***Intermediate Hindi I,II (4,4)***
Continued development of oral and written proficiency. Elementary literary material. Detailed exploration of the underlying linguistic structures of the language.
Prerequisite: 01:505:161 or 01:013:161 or placement. Credit not given for both this course and 01:505:260-261.

01:013:266 ***Ancient Egypt (1.5)***
Introduction into ancient Egypt. Topics include a historical overview, religion, art, interconnections between ancient Egypt and ancient Israel, and Hieroglyphic Egyptian language and literature.
Credit not given for both this course and 01:563:266.

01:013:276-277 ***Intermediate Persian I,II (4,4)***
Continued development of oral and written proficiency. Elementary literary material. Detailed exploration of the underlying linguistic structures of the language.
Prerequisite: 01:013:177 or 01:723:177 or placement. Credit not given for both this course and 01:723:276-277.

01:013:280-281 ***Intermediate Sanskrit I,II (4,4)***
Reading of intermediate-level Sanskrit technical literature: grammar, logic, and textual exegesis.
Prerequisite: 01:013:181 or permission of instructor.

01:013:285 ***Language and Globalization (3)***
Linguistic and sociolinguistic dimensions of globalization and current debates surrounding language and globalization.

01:013:286-287 ***Intermediate Swahili I,II (4,4)***
Continued development of oral and written proficiency. Elementary literary material. Detailed exploration of the underlying linguistic structures of the language.
Prerequisite: 01:013:187.

01:013:290-291 ***Intermediate Turkish I,II (4,4)***
Continued development of oral and written proficiency. Elementary literary material. Detailed exploration of the underlying linguistic structures of the language.
Prerequisite: 01:013:191 or 01:973:191 or placement. Credit not given for both this course and 01:973:290-291.

01:013:292-293 ***Intermediate Twi I,II (4,4)***
Continued development of oral and written proficiency. Elementary literacy material. Detailed exploration underlying linguistic structures of the language.
Prerequisite: 01:013:193 or placement.

01:013:294-295 ***Intermediate Yoruba I,II (4,4)***
Continued development of written and oral proficiency. Elementary literary material. Detailed exploration of the underlying linguistic structures of the language.
Prerequisite: 01:013:134 or 01:013:195.

01:013:301 ***Topics in African, Middle Eastern, and South Asian Languages and Literatures (3)***
Variable content. Studies in particular ideas, themes, forms, and historic units in literature, linguistics, or sociolinguistics in one or more regions covered by AMESALL.

01:013:302 ***Topics in African, Middle Eastern, and South Asian Languages and Literatures (1.5)***
Variable content. Studies in particular ideas, themes, forms, and historic units in literature, linguistics, or sociolinguistics in one or more regions covered by AMESALL.

01:013:304 ***Introduction to Translation Studies (3)***
Introduction to the main themes and issues in contemporary translation studies.

01:013:305 ***Languages in Peril: African, Middle Eastern, and South Asian (3)***
Introduction to local languages, their scientific and cultural value, and the threat posed by their extinction, with a focus upon the endangered languages of Africa and Asia.

01:013:307 ***Introduction to Postcolonial Literatures and Theories (3)***
Study of novels, poetry, essays, and films from regions of the world deemed postcolonial, which may include Africa, Latin America, South and Southeast Asia, and the Caribbean, among others. Discussion of major issues in postcolonial theory and criticism.
Credit not given for both this course and 01:195:307.

01:013:308 ***Minorities in the Middle East (3)***
Examination of various ethno-linguistic and religious minority groups, their origins, their oral and written literatures, their recent history (from 1798 onwards), their current status, and their future prospects, and how these factors influence their experiences of and perspectives on the world.
Credit not given for both this course and either 01:685:306 or 01:840:306.

01:013:311 ***Women Writers of Africa (3)***
Survey of recent writings by women from a variety of cultural, linguistic, and regional areas of Africa.
Credit not given for both this course and 01:195:363.

01:013:312 ***African Folklore and Myth (3)***
Survey of the folklore of Africa and the African diaspora.

01:013:314 ***Islam and African Literature (3)***
Impact of Islam on African literature, and Islam as a theme of literary expression.
Credit not given for both this course and 01:840:377.

01:013:315 ***Political Thought in African Literatures (3)***
Literatures of Africa as an instrument of political thought and political activism.

01:013:316 ***African Literature of the South Asian Diaspora (3)***
Imaginative works of writers of the South Asian diaspora in East Africa and Southern Africa.

01:013:320 ***The Ottoman Middle East: Politics, Culture, Literature (3)***
A study of the sociocultural atmosphere of the Middle East in the late 19th-early 20th century under Ottoman rule.

01:013:322 ***Middle Eastern Folklore and Myth (3)***
A survey of the folklore of the Middle East, with a focus upon Jewish, Christian, Mandaean, and Muslim folktales from Iraq and the Levant.
Credit not given for both this course and 01:685:323.

01:013:324 ***Ottoman Africa (3)***
Cultural legacy of Ottoman-Turkish rule in Africa during 19th century in context of radical political and cultural shifts, through historical narratives, novels, short stories, essays, articles, and poetry.

01:013:325 ***Women Writers of the Middle East (3)***
Survey of recent writings by women from a variety of cultural, linguistic, and regional areas of the Middle East.

01:013:326 ***Orhan Pamuk (3)***
Introduction to Turkish Nobel Prize laureate Orhan Pamuk through novels, essays and articles, interviews and autobiographical narratives, offering practical instruction in literary and cultural criticism.

01:013:331 *Modern Literatures of South Asia (3)*
Literary works from modern South Asia.
Credit not given for both this course and 01:195:249. All works studied in translation.

01:013:334 *The Modern Indian Woman (3)*
Course focuses on how representations of women have shaped ideas of modern Indian citizenship and belonging in colonial and postcolonial periods.

01:013:335 *Caribbean Pluralities and Indo-Caribbean Literature (3)*
A study of some of the major canonical works of the Anglophone Caribbean and Indo-Caribbean writers.
Credit not given for both this course and 01:195:335 or 01:195:338.

01:013:337 *Film and Literature in South Asia (3)*
A critical study of a wide range of South Asian films and the literary works they are based on/inspired by.

01:013:340-341 *Advanced Arabic I,II (3,3)*
Reinforcement of oral and written proficiency developed within a cultural context. Comprehensive understanding of linguistic structures. Readings in literature.
Prerequisite: 01:013:241 or 01:074:241 or permission of instructor. Credit not given for both this course and 01:074:340-341.

01:013:342 *Modern Arabic Literatures (3)*
Survey of representative works of modern Arabic literature in translation, including poetry, the novel, the short story, and plays.
Credit not given for both this course and 01:195:365.

01:013:343 *Arabic Classical Literatures (3)*
Survey of a wide selection of Arabic literary texts in translation, dating from the sixth to the 12th centuries, including poetry and prose in both classical and colloquial Arabic.
Credit not given for both this course and 01:195:237. All works studied in translation.

01:013:346 *Literature and Memory in the Arab World (3)*
The course explores the interconnections between memory and literature through close readings of memoirs, novels, poems, short stories, films, and graphic art.
Credit not given for both this course and 01:195:337 or 01:685:347.

01:013:352-353 *Advanced Modern Hebrew I,II (3,3)*
Intensive training in Hebrew grammar and reinforcement of already acquired higher-level language skills: speaking, listening, comprehension, reading, and writing. Text analysis includes newspaper articles and essays.
Prerequisite: 01:563:132, 01:685:132, 01:103:253, or placement. Credit not given for both these courses and 01:563:210-211 or 01:685:210-211.

01:013:354 *Contemporary Hebrew Literature and Media (3)*
Addresses current issues facing Israeli society as reflected in Israeli literature and press. Texts include poetry, songs, essays, newspaper articles, and films.
Prerequisite: 01:563:211 or 01:013:353 or placement. Credit not given for both this course and 01:563:371.

01:013:355 ***Introduction to Modern Israeli Literature (3)***
Introduces students to major writers of modern Hebrew literature with the goal of developing their own critical reading and writing skills. Readings include modern Hebrew poetry, prose, and plays.
Credit not given for both this course and 01:563:372.

01:013:360-361 ***Advanced Hindi I,II (3,3)***
Reading, textual analysis, and content discussion of selected short essays from Hindi newspapers, fictional works, and ethnographic material. Introduction to Hindi discourse structure.
Prerequisite: 01:013:261 or 01:505:261. Credit not given for both this course and 01:505:360-361.

01:013:365 ***Bollywood (3)***
A broad overview of the Bollywood industry and its cinematic productions over the years.
Credit not given for both this course and 01:175:365.

01:013:372 ***Islamic Mystical Literatures (3)***
Examines literary output of mystics in Islamic world. Main focus will be on mystical teachings, although attention will be also paid to literary genres, including not only poetry of various forms and from diverse regions and periods, but also biography and modern novels, all in English translation.
Credit not given for both this course and 01:840:372.

01:013:376-377 ***Advanced Persian I,II (3,3)***
Reinforcement of oral and written proficiency developed within a cultural context. Comprehensive understanding of linguistic structures. Readings in literature.
Prerequisite: 01:013:277 or placement. Credit not given for both this course and 01:723:376-377.

01:013:386-387 ***Advanced Swahili I,II (3,3)***
Reinforcement of oral and written proficiency developed within a cultural context. Comprehensive understanding of linguistic structures. Readings in literature.
Prerequisite: 01:013:287 or 01:956:287 or placement.

01:013:390-391 ***Advanced Turkish I,II (3,3)***
Reinforcement of oral and written proficiency developed within a cultural context. Comprehensive understanding of linguistic structures. Readings in literature.
Prerequisite: 01:013:291 or placement. Credit not given for both this course and 01:973:390-391

01:013:392-393 ***Advanced Twi I,II (3,3)***
Develop advanced-level proficiency in all four language skills: writing, speaking, listening, and reading Twi (Akan).
Prerequisite: 01:013:293 or placement.

01:013:401 ***Senior Seminar in Literature and Society (3)***
Advanced seminar on critical theories and methods of analysis related to modern and contemporary literatures of Africa, Middle East, and South Asia.
Prerequisites: 01:013:201. Open only to students with senior standing or by permission of instructor.

01:013:402 ***Advanced Topics in African, Middle Eastern, and South Asian Languages and Literatures (3)***
Variable content. Advanced studies in particular ideas, themes, forms, and historic units in literature, linguistics, or sociolinguistics in one or more regions covered by AMESALL.

01:013:403-404 ***Translation Practicum I,II (3,3)***
Practical course in translation into English.***Prerequisites: 01:013:304.***

01:013:409 ***Introduction to the Semitic Languages (3)***
Survey of the Semitic languages and their history from a comparative perspective.
Prerequisite: One year of a Semitic language (such as Hebrew or Arabic) or permission of instructor. Credit not given for both this course and 01:563:409.

01:013:410 ***African Immigrant Voices (3)***
An examination of the literary works of African immigrant writers in the United States and Europe.

01:013:412 ***Literature and Religion (3)***
Addresses relationship between literature and religion through close reading of select literary works and survey of major schools of interpretation within contemporary literary and cultural criticism.

01:013:430 ***Gender, Nation, and Literature in South Asia (3)***
Course focuses on how representations of women have shaped ideas of modern Indian citizenship and belonging in colonial and postcolonial periods.
Credit not given for both this course and 01:195:430 or 01:988:431.

01:013:432 ***Readings in Modern Hindi Literature (3)***
Introduces students to modern Hindi literature and its various genres. Course conducted entirely in Hindi.
Prerequisite: 01:013:261 or 01:505:261. Credit not given for both this course and 01:505:432.

01:013:433 ***Modern Urdu Literature and Popular Culture (3)***
Introduces students to modern Urdu literature and popular culture in various genres and cultural contexts. Provides overview of diverse manifestations of South Asian culture and history in Urdu literature. Conducted entirely in Urdu.

01:013:442 ***Readings in Modern Arabic Literature (3)***
Critical readings of selected short stories from the modern Arab world.
Prerequisite: Advanced Arabic 01:013:341, near-native proficiency in Arabic, or permission of instructor. Credit not given for both this course and 01:074:442.

01:013:445 ***Storytelling in the Muslim World (3)***
Exploration of storytelling traditions from culturally diverse communities of the Muslim world, from medieval times to present.

01:013:452 ***Readings in Modern Hebrew Literature (3)***
Reading and analysis of modern Hebrew poetry and short prose, with an emphasis on major Israeli authors.
Prerequisite: 01:563:372 or 01:013:355 or placement. Credit not given for both this course and 01:563:471.

01:013:453 ***The Hebrew Novel (3)***
Reading and analysis of the modern Hebrew novel, with an emphasis on major Israeli authors.
Prerequisite: 01:563:372, 01:013:355, or placement. Course taught in Hebrew. Credit not given for both this course and 01:563:472.

01:013:454 ***Love and Desire in Hebrew Prose and Poetry (3)***
Explores the themes of love and desire in modern Hebrew prose, poetry, and film. Special attention paid to how the literature and films handle the issues of love, desire, and personal relationships in contemporary Israeli culture.
Prerequisite: 01:563:372, 01:013:355, or placement. Course taught in Hebrew. Credit not given for both this course and 01:563:484.

01:013:455 ***Hebrew Literature and Israeli Society (3)***
Traces the development of modern Israeli literature, from the establishment of the state of Israel in 1948 to the present day. Of special interest will be the manner in which these stories define the quintessential Israeli hero and contend with the question of Israeli identity.
Prerequisite: 01:563:372, 01:013:355, or placement. Course taught in Hebrew. Credit not given for both this course and 01:563:485.

The study of history allows students to understand the past as well as the present--how and why our world became the way it is today. The Department of History offers an array of two hundred course offerings and many research opportunities. The courses are designed to (1) provide the student with an understanding of the social, political, and cultural forces that have shaped the course of history and our present world; and (2) teach the student the important skills of critical reading and research, logical analysis, and effective written and oral communication.

Students should begin with introductory-level courses (100 or 200), proceed to the upper-level courses that are at the center of the history major (300), and finally to the advanced courses (400), which usually require significant research.
The history major is designed to expose students to the histories of various civilizations over time and place. However, it also affords specialization in one area, time, or theme (e.g., African history, medieval Europe, or women in history, etc.) to interested students, in consultation with departmental advisers.

For additional information, visit the department's website.

History (SAS)

Learning Goals

Learning Goals

Conceptual Learning Goals. Students who study history at Rutgers University can expect to develop an understanding of the following concepts:

1) The role of human agency in bringing about change in society and institutions. This includes:

- understanding how individuals are shaped by their own past and by the past of their society and institutions
- the role of diversity and difference in shaping human experience

2) The operation of large-scale forces responsible for causing change over time, such as politics, economics, and religion

Practical Learning Goals. Students who study history at Rutgers University can expect to develop the following practical skills:

1) The ability to understand a variety of historical primary sources such as archival documents, diplomatic correspondence, journalistic reports, and private papers

2) The ability to read and understand secondary sources written in academic prose and to understand the substance of debates

3) The ability to analyze information effectively and to use different kinds of historical sources to a historical argument

4) The ability to write persuasively and communicate effectively

5) The ability to work independently and to conduct independent research

History (SAS)

Major Requirements

Major Requirements

History majors must complete 12 courses in history (36 credits) with a grade of C or better in each course. A minimum of eight courses for the major must be taken at Rutgers University-New Brunswick. All history majors must fulfill the following requirements:

1. At least five courses at the 300 or 400 level

2. At least eight courses at the 200 through 400 level

3. History Workshop, 01:506:299, taken by the end of the sophomore year; transfer students must take 01:506:299 in their first semester at Rutgers

4. A History Seminar, either 01:506:401 or 402,or Public History Internship (01:506:451), or History Honors Thesis (01: 506:495 and 496) usually taken in the junior year, or senior year

5. Of the 12 history courses, at least two must be in each of the following three areas:

a. Global, African, Asian, Latin American, or Native American history (selected 506 courses and all 508 courses)

b. European history (510)

c. United States history (512)

6. At least one course focusing on the period before 1500 C.E.

7. History majors shall not count more than two overlapping courses between history and any other majors or minors.

Ancient History and Classics Option

The ancient history and classics option in the history major requires 15, 3-credit courses (of which at least three must be history department courses and at least three must be classics department courses), apportioned as follows:

1. At least two courses in ancient languages (at least two languages: Latin, Greek, and/or other ancient languages offered at the university, e.g., Sanskrit and Hebrew). One of the courses must be a Greek or Latin course at the 200 level or above. Advanced placement can substitute for either or both of the courses, if at the appropriate level. Suggested intermediate courses are 01:490:207 Classical Greek Prose (3) and 01:580:203 Intermediate Latin Prose (3).

2. Three ancient history or classics survey courses at the 200 level, from among:

01:190:205 Greek Civilization (3)
01:190:206 Roman Civilization (3)
01:508:200 Ancient Near East (3)
01:510:201 Ancient Greece (3)
01:510:202/01:190:209 Ancient Rome (3)
01:510:205 History of the Byzantine Empire (3)
01:510:207 Byzantine Civilization (3)

In consultation with an adviser, appropriate higher-level courses or courses from other departments may be substituted for any of the 200-level courses mentioned above.

3. Six ancient history or classics lecture courses at the 300 level, from among:

01:190:310 Augustan Rome (3)
01:190:320 Women in Antiquity (3)
01:190:322 Greek Political Philosophy (3)
01:190:325 Cults, Magic, and Witchcraft (3)
01:190:350/01:510:350 Greek Society (3)
01:190:355 Ancient Mythology and Society (3)
01:190:372 Cities of the Classical World (3)
01:190:373 Pompeii: The Life and Death of a Roman Town (3)
01:490:306 From Athens to Alexandria (3)
01:490:391 Readings in Greek Prose (historical topic/author) (3)
01:510:301 Early Greece (3)
01:510:302 Classical Greece (3)
01:510:303 Hellenistic World (3)
01:510:304 The Rise of the Roman Republic (3)
01:510:305 The Crisis of the Roman Republic (3)
01:510:306/01:190:306 Roman Empire (3)
01:510:307 The Roman World in Late Antiquity (3)
01:510:308 Creating Culture and History in the Ancient World (3)
01:510:403 Ancient Warfare and Diplomacy (3)
01:580:304 Cicero: Orations (3)
01:580:325 The History of Livy (3)
01:580:329 Tacitus (3)

4. One ancient history or classics course at the 300 or 400 level focusing on research and writing such as:

01:490:391 Readings in Greek Prose (historical readings) (3)
01:506:401,402 History Seminar (ancient topic) (3,3)
01:506:471,472 Research in History (ancient topic) (3,3)
01:510:407 Rome in the Age of Augustus (3)
01:580:369,370 The Seminar in Latin (historical readings) (3,3), college honors, or departmental project (appropriate topic)

5. Three additional courses in history, classics, Latin, or Greek (in any combination, but no more than two of them at the 100 level)

History (SAS)

Minor Programs and Requirements

Minor Programs and Requirements

General History Minor

The minor in history consists of six 3-credit courses, passed with a grade of C or better, including three courses at the 300 to 400 level. A minimum of four courses for the minor must be taken at Rutgers University. No more than two courses used to complete a major or minor in another department can be used to fulfill the requirements of the history minor.

Law and History Minor

The minor in law and history provides an interdisciplinary introduction to the study of law, with a particular focus on the role of history in examining law and legal culture in their social contexts. The minor in law and history consists of six 3-credit courses, passed with a grade of C or better, from the following list. No more than one course used to complete a major or minor in another department can be used to fulfill the requirements of the law and history minor.

01:506:216 Law and History (required introductory course)

Four of the following history courses:
01:506:210 Sex and Power
01:506:220 Piracy: A Global History
01:506:236 Poverty in World History
01:506:255 Science, Nature, and Empire
01:506:260 Wars, Wayfarers, and the Wall: A History of the U.S.-Mexican Border
01:508:110 Political Islam: Present and Past
01:508:367 The Afro-Latin American Experience
01:510:245 The Arts of Power
01:510:261 History of the Holocaust
01:510:268 Fascism
01:510:335 Modern France
01:510:345 English Constitutional History to 1688
01:510:394 Human Rights

01:512:215 American Legal History
01:512:216 Famous Trials
01:512:221 Abortion: The Collision of History, Law, Religion, Medicine, and Human Rights
01:512:229 History of Medical Ethics
01:512:238 History of Homelessness
01:512:250 Natives and Newcomers: Immigration and Migration in U.S. History
01:512:253 Asian American History
01:512:264 Black Lives Matter
01:512:308 History and Asylum Law
01:512:317 Murder in American History
01:512:318 Political Corruption in America
01:512:322 Drugs: A Social History
01:512:342 Policing in Black Communities: From Slavery to Mass Incarceration (3)
01:512:368 History of Civil Rights, 1900-1980
01:512:383 Women's Rights in America, 1800-1930
01:512:385 Women Behaving Badly
01:512:402 American Constitutional History to 1865
01:512:404 American Constitutional History from 1865
One of the following electives from outside of the Department of History:

Africana Studies
01:014:353 Black Community Law and Social Change
Anthropology
01:070:360 Law, Justice, Rights
Criminal Justice
(Special permission numbers are required for the following courses):
01:202:201 Introduction to Criminal Justice (recommended)
01:202:202 Police
01:202:203 Prisons and Prisoners
01:202:204 Crime and Public Policy
01:202:205 Criminal Procedure
Economics
01:220:395 Law and Economics
(01:220:102 and 01:220:103 are prerequisites for 01:220:395, and precalculus math is a prerequisite for 01:220:102 and 01:220:103)
Latino and Caribbean Studies
01:595:370 Law and the Latino Community
Middle Eastern Studies
01:685:457 Islamic Law and Jurisprudence
Philosophy
01:730:345 Philosophy and the Law
01:730:358 Philosophy of Law
01:730:341 Ethics through History
01:730:342 Seventeenth- and Eighteenth-Century Social and Political Philosophy
Political Science

01:790:340 Law and Society
01:790:373 Legal Philosophy, Rights, and Justice
01:790:401 American Constitutional Law I
01:790:404 Politics of Criminal Justice
01:790:406 Civil Liberties and Civil Rights
01:790:426 Gender, Public Policy, and the Law
Religion
01:840:425 Seminar on Law and Religion
Sociology
01:920:349 Law and Society
01:920:222 Criminology
01:920:304 Sociology of Deviant Behavior
01:920:361 Sociology of Drug Use
Women's, Gender, and Sexuality Studies
01:988:307 Women and the Law

STEM in Society Minor

The minor in STEM in society examines science, technology and engineering, environment, medicine, and quantification in their historical contexts from the ancient world to the 21st century. The minor in STEM in society consists of six 3-credit courses, passed with a grade of C or better, from the following list:

01:506:226 Contemporary Challenges in International Health
01:506:227 Health, Culture, and Society
01:506:233 History of the Future
01:506:247 The Seas Around Us: Ocean History in Global Perspective
01:506:249 Climate Politics: A Deep History
01:506:250 Science, Collecting, and Power
01:506:251 History of Science and Society
01:506:252 History of Technology and Society I
01:506:253 History of Technology and Society II
01:506:254 History of Oil
01:506:255 Science, Nature, and Empire
01:506:321 Disease in History
01:506:322 Black Death to Obesity Epidemic: History of Public Health in the West
01:506:324 History of AIDS Pandemic
01:506:325 Living on the Edge: Human Societies in Extreme Environments
01:508:255 Global Environmental History
01:508:328 History of Health and Healing in Africa
01:508:364 Environmental History of Latin America
01:510:248 The Last Climate Crisis: Histories of ¿The Little Ice Age¿ c. 1300-1800
01:512:121 Health and Environment in America
01:512:210 Food in the United States and the World
01:512:221 Abortion: The Collision of History, Law, Religion, Medicine, and Human Rights
01:512:229 History of Medical Ethics
01:512:230 History of Medicine in Film

01:512:235 Accidents and Disasters in the United States and the World
01:512:237 Data: A Social History
01:512:321 Health Care and Society in America
01:512:322 Drugs: A Social History
01:512:323, 324 History of the North American Environment
01:512:328 Science in American Culture
01:512:329 Technology and Nature in American History
01:880:210 The Edison Effect: Technological Innovation in American Culture
01:880:212 Science and Dollars: The Business of Innovation Since the Age of Edison

History (SAS)

Certificate Programs and Requirements

Certificate Programs and Requirements

Law and History Certificate

The certificate in law and history provides an interdisciplinary introduction to the study of law, with a particular focus on the role of history in examining law and legal culture in their social contexts. The certificate in law and history consists of five 3-credit courses, passed with a grade of C or better, from the following list. No more than one course used to complete a major or minor in another department can be used to fulfill the requirements of the law and history certificate.

01:506:216 Law and History (required introductory course)

Four of the following history courses:

01:506:210 Sex and Power
01:506:220 Piracy: A Global History
01:506:236¿Poverty in World History
01:506:255 Science, Nature, and Empire
01:506:260 Wars, Wayfarers, and the Wall: A History of the U.S.-Mexican Border
01:508:110 Political Islam: Present and Past
01:508:367 The Afro-Latin American Experience
01:510:245 The Arts of Power
01:510:261 History of the Holocaust
01:510:268 Fascism
01:510:335 Modern France
01:510:345 English Constitutional History to 1688
01:510:394 Human Rights
01:512:215 American Legal History
01:512:216 Famous Trials
01:512:221 Abortion: The Collision of History, Law, Religion, Medicine, and Human Rights
01:512:229 History of Medical Ethics
01:512:238 History of Homelessness

01:512:250 Natives and Newcomers: Immigration and Migration in U.S. History
01:512:253 Asian American History
01:512:264 Black Lives Matter
01:512:308 History and Asylum Law
01:512:317 Murder in American History
01:512:318 Political Corruption in America
01:512:322 Drugs: A Social History
01:512:342 Policing in Black Communities: From Slavery to Mass Incarceration (3)
01:512:368 History of Civil Rights, 1900-1980
01:512:383 Women's Rights in America, 1800-1930
01:512:385 Women Behaving Badly
01:512:402 American Constitutional History to 1865
01:512:404 American Constitutional History from 186

One of the following electives from outside of the Department of History:

Africana Studies
01:014:353 Black Community Law and Social Change
Anthropology
01:070:360 Law, Justice, Rights
Criminal Justice
(Special permission numbers are required for the following courses):
01:202:201 Introduction to Criminal Justice (recommended)
01:202:202 Police
01:202:203 Prisons and Prisoners
01:202:204 Crime and Public Policy
01:202:205 Criminal Procedure
Economics
01:220:395 Law and Economics
(01:220:102 and 01:220:103 are prerequisites for 01:220:395, and precalculus math is a prerequisite for 01:220:102 and 01:220:103)
Latino and Caribbean Studies
01:595:370 Law and the Latino Community
Middle Eastern Studies
01:685:457 Islamic Law and Jurisprudence
Philosophy
01:730:345 Philosophy and the Law
01:730:358 Philosophy of Law
01:730:341 Ethics through History
01:730:342 Seventeenth- and Eighteenth-Century Social and Political Philosophy
Political Science
01:790:340 Law and Society
01:790:373 Legal Philosophy, Rights, and Justice
01:790:401 American Constitutional Law I
01:790:404 Politics of Criminal Justice

01:790:406 Civil Liberties and Civil Rights
01:790:409 Courts and Public Policy
01:790:426 Gender, Public Policy, and the Law
Religion
01:840:425 Seminar on Law and Religion
Sociology
01:920:349 Law and Society
01:920:222 Criminology
01:920:304 Sociology of Deviant Behavior
01:920:361 Sociology of Drug Use
Women's, Gender, and Sexuality Studies
01:988:307 Women and the Law

Public History Certificate

Public history explores interpretations of the past produced for the general public in a variety of different settings such as museums, archives, historical preservation, monuments, etc. The certificate in public history consists of the following five courses:

1. History Workshop 01:506:299
2. Public History: Theory, Method, and Practice 01:506:301
3. Introduction to Oral History 01:506:302 or Digital History 01:506:303 or a class on digital humanities (01:506:299 and 01:506:301 should be prerequisites for coursework in oral history or digital history)
4. One elective. See history department's website for approved electives: https://history.rutgers.edu/academics/public-history.
5. Public History Internship 01:506:451

STEM in Society Certificate

The certificate in STEM and society examines science, technology and engineering, environment, medicine, and quantification in their historical contexts from the ancient world to the 21st century. The certificate in STEM and society consists of five 3-credit courses, passed with a grade of C or better, from the following list:

01:506:226 Contemporary Challenges in International Health
01:506:227 Health, Culture, and Society
01:506:233 History of the Future
01:506:247 The Seas Around Us: Ocean History in Global Perspective
01:506:249 Climate Politics: ADeep History01:506:250 Science, Collecting, and Power01:506:251 History of Science and Society
01:506:250 Science, Collecting, and Power
01:506:251 Science and Society
01:506:252 History of Technology and Society I
01:506:253 History of Technology and Society II
01:506:254 History of Oil
01:506:255 Science, Nature, and Empire
01:506:321 Disease in History
01:506:322 Black Death to Obesity Epidemic: History of Public Health in the West

01:506:324 History of AIDS Pandemic
01:506:325 Living on the Edge: Human Societies in Extreme Environments
01:508:255 Global Environmental History
01:508:328 History of Health and Healing in Africa
01:508:364 Environmental History of Latin America
01:510:248 The Last Climate Crisis: Histories of `The Little Ice Age¿ c. 1300-1800
01:512:121 Health and Environment in America
01:512:210 Food in the United States and the World
01:512:221 Abortion: The Collision of History, Law, Religion, Medicine, and Human Rights
01:512:229 History of Medical Ethics
01:512:230 History of Medicine in Film
01:512:235 Accidents and Disasters in the United States and the World
01:512:237 Data: A Social History
01:512:321 Health Care and Society in America
01:512:322 Drugs: A Social History
01:512:323, 324 History of the North American Environment
01:512:328 Science in American Culture
01:512:329 Technology and Nature in American History
01:880:210 The Edison Effect: Technological Innovation in American Culture
01:880:212 Science and Dollars: The Business of Innovation Since the Age of Edison

History (SAS)

Teacher Certification

Teacher Certification

History majors interested in entering the five-year program in social studies education should contact advisers in the Department of History and in the Graduate School of Education in their first year or as soon as possible thereafter.

History (SAS)

Departmental Honors Program

Departmental Honors Program

The departmental honors program enables students to pursue their individual interests in history and helps prepare them for future research work or graduate study. Qualified students take a two-semester honors thesis seminar (in the spring of the junior year and fall of the senior year) and work with a faculty adviser to conduct original historical research and write a thesis. Interested students should read the program description available on the department website and discuss their plans thoroughly and well in advance with a faculty adviser. Approval of the proposed thesis topic by a faculty member who will serve as thesis adviser is required for acceptance to the program.

For more information, see the department website: https://history.rutgers.edu/academics/undergraduate/honors-program.

History (SAS)

General/Comparative History Courses (506)

General/Comparative History Courses (506)

01:506:101 ***World History I (3)***
Traces human history from the development of modern humans to the beginning of the first era of globalization with the voyage of Columbus to the Americas.

01:506:102 ***World History II (3)***
World history since the late 15th century.

01:506:105 ***Honors Colloquium (3)***
Study of a contemporary social issue from the perspective of the discipline of history. Specific title available at time of registration through the School of Arts and Sciences honors programs.
By permission of the department. Open to students in school honors.

01:506:110 ***Age of European Global Expansion (3)***
Traces the rise of Europe to global dominance beginning with early explorers and empire builders, and focuses on Europe's impact on Africa, Asia, and the Americas.

01:506:112 ***Patterns in Civilization: Love (3)***
Love and its literary expression in Japan and Europe since the Middle Ages. Comparative analysis of culture and society, political and economic transformations, and religion.

01:506:113 ***Patterns in Civilization: Death (3)***
Individual and societal responses to death in Japan, Europe, and the United States. Comparative analysis of culture and society, political and economic transformation, and religion.

01:506:114 ***World Civilizations: Europe, Africa, and America (3)***
Family, economy, government, and religion in major civilizations of West Africa, Europe, and North America. Interaction of these three geographical areas through the slave trade, colonialism, and the movement of ideas and culture.

01:506:115 ***World War II in World History (3)***
Examines the political, military, economic, social, and cultural dimensions of World War II from the perspectives of its different combatants. Considers the war from the perspective of states, soldiers, and civilians around the world.

01:506:118 ***Looking at 21st-Century World History (3)***
Interdisciplinary examination of the role of the visual in both our daily lives and in the way we remember the past. Taught through a series of topics ranging from war and violence to gender, work, and play.
Credit not given for both this course and 01:082:118.

01:506:151 ***History and the News (3)***
Analysis of the historical background to events in the current week's news; emphasis on how historical knowledge deepens understanding of contemporary issues.

01:506:201 ***Twentieth-Century Global History to 1945 (3)***
Emphasis on themes in political-military and social-cultural history worldwide, including imperialism, origins and impact of two world wars, revolutions, fascism, Nazism, and race and gender issues.

01:506:202 ***Twentieth-Century Global History from 1945 (3)***
Focus on critical themes from Hiroshima to September 11, 2001, including the atomic age, superpower rivalries, decolonization, population growth and development, globalization, environmental degradation, and terrorism.

01:506:203 ***Histories of the Pacific (3)***
Survey of Pacific island peoples and cultures from early navigators and settlers to the colonial and postcolonial eras of the 19th and 20th centuries.

01:506:205 ***Paris/Tokyo: 1700-Present (3)***
Comparative study of French and Japanese cultures from 1700 to the present, drawing on literary and visual representations from both traditions.

01:506:210 ***Sex and Power (3)***
Investigates how gender relations have changed over time and place by considering different moments in world history. Examines how states, religions, families, and other social or political institutions have created and enforced sex and gender norms.

01:506:211 ***Women in Europe and the Americas until 1800 (3)***
Survey of women's roles in Western society and culture--covering Europe and the New World up to about 1800.
Credit not given for both this course and 01:988:211

01:506:212 ***Women in Europe and the United States since 1800 (3)***
Survey of women's roles in Western society and culture--covering the 19th and 20th centuries.
Credit not given for both this course and 01:988:212.

01:506:215 ***The Modern Girl (3)***
Examines the so-called "modern girl" of the 1920s and 1930s. Representations in fiction, film, and advertisements. Concentrates on the West, with comparative evidence from Asia and Africa.
Credit not given for both this course and 01:988:260.

01:506:216 ***Law and History (3)***
Explores the law through historical and contemporary cases, including disputes about legalization of drugs, religious freedom, and immigration controls, from U.S. and global perspectives.
Required for the Law and History Minor/Certificate.

01:506:218 ***Terrorism (3)***
Global historical survey of the development and importance of terrorism from the eighteenth century to the present.

01:506:220 ***Piracy: A Global History (3)***
Examines piracy in world history from Ancient Egypt until the 21st century. Considers its social, political, and economic meanings in different societies.

01:506:221 ***History of Exploration (3)***
Exploring expeditions from Columbus to the moon flights. Experiences of explorers; political, economic, and cultural motives for exploration; effects of exploration on society and on views of the world.

01:506:224 ***Slavery in World History (3)***
Historical survey of the institution of slavery from antiquity to the present day, with particular attention to the relationship of human bondage to broader progress of social and economic change.

01:506:225 ***The Black Atlantic World (3)***
Black Atlantic World (Europe, Atlantic Africa, and the Americas) from the 16th century to the present. Historical, cultural, sociopolitical, and intellectual formations, movements, and connections crisscrossing the Atlantic.

01:506:226 ***Contemporary Challenges in International Health (3)***
Examines the history of Western efforts to promote health and nutrition in the developing world, including Africa, Asia, Latin America, and the former Soviet Republics. Emphasizes the economic, political, and cultural assumptions associated with international health and development.

01:506:233 ***History of the Future (3)***
Examines the global history of human attempts to predict the future from antiquity to the present, with an emphasis on the 19-21st century. Engages with topics and concepts from disciplines including meteorology, economics, statistics, computer science, behavioral economics, psychology, and literature to look at attempts to anticipate the future, from fortune telling to sports picks to weather forecasting.

01:506:227 ***Health, Culture, and Society (3)***
Integrates perspectives from sociology, history, public health, medicine, and the humanities to define health, understand the diverse ways scholars study health, and identify factors that influence the prevalence, distribution, and experience of four health conditions: obesity; depression; cancer; and HIV/AIDS. Implications of research for medical practice, ethics, and policies to enhance health worldwide.
Credit not given for both this course and 01:920:220.

01:506:236 ***Poverty in World History (3)***
Explores poverty as people have experienced and understood it in various times, places, and circumstances through world history.

01:506:241 ***Film and History (3)***
Presentation of films relating to history and culture, combined with readings and discussions of standard history accounts.

01:506:247 ***The Seas Around Us: Ocean History in Global Perspective (3)***
Explores maritime history in a global context from antiquity to the modern period, with a special focus on Polynesian, Malay, Dutch, and Greek mariners, among others.

01:506:249 ***Climate Politics: A Deep History (3)***
Studies climate change in the past and present; explores the legitimacy and manipulation of scientific knowledge; analyzes the connections between climate and imperialism in a global context.

01:506:250 ***Science, Collecting, and Power (3)***
Explores scientific collections from the ancient world to the present in a global context. Examines the relationship between collecting and science, and how science derives its power from making and using collections.
Credit not given for both this course and 16:082:594.

01:506:251 ***History of Science and Society (3)***
Science and its social context from 1500 to the present. Development of ideas; interaction with philosophy, religion, and art; science as a profession.

01:506:252 ***History of Technology and Society I (3)***
Global perspective on the history of materials, energy, manufacturing, transportation, and communication technologies from earliest times to the Industrial Revolution. Central themes include interplay between technology and the pursuits of material wealth, political power, and military, as well as the relationship between early science and burgeoning technology.

01:506:253 ***History of Technology and Society II (3)***
History of production, transportation, and communication technologies worldwide from the Industrial Revolution to the present. Integration of science and technology, rise of consumer technologies, and emergence of the United States as a center for technological, economic, military, and political power.
Special Notation: Does not fulfill global requirement for majors.

01:506:254 ***History of Oil (3)***
Political and economic history of oil over the 20th and into the 21st century. Oil's impact on the rise and fall of empires, the fates of nation-states, its role in war, as well as its varied impact on social and cultural life.

01:506:255 ***Science, Nature, and Empire (3)***
Explores key episodes in the history of science, imperialism, and colonialism in a global context from the 15th to the 21st century.

01:506:260 ***Wars, Wayfarers, and the Wall: A History of the U.S.-Mexican Border (3)***
The history of the U.S.-Mexican border from the colonial era to the present and its contemporary significance for national well-being and national identities in the United States and Mexico. Emphasis on this history's influence on contemporary debates regarding immigration, national borders, and the United States' relationship with Mexico and Mexicans.

01:506:271 ***Jewish History I: Ancient and Medieval (3)***
Social, economic, religious, and political experiences of the Jewish people from the Biblical world of the ancient Near East until the Middle Ages.
Credit not given for both this course and 01:563:201 or 01:685:208.

01:506:272 ***Jewish History II: Modern (3)***
Jewish life from the breakdown of traditional society in Europe in the 1700s until the rise of the modern state of Israel in the 20th century.
Credit not given for both this course and 01:563:202.

01:506:291,292 ***Topics in History (3,3)***
Study of special topics in history at the intermediate level.

01:506:299 ***History Workshop (3)***
Introduction to historical research, analysis, and interpretation. Topical lectures and hands-on workshops.
Required for all history majors.

01:506:301 ***Public History: Theory, Method, and Practice (3)***
Introduction to theory, methods, practice, and politics of public history, exploring production and dissemination of histories in nonacademic settings. Includes workshops conducted by professionals in the field, site visits.

01:506:302 ***Introduction to Oral History (3)***
Introduction to oral history and its methods. How to design an oral history project and how to integrate technology into that design.

01:506:303 ***Digital History (3)***
History of the United States through space and geography. Focus on three key topics: colonial North America, the American Civil War, and the racial landscape of the modern US.

01:506:305 ***Special Topics in Politics, History, and Heritage (3)***
Special topics emphasizing politics, history, and cultural heritage and preservation studies. Special studies in particular theoretical and practical aspects of historic preservation and conservation. Designed by individual instructor.
Credit not given for both this course and 01:082:441.

01:506:313 ***Women and Social Movements to 1945 (3)***
In-depth analysis of different ways women have organized for change. Focus on three or four case studies using cross-cultural perspectives to illustrate various themes of gender and collective action by women.
Credit not given for both this course and 01:988:371.

01:506:314 ***Women and Social Movements since 1945 (3)***
Twentieth-century autonomous women's movements, emphasizing the second wave of feminism from cross-cultural perspectives. Selected case studies to illustrate themes of gender and collective action.
Credit not given for both this course and 01:988:372.

01:506:321 ***Disease in History (3)***
Human disease on a global scale from the Paleolithic period to the present, with emphasis on infectious disease and diet.

01:506:322 ***Black Death to Obesity Epidemic: History of Public Health in the West (3)***
Surveys attempts to protect the health of human populations from the Black Death in Europe to rising concern about obesity in the United States. Explores shifting patterns of disease and illness, and emergence and growth of public health as a domain of expert knowledge and policy in the United States and Europe.

01:506:324 ***History of AIDS Pandemic (3)***
Explores the AIDS epidemic from a range of historical vantage points: science, health care, and social and cultural life in a variety of local, national, international, and institutional contexts. Focuses on United States, Haiti, and Africa.

01:506:325 ***Living on the Edge : Human Societies in Extreme Environments (3)***
Focuses on important changes in human history and their origins in extreme environments. Looks closely at environments such as deserts, mountains, and icescapes, from antiquity to the present day, and in a global context.

01:506:328 ***Atlantic Cultures 1500-1800 (3)***
Encounters between peoples of Europe, Africa, and the Americas from the 16th through the 18th centuries. Team-taught, interdisciplinary course with an emphasis on the interpretation of texts and visual images from the era.

01:506:329 ***Jamestown, 1607, and the Atlantic World (3)***
The original permanent English New World settlement at Jamestown in 1607, from the perspective of the larger Atlantic World of which it was a part. Course approaches topic through history and other fields such as archaeology, art history, and literature, and is taught from an interdisciplinary perspective.

01:506:330 ***African Diaspora Liberation Movements (3)***
Examines liberation movements in Africa and the African diaspora in Europe and the Americas, focusing on common intellectual, political, and social currents. Concentrates on abolitionism, Pan-Africanism, and nationalism, investigating the relationship between elite and mass movements in each case.

01:506:361 ***History of Socialism and Communism (3)***
History of movements for socialism and communism, their diverse development on the world scene, and impact on modern history.

01:506:362 ***Capitalism: The History (3)***
Explores the nature of capitalism, the relationship between capitalism and history, questions about the relation between capitalism and ideas or events of the modern age.

01:506:363 ***Imperialism (3)***
Causes of colonial expansion by European powers, Russia, Japan, and the United States; the nature of colonial empires; and the impact of imperialism on Africa and Asia.

01:506:364 ***Colonialism to Globalism (3)***
Differences and similarities of the major European encounters with non-Europeans in modern history.

01:506:373 ***History of Jewish Women (3)***
Jewish women's history; examines the religious, social, intellectual, and cultural environments of Jewish women from the biblical period through the 20th century.
Credit not given for both this course and 01:563:373 or 01:988:373.

01:506:375 ***Jewish Immigrant Experience (3)***
Modern Jewish immigrant experience, focusing on European and Middle Eastern communities resettled in America, Israel, and Europe.
Credit not given for both this course and 01:563:375 or 01:685:375.

01:506:388 ***Touching History: The World of Medieval Manuscripts (3)***
An introduction to medieval manuscripts and to book culture from before the age of printing, with particular attention to the scribal transmission of ancient and classical texts (Bible, Homer, Qur¿an, Beowulf, etc.).

Credit not given for both this course and 01:563:387 or 01:677:387 or 01:840:388

01:506:390 ***Historiography: The History of History (3)***
Explores the history of writing history and the philosophy of history over time.

01:506:391,392 ***Historical Studies (3,3)***
Separate sections focusing on different topics at different times and in different areas. Specific titles available at time of registration.

01:506:393 ***Advanced Topics in the History of Women (3)***
Advanced course on specialized topic in the history of women.

01:506:401,402 ***History Seminar (3,3)***
Introduction to skills and techniques of historical research, including writing a research paper based on primary sources. Specific topics of sections available at time of registration.

01:506:424 ***Reading and Writing about Nature (3)***
Exploration of political, philosophical, fictional, and visual texts on relationship between humans and nature in Anglo-North America, late-16th century to present.
Prerequisite: Permission of instructor.

01:506:451 ***Public History Internship (3)***
Professional, supervised work for historical society, site, archives, museum, legislative office, or equivalent; 112 hours required. Faculty coordinator evaluates student's paper/product and agency's assessment.
Open only to junior and senior history majors.

01:506:452 ***General History Internship (3)***
Includes internships in the fields of law, politics, and government. In addition, includes other internships that do not meet the criteria for the Public History Internship Program; 112 hours required. Faculty coordinator evaluates student's paper/product and agency's assessment.
Open only to junior and senior history majors. Not eligible for major credit without special permission of undergraduate adviser.

01:506:471,472 ***Research in History (BA, BA)***
One-semester independent study projects.
Not open to honors candidates.

01:506:473,474 ***Readings in History (BA, BA)***
Independent readings under supervision of a member of the department.

01:506:495-496 ***Honors Program in History (BA,BA)***
Focus on writing of a major research paper working with an individual professor. A seminar guides students through stages of writing, using short papers as the vehicle for the exploration; includes outlines, rough drafts, etc.
Both semesters must be completed to receive degree credit.

African, Asian, and Latin American History Courses (508)

African, Asian, and Latin American History Courses (508)

01:508:100 ***Study Abroad Benin: History Culture and Memory (3)***
This interdisciplinary cross-cultural study abroad program explores the African side of the Atlantic World. Students spend two weeks in Benin based at our sister institution, the Ecole du Patrimoine Africaine in Porto Novo. In partnership with our Beninois colleagues, faculty and students will explore how trans-Atlantic connections have shaped religion, language, and identity; the relationship between tourism and historical memory; and the dynamism of the contemporary art scene.

Credit not given for both this course and 01:016:100.

01:508:110 ***Political Islam: Present and Past (3)***
Introduction to Islamic political thought and practice. Emphasis on how historical knowledge can help us to understand contemporary debates over the place of Islam in the modern world.
Credit not given for both this course and 01:685:110 and 01:840:125.

01:508:191,192 ***Global Topics (3,3)***
Study of special topics in global history at the introductory level.

01:508:200 ***Ancient Near East (3)***
Origins and development of the societies of Mesopotamia, Egypt, Asia Minor, and the Levant, through the period of the Persian Empire.
Credit not given for both this course and 01:190:200, 01:563:200, or 01:685:200.

01:508:201 ***Islamic Civilization (3)***
Survey of Islamic societies from seventh-century Arabia to modern times. Religious, political, military, social, economic, and cultural institutions and organizational patterns.
Credit not given for both this course and 01:014:205 or 01:685:201

01:508:203 ***History of Islamophobia (3)***
This course surveys the history of Western anxiety about Islam from its origins to the present, exploring the theological, political, and cultural forces behind it. It examines how Islamophobia has been institutionalized through discrimination, exclusion and violence against Muslims and those perceived as Muslim. The term ¿Islamophobia¿ is analyzed through engaging with multidisciplinary debates that interrogate the term and its limitations, and its complex relation to religious bias and racism.

Credit not given for both this course and 01:685:241 or 01:840:228

01:508:205 ***History of the Modern Middle East (3)***
Shaping of Middle Eastern politics and society since 1800 out of the Islamic/Ottoman legacies and under the impact of modernity and Western encroachment.
Credit not given for both this course and 01:563:205 or 01:685:203.

01:508:208 ***Jewish-Muslim Relations: History and Culture (3)***
Surveys the cultural history of Jewish-Muslim relations from the seventh century up to our present. Analyzes this important and unique aspect of Jewish and Muslim pasts and the place of the Jews in the cultural history of Islam. Course taught in English. Credit not given for both this course and 01:013:208 or 01:563:208.

01:508:209 ***Jerusalem Contested: A City's History from Jewish, Christian, and Muslim Perspectives (3)***
Introduces students to the history of Jerusalem. Causes for and evolution of the profound attachment of Judaism, Christianity, and Islam.
Credit not given for both this course and 01:563:280 or 01:685:280.

01:508:211 ***Modern Israeli Culture (3)***
Approaches modern Israel as a case study in creating a new national culture in relation to ancient history and traditions and a longstanding diaspora. Explores the evolution of Israeli culture between 1940s and the 1990s from an interdisciplinary perspective.
Credit not given for both this course and 01:508:310, 01:563:310, 01:563:281, 01:685:310, or 01:685:281.

01:508:212 ***Israeli-Palestinian Conflict (3)***
Overview of the hundred-year-old Arab-Israeli conflict, the controversies it has generated, the attempts to resolve it, and how outsiders to the conflict learn about it and experience it.
Credit not given for both this course and 01:508:300; 01:563:282; 01:563:300; 01:685:282 or 01:685:300.

01:508:220 ***Ancient Africa (3)***
Precolonial African societies and kingdoms: family life, cities, Islam, growth and decline of states, impact of the slave trade, and African culture in the Americas.
Credit not given for both this course and 01:016:220.

01:508:221 ***West Africa (3)***
Politics in past and present states, rise of new social and economic groups, various reactions to the West during precolonial and colonial eras.

01:508:222 ***Modern Africa (3)***
Nineteenth-, 20th-, and 21st-century Africa: resistance and accommodation to colonialism; impact of Christianity; African workers and new elites; changing roles of women, nationalism, and revolution.
Credit not given for both this course and 01:016:222.

01:508:224 ***Women and Gender in African History (3)***
Issues in the history of gender in Africa: female slavery; women and power formations; women in production and trade; family and community; and gender and protest.
Credit not given for both this course and 01:016:224 or 01:988:224.

01:508:226 ***War and Violence in Africa (3)***
Explores the history of warfare and violence in Africa with a view toward understanding how war has shaped African states, societies, and economies. Topics include different patterns of military organization over time; evolution of weaponry, tactics, and strategy; and increasing prevalence of warfare and militarism in African political and economic systems.

01:508:230 ***The Making of Modern India and Pakistan (3)***
Introduction to the history of the Indian subcontinent from the advent of the Mughal Empire to the creation of the modern states of India, Pakistan, and Bangladesh.
Credit not given for both this course and 01:925:230.

01:508:231 ***South Asian Civilization: The First Five Millennia (3)***
History and culture of South Asia from protohistoric beginnings in the Indus Valley to the late first millennium CE. Emphasizes processes of sociocultural change such as social organization and ideology, religious institutions and patronage, and the evolution of classical culture.

01:508:235 ***Business and Society in Historical and Contemporary India (3)***
Introduction to the long history of commerce and society in the Indian subcontinent up to the present. Includes study of the sociology of economic activity and its representation in popular culture.

01:508:240 ***Classical Asia (3)***
Introduction to the three great civilizations of Asia: India, China, and Japan. Emphasis on traditional family life, art, literature, and the spread of Buddhism.

01:508:242 ***Modern East Asia (3)***
Development of China and Japan in the 19th and 20th centuries: the response to Western imperialism; the rise of Chinese communism and Japanese fascism.

01:508:243 ***War and Society in Early Modern East Asia: Hideyoshi Invasions (3)***
Examination of background, unfolding, and consequences of Hideyoshi Invasions of Korea (1592-1598) as a major international war. Considers the war's influence on Korea, Japan, and China and the political, military, socioeconomic, and cultural history of early modern East Asia more broadly. Transcends the boundary of national history to reach a comprehensive understanding of the "international" connectedness of East Asia.

01:508:244 ***China and the United States (3)***
History of contacts between the two peoples since 1784. Concentrates on period from 1941 to present. Includes all aspects of cultural, economic, and political relations.

01:508:246 ***History of Chinese Civilization (3)***
Introduction to foundational elements of Chinese civilization and society from a historical perspective. Evolution of main Chinese intellectual, political, social, economic, and religious traditions and institutions from the Neolithic to the present period.

01:508:247 ***China, 1800 to the Present (3)***
Continuity and change in Chinese society, politics, culture, international relations, and the economy. Industrialization, rural life, nationalism, socialism, the party-state, gender issues, democracy movements.
Credit not given for both this course and 01:508:342.

01:508:250 ***Southeast Asia and the World (3)***
Introduction to Southeast Asia--one of the crossroads of the world--from ancient civilizations until the end of the 20th century. Includes the histories of Brunei, Burma/Myanmar, Cambodia, Indonesia, Laos, Malaysia, Philippines, Singapore, Thailand, Timore Leste, and Vietnam.

01:508:260 ***Colonial Latin America (3)***
Study of formation of culture and society in Latin America through intermingling and merger of Native Americans, Iberians, and Africans.

01:508:262 ***War and Politics in Latin America (3)***
Examines the causes and political consequences of war and revolution in Latin America (including the Wars of Independence in the 19th century, Cuban Revolution in the 20th century, and US intervention in the region). Special emphasis on international geo-politics and US-Latin American relations.
Credit not given for both this course and 01:590:262.

01:508:264 ***Latin America and the United States (3)***
Survey of the relations between the United States and Latin American nations from the 1780s to the present.

01:508:265 ***Afro-Brazilian History (3)***
Overview of the history of the largest African diaspora community in the world from the pre-history of slavery through the present day. Critical analysis of major issues in Afro-Brazilian and African diaspora studies.
Credit not given for both this course and 01:014:265 or 01:590:265.

01:508:271 ***History of the Caribbean to 1898 (3)***
History of the Caribbean from before the Spanish conquest until the consolidation of the US Imperial sphere in 1898. Emphasis on Spanish, English, and French colonialism and the formation of Jamaica, Saint Domingue/Haiti, Puerto Rico, Cuba, and Española/Dominican Republic.
Credit not given for both this course and 01:595:204.

01:508:272 ***History of teh Caribbean since 1898 (3)***
Overview of the history of the Caribbean since the formation of the US sphere of influence in 1898. Emphasis on the Hispanic Caribbean and Haiti with consideration of the English-speaking nations.
Credit not given for both this course and 01:595:205.

01:508:280 ***Early Native American History (3)***
Examines the images and realities of Native American cultures and histories from America before Columbus through the early period of European-Native American interaction.
(Formerly 01:508:379)

01:508:282 ***Modern Native American History (3)***
Examines the images and realities of Native American cultures and histories from the colonial period through the present day.

01:508:291,292 ***Topics in History (3,3)***
Study of special topics in global history at the intermediate level.

01:508:303 ***The Classical Age of Islam (3)***
Rise and expansion of Islam and formation of Islamic civilization in the Middle East from 600 to the demise of the Abbasid Caliphate ca. 1250.
Credit not given for both this course and 01:685:303.

01:508:304 ***Ottoman Empire (3)***
Political, socioeconomic, and cultural history of the Ottoman Empire, 1300-1900, from frontier principality, to world empire, to post-Suleymanic crisis and change.
Credit not given for both this course and 01:685:304.

01:508:305 ***Modern Turkey (3)***
Introduction to the political, social, and cultural history of modern Turkey, from its late Ottoman origins to the recent past.

01:508:306 ***War and Revolution in Iran and Iraq (3)***
Examines key episodes of conflict between Iran and Iraq in the 20th century, including Iran's Islamic revolution, the Iran-Iraq war, and the two U.S. led wars on Iraq. Investigates the longer-term roots of conflict and its social, political, and ideological consequences.

01:508:307 ***Women and Society in the Islamic Middle East (3)***
History of women and gender relations in the Islamic Middle East: origins of gender inequalities; women's functioning within society; reality versus literary depictions; and recent transformations.
Credit not given for both this course and 01:988:308 or 01:685:307.

01:508:316 ***Israeli Women: Historical and Literary Perspectives (3)***
Impact of socialism, nationalism, ethnicity, religion, and feminism on Israeli women's roles within the family, labor force, army, kibbutz, and politics.
Credit not given for both this course and 01:563:316 or 01:685:316 or 01:988:316.

01:508:318 ***Nationalism in Modern Africa (3)***
Development of African political thought from the 18th century to the modern period with a focus on nationalism. Topics will include African responses to European conquest and colonization; efforts to situate Africa in world history; the emergence of African independence movements; and the influence of race, class, and gender on nationalist thought.

01:508:320 ***History of Southern Africa (3)***
Precolonial African societies and kingdoms, family life, religion, European colonialism, and African nationalist and revolutionary movements. Emphasis on South Africa, apartheid, and the freedom struggle.

01:508:321 ***African Cultural History (3)***
History of African music, art, religion, and other cultural practices in social and political context.
Credit not given for both this course and 01:016:321.

01:508:324 ***Africans in the Americas (3)***
Africans in the Americas: Latin America, the Anglophone and Francophone Caribbean, and the United States. Focus on the African background, slavery, and race relations.

01:508:325 ***Africa from the 15th to the 19th Centuries (3)***
Explores the history of Africa between the 15th and 19th centuries. Focuses on themes such as state formation, economic development, and the imperial conquest.

01:508:326 ***Islam in African History (3)***
Relation of Islam to the history of long distance trade, the rise of urban centers, shifting identity formations, gender dynamics, and religious conflict.

01:508:327 ***World War II and Africa (3)***
Focuses on the history of Africa's involvement in World War II and the impact of this involvement on African political and economic history, with special emphasis on the war's role in nationalist movements.

01:508:328 ***History of Health and Healing in Africa (3)***
Impact of colonial and postcolonial history on patterns of health and health care in sub-Saharan Africa. Focus on African responses to changing new medical technologies and cultures, and emerging patterns of disease.

01:508:330 ***Early Modern South Asia, 1500-1800 (3)***
The Mughal Empire between the 16th and 19th centuries and the making of modernity in the region.

01:508:331 ***Women in South Asian History (3)***
Origins and development of modern Indian feminist struggles in their historical contexts between the late-18th and late-20th centuries.
Not open to first-year students.

01:508:332 ***Slavery in South Asian History (3)***
Covers military, monastic, and household forms of slave employment in the economy of the region between the 12th and 19th centuries. Also traces changes in the legal and economic statuses of slaves in the latter half of the period.

01:508:333 ***Culture and Power in South Asia (3)***
Explores connections between sacred power, "sciences," courts, nation-building and developments in music, dance, drama, and cinema.

01:508:334 ***Passages to India: South Asia through Travel Narratives (3)***
Introduces students to South Asian and comparative history through reading of travelogues by visitors from other civilizations, seventh century to 20th century.

01:508:335 ***Modern South Asia (3)***
Modern history of South Asia; focuses on the transition to and through colonialism.

01:508:336 ***South Asia, 1947 to the Present (3)***
Follows social and political development of South Asia after decolonization, assessing the developmental agendas and international relations of the new regimes.

01:508:337 ***Pirates, Pilgrims, and Poets: Globalization in Indian Ocean History (3)***
Examines the history of globalization by looking at the Indian Ocean as a space of economic and cultural exchange. Themes include technology and exchange, politics and space, people and mobility, and culture and representation.

01:508:338 ***Asian Migrations (3)***
Traces the modern history and contemporary cultures of Asian migration, from approximately 1850 to the present. Explores how global historical trends, including overseas exploration, colonialism, capitalism, nation-building, and war, have shaped patterns of Asian migration.

01:508:340 ***Late Imperial Chinese Culture and Society (3)***
Chinese history from the 16th to the 19th centuries. Focus on power, gender, and ethnicity in a comparative framework of analysis.

01:508:341 ***Chinese Renaissance, 1000 to 1400 (3)***
History of China from 1000 CE to 1400 CE, exploring the social, cultural, and intellectual changes in the period beginning with the transition from the Tang to Song dynasties.

01:508:344 ***China's Socialist Revolution (3)***
History of socialism and revolution in China, emphasizing rise of Chinese Communist Party, its victory in 1949, and post-1949 People's Republic of China.

01:508:346 ***TransAsia: A Transnational History of Gender and Sexuality in Asia (3)***
Transnational history of Asia; how (trans)regional movements in peoples, ideas, commodities, technologies, and capital have shaped and been shaped by gender/sexuality.

01:508:348 ***Chinese Intellectual History (3)***
Key topics and themes of Chinese intellectual history from antiquity to the modern period.

01:508:349 ***Modern China through Film and Fiction (3)***
Use of film and fiction to examine selected topics in modern Chinese history: origins and rise of Chinese nationalism; geneses and development of Chinese social revolutions and political movements; trajectories of China's rise and transformation from a declining empire to a global power and evolving modern society.

01:508:352 ***Japan's Rise to World Power (3)***
Japan's emergence from 1800 to present. The path to industrialization, military expansion, and postwar recovery. Emphasis on changing lifestyles depicted in literature and film.

01:508:360 ***The History of Brazil (3)***
Social, economic, and political developments of the Colonial Period, the Independence Movement, the Empire, the First Republic, the era of Getulio Vargas, and the Second Republic.

01:508:362 ***Mexico (3)***
Surveys Mexican history from pre-Columbian times to the present with special emphasis on the 20th century and the Mexican Revolution.

01:508:364 ***Environmental History of Latin America (3)***
Mutual reshaping of physical environment and human society in Latin America, from pre-Colombian through contemporary times.
Credit not given for both this course and 01:590:364.

01:508:365 ***Revolution in Latin America (3)***
Compares and contrasts the causes and effects of major revolutionary movements in 20th-century Latin America: Mexico, Bolivia, Cuba, and Central America.

01:508:366 ***Central American Revolutions (3)***
Central America since independence. Topics include revolt and revolution; formation of repressive states and labor-repressive capitalism; emergence of reformist and revolutionary movements.
Credit not given for both this course and 01:595:391.

01:508:367 ***The Afro-Latin American Experience (3)***
Examines profound impact of African diaspora on Latin American societies where persons of African descent represent significant minorities and numerical majorities. Explores how Afro-Latin Americans remember the past and experience the present.
Credit not given for both this course and 01:590:367 or 01:595:367.

01:508:369 ***Gender in Latin American History (3)***
Study of the position of men and women in Latin American society from pre-European times to the present.

01:508:370 ***The History of Cuba (3)***
Study of Cuba from pre-Columbian times to the present day. Deals with the long battle for freedom during the 19th and 20th centuries.
Credit not given for both this course and 01:595:390.

01:508:371 ***History of Puerto Rico (3)***
Examination from pre-Columbian to present times. Focus on Spanish colonial policy, slavery and land tenure systems, emergence of national identity, U.S. invasion and rapid economic changes, and population control and migration.
Credit not given for both this course and 01:595:371.

01:508:372 ***History of the Dominican Republic (3)***
From French invasion of Hispaniola to present. Role in Spanish Empire, U.S. control in transition to sugar economy, Trujillismo, U.S. invasion in 1965, and impact of migration on society.
Credit not given for both this course and 01:595:372.

01:508:374 ***Slavery in the Caribbean (3)***
Analysis of different institutions of slavery in the Caribbean and the rise of the plantation societies. Investigating the effects on Europe and the Western Hemisphere and its legacy.
Credit not given for both this course and 01:595:300.

01:508:381 ***Ancient Kingdoms: A History of the Aztecs, Incas and Mayas (3)***
This course treats the history of the three most powerful Native American states: the Aztecs, Incas and Mayas. It begins long before contact with Europeans and ends about two generations after the arrival of the newcomers. Students will learn what scholars have been able to uncover, now that we are relying more on sources written by Indigenous people and less on those produced by Europeans.

Credit not given for both this course and 01:590:381.

01:508:383 ***History of Native American Women (3)***
Explores the lives and experiences of Native American women from 16th-century contact with Europeans through the present-day United States.
Credit not given for both this course and 01:988:387.

01:508:391,392 ***Historical Studies (3,3)***
Separate sections focusing on different topics at different times and in different areas. Specific titles available at time of registration.

01:508:393 ***Global Diasporas in Caribbean History (3)***
Intraregional migrations of Caribbean since 18th century. Theories and concepts of migration; slavery; Asian indentured workers; European and American presence; labor migration; Panama Canal; export economies; race; citizenship; transnational dynamics.
Credit not given for both this course and 01:595:393.

01:508:410 ***Medieval Turkey, 1071-1481 (3)***
Origins and development of Turkish states in Asia Minor including Seljuk Sultanate of Rum, its successor beyliks, and early Ottoman Empire.
Credit not given for both this course and 01:685:410.

01:508:420 ***African Labor History (3)***
African labor history: precolonial labor mobilization, control, and resistance; working-class formation; the labor process and worker consciousness.
Credit not given for both this course and 01:014:367.

01:508:424 ***African Cities Past and Present (3)***
Social, cultural, economic, and political history of African cities with focus on student-led comparative research.
Not open to first-year students. Prerequisite recommended: One course on Africa.

01:508:429 ***Research in African Historical Studies (3)***
Construction of the African past through extended study of sources for one region or theme. Requires research paper based on primary sources.

01:508:450 ***Society and Culture in Japan (3)***
Topical approach to traditional Japanese history. Focus on social institutions, the courtly and martial arts, and the endurance of traditional values in postindustrial Japan.

History (SAS)

European History Courses (510)

European History Courses (510)

01:510:101 ***Ancient and Medieval Europe (3)***
Introductory survey of European history from ancient times to the early modern period. Introduction to historical interpretation and historical inquiry.

01:510:102 ***Europe in the Global Age (3)***
Introductory survey of European history from the early modern period to the present. Introduction to historical interpretation and historical inquiry.

01:510:191,192 ***Topics in History (3,3)***
Study of special topics in European history at the introductory level.

01:510:201 ***Ancient Greece (3)***
Civilization of the eastern Mediterranean world in ancient times, with emphasis on the origins of Western civilization and the Greek contribution to Western culture.
Credit not given for both this course and 01:190:201.

01:510:202 ***Ancient Rome (3)***
The Roman Republic and the Empire, with emphasis on the rise and decline of a Mediterranean world civilization under Roman leadership.
Credit not given for both this course and 01:190:209.

01:510:205 ***History of the Byzantine Empire (3)***
Survey of political, military, religious, and socioeconomic development of the eastern Roman Empire, centered at Constantinople, from late third century to Ottoman conquest in 1453.
Credit not given for both this course and 01:489:205 or 01:685:205.

01:510:207 ***Byzantine Civilization (3)***
History of Byzantine culture and civilization, including political ideology and statecraft, orthodox Christianity, transmitting classical traditions of science and literature, art and architecture, and laying foundations of modern Greek culture.
Credit not given for both this course and 01:489:207 or 01:685:207.

01:510:209 ***Emergence of Medieval Europe, 400-1150 (3)***
Europe from the fall of Rome through the Dark Ages and into the feudal age--the era of Charlemagne, the Vikings, and the Crusades.
Credit not given for both this course and 01:667:281.

01:510:211 ***Harvest of the Middle Ages, 1150-1520 (3)***
From feudalism to the Protestant Reformation, with emphasis on social and economic developments. Religious, political, institutional, and cultural changes.
Credit not given for both this course and 01:667:282.

01:510:213 ***The Crusades (3)***
Ideology and expressions of the crusades, 11th to 14th centuries, including crusades against Muslims, heretics, and other papal enemies. Extensive use of film.
Credit not given for both this course and 01:685:213.

01:510:217 ***From Byzantium to the Ottomans: 1204-1460 (3)***
Development of Byzantine society and culture from the Latin crisis (1204-1261) through the Ottoman conquest (1453), including the Byzantine impact on West European, Slavic, and Ottoman cultures.
Credit not given for both this course and 01:489:217 and 01:685:217.

01:510:222 ***Greek Food from Antiquity to Today (3)***
Food and foodways of Greek-speaking peoples from ancient times to the present, with special emphasis on problems of continuity and change.
Credit not given for this course and 01:489:220, 01:685:220, 01:667:220, or 01:190:220.

01:510:224 ***Europe: Gender, Sex, and Society (3)***
Explores the varieties of gendered experience in Europe from the Enlightenment to the 20th century, including the relationship between gender, class, ethnicity, and sexual orientation. Course material will emphasize interdisciplinary and comparative approaches.

01:510:231 ***A History of the Britannic Isles: From the Beginnings to the 18th Century (3)***
Explores the histories of the Britannic Isles--modern England, Ireland, Scotland, and Wales--from the beginnings until the Act of Union of 1707; emphasis on history of migration, invasion, and cultural exchange.

01:510:232 ***Fashion & Design in Europe: Between the West and the World (3)***
Focuses on a series of "moments" in European history when aesthetic styles in clothing became a flashpoint for cultural change. Explores the history and culture of clothing and fashion through a range of disciplinary and interdisciplinary perspectives from the European Renaissance to the 20th century.

01:510:245 ***The Arts of Power: Ritual, Myth, and Propaganda (3)***
Investigates how paintings, movies, poems, and ceremonies have been manipulated to bolster the political authority of rulers, including Louis XIV, Lincoln, Hitler, and Elizabeth II.

01:510:248 ***The Last Climate Crisis: Histories of the "Little Ice Age", c.1300-1800 (3)***
Analyzes the social, environmental, political, and cultural impact of the centuries-long climatic cooling often known as the ¿Little Ice Age¿ (c.1300-1800). Students consider what the historical study of the last climate crisis can teach us about what awaits us in the current crisis of anthropogenic climate change.

01:510:253 ***History of Witchcraft and Magic (3)***
Witchcraft in relation to the history of religion; the phenomena of crime, deviance, and demographic change; and the history of women in Europe and America.

01:510:255 ***Dracula: Facts and Fictions (3)***
History of Dracula in context of early modern Balkan and Ottoman political and military history. Historical and literary legacies of Dracula from the 15th century to the late 19th century.

01:510:260 ***Remembering the Shtetl (3)***
How Jewish life in eastern European small towns has been documented and recalled from 19th century to present in fiction, art, ethnography, film, and memoir.
Credit not given for both this course and 01:563:260.

01:510:261 ***History of the Holocaust (3)***
Development of anti-Semitism in modern European history culminating in the "Final Solution"; special emphasis on Jewish responses and resistance.
Credit not given for both this course and 01:563:261.

01:510:263 ***Between Nazism and Communism (3)***
Explores the experiences of Poles and Polish Jews under Nazi and Communist rule through history, travel writing, memoir, poetry, and film.
Credit not given for both this course and 01:563:270.

01:510:265 ***Jewish-Christian Relations through the Ages (3)***
Jewish-Christian relations from the first century CE to the start of the 21st century. Focuses both on the history of interactions between Jews and Christians--persecutions, collaborations, conversions, etc.--and the history of theological stances and popular attitudes.
Credit not given for both this course and 01:563:240.

01:510:268 ***Fascism (3)***
Examines connections between alt-right, white power, and neo-Nazi groups today to the historical fascist movements and regimes of the 1930s and 1940s. Historical perspective on what fascism is, what fascists believe, and they want to do. Considers the historical conditions that have produced fascism, the legacies of the fascist movements of the 1930s for our own time, and the relevance of fascism's history to the challenges of the present day.

01:510:269 ***Antisemitism (3)***
History of negative attitudes toward Jews and Judaism from the ancient and medieval world to modern Europe, the United States, and the Middle East. Explores continuities and turning points in the history of antisemitism as well as the significance of antisemitism as an analytic category. Focus on contemporary discourses and media representations of antisemitism in light of their historical precedents and resonances.
Credit not given for both this course and 01:563:269.

01:510:271 ***Russia and the West (3)***
Formation of traditional Russian society in isolation from the West; the impact of the West on Russia from Peter the Great to the present.

01:510:277 ***Russia: Between Empire and Nation (3)***
Study of Russia's imperial culture, history, and politics from the 19th to the 21st century as a window onto geopolitical shifts in contemporary Russia's relations to the wider world.
Credit not given for both this course and 01:195:272 or 01:860:272.

01:510:291,292 ***Topics in History (3,3)***
Study of special topics in European history at the intermediate level.

01:510:300 ***Greek and Roman Slavery (3)***
Social, economic, legal, and political aspects of slavery in Ancient Greece and Rome. The sources and numbers of slaves, forms of servitude, manumission, and slave labor.
Credit not given for both this course and 01:190:300.

01:510:301 ***Early Greece (3)***
History of the Greek world from Minoan Crete through the Persian War. Readings (in translation) range from Homer through Herodotus.

01:510:302 ***Classical Greece (3)***
Greek history from the Persian War to the Macedonian conquest of Greece. Readings (in translation) from Thucydides, Xenophon, Demosthenes, Plutarch, and others.

01:510:303 ***Hellenistic World (3)***
Expansion and development of Greek culture from Alexander through the successor kingdoms in Greece, Egypt, Syria-Palestine, and Asia Minor.
Credit not given for both this course and 01:190:303.

01:510:304 ***The Rise of the Roman Republic (3)***
Roman political, social, and cultural history from the beginning of urban settlement through the emergence of the Roman state as the dominant power in the Mediterranean basin to the end of the second century BC.

01:510:305 ***The Crisis of the Roman Republic (3)***
Roman political, social, and cultural history during the crisis of the late republic from 133 BC, the tribunate of Tiberius Gracchus, through the establishment of the principate by the Emperor Augustus.
Credit not given for both this course and 01:190:305.

01:510:306 ***Roman Empire (3)***
Political, social, and intellectual developments of the imperial period until the age of Constantine, with emphasis on the first two centuries AD.
(Formerly 01:510:305) Credit not given for both this course and 01:190:306.

01:510:307 ***The Roman World in Late Antiquity (3)***
Development of the Roman state and society from the late third through early seventh centuries. The transformation of the late classical world, and the origins of Byzantium and the medieval West.
(Formerly 01:510:306)

01:510:308 ***Creating Culture and History in the Ancient World (3)***
Aspects of cultural, religious, and intellectual developments in the classical world.
(Formerly 01:510:307)

01:510:309 ***A History of Western Morals: Antiquity and Middle Ages (3)***
Examines the formative period of moral ideas in Western civilization in ancient Greek, Roman, and Hebrew societies, then traces the evolution of those ideas through the Middle Ages.

01:510:310 ***Pompeii: The Life and Death of a Roman Town (3)***
Pompeii and Herculaneum, as laboratories for the study of Roman life: the economy and society; public and private architecture, art, and inscriptions; and the birth of archaeology.
Prerequisites: One course in Roman history or culture, Latin or ancient art, or permission of instructor. Credit not given for both this course and 01:190:373.

01:510:311 ***Cities of the Classical World (3)***
Study of urban development in antiquity, focusing on Athens and Rome, and synthesizing the evidence of literary, historical, and archaeological sources.
Credit not given for both this course and 01:190:372.

01:510:312 ***Cleopatra (3)***
Examines the historical Cleopatra and the reception of her image from antiquity to the present in literature, art, and film. Issues considered include female power in a man's world, east versus west, and politics and propaganda.
Credit not given for both this course and 01:190:318 or 01:988:321.

01:510:313 ***Muslims, Christians, and Jews in Medieval Spain (3)***
History of medieval Spain with a focus on cultural, religious, and political diversity.
Credit not given for both this course and 01:563:307.

01:510:314 ***Jews, Heretics, and the Inquisition (3)***
Survey of the Medieval, Spanish, and Roman inquisitions focusing on these institutions' attitudes toward--and treatment of--heretics, Jews, and conversos. Examines how these inquisitions operated and their legal precedents as well as their relations to the social, political, and religious tensions of their day, in the context of broader historical questions about forms of intolerance and modes of persecution.
Credit not given for both this course and 01:563:314.

01:510:315 ***Reform and Dissent in the Middle Ages (3)***
Christian unity and its implementation, church structure, canon law, monastic reform, conciliar movement, academic and popular heresy, and church-state relations, with emphasis on Italy and Germany. Integrated, interdisciplinary study of the age of the Renaissance in Italy and northern Europe from 1300 to 1550.
(Formerly 01:510:417)

01:510:316 ***Food and Drink in Medieval Europe (3)***
Food history at the crossroads of environmental, economic, agricultural, dietary, social, gender, ethnic, everyday life, religious, and political-diplomatic investigations. Examination of these themes within the millennial trajectory of medieval Europe and the Mediterranean from ca. 450 CE to ca. 1450 CE.

01:510:317 ***The Renaissance (3)***
Integrated, interdisciplinary study of the age of the Renaissance in Italy and northern Europe from 1300 to 1550.

01:510:318 ***Era of World War I (3)***
Causes, course, and consequences of World War I in the light of political, social, and military forces.
(Formerly 01:510:417)

01:510:319 ***The Age of Reformation, 1500-1648 (3)***
The Protestant and Catholic reformations and their significance for European society.

01:510:320 ***Women in Antiquity (3)***
Women in the ancient societies of Greece and Rome. Their roles and images in the social, legal, political, domestic, philosophical, and artistic spheres examined using primary sources.
(Formerly 01:510:251). Credit not given for both this course and 01:190:320.

01:510:321 ***The Age of Enlightenment (3)***
Eighteenth-century European philosophy and philosophers examined within their historical contexts. The role of ideas in movements for social, moral, and political change.

01:510:325 ***Nineteenth-Century Europe (3)***
Examination of the formative period of modern Europe, including the industrial and democratic revolutions, nationalism, imperialism, and the crises culminating in World War I.

01:510:327 ***Twentieth-Century Europe (3)***
Major economic and social forces shaping life in 20th-century Europe, and efforts of major social groups to cope with and shape these forces.

01:510:329 ***World War II in Europe (3)***
Exploration of causes, events, and consequences of WW II in Europe. Focus on political, military, economic, social, and cultural history dimensions.

01:510:330 ***The Spanish Civil War (3)***
Analysis of the historical factors that led to war in twentieth-century Spain, how major powers influenced the conflict's outcome, and the war's impact on European and global politics.

01:510:333 ***France, Old Regime, and Revolution (3)***
French history from Louis XIV to the fall of Napoleon. The absolutist state and the impact of revolution, stressing the interplay of political, social, cultural, and economic history.

01:510:335 ***Modern France (3)***
History of France from the fall of Napoleon to the present, with particular emphasis on the relation of political developments to social, intellectual, and economic change.

01:510:337 ***Medieval Kings and Queens (3)***
Rulership in theory and practice, from Germanic chieftains to divine-right monarchs, with attention to royal rivals, myths and rituals, marriage, and gender.

01:510:338 ***England in the Middle Ages (3)***
Political development of England from William the Conqueror to the War of the Roses.

01:510:340 ***British Atlantic World (3)***
Explores the forms of knowledge and networks of communication that shaped British colonization in the early modern Atlantic. Themes include early contact with Native Americans; commerce, piracy, and slavery; political communications and the American Revolution; and the campaign to abolish the slave trade.

01:510:343 ***A Century of Revolution: Politics and Culture in England 1588-1720 (3)***
Explores the tumultuous political history of England during the "long seventeenth century," focusing on the long-term origins and consequences of the revolutions of 1640-60 and 1688-89, the impact of religion on politics, and the operations and transformations of monarchical and popular political culture.

01:510:344 ***The Social History of England, 1580-1780: The First Modern Society? (3)***
Explores the socioeconomic and cultural history of early modern England. Topics include popular culture; religion; sex and gender; urbanization; and the rise of consumerism, industrialism, and capitalism.

01:510:345 ***English Constitutional History to 1688 (3)***
Developments of English governments to 1688, with emphasis on those institutions and political and legal ideas that form the background for American constitutional development.

01:510:346 ***The English Revolution, 1640-1660 (3)***
Explores the most tumultuous period in English history. Topics include causes and revolution, the Civil War, regicide and republicanism, radical politics and religion, and Oliver Cromwell.

01:510:347 ***The British Empire and the British Isles, 1485-1763 (3)***
History of British overseas enterprise from opening phases of Atlantic exploration through the end of the Seven Years' War. Special attention to impact of empire on British Isles.

01:510:348 *Great Britain, 1685-1815 (3)*
Explores Great Britain's rise to dominant global power. Focuses on internal developments as well as colonial experiences.

01:510:349 *Modern Britain (3)*
Developments since the 18th century that have shaped the character of contemporary Britain, including parliamentary democracy, industrialization, rise and fall of empire, and cultural change.

01:510:350 *Greek Society (3)*
Social and economic life of the Greeks from the Mycenaean period through the Hellenistic age. Written and material evidence employed.
Prerequisite: Recommended: 01:510:201. Credit not given for both this course and 01:190:350.

01:510:351 *Medieval Italy, 476-1300 (3)*
The Italian peninsula from the fall of the empire in the west to the age of the communes; social, political, and religious history.

01:510:354 *History of Italy's People (3)*
Topical approach. Etruscans to present. Emphasis on culture, geography, religion, philosophy, family structures, agricultural systems, urban development, and universities.

01:510:357 *Medieval Germany (3)*
Survey of German history from the late Roman Empire to the threshold of the Reformation, ca 300 to ca 1500.

01:510:360 *Society and Culture in Germany 1750-1870 (3)*
Introduction to the classical period of German culture, including study of Kant, Fichte, Lessing, Goethe, and Shiller in historical context.

01:510:363 *Germany from 1871 to Present (3)*
Analysis of the collapse of imperial Germany, the failure of democracy in the Weimar Republic, Hitler's Third Reich, the Holocaust, and restructuring of Germany since 1945.

01:510:368 *Jews of Germany and Austria-Hungary, 1780-Present (3)*
Jewish history in modern Central Europe. Focus on Germany, Austria, Hungary, and Czechoslovakia (now the Czech Republic and Slovakia) from the late 1700s until the present day.
Credit not given for both this course and 01:563:368.

01:510:370 *Remembering the Holocaust (3)*
Holocaust remembrance in contemporary social and cultural practices in the United States and globally considered as a paradigm for deriving lessons from the past in order to respond to traumatic losses, address present social injustices, and prevent future acts of intolerance.
Credit not given for both this course and 01:563:360 and 01:470:369.

01:510:372 *Armenian Genocide in Comparative Perspective (3)*
Overview of the Armenian Genocide in comparative perspective, drawing from a wide spectrum of cases of mass violence and genocide, the development of the concept of genocide in International Law, genocide denial, responsibility to protect, reparations, and reconciliation; organization and implementation of the genocide, humanitarian and armed resistance to it, and the aftermath of genocide.

01:510:373 *State and Society in Imperial Russia (3)*
Autocratic government as a dynamic force in the 18th century and a conservative one in the 19th century in the face of intellectual and socioeconomic development.

01:510:375 *Revolutionary Russia and the Soviet Union (3)*
Crisis of the old regime; revolution; building socialism in an underdeveloped country; Stalin's terror; expansion and the Cold War; the post-Stalin attempts at reform; and the breakup of the Soviet Union.

01:510:377 *Russia in War and Peace (3)*
History of Russia from the war against Japan in 1904 to post-Soviet wars in Chechnya. Focus on how international conflicts affected Russian politics, culture, and society: Revolution of 1905, turmoil in First World War, revolutions of 1917, Russian Civil War, "socialism in one country," mythology of Great Patriotic War, xenophobia in Cold War, war in Afghanistan, and collapse of communism.

01:510:378 *Jews and Revolution (3)*
Jewish experience in modern Russia, with special focus on the involvement of Jews in the Russian Revolution and socialism and nationalism during the Soviet Union, and the challenges to Russian-Jewish relations in the post-Soviet era.
Credit not given for both this course and 01:563:331.

01:510:379 *St. Petersburg (3)*
Intensive study of the historical development of St. Petersburg and its role in Russian and European history. Variable topics; specific topics will be available at time of registration.
No knowledge of Russian required. Offered only as part of summer program in St. Petersburg.

01:510:381 *Eastern Europe, 1800-1948 (3)*
Emergence of national movements and independent states in Poland, Czechoslovakia, Hungary, Yugoslavia, Romania, and Bulgaria. Problem of national minorities in nation-states, and solutions offered by nationalist, fascist, and communist regimes.

01:510:382 *History of Modern Greece (3)*
Greek experience under Ottoman rule; revolution and independence; development of national state and society 1830s to present.
Credit not given for both this course and 01:489:382 or 01:685:382.

01:510:383 *Eastern Europe, 1945-Present (3)*
Impact of communism and neoliberalism on Eastern Europe. Collapse of the Soviet Bloc, transition to liberal market capitalism, and its social consequences.

01:510:384 *Cyprus: A Global History (3)*
History of Cyprus from the 16th to the 21st century.
Credit not given for both this course and 01:489:381 or 01:685:384.

01:510:385 *The History of East European Jewry (3)*
Economic, legal, and political conditions of Jewish life from the 16th century to World War II. Forms of Jewish response: autonomism, messianism, Hasidism, emigration, and socialism.
Credit not given for both this course and 01:563:385.

01:510:386 ***Zionism: Meanings and Challenges (3)***
Origins of Zionism in the mid-19th century and its development to the present day. Topics addressed include Zionism¿s political and social contexts, how other ideologies shaped Zionism, critics of Zionism, and the effect of Zionism on Jews¿ relationship to each other and to their surrounding societies.

Credit not given for both this course and 01:563:343

01:510:389 ***Jewish Politics, Jewish Power (3)***
Political relationship of the Jewish community to the Gentile authorities among whom they lived, from Rome in 70 CE to the contemporary period. Continuities and discontinuities of traditional conceptions of Jewish political behavior; rebellion and accommodation to structures of power in varying historical contexts.
Prerequisite: At least one course in Jewish or European history after 1500. Credit not given for both this course and 01:563:389 and 01:790:384.

01:510:390 ***Jewish Memory (3)***
Course explores various forms of Jewish memory shaped in response to major events, including myths, holidays, monuments, pilgrimages, testimonies, museums, literature, and film.
Credit not given for both this course and 01:563:390.

01:510:391,392 ***Historical Studies (3,3)***
Separate sections focusing on different topics at different times and in different areas. Specific titles available at time of registration.

01:510:393 ***Jewish Historical Fiction (1.5)***
Explores a variety of Jewish historical novels and their relationship to the historical periods they purport to represent, from late antiquity to the modern period. Special emphasis is given to comparing works of history with works of fiction. Topics include: Second Temple sectarianism, medieval Jewish marriage law and customs, mysticism, sabbatianism, and revolution in the Soviet Union.
Credit not given for both this course and 01:563:336.

01:510:394 ***Human Rights (3)***
Examines the history of human rights as a set of ideas and as a motivation for social action. Special emphasis on the role of human rights in Europe, but includes comparisons with rights-based activism in other parts of the world.

01:510:401 ***The Idea of Europe: 18th Century to the Present (3)***
Exploration of the concepts "Europe" and "Europeans" from 1700 to the present.
Prerequisite: 01:510:101-102 or permission of instructor. Credit not given for both this course and 01:360:401.

01:510:403 ***Ancient Warfare and Diplomacy (3)***
International politics and military history in the Greek and Roman world. Readings include ancient sources (in translation) and modern interpretations.

01:510:407 ***Rome in the Age of Augustus (3)***
Examination of the career of Augustus and the developments in the Roman world during this period. Treatment of the problems of change and continuity through revival and innovation in political, social, and intellectual spheres, with emphases on growth of imperial system and on the literary works and social legislation.

01:510:419 ***Europe in the Contemporary World (3)***
Europe from 1930s to present, focusing on European responses to challenges of American power, Soviet revolution, and anticolonial movements.

01:510:425 ***Intellectual History of Early Modern Europe (3)***
Study of major currents of thought (religious, scientific, political, and social) from the end of the Middle Ages to the 18th century.

01:510:441 ***The Social History of Medieval England (3)***
Concentrates on the interaction between individual and society in medieval England with special emphasis on the life experiences of the common people.

01:510:484 ***Russia after Stalin: Literature, History, Theory (3)***
Recent past of Russian culture and politics. Study of how the Stalinist past influenced late Soviet Russian culture, contributed to the collapse of the USSR, and shaped post-Soviet Russia through examination of powerful fiction texts and films that defined the post-Stalin era, from 1950s onward, as well as nonfiction and theoretical texts on Stalinism and its aftermath.
Taught in English. Credit not given for both this course and 01:86:484 and 01:195:484.

History (SAS)

American History Courses (512)

American History Courses (512)

01:512:103 ***Making of America: Colonization to Civil War (3)***
Political, economic, and social history of the United States from colonial times to the Civil War.

01:512:104 ***Making of America: Gilded Age to Global Power (3)***
Political, economic, and social history of the United States from the Civil War to the present.

01:512:107 ***Gateway to Making of America: Colonization to Civil War (4)***
U.S. history to 1877, with weekly recitation section.
Registration through school dean.

01:512:108 ***Gateway to Making of America: Gilded Age to Global Power (4)***
U.S. history since 1877, with weekly recitation section.
Registration through school dean.

01:512:111 ***Race, Place, and Space in American History (3)***
Explores the interplay of social, historical, and spatial forces in configuring American racial formations and identities--white, black, Indian, and Asia--from the colonial period to the present. Situates race in geographical context and assesses how modern America has been influenced by the historical development of racialized spaces and places.

01:512:121 ***Health and Environment in America (3)***
Changing manner in which Americans perceived and responded to health-related problems involving both the individual and the physical and social environment from the 17th to the 20th century.

01:512:191,192 ***American Topics (3,3)***
Study of special topics in American history at the introductory level.

01:512:205 ***The American Presidency (3)***
Examines the American presidency in historical perspective, including the powers of the office, its place in the American imagination, and the substantive achievement of the most significant presidents.

01:512:210 ***Food in the United States and the World (3)***
Examines the histories of food production and consumption in the United States and the world from the colonial era to the 21st century, with particular emphasis on the 19th and 20th centuries. Considers how political and economic power relations, social norms, and cultural traditions regarding food production and consumption have changed over time.

01:512:212 ***Cowboys and Indians on the Western Frontier (3)***
Introduction to the history of the west and tensions between native people and settlers.

01:512:215 ***American Legal History (3)***
American legal history from the 18th century to the contemporary era. Focus on specific case studies in the history of American law.

01:512:216 ***Famous Trials (3)***
Examines famous American trials (Sacco and Vanzetti, Scopes, Scottsboro, Hiss) with comparative trials from world history (Galileo, Dreyfus, Oscar Wilde). Includes film portrayals and 21st-century parallels.

01:512:220 ***Your Family in History (3)***
American history from the perspective of a student's own family or ethnic group. Impact of social, cultural, economic, and religious changes on the family.

01:512:221 ***Abortion: The Collision of History, Law, Religion, Medicine, and Human Rights in the 20th and 21st Centuries (3)***
Abortion is one of the most socially contested issue of our time. Using a historical and

sociological lens, this course seeks to understand the issues in more contextual and less polemic manner. This course will explore the history of abortion, key legal and public health aspects, the anti-abortion social movement, the realities of abortion provision, abortion in popular culture and public opinion, and abortion in the international arena.

Credit not given for both this course and 01:840:220.

01:512:225 ***Sexuality in America (3)***
The history of sexuality in American history from early colonization to contemporary America. Explores the factors that shaped people's sexual lives and introduces students to the historical study of sexuality.

01:512:229 ***History of Medical Ethics (3)***
Overview of medical ethics in 19th and 20th century United States and the historical milestones that led to our current system of research oversight. Traces history of research with human subjects prior to the establishment of bioethics as a field and examines discussion and practice surrounding human subjects research in late 19th and 20th centuries. Topics include Tuskegee Syphilis Experiment, ethical issues in human reproduction, ethics of death and dying, ethics of commodification of medical care.

01:512:230 ***History of Medicine in Film (3)***
Portrayals of medicine and medical care in American film over the past 80 years. What popular films can tell us about the cultural images of physicians, technology, and medicine in American society.

01:512:231 ***American Jewish History (3)***
History of the Jews in the New World, beginning in the middle of the 17th century, and then focusing on the United States until the present.
Credit not given for both this course and 01:563:231.

01:512:235 ***Accidents and Disasters in the United States and the World (3)***
Examines the histories of accidents and disasters in the United States and the world from the 17th to the 21st centuries, with particular emphasis on the 19th and 20th centuries.

01:512:236 ***Edison and His Era (3)***
Work of Thomas Edison as a vehicle for understanding the transformation of the American economy and culture from 1880-1930.

01:512:237 ***Data: A Social History (3)***
Explores data in American society. How and why data became central to government, business, and daily life in the United States, from the nineteenth century to the present day.

01:512:238 ***History of Homelessness: Unhoused Populations in US History (3)***
Examines social and legal history of homelessness and unhoused populations in the United States, from the colonial period to the present.

01:512:240 ***World War I (3)***
Study of the causes, course, and consequences of World War I, with particular emphasis on American culture and foreign policy within Western civilization.

01:512:242 ***World War II (3)***
Study of the causes, course, and aftermath of World War II, with particular emphasis on the place of American culture and foreign policy within world politics.

01:512:250 ***Natives and Newcomers: Immigration and Migration in U.S. History (3)***
Immigration and migration in U.S. history from precolonial societies to the present. Critical examination of the dynamics of immigration over several centuries, challenging common fundamental views. Considers immigration from the perspective of natives or "the nation" and from the view of newcomers.

01:512:253 *Asian American History (3)*
Introduction to the political, economic, and sociocultural aspects of immigrants from Asia and their descendants in the United States from the 16th to the 21st century.
Credit not given for both this course and 01:050:253.

01:512:260 *American Slavery (3)*
Examines the institution of slavery from 1619 through the Civil War. Considers how slavery changed over time and how it was experienced in different regions.

01:512:262 *African-American History to 1877 (3)*
African-American history from origins in Atlantic Africa to the end of the Civil War. Focal points include the Atlantic African background, the Atlantic slave trade, Antebellum slavery, slave culture, and the Civil War. Explores forces which have converged to create African-American peoples and shape their lives, communities, and cultures in early North America.

01:512:263 *African-American History, 1877 to Present (3)*
African-American history from defeat of Reconstruction to present. Topics covered include the post-Reconstruction period, Jim Crow, urbanization, and migration, as well as African-Americans' experiences with education, housing, and justice in the U.S. legal system. Examines key social justice movements such as the Civil Rights Movement and Black Power.

01:512:264 *Black Lives Matter (3)*
Explores the development of the #BlackLivesMatter movement beginning with the colonial era and ending with the contemporary moment.
Credit not given for this course and 01:014:264.

01:512:266 *History of the Black American (3)*
Survey of the history of the black American from the colonial era to the present. Includes such topics as slavery, the Reconstruction era, the Washington-DuBois controversy, the Harlem Renaissance, and the Civil Rights movement.

01:512:267 *History of Black Travel and Migration (3)*
Examines the various travels taken by African Americans. From the forced migration of African peoples in the transatlantic slave trade to contemporary heritage tours to Africa, this class explores the meaning of travel for African Americans.

01:512:268 *Plantation to White House (3)*
Exploration of the history of blackness in America, from colonial times to the present, with key questions focusing on slavery, citizenship, gender, and racial identity.

01:512:278 *Popular Music in American History (3)*
Popular music examined within the broader social and cultural context of America's past. Significant historical changes in musical expression.

01:512:280 *News Media and Government in American History (3)*
Examines relationship between media and institutions, and the processes through which people and societies make political choices.
Credit not given for both this course and 04:567:278.

01:512:282 ***Sport in History (3)***
Role of sport in ancient and preindustrial societies; modernization of sport following the Industrial Revolution; social functions and aesthetics of sport; women in sport; sport in contemporary society.

01:512:291,292 ***Topics in History (3,3)***
Study of special topics in American history at the intermediate level.

01:512:300 ***History of Colonial America (3)***
From the Age of Discovery through the American Revolution, with particular emphasis on political, economic, and social history.

01:512:301 ***The American Revolution (3)***
Coming of the American Revolution seen in its world setting; various interpretations of the causes: ideological, constitutional, social, economic, political, diplomatic, and military perspectives.

01:512:302 ***The United States: The Young Republic (3)***
Examination of the principal political, economic, and social forces that were responsible for the development of the new nation.

01:512:303 ***American Civil War and Reconstruction, 1848-1880 (3)***
Analysis of major forces 1848 to 1880. Emphasis on the more immediate background to the war; how the war began; how it was fought; and why Reconstruction developed and collapsed.

01:512:304 ***The Forging of Modern America, 1880-1920 (3)***
Political reform movements against the background of industrial development, urbanization, and immigration in the United States from 1880 to 1920.

01:512:305 ***U.S. History, 1914-1945 (3)***
U.S. history from World War I through World War II, emphasizing major themes in U.S. politics, society, culture, and diplomacy.

01:512:306 ***U.S. History, 1945 to the Present (3)***
U.S. history emphasizing the cold war, McCarthyism, and the major political, social, and economic trends of the 1960s and 1970s.

01:512:308 ***History and Asylum Law in the United Stats (3)***
Advanced research seminar and practicum; explores the history of asylum in the United States; shows how historical research can be applied to the practice of asylum law.

01:512:310 ***New Jersey History (3)***
New Jersey from its proprietorial beginnings to the present. Emphasis on those factors that have been most influential in determining the character of the state today.

01:512:311 ***History of American Education (3)***
A historical survey of American education from the colonial period to the present. Topics considered will include the following: 1) colonial American education; 2) the origins of common schools; 3) the development of a public school system; and 4) 20th- and 21st-century educational reform.
Credit not given for both this course and 05:300:364.

01:512:313 ***Childhood in America (3)***
Introduction to childhood as a subject of historical inquiry, exploring both childhood as a cultural expression and children as historical subjects over the course of 400 years of American experience in psychological, religious, social, educational, economic, and political terms.

01:512:314 ***The City in American History (3)***
Urbanization from the colonial city to the 20th-century metropolis; urban population, institutions, problems, and planning; urbanism in American culture.

01:512:315 ***Famous Trials in Modern America (3)***
Civil liberties and civil rights trials in 20th-century America: Abrams, Sacco and Vanzetti, Scopes, Scottsboro, Rosenbergs, Hiss, *Roe v. Wade*.

01:512:316 ***Radicalism in America (3)***
Ideas of the outstanding radicals in American history (18th century to the present), the areas of discontent, and an analysis of the response of the American community.

01:512:317 ***Murder in American History (3)***
Famous murders (and other capital crimes) illustrating major cultural and political trends in American life. May include Salem witchcraft, the Boston Massacre, Sacco and Vanzetti, Lindbergh, Leopold and Loeb, and Emmett Till.

01:512:318 ***History of Political Corruption and Reform in America (3)***
The long history of political corruption in America, and the reform movements designed to combat corruption. From colonial America to the present.

01:512:319 ***Nineteenth-Century Architecture and Society in the United States (3)***
Overview of the social and intellectual history of architecture in the United States to 1900. Role of architecture in societal transformations (the development of nationhood, industrialization, and urbanization). Emphasis on the invention of new building types, including universities, government buildings, prisons, hospitals, railroad stations, and the architecture of World's Fairs.
Credit not given for both this course and 01:082:391.

01:512:320 ***American Frontier History (3)***
Mythology, theory, and reality of the frontier in American social, cultural, and environmental development from discovery to the present.

01:512:321 ***Health Care and Society in America (3)***
History of disease in America from the age of smallpox and scarlet fever to the era of AIDS; and history of health and health care from the colonial era to present.

01:512:322 ***Drugs: A Social History (3)***
History of drug use in modern America, drugs in the underground and informal economy, drug epidemics, and government response in the United States after World War II.

01:512:323,324 ***History of the North American Environment (3,3)***
Comparative study of the interplay of culture, society, and environment in Canadian, U.S., and Mexican history.

01:512:328 ***Science in American Culture (3)***
Place of science in U.S. history. Science and exploration, war, the economy, and social problems; growth of research and educational institutions; popular science and antiscience.

01:512:329 ***Technology and Nature in American History (3)***
Historical exploration of the shaping of American history by technological and natural forces. From colonial America to the 21st century; from Walden Pond to Yosemite National Park, an exploration of land-use patterns, transportation networks, suburbanization, ideas about wilderness, environmental politics, and other topics.

01:512:332 ***American Economic Growth since 1860 (3)***
Main currents and major factors in American economic growth, welfare, and decision making, 1860 to the present. Critical evaluation and interpretation of economic issues.

01:512:335 ***History on Film (3)***
Examination of films that interpret the American past and engage major historical issues.

01:512:342 ***Policing in Black Communities: From Slavery to Mass Incarceration (3)***
This course examines the history of policing in Black communities from its origins in colonial slavery to the present. It reveals how Black people's desire for freedom from slavery led fearful local, state, and federal authorities to establish a complex web of laws, policies and social practices that monitored and governed Black people's lives, laying a durable foundation for systems of racial and social control that continue to exist in modified forms in contemporary society.

01:512:347 ***War, Peace, and the Military of the United States to 1877 (3)***
Survey of American attitudes toward and developments in regard to war, peace, and the military from colonial times through the Civil War and the end of Reconstruction.

01:512:348 ***War, Peace, and the Military of the United States since 1877 (3)***
Survey of American attitudes toward and developments in regard to war, peace, and the military from modernization of the army and navy beginning in the late 19th century through the Spanish-American War, two world wars, the Korean and Vietnam wars, to the present military situation.

01:512:350 ***From Colonies to Empire: American Foreign Relations to 1898 (3)***
American foreign relations from the colonists' conflicts with Native Americans to the Spanish-American War. Territorial expansion, diplomatic principles, economic expansion, and rise of the "New Empire."

01:512:351 ***Mexican-American History (3)***
Examination of major themes in Mexican American/Chicano history since the 19th century. Topics include Spanish empire, Anglo-American conquest, racial hierarchies, labor migration, politics, popular culture, gender, sexuality, and social movements.
Credit not given for both this course and 01:595:351.

01:512:352 ***U.S. Foreign Relations since 1898 (3)***
American foreign relations from the Spanish-American War to the end of the cold war: Imperialism, Wilsonian interventionism, World War II, cold war, and détente.

01:512:354 ***America, Russia, and the Cold War (3)***
Examines the shift from friendship to antipathy between Russia and America in the late 19th century and early 20th century; the roots of Soviet-American ideological rivalry; superpower competition and global conflicts after 1945; détente; the ending of the Cold War; and the question of a "new Cold War" in the 21st century.

01:512:355 ***America's Rise to Global Power (3)***
Technology as the key source of U.S. identity and projection of power and culture overseas. Focus on the interaction of United States and Asian and African societies.

01:512:356 ***The Thirty Years' War: America in Vietnam (3)***
Examination of the causes and effects of the war in Vietnam with special emphasis on the United States and its role.

01:512:359 ***Race, Culture, and Politics: Blacks and Jews in America (3)***
How black and Jewish identities have evolved in relationship to one another through an examination of social and political history, literature, and film.
Credit not given for both this course and 01:563:359 or 01:014:359 or 01:050:339.

01:512:360 ***Latino History (3)***
History of people of Latin American and Hispanic Caribbean descent in the United States over the last two centuries. Experiences of exile, labor migrants, refugees, and colonial subjects. Formation of communities, political and labor struggles, and racial/ethnic identities.
Special Notation: Not open to first-year students. Credit not given for both this course and 01:595:369.

01:512:361 ***History of the South (3)***
Development of southern society from the settlements of Virginia to the present. Aspects of life in the South that distinguish this region from others in the United States.

01:512:362 ***Black Family in American History (3)***
Defines and interprets the black family at different points in American history. Also explores such contemporary topics as the rise of the "underclass" black family, and the tendency toward "singleness" in black America.

01:512:363 ***African-American Women's History (3)***
Examines the diversity of African-American women's lives and the development of women, work, and culture from the colonial era through the late 20th century.

01:512:364 ***History of Blacks in Urban America (3)***
Explores aspects of black urban life from the early years of the nation to the present. Migration. Examination of contemporary black urban America.

01:512:365 ***African-American History Since 1945 (3)***
Social history, politics, and culture of African-American life in the United States from 1945 to the present.

01:512:366 ***History of Race and Sex in America (3)***
Examines how race and gender have independently and jointly determined life chances throughout American history.
Credit not given for both this course and 01:014:366 and 01:988:329.

01:512:368 ***History of Civil Rights, 1900-1980 (3)***
Politico-economic, demographic, cultural, and legal forces generating and shaping the struggle for racial justice in the United States from the beginning of the 20th century.

01:512:370 ***History of American Thought to 1850 (3)***
Principal ideas about humanity, God, nature, and society in American history from Puritan America to 1850.

01:512:372 ***History of American Thought since 1850 (3)***
Principal ideas about humanity, God, nature, and society in American history from 1850 to present.

01:512:373 ***African Americans in a Revolutionary World, 1910-1940 (3)***
History of black migration to the urban South and North, Harlem Renaissance and the New Negro movement, the entrance of black people into industrial employment, the establishment of black urban communities, the development of black political activism and artistic production, pan-Africanism and the connection of black activists to global networks of activists and intellectuals in the Caribbean and Europe.

01:512:374 ***Cultural History of the United States: 20th Century (3)***
Nature of American culture by study of folk, popular, and elite cultural products, verbal and nonverbal, in a world of mass production and consumption.

01:512:375 ***Gay and Lesbian History in the United States (3)***
Introduction to gay and lesbian history in the United States; explores same-sex desire, queer identities, community formation, and social movements from the colonial period to present. Particular emphasis on queer history's place in the larger context of U.S. political, social, and cultural movements in history.

01:512:376 ***American Culture in the 1950s (3)***
Survey of major cultural and political developments of the 1950s. Growth of advertising, consumerism, television, popular music, the "Ike Age," and McCarthy; perceptions of race and sex.

01:512:377 ***The 1960s (3)***
Examines the political culture of the 1960s, centering on conflicts between the forces of order, consensus, and containment, and the social forces of protest, resistance, and liberation.

01:512:379 ***African-American History, 1877 to Present (3)***
African-American history from defeat of Reconstruction to present.

01:512:380 ***Women in American History I (3)***
Changing status of women from settlement to Reconstruction, including the study of work, family, religion, sexuality, organizations, and feminism.
Credit not given for both this course and 01:988:380.

01:512:381 ***Women in American History II (3)***
Changing status of women from Reconstruction to the present, including the study of work, family, religion, sexuality, organizations, and feminism.
Credit not given for both this course and 01:988:390.

01:512:383 ***Women's Rights in America, 1800-1930 (3)***
Explores women's rights movements in the United States from 1800-1930 in the context of larger developments in the Atlantic World. Movements studied include abolition of slavery, legal rights, labor organizing, peace, suffrage, and sex radicalism.

01:512:385 ***Women Behaving Badly (3)***
History of women behaving badly in the late 19th- and early 20th-century United States. Examines histories of women criminals as well as experiences of women who transgressed racial, gendered, and sexual boundaries. Analysis of crime and female sexual deviance as well as efforts to curtail and reform disorderly women. Emphasis on social constructions of morality, delinquency, and womanhood.

01:512:388 ***Religion, Law, and the American Constitution (3)***
A course that studies Religion in American Constitutional Law, focusing especially on Supreme Court cases related to religion from the 19th century to the present. Interpretation of the establishment and free exercise of religion clauses in the First Amendment has been and remains a vital issue for American democracy and civil rights. This course seeks to provide context and analytical tools for understanding religion's role in American law, and vice versa.

Credit not given for both this course and 01:840:381.

01:512:391,392 ***Historical Studies (3,3)***
Separate sections focusing on different topics at different times and in different areas. Specific titles available at time of registration.

01:512:395 ***The Electronic Century: Technology and Popular Culture Description (3)***
Shaping of American social and cultural life in the 20th century by electrical, electronic, communications, and computer technologies.

01:512:400 ***History of American Politics (3)***
Conduct of politics in the United States, including the origin and development of political parties, characteristic forms of political behavior, and relationship of parties to democratic government.

01:512:402 ***American Constitutional History to 1865 (3)***
Study of the origins of the American Constitutional system: American Revolution; Constitutional Convention of 1787; Bill of Rights; Marshall and Taney courts; slavery, racism, and the Civil War.

01:512:404 ***American Constitutional History from 1865 (3)***
Supreme Court's role in interpreting the Constitution from the Civil War and Reconstruction (and passage of the 14th Amendment) to the present. Regulation of the economy and the "right to work"; free speech in war and peace; the New Deal; the due process "revolution"; abortion; affirmative action; and freedom of and from religion.

01:512:432 ***History of Business in America (3)***
Historical view of the growth and change of business institutions in the United States from the colonial era to the present.

01:512:434 ***History of Labor Movement (3)***
Impact of industrialization on the workforce of the United States. Economic pressures, technological developments, and ethnic subcultures as related to the social history of the working class.

01:512:438 *Oral History Fieldwork (3)*
Problems, theories, and methods of conducting field interviews and transcribing, editing, and analyzing oral sources. Students document New Jersey families; ethnic communities; and labor, business, religious, and political groups.

History/French Joint Major 513 (SAS)

HISTORY/FRENCH JOINT MAJOR 513

The joint major is an integrated program consisting of 45 credits of interdisciplinary study in the history, literature, culture, and language of France and French-speaking regions. The program is administered jointly by the Departments of History and French, and students should obtain advising and program approval from the undergraduate director in either department.

History/French Joint Major 513 (SAS)

Major Requirements

Major Requirements

The required 45 credits are distributed as follows:

1. 18 credits in courses offered by the Department of History:

6 credits in French history (01:510:331, 333, 335, or others by approval)

12 credits in either French history or related subjects, including non-European Francophone cultures. (Related courses in history include 01:510:101, 102, 321, 323, 325, 327, 343, 363, 407, 427, 445; 01:508:322, 422. Other courses may be added with approval of an adviser.)

2. 24 credits in courses offered by the Department of French:

9 credits of French language courses. A student may count only one of 01:420:131, 132, 210, and may not count 01:420:100, 101, 102, 105, 121, or 128.

6 credits as follows: 01:420:215 (or 217) and 216 (or 218). (These courses have a prerequisite of 200-level placement or successful completion of 01:420:132.)

9 credits on the 300 and 400 levels, at least 3 of which must be on the 400 level

3. 3 credits from a senior seminar jointly offered by history and French (taught in English, with supplemental materials in French).

With appropriate written approval, a student may count toward the major one School of Arts and Sciences honors seminar on an appropriate history/French topic, or one course given outside the history and French departments on a topic directly related to history/French. (For example, 01:082:351 Art in France, or a seminar on Paris/Tokyo-1700 to present.)

Of the required eight upper-level courses, at least four must be taken with Rutgers University-New Brunswick faculty.

History/French Joint Major 513 (SAS)

Honors Program

Honors Program

History/French majors with a cumulative grade-point average of 3.0, and a grade-point average of 3.4 in history and French courses, are encouraged to choose and carry out an independent project of advanced study on a topic that interests them for 6 credits, of which 3 count toward the major. Interested juniors may obtain further information from the departments and should consult an adviser.

History/French Joint Major 513 (SAS)

Secondary Teaching Certificate

Secondary Teaching Certificate

A secondary teaching certificate is available to students who complete the major and a fifth year in the teaching education department. Consult the Office of Teacher Education, Graduate School of Education, no later than the start of the junior year.

History/French Joint Major 513 (SAS)

Study Abroad

Study Abroad

History/French majors are urged to increase their knowledge of French through study abroad. Students who have completed French 01:420:213, 215, and 216 are eligible for study in Rutgers' program in Tours as sophomores or juniors. The French Department offers courses from the 213 to the 400 level through its seven-week summer program in Paris.

History/French Joint Major 513 (SAS)

Eligibility for Departmental Activities

Eligibility for Departmental Activities

Program majors are eligible to compete for nomination by the French department as "assistant d'anglais" (subsidized program to teach English in French schools for a year), to live in the French-speaking housing on

the Douglass campus or the French Living and Learning Community on the College Avenue campus, and for membership in the Phi Sigma Iota honorary society. A variety of special programs, opportunities, and events also are available through the history department, which will provide information at its offices.

Information may be found at the Department of History website or at the Department of French website.

History/Political Science Joint Major 514 (SAS)

HISTORY/POLITICAL SCIENCE JOINT MAJOR 514

The joint major is an integrated program consisting of 45 credits from the combined disciplines and not less than 21 credits from each. The program is administered by the Department of History and students should obtain advising and program approval from the undergraduate director in history.

Major Requirements

1. 15 courses in history and political science (45 credits)

2. 9 out of 15 courses in history and political science at the 300+ level (27 credits)

3. A minimum of 11 courses for the major must be taken at Rutgers University-New Brunswick.

4. Students must take 21 credits of political science, with 12 of those credits being at the 300+ level.

5. One course needs to be taken in each of the following four areas:

a. Global, African, Asian, Latin American, or Native American History (all 508 and select 506 courses)

b. European history (510)

c. United States history (512)

d. A course focusing on the period before 1500 CE

6. A History Seminar, either 01:506:401 or 01:506:402, in their junior or senior year. Students can also complete a Public History Internship (01:506:451) or Honors Program in History Thesis (01:506:496) for this requirement.

7. A History Workshop, 01:506:299, must be taken by the end of their sophomore year; junior-year transfer students must take the History Workshop in their first semester at Rutgers.

8. No more than two courses taken to complete a major or minor in another department can be used to fulfill the requirements of the history/political science joint major.

Holocaust Studies 564 (SAS)

HOLOCAUST STUDIES 564

Website: https://jewishstudies.rutgers.edu/academics/undergraduate/minors

Director: Jeffrey Shandler, Jewish Studies; Ph.D., Columbia

Judith Gerson, Sociology; Ph.D., Cornell

Paul Hanebrink, History and Jewish Studies; Ph.D., Chicago

Martha Helfer, German; Ph.D., Cornell

Michael Levine, German; Ph.D., Johns Hopkins

Jeffrey Shandler, Jewish Studies; Ph.D., Columbia

Nancy Sinkoff, History and Jewish Studies; Ph.D., Columbia

Arlene Stein, Sociology; Ph.D., California (Berkeley)

Paola Tartakoff, History and Jewish Studies; Ph.D., Columbia

Holocaust Studies Minor

This interdisciplinary minor enables students to take courses, offered by multiple departments, related to the history of the Holocaust and its remembrance, in order to acquire an in-depth understanding of the genocide in multiple contexts and its enduring importance as a moral paradigm.

Holocaust Studies 564 (SAS)

Learning Goals

Learning Goals

- Students will demonstrate a foundational command of the history of the Holocaust, situated within the context of European history of the first decades of the 20th century, the rise of Nazism and its racial policies, and World War II.
- Students will demonstrate an overview of representations of the Holocaust from a variety of countries and in an array of media, in order to understand how these works of memory are responsive to the context in which they are created and how they are used by various constituents to engage the public in issues of social justice.
- Students will demonstrate the relationship between their study of Holocaust history and remembrance with larger historical trajectories (e.g., modern Germany, modern Jewish history, World War II, Antisemitism), with related cultural practices (e.g., film, literature), with related intellectual issues (e.g., the ideology of fascism, the study of collective memory and of trauma), and/or other genocides.

Holocaust Studies 564 (SAS)

Minor Requirements

Minor Requirements

The minor consists of 6 courses.

Two required courses:

- 01:510:261 or 01:563:261 History of the Holocaust (3)
- 01:563:360 or 01:510:370:01 Remembering the Holocaust (3)

Four additional courses in at least two different departments (German, History, Jewish Studies) related to the Holocaust as listed on the Electives Courses page. A relevant 3-credit independent study or internship (e.g., at the Museum of Jewish Heritage: A Living Memorial to the Holocaust in New York) can count as one of these four courses, with approval of the faculty adviser. A 6-credit honors thesis can count as two of these courses, with approval of the faculty adviser. An honors seminar on a relevant topic can count as one of these four courses, with approval of the faculty adviser. Only one transfer course may be counted toward the minor, pending approval of the faculty adviser.

Holocaust Studies 564 (SAS)

Elective Courses

Elective Courses

Elective Courses

German
01:090:255 Atrocity Crimes and Legal Response (Honors Seminar)
01:470:310, 01:195:370, or 01:563:370 Germany Confronts the Holocaust
01:470:350 Nazi Period in Film
01:470:380 or 01:563:380 Topics: Germans and Jews: An Intercultural History
01:470:388 Topics: The Holocaust and Transgenerational Trauma

History
01:510:261 or 01:563:261 History of the Holocaust
01:510:329 World War II in Europe
01:510:363 Germany from 1871 to Present
01:510:368 or 01:563:368 Jews of Germany and Austria-Hungary, 1780-Present
01:510:372 Armenian Genocide in Comparative Perspective
01:510:381 Eastern Europe, 1800-1948
01:510:385 Rabbis, Rebels, and Rationalists: The Jews of Eastern Europe
01:510:394 Human Rights
510:268:01 Fascism

Jewish Studies
01:510:260 or 01:563:210 Remembering the Shtetl
01:563:269 or 01:510:269 Antisemitism
01:563:270 or 01:510:263 Exile under Nazism and Communism
01:563:365 or 01:195:395 Holocaust Literature in Translation
01:563:366 or 01:195:371 Holocaust Media
01:563:390 or 01:510:390 Jewish Memory

Sociology
01:920:393 Sociology of Trauma and Collective Memory
01:920:298 After the Holocaust (Honors Seminar)

Human Resource Management 533 (SMLR-U)

HUMAN RESOURCE MANAGEMENT 533

Dean: Adrienne Eaton

Program Director: Ryan Greenbaum

Student Counselors: Shuenn (Grace) Tien and Joy Montuoro

Website: smlr.rutgers.edu/hrmug

The School of Management and Labor Relations' Department of Human Resource Management (HRM) faculty are among the most frequently published and cited human resources (HR) faculty in the United States. Students who pursue studies in HRM will understand the relationship between HR strategy and business success while obtaining valuable skills to apply across many industries.

A course of study in human resource management is one path to understanding business that does not require a business degree. It helps prepare students interested in pursuing a master's degree in human resource management (M.H.R.M.) or the master's in business administration (M.B.A.).

The human resource management undergraduate major and minor are offered by the School of Management and Labor Relations (SMLR). Further details are available in the School of Management and Labor Relations section of this catalog.

Human Resource Management 533 (SMLR-U)

Major Requirements

Major Requirements

Students who are in good academic standing are eligible to declare the human resource management (HRM) major through the School of Arts and Sciences at Rutgers University-New Brunswick. The major consists of a total of 45-48 credits, 36 of which are to be taken from within the human resource management curriculum (seven HRM

core courses [37:533] are required; eight for the HRM Honors Program) four HRM elective courses; and 9 credits from a list of related courses from other programs (the list of these courses is provided on the School of Management and Labor Relations [SMLR] website at http://smlr.rutgers.edu/content/bachelors-degree-human-resource-management.)

Introduction to Human Resource Management (37:533:301) is a prerequisite for the human resource management bachelor of arts degree program. Students must achieve a grade of C or better in this course before the major is declared.

Grades of C or better must be earned in all courses used to fulfill the requirements of the human resource management major.

Please visit the SMLR website for a full description of the requirements at http://smlr.rutgers.edu/content/bachelors-degree-human-resource-management.

For a full list of courses and details about the human resource management major, see the School of Management and Labor Relations section of this catalog.

Human Resource Management 533 (SMLR-U)

Minor Requirements

Minor Requirements

Students who are in good academic standing are eligible to declare the human resource management (HRM) minor through the School of Arts and Sciences at Rutgers University-New Brunswick. The HRM minor consists of 18 credits in human resource management, and must include course 37:533:301 Introduction to Human Resource Management, four courses from the concentration, and one elective course from the potential electives offered by the School of Management and Labor Relations (SMLR). Substitution of courses is not allowed.

Students will be required to complete six courses, offered by SMLR, with a C grade or better.

Please visit the SMLR website for a full description of the requirements at: http://smlr.rutgers.edu/content/minors-concentration-hrm.

For a full list of courses and details about the human resource management minor, see the School of Management and Labor Relations section of this catalog.

Human Resource Management 533 (SMLR-U)

Courses

Courses

37:533:301 ***Introduction to Human Resource Management (3)***
While many of the tasks associated with human resource management are centered in the HR department, all managers have HR responsibilities. This course covers the broad range of topics associated with HR management

from the perspective of the HR professional, the manager, and the employee. It serves as the base course in both the undergraduate HRM major and minor. It will also serve to familiarize students who hope to become managers or team leaders during their careers with some of the issues they will have to deal with, such as staffing, motivating, and developing team members.

37:533:311 *Talent Acquisition (3)*
This course focuses on the effective management of the flow of talent into and through organizations. It covers human resource planning, recruiting and selection, career transitions, and other workforce movement. An important goal of the class will be to provide opportunities to develop hands-on skills that are relevant to effectively managing talent flow.
Prerequisite: 37:533:301.

37:533:312 *Developing Talent (3)*
This interactive, theoretically anchored, and applied course is aimed at understanding the processes and practices of developing human capital. It covers how organizations train and develop their employees, performance management as an evaluative and developmental tool, and the strategic development of talent framed within the context of talent.
Prerequisite: 37:533:301.

37:533:313 *Compensation & Total Rewards (3)*
Helps students understand the theoretical basis for compensation and other rewards systems and provides a practical understanding of how compensation and rewards systems work. The economic, psychological, and strategic aspects of rewards systems are covered. A series of exercises provide hands-on experience with major compensation and rewards practices.
Prerequisite: 37:533:301.

37:533:315 *Global Human Resource Management (3)*
Explores the importance of international business management in the context of international human resource management, including topics on culture, compensation and benefits, international organizations and their structures, international assignment management, and the legal and regulatory considerations that global organizations face.
Prerequisite: 37:533:301.

37:533:317 *Career Management (3)*
Provides students with the knowledge and skills to help others manage their careers while learning how to manage their own. Topics will include self-assessments, motivation theory, professional skill-development, career ladders, labor market/occupational trends, market research, personal branding, job search techniques, résumé writing, interviewing skills, negotiating, networking, and creating work-life balance.

37:533:318 *HRM and Benefits (3)*
Employee benefits are complex, expensive, very personal, and many times misunderstood. This course seeks to acquaint students with the type of employee benefits offered in the workplace, the history behind them, and the challenges that benefits present to an organization. Students gain an understanding of benefits strategy, the legal requirements covering benefits, and explore how workforce demographics provide a context for the organization's employee benefits decisions. The course relies on a base knowledge of employment law, tax law, psychology,

management, organizational dynamics, and economics.
Note: This course was previously offered under Special Topic numbers 533:322 and 533:324. Students who take this course may not also utilize 37:575:375 Benefits and Social Insurance toward the HRM major.

37:533:321-328 *Special Topics in Human Resource Management (3)*
Topics offered may include:

- Ethics and Corporate Responsibility
- Human Resource Management and Health Administration
- Human Resource Management in the Public Sector
- Economics and Demographics of Labor Markets
- Employee Ownership and Group Incentives
- Conflict Management
- Social Media in HRM

Prerequisite: 37:533:301.

37:533:360 *HRM and Finance (3)*
Successful HR strategies are those that align with and support the firm's business strategy. Successful business strategies are those that create value for the firm and its stakeholders. To be effective in their strategic partner role HR professionals must understand how firms create value and measure value creation. This course will introduce students to the interpretation of financial statements and use of discounted cash flow techniques for planning and evaluating HR and strategic investments. Particular attention will be paid to topics such as selecting the financial measures used to determine incentive pay, paying in stock versus paying in stock options, alternative models for valuing stock options, the financial and HR aspects of pension plans, and the modeling of merger and acquisition opportunities.
Note: This course is designed for students without prior training in accounting or finance. Prerequisite: 37:533:301.

37:533:376 *Corporate Governance (3)*
Explores the relationship between corporate governance and the economic, social, and political impact of corporations. Topics include: history of the corporation and stock ownership; boards of directors; principal-agent/stakeholder theories; executive compensation; profit sharing; employee ownership; stock options; shareholder rights; takeovers and mergers; labor issues; pension funds; international corporate governance; the relationship between governance, corporate performance, and financial collapses; social and environmental sustainability; corporate social responsibility; and the role of public policy and government regulation.
Prerequisite: 37:533:301.

37:533:440 *HRM and Statistics (3)*
Addresses basic statistics, covering frequency distributions through regression analysis. Enables students to compile and analyze data used in developing, implementing, and measuring HR outcomes. It will also enable students to interpret HR and government reports.
Prerequisite: 37:533:301.

37:533:494,495 ***Independent Study and Research (BA)***
Individual reading and research project under the guidance of a human resource management faculty member on a topic of interest to the student.
For HRM majors only. Prerequisites: Completion of five human resource management courses from the list of core requirements including 37:533:301, with a GPA of 3.5 or better. Permission of program director required.

37:533:496,497 ***Internship in Human Resource Management (BA)***
Students work as staff members in an approved public or private organization's human resource management department. The opportunity will allow students to apply conceptual knowledge learned in the classroom to actual situations and to acquire new skills
For HRM majors only. Prerequisites: Completion of five human resource management courses from the list of core requirements including 37:533:301, with a GPA of 3.5 or better. Permission of program director required.

37:533:498,499 ***Honors in Human Resource Management (BA)***
An in-depth individual research project under the guidance of a member of the HRM department. Student will produce a thesis-quality research paper.
Students must be enrolled in the HRM Departmental Honors Curriculum Program (37-533H).

37:575:315 ***Employment Law (3) - Labor Studies Offering***
Overview of employment at-will and its limitations; wages and hours; medical/family leave; privacy; drug testing; workers' compensation; and fundamental antidiscrimination law.

37:575:345 ***Organizational Behavior and Work (3) - Labor Studies Offering***
Covers behavior by individuals and groups in the workplace; group and intergroup dynamics; organizational culture, structure, and change; leadership, employee motivation, job performance, and feedback.
This course number will be offered under a schoolwide course number in fall 2020.

Applicable Labor Studies Courses

In addition to 37:575:315 and 37:575:345, there are certain courses from the Department of Labor Studies and Employment Relations that are applicable to both the HRM undergraduate minor and major. For the complete list, please consult the HRM undergraduate website at smlr.rutgers.edu/hrmug.

Applicable Courses from Other Disciplines

The HRM undergraduate major includes a requirement of three courses from psychology, sociology, and economics as well as two courses from a list of quantitative requirements. Applicable courses from these areas of study can be found on the human resource management website at https://smlr.rutgers.edu/content/hrm-course-descriptions. Course descriptions for these courses can be found under their respective headings in the Programs of Study and Courses for Liberal Arts and Sciences Students chapter of this catalog.

Hungarian 535 (SAS)

HUNGARIAN 535

(See also European Studies 360)

Department of German, Russian, and East European Languages and Literatures, School of Arts and Sciences

Website: http://reell.rutgers.edu/home

Courses in English

Courses in English

01:535:259 ***Hungarian Literature and Civilization (3)***
Survey of the history of Hungarian literature and culture, including the fine arts.

01:535:260 ***Hungarian Culture Today (3)***
Survey of contemporary cultural, social, and political life in Hungary with emphasis on developments after World War II and the Revolution of 1956.

01:535:360 ***Special Topics in Hungarian Studies (3)***
With permission of program director, course can be taken repeatedly if content is different.
No knowledge of Hungarian necessary. Content varies each semester.

01:535:460 ***Advanced Topics in Hungarian Studies (3)***
With permission of program director, course can be taken repeatedly if content is different.
No knowledge of Hungarian necessary. Content varies each semester.

Courses in Hungarian

Courses in Hungarian

Introductory Courses

Beginners, or students with less than two years of Hungarian in secondary school, normally take 01:535:101,102. Students who have had two or more years of Hungarian in secondary school normally take 01:535:201,202. Students from homes in which Hungarian is spoken but who have not had academic training in the language normally take 01:535:121 before taking 01:535:201,202. Native speakers of Hungarian with academic training in the language must receive departmental permission before enrolling in any course.

NOTE: Rutgers currently offers Hungarian language courses only through BTAA course share. For more information, visit: https://tlc.rutgers.edu/btaa . Please contact the REELL Program Director with questions.

01:535:101,102 ***Elementary Hungarian (4,4)***
Basic course emphasizing the four basic skills of listening, speaking, reading, and writing

01:535:121 ***Intensive Elementary Hungarian (4)***
Intensive review of grammar, reading, writing, and vocabulary building, together with development of communicative skills.

01:535:201,202 ***Intermediate Hungarian (4,4)***
Continued development of language skills in Hungarian.
Prerequisite: 01:535:102 or 121 or equivalent.

01:535:301 ***Conversation (3)***
Designed to develop fluency in spoken Hungarian. Emphasis on listening, speaking, and interpretation skills. Development of active language skills through formal instruction and supervised foreign language immersion at the Hungarian Heritage Center.
Prerequisite: 01:535:202 or equivalent.

01:535:303 ***Internship in Hungarian (3)***
Development of active language skills through formal instruction and supervised foreign language immersion at the Hungarian Heritage Center.
Prerequisites: 01:535:301 or equivalent and permission of instructor.

01:535:305 ***Hungarian Language Laboratory (1)***
Instructor-guided laboratory practicum based on intensive use of media and designed for the improvement of aural/oral skills. Practice involves the use of text-related and other audio and video material, individual and group work, and recording of student speech for evaluation of pronunciation and fluency.
Pre- or corequisite: 01:535:259 or 301.

01:535:321 ***Poetry (3)***
Readings in the history of Hungarian literature. Emphasis on selected poets who led to the development of Hungarian literary consciousness.
Prerequisite: 01:535:202 or equivalent.

01:535:355 ***Translation (3)***
Translation of advanced-level texts from Hungarian into English. Vocabulary building, linguistic and stylistic problems, contrastive analysis with texts selected from various genres, including the media.
Prerequisite: 01:535:202 or equivalent.

01:535:401 ***Advanced Grammar, Stylistics, and Composition (3)***
Intensive study of selected Hungarian grammatical forms and structures. Study and practice in composition. Analysis and imitation of writing styles and forms, vocabulary development, and orthography. Frequent writing exercises.
Prerequisites: 01:535:301 and permission of instructor.

01:535:402 ***Advanced Writing Workshop (3)***
Intensive study of selected Hungarian grammatical forms and structures. Study and practice in composition. Analysis and imitation of writing styles and forms, vocabulary development, and orthography. Frequent writing exercises.
Prerequisites: 01:535:401 and permission of instructor.

01:535:403 ***Advanced Internship in Hungarian (3)***
Supervised training in a Hungarian business firm, social service agency, or nonprofit organization. Weekly discussion of situations and practices arising from internship experience.
Prerequisites: 400-level Hungarian course with a grade of B or better or equivalent and permission of instructor.

01:535:490 ***Seminar (3)***
Specific problems of Hungarian literature and language. Content varies each semester. Paper required.
Prerequisite: Permission of instructor.

01:535:493,494 ***Independent Study (3,3)***
Independent reading under supervision of a member of the department.
Prerequisites: Permission of department and instructor.

Individualized Major 555 (SAS)

School of Arts and Sciences

School of Arts and Sciences

Normally, individualized majors are are only approved when they propose a course of study that would be impossible to do within the current structure of majors, minors, and electives required of School of Arts and Sciences (SAS) students. Within the existing structure of majors, students are free to specialize while fulfilling the general requirements for an existing, approved SAS major. Appropriate courses in a minor and electives can provide the sought-after multidisciplinary supplementation to the particular focus of the standard major.

Students who wish to design their own individualized majors in the arts and sciences may make an application in writing to the SAS Vice Dean for Undergraduate Education. Application forms for the individualized major can be obtained by special request from the Office of Advising and Academic Services of the School of Arts and Sciences.

The individualized major should be designed in consultation with a major faculty adviser from SAS and two additional academic sponsors from at least two different departments, at least one of which must be another SAS department. Applications must include a statement of purpose and learning goals, a proposed program of courses, and the signatures of the three faculty sponsors. An individualized major must consist of at least 36 credits (twelve 3 credit courses): ordinarily, at least two-thirds of these credits (8 credits) must be taken in SAS courses; three-quarters (9 credits) must be at the 300 level or above; and at least one course should be taken as an independent study or capstone project in the senior year under the direction of the SAS faculty adviser, for the purpose of integrating the work comprising the major.

Students returning after multiple semesters away may pursue a 54 credit structured, individualizedmajor. They may write to the SAS Vice Dean for Undergraduate Education for more information about this return to learn credit-intensive option.

Satisfactory completion of this major leads to a Bachelor of Arts degree and will appear on the student's transcript simply as individualized major.

Information Technology and Informatics (SC&I-U)

INFORMATION TECHNOLOGY AND INFORMATICS

The information technology and informatics (ITI) major is a 39-credit program offered by the Department of Library and Information Science. This major emphasizes the evaluation, implementation, use, and management of information technologies for a wide range of organizations and corporations, as well as the social and organizational aspects of information and communication technologies. The major unites theories drawn from the humanities and social sciences with practical computer-based competencies. This combination prepares students to work in a diverse and highly competitive marketplace that demands individuals who understand the social, economic, and organizational impacts of technology locally and globally. The course of study combines rigorous thinking, problem-solving, and technology skills in a program that is based on sound research and current technology applications.

Upon successful completion of the major, students will be able to demonstrate these learning goals of the ITI program:

- *[CREATE]* Develop new technological solutions to real-world problems through innovative, collaborative, and computation approaches.
- *[COMMUNICATE]* Communicate to professional stakeholders utilizing evolving technological platforms.
- *[CRITICAL THINKING]* Analyze the ever-changing interactions of people and technology, regarding pertinent social, cultural, philosophical, ethical, legal, and economic issues.
- [COORDINATE] Evaluate, implement, use, and manage information technologies for a wide range of organizations and corporations.

Career Opportunities

New Jersey's growth industries--technology, pharmaceuticals, logistics, and finance--are driven by innovative applications of information technology. Graduates of the major in information technology and informatics seek positions in sectors such as government, health care, education, consulting, and finance where technology skills and an understanding of organizational and social informatics make them valuable employees. Examples of where ITI graduates have launched their careers include:

- Information technology analysis
- IT consulting and project management
- Technology policy analysis
- User experience analysis and design
- Web design and development
- Information assurance and cybersecurity
- Networking and systems administration and support

Admission to the Major

Admission to the information technology and informatics major is highly competitive; meeting the minimum requirements does not guarantee acceptance. Minimum requirements for admission include

- completion of at least 15 credits at Rutgers, or 15 transfer credits, with a grade-point average of 2.0 or better;
- a grade of C or better in the required prerequisite course 04:189:103 Information Technology and Informatics (or an equivalent transfer course);
- a grade of C or better in Expository Writing or an equivalent course or placement; and
- completion of the application including a personal statement.

The admissions committee considers the following criteria when reviewing student essays: (a) evidence of your interest in the major; (b) your future plans and their relationship to the major; (c) your strength as a writer; and (d) any other qualities that make you a strong candidate for admission to the ITI major. Applications are available on the school's website at: https://comminfo.rutgers.edu/admissions/undergraduate. Students may be admitted for the fall, spring, and summer semesters; check the website for the application deadlines each semester. Students are strongly encouraged to consult the school's website for up-to-date information regarding admissions procedures.

Major Requirements

Students must earn a grade of C or better in 04:547 courses in order for those courses to count toward the major.

Prerequisite survey course required before admission to the major (3 credits):

04:189:103 Introduction to Information Technology and Informatics (3)

SC&I interdisciplinary requirement (3 credits):

Either
04:189:101 Introduction to Communication and Information Processes (3)
or
04:189:102 Introduction to Media (3)

Core courses (12 credits):

04:547:200 Social Informatics (3)
04:547:201 Information Technology Fundamentals (3)
04:547:202 Object-Oriented Programming (3)
04:547:210 Management of Technological Organizations (3)

Elective courses (21 credits):

ITI students must select seven elective courses from the course listing for the ITI major.

Optional pathways:

Several optional areas of focus are available within the information technology and informatics program, including cybersecurity and information assurance, data management and information visualization, and web design. These guided pathways allow students to develop more in-depth knowledge and skills in focused areas. Please check the website for current offerings and course options.

Internships and Other Educational Opportunities

The ITI program encourages students to complete a 3-credit internship, which includes both work experience and an academic component. The program offers an independent study option to students who want to investigate a particular topic more fully under the supervision of a faculty member. High achieving students who qualify may apply to participate in a senior thesis. Students interested in the senior thesis must first take Application Research for Information Technology (04:547:300) and then conduct a research project, taking the Senior Thesis Course (04:547:465).

Course Transfers

A maximum of 6 transfer credits may be counted toward the information technology and informatics major. Only courses with a grade of C or better will be accepted for transfer.

Courses that students have taken at other New Jersey colleges, which are articulated through the NJ Transfer system and recorded on a student's transcript with an ITI course number, will be counted toward the major. However, such courses do count as transfer courses to the major and therefore a maximum of 6 credits may be applied to the major.

Students who wish to have a course they have taken elsewhere at Rutgers or externally at another university considered as one of their required or elective courses in the ITI major must submit a request for transfer equivalency in writing to the SC&I Office of Student Services. To submit such a request, the letter of petition must include a copy of the full syllabus of the course, a copy of the student's transcript showing the grade achieved, a note which ITI course it is requested to replace, and the reasons for consideration. The courses are evaluated in terms of their very close match of content and skills to the ITI course, the level of the course, and the grade achieved, which should typically be a B or better. Students will be notified in writing of the outcome of the petition.

Dual-Bachelor's/Master's Degree Program for ITI Majors

This degree pathway allows students to earn a bachelor's degree with an ITI major and a master of information (M.I.) degree in five years of continuous, full-time study, or longer if completed part-time. Students who have completed at least 90 credits in their undergraduate program can be considered for admission into the dual-degree pathway to the M.I. degree.

ITI majors who are admitted into the dual-degree pathway take two graduate courses in each of the fall and spring semesters of their senior year. Those courses are selected based on student goals and M.I. program requirements. These four courses (12 credits) count both as an undergraduate (ITI electives) and fulfill graduate (M.I.) requirements as long as the student earns a grade of B or better. Upon successful completion of coursework in the senior year, dual-degree students will graduate from the undergraduate program and transition into the graduate program as a M.I. student.

Details about the application process and degree requirements are on the school's website.

Interdisciplinary Studies, SAS 556 (SAS)

Interdisciplinary Studies, SAS 556 (SAS)

Courses

Courses

01:556:101 ***Studies in Biomedical Sciences (3)***
Lectures and laboratory in microbiology including basic morphology, physiology, and genetics of bacteria and viruses, with an introduction to human pathogens. Experience in a clinical department and participation in biomedical research and seminars.
Lec. 2 hrs., lab. 3 hrs. Open only to students in the biomedical careers program. Prerequisites: One year of college, including one semester of college biology or chemistry, and one semester of college math. Enrollment by permission only. Offered only during the summer semester.

01:556:103,104,105,106,107,108,109,111 ***Studies in Humanities (3,3,4,3,1.5,2,2,1)***
Instruction in six modules within four major humanities disciplines: art history, American history, literature, and philosophy. Topics vary.
Prerequisites: For students in Rutgers Early College Humanities Program; by permission. Graded pass (C or higher)/No Credit.

01:556:115,116,117,118 ***Upward Bound Interdisciplinary Studies (1,1,1,1)***
Topics vary.
Prerequisite: Special permission of program. Graded Pass (C or higher)/No Credit.

01:556:120 ***Human Biology and Health (1)***
Cultivation of STEM identity and empowerment of women through fostering understanding of the human body and enabling self-awareness. The role of various organ systems, nutrition, and genetics will be considered in the perspective of human health.

For students in the Douglass Bunting-Cobb Sciences LLC

01:556:130 ***Introduction to Scientific Research (3)***
How research projects are developed and what skills are needed to undertake research projects. Lectures, discussions, and small-group activities. Serves as a prerequisite for the research-oriented internship of Project SUPER.
Pre- or corequisites: 01:640:112 or 115; one course in the natural sciences. Enrollment limited to students in Project SUPER.

01:556:140 *The Greenhouse Effect (3)*
Physical and chemical bases of the greenhouse effect and its global impact: biological, climatic, economic, and political. Reducing the emission of greenhouse gases; nuclear energy and other alternative energy sources.
Lec. 2 hrs., lab. 1.5 hrs. For nonscience majors; not for major credit in science and engineering. Credit not given for both this course and 01:160:140 or 01:450:140 or 01:750:140.

01:556:201 *Studies in Biomedical Sciences (3)*
Introductory biochemistry emphasizing major classes of biomolecules, intermediary metabolism, and gene expression. Selected laboratory projects in bacterial physiology and molecular biology. Instruction in organic chemistry also available where needed. Research/clinical seminars required.
Lec. 2 hrs., lab. 3 hrs. Open only to students in the biomedical careers program. Prerequisites: Two years of college; two semesters of college chemistry; and two semesters in one of the following areas: college biology, organic chemistry, or physics. Enrollment by permission only. Offered only during summer semester.

01:556:202 *NERA II (3)*
Introductory biochemistry emphasizing major classes of biomolecules, intermediary metabolism, and gene expression.
Prerequisites: Two years of college; two semesters of college chemistry; and two semesters in one of the following areas: college biology, organic chemistry, or physics. Open only to students in the NERA program. Enrollment by permission only. Offered only during summer semester.

01:556:221,222 *Aresty Research Assistant Program (1.5,1.5)*
Research with a professor; training on the social and professional aspects of research.
Prerequisite: Special permission of Aresty program required. Graded Pass/No Credit.

01:556:240 *STEM Professional Development with Industry Perspectives (1)*
This course provides professional development and mentoring of STEM students via a collaboration of Douglass Women in Science and Engineering and industry partners. Through workshops, seminars, site visits, and 1-1 mentoring, this course cultivates career readiness, confidence building, and self-advocacy with perspectives from industry partners who support the advancement of women in professional workspaces.

01:556:251 *Papal Rome and Its People, 1500-Present: A Select History (3)*
Case-study approach toward select aspects of the social, cultural, intellectual, and political history of the early modern and modern popes, with a particular focus on their relationship to the city of Rome. Highlights the reigns of Popes Gregory XIII Boncompagni (1572-1585) and Gregory XV Ludovisi (1621-1623), and their subsequent family history to the present day.

01:556:291 *Foreign Language Workshop (1)*
Accompanies undergraduate courses in nonlanguage disciplines. Particular language elements taught dependent on the associated course.
Corequisite: Designated nonlanguage course. For students majoring in nonlanguage disciplines. Graded Pass/No Credit.

01:556:301 *Independent Study in Biomedical Sciences (3)*
Lectures and student seminars in experimental genetics; MCAT preparation; required participation in research/clinical seminars; independent research projects with biomedical scientists culminating in formal student presentations at a public symposium.
Lec. 1 hr., lab. 6 hrs. Open only to students in the biomedical careers program. Prerequisites: Three years of college; two

semesters of college chemistry; two semesters of college biology; one semester of college calculus; and four semesters of advanced courses in science, math, statistics, or computer science. Enrollment by permission only. Offered only during summer semester.

01:556:302 *NERA III (3)*
Participation in research/clinical seminars; independent research projects with biomedical scientists culminating in formal student presentations at a public symposium.
Lec. 1 hr., lab. 6 hrs. Prerequisites: Three years of college; two semesters of chemistry and biology; one semester of college calculus; and four semesters of advanced courses in science. Open only to students in the NERA program. Enrollment by permission only. Offered only during summer semester.

01:556:303 *Accelerated Research Methods (L/EARN) (3)*
Basic steps of the research process, from the conceptualization of a research question through hypothesis testing. Skills necessary for data analysis. Methodological issues that guide how researchers design projects, collect data, and interpret results.
Restricted to Project L/EARN summer program participants.

01:556:325,326 *Special Topics (3,3)*
Exploration of problems and issues relating to a particular theme.

01:556:328 *Special Topics (BA)*
Exploration of problems and issues relating to a particular theme.

01:556:403 *Applied Data Analysis in Health Research (L/EARN) (3)*
Statistical analyses, including univariate, bivariate, and multivariate. Application to an analysis of secondary data on a health or health policy topic.
Registration by special permission of Project L/EARN director. Prerequisite: For Project L/EARN program participants and other students who have completed a course in statistics through multiple regression and are familiar with a statistical package.

01:556:406,407 *Research in Computational Biology and Molecular Biophysics (1-4,1-4)*
Experimental or computational research on an original problem under the direction of a member of the Rutgers Center for Quantitative Biology faculty. Written report required.
Prerequisites: Declared major in biomathematics, chemistry, computer science, engineering (any of the nine engineering majors), mathematics, physics, statistics, or a minor in one of these fields with a major in biochemistry, biological sciences, biotechnology, cell biology and neuroscience, genetics, microbiology, or molecular biology and biochemistry. Permission of the Rutgers Center for Quantitative Biology undergraduate director; cumulative grade-point average of 2.8 or better. Open only to students who have completed at least 60 credits.

01:556:426 *Special Topics (BA)*
Exploration of problems and issues relating to a particular theme.

01:556:427 *Special Topics (1.5)*
Exploration of problems and issues relating to a particular theme.

01:556:480 *Interdisciplinary Quantitative Biology Boot Camp (1)*
Introductory exposure to language, culture, and experimental/theoretical underpinnings of molecular biology, macromolecular biochemistry/biophysics, structural biology, computational biology, systems biology, and bioinformatics.
Prerequisite: Permission of program director.

01:556:481 *Interdisciplinary Boot Camp in Quantitative Biology (0)*
Introduces students to the value of integrating quantitative biology education with that afforded by other disciplines of study including mathematics, physics, computer science, statistics, engineering, medicine, and the life sciences.
Prerequisite: Permission of program director.

01:556:482 *Interdisciplinary Boot Camp in Quantitative Biology (2)*
Introduces students to the value of integrating quantitative biology education with that afforded by other disciplines of study including mathematics, physics, computer science, statistics, engineering, medicine, and the life sciences.
Prerequisite: Permission of program director.

01:556:491,492 *Independent Study (BA,BA)*
Individual research supervised by a faculty member.

01:556:493,494 *Independent Study (3,3)*
Prerequisite: By permission, SAS dean's office.

01:556:497-498 *SAS Honors Seminar (1.5,1.5)*
Interdisciplinary honors seminar offered by a distinguished faculty member.
Prerequisite: By permission, SAS dean's office.

01:556:499 *SAS Dean's Honors Seminar (3)*
Interdisciplinary honors seminar offered by a distinguished faculty member.
Prerequisite: By permission, SAS dean's office.

International and Global Studies 558 (SAS)

INTERNATIONAL AND GLOBAL STUDIES 558

Department of Geography, School of Arts and Sciences

Website: http://geography.rutgers.edu/academics/undergraduate-program/minor-in-international-global-studies

Chair: Kevin St. Martin

Director of Undergraduate Studies: Asa K. Rennermalm

The minor in international and global studies is an interdisciplinary minor offered under the auspices of the Department of Geography in the School of Arts and Sciences, but is open to all Rutgers University students. The minor promotes an interdisciplinary understanding of global processes and relationships between places, while

fostering specialization in a particular world region and its language(s). The purpose of the minor is to prepare our students to meet the challenges of the 21st century, including appreciating human difference from multiple disciplinary perspectives and grappling with questions of social justice.

International and Global Studies 558 (SAS)

Learning Goals

Learning Goals

This program has three learning goals:

1. Global Literacy--Gain an understanding of the degree to which forms of human difference shape a person's experiences of and perspectives on the world.

2. Regional Understanding--Apply this understanding to a specific world region and situate this region in broader human and societal processes.

3. Language Training--Complete language training through the intermediate level as both a mode of communication and vehicle for cultural understanding.

International and Global Studies 558 (SAS)

Minor Requirements

Minor Requirements

The minor requires 18 credits (six 3-credit courses) in the distribution below, and an approved language proficiency. Detailed course list may be found on Degree Navigator.

Requirement 1: General Core: A total of 6 credits (See detailed course list on Degree Navigator.)

Requirement 2: Track Core: A total of 6 credits (Students select Track 1, Track 2, or Track 3; see detailed course list for each track on Degree Navigator.)

Track 1: International Politics, Economics, and Business. Will enable students to address issues relating to the management of global political and economic relationships and systems.

Track 2: Global Cultures and Social Systems. Will enable students to better understand forms of human difference and their relation to social justice in diverse cultural settings.

Track 3: Environment and Development. Will enable students to address pressing global issues of the 21st century, including environmental change, and human health and well-being.

Requirement 3a: Regional Specialization: A total of 6 credits (Students select one of the six regions below; see detailed course list on Degree Navigator.)

East Asia and the Pacific
Europe and Central Asia
Latin America and the Caribbean
Middle East and North Africa
South Asia
Sub-Saharan Africa

Requirement 3b: Language Proficiency: Intermediate college-level proficiency in a language approved for the selected region (Requirement 3a: see list of what languages are preapproved for each region on Degree Navigator.)

Requirement 4: Upper-level courses: A total of 9 credits in the minor must be earned at the 300 level or above. This requirement overlaps with requirements 1, 2, and 3a.

Students must receive a grade of C or better in each course that counts toward the minor in international and global studies.

Courses

Courses

01:558:101 ***Global Awareness: An Introduction to International and Global Studies (3)***
Introduces the field of international and global studies using analytical tools from a variety of social science and humanities traditions.

Italian Undergraduate Program

Italian Undergraduate Program

The Department of Italian is committed to the research and teaching of Italian language, literature, and culture from all periods--from Dante to opera, theater, and contemporary film. With seven full-time faculty members, the department is home to award-winning researchers, a thriving graduate program (M.A., M.A.T., and Ph.D.), and an incredibly rich undergraduate program, where students choose from a range of courses on Italian literature, culture, and gastronomy; world-class cities like Venice, Naples, and Rome; business Italian for careers in food, and fashion; the history of Italian opera; the mafia movie genre in the United States and Italy; Italian women writers; medieval and modern Italian poetry; and race, migration, and Italian (post)colonialism, among others.

The undergraduate program prepares students for a globalized world by providing them cultural immersion and fluency in a language other than English, and solid training in the humanities through a focus on textual analysis, critical thinking and writing, and intercultural interpretation.

The Major in Italian is comprised of two sets of courses: the first is designed to provide students linguistic proficiency; the second offers students a solid foundation in Italian cultural production across the centuries¿from Dante to opera, theater, and contemporary film.

Italian 560 (SAS)

Goals, Objectives, and Expected Outcomes

Goals, Objectives, and Expected Outcomes

The Department of Italian is committed to providing the university community with an authentic experience of Italian language, literature, and culture, and to providing intercultural and interdisciplinary knowledge as well as fundamental analytical tools. The language is taught with an emphasis on four skills: comprehension, speaking, reading, and writing. Literature and culture are taught with an emphasis on critical analysis, intercultural skills, and interdisciplinary approaches. Equipped with linguistic skills and refined insights into a different culture, students acquire the ability to interact in changing local and global environments and to participate in them with deeper understanding and greater effectiveness.

Departmental Learning Goals and Expected Outcomes

Goal I. General Linguistic Proficiency

Students achieve the linguistic and intercultural competence necessary to communicate in Italian. Our instructors teach Italian with an emphasis on cultural immersion and interpersonal modes of communication. Students will be able to read and write texts in formal, literary, and academic registers.

Goal II. Cultural Proficiency

Students achieve the skills necessary to research and critically analyze Italian culture (literature, film, art, design, fashion, etc.). In addition to culture courses taught in Italian, courses taught in English provide the same skills to students without prior knowledge of Italian and Italian American culture.

Goal III. Professional Preparation

Students learn about research and writing methods in Italian literature and culture, which equips them with the necessary skills to enter graduate programs in the humanities or professional graduate schools, including law schools and schools of international affairs or diplomacy, as well as careers in education, international business (finance, import/export, wine, food, and fashion), journalism, and public relations.

Italian 560 (SAS)

Major Requirements

Major Requirements

The major consists of 11 courses, beginning with 01:560:101.

Language Proficiency

A series of 6 courses in language at any level.

Students must complete: **Advanced Conversation 321 or 322.**

NB: 105/6 Italian for Reading Knowledge does NOT count toward the Major/Minor.

* Students who place into 121 Intensive Italian or above are required to take **additional** courses at the 200-400 level in Italian in order to fulfill the **6-course language requirement**.

Cultural Competence
5 courses from the Italian Studies Course list (ALL 200-400 level literature, film, and culture classes in the Department of Italian, plus some courses taught in other departments -- Classics, Art History, etc.).

Students MUST complete at least:

THREE courses at the 300-400 level in Italian

NB: 1.5 Credit "Mini-Courses" do NOT count toward the Major/Minor.

Up to 4 Italian transferred courses will count towards your major or minor.

Students must earn a minimum grade of C to count the course toward the Major.

The student's program must be approved by the Undergraduate Director.

Italian 560 (SAS)

Minor Requirements

Minor Requirements

The minor requires six courses, beginning with 01:560:101.

4 courses in Italian language.

Students must complete 01:560:132. If placed into 121 intensive Italian or above, students must take 321 or 322 advanced conversation.

The remaining 2 courses must be chosen from the Italian Studies Course List. (ALL 200-400 level literature, film, and culture classes in the Department of Italian, plus some courses taught in other departments--Classics, Art History, etc.).

NB: 1.5 Credit "Mini-Courses" do NOT count toward the Minor.

NB: 105/6 Italian for Reading Knowledge does NOT count toward the Minor.

Up to 4 Italian transferred courses will count towards your major or minor.

Students must earn a minimum grade of C to count the course toward the Minor.

The student's program must be approved by the Undergraduate Director.

Italian 560 (SAS)

Introductory Courses

Introductory Courses

Students who already have studied Italian and wish to continue that language are assigned according to the results on their placement test. Except for the courses listed under Courses in English, all courses are conducted in Italian.

Italian 560 (SAS)

Departmental Honors Program

Departmental Honors Program

To qualify for the Department of Italian's Honors Program, a student must have, at the end of her or his junior year, a cumulative grade-point average (GPA) of at least 3.0, and a GPA of 3.5 or higher in the Italian major.

In order to receive Departmental Honors, eligible students write an honors thesis. The honors thesis takes two semesters to complete, and counts for 6 credits toward the major. Students enroll in 495 during the fall semester, and 496 during the spring semester.

During the first semester, students conduct independent research and prepare a bibliography on their chosen topic, in consultation with their faculty adviser. During the second semester, students write and submit the thesis, in consultation with their faculty adviser. The honors thesis will be evaluated by a committee that includes two additional faculty members of the Italian Department.

Students interested in pursuing the honors thesis should take the following steps:

- Contact the undergraduate director, who will verify the student's eligibility (i.e., that the student has the requisite GPA).
- Write a brief (400-word) paragraph research proposal, describing her or his project.
- Consult the research profiles of faculty members on the department website, and select an appropriate faculty adviser.
- Contact the appropriate faculty member with her or his research proposal, requesting that the faculty member advise the honors thesis.

Study Abroad Programs in Italy

Study Abroad Programs in Italy

SUMMER PROGRAM

RU in Rome - Rutgers University

Each summer the Department of Italian offers RU in Rome--a four-week language, culture, and internship program in Rome, Italy, gives students the opportunity to earn 6 to 8 credits. It also provides excursions and other extracurricular activities to acquaint students more fully with everyday life in Italy today. Offerings include introductory to advanced Italian language classes, food studies and culture classes taught in English, which feature trips around Rome and beyond and a credit-bearing internship for those selected to participate. Inquiries should be addressed to the Department of Italian. https://global.rutgers.edu/program-search/details/summer-rutgers-ru-rome

SEMESTER PROGRAMS

Florence

The International Studies Institute (ISI) offers a variety of courses in Italian language, food studies & sustainability, art history, studio arts, architecture, history, international business, and Italian studies. All students are required to enroll in one course in the Italian language -- the Institute offers Italian at all levels from beginner to advance. Students may then choose freely from the wide variety of elective courses available. In order to have an idea of what classes are available, you should visit the ISI Florence website.

Rome

John Cabot University (JCU), an American-style liberal arts university, welcomes approximately 600 study abroad students a year as well as some 350 full degree-seeking Italian and international students. Academic year, summer, fall, spring.
Visit Global-Study Abroad website for more information.

Perugia

Umbra Institute has a robust catalog of academic offerings, including Food and Sustainability, Music and Fine Arts, STEM, and Multicultural Psychology, to name a few. All students are required to enroll in one course in the Italian language -- the Institute offers Italian at all levels from beginner to advanced. Students may then choose freely from the wide variety of elective courses available. Students should visit the Global-Study Abroad - Italy website for more information.

Students with intermediate level Italian skills will be excited by Umbra's innovative iCourses. These literature, media, and sociology seminars are taught in English, but with hour-long sections taught exclusively in Italian. Visit the¿Global-Study Abroad website for additional information.

Italian 560 (SAS)

Italian Studies Option

Italian Studies Option

Italian 560 (SAS)

Courses in English

Courses in English

01:560:231,232 ***Italian Culture (3,3)***
First semester: Italian contributions to Western art, literature, music, and thought from the late Middle Ages to the High Renaissance. Second semester: Milestones in Italian history and culture from the High Renaissance to the present.

01:560:235 ***Doing Business in Italy: Food, Wine, Fashion, and Beyond (3)***
Cultivates cultural competencies with regard to the particularities of the Italian food, wine, fashion industries, and business in general from economic, cultural, and social perspectives.

01:560:240 ***Italian Cooking Lab (3)***
Laboratorio di cucina. Fifth-semester Italian language and culture. Students learn food-related vocabulary, practice Italian conversation, and experience the art of cooking true Italian food during our cooking sessions.
Prerequisite: 01:560:132, Special Permission, or Placement equivalent.

01:560:241,242 ***Masterpieces of Italian Literature (3,3)***
Readings and discussion of representative works from Dante to Machiavelli in the first semester and from Galileo to contemporary writers in the second.

01:560:248 ***A Cultural Tour of Italy (1.5)***
Culture of Italy, focusing on some of its most fascinating cities (Naples, Rome, Urbino, Florence, and Venice), seen from a variety of perspectives and a wide spectrum of media (literary texts, photographs, visual artworks, documentaries, and films).
Does not count toward the major or minor in Italian or Italian studies.

01:560:253 ***Major Works of the Italian Renaissance (3)***
Historical overview of Italian Renaissance civilization in Florence and other major centers; significant works of representative writers, composers, and artists.

01:560:254 ***Modern Italian Literary Masterpieces (3)***
Comparative study of selected narrative, lyrical, and dramatic works of modern Italy.

01:560:255 ***The Italian Short Story (3)***
Exemplary masterpieces of Italian short-story writing from the early collections to the classics of the Renaissance and the modern and contemporary masters of the art.

01:560:256 ***Introducing Italy, City by City (3)***
A sequence of courses, each concentrating on one Italian city. Initial semester, Naples, to be followed by other semester courses taught by different members of the department.

01:560:258 ***Italian Icons (1.5)***
Introduction to Italian culture, seen through some of Italy's most prominent thinkers, artistic movements, and fields. Taught in English.
Does not count toward the major or minor in Italian or Italian studies.

01:560:260 ***From Literary Text to Film: An Introduction (3)***
Introduction to cinematic adaptation of literary texts within the Italian context, through analysis of pivotal narratives and their cinematic counterparts. No knowledge of Italian is required.
Credit not given for both this course and 01:560:347, 348, 349, 350.

01:560:268 ***Walking in the City (3)***
Representations of walking in modern European culture. Readings include Baudelaire, Calvino, Serao, Mansfield, Marinetti, Ortese, and Woolf. Screenings include Rossellini, De Sica, and Sorrentino.

01:560:270 ***Gol! Italian Sports Culture (3)***
Overview of the history of the development of Italian sports from ancient Rome to today.

01:560:280 ***The Environment in Italian Narratives (3)***
Introduction to the development of ecological concerns in influential Italian narratives, following a chronological thread. With a focus on the interactions between humans, other animals, and their environments, topics may include urbanization, pollution, ecological disasters, and sustainability, and texts may include poetry, prose, dialogues, documentaries, and feature films. Taught in English.

01:560:290 ***The Renaissance at the Movies and in Popular Culture (3)***
An exploration of the cultural dynamics of Renaissance Italy and the resonance of Renaissance culture in the popular imagination in the last half century. Study of canonical Renaissance works and films, graphic novels, advertising, and the performing arts.

01:560:304 ***Translation Workshop: Practice and Theory***
This course will introduce students to the craft of literary translation as well as the theoretical foundations of translation studies.H

01:560:315 ***Dante and Medieval Culture (3)***
Dante's work in historical perspective: the theological antecedents, memory of the classical writers, and new profane literary experience.
Credit not given for both this course and 01:195:315.

01:560:316 ***Fascism and Italian Culture (3)***
Twentieth-century literary and visual representations of Italian Fascism, the Resistance, and the Holocaust. Topics may include: fascism and everyday life; myths of technology and empire-building; the poetry of dissidents; testimony of Jewish writers; and narratives of resistance fighters, men, and women.

01:560:320 ***Mafia Movies: Approaches to Genre in Italian and American Film (3)***
Representations of the Mafia in Italian and American films from the early 20th century to today. Introduction to film genres.

01:560:331,332 ***Dante in Translation (3,3)***
Critical study of Dante in translation: the *Divine Comedy* and other works in their medieval context.

01:560:335, 336 ***Italian Opera (3,3)***
Italian opera and its cultural milieu from its origin to the present. Libretti and related literature, recordings, and possible attendance at performances.

01:560:339, 340 ***The Italian-American Experience (3,3)***
Literature of the struggle for survival, adaptation, and success of Italians in the United States; their search for identity; and their impact on the development of American life and culture. Counts toward the major.

01:560:345 ***Classics of Italian Cinema (3)***
Development of cinema in Italy; its rebirth after World War II; and the achievements of the major directors: Visconti, Rossellini, De Sica, Fellini, Antonioni, and others.

01:560:346 ***Contemporary Italian Cinema (3)***
A historical introduction to the past 25 years of Italian cinema, situating the films in the historical and cultural contexts that have shaped the past several decades of Italian social life. Films by Bertolucci, Benigni, Amelio, Crialese, Tornatore.

01:560:349, 350 ***Italian Cinema and Literature (3,3)***
Development of Italian cinema from neorealism to today (Visconti, Fellini, Wertmuller, and others) and the literature that inspired it and was influenced by it.
May not be used in satisfaction of major requirements. Credit not given for both these courses and 01:560:347,348. Credit not given for this course and 01:560:260.

01:560:355 ***Love and Sex Italian Style (3)***
An investigation of love in Italian literary texts from the Middle Ages to the present, through a combination of novels, poems, short stories, treatises, essays, and films.

01:560:356 ***Women in Italian Literature and Society (3)***
Women in the cultural and social milieu of both historical and present-day Italy as portrayed in works of literature and art as well as by today's mass media.

01:560:358 ***Love and Power in the Italian Renaissance (3)***
Interdisciplinary investigation of early modern Italian culture, seen through the perspective of power structures.
Credit not given for both this course and 01:195:389.

01:560:362 ***Women's Lives and Literature (3)***
Women's writing in the Italian context, from the end of the 19th century to the present. Analysis and discussion of literary works testifying to women's struggle for social and economic freedom and access to knowledge.

01:560:364 ***Villains, Heroines, Rebels, and Scapegoats (3)***
Representations of subjugation, violence, and cruelty--seen against their positive counterforces, resilience and heroism--in Italian culture of the late 19th and 20th centuries. Analysis of short stories, novels, and films.

01:560:391 ***Italian Food Culture (3)***
The history of Italian cuisine seen through literary texts and cultural traditions. Authors include: Dante, Boccaccio, Pulci, Sanudo, Marino, Goldoni, Manzoni, Pirandello, Calvino, and more. Taught in English.

01:560:398 ***Internship in Italian (3)***
Academic internship in an Italian company, agency, or organization. Internship requires supplemental reading, writing, exams, and reflection, and culminates with an oral interview, a public presentation, and a professional portfolio analyzing the student's experience.

01:560:399 ***CESEP (1)***
One-credit community service placement in Italian culture.

01:560:443 ***Contemporary Man's Search for Identity, Dignity, and Justice: The Drama of Pirandello and Betti (3)***

Discussion of several of the authors' most mature and brilliant plays illustrating contemporary man's feeling of confusion, alienation, and outrage, and his eternally unsatisfied search for identity and dignity.

01:560:446 ***Contemporary Italian Literature in Translation (3,3)***
Study of selected writers illustrating the main currents of 20th century Italian literature: Pirandello, Montale, Merini, Moravia, Calvino, Pavese, Ortese, Scego, and others.

Courses in Italian

Courses in Italian

Prerequisite

Italian 01:560:132 or permission of the department is a prerequisite for all courses in this section at the 300 level or above.

Please visit our website for the most updated version of our Course List.

01:560:101,102 ***Elementary Italian (4,4)***
Speaking, reading, and writing; oral-aural and written exercises.
Not open for credit to students who have had two or more years of secondary school Italian.

01:560:110 ***Intensive Elementary Italian (8)***
Fundamentals of the Italian language normally covered in two semester-long courses, 01:560:101 and 01:560:102, offered as a single intensive course.
Not open for credit to students who have had two or more years of secondary school Italian 01:560:101,102.

01:560:105,106 ***Italian for Reading Knowledge (3,3)***
Development of reading skills. Texts chosen from the humanities and social sciences.
Does not satisfy prerequisite for 01:560:131.

01:560:107, 108 ***Elementary Italian Laboratory (1,1)***
Instructor-guided laboratory practicum based on intensive use of media and designed for the improvement of aural/oral skills:
Corequisites: 01:560:101 (for 107); 01:560:102 (for 108)

01:560:121 ***Italian Review (4)***
Intensive review and practice of Italian grammar, reading, and writing.
Prerequisite: Placement test in Italian. Not open to students who have taken 01:560:101,102.

01:560:123,124 ***Conversation (3,3)***
For students enrolled in Intermediate Italian and others who wish to develop fluency in speaking.
Not open to students who have taken 300-level courses.

01:560:131,132 ***Intermediate Italian (4,4)***
Development of fluency and accuracy in speech and composition; current reading materials.
Prerequisite: 01:560:102 or equivalent.

01:560:136 ***Intensive Intermediate Italian (8)***
Development of fluency and accuracy in speech and composition through current reading materials, in one semester.
Prerequisite: 01:560:102 or equivalent. Not open for credit to students who have taken 01:560:131,132.

01:560:250 ***Writing Workshop in Italian (3)***
Study and practice in composition to improve skills for written Italian. Analysis and imitation of writing styles and forms; vocabulary development; syntax; frequent written exercises.
Pre- or corequisite: 01:560:132 or permission of department.

01:560:251 ***Italian Composition and Stylistics (3)***
Study and practice in composition to perfect skills for written Italian. Analysis and imitation of writing styles and forms; vocabulary development; syntax; frequent written exercises.
Pre- or corequisite: 01:560:250 or permission of department.

01:560:261,262 ***Masterpieces of Italian Literature (3,3)***
Introduction to Italian literature: from Dante to Machiavelli in the first semester and from Galileo to the moderns in the second.
Prerequisite: 01:560:132.

01:560:302 ***Italian Today Through Literature (3)***
Explores typical aspects of current Italian life through the analysis of texts taken from contemporary Italian literature, also examined through songs and films.
Prerequisite: 01:560:132.

01:560:305 ***Introduction to Literature (3)***
Introduction to canonical works of medieval and early modern Italian literature, from the beginnings to the 16th century. Refinement of speaking and writing ability.

01:560:306 ***Introduction to Literature II (3)***
Introduction to canonical works of Italian literature from the Baroque period to the 21st century. Refinement of speaking and writing ability.

01:560:317,318 ***Italian Culture Today (1.5,1.5)***
Contemporary cultural, social, and political life in Italy with emphasis on daily experience. Field trips.

01:560:321 ***Advanced Conversation through Current Events (3)***
Development of conversational ability through discussion of significant historical, social, and cultural movements in Italy.

01:560:322 ***Advanced Conversation through Cinema (3)***
Development of conversational ability through discussion of contemporary films.

01:560:341,342 ***Italian Literature of the 19th Century (3,3)***
Neoclassicism, romanticism, and verismo. Readings from Foscolo, Manzoni, Leopardi, Carducci, Pascoli, Verga, D'Annunzio, and others.

01:560:347, 348 ***Italian Cinema and Literature (3)***
Comparative study of selected films and their literary sources and counterparts.
Credit not given for this course and 01:560:260.

01:560:351,352 ***Italian Literature of the 20th Century (3,3)***
First semester: modern narrative; second semester: modern theater. Readings include Pirandello, Saba, Ungaretti, Montale, Quasimodo, Silone, Pavese, Moravia, Vittorini, and others.

01:560:353 ***Modern and Postmodern Italian Travel Literature (3)***
Italian travel writing from early 20th-century playwright and novelist Luigi Pirandello to postmodern authors Italo Calvino and Antonio Tabucchi.
Prerequisite: 01:560:305 or 306.

01:560:354 ***Italian Culture through Music (3)***
An overview of some of the major trends and movements in Italian history and culture, seen through Italian music.
Prerequisite: 01:560:305 or 306.

01:560:360 ***Practical Commercial Italian (3)***
Study of Italian commercial organizations in Italy. Practice in business correspondence. Comparison of financial and commercial terms in English and Italian.
Pre- or corequisite: Any 300-level course in Italian.

01:560:369 ***Walking in the Modern and Postmodern Italian City (3)***
The representation of walking in modern and postmodern Italian cities, examining literary and visual texts dating from the end of the 19th century to today.
Prerequisite: 01:560:250.

01:560:371 ***Italian Theater (3)***
A survey of Italian theatrical masterpieces combined with the creative component of writing, editing, and performing a play in Italian by the class.
Prerequisite: 01:560:250 or 251.

01:560:377 ***Ri-Scrittura: Rewriting of Biblical Texts in Contemporary Italian Literature (3)***
Addresses a wide variety of genres (novels, plays, screenplays, and poems) and themes. Authors may include Bacchelli, Berto, Coccioli, De Luca, Fabbri, Guidacci, Merini, Pasolini, Pazzi, and Pomilio. Reading of each text accompanied by the study of the appropriate biblical text.
Prerequisite: 01:560:305 or 306.

01:560:381,382 ***The Civilization of Italy (3,3)***
Interdisciplinary approach to Italy's culture, medieval to contemporary; readings and multimedia lectures highlighting masterpieces of literature, drama, music, and art.
Prerequisite: 01:560:250 or 251.

01:959:383,384 ***Study Abroad in Italy (BA,BA)***

01:560:393,394 ***Independent Study in Italian (3,3)***
Independent study and guided research on a topic selected by the student and approved by a faculty member. Individual conferences.

01:560:401,402 ***Italian Literature of the 13th and 14th Centuries (3,3)***
Intensive study of the most important representatives of the Sicilian and Tuscan schools, with particular attention to the Dolce Stil Novo and the works of Dante.

01:560:405 ***The Three Crowns of Florence: Dante, Petrarch, and Boccaccio (3)***
A course on the three main authors of the 14th century. Readings from the *Divine Comedy*, Petrarch's *Lyrics*, and the *Decameron*.
Prerequisite: 01:560:250 or 251.

01:560:409,410 ***Italian Women Writers in the 19th and 20th Centuries (3,3)***
Explores the foremost issues concerning women's writing in the Italian context. Analysis of the historically specific sense of difference in women's literature.

01:560:415,416 ***Dante (3,3)***
Critical study of Dante's *Divine Comedy* and other works in their medieval context.

01:560:421,422 ***Italian Literature of the Renaissance (3,3)***
Italian writers most relevant to the development of the humanistic viewpoint and representative of the creative achievements of the Renaissance: Petrarca, Boccaccio, Poliziano, Machiavelli, Ariosto, Michelangelo, and others.

01:560:431,432 ***Italian Literature of the 17th and 18th Centuries (3,3)***
Readings from the works of Campanella, Marino, Galileo, Goldoni, Alfieri, Parini, and others.

01:560:491,492 ***Topics in Italian Literature (3,3)***
Directed independent study of a topic selected in consultation with the instructor.

01:560:493 ***Senior Seminar in Italian (3)***
In-depth examination of a topic, a genre, or a movement within the history of Italian literature and/or film. Focus on development of analytic, interpretive, and research skills. Topic announced by the department.
Prerequisite: 01:560:305 or 306. Open to senior majors in Italian or by permission of the instructor.

01:560:495,496 ***Honors in Italian (3,3)***
Special readings and honors paper prepared under the direction of the departmental honors committee.

Japanese 565 (SAS)

JAPANESE 565

Department of Asian Languages and Cultures, School of Arts and Sciences

Website: http://alc.rutgers.edu

Chair: Wendy Swartz

Director of Undergraduate Studies: Satoru Saito

Distinguished Professor:

Senko K. Maynard, B.A., Tokyo University of Foreign Studies; M.A., Illinois (Chicago); Ph.D., Northwestern

Professor:

Paul Schalow, B.A., Hampshire College; M.A., Ph.D., Harvard

Associate Professor:

Satoru Saito, B.A., Virginia; M.A., Ph.D., Columbia

Associate Teaching Professor:

Haruko Wakabayashi, B.A., Sophia (Japan); Ph.D., Princeton

Assistant Teaching Professor:

Jiro Harasaki, M.A., Columbia

Teaching Instructor:

Michiru Ichihara Lowe, B.A., Nanzan; M.A., Columbia

Major Program Learning Goals and Requirements

Major Program Learning Goals and Requirements

Learning Goals

Majors in Japanese will acquire in-depth knowledge of the Japanese language as well as the literature and culture of Japan. Majors will be able to demonstrate oral, reading, and written proficiency in the language and develop critical skills in analyzing and interpreting literary, historical, and cultural texts. Students will acquire the literary, cultural, and linguistic competency necessary for continuing onto postgraduate study or employment requiring such cultural knowledge and/or linguistic skill. Students will learn the cultural heritage of Japan within the larger context of East Asia through a wide and coherent curriculum, which includes courses in the following humanities and social science disciplines: literature, visual culture, history, religion, language. and linguistics.

Requirements

The major in Japanese requires 36 credits distributed as follows:

1. Six courses in Japanese language above the 100 level.
2. Four courses in Japanese literature, history, and/or culture (under subject code 565).
3. One course chosen from East Asian Civilizations: Traditional Era (01:098:241) OR East Asian Civilizations: Modern Era (01:098:242) OR Global East Asia (01:098:250).
4. Capstone Seminar on East Asian Societies (01:098:444).

Minor Program Learning Goals and Requirements

Minor Program Learning Goals and Requirements

Learning Goals

Minors will be introduced to the cultural heritage of Japan through courses on literature, history, visual culture, language, and linguistics. Minors will be able to communicate effectively (listening, speaking, and writing) in Japanese and will learn critical skills in analyzing and interpreting literary and cultural materials appropriate to the student's area of specialization. Students will achieve advanced linguistic competency and be able to demonstrate practical skills in using Japanese for translation and interpretation. Students will be able to relate relevant issues to other areas in the humanities.

Requirements

A minor in Japanese consists of four courses in Japanese above the 100 level plus two additional elective courses (of 3 credits or more) in the area of concentration (subject code 565). The elective courses may be language courses or culture courses.

Japanese 565 (SAS)

Departmental Honors Program

Departmental Honors Program

To qualify, a student must have a cumulative grade-point average of 3.0 or better and a grade-point average of 3.4 or better in the major at the end of the junior year. At that time, the student should formally apply to the chair for admission to the honors program. In addition to completing all requirements of the Japanese major, candidates are required to register for 01:565:497-498 Honors in Japanese, write an honors paper under the guidance of an assigned faculty member, and take a comprehensive examination at the end of their senior year.

Japanese 565 (SAS)

Japanese Culture Courses (Taught in English)

Japanese Culture Courses (Taught in English)

01:565:210 ***Introduction to Japanese Culture (3)***
Introduction to Japanese culture, past and present. Explores some of the major themes in Japanese culture across areas of art, religion, literature, and film. Themes include Shinto and Buddhism, warrior culture, monsters and the supernatural, and war and disaster.

01:565:215 ***A-Bomb Literature and Film in Japan (3)***
Reading and discussion of fiction, poetry, and film by and about survivors of the 1945 U.S. atomic bombings of Hiroshima and Nagasaki, Japan, with emphasis on problems of memory, representation, and redemption in a literature of trauma.

01:565:241 ***Japanese Literature in Translation (3)***
Selected poetry and fiction from 700 to 1885. Major concerns of the Japanese literary tradition and ideas and images of man, love, nature, and time that have continued to influence Japanese culture.
Taught in English.

01:565:242 ***Modern Japanese Literature in Translation (3)***
Japanese literature from 1885 to the present. The influence of Western cultural ideals on modern Japanese literature. Emphasis on the novel as a literary form. Readings from Kawabata, Sõseki, Mishima, Akutagawa, and Tanizaki.

01:565:250 ***Language and Society in Japan (3)***
How language and society interact in contemporary Japan. Sociolinguistic methods applied to various issues: honorific/humble forms, language and gender, and conversation strategies.

01:565:317 ***Love, Honor, and Suicide in Japanese Literature (3)***
Suicide as a theme in Japanese literature from the eighth century to the present, with comparisons to the theme of suicide in Western literature. Selected texts from Western literature read to gain a comparative perspective. Films shown as well.
Credit not given for both this course and 01:195:332.

01:565:320 ***The Samurai Tradition in Japanese Literature and Film (3)***
The samurai warrior as a focus of cultural and political expression in Japanese literature and cinema. Supplementary readings of secondary sources on samurai culture and thought.

01:565:333 ***Anime: Introduction to Japanese Animation (3)***
Anime as an object of cultural, historical, and media analysis. Development of Japanese animation from post-1945 to the present, with special focus on examples from the 1980s onward. Utilizes a variety of approaches to anime, including media theory, reception theory, issues of globalization, and cross-cultural adaptation.

01:565:350 ***Japanese Film (3)***
Japanese film in its cultural and historic contexts and as a Japanese art form. Viewing and analysis of films by Kurosawa, Mizoguchi, Ozu, and others.

01:565:360 ***Japanese Women Writers (3)***
Fiction and poetry by Japanese women from the ninth century to the present. Focus on women's early role in inventing and shaping literary genres, and the reemergence of a feminine tradition in the 20th century.

01:565:370 ***Community and Difference in Japanese Literature and Film (3)***
Charting and analyzing 20th-century filmic and literary portrayals of what is "foreign" and "Japanese." Racialism, ethnicity, sexuality, and gender in the Japanese arts.

01:565:380 *Contemporary Japanese Literature and Film (3)*
Examines the fictional representations (short stories, novels, films) of contemporary Japan from the 1980s to the present.

01:565:395 *Issues in Japanese Literature (3)*
Variable content, focusing on important issues, texts, and genres in the Japanese literary tradition. May be taken more than once. Content will differ each semester.

01:565:425 *Rutgers Meets Japan: Revisiting Early U.S.-Japan Encounters (3)*
Examination of the crucial moment of early U.S.-Japan relationship and cultural exchange during the late nineteenth century through Extensive reading of primary, secondary, and visual sources.

01:565:460 *Seminar in Japanese Film (3)*
Major directors, development of Japanese film genres, Japanese film studies in English-language scholarship, and relationship between film and national identity.
Prerequisite: 01:565:350 or permission of instructor.

01:565:471 *Yukio Mishima: His Fictions and Global Literary Legacy (3)*
Explores the many facets of one of Japan¿s most formidable 20th-century writers, Yukio Mishima (1925-1970)¿his fictions and global literary legacy.
Taught in English. Credit not given for both this course and 01:195:471.

01:565:475 *The Tale of Genji as World Literature (3)*
The *Tale of Genji* in the context of world literature as court romance, psychological novel, and feminist text. Extensive readings from critical literature in English and discussion of issues of translation.
Credit not given for both this course and 01:195:475.

01:565:480 *Seminar on Modern Japanese Literature (3)*
Critical literary developments of modern Japan, from the late 19th century to the postwar period, with a close reading of literary texts. Particular attention paid to understanding various analytical frameworks, from historical to theoretical.

01:565:483 *From Text to Image in Japanese Art (3)*
Explores the profound influence of classical literature on the arts of Japan, especially painting. Analysis of the historical and literary meaning of the literary works; investigation of the fusion of text and image.
Credit not given for both this course and 01:082:483.

01:565:495,496 *Independent Study (3,3)*
Independent reading under supervision of a member of the department.
Prerequisites: Permission of instructor and department.

01:565:497,498 *Honors in Japanese (6,6)*
Both semesters must be completed to receive credit.

- Departmental Honors Program

Japanese Language Courses

Japanese Language Courses

01:565:101,102 ***Elementary Japanese (4,4)***
Introduction to grammar and writing systems; practice in speaking, reading, and writing.
Prerequisite: 01:565:101 or equivalent for 01:565:102.

01:565:103 ***Introduction to Japanese Writing (3)***
History, types, and styles of Japanese writing systems: hiragana, katakana, and kanji. Pen and brush (calligraphy) practices. Some basic creative writing.

01:565:104 ***Speaking Elementary Japanese (3)***
Elementary speaking and communicating skills based on limited vocabulary and grammar. Conversational phrases and idiomatic expressions associated with various social situations and interpersonal relationships.
Prerequisite: 01:565:101.

01:565:201,202 ***Intermediate Japanese (4,4)***
Study of grammar, development of fluency in speaking; practice in reading and composition.
Prerequisite: 01:565:102 or equivalent for 01:565:201; 01:565:201 or equivalent for 01:565:202.

01:565:213,214 ***Japanese Conversation and Culture (3,3)***
Develops speaking skills; guided conversation practice, vocabulary building, and oral reports. Texts and discussion topics relating to Japanese everyday life, language, culture, and society.
Prerequisite: 01:565:102 or permission of instructor.

01:565:301,302 ***Advanced Japanese (3,3)***
Refinement of reading, writing, speaking, and listening skills. Advanced grammar and extensive vocabulary. Reading written text from various genres.
Prerequisite: 01:565:202 or equivalent for 01:565:301; 01:565:301 or equivalent for 01:565:302.

01:565:303,304 ***Advanced Japanese for Business (3,3)***
Principles of interpersonal communication in Japanese business and international negotiation. Specialized vocabulary, social skills, and business correspondence. Reading and discussion of business, culture, and society.
Prerequisite: 01:565:202 or permission of department.

01:565:313,314 ***Advanced Japanese Conversation and Contemporary Issues (3,3)***
Development of conversational skills and strategies. Class discussion, oral presentation, and debate based on cultural/social materials.
Prerequisite: 01:565:202 or permission of instructor.

01:565:325 ***Advanced Japanese Grammar and Rhetoric (3)***
Analysis and study of complex sentence structures, rhetorical strategies and principles, and paragraph and text structures of a variety of genres. Reading assignments to appreciate different styles of written Japanese: essays, narrative, newspaper text, etc.
Prerequisite: 01:565:301 or permission of instructor.

01:565:361,362 ***Japanese Popular Culture (3,3)***
Critical approaches to Japanese popular culture and advanced discussion in Japanese of a broad range of popular genres, including manga, anime, film, commercials, and music.
Prerequisite: 01:565:302 or permission of instructor.

01:565:401,402 ***Advanced Readings in Japanese (3,3)***
Selected readings from modern Japanese. Materials from literature, humanities, and social sciences. Discussion and some writing exercises.
Prerequisite: 01:565:302 or permission of instructor.

01:565:411 ***Readings in Classical Japanese: Bungo (3)***
Introduction to classical literary Japanese. Study of verbal and adjectival suffixes and particles through sample sentences. Selected readings in classical prose. Some translation exercises.
Prerequisite: 01:565:301 or permission of instructor.

01:565:451,452 ***Translating Japanese Popular Media (3,3)***
Theory and practical techniques of translation from Japanese to English, with particular focus on monthly news and literary magazines, film, anime, manga, and song.
Prerequisite: 01:565:302 or equivalent.

01:565:470 ***Seminar in Japanese Language and Literature (3)***
Readings and research on topics in Japanese language and literature.
Prerequisite: 01:565:402 or permission of instructor.

01:565:495,496 ***Independent Study (3,3)***
Independent reading under supervision of a member of the department.
Prerequisites: Permission of instructor and department.

01:565:497,498 ***Honors in Japanese (6,6)***
Both semesters must be completed to receive credit.

Jewish Studies 563 (SAS)

JEWISH STUDIES 563

Department of Jewish Studies, School of Arts and Sciences

Website: http://jewishstudies.rutgers.edu

Chair: Paola Tartakoff

Undergraduate Director: Michal Raucher

Core Faculty:

Michal Raucher, Jewish Studies, PhD, Northwestern

Gary A. Rendsburg, Jewish Studies and History; Ph.D., New York

Jeffrey Shandler, Jewish Studies, Ph.D., Columbia

Nancy Sinkoff, Jewish Studies and History; Ph.D., Columbia

Paola Tartakoff, Jewish Studies and History; Ph.D., Columbia

Azzan Yadin-Israel, Jewish Studies; Ph.D., California (Berkeley)

Affiliated Faculty:

Debra Ballentine, Religion; Ph.D., Brown

Ethel Brooks, Women's, Gender, and Sexuality Studies; Ph.D., New York

Rebecca Cypess, Mason Gross School of the Arts-Music; Ph.D., Yale

Maurice Elias, Psychology; Ph.D., Connecticut

Leslie E. Fishbein, American Studies; Ph.D., Harvard

Judith Gerson, Sociology; Ph.D., Cornell

David Greenberg, Journalism; Ph.D., Columbia

Charles Haberl, AMESALL; Ph.D., Harvard

Paul Hanebrink, History; Ph.D., Chicago

Martha Helfer, German; Ph.D., Cornell

Michael Levine, German; Ph.D., Johns Hopkins

Emma Wasserman, Religion; Ph.D., Yale

The Department offers an interdisciplinary approach to the academic study of all aspects of the Jewish experience. Courses offered by the Department, which are open to all students, address the historical, social, cultural, religious and political life of the Jewish people from ancient times to the present. Drawing on faculty from eight departments, as well as on visiting fellows sponsored by the Bildner Center, the Jewish Studies curriculum offers over sixty interdisciplinary courses. Students pursuing a B.A. degree may major or minor in Jewish Studies. Students may also minor in Hebrew language . The Department of Jewish Studies and the Bildner Center work together to promote Jewish Studies at Rutgers.

Jewish studies offers courses that originate in the department and cross-listed courses that originate in other departments, both of which may be counted toward the Jewish studies major or minor. Credit is not given for both a Jewish studies course (01:563) and its corresponding cross-listed course.

For further information about the Department of Jewish Studies, contact the office, which is housed at the Allen and Joan Bildner Center for the Study of Jewish Life, Rutgers, The State University of New Jersey, 12 College Avenue, New Brunswick, NJ 08901-1282 (telephone: 848-932-2033), or send an email to info@jewishstudies.rutgers.edu. Information is also posted on the department's website.

Jewish Studies 563 (SAS)

Learning Goals

Learning Goals

Majors will be able to conceptualize the development of Jewish culture and history over time (from the era of the Bible until the present) and across space (comparing the variety of Jewish cultures in a given historical moment); recognize and analyze a variety of Jewish Studies primary sources, both pre-modern and modern; apply second sources and methodologies (historical, literary, philological, anthropological, philosophical, and sociological) used to study Jewish life; demonstrate research skills (bibliographic, analytic, research, and writing) and competence in textual analysis through guided researching and writing of a research paper over the course of a semester.

Minors will be able to demonstrate a broad view of Jewish history and more in-depth knowledge of a sample of the spectrum of Jewish studies.

Jewish Studies 563 (SAS)

Major Requirements

Major Requirements

Majors must complete 12 courses (at least 36 credits), either offered by the Department of Jewish Studies or cross-listed by the department, with a grade of C or better in each course:

Required courses:

- 01:563:201 Jewish History I: Ancient and Medieval (3)
- 01:563:202 Jewish History II: Modern (3)
- 01:563:464 Research and Writing in Jewish Studies (3)

Students are advised to take the first two courses as early as possible in their studies, preferably before their junior year. Jewish History I is offered every Fall and Spring semester. Jewish History II is offered only in the Spring semester. The seminar is not regularly offered. In the Fall of your Junior year, plan a meeting with the Undergraduate Director, Prof. Michal Raucher, to discuss meeting this requirement.

Elective courses: Nine elective courses (at least 3 credits each).

Jewish Studies 563 (SAS)

Minor Requirements

Minor Requirements

Requirements for the Jewish Studies Minor

Minors must complete six courses (at least 18 credits), offered by the Department of Jewish Studies or cross-listed by the department, with a grade of C or better in each course, as follows.

Required courses:

- 01:563:201 Jewish History: Ancient and Medieval (3)
- 01:563:202 Jewish History: Modern (3)

Students are advised to take the first two courses as early as possible in their studies, preferably before their junior year. Jewish History I is offered every Fall and Spring semester. Jewish History II is offered only in the Spring semester.

Elective courses: Four courses (at least 3 credits each), of which no more than two can be in elementary or intermediate language
Learning Goals: Minors will be able to demonstrate a broad view of the Jewish past and more in-depth knowledge of a sample of the spectrum of Jewish studies.

Requirements for the Minor in Language and Culture of Ancient Israel

The minor in language and culture of ancient Israel consists of six courses (18 credits total) from the courses listed below. A student may not major in Jewish studies and minor in the language and culture of ancient Israel at the same time. The following courses count toward the minor:

- 01:563:141 Biblical Hebrew I (3)
- 01:563:142 Biblical Hebrew II (3)
- 01:563:145 Introduction to Aramaic (3)
- 01:563:201 Jewish History: Ancient and Medieval (3)
- 01:563:241 Introduction to Rabbinic Literature (3)
- 01:563:322 Women in the Bible (3)
- 01:563:340 The Dead Sea Scrolls (3)
- 01:563:409 Introduction to Semitic Languages (3)
- 01:563:431 Hebrew Bible (3)
- 01:563:433 Readings in Biblical Hebrew Prose (3)
- 01:563:434 Readings in Biblical Hebrew Poetry (3)

Requirements for Interdisciplinary Minor in Holocaust Studies (564)

Rutgers now offers an **interdisciplinary minor in Holocaust Studies**, with courses offered by the German, History, Jewish Studies, and Sociology departments. The minor consists of six courses, as follows:
Required courses:

History of the Holocaust (01:510:261 / 01:563:261)¿[Core Curriculum Course]

Remembering the Holocaust (01:563:360/01:510:370:01) [Core Curriculum Course]
Elective courses: Four additional courses in at least two different departments; currently including German, History, Jewish Studies, and Sociology related to the Holocaust. Courses can include:

- A relevant three-credit independent study or internship (e.g., at the Museum of Jewish Heritage: A Living Memorial to the Holocaust in New York), with the approval of the faculty coordinator

- An honors seminar on a relevant topic
- A six-credit honors thesis on a relevant topic, with approval of the faculty coordinator
- One relevant transfer course may be counted toward the minor, pending approval of the faculty coordinator

Jewish Studies 563 (SAS)

Departmental Honors Program

Departmental Honors Program

Students majoring in Jewish Studies have two options for earning Honors in the department.

Option A: Honors with a Thesis

The Department of Jewish Studies offers qualified Jewish Studies majors the opportunity to earn honors by pursuing a research project in depth for their entire senior year under the supervision of a faculty advisor.

To be considered, students must meet the following requirements:

1. Have a cumulative grade point average of 3.0 or higher, and 3.4 or higher in the Jewish Studies major.
2. Meet with the department's Undergraduate Director during the second semester of their junior year to discuss the process and determine eligibility.
3. Meet with potential primary advisors and select one in consultation with the Undergraduate Director and faculty.
4. Submit their project proposal to the Undergraduate Director and their primary advisor by the end of their junior year.
5. Enroll in the Jewish Studies Seminar (563:464) in the fall of their senior year and Jewish Studies Honors (563:497) in the spring of their senior year.
6. Complete a multi-chapter thesis during their senior year. The thesis should be a substantial written work based on a defined thesis question developed into a sustained argument. The work must incorporate substantial original research, be supported by evidence and critical reasoning, and must show familiarity with a subject field.
7. Sit for an oral defense in the final semester of their senior year.
8. A panel of faculty members (including the student's advisor) will determine whether the thesis merits honors according to the rubric developed for this assessment.

Option B: Honors without a Thesis

At the discretion of the department, honors in Jewish Studies may also be earned by Jewish Studies majors on the basis of extraordinary research, study, or internships associated with the department. In this case, during the penultimate semester of their senior year, a student may apply to be considered for honors by contacting the undergraduate director. Alternatively, a Jewish Studies faculty member may nominate a Jewish Studies major for honors during the penultimate semester of their senior year.¿

To be eligible for JS honors without a thesis, a student must meet the following criteria:

1. Have a cumulative grade point average of 3.0 or higher, and 3.4 or higher in the Jewish Studies major.
2. Have conducted independent research, study, or for-credit internships associated with the department.
3. Submit for consideration a portfolio of at least 2 semester-long papers, projects, or the equivalent. Materials should be submitted at the beginning of their final semester.
4. A committee of faculty members (including at least one who advised the student on this work) will determine whether this student's work is worthy of department honors.

Jewish Studies 563 (SAS)

Student Awards

Student Awards

The Department of Jewish Studies provides awards to students in three categories:

Research in Jewish Studies Awards are available to students (both undergraduate and graduate) who plan to conduct research related to the field of Jewish Studies in fulfillment of an honors project, senior thesis, capstone project, summer research project, graduate thesis, doctoral dissertation, etc.

Study in Israel/Abroad Awards provide financial support to full-time Rutgers students (both undergraduate and graduate) to study at any of the six accredited Israeli universities: Hebrew University, Tel-Aviv University, Bar-Ilan University, Ben-Gurion University, University of Haifa, and the Technion, or to enroll in a program of Jewish Studies at universities in other countries.¿Awards will only fund programs that are open to all students.¿Proof of acceptance to the program is required at time of application.

Excellence in Jewish Studies Awards (ONLY SPRING 2025) recognize achievements by Rutgers students in the field of Jewish Studies. To be eligible for an award, students must have taken at least two courses in Jewish Studies. Selection is based upon a sustained record of achievement in Jewish Studies. Prior recipients may reapply.

Please visit the Department of Jewish Studies website to learn about eligibility for student awards.

Jewish Studies 563 (SAS)

Courses in English

Courses in English

01:563:100 ***Introduction to the Middle East (3)***
Introduction to the languages and cultures of the Middle East and facilities of cross-cultural communication and understanding between the people of the West and Middle East.
Credit not given for both this course and 01:685:100.

01:563:201 ***Jewish History: Ancient and Medieval (3)***
Examines the social, economic, religious, and political experiences of the Jewish people, from the Biblical world of the ancient Near East until the Middle Ages.
Credit not given for both this course and 01:506:271 or 01:685:208.

01:563:202 ***Jewish History: Modern (3)***
Examines Jewish life from the breakdown of traditional society in Europe in the 1700s until the rise of the modern state of Israel in the 20th century.
Credit not given for both this course and 01:506:272.

01:563:205 ***History of the Modern Middle East (3)***
Shaping of Middle Eastern politics and society since 1800 out of the Islamic/Ottoman legacies and under the impact of modernity and Western encroachment.
Credit not given for both this course and 01:508:205 or 01:685:203.

01:563:206 ***Introduction to the Bible II: Prophets and Poetry (3)***
Literature of the Bible, focusing on the Prophets, the historical backdrop of the prophetic message as revealed mainly through the books of Kings, and other relevant poetic material (Psalms, Job, etc.).
Credit not given for both this course and 01:840:206.

01:563:208 ***Jewish-Muslim Relations: History and Culture (3)***
Surveys the cultural history of Jewish-Muslim relations from the seventh century up to our present. Analyzes this important and unique aspect of Jewish and Muslim pasts and the place of the Jews in the cultural history of Islam. Course taught in English. Credit not given for both this course and 01:013:208 or 01:508:208.

01:563:220 ***Introduction to the Bible I: Torah and Prose (3)***
Literature of the Bible, focusing on the Torah and the historical material in Joshua through Samuel. Emphasis placed on literary, historical, and theological matters. Special use made of archaeological discoveries. The Bible studied against the backdrop of ancient Near Eastern literature, history, religion, mythology, and law.

01:563:222 ***Introduction to Ancient Judaism (3)***
Historical development of Judaism in ancient times from its origins in ca. 1200 BCE through the Roman period ca. 300 CE. Emphasis on the beliefs and practices of ancient Judaism during biblical and postbiblical periods, as reflected in the literature of the times (such as the Bible, Dead Sea Scrolls, and Mishna) and in the archaeological record.
Credit not given for both this course and 01:840:242.

01:563:223 ***New Testament (3)***
Interpretation of basic Christian scriptures in translation; influence of Jesus and Paul on the early Christian community.
Credit not given for both this course and 01:840:202.

01:563:224 ***Breaking the Glass Ceiling: Women Religious Leaders (3)***
Interdisciplinary approach to analyzing women¿s religious leadership in Judaism, Christianity, and Islam. Ethnographic case studies of religious communities. Topics include: strategies that preclude women from leadership; informal and formal leadership for women; differences across traditions; feminism; Internet and religious authority. Readings, films, discussions, interviews with female religious leaders.

Credit not given for both this course and 01:070:284 or 01:988:221.

01:563:225 ***Jewish Music (3)***
Introduction to biblical cantillation, medieval Jewish music, liturgical and Hasidic melodies, Yiddish folk songs, and the music of modern Israel.

01:563:226 ***History of Jewish Art (3)***
A survey of Jewish visual culture from ancient synagogue architecture to works of contemporary art.
Credit not given for both this course and 01:082:255.

01:563:228 ***Jews and Medicine (3)***
Explores the engagement of Jews with medicine, public health, and bioethics. Examines ways that Jews have imagined health, illness, and the body, as well as the way that non-Jews have imagined the Jewish body and health.

01:563:230 ***Modern Jewish Culture: Key Texts and Their Afterlives (3)***
Examines four key texts, written between 1894 and 1944, that have become fixtures not only of modern Jewish culture, but also of world culture primarily through adaptations in stage, film, broadcasting, music, and visual art.
Credit not given for both this course and 01:195:230.

01:563:231 ***American Jewish History (3)***
History of the Jews in the New World, beginning in the middle of the 17th century, and then focusing on the United States until the present.
Credit not given for both this course and 01:512:231.

01:563:240 ***Jewish-Christian Relations through the Ages (3)***
Jewish-Christian relations from the first century of the Common Era through to the start of the 21st century. The course focuses both on the history of interactions between Jews and Christians--persecutions, collaborations, conversions, etc.--and also on the history of theological stances and popular attitudes.
Credit not given for both this course and 01:510:265.

01:563:241 ***Introduction to Rabbinic Literature (3)***
Introduces students to the Rabbinic period and rabbinic texts, including the Mishnah, the Talmud, and midrashic literature.
Credit not given for both this course and 01:840:241. No prior knowledge required; all readings in English.

01:563:243,244 ***Modern Jewish Literature (3,3)***
Works of great Jewish writers from Russia, Germany, France, Italy, the United States, and Israel, from late 19th century to the present, in translation.

01:563:245 ***The Culture of Yiddish: An Introduction (3)***
An overview of Yiddish, the traditional vernacular language of Ashkenazic Jews, and its culture, from its medieval origins to the present.
Credit not given for both this course and 01:470:280. All readings in English.

01:563:246 ***Jewish Humor (3)***
Analyzes the development of Jewish humor during the 19th and 20th centuries, with a focus on America, Eastern Europe, and Israel. Relation of humor to historical developments, including acculturation and the maintenance of cultural distinctiveness.

01:563:250 ***Spirituality and Mysticism in Judaism (3)***
The course offers a historical survey of Jewish mystical traditions from the Bible and early rabbinic traditions through later medieval works, including the core book of Jewish kabbalah, the Zohar. The course emphasizes Jewish mystical discussions of the relationship between God and man, the spiritual dimension of everyday practices, and kabbalistic understanding of God
Credit not given for both this course and 01:840:250.

01:563:254 ***Hasidic Tales (3)***
Legends and stories; a study of the ideals and values of the Ba'al Shem Tov and other Hasidic masters from the 18th century to the present.

01:563:260 ***Remembering the Shtetl (3)***
How Jewish life in eastern European small towns has been documented and recalled from the 19th century to the present in fiction, art, ethnography, film, and memoir.
Credit not given for both this course and 01:510:260.

01:563:261 ***History of the Holocaust (3)***
Development of anti-Semitism in modern European history, culminating in the "Final Solution"; special emphasis on Jewish response and resistance.
Credit not given for both this course and 01:510:261.

01:563:265 ***Women in the Bible (1.5)***
The course focuses on the role of women in biblical stories and addresses the question of the role of women in ancient Israelite society.

01:563:266 ***Ancient Egypt (1.5)***
Introduction into ancient Egypt. Topics include a historical overview, religion, art, interconnections between ancient Egypt and ancient Israel, and Hieroglyphic Egyptian language and literature.
Credit not given for both this course and 01:013:266.

01:563:269 ***Antisemitism (3)***
History of negative attitudes toward Jews and Judaism from the ancient and medieval world to modern Europe, the United States, and the Middle East. Explores continuities and turning points in the history of "antisemitism"

as well as the significance of "antisemitism" as an analytic category. Focus on contemporary discourses and media representations of "antisemitism" in light of their historical precedents and resonances.
Credit not given for both this course and 01:510:269.

01:563:270 *Between Nazism and Communism (3)*
Explores the experiences of Poles and Polish Jews under Nazi and Communist rule through history, travel writing, memoir, poetry, and film.
Credit not given for both this course and 01:510:263.

01:563:280 *Jerusalem Contested: A City's History from Jewish, Christian, and Muslim Perspectives (3)*
Introduces students to the history of Jerusalem and explores the causes and evolution of the city's importance in Judaism, Christianity, and Islam.
Credit not given for both this course and 01:508:209 or 01:685:280.

01:563:281 *Modern Israeli Culture (3)*
Approaches modern Israel as a case study in creating a new national culture in relation to ancient history and traditions and a longstanding diaspora. Explores the evolution of Israeli culture between 1940s and 1990s from an interdisciplinary perspective.
Credit not given for both this course and 01:508:211, 310 or 01:563:310 or 01:658:281, 310.

01:563:282 *Israeli-Palestinian Conflict (3)*
Overview of the hundred-year old Israeli-Palestinian conflict, the controversies it has generated, the attempts to resolve it, and how we as outsiders to the conflict learn about it and experience it. Credit not given for both this course and 01:508:212 or 01:685:282

01:563:293 *Topics in Jewish Studies (3)*
Selected themes in Jewish studies at the introductory level. Topics announced when course offered.

01:563:304 *Jewish Cinema and Fiction (3)*
Comparative study of Jewish themes in Yiddish, Israeli, American, and European films (with English subtitles) and their literary sources; discussions and readings in English.

01:563:306 *American Jews and the Media (3)*
Examines the roles that film, sound recordings, radio, television, video, and computers play in American Jewish life since the turn of the 20th century.
Credit not given for both this course and 01:050:336.

01:563:307 *Muslims, Christians, and Jews in Medieval Spain (3)*
History of medieval Spain with a focus on cultural, religious, and political diversity.
Credit not given for both this course and 01:510:313.

01:563:311 *Classical Jewish Philosophy (3)*
Major trends and figures in medieval Jewish thought; Jewish Platonism (Solomon ibn Gabirol); Jewish Aristotelianism (Maimonides); the critique of philosophy (Hallevi); and Jewish philosophy in the Renaissance.
Credit not given for both this course and 01:730:311.

01:563:312 ***Modern Jewish Philosophy (3)***
Thinkers and systems in modern Jewish philosophy, including interpretations of Jewish tradition; Jewish Kantianism (Cohen, Buber); Jewish existentialism and postmodernism (Rosenzweig, Levinas); the Holocaust; and Jewish feminism.
Credit not given for both this course and 01:730:312.

01:563:314 ***Jews, Heretics, and the Inquisition (3)***
A survey of the medieval, Spanish, and Roman inquisitions, focusing on these institutions' attitudes toward, and treatment of, heretics, Jews, and conversos. Students will study how these inquisitions operated and examine their legal precedents as well as their relations to the social, political, and religious tensions of their day, in the context of broader historical questions about forms of intolerance and modes of persecution.
Credit not given for both this course and 01:510:314.

01:563:315 ***Topics in Rabbinic Literature (3)***
Examines selections of original materials from the Talmud, codes, and responsa literature concerning several topics.

01:563:316 ***Israeli Women: Historical and Literary Perspectives (3)***
Impact of socialism, nationalism, ethnicity, religion, and feminism on Israeli women's roles within the family, labor force, army, kibbutz, and politics.
Credit not given for both this course and 01:508:316 or 01:988:316 or 01:685:316.

01:563:319 ***Women in Jewish Law (3)***
Women's voices in Jewish legal sources from Late Antiquity and the Middle Ages.

01:563:321 ***Studies in Literature and Spirituality (3)***
Religious themes in literature, with attention to matters of rhetoric, style, and structure.

01:563:322 ***Women in the Bible (3)***
Literary readings of biblical stories about women, with special emphasis on their roles, representation, and literary types. All texts in English translation.
Credit not given for both this course and 01:840:361 or 01:988:314.

01:563:323 ***Women in the Bible--Hebrew Seminar (1)***
Optional 1-credit add-on for students enrolled in Women in the Bible who wish to further their understanding of the texts by reading them in the original Hebrew.
Prerequisite: Intermediate Hebrew or higher. Corequisite: 01:563:322.

01:563:324 ***Ancient Near Eastern Religions (3)***
Religious patterns in Mesopotamia, Anatolia, Canaan, Israel, and Egypt from texts in translation; their impact on cultural developments of the Near East.
Credit not given for both this course and 01:840:301.

01:563:325 ***Hebrew Prophets (3)***
Development and diffusion of Israelite prophetic thought from early associations with divination in Near Eastern culture through the Exile and later decline.
Prerequisites: 01:840:201,202 or permission of instructor; not open to first-year students.

01:563:330 ***Space and Identity: Jewish Perspectives (3)***
Drawing on modern Jewish culture as a case study, course focuses on the "spatial turn" in the study of human societies as it sets out to explore the interrelation between space and identity. Examines such concepts as homeland and exile, diasporas and hybrid identities, symbolic landscapes, private and public spaces, gendered spaces, the sanctification of space, communal enclaves and cultural spaces, transplanted and reenacted spaces, and tourism as pilgrimage.

01:563:332 ***The American Jewish Experience in Literature (3)***
Patterns of alienation and assimilation of an American ethnic group as portrayed in its literature. Attention to early narratives as well as the works of contemporary writers such as Roth, Potok, Bellow, Malamud, and Singer.
Credit not given for both this course and 01:050:332.

01:563:335 ***Jewish-American Women: Contested Lives (3)***
Explores the Jewish-American female identity in autobiography and memoir, social history, literature, and film. Examines interplay of religious belief, secularism, social mobility, and acculturating influences within American experience.
Credit not given for both this course and 01:050:335 or 01:988:334.

01:563:336 ***Jewish Historical Fiction (3)***
Explores a variety of Jewish historical novels and their relationship to the historical periods they purport to represent, from late antiquity to the modern period. Special emphasis is given to comparing works of history with works of fiction. Topics include: Second Temple sectarianism; Medieval Jewish marriage law and customs; mysticism; Sabbatianism; and revolution in the Soviet Union.
Credit not given for both this course and 01:510:393.

01:563:338 ***The Jewish Graphic Novel (3)***
Examination of Jewish graphic novels since the emergence of this genre during the latter half of the 20th century. Focus on the role of graphic novels in Jewish popular culture and as a medium for Jewish storytelling.

01:563:340 ***The Dead Sea Scrolls (3)***
Introduction to the history and scholarship surrounding the Dead Sea Scrolls.
Credit not given for both this course and 01:840:340.

01:563:341 ***Jesus the Jew (3)***
Explores the historic figure of Jesus within the context of first-century Palestinian Judaism. Topics include Jesus and the Law, Jesus and the Temple, the problem of religious authority and types of religious leaders, the Sermon on the Mount, and the "Parting of the Ways."
Credit not given for both this course and 01:840:310.

01:563:342 ***Jewish Nationalism (3)***
Examines the varieties of Jewish nationalisms that arose in Europe at the end of the 19th century. Considers causes of Jewish national thinking in the broader political and intellectual context within which the Jews lived.

01:563:343 ***ZionisMeanings and Challenges (3)***
Origins of Zionism in the mid-19th century and its development to the present day. Topics addressed include Zionism¿s political and social contexts, how other ideologies shaped Zionism, critics of Zionism, and the effect of Zionism on Jews¿ relationship to each other and to their surrounding societies.
Credit not given for both this course and 01:510:386.

01:563:344 ***Sephardic History and Culture (3)***
Explores the history, religion, and culture of Sephardic Jews from the 15th century to the present.

01:563:346 ***Contemporary Jewish Life (3)***
Study of contemporary Jewish life, especially in America--in communities, institutions, rituals, personal histories, etc.--through the approach of fieldwork and ethnographic writing.
Credit not given for both this course and 01:050:337.

01:563:348 ***Tradition and Innovation in American Jewish Ritual (3)***
Focuses on the tension between tradition and innovation that characterizes American Jewish life cycles by considering theories of ritual and ethnographic practice. Examines some of the ways American Jews have engaged various rituals including birth, marriage, bar/bat mitzvah, and death and mourning rituals.

01:563:351 ***Contemporary Politics in the Middle East (3)***
Contemporary politics of the Middle East through scholarly literature and documentary-type films dealing with socioeconomic and cultural influences on politics.
Credit not given for both this course and 01:685:351 or 01:790:351.

01:563:352 ***Israeli Politics (3)***
Basic understanding of the historical background of the establishment of the state of Israel; major characteristics of the political culture and institutions and how they have responded to the dynamic sociocultural and political changes that have shaped the society.
Credit not given for both this course and 01:790:352 or 01:685:352.

01:563:355 ***Kafka and World Literature (3)***
Introduction to Kafka's work and its impact on world literature. Topics include: literary modernism and European modernity; Jewish languages, culture, identity, and music in the early 20th century and beyond; minor and postcolonial literature; rethinking the relationship among humans, animals, hybrids, and monsters; and new directions in art, literature, film, and music. Taught in English.
Credit not given for both this course and 01:195:382 or 01:470:354.

01:563:359 ***Race, Culture, and Politics: Blacks and Jews in America (3)***
How black and Jewish identities have evolved in relationship to one another through an examination of social and political history, literature, and film.
Credit not given for both this course and 01:512:359 or 01:014:359 or 01:050:359.

01:563:360 ***Remembering the Holocaust (3)***
Holocaust remembrance in contemporary social and cultural practices in the United States and globally considered as a paradigm for deriving lessons from the past in order to respond to traumatic losses, address present social injustices, and prevent future acts of intolerance.
Credit not given for this course and 01:510:370 or 01:470:369.

01:563:364 ***Genocide, the Holocaust, and Legacies of Violence (3)***
How the Holocaust has shaped and reshaped understandings of genocide and witnessing through an ethnographic and historiographic lens. Examines the complexities of survival as they relate to truth and memory.

01:563:365 ***Holocaust Literature in Translation (3)***
Interpretation of works dealing with the Holocaust by leading Hebrew, Yiddish, and European writers. Appropriate films used.
All readings in English.

01:563:366 ***Holocaust Media (3)***
Examines the wide array of uses of media to represent the Holocaust, from World War II to the present. Examples range from wartime radio broadcasts and newsreels to documentaries, television dramas, videotaping of Holocaust testimonies, photography, as well as the use of media in museum displays and tourist practices.
Credit not given for both this course and 01:195:371.

01:563:367 ***American Jewish Writers of the 20th Century (3)***
Cultural, literary, attitudinal aspects of American Jewish fiction: Abe Cahan, Henry Roth, Daniel Fuchs, Saul Bellow, Bernard Malamud, and others.

01:563:368 ***Jews of Germany and Austria-Hungary, 1780-Present (3)***
Jewish history in modern Central Europe. Focus on Germany, Austria, Hungary, and Czechoslovakia (now the Czech Republic and Slovakia) from the late 1700s until the present day.
Credit not given for both this course and 01:510:368.

01:563:370 ***Germany Confronts the Holocaust (3)***
Analyzes the shifting role of the Holocaust in postwar German public life--in art, literature, museums, and other memorials; film; television; and political discourse. Some attention will also be given to Austria and Switzerland; contrasts will be drawn to the place of the Holocaust in postwar and contemporary America.
Credit not given for both this course and 01:470:310 or 01:195:370.

01:563:373 ***History of Jewish Women (3)***
Jewish women's history; examines the religious, social, intellectual, and cultural environments of Jewish women from the biblical period through the 20th century.
Credit not given for both this course and 01:506:373 or 01:988:373.

01:563:375 ***Jewish Immigrant Experience (3)***
Modern Jewish immigrant experience, focusing on European and Middle Eastern communities resettled in America, Israel, and Europe.
Credit not given for both this course and 01:506:375 or 01:070:375.

01:563:380 ***German-Jewish Literature and Culture (3)***
Survey of German-Jewish culture, 18th century to present. Literature in political-historical context, with some attention to music, philosophy, and film.
Credit not given for both this course and 01:470:380 or 01:195:380.

01:563:381,382 ***Topics in Jewish Studies (1.5,1.5)***
Topics vary. Topics announced when course is offered.
Seven-week courses; may be taken consecutively or separately.

01:563:383 *Modern Jewish Art (3)*
The Jewish experience in modern art.
Credit not given for both this course and 01:082:380.

01:563:384 *Gender and Politics in Yiddish Literature and Culture (3)*
Traces the cultural dynamics of Ashkenazic Jews in 16th- to 19th-century Europe through Yiddish religious writing, folktales, fiction, memoirs, and poetry.
Prerequisites: 01:563:202, 260, or permission of instructor. Credit not given for both this course and 01:470:384 and 01:988:391. All readings in English.

01:563:385 *Rabbis, Rebels, and Rationalists: The Jews of Eastern Europe (3)*
Economic, legal, and political conditions of Jewish life from the 16th century to World War II. Forms of Jewish response: autonomism, messianism, Hasidism, emigration, and socialism.
Credit not given for both this course and 01:510:385.

01:563:386 *Modern Yiddish Literature and Culture (3)*
Yiddish prose, poetry, folklore, theater, and film in Europe and America from the late 19th century to the present.
All readings in English translation.

01:563:387 *Touching History: The World of Medieval Manuscripts (3)*
An introduction to medieval manuscripts and to book culture from before the age of printing, with particular attention to the scribal transmission of ancient and classical texts (Bible, Homer, Qur¿an, Beowulf, etc.).

Credit not given for both this course and 01:506:388 or 01:677:387 or 01:840:388

01:563:389 *Jewish Politics, Jewish Power (3)*
Political relationship of the Jewish community to the Gentile authorities among whom they lived, from Rome in 70 CE to the contemporary period. Continuities and discontinuities of traditional conceptions of Jewish political behavior and rebellion, and accommodation to structures of power in varying historical contexts.
Prerequisite: At least one course in Jewish or European history after 1500. Credit not given for both this course and 01:510:389 or 01:790:384.

01:563:390 *Jewish Memory (3)*
Explores various forms of Jewish memory shaped in response to major events, including myths, holidays, monuments, pilgrimages, testimonies, museums, literature, and film.
Credit not given for both this course and 01:510:390.

01:563:393 *Israeli Film (3)*
Explores major social, cultural, and political issues central to contemporary Israeli society and its development, and their representation in Israeli cinema.
Credit not given for both this course and 01:195:393.

01:563:394,395,396,397 *Topics in Jewish Studies (3,3,3,3)*
Selected themes in Jewish studies. Topics announced when course offered.

01:563:399 *Research and Writing in Jewish Studies (3)*
Explores a major theme in Jewish studies and allows students to pursue their own scholarship, culminating in a major research paper.
Credit not given for both this course and 01:506:464.

01:563:404 *Spinoza (3)*
Spinoza's theological political treatise: prophecy, miracles, and faith and reason. Spinoza's ethics: God and his attributes, the human mind, and human bondage and freedom.
Prerequisites: Two courses in philosophy. Recommended: 01:730:205 or 307. Credit not given for both this course and 01:730:404.

01:563:408 *Sociology of American Jewish Religious Movements (3)*
Denominational patterns of America's Jews; religious patterns including Hasidism, fundamentalism-secularization, women's roles, intermarriage, and intra- and interreligious patterns.
Credit not given for both this course and 01:920:408.

01:563:409 *Introduction to the Semitic Languages (3)*
Survey of the Semitic languages and their history from a comparative perspective.
Prerequisite: One year of a Semitic language (such as Hebrew or Arabic) or permission of instructor. Credit not given for both this course and 01:013:409.

01:563:451 *Critical Perspectives on the Middle East (3)*
Promotes critical thinking about the Middle East by analyzing how stereotypes and Western political thinking hinder intercultural understanding, and encourages students to think more dynamically about the relationship between the United States and the developing world.
Prerequisite: 01:790:102 or 01:790:103 or 01:790:351 or permission of instructor. Credit not given for both this course and 01:685:451 or 01:790:451.

01:563:460 *Jewish Studies Internship (3)*
Supervised work at a historical society, archive, museum, communal agency, etc.; 112 hours required. Students also required to prepare a research project related to the internship, under the supervision of an assigned faculty member. Students may do more than one internship, as long as no two are at the same institution. Only one internship can count toward the Jewish studies major or minor.
Open to all Rutgers undergraduates.

01:563:461 *Supplementary Independent Study (1)*
Add-on for undergraduates who undertake extra work in relation to a course, for example, regularly meeting with a professor to read texts in their original language.
Prerequisite: Special permission of department.

01:563:464 *Jewish Studies Seminar (3)*
Explores a major theme in Jewish studies and allows students to pursue their own scholarship, culminating in a major research paper.
Prerequisite: 01:563:201 or 202 or permission of instructor. Credit not given for both this course and 01:506:464.

01:563:480 *Modern Middle Eastern Literature in Translation (3)*
Modern literature in the Arabic, Hebrew, Persian, and Turkish traditions; with a focus on poetry, the short story, and the novel.
Credit not given for both this course and 01:195:490 or 01:685:490.

01:563:482,483 *Advanced Topics in Jewish Studies (1.5,1.5)*
Highly specialized advanced courses open to both undergraduate and graduate students. Specific titles available at registration.
Seven-week courses; may be taken consecutively or separately.

01:563:490 *Studies in Jewish History (3)*
In-depth study of selected issues and problems in Jewish history and culture.

01:563:491,492 *Independent Study and Research (3,3)*
Individual reading research project under the guidance of a Jewish studies faculty member on a topic of interest to the student. Final written report required.

01:563:495 *Special Topics in Literature (3)*
Selected themes in Hebrew, Yiddish, or other Jewish literature. Topics announced when course offered.

01:563:496,497 *Senior Honors (3,3)*
Independent research project under supervision of a faculty member, culminating in an honors thesis that must be approved by the program.
Prerequisite: Permission of department director.

Jewish Studies 563 (SAS)

Courses in Modern Hebrew

Courses in Modern Hebrew

01:563:101 *Elementary Modern Hebrew (4)*
Speaking, reading, and writing; oral-aural and written exercises.
Prerequisite: Placement test to determine level of language competence. Not open for credit to students who have had two or more years of secondary school Hebrew. Credit not given for both this course and 01:013:152 and 01:685:101.

01:563:121 *Hebrew Review and Continuation (4)*
Development of primary language skills.
Prerequisites: Previous exposure to Hebrew and placement into Hebrew 121. Credit not given for both this course and 01:013:156.

01:563:131,132 *Intermediate Modern Hebrew (4,4)*
Development of language skills; selected readings.
Prerequisite: 01:563:102 or placement test. Credit not given for both courses and 01:013:252,253 and 01:685:131,132.

01:563:210,211 *Advanced Modern Hebrew (3,3)*
Intensive training in Hebrew grammar and reinforcement of already acquired higher-level language skills: speaking, listening, comprehension, reading, and writing. Text analysis includes newspaper articles and essays.
Prerequisite: 01:563:132 or placement test. Credit not given for both courses and 01:013:352,353 and 01:685:210,211.

01:563:371 *Readings in Modern Hebrew 1 (3)*
Addresses current issues facing Israeli society as reflected in Israeli literature and press. Texts include poetry, songs, essays, newspaper articles, and films.
Prerequisite: 01:563:211 or 01:013:353 or placement test. Credit not given for both this course and 01:013:354.

01:563:372 *Readings in Modern Hebrew 2 (3)*
Introduces students to major writers of modern Hebrew literature with the goal of developing their own critical reading and writing skills. Readings include modern Hebrew poetry, prose, and plays.
Prerequisite: 01:563:211 or 01:013:353 or placement test. Credit not given for both this course and 01:013:355.

01:563:471 *Readings in Modern Hebrew Literature (3)*
Reading and analysis of modern Hebrew poetry and short prose, with an emphasis on major Israeli authors.
Prerequisite: 01:563:372 or 01:013:355 or placement test. Credit not given for both this course and 01:013:452.

01:563:472 *The Hebrew Novel (3)*
Reading and analysis of the modern Hebrew novel, with an emphasis on major Israeli authors.
Prerequisite: 01:563:372 or 01:013:355 or placement test. Credit not given for both this course and 01:013:453.

01:563:484 *Love and Desire in Hebrew Prose and Poetry (3)*
Explores the themes of love and desire in modern Hebrew prose, poetry, and film. Special attention paid to how the literature and films handle the issues of love, desire, and personal relationships in contemporary Israeli culture.
Prerequisite: 01:563:372 or 01:013:355 or placement. Credit not given for both this course and 01:013:453.

01:563:485 *Hebrew Literature and Israeli Society (3)*
Traces the development of modern Israeli literature, from the establishment of the state of Israel in 1948 to the present day. Of special interest will be the manner in which these stories define the quintessential Israeli hero and contend with the question of Israeli identity.
Prerequisite: 01:563:372 or 01:013:355 or placement. Credit not given for both this course and 01:013:455.

Jewish Studies 563 (SAS)

Courses in Biblical Hebrew

Courses in Biblical Hebrew

01:563:141 *Biblical Hebrew I (3)*
An introduction to Biblical Hebrew, with a focus on basic grammar and basic lexicon, leading to a reading and understanding of simple narrative prose texts.
Credit not given for both this course and 01:013:154.

01:563:142 ***Biblical Hebrew II (3)***
A continuation of Biblical Hebrew I, leading to more advanced grammar and lexicon, with further understanding of narrative prose texts and an introduction to poetic texts.
Prerequisite: 01:563:141 or 01:013:154 or permission of the instructor. Credit not given for both this course and 01:013:155.

01:563:146 ***The Bible in Aramaic (3)***
Introduction to Aramaic through biblical literature, including Aramaic Bible passages and vernacular translations into various Aramaic dialects, with a focus on Syriac version.

In English. Credit not given for this course and 01:013:111 or 01:840:123.

01:563:431 ***Hebrew Bible (in Hebrew) (3)***
Study of selected portions of the Pentateuch; comparing the original Hebrew with English translations and utilizing classical and modern commentaries.
Prerequisite: 01:563:216 or placement test or permission of instructor.

01:563:433 ***Readings in Biblical Hebrew Prose (3)***
Advanced course in reading selected prose texts in the Hebrew Bible, with a special focus on material from Genesis, Exodus, Numbers, Joshua, Judges, and Samuel. Emphasis on the literary devices utilized by the ancient Israelite prose writers, but also other issues such as grammatical and historical concerns.
Prerequisite: 01:563:211 or permission of instructor.

01:563:434 ***Readings in Biblical Hebrew Poetry (3)***
Advanced course in reading selected poems in the Hebrew Bible, with a special focus on material from Psalms, Proverbs, and the prophets. Emphasis on the literary devices utilized by the ancient Israelite poets, most importantly parallelism, but also other issues such as grammatical and historical concerns.
Prerequisite: 01:563:211 or permission of the instructor.

01:563:437 ***Rabbinic Literature (in Hebrew/Aramaic) (3)***
Study of selected portions of the Mishnah, Midrash, and Talmud; comparing Hebrew/Aramaic and English texts and utilizing classical and modern commentaries.
Prerequisite: 01:563:216 or placement test.

Jewish Studies 563 (SAS)

Courses in Yiddish

Courses in Yiddish

01:563:103,104 ***Elementary Modern Yiddish (4,4)***
Speaking, reading, and writing; oral-aural and written exercises.
Not open for credit to students who have had two or more years of secondary school Yiddish or equivalent.

01:563:133,134 ***Intermediate Modern Yiddish (4,4)***
Practice in oral and written composition and selected readings in Yiddish prose and poetry.
Prerequisite: 01:563:104 or placement test.

Jewish Studies 563 (SAS)

Course in Aramaic

Course in Aramaic

01:563:145 ***Introduction to Aramaic (3)***
Introduction to the grammar of Aramaic. Focuses on the Aramaic portions of the books of Ezra and Daniel, combined with a survey of Aramaic dialects in antiquity and the present day.
Prerequisite: 01:563:101 or 01:685:101 or equivalent. Credit not given for both this course and 01:013:145 or 01:685:145.

Journalism and Media Studies 567 (SC&I-U)

JOURNALISM AND MEDIA STUDIES 567

Please check the listing of JMS courses on the SC&I website for the most up-to-date information about courses.

04:567:200 ***Writing for Media (3)***
Fundamentals of writing across media platforms. By the end of the course, students will be able to write in many journalistic and media-based styles using basic and accepted techniques accepted by each discipline. This course will serve as a foundation for understanding and using different styles of writing, research, and content development. (Required course)

04:567:201 ***Media Ethics and Law (3)***
Legal issues and ethical problems confronting journalists. (Required course)
Open only to journalism and media studies majors.

04:567:205 ***Digital News Writing and Reporting (3)***
Fundamentals of gathering information and journalistic writing. By the end of the course, students will learn basic journalistic news writing and reporting techniques, including writing in journalistic style, fact-gathering, conducting observation, freedom of information, and ethics. (Foundational course)
Prerequisites: 04:567:200. Open only to journalism and media studies majors.

04:567:206 ***Broadcast News Writing and Reporting (3)***
News writing for radio, with review of television news writing approaches for comparison. (Foundational course)
Prerequisites: 04:567:200. Open only to journalism and media studies majors.

04:567:207 ***Design and Digital Editing (3)***
Fundamentals of copyediting and layout. (Foundational course)
Prerequisites: 04:567:200. Open only to journalism and media studies majors.

04:567:210 ***Media Management and Strategy (3)***
Focuses on the key economic and strategic concepts, challenges, and opportunities that are central to the management of contemporary media organizations. The course is grounded in the growing academic and professional literatures examining the unique nature of media products and services and the unique and rapidly

changing marketplace dynamics in which media organizations operate. Given the ongoing convergence of media industries and technologies, this course focuses on concepts, analytical tools, and issues that have relevance across the full range of media industry sectors. (Foundational Course)
Prerequisites: 04:567:200. Open only to journalism and media studies major.

04:567:211 ***Exploring New Media (3)***
This course examines the nature and impact of emerging media technology. Students study four primary ways new technology influences media, including 1) how media professionals do their work; 2) the nature of media content; 3) the relationships between and among media and relevant publics; and 4) the structure, culture, and management of media organizations and systems. Five areas of media technology are studied, including 1) acquisition tools; 2) storage technologies; 3) processing devices; 4) distribution technologies; and 5) display, access, or presentation tools. (Foundational course)
Prerequisites: 04:567:200. Open only to journalism and media studies majors.

04:567:212 ***Digital Media Production (3)***
Digital media production is the study of media creation and display through online and interactive experiences. This includes audio and video steaming in online contexts, but it also covers other types of new media that are hybrids of the two. Using various multimedia systems and formats, you will explore the foundations of development, content creation and distribution across multiple platforms. Focusing on multi-platform digital media, you will have the opportunity to write, produce and edit your own digital media content for online distribution.
Prerequisites: 04:567:200. Open only to journalism and media studies majors.

04:567:215 ***Gender, Race, and Class in the Media (3)***
Content, treatment, and effects of women and minority group coverage in television, newspapers, magazines, popular music, and film. (Foundational course)

04:567:216 ***Digital Media and Society (3)***
Historical and contemporary social, cultural, political, and economic issues related to digital media in society. (Foundational course)

04:567:217 ***Foundations of Media Analysis (3)***
Survey of critical approaches to the analysis of media and its impact on society. (Foundational course)

04:567:250 ***Children and Media (3)***
This course examines children's relationship to media in its historic, economic, political, and social contexts. It begins by reviewing theories of child development as they inform children's relationship with and understanding of media. Next, it considers the political and economic forces that shape the landscape of children's media. Against this backdrop, the course examines research on the effects of media on children's physical, cognitive, social, and emotional development. Class time consists of lectures, screenings, and visits from professionals working in the field. Students in this course produce a proposal or prototype for an educational children's media property as their final project. (Concept and Analysis Course)

04:567:274 ***Consumer Media Culture (3)***
Provides a critical understanding of advertising's role in modern society. Examines the history of advertising, the commercial and social aspects of the messages conveyed by ads, and the advertising industry's influence on social relations and institutions, such as journalism. The basic orientation of the course is to study consumer media culture (advertising, public relations, and branded space) as a form unique to modern society. (Concept and Analysis course)

04:567:275 ***Social Media and Participatory Culture (3)***
This course takes a critical approach to understanding new media environments, especially with regard to what has been called at various moments "social media," "participatory culture," "digital media," "convergence," "Web 2.0," "social web," and "interactive media," among other things. Rather than focus on these emerging media practices as purely technological phenomena, the course situates them in broader social, political, and historical contexts. We will examine key dimensions of cultural life that make up our selves, including friendship, intimacy, labor, celebrity, power, gender, control, race, sexuality, activism, and privacy. (Concept and Analysis course)

04:567:276 ***Musical Cultures and Industries (3)***
This course looks at the invisible power of music over lives, exploring how music can influence how people feel, what they think, and how they think. Exploration of music's social power, delving into its rich history at the center of politics, religion, and a multibillion dollar global industry. Consideration of music's relationship to technology and how changes in the media landscape are altering the role music plays in human life. (Concept and Analysis course)

04:567:278 ***News Media and Government in America (3)***
Examines the relationship between media and institutions and the processes through which people and societies make political choices. (Concept and Analysis course)

04:567:314 ***Photojournalism (3)***
Fundamentals of still photography in print and audiovisual mass media with a primary focus on print journalism. (Practice and Innovation course) Must have a 35mm camera.
Prerequisites: 04:567:200. Open only to journalism and media studies majors.

04:567:317 ***Writing the Mediterranean (3)***
Students will draw inspiration from great Mediterranean journeys, and learn to write compelling journey stories of their own. They will travel with Homer, Mark Twain, Ernest Hemingway, Martha Gellhorn, George Orwell, and other notable authors through one of the world's grandest regions, as they explore its legacy of war and exodus, cooking and eating, and romance and revenge. This course includes a spring break reporting trip to a Mediterranean country, such as Spain, Italy, or Turkey.
Prerequisites: 04:567:200. Open to majors and MCM digital media track students only, except by special permission.

04:567:318 ***Fashion Journalism (3)***
Fashion Journalism is a course for advanced students in the journalism and media studies major who have an interest in writing about fashion, a key industry in New York City. The course provides students with an overview of writing about fashion, the different types of fashion journalism, and the numerous formats for fashion journalism. Students will also look at how fashion journalism has changed and how digital has transformed coverage. Throughout the semester, students will use readings, televised fashion coverage as well as online documentaries and collection showings to learn about the fashion journalism industry and to practice reporting techniques. Assignments will incorporate a multimedia focus with students working to produce a full range of fashion journalism that reflects the variety of journalism commonly produced in the industry. (Practice and Innovation Course)
Prerequisites: 04:567:200. Open only to journalism and media studies majors.

04:567:319 ***Podcasting and Audio Documentary (3)***
By the end of the course, students learn the basics of the production, writing, and journalistic process required to use audio as a nonfiction storytelling language. Students will participate in the completion of at least one podcast episode. (Practice and Innovation Course)
Prerequisites: 04:567:205 or 04:567:206 or 04:567:212. Open only to journalism and media studies majors.

04:567:326 ***Multimedia Reporting (3)***
Advanced reporting, writing, and research using new media technology. (Practice and Innovation course)
Prerequisites: 04:567:205 or 04:567:206. Open only to journalism and media studies majors.

04:567:327 ***Public Information and Public Relations (3)***
Techniques of public information with focus placed on government, public affairs, and public interest issues. (Practice and Innovation course)
Prerequisites: 04:567:200. Open only to journalism and media studies majors.

04:567:328 ***The Hyperlocal Newsroom (3)***
This class will give students hands-on experience with traditional and digital journalism, including work in both written and multimedia formats, through the creation and management of a news-based website covering Rutgers and the city of New Brunswick. Students will report; write and edit stories; create video, audio, and graphics; take photos; and learn about the various uses of social media within the journalism field. Students will collaborate on a news-based website that will synthesize learned skills, journalistic practices, and knowledge of information and technology. (Practice and Innovation course)
Prerequisites: 04:567:205 or 04:567:206, or 04:567:212. Open only to journalism and media studies majors.

04:567:329 ***International Reporting (3)***
This course prepares students to write about life in other countries and to cover international issues from the United States. Students analyze award-winning global journalism and learn about and practice techniques foreign correspondents use. (Practice and Innovation course)
Prerequisites: 04:567:200. Open only to journalism and media studies majors.

04:567:331 ***Digital Media Lab (3)***
Students use experimental new media tools to transform news reporting, media storytelling, and other media processes. Augmented reality, e-reader technology, 360-degree cameras, immersive media, the Mobile Journalist Workstation, 3D imaging and audio, 3D printing, interactive video, video as input, geotagged content, animation and news, and other emerging new media tools are applied to journalism and media to create and test new story formats that in an analog world would be impossible, but in a digital, networked world can engage individuals across time and space; and provide much-needed context and customization, and in-depth, context-sensitive news and mediated entertainment.
Open only to journalism and media studies majors.

04:567:333 ***Media and Popular Culture (3)***
Examines the relationship between media and popular culture and their impact on society. This course introduces students to the shifting trends, ideas, and competing forces that will lay the foundation for the cultural battleground of the future. (Concept and Analysis course)

04:567:335 *Mass Communication and the American Image (3)*
Mass communication and America's traditional self-imagery. Critical analysis of the ways in which the American experience is now, and has been, interpreted by the mass media; the relationship of myth to reality. (Concept and Analysis course)

04:567:340 *Science and Health Journalism (3)*
To introduce students to the specialized fields of science, health, and technology writing. (Practice and Innovation course)
Prerequisites: 04:567:205 or 04:567:206. Open only to journalism and media studies majors.

04:567:345 *Media Publishing and Design (3)*
Computer-based writing, design, and pagination for newsletters, websites, magazines, and newspapers. (Practice and Innovation course)
Prerequisites: 04:567:205 or 04:567:206 or 04:567:207 or 04:567:212. Open only to journalism and media studies majors.

04:567:347 *Information Design for Web Journalists (3)*
Creation, design, and development of webpages as primary sites for distributing news content and to supplement other technologies for news transmission. (Practice and Innovation course)
Prerequisites: 04:567:205 or 04:567:206 or 04:567:207 or 04:567:212. Open only to journalism and media studies majors.

04:567:350 *Development of Media (3)*
This course examines what media are and what they do; how specific media technologies affect democratic discourse; how media shape narratives of class, race, ethnicity, and gender; the long-running conflict between information and propaganda, and how media conglomerates came to wield such enormous power in modern society. (Concept and Analysis course)

04:567:365 *Mediating the Middle East (3)*
Media in the US have tended to present the Middle East in a negative light casting Muslim majority countries as static, violent, undemocratic, and sexist. This course will critically analyze racial and religious stereotypes and caricatures by foregrounding the rich and complex history of interaction between the West and the Near East. While the course begins in the 7th century, the emphasis will be on popular discourse in the United States over the last half century. We will study films, news media reports, television shows, video games, and arange of other outlets through which our understanding of the Middle East is mediated. Note: Students who completed Islam, Media, and the Western Imagination (04:567:365) in prior years cannot enroll in this course for credit.

04:567:370 *Journalism in American Film (3)*
The course is designed to expose students to many of the best known and classic American films about journalism, and to examine how American (U.S.) film has depicted the practice and societal impact of journalism. The course aims to deeply immerse students in a broad range of challenging and critical questions about journalistic practice in the United States, as represented in American film. Among the goals of the course is to have students consider whether popular, filmic depictions of American journalists are accurate and have bases in fact. Similarly, students consider whether the image, or the reality of journalistic practice, keeps changing in the United States, or whether, perhaps, there has been very little if any change in either, or at all, over the 75 years of film the course covers. And

if there is change, or there is no change in reality or film, how might we understand the forces behind change or stability (Concept and Analysis course)
Prerequisites: Open only to junior and senior journalism and media studies majors.

04:567:373 ***Editing for Multimedia (3)***
In this course, students will learn the workflows associated with editing audio, video, graphics, and text. A strong emphasis is placed on demonstration and hands-on experience in this course. Students will become familiar with developing editing scripts, managing content, importing media, editing, and encoding for distribution across multiple platforms. Instructors will also discuss editing concepts which provide a thorough understanding of technique and theory used by professional editors. Exploring these concepts will provide a better understanding of how messages and stories are told through editing. Editing media will be provided for all exercises and projects.
Prerequisites: 04:567:200 and one foundation course; Open only to journalism and media studies majors.

04:567:374 ***Media Field Production (3)***
This course introduces students to the working principles of Electronic Field Production (EFP). Special attention is given to on-location creative and technical aspects of media production. Valuable EFP knowledge and skills will be gained through production exercises, projects, and readings. Students will learn the constraints and benefits of shooting on-location while producing, directing, and operating production equipment.
Prerequisites: 04:567:200 and one foundation course; Open only to journalism and media studies majors.

04:567:375 ***Television Reporting (3)***
Fundamentals of television reporting and electronic news gathering with students assigned to various projects. (Practice and Innovation course)
Prerequisites: 04:567:206. Open only to journalism and media studies majors.

04:567:376 ***Advanced Television Reporting (3)***
Advanced television reporting and electronic news gathering with students assigned to various projects. (Practice and Innovation course)
Prerequisite: 04:567:375. Open only to journalism and media studies majors.

04:567:379 ***Media and Politics (3)***
Examines who controls the media and how the media differentially serve the public and power holders. Attention to both news and entertainment media. (Concept and Analysis course)
Prerequisite: Open only to junior or senior majors in journalism and media studies.

04:567:380 ***Media and Social Change (3)***
This course looks at how past and present social movements (e.g., environmental, civil rights, labor movements) challenge dominant social, economic, and political structures and how they have been portrayed in the mass media. It also examines how social activists use media technologies to organize themselves and communicate their messages to wide audiences in order to achieve social change. (Concept and Analysis course)

04:567:384 ***Media and the Struggle for Democracy in Central America (3)***
This course takes students to Guatemala for 10 days to study the role of media in historic and contemporary struggles for democracy. The class meets with Guatemalan journalists, human rights activists, Indigenous associations, women's collectives, and other community groups. Students visit news agencies, community radio and TV stations, and the office of the country's first and only feminist magazine. Using Guatemala as a case study, students will learn about the regional effects of colonization, US military intervention, and neoliberal economic

policies in the Central American region, as well as the key role of media in local struggles for political autonomy, human rights, and democracy.
Prerequisites: 04:567:215 or 04:567:380

04:567:385 *Irish Media, Politics and Cultural Survival (3)*
This embedded course takes students to Ireland for 8 days to study the role of Irish (Gaelic) journalism and media in historic and current struggles for political autonomy and cultural identity. There are six 3-hour class meetings before we travel. In the heart of Galway's Irish-Gaelic speaking region, students will spend a few days in the lovely rural village of Carraroe, where Gaelic is the main language spoken (although everyone is bilingual in English). They will also spend two days in the cultural hub of historic Galway City, and two days in the county's bustling capital, Dublin. Through readings, films, lectures, and site visits, students will learn the history of British colonialism in Ireland and the role of Irish-Gaelic journalism in the country's struggles for political independence from England. They will meet Irish civil rights activists who fought in the 1960s and 70s for the right to have Irish/Gaelic radio and TV stations in Ireland and will visit Gaelic radio, TV, print, and online news outlets to speak with journalists and other media makers. Focused on the political and cultural importance of native language media for minoritized and formerly colonized populations, students will see examples of Irish-language journalism and cultural programming such as documentaries, websites, children's cartoons, sports, music videos, and soap operas (subtitled in English), and gain familiarity with contemporary debates about whether the Irish government should continue funding Irish language media. Connections will be emphasized between struggles for Gaelic media in Ireland and struggles by minoritized and indigenous populations in other parts of the world for the right to have media in their native languages.
Prerequisites: 04:567:380 or 04:567:215. Majors only

04:567:388,389 *Independent Study in Journalism and Media Studies I,II (3,3)*
Independent study in journalism and media studies topics under faculty supervision. (Elective course)
Prerequisites: Approval by department chair and supervising instructor of a written project proposal. 04:567:200; 75 or more overall credits, five (5) courses in major, one foundation. Open only to junior or senior majors in journalism and media studies. Minimum 2.50 GPA overall, and 2.75 in the major, and permission of instructor.

04:567:393 *3-Credit Internship in Journalism and Media Studies (3)*
Supervised field experience at professional media outlets. Before registering, students must meet with the internship coordinator to determine eligibility and receive approval of the placement. Students must work at their site a minimum of 15 hours per week during the semester. Off-site (virtual) positions will not be accepted. Students will complete weekly journals and attend several in-class meetings during the semester. Students will be allowed to take both the 3-credit internship and the 6-credit internship, but are not allowed to take both of them in the same semester. Also note that students are limited to a maximum of 9 out-of-classroom credits in the major; the courses that fall under this heading are: Internship, Practicum, and Independent Study.
Prerequisites: 04:567:200; 75 or more overall credits, five (5) courses in major, one foundation. Open only to junior or senior majors in journalism and media studies. Minimum 2.50 GPA overall, and 2.75 in the major, and permission of instructor.

04:567:394 *6-Credit Internship in Journalism and Media Studies (6)*
Supervised field experience at professional media outlets. Before registering, students must meet with the internship coordinator to determine eligibility and receive approval of the placement. Students must work at their site a minimum of 24 hours per week during the semester. Off-site (virtual) positions will not be accepted. Students will complete weekly journals and attend several in-class meetings during the semester. Students will be allowed to take both the 3-credit internship and the 6-credit internship, but are not allowed to take both of them in the same

semester. Also note that students are limited to a maximum of 9 out-of-classroom credits in the major; the courses that fall under this heading are: Internship, Practicum, and Independent Study.
Prerequisites: 04:567:200; 75 or more overall credits, five (5) courses in major, one foundation. Open only to junior or senior majors in journalism and media studies. Minimum 2.50 GPA overall, and 2.75 in the major, and permission of instructor.

04:567:405 ***Writing about Social Issues (3)***
Students will cover the game-changing stories of our time, from the widening gap between the rich and the poor; to battles over immigration; to the climate change wars that may determine our very survival. They'll analyze groundbreaking journalism, and have an opportunity to write and shoot commanding stories of their own. (Practice and Innovation course)
Prerequisites: 04:567:215 or 04:567:380; 04:567:205 or 04:567:206 or 04:567:328 or 04:567:329 or 04:567:445. Open only to journalism and media studies majors.

04:567:410 ***Magazine Writing (3)***
Magazine writing for publication, including consumer, trade, and business magazines. (Practice and Innovation course)
Prerequisites: 04:567:205 or 04:567.206. Open only to journalism and media studies majors or by permission of the instructor.

04:567:413 ***Literary Journalism***
This course analyzes great examples of nonfiction writing from the last century to appreciate what makes for enduring non-fiction writing-- journalism that rises to the level of literature.

04:567:415 ***Media and Climate Change (3)***
This course will consider the intersections of science, media, and society. With a focus on both theory and practice, it explores the media's role in understanding and communicating about the most critical science and environmental issues of our day. (Concept and Analysis course)
Prerequisite: Open only to junior or senior journalism and media studies majors.

04:567:420 ***Global News (3)***
Investigates, analyzes, and discusses global production, distribution, and consumption of news. Issues include global news flows, journalistic cultures and practices, and international news coverage. (Concept and Analysis course)
Prerequisite: Open only to junior or senior journalism and media studies majors or by permission of the instructor.

04:567:423 ***Communication Law (3)***
Examines laws and regulations governing U.S. mass media. (Concept and Analysis course)
Prerequisite: Open only to juniors or seniors or by permission of the instructor.

04:567:425 ***Copyright, Media, and Culture (3)***
In this course we will discuss one of the most powerful social, cultural, economic, and political institutions of our day: intellectual property (IP). How did we arrive at the notion that creative works and ideas can be owned, bought, and sold like tangible commodities? What impact does this concept have on the way we view the world? How does it help us achieve our social goals, and how does it present obstacles to reaching those goals? And, in the age of digitized information and networked communication, how can we understand the role of IP in light of the rapidly changing developments in the way culture is produced and consumed? In our efforts to better understand these issues, we will read both primary and secondary materials, covering subjects ranging from the birth of copyright to the latest developments in the global "copyfight" over information in the digital age; view relevant and interesting

documentary films; and enjoy guest lectures from a variety of knowledgeable speakers. (Concept and Analysis course)
Prerequisite: Only open to journalism and media studies juniors or seniors.

04:567:430 ***Sports Writing and Reporting (3)***
Fundamentals of sports writing, reporting, and commentary for print and online media. (Practice and Innovation course)
Prerequisites: 04:567:205 or 04:567:206. Open only to journalism and media studies majors.

04:567:432 ***Multimedia Sports Reporting (3)***
This course will explore the many facets of multimedia sports reporting, from conventional newspaper websites to robust sports sites and the use of social networking services to transmit sports news.
Prerequisites: 04:567:205 or 04:567:206 or 04:567:212. Open only to journalism and media studies majors.

04:567:434 ***Critical Issues in Sports Media (3)***
Examines the critical issues in sports and sports media, including race, gender, class, politics, culture, economics, and the role of sport in society.
Prerequisite: Open only to journalism and media studies majors.

04:567:438 ***Media and Data (3)***
Who decides what we watch, read, and listen to in the digital media age? Increasingly the answer is not a person at all, but an algorithm that studies our online behavior and tries to predict what we'll click, like, and share next. This course will look at how media industries--such as TV, film, music, book publishing, and journalism--are using Big Data to compete in a fierce battle for audiences' attention. How are data and algorithms shaping the movies we watch on Netflix, the songs we hear on Spotify, the books we read on Kindle, and the news we consume on Facebook and Twitter? What are the potential benefits and drawbacks of this transformation? (Concept and Analysis course)
Prerequisites: 04:567:215 or 04:567:216 or 04:567:217. Open only to journalism and media studies majors.

04:567:445 ***Media, Movement, and Community Engagement (3)***
This course will enable students to participate in the development of a journalism and media production project. They will also learn how to harness technology and study its implementation and impact on social change. (Concept and Analysis and/or Practice and Innovation course; student may only use this course to satisfy one requirement.)
Prerequisite: 04:567:215 or 04:567:380.

04:567:450 ***Promotional Media (3)***
What is a promotional culture? Bringing together elements of media studies, visual culture, critical branding/ marketing studies, and consumer culture, this course is designed to provide advanced undergraduate students with analytical tools to understand the extent to which promotional language, communication, and habits suffuse our everyday lives.
Prerequisites: 04:567:274. Only open to journalism and media studies juniors or seniors.

04:567:451 ***Topics in Journalism and Emerging Media I (3)***
Specialized topics related to the practice of journalism are offered on a regular basis. (Practice and Innovation Course)
Prerequisites: 04:567:205 or 04:567:206 or 04:567:207 or by permission. Open only to journalism and media studies majors.

04:567:452 ***Topics in Journalism and Emerging Media II (3)***
Specialized topics related to the practice of journalism are offered on a regular basis. (Practice and Innovation Course)
Prerequisites: 04:567:205 or 04:567:206 or 04:567:207 or by permission. Open only to journalism and media studies majors.

04:567:453 ***Topics in Journalism Emerging Media III (3)***
Specialized topics related to the practice of journalism are offered on a regular basis. (Practice and Innovation Course)
Prerequisites: 04:567:205 or 04:567:206 or 04:567:207 or by permission. Open only to journalism and media studies majors.

04:567:454 ***Practicum in Journalism and Media Studies (3)***
Specific directed project work conducted under faculty supervision. (Practice and Innovation Course)
Prerequisites: Permission of the instructor required. Open only to sophomore, junior, and senior majors in journalism and media studies.

04:567:457 ***Journalism of the Civil Rights Movement (3)***
Students read and study the journalism of the U.S. civil rights movement (1954-1968) to understand its historical role.

04:567:458 ***Media, Government, and Politics (3)***
Examines interactions between media and political institutions, actors and processes, in light of theories of journalism, communication, and political practice. (Concept and Analysis course)
Prerequisite: Open only to junior and senior journalism and media studies majors.

04:567:459 ***Media, Democracy, and the Public (3)***
The course explores how the news media have figured in constituting a public sphere in American history. Readings juxtapose classics of political philosophy with historical or sociological works describing democracy in practice in the United States. (Concept and Analysis course)
Prerequisite: Open only to junior and senior journalism and media studies majors.

04:567:460 ***News, Entertainment, and Politics (3)***
Examines the influence of entertainment media on political news, opinion, knowledge, and behavior.(Concept and Analysis course)
Prerequisite: Open only to junior and senior journalism and media studies majors.

04:567:465 ***Documentary Filmmaking and Storytelling (3)***
Long-form video journalism storytelling developed over a significant period of time teaching students critical thinking, research, writing skills, and various production techniques. (Practice and Innovation course)
Prerequisites: 04:567:206 or 04:567:212. Open only to journalism and media studies majors.

04:567:470 ***Critical Analysis of News (3)***
Surveys and critiques of social science research on news, journalists, and the news media. (Concept and Analysis course)
Prerequisite: Open only to junior and senior journalism and media studies majors.

04:567:471 ***Topics in Media and Society I (3)***
Upper level seminar on specialized topics relating to journalism media studies. Examples of recent topics: Covering the World, Design for the World Wide Web, History of Sports Journalism. (Concept and Analysis course)
Prerequisites: 04:567:200 and 04:567:215 or 04:567:216 or 04:567:217. Open only to journalism and media studies majors.

04:567:472 ***Topics in Media and Society II (3)***
Upper level seminar on specialized topics relating to journalism media studies. Examples of recent topics: Covering the World, Design for the World Wide Web, History of Sports Journalism. (Concept and Analysis course)
Prerequisites: 04:567:200 and 04:567:215 or 04:567:216 or 04:567:217. Open only to journalism and media studies majors.

04:567:473 ***Topis in Media and Society III (3)***
Upper level seminar on specialized topics relating to journalism media studies. Examples of recent topics: Covering the World, Design for the World Wide Web, History of Sports Journalism. (Concept and Analysis course)
Prerequisites: 04:567:200 and 04:567:215 or 04:567:216 or 04:567:217. Open only to journalism and media studies majors.

04:567:474 ***Topics in Media and Society IV (3)***
Upper level seminar on specialized topics relating to journalism media studies. Examples of recent topics: Covering the World, Design for the World Wide Web, History of Sports Journalism. (Concept and Analysis course)
Prerequisites: 04:567:200 and 04:567:215 or 04:567:216 or 04:567:217. Open only to journalism and media studies majors.

04:567:475 ***International Media (3)***
Analyze debates about media and cultural globalization, and theories about international media. (Concept and Analysis course)
Prerequisites: Open only to junior and senior journalism and media studies majors.

04:567:476 ***Topics in Creative Media Practice I (3)***
Upper-level seminar on specialized topics relating to journalism media studies. Examples of recent topics: Covering the World, Design for the World Wide Web, History of Sports Journalism. Note: Please check with the journalism and media studies coordinator of undergraduate studies or the School of Communication and Information Office of Student Services each semester to find out if the course is conceptual or skills.
Prerequisites: 04:567:200 and 04:567:210 or 04:567:211 or 04:567:212. Open only to journalism and media studies majors.

04:567:477 ***Topics in Creative Media Practice II (3)***
Upper-level seminar on specialized topics relating to journalism media studies. Examples of recent topics: Covering the World, Design for the World Wide Web, History of Sports Journalism. Note: Please check with the journalism and media studies coordinator of undergraduate studies or the School of Communication and Information Office of Student Services each semester to find out if the course is conceptual or skills.
Prerequisites: 04:567:200 and 04:567:210 or 04:567:211 or 04:567:212. Open only to journalism and media studies majors.

04:567:478 ***Topics in Creative Media Practice III (3)***
Upper-level seminar on specialized topics relating to journalism media studies. Examples of recent topics: Covering the World, Design for the World Wide Web, History of Sports Journalism. Note: Please check with the journalism and media studies coordinator of undergraduate studies or the School of Communication and Information Office of Student Services each semester to find out if the course is conceptual or skills.
Prerequisites: 04:567:200 and 04:567:210 or 04:567:211 or 04:567:212. Open only to journalism and media studies majors.

04:567:479 ***Topics in Creative Media Practice IV (3)***
Upper-level seminar on specialized topics relating to journalism media studies. Examples of recent topics: Covering the World, Design for the World Wide Web, History of Sports Journalism. Note: Please check with the journalism and media studies coordinator of undergraduate studies or the School of Communication and Information Office of Student Services each semester to find out if the course is conceptual or skills.
Prerequisites: 04:567:200 and 04:567:210 or 04:567:211 or 04:567:212. Open only to journalism and media studies majors.

04:567:484 ***Workshop in Journalism and Media Practice I (1.5)***
Specialized topics directed at enhancing or introducing journalism and/or media-related skill sets. These are intense seven-week workshops teaching students specific skills applicable to the field. The specialized focus can be an accelerated introduction to basics or an advanced training in particular skills learned in previous offerings.
Prerequisites: 04:567:205, 04:567:206, or 04:567:212. Open only to journalism and media studies majors.

04:567:485 ***Workshop in Journalism and Media Practice II (1.5)***
Specialized topics directed at enhancing or introducing journalism and/or media-related skill sets. These are intense seven-week workshops teaching students specific skills applicable to the field. The specialized focus can be an accelerated introduction to basics or an advanced training in particular skills learned in previous offerings. (Practice and Innovation course)
Prerequisites: 04:567:205, 04:567:206, or 04:567:212. Open only to journalism and media studies majors.

04:567:488 ***Independent Study in Media Studies (3)***
Independent study in media studies topics under faculty supervision. (Elective course)
Prerequisites: 75 or more overall credits, five (5) courses in major, one foundation, 567:200, 2.75 major GPA, 2.5 overall GPA, and permission of instructor. Open only to junior and senior journalism and media studies majors.

04:567:489 ***Independent Study in Journalism (3)***
Independent study in journalism topics under faculty supervision. (Elective course)
Prerequisite: 75 or more overall credits, five (5) courses in major, one foundation, 567:200, 2.75 major GPA, 2.5 overall GPA, and permission of the instructor. Open only to junior and senior journalism and media studies majors.

04:567:490 ***Senior Thesis/Project (3)***
Honors thesis or project under faculty supervision. (Elective course)
Prerequisites: 04:567:488 or 04:567:489. Permission of instructor. Must meet certain GPA requirements. Open only to senior journalism and media studies majors.

04:567:495 ***Investigative and In-Depth Reporting (3)***
In-depth reporting project using public records and other investigative journalism techniques. (Practice and Innovation course)
Prerequisites: 04:567:205 or 04:567:206. Open only to journalism and media studies majors.

04:567:499 ***Capstone in Gender and Media (3)***
In this capstone to the gender and media minor, students will develop, discuss, produce, and critique a project related to gender, media, and technology. Students will articulate and present the project in written and oral formats and will have the option to also (1) create an in-depth multimedia component to the project; 2) complete an internship; or 3) complete a service-learning experience. Note: Students in the minor, especially those who are not otherwise SC&I majors, may choose to enroll in the capstone through the program in women's and gender studies, course number 01:988:499.
Prerequisite: Minimum of 12 credits in the gender and media minor must be completed before enrolling in the capstone.

Study Abroad 959 (SAS)

STUDY ABROAD 959

Rutgers offers over 180 study abroad and service-learning abroad programs in more than 50 countries around the world. Students can study overseas for a full year, a single semester, or a Summer or Winter Session. The majority of study abroad programs are offered in English and are open to students of any major.

Interested students should contact the Center for Global Education, Rutgers, The State University of New Jersey, 102 College Avenue, New Brunswick, NJ 08901-8543, or visit the website at https://global.rutgers.edu/study-abroad.

Students wishing to study abroad with programs other than those hosted by Rutgers may contact other American colleges or may seek admission directly from a foreign university. Students making these arrangements should speak with their academic dean about the acceptability of the program and the transfer of credit.

Study Abroad 959 (SAS)

Courses

Courses

01:959:191,192,193,194 ***Study Abroad - Honors (1)***
Field experience course, either embedded in an existing honors course or a free-standing honors experience.
Graded Pass/No Credit.

01:959:200 ***Study Abroad - Nursing (BA)***

01:959:210 ***Study Abroad - SEBS (BA)***

01:959:220 ***Study Abroad in Journalism and Media Studies (BA)***
Students will explore issues such as war, corruption, family, food, the arts, and the influence of the sea.

01:959:300 ***Study Abroad in Guatemala (BA)***

01:959:301,302 ***Study Abroad in Argentina (BA,BA)***
Study for a year or a semester in Buenos Aires at the CIEE Study Center at the Facultad Latinoamericana de Ciencias Sociales (FLACSO).

01:959:304,305 ***Study Abroad in Australia (BA,BA)***
Study for a year or a semester at the University of Melbourne, the University of Queensland, or Macquarie University.

01:959:307,308 ***Study Abroad in Barbados (BA,BA)***
Study for a year or a semester at the University of West Indies at Cave Hill.

01:959:310,311,312 ***Study Abroad in Belgium (BA,BA,BA)***
Study for a year, semester, or Summer Session in Brussels at Vesalius College.

01:959:315 ***Study Abroad in Bolivia (BA)***
Study for a Summer Session in Cochabamba and environs in the Rutgers Latin American Studies Program/ Department of Anthropology's International Service Learning Program.

01:959:316,317 ***Study Abroad in Brazil (BA,BA)***
Study for a year or a semester in either Saõ Paulo at the University of Saõ Paulo (USP), or the USP Escola Superior de Agricultura "Luiz de Queiroz" (ESALQ), or in Rio de Janeiro at the Universidade Estadual do Norte Fluminense Darcy Ribeiro.

01:959:320,321 ***Study Abroad in the Cayman Islands (BA,BA)***
Study for either a Winter or Summer Session on Little Cayman Island at the Central Caribbean Marine Institute.

01:959:322,323 ***Study Abroad in Chile (BA,BA)***
Study for a year or a semester in Santiago at the CIEE Study Center at the Pontificia Universidad Católica de Chile and the Universidad de Chile.

01:959:325,326,327 ***Study Abroad in China (BA,BA,BA)***
Study for a year or a semester at Jilin University, or for a Summer Session in Jilin in the Rutgers Asian Languages and Cultures Department's intensive Chinese program, or the School of Social Work's summer program in Beijing.

01:959:328,329,330 ***Study Abroad in Costa Rica (BA,BA,BA)***
Study for a year or a semester in San José at the Universidad de Costa Rica.

01:959:331,332 ***Study Abroad in the Dominican Republic (BA,BA)***
Study for a year or a semester in Santiago at the CIEE Study Center at the Facultad Latinoamericana de Ciencias Sociales (FLACSO-Dominican Republic).

01:959:334,335 ***Study Abroad in Egypt (BA,BA)***
Study for a year or a semester in Dokki, near Cairo, at the AMIDEAST Semester/Academic Year in Cairo Program.

01:959:337,338,339 ***Study Abroad in France (BA,BA,BA)***
Study for a year or a semester either in Tours, at the Université François Rabelais; Paris variously at fourteen locations (Paris I, III, IV, VI, VII, VIII, X, XI, XII, XIII; Université d'Évry Val-d'Essonne; Institut Catholique de Paris;

Université Paris-Est Marne-la-Vallée; and Université de Versailles St. Quentin-en-Yvellines); or at Sciences Politique, or for a Summer Session either in Paris, in the Rutgers Art History Department's Summer Institute in Art History; or Cluny in the Rutgers School of Environmental and Biological Sciences Department of Biochemistry and Microbiology's Science of Wine and Cheese course.

01:959:340,341,342 ***Study Abroad in Germany (BA,BA,BA)***
Study for a year or a semester either in Constance at the Universität Konstanz, or Berlin at the Freie Universität (direct enroll or FU-BEST), or Munich in the Technische Universität München, or Östrich-Winkel at the European Business School (EBS); or for a Summer Session in EBS's intensive summer seminar, or Rutgers landscape architecture program in Berlin and Munich.

01:959:343,344,345 ***Study Abroad in Ghana (BA,BA,BA)***
Study for a year or a semester in Accra at the University of Ghana, or for a Summer Session in the Rutgers Center for African Studies/Department of Women's, Gender, and Sexuality Studies International Service Learning in Ghana program.

01:959:346,347,348 ***Study Abroad in Greece (BA,BA,BA)***
Study for a year or a semester in Athens at College Year in Athens (CYA), or in Thessaloniki at the American College of Thessaloniki (ACT), or for a Summer Session in Athens in CYA's various programs, or in Thessaloniki at Aristotle University's intensive modern Greek program, or throughout Greece in the Rutgers Department of Classics' Summer Semester in Greece Program, or in Athens in the Rutgers Department of Art History's Cultural Heritage Preservation Program.

01:959:349,350 ***Study Abroad in Hungary (BA,BA)***
Study for a year or a semester in Budapest at the University of California's Central European Studies Center.

01:959:352,353 ***Study Abroad in India (BA,BA)***
Study for a year or a semester in Delhi either at St. Stephen's College or Ramjas College.

01:959:355,356 ***Study Abroad in Ireland (BA,BA)***
Study for a year or a semester either at University College Dublin, University College Cork, or the Limerick Institute of Technology.

01:959:358,359 ***Study Abroad in Israel (BA,BA)***
Study for a year or a semester at the University of Haifa, in Beer Sheva at Ben-Gurion University, or at the Hebrew University of Jerusalem.

01:959:361,362,363 ***Study Abroad in Italy (BA,BA,BA)***
Study for a year or a semester in Rome at John Cabot University (JCU), or in Ferrara through CIEE's programs in language and culture and liberal arts; or for a Summer Session in Rome in JCU's various programs, or the Rutgers Summer Art History program in Rome.

01:959:364,365,366 ***Study Abroad in Japan (BA,BA,BA)***
Study for a year or a semester either in Kyoto at Ritsumeikan University, Beppo at Ritsumeikan Asia Pacific University, or International Christian University in Tokyo; or for a Summer Session in Kyoto in the Rutgers Department of Political Science's course on Japanese international relations.

01:959:367,368 ***Study Abroad in Jordan (BA,BA)***
Study for a year or a semester at the AMIDEAST Semester/Academic Year in Amman Program.

01:959:371 ***Study Abroad in Kenya (BA)***
Study for a Summer Session throughout Kenya in the Rutgers Department of Anthropology's program on primatology (Laikippia Plateau region).

01:959:372 ***Study Abroad in Kenya (BA)***
Study for a Summer Session throughout Kenya in the Rutgers Department of Anthropology's program on palaeoanthropolgy (Koobi Fora).

01:959:373,374,375 ***Study Abroad in Mexico (BA,BA,BA)***
Study for a year or a semester in Merida at the Universidad Autónoma de Yucatán, or for a Winter Session throughout the Yucatan in the Rutgers School of Environmental and Biological Sciences (SEBS) Department of Landscape Architecture's course on Cities and Monuments of the Yucatan, or for a Summer Session at Oaxaca in the Rutgers Latin American Studies Program/SEBS Department of Human Ecology International Service Learning Program.

01:959:378 ***Study Abroad in Morocco (BA)***
Study for a Summer Session in Rabat at the AMIDEAST intensive modern Arabic program.

01:959:379,380 ***Study Abroad in the Netherlands (BA,BA)***
Study for a year or a semester at the University of Leiden.

01:959:382,383 ***Study Abroad in New Zealand (BA,BA)***
Study for a year or a semester at the University of Auckland.

01:959:385,386 ***Study Abroad in Norway (BA,BA)***
Study for a year or a semester at the University of Oslo.

01:959:388,389 ***Study Abroad in Peru (BA,BA)***
Study for a year or a semester in Cusco and environs in the ProWorld International Service Learning Semester Program.

01:959:396 ***Study Abroad in Romania (BA)***
Study for a Summer Session in Cluj and environs in the Rutgers School of Social Work's International Service Learning Program.

01:959:397 ***Study Abroad in Uruguay (BA)***

01:959:398,399 ***Study Abroad in Russia (BA,BA)***
Study for the spring semester at the European University at St. Petersburg, or for a Summer Session in the Rutgers Russian language and literature program's intensive Russian courses.

01:959:400,401 ***Study Abroad in South Africa (BA,BA)***
Study for a year or a semester in Pietermaritzburg at the University of Kwazulu Natal, or through CIEE's programs in arts and sciences or service learning in Cape Town at the University of Cape Town, or at the University of Stellenbosch.

01:959:402 ***Study Abroad CIEE Open Campus LA (BA)***

01:959:403,404,405 ***Study Abroad in South Korea (BA,BA,BA)***
Study for a year, a semester, or a Summer Session in one of various programs in Seoul at Ewha Woman's University.

01:959:406,407,408 ***Study Abroad in Spain (BA,BA,BA)***
Study for a year or a semester in Valencia at the Universitat de València.

01:959:409,410 ***Study Abroad in Thailand (BA,BA)***
Study for a year or a semester in Bangkok and environs in the ProWorld International Service Learning Semester Program.

01:959:412,413 ***Study Abroad in Turkey (BA,BA)***
Study for a year or a semester in Istanbul at Koç University or Ankara at Bilkent University.

01:959:415,416,417 ***Study Abroad in the United Kingdom (BA,BA,BA)***
Study for a year or a semester variously in 10 locations (Bristol University, Cardiff University, City University London, University College London, University of East Anglia, University of Exeter, University of Manchester, University of Reading, University of Sussex, and University of York), or for a Summer Session in Sussex either at the University of Sussex in various courses or in the Rutgers creative writing program.

01:959:418,419 ***Study Abroad on Euroscholars Program (BA,BA)***
Study for a year or a semester on a research project in one of 12 major European universities.

01:959:421,422,423 ***Field Experience (BA,BA,BA)***
Various service learning projects supplementing enrollment in semester/year-length study abroad programs.

01:959:424,425,426 ***Supplemental Language Study (BA,BA,BA)***
Elementary language instruction supplementing Rutgers faculty-led summer programs.

01:959:427 ***Study Abroad in Austria (BA)***
Study for a summer at Graz University of Technology and the University of Graz, Austria.

01:959:428,429 ***Study Abroad in Austria (BA, BA)***
Study for a semester or year at Graz University of Technology and the University of Graz, Austria.

01:959:431 ***Study Abroad in the Czech Republic (BA)***
Study for a summer on the Council for International Educational Exchange's Program in Central European Studies in Prague.

01:959:432,433 ***Study Abroad in the Czech Republic (BA,BA)***
Study for a semester or year on the Council for International Educational Exchange's Program in Central European Studies in Prague.

01:959:434,435 ***Study Abroad in Hong Kong (BA,BA)***
Study for a semester or year at the Hong Kong University of Science and Technology.

01:959:437,438 ***Study Abroad in Portugal (BA,BA)***
Study for a semester or year on the Council for International Educational Exchange's Language and Culture Program at the School of Social Sciences and Humanities, Universidade Nova de Lisboa.

01:959:440,441 ***Study Abroad in Sweden (BA,BA)***
Study for a semester or year at the Royal Institute of Technology in Stockholm.

01:959:442 ***Study Abroad in Poland (BA)***
Study cultural heritage and preservation studies in Krakow, Poland, and Prague, Czech Republic.

01:959:446 ***Study Abroad in Taiwan (BA)***
Study for a semester or a year at the College of Management, National Taiwan University, Taiwan.

01:959:447 ***Study Abroad in Taiwan (BA)***
Study for a semester or a year at the College of Management, National Taiwan University, Taiwan.

01:959:448 ***Study Abroad in Bonaire (BA)***
Study chemistry and marine biology in Bonaire during the summer.

01:959:449 ***Study Abroad in South Africa (BA)***
Study for a Summer Session in South Africa.

01:959:450 ***Study Abroad in Cuba (BA)***
Study comparative health care systems in Cuba in the summer.

01:959:451 ***Study Abroad in Indonesia (BA)***
Study primates, ecology, and conservation in Indonesia in the summer.

01:959:454 ***Study Abroad in Senegal (BA)***
Study in Senegal in the summer.

01:959:457 ***Study Abroad at the UN (BA)***
Study the UN and visit UN headquarters in the summer.

01:959:460 ***Study Abroad in Iceland (BA)***
Study renewable energy in Iceland in the summer.

01:959:463 ***Study Abroad in Oman (BA)***
Study for a semester or a year with AMIDEAST in Muscat, Oman.

01:959:466 ***Study Abroad in Belize (BA)***
Study animal science in Belize in the summer.

Korean 574 (SAS)

KOREAN 574

Department of Asian Languages and Cultures, School of Arts and Sciences

Website:http://alc.rutgers.edu

Chair: Wendy Swartz

Director of Undergraduate Studies: Satoru SaitoW

Professor:

Young-mee Yu Cho, B.A., Seoul National (South Korea); Ph.D., Stanford

Suzy Kim, B.A., California (Los Angeles); Ph.D., Chicago

Assistant Professor:

Jae Won Edward Chung, B.A., Swarthmore; M.F.A., M.A., Ph.D., Columbia

Assistant Teaching Professors:

Hee Chung Chun, B.A.,M.A., Ewha Womans (South Korea); Ph.D. candidate (Rutgers)

Jaehyun Jo, B.A., M.A., Yonsei; Ph.D., California (Los Angeles)

Teaching Instructor:

Kyoung-eun Jang Moon, B.A., Seoul National (South Korea); M.A,, Rutgers

Korean 574 (SAS)

Major Program Learning Goals and Requirements

Major Program Learning Goals and Requirements

Learning Goals

Majors in Korean will acquire in-depth knowledge of the Korean language as well as the literature and culture of Korea. Majors will be able to demonstrate oral, reading, and written proficiency in the language and develop critical skills in analyzing and interpreting literary, historical, and cultural texts. Students will acquire the literary, cultural, and linguistic competency necessary for continuing on to postgraduate study or employment requiring such cultural knowledge and/or linguistic skill. Students will learn the cultural heritage of Korea within the larger context of East Asia through a wide and coherent curriculum, which includes courses in the following humanities and social science disciplines: literature, visual culture, history, religion, language, and linguistics.

Requirements

The major in Korean requires 36 credits distributed as follows:

1. Six courses in Korean language above the 100-level.
2. Four courses in Korean literature, history, and/or culture (under subject code 574).

3. One course chosen from East Asian Civilizations: Traditional Era (098:241) OR East Asian Civilizations: Modern Era (098:242) OR Global East Asia (098:250).

4. Capstone Seminar on East Asian Societies (098:444).

Korean 574 (SAS)

Minor Program Learning Goals and Requirements

Minor Program Learning Goals and Requirements

Learning Goals

Minors will be introduced to the cultural heritage of Korea through courses on literature, history, civilization, language, and linguistics. Minors will be able to communicate effectively (listening, speaking, and writing) in Korean and will learn critical skills in analyzing and interpreting historical and cultural materials appropriate to the student's area of specialization. Students will achieve advanced linguistic competency and be able to demonstrate practical skills in using Korean for translation and interpretation. Students will be able to relate relevant issues to other areas in the humanities.

Requirements

A minor in Korean consists of four courses in Korean above the 100 level plus two additional elective courses (of 3 credits or more) in the area of concentration (subject code 574). The elective courses may be language courses or culture courses.

Korean 574 (SAS)

Certificate of Academic Korean for Heritage Speakers

Certificate of Academic Korean for Heritage Speakers

Korean Heritage Speakers certificate program

The Certificate of Academic Korean for Heritage Speakers (AKHS) provides students who are heritage speakers of Korean across diverse schools at Rutgers University the opportunity to further their academic competence in Korean. As a separate program designed for non-majors/ minors in Korean, it will train students in developing academic and professional oral registers and literacy in Korean, skills that can be applied to future employment in connection with other majors or professional fields such as Business, Health, Journalism, Law, Social Work, or the Language Industries.

The Certificate of Academic Korean for Heritage Speakers (AKHS) requires:

1. The Heritage-Korean placement test https://alc.rutgers.edu/academics/undergraduate/placement-testing

2. Completion of 12 credits distributed as follows:

- Electives: 3 courses [see the brochure below]
- Capstone course: 01:574:365 Topics in the Korean Language & Linguistics (3)

3. A 3.0 or better grade-point average for the entire sequence is required.

Korean 574 (SAS)

Departmental Honors Program

Departmental Honors Program

To qualify, a student must have a cumulative grade-point average of 3.0 or better and a grade-point average of 3.4 or better in the major at the end of the junior year. At that time, the student should formally apply to the chair for admission to the honors program. In addition to completing all requirements of the Korean major, candidates are required to register for 01:574:497-498 Honors in Korean, write an honors paper under the guidance of an assigned faculty member, and take a comprehensive examination at the end of their senior year.

Korean 574 (SAS)

Korean Culture Courses

Korean Culture Courses

01:574:110, 111 ***The History of the Korean Script and Calligraphy I, II (2,2)***
Overview of the history of Hangul writing practices as well as an introduction to the principles, techniques, and art of Korean calligraphy that are distinct from Chinese calligraphy.

No prior knowledge of Korean language is required.

01:574:120 ***Korean Folk Traditions (2)***
Introduction to the history and practice of Korean folk-art traditions. Development of an understanding of the popular themes of folk painting (minhwa) and its aesthetics.

No prior knowledge of Korean language is required.

01:574:210 ***Introduction to Korean Culture (3)***
Survey of Korean culture and society in a historical context. Exploration into the connection between language and culture. Examination of modern Korean novels and their social and historical relevances.

All readings and classes are in English.

01:574:220 ***Introduction to Korean Literature in Translation (3)***
Introduction to canonical works in Korean literature and practice of literary analysis. Exploration of historical backgrounds and cultural contexts of major works of various genres.
All readings and classes are in English.

01:574:221 ***Topics in Korean Literature in Translation (3)***
Focus on a set of themes and issues as a way to read and analyze Korean literature and texts from various genres and as a way to explore Korea's historical background and cultural context. Topics vary by instructor and semester offered.
All readings and classes are in English.

01:574:230 ***Introduction to Korean Cinema and Cinematic Language (3)***
Cinematic development in postcolonial Korea. Topics include the depictions of traditional and contemporary Korea in films, reflecting political, social, and cultural changes.

All readings and classes are in English.

01:574:250 ***Korean Language in Culture and Society (3)***
Survey of the Korean language in relation to its culture and society. Examination of language use (diglossia, language and gender, metaphors, and the writing system).
No prior knowledge of Korean language is required.

01:574:281 ***Korean Studies Internship (1.5)***
Provides study-abroad students an opportunity to navigate businesses, cultural centers, community organizations, and non-profit sectors in South Korea over the summer.

01:574:293 ***Korean Studies Guided Research (1.5)***
Allows students to reflect on their summer study abroad experience in Seoul while conducting a rigorous investigation of Korea's past and present.

01:574:310 ***Gender and Social Change in Korea (3)***
Explores the shifting category of femininity and masculinity, women's roles and their experiences of social change in Korea from the late 19th century to contemporary times.

01:574:350 ***North Korea in the Socialist and Postsocialist Worlds (3)***
Examination of social, political, economic, and cultural developments in North Korea before and after the social revolution (1945-1950) that radically transformed it by situating it within the context of regional and global developments.

01:574:360 ***Korean Popular Culture (3)***
This course examines the history of popular music, dance, and performance through the period of Japanese occupation, the Cold War era, and the recent postmillennial decades, while considering their ideological, economic, and socio-political functions, their modes of reception, redeployment, and medium-specific meaning-making operations.

01:574:365 ***Advanced Topics in Korean Languages and Linguistics (3)***
Investigation of topics in the Korean language such as phonology, syntax, pragmatics, language change, and dialect variations.

01:574:380 ***Taste of Korea: Culinary Politics in Contemporary South Korea (3)***
An interdisciplinary introduction to Korean food politics: examines the geo-politics, cultural significance, historical background, and global circulation of Korean culinary culture within the East Asian context and beyond.

01:574:382 ***Imagining Disaster: Korea and the Apocalyptic Modern (3)***
Traces the apocalyptic imagination in Korea from the 1930s to the 2010s. Approaches familiar topics of modern Korean history (such as Japanese colonial occupation, the unending Korean War, postwar industrial development, virtualization of consumer culture) through the apocalyptic lens, and considers how representations of calamity can function as powerful allegories for re-mapping our past, present, and future.

01:574:390 ***Topics in Korean Studies (3)***
Study of special topics in Korean studies at the advanced level.

01:574:392 ***Topics in Korean Studies (3)***
Study of special topics in Korean studies at the advanced level; Topics change per semester.

01:574:420 ***Traditional Korean Poetry: Sijo (3)***
Examination of the most enduring poetic form in traditional Korea, sijo, a three-line verse form written to be performed in a musical setting. Exploration of its unique structural and thematic properties within the larger context of East Asian poetic tradition, and historical developments as well as contemporary transformations.

All readings and classes are in English.

01:574:470 ***Seminar on Modern Korean History (3)***
Designed to introduce advanced undergraduate and graduate students to emerging scholarship and major debates in modern Korean history (since 1876). Topics vary by instructor and semester offered.

01:574:495,496 ***Independent Study in Korean (3,3)***
Independent reading under supervision of a member of the department.
Prerequisites: Permission of instructor and department.

01:574:497,498 ***Honors in Korean (6,6)***
Individualized honors projects for students who have fulfilled all requirements for the minor in Korean or major in East Asian languages and area studies. Both semesters must be completed to receive credit.

Korean 574 (SAS)

Korean Language Courses

Korean Language Courses

01:574:101,102 ***Elementary Korean (4,4)***
Introduction to the sound, grammar, and writing system of modern Korean; practice and exercises in speaking, reading, and writing. Designed for true beginners with no prior knowledge of Korean.
Prerequisite: 01:574:101 or 01:574:105 or equivalent for 01:574:102.

01:574:103 ***Beginning Korean Reading and Writing for Heritage Students (3)***
Development of foundation in Korean grammar and vocabulary. Practice in reading, writing, and oral skills.
Prerequisite: Placement. Credit not given for both this course and 01:574:101 or 01:574:102.

01:574:105,106 ***Online Elementary Korean (4,4)***
Acquisition of basic linguistic and cultural background of the Korean language. Intensive online course that is equivalent to Korean 101 and 102, respectively (01:574:101 and 102).
Credit not given for both 01:574:101 and 01:574:105. Credit not given for both 01:574:102 and 01:574:106. Prerequisite: 01:574:101 or 01:574:105 or equivalent for 01:574:106.

01:574:107, 108 ***Introductory Korean I, II (2,2)***
A sequence of two courses introducing the Korean language. Development of basic skills in speaking, listening, reading and writing in Korean. 01:574:107 is equivalent to the first half of Elementary Korean 1 (01:574:101; 01:574:105); 01:574:108 is equivalent to the second half of Elementary Korean 1 (01:574:101; 01:574:105).
Prerequisite: 01:574:107 or equivalent for 01:574:108.

01:574:201,202 ***Intermediate Korean (4,4)***
Development of oral proficiency, practice in reading comprehension, composition, study of grammar, and vocabulary building.
Prerequisite: 01:574:102 or 01:574:106 or equivalent for 01:574:201; 01:574:201 or equivalent for 01:574:202.

01:574:203 ***Intermediate Korean Reading and Writing for Heritage Students (3)***
Continued study of Korean grammar and vocabulary. Practice in reading, writing, and oral skills.
Prerequisite: 01:574:103 or equivalent. Credit not given for both this course and 01:574:201 or 01:574:202.

01:574:301,302 ***Advanced Korean (3,3)***
Study of advanced vocabulary and grammar through reading texts in various styles. Practice in composition and refinement of oral proficiency.
Prerequisite: 01:574:202 or 01:574:203 or equivalent for 01:574:301; 01:574:301 or equivalent for 01:574:302.

01:574:303, 304 ***Advanced Korean for Business I, II (3, 3)***
Reading and discussion of business, culture, and society; specialized vocabulary, social skills, and practice in business correspondence.
Prerequisite: 01:574:202 or 01:574:203 or equivalent.

01:574:320 ***Korean Translation: Introduction to Practical Translation and Translation Theories (3)***
Practical translation of high-demand materials (medical and legal forms, government and court documents, news articles and headlines, manuals and instructions, and short writings from diverse disciplines), as well as fundamentals of translation theory and its application.
Prerequisite: 01:574:202 or 01:574:203 or equivalent.

01:574:401,402 ***Advanced Readings in Korean (3,3)***
Selected readings from modern Korean materials, including fiction, essays, newspapers, and journal articles. Discussion and some writing exercises.
Prerequisite: 01:574:302 or equivalent.

01:574:410,411 ***Readings in Korean Literature (3,3)***
Selections from representative literary works from premodern to the contemporary period. Exploration of major poetry, drama, and fictional narratives in the context of historical and cultural changes.
Prerequisite: 01:574:302 or equivalent.

01:574:450 ***Korea in Translations: Modern Literature and Film (3)***
Translations as a generative process. Korean literary fiction and poetry of the 20th century and their versions in English translations. Film as another mode of translation with its own language and grammar.
Prerequisite: 01:574:202 or 01:574:203 or equivalent.

01:574:471 ***Korea in Translations: Contemporary Media (3)***
Expository and journalistic writings with attention to contemporary language of the mass media. Broadcast news, documentary films, as well as newspaper and magazine articles, studied and translated into English.
Prerequisite: 01:574:202 or 01:574:203, or equivalent.

01:574:480 ***Korean Interpreting (3)***
Hands-on introduction to practical skills with social, cultural, and ethical components. Role-play with both written and spoken texts, textbook exercises, discussion, and peer evaluation. Required for Certificate in Korean Translation.
Prerequisite: 01:574:202 or 01:574:203, or equivalent.

01:574:481 ***Korean Interpreting Internship (1.5)***
Real-time interpreting assignments in public services settings. Required for Certificate in Korean Translation.
Permission of instructor and department.

01:574:495,496 ***Independent Study in Korean (3,3)***
Independent reading under supervision of a member of the department.
Prerequisites: Permission of instructor and department.

01:574:497,498 ***Honors in Korean (6,6)***
Individualized honors projects for students who have fulfilled all requirements for the minor in Korean or major in East Asian languages and area studies.
Both semesters must be completed to receive credit.

Labor Studies and Employment Relations 575 (SMLR-U)

LABOR STUDIES AND EMPLOYMENT RELATIONS 575

Dean: Adrienne Eaton

Director: Professor Paula B. Voos

Website: http://smlr.rutgers.edu/content/labor-studies-and-employment-relations

The School of Management and Labor Relations' Department of Labor Studies and Employment Relations (LSER) creates and disseminates knowledge about issues related to work, workers, and the employment relationship.

The undergraduate labor studies and employment relations program aims to provide students with an opportunity to learn more about the nature of work, the management of work, the problems of working people, and what workers have done, both individually and collectively, to address those problems.

Its introductory courses offer anyone interested in the world of work (or likely to have a job) the opportunities to develop a realistic view of the dominant institutions, practices, and values of the workforce and to think about how work can be improved.

Intermediate courses enable students to acquire a range of specific competencies useful to employment, labor relations, and human resource specialists. They also allow students to participate in a series of cultural and disciplinary dialogues providing alternative perspectives on work and the wider society.

Advanced courses provide students majoring in labor studies and employment relations with an opportunity to consolidate what they have learned about the nature of work through more in-depth study of a particular topic or topics through either independent work or the senior seminar.

- The bachelor of arts (B.A.) degree in labor studies and employment relations is offered jointly with the School of Management and Labor Relations and Rutgers School of Arts and Sciences.
- The bachelor of science (B.S.) degree in labor and employment relations is granted by the School of Management and Labor Relations.

Both types of majors are eligible to apply for a five-year bachelor of arts/master of labor and employment relations degree program.

See the School of Management and Labor Relations section of this catalog for additional information about the B.A. program in labor studies and employment relations.

Labor Studies and Employment Relations 575 (SMLR-U)

Admission Requirements to the Bachelor of Arts in Labor Studies and Employment Relations

Admission Requirements to the Bachelor of Arts in Labor Studies and Employment Relations

Students in this degree program must be admitted to the major as well as Rutgers School of Arts and Sciences. There is no deadline for admission to the major, but students should apply as soon as possible. Students may take individual courses, or complete a minor offered by the school, without being admitted.

Admission involves completing the application, writing a one-page application letter explaining why the applicant wishes to pursue a labor studies and employment relations major, having earned a 2.0 grade-point average or better in college work taken to date, and having demonstrated an adequate academic record in the introduction to labor studies course or the work, society and the quality of life course.

Please contact Amaila (Amy) Marchitto, student adviser, at amarchitto@smlr.rutgers.edu.

Academic Policies and Admission Requirements for the Bachelor of Science in Labor and Employment Relations

Academic Policies and Admission Requirements for the Bachelor of Science in Labor and Employment Relations

This program is designed to accommodate the needs of transfer and nontraditional students. For admissions procedures please visit: http://smlr.rutgers.edu/content/transferring-smlr.

The academic and other regulations established by the faculty and administration of the School of Management and Labor Relations and the Board of Governors of the university are subject to amendment at any time. Questions related to general student rules that fall under the jurisdiction of the School of Management and Labor Relations may be directed to the appropriate program. It is the responsibility of the student to remain in communication with the director of the program for which he or she is matriculated.

Labor Studies and Employment Relations 575 (SMLR-U)

Online Bachelor of Science Program

Online Bachelor of Science Program

The School of Management and Labor Relations' online program for the bachelor of science (B.S.) degree in labor and employment relations (LER) is perfectly suited for highly motivated, independent students who are seeking the convenience of distance learning. A typical online learner is self-directed, self-motivated, and organized in his or her approach to studying. This program is ideal for adult learners.

All 36 credits needed for the B.S. degree in LER can be completed exclusively online or through a combination of online and live courses. In order to complete the degree solely online, students must be sure they have completed Rutgers' general education requirements since some requirements may not be available from Rutgers online, particularly 01:355:101 Expository Writing. An associate's degree will typically suffice.

Students must ensure that they have the appropriate computer requirements needed to fulfill their work. Academic requirements individual courses in LER are identical for both the online and in-person versions. Online learners will not be segregated into a separate cohort.

Please note that not all online courses are the same. Classes and experiences will vary, as it does with in-person class sessions. Students' course responsibilities using this learning venue require the same, if not more, commitment than traditional courses. In turn, students will learn as much or more than what they would learn in a traditional class.

For more information on the online program for the B.S. degree in LER, visit the school's website.

Labor Studies and Employment Relations 575 (SMLR-U)

Major Requirements of the B.S. and B.A. Degrees

Major Requirements of the B.S. and B.A. Degrees

Bachelor of Science (B.S.) in Labor and Employment Relations

The major consists of 36 credits in labor studies and employment relations. Students must attain a grade of C or better for a class to count toward the major. In place of 6 of these credits, students may substitute related courses from other social science programs. Departmental approval is required for courses from other universities; a list of Rutgers University-New Brunswick courses is available from the department.

A complete list of requirements is available in the School of Management and Labor Relations section of this catalog or by contacting the department.

The following five courses are required in the B.S. program:

- 37:575:100 Introduction to Labor Studies or 37:575:110 Work, Society, and the Quality of Life
- 37:575:315 Employment Law
- 37:575:401 Research Methods in Labor Studies, 37:575:402 Research Corporations and Industries, 37:575:403 Problem-Solving Tools at Work, 37:575:404 Creating and Administering Surveys, or an alternative research methods/statistics from other programs;
- 37:575:395 Perspectives on Labor Studies
- 37:575:490, 496, or 497 an internship; this course will be waived for students with work experience and they will take another major elective in its place.

General education requirements for the B.S. degree:

The School of Management and Labor Relations is fully compliant with the Lampitt Law requiring that all individuals who have earned an associate in arts (A.A.) or an associate in science (A.S.) degree from a New Jersey county college will have fulfilled its general education requirements. For others, the requirements are:

- Writing and Communication: 6 credits. Expository Writing (01:355:101) plus a second class that involves writing with revision. See Degree Navigator for a list of approved second-level writing courses.
- Quantitative Reasoning: 6 credits. One course in mathematics or applied quantitative reasoning plus the major requirement of a 3-credit course in research methods/statistics. See Degree Navigator for lists of courses in each.
- Natural Science and Technology: 6 credits
- Arts and Humanities: 3 credits
- History: 3 credits
- Diversity: 3 credits
- Social Science: 3 credits (automatically filled by courses in the major)

Bachelor of Arts (B.A.) in Labor Studies and Employment Relations

The major consists of 36 credits in labor studies and employment relations. Students must maintain a grade of C or better. In place of 6 of these credits students may substitute related courses from other programs. (A list of these courses is available from the department).

The following three courses are required in the B.A. program: either 37:575:100 Introduction to Labor Studies and Employment Relations or 37:575:110 Work and Society; 37:575:395 Perspectives on Labor Studies; and at least one advanced capstone course or internship, chosen from 37:575:401, 402,403, 404, 450, 490, 494, 495, 496, 497, 498, or 499.

Concentrations in the major are available but not required. These include:

- Law and the Workplace
- Diversity in the Workplace
- Work Organization and Management
- Labor Unions and Social Movements
- Work, Globalization, and Migration

A list of courses required for each concentration is available from the department.

Labor Studies and Employment Relations 575 (SMLR-U)

Minor Requirements

Minor Requirements

The general minor in labor studies and employment relations consists of six courses offered by the department, for a total of at least 18 credits. Students must take either Introduction to Labor Studies and Employment Relations (37:575:100) or Work, Society, and the Quality of Life (37:575:110). Students must have a C or better in

a course for it to count toward the minor. Minor options are available that parallel each of the concentrations in the major. Each involves taking Introduction, four courses from the concentration, and one elective course from the remaining courses offered by the department; details are available from the department website.

Labor Studies and Employment Relations 575 (SMLR-U)

Departmental Honors Program

Departmental Honors Program

To qualify, a student must have completed 18 credits in labor studies and employment relations. The student also must have attained a cumulative grade-point average of 3.0 or better and a grade-point average of 3.4 or better in the major. After earning 90 credits, the student should formally apply to the director. Candidates who are accepted are required to complete a research project under the direction of a faculty member, culminating in a written honors paper, and are examined orally on their project by a faculty honors committee.

Additional information can be found on the department's website.

Labor Studies and Employment Relations 575 (SMLR-U)

Courses

Courses

7:575:100 ***Introduction to Labor Studies and Employment Relations (3)***
Work, workers, and organizations that represent employees; class, race, gender, and work; legal, labor market, and human resource issues.
Students must complete either 100 or 110 for the major or minor. Students may not count both toward the major.

37:575:110 ***Work, Society, and the Quality of Life (3)***
Work, social class, diversity, and economic opportunity in the context of globalization; civic engagement and collective action to promote opportunity and social justice for all people.
Students must complete either 100 or 110 for the major or minor. Students may not count both toward the major.

37:575:191,192,193 ***Short Topics on Work (1 each)***
Brief examination of selected issues with regard to work at a level suitable for first-year college students, as well as those at a higher level of academic preparation. Topics to be announced.

373:575:201 ***U.S. Labor and Work before the End of Reconstruction (3)***
History of work, economic organization, and labor in the United States. Free and slave labor. Early labor unions and movements in the American context.

37:575:202 ***History of Labor and Work in the U.S. 1880-1945 (3)***
Changes in work, its organization, and the public policy context. History, philosophy, structure, activities, and impact of U.S. labor unions.

37:575:203 ***Work and Labor History from 1940 to the Present in the U.S. (3)***
Developments in work, labor organizations, and related social movements. Relationship of labor movements to the changing economic, social, and public policy context, including increasing globalization.

37:575:207 ***New Jersey Labor History (3)***
Workers movements in New Jersey, both local and statewide; their relationship to U.S. labor and working-class history from the earliest period to today.

37:575:215 ***Youth and Work (3)***
Youth in the U.S. labor market; working students, internships, and unpaid work; job-hopping; and other contemporary concerns. Policies and practices to improve outcomes.

37:575:220 ***Law for Business and Nonprofit Organizations (3)***
Overview of legal essentials for organizations; contracts; torts; organizational forms; property rights; cyber-law; bankruptcy; agency; criminal law; basics of employment/labor law.

37:575:230 ***People, Work, and Organizations (3)***
Contemporary organizational transformations forming the context for how people are managed at work; decline of bureaucracy and predictable internal careers; growth of flexible, knowledge-based systems.

37:575:250 ***Finance for Personal and Professional Success (3)***
Overview of core financial concepts and techniques useful both at work and in personal life; interest, credit, insurance, investments, present value, and net worth.

37:575:265 ***Introduction to Disability Studies: History, Rights, Justice, and Inclusion (3)***
Introduces perspectives on disability and its relationship to politics, employment, law, media, arts, sports, and built environments, focusing on creating social and economic change.
Previously listed under 37:575:365 Disability, Work, and Society

37:575:294 ***Avoiding Sexual Harassment (1)***
Legal, organizational, and social dimensions of sexual harassment in the workplace; power, gender roles, homophobia, and failed romance; effective prevention or response.

37:575:295 ***Workplace Violence (1)***
Causes, consequences, and prevention of physical violence in the American workplace. Organizational policies that preserve the rights and well-being of all employees.

37:575:297 ***Religion in the Workplace (1)***
Contemporary workplace issues stemming from employee religious diversity. Employee rights, accommodation and inclusion; dominant group privilege, prejudice, discrimination; and organizational responses to religious diversity.

37:575:298 ***Social Media in the Workplace (1)***
Issues for organizations and employees stemming from the increased use of social media by individuals. Hiring discrimination, professional image, collective action, ethics, and other concerns.

37:575:300 ***Writing in Labor Studies and Employment Relations (3)***
Construction of a well-written argument in labor studies and employment relations; application of sound writing principles to contemporary labor policy issues; intensive practice.

37:575:301 *Labor and Democracy (3)*
Labor as a worldwide social and political movement; comparative and historical consideration of how labor can achieve influence in market economies and a better standard of living.

37:575:302 *Comparative Social and Employment Policy (3)*
Overview of such policy in wealthy democracies; the relationship between state and market; varieties of capitalism and welfare states; social safety nets; family policy; labor movements' role.

37:575:303 *Black Workers in American Society (3)*
Examination of the historical relationships between African-American workers and the American labor movement; analysis of problems facing Black workers in the workplace.

37:575:304 *Comparative Employment Relations in Wealthy Nations (3)*
Employment relations systems in wealthy nations; corporate governance; social welfare; global and national labor standards; union-management relations; work organization; labor politics.

37:575:307 *Latino Workers in the U.S. (3)*
Role of Latino workers in U.S. society and the U.S. economy; impact of the new migration on the U.S. labor market and social policy.

37:575:308 *Dynamics of Work and Work Organizations (3)*
Examination of the social dynamics of economic institutions and their corresponding work relations; corporate organization and union structure; selected problems of technological change; human relations in industry and the changing bases of managerial authority.

37:575:309 *Working Women in American Society (3)*
Focus on the contemporary experience of working women, including an exploration of current legal strategies and social policies created to address their concerns.

37:575:310 *Labor Relations in Professional Sports (3)*
Labor relations systems in professional sports in the United States; unique institutional aspects and common features of union-management and employee relations.

37:575:311 *Organizational Design and Structure (3)*
New and old methods of organizing work and organizations ranging from hierarchical bureaucracy to contemporary models emphasizing teamwork and/or flatter or networked structures.

37:575:312 *Conflict and Conflict Resolution in the Workplace (3)*
How people resolve work-related grievances: bargaining, grievance procedures, mediation, arbitration, demonstrations, strikes, and industrial violence. Examines union and nonunion workplaces.

37:575:313 *New Technology and Work (3)*
Impact of new technology on work, workers, and society. Emerging technologies like digital platforms, algorithmic hiring, artificial intelligence, and practices like gig jobs.

37:575:314 ***Collective Bargaining (3)***
Comprehensive study of the development of collective bargaining; the nature and scope of contracts; the changing character of collective bargaining processes through negotiation, legislation, the courts, and arbitration; the substantive issues in bargaining, including the implications for public policy.

37:575:315 ***Employment Law (3)***
Overview of employment at-will and its limitations; wages and hours; medical/family leave; privacy; drug testing; workers compensation; and fundamental antidiscrimination law.
Required course for the B.S. in labor and employment relations program (not a required course for the B.A. program).

37:575:316 ***Employment Discrimination Law (3)***
Legal, regulatory, and public policy approaches to employment discrimination of all types; Title VII, ADA, ADEA, relevant N.J. laws, and related court decisions.

37:575:317 ***Contingent and Nonstandard Work (3)***
Issues arising from employment relationships that have nonstandard aspects; temporary, leased, or part-time employees; independent contractors and owner-operators.

37:575:319 ***Leadership and Governance of Labor Unions (3)***
Leadership of all types of labor organizations. Internal management; union politics; relationships with other organizations; use of media; and other key leadership issues.
Prerequisite: 37:575:100 or 110, or permission of the instructor.

37:575:320 ***Immigration and Public Policy (3)***
Immigration and immigrant workers in American society and related public policy debates; history; immigrants in unions and community organizations.

37:575:321 ***Immigration Law and Employment Rights (3)***
Contemporary immigration law in the United States; employer compliance issues; employee rights; immigrant employee representation; and related policy debates.

37:575:322 ***American Labor Unions in Politics (3)***
Role of the labor movement in the political process from the New Deal to the present, including an analysis of its ideology, its legislative agenda, its political action, and its impact on public policy.

37:575:325 ***Economics of the Employment Relationship (3)***
Fundamentals of labor economics. Economic dimensions of public policies and human resource administration.

37:575:326 ***Negotiation Concepts and Techniques (3)***
Negotiation strategy and tactics; interests and interest-based bargaining, rights, power, leverage, concessions, commitment; application of theory in various work-life contexts; negotiation skill development.

37:575:330 ***Working Women and the Law (3)***
Survey of law affecting women as employees: antidiscrimination, OSHA, and other laws. How law relates to advancement opportunities for women, the glass ceiling, and employer behavior.

37:575:335 ***Women and Labor Movements: A Global Perspective (3)***
How labor movements around the world are addressing such issues as pay equity, equal opportunity, sexual and racial harassment, work-life balance, and women's leadership.

37:575:336 ***Employment Relations in Emerging Economies (3)***
Changing employment relations systems in nations that are rapidly industrializing; focus on labor movements; labor-management relations; labor standards and public policy.

37:575:337 ***Workers and Multinationals in Global Perspective (3)***
Impact of multinationals and global value chains on workers in developing nations. Issue of labor standards; corporate social responsibility; international labor organizations; and regulatory approaches.

37:575:338 ***Occupational Safety and Health (3)***
Federal and state regulatory laws and enforcement; the basic issues involved in safety and health at the workplace; and worker, union, and employer response to the issues.

37:575:340 ***American Labor Law (3)***
Examination of the present legal arrangements governing the conduct of labor relations in the United States; historical development and impact of common law, legislative statutes, and court decisions on the growth of the labor movement.

37:624:345 ***Organizational Behavior and Work (3)***
Behavior by individuals and groups in the workplace; group and intergroup dynamics; organizational culture, structure, and change; leadership, employee motivation, job performance, and feedback.
Previously listed under 37:575:345

37:624:348 ***Leadership in the Workplace (3)***
Leadership in work organizations, including unions, nonprofit, and businesses. Key leadership issues in small groups and large organizations; diversity concerns; leadership development.
Previously listed under 37:575:318 Leadership in Work Organizations

37:575:350 ***Public Sector Collective Bargaining (3)***
Study of employer-employee relations in the public sector; federal executive orders and state and municipal legislation regulating public employers and employee organizations; procedures for bargaining unit certification, representation, and recognition; dispute resolution techniques.

373:575:355 ***Current Labor Problems (3)***
A selected number of labor and employment issues that have particular relevance in contemporary society.

37:575:357 ***Social Movements, Social Change, and Work (3)***
The theory and practice of social movements and social change, particularly those related to work; the prospects for current and future mobilization.

37:575:359 ***Organizing for Social Change (3)***
Theory and practice of community organizing for social change for labor and community groups; membership building; leadership development; strategy development; community power analysis; campaign planning.

37:575:360 ***Union Organizing (3)***
Introduction to and critical analysis of union-organizing strategies and tactics.

37:575:361 ***Labor and Corporate Restructuring (3)***
Study of how management efforts to decentralize organizational structures and reduce employment levels affect industrial relations, work and workers, skill levels and training needs, and productivity and the macro-economy.

37:575:362 ***The Work-Education Connection (3)***
What do workers need to know to be prepared for the jobs being generated by the global economy? How do the American secondary and higher education systems prepare workers for changing jobs?

37:575:363 ***Labor and the Global Economy (3)***
Changes in the global economy and their effects on the living standards and bargaining power of American workers and their unions. Alternative strategies for dealing with globalization.

37:624:364 ***Diversity in the Workplace (3)***
Focuses on how the increasing demographic diversity of American workplaces affects social relations, cultural dynamics, and organizational effectiveness.
Previously listed under 37:575:364

37:575:366 ***Asian-American Workers in a Global Context (3)***
Social structures affecting Asian-American workers; contemporary and historical immigration policies; stereotypes and other problems; racialized employment; inequality and achievement; differences by nation origin.

37:575:367 ***Emotional Intelligence in the Workplace (3)***
Nature of emotional intelligence and its effects on employee performance and organizational success; research on development of emotional intelligence; self-awareness and self-development.

37:575:368 ***Professional Development Strategies (3)***
Best practices in professional development; organizational strategies for addressing employee retention, work/life balance, wellness, communication, and other matters related to employee development.

37:575:375 ***Benefits and Social Insurance (3)***
Overview of benefits with a focus on social insurance systems, health insurance, and pensions. Relevant issues for employers, employees, unions, and public policy.

37:624:376 ***Corporate Governance, Power, and Control (3)***Corporate governance and the impact of corporations on society; boards of directors; executive compensation; principal-agent/stakeholder theories; issues for labor and the public.
Previously listed under 37:575:376

37:575:377 ***Democratic Workplaces (3)***Democracy within the firm, employee ownership, and co-ops; approaches to economic democracy; political and economic theory; case studies; and related career tracks.

37:575:378 ***Solving Labor Problems through Social Entrepreneurship (3)***
Concepts and skills for starting nonprofit organizations or businesses addressing problems of employees and their families; innovative business models; venture plans; critical and supportive perspectives.

37:575:385 ***Finance for Organizational Leadership (3)***
Quantitative financial and accounting techniques in organizations used for cost analysis and performance decisions. The class is for nonfinancial leaders in profit and nonprofit organizations.

37:575:391,392,393,394 ***Issues in Work (1 each)***
Brief examination of selected issues in labor and employment relations. Topics to be announced.

37:575:395 ***Perspectives on Labor Studies (3)***
In-depth study of the classic works on the nature of labor, the relationship of work to other social functions, and the relationship between workers and management.
Open only to majors who have completed at least 15 credits of labor studies coursework.

37:575:396,397 ***Concerns at Work (2 each)***
Examination of contemporary issues related to work; topics to be announced.

37:575:401 ***Research Methods in Labor Studies (3)***
Overview of both quantitative and qualitative research methods commonly used in the study of labor problems.

37:575:402 ***Research Corporations and Industries (3)***
Overview of methods used to investigate the competitive situation/prognosis of an industry's employers, profitability, sales, employment, wages, and unionization; strategic corporate research.

37:575:403 ***Problem-Solving Tools at Work (3)***
Applied analytical and statistical tools for solving problems at work, surveying employees, and maintaining quality. Projects are individual/group and spreadsheet-intensive.

37:575:404 ***Creating and Administering Surveys (3)***
Issues for online, mail, telephone, and in-person surveys given their intended use. Samples: item construction; scaling; measurement validity and reliability; improving response rates; ethical research.

37:575:407 ***Workers' Movements in New Jersey (3)***Examination of workers' movements at state and local levels in New Jersey, using library resources, interviews, participant observations, and movement archives. Research results document the development of the New Jersey labor movement.

37:575:450 ***Senior Seminar in Labor Studies (3)***
In-depth study of a labor studies topic. Intensive reading and discussion designed to integrate student experiences in the labor studies major. Topics vary.
Open only to labor studies majors with senior standing, except by special permission.

37:575:490 ***Internship in Labor Education (BA)***
Students work under the supervision of individual faculty members and other experienced labor educators to develop and/or teach courses and workshops.
Prerequisite: Permission of instructor.

37:575:480,481,491,492,493 ***Topics in Labor Studies (3 each)***
In-depth examination of particular topics concerning work organization, worker problems, or worker organizations.

37:575:494,495 ***Independent Study and Research (BA,BA)***
An individual reading and research project under the guidance of a labor studies faculty member on a topic of interest to the student.
Prerequisite: Departmental permission.

37:575:496,497 ***Internship in Labor Studies (BA,BA)***
Students work as staff members in a union or labor-related organization (public or private), in an industrial relations unit in private industry, or as employees in a position that permits observation of, and participation in, a labor union at the grassroots level. Allows students to apply conceptual knowledge learned in the classroom to actual situations and to acquire new skills and knowledge.
Prerequisite: Departmental permission.

37:575:498,499 ***Honors in Labor Studies (BA,BA)***
An individual research and reading project under the guidance of a member of the department.
Prerequisite: Departmental permission.

Landscape Architecture 550 (SEBS)

LANDSCAPE ARCHITECTURE 550

Degree: B.S.L.A.

Director: Holly Grace Nelson (Holly.Nelson@rutgers.edu)

Program Webpage: http://landarch.rutgers.edu/landscape-architecture-program

Managing Department Webpage: http://landarch.rutgers.edu/index.html

Landscape Architecture is the planning and design of outdoor environments at the residential, city, and regional scale. The program engages students in art, science, theory, and practice with a commitment to equitable, sustainable, and resilient solutions that contribute to human and environmental health and well-being.

Our nationally accredited program prepares students for Landscape Architecture licensure through a creative, analytic, and interdisciplinary approach to stewardship of the environment. Set in the School of Environmental and Biological Sciences, the program examines the ideas shaping the interaction of people and landscape and integrates scientific knowledge creatively in the designed environment. Interdisciplinary courses with environmental planning students provide a mutual foundation for both majors, promote collaboration between programs, and sets the groundwork for professional practice where landscape architects are part of or lead interdisciplinary teams of planners, engineers, ecologists, and social scientists.

The program also has a Minor in Landscape Design for students interested in
exploring design solutions to the environmental issues of our time--climate change, demographic shifts, increasing income inequality, food scarcity, and the spread of global pandemics to make our world more sustainable, viable, just, healthy, inclusive, and beautiful.

Learning Goals

Learning Goals

Our Program's Learning Goals

Explore . . . the potential of space and spatial relationships to create socially vibrant and culturally inclusive design solutions.

Analyze . . . and thoughtfully incorporate natural features and systems to create enduring and ecologically sensitive design solutions.

Understand . . . social, cultural, and behavioral factors in the historical development of designed and everyday landscapes to equitably shape our public realm.

Master . . . technical and industry standards to effectively and sustainability foster safe accessible environments using the materials, methods, and technologies of site design and engineering.

Apply . . . design principles at large as well as small scales.

Demonstrate . . . knowledge of the professional practice skills required for the Landscape Architecture Accreditation licensure exam and manifest sensitivity to issues of power.

Communicate . . . creatively with the public, communities, and policymakers in graphic, written, and verbal formats to advance social justice

Landscape Architecture 550 (SEBS)

Graduation Requirements for the Major

Graduation Requirements for the Major

For an up-to-date description of the landscape architecture major requirements, courses, and course sequences please refer to the program webpage at http://landarch.rutgers.edu/landscape-architecture-program.

SEBS UNDERGRADUATE CORE CURRICULUM (39 credits)

Contemporary Challenges (6 credits) *Two courses, one in each of the Contemporary Challenges areas: Diversities and Social Inequalities* [CC-D] *and Our Common Future* [CC-O]

Experiential Learning (3 credits) *Students must participate in a certified experience that meets this goal* [EL]

Natural Sciences (6 credits) *Students must take two courses, one each in two of the following areas: physical, biological, or environmental sciences* [NS]

Historical Analysis (3 credits) *Students must take one course* [HST]

Social Analysis (6 credits) *SEBS students must complete two courses, one in either social/cultural analysis or economic analysis, and one in governmental and regulatory analysis [SCL]*

Arts and Humanities (3 credits) *Students must complete one course* [AH]

Writing and Communication (6 credits) *Students must take 01:355:101 or its equivalent* [WC] *and one course that fulfills the learning goal, communicate effectively in modes appropriate to a discipline or area of inquiry* [WCD].

Quantitative and Formal Reasoning (6 credits) *Students must take two courses* [QQ; QR]

Graduation Requirements: Major in Landscape Architecture (550)

No more than one course with a grade equal to D may be used from (landscape architecture courses) in any requirements or conditions.

Year 1

11:460:100* Planet Earth or 01:450:101 Earth Systems

01:640:115* Pre-Calculus or 11:640:111 and 11:640:112 or 11:640:135 or 11:640:139 or 11:640:151

11:573:231 Fundamentals of Environmental Planning

11:550:237* Landscape Drawing and Drafting

11:550:133* Architectural Design

Core requirements (contemporary challenges, writing, economics, social analysis). (See also http://landarch.rutgers.edu/courses.html for core classes met by major requirements.)

Year 2

11:550:231	11:550:232
11:550:241*	11:573:232
11:550:233	11:573:233
11:119:103*	11:550:341
	11:550:345, 11:550:347

Year 3

11:550:331	*11:550:332*
11:550:250*	11:550:340

11:216:332	11:550:301* or Theory Elective (see DN List)
or 11:216:101	
11:550:350	Plant/Ecology Elective (see DN List)

Year 4

11:550:431	11:550:432 or 11:550:333 or 11:550:443
11:550:441	11:550:435
Electives	11:550:499

*Meets core requirement

Classics (SAS)

CLASSICS

(Classical Humanities 190, Greek 190b, Greek and Latin 190c, Latin 190d)

Department of Classics, School of Arts and Sciences

Website: Here

Chair: Serena Connolly

Undergraduate Director: Emily Allen-Hornblower

Distinguished Professor:

Thomas J. Figueira, B.A., Fordham; Ph.D., Pennsylvania

Professors:

T. Corey Brennan, B.A., Pennsylvania; M.A., Oxford; Ph.D., Harvard

Serena Connolly, B.A., Cambridge; M.A., Ph.D., Yale

James McGlew, B.A., M.A., Ph.D., Chicago

Azzan Yadin-Israel, B.A., Hebrew; Ph.D., California (Berkeley) and Graduate Theological Union

Associate Professors:

Emily Allen-Hornblower, B.A., Sorbonne, École Normale Supérieure; M.A., Ph.D., Harvard

Timothy Power, B.A., Yale; M.A., Ph.D., Harvard

Assistant Professors:

Bice Peruzzi, B.A., Perugia (Italy); M.A., Padova (Italy); M.A., Ph.D., Cincinnati

Jeffrey Ulrich, B.A., Rutgers; M.A., Ph.D., Pennsylvania

Associate Teaching Professor:

Kristina Chew, B.A., Princeton; Ph.D., Yale

John Fisher, B.A., Kean College; M.A., Richard Stockton College; Ph.D., Princeton¿

Assistant Teaching Professors:

Salam Al Kuntar, B.A., Damascus University; M.A., University of Liverpool; Ph.D., University of Cambridge

The department offers a major in classics with options in classical humanities, Greek, Greek and Latin, and Latin. Selected courses in history, philosophy, and art history also may count for credit toward the classics major. Students with a strong interest in ancient history may pursue the ancient history and classics option within the history major (see the history section of this catalog). Minors are offered in ancient Greek, Latin, and classical humanities. For more information, consult the departmental website.

Classics (SAS)

Learning Goals

Learning Goals

See here.

- Classics is a broad discipline, characterized by its interdisciplinary nature. Pursuing classics means acquiring fundamental language skills in ancient classical languages (Greek, Latin, and, to a lesser degree, Sanskrit), along with a wide-ranging knowledge of the ancient world.
- Studying classics involves coming to grips with the ancient Greek and Roman civilizations: their myths and literature; their social, military, political, and cultural history; their philosophy; and aspects of their material culture. At every stage, students are led to reflect on the many connections of classics to the modern world, and how these ancient civilizations contributed to shape it.
- As many other humanities disciplines do, classics combines language study with the exploration of questions central to many social sciences. Classics students are led to ponder the mechanisms of human psychology, social organization, and historical evolution, and given an opportunity to appreciate the ways in which the individual and the community relate to, shape, and affect one another.

Classics (SAS)

Major Requirements

Major Requirements

Classics majors choose one of four options. Those who wish to concentrate on one or both ancient languages may choose an option in ancient Greek and Latin, ancient Greek, or Latin. The classical humanities option is for those who wish to pursue a general study of the history, literature, and culture of the classical world. All courses applied to the major must be completed with a grade of C or better.

Classical Humanities Option (Classical Humanities 190). A major who pursues the classical humanities option must complete 36 credits in the department. (Credits from approved classical humanities courses in other departments may be counted among these, as well as courses with a 190, 490, or 580 subject code.) The following are required of every classical humanities major: 1) one course in the Greek or Latin language at the 200 level or above; 2) at least six courses at the 300-level or above.

Greek Option (Greek 190b). A student majoring in classics with emphasis on Greek must take 35 credits in the department, of which 26 credits must be in the ancient Greek language (including at least six courses at the 300 level or above).

Greek and Latin Option (Greek and Latin 190c). A student majoring in classics with emphasis on Greek and Latin must take 35 credits in the department, of which at least 29 credits must be in the ancient Greek and Latin languages. The credits may be distributed between the two languages, but at least 11 credits must be taken in each language. At least six courses must be at the 300 level.

Latin Option (Latin 190d). A student majoring in classics with emphasis on Latin must take 35 credits in the department, of which at least 26 credits must be in the Latin language (including at least six courses at the 300 level or above).

Classics (SAS)

Minor Requirements

Minor Requirements

Classics minors choose one of three options. Those who wish to concentrate on one of the ancient languages may choose an ancient Greek or Latin minor. The classical humanities minor is for those who wish to pursue a general study of the history, literature, and culture of the classical world. All courses applied to the minor must be completed with a grade of C or better.

Classical Humanities (190). A minor in classical humanities requires a minimum of seven courses in the department. (Credits from approved classical humanities courses in other departments may be counted among these, as well as courses with a 190, 490, or 580 subject code.) Of these seven courses, at least three courses must be at the 300 level or above.

Latin (580). A minor in Latin requires a minimum of six courses in the Latin language, including three at or above the 300 level.

Greek (490). A minor in ancient Greek requires a minimum of six courses in the Latin language, including three at or above the 300 level.

Classics (SAS)

Teacher Certification

Teacher Certification

Classics majors interested in earning eligibility for teacher certification (K-12) in New Jersey should contact advisers in the Graduate School of Education and in the Department of Classics in their first year, or as soon as possible thereafter.

Classics (SAS)

Departmental Honors Program

Departmental Honors Program

Honors in Classics may be earned by eligible students who wish to write a senior thesis with the help of an adviser. To qualify, students must have a cumulative grade-point average (GPA) of 3.2 or better and a GPA of 3.6 or better in the major at the end of their junior year. At that time, students should complete the required application form, before the deadline of May 2 of their junior year. See the classics website under Honors & Glory for the honors thesis application form.

Note: Students writing theses must enroll in 01:190:495, 496 (8 credits total) in their senior year. Students who are interested in a topic that spans more than one academic discipline should consider the School of Arts and Sciences interdisciplinary honors thesis option: Here.

Honors in Classics may also be earned by classics majors who:

1. Maintain a 3.5 in the major

2a. Have earned 12 credits at the 300 level or above in Greek OR Latin courses

OR

2b. Have earned 6 credits in BOTH Greek and Latin at the level of 300 or above

3. Submit two papers representative of their work in classics (they may be revised versions of class papers), which a panel of two faculty members deem worthy of honors using the rubric that we have developed for senior assessment purposes.

4. Sit for a sight translation exam in the spring of senior year and pass with honors

To be eligible for honors without a thesis, the grades in the Greek and Latin courses must be at an average of 3.5 or above; for high honors, 3.7 or above; for highest honors, 3.9 or above. Highest honors will be reserved for those students who, in addition to meeting the GPA requirement, have performed at the highest level on the sight exam and paper requirement. Students should inform the undergraduate director by the fall of senior year if they would like to be considered for honors in the major.

Classics (SAS)

Courses in Classical Humanities (190)

Courses in Classical Humanities (190)

Courses in classical humanities are open to students without a knowledge of the Greek or Latin language.

01:190:101 ***Word Power (3)***
Systematic study of the basic Greek and Latin derivatives in English. Emphasis is on Greek and Latin elements in current scientific and literary use.

01:190:102 ***Medical Terminology (1.5)***
Systematic study of scientific terminology based on ancient Greek and Latin elements, with emphasis on the field of medicine.
May be taken concurrently with 01:190:101.

01:190:200 ***Ancient Near East (3)***
Origins and development of the societies of Mesopotamia, Egypt, Asia Minor, and Palestine, through the period of the Persian Empire.
Credit not given for both this course and 01:563:200, 01:508:200, or 01:685:200.

01:190:201 ***Ancient Greece (3)***
Civilization of the eastern Mediterranean world in ancient times, with emphasis on the origins of Western civilization and the Greek contribution to Western culture.
Credit not given for both this course and 01:510:201.

01:190:205 ***Greek Civilization (3)***
Survey of Greek thought and literature. Readings include Homer, the lyric poets, the Athenian dramatists, and selected readings from historians and philosophers. Artistic material may be included.

01:190:206 ***Roman Civilization (3)***
Surveys Roman thought and literature. Readings include Virgil, Ovid, Livy, Cicero, Tacitus, and Petronius. Artistic material may be included.

01:190:207 ***Greek and Roman Mythology (3)***
Examination of the nature, meaning, and continued vitality of the principal classical myths through reading, lectures, and slide presentations.

01:190:208 ***Philosophy of the Greeks (3)***
Introduction to the major philosophical thinkers of the ancient Greek world with special emphasis on Plato and Aristotle.
Credit not given for both this course and 01:730:208.

01:190:209 ***Ancient Rome (3)***
The Roman Republic and the empire, with emphasis on the rise and decline of a Mediterranean world civilization under Roman leadership.
Credit not given for both this course and 01:510:202.

01:190:211 ***Greek and Roman Religion (3)***
Study of pagan gods and goddesses, and cults and practices of the classical Greek world, Roman Republic, and Roman Empire.

01:190:212 ***Classical World in Film (3)***
Survey of film depictions of the classical world of Greece and Rome, with readings from literary, historical, and critical sources. Topics include "sword and sandals" genre and its history; parallels between America and Greece/ Rome; spectacle and empire; and the uses of history in popular historical films.

01:190:213 ***Science and Technology in Ancient Greece and Rome (3)***
Explores the nature and development of science in ancient Greece and Rome, focusing on medicine, biology, physics, and mathematics.

01:190:214 ***Sexuality in Ancient Greece and Rome (3)***
Investigates how the ancient Greeks and Romans categorized, depicted, and reacted to different sexual behaviors and identities through the study of visual and literary sources ranging from Homeric Greece to Imperial Rome.

01:190:215 ***Introduction to Greek and Roman Archaeology (3)***
Introductory survey of the archaeology, architecture, and material culture of the Mediterranean world from the Bronze Age throughout the transformation of the Roman Empire following the reign of Constantine. Consideration given to chronological developments, Greek and Roman artistic production in its social and cultural settings, and Classical Art.
Credit not given for this course and 01:070:113.

01:190:220 ***Greek Food from Antiquity to Today (3)***
Food and foodways of Greek-speaking peoples from ancient times to the present, with special emphasis on problems of continuity and change.
Credit not given for this course and 01:489:220, 01:510:222, 01:685:220, or 667:220.

01:190:251 ***Papal Rome and Its People, 1500-Present: A Select History (3)***
Case-study approach toward select aspects of the social, cultural, intellectual, and political history of the early modern and modern popes, with a particular focus on their relationship to the city of Rome. Highlights the reign of Pope Gregory XIII Boncompagni (1572-1585) and Gregory XV Ludovisi (1621-1623), and their subsequent family history to the present day.
Credit not given for both this course and 01:556:251.

01:190:254 ***The Presocratic Philosophers (3)***
Introductory survey of the Presocratic philosophers. Emphasizes exposure to the teachings of these thinkers through the remaining fragments, while also engaging scholarly writings that introduce and contextualize the sources.
Credit not given for this course and 01:730:254.

01:190:300 ***Greek and Roman Slavery (3)***
Social, economic, legal, and political aspects of slavery in ancient Greece and Rome. The sources and numbers of slaves, forms of servitude, manumission, and slave labor.

01:190:301 ***Food and Drink in the Ancient World (3)***
This course provides students an opportunity to understand the social history of the ancient Mediterranean world through an exploration of the production, preparation, and consumption of food and drink and (re)presentations of them in word and image.

01:190:303 ***Hellenistic World (3)***
Expansion and development of Greek culture from Alexander through the successor kingdoms in Greece, Egypt, Syria-Palestine, and Asia Minor.
Credit not given for both this course and 01:510:303.

01:190:305 ***The Crisis of the Roman Republic (3)***
Roman political, social, and cultural history during the crisis of the late republic from 133 BC.

01:190:306 ***Roman Empire (3)***
Political, social, and intellectual developments of the imperial period until the age of Constantine, with emphasis on the first two centuries AD.
Credit not given for both this course and 01:510:306.

01:190:309 ***Greek and Roman Athletics (3)***
Examines the ideology and cultural context of ancient athletic competition. Topics include the Olympic and other Panhellenic games, Roman chariot racing and gladiator combat, and women athletes.

01:190:310 ***Augustan Rome (3)***
The cultural renaissance under Augustus (44 BC-AD 14): the writings of Virgil, Horace, Livy, Ovid, and the elegiac poets; the building program at Rome; and artistic trends.
May be jointly taught (in part) with 01:580:310. Students wishing to earn language credit in Latin should enroll in 01:580:310. Credit not given for both this course and 01:580:310.

01:190:312 ***The Search for the Historical Socrates (3)***
Portraits of Socrates in Plato, Xenophon, Aeschines of Sphettus, and Aristophanes. Birth of the philosophical dialogue and other genres; life and thought of Socrates; and later Socratic movements.
Prerequisite: One course in ancient Greek history, culture, or philosophy; or permission of instructor. May be jointly taught (in part) with 01:490:312. Students wishing to earn language credit in Greek should enroll in 01:490:312. Credit not given for both this course and 01:490:312.

01:190:314 ***The Etruscans (3)***
Study of the social history, material culture, and artistic expression of the Etruscans. Survey of urbanism and architecture, trade, funerary practices, painted decoration, sculpture, and minor arts between the 9th and 2nd centuries BC.
Credit not offered for this course and 01:082:314.

01:190:315 ***Latin Poets in English (3)***
Selections from the Augustan poets Horace, Virgil, and Propertius. Translations by Dryden, Ezra Pound, and others, with close reference to the Latin original. Theories of translation.
Prerequisite: One year of Latin or permission of instructor.

01:190:317 ***Ancient Painting (3)***
Survey of Greek, Etruscan, and Roman painting from the eighth century BC through the Roman Empire. Emphasis on the development of style and on the cultural significance of painted images in different social contexts.
Credit not given for this course and 01:082:317.

01:190:318 ***Cleopatra (3)***
Examines the historical Cleopatra and the reception of her image from antiquity to the present in literature, art, and film. Issues considered include female power in a man's world, East versus West, and politics and propaganda.
Credit not given for both this course and 01:510:312 or 01:988:321.

01:190:320 ***Women in Antiquity (3)***
Women in the ancient societies of Greece and Rome. Their roles and images in the social, legal, political, domestic, philosophical, and artistic spheres examined using primary sources.
Credit not given for both this course and 01:510:251.

01:190:321 ***Classical Rhetoric (3)***
Origins and development of rhetorical theory: persuasive argument, emotional appeal, good style, and delivery.

01:190:323 ***Criminals and Saints: Power in Greek Political Life and Imagination (3)***
Unlimited power, tyranny, democracy. Explores the ancient Greeks' ambivalent conceptions and perceptions of autocratic versus collective power through time.
Prerequisite: 01:190:205 or permission of instructor.

01:190:324 ***Race and Ethnicity in the Classical World (3)***
Examination of ancient Greek and Roman understanding of physically different and geographically alien individuals. Consideration of the origins of our culture's beliefs about race, ethnicity, and human difference in classical world's views of strangers, foreigners, and barbarians and how our ideas about race and difference have evolved.

01:190:325 ***Cults, Magic, and Witchcraft (3)***
Magic and witchcraft in the everyday life of antiquity, from pagan to Christian times; how individuals tried to control the unknown. Literary and material sources.

01:190:328 ***Ancient Law in Action (3)***
Explores Greek and Roman constitutions and legal systems in their social contexts. Illustrates procedural elements of ancient criminal and civil law through mock trials.

01:190:350 *Greek Society (3)*
Social and economic life of the Greeks from the Mycenaean period through the Hellenistic age. Written and material evidence employed.
Recommended: 01:510:201. Credit not given for both this course and 01:510:350.

01:190:352 *Plato (3)*
Philosophy of Plato through close reading of selected dialogues, supplemented by relevant readings on other ancient and contemporary philosophers.
Credit not given for both this course and 01:490:352 or 01:730:352.

01:190:353 *Aristotle (3)*
Philosophy of Aristotle through his selected works, supplemented by relevant readings in Plato and in modern philosophers.
Prerequisite: One course in ancient Greek history, culture, or philosophy; or permission of instructor. May be jointly taught (in part) with 01:490:353. Students wishing to earn language credit in Greek should enroll in 01:490:353. Credit not given for both this course and 01:490:353.

01:190:355 *Ancient Mythology and Society (3)*
Social history and practical utilization of ancient myth (with emphasis on Greek myths), applying historical, religious, sociological, and literary-critical perspectives.

01:190:356 *Oedipus: A Survey of the Myth from Antiquity to Freud (3)*
Survey of the Oedipus myth in earliest, pre-Sophoclean evidence; in Greek and Roman tragedy; in the Middle Ages and the Renaissance; and in the 19th and 20th centuries (with special emphasis on Oedipus in art and music).

01:190:358 *Odysseus in Literature, Drama & Film (3)*
Evolving images of Odysseus from ancient literature through medieval poetry and modern novels, poetry, plays, and films. Significance of Odysseus as an enduring literary icon.
Credit not given for both this course and 01:195:358 or 01:489:358.

01:190:370 *Greek Film: Love, Eros & Death (3)*
Masterpieces of modern Greek film, 1914 to present, exploring interplay of love, the erotic, and death.
Credit not given for this course and 01:489:370. Taught in English.

01:190:372 *Cities of the Classical World (3)*
Study of urban development in antiquity, focusing on Athens and Rome, and synthesizing the evidence of literary, historical, and archaeological sources.
Credit not given for both this course and 01:512:311.

01:190:373 *Pompeii: The Life and Death of a Roman Town (3)*
Pompeii and Herculaneum, as laboratories for the study of Roman life: the economy and society; public and private architecture, art, and inscriptions; and the birth of archaeology.
Prerequisite: One course in Roman history or culture, Latin or ancient art, or permission of instructor. Credit not given for both this course and 01:510:310.

01:190:375 *Masterpieces of Greek and Roman Art (3)*
Analyses of selected monuments of architecture, sculpture, and painting from 800 BC to AD 500.

01:190:377 ***The Hero in Ancient Greece and Rome (3)***
Explores the ancient Greek and Roman hero from literary, religious, mythical, and comparative narrative points of view. Readings drawn mostly from ancient sources.

01:190:381 ***Greek Drama in Translation (3)***
Readings in English of the major Greek tragedies and comedies; emphasis on the dramatic structure, literary analysis, and the theatrical conventions of the ancient stage.

01:190:391 ***Roman Drama in Translation (3)***
Readings in English of the comedies of Plautus and Terence and the tragedies of Seneca to emphasize the contributions of Latin authors to the dramatic genre and their influence on European and English drama.

01:190:393 ***Greek and Roman Satire (3)***
Readings in English of classical satire from its origins in the Greek world through the fourth century AD. Emphasis on the significance of ancient satire for comedy and satire in Western culture.

01:190:395 ***Transgression in Ancient Greek Society and Culture (3)***
Violence. Obscenity. Gender roles. Punishment. Violations of cultural norm in ancient Greek practical, civic, religious, and intellectual life, through close critical analysis of their myths, literature, laws, and rituals.
Prerequisite: 01:190:205 or permission of instructor.

01:190:397 ***The Ancient Novel in Context (3)***
Readings from Greek and Roman novels of the Imperial period, with attention to their place in the literary and cultural history of the ancient world.

01:190:421 ***Indo-European Origins of the Classical Languages (3)***
Comparative survey of Latin and Greek grammar, with historical analysis of those features that the two languages share due to their common origin as Indo-European languages. Reference to the major characteristics of Indo-European languages in general.
Open only to advanced undergraduates in classics and linguistics and to graduate students with some knowledge of Latin and/or Greek.

01:190:440 ***Cultural Heritage and Preservation Studies (CHAPS): Museums, Collecting, and Preservation (3)***
Examines the history of museums, modes of collecting, and the preservation of the past, and considers these activities in the context of contemporary political issues.
Credit not given for this course and 01:082:440.

01:190:491,492 ***Independent Study in Classics (3,3)***
Directed reading and research on an assigned topic in classics under the supervision of a member of the department. An extensive essay required, reflecting in-depth research on the assigned topic.
Open only to juniors and seniors majoring in classics. Permission of the undergraduate director required.

01:190:493,494 ***Special Topics Seminar (3,3)***
Advanced study of a problem, topic, or theme in Greek and Roman studies.
Open only to junior or senior majors in classics or by permission of instructor.

01:190:495,496 ***Honors Project (4,4)***
Independent or team projects resulting in a written paper, a performance, or some other appropriate form of public presentation such as drama, poetry, narrative prose, or museum excavation materials.
Open only to honors students in one of the fields in classics.

Courses in Greek, Ancient (490)

Courses in Greek, Ancient (490)

01:490:101 ***Elementary Greek I (4)***
Intensive study of ancient Greek grammar in conjunction with readings in simple Greek prose.

01:490:102 ***Elementary Greek II (4)***
Continued study of Greek grammar in conjunction with readings.
Prerequisite: 01:490:101 or permission of instructor.

01:490:206,207 ***Intermediate Greek Prose (3,3)***
Study of Greek prose through the reading of a work of Plato, Lysias, Herodotus, or other authors.
Prerequisite: 01:490:102 or permission of instructor.

01:490:208,209 ***Intermediate Greek Poetry (3,3)***
Study of Greek poetry through the reading of a work of Euripides, Sophocles, Homer, or other authors.
Prerequisite: 01:490:102 or permission of instructor.

01:490:211 ***Introduction to New Testament Greek (3)***
Introduction to grammar and syntax of Greek in conjunction with readings from the Gospels, Acts, or Epistles.
Prerequisite: 01:490:207 or permission of instructor.

01:490:304 ***Aristophanes (3)***
Reading of *Clouds* and one other comedy; comparison of the Aristophanic with the Platonic Socrates; study of relation of Old Comedy to Athenian life.
Prerequisites: 01:490:207 or 208 or permission of instructor.

01:490:305 ***Greek Drama (3)***
Readings in the works of fifth-century Greek dramatists with special emphasis on Sophocles.
Prerequisite: 01:490:207 or 208 or permission of instructor.

01:490:306 ***From Athens to Alexandria (3)***
Major works of the literature of Greece from the fourth century BC into the Hellenistic Age.
Prerequisite: 01:490:207 or 305 or permission of instructor.

01:490:308 ***Greek Historical Writings (3)***
Readings of selected narratives in Herodotus and of main speeches, excursuses, and parts of books six and seven of Thucydides. Comparative study of historical method.
Prerequisites: 01:490:207, 208, or permission of instructor.

01:490:309 ***Lyric Poetry (3)***
Survey of the main poets of the "lyric age" of Greece (Alcman, Sappho, Alcaeus, Archilochus, Solon, Theognis, and Anacreon); reading of an ode of Pindar.
Prerequisites: 01:490:207, 208, or permission of instructor.

01:490:310 ***Greek Heroic Poetry (3)***
Studies in the poetry and culture of Homeric Greece. Selections from the *Iliad* or *Odyssey*.
Prerequisites: 01:490:207, 208, or permission of instructor.

01:490:311 ***New Testament Greek (3)***
Selections from the Gospels, Acts, and Epistles, supplemented by a review of grammar and syntax.

01:490:312 ***Socratic Literature (3)***
Portraits of Socrates in Plato, Xenophon, Aeschines of Sphettus, and Aristophanes, with emphasis on the reading, in Greek, of selections from the writings of these authors.
Prerequisite: 01:490:207 or 208 or permission of instructor. May be jointly taught (in part) with 01:190:312. Students wishing to earn language credit in Greek should enroll in 01:490:312. Credit not given for both this course and 01:190:312.

01:490:315 ***Menander (3)***
Study of *Dyskolos* and *Samia* as examples of New Comedy; their relation to Athenian life at the end of the fourth century.
Prerequisites: 01:490:207, 208, or permission of instructor.

01:490:335 ***Greek Prose Composition (3)***
Review of syntax, composition in Greek, and translation from English to Greek of continuous passages adapted from classical authors.
Prerequisite: 01:490:207 or 208.

01:490:352 ***Readings in Plato (3)***
Reading of one or more Platonic dialogues (or thematically related selections from several) in the original Greek.
Prerequisites: 01:490:207, 208, or permission of instructor. May be jointly taught (in part) with 01:190:352; separate meetings for readings in Greek. Credit not given for both this course and 01:190:352 or 01:730:352.

01:490:353 ***Readings in Aristotle (3)***
Reading of one or more treatises by Aristotle (or thematically related selections from several) in the original Greek.
Prerequisites: 01:490:207, 208, or permission of instructor. May be jointly taught (in part) with 01:190:353; separate meetings for readings in Greek. Credit not given for both this course and 01:190:353.

01:490:391 ***Readings in Greek Prose (3)***
Readings in selected ancient Greek prose authors or genres.
Prerequisites: 01:490:305, 306, or permission of instructor.

01:490:392 ***Readings in Greek Poetry (3)***
Readings in the works of selected Greek poets or poetic genres.
Prerequisites: 01:490:305, 306, or permission of instructor.

01:490:400 ***Demosthenes (3)***
Reading of one public and one private oration; study of Demosthenes as orator; as source for Athenian law, commerce, and private life; and as statesman.
Prerequisites: 01:490:207, 208, or permission of instructor.

01:490:402 ***Plato and Aristotle (3)***
Reading of one Platonic dialogue followed by selected portions of an Aristotelian treatise. Attention to prose style and also to common problems and diverging solutions.
Prerequisites: 01:490:207, 208, or permission of instructor.

Classics (SAS)

Courses in Latin (580)

Courses in Latin (580)

01:580:101 ***Elementary Latin I (4)***
Beginning course in Latin, introducing the Latin language and its grammar and syntax.

01:580:102 ***Elementary Latin II (4)***
Continued beginning instruction in Latin, introducing Latin language, grammar, and syntax.
Prerequisite: 01:580:101 or permission of instructor.

01:580:203 ***Intermediate Latin Prose (3)***
Selections from prose authors of the late Republican and/or early empire, e.g., Caesar, Cicero, Livy; development of skill in reading continuous passages of Latin prose.
Prerequisite: 01:580:102 or permission of instructor.

01:580:204 ***Intermediate Latin Poetry (3)***
Representative poems of Catullus, Horace, and Ovid, read and studied with a view to their style, imagery, and topicality. Introduction to Latin metrics.
Prerequisite: 01:580:102 or permission of instructor.

01:580:302 ***Medieval Latin (3)***
Readings in major Latin writings and documents of the Middle Ages.
Prerequisite: 01:580:203 or 204 or permission of instructor.

01:580:303 ***Cicero: Philosophical Writings (3)***
Selected philosophical dialogues and rhetorical treatises of Cicero.
Prerequisites: 01:580:203, 204.

01:580:304 ***Cicero: Orations (3)***
Selected orations of Cicero, with emphasis on the development of Cicero's style and the significance of historical and biographical background.
Prerequisites: 01:580:203, 204.

01:580:310 ***Prose and Poetry in the Age of Augustus (3)***
The cultural renaissance under Augustus (44 BC-AD 14), with emphasis on the reading, in Latin, of selections from the writings of Virgil, Horace, Livy, Ovid, and the elegiac poets.
Prerequisite: 01:580:203 or 204 or permission of instructor. May be jointly taught (in part) with 01:190:310. Students wishing to earn language credit in Latin should enroll in 01:580:310. Credit not given for both this course and 01:190:310.

01:580:321 ***Roman Comedy (3)***
Study of the principal meters, the theater, and the staging of plays through the reading of plays of Plautus and Terence.
Prerequisites: 01:580:203, 204.

01:580:323 ***Lucretius (3)***
Readings from Lucretius' *De Rerum Natura* with analysis of its place within the literary and philosophical traditions of Rome and Greece.
Prerequisites: 01:580:203, 204.

01:580:324 ***Sallust (3)***
Readings from Sallust's *Jugurthine War*, *Histories*, and *Catiline*, with a study of selected problems from the historical periods relevant to those works.
Prerequisites: 01:580:203, 204.

01:580:325 ***The History of Livy (3)***
Readings from Livy's *Ab Urbe Condita* with a study of selected problems in Roman Republican history.
Prerequisites: 01:580:203, 204.

01:580:327 ***Latin Elegy (3)***
Survey of Latin poetry written in elegiac meter, with selections from Catullus, Tibullus, Sulpicia, Propertius, and/or Ovid.
Prerequisites: 01:580:203, 204.

01:580:328 ***Roman Satire (3)***
Selected poems of Horace, Martial, and Juvenal and a study of their interrelationship.
Prerequisites: 01:580:203, 204.

01:580:329 ***Tacitus (3)***
Reading of a minor work of Tacitus and/or selections from the *Annals of Tacitus* with an investigation of their value as sources for Imperial history in the first century AD.
Prerequisites: 01:580:203, 204.

01:580:335 ***Latin Prose Composition (3)***
Review of syntax and prose style; composition in Latin and translation into Latin of continuous passages of prose.
Prerequisites: 01:580:203, 204.

01:580:369,370 ***The Seminar in Latin (3,3)***
Extensive and rapid reading in Latin literature from the early Roman Republic to the empire.
Primarily for juniors and seniors majoring in classical humanities; open to others with permission of instructor.

01:580:401 ***Advanced Study of the Poetry of Ovid (3)***
Readings and interpretation of selected works of Ovid. A study of the poet's contribution to Roman literature and his importance in the Western literary tradition.
Prerequisites: 01:580:203, 204.

01:580:402 ***Advanced Study of Vergil's Aeneid (3)***
Readings of Vergil's *Aeneid* with an analysis of selected problems in its interpretation.
Prerequisites: 01:580:203, 204.

01:580:403 ***Readings in Latin Literature I: Literature of the Republic (3)***
Prose and poetry of Rome from its beginnings in the third century BC to the end of the republic in the first century BC. Extensive selections from epic, drama, lyric, elegy, pastoral, and other poetry and from history, rhetoric, and oratory.
Prerequisites: 01:580:203, 204.

01:580:404 ***Readings in Latin Literature II: Literature of the Empire (3)***
Prose and poetry of imperial Rome. Extensive selections from epic, history, satire, the novel, and other genres, with emphasis on writers of the Augustan and Neronian ages.
Prerequisites: 01:580:203, 204.

01:580:407 ***Advanced Study of the Poetry of Horace (3)***
Intensive reading of Horace's poems with emphasis on the variety of style and content.
Prerequisites: 01:580:203, 204.

The program in Latin American studies is administered by the Center for Latin American Studies, a clearinghouse and center of coordination for research, pedagogy, and extracurricular events pertaining to Latin America and its worldwide diasporas. The mission of the Center for Latin American Studies is to foster learning and research across disciplines and geographic boundaries, and to bring the richness of the scholarship on Latin American environment, economics, politics, culture, history, art, language, and literature to the larger Rutgers community. Academic courses, together with visiting writers, film series, concerts, conferences, and lectures, highlight topics in migration, health, environmental issues, human rights and democracy, cultural performance, literary innovation, and linguistic and political change in Latin American and greater hemispheric contexts. The center moves beyond traditional regionalisms toward a more thorough understanding of culture and society throughout the Americas.

Latin American Studies 590 (SAS)

Learning Goals

Learning Goals

Upon completion of the program students will:

1. demonstrate familiarity with several of the disciplines that comprise the field of Latin American studies, by proficiently employing different research methodologies and interdisciplinary approaches, including but not limited to anthropological, economic, environmental, geographic, historical, political, sociological, linguistic, literary, visual, cinematic, and/or performance analysis;

2. demonstrate substantive knowledge of the cultural concepts, historical legacies, and socioeconomic processes that inform modern Latin America and its diaspora;

3. demonstrate an understanding of the hemispheric and global connections between Latin America, the United States, and other regions;

4. demonstrate an understanding of issues of social justice in Latin America and its diaspora in order to participate as informed citizens in a global society;

5. demonstrate the research and critical thinking skills necessary to formulate clear and persuasive written and oral arguments;

6. be able to carry out basic research in Spanish and/or Portuguese and to converse with native speakers;

7. be prepared to pursue graduate study in Latin American studies or in one of the disciplines represented in the program; and/or

8. be prepared to pursue professional training and careers in fields such as business, education, journalism and media, international relations, law, nongovernmental work, public policy and planning, public health, and social work

Latin American Studies 590 (SAS)

Major Requirements

Major Requirements

The interdisciplinary major in Latin American studies is intended for students with an interest in the Latin American region and its diaspora. It offers students a range of course choices in a variety of fields in the arts and sciences. The major consists of 30 credits, of which 15 credits must be at the 300 level or above, completed with a grade of C or better.

Students must take the core course, 01:590:101 Latin America: An Introduction. Required courses are: 3 credits in history (01:508:260 Colonial Latin America, 01:508:262 Modern Latin America, 01:508:264 Latin America and the United States, 01:508:360 The History of Brazil, 01:508:362 Mexico, 01:508:369 Gender in Latin American History, or 01:508:370 History of Cuba); 6 credits in social sciences (any two of the following: 01:070:223 Anthropology of Latin America, 01:450:336 Latin America, 01:790:312 Change in Latin America; and 01:595:298 Latinos and Migration OR 01:595:299 Latinos and Community); 6 credits in Spanish-American or Brazilian literature and culture or art history; and a Seminar in Latin American Studies (01:590:401 or 402).

Students must also take 9 credits of elective courses with a Latin American focus, 6 credits of which must be at the 300 level or above; electives may include courses listed above not selected as required courses.

Majors must also satisfy the language proficiency requirement by completing either Spanish 01:940:215 Introduction to Hispanic Literature or 01:940:261 Introduction to the Study of Language (or above) OR Portuguese 01:810:201 Portuguese for Native Speakers or 01:810:203 Portuguese Conversation and Composition (or above). Students are encouraged to take a placement exam to determine their level of language ability.

Course selections for the major must be approved by the program director or an adviser.

Latin American Studies 590 (SAS)

Minor Requirements

Minor Requirements

The minor consists of 18 credits, of which 9 credits must be at the 300 level or above.

Students must take the core course, 01:590:101 Latin America: An Introduction. Required courses are: 3 credits in history (01:508:260 Colonial Latin America, 01:508:262 Modern Latin America, 01:508:264 Latin America and the United States, 01:508:360 The History of Brazil, 01:508:362 Mexico, 01:508:369 Gender in Latin American History, or 01:508:370 History of Cuba); 3 credits in social sciences (any two of the following: 01:070:223 Anthropology of Latin America, 01:450:336 Latin America, 01:790:312 Change in Latin America; and 01:595:298 Latinos and Migration OR 01:595:299 Latinos and Community); and 3 credits in Spanish-American or Brazilian literature and culture or art history.

Students must also take 6 credits of elective courses with a Latin American focus, 3 credits of which must be at the 300 level or above; electives may include courses listed above beyond those selected as required courses.

Minors must also satisfy the language proficiency requirement by completing either Spanish 01:940:215 Introduction to Hispanic Literature or 01:940:261 Introduction to the Study of Language (or above) OR Portuguese 01:810:201 Portuguese for Native Speakers or 01:810:203 Portuguese Conversation and Composition (or above). Students are encouraged to take a placement exam to determine their level of language ability.

Course selections for the minor must be approved by the program director or an adviser.

Latin American Studies 590 (SAS)

Departmental Honors Program

Departmental Honors Program

To be eligible for honors work, students must have a cumulative grade-point average of 3.25 or higher and an average of 3.5 or higher in Latin American studies courses. Students are admitted to the departmental honors program by recommendation of a faculty adviser and permission of the director. Students must complete a capstone project. Departmental honors also are awarded to those students maintaining a grade-point average of 3.5 in the major and who complete the requirements for the School of Arts and Sciences honors program. Interested students are encouraged to apply at the department toward the end of their junior year. More detailed information is available in the departmental office.

For additional information about the program, consult the department's website.

Courses

Courses

01:590:100 ***Themes in Latin American Studies (1.5)***
Introduction to the construct called Latin America: geography, peoples and groups, cultures, history, languages, music, art, and literature. Focus may vary, according to instructor interest.

01:590:101 ***Latin America: An Introduction (3)***
Survey of Latin American culture and society from the precolonial era to the present day. Topics include culture, politics, literature, language, social inequality, and related issues.

01:590:150 ***The Latin American Woman (3)***
Analysis of women's roles within the family structure in Latin America and the Caribbean. Examines the double standards imposed on men and women, the impact of socialization, and the development of a critical consciousness.
Credit not given for both this course and 01:988:150.

01:590:201 ***Introduction to Latin American Civilization and Culture (3)***
Survey of Latin American culture from the colonial period to the present day. Consideration of chronicles of the Indies, documents on independence and nation formation, and canonical texts of modern literature and thought.

01:590:250 ***Sports in Latin America and the Caribbean (3)***
Analysis of contexts and evolution of sports and games in Latin American and Caribbean cultures. Topics may include Maya ballgame, capoeira, soccer fever, baseball, women in sports, and sport management.
Credit not given for both this course and 01:595:250 or 01:940:250.

01:590:265 ***Afro-Brazilian History (3)***
Overview of the history of the largest African diaspora community in the world. Encourages critical analysis of major issues in African-Atlantic diaspora studies. Principal scholarship supplemented with selected readings in literature, oral history, African-Brazilian movement documents, and iconography.
Credit not given for both this course and 01:014:265, 01:014:410, 01:508:265, or 01:590:410.

01:590:298 ***Latinos and Migration (3)***
Historical and contemporary experience of Latinos and Latin Americans with migration to/from the United States and migration within the United States. Development of regional, national, and transnational practices. Emphasis on causes and experience of migration.
Credit not given for both this course and 01:050:295 or 01:595:298.

01:590:299 ***Topics in Latin American Studies (3)***
Analysis of topics in the culture and society of Latin America.

01:590:330 ***Religion in Latin America (3)***
Exploration of the religious complexity of Latin America, including Christianity, indigenous and syncretic practices, and traditions.
Credit not given for both this course and 01:840:330.

01:590:367 ***The Afro-Latin American Experience (3)***
Examines profound impact of African diaspora on Latin American societies where persons of African descent represent significant minorities and numerical majorities. Explores how Afro-Latin Americans remember the past and experience the present.
Credit not given for both this course and 01:508:367.

01:590:381 ***Ancient Kingdoms: A History of the Aztecs, Incas and Mayas (3)***
This course treats the history of the three most powerful Native American states: the Aztecs, Incas and Mayas. It begins long before contact with Europeans and ends about two generations after the arrival of the newcomers. Students will learn what scholars have been able to uncover, now that we are relying more on sources written by Indigenous people and less on those produced by Europeans.

Credit not given for both this course and 01:508:381.

01:590:393 ***Modern Latin American Art (3)***
Latin American art from post-independence era to the second half of the 20th century.
Credit not given for both this course and 01:082:393.

01:590:399 ***Topics in Latin American Studies (3)***
Analysis of select topics in the culture and society of Latin America.

01:590:401,402 ***Seminar in Latin American Studies (3,3)***
Correlation of studies through analysis of particular problems or periods in Latin American civilization. Reading, reports, and discussions.
Credit not given for both these courses and 01:940:403,404.

01:590:460 ***Race, Class, and Ethnicity in Latin America (3)***
Investigation of racio-ethnic conflicts and racial formation and renegotiation in Latin America through literary and nonliterary sources. Consideration of class, racism, miscegenation, marginalization, and ethnonym.
Prerequisite: One semester of 01:940:300-level Spanish literature or permission of department. Credit not given for both this course and 01:940:460.

01:590:493 ***Internship in Latin American Studies (1-3)***
Professional, supervised work in an approved organization or agency; an appropriately designed academic project required.
Open only to juniors and seniors.

01:590:496 ***Independent Study (1-3)***
Independent study in the field of Latin American studies. Topic must not be already treated in a regularly offered course.
Prerequisites: Permission of program director and instructor. Open only to juniors and seniors.

01:590:497,498 ***Honors in Latin American Studies (BA,BA)***
Preparation for comprehensive examination in Latin American studies and research paper prepared under direction of honors committee.
Prerequisites: 01:940:394 or equivalent, and permission of Latin American Studies Program Committee. Open only to seniors.

01:590:499 ***Readings in Latin American Studies (3)***
Independent readings under faculty supervision. Project must be one not already treated in a formal course.
Prerequisites: Permission of Latin American Studies Program Committee and instructor. May not be taken for more than one semester.

Priscilla Fereirra, B.A., University of São Paulo-Brazil, M.A., Ph.D. UNC at Chapel Hill

Sebastián León, B.S., Florida State; M.A., George Washington; Ph.D., American

Shantee Rosado[KS1] [UB2] , B.A. Macalester, M.A, Ph.D., Pennsylvania

Omaris Z. Zamora, B.A., Chicago; M.A., Ph.D., Texas

The Department of Latino and Caribbean Studies (LCS) offers a program of study that examines the histories, politics, and cultures of both U.S. Latino and Caribbean populations. We employ interdisciplinary, hemispheric, and transnational approaches to consider the ways U.S. Latino and Caribbean communities have been, and continue to be, shaped by the legacies of colonialism, slavery, globalization, and social, artistic, and intellectual activism. The department's interdisciplinary faculty and major/minor curriculum expose students to a wide range of scholarship, intellectual debates, and methodologies drawn from the social sciences and the humanities. We also offer a departmental certificate in multicultural competence to students who take 9 credits offered by LCS. The certificate enables students to demonstrate competency in one of the most important areas of change in the United States in the 21st century: the formation of an increasingly multicultural society. The department works closely with students to foster a comprehensive learning experience by teaching them to write well, speak articulately, and think analytically and creatively. These skills prepare students for success in many careers and fields of study in graduate or professional schools.

Learning Goals

Learning Goals

Latino and Caribbean studies majors will:

- be familiar with several of the disciplines that comprise the field of Latino and/or Caribbean studies, including but not limited to: anthropology, art history, cinema studies, education, geography, history, literature, media studies, music, philosophy, political science, sociology, and women's and gender studies;
- develop critical thinking skills and the ability to speak and write clearly and analytically;
- employ different research methodologies and interdisciplinary approaches in the humanities and/or social sciences, demonstrating proficiency in one or more of the following areas: historical, political, sociological, anthropological, environmental, philosophical, literary, visual, cinematic, musical, and/or performative analysis;
- develop multi- and intercultural competence and sensitivity to issues particular to Latino and/or Caribbean experience(s); and
- conduct individual research to formulate rigorous and convincing arguments in the field of Latino and/or Caribbean studies; honors students will perform and present original research.

Latino and Caribbean Studies 595 (SAS)

Major Requirements

Major Requirements

The major in Latino and Caribbean studies requires successful completion of twelve 3-credit courses or 36 credits.

Introductory Course (3 credits)

01:595:100 Introduction to Caribbean Studies (3)
or
01:595:101 Introduction to Latino Studies (3)

Research Methodologies (3 credits)

01:595:215 Research Methods in Latino and Caribbean Studies (3)

Interdisciplinary Distributions (9 credits, one course from each of the following areas for a total of three 200-level courses):

See department website or Degree Navigator for lists of courses in each area.

- *History, Politics, and Philosophy*
- *Culture and Creative Expressions*

- *Society, Community, and Environment*

Capstone Course (3 credits)

One 400-level seminar or another approved course

Electives (18 credits)

Six additional courses, three of which must be at the 300 or 400 level.

With the department's approval, students may replace up to two electives with courses that are offered by other departments or units of Rutgers University.

Credit may be offered for one course in Spanish language or composition at the 200 or 300 level.

Only one independent study course may be used to satisfy the requirements, except by students enrolled in the department's honors program.

Only grades of C or better will count toward the major requirements.

Latino and Caribbean Studies 595 (SAS)

Minor Requirements

Minor Requirements

The minor in Latino and Caribbean studies requires successful completion of six 3-credit courses.

Introductory Course (3 credits)

595:100 Introduction to Caribbean Studies (3)
or
595:101 Introduction to Latino Studies (3)

Electives (15 credits)

Five additional courses, two of which must be 300 or 400 level.

None of the courses in the minor may be substituted by courses outside the department.

Only one independent study course can be counted toward the minor.

Only grades of C or better will count toward the minor requirements.

Latino and Caribbean Studies 595 (SAS)

Certificate in Latino and Caribbean Studies

Certificate in Latino and Caribbean Studies

Students who are unable to major or minor in Latino and Caribbean Studies may earn the Certificate in Latino and Caribbean Studies. It is intended for students majoring in other SAS departments or other schools and planning for careers in education, social work, business, law, international relations, global development, public policy, medicine and public health, and journalism, among others. It is conferred to students at the time of graduation.

Certificate Requirements:

- Students must complete 9 credits of coursework in Latino and Caribbean Studies (595)
- Students must achieve a minimum grade of C for all courses
- Up to three credits may be taken on a Pass/No Credit basis
- Students who earn the Major or Minor in Latino and Caribbean Studies may not also earn the Certificate in Latino and Caribbean Studies

Latino and Caribbean Studies 595 (SAS)

Honors Program

Honors Program

To be eligible for the departmental honors program, students must have a minimum 3.25 grade-point average overall and a minimum 3.5 grade-point average in Latino and Caribbean studies courses. Interested majors are encouraged to apply toward the end of their junior year. Students are admitted to the program by recommendation of a faculty adviser and permission of the undergraduate director. To graduate with honors, students must complete a yearlong (6 credits) independent research project that culminates in a written thesis, creative work, or community-based program.

Departmental honors also are awarded to those students maintaining a grade-point average of 3.5 in the major and who complete the requirements for the Honors College or School of Arts and Sciences Honors Program.

Latino and Caribbean Studies 595 (SAS)

Courses

Courses

01:595:100 ***Introduction to Caribbean Studies (3)***
Interdisciplinary introduction to the principal questions, themes, and debates in the field of Caribbean studies. Emphasis on the complex connections and fragmentation of the different histories, cultures, and nations of the Caribbean Basin.

01:595:101 ***Introduction to Latino Studies (3)***
Interdisciplinary introduction to the principal questions, themes, and debates in the study of Latinos in the United States, including distinct immigrant, national origin, and ethnic groups.

01:595:103 ***Latin Images and Identities Seminar (1.5)***
Full-semester seminar for students in the Latin Images Living-Learning Community. Offered fall and spring with varying content each semester.

Open to Latin Images LLC students only. Pass/No Credit.

01:595:104 ***Latin Images and Identities Seminar (1.5)***
Full-semester 1.5-credit seminar for students in the Latin Images Living-Learning Community. Offered in fall and spring with varying content each semester.
Open to Latin Images LLC students only. Pass/No Credit. Special Permission required.

01:595:201 ***African Belief Systems and the Latino Community (3)***
Historical examination of ancestor worship, Santería (Cuba), Vodun (Santo Domingo), Espiritismo (Puerto Rico), and other African-based belief systems. Formation from African to slave societies and use in contemporary period.
Credit not given for both this course and 01:014:201.

01:595:202 ***Color-Lines and Borderlands (4)***
Introductory examination of the power of "color-lines" in producing divisions among peoples and individuals and exploration of the possibilities to cross borders of separation and create new forms of human connection in the 21st century.

01:595:203 ***Music of the Caribbean (3)***
Music of the Caribbean and its relationship to the cultural production of Caribbean diasporas in the United States. Considers the musical traditions of Cuba, Dominican Republic, Haiti, Jamaica, and Puerto Rico, and also surveys the musical profiles of smaller Caribbean nations.

01:595:204 ***History of the Caribbean to 1898 (3)***
History of the Caribbean from before the Spanish conquest until the consolidation of the U.S. imperial sphere in 1898. Emphasis on Spanish, English, and French colonialism and the formation of Jamaica, Saint Domingue/Haiti, Puerto Rico, Cuba, and Española/Dominican Republic.
Credit not given for both this course and 01:508:271.

01:595:205 ***History of the Caribbean since 1898 (3)***
Overview of the history of the Caribbean since the formation of the U.S. sphere of influence in 1898. Emphasis on the Hispanic Caribbean and Haiti with consideration of the English-speaking nations.
Credit not given for both this course and 01:508:272.

01:595:206 ***The Caribbean and the United States (3)***
Political relationships between the United States and the countries of the Caribbean Basin since 1898. Political history, political economy, colonialism, nationalism, and the conflicted and contradictory role of the United States in the formation of national states during the 20th century.

01:595:210 ***Women in the Caribbean-Caribbean Women in the United States (3)***
Examines the experience of Caribbean women in nations of origin and in diasporic communities in the United States. Focus on work, migration, transnationalism, family, daily life, gender relations, and politics.
Credit not given for both this course and 01:988:210.

01:595:212 ***Introductory Topics in Latino and Caribbean Studies (3)***
Study of select introductory social science and humanities topics in Caribbean and Latino studies.

01:595:215 ***Research Methods in Latino and Caribbean Studies (3)***
Introduction to qualitative and quantitative or ethnographic, archival, and oral history research methods in Latino and Caribbean studies.

01:595:220 ***Literature and Activism on the US-Mexico Border (3)***
Analysis and contextual understanding of literature and performance that explore the geopolitical space of the U.S.-Mexico border, with a special emphasis on the intersections of activism and the humanities. Taught in English.

Credit not given for this course and 01:940:220.

01:595:224 ***Immigration and Society (3)***
Provides a sociological perspective and comparative lens on international migration by looking at the causes and consequences of immigration for the United States, Canada, France, Germany, and the United Kingdom. Explores why people migrate, examines different modes of assimilation, and compares immigration policies.
Credit not given for both this course and 01:920:225.

01:595:225 ***Caribbean Cinema (3)***
Examination of the outstanding films produced in the Hispanic Caribbean region.

01:595:226 ***Art and Visual Culture of the Caribbean (3)***
Introduction to art and visual culture of the Caribbean from pre-Conquest to the present. Representational practices in relation to the region's diversity, history of colonization, dictatorships, and revolutions. Role of the visual in defining national, gendered, classed, racial, and regional identities.
Credit not given for both this course and 01:082:226.

01:595:230 ***Latinx Art (3)***
Survey of art produced by Latinas and Latinos across the United States from the 1950s to the present.
Credit not given for both this course and 01:082:230.

01:595:240 ***Latino Literature and Culture (3)***
Survey of Latino/a literary voices drawn from the Mexican, Puerto Rican, Dominican, Cuban, and other Latin American migrations to the United States. Discussion of exile, resistance, and assimilation; political presence and identity formation; race, ethnicity, gender, and sexuality; and examination of literary modes and genres (autobiography, poetry, novel, film, music).
Credit not given for both this course and 01:050:240.

01:595:250 ***Sports in Latin America and the Caribbean (3)***
Analysis of contexts and evolution of sports and games in Latin American and Caribbean cultures. Topics may include Maya ballgame, capoeira, soccer fever, baseball, women in sports, and sport management.
Credit not given for both this course and 01:590:250 or 01:940:250.

01:595:251 *Caribbean Freedom (3)*
Ideas and arguments about freedom (personal, political, and economic) in the Caribbean region, in light of ideas generated by abolitionism, nationalism, and neoliberalism.

01:595:266 *Puerto Rican Literature (3)*
Study of the development of Puerto Rican literature from the Spanish colonial period to the present. Emphasis on major writers: Pales Matos, Corretjer, Marquez, Gonzalez, Soto, Diaz, Valcarcel, Sanchez, and Blanco.
Credit not given for both this course and 01:940:331,332.

01:595:268 *Cuban Literature (3)*
Study of the development of Cuban literature from the Spanish colonial period to the present. Emphasis on major writers such as: Plácido, Manzano, Martí, Guillén, Fernando Ortiz, Arenas, Casal, Achy Obejas, and Rivera-Valdés.
Credit not given for both this course and 01:195:268 or 01:940:331,332.

01:595:269 *Dominican Literature (3)*
Study of the development of Dominican literature from the Spanish colonial period to the present. Emphasis on major writers such as Columbus, Pané, Galván, Bosch, Alvarez, Danticat, Andújar, Rita Indiana, and Junot Díaz.
Credit not given for both this course and 01:195:269 or 01:940:331,332.

01:595:270 *Introduction to Caribbean Literature (3)*
Reading and discussion of poetry, prose, and drama by major literary figures representative of different histories and cultures of the Caribbean and its diaspora.
Credit not given for both this course and 01:195:260 or 01:940:270.

01:595:271 *Immigrant States: Jersey's Global Routes (3)*
New Jersey as one of the top immigrant destinations in the United States, yet also one of the most ethnically and racially segregated states. Analysis of how and why racial/ethnic differences shape a person's experiences of and perspectives on the world locally, nationally, and internationally.
Credit not given for both this course and 01:050:271 or 01:920:271 or 01:988:271.

01:595:280,281,282,283 *Topics in Latino and/or Caribbean Studies (1.5,1.5,1.5,1.5)*
Half-semester courses offered regularly on contemporary topics related to Latino and/or Caribbean studies.

01:595:285,286,287,288 *Topics in Latino and/or Caribbean Studies (2,2,2,2)*
Two-credit courses offered regularly on contemporary topics related to Latino and/or Caribbean studies.

01:595:295 *Latino and Caribbean Cultural Studies (3)*
Comparative study of Latino and Caribbean cultures by reviewing key definitions of culture, paying attention to the historical and disciplinary development of the term, as well as the key debates on cultural studies in the humanities.
Credit not given for both this course and 01:050:295. Not open to first-year students.

01:595:296 *English-Caribbean Communities in the United States (3)*
Formation of diaspora from the former British Caribbean in the United States. New York City communities. Transnational experiences, racial and ethnic identities, upward mobility, family, and social networks.

01:595:297 *Caribbean Societies (3)*
This course examines Caribbean societies through the perspective of social development. The course surveys the social, economic, political, and cultural realities in contemporary Caribbean societies with an eye to the policy

interventions devised to address them. The course is divided in two parts. In the first part, students are introduced to the central policy areas for social and economic development in the Caribbean, the definition of a social problem, and the history and theory behind ideas of development. In the second part, students examine a number of social development areas in order to assess the policies utilized to address them and begin to think about alternative social policy directions.
Credit not given for both this course and 01:920:287.

01:595:298 *Latinos and Migration (3)*
Historical and contemporary experience of Latinos and Latin Americans with migration to/from the United States and migration within the United States. Development of regional, national, and transnational practices. Emphasis on causes and experience of migration.
Credit not given for both this course and 01:590:298.

01:595:299 *Latinos and Community (3)*
Historical and contemporary formation and experience of Latino cultural, political symbolic, and geographic communities in comparative perspective. Participation of Latinos and Latin American migrants in broader communities.
Open to second-and third-year students only.

01:595:300 *Slavery in the Caribbean (3)*
Analysis of different institutions of slavery in the Caribbean and the rise of the plantation societies. Investigating the effects on Europe and the Western Hemisphere and its legacy.
Credit not given for both this course and 01:508:374.

01:595:301 *Latinos and Race (3)*
Various ways in which race is constituted and how dominant racial identities create a framework for Latino identity in the United States. How notions of white people, white culture, and whiteness are understood by populations racialized as the Other, particularly Latinos.
Not open to first-year students. Credit not given for this course and 01:920:301.

01:595:302 *Dominican Transnational Cultures (3)*
Importance of transnationalism to the Dominican Republic from the "first encounter" with Europeans to contemporary migration and cultural patterns.
Open to third- and fourth-year students only.

01:595:303 *Language and U.S. Latino/a Culture (3)*
Interrelation of diverse linguistic traits and practices in the production of U.S. Latino/a culture. Emphasis on Chicano/a, Mexican-American, Nuyorican/Puerto Rican, Dominican-American, Cuban, and Cuban-American contributions, in the context of historical and political processes.
Credit not given for both this course and 01:940:303.

01:595:305 *Caribbean Urbanism and Urban Policy (3)*
Urbanism in the Caribbean since the colonial period; the social, economic, and political dynamics that have shaped the urban form and the experiences of those who inhabit these cities.
Not open to first-year students.

01:595:306 ***Latino Youth Cultures (3)***
Latino youth cultures, subcultures, and countercultures. Urban youth, body image, masculinity/femininity. Youth and class, state institutions, surveillance practices. Education, schooling, bilingualism. Generational cohorts.
Not open to first-year students.

01:595:307 ***Latino Ethnography (3)***
Cultural description of U.S. Latinos and their communities; introduction to reading, writing, and theorizing ethnography; ethnographic film; ethnography of migration and diaspora; testimonial as ethnography; locating anthropology within Latino studies.
Credit not given for both this course and 01:050:327 or 01:070:321.

01:595:310 ***Mexican Migration to the United States (3)***
Origins and processes of international migration by people from Mexico to, from, and within the United States. Economic, political, social, and cultural histories of Mexico, including the effects of U.S. foreign policy and economic power; assimilation and incorporation of first- and second-generation Mexicans and transnational links. Impact on gender, class, and racial formation.
Not open to first year students.

01:595:311 ***Puerto Rican Migration to the United States (3)***
Historical evolution of the movement of Puerto Ricans between the island and the United States examined within the colonial context and the international circulation of workers.

01:595:312 ***Special Topics in Latino and Caribbean Studies (3)***
Study of select social science and historical topics in Caribbean and Latino studies.

01:595:314 ***Caribbean Natural Disasters (3)***
Introduction to the various elements that influence the uneven impact of natural disasters in the Caribbean region. Material, economic, political, institutional, cultural, and social resources that facilitate or hinder adaptive capacity and resilience.

01:595:316 ***Mexican Art Across Borders (3)***
Art, visual culture, and cultural history, with emphasis on the 20th century. Modernism, muralism, varied minor media and artists, post-revolutionary art, Mexican-American/Chicano Civil Rights Movement art, visual production, and politics.
Not open to first-year students. Credit not given for both this course and 01:082:316.

01:595:319 ***Unraveling Race in Latino and Latin American Studies (3)***
Study of the history and cultural representation of race and ethnicity in Latin American and Latino studies from the colonial period to the present. Emphasis on major writers working with race, miscegenation, and racialization.
Prerequisite: Reading knowledge of Spanish recommended. Credit not given for both this course and 01:195:319.

01:595:322 ***Latinas: Migration, Work, and Family (3)***
Interaction of work and family in Latinas' migration to the United States. Focus on reasons for migration, incorporation into U.S. society, and questions of continuity and change.
Credit not given for both this course and 01:988:322.

01:595:323 ***U.S. Latina Feminists (3)***
Overview of diverse perspectives of U.S. Latina feminists based on their multiple positions as racialized ethnic women.

01:595:324 ***Latinos in Film and Media (3)***
Examines the presence of Latinos in U.S. film and media as a site for cultural and political visibility and representation. Compares how a diverse array of representations establish, produce, transform, limit, or question the political and cultural visibility of Latinos in the United States.

01:595:326 ***Genders, Sexualities, and the Caribbean (3)***
Historical and comparative examination of how sexuality and gender differences have been shaped by the insertion of the Caribbean region into the global economy since the colonial era.

01:595:327 ***Genders and Sexualities in U.S. Latina/o Communities (3)***
Analysis of U.S. Latina/o cultures through a focus on gender, sexuality, and representation. Special attention to the lived experiences of Latina/os in contrast to representations of latinidad as physically and erotically excessive.

01:595:328 ***Caribbean Politics and Development (3)***
Politics and development of Caribbean nation-states with special emphasis on internal and regional politics and their relationship with social questions. Party politics, ideologies, economic development, leadership, and political/social movements.
Credit not given for both this course and 01:790:328.

01:595:329 ***Latino Politics in the United States (3)***
Political organization of Latino communities in the northeastern United States since World War II. Role of Latinos in shaping U.S. domestic and foreign policy; the impact of immigration and language policies on political organization.
Credit not given for both this course and 01:790:329.

01:595:333 ***Caribbean Religion (3)***
Examines the history and role of the diverse religious components of the Caribbean Basin from indigenous practices to Catholicism, Protestantism, Judaism, and the emergence of African belief systems such as Vodou, Santeria, and Rastafarianism from the 18th century to the present.
Credit not given for both this course and 01:840:333.

01:595:335 ***Caribbean Pluralities and Indo-Caribbean Literature (3)***
Selected major canonical works of the Anglophone Caribbean and Indo-Caribbean writers.
Credit not given for both this course and 01:013:335 or 01:195:338.

01:595:336 ***Caribbean Borderlands (3)***
Regional analysis of basic human and physical differences affecting economic, political, and social conditions in the West Indies, Central America, and Mexico.
Credit not given for both this course and 01:450:335

01:595:337 ***Global Haiti (3)***
Haiti in worldwide historical processes and political and economic systems.

01:595:340 ***Religion and the Hispanic Community (3)***
Sociological comparison of religious institutions and practices under Spanish and U.S. influence. The role of religion in Caribbean migrations and processes of adaption in the United States.

01:595:341 ***Theater of the Hispanic Caribbean: Migration and Memory (3)***
Exploration of Latino theater in the United States, with emphasis on the experience of migration in texts by authors from Cuba, the Dominican Republic, and Puerto Rico.

01:595:342 ***Postcolonial Caribbean Theater and Performance (3)***
Cross-cultural exploration of postcolonial Caribbean theater and performance.

01:595:350 ***The Literatures of the Americas (3)***
Comparative study of the literatures of the Americas from the 19th century to the present, focusing on novels, stories, essays, and poems written in the United States, Latin America, and the Caribbean.
Credit not given for both this course and 01:195:351, 01:358:351, or 01:940:356.

01:595:351 ***Mexican-American History (3)***
Examination of major themes in Mexican-American/Chicano history since the 19th century. Topics include Spanish empire, Anglo-American conquest, racial hierarchies, labor migration, politics, popular culture, gender, sexuality, and social movements.
Credit not given for both this course and 01:512:351.

01:595:354,356 ***Independent Study (3,3)***
Prerequisite: Permission of instructor. Open only to junior and senior majors and minors in Latino and Caribbean studies.

01:595:361 ***Islands of Empire: Caribbean Colonial and Postcolonial Literatures (3)***
Literary, cultural, and artistic formations that emerged from New World slavery and colonialism, both throughout the Caribbean archipelago and across its many diasporas in the New and Old Worlds.

01:595:364 ***Afro-LatinxGeographies in the U.S. ad Latin America (3)***
Examines uneven Afro-Latinx geographies in the US and Latin America. Interrogates how racialization and gender intersect spatial, economic, and environmental (in)justices that affect Afro-Latinxs communities across the Americas.
Credit not given for both this course and 01:450:364.

01:595:367 ***The Afro-Latin American Experience (3)***
Examines profound impact of African diaspora on Latin American societies where persons of African descent represent significant minorities and numerical majorities. Explores how Afro-Latin Americans remember the past and experience the present.
Credit not given for both this course and 01:508:367 or 01:590:367.

01:595:368 ***History of Latino Social Movements (3)***
History of Latino responses to inequality and discrimination. Citizenship, societal inclusion, cultural relevance, job mobility, and self-determination. Political and community responses to racialization. Politics of confrontation, negotiation, networking, alliances, legislation, litigation, and social mobilization.
Not open to first-year students.

01:595:369 *Latino History (3)*
History of people of Latin American and Hispanic Caribbean descent in the United States over the last two centuries. Experiences of the exiled, labor migrants, refugees, and colonial subjects. Formation of communities, political and labor struggles, and racial/ethnic identities.
Not open to first-year students. Credit not given for both this course and 01:512:360.

01:595:370 *Law and the Latino Community (3)*
Focus on the legal struggle of the Latino community to achieve equality in the United States. Analyzes organization of migrant workers, immigration laws, bilingual education, and the Latino struggle for equal representation in government.

01:595:371 *History of Puerto Rico (3)*
Examination from pre-Columbian time to present. Focus on Spanish colonial policy, slavery and land tenure systems, emergence of national identity, U.S. invasion and rapid economic changes, and population control and migration.
Credit not given for both this course and 01:508:371.

01:595:372 *History of Dominican Republic (3)*
From French invasion of Hispaniola to present. Role in Spanish empire, U.S. control in transition to sugar economy, Trujillismo, U.S. invasion in 1965, and impact of migration on society.
Credit not given for both this course and 01:508:372.

01:595:389 *Black and Brown Bodies and Criminal Justice Systems (3)*
Examination of impacts of criminal justice systems on communities of color in the US, focusing on how social, political, ideological, and economic structures contribute to the disproportionate placement of Black and Brown bodies under systems of formal social control. Historical precursors and modern-day features of mass incarceration, state surveillance, migration-related controls, and current developments in criminal justice through a critical race theory and critical legal theory framework.
Open to juniors and seniors.

01:595:390 *The History of Cuba (3)*
Study of Cuba from pre-Columbian times to the present day. Deals with the long battle for freedom during the 19th and 20th centuries.
Credit not given for both this course and 01:508:370.

01:595:391 *Central American Revolutions (3)*
Central America since independence. Topics include revolt and revolution; formation of repressive states and labor-repressive capitalism; emergence of reformist and revolutionary movements.
Credit not given for both this course and 01:508:366.

01:595:392 *The History of Haiti (3)*
Haiti from late colonial period to present day. Conquest, colonial Saint Domingue, France's empire, plantation economy and society, revolt, independence. Haiti's isolation, nationhood, U.S. influences, the Duvalier regimes, relations with neighbors.
Not open to first-year students.

01:595:393 ***Global Diasporas in Caribbean History (3)***
Intraregional migrations of Caribbean since the 18th century. Theories and concepts of migration; slavery; Asian indentured workers; European and American presence; labor migration; Panama Canal; export economies; race; citizenship; transnational dynamics.
Credit not given for both this course and 01:508:393. Not open to first-year students.

01:595:394 ***Barrio/Ghetto Life (3)***
Examines how marginalized neighborhood spaces that Latinos and Caribbean peoples occupy shape social experience. Origins and development of the concepts "ghetto" and "barrio" in the Americas; intersection of culture and policy in shaping everyday life; production of race, class, and gender in urban space; use of research skills to produce a community urban plan.

01:595:400 ***Topics in Puerto Rican and Caribbean Literature (3)***
Thematic approach to the textual analysis of selected poets, dramatists, essayists, and fiction writers.

01:595:402 ***Documenting Latino Lives (3)***
Ethnographic documentary filmmaking; Latino Community in film; film production. Video-production seminar on the social experience of Latinos in the United States. Project development, advanced production techniques, narrative structure, storytelling strategies, and ethical issues in filmmaking.
Corequisite: Taken with 01:595:403, 1-credit Video Production Lab. Not open to first- and second-year students. Credit not given for both this course and 01:070:407.

01:595:403 ***Video Production Lab for Latino Lives (1)***
Video production laboratory taken with 01:070:407 or 01:595:402 Documenting Latino Lives.
Corequisite: 01:070:407 or 01:595:402. Not open to first- and second-year students. Credit not given for both this course and 01:070:408.

01:595:412 ***Special Topics Seminar in Latino and Caribbean Studies (3)***
Seminar on advanced social science and historical topics in Caribbean and Latino studies.

01:595:493 ***Service Learning Internship (3)***
Community or policy-related service learning internship in Latino community.

01:595:494 ***Service Learning Internship (1)***
Community or policy-related service learning internship in Latino community.

01:595:495,496 ***Independent Study (3,3)***
Prerequisite: Permission of instructor. Open only to junior and senior majors and minors in Latino and Caribbean studies.

01:595:497 ***Senior Research Seminar in Latino and Caribbean Studies (3)***
Provides a forum for the organization of independent or coordinated research projects in Latino and Caribbean studies for seniors who are majors or minors in the department.

01:595:498, 499 ***Honors Research in Latino and Caribbean Studies (3,3)***
Independent research project for the Latino and Caribbean Studies honors program.
Permission of instructor. Open only to junior and senior majors in Latino and Caribbean Studies.

Law (SAS)

LAW

Since law schools do not require that any special undergraduate curriculum be followed, no one program can be described as the best preparation for law school. Students should seek a broad foundation in the arts and sciences. Many students preparing for law school choose majors in political science, history, English, modern languages, philosophy, or programs in mathematics and the sciences. In selecting a course of study, students should consult a prelaw adviser at the Office of Advising and Academic Services.

For information, refer to https://prelaw.rutgers.edu.

Please also refer to the above resource for information on the three-plus-three bachelor's and juris doctor program with Rutgers Law School.

605 Leadership and Management (RBS-NB)

605 Leadership and Management

Major requirements for students who entered RBS *from fall 2017 to fall 2022:*

Business Core

33:010:275 Introduction to Managerial Accounting (3) (prerequisite: 33:010:272)
33:011:300 Business Forum (2)
33:136:370 Management Information Systems OR 33:010:458 Accounting Information Systems (3) (33:010:458 required if double majoring in Accounting, Prerequisite for 33:010:458: 33:010:272)
33:136:385 Statistical Methods in Business (3)
33:136:386 Operations Management (3)
33:140:320 Business Law I (3) OR 33:522:334 Business Ethics (3) (junior or senior year33:140:320 required if double majoring in Accounting)
33:390:300 Financial Management OR 33:390:310 Financial Management for Finance Majors (3) (33:390:310 required if double majoring in Finance)
33:620:301 Introduction to Management (3)
33:620:302 Management Skills (3)
33:620:492 Business Policy and Strategy (3) (prerequisites: 33:390:300 or 33:390:310, 33:620:301, 33:630:301, and senior year)
33:630:301 Introduction to Marketing (3)
33:799:301 Introduction to Supply Chain Management (3)

Required Management Courses

33:620:369 International Business (3) (prerequisite: 33:620:301)
33:620:410 Executive Leadership (3) (prerequisite: 33:620:302)

Electives: At least 6 credits (two courses) of the following:

33:620:362 Effective Leadership Communications (3) (prerequisite: 33:620:302)
33:620:330 Women Leading in Business (3) (prerequisites: 33:620:301 or 33:620:302) 33:620:320 Cross Cultural Management (3) (prerequisite: 33:620:301)
33:620:350 Negotiations (3) (prerequisite: 33:620:301)
33:620:370 Managing Diversity in Organizations (3) (prerequisite: 33:620:301)
33:620:430 Team Building and Group Processes (3) (prerequisite: 33:620:301)

Other elective courses (up to 6 credits)

There are two introductory Finance courses that can fulfill a business core requirement. If you intend to double major in Finance or declare a Finance concentration you will need to take Financial Management for Finance Majors (33:390:310). You can take Financial Management (33:390:300) if you have no intention of majoring in Finance or declaring a Finance Concentration. Credit will not be given for both courses if you take both due to switching to a Finance major/declaring a Finance concentration at a later date.
If you major in Accounting as your first, second, or third major, you are required to take 33:010:458 Accounting Information System and 33:140:320 Business Law I. You will not earn credit for taking 33:136:370 Management Information System. You can earn credit towards graduation if you take 33:522:334 Business Ethics but it will not fulfill a major requirement.
Students with more than one Business School major may only double count one RBS course between those majors.

Major requirements for students who entered RBS ***in the fall 2024 semester or later:***

Business Core

33:010:275 Introduction to Managerial Accounting (3) (prerequisite: 33:010:272)
33:011:301 Foundations for Your Career Journey (1)
33:011:302 Building Your Brand (1) (prerequisite: 33:011:301)
33:011:303 Conquering Your Transition (1) prerequisite: 33:011:302)
33:136:370 Management Information Systems OR 33:010:458 Accounting Information Systems (3) (33:010:458 required if double majoring in Accounting, Prerequisite for 33:010:458: 33:010:272)
33:136:385 Statistical Methods in Business (3)
33:136:386 Operations Management (3)
33:140:320 Business Law I (3) OR 33:522:334 Business Ethics (3) (33:140:320 required if double majoring in Accounting)
33:390:300 Financial Management (3)
33:620:301 Introduction to Management (3)
33:620:302 Management Skills (3)
33:620:492 Business Policy and Strategy (3) (prerequisites: 33:390:300 or 33:390:310, 33:620:301, 33:630:301, and senior year)
33:630:301 Introduction to Marketing (3)
33:799:301 Introduction to Supply Chain Management (3)

Required Management Courses

33:620:369 International Business (3) (prerequisite: 33:620:301)
33:620:410 Executive Leadership (3) (prerequisite: 33:620:302)

Electives: At least 6 credits (two courses) of the following:

33:620:362 Effective Leadership Communications (3) (prerequisite: 33:620:302)
33:620:330 Women Leading in Business (3) (prerequisites: 33:620:301 or 33:620:302) 33:620:320 Cross Cultural Management (3) (prerequisite: 33:620:301)
33:620:350 Negotiations (3) (prerequisite: 33:620:301)
33:620:370 Managing Diversity in Organizations (3) (prerequisite: 33:620:301)
33:620:430 Team Building and Group Processes (3) (prerequisite: 33:620:301)

Other elective courses (up to 6 credits)

A grade of B or better is required to take any additional Finance department courses beyond 33:390:300 Financial Management.
If you major in Accounting as your first, second, or third major, you are required to take 33:010:458 Accounting Information System and 33:140:320 Business Law I. You will not earn credit for taking 33:136:370 Management Information System. You can earn credit towards graduation if you take 33:522:334 Business Ethics but it will not fulfill a major requirement.
Students with more than one Business School major may only double count one RBS course between those majors.

Life Sciences (SAS)

LIFE SCIENCES

Division of Life Sciences, School of Arts and Sciences

Website: http://lifesci.rutgers.edu

Dean: Lori R. Covey

Director, Office of Undergraduate Instruction: Martha Haviland

Chair, Department of Cell Biology and Neuroscience: Megerditch Kiledjian

Chair, Department of Genetics: Tara C. Matise

Chair, Department of Kinesiology and Health: Brandon Alderman

Chair, Department of Molecular Biology and Biochemistry: Barth Grant

The following majors are available in the Division of Life Sciences:

Biological Sciences 119
Cell Biology and Neuroscience 146
Exercise Science 377

Genetics 447
Molecular Biology and Biochemistry 694
Sport Management 955

Students interested in the life sciences also may consider related tracks within major programs offered by the Department of Chemistry and Chemical Biology (chemical biology option) and the Department of Psychology (specialization in behavioral neuroscience).

The Division of Life Sciences coordinates, fosters, and integrates the instructional and research activities of a broad range of faculty with interests in the biological sciences. The principal units of the division include four departments: Cell Biology and Neuroscience, Genetics, Kinesiology and Health, and Molecular Biology and Biochemistry, as well as two sections, the biological chemistry section of the Department of Chemistry and Chemical Biology, and the biopsychology and behavioral neuroscience section of the Department of Psychology. The division's primary goal is to provide a high caliber of interdisciplinary teaching and research in the life sciences as it trains the next generation of teachers, researchers, and future health professionals.

Instruction in the life sciences has undergone enormous changes over the past 15 to 20 years. These changes reflect the intellectual revolution of the last two decades, as well as technical advances that have expanded greatly the tools available to life scientists. Today, students majoring in the life sciences at Rutgers University-New Brunswick experience an exciting atmosphere of learning that exposes them to the concepts and methods of these intellectual and technological advances. The students have open to them a plethora of learning avenues, ranging from thought-provoking lecture presentations to original and cutting-edge research opportunities in state-of-the-art laboratories. A first-class faculty and modern laboratory equipment reflect the division's commitment to provide its students with the best learning environment.

The division offers a wide spectrum of majors for students interested in the life sciences. These options range from a division-based major in biological sciences, designed to provide a general life sciences education, to department-based majors in cell biology and neuroscience, exercise science, genetics, molecular biology and biochemistry, and sport management aimed at providing specialized training, with a strong emphasis on research. Graduates of the division will be highly competitive for a range of postbaccalaureate opportunities, including graduate education and research, health-professions training, and biomedical and biotechnological research positions, as well as teaching careers in the sciences.

The first two years of the student's tenure at Rutgers is expected to revolve around the life sciences core curriculum, a series of basic offerings designed to provide the general background required for pursuing upper-division courses in any of the individual majors. Regardless of the major chosen, students are encouraged to participate in independent study within a research laboratory in order to take advantage of the rich expertise of the many life sciences faculty in New Brunswick and Piscataway. The exercise science and the sport management majors require an internship experience. The division also has a highly developed advising system, with dedicated and knowledgeable faculty advisers available to work with individual students in their selection of courses, completion of major requirements, and preparation for future careers.

Students may not major in more than one of the following majors in the Division of Life Sciences: Biological Sciences (119), Cell Biology and Neuroscience (146), Exercise Science (377), Genetics (447), Molecular Biology and Biochemistry (694), or Sport Management (955). Furthermore, students majoring in one of these four majors may not minor in Biological Sciences (119). Life science majors or minors may not be combined as double majors or as major/minors with Biomathematics (122), Biochemistry (115), or Microbiology (680).

No more than 16 credits from among the life science courses required for completion of any Division of Life Sciences major may be fulfilled by credits transferred from any school outside of Rutgers-New Brunswick.

For additional information and announcements about the Division of Life Sciences, please visit the division's website.

Life Sciences (SAS)

Life Sciences Core Curriculum

Life Sciences Core Curriculum

The life sciences core curriculum is a set of courses that include a series of introductory- and intermediate-level courses in the physical and life sciences forming a foundation of knowledge necessary to understand modern biology and to prepare for the more advanced courses required for each major. Following are core courses:

1. 01:119:115-116 General Biology (4,4)

2. 01:119:117 Biological Research Laboratory (2)

3. 01:160:161-162 General Chemistry (4,4) or 01:160:163-164 Honors General Chemistry (4,4) or 01:160:165-166 Extended General Chemistry (4,4)

4. 01:160:171 Introduction to Experimentation (1)

5. 01:160:307-308 Organic Chemistry (4,4) or 01:160:315-316 Honors Organic Chemistry (4,4)

6. 01:160:311 Organic Chemistry Laboratory (2)

7. 01:750:203-204 General Physics (3,3) or 01:750:271-272 Honors Physics (3,3)*

8. 01:750:205-206 General Physics Laboratory (1,1)*

9. 01:640:135,136 Calculus for the Life and Social Sciences (4,4) or 01:640:151-152 Calculus for Mathematical and Physical Sciences (4,4)**

10. 01:447:380 Genetics (4)***.

*01:750:193-194 (4,4) or 01:750:201-202 (5,5) may be substituted for 01:750:203-204 (3,3) plus 01:750:205-206 (1,1).

**Basic Statistics for Research (01:960:401, 3 credits), Basic Probability and Statistics (01:960:379, 3 credits), or Statistics I and II (01:960:211 and 212) may be substituted for the second semester of Calculus.

***Students majoring in genetics must take 01:447:384-385 (4,4) instead of 01:447:380

Life Sciences (SAS)

Biological Sciences 119

Biological Sciences 119

Website: http://biology.rutgers.edu

Director: Martha Haviland

Director of Advising: Anne Carr-Schmid

Teaching Professor:

Martha B. Haviland, B.A., Rutgers; M.S., A.M., Ph.D., Michigan[AC1] [SB2]

Associate Teaching Professor:

Anne Carr-Schmid, B.S., James Madison; Ph.D., Rutgers

Daniel Stern Cardinale, B.S., College of New Jersey; Ph.D., Rutgers

Monica S. Torres, B.S., National University of La Plata (Argentina); M.S., Ghent (Belgium); Ph.D., Rutgers

Assistant Teaching Professors:

Christy A. Beal, B.S., Rutgers; M.S., Ph.D., Delaware

Cominski, Tara, B.S., St. Peter¿s; M.S., Seton Hall; Ph.D. Rutgers

Doreen R. Glodowski Trotta, B.S., Wisconsin (Stevens Point); M.S., Kansas State; Ph.D., Wisconsin (Madison)
Anne Keating, B.S., M.S., Ph.D., Rutgers

Lu, Haiyang, B.S., Hebei Univ. (China); M.S., Beijing Normal Univ. (China); Ph.D. City Univ. of NY

Nelson, Cassandra, B.S., Marquette; M.S., Indiana University School of Medicine; Ph.D., Marquette

Soliman, Mai, B.S., M.Sc. Montclair State; Ph.D., Rutgers

Gregg Transue, B.S., Pennsylvania State; M.S., Ph.D., Rutgers

Anthony J. Uzwiak, B.A., Ph.D., Rutgers

Villegas, Gabriel¸,B.A., Ph.D., Rutgers

Walczak, Alexandra, B.S., Ramapo College, Ph.D., Rutgers

Life Sciences (SAS)

Learning Goals

Learning Goals

Our overarching goal for educating our students majoring in biological sciences is to inspire them to want to discover and understand the natural world. In the process of achieving this goal, we expect our students to acquire not only facts and concepts, but also skills and perspectives. We hope that our learning goals will both prepare our students for a variety of career objectives and supply them with the tools to become lifelong learners in the ever-evolving world of biological sciences.

Learning Goals:

I. To acquire the appropriate factual and conceptual knowledge that provides students with a foundation to further their education and career in the areas of life science or health science. Students will be able to demonstrate basic knowledge (e.g., identify, define, explain, etc.) of the concepts, practices, and principles that comprise the biological sciences.

II. To develop data analysis and statistical reasoning skills that prepare students for a society increasingly reliant on the use of data and information. Students will be able to interpret/evaluate patterns in data presented in tables, figures, and graphs, as well as be able to organize, summarize, and present data.

III. To develop the ability to use scientific reasoning as embodied by the structured process commonly known as the scientific method to empower students with the ability to generate and refine knowledge. Students will be able to evaluate and apply the practice of science.

IV. To develop critical thinking and problem-solving skills necessary to prepare students to evaluate, synthesize, and generate knowledge that provides them with a competitive advantage to adapt to an evolving, global, and knowledge-based society. Students will be able to demonstrate application of higher-order thinking (e.g., classify, diagnose, evaluate, synthesize, hypothesize, etc.). Students will develop an understanding of not only the connections within biology, but also the connections between biology and other scientific disciplines.

Life Sciences (SAS)

Entry Requirements of the Major

Entry Requirements of the Major

Students wishing to major in biological sciences must have completed two semesters of General Biology and Biological Research Laboratory with a grade of C or better in each course. Both semesters of General Biology must have been completed at the same institution or on the same campus at Rutgers. No more than two courses with a grade of D may be used to fulfill the requirements of the major. A 2.0 grade-point average must be maintained in the life sciences core and elective courses applied toward the major. Students must meet with an adviser before they can successfully declare their major.

Life Sciences (SAS)

Major Requirements

Major Requirements

The program in biological sciences, administered through the Division of Life Sciences Office of Undergraduate Instruction, is intended to provide a broad and comprehensive training in modern biology. This course of study is recommended for those who wish to study biology as part of their liberal arts education, preparing them for a career in one of the health professions, graduate studies in biology, a teaching career in secondary schools (courses in education also are required), as well as employment in various areas of the life sciences. If a student wishes to concentrate his or her studies in a specific area of biology, he or she should consider a major offered by one of the departments in the Division of Life Sciences or in the School of Environmental and Biological Sciences. Faculty advisers are available to assist each student with course selection and program requirements.

A minimum of 20 credits of coursework from among general biology, genetics, and life sciences electives must be completed in residence. In other words, no more than 16 credits in this part of the major requirements may be transferred from any institution outside of Rutgers University-New Brunswick. This rule is intended to assure that students receiving degrees from Rutgers-New Brunswick have taken a minimum number of courses in their major with this faculty. Please keep in mind that although a course may transfer from another institution into one of the Rutgers-New Brunswick schools, it will not necessarily be accepted toward the major in biological sciences. Therefore, all transfer courses must be evaluated and accepted by the advising office of the Office of Undergraduate Instruction in order to count toward the major. As indicated earlier, students must complete both semesters of general biology at the same institution or on the same campus of Rutgers before becoming eligible to declare the biological sciences major. Any life sciences courses applied to the major in biological sciences should be taken within 10 years of graduating. Returning students must meet with their adviser to discuss their path to graduation. Credits for cooperative education and Winter Session courses (exceeding 1 credit) may not be used to satisfy requirements for the major in biological sciences. To be applied to the major, Summer Session courses must be offered over a minimum of five weeks. Online courses will be reviewed on a case-by-case basis to confirm that they meet departmental learning goals before they may be used to satisfy the requirements for the major.

The course requirements for the biological sciences major are divided into two sections: the life sciences core courses and the life sciences electives.

Required Life Sciences Core Courses (47 credits)

01:119:115-116 General Biology I,II (4,4)
01:119:117 Biological Research Laboratory (2)
01:160:161-162 General Chemistry (4,4) or 01:160:163-164 Honors General Chemistry (4,4) or 01:160:165-166 Extended General Chemistry (4,4)
01:160:171 Introduction to Experimentation (1)
01:160:307-308 Organic Chemistry (4,4) or 01:160:315-316 Honors Organic Chemistry (4,4)*
01:160:311 Organic Chemistry Laboratory (2)
01:750:203-204 General Physics (3,3) or 01:750:271-272 Honors Physics***
01:750:205-206 General Physics Laboratory (1,1)***
01:640:135,~~138~~136 Calculus for the Life and Social Sciences (4,4)** or 01:640:151-152 Calculus for Mathematical and Physical Sciences (4,4)
01:447:380 Genetics (4)
* With approval from a Biological Sciences Advisor, 01:160:308/316 may be replaced by another elective course. Please meet with an Advisor to discuss.

**01:750:193-194 (4,4) or 01:750:201-202 (5,5) may be substituted for 01:750:203-204 (3,3) plus 01:750:205-206 (1,1).
***Calculus II 01:640:13~~8~~6(4) may be substituted by 01:960:379 Basic Probability and Statistics (3), 01:960:401 Basic Statistics for Research (3), or 01:960:211-212 Statistics I,II (3,3).

Life Sciences Electives (24 credits)

It is highly recommended that students meet with a life sciences adviser in the Division of Life Sciences Office of Undergraduate Instruction when planning their elective courses. It is important that the courses taken complement each other as much as possible and are not merely a collection of unrelated topics.

The electives must include at least three laboratory courses, only one of which may be satisfied by research work. Biological Research Laboratory and "library research" do not qualify for this requirement. A minimum of six courses (18 credits) must be at the 300 or 400 level, including at least three separate laboratory courses or three courses with a laboratory component. The laboratory associated with genetics (01:447:382 or equivalent), if taken, may be used to satisfy one of the three laboratory requirements.

No course at the 100 level may be used to satisfy the life sciences elective requirements. A maximum of 6 credits of independent study/research/honors research may be used toward the 24 elective credits. Please keep in mind that a minimum grade-point average of 2.8 is required to enroll in an independent study/research course in biological sciences. Research courses can satisfy only one of the three laboratory requirements, regardless of number of credits. Courses taken on a pass/fail basis may not be used to satisfy requirements for the major in biological sciences. A grade-point average of 2.0 or better in courses credited toward the major is required. No more than two courses with a grade of D may be used to fulfill the requirements of the major.

The elective courses must include at least one course (3 or 4 credits) each from the Departments of Cell Biology and Neuroscience 146, Genetics 447, Molecular Biology and Biochemistry 694, and Ecology, Evolution, and Natural Resources 11:216 at the School of Environmental and Biological Sciences. A list of approved courses in subject areas in addition to those in the Division of Life Sciences (Biological Sciences 119, Cell Biology and Neuroscience 146, Genetics 447, and Molecular Biology and Biochemistry 694) will be published by the advising office of the Office of Undergraduate Instruction. It is strongly recommended that students consult this list, which is available

on the website, prior to registering for their courses. Generally, acceptable courses from other departments on any campus of Rutgers University have a year of general biology as a prerequisite; however, there are exceptions. It is imperative for students to consult the published list and meet with an adviser. Credits from cooperative education and Winter Session courses (exceeding 1 credit) may not be used to satisfy requirements for the major in biological sciences. To be applied to the major, Summer Session courses must be offered over a minimum of five weeksIf double majoring with another permitted life sciences major, at least four of the 3-4 credit life science courses applied to the Biology major may not overlap with courses used to fulfill second major requirements. Given that biological sciences is a dynamic and developing field, it is critical that coursework applied to the major must be current. Thus, any life sciences courses applied to the major in biological sciences should be taken within 10 years of graduating. Returning students must meet with their adviser to discuss their path to graduation.

Life Sciences (SAS)

Minor Requirements

Minor Requirements

The minor requires four courses of at least 3 credits each in life sciences subjects as well as General Biology and Biological Research Laboratory. Both semesters of General Biology must be completed at the same institution or on the same campus at Rutgers. No other course at the 100 level may be used to satisfy the minor. A minimum of 11 credits must be taken at Rutgers University-New Brunswick. A maximum of 3 credits of research in a life sciences subject may be used toward the minor. A minimum of three courses at the 300 level or above is required. If majoring in a permitted life sciences major, no more than two of the four life science courses applied to the minor requirements may overlap with courses used to fulfill major requirements. Only life sciences courses acceptable for the biological sciences major may be used for the minor. Courses in chemistry, mathematics, or physics do not count toward the minor. A grade-point average of 2.0 or better in courses credited toward the minor is required. No more than one course with a grade of D may be used to fulfill the requirements of the minor.

Life Sciences (SAS)

Independent Study and Research in Biology

Independent Study and Research in Biology

A minimum cumulative grade-point average of 2.8 is required for a student to register for an independent study/research course in biological sciences. A maximum of 6 credits of laboratory-based independent study, research, or honors projects may be used to fulfill the elective credits requirement in biology. The independent study/research form, available from the advising office of the Office of Undergraduate Instruction, must be completed and signed by the professor in whose laboratory the student will study prior to initiating the research project. Approval of a research proposal by the director of advising and a special permission number from the Office of Undergraduate Instruction is necessary for registration. Students may not earn academic credit for laboratory projects for which they are being paid. Students wishing to apply research credits from other departments toward the major in biological sciences must get approval from the advising office of the Office of Undergraduate Instruction, Division of Life Sciences, prior to beginning their research project.

Life Sciences (SAS)

Departmental Honors Program

Departmental Honors Program

To qualify, a student must have a cumulative grade-point average of 3.0 or better and an average of 3.4 or better in life sciences core and elective courses credited toward the biological sciences major at the end of the junior year and previous research experience. At that time, the student should apply formally to the advising office of the Office of Undergraduate Instruction. Accepted students are expected to complete at least 6 credits over two semesters in an independent research project, resulting in a thesis, and to pass an oral examination before a faculty committee in the general field of the student's program of emphasis. If the research is done in a laboratory outside of the Division of Life Sciences, the examination committee must include at least one individual from the Division of Life Sciences faculty. Departmental Honors is completed in the fall and spring of senior year. Students accepted into special programs (e.g. BA/MD) may complete honors during junior year.

Honors students must register either for an honors course sequence in life sciences or for a course sequence in a school honors program. These decisions should be discussed with an adviser. An approval form (available in the advising office) must be completed.

Life Sciences (SAS)

Joint B.A./M.D. Program (Rutgers Undergraduate-Robert Wood Johnson Medical School)

Joint B.A./M.D. Program (Rutgers Undergraduate-Robert Wood Johnson Medical School)

Rutgers Undergraduate/Robert Wood Johnson Medical School Joint Bachelor of Arts/Medical Degree (B.A./M.D.) Program

This program is designed for high-achieving premedical students of Rutgers University who are in their sophomore year. Specially selected students will obtain bachelor's and medical degrees in a seven-year program of study taken at Rutgers undergraduate units and Robert Wood Johnson Medical School (RWJMS).

Application to this program is open to all undergraduate students enrolled at Rutgers University, New Brunswick. It is not directly associated with any one school within the university but see below for specific restrictions.

Admission is a two-stage and highly competitive process. In the first stage, undergraduate students are admitted into the program by an executive committee consisting of faculty from the appropriate units. Eligible applicants are sophomores at any of the undergraduate schools of Rutgers University who have spent at least a year here. Prospective applicants from Rutgers University-Newark and Rutgers University-Camden must transfer to one of the units in New Brunswick for their sophomore year and complete at least 30 credits here. All applicants must have completed 4 semesters of college with a minimum of 60 credits. Applicants with an Associate¿s Degree, regardless of whether it was earned as a dual degree in high school or as a traditional degree after high school,

are ineligible to apply for the program. Admitted students will need to complete all of the core requirements of their undergraduate unit and major requirements with the exception of Biological Sciences and Cell Biology and Neuroscience majors, who may apply credit from the first professional year toward the major requirements. During the fourth year, students will be full time at the medical school and elective credits will count towards the undergraduate degree. The executive committee reviews applications and selects those students who are deemed most qualified for the program. The second stage occurs typically after the fourth year of study. It is the responsibility of the RWJMS Admissions Committee to review the credentials of students recommended by the Joint Program Executive Committee. Students who are deemed to have met the academic and nonacademic standards of the program will be recommended to the RWJMS Admissions Committee. The purpose of this second, noncompetitive review is to ascertain that the student has maintained adequate academic and nonacademic qualities appropriate for retention in the medical school. It is expected that students will have grades of A or B (Honors or High Pass) in courses taken at both universities. However, recommendation is not automatic. The final decision rests with the RWJMS Admissions Committee. Upon approval by this admissions committee, the student will be permitted to continue into the fifth year of study and will be matriculated formally as a candidate for the M.D. degree at RWJMS.

Applicants to the B.A./M.D. program must be in their fourth semester at Rutgers University. Applications are available in the Health Professions Office after spring break; they are due by the end of May. There is no rolling admissions policy. Decisions are expected to be made in July. By the end of the semester of application, applicants must have completed a minimum of 60 credits of which at least 30 credits must be at Rutgers, and they must have been in attendance at Rutgers, New Brunswick a minimum of one year. Additionally, applicants must have a minimum cumulative and science grade-point average of 3.5 by the end of the third semester and sustain it through the end of the fourth. The applicant must have completed, or be in the process of completing by the end of the fourth semester, two semesters of biology with lab, two semesters of general chemistry with lab, two semesters of organic chemistry, one semester of college-level mathematics, and one semester of English. Applicants who have not taken General Biology I and II and lab at Rutgers University, either because they have been awarded advanced placement biology credits or because they have transferred equivalent courses from another institution, must have at least one year of upper-division biology courses at Rutgers-New Brunswick (i.e., two courses of at least 3 or more credits each at the 200 level or higher). Those students who are admitted to the program without having two semesters of physics, two semesters of English, and organic chemistry lab must complete these requirements by the end of the third year of study. Students who did not take the SAT or ACT but who are admitted to the program will be required to take the MCAT by April of the junior year and score competitively with a total score of at least 508 (minimum single sub score of 123). An application form has been developed that allows the student to provide the executive committee with information it deems useful for its deliberations.

The bachelor's degree will be awarded upon completion of the undergraduate college and major requirements, by the end of year four. Upon satisfactory completion of year seven and all RWJMS requirements, the student will receive the medical degree.

Students who wish to pursue a major other than biological sciences must discuss their plans with the appropriate department in order to establish the requirements they need to complete for their major. For a student at Rutgers-New Brunswick who has elected to major in biological sciences, 15 credits from RWJMS will be applied toward the major (as stipulated below). The baccalaureate degree will be awarded upon completion of the undergraduate college requirements and major requirements, usually by the end of year four. The number of credits, however, is not directly translated between the two universities; no more than 4 credits per laboratory course and 3 credits per non-laboratory course taken at RWJMS may be used toward the bachelor's degree at Rutgers.

A student enrolled in the program completing a major in biological sciences at Rutgers-New Brunswick is required to complete remaining Life Science Core Curriculum coursework and Intro to Biochemistry (01:694:301) and three approved life sciences electives (3- or 4-credit courses) at Rutgers-New Brunswick. Students who have not taken General Biology I and II at Rutgers, either because they have been awarded AP biology credit or because they have transferred equivalent courses from another institution, must complete an additional approved life sciences electives (3- or 4-credit courses) at Rutgers-New Brunswick.

Students in the program must meet with advisers at the medical school and at their undergraduate school when planning their elective courses. No more than one independent study/research course may be applied toward the biological sciences major for students in the B.A./M.D. program. Please be sure to meet with a biological sciences adviser when selecting life science elective courses because not all course combinations are allowed given overlap in subject matter taught at Rutgers' undergraduate units and RWJMS.

For further information on this program, you may contact the Division of Life Sciences, Health Professions Office, Nelson Biological Laboratories, 604 Allison Road, Piscataway, NJ 08854-8082, at 848-445-5667.

Life Sciences (SAS)

Joint B.A./M.D. Program (Rutgers Undergraduate-New Jersey Medical School)

Joint B.A./M.D. Program (Rutgers Undergraduate-New Jersey Medical School)

Rutgers Undergraduate/New Jersey Medical School Joint Bachelor of Arts/Medical Degree (B.A./M.D.) Program

The Rutgers Undergraduate/New Jersey Medical School joint program started in the fall of 2003. The purpose of the program is to permit students to begin their medical education after their third year or at least 96 degree credits at Rutgers. Specially selected students will obtain bachelor's and medical degrees in a seven-year program of study taken at Rutgers undergraduate units and New Jersey Medical School (NJMS).

This program is only open to students enrolled in Rutgers University-New Brunswick schools.

Admission is a two-phase and highly competitive process. In the first phase, undergraduate students are admitted into the program by the Joint Program Executive Committee consisting of faculty from the appropriate units. Eligible applicants are sophomores at any of the undergraduate schools at the New Brunswick location of Rutgers University who have been enrolled here for at least one year. The executive committee reviews applications and selects those students who are deemed most qualified for the program. The second phase occurs typically after the third year of study. It is the responsibility of the NJMS Admissions Committee to review the credentials of students recommended by the Joint Program Executive Committee. The purpose of this second review is to ascertain that the student has maintained adequate academic and nonacademic qualities appropriate for retention in the medical school. It is expected that students will have grades of A or B in courses taken at Rutgers. Students must complete the Medical College Admission Test (MCAT) by January of the junior year before matriculating at NJMS and be required to be in the competitive range of other accepted NJMS students. This second review is noncompetitive. Students who are deemed to have met the academic and nonacademic standards of the program will be recommended to the NJMS Admissions Committee. However, recommendation is not automatic. The final decision

rests with the Medical School Admissions Committee. Upon approval by the Medical School Admissions Committee, the student will be permitted to continue into the next year of study and will be matriculated formally as a candidate for the M.D. degree at the New Jersey Medical School.

Applicants for the program must be in their fourth semester at Rutgers-New Brunswick. Applications are available in the Health Professions Office after spring break; they are due by the end of May. There is no rolling admissions policy. Decisions are expected to be made in July. By the end of the semester of application, applicants must have completed a minimum of 60 credits of which at least 30 credits must be at Rutgers, and they must have been in attendance at Rutgers a minimum of one year. Additionally, applicants must have a minimum cumulative and science grade-point average of 3.5 by the end of the third semester which must be maintained through the end of the fourth. The applicant must have completed, or be in the process of completing by the end of the fourth semester, two semesters of biology with lab, two semesters of general chemistry with lab, two semesters of organic chemistry, one semester of college-level mathematics, and one semester of English. Applicants who have not taken General Biology I and II and lab at Rutgers, either because they have been awarded advanced placement biology credits or because they have transferred equivalent courses from another institution, must have at least one year of upper-division biology courses at Rutgers (i.e., two courses of at least 3 or more credits each at the 200 level or higher). Those students who are admitted to the program without having two semesters of physics, organic chemistry lab, and two semesters of English must complete these requirements by the end of the third year of study. An application form has been developed that allows the student to provide the committee with information the committee deems useful for its deliberations.

Students will be admitted at the end of the spring semester of year two and be formal members of the program beginning with year three. Prior to leaving the Rutgers undergraduate unit, students must satisfy all college and major requirements, except for the credits which they will receive from NJMS (please see next paragraph). For a student at Rutgers-New Brunswick who has elected to major in biological sciences, 15 credits from NJMS will be applied toward the major.

The baccalaureate degree will be awarded upon completion of the undergraduate college requirements and major requirements by the end of year four. Upon satisfactory completion of year seven or eight, as well as all New Jersey Medical School requirements, the student will receive the medical degree.

A student enrolled in the program completing a major in biological sciences at Rutgers-New Brunswick is required to complete remaining Life Science Core Curriculum coursework and three approved life sciences electives (3- or 4-credit courses) at Rutgers-New Brunswick. Students who have not taken General Biology I and II at Rutgers, either because they have been awarded AP biology credit or because they have transferred equivalent courses from another institution, must take Genetics 01:447:380, and four approved life sciences electives (3- or 4-credit courses) at Rutgers-New Brunswick. No more than one independent study/research course may be applied toward the biological sciences major for students in the B.A./M.D. program. Please be sure to meet with a biological sciences adviser when selecting life science elective courses because not all course combinations are allowed given overlap in subject matter taught at Rutgers and NJMS.

For further information on this program, you may contact the Division of Life Sciences, Health Professions Office, Nelson Biological Laboratories, 604 Allison Road, Piscataway, NJ 08854-8082, at 848-445-5667.

Joint B.A./D.M.D. Program (Rutgers School of Arts and Sciences-Rutgers School of Dental Medicine)

Joint B.A./D.M.D. Program (Rutgers School of Arts and Sciences-Rutgers School of Dental Medicine)

Rutgers School of Arts and Sciences/Rutgers School of Dental Medicine Joint Bachelor of Arts/Doctor of Medicine in Dentistry (B.A./D.M.D.) Program

Rutgers School of Arts and Sciences/Rutgers School of Dental Medicine joint program started in the spring of 2002. The purpose of the program is to permit students to begin their dental education after their third year or at least 98 credits at Rutgers. Specially selected students will obtain bachelor's and dental degrees in a seven-year program of study taken at Rutgers undergraduate units and Rutgers School of Dental Medicine.

This program is open to students enrolled at the School of Arts and Sciences, Rutgers University-New Brunswick. The program is administered by the Health Professions Office.

Admission is a two-phase and competitive process. In the first phase, undergraduate students are admitted into the program by the Executive Committee of the Joint Program consisting of faculty from the appropriate units. The executive committee reviews applications and selects those students who are deemed most qualified for the program. The second phase occurs typically after the third year of study. It is the responsibility of the Rutgers School of Dental Medicine Admissions Committee to review the credentials of students recommended by the articulated program executive committee. The purpose of this second review is to ascertain that the student has maintained adequate academic and nonacademic qualities appropriate for admission to the dental school. It is expected that students will have grades of A or B in courses taken at Rutgers University. Students must complete the Dental Admissions Test (DAT) and earn scores of 20 or better in Total Science, Academic Average, Organic Chemistry, General Chemistry, and Biology. Students may only take the DAT one time to qualify for this program. The second review is noncompetitive. Students who are deemed to have met the academic and nonacademic standards of the program will be recommended to the Rutgers School of Dental Medicine Admissions Committee. However, recommendation is not automatic. The final decision rests with the Dental School Admissions Committee. Upon approval by the Dental School Admissions Committee, the student will be permitted to continue into the next year of study and will be matriculated formally as a candidate for the Doctor of Medicine in Dentistry (D.M.D.) degree at the Rutgers School of Dental Medicine.

Applicants to the program must be in their fourth semester at the School of Arts and Sciences, Rutgers-New Brunswick. Applications are available in the Health Professions Office after spring break; they are due by the end of May. There is no rolling admissions policy. Decisions are expected to be made in July. By the end of the semester of application, applicants must have completed a minimum of 60 credits of which at least 30 credits must be at Rutgers, and they must have been in attendance at the School of Arts and Sciences, Rutgers-New Brunswick a minimum of one year. Additionally, applicants must have a minimum cumulative and science grade-point average of 3.5 by the end of the third semester, which must be maintained through the end of the fourth. The applicant must have completed, or be in the process of completing by the end of the fourth semester, two semesters of biology with lab, two semesters of general chemistry with lab, two semesters of organic chemistry, two semesters of college-level mathematics (Calc I and either Calc II or an approved Statistics course) and one semester of English. Applicants who have not taken General Biology I and II and lab at Rutgers, either because they have been awarded

advanced placement biology credits or because they have transferred equivalent courses from another institution, must have at least one year of upper-division biology courses at Rutgers (i.e., two courses of at least 3 or more credits each at the 200 level or higher). If AP credit was granted for general chemistry, then organic chemistry I and II and laboratory and a course in biochemistry at Rutgers are required. If AP credit was granted for English, upper level English at Rutgers is required with the same amount of credit work. If AP credit was granted for physics, two approved courses from Physics or Kinesiology & Health at Rutgers are required. Those students who are admitted to the program without having two semesters of physics, biochemistry, organic chemistry lab, and two semesters of English, must complete these requirements by the end of the third year of study.

The B.A./D.M.D. program is a seven-year program with year one being the first undergraduate year. Students will be admitted at the end of the spring semester of year two and be formal members of the articulated program beginning with year three. Prior to leaving the School of Arts and Sciences, Rutgers-New Brunswick, students must satisfy all college and major requirements, except for the credits which they will receive from Rutgers School of Dental Medicine (please see below). For a student at the School of Arts and Sciences, Rutgers-New Brunswick who has elected to major in biological sciences, 15 credits from Rutgers School of Dental Medicine will be applied toward the major.

The baccalaureate degree will be awarded upon completion of the general education and major requirements by end of year four. Upon satisfactory completion of year seven or eight, as well as all Rutgers School of Dental Medicine requirements, the student will receive the dental degree.

A student enrolled in the joint program completing a major in biological sciences at Rutgers-New Brunswick is required to complete any remaining Life Sciences Core Curriculum coursework and three approved life sciences electives (3- or 4-credit courses) at Rutgers-New Brunswick. Students who have not taken General Biology I and II at Rutgers-New Brunswick, either because they have been awarded AP biology credit or because they have transferred equivalent courses from another institution, must take Genetics 01:447:380, and four approved life sciences electives (3- or 4-credit courses) at Rutgers-New Brunswick. No more than one independent study/ research course may be applied toward the biological sciences major for students in the B.A./D.M.D. program. Please be sure to meet with a biological sciences adviser when selecting life science elective courses because not all course combinations are allowed given overlap in subject matter taught at Rutgers-New Brunswick and Rutgers School of Dental Medicine.

For further information on this program, you may contact the Division of Life Sciences, Health Professions Office, Nelson Biological Laboratories, 604 Allison Road, Piscataway, NJ 08854-8082, at 848-445-5667.

Life Sciences (SAS)

Joint B.A./M.S. Physician Assistant Program (Rutgers School of Arts and Sciences-School of Health Professions)

Joint B.A./M.S. Physician Assistant Program (Rutgers School of Arts and Sciences-School of Health Professions)

Rutgers School of Arts and Sciences/Rutgers School of Health Professions Joint Bachelor of Arts/Master of Science Degree (B.A./M.S.) Physician Assistant Program

This is a six-year (3+3) program offered jointly by the School of Arts and Sciences and the School of Health Professions (SHP). The program can be looked at as a two-phase program, an undergraduate phase followed by a professional phase. This program is open to students enrolled at the School of Arts and Sciences, Rutgers University-New Brunswick, who are U.S. citizens, permanent residents of the United States, or international individuals currently on a student visa. At a minimum, applicants must be enrolled for one year at Rutgers-New Brunswick earning at least 30 credits.

The first phase of the program includes three years of undergraduate liberal arts and basic science education. Students may apply to the second (professional) phase in April of their second year by applying to the Physician Assistant (PA) program. Personal interviews will be required of those applicants being considered for admission. The interview will serve to determine the applicant's emotional and intellectual maturity, ability to communicate, and the potential to achieve career satisfaction within the physician assistant role. Applicants must have a cumulative and science GPA of 3.2. In cases where individuals may show high potential by improved performance, exceptions to this requirement may be considered. Please note that acceptance by Rutgers University does not guarantee acceptance by the PA program.

Applicants to the program must have completed the following courses with a grade of C or better: at least one semester (3 credits) of English composition, applied statistics or biostatistics (from Psychology, Biology, or Math departments), General Biology I and II with lab (119:115, 116, and 117, or equivalents); General Chemistry I and II with lab (160:161,162 and 171, or equivalents); and General Psychology (830:101, or equivalent). If the student has been granted AP credit by Rutgers for science courses, additional science courses will be required.

All applications must be received by June 1 and final notices of acceptance will be made by August 1. If the applicant is accepted into the program, it will be contingent on maintaining a 3.2 GPA through the end of the third undergraduate year at Rutgers-New Brunswick, and on all requirements for the undergraduate degree being met before the beginning of the fourth year. Students who are accepted into the second phase of the program will begin this phase at the beginning of their senior year. At the end of the senior year, these students will receive a bachelor of arts degree conferred by the School of Arts and Sciences, Rutgers University-New Brunswick. After completion of the remaining two years of the PA program, graduates will receive a master of science degree awarded by Rutgers School of Health Professions.

Before entering the second (professional) phase, a student accepted by this program must also complete for the PA program, Functional Human Anatomy (01:377:223), General Microbiology (01:447:390), Intro to Biochemistry (01:694:301) and Systems Physiology (01:146:356) (waived if Gen Bio II is completed at Rutgers-NB and not AP credit), and 6-8 additional credits of life science electives. Students majoring in biological sciences are required to have completed, in addition to the School of Arts and Sciences core distribution requirements, the Life Sciences Core requirements, Intro to Biochemistry (01:694:301) and General Microbiology (01:447:390) and one (three credit or more) course from the 216 subject area approved electives. Students with AP or transfer credit of General Biology I and II and lab must take an additional life science elective course for 3 or more credits. A maximum of 14 credits from SHP courses will be accepted toward the biological sciences major. Please be sure to meet with a biological sciences adviser when selecting life sciences elective courses because not all course combinations are allowed given overlap in subject matter taught at Rutgers and SHP.

For a complete description of the requirements for the major in biological sciences, please read the appropriate section under the Division of Life Sciences in this catalog.

For more information about this program, you may contact the PA program office at the School of Health Professions, 675 Hoes Lane, Piscataway, NJ 08854, at 732-235-4444; or the Division of Life Sciences, Health Professions Office at Rutgers University, Nelson Biological Laboratories, 604 Allison Road, Piscataway, NJ 08854-8082, at 848-445-5667.

Life Sciences (SAS)

Courses

Courses

With the exception of 01:119:115,116, and 117 General Biology I and II and Biological Research Laboratory, courses numbered at the 100 level may not be used for major credit in any of the majors within the Division of Life Sciences.

01:119:098 ***Foundations for Biological Science (E2)***
Selected topics in general biology: introduction to cellular organization, metabolism, genetics, reproduction, and organ systems. Development of analytical reasoning and science-oriented study techniques.
Preparation for college-level general biology.

01:119:103 ***Principles of Biology (4)***
Selected topics in general biology, including cell structure, genetics, plant and animal diversity, basic plant and animal biology, ecology, and evolution.
Lec. 3 hrs., lab. 3 hrs. Designed for students who must take a one-semester laboratory course in introductory biology to meet major requirements. Credit not given for this course if student has already completed 01:119:115. Not for life sciences major credit.

01:119:109,110 ***Biology Practice Group (1,1)***
Students will work actively to (1) organize the lecture content, (2) identify what they are expected to do with that content (outcomes), (3) prepare and explain study aids (organizers) to ensure that they correctly understand the week¿s content, and (4) begin the self-evaluation process to gauge exam preparedness. Discussion of the basic methods and principles.
Corequisite for 109 is 01:119:115; corequisite for 110 is 01:119:116.

01:119:111,112 ***Reading in General Biology (1,1)***
Discussion and reading providing extensive and advanced coverage of selected topics.
Corequisite for 111 is 01:119:115; corequisite for 112 is 01:119:116.

01:119:115 ***General Biology I (4)***
Broad principles of cell biology, genetics, and evolution; the diversity of life and its physiology, ecology, and population dynamics. Lec. 3 hrs., Wkshp. 80 min.
Prerequisite has two parts: writing (prerequisite of 01:355:101, 01:355:103, or 01:355:104, or placement into 355:101 or 355:104) and math (prerequisite of 01:640:026 or placement into 640:CMA, 640:PCA, 640:CLG, or 640:CLS).

01:119:116 *General Biology II (4)*
Broad principles of cell biology, genetics, and evolution; the diversity of life and its physiology, ecology, and population dynamics.
Lec. 3 hrs., Wkshp. 80 min. Prerequisite: 01:119:115 with a grade of C or better. Credit not given for both this course and 01:119:102.

01:119:117 *Biological Research Laboratory (2)*
Laboratory designed to introduce and explore principles of research in the biological sciences by engaging in semester-long research projects requiring students to analyze data, synthesize new experiments, and evaluate findings.
Prerequisite: 01:119:115 with a grade of C or better. Corequisite: 01:119:116.

01:119:120 *STEM Success Seminar (1.5)*
Increases ability to control academic success and improve transition to the university environment in furtherance of educational and career goals. Reflection on recent and current academic experience and career aspirations. Setting of priorities and alignment of time and effort towards those ends.
By special permission only.

01:119:127-128 *Anatomy and Physiology: Health Sciences (4,4)*
Structure and function of human organ systems. Some microanatomy and biochemical aspects of physiology included.
Lec. 3 hrs., lab. 3 hrs. For nursing, medical technology, physical therapy, and other professional students. Not for life sciences major credit.

01:119:131 *Microbiology for the Health Sciences (3)*
Introduction to microbes with emphasis on the nature and behavior of microorganisms, the interrelationships between microbes and the human host in health and disease, and the principles of prevention and control of infectious disease.
Not open to students who have taken 01:447:390. For nursing and other professional students. Not for life sciences major credit. Prerequisites: 01:199:115-116 or 01:119:127-128.

01:119:132 *Microbiology for the Health Sciences Laboratory (1)*
Laboratory to accompany 01:119:131.
Lab. 3 hrs. Pre- or corequisite: 01:119:131.

01:119:140 *The DNA Revolution (Honors) (3)*
Introduction to fundamentals of molecular genetics, biotechnology, and modern genetics, including a laboratory research project using molecular biology and bioinformatics techniques. Intended primarily for nonscience majors, but may also appeal to prospective chemists, physicists, engineers, and computer scientists.
Restricted to first-year and sophomore students in the School of Arts and Sciences Honors Program or the Honors College. Credit not given for both this course and 01:119:140 or 01:694:215 or 315, or 01:447:315. Not for life sciences major credit.

01:119:148 *Moving Bodies: The Biology of Movement (3)*
Considers fundamental processes that allow humans and other animals to move, including structural basis (bones and muscles), control (brain and nervous system), conversion of food into energy (digestion and nutrition),

movement of food and oxygen to muscles (circulation), and some common and familiar injuries and illnesses and their treatments.
Credit not given for both this course and 01:119:100, 103, 115-116, or 127-128. Not for life sciences major credit.

01:119:150 *Biology, Society, and Biomedical Issues (3)*
Discussion of current topics and issues in human health and medicine from a biological perspective.
Credit not given for both this course and 11:115:100. Not for life sciences major credit.

01:119:154 *Genetics, Law, and Social Policy (3)*
Principles of human and behavioral genetics and their legal, ethical, and social implications. Topics include genetic screening, counseling, and engineering; reproductive regulation; and human behavior genetics.
Prerequisite: Sophomore standing. Not for life sciences major credit or related major.

1:119:155 *Human Genetics (3)*
How our genes influence our development and health, how both normal traits and diseases are transmitted through families, how genetics is used in forensics and personalized medicine, and the genetic tests that are offered directly to consumers.
Not for life sciences major credit.

01:119:156 *Genetics, Evolution, and Human Health (4)*
The human body and human behavior, shaped by more than four billion years of evolutionary processes. Scientific and social implications of current ideas and controversies of evolution and genetics.
Not for life sciences major credit.

01:119:160 *Biology, Society, and Ecological Issues (3)*
Ecological and evolutionary ideas affecting space ecology; population increase, food supply, air and water pollution, war, and nuclear energy.
Not for life sciences major credit or related major.

01:119:182 *Essentials of Human Reproduction (3)*
Anatomical and physiological bases of human sexuality; biological and cultural aspects of sexual differentiation and psychosexual development, contraception, venereal disease, and sexual lifestyles.
Not for life sciences major credit or related major.

01:119:195 *Brain, Mind, and Behavior (3)*
Honors course discussing the interrelationship between the brain, the mind, and behavior.
Open to students in the School of Arts and Sciences Honors Program or the Honors College. Not for life sciences major credit or related major.

01:119:199 *Preparation for General Biology (4)*
For first- and second-year students planning science majors. Enrollment based on placement scores. Selected concepts in biology, proven learning strategies for college science courses, and instruction in the scientific method. Prepares students for success in the General Biology sequence (01:119:115-117).
Lec./rec. 3 hrs., lab. 3 hrs. Enrollment restricted by placement. Not for life sciences major credit.

01:119:201-202 ***Independent Study in Biology (1-3,1-3)***
Independent study under the direction of a member of the faculty. Written report required.
Prerequisites: Declared biological sciences major or minor. Permission of the Office of Undergraduate Instruction; cumulative grade-point average of 2.8 or better. May not be used to fulfill a laboratory requirement.

01:119:204 ***Outreach in Biology (1)***
Introduction to the basic principles and best practices of outreach in the biological sciences. Emphasis on understanding how to translate technical concepts and techniques to lay audiences incorporating best practices in active learning, public speaking and curriculum development. Recommended for students interested in teaching careers and related positions in science communication.
Prerequisites: 01:119:115, 01:119:116, and 01:119:117. By special permission.

01:119:205 ***Internship in Life Sciences (3)***
Development of experience and knowledge regarding the expectations, qualifications, competencies and responsibilities of professionals working within the life sciences through an internship experience with academic component. Integration of knowledge from life science coursework with the internship experience, development of new skills, and reflection on the learning experience.
Prerequisites: 01:119:116 and 01:119:117. Open only to 119 Biology Majors.

01:119:307-308 ***Research in Biology (1-3,1-3)***
Laboratory/field research on an original problem under the direction of a member of the faculty. Written report required.
Prerequisites: Declared biological sciences major or minor. Permission of the Office of Undergraduate Instruction; cumulative grade-point average of 2.8 or better. Open only to students majoring (or minoring) in biological sciences.

01:119:310 ***Communication in Biology (1)***
Effective skills for communicating science to a variety of audiences in a variety of forms including papers, grant proposals, teaching, and presentations to scientists and others. Provides support for students completing the 10-page research paper required for Research in Biology.
Prerequisites: 01:119:307, 308, 407, or 408. Corequisites: 01:119:307, 308, 407, or 408.

01:119:311 ***Current Topics in Life Sciences (1)***
Directed readings and discussion of selected scientific topics and career stories with Rutgers Life Sciences Alumni.
Junior or senior status and Division of Life Sciences major (subject code: 119, 146, 694, 447).

01:119:401 ***Clinical Practicum in the Health Professions (3)***
Development of advanced knowledge of and reflection on the qualifications, competencies, and responsibilities of physician health care providers through an internship experience and academic component integrating knowledge from life science coursework and the health care setting.
Prerequisites: 3.4 science GPA. By special permission of the Office of Undergraduate Instruction only.

01:119:406-407 ***Research in Biology (1-4,1-4)***
Laboratory/field research on an original problem under the direction of a member of the faculty. Written report is required.
Prerequisites: Declared biological sciences major or minor. Permission of the Office of Undergraduate Instruction; cumulative grade-point average of 2.8 or better. Open only to seniors majoring (or minoring) in biological sciences.

01:119:408-409 ***Honors in Biology (3-6,3-6)***
Laboratory/field research on an original problem under the direction of a member of the faculty. Written thesis, oral presentation, and defense are required.
Prerequisites: Declared biological sciences major. Permission of the Office of Undergraduate Instruction. Open only to seniors majoring in biological sciences who meet the requirements for departmental honors.

01:119:410 ***Honors Communication in Biological Sciences (1)***
Instruction on effective communication of scientific ideas and findings for both the scientific community as well as the general public. Support in writing honors theses and preparing for oral thesis defenses.
Prerequisite: 01:119:408. Corequisite: 01:119:409.

Cell Biology and Neuroscience 146

Cell Biology and Neuroscience 146

Department of Cell Biology and Neuroscience, School of Arts and Sciences

Chair: Megerditch Kiledjian

Vice Chair and Undergraduate Director: Gabriella D'Arcangelo

Distinguished Professors:

Joanna Burger, B.S., SUNY (Albany); M.S., Cornell; Ph.D., Minnesota

Megerditch Kiledjian, B.A., Rutgers; Ph.D., University of Pennsylvania

Melitta Schachner, Diploma in Biochemistry, Tübingen (Germany); Ph.D., Max-Planck Institut für Biochemie (Germany)

Wise Young, B.A., Reed; Ph.D., Iowa; M.D., Stanford

Professors:

Lori R. Covey, B.S., California (Riverside); Ph.D., Columbia

Gabriella D'Arcangelo, B.S., Bari (Italy); Ph.D., SUNY (Stony Brook)

Robin L. Davis, B.S., Pennsylvania State; M.A., San Diego State; Ph.D., Stanford

Bonnie Firestein, B.S., Michigan; Ph.D., California (San Diego)

Martin Grumet, B.S., Cooper Union; Ph.D., Johns Hopkins

Ronald P. Hart, B.S., Connecticut; Ph.D., Michigan

Arnold G. Hyndman, A.B., Princeton; Ph.D., California (Los Angeles)

Alice Y.-C. Liu, B.S., Chinese University of Hong Kong (China); Ph.D., Mount Sinai School of Medicine

Gary F. Merrill, B.S., Weber State; Ph.D., Michigan State

Kathleen M. Scott, B.A., Brown; Ph.D., Yale

Associate Professors:

Qian Cai, M.D., Shanghai Railway Med College (China); Ph.D., National Institutes of Health-Shanghai Second Medical University

Wei Dai, B.S., M.S., Beijing Normal (China); M.S., Texas Health Science Center; Ph.D., Baylor College of Medicine

Dunne Fong, B.S., Massachusetts; M.A., Ph.D., Princeton

Shu-Chan Hsu, B.S., Ph.D., British Columbia

Peng Jiang, B.S., Soochow (China); Ph.D., University of Science and Technology of China

Kelvin Y. Kwan, B.S., California Institute of Technology; Ph.D., Harvard

David Margolis, B.S., Brown; Ph.D., Washington (Seattle)

Ping Xie, B.S., Nanjing (China); Ph.D., Hong Kong University of Science and Technology

Assistant Professors:

Victoria Abraira, B.S., Southern California; Ph.D., Harvard

Santiago Cuesta, B.A., M.S., Ph.D., National University of Rosario (Argentina)

Brian Daniels, B.A., B.S., Southern Wesleyan (Central); Ph.D., Washington (Seattle)

Rafiq Huda, B.A., Carleton College; Ph.D., Northwestern University (Chicago)

Natasha O¿Brown, B.S., Davidson College; Ph.D., Stanford

Max Tischfield, B.A., Rutgers; Ph.D., Harvard

Associate Research Professors:
Xinfu Jiao, B. S., Xinxiang Medical College (China); M.S., Tongji Medical University (China); Ph.D., Shanghai Institute of Hematology (China)

Patricia Morton, B.S., Northwestern University; M.S., Ph.D., University of Wisconsin

Assistant Research Professor:

Dongming Sun, B.S., Beijing Medical University (China); Ph.D., Columbia University

Assistant Teaching Professors:

Anne Carr-Schmid, B.S., James Madison; Ph.D., Rutgers

Tara Cominski, B.S. St. Peter's University; Ph.D., Rutgers

Anne Keating, B.S., M.S., Ph.D., Rutgers

Life Sciences (SAS)

Learning Goals

Learning Goals

The Department of Cell Biology and Neuroscience offers a course of study that provides fundamental and comprehensive training in the areas of cell biology and neuroscience. The major objective of this program is to prepare students for graduate studies in cell biology and neuroscience; entry into professional schools in medicine, dentistry, or other health-related fields; or employment in industrial and pharmaceutical companies.

Learning Goals

Students will:

I. master factual and conceptual knowledge in cell biology and neuroscience that will provide a solid foundation for success in advanced training and professional careers;

II. develop an ability to summarize, integrate, and organize information; and

III. use scientific reasoning to evaluate the potential for current research and new discoveries to improve our understanding of cell biology and neuroscience and its relevance to human health and to our society.

Life Sciences (SAS)

Entry Requirements of the Major

Entry Requirements of the Major

The major in the Department of Cell Biology and Neuroscience is open to students after their first year who have completed Fundamentals of Neurobiology (01:146:245) or Fundamentals of Cell Biology (01:146:270), with a grade of C or better. Departmental approval is required.

A grade of C or better in all courses credited toward the major is required for graduation, and each course may be repeated only once to replace D/F grades.

Life Sciences (SAS)

Major Requirements

Major Requirements

The Department of Cell Biology and Neuroscience offers a program of study from which students can select one of two tracks, depending upon particular interests and career goals: a general track (default) and an honors track. Students can apply to enter the honors track at the beginning of the senior year. This track requires a minimum GPA of 3.4 in courses credited toward the major, and departmental approval. A number of core courses are required of all students in the cell biology and neuroscience major, regardless of the chosen track. No more than 16 credits from among the life science courses required for completion of the cell biology and neuroscience major may be fulfilled by credits transferred from any school outside of Rutgers University-New Brunswick. Any life science courses applied to the major should be taken within 10 years of graduating.

Required Core Courses (65 or more credits)

01:119:115-116 General Biology (4,4)

01:119:117 Biological Research Laboratory (2)

01:160:161-162 or 01:160:163-164 or 01:160:165-166 General Chemistry (4,4)

01:160:171 Introduction to Experimentation (1)

01:160:307-308 or 01:160:315-316 Organic Chemistry (4,4)

01:160:311 Organic Chemistry Laboratory (2)

01:750:203-204 General Physics (3,3) or 01:750:193-194 Physics for the Sciences(4,4)*or 01:750:271-272 Honors Physics (3,3)

01:750:205-206 General Physics Laboratory (1,1)

01:640:135,136 or 01:640:151-152 Calculus I and II (4,4) or 01:640:135 and 01:960:401 Basic Stat for Research (3) or 01:960:379 Basic Prob and Stat or 01:640:135 and 01:960:212 Statistics II (3)**

01:447:380 Genetics (4)

01:146:245 Fundamentals of Neurobiology (3)

01:146:270 Fundamentals of Cell Biology (3)

01:694:395 Biochemistry for Life Sciences (3) or 01:694:407 Biochemistry (3)

Advanced Cell Biology and Neuroscience Courses: choose three of the following:

01:146:445 Synapses, Neurons, and Circuits (3)

01:146:447 Clinical Neurobiology (3)

01:146:465 Neurobiology of Pain and Addiction (3)

01:146:472 Developmental Biology (3)

01:146:473¿ Genetic Regulation in Cell Biology¿(3)

01:146:474 Immunology (3) or 01:146:476¿ Honors Immunology (3)

01:146:481 Protein Dynamics in Cell Biology (3)

* with approval from the Undergraduate Director or CBN Advisor 01:160:308 may be replaced by an additional elective course.
** Students who take who take Physics for the Sciences 01:750:193-194 (4,4) do not need an additional Physics laboratory.
*** Students with AP statistics equivalent of 01:960:211, transfer credit for 01:960:211, or who have taken 01:960:211 at Rutgers must take 01:960:212.

Life Sciences (SAS)

Options

Options

General Track; 4 credits

This track is for students who, upon graduation, seek immediate employment or plan to attend professional schools in health-related fields. In addition to the required core courses, students must take the following courses:

1. One elective lecture courses at the 300-400 level in the life sciences area (equaling 36 or more credits)
2. One laboratory or research course (1-3 credits). Students can take a lecture course with an associated laboratory component (3-4 credits) to satisfy both requirements, or a stand-alone lecture plus a laboratory or research course.

Honors Track; 12 credits

This area of concentration is for students interested in research who, upon graduation, plan to attend graduate school or professional schools in health-related fields. A student must qualify for admission into the honors track. See the departmental honors program page in this catalog for student qualifications. In addition to the required core courses, students must complete the following courses, produce a written research thesis and an oral thesis presentation:

1. One elective lecture course at the 300-400 level in the life sciences area (3 or more credits).
2. 01:146:405 Honors Seminar (3).
3. 01:146:408-409 Honors Research (3,3).

Life Sciences (SAS)

Departmental Honors Program

Departmental Honors Program

Honors in cell biology and neuroscience are awarded to students who have successfully completed the honors track course requirements, submitted a written research thesis, and defended the thesis orally. To qualify for the honors track, a student must have attained a grade-point average of 3.4 or better in courses required for the major. The student should apply formally to the department for acceptance into the honors program by the end of the second semester of the junior year.

Life Sciences (SAS)

Courses

Courses

01:146:201,202 *Independent Study in Cell Biology and Neuroscience (1-3,1-3)*
Laboratory research under the direction of a Rutgers faculty member.
Written report required. Permission of department and an instructor willing to sponsor the student, and a cumulative grade-point average of 2.8 or better are required. May not be used to fulfill a laboratory requirement. Open only to students majoring or planning to major in cell biology and neuroscience.

01:146:245 *Fundamentals of Neurobiology (3)*
Introduction to the biology of the nervous system. Topics covered include nerve cell signaling, sensory and motor systems, and higher brain processes.
Prerequisites: 01:119:115-116.

01:146:270 *Fundamentals of Cell Biology (3)*
Principles of cell biology. Structure, function, and macromolecular organization of cellular organelles.
Prerequisites: 01:119:115-116.

01:146:295 *Essentials of Cell Biology and Neuroscience (3)*
Provides a background in the biology of neural cells and cognition.
Prerequisites: 01:119:115-116. Not intended for cell biology and neuroscience majors.

01:146:307,308 *Research in Cell Biology and Neuroscience (1-3,1-3)*
Laboratory research on an original problem under the direction of a member of the Rutgers faculty.
Written report required. Permission of department and an instructor willing to sponsor the student, and a cumulative grade-point average of 2.8 or better. Open only to students majoring or planning to major in cell biology and neuroscience.

01:146:322 *Human Histology (4)*
Structure of the tissues and organs of the human body. Lec. 3 hrs., lab. 3 hrs.
Prerequisite: 01:146:270 or 01:146:295.

01:146:328 ***Human Parasitology (3)***
Cell biology, epidemiology, pathogenesis, and clinical manifestations of human parasitic diseases.
Prerequisites: 01:119:115-116.

01:146:329 ***Human Parasitology Laboratory (1)***
Laboratory to accompany the Human Parasitology lecture course 01:146:328. Lab. 3 hrs.
Pre- or corequisite: 01:146:328.

01:146:340 ***Virology (3)***
Principles of virology including the molecular and cellular events that occur during virus replication, the host cell response, and pathogenesis. Emphasis on animal viruses that impact human health and disease. Strategies for controlling viruses.
Prerequisite: 01:146:270.

01:146:350 ***Introduction to Light Microscopy for the Life Sciences (1, minicourse)***
This course offers a comprehensive exploration of advanced imaging techniques essential for studying tissues, cells, and organelles in the life sciences.
Prerequisite: 01:146:270 or 01:146:295.

01:146:356 ***Systems Physiology (3)***
Comprehensive study of the principal organ systems of laboratory animals and humans.
Prerequisites: 01:119:115-116 and 01:160:161-162 or 163-164, and 171 Credit not given for both this course and 11:067:300.

01:146:357 ***Systems Physiology Laboratory (1)***
Laboratory to accompany the Systems Physiology lecture course 01:146:356. Lab. 3 hrs.
Pre- or corequisite: 01:146:356.

01:146:405 ***Honors Seminar (3)***
This course is intended to help students prepare a written research thesis and practice the oral thesis presentation.
Requires departmental permission. Open only to senior honors students majoring in cell biology and neuroscience. This course fulfills the SAS WCd core requirement.

01:146:406, 407 ***Research in Cell Biology and Neuroscience (1-3,1-3)***
Research under the direction of a Rutgers faculty member.
Written report required. Permission of department and an instructor willing to sponsor the student, and a cumulative grade-point average of 2.8 or better are required. Open only to students majoring in cell biology and neuroscience.

01:146:408-409 ***Honors Research (3-3)***
Two semester laboratory research sequence under the direction of a Rutgers faculty member. Written report and oral presentation required. Culminates in a written thesis and oral thesis defense.
Permission of department and an instructor willing to sponsor the student are required. Open only to seniors majoring in cell biology and neuroscience who meet the requirements for the departmental honors program.

01:146:410-411 ***Research Thesis in CBN I and II (3-3)***
Two semester laboratory research sequence under the direction of a Rutgers faculty member and the course coordinator.
Prerequisites: 01:146:307 or 01:146:308. Requires departmental permission and acceptance by a faculty mentor who will

host the student in the laboratory. Requires submission of a written thesis draft (I = Fall semester), and submission of a final written thesis and oral defense (II = Spring semester). Open to senior students majoring in cell biology and neuroscience who are not enrolled in the departmental honors program.

01:146:445 *Synapses, Neurons, and Circuits (3)*
Cellular and systems features of neurons and the fundamental unit of signaling in the nervous system, focusing on a small number of advanced topics. Focus on how to test hypotheses related to the topics addressed: intra- and inter- cellular communication; construction of neuronal networks; protein interactions at the synapse; and signal transduction pathways.
Prerequisites: 01:146:245 and 01:146:270.

01:146:447 *Clinical Neurobiology (3)*
Development and function of the nervous system with an emphasis on diseases and disorders. Topics include neurodevelopment, demyelination, tumors, and viral infections; neurological disorders/diseases; injury to the spinal cord and brain and repair; and clinical trials and the future of spinal cord and brain trauma.
Prerequisites: 01:146:245 and 01:146:270. Intended for senior students majoring in cell biology and neuroscience.

01:146:456 *Advanced Physiology (3)*
Preparation for advanced graduate study in physiology and for medical physiology (first-year medical school). Focus on mammalian physiology and the whole animal (whole organ) approach to classical experimental physiology.
Prerequisites: 01:146:356. Intended for senior and junior students.

01:146:464 *Topics in Cell Biology and Neuroscience (3)*
Directed readings and discussion of selected topics in cell biology and neuroscience.
Prerequisites: 01:146:245 and 01:146:270. Open to junior or senior students majoring in cell biology and neuroscience.

01:146:471 *Advanced Cell Biology Laboratory (3)*
Advanced laboratory methods in cell biology. Emphasis on light and electron microscopy, imaging, immunocytochemical techniques, tissue culture, and methods of identifying and separating macromolecules.
Prerequisite: 01:146:270 or permission of instructor.

01:146:472 *Developmental Biology (3)*
Genetic, molecular and cellular processes that lead from egg to embryo to mature organism.
Prerequisite: 01:146:270 or 01:447:380 or 01:447:384.

01:146:473 *Genetic Regulation in Cell Biology (3)*
Advanced topics in cell biology, focusing on genetic animal models, genomics, chromatin function, gene expression, and RNA biology.
Prerequisite: 01:146:270.

01:146:474 *Immunology (3)*
Fundamental principles of immunology with emphasis on antibody formation, immunoglobulin molecules and genes, hypersensitivity reactions, and the cellular basis for the immune response.
Prerequisites: 01:119:115-116 and 01:447:380 or 01:447:384. Recommended: 01:447:390.

01:146:475 ***Laboratory in Immunology (1)***
Biochemical and molecular analysis of immune cell function. Application of immunological techniques to the examination of normal and diseased states.
Pre- or corequisite: 01:146:474.

01:146:476 ***Honors Immunology (3)***
Introduction to the immune system, with a focus on mammalian organisms (particularly humans). Focus on critical thinking and problem-solving abilities, as well as introduction to primary research addressing contemporary immunological questions. Open only to students enrolled in the Honors College, SAS Honors Program or CBN Honors Program.
Prerequisites: 01:447:380 or 01:447:384. Credit not given for both this course and Immunology 01:146:474.

01:146:481 ***Protein Dynamics in Cell Biology (3)***
Advanced topics in cell biology, focusing on signal transduction (module 1), cell adhesion and protein transport (module 2) and cytoskeletal dynamics controlling cell movement (module 3).
Prerequisite: 01:146:270.

Learning Goals

Learning Goals

Learning Goals:

The Department of Genetics is committed to teaching science through the way we do science: through the process of doing research. The curriculum of the Department of Genetics is centered around four main goals. These goals shape our innovative courses and provide the basis for lifelong learning.

I. Knowledge specific goals: Know the terms, concepts, and theories of genetics.

II. Integrate the material from multiple courses and research to think holistically and to see the whole as well as the parts.

III. Use genetic information and ideas to critically analyze published research articles in genetics.

IV. At the end of four years, all of our students will be able to design an experiment, carry out the research using the appropriate laboratory techniques, and analyze and interpret their data. They will also be able to communicate their discoveries through a written article appropriate for publication in a peer-reviewed genetics journal, and through talks or posters appropriate for scientific meetings.

Life Sciences (SAS)

Entry Requirements of the Major

Entry Requirements of the Major

Students wishing to major in this department must have been enrolled at Rutgers for at least one semester. In addition, students must:

1. Be an SAS student

2. Have a cumulative GPA of at least 2.00, and a GPA of at least 2.8 at the time of taking research for credit.

3. Have earned a C or better in these prerequisite courses or equivalents (25-26 credits):

a. General Biology I 01:119:115

b. General Biology II 01:119:116

c. General Biology Lab 01:119:117

d. General Chemistry I either 01:160:161 or 01:160:163

e. General Chemistry II either 01:160:162 or 01:160:164

f. Calculus I either 01:640:135 or 01:640:151

g. Calculus II or Statistic either 01:640:136, or 01:640:152, or 01:640:192, or 01:960:401, or 01:960:212, or 01:960:379

4. Students with an overall GPA < 3.0 must meet with the UGD before declaring the major.

a. Genetics is a credit-intensive major and has a requirement of a 2.80 GPA at the time of taking research for credit

b. Students entering the major with a GPA of < 3.0 may struggle to complete the major on time

5. Watch a Genetics Major Declaration Video

Life Sciences (SAS)

Major Requirements

Major Requirements

The department offers a major with a strong emphasis on research. A minimum of 20 credits of coursework in the life sciences must be completed in residence. Genetics is a credit-intensive major. Excluding the prerequisite courses (25-26 credits) to get into the major (see above), there are between 54-56 credits to complete the major (60-62 for honors). A grade of "C" or better in courses credited toward the major is required for graduation, and each course may be repeated only once to replace D/F grades. Students may not double major in two Division of Life Sciences majors.

The requirements of the major consist of:

A. Life Science Core Courses (19-21 credits) - Required for all DLS Majors (Approved AP and Transfer credits may be substituted)

a. Intro to Experimentation 01:160:171

b. Organic Chemistry I 01:160:307 or 01:160:315

c. General Physics I (01:750:203 + 205 lab), or (01:750:271 + 275 lab), or 01:750:193, or 01:750 201
Note: 193 & 201 have integrated lab

d. General Physics II (01:750:204 + 206 lab) or (01:750:272 + 276 lab) or 01:750:194 or 01:750:202
Note: 194 & 202 have integrated lab

B. Genetics Core (17 credits) - Required for all Genetics Majors- All below credits must be completed at Rutgers

a. Genetic Analysis I 01:447:384

b. Genetic Analysis II 01:447:385

c. Lab Course Req. 01:447:315, or 01:447:302, or 01:447:203, or 01:447:303, or 01:694:214, or 01:694:215, or 01:694:316

d. Biochemistry for the Life Sciences 01:694:395 or 01:694:407

e. Communications in Genetics 01:447:430 or 01:447:414 + 01:447:415 (Honors, Thesis Writing senior year)

C. Genetics Independent Scholarship (minimum 6 credits but 12 credits for honors

Note: 2.8 minimum GPA to register for research

a. Independent Scholarship 01:227:460, 407, 408, 409, 410, 488, 489, 490

b. Independent Scholarship 01:227:460, 407, 408, 409, 410, 488, 489, 490

D. Genetics Electives (6 credits)

Fifty percent must be taken within the Genetics Major (i.e.; 01:447)

a. Genetics Electives See electives table

b. Genetics Electives See electives table

c. Genetics Electives See electives table

E. Electives OR Independent Scholarship (6 credits)

Note: Additional Genetics Lab may be used as an elective

a. Independent Scholarship 01:227:460, 407, 408, 409, 410, 488, 489, 490

b. Independent Scholarship 01:227:460, 407, 408, 409, 410, 488, 489, 490

c. Genetics Electives See electives table below

Lab Note: 01:694:214 and 01:694:215 are only offered to first-year students with AP Biology credit and AP General Chemistry credits (or taking General Chemistry concurrently). 01:447:203 is only offered to first-year students in the SAS Honors Program or the Honors College. Students cannot receive credit for both 01:447:203 and 01:447:302.

Organic Chemistry Note: If you are planning to pursue a graduate degree in which a full year of organic chemistry is suggested/required (e.g., med/dental school), we strongly recommend taking Organic Chemistry II + lab as an elective (6 credits)

Departmental Honors

Departmental Honors

Departmental Honors

The Department of Genetics recognizes graduating students who have made outstanding academic achievements by awarding **departmental honors**. The department awards two types of departmental honors (see below) and these are awarded at the discretion of the Genetics Honors Committee. To be considered, students must meet all criteria for that type of honors and submit the honors request application by the deadline (April 1st of senior year).

The two types of departmental honors and their criteria are as follows:

1. GENETICS HONORS- RESEARCH

a. GPA requirement: a student must have attained, at the end of the junior year, a cumulative GPA of at least 3.4 and a Genetics major GPA of at least 3.4 (including prerequisites).

b. Complete 6 or more credits of Honors in Genetics (01:447:408-409) during senior year

c. Complete a total of 12 or more research credits (including the 6 credits of 01:447:408-409)

d. Complete Honors Thesis and Communication in Genetics 447:414 and 415 during senior year

e. Complete and defend a research thesis before a faculty committee (see Thesis Guidelines)

f. Present at Honors Day

Students can apply to do an Honors thesis by completing the relevant sections of the Independent Scholarship Form. Students must register either for an Honors course sequence in Genetics (01:447: 408 and 409) or for a course sequence in a college Honors Program (See Handbook) . These decisions should be discussed with an advisor and approved by the Department Vice Chair. Accepted students are expected to complete at least 12 credits in an independent research project, resulting in a thesis. Students may do research with Rutgers faculty outside of the Department with the approval of their advisor and the Vice Chair. Students will prepare a thesis and present an oral defense to a committee of three faculty. At least one member of the committee must come from the Department of Genetics. Students will present their research at a Departmental Symposium in April. Students contemplating an Honors thesis should refer to the much more detailed instructions and details in Section IX and Section X of the Student Handbook. For information on the thesis, see Thesis Guidelines.

Level of Honors: In determining the level of honors, the honors/awards committee takes into consideration multiple factors in aggregate, including but not limited to (1) cumulative GPA, (2) thesis defense committee recommendation, (3) research mentor evaluation, (4) faculty evaluation of presentation at Honors Day, and (5) whether or not the student took the honors versions of Genetic Analysis 1 and/or 2 (i.e., 01:447:384:H1 and/or 01:447:385:H1) and the grades received in those courses.

2. Genetics Honors - Certificate Program

a. GPA requirement: A student must have attained, by April 1st of senior year, a cumulative GPA of at least 3.4 and Genetics major GPA of at least 3.4 (including prerequisites).

b. Complete a departmental certification program (i.e.; CompGen, Cancer or Genetic Counseling).

c. By April 1st, the student must formally apply to request consideration for Certificate Honors by completing the Genetics Honors- Certificate Program Form

* *The honors committee may award Honors, High Honors or Highest Honors*

Life Sciences (SAS)

Undergraduate Certificate Programs

Undergraduate Certificate Programs

The Department of Genetics offers two certificate programs. Students who complete one of these Certificates are eligible to receive Departmental Honors.

1) Genetic Counseling Certificate Program

The Department of Genetics offers an undergraduate **Genetic Counseling Certificate Program (GCCP).** The GCCP program is intended for a select group of students interested in applying to the masters-level programs in genetic counseling. The goal is to provide students with guidance, coursework, and relevant clinical experience to improve their graduate school applications. This is a highly competitive option and is **only open to declared genetics majors**. Not all applicants will be accepted. The Certificate will be awarded only in conjunction with the awarding of a baccalaureate degree in genetics and does not replace minors. The certificate is NOT in lieu of completing the masters-level programs in genetic counseling. At the end of the program students will:

- understand genetic counseling as a profession ·
- understand application requirements for masters-level programs
- gain experience in talking with people who are in crisis
- gain experience in a clinical genetic counseling clinic

2) Certificate in Computational Genetics

The Department of Genetics offers a Certificate in Computational Genetics (CCG) for Genetics majors. The volume of data being generated in Genetics and related life science fields has been expanding tremendously in recent years, and career opportunities for geneticists with computational and quantitative expertise are simultaneously growing. This certificate program is intended for students who are either interested in applying to graduate-level programs,

or planning careers, in Computational Genetics/Biology, Statistical Genetics, Bioinformatics, or other programs in quantitative biomedical related research. The goal of the CCG is to provide students with guidance, coursework, and relevant data design and analysis experience to prepare them for graduate studies in the field or entry-level informatics jobs. This program is only open to declared Genetics Majors. The Certificate will be awarded only in conjunction with the awarding of a baccalaureate degree in Genetics. At the end of the program students will:

- Have gained competence in genetic data analysis using basic computer programming and statistical analysis.
- Be prepared to apply to M.S. or Ph.D. graduate programs in the areas of Computational Genetics and Bioinformatics.
- Be prepared to apply for career positions in industry, biotech companies, pharmaceutical companies, medical centers, or universities

3) Cancer Research Certificate

The Department of Genetics offers a Certificate in Cancer Research (CCR) for Genetics majors. Completion of the Certificate in Cancer Research will provide an advantage when applying to MD, PhD, and MS programs and facilitate transitions to careers with Cancer-related missions. The goal of the CCR is to provide students with a rigorous and Cancer-specialized curriculum. Students will do at least one year of research in a nation-leading Cancer Research Lab and students will be expected to participate in community engagement and develop skills to build community outside of academia. This program is only open to declared Genetics Majors. The Certificate will be awarded only in conjunction with the awarding of a baccalaureate degree in Genetics. At the end of the program students will:

- Have gained knowledge in Cancer Genetics with an expanded curriculum focused on Cancer biology.
- Have at least one year of experience conducting laboratory research in a Cancer research lab.
- Be prepared to apply to M.S., MD, or Ph.D. graduate programs in the areas of Cancer Genetics or for career positions in industry, biotech companies, pharmaceutical companies, medical centers, policy-driving institutes, or universities.

Life Sciences (SAS)

Courses

Courses

01:447:203 ***Honors Computational Genetics (Honors) (3)***
Honors computational genetics is a computer-based laboratory course that introduces students to the use of computers in biological research. This course is for students who are thinking of careers at the intersection of life sciences, statistics, and/or computer science, particularly students who are considering majoring in Genetics. The course fulfills the laboratory requirement for the Genetics major. In the first half of the course, students will receive instruction in introductory computer programming (Python). In the second half of the course, students will practice writing code in Python via in-depth computational projects in genetics and genomics. Each class consists of a mixture of lecture and computer-based demos and/or exercises, as well as time for students to work on

assignments. The course provides the introductory skills needed to conduct basic computational research in the life sciences, including many aspects of computer programming and genomic data analysis. Prior experience with computer programming is neither necessary nor is it expected for students who enroll in this course.

This course is for freshman or sophomore Honors students who are thinking of careers at the intersection of life sciences, statistics, and/or computer science, particularly students who are considering majoring in Genetics. The course fulfills the laboratory requirement for the Genetics major.The course fulfills the laboratory requirement for the Genetics major.
Prerequisites: Students must be in their first or second year at Rutgers in an approved Honors program (e.g., the Honors College or the SAS Honors Program). General Biology I (01:119:115) and be at least co-registered for General Biology II (01:119:116)) or have placed out of these two courses (e.g., through AP credit or approved transfer credit). Credit not given for both 01:447:203 and 01:447:302.

01:447:216 ***Analysis of Scientific Literature (Honors) (3)***
A systematic approach to the reading, analyzing, and understanding of primary literature in genetics; emphasis will be placed on data analysis and experimental design and demystifying the process of reading a scientific journal article.
Prerequisites: 01:119:115-116. Highly recommended: 01:694:215. Open only to freshmen and sophomores in the SAS or SEBS Honors Program. By permission only.

01:447:245 ***Introduction to Cancer (3)***
Introduction to Cancer provides the student with an overview of conventional and state-of-the-art aspects of oncogenesis. Students will become familiar with the process involved in neoplastic transformation to the cancer phenotype through aspects of epidemiology, pathophysiology, virology, in vitro and in vivo cellular transformation and genetics. They will then apply these aspects to the understanding of classic therapeutic modalities and new state-of-the-art rational therapies. This comprehensive course will concentrate on the human disease process by applying clinical aspects of oncogenesis during a series of Grand Rounds discussions that will include recent patient clinical cases and their outcomes.
Prerequisites: 01:119:115-116. Credit not given for both this course and 01:447:495.

01:447:302 ***Quantitative Biology and Bioinformatics (3)***
Introduction to the use of computers and computer programming to develop applications for research in genetics and molecular biology. Application topics will include evolutionary genetics, association analysis and genetics mapping, and structural biology.
Prerequisites: 01:447:380 or 01:447:384. May be used to fulfill an elective requirement or taken instead of 01:447:315 Introduction to Research in Genetics by students majoring in Genetics. Credit not given for both 01:447:203 and 01:447:302

01:447:303 ***Computational Genetics of Big Data (3)***
The main focus of this course is the application of R programming to the analysis of genetic data, particularly big data sets with multiple measurements. The primary data sets considered will contain RNA-seq and/or other expression data for multiple/all genes in a given set of individuals. This course is for junior or senior students who are thinking of careers at the intersection of life sciences, statistics, and/or computer science, particularly students who are majoring in Genetics. The course fulfills the laboratory requirement for the Genetics major. Students will learn how to acquire such data, format it for R, plot the data, and perform statistical analyses. In addition, students will learn how to simulate data under different hypotheses, and how to perform power and sample size calculations

for different statistical methods applied to real or simulated data. Each class consists of a mixture of lecture and computer-based demos and/or exercises, as well as time for students to work on assignments. Guest investigators will frequently make short presentations (in person or by skype) to provide illustrations of how programming and informatics is critical for their research. The course provides the introductory skills needed to conduct basic computational research in the life sciences, including many aspects of computer programming and data analysis.
Prerequisites: 01:447:380 or 01:447:384. May be used to fulfill the lab requirement by students majoring in genetics. May be used to fulfill an elective requirement by students majoring in genetics who have already fulfilled the lab requirement with a separate course.

01:447:315 ***Introduction to Research in Genetics (3)***
Basic principles and methods of research with microbial model systems used in the analysis and manipulation of genes, followed by a research project in molecular genetics.
Prerequisites: 01:119:115,116, and 117; and 01:160:161-162, 171 (or equivalent) or 01:160:163-164, 171. May be used to fulfill the lab requirement by students majoring in genetics. May be used to fulfill an elective requirement by students majoring in genetics who have already fulfilled the lab requirement with a separate course. Credit not given for both this course and 01:694:315. Open only to genetics majors

01:447:354 ***Social, Legal, and Ethical Implications of the New Genetics (3)***
Social, legal, and ethical implications of new modern genetic techniques, for example: genetic screening, stem cells and cloning, forensic genetics, genetic engineering of plants, animals, and humans, genetic enhancement, gene therapy, and the new eugenics.
Prerequisites: Genetics (01:447:380) or Genetics Analysis (01:447:384)

01:447:356 ***Evolutionary Medicine (3)***
In this course, we examine human health from an evolutionary perspective, exploring the impact that our evolutionary heritage has on modern human diseases, both chronic and infectious. We will learn how the framework of evolutionary biology and modern genetic tools can inform our understanding of issues relevant to clinical and public health. Rather than focus on the immediate mechanisms underlying disease, we will endeavor to understand the ultimate factors that influence susceptibility, such as past natural selection. The course topics are wide-ranging, but particular attention is paid to emerging infectious diseases, as well as non-communicable diseases that may be exacerbated by facets of modern lifestyles.

Through lectures, critical analysis of the primary literature and popular science news, and class discussions, students will learn how evolutionary principles can be practically applied to medicine. Key readings each session will focus on genetic techniques for understanding evolutionary medicine, while additional readings will incorporate perspectives from diverse fields.

By fully participating in this course, students will be able to appreciate how modern susceptibility to non-communicable and infectious diseases has been influenced by past evolutionary processes; critically evaluate evolutionary hypotheses related to health and medicine, including those found in popular science articles; and know how genetic techniques are applied within an evolutionary framework to understand ultimate reasons for disease.
Prerequisites: (01:447:380 or 384) AND (01:960:401 or 01:960:212).

01:447:370 ***Developmental Genetics (3)***
How genes influence the developmental processes of an organism. Topics include gene regulatory networks, signaling pathways, stem cell biology, and the role of developmental genetics in human disease.
Prerequisites: Genetics (01:447:380) or Genetic Analysis (01:447:384)

01:447:380 *Genetics (4)*
Introduction to the mechanisms of heredity and evolution. Mechanisms of Mendelian inheritance, meiosis, recombination, gene mutation, and mapping, and an introduction to modern biochemical, molecular, and population genetics.
Lec. 3 hrs., rec. 1 hr. Prerequisites: 01:119:115-116 and 01:160:161-162 or 01:160:163-164. Credit not given for both this course and 01:447:384-385 or 11:067:328 or 11:776:305.

01:447:382 *Genetics Laboratory (1)*
Laboratory to accompany 01:447:380. Not accepted for elective credit for Genetics majors.
Lab. 3 hrs. Pre- or corequisites: Genetics (01:447:380) or Genetic Analysis (01:447:384)

01:447:384-385 *Genetic Analysis I,II (4,4)*
Experimental methods and concepts in genetics, with emphasis on their application to genetic research. Part I covers transmission genetics and breeding analyses, basic molecular genetics, isolation and characterization of mutations, and chromosome structure and function. Part II covers mathematical genetics, recombinant DNA, genomics, and special topics relevant to modern genetic research.
Open only to majors in genetics or by permission of instructor. Credit not given for both this course and 01:447:380 or 11:067:328 or 11:776:305. Prerequisites for 01:447:384 are 01:119:115-116 (General Biology I & II) or 01:160:161-162 or 01:160:163-164 (General Chemistry I & II). Prerequisite for 01:447:385 is 01:447:384.

01:447:390 *General Microbiology (4 includes laboratory)*
Microorganisms are an essential component of the human environment and are significant not only for the disease they cause, but also for their ecological, agricultural, pharmaceutical, and industrial benefits. This course will introduce students to the physiology, morphology, pathogenicity, and genetics of groups of microorganisms and their applications. The lab component of the course will introduce microscopy and staining techniques, the growth cycle and generation of a standard curve, physiological characteristics of microorganisms, and bacterial transformation. The course is an introduction to the physiology, morphology, pathogenicity, and genetics of groups of microorganisms. Topics include: History and Overview of Microbiology, Cell Structure and function, Microbial Growth, Nutrition, culture, and metabolism, Virology, Bacterial genetics, Microbial evolution and systematics, Bacteria and Archaea, Nutrient cycles, Genetic Engineering and Biotechnology, Waste treatment, Anaerobic respiration and Nitrogen fixation, Antibiotics and chemotherapeutic agents, Normal Flora, Virulence, Toxins, Epidemiology, and Microbial Diseases.

This is an upper-level course that focuses on the basic principles of microbiology. The course is an introduction to the physiology, morphology, pathogenicity, and genetics of groups of microorganisms. Topics include:
Prerequisites: General Biology 01:119:115-116-117 or 01:119:101-102 and General Chemistry 01:160:161-162-171 (or higher) and Organic Chemistry 01:160:307. Credit not given for both this course and 11:680:390.

01:447:392 *Pathogenic Microbiology (3)*
This course will integrate basic microbiology and infectious diseases. The first quarter of the course will provide the conceptual basis of microbial morphology, metabolism and growth, heredity and variation, pathogenicity and antimicrobial chemotherapy. Then this course will introduce the students to one real life patient case study each week, moving the course toward an understanding of specific human diseases (e.g., pharyngitis, meningitis) as might be expected in a clinical environment. Each case will include a patient history, differential diagnosis, clinical cues, laboratory data, pathogenesis, treatment and prevention, additional points and references. The objective is not to attempt to cover every infectious disease or microorganism, but rather to use examples that would stress the key

principles of microbial pathogenesis, differential diagnosis and appropriate treatment and prevention. This course is intended for Life Science majors or those with a strong background in the Biological Sciences.
Prerequisites: General Biology (01:119:115-117), General Chemistry (01:160:161-162-171), and Organic Chemistry (01:160:305. and 01:160:315. Systems Physiology is recommended.

01:447:406-407 ***Research in Genetics (3)***
Laboratory research on original problem under the direction of a professor. Written thesis, oral presentation, and defense required.
Prerequisites: Permission of department and cumulative grade-point average of 2.8 or better. Open only to students majoring in Genetics.

01:447:408-409 ***Honors in Genetics (3-6,3-6)***
Laboratory research on original problem under the direction of a professor. Written thesis, oral presentation, and defense required.
Prerequisites: Open by permission to seniors majoring in genetics who meet the requirements for the departmental honors program. Corequisite: 01:447:414 (fall) and 415 (spring).

01:447:410 ***Research in Genetics - Writing Intensive (3)***
Research in Genetics- Writing Intensive is intended to provide you with an opportunity to engage in original laboratory research under the direct supervision of a faculty mentor, usually in the faculty member¿s research laboratory. You are expected to carry out your own research project. NOTE: this research requires a heavy commitment of time and effort and can impact your performance in coursework, especially if you have not yet managed the foundational material for the discipline. Fulfills the writing and communication requirements of the SAS Core Curriculum.
Prerequisites: 01:447:302, 447:315, or permission of department. Registration is by special permission only. Cumulative grade-point average of 2.8 or better. Declared genetics major.

01:447:414 ***Thesis Writing and Communication in Genetics (1.5)***
Assists students with their honors thesis; emphasis will be on library/internet research and thesis writing. Students will be expected to write the introduction, methods, and reference sections of their thesis and outline the results and discussion.
Corequisites: 01:447:408. For seniors completing departmental honors; by special permission only.

01:447:415 ***Thesis Writing and Communication in Genetics (1.5)***
Assists students with their honors thesis; emphasis will be on library/internet research and thesis writing. Students will be expected to write the introduction, methods and reference sections of their thesis and outline the results and discussion.
Prerequisite: 01:447:408. Corequisite: 01:447:409. For seniors completing departmental honors; by special permission only.

01:447:430 ***Effective Communication Skills in Genetics (3)***
Communication is an essential part of science. Whether it is communicating research findings to other scientists or conveying complex concepts to a lay audience, a scientist must be able to effectively communicate their research to succeed. Communication in science is typically through publications, posters, or oral presentations. The goal of this course is to provide students practice in effectively communicating scientific findings. This includes preparing and revising an introduction for scientific papers, writing a research description for general audience, and preparing and

giving presentations (both oral and poster).
Prerequisites: Declared major in Genetics; must have completed one semester of Research in Genetics, Advanced Independent Study, or Genetic Counseling Rotation. By special permission only.

01:447:451 *Genomes (3)*
This course will focus on Genomics, Proteomics and Bioinformatics from a Genetics perspective. Special attention will be given to the organization and functioning of the human genome.
Prerequisites: Genetics (01:447:380) or Genetic Analysis (01:447:384).

01:447:460 *Genetics of Compulsive Behavior (3)*
Compulsive urge can be channeled toward productive endeavors such as a strong drive to succeed in competitions, schooling, and career. On the other hand, improper handling of compulsive urge may lead to problematic behaviors such as alcoholism, drug use, gambling, and other undesirable behaviors. There are also conditions that are medically defined as disorders, with certain types of compulsive behaviors as part of the diagnostic symptoms, such as OCD and ADD/ADHD. There is evidence that genetics contribute to compulsive behavior in humans, and research in animal models has begun to uncover the molecular factors that underlie the genetic basis of compulsive behavior. Discussion of primary literature and other scientific publications that deal with the molecular and genetic basis of compulsive behavior. Emphasis will be placed on the development of skills for critical thinking and effective writing.
Prerequisites: Genetics (01:447:380) or Genetic Analysis (01:447:384).

01:447:465 *Genetic Approaches and Research Analysis (3)*
This class will teach students how to read, interpret and analyze research articles. The class will follow an active learning format, where we will discuss seminal and recent research articles in depth: What was the scientific question or problem? What methods and strategies were used to address it? What were the findings and conclusions? What are the alternative interpretations and methods that could have been applied? What questions are remaining?
This class will expose students to a diverse selection of research literature, involving genetic and molecular analyses in model organisms such as mice, worms, flies and yeast. The class series will begin with a research article presented by the teacher. During the majority of the class series, students will be divided into groups of 4-5. Each group will be assigned one research article and be required to work together to a) interpret, b) analyze and c) present the article in the form of an oral presentation to the class. Students will be graded on their ability to perform each of these tasks and on active participation during presentations by other groups. All groups will also be required to complete and be graded on a written discussion summary assignment at the end of each article discussion. This summary assignment may take many forms, e.g., preparation of a graphical abstract, subway advert, or other creative forms of expression.
Prerequisites: Genetics (01:447:380) or Genetic Analysis (01:447:384).

01:447:470 *Evolutionary Developmental Biology (3)*
Evolutionary origins of the vertebrate body plan are major problems in biology. While paleontology and comparative anatomy have revealed the evolutionary trajectories of the organs, recent genetics, genomics and embryology are becoming powerful tools to answer classical questions. The goals of this course are twofold; 1) obtain fundamental knowledge of anatomy, embryology, and the latest genomics and 2) learn how to integrate genetics, genomics and embryology to answer evolutionary questions through active discussion in the classroom. The training to discover and answer scientific questions in animal diversity will be performed at the American Museum of Natural History.
Prerequisites: Genetics (01:447:380) or Genetic Analysis (01:447:384)

01:447:478,479 ***Special Topics in Genetics (3,3)***
Directed readings and discussion of selected topics of special interest in genetics. Topics will vary according to semester and/or instructor.
Prerequisites: Genetics (01:447:380) or Genetic Analysis (01:447:384)

01:447:480 ***Topics in Molecular Genetics (3)***
Current research topics in microbial and molecular genetics. Lectures, discussions, and critical analyses of journal articles.
Prerequisites: Genetics (01:447:380) or Genetic Analysis (01:447:384).

01:447:484 ***Behavioral and Neural Genetics (3)***
Influence of genetics on the nervous system and behavior of various organisms. Overview of field including experimental analysis of behavior, development of the nervous system, and sensory systems. Emphasis on reading and interpreting original research,
Prerequisites: Genetics (01:447:380) or Genetic Analysis (01:447:384).

01:447:488 ***Genetic Counseling Rotation (3)***
The goal of this course is to provide students with an understanding of the genetic counseling career. Students will be placed at a local Genetic Counseling clinic to shadow a genetic counselor for one semester. During the semester, the student is expected to spend 8-9 hours a week at the rotation plus meet weekly with course director (attendance is mandatory). Course grade will be based on 1) Case presentation to Genetic Counseling group 2) ten Genetic Counseling case summary logs, and 3) evaluation by the clinical supervisor.
Prerequisites: Declared Genetics major, cumulative GPA of 2.8 or greater, and accepted into the undergraduate Genetic Counseling Certificate Program (GCCP).

01:447:489,490 ***Advanced Independent Study in Genetics (3,3)***
Advanced independent study in Genetics is an opportunity for students to complete a scholarly project under the direct supervision of a faculty mentor. Projects are varied; e.g. library research on a topic of mutual interest to both the student and the faculty member, computer simulations, informative website design, or development of teaching materials. This course may not used for laboratory research.
Prerequisites: 01:447:384 and permission of department. Open only to students majoring in Genetics

Life Sciences (SAS)

Learning Goals

Learning Goals

The Department of Molecular Biology and Biochemistry offers a course of study in which traditional and modern biochemistry are integrated with studies in molecular biology. In addition to traditional courses, students are required to carry out undergraduate research work in a Rutgers professor¿s lab who serves as the host and mentor. This course of study prepares students for graduate studies in molecular biology and biochemistry and related fields, entry into professional schools in medicine or other health professions, or employment in industries (e.g., biotechnology, pharmaceuticals) in which molecular biology and biochemistry skills are in demand. The same learning goals are also used for nonmajor students taking molecular biology and biochemistry courses.

Learning Goals:

I. Students should demonstrate an understanding of the knowledge that is needed to begin biomedical research and that is required for postgraduate exams and studies.

II. Students should demonstrate the ability to find and evaluate information about specific biological systems or problems.

III. Students should demonstrate the ability to design experiments and critically analyze data.

IV. Students should demonstrate the ability to communicate their research and findings orally through seminar and poster presentations and through written research papers.

Life Sciences (SAS)

Entry Requirements of the Major

Entry Requirements of the Major

The molecular biology and biochemistry (MBB) major is open to students beyond their first year who have a 2.0 cumulative grade-point average and have received grades of C or better in courses taken toward the major, except by special permission of the department undergraduate chair. The MBB major is also open to first year students with AP credits. In all cases, students interested in the MBB major should contact the Undergraduate Director, Sam Gunderson. A grade of C or better in all courses credited toward the major is required for graduation and each course may be repeated only once to replace D/F grades.

Departmental approval is required to declare the major in molecular biology and biochemistry. Students who want to register for the MBB major must first meet with the Undergraduate Chair Sam Gunderson, Nelson lab, Room A322/A320 (848-445-1016 gunderson@dls.rutgers.edu) to discuss details about the major.

Life Sciences (SAS)

Major Requirements

Major Requirements

A core of courses is required for completion of the major in molecular biology and biochemistry. Students supplement the core with additional required and elective courses in one of three options. Given that molecular biology and biochemistry is a dynamic and developing field, it is critical that coursework applied to the major must be current. Thus, any life science courses applied to the major in molecular biology and biochemistry should be taken within 10 years of graduating. Online courses will be reviewed on a case-by-case basis to confirm that they meet departmental learning goals before they may be used to satisfy the requirements for the major. Returning students must meet with their adviser to discuss their path to graduation. All students are required to write research reports and present them at a seminar.

Required Core Courses (58 credits)

01:119:115-116 General Biology (4,4)*
01:119:117 Biological Research Laboratory (2)*
01:160:161-162 or 01:160:163-164 or 01:160:165-166 General Chemistry (4,4)*
01:160:171 Introduction to Experimentation (1)*
01:160:309 Organic Chemistry Laboratory (2) (recommended)* or 01:160:311 Organic Chemistry Laboratory (2)
01:160:315-316 Principles of Organic Chemistry (4,4) (recommended)* or 01:160:307-308 Organic Chemistry (4,4)
01:447:380 Genetics (4)*
01:640:151-152 Calculus for Mathematical and Physical Sciences (4,4) *(recommended) or 01:640:135-136 Calculus for the Life and Social Sciences I,II (4,4)**
01:694:407 Molecular Biology and Biochemistry (3) or 01:694:395 Biochemistry for the Life Sciences (3)
01:694:315 Introduction to Molecular Biology and Biochemistry Research (3) or 01:694:215 Honors Introduction to Molecular Biology and Biochemistry Research (4) or 01:694:214 Introduction to Molecular Biology Research (3) or 01:694:316 Honors Introduction to Molecular Biology, Biochemistry, Genetics Research (4)
01:694:408 Molecular Biology and Biochemistry (3)
01:694:383 Molecular Biology and Biochemistry Seminar: Careers in Science (1)
01:694:484 Molecular Biology and Biochemistry Seminar: Research Presentations (1)
01:750:203-204 General Physics (3,3)***

01:750:205-206 General Physics Laboratory (1,1)***

*Life sciences core course
**01:960:401 Basic Statistics for Research (3) or 01:960:211-212 Statistics I,II (3,3) may be substituted for the second semester of calculus.
***01:750:193-194 (4,4) or 01:750:201-202 (5,5) may be substituted for 01:750:203-204 (3,3) plus 01:750:205-206 (1,1).

Life Sciences (SAS)

Course Requirement Options

Course Requirement Options

In addition to the required core courses, the Department of Molecular Biology and Biochemistry (MBB) offers two course options to students to fulfill the requirements for the major. Course option one comprises taking advanced electives and is intended to expose MBB students to different current topics in molecular biology and biochemistry. Course option two is for students interested in biophysical questions and research and comprises taking Physical Chemistry and Multivariable Calculus. Students completing course option two will also receive a minor in chemistry are encouraged to take the physical chemistry courses as they will fulfill the minor requirements. Course option two is intended to expose MBB students to different current topics in molecular biology and biochemistry.

Course Option One (13 credits)

Two 3-credit courses offered by the MBB department from the following list: 01:694:230; 01:694:390; 01:694:411; 01:694:412; 01:694:413; 01:694:420/421; 01:694:492

One 400-level, 3-credit elective course offered by any department in the Division of Life Sciences or approved by the MBB department. See degree navigator or the MBB department website for a list of approved courses.

Course Option Two (9 credits)

01:160:341-342 Physical Chemistry: Biochemical Systems (3,3) or 01:160:327-328 Physical Chemistry (3,3) (requires 01:640:251 as a prerequisite). Other combinations of Physical Chemistry are possible so see degree navigator for further details.

01:640:251 Multivariable Calculus (4)

One 3-credit course offered by the MBB department from the following list: 01:694:390; 01:694:411; 01:694:412; 01:694:413; 01:694:420/421; 01:694:492

Electives

Because the list of approved electives is changing, students should discuss their elective options directly with their departmental faculty advisers and with the MBB Undergraduate Director, Sam Gunderson. A list of currently approved electives can be found on the MBB department website. In addition to the undergraduate courses listed, advanced students are encouraged to choose electives from the School of Graduate Studies.

Life Sciences (SAS)

Research Options

Research Options

The Department of Molecular Biology and Biochemistry (MBB) offers two laboratory research options (laboratory option one and laboratory option two), as well as a nonlaboratory research option (nonlaboratory option). In all cases, students must take one of the Introduction to Molecular Biology and Biochemistry Research courses (01:694:214, 01:694:215, 01:694:315, or 01:694:316) and 01:694:383, 484 Seminars in Molecular Biology and Biochemistry. Course 01:694:215 is only for first-year honors students who have placed out of General Biology (01:119:115,116, and 117) by receiving a score of 4 or 5 on the AP biology exam. Course 01:694:214 is for first-year students who have placed out of General Biology (01:119:115,116, and 117) by receiving a score of 4 or 5 on the AP biology exam. Course 01:694:315 is for either qualified sophomores or junior students in the major. Course 01:694:316 is for either qualified sophomores or junior honors students in the major.

Laboratory Option One (>12 credits)

01:694:381,382, and 283 (Summer) or 384 (Summer) Undergraduate Laboratory Research (2-6,2-6)

01:694:481,482 Advanced Undergraduate Laboratory Research (2-6) or 01:694:495,496 Honors Laboratory Research (6,6)

A minimum of 12 credits is required in research courses. With the exception of Honors Laboratory Research (01:694:495/496), students who plan to take more than 3 credits of research a semester need approval from the MBB undergraduate chair.

Laboratory Option Two (6 to 11 credits)

01:694:381,382, and 283 (Summer) or 384 (Summer) Undergraduate Laboratory Research (2-6) or 01:694:481,482 Advanced Undergraduate Laboratory Research (2-6) or 01:694:495,496 Honors Laboratory Research (4-6,4-6)

One 3-credit course offered by the MBB department from the following list: 01:694:230 (3); 01:694:390; 01:694:411 (3); 01:694:412 (3); 01:694:413 (3); 01:694:420/421 (3); 01:694:492 (3).

A minimum accumulation of 6 credits is required in research courses. Students must take at least one MBB elective in addition to the course requirements to satisfy the requirements for this option. Note that students applying for honors must complete 4 up to 6 credits of honors coursework per semester for two semesters. With the exception of Honors Laboratory Research (01:694:495/496), students who plan to take more than 3 credits of research a semester need approval from the MBB undergraduate chair.

Nonlaboratory Option (9 credits)

01:694:489,490 Literature Research in Molecular Biology and Biochemistry (3,3). This non-lab option is almost never used and will need approval from the Undergraduate Director, Sam Gunderson

One 3-credit course offered by the MBB department from the following list: 01:694:230 (3); 01:694:390; 01:694:411 (3); 01:694:412 (3); 01:694:413 (3); 01:694:420/421 (3); 01:694:492 (3).

Students must take at least one MBB elective in addition to the course requirements to satisfy the requirements for this option. Students taking this option may not apply for departmental honors.

Life Sciences (SAS)

Departmental Honors Program

Departmental Honors Program

To qualify, a student must have attained, at the end of the junior year, a cumulative grade-point average of at least 3.4 and a grade-point average of 3.4 or better in courses required for the major. Exceptional students not meeting these criteria but wishing to apply for honors research may petition the Department of Molecular Biology and Biochemistry at the beginning of their senior year. Students accepted into the program are expected to complete two semesters (6 credits per semester) of honors coursework. A written honors thesis and an oral thesis presentation are required. Students enrolled in 01:694:495,496 Honors Laboratory Research or any of the various school honors programs are eligible to receive departmental honors at the time of graduation.

Life Sciences (SAS)

Courses

Courses

01:694:214 ***Introduction to Molecular Biology Research (3)***
Basic principles and methods of research, followed by a research project: analyses of molecular clones from eukaryotic cDNA libraries. Description of research opportunities available to undergraduates at the university.
Prerequisites: For first-year students only who have placed out of General Biology (01:119:115,116, and 117) with AP credits, and 01:160:161 or 01:160:163. Corequisite: 01:160:162 or 164.

01:694:215 ***Honors Introduction to Molecular Biology and Biochemistry Research (4)***
Basic principles and methods of research, followed by a research project: isolation and analyses of transcriptional regulatory mutants in yeast. Description of research opportunities that are available to undergraduates at the university.
Prerequisite: Limited only to first-year SAS Honors Program or Honors College students who have placed out of General Biology (01:119:115,116, and 117) with AP credits. Corequisites: 01:160:161 or 01:160:163 (or AP credits) and 01:640:135 or 01:640:151 (or AP credits).

01:694:230 ***Analytical Methods in Biology (3)***
Mathematical methods and tools to analyze and interpret biological and biomedical data, including probability theory; Bayes Theorem; the binomial, Poisson, and normal distributions; limit theorems; error analysis; tests of statistical significance; parameter estimation; curve fitting; sampling techniques; random number generation; and Monte Carlo methods. Analysis of sequencing and microarray data, such as sequence alignment, phylogeny inference, population structure, selection, and human migration.
Prerequisites: 01:119:115-116 and 01:640:135 or 151.

01:694:281,282 *Sophomore Laboratory Research (2-6,2-6). 281 is Fall, 282 is Spring*
Research project in the laboratory of a faculty member. Written report of research carried out during each semester required. Credits in this course cannot be used toward the required research credits for laboratory option. Students must complete a special permission form and have it signed by their research advisor and then send the signed form to the Undergraduate Director (Sam Gunderson) before they can register for the course.

01:694:283 *01:694:283 Undergraduate Laboratory Research (2-6). Summer semester*
Independent research project in the laboratory of a faculty member. A written report of research carried out during each semester required by the end of each semester.
Typically for rising Juniors and Seniors. Students must complete a special permission form and have it signed by their research advisor and then send the signed form to the Undergraduate Director (Sam Gunderson) before they can register for the course.

Prerequisite: Students must complete a special permission form and have it signed by their research and MBB faculty mentors before they can register of the course.

01:694:301 *Introductory Biochemistry and Molecular Biology (3)*
Chemistry and metabolism of proteins, carbohydrates, lipids, nucleic acids, and other biologically important compounds.
Prerequisite: 01:160:209 or 307. Not for students majoring in molecular biology and biochemistry. Credit not given for both this course and 01:694:407, 11:115:301, or 11:115:403.

01:694:313 *Introductory Biochemistry Laboratory (1)*
Techniques used in research, clinical, and food laboratories, including tests of biological materials, methods of separation, and determination of enzyme activities.
Lab. 3 hrs. Pre- or corequisite: 01:694:301. Not for students majoring in molecular biology and biochemistry.

01:694:315 *Introduction to Molecular Biology and Biochemistry Research (3)*
Basic principles and methods of research, followed by a research project: analyses of molecular clones from eukaryotic cDNA libraries. Description of research opportunities at the university available to undergraduates.
Pre- or corequisites: 01:119:115,116, and 117; and 01:160:161-162, 171 or 01:160:163-164, 171. Credit not given for both this course and 01:447:315, 01:694:214, 215, or 316. Open only to MBB majors.

01:694:316 *Honors Introduction to Molecular Biology, Biochemistry, Genetics Research (4)*
Basic principles and methods of research in molecular biology, biochemistry, and genetics, followed by a research project: isolation and analyses of transcriptional regulatory mutants in yeast. Description of research opportunities that are available to undergraduates at the university.
Prerequisites: 01:119:116 and (01:160:162 or 01:160:164). For MBB or genetics majors only or those planning on being MBB or genetics majors. Special permission required.

01:694:381,382 *Undergraduate Laboratory Research (3-6,3-6). 381 is Fall, 382 is Spring*
Research project in the laboratory of a faculty member. Written report of research carried out during each semester required. Students must complete a special permission form and have it signed by their research advisor and then send the signed form to the Undergraduate Director (Sam Gunderson) before they can register for the course.

01:694:383 *Molecular Biology and Biochemistry Seminar: Careers in Science (1)*
Discussion of career options in the life sciences, finding a research laboratory, performing literature searches, reading a scientific paper, and creating posters and abstracts. This course should be taken in the beginning of the third year.
Open to MBB majors only.

01:694:384 *Undergraduate Laboratory Research (1-6). Summer semester*
Independent research project in the laboratory of a faculty member. A written report of research carried out during each semester required by the end of each semester.
For rising Seniors. Students must complete a special permission form and have it signed by their research advisor and then send the signed form to the Undergraduate Director (Sam Gunderson) before they can register for the course.

For rising Seniors. Students must complete a special permission form and have it signed by their research advisor and then send the signed form to the Undergraduate Director (Sam Gunderson) before they can register for the course.

01:694:385 *MBB Research and Writing (3)*

Research project in the laboratory of a faculty member. Seminar on science communication. Written and oral reports of research carried out during the semester required.

Prerequisites: MBB majors only. Students need a GPA of 2.8 or better to enroll in research.

01:694:390 *Introductory Computational Biology (3)*
Disciplines of biochemistry and molecular biology and genomics all include collection and analysis of large data sets. Hands on use in a computer lab will permit students to learn and apply computer languages such as Python and R to analyze large data including for example DNA mutations and structural variations (SVs), RNA-seq and ChIP-seq as part of understanding genes and gene regulation.
Prerequisite: 01:447:380 or 01:447:384

01:694:395 *Biochemistry for Life Sciences (3)*
The course is intended for life science majors and takes a holistic approach to Biochemistry. You will learn the basics of proteins, enzymology, nucleic acids and metabolism and use these as foundations to discuss exemplary metabolic pathways for their importance to homeostasis and, when dysregulated, to disease including observable phenotypes and what current strategies are used to treat these disorders. Coursework will consist of quizzes, homework, exams and one graded paper.

Prerequisites: 01:160:307 or 01:160:315

01:694:407 *Biochemistry (3)*
Protein structure and function, structure of lipids, membranes and carbohydrates, catalysis of biochemical reactions, intermediary metabolism, oxidative phosphorylation, membrane transport, lipid metabolism, signal transduction, photosynthesis, protein secretion, targeting and turnover, nitrogen, amino acid, and nucleotide metabolism.
Pre- or corequisites: 01:160:307-308 or 315-316. Credit not given for both 01:694:407 and 01:694:301, 11:115:301, or 11:115:403.

01:694:408 *Molecular Biology and Biochemistry (3)*
Disciplines of biochemistry and molecular biology as interlocking and mutually complementary fields of study. Lectures on structure of DNA, RNA, recombinant DNA approaches, DNA replication, repair and recombination, mobile genetic elements, transcription, gene regulation, RNA splicing, translation, and viral gene expression.
Prerequisite: 01:694:407 or 01:694:301 or 01:694:395 or 11:115:403. Credit not given for both 01:694:408 and 01:146:478 or 11:126:481.

01:694:411 *Molecular Pathways and Signal Transduction (3)*
Lectures and discussion of current research areas of advanced molecular and structural biology: transcription, posttranscriptional regulation, cell cycle, neurobiology, protein folding, macromolecular recognition, and molecular virology.
Pre- or corequisites: 01:694:407 and 408, or 01:447:384-385 or 11:115:403-404 or 11:126:481.

01:694:412 *Proteomics and Functional Genomics (3)*
Survey of modern techniques of protein biochemistry, bioinformatics, proteomics, and functional genomics, including basic concepts of protein structure and function, protein folding, protein characterization and purification, enzyme kinetics, NMR and X-ray crystallography, mass spectrometry, yeast two hybrid, and various techniques and approaches to functional and structural genomics.
Prerequisites: [(01:694:301 OR 01:694:407 OR 01:694:395) AND (01:447:380) OR (01:447:384)]

01:694:413 *Chromatin and Epigenomics (3)*

Introduction to chromatin dynamics, particularly the structural and biochemical modifications of chromatin that underlie epigenetic states and their effects on gene expression and development.

Pre- or corequisites: Prerequisite: 01:694:408 or 01:146:478 or 01:447:385.

01:694:420,421 *Special Topics in Molecular Biology and Biochemistry (3,3)*
Directed reading and discussion of selected topics of special interest in molecular biology and biochemistry. Topics will vary according to semester and/or instructor.
Pre- or corequisites: [(01:694:301 or 01:694:407) and (01:447:380 or (01:447:384)] or equivalent.

01:694:481,482 *Advanced Undergraduate Laboratory Research (BA, BA). 481 is Fall, 482 is Spring.*
Research project in the laboratory of a faculty member. A written report of research carried out during each semester is required. Oral presentations of student research are required in 01:694:484.

01:694:484 *Molecular Biology and Biochemistry Seminar: Research Presentations (1)*
Oral presentation of student's own research results and the research interests of the laboratory with which the student is associated. Presentation at a required poster session.
Students should take this course in the spring semester of their senior year. MBB majors only.

01:694:489,490 *Literature Research in Molecular Biology and Biochemistry (1-3,1-3)*
Literature research projects on a selected subject under the direction of a faculty member. A written report of research carried out during each semester is required. Oral presentations of student research are required in 01:694:484. This course is rarely used, therefore contact the Undergraduate Director if you are considering to take this course.
Prerequisites: 01:694:214, 215 or 315, 407, 408, and 383.

01:694:492 ***Gene Regulation: Clocks to Cancer (3)***
Explanation of MBB as an experimental science and how molecular biologists know what they know. Covers all aspects of gene regulation from transcription to protein modification to explain how 25,000 human genes can make millions of different protein isoforms and mRNA and ncRNA. Mechanisms of molecular clocks and cancer addressed in terms of gene regulation complexity,feedback loops and rate-limiting steps with emphasis on the methods, experimental design,
Prerequisites:(01:694:407 BIOCHEM) OR (01:447:384 GEN ANALY) OR (11:126:481 MOLE GEN) OR (11:115:403 GEN BIOCHEM) OR (01:694:395 BioChem LS)

01:694:495,496 ***Honors Laboratory Research (BA)***
Two-semester-long Honors research project in the laboratory of a faculty member. In the Fall semester, 01:694:495 students are required to attend a seminar each week on writing a thesis and preparing an oral thesis presentation. In the Spring semester, students take 01:694:496 where they complete their Honors thesis and give their oral presentation to their honors committee.

Linguistics 615 (SAS)

LINGUISTICS 615

Department of Linguistics, School of Arts and Sciences

Website: http://ling.rutgers.edu

Chair: Kristen Syrett

Undergraduate Program Director: Troy Messick

Distinguished Professors:

Mark Baker, B.S., Ph.D., Massachusetts Institute of Technology

Professors:

Akinbiyi Akinlabi, B.A., M.A., Ph.D., University of Ibadan (Nigeria)

Viviane Déprez, Licence, Strasbourg (France); M.A., Syracuse; Ph.D., Massachusetts Institute of Technology

Kristen Syrett, B.A., Catholic University; M.Ed., Loyola; Ph.D., Northwestern

Bruce Tesar, B.S., Western Michigan; M.S., Ph.D., Colorado (Boulder)

Associate Professors:

Adam Jardine, B.A., New Hampshire; Ph.D., Delaware

Adam McCollum, B.A., Presbyterian College; M.A., Florida; Ph.D., California (San Diego)

Yimei Xiang, B.A., Peking University; Ph.D., Harvard

Assistant Professors:

Dorothy Ahn, B.A., University of Pennsylvania; Ph.D., Harvard

Maria Kouneli, B.A., Yale, Ph.D., New York University

Troy Messick, B.A., Michigan; M.A., Ph.D., Connecticut

Associate Teaching Professor:

Crystal Akers, B.A., Swarthmore College; Ph.D., Rutgers

Assistant Teaching Professor:

Barnali Mazumdar, B.A., University of Calcutta; M.Phil. Jawaharlal Nehru University, Ph.D., Louisiana State University

Faculty Emeriti:

Maria Bittner, B.A., Oxford; Ph.D., Texas (Austin)

José Camacho, Licenciatura, Universidad Complutense de Madrid; M.A., Ph.D., University of Southern California

Veneeta Dayal, B.A., M.A., M.Phil., Delhi University; Ph.D., Cornell

Paul de Lacy, B.A., M.A., Auckland (New Zealand); Ph.D., Massachusetts (Amherst)

Jane Grimshaw, B.A., University College London; Ph.D., Massachusetts (Amherst)

Alan Prince, B.A., McGill; Ph.D. Massachusetts Institute of Technology

Kenneth Safir, B.A., Massachusetts (Amherst); Ph.D., Massachusetts Institute of Technology

Learning Goals

Learning Goals

Learning Goals for Linguistics Majors and Minors

Students will be able to reason about language scientifically; demonstrate knowledge of cross-linguistic variability and universal patterns in language; evaluate a range of views on the nature, origin, and/or structure of language; and identify what someone knows when they know a language.

Majors and minors who complete the core courses in linguistics will demonstrate technical mastery over the tools of linguistic analysis in syntax, phonology, semantics, and pragmatics and apply linguistic theory in these areas. They will be able to investigate and analyze linguistic data; demonstrate strong problem-solving skills; extend their understanding of theoretical linguistics into other domains of linguistic research; apply the techniques of linguistics to new topics; and access current research in the field.

Linguistics 615 (SAS)

Major Requirements

Major Requirements

A major in linguistics consists of 12, 3-credit courses offered by the School of Arts and Sciences, distributed as follows:

1. Introduction: one introductory course (01:615:201)

2. Theory: four B core theoretical courses (01:615:305, 315, 325, 350)

3. Electives: six courses

a. At least three (3-6) C courses chosen from a list of linguistics courses at the 300 level or above

b. At most three (0-3) D courses chosen from a list of linguistics courses at the 300 level or above and/or from the list of approved courses from outside the department

4. Capstone experience: either a senior honors thesis (01:615:495/496) or the advanced seminar (01:615:497)

Grades of C or better must be earned in all coursework that is to be applied to the major.

Linguistics 615 (SAS)

Minor Requirements

Minor Requirements

A minor in linguistics consists of seven 3-credit courses offered by the School of Arts and Sciences, distributed as follows:

1. Introduction: one introductory course (01:615:201)

2. Theory: three B core theoretical courses (options: 01:615:305, 315, 325, 350)

3. Electives: three courses

a. At least one B or C course chosen from a list of linguistics courses at the 300 level or above.

b. Two C or D courses chosen from a list of linguistics courses at the 300 level or above and/or from the list of approved courses from outside the department.

Grades of C or better must be earned in all coursework that is to be applied to the minor.

Linguistics 615 (SAS)

Bachelor of Arts in Speech and Hearing Sciences in Linguistics

Bachelor of Arts in Speech and Hearing Sciences in Linguistics

1. Introduction: One introductory course (01:615:201)

2. Theory: four B core theoretical courses (01:615:305, 315, 325, 350)

3. Electives: six courses

The required number of courses from 3 of the following sets of courses:

a. 2 courses from (01:615:440, 01:615:451)

b. 1 course from Linguistics Courses Group C

c. 3 Courses from (Linguistics Courses Group C or D)

4. Capstone experience: One course from (01:615:495, 496).

Grades of C or better must be earned in all coursework that is to be applied to the major.

5. Certificate in Speech and Hearing Sciences - Required Courses:

A total of 5 courses from (01:615:391, 01:615:392, 01:615:393, 01:615:440, 01:615:451).

6. Certificate in Speech and Hearing Sciences - Electives:

Elective Set I: A total of 3 credits from (Cognitive Science, Education, Psychology, Statistics electives).

And

Elective Set II: A total of 3 credits from (Biology, Chemistry, Physics electives).

Linguistics 615 (SAS)

Certificate in Speech and Hearing Sciences

Certificate in Speech and Hearing Sciences

Linguistics 615 (SAS)

Departmental Honors Program

Departmental Honors Program

All students graduating with at least a 3.8 GPA in the linguistics major are designated as graduating with departmental honors. Only those students completing a senior honors thesis are eligible for high or highest honors.

To be considered for a senior honors thesis, a student must have a cumulative grade-point average of 3.0 or better and a grade-point average of 3.6 or better in courses counting toward the linguistics major. Linguistics majors intending to write a senior honors thesis who have an agreed-upon faculty advisor must then submit a written proposal to the undergraduate program director and their faculty advisor no later than May 31 of their junior year. This proposal should clearly indicate the proposed thesis topic, the faculty advisor, and a general plan for working together with the advisor over the summer (optional) and into the next academic year. These details may be rather general, and specified at a later time.

Students selected to participate in the program enroll in 01:615:495 and 496 and spend two semesters researching and writing an honors thesis under the supervision of a faculty member in the Department of Linguistics.

The thesis must be submitted by March 31 of the senior year. An oral examination on the thesis is given by a thesis evaluation committee consisting of at least two linguistics department faculty members and a possible graduate student in linguistics in the first two weeks of April. The committee does not include the student's thesis supervisor.

On the basis of the thesis committee's report and if necessary, in consultation with the undergraduate program director and the faculty advisor, the department determines whether the student is to be recommended for high or highest departmental honors.
All honors thesis students are designated as Paul Robeson Scholars. Only those thesis students earning highest honors are nominated for the Henry Rutgers Scholar Award, evaluation of which is conducted outside of the department by a separate School of Arts and Sciences committee.

Linguistics 615 (SAS)

Student Awards

Student Awards

Department of Linguistics Award for Academic Excellence: Awarded to a linguistics major with the highest GPA in linguistics, and who demonstrates overall academic excellence.

Department of Linguistics Award for Research Excellence: Awarded to a linguistics major who has demonstrated outstanding accomplishments in research and promise as a researcher.

Robert Jeffers Memorial Award: Awarded to a linguistics student in recognition of outstanding leadership and service in the Department of Linguistics.

Linguistics 615 (SAS)

Courses

Courses

01:615:101 ***Exploring Language (3)***
Wide-ranging examination of human language as a social, cultural, cognitive, historical, and formal phenomenon.
May not be used for major or minor credit.

01:615:190 ***Invented Languages (1.5)***
Introduction to linguistic properties of familiar and less familiar languages, natural and artificial. Content varies depending on the language or languages chosen.
May not be used for major or minor credit.

01:615:191 ***Linguistics, the Internet, and Social Media (1.5)***
Examination of language use on the internet and in social media through scholarly and popular sources. Investigation of current trends using linguistics research methodologies. Content varies to emphasize timely linguistic trends.
May not be used for major or minor credit.

01:615:201 ***Introduction to Linguistic Theory (3)***
Structural properties of human language as illuminated by modern linguistic theory. Sentence structure, sound patterns, word form, and aspects of meaning. Principles of Universal Grammar.
Required for all majors and minors; serves as a prerequisite for most other courses. Credit not given for both this course and 01:730:421.

01:615:215 ***Language of Advertising (3)***
Examines advertising strategies from a linguistic perspective, focusing on how sounds, sentence structures, and meanings are used in persuasive messages.

01:615:305 ***Syntax (3)***
Structure of phrases and sentences in natural language. Universal grammar and interlinguistic variation. X-bar theory. Case, NP- and Wh-movement, anaphora, binding, and government. Lexical representation. Logical form.
Prerequisite: 01:615:201.

01:615:315 ***Phonology (3)***
Sound structure of language. Phonetic underpinnings; phonological representation; rule systems; constraint interaction. Syllable structure; feature geometry; vowel harmony; stress, accent, and tone.
Prerequisite: 01:615:201.

01:615:325 ***Semantics (3)***
Meaning in natural language. Construction of the meaning of the whole from the meaning of the parts. Syntactic structure and semantic interpretation. Model theoretic semantics.
Prerequisite: 01:615:201.

01:615:330 ***Historical Linguistics (3)***
Change of language structure through time. Methods of reconstructing dead languages. Syntactic and phonological rule systems as locus of change. Language families; the deep reconstruction controversy.
Prerequisite: 01:615:201.

01:615:350 ***Pragmatics (3)***
Relation of language to the discourse context. Language usage. Linguistic structure beyond the sentence level. Sample topics: conversational maxims, implicature, presuppositions, speech act theory, reference and deixis
Prerequisite: 01:615:201.

01:615:371 ***Psychology of Language (3)***
Production, perception, and acquisition of language at the level of sound (phonology), words (morphology and the lexicon), and grammar (syntax).
Prerequisite: 01:615:201. Credit not given for both this course and 01:830:351.

01:615:381 ***Sociolinguistics (3)***
Emphasizes insights into the use of language in society provided by a generative linguistics approach to natural language.
Prerequisite: 01:615:201.

01:615:391 ***Anatomy and Physiology of the Speech Mechanism (3)***
Anatomy (structure) and physiology (function) of the systems and processes involved in speech production. Respiratory, phonatory, articulatory, resonatory, and nervous systems. Prerequisite content required for students planning to pursue a higher-level degree in the speech and hearing sciences, including speech pathology and audiology; emphasizes clinically relevant information.
Prerequisite: 01:615:201.

01:615:392 ***Introduction to Communication Disorders (3)***
Introduction to the study of human communication disorders, from the typical acquisition of speech and language milestones to the nature, causes, assessment, and treatment of communication and swallowing disorders; examination of the professional roles and responsibilities of speech-language pathologists and audiologists. Required for a higher-level degree in the speech and hearing sciences.
Prerequisite: 01:615:201.

01:615:393 ***Audiology (3)***
Introduction to the profession and practice of audiology through an overview of anatomy and physiology of the auditory system, physical properties of sound relevant to hearing assessment, techniques for hearing assessment, and auditory disorders. Covers the prerequisite content to pursue a higher-level degree in the speech and hearing sciences.
Prerequisite: 01:615:201.

01:615:394 ***Speech and Hearing Science (3)***
Introduction to the fundamentals of speech and hearing science, as applicable to speech-language pathology and audiology. Students will develop an understanding of the basic physical properties of sound or pressure waves, learn about the acoustics and perception of speech, describe perceptual correlates related to these sound properties and the anatomy and physiology of the speech production and hearing mechanism related to these properties, and explain variability that occurs. Covers the prerequisite content to pursue a higher-level degree in the speech and hearing sciences.
Prerequisite: 01:615:201

01:615:407 ***Francophone Linguistics (3)***
Study of advanced problems of syntax in French and Francophone dialects and Creole in conjunction with theoretical problems in linguistics.
Prerequisite: 01:615:201 or 01:420:333. Credit not given for both this course and 01:420:407.

01:615:411 ***Morphology (3)***
Structure of words in natural language. Word formation and syntax. Effects of word structure on sound patterning. Inflection, derivation, compounding, headedness, and scope of affixes.
Prerequisite: 01:615:305 or 315.

01:615:415 ***Evolution of the Human Language Capacity (3)***
Origins of the human language capacity in the evolutionary history of mankind.
Prerequisite: 01:615:305, 315, 325, or 350.

01:615:420 ***Speech Acts (3)***
Investigation of philosophical issues surrounding how speakers use language to communicate. What goals do people accomplish by speaking? What resources does a language offer for achieving those goals? How do speakers deploy those linguistic resources to achieve their communicative goals on particular occasions?
Prerequisite: 01:615:350. Credit not given for this course and 01:730:320.

01:615:421 ***Language Typology (3)***
Similarities and differences between grammatical systems, with focus on syntax. Role of principled variation in Universal Grammar. Overt and nonovert movement, pro-drop, case marking, and anaphora. Markedness.
Prerequisite: 01:615:305.

01:615:425 ***Romance Linguistics (3)***
Comparison of principal syntactic and phonological structures of French, Spanish, Italian, and other Romance languages. Stress patterns; vowel and consonant shifts. Pro-drop language, inflection, and inversion. Contrast with English.
Prerequisites: 01:615:201 and one of 01:615:305, 315, or 325.

01:615:431 ***Investigations into an Unfamiliar Language (3)***
Study of the linguistic structure of an unfamiliar language, based on in-class work with a native-speaking consultant.
Prerequisite: 01:615:305, 315, 325, or 350.

01:615:435 ***Experimental Methodologies in Language Acquisition (3)***
A review of experimental methodologies used by linguists to investigate language acquisition, including an in-depth focus on the linguistic phenomena being acquired by the language learner. Hands-on experience designing experiments and analyzing data.
Prerequisites: 01:615:305.

01:615:440 ***Language Development (3)***
Overview of child language development in the major subfields of Linguistics: phonology, morphology, syntax, semantics, and pragmatics. Covers child language production and comprehension, developmental milestones, theoretical frameworks, experimental methodologies, the role of the adult speaker, and multiple factors influencing language development. Involves hands-on work emphasizing communication with speech-language pathologists, parents, educators, and other professionals.
Prerequisite: 01:615:201

01:615:441 ***Linguistics and Cognitive Science (3)***
Linguistic theory and the human mind/brain. Acquisition and processing of natural language. Parsing. Formal learning. Language deficits. Symbolic and connectionist approaches to language.
Prerequisite: 01:615:305, 315, 325, or 350.

01:615:445 ***Language and Cognition (3)***
Understanding language and cognition. Language structure, linguistic and conceptual representations, and cognitive processes.
Prerequisites: 01:185:201, 01:615:201. Credit not given for both this course and 01:185:410 or 01:185:340.

01:615:451 ***Phonetics (3)***
Articulatory mechanisms of speech. Physical characteristics of speech sounds; interpretation of spectrograms. Description and transcription of the sounds of the world's languages.
Prerequisite: 01:615:305, 315, 325, or 350.

01:615:455 ***Computational Linguistics (3)***
An introduction to theoretical and practical issues in computational linguistics for linguistics majors. Students will learn basic programming techniques and apply them to the scientific study of language. Topics may include automata and formal language theory, regular expressions, syntactic and semantic parsing, functional programming, statistical methods, chatbots, and learning. No prior knowledge of programming or computer science is required.
Prerequisite: 01:615:201.

01:615:461 ***Linguistics of Signed Languages (3)***
Introduces the fundamental structure of natural signed languages spoken around the world. Covers the essentials of signed language phonology, syntax, and semantics. Includes discussion of deaf culture and of art and media in the signed languages medium.
Prerequisite: 01:615:201.

01:615:465 ***An Introduction to Prosody (3)***
Prosodic structure of language. Intonation in conversation, phonetic and phonological cues, sociophonetics of intonation, prosodic development, prosody in atypical populations and technological application. Prosody and intonation data collection and transcription.
Prerequisite: 01:615:201 and either 615:315 or 615:451.

01:615:471 ***Selected Topics in Linguistics (3)***
Study of selected areas in linguistics.
Prerequisite: 01:615:305, 315, 325, or 350.

01:615:481 ***Language and Law (3)***
Introduction to forensic linguistics. Examination of the linguistic analyses of language in legal settings and how language is used and interpreted by suspects, police, laws, and courts. Topics may include syntax, semantics, phonetics, phonology, morphology, pragmatics, and sociolinguistics.
Prerequisite: 01:615:305, 315, 325, or 350.

01:615:491 ***Practicum in Linguistics (3)***
Linguistic research techniques. Participation in a research group that focuses on a specific topic, defined by the course instructor.
Prerequisite: 01:615:305, 315, 325, or 350.

01:615:493,494 ***Independent Study (3,3)***
Independent research carried out under supervision of a linguistics faculty member.
Prerequisites: Permission of major advisor and instructor.

01:615:495,496 ***Senior Honors Thesis (3,3)***
Supervised research and writing of a senior honors thesis.
Prerequisites: Senior status; permission of major advisor.

01:615:497 ***Advanced Undergraduate Seminar (3)***
Students are introduced to a research topic. Work in small groups selecting a project related to the topic, with the goal of making a public presentation (e.g., poster, video, PowerPoint) at the end of the semester. Topics vary.
Prerequisites: Open only to linguistics majors; special permission.

Approved courses in other departments counting toward the major or minor as electives are listed on the Department of Linguistics website, in the undergraduate area (in the major/minor descriptions and course descriptions).

Programs of Study: Majors and Minors (RBS-NB)

PROGRAMS OF STUDY: MAJORS AND MINORS

The business studies program is only part of the student's academic program. Students will complement their professional education with coursework in the humanities, mathematics, natural sciences, and social and behavioral sciences. In order to design an integrated academic program, full-time students should plan their program over four years. During the first three semesters, the student should formulate a schedule that is comprised of the six prerequisite courses and liberal arts core curriculum requirements. During the remaining five semesters, the schedule focuses on completing the remaining credits required of the business major. Students should also plan to take additional general elective credits to ensure that their total degree credits equals 120, the number of credits needed for the bachelor of science degree. Business majors should consult with a Rutgers Business School: Undergraduate-New Brunswick advisor when they are planning their academic program.

The following are prerequisite courses that students must complete during their first three (four at most) semesters and before they are eligible to take additional business courses:

Prerequisite Courses (19 credits)
01:198:170 Computer Applications for Business (3)
01:220:102 Introduction to Microeconomics (3)
01:220:103 Introduction to Macroeconomics (3)
01:640:135 Calculus I (4)
01:960:285 Introductory Statistics for Business (3)
33:010:272 Introduction to Financial Accounting (3)

Liberal Arts Core Curriculum Requirements (minimum 27 credits)
In addition to the six eligibility courses and courses that are required for the major, all Rutgers Business School: Undergraduate-New Brunswick students must complete the following liberal arts core curriculum requirements:
1) Contemporary Challenges (two courses)
2) Areas of Inquiry (six courses)
3) Cognitive Skills and Processes (five courses).
All courses must be at least 3 credits and must be taken for degree credit. Pass/no credit courses may not be used to fulfill these requirements. Students should see Degree Navigator for specific courses and conditions.

Major Requirements (56-62 credits)
The major requirements for Rutgers Business School: Undergraduate-New Brunswick programs of study can be divided into two parts: business core course requirements that all students must complete regardless of their choice of major program (accounting, business analytics and information technology, finance, leadership and management, marketing, or supply chain management), and a combination of required and elective courses that students take according to their choice of major. Students must complete the requirements of the major that are in effect at the time of their admission into the major. All core courses and required courses specific to the major must be completed with a grade of C or better.

- 010 Accounting
- 136 Business Analytics and Information Technology (BAIT)
- 390 Finance
- 605 Leadership and Management
- 630 Marketing
- 799 Supply Chain Management
- 135 Business Administration Minor
- 382 Entrepreneurship Minor

Marine Sciences 628 (SEBS)

MARINE SCIENCES 628

Marine Sciences 628

Degree: B.S.

Director: Silke Severmann, Marine and Coastal Sciences Building, Room 303D, 848-932-3488 (silke@marine.rutgers.edu)

Program Webpage:https://marine.rutgers.edu/main/academics/undergraduate

Marine science is the study of the marine environment and its interactions with the Earth, the biosphere, and the atmosphere. It is, therefore, an interdisciplinary science requiring a knowledge of the principles of physics, geology and geophysics, mathematics, chemistry, and biology. A major in marine sciences provides students with a broad curriculum in the sciences, which demonstrates how the different disciplines can be brought to bear on understanding marine processes and managing ocean resources wisely.

The major prepares students for graduate work in oceanography or one of the basic disciplines, civil service careers in environmental management, employment in the many applied environmental and marine science fields, or teaching in secondary schools.

The marine science courses emphasize the improvement of oral and written communication skills, and competency in reading, understanding, and synthesizing scientific literature. Courses at all levels emphasize hands-on, experiential learning in the laboratory or the field. Students also are required to complete the experience-based education requirement with at least one semester or summer of supervised, independent research.

Options

The program includes the following options:

Marine Biology/Biological Oceanography. This option prepares students for professional opportunities or graduate study in oceanography or the biological sciences. Concentrations within the option permit students to focus on different levels of biological organization at the molecular, cellular, organismic, community, or ecosystem level. Depending on their choice of electives, students also may fulfill the requirements of a major in the biological sciences or ecology and natural resources.

Marine Chemistry. This option prepares students for professional opportunities or graduate study in oceanography or chemistry. Depending on their choice of electives, students may also fulfill the requirements of a major in chemistry.

Marine Geology. This option prepares students for graduate study in oceanography, geology, environmental science, or an allied field, as well as for immediate employment. Depending on their choice of electives, students may also fulfill the requirements of a major in geological sciences.

Physical Oceanography. This option prepares students for graduate study in physical oceanography, meteorology, fluid dynamics, or a related field, as well as immediate employment in environmental agencies or consulting firms and technical positions in marine sciences.

Directed Marine Studies. This option prepares students for professional opportunities in oceanography, the biological sciences, and related fields. It differs from the other four options in requiring students to complete one of several minor and certificate programs offered by the School of Arts and Sciences or the School of Environmental and Biological Sciences, either the Professional Writing Certificate (355), the minor in Education (300), the Certificate in Environmental Geomatics (372), the minor in Environmental Policy, Institutions, and Behavior (374), the minor in Fisheries Science (392), the minor in Sustainability, or a program approved by the Undergraduate Program Director. This requirement is included in order to ensure that students in this option will acquire a focused set of knowledge and skills to complement their marine science studies and to help them find employment upon graduation. Students in this option would choose the minor or certificate program that fulfills part of their major requirements no later than in their fourth semester of study at the university.

Learning Goals

Learning Goals

1. Master the basic biological, chemical, physical, and geological principles of marine science.

2. Analyze and interpret contemporary oceanographic datasets.

3. Show evidence of scientific literacy, and communicate the information effectively both orally and in writing.

4. Develop, conduct, and report on an applied research experience in marine science in collaboration with a scientific mentor.

5. Evaluate contemporary global issues and the ethics of how the ocean's resources are used.

Marine Sciences 628 (SEBS)

Graduation Requirements for the Major

Graduation Requirements for the Major

For an up-to-date description of marine sciences major requirements, courses, and course sequences please refer to the program webpage at https://marine.rutgers.edu/main/academics/undergraduate.

SEBS UNDERGRADUATE CORE CURRICULUM (39 credits)

Contemporary Challenges (6 credits) *Two courses, one in each of the Contemporary Challenges areas: Diversities and Social Inequalities* [CC-D] *and Our Common Future* [CC-O]

Experiential Learning (3 credits) *Students must participate in a certified experience that meets this goal* [EL]

Natural Sciences (6 credits) *Students must take two courses, one each in two of the following areas: physical, biological, or environmental sciences* [NS]

Historical Analysis (3 credits) *Students must take one course* [HST]

Social Analysis (6 credits) *SEBS students must complete two courses, one in either social/cultural analysis or economic analysis, and one in governmental and regulatory analysis* [SCL]

Arts and Humanities (3 credits) *Students must complete one course* [AH]

Writing and Communication (6 credits) *Students must take 01:355:101 or its equivalent [WC] and one course that fulfills the learning goal, communicate effectively in modes appropriate to a discipline or area of inquiry* [WCD].

Quantitative and Formal Reasoning (6 credits) *Students must take two courses* [QQ; QR]

Major Requirements For All Students Regardless of Matriculation Date

A. REQUIRED COURSES (12)

Professional Ethics
Ethical issues in marine sciences are addressed throughout the program in both introductory and advanced courses, especially within the framework of the experience-based education requirement.

- 01:960:401 Basic Statistics for Research (3)
- 11:628:120 Introduction to Oceanography (3)
- 11:628:320 Dynamics of Marine Ecosystems (3)
- 11:628:363 Oceanographic Methods and Data Analysis: Biol/Chem (3) OR 11:628:364 Oceanographic Methods and Data Analysis: Biol/Physical (3)

B. OPTIONS (63-78)

1. Marine Biology/Biological Oceanography (70-74)
Required Courses (58-59)

- 01:119:115-116 General Biology I&II (4+4)
- 01:119:117 Biological Research Lab (2)
- 01:447:380 Genetics (4) OR 11:776:305 Plant Genetics (4)
- 01:160:161-162 General Chemistry I&II (4+4)
- 01:160:171 Introduction to Experimentation (1)
- 01:160:307-308 Organic Chemistry I&II (4+4) OR
    - 01:160:209 Elementary Organic Chemistry (3) AND 01:694:301/11:115:301 Introductory Biochemistry (3) AND 01:694:313/11:115:313 Introductory Biochemistry Laboratory (1)
- 01:640:135-136 Calculus I&II (4+4)
- 01:750:193-194 Physics for the Sciences I&II (4+4)
- 11:628:461 Biology of Living in the Ocean: Water Column Ecosystems (3)
- 11:628:462 Biology of Living in the Ocean: Boundary Ecosystems (3)
- Experiential Learning (6)

One of the following (3-4):

- 01:146:356 Systems Physiology (3) AND 01:146:357 Systems Physiology Lab. (1)
- 11:216:360 Animal Physiological Ecology (3)
- 11:680:481 Microbial Physiology (3)
- 11:776:382 Plant Physiology (4)

One of the following (3-4):

- 11:628:321 Ichthyology (4)
- 11:680:390 General Microbiology (4)
- 11:216:323 Ornithology (4)
- 11:216:324 Invertebrate Zoology (4)
- 11:216:325 Vertebrate Zoology (4)
- 11:776:400 Fungi in the Environment (3)

One of the following (3-4):

- 11:628:405 Molecular Microbial Oceanography (3)
- 11:628:410 Biophysical Interactions: Barnacles to Jellyfish (3)
- 11:628:476 History of the Earth System (3)
- 11:670:451 Remote Sensing of the Ocean and Atmosphere (3)
- 11:216:240 Behavioral Biology (4)
- 11:216:351 Principles of Ecology (3)
- 11:216:486 Principles of Evolution (3)

At least 3 credits from the following:

- 11:628:201-203, 205-210 Topics in Marine Science (1.5)
- 11:628:309 Fishery Science (3)
- 11:628:317 Aquaculture (3)
- 11:628:340 Identification of Marine Invertebrates (2)
- 11:628:341 Hydrothermal Vents (3)
- 11:628:451 Physical Oceanography (4)
- 11:628:472 Chemical Oceanography (3)
- 11:628:402 The Role of Polar Regions in the Earth System
- 11:628:474 Coastal Biogeochemical Cycles in a Changing World

2. Marine Chemistry (66-68)

Required courses (60)

- 01:119:115-116 General Biology I&II (4+4)
- 01:119:117 Biological Research Lab (2)
- 01:160:161-162 General Chemistry I&II (4+4)
- 01:160:171 Introduction to Experimentation (1)
- 01:160:251 Analytical Chemistry (3)
- 01:160:307-308 Organic Chemistry I&II (4+4)
- 01:160:311 Organic Chemistry Laboratory (2)

- 01:160:348 Instrumental Analysis (3)
- 01:640:151-152 Calculus for Mathematical and Physical Sciences I&II (4+4)
- 01:750:203-204 General Physics I&II (3+3)
- 01:750:205-206 General Physics Laboratory I&II (1+1)
- 11:628:472 Chemical Oceanography (3)
- Experiential Learning (6)

One of the following (3-4)

- 01:460:101 Introductory Geology (3)
- 01:460:304 Introduction to Geochemistry (4)
- 01:460:417 Environmental Geochemistry (3)
- 11:375:202 Chemical Principles Environmental Science (3)
- 11:375:340 Environmental Applications of Organic Chemistry (3)
- 11:375:360 Soils and Water (4)
- 11:375:444 Water Chemistry (3)
- 11:670:323 Thermodynamics of the Atmosphere (3)
- 11:670:451 Remote Sensing of the Ocean and Atmosphere (3)

At least 3 credits from the following (3-4):

- 11:628:201-203, 205-210 Topics in Marine Science (1.5)
- 11:628:309 Fishery Science (3)
- 11:628:317 Aquaculture (3)
- 11:628:340 Identification of Marine Invertebrates (2)
- 11:628:341 Hydrothermal Vents (3)
- 11:628:402 The Role of Polar Regions in the Earth System
- 11:628:405 Molecular Microbial Oceanography (3)
- 11:628:410 Biophysical Interactions: from Barnacles to Jellyfish (3)
- 11:628:451 Physical Oceanography (4)
- 11:628:461 Biology of Living in the Ocean: Water Column Ecosystems (3)
- 11:628:462 Biology of Living in the Ocean: Boundary Ecosystems (3)
- 11:628:474 Coastal Biogeochemical Cycles in a Changing World

3. Marine Geology (71-74)

Required Courses (59)

- 01:119:115-116 General Biology I&II (4+4)
- 01:119:117 Biological Research Lab (2)
- 01:160:161-162 General Chemistry I&II (4+4)
- 01:160:171 Introduction to Experimentation (1)

- 01:460:101 Intro Geology (3)
- 01:460:330 Sedimentary Geology (4)
- 01:460:451 Marine Geology (3)
- 01:750:203-206 General Physics I+II and Lab I+II (4+4)
- 01:640:151-152 Calculus for Mathematical and Physical Sciences I&II (4+4)
- 01:750:203-204 General Physics I&II (3+3)
- 01:750:205-206 General Physics Laboratory I&II (1+1)
- Experiential Learning (6)

One of the following (3-4)

- 11:628:402 The Role of Polar Regions in the Earth System
- 11:628:451 Physical Oceanography (4)
- 11:628:461 Biology of Living in the Ocean: Water Column Ecosystems (3)
- 11:628:462 Biology of Living in the Ocean: Boundary Ecosystems (3)
- 11:628:472 Chemical Oceanography (3)
- 11:628:474 Coastal Biogeochemical Cycles in a Changing World

One of the following (3-4)

- 01:450:321 Geographic Information System (3)
- 01:460:303 Paleontology (4)
- 01:460:304 Introduction to Geochemistry (4)
- 01:460:407 Structural Geology (4)
- 01:460:414 Hydrological Processes (3)
- 01:460:453 Paleoecology (3)

One of the following (3-4)

- 01:450:403 Advanced Physical Geography (3)
- 01:460:306 Introduction to Geophysics (4)
- 01:460:417 Environmental Geochemistry (3)
- 11:628:476 History of the Earth Systems (3)
- 11:670:451 Remote Sensing of the Ocean & Atmosphere (3)

4. Physical Oceanography (63-64)

Required Courses (51-52)

- 01:119:103 Principles of Biology (3)
- 01:160:161-162 General Chemistry I&II (4+4)
- 01:160:171 Introduction to Experimentation (1)

- 01:640:151-152 Calculus for Mathematical and Physical Sciences I&II (4+4)
- 01:640:251 Multivariable Calculus (4)
- 01:640:252 Differential Equations (3) OR 01:640:244 Differential Equations/Engineers & Physics (4)
- 14:440:127 Intro Computers/Engineers (3) OR 11:670:212 Computational Methods Meteorology (3)
- 01:640:373 Numerical Analysis (3) OR 01:198:323 Numerical Analysis & Computing (3)
- 01:750:203-204 General Physics I&II (3+3)
- 01:750:205-206 General Physics Laboratory I&II (1+1)
- 11:628:451 Physical Oceanography (4)
- Experiential Learning (6)

Four of the following with at least one from Group A and at least one from Group B:

Group A

- 01:640:250 Introduction Linear Algebra (3)
- 01:640:421 Advanced Calculus/Engineers (3)
- 14:650:312 Fluid Mechanics (3)

Group B

- 11:628:402 The Role of Polar Regions in the Earth System
- 11:628:410 Biophysical Interactions: from Barnacles to Jellyfish (3)
- 11:628:461 Biology of Living in the Ocean: Water Column Ecosystems (3)
- 11:628:462 Biology of Living in the Ocean: Boundary Ecosystems (3)
- 11:628:472 Chemical Oceanography (3)
- 11:628:474 Coastal Biogeochemical Cycles in a Changing World
- 11:670:324 Atmospheric Thermodynamics (3)
- 11:670:451 Remote Sensing of the Ocean & Atmosphere (3)

5. Directed Marine Studies (74-78)

Required Courses (44)

- 01:119:115-116 General Biology I&II (4+4)
- 01:119:117 Biological Research Lab (2)
- 01:447:380 Genetics (4) OR 11:776:305 Plant Genetics (4)
- 01:160:161-162 General Chemistry I&II (4+4)
- 01:160:171 Introduction to Experimentation (1)
- 01:640:135 Calculus I (4)
- 01:750:193-194 Physics for the Sciences I&II (4+4)
- 11:628:461 Biology of Living in the Ocean: Water Column Ecosystems (3)
- 11:628:462 Biology of Living in the Ocean: Boundary Ecosystems (3)
- Experiential Learning (3)

One of the following (3-4):

- 01:146:356 Systems Physiology (3) AND 01:146:357 Systems Physiology Lab. (1)
- 11:216:360 Animal Physiological Ecology (3)
- 11:680:481 Microbial Physiology (3)
- 11:776:382 Plant Physiology (4)

One of the following (3-4):

- 11:628:321 Ichthyology (4)
- 11:680:390 General Microbiology (4)
- 11:216:323 Ornithology (4)
- 11:216:324 Invertebrate Zoology (4)
- 11:216:325 Vertebrate Zoology (4)
- 11:776:400 Fungi in the Environment (3)

One of the following (3-4):

- 11:628:405 Molecular Microbial Oceanography (3)
- 11:628:410 Biophysical Interactions: Barnacles to Jellyfish (3)
- 11:628:476 History of the Earth System (3)
- 11:670:451 Remote Sensing of the Ocean and Atmosphere (3)
- 11:216:240 Behavioral Biology (4)
- 11:216:351 Principles of Ecology (3)
- 11:216:486 Principles of Evolution (3)

At least 3 credits from the following:

- 11:628:201-203, 205-210 Topics in Marine Science (1.5)
- 11:628:309 Fishery Science (3)
- 11:628:317 Aquaculture (3)
- 11:628:340 Identification of Marine Invertebrates (2)
- 11:628:341 Hydrothermal Vents (3)
- 11:628:402 The Role of Polar Regions in the Earth System
- 11:628:451 Physical Oceanography (4)
- 11:628:472 Chemical Oceanography (3)
- 11:628:474 Coastal Biogeochemical Cycles in a Changing World

Completion of an approved Minor or Certificate Program (~ 18 credits)

Professional Writing Certificate (355), the minor in Education (300), the Certificate in Environmental Geomatics (372), the minor in Environmental Policy, Institutions, and Behavior (374), the minor in Fisheries Science (392), the minor in Sustainability (374), or a program approved by the Undergraduate Program Director.

630 Marketing (RBS-NB)

630 Marketing

Major requirements for students who entered RBS ***prior to the fall 2023 semester***

Business Core

33:010:275 Introduction to Managerial Accounting (3) (prerequisite: 33:010:272)
33:011:300 Business Forum (2)
33:136:370 Management Information Systems OR 33:010:458 Accounting Information Systems (3) (33:010:458 required if double majoring in Accounting, Prerequisite for 33:010:458: 33:010:272)
33:136:385 Statistical Methods in Business (3)
33:136:386 Operations Management (3)
33:140:320 Business Law I (3) OR 33:522:334 Business Ethics (3) (junior or senior year33:140:320 required if double majoring in Accounting)
33:390:300 Financial Management OR 33:390:310 Financial Management for Finance Majors (3) (33:390:310 required if double majoring in Finance)
33:620:301 Introduction to Management (3)
33:620:302 Management Skills (3)
33:620:492 Business Policy and Strategy (3) (prerequisites: 33:390:300 or 33:390:310, 33:620:301, 33:630:301, and senior year)
33:630:301 Introduction to Marketing (3)

Required Marketing Courses

33:630:385 Marketing Research (3) (prerequisites: 33:136:385 and 33:630:301)
33:630:374 Consumer Behavior (3) (prerequisite: 33:630:301)
33:630:452 Marketing Strategy and Decision-Making (3) (prerequisite: 33:630:385 and seniors only)

Four Marketing Electives (12)

There are two introductory Finance courses that can fulfill a business core requirement. If you intend to double major in Finance or declare a Finance concentration you will need to take Financial Management for Finance Majors (33:390:310). You can take Financial Management (33:390:300) if you have no intention of majoring in Finance or declaring a Finance Concentration. Credit will not be given for both courses if you take both due to switching to a Finance major/declaring a Finance concentration at a later date.

If you major in Accounting as your first, second, or third major, you are required to take 33:010:458 Accounting Information System and 33:140:320 Business Law I. You will not earn credit for taking 33:136:370 Management Information System. You can earn credit towards graduation if you take 33:522:334 Business Ethics but it will not fulfill a major requirement.

Students with more than one Business School major may only double count one RBS course between those majors.

Major requirements for students who entered RBS ***in the fall 2024 semester or later:***

Business Core

33:010:275 Introduction to Managerial Accounting (3) (prerequisite: 33:010:272)
33:011:301 Foundations for Your Career Journey (1)
33:011:302 Building Your Brand (1) (prerequisite: 33:011:301)
33:011:303 Conquering Your Transition (1) prerequisite: 33:011:302)
33:136:370 Management Information Systems OR 33:010:458 Accounting Information Systems (3) (33:010:458 required if double majoring in Accounting, Prerequisite for 33:010:458: 33:010:272)
33:136:385 Statistical Methods in Business (3)
33:136:386 Operations Management (3)
33:140:320 Business Law I (3) OR 33:522:334 Business Ethics (3) (33:140:320 required if double majoring in Accounting)
33:390:300 Financial Management (3)
33:620:301 Introduction to Management (3)
33:620:302 Management Skills (3)
33:620:492 Business Policy and Strategy (3) (prerequisites: 33:390:300 or 33:390:310, 33:620:301, 33:630:301, and senior year)
33:630:301 Introduction to Marketing (3)
33:799:301 Introduction to Supply Chain Management (3)

Required Marketing Courses

33:630:385 Marketing Research (3) (prerequisites: 33:136:385 and 33:630:301)
33:630:374 Consumer Behavior (3) (prerequisite: 33:630:301)
33:630:452 Marketing Strategy and Decision-Making (3) (prerequisite: 33:630:385 and seniors only)

Four Marketing Electives (12)

A grade of B or better is required to take any additional Finance department courses beyond 33:390:300 Financial Management.

If you major in Accounting as your first, second, or third major, you are required to take 33:010:458 Accounting Information System and 33:140:320 Business Law I. You will not earn credit for taking 33:136:370 Management Information System. You can earn credit towards graduation if you take 33:522:334 Business Ethics but it will not fulfill a major requirement.

Students with more than one Business School major may only double count one RBS course between those majors.

Mathematics 640 (SAS)

MATHEMATICS 640

Department of Mathematics, School of Arts and Sciences

Website: http://math.rutgers.edu

Chair: Stephen D. Miller

Undergraduate Vice-Chair: Avraham Soffer

Associate Undergraduate Vice-Chair for Assessment: Lewis Hirsch

Distinguished Professors:

Michael Beals, B.A., M.S., Chicago; Ph.D., Princeton

Lev A. Borisov, B.S., Moscow State; Ph.D., Michigan

Fioralba Cakoni, Dip. Math, M.S., Tirana (Albania); Ph.D., Patras/Tirana (Albania)

Eric Carlen, B.A., Virginia; Ph.D., Princeton

Sagun Chanillo, B.S., M.S., Indian Institute of Technology; Ph.D., Purdue

Paul Feehan, B.Eng., Dublin; M.S., Missouri; M.A., Southern California; M.S., Ph.D., Columbia

Gerald Goldin, Graduate School of Education; Ph.D., Princeton

Sheldon Goldstein, B.S., M.A., Ph.D., Yeshiva

Xiaojun Huang, B.S., Nanjing Aeronautical Institute (China); M.S., Wuhan (China); Ph.D., Washington

Henryk Iwaniec, Ph.D., Warsaw

Jeffry Kahn, B.S., Rensselaer Polytechnic Institute; Ph.D., Ohio State

János Komlós, Ph.D., Eötvös (Budapest)

Joel L. Lebowitz, B.S., CUNY (Brooklyn College); M.S., Ph.D., Syracuse

James Lepowsky, A.B., Harvard; Ph.D., Massachusetts Institute of Technology

Yanyan Li, B.S., Hefei (China); M.S., Academica Sinica (Taiwan); Ph.D., New York

Feng Luo, B.S., Beijing; Ph.D., California (San Diego)

Stephen D. Miller, A.B., California (Berkeley); M.A., Ph.D., Princeton

Konstantin Mischaikow, Ph.D., Wisconsin

Fred S. Roberts, Director, DIMACS; A.B., Dartmouth College; M.S., Ph.D., Stanford

Xiaochun Rong, B.S., M.A., Beijing Teachers College (China); Ph.D., SUNY (Stony Brook)

Michael Saks, B.S., Ph.D., Massachusetts Institute of Technology

Natasa Sesum, B.A., Belgrade (Yugoslavia); Ph.D., Massachusetts Institute of Technology

Avraham Soffer, B.S., M.S., Ph.D., Tel Aviv

Simon Thomas, B.S., Ph.D., London

Pham Tiep, Ph.D., Moscow State (Russia)

Michael S. Vogelius, Cand. Scient., Aarhus (Denmark); Ph.D., Maryland

Charles Weibel, B.S., B.A., Michigan; S.M., Ph.D., Chicago

Christopher Woodward, A.B., Harvard; Ph.D., Massachusetts Institute of Technology

Doron Zeilberger, B.S., London; Ph.D., Weizmann Institute of Science (Israel)

Professors:

Anders Buch, M.S., Ph.D., Chicago

Lisa Carbone, M.S., Melbourne; M.A., M.Ph., Ph.D., Columbia

Zheng-Chao Han, B.S., Beijing; M.S., Ph.D., New York

Yi-Zhi Huang, B.S., M.S., Fudan (China); Ph.D., Rutgers

Michael Kiessling, Doctor of Nat. Sci., Habil. Diplomphysiker, Bochum (Germany)

Alexander Kontorovich, B.A., Princeton; Ph.D., Columbia

Kasper Larsen, Ph.D., Southern Denmark

Liping Liu, B.E., Beijing; Ph.D., Minnesota

Juan Pablo Mejia-Ramos, Graduate School of Education, B.S., Universidad de Los Andes (Colombia); M.S., Ph.D., Warwick (UK)

Vladimir Retakh, M.A., Ph.D., Moscow Pedagogical Institute

Siddhartha Sahi, B.S., Delhi (India); M.A., Ph.D., Yale

Vladimir Scheffer, B.S., M.S., Florida; Ph.D., Princeton

Jian Song, B.S., Tsinghua (China); M.A., Ph.D., Columbia

A. Shadi Tahvildar-Zadeh, B.S., Sharif (Iran); M.S., Ph.D., Courant Institute of Mathematical Sciences

Associate Professors:

Kristen Hendricks, Ph.D., Columbia

Chi Li , Ph.D., Princeton

Assistant Professors:

Ian Jauslin, Ph.D., Università degli studi di Roma ¿La Sapienza¿ (Italy)

Daniel Ketover, Ph.D., Massachusetts Institute of Technology

Dennis Kriventsov, B.S., Chicago; Ph.D, Austin

Konstantin Matveev , Ph.D., Harvard

Mariusz Mirek, Ph.D., Wroclaw (Poland)

Bhargav Narayanan, Ph.D., Cambridge

Hongbin Sun, Ph.D., Princeton

Kimberly Weston, Ph.D., Carnegie Melon

Teaching Professor:

Lewis Hirsch, Ph.D., Pennsylvania State

Associate Teaching Professors:

Paul Ellis , Ph.D., Rutgers

Shari Prevost, Ph.D., Rutgers

Mathew Sequin , Ph.D., Ohio State

Sara Soffer, B.S., Tel-Aviv; M.S., California Institute of Technology; Ph.D., Rutgers

Assistant Teaching Professors:

Banmali Banerjee, Ph.D., Montclair State

Malcolm N. S. Bowles , Ph.D., British Columbia (Canada)

Matthew Charnley, Ph.D., Rutgers

Mariano Echeverria, Ph.D., Virginia

Carrie F. Frizzell, Ph.D., Kansas State

Alejandro Ginory, Ph.D., Rutgers

Sophia Gonet, Ph.D., Vermont

Lasantha Goonetilleke , Ph.D., Purdue

Joseph Guadagni, Ph.D., New York

Moulik Kallupalam Balasubramanian, Ph.D., Rutgers

Melissa Lieberman, B.A., Ed.M., Rutgers

Ioanna Mavrea, M.S., Connecticut

Nishali Mehta, B.A., California (Berkeley); M.A., California (Los Angeles); Ph.D., Ohio

David Molnar, Ph.D., Connecticut

Saiju Patel, B.S., M.S., Maharaja Sayajirao (India)

Triet Pham, Ph.D., Southern California

Steven Safran, B.A., Queens College; M.A., SUNY

Joshua Salamon, M.A., Brooklyn

Emily Sergel, Ph.D., California (San Diego)

Vladimir Shtelen, M.S. Physics, Kiev; Ph.D., Institute of Mathematics of the Academy of Sciences of the Ukrainera

Laura Nicole Silverstein , Ph.D., Vienna University of Technology (Austria)

Sheila Tabanli, Ph.D., Missouri University of Science and Technology

Peter Ullman, M.S., Emporia State

Laurent Vera , Ph.D,, California (Los Angeles)

Faculty Emeriti:

Tadeusz Balaban, M.S., Ph.D., Warsaw

József Beck, Ph.D., Hungarian Academy of Sciences

Haim Brezis, Doctorat, Paris

Richard Bumby, Ph.D., Princeton

Terence Butler, Ph.D., Indiana

Gregory Cherlin, Ph.D., Yale

Richard Falk, Ph.D., Cornell

Steven Ferry, Ph.D., Michigan

Simon Gindikin, M.A., Ph.D., Moscow

Roe Goodman, Ph.D., Massachusetts Institute of Technology

Stephen Greenfield, Ph.D., Brandeis

Antoni Kosinksi, Ph.D., Institute of Mathematics, Polish Academy of Sciences (Poland)

Peter Landweber, Ph.D., Harvard

Richard Lyons, Ph.D., Chicago

Richard Nussbaum, Ph.D., Chicago

Daniel Ocone, Ph.D., Massachusetts Institute of Technology

Barbara Osofsky, Ph.D., Rutgers

Ted Petrie, Ph.D., Princeton

Eugene Speer, Ph.D., Princeton

Héctor Sussmann, M.A., Buenos Aires; Ph.D., New York

Jean Taylor, Ph.D., Princeton

Francois Treves, Ph.D., Université Paris IV-Sorbonne (France)

Bertram Walsh, Ph.D., Michigan

Robert Wilson, Ph.D., Yale

Mathematics 640 (SAS)

Learning Goals

Learning Goals

Majors will be able to employ problem-solving skills in a wide range of modern mathematics, analyze quantitative information and apply advanced mathematics techniques and concepts where appropriate, communicate rigorous mathematical ideas and reasoning effectively, appropriately use supporting technology, and work cooperatively as part of a team to solve mathematical problems. Top students will demonstrate experience in research. Students in combined math/education programs will be able to demonstrate a broad perspective on mathematics, including the history of the subject, and an understanding of the connections between college mathematics and the state's curriculum framework. Students in the bachelor of science (B.S.) program (honors track) will be prepared to engage in graduate-level work in a doctoral program.

Minors will be able to demonstrate an understanding of the special nature of mathematical thinking, create and communicate mathematical arguments, and apply mathematical knowledge and techniques in advanced courses in their major discipline.

Biomath majors will be able to employ problem-solving skills in a wide range of modern mathematics; solve mathematical problems and apply mathematics, mathematical concepts, and mathematical models to problems in biology; communicate rigorous mathematical ideas and mathematical reasoning effectively; conduct laboratory work in the biological sciences; and pursue graduate study, medical school, or research jobs in government and industry.

The general liberal arts student will be able to employ elementary mathematics and discuss bringing abstract mathematics to bear on areas related to everyday life, such as political science, personal finance, or games of chance. Students whose majors require more advanced mathematics will be adequately prepared. Students aiming toward careers in elementary school education will be able to pass state-mandated examinations before certification, and to satisfy the university's course requirements related to certification. Students aiming at actuarial careers will be able to pass the exams for professional certification, including the P, FM, and LTAM exams.

Mathematics 640 (SAS)

Major Requirements

Major Requirements

The Department of Mathematics annually publishes a *Brochure for Math Majors*, which contains detailed information about the math major program; copies of this brochure may be obtained on the web at http://www.math.rutgers.edu/academics/undergraduate/majors.

The requirements for a math major are as follows:

1. Three semesters of calculus (01:640:151-152, and 251 or equivalent), Introductory Linear Algebra (01:640:250), and Elementary Differential Equations (01:640:252). Courses 01:640:250, 251, and 252 must be passed with grades of C or better. Majors normally should take both 01:640:250 and 251 no later than the first semester of their sophomore year.

2. 01:198:107 Computing for Mathematics and the Sciences with a grade of C or better. (01:198:111 Introduction to Computer Science or 14:332:252 Programming Methodology I may be substituted for 01:198:107.) It is recommended strongly that this course be completed by the end of the second semester of the sophomore year.

3. The completion of all the requirements in one of the mathematics major options listed below. (Students must notify the mathematics department in writing if they are not following the standard mathematics major option. Courses in other departments may not be substituted).

Grade Requirements for Mathematics Majors

To be admitted to the mathematics major program, a student normally must have completed three semesters of calculus with a grade of C or better in each course. To continue as a mathematics major, a student must make satisfactory progress toward completing the program. Satisfactory progress for a full-time student normally means passing at least one mathematics course at an appropriate level each semester with a grade of C or better. To complete the mathematics major program, a student must receive grades of C or better in 01:640:250, 251, and 252 and in all but one of the further mathematics courses. A student also must receive grades of C or better in the courses in other departments (e.g., computer science) used to fulfill the requirements of the program.

Mathematics Major Options

Option A, Standard Mathematics (Curriculum Code 640). In addition to the requirements above, to complete the standard mathematics major a student must pass eight 300- to 400-level mathematics courses, excluding 01:640:491,492. All but one of these courses (curriculum code 640) must be passed with a grade of C or better. At least four of the upper-level courses used to complete the major must be taken at Rutgers University-New Brunswick, including one of 01:640:311,312, 411-412, and one of 01:640:350, 351, 451-452. An appropriate Rutgers graduate mathematics course may be substituted for the required analysis and/or algebra course, with departmental approval.

Recommended are probability (01:640:477), statistics (01:640:481), a course in mathematical modeling (01:640:321, 338, or 478), and a course in discrete mathematics (01:640:338, 354, 428, or 454). Also recommended is a two-semester sequence of mathematically oriented courses in some other discipline.

Option B, Honors Track. The Department of Mathematics offers a special honors track to qualified students. Admission to the honors track is by application, which is available from the mathematics undergraduate office or from the mathematics department website. Students should normally apply no later than the end of the first semester of their sophomore year. Students in the honors track will have their progress reviewed by the honors committee, and are expected to earn a B or better in their advanced math courses (300 level and above). Students who successfully complete the honors track are eligible for graduation with a bachelor of science.

Each student in the honors track will be assigned a faculty adviser. Together with the adviser, he or she will formulate a proposed course plan, subject to the approval of the mathematics honors committee. This course of study will normally include 01:640:291 and 292 (01:640:151,152, 251, and 252 may be accepted if approved by the Honors Committee); either 01:198:107 or 01:198:111; 01:640:250, 300 (honors), 411-412, and 451-452; two semesters of 1-credit honors seminar, at least one at the junior/senior level; and four mathematics electives as approved by the honors committee.

Option C, Actuarial Mathematics Track. The actuarial track in mathematics requires 66 credits, primarily in mathematics and economics, as indicated below. See Brochure for Math Majors.

I. Core Math and Computer Science Courses (21 credits total)
Calculus I-IV; 01:640:151, 152, 251, 252
Linear Algebra; 01:640:250
Computer Science; 01:198:107 or 01:198:111

II. Core Economics and Accounting Courses (9 credits total)
Micro- and macroeconomics; 01:220:102, 01:220:103
Accounting 33:010:272

III. Additional Mathematics Courses (21 credits total)
Required courses:

01:640:285 Introduction to Interest Theory for Actuarial Sciences (3) (covers material on the SOA FM exam; students who pass the FM exam may be excused from this requirement)

01:640:477 Mathematical Theory of Probability (3) (Covers Material on the SOA P exam)

01:640:481 Mathematical Theory of Statistics (3) (Covers Material on the SOA P exam)

01:640:486 Mathematics of Life Contingent Risk Models I (3) (covers material on the SOA LTAM exam)

Elective courses: three additional mathematics courses at the level of 300 and above. The following are recommended:
01:640:485 Introduction to Mathematical Finance (3) (covers material on the SOA FM exam)
01:640:478 Introduction to Stochastic Processes (3)
01:640:487 Mathematics of Life Contingent Risk Models II (3) (covers material on the SOA LTAM exam)
01:640:354 Linear Optimization (3)
01:640:373 Numerical Analysis (3)

IV. Additional Economics courses (15 credits)
Required:
01:220:320 Intermediate Microeconomic Analysis (3)
01:220:321 Intermediate Macroeconomic Analysis (3)
01:220:322 Econometrics (3)

Students must take two additional electives from the following list:

Other 300/400-level math courses
01:220:421 Economic Forecasting and Big Data (3)
01:220:413 Financial Economics (3)
01:220:423 Advanced Time Series and financial Econometrics (3)
01:220:481 Economics of Uncertainty (3)

Biomathematics Interdisciplinary Major (Curriculum Code 122)

The biomathematics interdisciplinary major requires 63-67 credits distributed as follows: mathematics 33 credits, and biology and cognate fields 30-34 credits. A grade of C or better in courses credited toward the major is required for graduation, and each course may be repeated only once to replace D/F grades. See *Brochure for Math Majors.*

Core biology and chemistry required courses:

01:119:115-116 General Biology I and II (4,4), or equivalent
01:160:161-162 General Chemistry I and II (4,4), or equivalent
01:160:171 Introduction to Experimentation (1)

Mathematics required courses:

01:640:151,152, 251 Calculus for Mathematical and Physical Sciences I, II, and III (4,4,4)
01:640:250 Introductory Linear Algebra (3)
01:640:252 Elementary Differential Equations (3)
01:640:336 Dynamical Models in Biology (3)
01:640:338 Discrete and Probabilistic Models in Biology (3)
01:640:477 Mathematical Theory of Probability (3)
01:640:481 Mathematical Theory of Statistics (3)

One of the following courses:

01:640:350 Linear Algebra (3)
01:640:373 Numerical Analysis (3)
01:640:423 Elementary Partial Differential Equations (3)
01:640:428 Graph Theory (3)
01:640:454 Combinatorics (3)
01:640:478 Introduction to Stochastic Processes (3)

Required lab, one of the following:

01:146:357 (1); 01:146:475 (1); 14:125:315 (1)

Note: 01:447:390 is a 4-credit elective (see below) and includes a lab that satisfies this requirement.

Electives:
Four courses from the following list. 01:447:380 is highly recommended. No more than one course from 14:125 (biomedical engineering) can count as an elective.

01:146:245 Fundamentals of Neurobiology (3)
01:146:270 Fundamentals of Cell and Developmental Biology (3)
01:146:302 or 01:447:302 Computers in Biology (3)
01:146:356 Systems Physiology (3)
01:146:445 Advanced Neurobiology (3)
01:146:470 Advanced Cell Biology (3)
01:146:474 Immunology (3)
01:185:335 Neural Structure of Language (3)
01:185:350 Fundamentals of Cognitive Neuroscience (3)
01:160:305 (3) or 307 (4) or 315 (4) Organic Chemistry
01:160:306 (3) or 308 (4) or 316 (4) Organic Chemistry
01:447:380 Genetics (4)
01:447:384 Genetic Analysis (4)
01:447:390 General Microbiology (4)
01:447:480 Topics in Molecular Genetics (3)
01:447:486 Evolutionary Genetics (3)
11:704:486 Principles of Evolution (3)
11:216:351 Principles of Applied Ecology (3)
11:216:431 Fundamentals of Ecological and Environmental Modeling (4)
11:216:486 or 11:704:486 Principles of Evolution (3)
11:776:495 Functional Genomics for Research (3)
16:215:513 Population Genetics (01:447:380) (3)

No more than one of:

01:146:478 Molecular Biology (3)
01:694:301 Introductory Biochemistry and Molecular Biology (3)
01:694:407 Biochemistry (3)
01:694:408 Molecular Biology and Biochemistry (3)

No more than one of:

14:125:303 Biomedical Transport Phenomena (3)
14:125:403 Cardiovascular Engineering (3)
14:125:407 Fundamentals of Computer Tomography (3)
14:125:410 Sensory Processes, Mechanisms, and Computational Models (3)
14:125:437 Computational Systems Biology (3)

Graduation with Honors in Biomathematics

The interdisciplinary major in biomathematics has a program to recognize graduating biomathematics majors for outstanding performance. Such students, upon graduation, may be awarded honors in biomathematics.

Note that the requirements for graduation with honors in biomathematics are distinct from other honors graduation programs such as the honors program of the School of Arts and Sciences. Students may qualify for one or more honors programs, in multiple departments.

Students who will meet the requirements for biomathematics graduation honors and wish to be considered for graduation with honors in biomathematics should file the Intent to Complete Biomathematics Honors by February of their senior year, in order to ensure consideration.

To graduate with biomathematics honors, a biomathematics major must:

1. have a cumulative grade-point average of 3.4 or better in the five mathematics courses at or above the 300 level taken to fulfill the biomathematics required and elective courses;
2. have a cumulative grade-point average of 3.4 or better in the four courses taken to fulfill the biomathematics required upper-level science courses;
3. have an overall cumulative grade-point average of 3.0;
4. at least one of 01:640:336 and 01:640:338 must be completed with a grade of B+ or better; and
5. must have completed with a B+ or better grade in the biomathematics research courses 01:122:491 and 01:122:492.

Statistics-Mathematics Interdisciplinary Major (Curriculum Code 961)

See Statistics 960.

Mathematics 640 (SAS)

Minor Requirements

Minor Requirements

A minor in mathematics consists of three semesters of calculus (ordinarily 01:640:151-152, 251), linear algebra (01:640:250), and four additional 3- or 4-credit courses, one of which may be either 01:640:244 or 252, and the rest of which must be 300- or 400-level mathematics courses (curriculum code 640). Three of the four courses beyond 01:640:251 must be taken at Rutgers University-New Brunswick. Grades of C or better are required in 01:640:250 and 251; at most, one D is permitted in the four courses beyond 01:640:250.

Mathematics 640 (SAS)

Departmental Honors Programs

Departmental Honors Programs

Eligible first-year students and sophomores may take 01:640:291 and 292, which are honors courses in second-, third-, and fourth-semester calculus, respectively. The department also offers an honors version of 01:640:300 Introduction to Mathematical Reasoning and honors versions of proof-based courses in abstract algebra and real analysis.

Entry into these courses is determined by the department and is based on the student's previous performance in mathematics. The department occasionally offers honors sections of other courses.

To graduate with departmental honors, a mathematics major must have a cumulative grade-point average of at least 3.4 or better in mathematics courses at the 300 level or above and an overall cumulative grade-point average of at least 3.0, and must complete successfully two courses that are either approved independent study courses, approved graduate courses, approved sections of 300- or 400-level courses, or an approved project. A student who would like to have a course count toward the two-course honors requirement must apply at the department office no later than the first week of classes of the semester during which he or she takes the course. The determination of whether a candidate graduates with departmental honors depends on the student's total performance in mathematics (including the written exposition of mathematical ideas). A more detailed description of the honors program can be obtained at the departmental offices or on the website.

Mathematics 640 (SAS)

Preparation for Secondary School Teaching

Preparation for Secondary School Teaching

There are several paths that Rutgers students can follow to prepare for a career in secondary school teaching.

1. The five-year mathematics teacher preparation program in the Rutgers University Graduate School of Education (GSE) integrates the mathematics undergraduate program with teaching preparation, leading to a bachelor of arts (B.A.) degree in mathematics, a master of education (M.Ed.) degree, and New Jersey teacher certification. Students must apply for admission (usually in the junior year), complete a standard mathematics major, satisfy undergraduate requirements set by the GSE as well as those set by the School of Arts and Sciences, and, in the fifth year, complete additional coursework, including an additional mathematics elective, and do a student teaching internship. The nine required mathematics courses at the 300 to 400 level must include 01:640:300, 311, 351, 435, 437, 477, 481, and an applied math course.

2. After completing the mathematics major, students may obtain an M.Ed. and New Jersey teacher certification through the Rutgers GSE postbaccalaureate certification program or through postbaccalaureate certification programs at other institutions. Application to the program may be made in the fall of a student's senior year or anytime after graduation. This 45-credit program requires coursework in both mathematics and education as well as a student teaching internship, and may be pursued either full time or part time.

3. Other paths to secondary school mathematics teaching include: 1) "alternate route" certification, which usually requires a period of apprenticeship in a high school and 200 hours of coursework at a cooperating college or university; and 2) teaching without certification in a private independent or parochial school.

Prospective teachers should contact the mathematics department and/or the Office of Teacher Education in the Graduate School of Education as early as possible in their undergraduate careers and should stay informed about the rapidly evolving procedures and standards for certification. Further information on all Rutgers teaching programs can be obtained from GSE or from the website https://gse.rutgers.edu.

Mathematics 640 (SAS)

Five-Year Bachelor of Arts/Master's Programs

Five-Year Bachelor of Arts/Master's Programs

Many career paths in business, industry, and government depend on mathematical modeling and mathematical analysis. Rutgers offers five-year B.A./M.S. tracks that help to prepare students for entry into such careers. Tracks leading to master's degrees are available in fields such as economics, mathematical finance, industrial and systems engineering, and statistics. There is also a five-year, dual-degree track with the Graduate School of Education (see the catalog section Preparation for Secondary School Teaching). With proper planning, students in these tracks can finish a bachelor of arts degree in mathematics and a master's degree from one of these fields within five years.

The various tracks differ in details and requirements, but share the following common features. Undergraduate math majors apply for entry into a five-year track before their senior year. Accepted applicants are admitted to the master's program contingent upon successful completion of their undergraduate mathematics degree, plus additional coursework in their area of applied interest. Typically, this requires students to take as undergraduates more than the standard 120 credits needed for graduating with a bachelor of arts degree. Some of these credits will be in graduate courses and will count toward the master's degree. In the fifth year, accepted students complete the coursework for the master's program. More detailed information on the five-year tracks is available on the mathematics department webpage.

Students will find that a mathematics major is excellent preparation for graduate study in statistics, operations research, industrial engineering, economics, or financial mathematics, even if they choose not to pursue a five-year track. Such students would apply to graduate programs in these areas in their senior year, as normal. Departmental advisers can guide students in their selection of coursework outside the mathematics department to best prepare them for the graduate programs of their choice.

Mathematics 640 (SAS)

Before Taking Mathematics Courses

Before Taking Mathematics Courses

Entering first-year students and most transfer students are required to take the mathematics placement test before registering for any mathematics course at Rutgers University-New Brunswick. Students will be informed by their school of the times for taking the test.

Mathematics 640 (SAS)

Courses

Courses

The following abbreviations are used in the course listing.

1. CALC1 indicates that the prerequisite is any one of 01:640:135 or 151.

2. CALC2 indicates that the prerequisite is 01:640:152.

3. CALC3 indicates that the prerequisite is any one of 01:640:251 or 291.

4. CALC4 indicates that the prerequisite is any one of 01:640:244, 252, or 292.

5. CR1 indicates that students may not receive credit for more than one of the first-semester calculus courses 01:640:135 or 151.

6. CR2 indicates that students may not receive credit for more than one of the courses including second-semester topics 01:640:136 or 152.

7. CR3 indicates that students may not receive credit for more than one of the courses including third-semester topics 01:640:251 or 291.

8. CR4 indicates that students may not receive credit for more than one of the fourth-semester courses 01:640:244, 252, or 292.

01:640:011 ***Precalculus I Workshop (E2)***
Workshop to accompany 01:640:111.
Corequisite: 01:640:111.

01:640:012 ***Precalculus II Workshop (E2)***
Workshop to accompany 01:640:112.
Corequisite: 01:640:112.

01:640:013 ***Preparation for Calculus Workshop (E2)***
Workshop to accompany 01:640:123. Hybrid online.
Corequisite: 01:640:123.

01:640:025 ***Elementary Algebra (E3)***
Operations with polynomials, rational and square root expressions, exponents, solving linear and quadratic equations, basic applications, and graphing.

01:640:026 ***Intermediate Algebra (E3)***
Absolute value equations and inequalities, radical expressions, rational exponents, quadratic equations and inequalities, introduction to functions, and topics in analytic geometry.
Prerequisite: 01:640:025 or appropriate performance on the placement test in mathematics.

01:640:103 *Topics in Mathematics for the Liberal Arts (3)*
Topics in mathematics including voting theory, apportionment, fair division, exponential growth in nature and finance, Euler circuits, Traveling Salesman Problem, and networks.
An elementary course for liberal arts majors. Prerequisite: 01:640:025 or appropriate performance on the placement test in mathematics. May not be used as an elective for the math major or minor.

01:640:104 *Introduction to Probability (3)*
Concrete introduction to probability and its applications, with some statistics. Intended for majors in social science or liberal arts disciplines.
Prerequisite: 01:640:026 or 027 or placement. May not be used as an elective for the math major or minor. May not be taken for credit simultaneously with or after a student has received credit for any of the following courses: 01:640:477, 01:198:206, 01:960:379, 01:960:381, 14:332:226, 14:540:210.

01:640:106 *Mathematics of Money (3)*
Introduction to the uses of college-level mathematics in personal finance applications, including mortgages, student loans, and leasing. Some related nonfinancial applications. May not be used as an elective for the math major or minor. Not intended for students majoring in business, economics, or STEM fields.
Prerequisite: 01:640:025.

01:640:107 *Number and Operation for K-8 Teaching (3)*
Reexamination of familiar mathematical ideas, primarily about number systems and arithmetic operations, in the context of mathematics as a whole and from the perspective of young students first learning them. Emphasis on reasoning and communication.
Prerequisites: 01:640:025 or appropriate performance on the placement test in mathematics, and permission of department. For students interested in pursuing a career in elementary school teaching. May not be used as an elective for the math major or minor.

01:640:108 *Problem Solving and Reasoning with Discrete Mathematics (3)*
Discrete mathematics as a tool for developing problem-solving and reasoning skills. Applications of vertex-edge graphs and systematic counting, which can be introduced at K-8 grade levels. For students interested in a career in teaching in elementary or middle schools.
Prerequisites: 01:640:026 or 027 or appropriate performance on the placement test in mathematics, and permission of department. May not be used as an elective for the math major or minor.

01:640:109 *Geometry and Measurement for Middle Grades Teaching (3)*
Math content course on geometry and measurement stressing depth of understanding needed for effective middle grade teaching. Justifying procedures and formulas. Multiple points of view in explanations. Geometric objects in two and three dimensions. Transformations, symmetry, congruences, similarity, scaling. Perimeter, area, volume. Error estimates in measurement. Changing units.
Prerequisites: 01:640:026 or 107 or placement into 01:640:111, and permission of department. Primarily for those intending to teach in grades K-8.

01:640:110 *Algebra for Middle School Teachers (3)*
Examines algebraic thinking in the context of middle school algebra, with emphasis on mathematical reasoning, conceptual reasoning, and communicating concepts effectively.
Intended for future and current K-8 teachers. Prerequisite: 01:640:107 or permission of the department.

01:640:111-112 *Precalculus I,II (2,2)*
Math 111: Algebraic expressions, algebraic equations, inequalities, functions, and graphing. Math 112: Exponential, logarithmic, and trigonometric functions.
Prerequisite: 01:640:026 or appropriate performance on the placement test in mathematics. Corequisites: 01:640:011 for 111; 01:640:012 for 112. These two courses cover the same material as 01:640:115, but at a slower pace. Students may not receive more than 4 normal credits for any combination of 01:640:111-112 and 115.

01:640:115 *Precalculus College Mathematics (4)*
Algebraic expressions, algebraic equations, inequalities, functions, and graphing. Exponential, logarithmic, and trigonometric functions.
Prerequisite: 01:640:026 or appropriate performance on the placement test in mathematics. Students may not receive more than 4 normal credits for any combination of 01:640:111-112 and 115. Students who feel unprepared for this course (who have not had math for several years or whose mathematical background is weak) should consider taking 01:640:111-112, which covers the same material as 115 but at a slower pace and begins with an extensive review of intermediate algebra.

01:640:123 *Preparation for Calculus I (2)*
Beginning after six weeks of the semester for students who start Calculus 1 and encounter serious difficulties. Intensive review of topics in algebra and precalculus, in context of how they are used in Calculus 1. Hybrid online.
Prerequisite: Placement into CALC1.

01:640:125 *Methods of Mathematical Problem Solving (2)*
Equips students with effective methods for mathematical problem solving drawing on research into the relevent cognitive science and expert practices. Provides the scientifically-based strategic knowledge to succeed in the mathematics courses.

01:640:131 *Calculus I Practicum (1)*
Application of algorithms studied in 01:640:135 to problems.
Corequisite: 01:640:135.

01:640:135-136 *Calculus I,II for the Life and Social Sciences (4,4)*
Primarily for majors in the social sciences, business, and pharmacy. Students in the life sciences should take 135-136 or 151-152. Students intending to take more than two semesters of calculus should take 151-152. Students should review the requirements for their intended major when choosing between 135-136 and 151-152.
Prerequisite for 135: 01:640:112 or 115 or appropriate performance on the placement test in mathematics. Prerequisite for 136: CALC1. Credit restrictions: CR1, CR2.

01:640:138 *Calculus II for the Biological Sciences (4)*
Techniques of integration, elementary differential equations and their applications to biological sciences, and an introduction to linear algebra. For students who do not intend to continue beyond 01:640:250.
For biological sciences majors. Prerequisite: CALC1. Credit restriction: CR2.

01:640:151-152 *Calculus I, II for Mathematical and Physical Sciences (4,4)*
For mathematics, physics, computer science, statistics, chemistry, or engineering majors. Techniques of integration, elementary differential equations, sequences, infinite series, Taylor series, parametric equations, polar coordinates. Students should review the requirements for their intended major when choosing between 135-136 and 151-152.
Prerequisite for 151: 01:640:112 or 115 or appropriate performance on the placement test in mathematics. Prerequisite for 152: 01:640:151 or 01:640:135 with a C or better. Credit restrictions: CR1, CR2.

01:640:195,196 ***Seminar in Mathematics I,II (1,1)***
Discussion of selected topics in mathematics. For first- and second-year students.
Prerequisite: Permission of department. Corequisite: Enrollment in a calculus course.

01:640:197 ***Topics in Mathematics for K-8 Teaching I (3)***
Topics covered vary. Details available at registration.
Prerequisites: 01:640:026 or 027 or appropriate performance on the placement test in mathematics, and permission of the department. For students interested in a career in K-8 teaching. May not be used as an elective for the math major or minor. May be repeated for credit, with permission of the department.

01:640:198 ***Topics in Mathematics (3)***
Topics covered vary. Details available at registration.
Prerequisite: 01:640:026 or 027 or appropriate performance on the placement test in mathematics, and permission of the department. May not be used as an elective for the math major or minor. May be repeated for credit, with permission of the department.

01:640:244 ***Differential Equations for Engineering and Physics (4)***
First- and second-order ordinary differential equations; introduction to linear algebra and systems of ordinary differential equations.
Prerequisite: CALC3. Credit restriction: CR4. Pre- or corequisite: 01:640:247 or 01:640:250.

01:640:247 ***Fundamentals of Matrix Algebra (3)***
Basics of linear algebra; matrix operations, linear independence, inverses, determinants. Equivalent in content to the first third of 01:640:250.
Prerequisite: CALC1.

01:640:250 ***Introductory Linear Algebra (3)***
Systems of linear equations, Gaussian elimination, matrices and determinants, vectors in two- and three-dimensional Euclidean space, vector spaces, introduction to eigenvalues and eigenvectors. Possible additional topics: systems of linear inequalities and systems of differential equations.
Prerequisite: 640:112 or 115, or Placement.

01:640:251 ***Multivariable Calculus (4)***
Analytic geometry of three dimensions, partial derivatives, optimization techniques, multiple integrals, vectors in Euclidean space, and vector analysis.
Prerequisite: CALC2. Credit restriction: CR3.

01:640:252 ***Elementary Differential Equations (3)***
First- and second-order ordinary differential equations; systems of ordinary differential equations.
Prerequisites: 01:640:250 and CALC3. Credit restriction: CR4.

01:640:285 ***Introduction to Interest Theory for Actuarial Sciences (3)***
Compound interest rate theory and application to valuation of financial instruments; measurement of interest; present value; equations of value and yield rates; amortization; annuities; bond valuation; duration; immunization.
Prerequisite: 01:640:251.

01:640:291 ***Honors Calculus III (4)***
Covers the same material as 01:640:251 and 252 in a more thorough and demanding fashion.
Registration by special permission of department. Credit restriction: CR3. Grades of B or better are required to continue in the honors sequence.

01:640:292 ***Honors Calculus IV (4)***
First- and second-order ordinary differential equations; systems of ordinary differential equations. A more thorough and demanding alternative to 01:640:244 or 252.
Prerequisite: 01:640:291 or permission of department. Pre- or corequisite: 01:640:250. Credit restrictions: CR4. Grades of B or better are required to continue in the honors sequence.

01:640:300 ***Introduction to Mathematical Reasoning (3)***
Fundamental abstract concepts common to all branches of mathematics. Special emphasis placed on ability to understand and construct rigorous proofs.
Prerequisite: 01:640:250 or 01:640:251 or 01:640:291.

01:640:311 ***Introduction to Real Analysis I (4)***
Introduction to language and fundamental concepts of analysis. The real numbers, sequences, limits, continuity, and differentiation in one variable.
Prerequisites: CALC4 and C or better in 01:640:300; or permission of department.

01:640:312 ***Introduction to Real Analysis II (3)***
Series of numbers and functions, integration of functions of one variable, pointwise and uniform convergence, differential calculus in several variables, implicit and inverse function theorems.
Prerequisite: 01:640:311.

01:640:321 ***Introduction to Applied Mathematics (3)***
Mathematical models of mechanical vibrations, population dynamics, and traffic flow, involving ordinary differential equations and nonlinear first-order partial differential equations.
Prerequisite: CALC4.

01:640:325 ***Foundations of Quantum Mechanics (3)***
Interdisciplinary course, intended primarily for juniors and seniors majoring in mathematics, physics, or philosophy, dealing with what can be concluded from quantum mechanics about the nature of reality.
Prerequisite: CALC4 or permission of instructor. Credit not given for both this course and 01:556:325.

01:640:336 ***Dynamical Models in Biology (3)***
Models for biological processes based on ordinary and partial differential equations. Topics selected from models of population growth, predator-prey dynamics, biological oscillators, reaction-diffusion systems, pattern formation, neuronal and blood flow physiology, neural networks, and biomechanics.
Prerequisites: CALC4 and 01:640:250.

01:640:338 ***Discrete and Probabilistic Models in Biology (3)***
Models for biological processes based on discrete mathematics (graphs, combinatorics), probabilistic and optimization methods, Markov chains and Markov fields, Monte-Carlo simulation, maximum-likelihood estimation, entropy, and information. Applications selected from epidemiology, inheritance and genetic drift, combinatorics and sequence alignment of nucleic acids, energy optimization in protein structure prediction, and topology of

biological molecules.
Prerequisites: 01:640:250, 251; and either 01:198:206, 01:640:477, 01:960:381, 14:332:321, or 14:540:210. Only one of 01:640:338 and 339 may count for credit toward any math major or minor option.

01:640:339 *Mathematical Models in the Social Sciences (3)*
Introduction to the modeling process and survey of mathematical models from such areas as economics, sociology, psychology, and urban and policy science. Models dealing with energy use, air pollution, currency transfer, transportation, bargaining, voting, auctions, ecommerce, learning, and allocation of scarce resources. Models use graphs, signed graphs, Markov chains, n-person games, consensus functions, and differential equations.
Prerequisites: 01:640:250; and either 01:640:477, 01:198:206, or 01:960:381. Only one of 01:640:338 and 339 may count for credit toward any math major or minor option.

01:640:348 *Cryptography (3)*
Applications of algebra and number theory to cryptography (encryption/decryption) and cryptanalysis (attacking encrypted messages). Topics include congruences, finite fields, finding large primes, pseudoprimes, and primality testing, as well as the Vigenere and Hill ciphers, the Data Encryption Standard, probabilistic, trapdoor attacks on encrypted messages, and public key ciphers.
Prerequisites: 01:640:250; one of 01:640:300, 356, or 477; or permission of department.

01:640:350 *Linear Algebra (3)*
Continuation of 01:640:250. Abstract vector spaces and linear transformations, inner product spaces, diagonalization, and canonical forms. Possible additional topics: systems of ordinary differential equations and numerical techniques.
Prerequisites: CALC4, 01:640:250, and C or better in 01:640:300; or permission of department.

01:640:351-352 *Introduction to Abstract Algebra I,II (4,3)*
Abstract algebraic systems, including groups, rings, fields, polynomials, and some Galois theory.
Prerequisites: CALC3, 01:640:250, and C or better in 01:640:300; or permission of department.

01:640:354 *Linear Optimization (3)*
Linear programming problems, the simplex method, duality theory, sensitivity analysis, introduction to integer programming, the transportation problem, network flows, and other applications.
Prerequisite: 01:640:250. Credit not given for both this course and 01:640:453 or 01:711:453.

01:640:356 *Theory of Numbers (3)*
Properties of the natural numbers, congruences, diophantine equations, and elementary arithmetical functions.
Prerequisites: CALC3 and 01:640:300, or permission of department.

01:640:357 *Topics in Applied Algebra (3)*
Material relevant for various applications. Topics chosen from finite Fourier and wavelet transforms for signal and image processing, coding theory, algebraic graph theory, algebraic combinatorics, and algebraic computational complexity. Details available at time of registration.
Prerequisites: CALC3 and 01:640:250.

01:640:361 *Set Theory (3)*
Introduction to set theory. The set-theoretic foundations of mathematics, including the construction of the real number system. Countable and uncountable sets, cardinal numbers, and ordinals, the axiom of choice.
Prerequisites: 01:640:300 and one of 01:640:250 or CALC3, or permission of department. Credit not given for both this course and 01:730:423.

01:640:373-374 *Numerical Analysis I,II (3,3)*
Analysis of numerical methods for the solution of linear and nonlinear equations, approximation of functions, numerical differentiation and integration, and the numerical solution of initial and boundary value problems for ordinary differential equations.
Prerequisites: CALC4 and familiarity with a computer language. Credit not given for both these courses and 01:198:323, 324.

01:640:395 *Studies in Mathematics (3)*
Topics vary from semester to semester. Details available at time of registration.

01:640:403 *Introductory Theory of Functions of a Complex Variable (3)*
First course in the theory of a complex variable. Cauchy's integral theorem and its applications. Taylor and Laurent expansions, singularities, conformal mapping.
Prerequisite: CALC4.

01:640:411-412 *Mathematical Analysis I,II (3,3)*
Rigorous analysis of the differential and integral calculus of one and several variables.
Prerequisites: Permission of department and instructor. For students preparing for graduate study in the mathematical sciences.

01:640:421 *Advanced Calculus for Engineering (3)*
Laplace transforms, numerical solution of ordinary differential equations, Fourier series, and separation of variables method applied to the linear partial differential equations of mathematical physics (heat, wave, and Laplace's equation).
Primarily for mechanical engineering majors. Prerequisite: CALC4. Credit not given for both this course and 01:640:423.

01:640:423 *Elementary Partial Differential Equations (3)*
Linear partial differential equations of mathematical physics (heat, wave, and Laplace's equation), separation of variables, Fourier series.
Prerequisite: CALC4. Credit not given for both this course and 01:640:421.

01:640:428 *Graph Theory (3)*
Colorability, connectedness, tournaments, Eulerian and Hamiltonian paths, orientability, and other topics from the theory of finite linear graphs, with an emphasis on applications chosen from social, biological, computer science, and physical problems.
Prerequisites: CALC3 and 01:640:250.

01:640:432 *Introduction to Differential Geometry (3)*
Investigation of the properties of curves and surfaces using methods of analysis.
Prerequisite: 01:640:311.

01:640:435 *Geometry (3)*
Various geometries, including projective and non-Euclidean geometries, and geometric axiom systems.
Prerequisites: CALC3, 01:640:250 and 300; or permission of department.

01:640:436 *History of Mathematics until 1800 (3)*
Selected topics from the history of mathematics including number systems; Euclidean geometry; the development of algebra in China, India, the Islamic world, and Europe; and calculus.
Prerequisites: 01:640:250 and 01:640:251. Credit not given for both this course and 01:640:437. Recommended to be taken after 01:640:435.

01:640:437 *History of Mathematics (3)*
Selected topics from the history of mathematics including number systems; Euclidean geometry; the development of algebra in China, India, the Islamic world, and Europe; and calculus; selected modern topics.
Prerequisites: 01:640:250 and 01:640:251 or 01:640:291. Recommended to be taken after Geometry. Credit not given for both this course and 01:640:436. Open only to Math (640) and Stats/Math (961) majors.

01:640:441-442 *Introductory Topology I,II (3,3)*
Math 441: Introduction to topology with emphasis on the foundations of analysis; Euclidean spaces, metric spaces, topological spaces, and their properties; applications to analysis. Math 442: Basic concepts of algebraic topology, including the fundamental group, plane curves, homotopy, and a brief introduction to homology.
Prerequisites: CALC4 and either 01:640:311 or permission of department.

01:640:451-452 *Abstract Algebra I,II (3,3)*
Rigorous study of abstract algebraic systems including groups, rings, and fields.
Prerequisites: Permission of department and instructor. For students preparing for graduate study in the mathematical sciences.

01:640:453 *Theory of Linear Optimization (3)*
Emphasis on the theory of linear optimization. Topics include convex sets, polyhedra, Farkas lemma, canonical forms, simplex algorithm, duality theory, revised simplex method, primal-dual methods, complementary slackness theorem, maximal flows, transportation problems, and two-person game theory.
Prerequisite: 01:640:250. Credit not given for both this course and 01:640:354 or 01:711:453. Cross-listed with 01:711:453.

01:640:454 *Combinatorics (3)*
Existence and enumeration of designs and patterns such as codes, graphs, and block designs, and extremal problems related to such objects. Emphasis on applications to computer, biological, physical, and social problems.
Prerequisites: CALC2 and 01:640:250.

01:640:461 *Mathematical Logic (3)*
Intuitive and formal development of the sentential and predicate calculus. Special emphasis given to questions of consistency, completeness, and independence. Formal systems; incompleteness and undecidability; theorems of Gödel. Exploration of which properties of structures can be defined in the first-order language.
Prerequisites: CALC3 and either 01:640:300 or permission of department.

01:640:468 *Connecting Advanced Mathematics to High School Content (3)*
Connects math major course content to curricular content of grades 9 through 12. Shows how advanced mathematics justifies and elucidates high school material taught without full justification. Provides connections between concepts and procedures to facilitate recall and application of content knowledge both for exposition and for response to student misconceptions. Focus on applications of reasoning, real analysis, and abstract algebra to high school topics.
Prerequisite: Permission of instructor. Primarily for fifth-year students in the high school mathematics certification program.

01:640:477 *Mathematical Theory of Probability (3)*
Basic probability theory in both discrete and continuous sample spaces, combinations, random variables and their distribution functions, expectations, law of large numbers, central limit theorem.
Prerequisite: CALC3. Credit not given for both this course and 01:198:206, 14:332:226, 14:332:321, 14:540:210, or 01:960:381.

01:640:478 *Introduction to Stochastic Processes (3)*
Markov chains for discrete-time models, Poisson processes, Markov chains for continuous-time models, queueing theory, renewal processes.
Prerequisites: 01:640:250 and either 01:640:477 or both 01:640:251 and 01:960:381. Credit not given for both this course and 01:640:424.

01:640:481 *Mathematical Theory of Statistics (3)*
Fundamental principles of mathematical statistics, sampling distributions, estimation, testing hypotheses, correlation analysis, regression, analysis of variance, nonparametric methods.
Prerequisites: 01:640:250 and either 01:640:477 or both 01:640:251 and 01:960:381. Credit not given for both this course and 01:960:382.

01:640:485 *Introduction to Mathematical Finance (3)*
Study of the mathematical theory and financial concepts used to model and analyze financial derivatives. Topics include martingales, Brownian motion, and stochastic differentials, with applications to discrete and continuous time stochastic models of asset prices, option pricing, the Black-Scholes pricing model, and hedging.
Prerequisites: 01:640:250, CALC4, and 01:640:477 or 01:960:381 or 14:332:226. Recommended for students interested in economics, statistics, finance, or actuarial mathematics.

01:640:486 *Mathematics of Life Contingent Risk Models I (3)*
Survival models, life tables. Valuation of benefits, premiums, and standard single life insurance and annuity products. Covers part of the syllabus for Exam LTAM of the Society of Actuaries.
Prerequisites: 01:640:285 and (01:640:477 or 01:960:381). May not be used as an elective for the math major. May be used for the math minor.

01:640:487 *Mathematics of Life Contingent Risk Models II (3)*
Continuation of Mathematics of Life Contingent Risk Models I. Policy values, multiple state models, pension mathematics, effect of interest rate risk, emerging costs of traditional life insurance. Covers part of the syllabus for Exam LTAM of the Society of Actuaries.
Prerequisite: C or better in 01:640:486. Credit not given for both this course and 01:640:478.

01:640:491,492 ***Undergraduate Mathematics Seminar (1,1)***
Reading, presentation, and discussion of mathematical topics.
Prerequisite: Permission of department. Pass/no credit only.

01:640:493,494 ***Individual Study in Mathematics (1-3 BA,1-3 BA)Prerequisite: Permission of department.***

01:640:495 ***Selected Topics in Mathematics (3)***

01:640:496 ***Research in Mathematics (3)***

01:640:497,498 ***Honors in Mathematics (3,3)***

01:122:491,492 ***Research in Biomathematics (3,3)***
Research in a selected subject conducted with the supervision of a faculty member. Research proposals must receive prior approval of the director and codirector of the biomathematics program.
Prerequisite: Permission of program director.

Medicine and Dentistry (SAS)

MEDICINE AND DENTISTRY

The Association of American Medical Colleges, the American Association of Colleges of Osteopathic Medicine, and the American Dental Association have set the following entrance requirements for their member medical and dental schools:

Subject	**Credits**
Biology	8
Chemistry: General Inorganic	8
Chemistry: Organic	8
English	6
Humanities	6
Physics	8
Biochemistry	3/4*
Psychology	3*
Sociology	3*
Statistics	3*

*These courses are recommended for the Medical College Admissions Test (MCAT) as of 2015.

All four science areas should include a laboratory. In addition, some medical and dental schools may require

knowledge of a foreign language, a year of college mathematics, and additional work in the sciences. There is, however, no prescribed premedical major. Applicants to medical and dental schools should have excellent records, especially in the sciences, as well as experience in a health care field. Also, all schools recognize the importance of well-developed communication skills and a strong background in the humanities and the social sciences.

Before sitting for either the MCAT or Dental College Admissions Test (DAT), it is recommended that students take coursework in psychology, sociology, statistics, and other biomedical sciences such as biochemistry, genetics, physiology, and/or cell biology. Students should contact the Rutgers Health Professions Office (848-445-5667) for more information.

(See also Health Professions Office in the School of Arts and Sciences chapter of this catalog.)

Medieval Studies 667 (SAS)

Medieval Studies 667

School of Arts and Sciences

Program Director: Sarah Novacich

Program Faculty:

Tuna Artun, History, PhD., Princeton

T. Corey Brennan, Classics; Ph.D., Harvard

Jessey Choo, Asian Languages and Culture; Ph.D., Princeton

Serena Connolly, Classics; Ph.D., Yale

Leah DeVun, History; Ph.D., Columbia

Anthony Dibattista, History; Ph.D., Rutgers

Diane Shane Fruchtman, Religion, PhD., Indiana University

Charles Häberl, AMESALL, PhD, Harvard

Samantha Kelly, History, PhD., Northwestern

Stacy Klein, English; Ph.D., Ohio State

Tia Kolbaba, Religion; Ph.D., Toronto

Brian Leftow, Philosophy; PhD., Yale

James Masschaele, History; Ph.D., Toronto

James Niessen, Alexander Library, PhD., Indiana University

Sarah Novacich, English; Ph.D, Yale

Dámaris Otero-Torres, Spanish and Portuguese, PhD., UC San Diego

Ana Pairet-Vinas, French; Ph.D., University of Pennsylvania

Hieu Phung, Asian Languages and Cultures, PhD., University of Hawaii

Stephen Reinert, History; Ph.D., UCLA

Gary Rendsburg, History/ Jewish Studies, PhD, NYU

Larry Scanlon, English, PhD., Johns Hopkins

Tamara Sears, Art History, PhD., University of Pennsylvania

Wendy Swartz, Asian Languages and Cultures; Ph.D., UCLA

Paola Tartakoff, History/Jewish Studies; Ph.D., Columbia

Erik Thunø, Art History; Ph.D., Johns Hopkins

Alessandro Vettori, Italian; Ph.D., Yale

Haruko Wakabayashi, Asian Languages and Cultures, PhD., Princeton

Emma Wasserman, Religion; Ph.D., Yale

Laura Weigert, Art History; Ph.D., Northwestern

Laura White, Italian; Dottore in Lettere, Trieste (Italy); Ph.D., UCLA

Azzan Yadin-Israel , Jewish Studies, PhD., UC Berkeley

Medieval Studies 667 (SAS)

Learning Goals

Learning Goals

Majors and Minors have the opportunity to build individualized courses of interdisciplinary study to gain familiarity with different centuries and geographies of the medieval world, including its major cultural and intellectual trends, its demography, and its social formations and institutions. In addition, they are encouraged to become aware of the latest scholarly developments; the continuing areas of uncertainty and controversy; the variety and character of the sources for the modern study of the Middle Ages; the history of the study of the Middle Ages by modern interdisciplinary scholarship; and the influence of medieval culture on our own cultural moment.

Majors also will be able to demonstrate intermediate competence in at least one language (in addition to English) central to medieval culture; as well as competence in at least two of the constituent disciplines of Medieval Studies with some understanding of the benefits and challenges of interdisciplinary study.

Medieval Studies 667 (SAS)

Major Requirements

Major Requirements

The major in medieval studies requires 30 credits of coursework, as follows:

1. The equivalency of four semesters of study of a language other than English, or one semester of Old English Language and Literature. Students can satisfy this requirement by demonstrating proficiency through test scores, coursework, or a combination of the two.

2. 6 credits in introductory courses on medieval civilization, chosen from 01:667:281 Medieval Civilization I; 01:667:282 Medieval Civilization II; 01:082:105 Introduction to Art History, Prehistory to 1400; 01:098:241 East Asian Civilizations: Premodern Era; 01:506:271 Jewish History I: Ancient and Medieval.

3. 3 credits in the seminar in medieval studies, currently offered as 01:667:481 Senior Seminar in Medieval Studies, or equivalent course by permission. Many 400-level courses with a significant focus on the Middle Ages will also satisfy this requirement.

4. 18 credits in six elective courses chosen from approved cognate courses on medieval Europe offered in affiliated departments. Of the six elective courses, at least four must be at the 300 level or above. No more than three elective courses may be from any one department.

Medieval Studies 667 (SAS)

Minor Requirements

Minor Requirements

The interdisciplinary minor in medieval studies consists of seven courses distributed as follows:

1. 2 courses selected from the following: 01:510:209 (Emergence of Medieval Europe)/ 01:667:281 (Medieval Civilization, I); 01:510:211 (Harvest of the Middle Ages)/01:667:282 (Medieval Civilization, II); 01:506:271 Jewish History I: Ancient and Medieval; 01:082:105 Introduction to Art History, Prehistory to 1400; 01:098:241 East Asian Civilizations: Premodern Era.

2. 01:667:481 or equivalent 400-level course by permission.

3. Four courses selected from the list of approved courses for the minor.

At least five of the seven courses must be taken outside the student's major. A minimum of three of the seven courses must be at the 300 level or above, and the minor must include at least two courses in each of two disciplines outside the student's major.

Courses

Courses

01:667:220 *Greek Food from Antiquity to Today (3)*
Food and foodways of Greek-speaking peoples from ancient times to the present, with special emphasis on problems of continuity and change.
Credit not given for this course and 01:489:220, 01:510:222, 01:685:220, or 01:190:220.

01:667:281,282 *Medieval Civilization (3,3)*
Intellectual, technological, artistic, and social developments as reflected in specific manifestations from each period. First semester: from Justinian to the Crusades (400-1100), including *Beowulf*, Haghia Sophia, the *Song of Roland*, the manor. Second semester: from Romanesque to Renaissance (1100-1450), including troubadour music, Chartres, the Black Death, Dante.
Credit not given for both these courses and 01:510:209,210.

01:667:380 *Topics in Medieval Studies (3)*
Selected topics in any of the fields constituting medieval studies. Details available at the time of registration.

01:667:387 *Touching History: The World of Medieval Manuscripts (3)*
An introduction to medieval manuscripts and to book culture from before the age of printing, with particular attention to the scribal transmission of ancient and classical texts (Bible, Homer, Qur'an, Beowulf, etc.).

Credit not given for both this course and 01:506:388 or 01:563:387 or 01:840:388)

01:667:388 *The Cultures of the Middle Ages (3)*
A detailed survey of a particular medieval society, with special emphasis on the complex interactions between different ethnic and cultural traditions of the medieval world. Topics covered vary depending on the interests and expertise of the professor.
Credit not given for both this course and 01:195:388, 01:350:388, or 01:358:308.

01:667:390 *Independent Study (3)*
Independent work on a topic developed in consultation with instructor.
Prerequisite: Permission of director.

01:667:481 *Senior Seminar in Medieval Studies (3)*
Interdisciplinary course taught by faculty drawn from the humanities and social science disciplines. Topics in medieval civilization vary from year to year. Research paper required; supervised by faculty in two disciplines.

Approved Courses

Approved Courses

Many courses that are not officially cross-listed with medieval studies are approved for satisfaction of major and minor requirements. The list below is representative, but new courses are regularly being added: contact that director regarding courses with medieval content that are not listed below. Also check the medieval studies online list of approved courses.

01:013:201 Classical Literatures of Africa, the Middle East, and South Asia (3)¿

01:082:105 Introduction to Art History I (3)

01:082:308 Italy, 1250-1400: The Hinge between Medieval and Renaissance (3)

01:082:312 Byzantine Art (3)

01:082:318 Myth and Legend in Art (3)

01:082:320 Islamic Art and Architecture (3)

01:082:347 Early Northern European Painting (3)

01:082:373 Early Medieval Art (3)

01:082:374 Romanesque and Gothic Art (3)

01:082:377 Gothic Art (3)

01:082:379 Imagery and Architecture of Medieval Rome (3)

01:082:397 Medieval Architecture (3)

01:082:473 Illuminated Manuscripts (3)

01:165:341 Major Traditions in Chinese Thought (3)

01:165:471 Early "China" in the "World": Cosmography, Epistemology, & Encountering the Strange (3)

01:358:303 Literature of Medieval Courts (3)

01:358:304 Medieval Literature of Dissent (3)

01:358:305 Medieval Romance (3)

01:358:306 Chaucer (3)

01:358:307 Medieval Women Writers (3)

01:358:308 Cultures of the Middle Ages (3)

01:358:309 Issues and Problems in Medieval Literature and Culture (3)

01:358:411 Old English Language and Literature (3)

01:358:412 Seminar: Old English Language and Literature (3)

01:358:422 Seminar: Topics in Medieval Literature and Culture (3)

01:420:403 History of the French Language (3)

01:420:415 Medieval French Literature (3)

01:470:331 German Literature of the Middle Ages (3)

01:470:341 German Civilization I: Fifth through 15th Centuries (3)

01:508:303 The Classical Age of Islam (3)

01:508:410 Medieval Turkey (3)

01:510:205 History of the Byzantine Empire (3)

01:510:207 Byzantine Civilization (3)

01:510:213 The Crusades (3)

01:510:214 European Intellectual Tradition (3)

01:510:255 Dracula: Facts and Fictions (3)

01:510:307 The Roman World in Late Antiquity (3)

01:510:309 A History of Western Morals (3)

01:510:313 Medieval Spain: Muslims, Christians, and Jews (3)

01:510:314 Jews, Heretics, and the Inquisition (3)

01:510:315 Reform and Dissent in the Middle Ages (3)

01:510:316 Food and Drink in Medieval Europe (3)

01:510:337 Medieval Kings and Queens (3)

01:510:338 England in the Middle Ages (3)

01:510:345 English Constitutional History to 1688 (3)

01:510:351 Medieval Italy 476-1300 (3)

01:510:357 Medieval Germany (3)

01:510:441 The Social History of Medieval England (3)

01:560:315 Dante and Medieval Culture (3)

01:560:331,332 Dante in Translation (3,3)

01:560:401,402 Italian Literature of the 13th and 14th Centuries (3,3)

01:560:415,416 Dante (3,3)

01:563:201 Jewish History: Ancient and Medieval (3)

01:563:250 Spirituality and Mysticism in Judaism (3)

01:563:311 Classical Jewish Philosophy (3)

01:565:320 Samurai Tradition (3)

01:580:302 Medieval Latin (3)

01:685:303 The Classical Age of Islam (3)

01:730:304 The Origins of Medieval Philosophy (3)

01:730:305 Philosophy in the High Middle Ages (3)

01:730:306 Between Medieval and Modern Philosophy (3)

01:730:374 Islamic Philosophy (3)

01:840:312 Greek Christianity (3)

01:840:313 Latin Christianity (3)

01:940:405 Civilization of Spain (3)

01:940:415 Medieval Spanish Literature (3)

01:940:417 History of the Spanish Language (3)

07:700:211 Studies in Music History (3)

Meteorology 670 (SEBS)

METEOROLOGY 670

Degree: B.S.

Director: Steven Decker (decker@envsci.rutgers.edu)

Program Webpage: http://meteorology.rutgers.edu

Meteorology is the study of weather and climate, of the characteristics, structure, and processes of the atmosphere. Students learn how to forecast the weather and how to understand climate change. The emphasis of the bachelor of science degree program is on developing a broad understanding of the fundamental physical and dynamic processes governing the motions and behavior of the atmosphere, and its interactions with the underlying land and ocean surfaces. Basic courses in chemistry, physics, and mathematics are the prerequisite foundation on which the meteorology program is built. Students who wish to pursue an undergraduate meteorology degree should have a strong high school or equivalent background in mathematics and the sciences prior to enrollment. This program meets all the U.S. federal government civil service requirements for classification as a meteorologist and the American Meteorological Society recommendations for undergraduate meteorology programs.

Meteorology 670 (SEBS)

Learning Goals

Learning Goals

A successful meteorology graduate will be able to:

1. Conduct a weather discussion and apply diagnostic, prognostic, and technological tools to evaluate atmospheric processes across a multitude of scales.

2. Demonstrate integrated understanding of the linked Earth-atmosphere-ocean-cryosphere-biosphere system, including the roles of atmospheric chemistry and human impacts on the system.

3. Apply critical and analytical thinking to solve relevant scientific problems in both individual and collaborative settings.

4. Effectively communicate scientific information orally and in writing, including by electronic means, at an appropriate level for their audience.

5. Demonstrate mastery of the mathematical and physical foundations of meteorology and climatology as well as key atmospheric processes that occur at a variety of spatial and temporal scales.

6. Understand and utilize the principles of proper ethical behavior within the atmospheric sciences and be aware of the scientific limits of prediction.

Meteorology 670 (SEBS)

Entry Requirements for the Major

Entry Requirements for the Major

To enter meteorology courses at the 300 and 400 level and to satisfy the major requirements, students must achieve a grade of C or better in the following courses:

01:640:151-152 Calculus for Mathematical and Physical Sciences

01:640:251 Multivariable Calculus

01:750:203-204 General Physics *and* 01:760:205-206 General Physics Laboratory

11:670:101 Introduction to Meteorology

11:670:102 Introduction to Climate Science

Meteorology 670 (SEBS)

Graduation Requirements for the Major

Graduation Requirements for the Major

SEBS UNDERGRADUATE CORE CURRICULUM (39 credits)

Parts of the SEBS core are satisfied by the major requirements.

Contemporary Challenges(6 credits)*Two courses, one in each of the Contemporary Challenges areas: Diversities and Social Inequalities*[CC-D]*and Our Common Future*[CC-O]

Experiential Learning(3 credits)*Students must participate in a certified experience that meets this goal*[EL]

Natural Sciences(6 credits)*Students must take two courses, one each in two of the following areas: physical, biological, or environmental sciences*[NS]

Historical Analysis(3 credits)*Students must take one course*[HST]

Social Analysis(6 credits)*SEBS students must complete two courses, one in either social/cultural analysis or economic analysis, and one in governmental and regulatory analysis*[SCL]

Arts and Humanities(3 credits)*Students must complete one course*[AH]

Writing and Communication (6 credits) Students must complete two courses, one in [WC], and the other in [WCD]. For Meteorology majors, the [WCD] course must be one of the following:

01:355:302 Scientific and Technical Writing (3) or
01:355:201 Research in the Disciplines (3) or
01:355:301 College Writing and Research (3)

Quantitative and Formal Reasoning (6 credits) Students must take two courses [QQ; QR]

Graduation Requirements for the Meteorology Major (75 or 76 credits)

For an up-to-date description of meteorology major requirements, courses, and course sequences please refer to the program webpage at http://meteorology.rutgers.edu.

Quantitative Skills(22 credits)
01:640:151-152 Calculus for Mathematical and Physical Sciences (4,4)*
01:640:244 Differential Equations for Engineering and Physics (4)
01:640:251 Multivariable Calculus (4)
11:670:212 Computational Methods for Meteorology (3)
11:375:303 Numerical Methods in Environmental Science (3) or
01:960:401 Basic Statistics for Research (3) or
01:960:379 Basic Probability and Statistics (3)

*Calculus courses satisfy SEBS Quantitative [QQ] and Formal Reasoning [QR] requirements.

Physical Sciences (13 credits)
01:160:161 General Chemistry (4)
01:160:171 Introduction to Experimentation (1)
01:750:203-204 General Physics (3,3)
01:750:205-206 General Physics Laboratory (1,1)

Meteorology (37 or 38 credits)
11:670:101 Introduction to Meteorology (3)**
11:670:102 Introduction to Climate Science (3)***
11:670:211 Meteorological Analysis (3)
11:670:323 Thermodynamics of the Atmosphere (3)
11:670:324 Dynamics of the Atmosphere (3)
11:670:431 Physical Meteorology (3)
11:670:433 Weather Analysis and Forecasting I: Synoptic Meteorology (4)****
11:670:434 Weather Analysis and Forecasting II: Mesoscale Meteorology (3)
11:670:451 Remote Sensing of the Ocean and Atmosphere (3)
11:670:461 Climate Dynamics (3)

**Satisfies SEBS Natural Sciences [NS] (Physical) requirement
***Satisfies SEBS Natural Sciences [NS] (Environmental) requirement
****Satisfies SEBS Experiential Learning [EL] requirement

Also choose two courses from the following list:
11:375:346 Introduction to Atmospheric Chemistry (3)
11:628:451 Physical Oceanography (4)
11:670:414 Hydrologic Processes (3)
11:670:444 Tropical Meteorology (3)
11:670:453 Air Quality Modeling (3)

Capstone Experience (3 credits)
Complete at least three credits from among the following courses:
11:554:298 Honors Tutorial II (1)
11:554:301/2 Aresty Research Assistantship (1.5)
11:554:397/8 Honors Tutorial III/IV (arr)
11:554:487/8 G. H. Cook Honors Program (arr)

11:670:334 Severe Weather Forecasting Field Trip (3)
11:670:493/4 Research Problems in Meteorology (arr)
11:902:300 SEBS Internship I (arr)

ELECTIVES (23-24 credits or more)
In addition to courses meeting the above requirements, students must take enough other courses offered by the university to bring their total number of credits to the minimum of 128 required for graduation. Although not required, many meteorology students use these electives to complete a minor. A minor in mathematics, requiring only four more mathematics courses, is the most popular. Students also consider other fields, including oceanography, physics, environmental sciences, and environmental and business economics. Students are strongly encouraged to do internships, which provide valuable career-related experience and contacts, and to pursue research with faculty members. Both can be taken for academic credit.

A student must achieve a grade of C or better in the following courses:

Physics 1 (01:750:203 and 205)
Physics 2 (01:750:204 and 206)
Calculus 1 (01:640:151)
Calculus 2 (01:640:152)
Multivariate Calculus (01:640:251)
Introduction to Meteorology (11:670:101)
Introduction to Climate Science (11:670:102)

Students preparing for graduate study in meteorology or atmospheric science are encouraged to consider additional courses in meteorology, oceanography, computer science, and mathematics such as:

11:670:414 Hydrologic Processes (3)
11:670:444 Tropical Meteorology (3)
11:670:453 Air Quality Modeling (3)
11:628:451 Physical Oceanography (4)
01:198:323 Numerical Analysis and Computing (4)
01:640:250 Introduction to Linear Algebra (3)
01:640:423 Elementary Partial Differential Equations (3)
01:640:477 Mathematical Theory of Probability (3)

Microbiology 680 (SEBS)

MICROBIOLOGY 680

Degree: B.S.

Director: Ines Rauschenbach (inesrau@sebs.rutgers.edu)

Program Webpage: https://dbm.rutgers.edu/microbiology

Microorganisms are the smallest living things, the oldest form of life on earth, ubiquitous in the biosphere and central to the essential life processes on earth. The microbiology curriculum emphasizes the uniqueness of microbial biology, its enormous diversity, and the biochemical basis of microbial life.

The curriculum examines the diverse roles of microorganisms and covers the fundamentals of microbial diversity, physiology, and genetics. The focus is on the examination of microorganisms; microbial processes in natural and managed environments; and their effects on human, animal, plant, and environmental health. The nature and activity of microbial populations in aquatic and terrestrial ecosystems, the interactions within microbial communities, and biogeochemical cycles and energy flows are explored. The curriculum provides students with a fundamental understanding of the applications of microbes in biotechnology, the food industry, agriculture, and medicine. Recent advances in microbial molecular biology and biotechnology have led to an in-depth understanding of the physiology, genetics, and taxonomy of microbes. Microbes are central to the food, biotechnology, and pharmaceutical industries and are broadly utilized ranging from food fermentations and biosynthetic processes to waste treatment and biodegradation of toxic chemicals. The field of microbiology is a major contributor toward industrial development; human, animal, and plant health; environmental integrity; and agricultural productivity.

The primary objectives of the curriculum are to broadly educate students regarding the biology of microorganisms. The curriculum prepares students for positions in industry, government, and graduate/professional study in life sciences through extensive coursework combined with laboratory and research experience.

Microbiology 680 (SEBS)

Learning Goals

Learning Goals

1. Graduates will be able to illustrate and describe the biology of microorganisms, focusing on microbial processes and their effects on other organisms and the environment, microbial communities, and biogeochemical cycles.

2. Graduates will be able to apply the scientific method to formulate questions and hypotheses, design experiments, employ appropriate methodology to solve problems in microbiology, and be able to analyze, interpret, and present scientific data in microbiology.

3. Graduates will be able to critically evaluate scientific literature and explain their findings in written and oral format.

4. Graduates will be able to summarize ethical and current issues in microbiology and apply a code of ethics for microbiologists including ethical conduct, scientific integrity, and the dignity of the profession and practice of microbiology.

Microbiology 680 (SEBS)

Entry Requirements for the Major

Entry Requirements for the Major

To enter upper-level microbiology (11:680) courses, students must have completed 01:119:115-116,117 General Biology (formerly 01:119:101-102) and 01:160:161-162 General Chemistry with grades of C or better.

Microbiology 680 (SEBS)

Residency Requirements for the Major

Residency Requirements for the Major

A minimum of 20 credits of coursework from among the required and elective courses. Proficiency in microbiology, not including quantitative skills (8), must be completed in residence. Of these 20 credits, at least 12 credits must be completed from 680 courses.

This rule is intended to assure that students receiving degrees from Rutgers University-New Brunswick have taken a minimum number of courses in their major with New Brunswick faculty. Please keep in mind that although a course may transfer from another institution into one of the Rutgers-New Brunswick schools, it will not necessarily be accepted toward the major in microbiology. Therefore, transfer courses must be evaluated and accepted by the program director in order to count toward the major.

Microbiology 680 (SEBS)

Graduation Requirements for the Major

Graduation Requirements for the Major

All students, regardless of matriculation date must complete a minimum of 20 credits of microbiology major coursework from among the required and elective courses (Area VIII). Proficiency in microbiology, not including quantitative skills (8 credits), must be completed in residence. Of these 20 credits, at least 12 credits must be completed from 680 courses. This rule is intended to assure that students receiving degrees from Rutgers University-New Brunswick have taken a minimum number of courses in their major with New Brunswick faculty. Please keep in mind that although a course may transfer from another institution into one of the Rutgers-New Brunswick schools, it will not necessarily be accepted toward the major in microbiology. Therefore, transfer courses must be evaluated and accepted by the undergraduate program director in order to count toward the major.

For an up-to-date description of microbiology major requirements, courses, and course sequences please refer to the program webpage at https://dbm.rutgers.edu/microbiology.

GRADUATION REQUIREMENTS - SEBS UNDERGRADUATE CORE CURRICULUM (39 credits)

Options are chosen from lists of courses certified in each learning goal: https://sebs.rutgers.edu/core.

Note: The SEBS Core Curriculum requirements differ slightly from SAS Core Curriculum requirements.

Contemporary Challenges (6 credits) *Two courses, one in each of the Contemporary Challenges areas: Diversities and Social Inequalities* [CC-D] *and Our Common Future* [CC-O]

Experiential Learning (3 credits) *Students must participate in a certified experience that meets this goal* [EL]

Natural Sciences (6 credits)*Two courses, one each in two of the following areas: physical, biological, or environmental sciences* [NS]

Historical Analysis (3 credits) *One course* [HST]

Social Analysis (6 credits) *Two courses, one in either social/cultural analysis or economic analysis, and one in governmental and regulatory analysis* [SCL]

Arts and Humanities (3 credits) *One course* [AH]

Writing and Communication (6 credits) *01:355:101 or its equivalent* [WC] *and one course in communicating effectively in modes appropriate to a discipline or area of inquiry* [WCD]

Quantitative and Formal Reasoning (6 credits) *Two courses* [QQ; QR]

GRADUATION REQUIREMENTS FOR THE MAJOR

GRADUATION REQUIREMENTS FOR THE MAJOR

A. Introductory Life and Physical Sciences (44 credits)

- 01:119:115-116 General Biology (4,4)*
- 01:119:117 Biological Research Laboratory (2)
- 01:160:161-162 General Chemistry (4,4)*
- 01:160:171 Introduction to Experimentation (1)
- 01:640:151 Calculus for Mathematics and Physical Sciences (4)**
- 01:960:401 Basic Stats for Research (3)** (other calculus courses may be substituted)
- 01:160:370 - 308 Organic Chemistry (4,4)*** OR 01:160:315 - 316 Principles of Organic Chemistry (4,4)
- 01:447:380 Genetics (4)
- 01:750:193-194 Physics for the Sciences (4,4)* or equivalent

**Up to 6 credits can be applied to the SEBS Core-Natural Sciences*

***Up to 6 credits can be applied to the SEBS Core-Quantitative and Formal Reasoning*

****Students intending to apply to medical school should be aware that many schools require laboratories in organic chemistry and physics.*

B. Core Microbiology (44 Credits, including electives)

- 11:680:390 General Microbiology (*Must pass General Microbiology with a minimum grade of C to satisfy prerequisite requirement for: 11:680:401, 11:680:491, 11:680:492, 11:680:494, 11:680:480, and 11:680:481.)
- 11:680:480 Microbial Genetics and Genomics or 11:126:481 Molecular Genetics (3)
- 11:680:481 Microbial Physiology (3)
- 11:680:491 Microbial Ecology and Diversity (3)
- 11:680:494 Applied Microbiology (4)
- 11:680:401 Ethics and Issues in Microbiology (1)
- 11:680:495 Seminar in Microbiology (1)
- 11:115:403-404 General Biochemistry (4,3)
- 11:115:413 Experimental Biochemistry (3)

Microbiology Electives (15) (Semesters Taught)*
**Please note that no more than one course with a grade of D may be used to fulfill the core microbiology requirements of the major.*

- 11:126:407 Comparative Virology (3) (fall every other year)
- 11:126:427 Methods in Applications in Molecular Biology (4) (fall)
- 11:126:482 Molecular Genetics Laboratory (3) (spring)
- 11:126:484 Tools for Bioinformatic Analysis (3) (spring)
- 11:126:485 Bioinformatics (fall)
- 01:146:328 Human Parasitology (3) (fall)
- 01:146:340 Virology (3) (fall, even years only)
- 01:146:474 Immunology (3) (fall)
- 01:146:475 Laboratory in Immunology (1) (spring)
- 11:216:405 Evolution in Infectious Diseases (3) (spring)
- 11:375:302 Water and Wastewater Treatment (3) (fall)
- 11:375:312 Environmental Microbiology Laboratory (2) (fall)
- 11:375:411 Environmental Microbiology (3) (spring)
- 11:375:453 Soil Ecology (3) (fall)
- 11:400:423 Food Microbiology (3) (spring)
- 01:447:392 Pathogenic Microbiology (3) (fall)
- 01:447:480 Topics in Molecular Genetics (3) (spring)
- 11:680:410 Microbiology and Culture of Cheese and Wine (3) (summer)
- 11:680:486 Analytical Methods in Microbiology (3) (spring, even years)
- 11:680:492 Microbial Ecology Laboratory (3) (spring, odd years)
- 11:680:475 Microbiomes and Health (3) (spring)
- 11:776:302 General Plant Pathology (3) (fall)

- 11:776:400 Fungi in the Environment (3) (fall)
- 11:680:497, 498 Research in Microbiology (fall/spring/summer) - One to three credits of research may be substituted for an equal number of credits of elective courses, with the approval of the curriculum coordinator.

C. Unspecified Electives (up to 3)

Middle Eastern Studies 685 (SAS)

MIDDLE EASTERN STUDIES 685

School of Arts and Sciences

Website: https://mideast.rutgers.edu

Director, Center for Middle Eastern Studies (CMES): Toby Jones

Director, Middle Eastern Studies Program (MESP): Neda Bolourchi

Executive Committee, Center for Middle Eastern Studies/Middle Eastern Studies Program:

Toby Jones, History; Ph.D., Stanford

Maya Mikdashi, Women's, Gender, and Sexuality Studies, Middle Eastern Studies; Ph.D., Columbia

Sandra Russell-Jones, History, Religion; Ph.D., Pennsylvania

Deepa Kumar, Journalism; Ph.D., Pittsburgh

Omar Dewachi, Anthropology; Ph.D., Harvard

Asle Zengin, Women¿s Gender, and Sexuality Studies; Ph.D., Toronto

For information about the Center for Middle Eastern Studies or the Middle Eastern studies program and declaring a major or minor in Middle Eastern studies, contact the CMES director or MESP director at Lucy Stone Hall, Room B-316, Rutgers, The State University of New Jersey, 54 Joyce Kilmer Avenue, Piscataway, NJ 08854, or by email at mideast@rci.rutgers.edu. Information also may be found at the center's website. Rutgers faculty or students who want to be added to the center's email list can do so on the webpage: https://lists.sas.rutgers.edu/mailman/listinfo/cmes-students.

Learning Goals

Learning Goals

Majors will be able to demonstrate language proficiency at the 300 level or above in one of the Middle Eastern languages (Arabic, Hebrew, Persian, and Turkish); an interdisciplinary foundational knowledge of the languages and cultures of the Middle East; and, an understanding of key themes in Middle Eastern cultures, history, and contemporary social, economic, and political issues. *Majors* will be able to engage in cross-cultural communication and understanding; analyze how stereotypes hinder intercultural understanding; think dynamically about the relationship between the United States and the third world; and, initiate, research, and write a semester-length independent research paper.

Minors will be able to demonstrate introductory level language proficiency (one year) in one of the Middle Eastern languages (Arabic, Hebrew, Persian, and Turkish); an interdisciplinary foundational knowledge of the languages and cultures of the Middle East; and, a basic understanding of key themes in Middle Eastern cultures, history, and contemporary social, economic, and political issues. *Minors* will be able to engage in cross-cultural communication and understanding; analyze how stereotypes hinder intercultural understanding; think dynamically about the relationship between the United States and the third world; and, initiate, research, and write a semester-length independent research paper.

Middle Eastern Studies 685 (SAS)

Major Requirements

Major Requirements

The interdisciplinary major in Middle Eastern studies consists of a total of 34 credits that are distributed among the following courses. Students must complete all courses counting toward the major in Middle Eastern studies with a grade of C or better.

Core Middle Eastern Studies courses (12 credits)

1. Introduction to the Modern Middle East (3 credits) 01:685:100

This course should be taken as early as possible, in the freshman year, or as soon as the major is declared.

2. Historical Survey (3 credits)

One of the following three courses should be taken as early as possible, in the freshman year, or as soon as the major is declared.

01:685:201/01:508:201/01:014:205 Islamic Civilization

01:685:305/01:508:205 History of the Modern Middle East

01:685:304/01:508:304 Ottoman Empire

3. Senior Seminar (3 credits) 01:685:493; 01:685:494; 01:685:499

Senior Seminars in Middle Eastern Studies are offered every semester and focus on a particular topic, such as The United Nations and the Middle East; Women's Movements in the Middle East; and The Middle East in Western Popular Culture and Mass Media.

In lieu of the Senior Seminar in Middle Eastern Studies, students may substitute an equivalent Senior Seminar in a related discipline (e.g., art history, history, Jewish studies, political science, religion, sociology, or women's, gender, and sexuality studies) that has the Middle East as its focus, with the approval of the director of the Middle Eastern studies program (MESP).

4. Arts/Literature (3 credits) 01:013:201; 01:013:221; 01:082:320

The arts/literature requirement can be satisfied by choosing one of the courses listed above in either the AMESALL or the art history department. Upon the director's approval, students can also take related courses in other disciplines.

Middle Eastern Language (16 credits)

Students can choose to study any of the following Middle Eastern languages:

Arabic

Hebrew

Persian

Turkish

Less common languages, arranged in consultation with the AMESALL department and the MESP director.

Language courses at Rutgers are typically worth 4 credits (as opposed to the standard 3), therefore, majors should plan to spend four semesters studying their chosen language. All 16 credits must be in the same language--you cannot mix and match.

Students who arrive at Rutgers having completed coursework in their chosen language elsewhere may take a placement test. If the student tests beyond the intermediate level, they need only complete 8 (or 6, depending on the specific courses chosen) credits of language study, at the advanced level, in consultation with the MESP director. Advanced placement students must document their previous language study (students with native language abilities are not eligible to use their native language as their language of study).

Electives (6 credits)

The remaining 6 elective credits are taken from other courses offered by Middle Eastern studies, or from approved cross-listed courses relevant to the Middle East offered by contributing departments. Language courses may not be taken to fulfill elective requirements. Some examples of accepted courses from contributing departments are: Islam and Democracy (political science); Jews in the Islamic World (Jewish studies); and Women and Society in the Islamic Middle East (history).

Students may also pursue an internship (3 credits) for elective credit. There are many different types of internships available locally or off campus that would be acceptable for elective credit for the major.

Middle Eastern Studies 685 (SAS)

Minor Requirements

Minor Requirements

The interdisciplinary minor in Middle Eastern studies consists of a total of 23 credits that are distributed among the following courses. Students must complete all courses counting toward the major in Middle Eastern studies with a grade of C or better.

Core Middle Eastern Studies courses (12 credits)

1. Introduction to the Modern Middle East (3 credits) 01:685:100

This course should be taken as early as possible, in the freshman year, or as soon as the major is declared.

2. Historical Survey (3 credits)

One of the following three courses should be taken as early as possible, in the freshman year, or as soon as the major is declared.

01:685:201/01:508:201/01:014:205 Islamic Civilization

01:685:305/01:508:205 History of the Modern Middle East

01:685:304/01:508:304 Ottoman Empire

3. Senior Seminar (3 credits) 01:685:493; 01:685:494; 01:685:499

Senior Seminars in Middle Eastern Studies are offered every semester and focus on a particular topic, such as The United Nations and the Middle East; Women's Movements in the Middle East; and The Middle East in Western Popular Culture and Mass Media.

In lieu of the Senior Seminar in Middle Eastern Studies, students may substitute an equivalent Senior Seminar in a related discipline (e.g., art history, history, Jewish studies, political science, religion, sociology, or women's, gender, and sexuality studies) that has the Middle East as its focus, with the approval of the director of the Middle Eastern studies program (MESP).

4. Arts/Literature (3 credits) 01:013:201; 01:013:221; 01:082:320

The arts/literature requirement can be satisfied by choosing one of the courses listed above in either the AMESALL or the art history department. Upon the director's approval, students can also take related courses in other disciplines.

Middle Eastern Language (8 credits)

Students can choose to study any of the following Middle Eastern languages:

Arabic

Hebrew

Persian

Turkish

Less common languages, arranged in consultation with the AMESALL department and the MESP director.

Language courses at Rutgers are typically worth 4 credits (as opposed to the standard 3), therefore, majors should plan to spend four semesters studying their chosen language. All 8 credits must be in the same language--you cannot mix and match.

Students who arrive at Rutgers having completed coursework in their chosen language elsewhere may take a placement test. If the student tests beyond the intermediate level, they need only complete 4 (or 3, depending on the specific courses chosen) credits of language study, at the advanced level, in consultation with the MESP director. Advanced placement students must document their previous language study (students with native language abilities are not eligible to use their native language as their language of study).

Electives (3 credits)

The remaining 6 elective credits are taken from other courses offered by Middle Eastern studies, or from approved cross-listed courses relevant to the Middle East offered by contributing departments. Language courses may not be taken to fulfill elective requirements. Some examples of accepted courses from contributing departments are: Islam and Democracy (political science); Jews in the Islamic World (Jewish studies); and Women and Society in the Islamic Middle East (history).

Students may also pursue an internship (3 credits) for elective credit. There are many different types of internships available locally or off campus that would be acceptable for elective credit for the major.

Middle Eastern Studies 685 (SAS)

Honors

Honors

Middle Eastern studies program (MESP) honors will be awarded to senior Middle Eastern studies (685) majors who enroll in the Middle Eastern studies courses, Honors Thesis 685:497/498, and successfully complete a Middle Eastern studies honors thesis. In order to be eligible for departmental honors, an MESP major will have successfully completed at least 15 credits in Middle Eastern studies courses with a grade-point average 3.4 or better in these courses and have an overall grade-point average of 3.0 or better at the beginning of the fall semester of senior year.

Middle Eastern Studies 685 (SAS)

Program Courses

Program Courses

The Middle Eastern studies program, which is affiliated with the Center for Middle Eastern Studies, is an interdisciplinary major and minor. In addition to courses originating in the Middle Eastern studies program, the major and minor include courses anchored in other departments that are approved for the Middle Eastern studies major or minor, many of which are cross-listed. Cross-listed courses usually utilize the same last three digits of the course number as the listing in the originating department. The Middle Eastern studies code designation is 01:685:__. For example, course 01:790:351 Contemporary Politics in the Middle East, a political science course, is offered simultaneously within Middle Eastern studies as course 01:685:351, with the same title. Credit is not given for both a Middle Eastern studies course (01:685:__) and its corresponding cross-listed course.

Summary descriptions of cross-listed and other approved courses may be found under the relevant originating department's subject code listing (e.g., for a description of 01:685:385 Arab Politics and Society, consult the parallel course entry in the political science program, which is 01:790:385).

Middle Eastern Studies 685 (SAS)

Courses Originating in Middle Eastern Studies

Courses Originating in Middle Eastern Studies

01:685:100 ***Introduction to the Modern Middle East (3)***
Introduction to the languages and cultures of the Middle East and facilities of cross-cultural communication and understanding between the people of the West and of the Middle East.
Credit not given for both this course and 01:563:100.

01:685:200 ***Ancient Near East (3)***
Origins and development of the societies of Mesopotamia, Egypt, Asia Minor, and the Levant, through the period of the Persian Empire.
Credit not given for both this course and 01:508:200, 01:190:200 and 01:563:200.

01:685:201 ***Islamic Civilization (3)***
Survey of Islamic societies from seventh-century Arabia to modern times. Religious, political, military, social, economic, and cultural institutions and organizational patterns.
Credit not given for this course and 01:489:220, 01:510:222, 01:667:220, or 01:190:220.

01:685:220 ***Greek Food from Antiquity to Today (3)***
Food and foodways of Greek-speaking peoples from ancient times to the present, with special emphasis on problems of continuity and change.
Credit not given for this course and 01:489:220, 01:510:222, 01:667:220, or 01:190:220.

01:685:225 *Global Arabic (3)*
Traces the historical development of Arabic as a global language, the various meanings Arabic has come to acquire in various parts of world, and the functions it has come to serve in different periods and different global spaces. Arabic's interactions with other languages and their sociolinguistic implications. Taught in English.
Credit not given for this course and 01:013:225.

01:685:226 *Islam (3)*
Muhammad and the development of Muslim beliefs and practices; major movements and their effects on historical and current events.
Credit not given for both this course and 01:840:226.

01:685:230 *Introduction to Third World Cinema: Middle East and North Africa (3)*
Analyze Third World cinema in the context of sociopolitical issues such as race, class, and gender; relation between Third World cinema and the West; roles of women, youth, and marginal groups. Examine and compare cultural understandings of the concepts of modern and traditional.

01:685:236 *History and Cultures of Iran (3)*
Introduction to Iranian civilization through its historical, material, and intellectual cultures. A diachronic view of cultural tropes, intellectual and nationalist movements, and political governing systems that transformed Iran over the course of the three significant historical periods: the ancient and medieval dynasties, the period from the 19th century to the end of the Pahlavis Monarchy, and the Islamic Republic of the post-1979 Revolution.

01:685:240 *Muslims and Islamic Institutions in America (3)*
Explores the bonds of Muslim community, the meaning of Muslim-American identity, how immigrant groups are assimilated into American society, and institutional frameworks being adopted for national integration.
Credit not given for both this course and 01:014:356 or 01:685:355.

01:685:241 *History of Islamophobia (3)*
This course surveys the history of Western anxiety about Islam from its origins to the present, exploring the theological, political, and cultural forces behind it. It examines how Islamophobia has been institutionalized through discrimination, exclusion and violence against Muslims and those perceived as Muslim. The term 'Islamophobia' is analyzed through engaging with multidisciplinary debates that interrogate the term and its limitations, and its complex relation to religious bias and racism.
Credit not given for both this course and 01:508:203 or 01:840:228

01:685:282 *Israeli-Palestinian Conflict (3)*
Overview of the hundred-year old Arab-Israeli conflict, the controversies it has generated, the attempts to resolve it, and how outsiders to the conflict learn about it and experience it.
Credit not given for both this course and 01:508:212, 01:508:300; 01:563:282; 01:563:300; or 01:685:300.

01:685:295 *Special Topics in Middle Eastern Studies (3)*
Study of a specifically defined subject of Middle Eastern studies. Subjects vary according to individual instructors; contact the undergraduate director for information.

01:685:306 ***Minorities in the Middle East (3)***
Survey of peoples, languages, and religions found in the contemporary Middle East, with a focus upon underrepresented groups and transnational issues. Emphasizes their histories, their roles in the contemporary Middle East, and their evolving relationships with the dominant group of the nations in which they are found.
Credit not given for both this course and 01:013:308 or 01:840:306.

01:685:324 ***Women Writers of the Arab World (3)***
Comprehensive overview of emergence and development of fiction by Middle Eastern women through translated works with emphasis on comparative feminisms in literature. Taught in English.
Credit not given for this course and 01:013:325 or 01:988:315.

01:685:330 ***Major Themes in Contemporary Iranian Cinema (3)***
Examines major films from postrevolutionary Iranian cinema. Major themes: the role of religion in film, art, feminism, children in adult roles, city versus rural and tribal spaces, and the gradual erosion of political and cultural restrictions.

01:685:331 ***Impacts of Media Technologies and Globalization on the Middle East (3)***
Examines how media, especially information technology, have changed societies in the modern Middle East. Tensions between traditional values and modernity as they manifest in the widespread application of computer technology. Challenges to authoritarian governments in the Middle East by the proliferation and democratization of public access to technology. Introduction to the languages and cultures of the Middle East and facilitation of cross-cultural communication and understanding between the people of the West and of the Middle East.

01:685:335 ***Ta'zieh (Passion Play): Religious Rituals, History, and Shi'ite Culture (3)***
Examination of the Persian passion play *Ta'zieh*, its roots in Shi'ite history, and its ritual and aesthetic dimensions.

01:685:336 ***History and Cultures of Iran (3)***
Introduction to Iranian history through its social, cultural, and political developments.

01:685:346 ***Media in the Arab World (3)***
Examines media in the Arab world from mid-19th century print sources to modern electronic media. The role that satellite channels, such as al Jazeera, play in contemporary political discourse in Arabic.

01:685:353 ***Islamic Law and Jurisprudence (3)***
Introduction to Islamic legal theory in its historical and modern contexts. Contrasts Islamic law and legal theory with Western legal theory and constitutional thought.
Credit not given for both this course and 01:790:457.

01:685:357 ***Islam and Democracy in the Arab World (3)***
Current debates about why the Arab world is reluctant to embrace democracy and why some governments in the Arab world remain authoritarian. Includes the role of Islam in political, economic, and cultural discourse.
Credit not given for both this course and 01:790:367.

01:685:395,396 ***Special Topics in Middle Eastern Studies (3,3)***
Study, in a discussion-oriented format, of a specifically defined subject of Middle Eastern studies.
Subjects vary according to individual instructors; contact the undergraduate director for information.

01:685:447 ***Twentieth-Century Social Movements in Iran (3)***
The Constitutional Revolution of 1906-09; impact of the Russian Revolution on social movements in Iran and the emergence of nationalist movements in Iran's Azerbaijan, Gilan, and Kurdistan provinces; Mossaddegh's oil nationalization effort and its aftermath; the 1979 Revolution in Iran; and the ongoing struggle for social and political freedoms.

01:685:480,481,482 ***Internship in Middle Eastern Studies (3,3,3)***
Students work in outreach projects or with a designated agency concerned with Middle Eastern affairs; requires an appropriately designed academic project, resulting in a paper.
Prerequisite: Permission of program director.

01:685:495,496 ***Advanced Topics in Middle Eastern Studies (3,3)***
Intensive study, in a discussion-oriented format, of a specifically defined subject of Middle Eastern studies. Subjects vary according to individual instructors; contact the center director for information.
Prerequisite: 01:685:100.

01:685:497,498 ***Honors Thesis (3,3)***
Research for and writing of an original work of scholarship.
Prerequisite: Permission of program.

01:685:499 ***Senior Seminar in Middle Eastern Studies (3)***
Ways of looking at and interpreting Middle Eastern societies, cultures, histories, languages, religions, etc. Examines popular scholarly materials including artwork, films, fiction, and essays using modern methods of critical analysis.
Prerequisites: 01:685:100 or 01:563:100. Open to seniors only.

Middle Eastern Studies Courses Offered by Other Departments

Middle Eastern Studies Courses Offered by Other Departments

A. African, Middle Eastern, and South Asian Languages and Literatures (for Hebrew language courses, see Jewish Studies below)

01:013:110 (01:563:145; 01:685:145) Introduction to Aramaic (3)

01:013:130 (01:685:130) Comics in the Middle East (3)

01:013:140 Elementary Arabic I (4)

01:013:141 Elementary Arabic II (4)

01:013:176 (01:723:103) Elementary Persian I (4)

01:013:177 (01:723:104) Elementary Persian II (4)

01:013:190 (01:973:105) Elementary Turkish I (4)

01:013:191 (01:973:106) Elementary Turkish II (4)

01:013:201 (01:685:204) Crossroads: Classical Literatures of Africa, the Middle East, and South Africa (3)

01:013:203 Language and Society in Africa, the Middle East, and South Asia (3)

01:013:221 (01:685:221; 01:195:221) Introduction to the Literatures of the Middle East (3)

01:013:240 (01:013:227; 01:685:227; 01:074:240) Intermediate Arabic I (4)

01:013:241 (01:013:228; 01:685:228; 01:074:241) Intermediate Arabic II (4)

01:013:242 Classical Arabic I (4)

01:013:243 Classical Arabic (3)

01:013:276 (01:723:276) Intermediate Persian I (4)

01:013:277 (01:723:204) Intermediate Persian II (4)

01:013:290 (01:973:215) Intermediate Turkish I (4)

01:013:291 (01:973:216) Intermediate Turkish II (4)

01:013:301 Topics in AMESALL (3)

01:013:302 Topics in AMESALL (1.5)

01:013:314 Islam and African Literatures (3)

01:013:322 (01:685:323) Middle Eastern Folklore and Myth (3)

01:013:325 (01:685:324, 01:988:315) Women Writers of the Arab World (3)

01:013:329 (01:685:322) Moroccan Culture (3)

01:013:340 (01:013:327; 01:685:327; 01:074:340) Advanced Arabic I (3)

01:013:341 (01:013:328; 01:685:328; 01:074:341) Advanced Arabic II (3)

01:013:342 (01:013:437) Modern Arabic Literatures (3)

01:013:343 (01:195:237) Arabic Classical Literatures (3)

01:013:346 (01:195:337; 01:685:347) Literature and Memory in the Arab World (3)

01:013:376 (01:723:303) Advanced Persian I (3)

01:013:377 (01:723:304) Advanced Persian II (3)

01:013:378 Modern Persian Literatures (3)

01:013:379 Classical Persian Literatures (3)

01:013:390 Advanced Turkish I (3)

01:013:391 Advanced Turkish II (3)

01:013:401 Senior Seminar in Literature and Society (3)

01:013:402 Advanced Topics in AMESALL (3)

01:013:409 (01:563:409) Introduction to the Semitic Languages (3)

01:013:476 Theory and Practice of Persian Translation I (3)

01:013:477 Theory and Practice of Persian Translation II (3)

MILITARY EDUCATION, AIR FORCE 690

Department of Aerospace Studies, Office of the Executive Vice President for Academic Affairs

Website: http://afrotc.rutgers.edu

Department Chair: Lieutenant Colonel Kristine E. Poblete, U.S. Air Force, Ed.D.

Professor:

Lieutenant Colonel Kristine E. Poblete, B.A., Washington State University; M.S., Duquesne University; Ed.D., University of Southern California

Assistant Professors:

Captain Megan M. Chaplin, B.A., Hiram College; M.S., Southern New Hampshire University

Captain Samuel H. Kim, B.A., New York University; M.A., Columbia University

Technical Sergeant Emad N. Delos Reyes, B.S., University of Maryland Global Campus

Military Education, Air Force 690 (SAS)

Air Force Reserve Officer Training Corps

Air Force Reserve Officer Training Corps

Air Force Reserve Officer Training Corps (AFROTC) is a voluntary program of military education and leadership development open to qualified students in all academic majors of the university. Upon completion of the AFROTC program and the attainment of a baccalaureate-level degree, the cadet receives a commission as an officer in the U.S. Air Force or Space Force. A monthly subsistence is provided during the junior and senior years.

Military Education, Air Force 690 (SAS)

Scholarships

Scholarships

Scholarships are awarded on a competitive basis in increments of four, three, and two years. Current information on scholarships is available on the web at afrotc.com and at the local Rutgers detachment website at afrotc.rutgers.edu.

Military Education, Air Force 690 (SAS)

Program Requirements

Program Requirements

Typically, AFROTC is a four-year program; however, in many circumstances students may join during any semester as long as they have at least three years of school left in either an undergraduate- or graduate-level course of study (or a combination of both). Interested students should inquire about special programs that may need as little as one to two years to complete.

Four-Year Program. The first two years of the four-year candidate program are called the General Military Course (GMC) and are voluntary. The GMC is designed to acquaint the new college student with the Air Force.

Enrollment in the GMC does not place the student under any military service obligation. Requirements for the GMC include 03:690:121,122 and 221,222 scheduled for one hour per week over the first four semesters. In addition, Leadership Laboratory (03:690:171,172 and 271,272) is scheduled each week for three hours. One academic credit is awarded for the classroom work in each semester of the GMC.

Four-year candidates must attend a nineteen-day leadership, evaluation, and development encampment prior to their junior year.

During his or her sophomore year, the student may apply for entrance into the Professional Officer Course (POC). The POC is contractual and is scheduled during the junior and senior years. Obligations include enlisting in the Air Force Reserve, completion of degree requirements, and acceptance of a commission in the U.S. Air Force if tendered. Semester requirements for the POC include attendance at leadership laboratory and classes. The POC courses are 03:690:323,324; 371,372; 423,424; and 471,472. Three academic credits are awarded for the classroom work in each semester of the POC. Students who successfully complete the POC are commissioned as second lieutenants in the Air Force upon graduation and have an initial active duty obligation of four years. This active duty period is longer for certain positions such as pilots, combat systems officers, remotely piloted aircraft pilots, and air battle managers.

Three-Year Program. The three-year candidate program offers college students, who have at least three full academic years remaining, an opportunity to catch up with their contemporaries and complete the AFROTC program. Three-year candidates take an accelerated schedule of courses their first year in the program in order to make up missed military training objectives.

Military Education, Air Force 690 (SAS)

Military Science Minor

Military Science Minor

The department offers two options to earn a military science minor: commission track and non-commission track. To declare the minor, notify your academic adviser or the professor of military science. Additionally, students not seeking a commission may take the leadership development lower-division lecture only courses for academic credit only.

Military Education, Air Force 690 (SAS)

Membership Qualifications

Membership Qualifications

To qualify for membership in the Air Force ROTC program (as a cadet), a student must be a citizen of the United States or be able to verify active pursuit of U.S. citizenship. Non-U.S. citizens may not contract or accept scholarship funding. The student must be at least 14 years of age, physically qualified, and enrolled as a full-time student. All Rutgers students are eligible to take AFROTC academic classes, even if they are not members of AFROTC. To apply for membership in the program, students should contact the Recruiting Officer at 848-932-7706 or via email at rotc485@afrotc.rutgers.edu.

Military Education, Air Force 690 (SAS)

Non-Cadet Enrollment

Non-Cadet Enrollment

Rutgers students who desire a varied aerospace education without seeking a commission are encouraged to enroll in classes on a space-available basis for the purpose of academic credit only. These students are not required to attend traditional ROTC activities, including the Leadership Laboratory. For more information, call 848-932-7706, or send an email to rotc485@afrotc.rutgers.edu.

Military Education, Air Force 690 (SAS)

Uniforms and Allowances

Uniforms and Allowances

Uniforms and textbooks are supplied to all students enrolled in AFROTC. Students enrolled in the Professional Officer Course (POC) and scholarship students receive a monthly graduated stipend ranging from $300 to $500, depending on their year in school.

Military Education, Air Force 690 (SAS)

Courses

Courses

03:690:121,122 ***The Foundations of the United States Air Force (1,1)***
Survey course designed to introduce students to the United States Air Force and encourage participation in Air Force Reserve Officer Training Corps. Featured topics include: overview of ROTC; special programs offered through ROTC; mission and organization of the Air Force; brief history of the Air Force; introduction to leadership and leadership related issues; Air Force Core Values; Air Force officer opportunities; and an introduction to communication skills. Leadership Laboratory is mandatory for AFROTC cadets and complements this course by providing cadets with followership experiences.

03:690:171,172 ***Leadership Laboratory I (0,0)***
Fundamentals of drill and ceremonies; physical fitness training; leadership exercises; and military-related skill sets. ***Corequisites: 03:690:121,122. Enrollment limited to Air Force ROTC cadets.***

03:690:221,222 ***The Evolution of Air and Space Power (1,1)***
Designed to examine general aspects of air and space power through a historical perspective. Utilizing this perspective, the course covers a time period from the first balloons and dirigibles to the space-age global positioning systems of the Afghan/Iraqi wars. Historical examples are provided to extrapolate the development of Air Force capabilities (competencies) and missions (functions) to demonstrate the evolution of what has become today's USAF air and space power. As a whole, this course provides the students with a knowledge-level

understanding for the general element and employment of air and space power from an institutional doctrinal and historical perspective. Leadership Laboratory is mandatory for AFROTC cadets and complements this course by providing cadets with followership experiences.

03:690:271,272 ***Leadership Laboratory II (0,0)***
Continuation of Leadership Laboratory I. Advanced drill and ceremonies; physical fitness training and evaluation; leadership exercises; and military-related skill sets.
Corequisites: 03:690:221,222. Enrollment limited to Air Force ROTC cadets.

03:690:323,324 ***Air Force Leadership Studies (3,3)***
Study of leadership; management fundamentals; professional knowledge; leadership ethics; problem-solving strategies; and communication skills required of an Air Force junior officer. Case studies are used to examine Air Force leadership and management situations as a means of demonstrating and exercising practical application of the concepts being studied. A mandatory Leadership Laboratory complements this course by providing advanced leadership experiences in officer-type activities, giving students the opportunity to apply leadership and management principles of this course.

03:690:371,372 ***Leadership Laboratory III (0,0)***
Advanced leadership experience in planning, organizing, directing, coordinating, controlling, and communicating.
Corequisites: 03:690:323,324. Enrollment limited to Air Force ROTC cadets.

03:690:423,424 ***National Security Affairs (3,3)***
Examines the national security process, regional studies, advanced leadership ethics, and Air Force doctrine. Special topics of interest focus on the military as a profession, officership, military justice, civilian control of the military, preparation for active duty, and current issues affecting military professionalism. Within this structure, continued emphasis is given to refining communication skills. A mandatory Leadership Laboratory complements this course by providing advanced leadership experiences, giving students the opportunity to apply the leadership and management principles of this course.

03:690:471,472 ***Leadership Laboratory IV (0,0)***
Advanced leadership and management skills and their application.
Corequisites: 03:690:423,424. Enrollment limited to Air Force ROTC cadets.

Military Education, Army 691 (SAS)

Army Reserve Officer Training Corps (ROTC)

Army Reserve Officer Training Corps (ROTC)

Army ROTC is a leadership and management development program designed to commission second lieutenants in the U.S. Army. The Rutgers ROTC Scarlet Knight Detachment recruits, develops, trains, and mentors confident, physically fit, adaptive cadets who are prepared for successful leadership positions as second lieutenants in the active duty Army, National Guard, or Reserves. The program consists of 21 credits: 18 credits of military education courses taken over eight semesters, plus one department-approved course in American military history.

Military Education, Army 691 (SAS)

Officer Commission Track Requirements

Officer Commission Track Requirements

Two paths lead to commissioning: a two-year program and a four-year program.

Two-Year Program. The two-year program offers qualified students an alternate method of entry into the advanced course. A) Students taking this option attend four weeks of leadership and military skill training at Fort Knox, Kentucky, during the summer before entering the advanced course. B) Students with prior and/or current military service members who have completed basic training successfully within any branch of the armed forces may also receive commissioning credit for the basic course and use the two-year option.

Four-Year Program. The first two years of the four-year program constitute the basic course and do not include an obligation to the Army. Successful completion of the basic course is required for contracting as a cadet in the junior year. Basic course classes meet once a week for one class period (1.5 credits). Attendance at the military leadership lab on Friday mornings (three class periods) is required. The junior and senior years constitute the advanced course. These classes meet for three hours a week for 3 credits, and attendance at the Friday labs is required. Additionally, required field training exercises are conducted off campus approximately one weekend per semester.

Military Education, Army 691 (SAS)

Military Science Minor

Military Science Minor

The department offers two options to earn a military science minor: commission track and non-commission track. To declare the minor, notify your academic adviser or the professor of military science. Additionally, students not seeking a commission may take the leadership development lower-division lecture only courses for academic credit only.

Non-Commissioning Track - Army Option (21 credits)

The requirements to complete the non-commission track requirements include the following: basic course components, one course in American military history, and four leadership courses. To apply for the non-commission track minor, notify your academic adviser or the department professor of military science.

Basic Course:

03:691:101 Foundations of Officership and Basic Leadership (1.5)
03:691:102 Foundations of Officership and Basic Leadership (1.5)

03:691:201 Individual Leadership Studies (1.5)
03:691:202 Individual Leadership Studies (1.5)

One course of American military history: For course descriptions offered by other departments, please refer to the individual department websites.

01:512:240 World War I (3)
01:512:242 World War II (3)
01:512:301 The American Revolution (3)
01:512:303 American Civil War and Reconstruction (3)
01:512:305 U.S. History, 1914-1945 (WWI-WWII) (3)
01:512:306 U.S. History, 1945 to the Present (3)
01:512:347 War, Peace, and the Military of the United States to 1877 (3)
01:512:348 War, Peace, and the Military of the United States since 1877 (3)
01:512:352 American Foreign Policy since 1898 (3)
01:512:354 History of the Cold War (3)
01:790:319 American Foreign Policy (3)
01:790:324 The Causes of War (3)
01:790:323 Defense Policy (3)
01:988:270 War: Critical Perspectives (3)

Four courses from the following, with at least TWO at the 300 level: (may not use the same course to meet this requirement and the previous requirement). For course descriptions offered by other departments, please refer to the individual department websites.

01:713:202 Introduction to Organizational Leadership (3)
01:713:308 Leadership in a Diverse Workplace (3)
01:508:300 The Arab-Israeli Conflict (3)
01:508:306 War and Revolution in Iran and Iraq (3)
01:512:240 World War I (3)
01:512:242 World War II (3)
01:512:301 The American Revolution (3)
01:512:303 American Civil War and Reconstruction (3)
01:512:305 U.S. History, 1914-1945 (WWI-WWII) (3)

Uniforms and Allowances

Uniforms and Allowances

Government-issued uniforms and equipment are provided to all contracted cadets enrolled in Army ROTC. These items must be returned to the ROTC department at the end of each semester or as directed by the ROTC supply officer.

Contracted cadets enrolled in the basic or advanced course of Army ROTC receive $420 as a monthly stipend while attending classes. Army tuition and fees scholarship recipients receive the cadet stipend plus $1,200 for books per year. New Jersey Army National Guard members who are also Army ROTC cadets may be eligible for additional tuition benefits.

Military Education, Army 691 (SAS)

Summer and Winter Break Training Opportunities

Summer and Winter Break Training Opportunities

Qualified cadets may compete for training opportunities at Airborne, Air Assault, Mountain Warfare, and Northern Warfare schools. There are summer opportunities for contracted cadets to study abroad, involving identified critical language and subject areas. Cadets attend one month of summer training at Fort Knox, Kentucky, before their senior year. Following summer training, rising seniors have the opportunity to participate in Cadet Troop Leadership Training (CTLT) for two to four weeks with the Army branch of their choice at domestic and international locations.

Military Education, Army 691 (SAS)

Distinguished Military Student/Distinguished Military Graduate

Distinguished Military Student/Distinguished Military Graduate

Distinguished Army ROTC students are so designated at the beginning of their senior year by the professor of military science on the basis of high scholarship, evidence of high moral character, military aptitude, and demonstrated leadership ability. Distinguished military graduates are those who rank in the top 20 percent of Army ROTC graduates nationwide, as determined by the national Order of Merit Listing (OML).

Military Education, Army 691 (SAS)

Physical Training

Physical Training

Physical development is focused on the physically challenging requirements of being an Army officer. Students develop their ability to maintain personal fitness and build an appreciation for teamwork, inspire a will to win, and be successful. Physical fitness training is conducted four mornings a week and is required of all cadets pursuing a commission.

Military Education, Army 691 (SAS)

Non-Cadet Enrollment

Non-Cadet Enrollment

Rutgers students who desire a varied education without seeking a commission are encouraged to enroll in either the non-commission track minor or the basic course (lecture only 100- and 200-level lecture courses), for academic credit only. Non-commission track and basic course students are not required to attend additional ROTC activities, including the leadership laboratory.

Military Education, Army 691 (SAS)

Army ROTC Extracurricular Activities

Army ROTC Extracurricular Activities

There are many opportunities for involvement for Rutgers Army ROTC cadets, including the Scabbard and Blade National Honor Society; the annual Rutgers Army ROTC Hope for the Warriors 5K Run; the Ranger Challenge Team; the annual Army Ten Miler in Washington, D.C.; ROTC intramural athletics teams; ROTC-sponsored blood drives; and various community service projects.

Military Education, Army 691 (SAS)

Courses

Courses

03:691:101 ***Foundations of Officership (1.5)***
Introduces basic Army structure, customs, and traditions as well as different concepts that are critical to effective leadership. Cadets/students learn how the personal development of life skills and attributes such as critical thinking, goal setting, time management, physical fitness, ethics, values, and stress management relate to leadership, Officership, and the Army profession.

03:691:102 ***Basic Leadership (1.5)***
Overviews leadership fundamentals such as setting direction, problem solving, listening, presenting briefs, providing feedback, and using effective writing skills. Explores different dimensions of leadership values, attributes, skills, and actions.
Prerequisite: 03:691:101 or permission of department chair.

03:691:103,104 ***Military Leadership Laboratory (0,0)***
Practical exercises in basic military skills and leadership techniques as a member of the rifle squad.
Lab. 5.5 hrs. Corequisites: 03:691:101, 102.

03:691:201 ***Individual Leadership Studies (1.5)***
Explores the dimensions of creative and innovative tactical leadership strategies and style by examining team dynamics and historical leadership theories that form the basis of Army leadership framework. Case studies provide tangible context for learning the Soldier's Creed and Warrior Ethos.
Prerequisites: 03:691:101, 102; or permission of department chair.

03:691:202 ***Leadership and Teamwork (1.5)***
Examines the challenges of leading tactical teams in the complex contemporary operating environment. Highlights dimensions of terrain analysis, patrolling, and operations orders. Students develop greater self-awareness as they assess their own leadership styles and practice communication and team-building skills.
Prerequisites: 03:691:101, 102, 201; or permission of department chair.

03:691:203,204 ***Military Leadership Laboratory (0,0)***
Practical exercises in basic military skills and leadership techniques as a rifle team leader.
Lab. 5.5 hrs. Corequisites: 03:691:201, 202.

03:691:391 ***Military Leadership and Problem Solving (3)***
Challenges students to study, practice, and evaluate adaptive leadership skills techniques in preparation for the Leadership Development and Assessment Course. Students begin to analyze and evaluate their own leadership values, attributes, skills, and actions. Students receive systematic and specific feedback on their leadership abilities.
Prerequisites: 03:691:101, 102, 201, 202; or permission of department chair.

03:691:392 ***Military Leadership and Ethics (3)***
Increasingly intense situational leadership challenges to build student awareness and skills in leading tactical operations. Students review aspects of combat, stability, and support operations. Students are evaluated on what they know and do as leaders in preparation for the summer Leadership Development and Assessment Course.
Prerequisites: 03:691:101, 102, 201, 202, and 391; or by permission of department chair.

03:691:393,394 ***Military Leadership Laboratory (0,0)***
Practical exercises in basic military skills and leadership techniques at the rifle platoon/company level.
Lab. 5.5 hrs. Corequisites: 03:691:391, 392.

03:691:491 ***Military Leadership and Management (3)***
Develops student proficiency in planning, executing, and assessing complex operations, functioning both as a leader and as a member of a staff, and providing performance feedback to subordinates. Lessons and practical exercise prepare the student to make the final transition to becoming an Army officer.
Prerequisites: 03:691:391, 392; or permission of instructor.

03:691:492 ***Officership (3)***
Explores the dynamics of leading in complex situations of current military operations in the contemporary operating environment. Examines differences in customs and courtesies, military law, principles of war, and rules of engagement in the face of international terrorism. Significant emphasis on leading by example.
Prerequisite: 03:691:491 or permission of department chair.

03:691:493,494 ***Military Leadership Laboratory (0,0)***
Practical exercises in basic military skills and leadership techniques as staff members and leaders at the rifle company and battalion level.
Lab. 5.5 hrs. Corequisites: 03:691:491, 492. Enrollment limited to and required of all Army ROTC cadets.

03:691:495,497 ***Independent Study (3,3)***
Selected additional research topics related to military leadership and training.
This course is not a requirement for commissioning.

03:691:496,498 ***Military Leadership Laboratory (0,0)***
Practical team training related to specified topic of the Independent Study course.
This course is not a requirement for commissioning.

Military Education, Naval 692 (SAS)

MILITARY EDUCATION, NAVAL 692

Department of Military Education (Naval), Office of the Executive Vice President for Academic Affairs

Website: http://nrotc.rutgers.edu

Department Chair: Captain Jessica R. Parker, U.S. Navy

Professor:

Captain Jessica R. Parker, U.S. Navy; B.S., U.S. Naval Academy; M.S., University of Arkansas

Assistant Professors:

Commander Charles Eaton, U.S. Navy. B.S., U.S. Naval Academy; M.A., University of Rhode Island; M.O., Graduate School of Oceanography (URI)

Captain Sean Ferraro, U.S. Marine Corps; B.S., Maryland

Lieutenant Cal Cisneros, U.S. Navy;. B.S., U.S. Naval Academy

Lieutenant Brady Kuzmick, U.S. Navy;. B.S., Florida State University

Naval Reserve Officers Training Corps (ROTC)

Naval Reserve Officers Training Corps (ROTC)

The Naval Reserve Officers Training Corps (NROTC) program is a voluntary program of military education and leadership development with Navy, Marine Corps, and Navy Nurse options. NROTC is open to qualified male and female students of all academic majors of the university. Navy students earn 22 elective credits plus 16-17 calculus and calculus-based physics credits; Marine Corps students earn 16 credits; and Navy Nurse students earn 10 elective credits. Upon completion of NROTC program academic requirements and attainment of a baccalaureate-level degree, midshipmen are commissioned as ensigns in the Navy or second lieutenants in the Marine Corps. Selected applicants for the program are awarded scholarships through a highly competitive national selection process, and receive full tuition and other financial benefits. Those participants enrolled on a nonscholarship basis compete to obtain a commissioning, and, if approved, receive a stipend and training benefits in their third and fourth years in the program.

Military Education, Naval 692 (SAS)

Mission

Mission

The mission of the Naval Reserve Officers Training Corps program is to develop young men and women morally, mentally, and physically, and to instill in them the highest ideals of honor, courage, and commitment. The program educates and trains young men and women for leadership positions in an increasingly technical Navy and Marine Corps.

Military Education, Naval 692 (SAS)

Program Requirements

Program Requirements

The Department of Naval Science offers several programs of instruction for men and women leading to commissions in the U.S. Navy or U.S. Marine Corps.

Navy: Navy option students complete a course of instruction tailored toward a career in the professional communities in the Navy, including Surface Warfare (conventional and nuclear power), Submarine Warfare (nuclear power), Aviation, Explosive Ordnance Disposal, and SEAL. All Navy option scholarship students must complete the required calculus and calculus-based physics courses by the end of their sophomore and junior years, respectively, in addition to a full regimen of naval science courses.

Required Courses (36 credits)

01:640:151-152 Calculus for Mathematical and Physical Sciences (4,4) or equivalent

01:750:123-124, 227 Analytical Physics (2,2,3) or 01:750:203,204 General Physics (3,3) or equivalent

03:692:101 Introduction to Naval Science (2)

03:692:102 Sea Power and Maritime Affairs (2)

03:692:103,104 Naval Science Laboratory (0,0)

03:692:201 Leadership and Management (3)

03:692:202 Navigation (3)

03:692:203,204 Naval Science Laboratory (0,0)

03:692:301 Naval Ship Systems I: Engineering (3)

03:692:302 Naval Ship Systems II: Weapons (3)

03:692:303,304 Naval Science Laboratory (0,0)

03:692:401 Naval Operations and Seamanship (3)

03:692:403,404 Naval Science Laboratory (0,0)

03:692:490 Leadership and Ethics (3)

Marine: Marine option students follow a similar course of study but replace several Navy courses with Marine Corps-specific classes required for their respective career paths. Marine option students are not required to take calculus or calculus-based physics unless required for their academic major.

Required Courses (16 credits)

03:692:101 Introduction to Naval Science (2)

03:692:102 Sea Power and Maritime Affairs (2)

03:692:103,104 Naval Science Laboratory (0,0)

03:692:201 Leadership and Management (3)

03:692:211 The Evolution of Warfare (3)

03:692:212 Fundamentals of Maneuver Warfare (3)

03:692:203,204 Naval Science Laboratory (0,0)

03:692:303,304 Naval Science Laboratory (0,0)

03:692:403,404 Naval Science Laboratory (0,0)

03:692:490 Leadership and Ethics (3)

Navy Nurse: Navy Nurse option students need only complete Introduction to Naval Science, Sea Power and Maritime Affairs, and the two leadership courses while pursuing a degree in nursing.

Required Courses (10 credits)

03:692:101 Introduction to Naval Science (2)

03:692:102 Sea Power and Maritime Affairs (2)

03:692:103,104 Naval Science Laboratory (0,0)

03:692:201 Leadership and Management (3)

03:692:203,204 Naval Science Laboratory (0,0)

03:692:303,304 Naval Science Laboratory (0,0)

03:692:403,404 Naval Science Laboratory (0,0)

03:692:490 Leadership and Ethics (3)

All midshipmen are required to attend the weekly Naval Science Laboratory. These two-hour sessions offer the student an active role in the management and direction of the midshipman battalion and provide time for the midshipmen to explore professional topics.

Military Education, Naval 692 (SAS)

Military Science Minor

Military Science Minor

The department offers two options to earn a military science minor: commission track and non-commission track. To declare the minor, notify your academic adviser or the professor of military science. Additionally, students not seeking a commission may take the leadership development lower-division lecture only courses for academic credit only.

Military Education, Naval 692 (SAS)

Scholarships

Scholarships

Scholarship opportunities are offered for Navy, Marine Corps, and Navy Nurse option applicants. Typically, Naval Reserve Officers Training Corps is a four-year program, although other programs of shorter duration may be available. Students who were not selected for a four-year scholarship are encouraged to join as College Program (or nonscholarship) students as early as practicable. Potential College Program students should contact the professor

of naval science as, periodically, scholarships are available for College Program students. All information on scholarship programs including entrance requirements, physical requirements, academic requirements, application process, and selection process can be found at http://www.nrotc.navy.mil.

Military Education, Naval 692 (SAS)

Membership Qualifications

Membership Qualifications

To qualify for enrollment in the Naval Reserve Officers Training Corps (NROTC) program, an individual must be a United States citizen or national between 17 and 27 years of age inclusive (possibly up to 30 years of age based on prior service) and physically qualified by Navy or Marine Corps standards. Students with 30 or more semester hours or 45 or more quarter hours of college credit upon application or students already enrolled in NROTC College Program are not eligible for four-year NROTC scholarships; these students should see the professor of naval science to discuss other scholarship opportunities.

Students interested in a career in the Navy or Marine Corps through the NROTC program should visit http://www.nrotc.navy.mil for full entrance requirements.

Military Education, Naval 692 (SAS)

Non-Midshipman Naval Science Class Enrollment

Non-Midshipman Naval Science Class Enrollment

Rutgers students with an interest in military history or wanting to learn more about the Navy or Marine Corps but not desiring a commission are encouraged to enroll in classes on a space-available basis for the purpose of academic credit only. These students are not required to attend traditional Naval Reserve Officers Training Corps activities, including Naval Science Lab or drill time. For more information, contact the Department of Military Education (Naval).

Military Education, Naval 692 (SAS)

Uniforms and Allowances

Uniforms and Allowances

Uniforms and naval science textbooks are supplied for all students enrolled in naval science courses. Additionally, scholarship students receive a textbook stipend and a monthly subsistence allowance.

Military Education, Naval 692 (SAS)

Physical Training

Physical Training

Scholarship, college program, and active duty Navy and Marine Corps students must meet all physical fitness requirements of their prospective service. The Naval Reserve Officers Training Corps program embraces a culture of fitness, and midshipmen can be expected to participate in rigorous and demanding physical activity throughout the school year.

Military Education, Naval 692 (SAS)

Summer Training

Summer Training

A summer training period is held annually to furnish Naval Reserve Officers Training Corps (NROTC) midshipmen experience in the practical application of their studies in naval science. Student midshipmen participate in four- to six-week summer training cruises throughout the world during each of the three summers between their freshman and senior years. Marine option midshipmen attend a seven-week Marine Corps Officer Candidates School in the summer between their junior and senior year. Nurse option midshipmen participate in four-week cruises tailored to the nursing program. The first class cruise (between their junior and senior year) satisfies the USC 10 (Title 10) commissioning requirement for all NROTC midshipmen and may not be waived.

Military Education, Naval 692 (SAS)

NROTC Extracurricular Activities

NROTC Extracurricular Activities

Naval Reserve Officers Training Corps students are encouraged to participate in university-sponsored extracurricular activities such as clubs and sports.

Military Education, Naval 692 (SAS)

Courses

Courses

03:692:101 ***Introduction to Naval Science (2)***
Introduction to the organization and culture of the U.S. Department of Defense and the naval service. Customs and traditions of the service, basic leadership, ethics and character development, junior officer duties, and basic shipboard procedures and safety.
Prerequisite: Permission of department.

03:692:102 ***Sea Power and Maritime Affairs (2)***
U.S. historical evolution of sea power, its concepts, theories, and applications, and relationships to current trends. Impact of world situation, U.S. national interest, changing technology, and naval leadership on the evolving concept of sea power.
Prerequisite: Permission of department.

03:692:103,104 ***Naval Science Laboratory (0,0)***
Instruction and practical application in leadership and associated military skills. Topics may include drill and ceremonies, physical fitness and swimming testing, cruise preparation, cruise evaluation, safety awareness, preparation for commissioning, personal finances, insurance, and applied exercises in naval ship systems, navigation, naval operations, naval administration, and military justice.
Graded pass/no credit. Prerequisite: Permission of department.

03:692:201 ***Leadership and Management (3)***
Basic management, decision-making, and moral leadership. Goal establishment, prioritization, planning and forecasting in a task-centered organization. Measures of organizational effectiveness, overcoming resistance to change, effective communications, counseling, team building, and resolution of disciplinary and personnel matters.
Prerequisite: Permission of department.

03:692:202 ***Navigation (3)***
Theory, principles, procedures, and application of plotting, piloting, and electronic navigation, and an introduction to maneuvering boards. Piloting techniques, the use of charts, the use of visual and electronic aids, and the theory of operation of both magnetic and gyrocompasses. Other topics include tides, currents, effects of wind/weather, voyage planning, and the international/inland rules of navigation.
Prerequisite: Permission of department.

03:692:203,204 ***Naval Science Laboratory (0,0)***
Instruction and practical application in leadership and associated military skills. Topics may include drill and ceremonies, physical fitness and swimming testing, cruise preparation, cruise evaluation, safety awareness, preparation for commissioning, personal finances, insurance, and applied exercises in naval ship systems, navigation, naval operations, naval administration, and military justice.
Graded pass/no credit. Prerequisite: Permission of department.

03:692:211 ***The Evolution of Warfare (3)***
Traces the development of warfare to the present day. Causes of continuity and change in the means and methods of warfare. Influence of political, economic, and societal factors on the conduct of war, with significant attention on the role of technological innovation in changing the battlefield.
Prerequisite: Permission of department.

03:692:212 ***Fundamentals of Maneuver Warfare (3)***
Political, strategic, operational, and tactical/technical aspects of amphibious warfare, and the evolution of the U.S. Marine Corps. Structure and capabilities of the present day U.S. Marine Corps as a forward deployed and rapid deployment force and development of Expeditionary Maneuver Warfare concepts.
Prerequisite: Permission of department.

03:692:301 ***Naval Ship Systems I: Engineering (3)***
Principles of design and operation of ships. Description and analysis of major types of propulsion plants, both conventional and nuclear. Principles of thermodynamic cycles, electrical theory, power generation and distribution, auxiliary machinery systems. Ship construction, strength, and stability in intact and damaged conditions. Factors and design criteria for seaworthiness, structural integrity, and operational employment.
Course may be repeated for credit with consent of department. Prerequisite: Permission of department.

03:692:302 ***Naval Ship Systems II: Weapons (3)***
Introduction to the physical theory of acoustic and electromagnetic wave generation and propagation; the design and use of electronic, electromechanical, and pneumatic systems; and the combination of these systems to perform detection and analysis of objects sharing and traversing common environments.
Prerequisite: Permission of department.

03:692:303,304 ***Naval Science Laboratory (0,0)***
Instruction and practical application in leadership and associated military skills. Topics may include drill and ceremonies, physical fitness and swimming testing, cruise preparation, cruise evaluation, safety awareness, preparation for commissioning, personal finances, insurance, and applied exercises in naval ship systems, navigation, naval operations, naval administration, and military justice.
Graded pass/no credit. Prerequisite: Permission of department.

03:692:401 ***Naval Operations and Seamanship (3)***
Introduction to ship operations at sea. Principles of navigation including the rules of the road for prevention of collisions at sea, vector analysis of relative motion, ship behavior and characteristics in maneuvering, precise ship positioning, use of aids to navigation, meteorology, and electronic navigation.
Prerequisite: Permission of department.

03:692:403,404 ***Naval Science Laboratory (0,0)***
Instruction and practical application in leadership and associated military skills. Topics may include drill and ceremonies, physical fitness and swimming testing, cruise preparation, cruise evaluation, safety awareness, preparation for commissioning, personal finances, insurance, and applied exercises in naval ship systems, navigation, naval operations, naval administration, and military justice.
Graded pass/no credit. Prerequisite: Permission of department.

03:692:490 ***Leadership and Ethics (3)***
Capstone. Prepares for leadership in the naval service of the 21st century through integration of Western moral traditions and ethical philosophy with topics such as military leadership, core values, and professional ethics; the Uniform Code of Military Justice and Navy regulations; and the roles of enlisted members, junior and senior officers, command relationships, and the conduct of warfare.
Prerequisite: Permission of department.

Military Science Minor (Military Science 691N, Naval Science 692N, Aerospace Science 693N, Non-Commissioning 695N) (SAS)

MILITARY SCIENCE MINOR (MILITARY SCIENCE 691N, NAVAL SCIENCE 692N, AEROSPACE SCIENCE 693N, NON-COMMISSIONING 695N)

Program: Military Science Minor (17-25 credits)

Adviser: SAS Adviser and/or Department of Aerospace Science, Military Science, and Naval Science

Departments:
School of Arts and Sciences, Office of Advising and Academic Services
Departments of Aerospace Science, Military Science, and Naval Science

Military Science Minor (Military Science 691N, Naval Science 692N, Aerospace Science 693N, Non-Commissioning 695N) (SAS)

Minor Description

Minor Description

American military forces have played an important role in our domestic and international history and will continue to have significant involvement in policy arenas relating to national security and international relations.

The interdisciplinary military science minor, administered by the Departments of Aerospace Science, Military Science, and Naval Science is available in four tracks:

- Tracks AS, MS, and NS are the methods through which students become contracted cadets or midshipmen, committed to participating in any of the three Reserve Officer Training Corps (ROTC) programs (Air Force, Army, Navy) with the intent to commission as an officer into the Armed Forces after graduation.
- Track NC is open to all students providing them with a broad perspective on the military with analysis of national security affairs and all service branches of the Armed Forces from a historical and social scientific perspective.

Students who plan to complete the requirements for the minor should consult an undergraduate adviser in the School of Arts and Sciences or any of the professors for the Air Force, Army, Navy, or ROTC programs.

Military Science Minor (Military Science 691N, Naval Science 692N, Aerospace Science 693N, Non-Commissioning 695N) (SAS)

Learning Goals

Learning Goals

Upon completion of the military science minor students will be able to:

- Provide a broad perspective on the military and branches of service: Air Force, Army, and/or Navy;
- Demonstrate and apply an understanding of individual and group dynamics and formal and informal leadership;
- Demonstrate and apply an understanding of governmental applications of power; and
- Demonstrate preparation for commissioning (AS, MS, and NS tracks only).

Military Science Minor (Military Science 691N, Naval Science 692N, Aerospace Science 693N, Non-Commissioning 695N) (SAS)

Aerospace Science Track

Aerospace Science Track

Aerospace Science Track (19 credits)

03:690:121 and 03:690:122 Heritage and Values (1,1)
03:690:221 and 03:690:222 Team and Leadership Fundamentals (1,1)
03:690:323 and 03:690:324 Leading People and Effective Communication (3,3)
03:690:423 and 03:690:424 National Security Leadership Responsibilities and Commissioning Preparation (3,3)
03:690:171 MIL LEADERSHIP LAB (0)
03:690:271 MIL LEADERSHIP LAB (0)
03:690:371 MIL LEADERSHIP LAB (0)
03:690:471 MIL LEADERSHIP LAB (0)

One course from the following:

01:512:240 World War I (3)
01:512:242 World War II (3)
01:512:301 The American Revolution (3)
01:512:303 American Civil War and Reconstruction (3)
01:512:305 U.S. History, 1914-1945 (WWI-WWII) (3)
01:512:306 U.S. History, 1945 to the Present (3)
01:512:347 War, Peace, and the Military of the United States to 1877 (3)
01:512:348 War, Peace, and the Military of the United States since 1877 (3)
01:512:352 American Foreign Policy since 1898 (3)
01:512:354 History of the Cold War (3)
01:790:319 American Foreign Policy (3)
01:790:323 Defense Policy (3)
01:790:324 The Causes of War (3)
01:988:270 War: Critical Perspectives (3)

Non-Commissioning Track - Army Option (21 credits)

Non-Commissioning Track - Army Option (21 credits)

Non-Commissioning Track - Army Option (21 credits)

The requirements to complete the non-commission track requirements include the following: basic course components, one course in American military history, and four leadership courses. To apply for the non-commission track minor, notify your academic adviser or the department professor of military science.

Basic Course:

03:691:101 Foundations of Officership and Basic Leadership (1.5)
03:691:102 Foundations of Officership and Basic Leadership (1.5)

03:691:201 Individual Leadership Studies (1.5)
03:691:202 Individual Leadership Studies (1.5)

One course of American military history: For course descriptions offered by other departments, please refer to the individual department websites.

01:512:240 World War I (3)
01:512:242 World War II (3)
01:512:301 The American Revolution (3)
01:512:303 American Civil War and Reconstruction (3)
01:512:305 U.S. History, 1914-1945 (WWI-WWII) (3)
01:512:306 U.S. History, 1945 to the Present (3)
01:512:347 War, Peace, and the Military of the United States to 1877 (3)
01:512:348 War, Peace, and the Military of the United States since 1877 (3)
01:512:352 American Foreign Policy since 1898 (3)
01:512:354 History of the Cold War (3)
01:790:319 American Foreign Policy (3)
01:790:324 The Causes of War (3)
01:790:323 Defense Policy (3)
01:988:270 War: Critical Perspectives (3)

Four courses from the following, with at least TWO at the 300 level: (may not use the same course to meet this requirement and the previous requirement). For course descriptions offered by other departments, please refer to the individual department websites.

01:713:202 Introduction to Organizational Leadership (3)
01:713:308 Leadership in a Diverse Workplace (3)
01:508:300 The Arab-Israeli Conflict (3)
01:508:306 War and Revolution in Iran and Iraq (3)
01:512:240 World War I (3)

01:512:242 World War II (3)
01:512:301 The American Revolution (3)
01:512:303 American Civil War and Reconstruction (3)
01:512:305 U.S. History, 1914-1945 (WWI-WWII) (3)
01:512:306 U.S. History, 1945 to the Present (3)
01:512:347 War, Peace, and the Military of the United States to 1877 (3)
01:512:348 War, Peace, and the Military of the United States since 1877 (3)
01:512:352 American Foreign Policy since 1898 (3)
01:512:354 American, Russia, and the Cold War (3)
01:730:330 The Ethics of War and Conflict (3)
01:790:319 American Foreign Policy (3)
01:790:323 Defense Policy (3)
01:790:324 The Causes of War (3)
01:790:363 Conflict Resolution in World Politics (3)
01:830:373 Organizational and Personnel Psychology (3) (Prereq: 01:830:101)
01:920:273 OR 01:988:270 War: Critical Perspectives (3)
04:192:101 Introduction to Communication (3)

Music (MGSA)

MUSIC

Department of Music, Mason Gross School of the Arts

The Department of Music is a member of the National Association of Schools of Music.

See the Mason Gross School of the Arts section for faculty listing, descriptions of all Music (700) courses, Applied Music 701 courses, and bachelor of music (B.M.) program information.

B.A. Music Major

B.A. Music Major

To declare the major in music, students must have completed level II of both Music Theory and Aural Skills with a grade of C+ or better in the following courses:

- Music Theory II (07:700:122) and
- Aural Skills II (07:700:124) or Advanced Aural Skills II (07:700:154)

Music majors in the bachelor of arts (B.A.) program are required to complete at least 41 credits, distributed as follows:

- 13 credits of music theory: 07:700:121,122, 127, 221, 222
- 8 credits of aural skills: 07:700:123 or 153, 124 or 154, 223 or 253, 224 or 254*
- 12 credits of music history: 07:700:301-302, 303, and either 419 or 420
- four semesters of performance study (4 credits)
- four semesters of large ensemble (4 credits)

*Students are placed in aural skills or advanced aural skills by the appropriate faculty.

In order to graduate with a major in music, students must pass a piano proficiency examination. Students must achieve a minimum grade-point average of 2.5 in courses required for the major. At least 15 of the 41 credits required for the major must be taken at Rutgers.

Music (MGSA)

B.A. Music Minor

B.A. Music Minor

The music minor consists of a minimum of 18 credits, distributed as follows: (1) at least 6 credits in music theory (07:700:103), which is also offered online as 07:700:133 and 07:700:104; (2) at least 6 credits in music history; and (3) 6 elective credits in music.

Students may **not** earn credit for both 07:700:103 and 07:700:133.

The courses most commonly used for music history are: Introduction to Music (07:700:101), which is also offered online as 07:700:131, and Introduction to Music History (07:700:102). The music history requirement may also be satisfied by the following courses: Studies in Music History (07:700:211, 212), which is also offered online as 07:700:231, 232; Studies in Major Composers (07:700:237, 238); Jazz Appreciation (07:700:291), which is offered online as From Jazz to Hip-Hop: African-American Music in the 21st Century (07:700:234); Music of the Worlds (07:700:292), which is offered online as Studies of World Music (07:700:241); and Special Topics in Music (07:700:295, 296).

Students may **not** earn credit for both 07:700:101 and 07:700:131.

Students may **not** earn credit for both 07:700:291 and 07:700:234.

Students may **not** earn credit for both 07:700:292 and 07:700:241.

The electives may be satisfied by further courses in music theory or music history, by ensemble participation, and by some approved music-related courses from other departments. At least 6 of the 18 credits required for the minor must be taken at Rutgers. Exceptions to the prescribed distribution of requirements must be approved by the Mason Gross School of the Arts Department of Music coordinator of undergraduate studies.

Music (MGSA)

B.A. Music Technology Minor

B.A. Music Technology Minor

Music (MGSA)

Departmental Honors Program

Departmental Honors Program

The Department of Music offers an honors program to qualified students majoring in music. Before the end of the junior year, interested students who meet departmental requirements for honors candidacy should apply in writing to the coordinator of undergraduate studies for admission to the honors program. To complete the program successfully, the candidate must submit an honors paper prepared under the supervision of a member of the faculty (07:700:495 Senior Honors Tutorial) and maintain a cumulative grade-point average of 3.0 or better and a grade-point average of 3.5 or better in the major.

Music (MGSA)

Courses for Nonmajors

Courses for Nonmajors

The department offers a variety of courses for the nonmajor. In general, 07:700:101 and/or 103 provide the prerequisites for most other nonmajor courses in music. Several nonmajor courses are offered online (700:131, 133, 135, 230, 231, 232, 233, 234, 235, 239, 241, 242, 243). Some ensembles and other performance courses are also open to nonmajors. See the listing under Applied Music 701 in the Mason Gross School of the Arts section.

Life Sciences (SAS)

LIFE SCIENCES

Division of Life Sciences, School of Arts and Sciences

Website: http://lifesci.rutgers.edu

Dean: Lori R. Covey

Director, Office of Undergraduate Instruction: Martha Haviland

Chair, Department of Cell Biology and Neuroscience: Megerditch Kiledjian

Chair, Department of Genetics: Tara C. Matise

Chair, Department of Kinesiology and Health: Brandon Alderman

Chair, Department of Molecular Biology and Biochemistry: Barth Grant

The following majors are available in the Division of Life Sciences:

Biological Sciences 119
Cell Biology and Neuroscience 146
Exercise Science 377
Genetics 447
Molecular Biology and Biochemistry 694
Sport Management 955

Students interested in the life sciences also may consider related tracks within major programs offered by the Department of Chemistry and Chemical Biology (chemical biology option) and the Department of Psychology (specialization in behavioral neuroscience).

The Division of Life Sciences coordinates, fosters, and integrates the instructional and research activities of a broad range of faculty with interests in the biological sciences. The principal units of the division include four departments: Cell Biology and Neuroscience, Genetics, Kinesiology and Health, and Molecular Biology and Biochemistry, as well as two sections, the biological chemistry section of the Department of Chemistry and Chemical Biology, and the biopsychology and behavioral neuroscience section of the Department of Psychology. The division's primary goal is to provide a high caliber of interdisciplinary teaching and research in the life sciences as it trains the next generation of teachers, researchers, and future health professionals.

Instruction in the life sciences has undergone enormous changes over the past 15 to 20 years. These changes reflect the intellectual revolution of the last two decades, as well as technical advances that have expanded greatly the tools available to life scientists. Today, students majoring in the life sciences at Rutgers University-New Brunswick experience an exciting atmosphere of learning that exposes them to the concepts and methods of these intellectual and technological advances. The students have open to them a plethora of learning avenues, ranging from thought-provoking lecture presentations to original and cutting-edge research opportunities in state-of-the-art laboratories. A first-class faculty and modern laboratory equipment reflect the division's commitment to provide its students with the best learning environment.

The division offers a wide spectrum of majors for students interested in the life sciences. These options range from a division-based major in biological sciences, designed to provide a general life sciences education, to department-based majors in cell biology and neuroscience, exercise science, genetics, molecular biology and biochemistry, and sport management aimed at providing specialized training, with a strong emphasis on research. Graduates of the division will be highly competitive for a range of postbaccalaureate opportunities, including graduate education and research, health-professions training, and biomedical and biotechnological research positions, as well as teaching careers in the sciences.

The first two years of the student's tenure at Rutgers is expected to revolve around the life sciences core curriculum, a series of basic offerings designed to provide the general background required for pursuing upper-division courses in any of the individual majors. Regardless of the major chosen, students are encouraged to participate in independent study within a research laboratory in order to take advantage of the rich expertise of the many life sciences faculty in New Brunswick and Piscataway. The exercise science and the sport management

majors require an internship experience. The division also has a highly developed advising system, with dedicated and knowledgeable faculty advisers available to work with individual students in their selection of courses, completion of major requirements, and preparation for future careers.

Students may not major in more than one of the following majors in the Division of Life Sciences: Biological Sciences (119), Cell Biology and Neuroscience (146), Exercise Science (377), Genetics (447), Molecular Biology and Biochemistry (694), or Sport Management (955). Furthermore, students majoring in one of these four majors may not minor in Biological Sciences (119). Life science majors or minors may not be combined as double majors or as major/minors with Biomathematics (122), Biochemistry (115), or Microbiology (680).

No more than 16 credits from among the life science courses required for completion of any Division of Life Sciences major may be fulfilled by credits transferred from any school outside of Rutgers-New Brunswick.

For additional information and announcements about the Division of Life Sciences, please visit the division's website.

Life Sciences (SAS)

Life Sciences Core Curriculum

Life Sciences Core Curriculum

The life sciences core curriculum is a set of courses that include a series of introductory- and intermediate-level courses in the physical and life sciences forming a foundation of knowledge necessary to understand modern biology and to prepare for the more advanced courses required for each major. Following are core courses:

1. 01:119:115-116 General Biology (4,4)

2. 01:119:117 Biological Research Laboratory (2)

3. 01:160:161-162 General Chemistry (4,4) or 01:160:163-164 Honors General Chemistry (4,4) or 01:160:165-166 Extended General Chemistry (4,4)

4. 01:160:171 Introduction to Experimentation (1)

5. 01:160:307-308 Organic Chemistry (4,4) or 01:160:315-316 Honors Organic Chemistry (4,4)

6. 01:160:311 Organic Chemistry Laboratory (2)

7. 01:750:203-204 General Physics (3,3) or 01:750:271-272 Honors Physics (3,3)*

8. 01:750:205-206 General Physics Laboratory (1,1)*

9. 01:640:135,136 Calculus for the Life and Social Sciences (4,4) or 01:640:151-152 Calculus for Mathematical and Physical Sciences (4,4)**

10. 01:447:380 Genetics (4)***.

*01:750:193-194 (4,4) or 01:750:201-202 (5,5) may be substituted for 01:750:203-204 (3,3) plus 01:750:205-206 (1,1).

**Basic Statistics for Research (01:960:401, 3 credits), Basic Probability and Statistics (01:960:379, 3 credits), or Statistics I and II (01:960:211 and 212) may be substituted for the second semester of Calculus.

***Students majoring in genetics must take 01:447:384-385 (4,4) instead of 01:447:380

Learning Goals

Learning Goals

Our overarching goal for educating our students majoring in biological sciences is to inspire them to want to discover and understand the natural world. In the process of achieving this goal, we expect our students to acquire not only facts and concepts, but also skills and perspectives. We hope that our learning goals will both prepare our students for a variety of career objectives and supply them with the tools to become lifelong learners in the ever-evolving world of biological sciences.

Learning Goals:

I. To acquire the appropriate factual and conceptual knowledge that provides students with a foundation to further their education and career in the areas of life science or health science. Students will be able to demonstrate basic knowledge (e.g., identify, define, explain, etc.) of the concepts, practices, and principles that comprise the biological sciences.

II. To develop data analysis and statistical reasoning skills that prepare students for a society increasingly reliant on the use of data and information. Students will be able to interpret/evaluate patterns in data presented in tables, figures, and graphs, as well as be able to organize, summarize, and present data.

III. To develop the ability to use scientific reasoning as embodied by the structured process commonly known as the scientific method to empower students with the ability to generate and refine knowledge. Students will be able to evaluate and apply the practice of science.

IV. To develop critical thinking and problem-solving skills necessary to prepare students to evaluate, synthesize, and generate knowledge that provides them with a competitive advantage to adapt to an evolving, global, and knowledge-based society. Students will be able to demonstrate application of higher-order thinking (e.g., classify, diagnose, evaluate, synthesize, hypothesize, etc.). Students will develop an understanding of not only the connections within biology, but also the connections between biology and other scientific disciplines.

Life Sciences (SAS)

Entry Requirements of the Major

Entry Requirements of the Major

Students wishing to major in biological sciences must have completed two semesters of General Biology and Biological Research Laboratory with a grade of C or better in each course. Both semesters of General Biology must have been completed at the same institution or on the same campus at Rutgers. No more than two courses with a grade of D may be used to fulfill the requirements of the major. A 2.0 grade-point average must be maintained in the life sciences core and elective courses applied toward the major. Students must meet with an adviser before they can successfully declare their major.

Life Sciences (SAS)

Major Requirements

Major Requirements

The program in biological sciences, administered through the Division of Life Sciences Office of Undergraduate Instruction, is intended to provide a broad and comprehensive training in modern biology. This course of study is recommended for those who wish to study biology as part of their liberal arts education, preparing them for a career in one of the health professions, graduate studies in biology, a teaching career in secondary schools (courses in education also are required), as well as employment in various areas of the life sciences. If a student wishes to concentrate his or her studies in a specific area of biology, he or she should consider a major offered by one of the departments in the Division of Life Sciences or in the School of Environmental and Biological Sciences. Faculty advisers are available to assist each student with course selection and program requirements.

A minimum of 20 credits of coursework from among general biology, genetics, and life sciences electives must be completed in residence. In other words, no more than 16 credits in this part of the major requirements may be transferred from any institution outside of Rutgers University-New Brunswick. This rule is intended to assure that students receiving degrees from Rutgers-New Brunswick have taken a minimum number of courses in their major with this faculty. Please keep in mind that although a course may transfer from another institution into one of the Rutgers-New Brunswick schools, it will not necessarily be accepted toward the major in biological sciences. Therefore, all transfer courses must be evaluated and accepted by the advising office of the Office of Undergraduate Instruction in order to count toward the major. As indicated earlier, students must complete both semesters of general biology at the same institution or on the same campus of Rutgers before becoming eligible to declare the biological sciences major. Any life sciences courses applied to the major in biological sciences should be taken within 10 years of graduating. Returning students must meet with their adviser to discuss their path to

graduation. Credits for cooperative education and Winter Session courses (exceeding 1 credit) may not be used to satisfy requirements for the major in biological sciences. To be applied to the major, Summer Session courses must be offered over a minimum of five weeks. Online courses will be reviewed on a case-by-case basis to confirm that they meet departmental learning goals before they may be used to satisfy the requirements for the major.

The course requirements for the biological sciences major are divided into two sections: the life sciences core courses and the life sciences electives.

Required Life Sciences Core Courses (47 credits)
01:119:115-116 General Biology I,II (4,4)
01:119:117 Biological Research Laboratory (2)
01:160:161-162 General Chemistry (4,4) or 01:160:163-164 Honors General Chemistry (4,4) or 01:160:165-166 Extended General Chemistry (4,4)
01:160:171 Introduction to Experimentation (1)
01:160:307-308 Organic Chemistry (4,4) or 01:160:315-316 Honors Organic Chemistry (4,4)*
01:160:311 Organic Chemistry Laboratory (2)
01:750:203-204 General Physics (3,3) or 01:750:271-272 Honors Physics***
01:750:205-206 General Physics Laboratory (1,1)***
01:640:135,~~138~~136 Calculus for the Life and Social Sciences (4,4)** or 01:640:151-152 Calculus for Mathematical and Physical Sciences (4,4)
01:447:380 Genetics (4)
* With approval from a Biological Sciences Advisor, 01:160:308/316 may be replaced by another elective course. Please meet with an Advisor to discuss.

**01:750:193-194 (4,4) or 01:750:201-202 (5,5) may be substituted for 01:750:203-204 (3,3) plus 01:750:205-206 (1,1).
***Calculus II 01:640:13~~8~~6(4) may be substituted by 01:960:379 Basic Probability and Statistics (3), 01:960:401 Basic Statistics for Research (3), or 01:960:211-212 Statistics I,II (3,3).

Life Sciences Electives (24 credits)

It is highly recommended that students meet with a life sciences adviser in the Division of Life Sciences Office of Undergraduate Instruction when planning their elective courses. It is important that the courses taken complement each other as much as possible and are not merely a collection of unrelated topics.

The electives must include at least three laboratory courses, only one of which may be satisfied by research work. Biological Research Laboratory and "library research" do not qualify for this requirement. A minimum of six courses (18 credits) must be at the 300 or 400 level, including at least three separate laboratory courses or three courses with a laboratory component. The laboratory associated with genetics (01:447:382 or equivalent), if taken, may be used to satisfy one of the three laboratory requirements.

No course at the 100 level may be used to satisfy the life sciences elective requirements. A maximum of 6 credits of independent study/research/honors research may be used toward the 24 elective credits. Please keep in mind that a minimum grade-point average of 2.8 is required to enroll in an independent study/research course in biological sciences. Research courses can satisfy only one of the three laboratory requirements, regardless of number of

credits. Courses taken on a pass/fail basis may not be used to satisfy requirements for the major in biological sciences. A grade-point average of 2.0 or better in courses credited toward the major is required. No more than two courses with a grade of D may be used to fulfill the requirements of the major.

The elective courses must include at least one course (3 or 4 credits) each from the Departments of Cell Biology and Neuroscience 146, Genetics 447, Molecular Biology and Biochemistry 694, and Ecology, Evolution, and Natural Resources 11:216 at the School of Environmental and Biological Sciences. A list of approved courses in subject areas in addition to those in the Division of Life Sciences (Biological Sciences 119, Cell Biology and Neuroscience 146, Genetics 447, and Molecular Biology and Biochemistry 694) will be published by the advising office of the Office of Undergraduate Instruction. It is strongly recommended that students consult this list, which is available on the website, prior to registering for their courses. Generally, acceptable courses from other departments on any campus of Rutgers University have a year of general biology as a prerequisite; however, there are exceptions. It is imperative for students to consult the published list and meet with an adviser. Credits from cooperative education and Winter Session courses (exceeding 1 credit) may not be used to satisfy requirements for the major in biological sciences. To be applied to the major, Summer Session courses must be offered over a minimum of five weeksIf double majoring with another permitted life sciences major, at least four of the 3-4 credit life science courses applied to the Biology major may not overlap with courses used to fulfill second major requirements. Given that biological sciences is a dynamic and developing field, it is critical that coursework applied to the major must be current. Thus, any life sciences courses applied to the major in biological sciences should be taken within 10 years of graduating. Returning students must meet with their adviser to discuss their path to graduation.

Life Sciences (SAS)

Minor Requirements

Minor Requirements

The minor requires four courses of at least 3 credits each in life sciences subjects as well as General Biology and Biological Research Laboratory. Both semesters of General Biology must be completed at the same institution or on the same campus at Rutgers. No other course at the 100 level may be used to satisfy the minor. A minimum of 11 credits must be taken at Rutgers University-New Brunswick. A maximum of 3 credits of research in a life sciences subject may be used toward the minor. A minimum of three courses at the 300 level or above is required. If majoring in a permitted life sciences major, no more than two of the four life science courses applied to the minor requirements may overlap with courses used to fulfill major requirements. Only life sciences courses acceptable for the biological sciences major may be used for the minor. Courses in chemistry, mathematics, or physics do not count toward the minor. A grade-point average of 2.0 or better in courses credited toward the minor is required. No more than one course with a grade of D may be used to fulfill the requirements of the minor.

Life Sciences (SAS)

Independent Study and Research in Biology

Independent Study and Research in Biology

A minimum cumulative grade-point average of 2.8 is required for a student to register for an independent study/research course in biological sciences. A maximum of 6 credits of laboratory-based independent study, research, or honors projects may be used to fulfill the elective credits requirement in biology. The independent study/research form, available from the advising office of the Office of Undergraduate Instruction, must be completed and signed by the professor in whose laboratory the student will study prior to initiating the research project. Approval of a research proposal by the director of advising and a special permission number from the Office of Undergraduate Instruction is necessary for registration. Students may not earn academic credit for laboratory projects for which they are being paid. Students wishing to apply research credits from other departments toward the major in biological sciences must get approval from the advising office of the Office of Undergraduate Instruction, Division of Life Sciences, prior to beginning their research project.

Life Sciences (SAS)

Departmental Honors Program

Departmental Honors Program

To qualify, a student must have a cumulative grade-point average of 3.0 or better and an average of 3.4 or better in life sciences core and elective courses credited toward the biological sciences major at the end of the junior year and previous research experience. At that time, the student should apply formally to the advising office of the Office of Undergraduate Instruction. Accepted students are expected to complete at least 6 credits over two semesters in an independent research project, resulting in a thesis, and to pass an oral examination before a faculty committee in the general field of the student's program of emphasis. If the research is done in a laboratory outside of the Division of Life Sciences, the examination committee must include at least one individual from the Division of Life Sciences faculty. Departmental Honors is completed in the fall and spring of senior year. Students accepted into special programs (e.g. BA/MD) may complete honors during junior year.

Honors students must register either for an honors course sequence in life sciences or for a course sequence in a school honors program. These decisions should be discussed with an adviser. An approval form (available in the advising office) must be completed.

Life Sciences (SAS)

Joint B.A./M.D. Program (Rutgers Undergraduate-Robert Wood Johnson Medical School)

Joint B.A./M.D. Program (Rutgers Undergraduate-Robert Wood Johnson Medical School)

Rutgers Undergraduate/Robert Wood Johnson Medical School Joint Bachelor of Arts/Medical Degree (B.A./M.D.) Program

This program is designed for high-achieving premedical students of Rutgers University who are in their sophomore year. Specially selected students will obtain bachelor's and medical degrees in a seven-year program of study taken at Rutgers undergraduate units and Robert Wood Johnson Medical School (RWJMS).

Application to this program is open to all undergraduate students enrolled at Rutgers University, New Brunswick. It is not directly associated with any one school within the university but see below for specific restrictions.

Admission is a two-stage and highly competitive process. In the first stage, undergraduate students are admitted into the program by an executive committee consisting of faculty from the appropriate units. Eligible applicants are sophomores at any of the undergraduate schools of Rutgers University who have spent at least a year here. Prospective applicants from Rutgers University-Newark and Rutgers University-Camden must transfer to one of the units in New Brunswick for their sophomore year and complete at least 30 credits here. All applicants must have completed 4 semesters of college with a minimum of 60 credits. Applicants with an Associate¿s Degree, regardless of whether it was earned as a dual degree in high school or as a traditional degree after high school, are ineligible to apply for the program. Admitted students will need to complete all of the core requirements of their undergraduate unit and major requirements with the exception of Biological Sciences and Cell Biology and Neuroscience majors, who may apply credit from the first professional year toward the major requirements. During the fourth year, students will be full time at the medical school and elective credits will count towards the undergraduate degree. The executive committee reviews applications and selects those students who are deemed most qualified for the program. The second stage occurs typically after the fourth year of study. It is the responsibility of the RWJMS Admissions Committee to review the credentials of students recommended by the Joint Program Executive Committee. Students who are deemed to have met the academic and nonacademic standards of the program will be recommended to the RWJMS Admissions Committee. The purpose of this second, noncompetitive review is to ascertain that the student has maintained adequate academic and nonacademic qualities appropriate for retention in the medical school. It is expected that students will have grades of A or B (Honors or High Pass) in courses taken at both universities. However, recommendation is not automatic. The final decision rests with the RWJMS Admissions Committee. Upon approval by this admissions committee, the student will be permitted to continue into the fifth year of study and will be matriculated formally as a candidate for the M.D. degree at RWJMS.

Applicants to the B.A./M.D. program must be in their fourth semester at Rutgers University. Applications are available in the Health Professions Office after spring break; they are due by the end of May. There is no rolling admissions policy. Decisions are expected to be made in July. By the end of the semester of application, applicants must have completed a minimum of 60 credits of which at least 30 credits must be at Rutgers, and they must have been in attendance at Rutgers, New Brunswick a minimum of one year. Additionally, applicants must have a minimum cumulative and science grade-point average of 3.5 by the end of the third semester and sustain it through

the end of the fourth. The applicant must have completed, or be in the process of completing by the end of the fourth semester, two semesters of biology with lab, two semesters of general chemistry with lab, two semesters of organic chemistry, one semester of college-level mathematics, and one semester of English. Applicants who have not taken General Biology I and II and lab at Rutgers University, either because they have been awarded advanced placement biology credits or because they have transferred equivalent courses from another institution, must have at least one year of upper-division biology courses at Rutgers-New Brunswick (i.e., two courses of at least 3 or more credits each at the 200 level or higher). Those students who are admitted to the program without having two semesters of physics, two semesters of English, and organic chemistry lab must complete these requirements by the end of the third year of study. Students who did not take the SAT or ACT but who are admitted to the program will be required to take the MCAT by April of the junior year and score competitively with a total score of at least 508 (minimum single sub score of 123). An application form has been developed that allows the student to provide the executive committee with information it deems useful for its deliberations.

The bachelor's degree will be awarded upon completion of the undergraduate college and major requirements, by the end of year four. Upon satisfactory completion of year seven and all RWJMS requirements, the student will receive the medical degree.

Students who wish to pursue a major other than biological sciences must discuss their plans with the appropriate department in order to establish the requirements they need to complete for their major. For a student at Rutgers-New Brunswick who has elected to major in biological sciences, 15 credits from RWJMS will be applied toward the major (as stipulated below). The baccalaureate degree will be awarded upon completion of the undergraduate college requirements and major requirements, usually by the end of year four. The number of credits, however, is not directly translated between the two universities; no more than 4 credits per laboratory course and 3 credits per non-laboratory course taken at RWJMS may be used toward the bachelor's degree at Rutgers.

A student enrolled in the program completing a major in biological sciences at Rutgers-New Brunswick is required to complete remaining Life Science Core Curriculum coursework and Intro to Biochemistry (01:694:301) and three approved life sciences electives (3- or 4-credit courses) at Rutgers-New Brunswick. Students who have not taken General Biology I and II at Rutgers, either because they have been awarded AP biology credit or because they have transferred equivalent courses from another institution, must complete an additional approved life sciences electives (3- or 4-credit courses) at Rutgers-New Brunswick.

Students in the program must meet with advisers at the medical school and at their undergraduate school when planning their elective courses. No more than one independent study/research course may be applied toward the biological sciences major for students in the B.A./M.D. program. Please be sure to meet with a biological sciences adviser when selecting life science elective courses because not all course combinations are allowed given overlap in subject matter taught at Rutgers' undergraduate units and RWJMS.

For further information on this program, you may contact the Division of Life Sciences, Health Professions Office, Nelson Biological Laboratories, 604 Allison Road, Piscataway, NJ 08854-8082, at 848-445-5667.

Life Sciences (SAS)

Joint B.A./M.D. Program (Rutgers Undergraduate-New Jersey Medical School)

Joint B.A./M.D. Program (Rutgers Undergraduate-New Jersey Medical School)

Rutgers Undergraduate/New Jersey Medical School Joint Bachelor of Arts/Medical Degree (B.A./M.D.) Program

The Rutgers Undergraduate/New Jersey Medical School joint program started in the fall of 2003. The purpose of the program is to permit students to begin their medical education after their third year or at least 96 degree credits at Rutgers. Specially selected students will obtain bachelor's and medical degrees in a seven-year program of study taken at Rutgers undergraduate units and New Jersey Medical School (NJMS).

This program is only open to students enrolled in Rutgers University-New Brunswick schools.

Admission is a two-phase and highly competitive process. In the first phase, undergraduate students are admitted into the program by the Joint Program Executive Committee consisting of faculty from the appropriate units. Eligible applicants are sophomores at any of the undergraduate schools at the New Brunswick location of Rutgers University who have been enrolled here for at least one year. The executive committee reviews applications and selects those students who are deemed most qualified for the program. The second phase occurs typically after the third year of study. It is the responsibility of the NJMS Admissions Committee to review the credentials of students recommended by the Joint Program Executive Committee. The purpose of this second review is to ascertain that the student has maintained adequate academic and nonacademic qualities appropriate for retention in the medical school. It is expected that students will have grades of A or B in courses taken at Rutgers. Students must complete the Medical College Admission Test (MCAT) by January of the junior year before matriculating at NJMS and be required to be in the competitive range of other accepted NJMS students. This second review is noncompetitive. Students who are deemed to have met the academic and nonacademic standards of the program will be recommended to the NJMS Admissions Committee. However, recommendation is not automatic. The final decision rests with the Medical School Admissions Committee. Upon approval by the Medical School Admissions Committee, the student will be permitted to continue into the next year of study and will be matriculated formally as a candidate for the M.D. degree at the New Jersey Medical School.

Applicants for the program must be in their fourth semester at Rutgers-New Brunswick. Applications are available in the Health Professions Office after spring break; they are due by the end of May. There is no rolling admissions policy. Decisions are expected to be made in July. By the end of the semester of application, applicants must have completed a minimum of 60 credits of which at least 30 credits must be at Rutgers, and they must have been in attendance at Rutgers a minimum of one year. Additionally, applicants must have a minimum cumulative and science grade-point average of 3.5 by the end of the third semester which must be maintained through the end of the fourth. The applicant must have completed, or be in the process of completing by the end of the fourth semester, two semesters of biology with lab, two semesters of general chemistry with lab, two semesters of organic chemistry, one semester of college-level mathematics, and one semester of English. Applicants who have not taken General Biology I and II and lab at Rutgers, either because they have been awarded advanced placement biology credits or because they have transferred equivalent courses from another institution, must have at least one year of upper-division biology courses at Rutgers (i.e., two courses of at least 3 or more credits each at the 200 level or higher). Those students who are admitted to the program without having two semesters of physics, organic chemistry lab, and two

semesters of English must complete these requirements by the end of the third year of study. An application form has been developed that allows the student to provide the committee with information the committee deems useful for its deliberations.

Students will be admitted at the end of the spring semester of year two and be formal members of the program beginning with year three. Prior to leaving the Rutgers undergraduate unit, students must satisfy all college and major requirements, except for the credits which they will receive from NJMS (please see next paragraph). For a student at Rutgers-New Brunswick who has elected to major in biological sciences, 15 credits from NJMS will be applied toward the major.

The baccalaureate degree will be awarded upon completion of the undergraduate college requirements and major requirements by the end of year four. Upon satisfactory completion of year seven or eight, as well as all New Jersey Medical School requirements, the student will receive the medical degree.

A student enrolled in the program completing a major in biological sciences at Rutgers-New Brunswick is required to complete remaining Life Science Core Curriculum coursework and three approved life sciences electives (3- or 4-credit courses) at Rutgers-New Brunswick. Students who have not taken General Biology I and II at Rutgers, either because they have been awarded AP biology credit or because they have transferred equivalent courses from another institution, must take Genetics 01:447:380, and four approved life sciences electives (3- or 4-credit courses) at Rutgers-New Brunswick. No more than one independent study/research course may be applied toward the biological sciences major for students in the B.A./M.D. program. Please be sure to meet with a biological sciences adviser when selecting life science elective courses because not all course combinations are allowed given overlap in subject matter taught at Rutgers and NJMS.

For further information on this program, you may contact the Division of Life Sciences, Health Professions Office, Nelson Biological Laboratories, 604 Allison Road, Piscataway, NJ 08854-8082, at 848-445-5667.

Life Sciences (SAS)

Joint B.A./D.M.D. Program (Rutgers School of Arts and Sciences-Rutgers School of Dental Medicine)

Joint B.A./D.M.D. Program (Rutgers School of Arts and Sciences-Rutgers School of Dental Medicine)

Rutgers School of Arts and Sciences/Rutgers School of Dental Medicine Joint Bachelor of Arts/Doctor of Medicine in Dentistry (B.A./D.M.D.) Program

Rutgers School of Arts and Sciences/Rutgers School of Dental Medicine joint program started in the spring of 2002. The purpose of the program is to permit students to begin their dental education after their third year or at least 98 credits at Rutgers. Specially selected students will obtain bachelor's and dental degrees in a seven-year program of study taken at Rutgers undergraduate units and Rutgers School of Dental Medicine.

This program is open to students enrolled at the School of Arts and Sciences, Rutgers University-New Brunswick. The program is administered by the Health Professions Office.

Admission is a two-phase and competitive process. In the first phase, undergraduate students are admitted into the program by the Executive Committee of the Joint Program consisting of faculty from the appropriate units. The executive committee reviews applications and selects those students who are deemed most qualified for the program. The second phase occurs typically after the third year of study. It is the responsibility of the Rutgers School of Dental Medicine Admissions Committee to review the credentials of students recommended by the articulated program executive committee. The purpose of this second review is to ascertain that the student has maintained adequate academic and nonacademic qualities appropriate for admission to the dental school. It is expected that students will have grades of A or B in courses taken at Rutgers University. Students must complete the Dental Admissions Test (DAT) and earn scores of 20 or better in Total Science, Academic Average, Organic Chemistry, General Chemistry, and Biology. Students may only take the DAT one time to qualify for this program. The second review is noncompetitive. Students who are deemed to have met the academic and nonacademic standards of the program will be recommended to the Rutgers School of Dental Medicine Admissions Committee. However, recommendation is not automatic. The final decision rests with the Dental School Admissions Committee. Upon approval by the Dental School Admissions Committee, the student will be permitted to continue into the next year of study and will be matriculated formally as a candidate for the Doctor of Medicine in Dentistry (D.M.D.) degree at the Rutgers School of Dental Medicine.

Applicants to the program must be in their fourth semester at the School of Arts and Sciences, Rutgers-New Brunswick. Applications are available in the Health Professions Office after spring break; they are due by the end of May. There is no rolling admissions policy. Decisions are expected to be made in July. By the end of the semester of application, applicants must have completed a minimum of 60 credits of which at least 30 credits must be at Rutgers, and they must have been in attendance at the School of Arts and Sciences, Rutgers-New Brunswick a minimum of one year. Additionally, applicants must have a minimum cumulative and science grade-point average of 3.5 by the end of the third semester, which must be maintained through the end of the fourth. The applicant must have completed, or be in the process of completing by the end of the fourth semester, two semesters of biology with lab, two semesters of general chemistry with lab, two semesters of organic chemistry, two semesters of college-level mathematics (Calc I and either Calc II or an approved Statistics course) and one semester of English. Applicants who have not taken General Biology I and II and lab at Rutgers, either because they have been awarded advanced placement biology credits or because they have transferred equivalent courses from another institution, must have at least one year of upper-division biology courses at Rutgers (i.e., two courses of at least 3 or more credits each at the 200 level or higher). If AP credit was granted for general chemistry, then organic chemistry I and II and laboratory and a course in biochemistry at Rutgers are required. If AP credit was granted for English, upper level English at Rutgers is required with the same amount of credit work. If AP credit was granted for physics, two approved courses from Physics or Kinesiology & Health at Rutgers are required. Those students who are admitted to the program without having two semesters of physics, biochemistry, organic chemistry lab, and two semesters of English, must complete these requirements by the end of the third year of study.

The B.A./D.M.D. program is a seven-year program with year one being the first undergraduate year. Students will be admitted at the end of the spring semester of year two and be formal members of the articulated program beginning with year three. Prior to leaving the School of Arts and Sciences, Rutgers-New Brunswick, students must satisfy all college and major requirements, except for the credits which they will receive from Rutgers School of Dental Medicine (please see below). For a student at the School of Arts and Sciences, Rutgers-New Brunswick who has elected to major in biological sciences, 15 credits from Rutgers School of Dental Medicine will be applied toward the major.

The baccalaureate degree will be awarded upon completion of the general education and major requirements by end of year four. Upon satisfactory completion of year seven or eight, as well as all Rutgers School of Dental Medicine requirements, the student will receive the dental degree.

A student enrolled in the joint program completing a major in biological sciences at Rutgers-New Brunswick is required to complete any remaining Life Sciences Core Curriculum coursework and three approved life sciences electives (3- or 4-credit courses) at Rutgers-New Brunswick. Students who have not taken General Biology I and II at Rutgers-New Brunswick, either because they have been awarded AP biology credit or because they have transferred equivalent courses from another institution, must take Genetics 01:447:380, and four approved life sciences electives (3- or 4-credit courses) at Rutgers-New Brunswick. No more than one independent study/ research course may be applied toward the biological sciences major for students in the B.A./D.M.D. program. Please be sure to meet with a biological sciences adviser when selecting life science elective courses because not all course combinations are allowed given overlap in subject matter taught at Rutgers-New Brunswick and Rutgers School of Dental Medicine.

For further information on this program, you may contact the Division of Life Sciences, Health Professions Office, Nelson Biological Laboratories, 604 Allison Road, Piscataway, NJ 08854-8082, at 848-445-5667.

Life Sciences (SAS)

Joint B.A./M.S. Physician Assistant Program (Rutgers School of Arts and Sciences-School of Health Professions)

Joint B.A./M.S. Physician Assistant Program (Rutgers School of Arts and Sciences-School of Health Professions)

Rutgers School of Arts and Sciences/Rutgers School of Health Professions Joint Bachelor of Arts/Master of Science Degree (B.A./M.S.) Physician Assistant Program

This is a six-year (3+3) program offered jointly by the School of Arts and Sciences and the School of Health Professions (SHP). The program can be looked at as a two-phase program, an undergraduate phase followed by a professional phase. This program is open to students enrolled at the School of Arts and Sciences, Rutgers University-New Brunswick, who are U.S. citizens, permanent residents of the United States, or international individuals currently on a student visa. At a minimum, applicants must be enrolled for one year at Rutgers-New Brunswick earning at least 30 credits.

The first phase of the program includes three years of undergraduate liberal arts and basic science education. Students may apply to the second (professional) phase in April of their second year by applying to the Physician Assistant (PA) program. Personal interviews will be required of those applicants being considered for admission. The interview will serve to determine the applicant's emotional and intellectual maturity, ability to communicate, and the potential to achieve career satisfaction within the physician assistant role. Applicants must have a cumulative and science GPA of 3.2. In cases where individuals may show high potential by improved performance, exceptions to this requirement may be considered. Please note that acceptance by Rutgers University does not guarantee acceptance by the PA program.

Applicants to the program must have completed the following courses with a grade of C or better: at least one semester (3 credits) of English composition, applied statistics or biostatistics (from Psychology, Biology, or Math departments), General Biology I and II with lab (119:115, 116, and 117, or equivalents); General Chemistry I and II with lab (160:161,162 and 171, or equivalents); and General Psychology (830:101, or equivalent). If the student has been granted AP credit by Rutgers for science courses, additional science courses will be required.

All applications must be received by June 1 and final notices of acceptance will be made by August 1. If the applicant is accepted into the program, it will be contingent on maintaining a 3.2 GPA through the end of the third undergraduate year at Rutgers-New Brunswick, and on all requirements for the undergraduate degree being met before the beginning of the fourth year. Students who are accepted into the second phase of the program will begin this phase at the beginning of their senior year. At the end of the senior year, these students will receive a bachelor of arts degree conferred by the School of Arts and Sciences, Rutgers University-New Brunswick. After completion of the remaining two years of the PA program, graduates will receive a master of science degree awarded by Rutgers School of Health Professions.

Before entering the second (professional) phase, a student accepted by this program must also complete for the PA program, Functional Human Anatomy (01:377:223), General Microbiology (01:447:390), Intro to Biochemistry (01:694:301) and Systems Physiology (01:146:356) (waived if Gen Bio II is completed at Rutgers-NB and not AP credit), and 6-8 additional credits of life science electives. Students majoring in biological sciences are required to have completed, in addition to the School of Arts and Sciences core distribution requirements, the Life Sciences Core requirements, Intro to Biochemistry (01:694:301) and General Microbiology (01:447:390) and one (three credit or more) course from the 216 subject area approved electives. Students with AP or transfer credit of General Biology I and II and lab must take an additional life science elective course for 3 or more credits. A maximum of 14 credits from SHP courses will be accepted toward the biological sciences major. Please be sure to meet with a biological sciences adviser when selecting life sciences elective courses because not all course combinations are allowed given overlap in subject matter taught at Rutgers and SHP.

For a complete description of the requirements for the major in biological sciences, please read the appropriate section under the Division of Life Sciences in this catalog.

For more information about this program, you may contact the PA program office at the School of Health Professions, 675 Hoes Lane, Piscataway, NJ 08854, at 732-235-4444; or the Division of Life Sciences, Health Professions Office at Rutgers University, Nelson Biological Laboratories, 604 Allison Road, Piscataway, NJ 08854-8082, at 848-445-5667.

Life Sciences (SAS)

Courses

Courses

With the exception of 01:119:115,116, and 117 General Biology I and II and Biological Research Laboratory, courses numbered at the 100 level may not be used for major credit in any of the majors within the Division of Life Sciences.

01:119:098 *Foundations for Biological Science (E2)*
Selected topics in general biology: introduction to cellular organization, metabolism, genetics, reproduction, and organ systems. Development of analytical reasoning and science-oriented study techniques.
Preparation for college-level general biology.

01:119:103 *Principles of Biology (4)*
Selected topics in general biology, including cell structure, genetics, plant and animal diversity, basic plant and animal biology, ecology, and evolution.
Lec. 3 hrs., lab. 3 hrs. Designed for students who must take a one-semester laboratory course in introductory biology to meet major requirements. Credit not given for this course if student has already completed 01:119:115. Not for life sciences major credit.

01:119:109,110 *Biology Practice Group (1,1)*
Students will work actively to (1) organize the lecture content, (2) identify what they are expected to do with that content (outcomes), (3) prepare and explain study aids (organizers) to ensure that they correctly understand the week¿s content, and (4) begin the self-evaluation process to gauge exam preparedness. Discussion of the basic methods and principles.
Corequisite for 109 is 01:119:115; corequisite for 110 is 01:119:116.

01:119:111,112 *Reading in General Biology (1,1)*
Discussion and reading providing extensive and advanced coverage of selected topics.
Corequisite for 111 is 01:119:115; corequisite for 112 is 01:119:116.

01:119:115 *General Biology I (4)*
Broad principles of cell biology, genetics, and evolution; the diversity of life and its physiology, ecology, and population dynamics. Lec. 3 hrs., Wkshp. 80 min.
Prerequisite has two parts: writing (prerequisite of 01:355:101, 01:355:103, or 01:355:104, or placement into 355:101 or 355:104) and math (prerequisite of 01:640:026 or placement into 640:CMA, 640:PCA, 640:CLG, or 640:CLS).

01:119:116 *General Biology II (4)*
Broad principles of cell biology, genetics, and evolution; the diversity of life and its physiology, ecology, and population dynamics.
Lec. 3 hrs., Wkshp. 80 min. Prerequisite: 01:119:115 with a grade of C or better. Credit not given for both this course and 01:119:102.

01:119:117 *Biological Research Laboratory (2)*
Laboratory designed to introduce and explore principles of research in the biological sciences by engaging in semester-long research projects requiring students to analyze data, synthesize new experiments, and evaluate findings.
Prerequisite: 01:119:115 with a grade of C or better. Corequisite: 01:119:116.

01:119:120 *STEM Success Seminar (1.5)*
Increases ability to control academic success and improve transition to the university environment in furtherance of educational and career goals. Reflection on recent and current academic experience and career aspirations. Setting of priorities and alignment of time and effort towards those ends.
By special permission only.

01:119:127-128 *Anatomy and Physiology: Health Sciences (4,4)*
Structure and function of human organ systems. Some microanatomy and biochemical aspects of physiology included.
Lec. 3 hrs., lab. 3 hrs. For nursing, medical technology, physical therapy, and other professional students. Not for life sciences major credit.

01:119:131 *Microbiology for the Health Sciences (3)*
Introduction to microbes with emphasis on the nature and behavior of microorganisms, the interrelationships between microbes and the human host in health and disease, and the principles of prevention and control of infectious disease.
Not open to students who have taken 01:447:390. For nursing and other professional students. Not for life sciences major credit. Prerequisites: 01:199:115-116 or 01:119:127-128.

01:119:132 *Microbiology for the Health Sciences Laboratory (1)*
Laboratory to accompany 01:119:131.
Lab. 3 hrs. Pre- or corequisite: 01:119:131.

01:119:140 *The DNA Revolution (Honors) (3)*
Introduction to fundamentals of molecular genetics, biotechnology, and modern genetics, including a laboratory research project using molecular biology and bioinformatics techniques. Intended primarily for nonscience majors, but may also appeal to prospective chemists, physicists, engineers, and computer scientists.
Restricted to first-year and sophomore students in the School of Arts and Sciences Honors Program or the Honors College. Credit not given for both this course and 01:119:140 or 01:694:215 or 315, or 01:447:315. Not for life sciences major credit.

01:119:148 *Moving Bodies: The Biology of Movement (3)*
Considers fundamental processes that allow humans and other animals to move, including structural basis (bones and muscles), control (brain and nervous system), conversion of food into energy (digestion and nutrition), movement of food and oxygen to muscles (circulation), and some common and familiar injuries and illnesses and their treatments.
Credit not given for both this course and 01:119:100, 103, 115-116, or 127-128. Not for life sciences major credit.

01:119:150 *Biology, Society, and Biomedical Issues (3)*
Discussion of current topics and issues in human health and medicine from a biological perspective.
Credit not given for both this course and 11:115:100. Not for life sciences major credit.

01:119:154 *Genetics, Law, and Social Policy (3)*
Principles of human and behavioral genetics and their legal, ethical, and social implications. Topics include genetic screening, counseling, and engineering; reproductive regulation; and human behavior genetics.
Prerequisite: Sophomore standing. Not for life sciences major credit or related major.

1:119:155 *Human Genetics (3)*
How our genes influence our development and health, how both normal traits and diseases are transmitted through families, how genetics is used in forensics and personalized medicine, and the genetic tests that are offered directly to consumers.
Not for life sciences major credit.

01:119:156 *Genetics, Evolution, and Human Health (4)*
The human body and human behavior, shaped by more than four billion years of evolutionary processes. Scientific and social implications of current ideas and controversies of evolution and genetics.
Not for life sciences major credit.

01:119:160 *Biology, Society, and Ecological Issues (3)*
Ecological and evolutionary ideas affecting space ecology; population increase, food supply, air and water pollution, war, and nuclear energy.
Not for life sciences major credit or related major.

01:119:182 *Essentials of Human Reproduction (3)*
Anatomical and physiological bases of human sexuality; biological and cultural aspects of sexual differentiation and psychosexual development, contraception, venereal disease, and sexual lifestyles.
Not for life sciences major credit or related major.

01:119:195 *Brain, Mind, and Behavior (3)*
Honors course discussing the interrelationship between the brain, the mind, and behavior.
Open to students in the School of Arts and Sciences Honors Program or the Honors College. Not for life sciences major credit or related major.

01:119:199 *Preparation for General Biology (4)*
For first- and second-year students planning science majors. Enrollment based on placement scores. Selected concepts in biology, proven learning strategies for college science courses, and instruction in the scientific method. Prepares students for success in the General Biology sequence (01:119:115-117).
Lec./rec. 3 hrs., lab. 3 hrs. Enrollment restricted by placement. Not for life sciences major credit.

01:119:201-202 *Independent Study in Biology (1-3,1-3)*
Independent study under the direction of a member of the faculty. Written report required.
Prerequisites: Declared biological sciences major or minor. Permission of the Office of Undergraduate Instruction; cumulative grade-point average of 2.8 or better. May not be used to fulfill a laboratory requirement.

01:119:204 *Outreach in Biology (1)*
Introduction to the basic principles and best practices of outreach in the biological sciences. Emphasis on understanding how to translate technical concepts and techniques to lay audiences incorporating best practices in active learning, public speaking and curriculum development. Recommended for students interested in teaching careers and related positions in science communication.
Prerequisites: 01:119:115, 01:119:116, and 01:119:117. By special permission.

01:119:205 *Internship in Life Sciences (3)*
Development of experience and knowledge regarding the expectations, qualifications, competencies and responsibilities of professionals working within the life sciences through an internship experience with academic component. Integration of knowledge from life science coursework with the internship experience, development of new skills, and reflection on the learning experience.
Prerequisites: 01:119:116 and 01:119:117. Open only to 119 Biology Majors.

01:119:307-308 *Research in Biology (1-3,1-3)*
Laboratory/field research on an original problem under the direction of a member of the faculty. Written report required.
Prerequisites: Declared biological sciences major or minor. Permission of the Office of Undergraduate Instruction; cumulative grade-point average of 2.8 or better. Open only to students majoring (or minoring) in biological sciences.

01:119:310 *Communication in Biology (1)*
Effective skills for communicating science to a variety of audiences in a variety of forms including papers, grant proposals, teaching, and presentations to scientists and others. Provides support for students completing the 10-page research paper required for Research in Biology.
Prerequisites: 01:119:307, 308, 407, or 408. Corequisites: 01:119:307, 308, 407, or 408.

01:119:311 *Current Topics in Life Sciences (1)*
Directed readings and discussion of selected scientific topics and career stories with Rutgers Life Sciences Alumni.
Junior or senior status and Division of Life Sciences major (subject code: 119, 146, 694, 447).

01:119:401 *Clinical Practicum in the Health Professions (3)*
Development of advanced knowledge of and reflection on the qualifications, competencies, and responsibilities of physician health care providers through an internship experience and academic component integrating knowledge from life science coursework and the health care setting.
Prerequisites: 3.4 science GPA. By special permission of the Office of Undergraduate Instruction only.

01:119:406-407 *Research in Biology (1-4,1-4)*
Laboratory/field research on an original problem under the direction of a member of the faculty. Written report is required.
Prerequisites: Declared biological sciences major or minor. Permission of the Office of Undergraduate Instruction; cumulative grade-point average of 2.8 or better. Open only to seniors majoring (or minoring) in biological sciences.

01:119:408-409 *Honors in Biology (3-6,3-6)*
Laboratory/field research on an original problem under the direction of a member of the faculty. Written thesis, oral presentation, and defense are required.
Prerequisites: Declared biological sciences major. Permission of the Office of Undergraduate Instruction. Open only to seniors majoring in biological sciences who meet the requirements for departmental honors.

01:119:410 *Honors Communication in Biological Sciences (1)*
Instruction on effective communication of scientific ideas and findings for both the scientific community as well as the general public. Support in writing honors theses and preparing for oral thesis defenses.
Prerequisite: 01:119:408. Corequisite: 01:119:409.

Learning Goals

Learning Goals

The Department of Cell Biology and Neuroscience offers a course of study that provides fundamental and comprehensive training in the areas of cell biology and neuroscience. The major objective of this program is to prepare students for graduate studies in cell biology and neuroscience; entry into professional schools in medicine, dentistry, or other health-related fields; or employment in industrial and pharmaceutical companies.

Learning Goals

Students will:

I. master factual and conceptual knowledge in cell biology and neuroscience that will provide a solid foundation for success in advanced training and professional careers;

II. develop an ability to summarize, integrate, and organize information; and

III. use scientific reasoning to evaluate the potential for current research and new discoveries to improve our understanding of cell biology and neuroscience and its relevance to human health and to our society.

Life Sciences (SAS)

Entry Requirements of the Major

Entry Requirements of the Major

The major in the Department of Cell Biology and Neuroscience is open to students after their first year who have completed Fundamentals of Neurobiology (01:146:245) or Fundamentals of Cell Biology (01:146:270), with a grade of C or better. Departmental approval is required.

A grade of C or better in all courses credited toward the major is required for graduation, and each course may be repeated only once to replace D/F grades.

Life Sciences (SAS)

Major Requirements

Major Requirements

The Department of Cell Biology and Neuroscience offers a program of study from which students can select one of two tracks, depending upon particular interests and career goals: a general track (default) and an honors track. Students can apply to enter the honors track at the beginning of the senior year. This track requires a minimum GPA of 3.4 in courses credited toward the major, and departmental approval. A number of core courses are required of all students in the cell biology and neuroscience major, regardless of the chosen track. No more than 16 credits from

among the life science courses required for completion of the cell biology and neuroscience major may be fulfilled by credits transferred from any school outside of Rutgers University-New Brunswick. Any life science courses applied to the major should be taken within 10 years of graduating.

Required Core Courses (65 or more credits)

01:119:115-116 General Biology (4,4)

01:119:117 Biological Research Laboratory (2)

01:160:161-162 or 01:160:163-164 or 01:160:165-166 General Chemistry (4,4)

01:160:171 Introduction to Experimentation (1)

01:160:307-308 or 01:160:315-316 Organic Chemistry (4,4)

01:160:311 Organic Chemistry Laboratory (2)

01:750:203-204 General Physics (3,3) or 01:750:193-194 Physics for the Sciences(4,4)*or 01:750:271-272 Honors Physics (3,3)

01:750:205-206 General Physics Laboratory (1,1)

01:640:135,136 or 01:640:151-152 Calculus I and II (4,4) or 01:640:135 and 01:960:401 Basic Stat for Research (3) or 01:960:379 Basic Prob and Stat or 01:640:135 and 01:960:212 Statistics II (3)**

01:447:380 Genetics (4)

01:146:245 Fundamentals of Neurobiology (3)

01:146:270 Fundamentals of Cell Biology (3)

01:694:395 Biochemistry for Life Sciences (3) or 01:694:407 Biochemistry (3)

Advanced Cell Biology and Neuroscience Courses: choose three of the following:

01:146:445 Synapses, Neurons, and Circuits (3)

01:146:447 Clinical Neurobiology (3)

01:146:465 Neurobiology of Pain and Addiction (3)

01:146:472 Developmental Biology (3)

01:146:473¿ Genetic Regulation in Cell Biology¿(3)

01:146:474 Immunology (3) or 01:146:476¿ Honors Immunology (3)

01:146:481 Protein Dynamics in Cell Biology (3)

* with approval from the Undergraduate Director or CBN Advisor 01:160:308 may be replaced by an additional elective course.
** Students who take who take Physics for the Sciences 01:750:193-194 (4,4) do not need an additional Physics laboratory.
*** Students with AP statistics equivalent of 01:960:211, transfer credit for 01:960:211, or who have taken 01:960:211 at Rutgers must take 01:960:212.

Life Sciences (SAS)

Options

Options

General Track; 4 credits

This track is for students who, upon graduation, seek immediate employment or plan to attend professional schools in health-related fields. In addition to the required core courses, students must take the following courses:

1. One elective lecture courses at the 300-400 level in the life sciences area (equaling 36 or more credits)
2. One laboratory or research course (1-3 credits). Students can take a lecture course with an associated laboratory component (3-4 credits) to satisfy both requirements, or a stand-alone lecture plus a laboratory or research course.

Honors Track; 12 credits

This area of concentration is for students interested in research who, upon graduation, plan to attend graduate school or professional schools in health-related fields. A student must qualify for admission into the honors track. See the departmental honors program page in this catalog for student qualifications. In addition to the required core courses, students must complete the following courses, produce a written research thesis and an oral thesis presentation:

1. One elective lecture course at the 300-400 level in the life sciences area (3 or more credits).
2. 01:146:405 Honors Seminar (3).
3. 01:146:408-409 Honors Research (3,3).

Life Sciences (SAS)

Departmental Honors Program

Departmental Honors Program

Honors in cell biology and neuroscience are awarded to students who have successfully completed the honors track course requirements, submitted a written research thesis, and defended the thesis orally. To qualify for the honors track, a student must have attained a grade-point average of 3.4 or better in courses required for the major. The student should apply formally to the department for acceptance into the honors program by the end of the second semester of the junior year.

Life Sciences (SAS)

Courses

Courses

01:146:201,202 ***Independent Study in Cell Biology and Neuroscience (1-3,1-3)***
Laboratory research under the direction of a Rutgers faculty member.
Written report required. Permission of department and an instructor willing to sponsor the student, and a cumulative grade-point average of 2.8 or better are required. May not be used to fulfill a laboratory requirement. Open only to students majoring or planning to major in cell biology and neuroscience.

01:146:245 ***Fundamentals of Neurobiology (3)***
Introduction to the biology of the nervous system. Topics covered include nerve cell signaling, sensory and motor systems, and higher brain processes.
Prerequisites: 01:119:115-116.

01:146:270 ***Fundamentals of Cell Biology (3)***
Principles of cell biology. Structure, function, and macromolecular organization of cellular organelles.
Prerequisites: 01:119:115-116.

01:146:295 ***Essentials of Cell Biology and Neuroscience (3)***
Provides a background in the biology of neural cells and cognition.
Prerequisites: 01:119:115-116. Not intended for cell biology and neuroscience majors.

01:146:307,308 ***Research in Cell Biology and Neuroscience (1-3,1-3)***
Laboratory research on an original problem under the direction of a member of the Rutgers faculty.
Written report required. Permission of department and an instructor willing to sponsor the student, and a cumulative grade-point average of 2.8 or better. Open only to students majoring or planning to major in cell biology and neuroscience.

01:146:322 ***Human Histology (4)***
Structure of the tissues and organs of the human body. Lec. 3 hrs., lab. 3 hrs.
Prerequisite: 01:146:270 or 01:146:295.

01:146:328 ***Human Parasitology (3)***
Cell biology, epidemiology, pathogenesis, and clinical manifestations of human parasitic diseases.
Prerequisites: 01:119:115-116.

01:146:329 ***Human Parasitology Laboratory (1)***
Laboratory to accompany the Human Parasitology lecture course 01:146:328. Lab. 3 hrs.
Pre- or corequisite: 01:146:328.

01:146:340 ***Virology (3)***
Principles of virology including the molecular and cellular events that occur during virus replication, the host cell response, and pathogenesis. Emphasis on animal viruses that impact human health and disease. Strategies for controlling viruses.
Prerequisite: 01:146:270.

01:146:350 ***Introduction to Light Microscopy for the Life Sciences (1, minicourse)***
This course offers a comprehensive exploration of advanced imaging techniques essential for studying tissues, cells, and organelles in the life sciences.
Prerequisite: 01:146:270 or 01:146:295.

01:146:356 ***Systems Physiology (3)***
Comprehensive study of the principal organ systems of laboratory animals and humans.
Prerequisites: 01:119:115-116 and 01:160:161-162 or 163-164, and 171 Credit not given for both this course and 11:067:300.

01:146:357 ***Systems Physiology Laboratory (1)***
Laboratory to accompany the Systems Physiology lecture course 01:146:356. Lab. 3 hrs.
Pre- or corequisite: 01:146:356.

01:146:405 ***Honors Seminar (3)***
This course is intended to help students prepare a written research thesis and practice the oral thesis presentation.
Requires departmental permission. Open only to senior honors students majoring in cell biology and neuroscience. This course fulfills the SAS WCd core requirement.

01:146:406, 407 ***Research in Cell Biology and Neuroscience (1-3,1-3)***
Research under the direction of a Rutgers faculty member.
Written report required. Permission of department and an instructor willing to sponsor the student, and a cumulative grade-point average of 2.8 or better are required. Open only to students majoring in cell biology and neuroscience.

01:146:408-409 ***Honors Research (3-3)***
Two semester laboratory research sequence under the direction of a Rutgers faculty member. Written report and oral presentation required. Culminates in a written thesis and oral thesis defense.
Permission of department and an instructor willing to sponsor the student are required. Open only to seniors majoring in cell biology and neuroscience who meet the requirements for the departmental honors program.

01:146:410-411 ***Research Thesis in CBN I and II (3-3)***
Two semester laboratory research sequence under the direction of a Rutgers faculty member and the course coordinator.
Prerequisites: 01:146:307 or 01:146:308. Requires departmental permission and acceptance by a faculty mentor who will host the student in the laboratory. Requires submission of a written thesis draft (I = Fall semester), and submission of a final written thesis and oral defense (II = Spring semester). Open to senior students majoring in cell biology and neuroscience who are not enrolled in the departmental honors program.

01:146:445 ***Synapses, Neurons, and Circuits (3)***
Cellular and systems features of neurons and the fundamental unit of signaling in the nervous system, focusing on a small number of advanced topics. Focus on how to test hypotheses related to the topics addressed: intra- and inter- cellular communication; construction of neuronal networks; protein interactions at the synapse; and signal transduction pathways.
Prerequisites: 01:146:245 and 01:146:270.

01:146:447 ***Clinical Neurobiology (3)***
Development and function of the nervous system with an emphasis on diseases and disorders. Topics include neurodevelopment, demyelination, tumors, and viral infections; neurological disorders/diseases; injury to the spinal cord and brain and repair; and clinical trials and the future of spinal cord and brain trauma.
Prerequisites: 01:146:245 and 01:146:270. Intended for senior students majoring in cell biology and neuroscience.

01:146:456 ***Advanced Physiology (3)***
Preparation for advanced graduate study in physiology and for medical physiology (first-year medical school). Focus on mammalian physiology and the whole animal (whole organ) approach to classical experimental physiology.
Prerequisites: 01:146:356. Intended for senior and junior students.

01:146:464 ***Topics in Cell Biology and Neuroscience (3)***
Directed readings and discussion of selected topics in cell biology and neuroscience.
Prerequisites: 01:146:245 and 01:146:270. Open to junior or senior students majoring in cell biology and neuroscience.

01:146:471 ***Advanced Cell Biology Laboratory (3)***
Advanced laboratory methods in cell biology. Emphasis on light and electron microscopy, imaging, immunocytochemical techniques, tissue culture, and methods of identifying and separating macromolecules.
Prerequisite: 01:146:270 or permission of instructor.

01:146:472 ***Developmental Biology (3)***
Genetic, molecular and cellular processes that lead from egg to embryo to mature organism.
Prerequisite: 01:146:270 or 01:447:380 or 01:447:384.

01:146:473 ***Genetic Regulation in Cell Biology (3)***
Advanced topics in cell biology, focusing on genetic animal models, genomics, chromatin function, gene expression, and RNA biology.
Prerequisite: 01:146:270.

01:146:474 ***Immunology (3)***
Fundamental principles of immunology with emphasis on antibody formation, immunoglobulin molecules and genes, hypersensitivity reactions, and the cellular basis for the immune response.
Prerequisites: 01:119:115-116 and 01:447:380 or 01:447:384. Recommended: 01:447:390.

01:146:475 ***Laboratory in Immunology (1)***
Biochemical and molecular analysis of immune cell function. Application of immunological techniques to the examination of normal and diseased states.
Pre- or corequisite: 01:146:474.

01:146:476 ***Honors Immunology (3)***
Introduction to the immune system, with a focus on mammalian organisms (particularly humans). Focus on critical thinking and problem-solving abilities, as well as introduction to primary research addressing contemporary immunological questions. Open only to students enrolled in the Honors College, SAS Honors Program or CBN Honors Program.
Prerequisites: 01:447:380 or 01:447:384. Credit not given for both this course and Immunology 01:146:474.

01:146:481 ***Protein Dynamics in Cell Biology (3)***
Advanced topics in cell biology, focusing on signal transduction (module 1), cell adhesion and protein transport (module 2) and cytoskeletal dynamics controlling cell movement (module 3).
Prerequisite: 01:146:270.

Life Sciences (SAS)

Learning Goals

Learning Goals

Learning Goals:

The Department of Genetics is committed to teaching science through the way we do science: through the process of doing research. The curriculum of the Department of Genetics is centered around four main goals. These goals shape our innovative courses and provide the basis for lifelong learning.

I. Knowledge specific goals: Know the terms, concepts, and theories of genetics.

II. Integrate the material from multiple courses and research to think holistically and to see the whole as well as the parts.

III. Use genetic information and ideas to critically analyze published research articles in genetics.

IV. At the end of four years, all of our students will be able to design an experiment, carry out the research using the appropriate laboratory techniques, and analyze and interpret their data. They will also be able to communicate their discoveries through a written article appropriate for publication in a peer-reviewed genetics journal, and through talks or posters appropriate for scientific meetings.

Life Sciences (SAS)

Entry Requirements of the Major

Entry Requirements of the Major

Students wishing to major in this department must have been enrolled at Rutgers for at least one semester. In addition, students must:

1. Be an SAS student

2. Have a cumulative GPA of at least 2.00, and a GPA of at least 2.8 at the time of taking research for credit.

3. Have earned a C or better in these prerequisite courses or equivalents (25-26 credits):

a. General Biology I 01:119:115

b. General Biology II 01:119:116

c. General Biology Lab 01:119:117

d. General Chemistry I either 01:160:161 or 01:160:163

e. General Chemistry II either 01:160:162 or 01:160:164

f. Calculus I either 01:640:135 or 01:640:151

g. Calculus II or Statistic either 01:640:136, or 01:640:152, or 01:640:192, or 01:960:401, or 01:960:212, or 01:960:379

4. Students with an overall GPA < 3.0 must meet with the UGD before declaring the major.

a. Genetics is a credit-intensive major and has a requirement of a 2.80 GPA at the time of taking research for credit

b. Students entering the major with a GPA of < 3.0 may struggle to complete the major on time

5. Watch a Genetics Major Declaration Video

Life Sciences (SAS)

Major Requirements

Major Requirements

The department offers a major with a strong emphasis on research. A minimum of 20 credits of coursework in the life sciences must be completed in residence. Genetics is a credit-intensive major. Excluding the prerequisite courses (25-26 credits) to get into the major (see above), there are between 54-56 credits to complete the major (60-62 for honors). A grade of "C" or better in courses credited toward the major is required for graduation, and each course may be repeated only once to replace D/F grades. Students may not double major in two Division of Life Sciences majors.

The requirements of the major consist of:

A. Life Science Core Courses (19-21 credits) - Required for all DLS Majors (Approved AP and Transfer credits may be substituted)

a. Intro to Experimentation 01:160:171

b. Organic Chemistry I 01:160:307 or 01:160:315

c. General Physics I (01:750:203 + 205 lab), or (01:750:271 + 275 lab), or 01:750:193, or 01:750 201
Note: 193 & 201 have integrated lab

d. General Physics II (01:750:204 + 206 lab) or (01:750:272 + 276 lab) or 01:750:194 or 01:750:202
Note: 194 & 202 have integrated lab

B. Genetics Core (17 credits) - Required for all Genetics Majors- All below credits must be completed at Rutgers

a. Genetic Analysis I 01:447:384

b. Genetic Analysis II 01:447:385

c. Lab Course Req. 01:447:315, or 01:447:302, or 01:447:203, or 01:447:303, or 01:694:214, or 01:694:215, or 01:694:316

d. Biochemistry for the Life Sciences 01:694:395 or 01:694:407

e. Communications in Genetics 01:447:430 or 01:447:414 + 01:447:415 (Honors, Thesis Writing senior year)

C. Genetics Independent Scholarship (minimum 6 credits but 12 credits for honors
Note: 2.8 minimum GPA to register for research

a. Independent Scholarship 01:227:460, 407, 408, 409, 410, 488, 489, 490

b. Independent Scholarship 01:227:460, 407, 408, 409, 410, 488, 489, 490

D. Genetics Electives (6 credits)
Fifty percent must be taken within the Genetics Major (i.e.; 01:447)

a. Genetics Electives See electives table

b. Genetics Electives See electives table

c. Genetics Electives See electives table

E. Electives OR Independent Scholarship (6 credits)

Note: Additional Genetics Lab may be used as an elective

a. Independent Scholarship 01:227:460, 407, 408, 409, 410, 488, 489, 490

b. Independent Scholarship 01:227:460, 407, 408, 409, 410, 488, 489, 490

c. Genetics Electives See electives table below

Lab Note: 01:694:214 and 01:694:215 are only offered to first-year students with AP Biology credit and AP General Chemistry credits (or taking General Chemistry concurrently). 01:447:203 is only offered to first-year students in the SAS Honors Program or the Honors College. Students cannot receive credit for both 01:447:203 and 01:447:302.

Organic Chemistry Note: If you are planning to pursue a graduate degree in which a full year of organic chemistry is suggested/required (e.g., med/dental school), we strongly recommend taking Organic Chemistry II + lab as an elective (6 credits)

Life Sciences (SAS)

Departmental Honors

Departmental Honors

Departmental Honors

The Department of Genetics recognizes graduating students who have made outstanding academic achievements by awarding **departmental honors**. The department awards two types of departmental honors (see below) and these are awarded at the discretion of the Genetics Honors Committee. To be considered, students must meet all criteria for that type of honors and submit the honors request application by the deadline (April 1st of senior year).

The two types of departmental honors and their criteria are as follows:

1. GENETICS HONORS- RESEARCH

a. GPA requirement: a student must have attained, at the end of the junior year, a cumulative GPA of at least 3.4 and a Genetics major GPA of at least 3.4 (including prerequisites).

b. Complete 6 or more credits of Honors in Genetics (01:447:408-409) during senior year

c. Complete a total of 12 or more research credits (including the 6 credits of 01:447:408-409)

d. Complete Honors Thesis and Communication in Genetics 447:414 and 415 during senior year

e. Complete and defend a research thesis before a faculty committee (see Thesis Guidelines)

f. Present at Honors Day

Students can apply to do an Honors thesis by completing the relevant sections of the Independent Scholarship Form. Students must register either for an Honors course sequence in Genetics (01:447: 408 and 409) or for a course sequence in a college Honors Program (See Handbook) . These decisions should be discussed with an advisor and approved by the Department Vice Chair. Accepted students are expected to complete at least 12 credits in an independent research project, resulting in a thesis. Students may do research with Rutgers faculty outside of the Department with the approval of their advisor and the Vice Chair. Students will prepare a thesis and present an oral defense to a committee of three faculty. At least one member of the committee must come from the Department of Genetics. Students will present their research at a Departmental Symposium in April. Students contemplating an Honors thesis should refer to the much more detailed instructions and details in Section IX and Section X of the Student Handbook. For information on the thesis, see Thesis Guidelines.

Level of Honors: In determining the level of honors, the honors/awards committee takes into consideration multiple factors in aggregate, including but not limited to (1) cumulative GPA, (2) thesis defense committee recommendation, (3) research mentor evaluation, (4) faculty evaluation of presentation at Honors Day, and (5) whether or not the student took the honors versions of Genetic Analysis 1 and/or 2 (i.e., 01:447:384:H1 and/or 01:447:385:H1) and the grades received in those courses.

2. Genetics Honors - Certificate Program

a. GPA requirement: A student must have attained, by April 1st of senior year, a cumulative GPA of at least 3.4 and Genetics major GPA of at least 3.4 (including prerequisites).

b. Complete a departmental certification program (i.e.; CompGen, Cancer or Genetic Counseling).

c. By April 1st, the student must formally apply to request consideration for Certificate Honors by completing the Genetics Honors- Certificate Program Form

* *The honors committee may award Honors, High Honors or Highest Honors*

Life Sciences (SAS)

Undergraduate Certificate Programs

Undergraduate Certificate Programs

The Department of Genetics offers two certificate programs. Students who complete one of these Certificates are eligible to receive Departmental Honors.

1) Genetic Counseling Certificate Program

The Department of Genetics offers an undergraduate **Genetic Counseling Certificate Program (GCCP).** The GCCP program is intended for a select group of students interested in applying to the masters-level programs in genetic counseling. The goal is to provide students with guidance, coursework, and relevant clinical experience to improve their graduate school applications. This is a highly competitive option and is **only open to declared genetics majors**. Not all applicants will be accepted. The Certificate will be awarded only in conjunction with the awarding of a baccalaureate degree in genetics and does not replace minors. The certificate is NOT in lieu of completing the masters-level programs in genetic counseling. At the end of the program students will:

- understand genetic counseling as a profession ·
- understand application requirements for masters-level programs
- gain experience in talking with people who are in crisis
- gain experience in a clinical genetic counseling clinic

2) Certificate in Computational Genetics

The Department of Genetics offers a Certificate in Computational Genetics (CCG) for Genetics majors. The volume of data being generated in Genetics and related life science fields has been expanding tremendously in recent years, and career opportunities for geneticists with computational and quantitative expertise are simultaneously growing. This certificate program is intended for students who are either interested in applying to graduate-level programs, or planning careers, in Computational Genetics/Biology, Statistical Genetics, Bioinformatics, or other programs in quantitative biomedical related research. The goal of the CCG is to provide students with guidance, coursework,

and relevant data design and analysis experience to prepare them for graduate studies in the field or entry-level informatics jobs. This program is only open to declared Genetics Majors. The Certificate will be awarded only in conjunction with the awarding of a baccalaureate degree in Genetics. At the end of the program students will:

- Have gained competence in genetic data analysis using basic computer programming and statistical analysis.
- Be prepared to apply to M.S. or Ph.D. graduate programs in the areas of Computational Genetics and Bioinformatics.
- Be prepared to apply for career positions in industry, biotech companies, pharmaceutical companies, medical centers, or universities

3) Cancer Research Certificate

The Department of Genetics offers a Certificate in Cancer Research (CCR) for Genetics majors. Completion of the Certificate in Cancer Research will provide an advantage when applying to MD, PhD, and MS programs and facilitate transitions to careers with Cancer-related missions. The goal of the CCR is to provide students with a rigorous and Cancer-specialized curriculum. Students will do at least one year of research in a nation-leading Cancer Research Lab and students will be expected to participate in community engagement and develop skills to build community outside of academia. This program is only open to declared Genetics Majors. The Certificate will be awarded only in conjunction with the awarding of a baccalaureate degree in Genetics. At the end of the program students will:

- Have gained knowledge in Cancer Genetics with an expanded curriculum focused on Cancer biology.
- Have at least one year of experience conducting laboratory research in a Cancer research lab.
- Be prepared to apply to M.S., MD, or Ph.D. graduate programs in the areas of Cancer Genetics or for career positions in industry, biotech companies, pharmaceutical companies, medical centers, policy-driving institutes, or universities.

Life Sciences (SAS)

Courses

Courses

01:447:203 ***Honors Computational Genetics (Honors) (3)***
Honors computational genetics is a computer-based laboratory course that introduces students to the use of computers in biological research. This course is for students who are thinking of careers at the intersection of life sciences, statistics, and/or computer science, particularly students who are considering majoring in Genetics. The course fulfills the laboratory requirement for the Genetics major. In the first half of the course, students will receive instruction in introductory computer programming (Python). In the second half of the course, students will practice writing code in Python via in-depth computational projects in genetics and genomics. Each class consists of a mixture of lecture and computer-based demos and/or exercises, as well as time for students to work on assignments. The course provides the introductory skills needed to conduct basic computational research in the life sciences, including many aspects of computer programming and genomic data analysis. Prior experience with computer programming is neither necessary nor is it expected for students who enroll in this course.

This course is for freshman or sophomore Honors students who are thinking of careers at the intersection of life sciences, statistics, and/or computer science, particularly students who are considering majoring in Genetics. The course fulfills the laboratory requirement for the Genetics major.The course fulfills the laboratory requirement for the Genetics major.
Prerequisites: Students must be in their first or second year at Rutgers in an approved Honors program (e.g., the Honors College or the SAS Honors Program). General Biology I (01:119:115) and be at least co-registered for General Biology II (01:119:116)) or have placed out of these two courses (e.g., through AP credit or approved transfer credit). Credit not given for both 01:447:203 and 01:447:302.

01:447:216 ***Analysis of Scientific Literature (Honors) (3)***
A systematic approach to the reading, analyzing, and understanding of primary literature in genetics; emphasis will be placed on data analysis and experimental design and demystifying the process of reading a scientific journal article.
Prerequisites: 01:119:115-116. Highly recommended: 01:694:215. Open only to freshmen and sophomores in the SAS or SEBS Honors Program. By permission only.

01:447:245 ***Introduction to Cancer (3)***
Introduction to Cancer provides the student with an overview of conventional and state-of-the-art aspects of oncogenesis. Students will become familiar with the process involved in neoplastic transformation to the cancer phenotype through aspects of epidemiology, pathophysiology, virology, in vitro and in vivo cellular transformation and genetics. They will then apply these aspects to the understanding of classic therapeutic modalities and new state-of-the-art rational therapies. This comprehensive course will concentrate on the human disease process by applying clinical aspects of oncogenesis during a series of Grand Rounds discussions that will include recent patient clinical cases and their outcomes.
Prerequisites: 01:119:115-116. Credit not given for both this course and 01:447:495.

01:447:302 ***Quantitative Biology and Bioinformatics (3)***
Introduction to the use of computers and computer programming to develop applications for research in genetics and molecular biology. Application topics will include evolutionary genetics, association analysis and genetics mapping, and structural biology.
Prerequisites: 01:447:380 or 01:447:384. May be used to fulfill an elective requirement or taken instead of 01:447:315 Introduction to Research in Genetics by students majoring in Genetics. Credit not given for both 01:447:203 and 01:447:302

01:447:303 ***Computational Genetics of Big Data (3)***
The main focus of this course is the application of R programming to the analysis of genetic data, particularly big data sets with multiple measurements. The primary data sets considered will contain RNA-seq and/or other expression data for multiple/all genes in a given set of individuals. This course is for junior or senior students who are thinking of careers at the intersection of life sciences, statistics, and/or computer science, particularly students who are majoring in Genetics. The course fulfills the laboratory requirement for the Genetics major. Students will learn how to acquire such data, format it for R, plot the data, and perform statistical analyses. In addition, students will learn how to simulate data under different hypotheses, and how to perform power and sample size calculations for different statistical methods applied to real or simulated data. Each class consists of a mixture of lecture and computer-based demos and/or exercises, as well as time for students to work on assignments. Guest investigators will frequently make short presentations (in person or by skype) to provide illustrations of how programming and informatics is critical for their research. The course provides the introductory skills needed to conduct basic

computational research in the life sciences, including many aspects of computer programming and data analysis.
Prerequisites: 01:447:380 or 01:447:384. May be used to fulfill the lab requirement by students majoring in genetics. May be used to fulfill an elective requirement by students majoring in genetics who have already fulfilled the lab requirement with a separate course.

01:447:315 *Introduction to Research in Genetics (3)*
Basic principles and methods of research with microbial model systems used in the analysis and manipulation of genes, followed by a research project in molecular genetics.
Prerequisites: 01:119:115,116, and 117; and 01:160:161-162, 171 (or equivalent) or 01:160:163-164, 171. May be used to fulfill the lab requirement by students majoring in genetics. May be used to fulfill an elective requirement by students majoring in genetics who have already fulfilled the lab requirement with a separate course. Credit not given for both this course and 01:694:315. Open only to genetics majors

01:447:354 *Social, Legal, and Ethical Implications of the New Genetics (3)*
Social, legal, and ethical implications of new modern genetic techniques, for example: genetic screening, stem cells and cloning, forensic genetics, genetic engineering of plants, animals, and humans, genetic enhancement, gene therapy, and the new eugenics.
Prerequisites: Genetics (01:447:380) or Genetics Analysis (01:447:384)

01:447:356 *Evolutionary Medicine (3)*
In this course, we examine human health from an evolutionary perspective, exploring the impact that our evolutionary heritage has on modern human diseases, both chronic and infectious. We will learn how the framework of evolutionary biology and modern genetic tools can inform our understanding of issues relevant to clinical and public health. Rather than focus on the immediate mechanisms underlying disease, we will endeavor to understand the ultimate factors that influence susceptibility, such as past natural selection. The course topics are wide-ranging, but particular attention is paid to emerging infectious diseases, as well as non-communicable diseases that may be exacerbated by facets of modern lifestyles.

Through lectures, critical analysis of the primary literature and popular science news, and class discussions, students will learn how evolutionary principles can be practically applied to medicine. Key readings each session will focus on genetic techniques for understanding evolutionary medicine, while additional readings will incorporate perspectives from diverse fields.

By fully participating in this course, students will be able to appreciate how modern susceptibility to non-communicable and infectious diseases has been influenced by past evolutionary processes; critically evaluate evolutionary hypotheses related to health and medicine, including those found in popular science articles; and know how genetic techniques are applied within an evolutionary framework to understand ultimate reasons for disease.
Prerequisites: (01:447:380 or 384) AND (01:960:401 or 01:960:212).

01:447:370 *Developmental Genetics (3)*
How genes influence the developmental processes of an organism. Topics include gene regulatory networks, signaling pathways, stem cell biology, and the role of developmental genetics in human disease.
Prerequisites: Genetics (01:447:380) or Genetic Analysis (01:447:384)

01:447:380 *Genetics (4)*
Introduction to the mechanisms of heredity and evolution. Mechanisms of Mendelian inheritance, meiosis, recombination, gene mutation, and mapping, and an introduction to modern biochemical, molecular, and population

genetics.
Lec. 3 hrs., rec. 1 hr. Prerequisites: 01:119:115-116 and 01:160:161-162 or 01:160:163-164. Credit not given for both this course and 01:447:384-385 or 11:067:328 or 11:776:305.

01:447:382 *Genetics Laboratory (1)*
Laboratory to accompany 01:447:380. Not accepted for elective credit for Genetics majors.
Lab. 3 hrs. Pre- or corequisites: Genetics (01:447:380) or Genetic Analysis (01:447:384)

01:447:384-385 *Genetic Analysis I,II (4,4)*
Experimental methods and concepts in genetics, with emphasis on their application to genetic research. Part I covers transmission genetics and breeding analyses, basic molecular genetics, isolation and characterization of mutations, and chromosome structure and function. Part II covers mathematical genetics, recombinant DNA, genomics, and special topics relevant to modern genetic research.
Open only to majors in genetics or by permission of instructor. Credit not given for both this course and 01:447:380 or 11:067:328 or 11:776:305. Prerequisites for 01:447:384 are 01:119:115-116 (General Biology I & II) or 01:160:161-162 or 01:160:163-164 (General Chemistry I & II). Prerequisite for 01:447:385 is 01:447:384.

01:447:390 *General Microbiology (4 includes laboratory)*
Microorganisms are an essential component of the human environment and are significant not only for the disease they cause, but also for their ecological, agricultural, pharmaceutical, and industrial benefits. This course will introduce students to the physiology, morphology, pathogenicity, and genetics of groups of microorganisms and their applications. The lab component of the course will introduce microscopy and staining techniques, the growth cycle and generation of a standard curve, physiological characteristics of microorganisms, and bacterial transformation. The course is an introduction to the physiology, morphology, pathogenicity, and genetics of groups of microorganisms. Topics include: History and Overview of Microbiology, Cell Structure and function, Microbial Growth, Nutrition, culture, and metabolism, Virology, Bacterial genetics, Microbial evolution and systematics, Bacteria and Archaea, Nutrient cycles, Genetic Engineering and Biotechnology, Waste treatment, Anaerobic respiration and Nitrogen fixation, Antibiotics and chemotherapeutic agents, Normal Flora, Virulence, Toxins, Epidemiology, and Microbial Diseases.

This is an upper-level course that focuses on the basic principles of microbiology. The course is an introduction to the physiology, morphology, pathogenicity, and genetics of groups of microorganisms. Topics include:
Prerequisites: General Biology 01:119:115-116-117 or 01:119:101-102 and General Chemistry 01:160:161-162-171 (or higher) and Organic Chemistry 01:160:307. Credit not given for both this course and 11:680:390.

01:447:392 *Pathogenic Microbiology (3)*
This course will integrate basic microbiology and infectious diseases. The first quarter of the course will provide the conceptual basis of microbial morphology, metabolism and growth, heredity and variation, pathogenicity and antimicrobial chemotherapy. Then this course will introduce the students to one real life patient case study each week, moving the course toward an understanding of specific human diseases (e.g., pharyngitis, meningitis) as might be expected in a clinical environment. Each case will include a patient history, differential diagnosis, clinical cues, laboratory data, pathogenesis, treatment and prevention, additional points and references. The objective is not to attempt to cover every infectious disease or microorganism, but rather to use examples that would stress the key principles of microbial pathogenesis, differential diagnosis and appropriate treatment and prevention. This course

is intended for Life Science majors or those with a strong background in the Biological Sciences.
Prerequisites: General Biology (01:119:115-117), General Chemistry (01:160:161-162-171), and Organic Chemistry (01:160:305. and 01:160:315. Systems Physiology is recommended.

01:447:406-407 *Research in Genetics (3)*
Laboratory research on original problem under the direction of a professor. Written thesis, oral presentation, and defense required.
Prerequisites: Permission of department and cumulative grade-point average of 2.8 or better. Open only to students majoring in Genetics.

01:447:408-409 *Honors in Genetics (3-6,3-6)*
Laboratory research on original problem under the direction of a professor. Written thesis, oral presentation, and defense required.
Prerequisites: Open by permission to seniors majoring in genetics who meet the requirements for the departmental honors program. Corequisite: 01:447:414 (fall) and 415 (spring).

01:447:410 *Research in Genetics - Writing Intensive (3)*
Research in Genetics- Writing Intensive is intended to provide you with an opportunity to engage in original laboratory research under the direct supervision of a faculty mentor, usually in the faculty member¿s research laboratory. You are expected to carry out your own research project. NOTE: this research requires a heavy commitment of time and effort and can impact your performance in coursework, especially if you have not yet managed the foundational material for the discipline. Fulfills the writing and communication requirements of the SAS Core Curriculum.
Prerequisites: 01:447:302, 447:315, or permission of department. Registration is by special permission only. Cumulative grade-point average of 2.8 or better. Declared genetics major.

01:447:414 *Thesis Writing and Communication in Genetics (1.5)*
Assists students with their honors thesis; emphasis will be on library/internet research and thesis writing. Students will be expected to write the introduction, methods, and reference sections of their thesis and outline the results and discussion.
Corequisites: 01:447:408. For seniors completing departmental honors; by special permission only.

01:447:415 *Thesis Writing and Communication in Genetics (1.5)*
Assists students with their honors thesis; emphasis will be on library/internet research and thesis writing. Students will be expected to write the introduction, methods and reference sections of their thesis and outline the results and discussion.
Prerequisite: 01:447:408. Corequisite: 01:447:409. For seniors completing departmental honors; by special permission only.

01:447:430 *Effective Communication Skills in Genetics (3)*
Communication is an essential part of science. Whether it is communicating research findings to other scientists or conveying complex concepts to a lay audience, a scientist must be able to effectively communicate their research to succeed. Communication in science is typically through publications, posters, or oral presentations. The goal of this course is to provide students practice in effectively communicating scientific findings. This includes preparing and revising an introduction for scientific papers, writing a research description for general audience, and preparing and

giving presentations (both oral and poster).
Prerequisites: Declared major in Genetics; must have completed one semester of Research in Genetics, Advanced Independent Study, or Genetic Counseling Rotation. By special permission only.

01:447:451 *Genomes (3)*
This course will focus on Genomics, Proteomics and Bioinformatics from a Genetics perspective. Special attention will be given to the organization and functioning of the human genome.
Prerequisites: Genetics (01:447:380) or Genetic Analysis (01:447:384).

01:447:460 *Genetics of Compulsive Behavior (3)*
Compulsive urge can be channeled toward productive endeavors such as a strong drive to succeed in competitions, schooling, and career. On the other hand, improper handling of compulsive urge may lead to problematic behaviors such as alcoholism, drug use, gambling, and other undesirable behaviors. There are also conditions that are medically defined as disorders, with certain types of compulsive behaviors as part of the diagnostic symptoms, such as OCD and ADD/ADHD. There is evidence that genetics contribute to compulsive behavior in humans, and research in animal models has begun to uncover the molecular factors that underlie the genetic basis of compulsive behavior. Discussion of primary literature and other scientific publications that deal with the molecular and genetic basis of compulsive behavior. Emphasis will be placed on the development of skills for critical thinking and effective writing.
Prerequisites: Genetics (01:447:380) or Genetic Analysis (01:447:384).

01:447:465 *Genetic Approaches and Research Analysis (3)*
This class will teach students how to read, interpret and analyze research articles. The class will follow an active learning format, where we will discuss seminal and recent research articles in depth: What was the scientific question or problem? What methods and strategies were used to address it? What were the findings and conclusions? What are the alternative interpretations and methods that could have been applied? What questions are remaining?
This class will expose students to a diverse selection of research literature, involving genetic and molecular analyses in model organisms such as mice, worms, flies and yeast. The class series will begin with a research article presented by the teacher. During the majority of the class series, students will be divided into groups of 4-5. Each group will be assigned one research article and be required to work together to a) interpret, b) analyze and c) present the article in the form of an oral presentation to the class. Students will be graded on their ability to perform each of these tasks and on active participation during presentations by other groups. All groups will also be required to complete and be graded on a written discussion summary assignment at the end of each article discussion. This summary assignment may take many forms, e.g., preparation of a graphical abstract, subway advert, or other creative forms of expression.
Prerequisites: Genetics (01:447:380) or Genetic Analysis (01:447:384).

01:447:470 *Evolutionary Developmental Biology (3)*
Evolutionary origins of the vertebrate body plan are major problems in biology. While paleontology and comparative anatomy have revealed the evolutionary trajectories of the organs, recent genetics, genomics and embryology are becoming powerful tools to answer classical questions. The goals of this course are twofold; 1) obtain fundamental knowledge of anatomy, embryology, and the latest genomics and 2) learn how to integrate genetics, genomics and embryology to answer evolutionary questions through active discussion in the classroom. The training to discover and answer scientific questions in animal diversity will be performed at the American Museum of Natural History.
Prerequisites: Genetics (01:447:380) or Genetic Analysis (01:447:384)

01:447:478,479 ***Special Topics in Genetics (3,3)***
Directed readings and discussion of selected topics of special interest in genetics. Topics will vary according to semester and/or instructor.
Prerequisites: Genetics (01:447:380) or Genetic Analysis (01:447:384)

01:447:480 ***Topics in Molecular Genetics (3)***
Current research topics in microbial and molecular genetics. Lectures, discussions, and critical analyses of journal articles.
Prerequisites: Genetics (01:447:380) or Genetic Analysis (01:447:384).

01:447:484 ***Behavioral and Neural Genetics (3)***
Influence of genetics on the nervous system and behavior of various organisms. Overview of field including experimental analysis of behavior, development of the nervous system, and sensory systems. Emphasis on reading and interpreting original research,
Prerequisites: Genetics (01:447:380) or Genetic Analysis (01:447:384).

01:447:488 ***Genetic Counseling Rotation (3)***
The goal of this course is to provide students with an understanding of the genetic counseling career. Students will be placed at a local Genetic Counseling clinic to shadow a genetic counselor for one semester. During the semester, the student is expected to spend 8-9 hours a week at the rotation plus meet weekly with course director (attendance is mandatory). Course grade will be based on 1) Case presentation to Genetic Counseling group 2) ten Genetic Counseling case summary logs, and 3) evaluation by the clinical supervisor.
Prerequisites: Declared Genetics major, cumulative GPA of 2.8 or greater, and accepted into the undergraduate Genetic Counseling Certificate Program (GCCP).

01:447:489,490 ***Advanced Independent Study in Genetics (3,3)***
Advanced independent study in Genetics is an opportunity for students to complete a scholarly project under the direct supervision of a faculty mentor. Projects are varied; e.g. library research on a topic of mutual interest to both the student and the faculty member, computer simulations, informative website design, or development of teaching materials. This course may not used for laboratory research.
Prerequisites: 01:447:384 and permission of department. Open only to students majoring in Genetics

Life Sciences (SAS)

Molecular Biology and Biochemistry 694

MOLECULAR BIOLOGY AND BIOCHEMISTRY 694

Department of Molecular Biology and Biochemistry, School of Arts and Sciences

Life Sciences (SAS)

Learning Goals

Learning Goals

The Department of Molecular Biology and Biochemistry offers a course of study in which traditional and modern biochemistry are integrated with studies in molecular biology. In addition to traditional courses, students are required to carry out undergraduate research work in a Rutgers professor¿s lab who serves as the host and mentor. This course of study prepares students for graduate studies in molecular biology and biochemistry and related fields, entry into professional schools in medicine or other health professions, or employment in industries (e.g., biotechnology, pharmaceuticals) in which molecular biology and biochemistry skills are in demand. The same learning goals are also used for nonmajor students taking molecular biology and biochemistry courses.

Learning Goals:

I. Students should demonstrate an understanding of the knowledge that is needed to begin biomedical research and that is required for postgraduate exams and studies.

II. Students should demonstrate the ability to find and evaluate information about specific biological systems or problems.

III. Students should demonstrate the ability to design experiments and critically analyze data.

IV. Students should demonstrate the ability to communicate their research and findings orally through seminar and poster presentations and through written research papers.

Life Sciences (SAS)

Entry Requirements of the Major

Entry Requirements of the Major

The molecular biology and biochemistry (MBB) major is open to students beyond their first year who have a 2.0 cumulative grade-point average and have received grades of C or better in courses taken toward the major, except by special permission of the department undergraduate chair. The MBB major is also open to first year students with AP credits. In all cases, students interested in the MBB major should contact the Undergraduate Director, Sam Gunderson. A grade of C or better in all courses credited toward the major is required for graduation and each course may be repeated only once to replace D/F grades.

Departmental approval is required to declare the major in molecular biology and biochemistry. Students who want to register for the MBB major must first meet with the Undergraduate Chair Sam Gunderson, Nelson lab, Room A322/A320 (848-445-1016 gunderson@dls.rutgers.edu) to discuss details about the major.

Life Sciences (SAS)

Major Requirements

Major Requirements

A core of courses is required for completion of the major in molecular biology and biochemistry. Students supplement the core with additional required and elective courses in one of three options. Given that molecular biology and biochemistry is a dynamic and developing field, it is critical that coursework applied to the major must be current. Thus, any life science courses applied to the major in molecular biology and biochemistry should be taken within 10 years of graduating. Online courses will be reviewed on a case-by-case basis to confirm that they meet departmental learning goals before they may be used to satisfy the requirements for the major. Returning students must meet with their adviser to discuss their path to graduation. All students are required to write research reports and present them at a seminar.

Required Core Courses (58 credits)

01:119:115-116 General Biology (4,4)*
01:119:117 Biological Research Laboratory (2)*
01:160:161-162 or 01:160:163-164 or 01:160:165-166 General Chemistry (4,4)*
01:160:171 Introduction to Experimentation (1)*
01:160:309 Organic Chemistry Laboratory (2) (recommended)* or 01:160:311 Organic Chemistry Laboratory (2)
01:160:315-316 Principles of Organic Chemistry (4,4) (recommended)* or 01:160:307-308 Organic Chemistry (4,4)
01:447:380 Genetics (4)*
01:640:151-152 Calculus for Mathematical and Physical Sciences (4,4) *(recommended) or 01:640:135-136 Calculus for the Life and Social Sciences I,II (4,4)**
01:694:407 Molecular Biology and Biochemistry (3) or 01:694:395 Biochemistry for the Life Sciences (3)
01:694:315 Introduction to Molecular Biology and Biochemistry Research (3) or 01:694:215 Honors Introduction to Molecular Biology and Biochemistry Research (4) or 01:694:214 Introduction to Molecular Biology Research (3) or 01:694:316 Honors Introduction to Molecular Biology, Biochemistry, Genetics Research (4)
01:694:408 Molecular Biology and Biochemistry (3)
01:694:383 Molecular Biology and Biochemistry Seminar: Careers in Science (1)
01:694:484 Molecular Biology and Biochemistry Seminar: Research Presentations (1)
01:750:203-204 General Physics (3,3)***

01:750:205-206 General Physics Laboratory (1,1)***

*Life sciences core course
**01:960:401 Basic Statistics for Research (3) or 01:960:211-212 Statistics I,II (3,3) may be substituted for the second semester of calculus.
***01:750:193-194 (4,4) or 01:750:201-202 (5,5) may be substituted for 01:750:203-204 (3,3) plus 01:750:205-206 (1,1).

Life Sciences (SAS)

Course Requirement Options

Course Requirement Options

In addition to the required core courses, the Department of Molecular Biology and Biochemistry (MBB) offers two course options to students to fulfill the requirements for the major. Course option one comprises taking advanced electives and is intended to expose MBB students to different current topics in molecular biology and biochemistry. Course option two is for students interested in biophysical questions and research and comprises taking Physical Chemistry and Multivariable Calculus. Students completing course option two will also receive a minor in chemistry are encouraged to take the physical chemistry courses as they will fulfill the minor requirements. Course option two is intended to expose MBB students to different current topics in molecular biology and biochemistry.

Course Option One (13 credits)

Two 3-credit courses offered by the MBB department from the following list: 01:694:230; 01:694:390; 01:694:411; 01:694:412; 01:694:413; 01:694:420/421; 01:694:492

One 400-level, 3-credit elective course offered by any department in the Division of Life Sciences or approved by the MBB department. See degree navigator or the MBB department website for a list of approved courses.

Course Option Two (9 credits)

01:160:341-342 Physical Chemistry: Biochemical Systems (3,3) or 01:160:327-328 Physical Chemistry (3,3) (requires 01:640:251 as a prerequisite). Other combinations of Physical Chemistry are possible so see degree navigator for further details.

01:640:251 Multivariable Calculus (4)

One 3-credit course offered by the MBB department from the following list: 01:694:390; 01:694:411; 01:694:412; 01:694:413; 01:694:420/421; 01:694:492

Electives

Because the list of approved electives is changing, students should discuss their elective options directly with their departmental faculty advisers and with the MBB Undergraduate Director, Sam Gunderson. A list of currently approved electives can be found on the MBB department website. In addition to the undergraduate courses listed, advanced students are encouraged to choose electives from the School of Graduate Studies.

Life Sciences (SAS)

Research Options

Research Options

The Department of Molecular Biology and Biochemistry (MBB) offers two laboratory research options (laboratory option one and laboratory option two), as well as a nonlaboratory research option (nonlaboratory option). In all cases, students must take one of the Introduction to Molecular Biology and Biochemistry Research courses (01:694:214, 01:694:215, 01:694:315, or 01:694:316) and 01:694:383, 484 Seminars in Molecular Biology and Biochemistry. Course 01:694:215 is only for first-year honors students who have placed out of General Biology (01:119:115,116, and 117) by receiving a score of 4 or 5 on the AP biology exam. Course 01:694:214 is for first-year students who have placed out of General Biology (01:119:115,116, and 117) by receiving a score of 4 or 5 on the AP biology exam. Course 01:694:315 is for either qualified sophomores or junior students in the major. Course 01:694:316 is for either qualified sophomores or junior honors students in the major.

Laboratory Option One (>12 credits)

01:694:381,382, and 283 (Summer) or 384 (Summer) Undergraduate Laboratory Research (2-6,2-6)

01:694:481,482 Advanced Undergraduate Laboratory Research (2-6) or 01:694:495,496 Honors Laboratory Research (6,6)

A minimum of 12 credits is required in research courses. With the exception of Honors Laboratory Research (01:694:495/496), students who plan to take more than 3 credits of research a semester need approval from the MBB undergraduate chair.

Laboratory Option Two (6 to 11 credits)

01:694:381,382, and 283 (Summer) or 384 (Summer) Undergraduate Laboratory Research (2-6) or 01:694:481,482 Advanced Undergraduate Laboratory Research (2-6) or 01:694:495,496 Honors Laboratory Research (4-6,4-6)

One 3-credit course offered by the MBB department from the following list: 01:694:230 (3); 01:694:390; 01:694:411 (3); 01:694:412 (3); 01:694:413 (3); 01:694:420/421 (3); 01:694:492 (3).

A minimum accumulation of 6 credits is required in research courses. Students must take at least one MBB elective in addition to the course requirements to satisfy the requirements for this option. Note that students applying for honors must complete 4 up to 6 credits of honors coursework per semester for two semesters. With the exception of Honors Laboratory Research (01:694:495/496), students who plan to take more than 3 credits of research a semester need approval from the MBB undergraduate chair.

Nonlaboratory Option (9 credits)

01:694:489,490 Literature Research in Molecular Biology and Biochemistry (3,3). This non-lab option is almost never used and will need approval from the Undergraduate Director, Sam Gunderson

One 3-credit course offered by the MBB department from the following list: 01:694:230 (3); 01:694:390; 01:694:411 (3); 01:694:412 (3); 01:694:413 (3); 01:694:420/421 (3); 01:694:492 (3).

Students must take at least one MBB elective in addition to the course requirements to satisfy the requirements for this option. Students taking this option may not apply for departmental honors.

Life Sciences (SAS)

Departmental Honors Program

Departmental Honors Program

To qualify, a student must have attained, at the end of the junior year, a cumulative grade-point average of at least 3.4 and a grade-point average of 3.4 or better in courses required for the major. Exceptional students not meeting these criteria but wishing to apply for honors research may petition the Department of Molecular Biology and Biochemistry at the beginning of their senior year. Students accepted into the program are expected to complete two semesters (6 credits per semester) of honors coursework. A written honors thesis and an oral thesis presentation are required. Students enrolled in 01:694:495,496 Honors Laboratory Research or any of the various school honors programs are eligible to receive departmental honors at the time of graduation.

Life Sciences (SAS)

Courses

Courses

01:694:214 ***Introduction to Molecular Biology Research (3)***
Basic principles and methods of research, followed by a research project: analyses of molecular clones from eukaryotic cDNA libraries. Description of research opportunities available to undergraduates at the university.
Prerequisites: For first-year students only who have placed out of General Biology (01:119:115,116, and 117) with AP credits, and 01:160:161 or 01:160:163. Corequisite: 01:160:162 or 164.

01:694:215 ***Honors Introduction to Molecular Biology and Biochemistry Research (4)***
Basic principles and methods of research, followed by a research project: isolation and analyses of transcriptional regulatory mutants in yeast. Description of research opportunities that are available to undergraduates at the university.
Prerequisite: Limited only to first-year SAS Honors Program or Honors College students who have placed out of General Biology (01:119:115,116, and 117) with AP credits. Corequisites: 01:160:161 or 01:160:163 (or AP credits) and 01:640:135 or 01:640:151 (or AP credits).

01:694:230 ***Analytical Methods in Biology (3)***
Mathematical methods and tools to analyze and interpret biological and biomedical data, including probability theory; Bayes Theorem; the binomial, Poisson, and normal distributions; limit theorems; error analysis; tests of statistical significance; parameter estimation; curve fitting; sampling techniques; random number generation; and Monte Carlo methods. Analysis of sequencing and microarray data, such as sequence alignment, phylogeny inference, population structure, selection, and human migration.
Prerequisites: 01:119:115-116 and 01:640:135 or 151.

01:694:281,282 *Sophomore Laboratory Research (2-6,2-6). 281 is Fall, 282 is Spring*
Research project in the laboratory of a faculty member. Written report of research carried out during each semester required. Credits in this course cannot be used toward the required research credits for laboratory option. Students must complete a special permission form and have it signed by their research advisor and then send the signed form to the Undergraduate Director (Sam Gunderson) before they can register for the course.

01:694:283 *01:694:283 Undergraduate Laboratory Research (2-6). Summer semester*
Independent research project in the laboratory of a faculty member. A written report of research carried out during each semester required by the end of each semester.
Typically for rising Juniors and Seniors. Students must complete a special permission form and have it signed by their research advisor and then send the signed form to the Undergraduate Director (Sam Gunderson) before they can register for the course.

Prerequisite: Students must complete a special permission form and have it signed by their research and MBB faculty mentors before they can register of the course.

01:694:301 *Introductory Biochemistry and Molecular Biology (3)*
Chemistry and metabolism of proteins, carbohydrates, lipids, nucleic acids, and other biologically important compounds.
Prerequisite: 01:160:209 or 307. Not for students majoring in molecular biology and biochemistry. Credit not given for both this course and 01:694:407, 11:115:301, or 11:115:403.

01:694:313 *Introductory Biochemistry Laboratory (1)*
Techniques used in research, clinical, and food laboratories, including tests of biological materials, methods of separation, and determination of enzyme activities.
Lab. 3 hrs. Pre- or corequisite: 01:694:301. Not for students majoring in molecular biology and biochemistry.

01:694:315 *Introduction to Molecular Biology and Biochemistry Research (3)*
Basic principles and methods of research, followed by a research project: analyses of molecular clones from eukaryotic cDNA libraries. Description of research opportunities at the university available to undergraduates.
Pre- or corequisites: 01:119:115,116, and 117; and 01:160:161-162, 171 or 01:160:163-164, 171. Credit not given for both this course and 01:447:315, 01:694:214, 215, or 316. Open only to MBB majors.

01:694:316 *Honors Introduction to Molecular Biology, Biochemistry, Genetics Research (4)*
Basic principles and methods of research in molecular biology, biochemistry, and genetics, followed by a research project: isolation and analyses of transcriptional regulatory mutants in yeast. Description of research opportunities that are available to undergraduates at the university.
Prerequisites: 01:119:116 and (01:160:162 or 01:160:164). For MBB or genetics majors only or those planning on being MBB or genetics majors. Special permission required.

01:694:381,382 *Undergraduate Laboratory Research (3-6,3-6). 381 is Fall, 382 is Spring*
Research project in the laboratory of a faculty member. Written report of research carried out during each semester required. Students must complete a special permission form and have it signed by their research advisor and then send the signed form to the Undergraduate Director (Sam Gunderson) before they can register for the course.

01:694:383 *Molecular Biology and Biochemistry Seminar: Careers in Science (1)*
Discussion of career options in the life sciences, finding a research laboratory, performing literature searches, reading a scientific paper, and creating posters and abstracts. This course should be taken in the beginning of the third year.
Open to MBB majors only.

01:694:384 *Undergraduate Laboratory Research (1-6). Summer semester*
Independent research project in the laboratory of a faculty member. A written report of research carried out during each semester required by the end of each semester.
For rising Seniors. Students must complete a special permission form and have it signed by their research advisor and then send the signed form to the Undergraduate Director (Sam Gunderson) before they can register for the course.

For rising Seniors. Students must complete a special permission form and have it signed by their research advisor and then send the signed form to the Undergraduate Director (Sam Gunderson) before they can register for the course.

01:694:385 *MBB Research and Writing (3)*

Research project in the laboratory of a faculty member. Seminar on science communication. Written and oral reports of research carried out during the semester required.

Prerequisites: MBB majors only. Students need a GPA of 2.8 or better to enroll in research.

01:694:390 *Introductory Computational Biology (3)*
Disciplines of biochemistry and molecular biology and genomics all include collection and analysis of large data sets. Hands on use in a computer lab will permit students to learn and apply computer languages such as Python and R to analyze large data including for example DNA mutations and structural variations (SVs), RNA-seq and ChIP-seq as part of understanding genes and gene regulation.
Prerequisite: 01:447:380 or 01:447:384

01:694:395 *Biochemistry for Life Sciences (3)*
The course is intended for life science majors and takes a holistic approach to Biochemistry. You will learn the basics of proteins, enzymology, nucleic acids and metabolism and use these as foundations to discuss exemplary metabolic pathways for their importance to homeostasis and, when dysregulated, to disease including observable phenotypes and what current strategies are used to treat these disorders. Coursework will consist of quizzes, homework, exams and one graded paper.

Prerequisites: 01:160:307 or 01:160:315

01:694:407 *Biochemistry (3)*
Protein structure and function, structure of lipids, membranes and carbohydrates, catalysis of biochemical reactions, intermediary metabolism, oxidative phosphorylation, membrane transport, lipid metabolism, signal transduction, photosynthesis, protein secretion, targeting and turnover, nitrogen, amino acid, and nucleotide metabolism.
Pre- or corequisites: 01:160:307-308 or 315-316. Credit not given for both 01:694:407 and 01:694:301, 11:115:301, or 11:115:403.

01:694:408 *Molecular Biology and Biochemistry (3)*
Disciplines of biochemistry and molecular biology as interlocking and mutually complementary fields of study. Lectures on structure of DNA, RNA, recombinant DNA approaches, DNA replication, repair and recombination, mobile genetic elements, transcription, gene regulation, RNA splicing, translation, and viral gene expression.
Prerequisite: 01:694:407 or 01:694:301 or 01:694:395 or 11:115:403. Credit not given for both 01:694:408 and 01:146:478 or 11:126:481.

01:694:411 *Molecular Pathways and Signal Transduction (3)*
Lectures and discussion of current research areas of advanced molecular and structural biology: transcription, posttranscriptional regulation, cell cycle, neurobiology, protein folding, macromolecular recognition, and molecular virology.
Pre- or corequisites: 01:694:407 and 408, or 01:447:384-385 or 11:115:403-404 or 11:126:481.

01:694:412 *Proteomics and Functional Genomics (3)*
Survey of modern techniques of protein biochemistry, bioinformatics, proteomics, and functional genomics, including basic concepts of protein structure and function, protein folding, protein characterization and purification, enzyme kinetics, NMR and X-ray crystallography, mass spectrometry, yeast two hybrid, and various techniques and approaches to functional and structural genomics.
Prerequisites: [(01:694:301 OR 01:694:407 OR 01:694:395) AND (01:447:380) OR (01:447:384)]

01:694:413 *Chromatin and Epigenomics (3)*

Introduction to chromatin dynamics, particularly the structural and biochemical modifications of chromatin that underlie epigenetic states and their effects on gene expression and development.

Pre- or corequisites: Prerequisite: 01:694:408 or 01:146:478 or 01:447:385.

01:694:420,421 *Special Topics in Molecular Biology and Biochemistry (3,3)*
Directed reading and discussion of selected topics of special interest in molecular biology and biochemistry. Topics will vary according to semester and/or instructor.
Pre- or corequisites: [(01:694:301 or 01:694:407) and (01:447:380 or (01:447:384)] or equivalent.

01:694:481,482 *Advanced Undergraduate Laboratory Research (BA, BA). 481 is Fall, 482 is Spring.*
Research project in the laboratory of a faculty member. A written report of research carried out during each semester is required. Oral presentations of student research are required in 01:694:484.

01:694:484 *Molecular Biology and Biochemistry Seminar: Research Presentations (1)*
Oral presentation of student's own research results and the research interests of the laboratory with which the student is associated. Presentation at a required poster session.
Students should take this course in the spring semester of their senior year. MBB majors only.

01:694:489,490 *Literature Research in Molecular Biology and Biochemistry (1-3,1-3)*
Literature research projects on a selected subject under the direction of a faculty member. A written report of research carried out during each semester is required. Oral presentations of student research are required in 01:694:484. This course is rarely used, therefore contact the Undergraduate Director if you are considering to take this course.
Prerequisites: 01:694:214, 215 or 315, 407, 408, and 383.

01:694:492 ***Gene Regulation: Clocks to Cancer (3)***
Explanation of MBB as an experimental science and how molecular biologists know what they know. Covers all aspects of gene regulation from transcription to protein modification to explain how 25,000 human genes can make millions of different protein isoforms and mRNA and ncRNA. Mechanisms of molecular clocks and cancer addressed in terms of gene regulation complexity,feedback loops and rate-limiting steps with emphasis on the methods, experimental design,
Prerequisites:(01:694:407 BIOCHEM) OR (01:447:384 GEN ANALY) OR (11:126:481 MOLE GEN) OR (11:115:403 GEN BIOCHEM) OR (01:694:395 BioChem LS)

01:694:495,496 ***Honors Laboratory Research (BA)***
Two-semester-long Honors research project in the laboratory of a faculty member. In the Fall semester, 01:694:495 students are required to attend a seminar each week on writing a thesis and preparing an oral thesis presentation. In the Spring semester, students take 01:694:496 where they complete their Honors thesis and give their oral presentation to their honors committee.

Nursing (SON-U)

NURSING

The School of Nursing of Rutgers Biomedical and Health Sciences awards a bachelor of science degree in nursing that is offered on both the Rutgers University-Newark and Rutgers University-New Brunswick campuses and at facilities in Blackwood, New Jersey. Specific information about the program and course offerings, admissions criteria, administrative procedures, and academic regulations of the school may be obtained from the School of Nursing website at http://nursing.rutgers.edu.

Nutritional Sciences 709 (SEBS)

NUTRITIONAL SCIENCES 709

Degree: B.S.

Director: John Worobey (worobey@sebs.rutgers.edu)

Program Webpage:http://nutrition.rutgers.edu/ug.html

Managing Department Webpage:https://nutrition.rutgers.edu/

The undergraduate program in nutritional sciences provides students with a strong background in the biological, biochemical, physiological, clinical, behavioral, sociological, and psychological dimensions of human nutrition. Students must maintain a cumulative grade-point average of 2.0 or better in all required courses.

The program offers five options:

Dietetics. The dietetics option is accredited by the Accreditation Council for Education in Nutrition and Dietetics (ACEND) as a Didactic Program in Dietetics. Upon completion of this option, students are eligible to apply for an accredited-supervised practice program, including the pre-select route with our MS-DI program at Rutgers-New Brunswick, in preparation for the registration examination for dietitians. Since a master's degree is now required to be eligible to take the RDN exam, students in this option are at an advantage in being able to apply to our accredited Rutgers MS-DI program during their senior year. Completing this option also can lead to work in the food business & industry, positions in cooperative extension, WIC, EFNEP, nutrition education, or clinical research.

Food Service Administration. The option in food service administration emphasizes the managerial aspects of food service operation. Entry-level employment opportunities include food service marketing, or managing food services in schools, hotels, restaurants, industrial cafeterias, corporations, hospitals, and child or long-term care facilities.

Biomedical Nutrition. The option in nutrition emphasizes research and prepares students for graduate study in the life sciences and medical, dental, and veterinary studies, as well as for immediate employment in the biomedical industry.

Community Nutrition. This option addresses the growing need for nutrition professionals to work with youth in structured organizations at the local, state, and national level such as 4-H, WIC, cooperative extension, after-school care, day care, environmental education, and programs for homeless children.

Nutritional Sciences 709 (SEBS)

Learning Goals

Learning Goals

Through completion of the program in nutritional sciences, graduates will be prepared for supervised practice in dietetics, graduate school, or employment by focusing upon the biological, social science, and community principles of food and nutrition coursework.

For overall nutritional sciences program learning goals as well as learning goals specific to each of the five options, see the program webpage: http://nutrition.rutgers.edu/ug.html.

Nutritional Sciences 709 (SEBS)

Entry Requirements for the Major

Entry Requirements for the Major

Nutritional sciences majors (other than Dietetics) are required to take the following courses before acceptance into an option:

- 01:160:161, 162, 171
- 01:119:115-116, 117
- 11:709:255

A grade-point average (GPA) greater than 2.5 is required in these courses for admission into the dietetics and biomedical nutrition options. Students with a GPA less than 2.5 are eligible for admission into the community nutrition and food service administration options. Students must achieve grades of C or better in all required biological sciences, biochemistry, chemistry, and nutrition courses in order to enter advanced courses in nutritional sciences.

Admission to the **Dietetics Option** requires the following:

- General Chemistry I, II and Lab (01:160:161; 01:160:162; 01:160:171)
- Anatomy and Physiology I and II (01:119:127; 01:119:128)
- Principles of Biology (01:119:103)
- Nutrition and Health (11:709:255)
- GPA of 2.5 or higher in the above courses

Nutritional Sciences 709 (SEBS)

Graduation Requirements for the Major

Graduation Requirements for the Major

For an up-to-date description of nutritional sciences major requirements, courses, and course sequences, please refer to the program webpage at https://nutrition.rutgers.edu/undergraduate.

SEBS UNDERGRADUATE CORE CURRICULUM (39 credits)

Contemporary Challenges (6 credits) *Two courses, one in each of the Contemporary Challenges areas: Diversities and Social Inequalities* [CC-D] *and Our Common Future* [CC-O]

Experiential Learning (3 credits) *Students must participate in a certified experience that meets this goal* [EL]

Natural Sciences (6 credits) *Students must take two courses, one each in two of the following areas: physical, biological, or environmental sciences* [NS]

Historical Analysis (3 credits) *Students must take one course* [HST]

Social Analysis (6 credits) *SEBS students must complete two courses, one in either social/cultural analysis or economic analysis, and one in governmental and regulatory analysis* [SCL]

Arts and Humanities (3 credits) *Students must complete one course* [AH]

Writing and Communication (6 credits) *Students must take 01:355:101 or its equivalent* [WC] *and one course that fulfills the learning goal, communicate effectively in modes appropriate to a discipline or area of inquiry* [WCD].

Quantitative and Formal Reasoning (6 credits) *Students must take two courses* [QQ; QR]

Graduation Requirements for the Major (64-88 credits)

PROFICIENCY IN NUTRITIONAL SCIENCES (22 credits)

A. REQUIRED COURSES

Students are required to have placed at the precalculus level or above to take the required biology and chemistry courses.

01:160:161 General Chemistry I (4) [NS]
01:160:162 General Chemistry II (4)
01:160:171 Introduction to Experimentation (1)
11:709:255 Nutrition and Health (3)
Certain Biological Sciences courses (see options below)

Students must achieve a GPA of 2.5 or better across these courses to be admitted to the Nutrition or Dietetics options.

B. OPTIONS IN NUTRITIONAL SCIENCES

1. Dietetics (74-75)

11:709:102 Careers in Nutrition (1)
11:709:201 Culinary Nutrition (3)
11:709:202 Culinary Nutrition Lab (1)
11:709:255 Nutrition and Health (3)
11:709:301 Food Safety & Sanitation in Food Service (2)
11:709:345 Nutrition through the Lifespan (3)
11:373:341 Organizational Dynamics (3) or equivalent
11:709:400 Advanced Nutrition: Macronutrients (3)
11:709:401 Advanced Nutrition: Energy & Micronutrients (3)
11:709:404 Advanced Nutrition: Clinical Research Practicum (1)
11:709:410 Dietetics Professional Practice (3)
11:709:441 Community Nutrition (3)
11:709:442 Nutrition Education & Communication (3)
11:709:448 Food Production & Management (3) [EL]
11:709:449 Food Service Lab (1) [EL]
11:709:483 Medical Nutrition Therapy I (3)
11:709:484 Nutrition Therapy Lab (1)
11:709:485 Medical Nutrition Therapy II (3)
11:709:489 Experimental Foods (4) or
11:709:493/494 Research in Nutrition (BA)
01:960:401 Basic Statistics for Research or Equivalent (3)
01:119:103 Principles of Biology (4)
01:119:127 Anatomy and Physiology I (4)
01:119:128 Anatomy and Physiology II (4)

01:160:161 General Chemistry I (4)
01:160:162 General Chemistry II (4)
01:160:171 Introduction to Experimentation Lab (1)
01:160:209 Elementary Organic Chemistry (3)
11:115:301 Introduction to Biochemistry (3) or 01:694:301 Introduction to Biochemistry and Molecular Biology (3)

Many of the science courses have prerequisites. Please see catalog descriptions. Students must achieve a C or better in all required biological sciences, biochemistry, chemistry, and nutrition courses before taking 709:400, 401, and 498.

2. Biomedical Nutrition (53.5-61.5)

11:709:400 Advanced Nutrition I (3)
11:709:401 Advanced Nutrition II (3)
11:709:427 Obesity: Biology, Behavior, and Management (3) or 11:709:443 Methods in Sensory Analysis (3) or 11:709:475 Nutrition and Fitness (3)
11:709:481 Seminar in Nutrition (1.5)
11:709:493 or 494 Research in Nutrition (3) [EL]
11:067:300 Integrative Physiology (4) or 01:146:356, 357 Systems Physiology, Lab (3,1)
01:160:307-308, 311 Organic Chemistry, Lab (4,4,2)
01:119:115-116 General Biology I, II (4,4) [NS]
01:116:117 Biological Research Laboratory (2)
01:447:380 Genetics (4)
01:640:135 Calculus I (4) or equivalent [QQ]
11:115:301 Introductory Biochemistry (3) or 11:694:301 Introductory Biochemistry and Molecular Biology (3) or 11:115:403-404 General Biochemistry (4,4) or 01:694:407-408 Molecular Biology and Biochemistry (3,3)
01:750:193-194 Physics for the Sciences (4,4) or 01:750:203-204 General Physics (3,3) and 01:750:205-206 General Physics Lab (1,1)
01:960:401 Basic Statistics for Research (3) or equivalent [QR]
01:146 3xx/4xx or 01:447:3xx/4xx or 01:694::3xx/4xx or 11:126:3xx/4xx or 11:216:3xx/4xx or other Advanced Life Sciences course (3)

Many of the science courses have prerequisites. Please see catalog descriptions. Students must achieve a C or better in all required biological sciences, biochemistry, chemistry, and nutrition courses before taking 709:400, 401, and 498.

3. Food Service Administration (29-31)

11:709:201,202 Culinary Nutrition, Lab (3,1)
11:709:302 Food Safety and Sanitation in Food Service (2)
11:709:448 Food Production & Management (3) [EL]
11:709:449 Food Service Lab (1) [EL]
01:640:115 Precalculus or equivalent (4) (QQ)
01:119:115-116 General Biology I, II (4,4) [NS]
01:119:117 Biological Research Laboratory (2)
11:373:121 Principles and Applications of Microeconomics (3) or equivalent [SCL]
11:373:121 Principles and Applications of Macroeconomics (3) or equivalent [SCL]
33:010:272 Introduction to Financial Accounting (3)

11:680:201,202 Introduction to Microbiology, Lab (3,1) or 01:119:131,132 Microbiology for the Health Sciences, Lab (3,1)
11:373:341 Organizational Dynamics (3) or equivalent

12 Credits selected from:
11:709:441 Community Nutrition (3)
11:709:442 Nutrition Communication (3)
11:709:443 Methods in Sensory Analysis (3)
01:355:203 Business Writing Essentials (3) [WCD]
11:373:231 Introduction to Marketing (3)
11:373:331 Economics of Food Marketing Systems (3)
11:373:241 Introduction to Management (3)
11:373:371 Food, Health, and Safety Policy (3)
11:375:403 Principles of Epidemiology (3)
11:400:304 Food Analysis (4)
11:400:412 Food Product Development (3)
33:011:201 Introduction to Management for Nonbusiness Majors (3)
33:011:202 Introduction to Marketing for Nonbusiness Majors (3)
33:011:203 Introduction to Finance for Nonbusiness Majors (3)
33:011:204 Principles of Business Law for Nonbusiness Majors (3)

4. Community Nutrition (51-52)

11:709:102 Careers in Nutrition (1)
11:709:201 Culinary Nutrition (3)
11:709:202 Culinary Nutrition Lab (1)
11:709:235 or 475 Introduction to Sports Nutrition or Nutrition & Fitness (3)
11:709:245 Food Customs & Nutrition Equity (3)
11:709:255 Nutrition & Health (3)
11:709:301 Food Safety & Sanitation (2)
11:709:448 Food Production & Management, (3) [EL]
11:709:449 Food Service Lab (1) [EL]
11:709:345 Nutrition through the Lifespan (3)
11:709:441 Community Nutrition (3)
11:709:442 Nutrition Education and Communication (3)
11:709:489 Experimental Foods (4)
01:640:115 Precalculus (4) or Calculus
01:119:103 Principles of Bio (4) (or 01:119:115-117)
01:160:161, 101 General Chemistry I & Recitation (4, 1)
01:160:162, 102 General Chemistry II & Recitation (4, 1)
01:160:171 Introduction to Experimentation Lab (1)
01:160:209 Elementary Organic Chemistry (3)
01:119:127-128 Anatomy and Physiology I & II (4, 4) (or 11:067:300 or 01:146:356, 357)

01:960:401 Basic Statistics for Research (3) or equivalent
01:830:101 General Psychology (3)
01:920:272 Sociology of the Family (3)

Organizational Leadership 713 (SAS)

ORGANIZATIONAL LEADERSHIP 713

Organizational Leadership Program, School of Arts and Sciences

Website: https://olp.rutgers.edu

Program Director: Arnold G. Hyndman

Associate Director: Michelle R. Jefferson

Program Committee:

Timothy Grimm, Adjunct Instructor; Ph.D., Temple

Arnold G. Hyndman, Cell Biology and Neuroscience; Ph.D., California (Los Angeles)

Michelle Jefferson, Associate Dean; Ph.D., Seton Hall

Organizational leadership is an innovative and challenging minor open to Rutgers University-New Brunswick undergraduate students. Rutgers has a rich body of courses that provide leadership instruction. The minor in organizational leadership gathers some of these courses into a curriculum designed to prepare students to assume a leadership role in any organization.

Program Goals

Program Goals

Students who minor in organizational leadership may pursue any major. The minor features both theoretical and practical components. For its theoretical segments, the minor draws from courses offered by the Organizational Leadership Program, the School of Arts and Sciences, departments in the Rutgers Business School: Undergraduate-New Brunswick, and the School of Communication and Information. For its practical components, the minor utilizes Rutgers student organizations and student's connections to the workplace through their jobs or internships, as well as other organizational relationships they have developed. The minor's objectives are to cultivate and enhance student's organizational understanding, interpersonal awareness, and leadership skills.

The minor's theory courses focus on formulating an ethically responsible vision that promotes organizational excellence; understanding change; and how to persuade individuals and groups to work toward a common goal. Students are encouraged to supplement coursework through extracurricular programs that provide an opportunity for the student to interact effectively with their cohorts and to apply their knowledge of organizational leadership.

Organizational Leadership 713 (SAS)

Learning Goals

Learning Goals

1. Students will know the leading terms, concepts, theoretical perspectives, and current trends in organizational leadership.

a. Students will be able to relate leadership theory in the context of other academic experiences.

b. Students will demonstrate the ability to integrate and resynthesize leadership approaches and theories.

2. Students will use critical thinking, experiential and collaborative learning, and scholarly inquiry to articulate an understanding related to the organizational processes and the behavior of people in groups.

3. Students will understand the importance of formulating an ethically responsible vision that promotes organizational excellence, and the importance of persuading individuals and groups to work toward a common goal to organizational success.

4. Students will learn to practically apply theory to real-world situations.

5. Students will demonstrate an understanding of basic leadership concepts and theories in written form.

6. Students will demonstrate an understanding of the components of a research paper in the field of leadership.

7. Students will demonstrate an ability to write a research paper in the field of leadership.

Organizational Leadership 713 (SAS)

Minor Requirements

Minor Requirements

The minor in organizational leadership consists of 20 credits (9 of which must be at the 300 level or above) divided into three foundation courses, three theory courses, and two applications courses. Students must earn a grade of C or better in all required courses to receive credit.

Prerequisites

Students must complete 01:713:202 Introduction to Organizational Leadership with a grade of C or better before they can declare organizational leadership as a minor. Students with 90 credits or more may not enroll in 01:713:202 Introduction to Organizational Leadership.

Required Courses

- 01:730:101 Logic, Reason, and Persuasion (3) or 01:730:201 Introduction to Logic (3) or 01:730:202 Introduction to Logic (4) or 01:730:109 Introduction to Formal Reasoning and Decision-Making (4)

- 01:713:202 Introduction to Organizational Leadership (3)
- 01:713:303 Intermediate Organizational Applications (3) (prerequisite 01:713:202)
- 01:713:404 Advanced Organizational Applications with Capstone Seminar (3) (prerequisite 01:713:303)
- One course from Leadership Theory I
- One course from Leadership Theory II
- One course from Leadership Theory III

Leadership Theory I: Formulating an Ethically Responsible Vision
All students must select one 3-credit course from the list below:

01:730:105 Current Moral and Social Issues
01:730:107 Introduction to Ethics
01:730:249 Medical Ethics
01:730:441 Ethical Theory
01:730:442 Moral Responsibility
03:691:392 Military Leadership and Ethics
03:691:490 Leadership and Ethics
04:567:480 Media Ethics and the Law
10:652:301 Medical Ethics
10:501:356 Health Care Ethics and the Law
10:832:356 Public Health Law and Ethics
10:833:480 Ethics in Planning and Public Policy
11:115:321 Ethical Issues in Biochemistry Research
11:374:289 Sustainable Food: Politics, Policy, and Ethics
11:607:385 The Ethical Leader
33:522:334 Business Ethics

Leadership Theory II: Understanding Organizational Change
All students must select one 3-credit course from the list below:

01:014:353 Black Community Law and Social Change
01:070:201 Evolution and Human Behavior
01:450:363 Geography of Development
01:450:370 Climate Change and Society
01:574:310 Gender and Social Change in Korea
01:713:308 Leadership in a Diverse Workplace
01:790:305 Public Policy Formation
01:790:312 Change in Latin America
01:790:333 Race, Ethnicity, and Politics
01:790:355 Women and Public Policy
01:790:363 Conflict Resolution in World Politics
01:790:386 Political Change in China
01:830:373 Organizational and Personnel Psychology
01:920:370 Global Structures and Change
01:988:103 Knowledge and Power: Issues in Women's Leadership
04:189:352 Self and Society in Virtual Contexts

Leadership Theory III: Persuading Others to Work for a Common Goal
All students must select one 3-credit course from the list below:

01:220:441 Industrial Organizations
01:790:292 Introduction to Critical Intelligence Studies
01:790:348 Psychology and Politics
01:830:321 Social Psychology
01:830:364 Motivation and Emotion
04:189:101 Introduction to Communication
04:189:151 Virtual Team Dynamics
04:192:359 Persuasive Communication
04:192:380 Public Speaking
04:192:458 Leadership in Groups and Organizations
04:547:210 Management of Technological Organizations
10:762:361 Managing People and Organizations
10:843:361 Managing People and Organizations
11:607:485 Understanding Group Dynamics and Team Process
37:575:230 People, Work, and Organizations
37:575:318 Leadership in Work Organizations

For a complete list of courses see the program's website.

Organizational Leadership 713 (SAS)

Courses

Courses

01:713:202 *Introduction to Organizational Leadership (3)*
Examines the nature of leadership, the processes that underpin group decisions, the basic features of organizational culture, and how leaders prepare themselves to meet challenges. Students develop strategies for integrating and sharing knowledge through extracurricular projects.

01:713:303 *Intermediate Organizational Applications (3)*
Students assume leadership positions or become active members in a university organization and maintain a log of activities. Students write an 8-to-10-page essay on a topic in organizational leadership.
Prerequisite: 01:713:202. Open only to students minoring in organizational leadership.

01:713:308 *Leadership in a Diverse Workplace (3)*
Furthers the understanding of multicultural issues by expanding the focus of study from the university to the wider world of work. Exposes students to theory, research, and practice in the ways that cultural diversity is managed in organizations and social institutions. Includes an overview of perspectives on diversity, organizations and diversity, various dimensions of diversity, specific diversity cases, as well as exercises on experiencing diversity.

01:713:404 ***Advanced Organizational Applications with Capstone Seminar (3)***
Capstone experience integrates what students have learned through critical review of organizational leadership theory, and the analysis of leaders and leadership situations. Students are expected to use theoretical and practical knowledge base of leadership theory and group dynamics in the analysis of readings, class projects, a research paper, and other assignments.
Prerequisite: 01:713:303. Open only to students minoring in organizational leadership.

01:713:495 ***Independent Study in Organizational Leadership (BA)***
Independent study of topic(s) in organizational leadership.
Prerequisite: 01:713:202.

Pharmacy (PHARM)

PHARMACY

Students who wish to earn a degree in pharmacy (doctor of pharmacy) must be admitted to the Ernest Mario School of Pharmacy. See the Ernest Mario School of Pharmacy section in this catalog for further information. Students enrolled in other units at Rutgers may, with consultation and permission of their adviser in their current school, complete the preprofessional coursework outlined at the website https://pharmacy.rutgers.edu/info-for/information-prospective-students and apply for a school-to-school transfer to the Ernest Mario School of Pharmacy. Such transfers are competitive and only a limited number of spaces are available.

Philosophy 730 (SAS)

PHILOSOPHY 730

Department of Philosophy, School of Arts and Sciences

Alexander Guerrero, A.B., Harvard; Ph.D., J.D., New York

Brian Leftow, B.A., Grove City College; Ph.D., Yale

Martin Lin, B.A., New York; Ph.D., Chicago

Jill North, B.A., Yale; Ph.D., Rutgers

Michael Ostuka , B.A., Yale, B. Phil, Oxford; D. Phil, Oxford

Carolina Sartorio , B.A., Buenos Aires, Argentina; Ph.D., Massachusetts Institute of Technology

Assisant Professors:

Zoe Jenkin, B.A. Williams College; Ph.D., Harvard

Jake Quilty-Dunn, B.A., Brown; Ph.D., CUNY

Regular Faculty, Partial Appointment:

Mark Budolfson, B.A.,Northern Arizona; Ph.D., Princeton

Nir Eyal, B.A., Tel Aviv; D. Phil, Oxford

Daniel Hausman, B.A., Cambridge;M. Phil, Ph.D., Columbia

Alec Walen, B.A., Maryland; Ph.D., Pittsburgh, J.D., Harvard

Assistant Teaching Professors:

Richard Fry , B.A., Arizona; Ph.D., Georgetown

Justin Kalef, B.A., Victoria (Canada), M.A., Leeds (UK); Ph.D., Victoria (Canada)

Edward McCrossin, B.A., Michigan; Ph.D., Yale

Jerry Piven, B.A., M.A., NYU; MPhil, Ph.D., Syracuse University

Alexander Skiles, B.A., M.A., Georgia; Ph.D., Notre Dame

Emeritus:
Martha Brandt Bolton, B.A., Ohio Wesleyan; Ph.D., Michigan

Robert Bolton, A.B., Princeton; B.Lit., Oxford; Ph.D., Michigan

Martin Bunzl, B.A., Ph.D., Minnesota

Alvin Goldman, B.A., Columbia; Ph.D., Princeton

Douglas Husak, B.A., Denison; Ph.D. and J.D., Ohio State

Peter Klein, B.A., Earlham Colleg; M.A., Ph.D., Yale

Robert Matthews, B.S., M.S., Cornell; M.A., Georgetown; Ph.D., Cornell

Howard McGary, Jr., B.A., California (Los Angeles); Ph.D., Minnesota

Holly Smith, B.A.m Wellesley College; M.A., Ph.D., Michigan

Stephen Stich, B.A., Pennsylvania; Ph.D., Princeton

Larry S. Temkin, B.A., Wisconsin (Madison); Ph.D., Princeton

Philosophy 730 (SAS)

Learning Goals

Learning Goals

Students will be able to employ the critical skills necessary for evaluating ideas and arguments; construct coherent arguments in support of their own views; present views that differ from their own accurately and fairly; and write clearly and in an organized manner.

Minors will in addition grasp philosophical issues in a range of intellectual domains.

Majors will in addition develop an appreciation of fundamental questions concerning reality, knowledge, and value, and the analytical resources necessary to engage these questions; an understanding of historical and contemporary attempts to answer these questions; a competence in formal reasoning techniques; and a broad-based foundation for graduate study in philosophy and for professional disciplines such as law, medicine, business, and government.

Philosophy 730 (SAS)

Major Requirements

Major Requirements

Students must pass a minimum of 11 classroom courses of 3 or more credits each in philosophy to earn the major. At least one of these courses must be at the 200 level, excluding 201, 202, 295, and 296. At least six of these courses must be at the 300 or 400 level, excluding 495 and 496. No more than one D grade can be applied toward the major. Among these courses must be the following:

1. One semester of logic from among the following:

01:730:109 Introduction to Formal Reasoning and Decision Making (3)

01:730:201 Introduction to Logic (3)

01:730:315 Applied Symbolic Logic (3)

01:730:407 Intermediate Logic I (3)

01:730:408 Intermediate Logic II (3)

2. One semester of ancient or medieval philosophy from among the following:

01:190:322 Greek Political Philosophy (3)

01:190:353 Aristotle (3)

01:730:301 Socrates and Plato (3)

01:730:302 Plato and Aristotle (3)

01:730:304 The Origins of Medieval Philosophy (3)

01:730:305 Philosophy in the High Middle Ages (3)

01:730:306 Between Medieval and Modern Philosophy (3)

01:730:311 Classical Jewish Philosophy (3)

01:730:352 Plato (3)

01:730:401 Plato (3)

01:730:402 Aristotle (3)

01:730:403 Ancient Philosophy after Aristotle (3)

3. One semester of modern philosophy from among the following:

01:730:307 Descartes, Locke, and the 17th Century (3)

01:730:308 Hume, Kant, and the 18th Century (3)

01:730:309 Nineteenth Century Philosophy (3)

01:730:404 Spinoza (3)

01:730:405 Kant (3)

01:730:406 Nietzsche (3)

01:730:416 Leibniz (3)

01:730:417 Hume (3)

4. One semester of advanced ethics or political philosophy from among the following:

01:730:330 Ethics of Harming and Helping (3)

01:730:341 Ethics through History (3)

01:730:342 Social and Political Philosophy through History (3)

01:730:441 Ethical Theory (3)

01:730:442 Moral Responsibility (3)

01:730:445 Topics in Social and Political Philosophy (3)

01:730:450 Topics in Moral Philosophy (3)

01:730:459 Advanced Seminar in Ethics (3)

01:730:470 Ethics and Practical Reason (3)

5. Two courses from among the following, at least one of which must be at the 400 level:

01:730:210 Philosophy of Language (3)

01:730:215 Introduction to Metaphysics (3)

01:730:220 Theory of Knowledge (3)

01:730:225 Introduction to the Philosophy of Science (3)

01:730:226 Introduction to the Philosophy of Physics (3)

01:730:256 Rhymes and Reasons: Hip Hop and Philosophy (3)

01:730:303 Metaphilosophy (3)

01:730:319 Philosophy of Mathematics (3)

01:730:320 Speech Acts (3)

01:730:327 Meaning and Numbering (3)

01:730:328 Philosophy of Psychology (3)

01:730:329 Minds, Machines, and Persons (3)

01:730:360 Philosophical Aspects of Cognitive Science (3)

01:730:370 Contemporary Philosophy of Religion (3)

01:730:410 History of Analytic Philosophy (3)

01:730:412 Epistemology (3)

01:730:413 Social Epistemology (3)

01:730:415 Metaphysics (3)

01:730:418 Philosophy of Mind (3)

01:730:419 Philosophy of Perception (3)

01:730:420 Philosophy of Language (3)

01:730:421 Semantics for Natural Languages (3)

01:730:422 Philosophy of Logic (3)

01:730:423 Foundations of Mathematics (3)

01:730:424 Logic of Decision (3)

01:730:425 Philosophy of Science (3)

01:730:426 Philosophy of Physics (3)

01:730:427 Philosophy of Social Sciences (3)

01:730:428 Topics in the Philosophy of Psychology (3)

01:730:429 Philosophy of Biology (3)

01:730:435 Philosophy of History (3)

A student may petition the department to substitute other courses for those on this list to satisfy any of the above requirements.

Philosophy 730 (SAS)

Minor in Philosophy Requirements

Minor in Philosophy Requirements

Students must pass a minimum of six philosophy classroom courses of 3 or more credits each to earn a minor. At least three of the courses must be at the 300 or 400 level. No more than two courses from outside of the department can be transferred toward the minor. No more than one D grade can be applied toward the minor.

Philosophy 730 (SAS)

Minor in Philosophy, Politics, and Economics

Minor in Philosophy, Politics, and Economics

The minor in philosophy, politics, and economics (PPE) is designed to engage students with the practical problems of organizing and running human society. The minor stands at the confluence of three major fields of study--philosophy, political science, and economics--and combines elements of these into a coherent framework in which to address questions about the nature of citizenship and the role individuals can and must play in making critical decisions facing society.

Students pursuing the PPE minor are expected to develop the ability to read and listen critically, to reason analytically concerning questions of public policy (especially economic policy), to engage in thoughtful moral judgment, and to write and speak clearly. The minor combines the best of the three participating fields: confronting the ethical issues of philosophy, the policy questions of political science, and the quantitative analytical problems of economics.

Generally, students taking the PPE minor will be majoring in one of the three included disciplines: philosophy, political science, or economics, and the courses that can be used toward the PPE minor taken in the student's major department may be used for both the major and the PPE minor. In other words, while the minor requires nine courses (27 credits), students majoring in philosophy, political science, or economics will only need to take six courses (18 credits) outside the major.

Learning Goals

At the end of this program students will be able to:

- Identify key factors in evaluating the morality of individual behavior and the legitimacy of regulations about that behavior.
- Explain the process through which the public regulation of individuals and groups occurs.
- Evaluate the economic ability of institutions to provide for the common welfare.
- Critique boundaries between private market forces and their just and efficient public regulation.

Minor Requirements

The minor requires students to take 3 courses (9 credits) in each of three fields of study. The course offerings in each field are structured to give students a solid grounding in each field, as well as a taste of what more advanced work in the field involves.

Students are permitted to bring in only 3 credits for each field from outside of Rutgers University-New Brunswick. In other words, at least two of the three classes for each field must be taken at Rutgers University-New Brunswick; only one course in each field can come from transfer credit, AP credit, study abroad, or other Rutgers campuses. Courses that are cross-listed may be used to satisfy only one requirement.

All courses must be completed with a grade of C or better in order to be used for the minor.

Below are the requirements for each field, which must be completed whether the student majors in the field or pursues them as other parts of the minor.

Requirements for the Economics Component of the PPE Minor (three courses, 9 credits)

Both of these two introductory courses:

01:220:102 Introduction to Microeconomics
01:220:103 Introduction to Macroeconomics

One course from the following list:

01:220:120 Inequality
01:220:327 History of Economic Thought
01:220:331 Economics of Crime
01:220:390 Choice and Strategy in Politics (Prerequisite: 01:220:102)
01:220:402 Labor Economics (Prerequisites: 01:220:320 and 01:220:322)
01:220:417 Health Economics (Prerequisites: 01:220:320 and 01:220:322)
01:220:432 Environmental Economics (Prerequisites: 01:220:320 and 01:220:322)
01:220:460 Public Economics (Prerequisites: 01:220:320 and 01:220:322)
01:220:463 Economics of Taxation (Prerequisites: 01:220:320 and 01:220:322)
01:220:482 Game Theory and Economics

Requirements for the Philosophy Component of the PPE Minor (three courses, 9 credits)

Total of three philosophy courses, no more than one at the 100 level, and two from the following list, at least one of which must be at a 300 level or higher (other courses on a case-by-case basis):

01:730:105/106 Current Moral and Social Issues
01:730:107 Introduction Ethics
01:730:249 Bioethics
01:730:250 Environmental Ethics
01:730:251 Ethics and Business
01:730:255 Introduction to Social and Political Philosophy
01:730:330 Ethics of Harming and Helping
01:730:341 Ethics through History
01:730:342 Social and Political Philosophy through History

01:730:343 Marx and Marxism
01:730:345 Philosophy and the Law
01:730:347 Philosophical Issues in Feminism
01:730:358 Philosophy of Law
01:730:371 Philosophies of Death and Dying
01:730:441 Ethical Theory
01:730:442 Moral Responsibility
01:730:445 Topics in Social and Political Philosophy
01:730:450 Topics in Moral Philosophy
01:730:459 Advanced Seminar in Ethics
01:730:470 Ethics and Practical Reason

Requirements for the Political Science Component of the PPE Minor (three courses, 9 credits)

One course in political theory, from the following list:

01:790:101 Nature of Politics
01:790:365 Gender and Political Theory
01:790:371 Western Tradition: Plato to Machiavelli
01:790:372 Western Tradition: Hobbes to Mill
01:790:373 Legal Philosophy Rights and Justice
01:790:374 Democratic Political Philosophy
01:790:375 American Political Thought to 1865
01:790:376 American Political Thought from 1865
01:790:472 Religion and Politics
01:790:473 Critics of Modernity
01:790:477 Critical Theory and Society

Two courses in policy or group relations, from the following list:

01:790:305 Public Policy Formation
01:790:318 Comparative Public Policy
01:790:319 Issues of American Foreign Policy
01:790:320 Politics and Social Policy: Lessons from Europe
01:790:322 Strategy in International Relations
01:790:323 Defense Policy
01:790:330 Interest Groups
01:790:333 Race, Ethnicity, and Politics
01:790:334 Politics of Black America
01:790:335 Women and American Politics
01:790:338 Government and Business
01:790:350 Environmental Policy: U.S. and International
01:790:355 Women and Public Policy
01:790:358 Globalization, Democracy, and Contemporary Capitalism
01:790:360 Gender and Politics and Global Perspective
01:790:363 Conflict Resolution in World Politics

01:790:364 Global Order
01:790:386 Political Change in China
01:790:401 American Constitutional Law I
01:790:404 Politics of Criminal Justice

Philosophy 730 (SAS)

Minor in Medical Ethics and Health Policy

Minor in Medical Ethics and Health Policy

The Medical Ethics and Health Policy Minor [21 credits] enables undergraduate students to explore the conceptual foundations of medical ethics as well as develop an appreciation of how they inform contemporary health policy in an era of major scientific innovation, technological advances, and resource constraint. Courses taken in fulfillment of the Medical Ethics and Health Policy minor cannot be double-counted to fulfill the requirements of a major. Not all courses are offered every semester.

Core: 6 credits
10:652:201 or 01:730:248 Foundations of Medical Ethics & Policy
10:652:301 or 01:730:348 Research Ethics (Pre-req: 10:652:201 or 01:730:248)

Ethics: 6 credits
Two of the following courses:
01:730:105 Current Moral and Social Issues
01:730:107 Introduction to Ethics
01:730:249 Bioethics
01:730:250 Environmental Ethics
01:730:371 Philosophies of Death and Dying
(Prereq: One course in philosophy equal to or greater than 01:730:103)
01:730:442 Moral Responsibility
01:512:229 History of Medical Ethics
01:119:154 Genetics, Law, and Social Policy
or
01:447:354 Social, Legal, and Ethical Implications of the New Genetics
(Prereq: 01:447:380 or 01:447:384)

Health Policy: 6 credits
Two of the following courses:
10:501:260 or 10:832:260 Health Care Systems*
10:501:356 Health Care Ethics and Law
10:832:252 Health and Social Justice
10:832 302 Sexual and Reproductive Health Policy
10:832:338 or 10:833:338 Health and Public Policy*
10:832:356 Public Health, Law, & Ethics
10:832:414 Culture and Health

Elective: 3 credits
Any one additional course from either the Ethics or Health Policy lists above.

*Credit issued only once for cross-listed courses.

Philosophy 730 (SAS)

Departmental Honors

Departmental Honors

The department offers students the opportunity to graduate in philosophy with departmental honors. The requirements to achieve this distinction are as follows:

1. At the time of graduation, the student must have an overall grade-point average of at least 3.0; a grade-point average within philosophy of at least 3.5; and grades of B+ or better in four 400-level courses, excluding 01:730:495 and 01:730:496.

2. The student must write a senior honors thesis of 25-45 pages (double-spaced, 12 pt. font) in order to be considered for honors.

a. The student must enroll in two semesters of the Senior Honors Thesis course (fall 01:730:495 and spring 01:730:496) in their senior year. At the time of registration for the fall Senior Honors Thesis course, the student must meet the grade-point requirements outlined in item #1, meaning students must have a minimum overall GPA of 3.0 and 3.5 within philosophy.

b. The thesis must be supervised by a tenured or tenure-track faculty member of the department or affiliated member of the department who will approve the topic and work with the student in developing his or her thesis.

c. The thesis may be a new project or based on the student's own prior research or written work for an upper-division philosophy course. If the student chooses to write a thesis based on prior written work, it is expected that the senior honors thesis be a very substantial enhancement of this prior work.

d. The student's thesis adviser will assign a letter grade to the thesis. The thesis grade along with the current GPA at the time of graduation will determine the level of honors.

e. All theses are due, without exception, to the thesis adviser, undergraduate director, and undergraduate program coordinator in electronic form by April 1 (or the last Friday of March if April 1 falls on a weekend) of the graduating year for May graduates, and by the last day of classes of fall semester classes for January graduates.

Philosophy 730 (SAS)

Courses

Courses

Courses at the 300 and 400 levels are not open to first-year students, and courses at the 400 level are not open to sophomores. Any course prerequisite can be waived with the permission of the instructor.

01:730:101 ***Logic, Reasoning, and Persuasion (3)***
Development of skills in reasoning. Consideration of what an argument is, how arguments go wrong, and what makes an argument valid. Application of techniques for clarifying meaning; evaluating and constructing arguments.

01:730:103 ***Introduction to Philosophy (3)***
Examination of fundamental philosophical issues such as the meaning and basis of moral judgments, free will and determinism, theism and atheism, knowledge and skepticism, and consciousness and the brain. Note: This course is a three-credit course certified to satisfy Core Curriculum goal AHo, but NOT certified for writing goals WCd and WCr. (Philosophy 104 is a four-credit writing intensive course certified for writing goals.)
Credit not given for both this course and 01:730:104.

01:730:104 ***Introduction to Philosophy - Writing Intensive (4)***
Examination of fundamental philosophical issues such as the meaning and basis of moral judgments, free will and determinism, theism and atheism, knowledge and skepticism, and consciousness and the brain. Note: This course is a four-credit, writing intensive course certified to satisfy Core Curriculum writing goals WCd and WCr. Philosophy 103 is a three-credit course, which is NOT certified to satisfy WCd or WCr.
Credit not given for both this course and 01:730:103.

01:730:105 ***Current Moral and Social Issues (3)***
Application of moral theory to selected contemporary issues. Possible topics include abortion, infanticide, euthanasia, punishment, equality, sexism, racism, affirmative action, privacy, obligations to the world's needy, treatment of animals, drug use, and the meaning of life.

01:730:106 ***Current Moral and Social Issues (4)***
Same as 01:730:105 with smaller weekly discussion section meetings, enabling students to develop their oral argumentative skills and to pursue issues discussed in lectures.
Credit not given for both this course and 01:730:105.

01:730:107 ***Introduction to Ethics (3)***
Exploration of basic issues in ethical theory and metaethics. Topics may include consequentialism, deontology, virtue theory, constructivism, value relativism, the objectivity of values, value skepticism, free will, and the nature of the values and practical reasons.
Credit not given for both this course and 01:730:108.

01:730:108 ***Introduction to Ethics (4)***
Same as 01:730:107 with smaller weekly discussion section meetings, enabling students to develop their oral argumentative skills and to pursue issues discussed in lectures.
Credit not given for both this course and 01:730:107.

01:730:109 ***Introduction to Formal Reasoning and Decision-Making (3)***
This course aims to introduce students to the fundamentals of logical, probabilistic, and statistical thinking, and, the basic principles of rational decision-making. It will provide basic principles for reasoning their way through the sorts of data & rhetoric encountered daily. Elementary principles of deductive logic & inference; fundamentals of inductive inference, probability, and statistics; and some basic rules for rational decision- making will be discussed & implemented.

01:730:113 ***Philosophical Questions (1.5)***
Condensed introduction to philosophy and philosophical thinking through focus on core philosophical questions in four areas: epistemology, metaphysics, ethics, and political philosophy.

01:730:140 ***Chinese Philosophy (3)***
Primary texts from influential thinkers of the pre-Qin period and some documents from the modern period. Topics include: Confucianism, Moism, Daoism, and modern China.

01:730:150 ***Special Introductory Topics in Philosophy (3)***
Introduction to philosophical thinking and method in the context of a special topic in philosophy.

01:730:164 ***Introduction to Philosophy through Film (2)***
Film as a stimulus for philosophical reflection. Issues include nature of morality, personal identity, knowledge, skepticism, free will, the problem of evil, and the good life.
This course is only taught in Winter/Summer Sessions.

01:730:201 ***Introduction to Logic (3)***
Introduction to formal logic, covering truth, functional propositional logic, and quantification theory. Emphasis on developing symbolic techniques for representing and evaluating arguments.
Credit not given for both this course and 01:730:202.

01:730:202 ***Introduction to Logic (4)***
Introduction to formal logic, covering truth, functional propositional logic, and quantification theory. Emphasis on developing symbolic techniques for representing and evaluating arguments.
Credit not given for both this course and 01:730:201.

01:730:204 ***Introduction to Classical Greek Philosophy (3)***
Introduction to the major philosophical thinkers of the ancient Greek world with special emphasis on Plato and Aristotle.
Credit not given for both this course and 01:190:208.

01:730:205 ***Introduction to Modern Philosophy (3)***
Study of the formative period of modern philosophy. Readings selected from works of Descartes, Leibniz, Spinoza, Hobbes, Locke, Berkeley, Hume, and Kant.

01:730:210 ***Philosophy of Language (3)***
Examination of central issues in the philosophy of language concerning questions of meaning and reference.
Prerequisite: 01:730:201.

01:730:215 ***Introduction to Metaphysics (3)***
Examination of central issues in metaphysics, such as free will, personal identity, the nature of time, causality, necessity, and possibility.
Credit not given if student has already taken 01:730:415.

01:730:218 ***Introduction to the Philosophy of Mind (3)***
Investigation of the nature of mind, including such questions as whether minds are or require brains, whether computers can think, and what distinguishes human mentality from that of other creatures.
Not open to students who have taken 01:730:418.

01:730:220 ***Theory of Knowledge (3)***
The nature of belief, perception, certainty, justification, and knowledge.
Credit not given if student has already taken 01:730:412.

01:730:225 ***Introduction to the Philosophy of Science (3)***
Study of scientific methodology using examples from a variety of scientific disciplines. Nature of scientific laws and theories, explanation, confirmation, objectivity, and changes in scientific knowledge.
Credit not given if student has already taken 01:730:425.

01:730:226 ***Introduction to the Philosophy of Physics (3)***
Introduction to the philosophy of physics. Possible topics include Zeno's paradoxes of motion; the truth of the physical laws; determinism of the laws; the existence of forces; the nature and existence of space and time; the structure of spacetime; and the possibility of time travel. Readings will be drawn from both physics and philosophy.
Prerequisite: 01:750:115 or 01:750:123 or 01:750:161 or 01:750:193 or 01:750:201 or 01:750:203 or 01:750:271.

01:730:242 ***Ethics of Artificial Intelligence and Other Technology (3)***
Introduction to the moral, social, and political challenges raised by artificial intelligence systems and how to address them. Discussion of how these challenges fit into more general questions about the complex and often ambivalent role of technology in human life.

01:730:248 ***Foundations of Medical Ethics and Policy (3)***
Introduction to the conceptual foundations of medical ethics, emphasizing how particular moral traditions and theories have influenced the development of policies and practices in health care and health research over time and in different setting around the world. Combines lectures with small-group casework to encourage students to "think-through" the moral and often practical challenges that arise in the practice of medicine, and health research.
Credit not given for both this course and 10:652:201.

01:730:249 ***Bioethics (3)***
Exploration of moral issues in medicine and medical research. Course will typically focus on issues raised by the creation and termination of life and include topics such as abortion, stem cell research, cloning, prenatal screening for disability, right to medical care, human experimentation, genetic enhancement and eugenics, animal experimentation, the diagnosis of death, and euthanasia. May require some thinking about issues in metaphysics, such as the nature of personal identity.

01:730:250 ***Environmental Ethics (3)***
Ethical matters concerning the environment; moral justification for coercing individuals and corporations, just distribution of resources, moral rights of animals; study of topical issues such as clean air standards, population control, land use.

01:730:251 ***Ethics and Business (3)***
Social and moral problems that arise in the context of business: profit motive, corporate social responsibility, use and abuse of corporate power, truth in advertising, consumer rights, strikes, stockholders' rights, preferential hiring.

01:730:252 ***Eating Right: The Ethics of Food Choices and Food Policy (4)***
Skill development for careful reasoning about difficult issues in life by analyzing food ethics. Includes in-depth arguments based on aesthetic, moral, cultural, or religious values and moral obligations and their consequences in everyday life.

01:730:253 ***Human Nature and Human Diversity (4)***
Critical analysis of facts, theories, and philosophical issues regarding human diversity in a variety of domains. May include: sex and gender; race; religion; diet; morality and norms; conceptions of the self; perceptions and cognition.
Credit not given for both this course and 01:185:253.

01:730:254 ***The Presocratic Philosophers (3)***
Introductory survey of the Presocratic philosophers. Emphasizes exposure to the teachings of these thinkers through the remaining fragments, while also engaging scholarly writings that introduce and contextualize the sources. All readings are in English.
Credit not given for both this course and 01:190:254.

01:730:255 ***Introduction to Social and Political Philosophy (3)***
Survey of philosophical writings on the origin and nature of the state. Topics include the individual and the state, the social order, nature and limitation of state authority, political obligation, and liberties of citizens.

01:730:256 ***Rhymes and Reasons: Hip Hop and Philosophy (3)***
Philosophical examination of the persistence and realities of America's dark ghettos, with an emphasis on what can be learned through studying hip hop rhymes and beats. Features lectures, interviews, music clips, and guest speakers including hip hop artists and prominent scholars.

01:730:258 ***Philosophy and the Black Experience (3)***
Analysis of what constitutes the black experience and analysis of issues in the black experience, such as racial integration, racial separatism, racism, and black values.

01:730:260 ***Philosophical Ideas in Literature (3)***
Philosophical issues in literary works. Topics such as freedom and determinism, conceptions and reality of the self, the quest for meaning, and the existence of evil.

01:730:261 ***Philosophical Ideas in Science Fiction (3)***
Philosophical issues in science fiction. Topics such as time travel, personal identity, the mind-body problem, nonhuman rationality, and parallel worlds.

01:730:263 ***Philosophy and the Arts (3)***
Introduction to the major issues in the philosophy of art. Topics include the definition of art, interpretation, evaluation, and the problem of the standard of taste. Texts selected from the classical period, the 18th century, and recent or contemporary authors.

01:730:264 ***Philosophical Ideas in Film (3)***
Use of film as a stimulus for philosophical reflection; investigation of film by applying the analytical rigor of philosophy. Issues to be examined include nature of morality, personal identity, knowledge, skepticism, free will, the problem of evil, and the good life.

01:730:265 ***Introduction to the Philosophy of Religion (3)***
Basic issues in the philosophy of religion, East and West: existence and nature of God; problem of evil; faith versus knowledge; mysticism and its claims; the problem of religious language; and attacks on religion by Hume, Nietzsche, Marx, and Freud.

01:730:268 ***Introduction to Existentialism (3)***
Study of the works of some recent existentialist philosophers and the ways in which their analysis of human existence affects their views of freedom, choice, and action.

01:730:295 ***Areté - Part I (1)***
Supervised process of editing of the undergraduate philosophy journal, with review of weekly submissions.
Prerequisites: At least two courses in philosophy or outstanding performance in a philosophy class.

01:730:296 ***Areté - Part II (1)***
Supervised process of editing of the undergraduate philosophy journal, with review of weekly submissions.
Prerequisites: At least two courses in philosophy or outstanding performance in a philosophy class.

01:730:297 ***Sophomore Advanced Seminar (3)***
Intensive study of some classic philosophical text (e.g., Kant's *Critique of Pure Reason)* or central philosophical question (e.g., the mind-body problem). Extensive writing of papers and discussion of reading material.
Prerequisites: Outstanding performance in at least one course in philosophy and permission of instructor.

01:730:298 ***Independent Study for minor in Medical Ethics and Health Policy (3)***
Supervised individual study of selected topics of interest with extensive reading and/or independent research project.
Prerequisites: Permission of department and (10:652:201 or 01:730:248) and (10:652:401 or 01:730:348). Credit not given for this course and 10:652:298,299.

01:730:301 ***Socrates and Plato (3)***
The thought of Socrates and Plato in the Platonic dialogues. The Socratic method; moral theory. Plato's early dialectic, theory of innate knowledge, theory of forms.
Prerequisite: One course in philosophy equal to or greater than 01:730:103.

01:730:302 ***Plato and Aristotle (3)***
Major work of Plato, such as the *Republic;* Aristotle's critical reaction and alternative theories in metaphysics, psychology, logic, ethics, and politics.
Prerequisite: One course in philosophy equal to or greater than 01:730:103.

01:730:303 ***Metaphilosophy (3)***
Examination of various modes of argumentation in the Western philosophical tradition. Specific topics of focus will vary by instructor/semester.
Prerequisites: 01:730:103 or 104 and 201, and permission of instructor. Not open to first-year students.

01:730:304 ***The Origins of Medieval Philosophy (3)***
Emergence of a distinct medieval philosophical style (Philo of Alexandria); the Platonic legacy in Augustine and Boethius; the development of philosophical theology in Christianity, Islam, and Judaism.
Prerequisite: One course in philosophy equal to or greater than 01:730:103.

01:730:305 ***Philosophy in the High Middle Ages (3)***
Impact of Aristotle in the Muslim-Jewish world (Averroës and Maimonides); the development of medieval science; Christian Scholasticism (Thomas Aquinas and Duns Scotus).
Prerequisite: One course in philosophy.

01:730:306 ***Between Medieval and Modern Philosophy (3)***
Critique of Aristotelian philosophy; the emergence of a new or "secular" Aristotle; the revival of Plato in the Italian Renaissance; and the "new science" of Galileo.
Prerequisite: One course in philosophy equal to or greater than 01:730:103.

01:730:307 ***Descartes, Locke, and the 17th Century (3)***
Early development of modern views about the nature of the physical world; relation between the mental and the physical; the nature of one's self; skepticism and certainty. Readings from Descartes, Locke, and others, such as Spinoza, Leibniz, and Hobbes.
Prerequisite: One course in philosophy.

01:730:308 ***Hume, Kant, and the 18th Century (3)***
Some major works of Hume and Kant with some attention to other 18th-century philosophers. Comparison of views on the structure of consciousness, space and time, the limits of knowledge, the foundations of natural sciences, mathematics, and metaphysics.
Prerequisite: One course in philosophy other than 01:730:101 or 102.

01:730:309 ***Nineteenth-Century Philosophy (3)***
A substantive exploration of notable nineteenth-century philosophers and philosophical perspectives and their legacies.
Prerequisite: One course in philosophy.

01:730:310 ***Contemporary Movements in Philosophy (3)***
Major movements in 20th-century philosophy, such as American pragmatism, development of logic, logical positivism, existentialism, phenomenology. Philosophers such as Peirce, James, Frege, Russell, Carnap, Wittgenstein, Sartre, Heidegger, and Husserl.
Prerequisite: One course in philosophy other than 01:730:101 or 102.

01:730:311 ***Classical Jewish Philosophy (3)***
Major trends and figures in medieval Jewish thought; Jewish Platonism (Solomon ibn Gabirol); Jewish Aristotelianism (Maimonides); the critique of philosophy (Hallevi); Jewish philosophy in the Renaissance.
Credit not given for both this course and 01:563:311.

01:730:312 *Modern Jewish Philosophy (3)*
Thinkers and systems in modern Jewish philosophy, including interpretations of Jewish tradition, Jewish Kantianism (Cohen, Buber), Jewish existentialism and postmodernism (Rosenzweig, Levinas), the Holocaust, and Jewish feminism.
Credit not given for both this course and 01:563:312.

01:730:315 *Applied Symbolic Logic (3)*
Use of deduction techniques (see 01:730:201) to formalize various subject matters such as modal logic, set theory, formal arithmetic, and relevance logic.
Prerequisite: 01:730:201.

01:730:316 *German Thought in the 20th Century (3)*
Exploration of the vexing history of German philosophy and thought in the 20th century with a focus on History, Language, and Technology. Taught in English.
Credit not given for this course and 01:470:355.

01:730:319 *Philosophy of Mathematics (3)*
Introduction to some of the central topics in philosophy of mathematics. Connection between mathematical knowledge and logical knowledge; metaphysics of mathematical objects; connection between mathematics and natural science.
Prerequisites: 01:730:103 or 104, and 201. Recommended prerequisite: 01:730:215 or 220.

01:730:320 *Speech Acts (3)*
Investigation of philosophical issues surrounding how speakers use language to communicate. What goals do people accomplish by speaking? What resources does a language offer for achieving those goals? How do speakers deploy those linguistic resources to achieve their communicative goals on particular occasions? Readings drawn from philosophy and linguistics, and range from the abstractly theoretical to the applied.
Prerequisite: Any 01:730 course. Credit not given for this course and 01:615:420.

01:730:327 *Meaning and Numbering (3)*
Central issues in cognitive science and strategies for addressing questions about the contributions of innate endowment and individual experience (a.k.a., nature/nurture) to mature cognition through discussion and comparison of the human capacity to understand linguistic expressions and the apparently more widespread capacity to make numerical comparisons.
Prerequisite: 01:185:201. Credit not given for both this course and 01:185:330.

01:730:328 *Philosophy of Psychology (3)*
Conceptual and methodological issues about information, mental illness, innate structure, developmental stages, rationality, and deviance. Behaviorism, reductionism, cognitivism, and structuralism.
Prerequisite: One course in philosophy.

01:730:329 *Minds, Machines, and Persons (3)*
Comparison of the nature of the human mind and that of complex machines. Consequences for questions about the personhood of robots.
Prerequisite: One course in philosophy other than 01:730:101 or 102.

01:730:330 *Ethics of Harming and Helping (3)*
Investigation of our moral duties to come to the aid of, and refrain from harming, others. Topics may include warfare, self-defense, abortion and physician-assisted dying; effective altruism and charitable giving; the paradox of deontology, the trolley problem, the doctrine of double effect, the non-identity problem; and the ethics of imposing risks of harm; and consequentialist, deontological, and contractualist approaches to the aforementioned.
Prerequisite: One course in philosophy.

01:730:341 *Ethics through History (3)*
An examination of some of the most important moral theories in the history of philosophy. Possible authors include Plato, Aristotle, Butler, Hume, Kant, Mill, and Nietzsche. Some contemporary philosophers may be discussed as well.
Prerequisite: One course in philosophy.

01:730:342 *Social and Political Philosophy through History (3)*
An examination of some of the most important social and political theories in the history of philosophy. Possible authors include Plato, Aristotle, Hobbes, Locke, Rousseau, Kant, Mill, and Marx. Some contemporary philosophers may be discussed as well, including Rawls and Nozick.
Prerequisite: One course in philosophy.

01:730:343 *Marx and Marxism (3)*
Central introduction to Marx's thought. Topics such as materialism; dialectics; analysis of capitalism; class and class struggle; and social revolution, a political program for socialism.

01:730:344 *Marx, Nietzsche, Freud (3)*
Exploration of the work of three German writers who revolutionized modern philosophy, theology, psychology, aesthetics, social and political science, gender studies, historiography, literature, and the arts.
Credit not given for both this course and 01:195:374 or 01:470:371.

01:730:345 *Philosophy and the Law (3)*
Examination of normative problems in law. Topics such as justification of punishment; limits of the law; nature of excuses; negligence; strict liability; and *mens rea* requirement.

01:730:347 *Philosophical Issues in Feminism (3)*
Clarification and analysis of feminist thought. Critical study of scientific theories of sex differences. Issues such as the family, abortion, nature of persons, prostitution, discrimination, pornography.
Prerequisite: One course in philosophy equal to or greater than 01:730:103 or one course in women's studies.

01:730:348 *Research Ethics (3)*
Origins of contemporary research ethics, paradigm studies that contributed to modern day rules and regulations, and case-based discussions of real and fictional cases. Particular attention to ethical issues arising in research involving vulnerable populations and research in international settings.
Prerequisite: 01:730:248 or 10:652:201. Credit not given for both this course and 10:652:400.

01:730:352 *Plato (3)*
Philosophy of Plato through close readings of selected dialogues supplemented by relevant readings in other ancient and contemporary philosophers.
Prerequisite: 01:730:203 and any other philosophy course. Credit not given for both this course and 01:190:352 or 01:490:352.

01:730:358 ***Philosophy of Law (3)***
Examination of the nature and purpose of law and legal systems; analysis of judicial decision making and the role of discretion.

01:730:360 ***Philosophical Aspects of Cognitive Science (3)***
Exploration of ways in which research and discoveries in cognitive science influence, and have been influenced by, philosophical theorizing. Topics include consciousness, innate knowledge, mental representation, and the nature of rationality.
Prerequisite: One course in philosophy.

01:730:362 ***Philosophy of Literature (3)***
Consideration of such questions as the definition of literature, the ontology of literary works, the nature of fiction, the emotional reaction of the audience to fiction, the problem of interpretation, the problem of literary value, and the experience of silent reading as opposed to the experience of literature as performance.
Prerequisite: One course in philosophy.

01:730:363 ***Philosophy and Popular Culture (3)***
An in-depth examination of philosophical questions raised by and about a particular topic in popular culture such as comics, games, humor, or specific genres of music, film, and television. Topics vary from semester to semester.

01:730:364 ***Aesthetics of Film (3)***
Problems in the philosophy of art raised in theory and practice of film. Variety of films screened in conjunction with the course.

01:730:365 ***Philosophy of Music (3)***
Concept of musical expression; music as language; music and drama; music and representation; the nature of the musical work.

01:730:366 ***African, Latin American, and Native American Philosophy (3)***
Introduction to philosophy from Africa, Latin America, and the indigenous peoples of North America, covering topics in ethics, metaphysics, epistemology, mind, and social and political philosophy. Considers metaphilosophical issues such as written v. oral traditions, ethnophilosophy v. individualism, and parochialism v. universalism. Typically includes Andean, Aztec/Nahua, Dogon, Igbo, Iroquois, Lakota, Maya, Navajo, Ojibwa, and Yoruba traditions.

01:730:367 ***American Philosophy (3)***
Study in its historical setting of inquiry into the nature of experience, truth, goodness, and society by American philosophers including James, Peirce, Dewey, Royce, Lewis, and Whitehead.
Prerequisite: One course in philosophy equal to or greater than 01:730:103.

01:730:368 ***Hindu Philosophy (3)***
Upanishads, Patanjali, Bhagavad Gita; theories of matter, energy, states of consciousness; meditation. Yogas of knowledge, action, devotion. Karma. Ethics. Comparison of Hindu and Western cosmology.
Credit not given for both this course and 01:840:358.

01:730:369 ***Buddhist Philosophy (3)***
Interdependence, impermanence, relativity; suffering; path to liberation; meditation; karma as cosmic justice; death and rebirth. Compassion as central ethical value. Theravada, Mahayana, and Tibetan Buddhism.
Prerequisite: One course in philosophy. Credit not given for both this course and 01:840:369.

01:730:370 ***Contemporary Philosophy of Religion (3)***
Modern philosophical discussions of religious language and experience; the possibility of religious knowledge; the nature of religious discourse; mysticism and truth; divine omniscience; religious morality.
Prerequisite: One course in philosophy equal to or greater than 01:730:103.

01:730:371 ***Philosophies of Death and Dying (3)***
Theories of death and dying in different metaphysical systems; Plato; Eastern philosophy; existentialism; thanatology. Extinction versus continuity of consciousness. Attitudes toward death and ethical values.
Prerequisite: One course in philosophy equal to or greater than 01:730:103. Sophomores by permission only.

01:730:374 ***Islamic Philosophy (3)***
Exploration of the main themes of Islamic philosophy, focusing on topics such as wisdom, the good life, and relations between metaphysical, moral, doctrinal, and practical knowledge.
Credit not given for both this course and 01:685:374 or 01:840:374.

01:730:375 ***Topics in Philosophy (3)***
An intensive writing course on a central topic in philosophy. Topics will vary with instructor.
Prerequisite: One course in philosophy.

01:730:397 ***Junior Advanced Seminar (3)***
Intensive study of some classic philosophical text (e.g., Kant's *Critique of Pure Reason*) or central philosophical question (e.g., the mind-body problem). Extensive writing of papers and discussion of reading material.
Prerequisite: Outstanding performance in at least one course in philosophy. By invitation only.

01:730:401 ***Plato (3)***
Intensive study of selected works of Plato, with emphasis upon the later dialogues such as Theaetetus, Sophist, and Philebus.
Prerequisites: Two courses in philosophy equal to or greater than 01:730:103.

01:730:402 ***Aristotle (3)***
Topics in Aristotle's logic, physics, metaphysics, and philosophy of language.
Prerequisites: Two courses in philosophy equal to or greater than 01:730:103.

01:730:403 ***Ancient Philosophy after Aristotle (3)***
Philosophy in the Hellenistic and Roman world. Stoics, Sceptics, and Epicureans; Hellenistic-Jewish philosophy; the revival of Aristotle; and Plotinus and the neo-Platonic tradition.
Prerequisite: One course in Greek philosophy.

01:730:404 ***Spinoza (3)***
Spinoza's theological political treatise: prophecy, miracles, and faith and reason. Spinoza's ethics: God and his attributes, the human mind, and human bondage and freedom.
Prerequisites: Two courses in philosophy other than 01:730:101 or 102. Recommended: 01:730:205 or 307.

01:730:405 ***Kant (3)***
Critical examination of Kant's *Critique of Pure Reason;* emphasis on metaphysical and epistemological views.
Prerequisites: Two courses in philosophy.

01:730:406 ***Nietzsche (3)***
A substantive exploration of Nietzsche's works and perspectives and their legacy. Nietzsche's critical philosophy and its excoriation of Platonism, metaphysics, Western morality, and religion, as well as his positive philosophy, primarily his epistemology. Topics may include the revaluation of values, perspectivism, naturalism, asceticism, time, and the self.
Prerequisites: Two courses in philosophy other than 01:730:101 or 102.

01:730:407 ***Intermediate Logic I (3)***
Metatheory of propositional and first-order predicate logic. Completeness is proved and its consequences are explored.
Prerequisite: 01:730:201.

01:730:408 ***Intermediate Logic II (3)***
Computability and recursiveness; metatheory of first-order theories; incompleteness theorems; special topics as time permits.
Prerequisite: 01:730:407.

01:730:409 ***Wittgenstein (3)***
Detailed study of either *Tractatus Logico-Philosophicus* and its relation to writings of Frege and Russell; or *Philosophical Investigations* and related writings.
Prerequisites: 01:730:201 and two additional courses in philosophy.

01:730:410 ***History of Analytic Philosophy (3)***
Major figures or movements in the development of analytic philosophy. Topics may include: early analytic philosophy, with an emphasis on Frege, Russell, and Moore; development and assessment of logical positivism; and roots of contemporary metaphysics in Quine and Strawson.
Prerequisites: 01:730:201 and two additional courses in philosophy.

01:730:411 ***History of Epistemology (3)***
Historical development of positions on one or more epistemological issues, such as knowledge of empirical and necessary truths, certainty and skepticism, or the scientific method. Authors addressed will include Plato, Aristotle, Descartes, Locke, Hume, and/or Kant.
Prerequisites: Two courses in philosophy equal to or greater than 01:730:103.

01:730:412 ***Epistemology (3)***
Topics such as belief, certainty, justification, knowledge, and skepticism are examined in detail.
Prerequisites: 01:730:201 and two additional courses in philosophy.

01:730:413 ***Social Epistemology (3)***
How groups, communities, and interpersonal practices promote or impede the quest for knowledge and rationality.
Prerequisites: Two courses in philosophy.

01:730:414 ***History of Metaphysics (3)***
Historical development of positions on one or more metaphysical issues such as substance, change, causality, universals, matter, space, time, free will, necessity, possibility, and contingency. Authors addressed will include Plato, Aristotle, Descartes, Locke, Hume, and/or Kant.
Prerequisites: Two courses in philosophy equal to or greater than 01:730:103.

01:730:415 ***Metaphysics (3)***
Topics such as essence, particulars and universals, causation, space, time, and identity. The nature of metaphysical arguments and problems of ontology. Realism and its alternatives.
Prerequisites: 01:730:201 and one additional course in philosophy.

01:730:416 ***Leibniz (3)***
Philosophical works of G.W. Leibniz. Particular attention will be paid to Leibniz's views on modality, substance, truth, free will, causation, the mind-body problem, innate ideas, and his claim that this is the best possible world.
Prerequisites: Two courses in philosophy. Recommended: 01:730:205, 307, or 308.

01:730:417 ***Hume (3)***
Intensive study of Hume's contributions to epistemology, cognitive psychology/philosophy of mind, metaphysics, morals, aesthetics, and political philosophy, both in the Early Modern period and to contemporary thought.
Prerequisites: Two courses in philosophy.

01:730:418 ***Philosophy of Mind (3)***
Mind-body problem and the nature of consciousness; rationality; intentionality; human freedom. Theories of dualism, physicalism, functionalism, and behaviorism.
Prerequisites: Two courses in philosophy other than 01:730:101 or 102.

01:730:419 ***Philosophy of Perception (3)***
Philosophical study of perception and of our access through it to knowledge and reality.
Prerequisites: Two courses in philosophy.

01:730:420 ***Philosophy of Language (3)***
Philosophical study of language and linguistics. Pragmatics, theories of learnability, meaning and reference, formal semantics, truth, indexicality.
Prerequisites: 01:730:201 and two additional courses in philosophy.

01:730:421 ***Semantics of Language (3)***
Philosophical study of natural language semantics: semantics of names, predicates, adverbs, psychological ascriptions, demonstrative and indexical expressions, verbs of change, comparative adjectives.
Prerequisite: 01:730:201. Credit not given for both this course and 01: 615:325.

01:730:422 ***Philosophy of Logic (3)***
Is logic a theory? The status and use of alternative logics. What logics and other mathematical systems can tell us about language and relations among language, belief, and the world.
Prerequisite: 01:730:315.

01:730:423 ***Foundations of Mathematics (3)***
A study of the set-theoretic approach to the foundations of mathematics, and connections to the philosophy of mathematics and logic.
Prerequisite: 01:730:315 or 01:730:407 or 01:640:300 or by instructor permission. Credit not given for both this course and 01:640:361.

01:730:424 ***The Logic of Decision (3)***
Analysis of rational preference and nondeductive inference with special emphasis on the examination of alternative concepts of utility and probability.
Prerequisite: 01:730:201 or 315 or 407 or 408 or 422.

01:730:425 ***Philosophy of Science (3)***
Detailed study of one or more of the following topics: explanation, confirmation, causation, the status of theoretical entities, objectivity, reductionism, unity of science.
Prerequisite: 01:730:225.

01:730:426 ***Philosophy of Physics (3)***
Methodology of the physical sciences. Philosophical problems of space and time, measurement, and causation in modern physics.
Prerequisite: One course in Philosophy equal to or higher than 01:730:101.

01:730:427 ***Philosophy of Social Sciences (3)***
Explanation. Relation to natural sciences. Discussion of debates in areas such as structuralism, functionalism, classical modeling, path analysis, statistical testing, and construct validation.
Prerequisite: One course in philosophy.

01:730:428 ***Topics in the Philosophy of Psychology (3)***
Detailed philosophical study of topics such as psychological explanation; implications of psychotherapy; and theories of cognition, perception, learning, and personality.
Prerequisites: Two courses in philosophy. Recommended: 01:730:225.

01:730:429 ***Philosophy of Biology (3)***
Methodology of the biological sciences. Detailed study of one or more of the following topics: the nature of explanation, laws, and reduction in biology; debates about fitness, units of selection, replicators, and evolutionary theory.
Prerequisite: One course in philosophy.

01:730:435 ***Philosophy of History (3)***
Theories of history and historical explanation; comparison of the methodologies of history and science; problems of historical interpretation.
Prerequisite: One course in philosophy.

01:730:441 ***Ethical Theory (3)***
Examination of contemporary views in normative ethics and metaethics, or both. Possible topics include the nature of reasons and value, the justification of moral judgments, the meaning of moral terms, theories of right action, and competing approaches to moral theory, including skepticism.
Prerequisites: Two courses in philosophy.

01:730:442 ***Moral Responsibility (3)***
Exploration of our responsibility for ourselves and our actions. Possible topics include justification versus excuses for actions; different types of excuses (e.g., ignorance of fact, morality, or law; insanity; alcohol-induced impairment; duress); negligence and risk; moral luck; collective responsibility; free will; and the justification for punishment.
Prerequisites: Two courses in philosophy.

01:730:445 ***Topics in Social and Political Philosophy (3)***
Exploration of important authors or topics in social and political philosophy. Material may range from classical masterpieces to unpublished manuscripts.
Prerequisites: Two courses in philosophy.

01:730:450 ***Topics in Moral Philosophy (3)***
Explores at an advanced level some of the most important authors or topics in moral philosophy. Material may range from classical masterpieces to unpublished manuscripts. Topics will vary by instructor.
Prerequisites: Two courses in philosophy.

01:730:459 ***Advanced Seminar in Ethics (3)***
Examines some of the deepest and most fundamental issues in moral theory and practical reasoning. Topics may include nature of morality, nature of reasons, impartiality, universal laws, Kantianism, consequentialism, contractualism, normativity, attitudes to time, obligations to future generations, the structure of moral ideals, competing conceptions of good, and transitivity.
Prerequisite: Permission of instructor required.

01:730:461 ***Topics in Aesthetics (3)***
Generally will discuss three major works in the philosophy of art, each concerning one of the major arts: for example, literature, the visual arts, film, and music. Works by recent or contemporary authors, at the cutting edge of current research, studied in depth.
Prerequisite: One course in philosophy other than 01:730:101 or 102.

01:730:465 ***Phenomenology and Existentialism (3)***
Issues in phenomenology and existentialism, selected from Kierkegaard, Nietzsche, Husserl, Heidegger, Sartre, and Merleau-Ponty. Consideration of contemporary philosophical literature.
Prerequisite: One course in philosophy.

01:730:470 ***Ethics and Practical Reason (3)***
Investigation of selected topics concerning reasoning about what to do. Possible topics include the nature of reasons, values, normativity, irrationality, agency, intention, free will, moral dilemmas, and problems raised by conflicts among values.
Prerequisites: Two courses in philosophy.

01:730:475 ***Advanced Topics in Philosophy (3)***
An intensive writing course on a central topic in philosophy. Topics will vary with instructor.
Prerequisites: Two courses in philosophy.

01:730:480 ***Issues in Contemporary Philosophy (3)***
Examination of some central issue(s) in contemporary philosophy. Topics vary from semester to semester.
Prerequisites: Two courses in philosophy.

01:730:492 ***Philosophy Writing Tutorial (3)***
Intensive writing tutorial, intended to prepare individual papers for submission to an undergraduate philosophy journal or conference.
Prerequisite: Permission of instructor. Open to philosophy majors only.

01:730:493,494 ***Independent Study (1-4,1-4)***
Individual study in some philosophical topic under the direction of a member of the department.
Open to philosophy majors/minors only.

01:730:495,496 ***Senior Honors Thesis (BA,BA)***
Thesis research under the direction of a faculty adviser.
Prerequisite: Eligibility for departmental honors and approval of thesis topic by faculty adviser and director of undergraduate studies.

Physics 750 (SAS)

PHYSICS 750 (INCLUDES ASTRONOMY)

Department of Physics and Astronomy, School of Arts and Sciences

Website: https://physics.rutgers.edu

Chair: John P. Hughes

Undergraduate Program Director: Jolie A. Cizewski

Distinguished Professor and Board of Governors Professor:

Eva Y. Andrei, B.S., M.S., Tel Aviv; Ph.D., Rutgers

B. Gabriel Kotliar, B.S., M.S., Hebrew (Israel); Ph.D., Princeton

Karin Rabe, A.B., Princeton; Ph.D., Massachusetts Institute of Technology

David Vanderbilt, B.A., Swarthmore College; Ph.D., Massachusetts Institute of Technology

Distinguished Professors:

Natan Andrei, B.S., M.S., Tel Aviv; Ph.D., Princeton

Andrew Baker, A.B., Harvard; Ph.D., California Institute of Technology

Thomas Banks, B.A., Reed College; Ph.D., Massachusetts Institute of Technology

Robert Bartynski, B.A., Cornell; Ph.D., Pennsylvania

Girsh Blumberg, M.S., Tartu (Finland); Ph.D., Estonian Academy of Sciences

Sang-Wook Cheong, B.S., Seoul National; M.S., Ph.D., California (Los Angeles)

Jolie A. Cizewski, B.A., Pennsylvania; M.A., Ph.D., SUNY (Stony Brook)

Piers Coleman, B.A., Cambridge; Ph.D., Princeton

Daniel Friedan, A.B., Princeton; Ph.D., California (Berkeley)

Eric Gawiser, A.B., Princeton; M.A., Ph.D., California (Berkeley)

Yuri Gershtein, B.S., Moscow Institute of Physics and Technology; Ph.D., Institute for Theoretical and Experimental Physics (Moscow)

Ronald Gilman, B.S., Massachusetts Institute of Technology; Ph.D., Pennsylvania

Eva Halkiadakis, B.S., Ph.D., Rutgers

Kristjan Haule, B.S., M.Sc., Ph.D., Ljubljana (Slovenia)

John P. Hughes, A.B., Ph.D., Columbia

Saurabh Jha, A.B., A.M., Ph.D., Harvard

Valery Kiryukhin, M.S., Moscow Institute of Physics and Technology; Ph.D., Princeton

Joel Lebowitz, B.S., M.S., Ph.D., Syracuse

Gregory Moore, A.B., Princeton; Ph.D., Harvard

Herbert Neuberger, B.S., M.S., Ph.D., Tel Aviv

Sunil V. Somalwar, M.S., Indian Institute of Technology; Ph.D., Chicago

Scott Thomas, B.S., Utah State; Ph.D., Texas

Professors:

Gyan Bhanot, M.S., Indian Institute of Technology; M.S., SUNY (Stony Brook); Ph.D., Cornell

Jak Chakhalian, B.S., St. Petersburg Technical (Russia); M.S., Ph.D., British Columbia

Premala Chandra, B.S., Yale; Ph.D., California (Santa Barbara)

John P. Chou, A.B., Princeton; A.M., Ph.D., Harvard

Mark C. Croft, B.A., Johns Hopkins; M.A., Ph.D., Rochester

Duiliu-Emanuel Diaconescu, B.S., Iasi (Romania); Ph.D., Rutgers

Charles Keeton, B.A., Cornell; Ph.D., Harvard

Amitabh Lath, B.S., Ph.D., Massachusetts Institute of Technology

Sergei Lukyanov, M.A., Moscow Engineering Physical Institute; Ph.D., Landau Institute for Theoretical Physics (Russia)

Alexander Morozov, Honors Diploma, Rostov State (Russia); M.S., Ph.D., Washington

Seongshik Oh, B.S., M.S., Seoul National; Ph.D., Illinois

Vitaly Podzorov, B.S., M.S., Moscow Institute of Physics and Technology; Ph.D., Rutgers

Ronald Ransome, B.S., Colorado School of Mines; Ph.D., Texas (Austin)

Sevil Salur, B.A., California (Berkeley); M.S., M.Phil., Ph.D., Yale

Anirvan Sengupta, B.A., Calcutta; Ph.D., Bombay

David Shih, A.B., Harvard; M.Phil., Cambridge; Ph.D., Princeton

Weida Wu, B.S., Science and Technology of China (Heifei); M.S., Northwestern; Ph.D., Princeton

Emil Yuzbashyan, M.S., Moscow Institute of Physics and Technology; Ph.D., Princeton

Associate Professors:

Alyson Brooks, B.A., Macalester College; M.S., Ph.D., Washington

Matthew Buckley, B.A., Kenyon College; M.A., Ph.D., California (Berkeley)

Blakesley Burkhart, B.S. Louisville; M.S. Physics Wisconsin-Madison, M.A. Astronomy, Wisconsin-Madison; Ph.D. Wisconsin-Madison

Sang-Hyuk Lee, B.S., M.S., Korea Advanced Institute of Science and Technology; Ph.D., New York

Andrew Mastbaum , B.S., Lehigh, Ph.D., University of Pennsylvania

Kristen McQuinn, B.S., Lehigh; M.S., Boston; Ph.D., Minnesota

Jedediah Pixley, B.S., California (Santa Cruz); M.S., Ph.D., Rice

Frank Zimmermann, M.S., Ph.D., Cornell

Assistant Professors:

Srivatsan Chakram Sundar, M.S., IIT-Kanpur, India; Ph.D., Cornell

Ananda Roy , M.Sc, Indian Institute of Technology Kanpur, India; M.S., M. Phil, Ph.D., Yale

Teaching Professor:

AbdelBaki Brahmia, DES, Annaba (Algeria); Ph.D., Warwick (UK)

Assistant Teaching Professors:

Michael Gentile, B.S., The College of New Jersey; M.S., Rutgers

Roy Montalvo, B.S., Stony Brook; M.S., California State (Long Beach); Ph.D., Texas A&M

Associate Professor of Practice:

Charles Ruggieri, B.S., The College of New Jersey; Ph.D., Rutgers

Distinguished Research Professor:

Philip Batson, B.S., Ph.D., Cornell

Assistant Research Professor:

Sylvie Rangan, B.A., Cergy-Pontoise (France); M.S., Ph.D., Pierre and Marie Curie (Paris)

Physics 750 (SAS)

Learning Goals (unless otherwise specified, "Physics" always means "Physics and Astronomy")

Learning Goals (unless otherwise specified, "Physics" always means "Physics and Astronomy")

- Our best majors, roughly 25% of total, conduct frontier Physics research with a Physics faculty member and demonstrate high quality of work.
- Top 25 % of our Physics majors demonstrate mastery of basic Physics and the ability to solve essential problems appropriate for beginning graduate study in Physics.
- All Physics majors demonstrate knowledge of fundamental Physics principles and are able to quantitatively analyze a broad spectrum of problems presented in a range of undergraduate Physics courses.
- Students who complete our introductory sequence of Physics courses demonstrate an understanding of Physics principles at a basic level.

Physics 750 (SAS)

Major Requirements

Major Requirements

The department offers a major in Physics and a major in Astrophysics. In all astrophysics and physics major options, at least 15 credits of physics courses at the 300 level or higher that are applied toward the major must be completed at Rutgers University-New Brunswick.

School of Engineering students are welcome to complete a second major or minor in Physics or Astrophysics/ Astronomy upon approval by both the SOE and Physics and Astronomy advisors.

Major in Astrophysics

Astrophysics Major Requirements:

The Astrophysics Major, leading to a Bachelor of Science degree, provides a thorough introduction to the subject. It is suitable for those with an interest in astronomy who aspire to a career in astronomy research, science education, science journalism, technical development, and other professional areas. Prospective majors should consult the Physics and Astronomy Undergraduate Program Director before choosing their courses.

In the astrophysics major, at least 15 credits of physics or astrophysics courses at the 300-level or higher that are applied towards the major must be completed at Rutgers New Brunswick

Required courses and suggested curricula for honors students and other well-prepared students:

- First year: 01:750:271-272, 275-276; 01:640:151-152.
- Second year: 01:750:273, 381-382, 351; 01:750:341, 342; 01:640:251, 244.
- Third year: 01:750:361, 385-386; 345, 346; and 01:640:423 or 421.
- Fourth year: At least two courses out of 01:750:441, 442, 443, 444.

An alternate curriculum is available for students who did not begin with the Honors Physics sequence:

- First year: 01:750:123-124; 01:640:151-152.
- Second year: 01:750:227-228, 229-230, 341, 381-382; 01:640:251, 244.
- Third year: 01:750: 342, 361, 385-386, 351; 01:750:345, 346.
- Fourth year: 01:640:423 or 421 and at least two courses out of 01:750:441, 442, 443, 444.

Students who took 01:750:203-204 (or 201-202) as their introductory physics sequence should consult a departmental adviser to plan an appropriate curriculum for the astrophysics major.
Major in Physics

Physics Major Requirements ¿ four options:

For the major in physics there are four options available:

- The Professional Option is a thorough introduction to the subject for all those who expect to make physics an important component of their career. It may lead to careers in research, technical development, or education in physics or related fields. It provides suitable preparation for Ph.D. study in physics.
- The Applied Option is intended for students who wish to work in industry without graduate studies in physics. The required courses give a breadth of knowledge in technical fields rather than specialized preparation for Ph.D studies in physics or astrophysics.
- The General Option is for students who have an interest in physics or astronomy but do not expect to do graduate work in physics or astrophysics. It is suitable preparation for careers in education, medicine, law, and business, and is particularly appropriate in an interdisciplinary course of study. A well-balanced sequence of natural science electives should be chosen in consultation with an adviser in the department.
- The Planetary Physics Option is for students who wish to pursue a career in physics applied to the study of Earth and other planets. Students will receive a firm foundation in physics. They will receive a broad exposure to planetary physics by taking a course in each of the three fields of concentration: geophysics, atmospheric physics, and ocean physics and will take three courses in their area of concentration.

Prospective majors should consult the Physics and Astronomy Undergraduate Program Director before choosing their courses.

Professional Option (Bachelor of Science)

Required courses and suggested curricula for honors students and other well-prepared students:

- First year: 01:750:271-272, 275-276; 01:640:151-152.
- Second year: 01:750:273, 326, 327, 381-382, 351; 01:640:251, 244.
- Third year: 01:750:361, 385-386, 387 or 388; 01:640:423 or 421.
- Fourth year: At least three courses out of 01:750:305, 406, 417, 418, 421, 431, 441, 442, 443, 444, 451, 464. At least one of those three courses must be taken from 305, 406, 417, 418.

An alternate curriculum is available for students who did not begin with the Honors Physics sequence:

- First year: 01:750:123-124; 01:640:151-152.
- Second year: 01:750:227-228, 229-230, 381-382; 01:640:251, 244.
- Third year: 01:750:361, 385-386, 326, 327, 351.
- Fourth year: 01:750:387 or 388, 01:640:423 or 421, and at least three courses out of 01:750:305, 406, 417, 418, 421, 441, 442, 443, 444, 451, 464. At least one of those three courses must be taken from 305, 406, 417, 418.

Students who took 01:750:203-204 (or 201-202) as their introductory physics sequence or have AP credit should consult a departmental adviser to plan an appropriate curriculum for the professional physics major.

Applied Option (Bachelor of Science)

- Introductory physics sequence: 01:750:123, 124, 227, 228, 229, 230 or 01:750:271, 272, 273, 275, 276
- Calculus: 01:640:CALC1, CALC2, CALC3, CALC4
- Computing: 01:198:107 or 01:198:111 or 14:440:127
- Physics: 01:750:323 or 381, 324 or 385, 326, 327, 305, 351, 313 or 361
- Senior Lab: 01:750:387 or 388 or 389
- Seven credits consisting of courses in engineering, chemistry or another physical science chosen in consultation with a departmental adviser to form a coherent concentration in a physics-related applied area.
- Six credits in natural science electives chosen in consultation with a departmental adviser to form a coherent concentration in a physics-related applied area. With the approval of the department, three of these credits may be for a department-sponsored outside internship.

A grade-point average of at least a C in the courses applied toward the major is required for graduation in the applied option.

Students who took 01:750:203-204 (or 201-202) as their introductory physics sequence or have AP credit should consult a departmental adviser to plan an appropriate curriculum for the professional physics major.

General Option (Bachelor of Arts)

- Introductory courses: 01:750:203-204 (or any other equivalent sequence) and laboratory 205-206 (or 229-230 or 275-276).
- Calculus: 01:640:CALC1, CALC2 (01:640:152 preferred.)
- Advanced courses: Six advanced physics courses including 01:750:313, 323, 324; two lab courses either 01:750:326 and 327 or 345 and 346, and one additional 300- or 400-level physics course (except 490-level). It is recommended, but not required, that this course be chosen from the following list: 01:750:301, 305, 341, 342, 397.
- Electives: 18 additional credits with grades of C or better in natural science or mathematics chosen in consultation with a departmental adviser to form a coherent sequence.

At least a C average in the physics and mathematics courses is required for admission, retention, and graduation in the general option. Four of the six advanced physics courses must be taken at Rutgers- New Brunswick.

Planetary Physics Option (Bachelor of Science)

- Introductory physics sequence: 01:750:123, 124, 227, 228, 229, 230 or 01:750:271, 272, 273, 275, 276
- Calculus: 01:640:CALC1, CALC2, CALC3, CALC4
- Computing: 01:198:107 or 01:198:111 or 14:440:127
- Physics: 01:750:323, 324; 326 and 327 or 345 and 346; 351; 305 or 342
- Planetary Physics: 01:460:442, 11:628:451, 11:670:323
- Nine credits in a field of concentration (geophysics, atmospheric physics, or ocean physics) chosen in consultation with an advisor in the field of concentration

A grade-point average of at least a C in the courses applied toward the major is required for graduation in the planetary physics option.

Physics 750 (SAS)

Minor Requirements

Minor Requirements

The department offers two minors--one in physics and one in astronomy.

The following courses are required for the Physics Minor:

- 01:750:203-204 (or equivalent)
- 01:750:205-206 (or 01:750:229-230 or 01:750:275,276)
- Twelve credits of 300- or 400-level physics courses. Recommended courses include 01:750:301, 01:750:305, 01:750:313, 01:750:323-324, 01:750:341, 01:750:342, 01:750:397.

The grade-point average for all courses applied toward the minor must be at least 2.0. Note that 300-level physics courses require 01:640:152 as a pre-requisite. No more than one D grade may be applied toward the minor. Three of the four advanced physics elective courses must be taken at Rutgers University-New Brunswick. No credits may be used from {01:750:491, 01:750:492, 01:750:493, 01:750:494, 01:750:495, 01:750:496, 01:750:497, 01:750:498} in any requirements or conditions.

The following courses are required for the Astronomy Minor:

- 01:750:203-204 (or equivalent)
- 01:750:205-206 (or 01:750:229-230 or 01:750:275,276)
- 01:750:341, 01:750:342
- Six credits of 300- or 400-level physics courses. Recommended courses include 01:750:345, 01:750:346, 01:750:441, 01:750:442, 01:750:443, 01:750:444.

The grade-point average for all courses applied toward the minor must be at least 2.0. Note that 300-level physics courses require 01:640:152 as a pre-requisite. No more than one D grade may be applied toward the minor. Three of the four 300-level courses must be taken at Rutgers-New Brunswick.

Physics majors or minors who also wish to minor in astronomy must complete 01:750:341, 01:750:342, 01:750:345, and 01:750:346. These courses may not also be used to satisfy requirements for the major or minor in physics. Astronomy or Astrophysics majors cannot major or minor in Physics.

Physics 750 (SAS)

Departmental Honors Program

Departmental Honors Program

The chairperson of the department will invite physics and astrophysics majors who have shown considerable ability by the end of their junior year to participate in the departmental honors program. Candidates for honors take a 2-semester honors research course, write a thesis, and conduct a seminar on a project undertaken in the senior year. Honors are awarded on the basis of the excellence of the honors project, general performance in physics and astronomy courses, and recommendations of the faculty.

More information about the undergraduate program is available at the department's website.

Physics 750 (SAS)

Courses without Prerequisites

Courses without Prerequisites

The following courses have no prerequisites in physics or mathematics. Most are relatively non-mathematical

- Concepts of Physics for Humanities and Social Science Students (01:750:106) discusses fundamental concepts of physics from a historical, sociological, and religious point of view.
- Astronomy and Cosmology (01:750:109,110) are descriptive courses designed for nonscientists, requiring only minimal high school mathematics. Either may be taken without taking the other.
- The Greenhouse Effect (01:750:140) is concerned with the scientific aspects of global warming. It is intended for liberal arts majors and is closed to natural science majors.

Physics 750 (SAS)

Introductory Courses for non-Physics and Astronomy Majors

Introductory Courses for non-Physics and Astronomy Majors

There are three introductory sequences for majors in the biological sciences (including pre-health professional curricula), computer science, chemistry, and other sciences, as well as for students who desire an elementary but thorough introduction to physics. All three cover basically the same material but utilize different teaching techniques.

- General Physics - 2 semester sequence. 01:750:203-204 (lectures + recitations) 01:750:205-206 (laboratory). Pre-requisite: pre-calculus or calculus. Fulfills all the physics requirements for science majors, as well as admission to health profession schools and graduate schools. Not recommended for BS Physics or Astrophysics majors.
- Extended General Physics - 2 semester sequence. 01:750:201-202 (lectures + recitations + laboratory). Pre-requisite: pre-calculus or calculus. Identical content as General Physics. Intended for science, science teaching, and pre-health profession majors with a nontraditional background or who would benefit from additional support.
- Physics for the Sciences - 2 semester sequence. 01:750:193-194 (integrated lectures + recitations + laboratory) with an emphasis on scientific reasoning and experimental design. Pre-requisite: pre-calculus or calculus.

Elements of Physics - 1 semester course. 01:750:161. Pre-requisite: pre-calculus or calculus. Primarily for School of Pharmacy students; students from other schools should contact the Physics and Astronomy Undergraduate Program Director before registering. Does not meet requirements for SAS or SEBS majors.

Physics 750 (SAS)

Introductory Courses for Prospective Physics and Astrophysics Majors and School of Engineering

Introductory Courses for Prospective Physics and Astrophysics Majors and School of Engineering

Analytical Physics sequence:

- Extended Analytical Physics (01:750:115,116) - first 2 semesters of 4-semester sequence with calculus. For students placed in pre-calculus. Primarily for Engineering majors and physics and astrophysics majors with limited high school physics.
- Analytical Physics (01:750:123,124) - first 2 semesters of 4-semester sequence with calculus. For students placed in calculus. Primarily for Engineering majors and physics and astrophysics majors with limited high school physics.
- Analytical Physics 01:75:227,228 and 01:750:229,230 labs. Final 2 semesters of 4 semester sequence with. Pre-requisites: 01:750:116 or 124 and 01:640:152; co-req: 01:640:Calc3.

Honors Physics sequence

- Honors Physics 01:750:271, 272, 273 and 275,276 labs. 3-semester sequence for Honors Engineering students and physics and astrophysics majors with strong high school physics background and permission of the undergraduate program director. Co-requisite in first semester is 01:640:Calc1; students required to progress through the calculus sequence

If there is any doubt about which sequence to take, please contact the Physics and Astronomy Undergraduate Program Director for advising. If a course is taken in one of these sequences, credit cannot also be given for a course (in another sequence) that covers substantially similar topics. Students who wish to switch from one sequence to another should consult the Physics and Astronomy Undergraduate Program Director for advising, as should students who change their major or who have advanced standing.

Physics 750 (SAS)

Courses

Courses

01:750:106 ***Concepts of Physics for Humanities and Social Science Students (3)***
Concepts of physics and astronomy in their scientific, social, historical, and current technological context, with no mathematical problem solving. How the physical universe works, from mechanics and the solar system to relativity, quantum behavior, and the big bang. Contributions of scientists from Aristotle, Galileo, and Newton through Einstein, Bohr, and up to the present time.
May not be taken for major or minor credit.

01:750:109,110 *Astronomy and Cosmology (3,3)*
Predominantly descriptive introduction to current ideas concerning the nature and origin of the earth, the solar system, the galaxy, and the universe; neutron stars and black holes; the big-bang; the possibility of life outside the earth. 109: Development of our understanding of the solar system from the time of the Greeks to the present day. 110: Current understanding of stars, galaxies, and the universe.
For nonscience majors. No prerequisite. May not be taken for major credit. Courses are independent and may be taken in either order or concurrently.

01:750:115-116 *Extended Analytical Physics I (3,3)*
Together with 01:750:227, 228 forms a thorough introductory sequence. First semester: graphs, orders of magnitude, units, dimensions, errors and precision, review of mathematics useful to physics, kinematics, vectors, force, and Newton's laws. Second semester: energy, momentum, rotational motion, oscillations, liquids, and thermal physics, including the laws of thermodynamics and the kinetic theory of gases.
Lec. 2 hrs., workshop 3 hrs. Corequisites: 01:640:112 or 115 (first semester), 01:640:CALC1 (second semester). Prerequisites: 01:750:115 or 01:750:123 for second semester 01:750:116. Sequence 01:750:115-116 is equivalent to 01:750:123-124, if both 01:750:115 and 116 are taken. Intended for engineering and physics majors who need extra help in preparing for 01:750:227, 228.

01:750:120 *Analyzing the X-Ray Universe (3)*
Astrophysical analysis of stellar properties and evolution; hands-on techniques for understanding cosmic x-ray sources, utilizing NASA data archives. Online course. This course is currently not offered.
Prerequisite: 01:640:112 or higher or placement.

01:750:123-124 *Analytical Physics I (2,2)*
Forms a thorough introductory sequence together with 01:750:227, 228. Kinematics, dynamics, energy, momentum, angular momentum, heat, and kinetic theory.
Lec. 1 hr., rec. 1 hr. Corequisites: 01:640:151-152. Primarily for engineering and physics majors. This course should be followed by 01:750:227, 228 (or 204 if changing major). Prerequisites: 01:750:115 or 01:750:123 for second semester 01:750:124

01:750:140 *The Greenhouse Effect (3)*
Physical and chemical bases of the "greenhouse effect" and its global impact: biological, climatic, economic, and political. Reducing the emission of "greenhouse" gases; nuclear energy, and other alternative energy sources.
For nonscience majors; may not be taken for major or minor credit in science or engineering. Credit not given for both this course and 01:160:140, 01:450:140, or 01:556:140.

01:750:155 *Introduction to Research and Research Communities in Physics & Astronomy (1.5)*
Introduction to research and research communities in Rutgers Physics & Astronomy for first year students.

Requires special permission of undergraduate program director. For first-year prospective physics and astrophysics majors.

01:750:161 *Elements of Physics (4)*
Survey of major topics in physics, such as motion, fluids, waves, electricity, electrical circuits, radioactivity, relativity, and atomic structure, with emphasis on developing laboratory and problem-solving skills.
Lec. 3 hrs., workshop/lab. 3 hrs. Prerequisite: 01:640:112 or 115. Primarily for pharmacy students

01:750:193-194 *Physics for the Sciences and Physics for the Sciences Laboratory (4,4)*
Introduction to physics with biological, ecological, and chemical applications. Selected topics in mechanics, thermodynamics, fluids, waves, electricity, magnetism, optics, and modern physics. Integrated laboratory experiments.
Lec. 2 hrs., workshop 1.5 hrs., lab. 3 hrs. Prerequisite for 01:750:193: 01:640:112 or 115 or equivalent. Prerequisite for 01:750:194: 750:193. Credit not given for more than one of 01:750:203, 01:750:193, or 01:750:201. Credit not given for more than one of 01:750:204, 01:750:194, or 01:750:202.

01:750:201-202 *Extended General Physics and Extended General Physics Laboratory (5,5)*
Elementary but detailed analysis of fundamental topics. First semester: review of mathematical skills useful for physics, vectors, kinematics; Newton's laws including gravitation, conservation laws, fluids, thermal physics. Second semester: electricity and magnetism, geometrical and wave optics, relativity and modern physics.
Two 80-min. lecs., one 80-min. workshop, lab. 3 hrs. Prerequisites: 01:640:112 or 115. Sequence 01:750:201-202 is an integrated program equivalent to 01:750:203-204 and 01:750:205-206. Intended for science, science teaching, and prehealth profession majors with a nontraditional background or who would benefit from additional support. Credit not given for more than one out of 01:750:203, 01:750:193, or 01:750:201. Credit not given for more than one of 01:750:204, 01:750:194, or 01:750:202.

01:750:203-204 *General Physics (3,3)*
Elementary but detailed analysis of fundamental topics: motion, gravitation, momentum, energy, electromagnetism, waves, heat, kinetic theory, quantum effects, and atomic and nuclear structures.
Lec. 2 hrs., rec. 1 hr. Corequisites: 01:750:205-206. Primarily for students in scientific curricula other than physics. Credit not given for more than one out of 01:750:203, 01:750:193, or 01:750:201. Credit not given for more than one of 01:750:204, 01:750:194, or 01:750:202.

01:750:205-206 *General Physics Laboratory (1,1)*
Laboratory to complement 01:750:203-204.
Corequisites: 01:750:203-204.

01:750:227 *Analytical Physics IIA (3)*
Electrostatics, particles in electric and magnetic fields, electromagnetism, circuits, Maxwell's equations, electromagnetic radiation.
Prerequisites: [(01:750:116 or 01:750:124) and (01:640:152)]. Corequisite: (01:640:251 or 01:640:291) and (01:750:229). Primarily for engineering and physics majors.

01:750:228 *Analytical Physics IIB (3)*
Waves and optics, relativity, quantum properties of electrons and photons, wave mechanics, atomic, solid state, nuclear, and elementary particle physics.
Prerequisite: [(01:750:227 or 204 or 272) and (01:640:152)]. Corequisite: 01:750:230. Primarily for engineering and physics majors.

01:750:229-230 *Analytical Physics II Laboratory (1,1)*
Laboratory to complement 01:750:227 and 228.
Corequisites: 01:750:227 and 228.

01:750:271-272 *Honors Physics I,II (3,3)*
Introduction to classical physics, covering mechanics, fluids, thermodynamics, waves, electricity, magnetism, and optics.
Prerequisites: For 272: 01:640:151 or higher and 750:271. Corequisites: For 271: 01:640:151 or higher and 01:750:275; For 272: 01:640:152 or higher and 01:750:276. Special permission of the SOE Honors Dean or Physics & Astronomy Undergraduate Program Director required.

01:750:273 *Honors Physics III (3)*
Relativity, wave, and quantum properties of photons and electrons; the structure of atoms, molecules, and solids; nuclear physics; elementary particles.
Prerequisites: 01:750:272 and 01:640:152. Special permission of the SOE Honors Dean or Physics & Astronomy Undergraduate Program Director required.

01:750:275,276 *Classical Physics Laboratory (1,1)*
Experiments in classical physics.
Prerequisite: 01:750:275 (for 276). Prerequisite: Enrollment in an honors program or permission of the department. For physics majors and honors students. Corequisites: 01:750:271 (for 275); 01:750:272 (for 276).

01:750:301 *Physics of Sound (3)*
Scientific basis of sound: waves, vibrating systems, normal modes, Fourier analysis and synthesis, perception and measurement of sound, noise, musical instruments, room acoustics, sound recording and reproduction, electronic synthesizers, and digital sound.
Prerequisites: Two semesters of introductory physics and two semesters of calculus. Primarily for science majors.

01:750:305 *Modern Optics (3)*
Geometrical optics; electromagnetic waves and the wave equation; superposition, interference, diffraction, polarization, and coherence; holography; multilayer films, Fresnel equations; blackbody radiation, Einstein coefficients, and lasers; waveguides and fiber optics; and optical properties of materials.
Prerequisites: 01:640:CALC3; 01:750:227 or 272.

01:750:313 *Modern Physics (3)*
Relativistic mechanics, wave and quantum properties of photons and electrons; Schrödinger equation and its application to the structure of atoms, molecules, and solids; nuclear physics; elementary particles.
Prerequisites: 01:640:CALC2; 01:750:202 or 204 or 228.

01:750:323-324 *Advanced General Physics (3,3)*
For students in the general physics program and others who wish a course in classical mechanics (323) and a course in electromagnetism (324) beyond the introductory level.
Prerequisites: 01:750:202 or 204 or 228 and 01:640:CALC2 (for 01;750:323); 01:750:323 or 381 (for 01:750:324).

01:750:326 *Computer-Based Experimentation and Physics Computing (4)*
Experiments in mechanics, electromagnetism, and modern physics, emphasizing error analysis. Uses the computer as a laboratory tool for symbolic manipulation, data collection, data analysis, simulation, and report writing.
Prerequisites: ((01:750:202 or 01:750:204) and 01:750:206) or (01:750:228 and 01:750:230) or (01:750:276).

01:750:327 *Modern Instrumentation (3)*
Theory and use of integrated circuits and their interconnection to produce measuring devices, control apparatus, and interfaces for such devices to microcomputers.
Prerequisites: ((01:750:202 or 01:750:204) and 01:750:206) or (01:750:227 and 01:750:229) or (01:750:272 and 01:750:276) or (01:750:194). Required for physics majors, but also suitable for psychology, biological sciences, and other physical science majors.

01:750:341,342 *Principles of Astrophysics (3,3)*
Properties and processes of the solar system, the stars, and the galaxies; origin of the elements; evolution of the stars and the universe; neutron stars and black holes.
Prerequisites: For 341: ((01:750:201 or 01:750:203 or 01:750:116 or 01:750:124 or 01:750:271) and 01:640:152). For 342: ((01:750:202 or 01:750:204 or 01:750:228 or 01:750:273) and 01:640:152).

01:750:345 *Computational Astrophysics (3)*
Introduction to computational astrophysics, including key algorithms, their implementation in code, and their application to current research in astrophysics. Extended projects feature analysis of real data and simulations.
Prerequisites: 01:750:341 or 342.

01:750:346 *Observational Astronomy (3)*
Introduction to the tools and techniques of observational astronomy across the electromagnetic spectrum, and to their application in the context of current research in astrophysics. Extended projects offer each student an opportunity to work with astronomical data from at least two wavelength regimes (among radio, optical/infrared, and X-ray), and in the two core modes of astronomical observations (imaging and spectroscopy).
Prerequisites: 01:750:345

01:750:351 *Thermal Physics (3)*
Principles of thermodynamics with physical and chemical applications: energy, entropy and temperature, the three laws of thermodynamics, cycles, open systems, critical phenomena, chemical equilibrium, ideal gas reactions, phase rule, phase diagrams, kinetic theory, and introduction to statistical mechanics.
Prerequisites: [(01:640:CALC3 and 01:750:227 or 01:750:272)]

01:750:361 *Quantum Mechanics and Atomic Physics (3)*
Introductory quantum mechanics: matter waves, uncertainty principle, stationary states and operators; the Schrödinger equation and its solutions for simple potentials; the hydrogen atom, quantization of angular momentum, spin; complex atoms and molecules.
Prerequisites: 01:640:CALC4; 01:750:228 or 273.

01:750:368 *Physics and Astronomy Junior Seminar (1)*
Development of communication skills needed by professionals in physics and related fields. Oral and written reports, discussions of topics of current interest, and career options.

For physics and astrophysics majors only. May not be taken for major or minor credit.

01:750:381-382 *Mechanics (3,3)*
Intermediate treatment of Newtonian mechanics, including particle dynamics, rigid body motion, accelerated and rotating reference frames, and Lagrange's and Hamilton's equations.
For 381: Prerequisites: 01:750:124 or 01:750:203 or 01:750:271; two semesters of calculus. Corequisite: 01:640:CALC3 or permission of instructor. For 382: 01:750:381. A theoretical course, primarily for physics and astrophysics majors.

01:750:385-386 *Electromagnetism (3,3)*
Intermediate course for physics majors and others who wish a thorough discussion of the fundamental laws of electromagnetism; electric and magnetic fields; dielectric and magnetic materials; DC and AC circuits; Maxwell's equations; and electromagnetic radiation.
Prerequisites: For 385: 01:640:CALC3; 01:750:227 or 272 or 324; or permission of instructor. For 386: 01:750:385. A theoretical course, primarily for physics majors.

01:750:387-388 *Experimental Modern Physics (3,3)*
Experiments in atomic, nuclear, condensed matter, and surface physics.
Prerequisites: 01:750:326 and 01:750:327 and (01:750:313 or 01:750:361 or 01:750:417). Credit not given for both 01:750:387 and 01:750:389.

01:750:389 *Experimental Applied Physics (3)*
Experiments in classical and modern physics emphasizing techniques useful for applications.
Prerequisites: 01:750:326, 327. Corequisite: 01:750:313 or 361 or permission of instructor. Credit not given for both 01:750:387-388, and 389.

01:750:397 *Physics of Modern Devices (3)*
Physical laws and principles underlying modern devices and processes; examples including motors, generators, refrigerators, vacuum tubes, transistors, radio and television receivers, computers, rockets, nuclear reactors, radiation detectors, lasers, and holograms.
Prerequisites: Two semesters of introductory physics and a course in calculus.

01:750:406 *Introductory Solid State Physics (3)*
Fundamental properties of metals, insulators, and semiconductors; dielectrics; magnetism; and superconductivity.
Prerequisites: (01:750:361 or 01:750:417) and 01:750:386.

01:750:417 *Intermediate Quantum Mechanics (3)*
Vector space formulation, operators, eigenfunctions, bound states, angular momentum, central potentials, approximation methods, scattering.
Prerequisite: 01:750:361.

01:750:418 *Nuclei and Particles (3)*
Nuclear forces and models; classification and interactions of elementary particles.
Prerequisite: 01:750:361.

01:750:421 *Introduction to Quantum Computing (3)*
Introduction to quantum computing including qubits, entanglement, quantum gates, quantum algorithms, applications to quantum chemistry and quantum information theory.
rerequisites: (01:750:228 or 01:750:273) and (01:640:244 or 01:640:250 or 01:640:252).

01:750:431 *Introduction to Computational Biology for Physicists (3)*
Introduction to analytical and computational methods applied to biological data and phenomena. Concepts of biology explained using techniques from physics, such as partition functions, mean field theory, and fixed point theory. Methods such as Bayesian analysis, parametric and nonparametric tests, sequence alignment, phylogenetic analysis, pattern recognition, and neural networks applied to big data to solve problems of current research interest using Matlab programming.
Prerequisites: (01:750:202 or 01:750:204 or 01:750:227 or 01:750:272) and 01:640:244. Corequisite: 01:750:351.

01:750:441 *Stars and Star Formation (3)*
Observed properties of stars. Internal structure of stars, energy generation and transport, neutrinos, solar oscillations. Evolution of isolated and double stars, red giants, white dwarfs, variable stars, supernovae. Challenges presented by formation of stars, importance of magnetic fields. Pre-main sequence stellar evolution.
Prerequisites: 01:750:342 or (01:750:351 and 01:750:361).

01:750:442 *High Energy Astrophysics and Radiative Processes (3)*
Radiation and scattering processes in plasma. Detection of X and gamma rays. Supernovae and remnants, pulsars. Gamma-ray bursts, accretion disks, and binary star outbursts. Quasars and active galactic nuclei, cosmic rays.
Prerequisites: 01:750:342 or (01:750:361 and 01:790:386).

01:750:443 *Galaxies and the Milky Way (3)*
Properties of galaxies: photometry, kinematics, and masses. Disk galaxies: spiral patterns, bars and warps, gas content, star formation rates, chemical evolution. Elliptical galaxies: shapes. Structure of the Milky Way. Nature of dark matter.
Prerequisites: (01:750:342) or [(01:750:351 and 01:750:361 and 01:750:381)].

01:750:444 *Introduction to Cosmology (3)*
Expansion of the universe, techniques for distance estimation. Large-scale structure of the universe. Cosmological models: open, closed, flat, and accelerating universes. Microwave background: observations, properties, and origin. Problems of standard cosmology and preliminary concept of inflation.
Prerequisites: (01:750:341 and 342) or (01:750:351 and 361).

01:750:451 *Physical Oceanography (4)*
Principles of ocean physics. Mass, momentum, heat, and freshwater conservation and atmospheric exchange. Influence of Earth's rotation. The ocean's role in climate. Tides, waves, and currents. Effects of ocean circulation on its biology and chemistry.
Two 80-min. lecs., one 55-min. rec. Prerequisite: 01:750:204. Credit not given for both this course and 11:628:451 or 16:712:501.

01:750:464 *Mathematical Physics (3)*
Physical applications of linear algebra, the exterior calculus, differential forms, complexes and cohomology. Applications include Hamiltonian dynamics, normal mode analysis, Markov processes, thermodynamics, Schrödinger's equation, special relativity, electrostatics, magnetostatics, Maxwell's equations, and wave equations.
Prerequisite: 01:640:423 or equivalent.

01:750:487,488 ***Special Topics in Physics (BA, BA)***
Study of selected areas in physics.
Special permission of Physics & Astronomy Undergraduate Program Director required. The number of credits will be determined when the course is scheduled.

01:750:491,492 ***Research in Physics (BA,BA)***
Independent research supervised by a member of the department.
Prerequisite: Permission of instructor.

01:750:493,494 ***Independent Study in Physics (1-4,1-4)***
Independent study supervised by a member of the department.
Prerequisite: Permission of instructor.

01:750:495,496 ***Honors in Physics (1-4,1-4)***
Supervised independent research or reading in experimental or theoretical physics, culminating in a seminar conducted by the student.
Prerequisite: Invitation of chair.

01:750:497,498 ***Honors in Astronomy (1-6,1-6)***
Supervised independent research or reading in astronomy, culminating in a seminar conducted by the student.
Prerequisite: Invitation of chair.

Life Sciences (SAS)

LIFE SCIENCES

Division of Life Sciences, School of Arts and Sciences

Website: http://lifesci.rutgers.edu

Dean: Lori R. Covey

Director, Office of Undergraduate Instruction: Martha Haviland

Chair, Department of Cell Biology and Neuroscience: Megerditch Kiledjian

Chair, Department of Genetics: Tara C. Matise

Chair, Department of Kinesiology and Health: Brandon Alderman

Chair, Department of Molecular Biology and Biochemistry: Barth Grant

The following majors are available in the Division of Life Sciences:

Biological Sciences 119
Cell Biology and Neuroscience 146
Exercise Science 377

Genetics 447
Molecular Biology and Biochemistry 694
Sport Management 955

Students interested in the life sciences also may consider related tracks within major programs offered by the Department of Chemistry and Chemical Biology (chemical biology option) and the Department of Psychology (specialization in behavioral neuroscience).

The Division of Life Sciences coordinates, fosters, and integrates the instructional and research activities of a broad range of faculty with interests in the biological sciences. The principal units of the division include four departments: Cell Biology and Neuroscience, Genetics, Kinesiology and Health, and Molecular Biology and Biochemistry, as well as two sections, the biological chemistry section of the Department of Chemistry and Chemical Biology, and the biopsychology and behavioral neuroscience section of the Department of Psychology. The division's primary goal is to provide a high caliber of interdisciplinary teaching and research in the life sciences as it trains the next generation of teachers, researchers, and future health professionals.

Instruction in the life sciences has undergone enormous changes over the past 15 to 20 years. These changes reflect the intellectual revolution of the last two decades, as well as technical advances that have expanded greatly the tools available to life scientists. Today, students majoring in the life sciences at Rutgers University-New Brunswick experience an exciting atmosphere of learning that exposes them to the concepts and methods of these intellectual and technological advances. The students have open to them a plethora of learning avenues, ranging from thought-provoking lecture presentations to original and cutting-edge research opportunities in state-of-the-art laboratories. A first-class faculty and modern laboratory equipment reflect the division's commitment to provide its students with the best learning environment.

The division offers a wide spectrum of majors for students interested in the life sciences. These options range from a division-based major in biological sciences, designed to provide a general life sciences education, to department-based majors in cell biology and neuroscience, exercise science, genetics, molecular biology and biochemistry, and sport management aimed at providing specialized training, with a strong emphasis on research. Graduates of the division will be highly competitive for a range of postbaccalaureate opportunities, including graduate education and research, health-professions training, and biomedical and biotechnological research positions, as well as teaching careers in the sciences.

The first two years of the student's tenure at Rutgers is expected to revolve around the life sciences core curriculum, a series of basic offerings designed to provide the general background required for pursuing upper-division courses in any of the individual majors. Regardless of the major chosen, students are encouraged to participate in independent study within a research laboratory in order to take advantage of the rich expertise of the many life sciences faculty in New Brunswick and Piscataway. The exercise science and the sport management majors require an internship experience. The division also has a highly developed advising system, with dedicated and knowledgeable faculty advisers available to work with individual students in their selection of courses, completion of major requirements, and preparation for future careers.

Students may not major in more than one of the following majors in the Division of Life Sciences: Biological Sciences (119), Cell Biology and Neuroscience (146), Exercise Science (377), Genetics (447), Molecular Biology and Biochemistry (694), or Sport Management (955). Furthermore, students majoring in one of these four majors may not minor in Biological Sciences (119). Life science majors or minors may not be combined as double majors or as major/minors with Biomathematics (122), Biochemistry (115), or Microbiology (680).

No more than 16 credits from among the life science courses required for completion of any Division of Life Sciences major may be fulfilled by credits transferred from any school outside of Rutgers-New Brunswick.

For additional information and announcements about the Division of Life Sciences, please visit the division's website.

Life Sciences (SAS)

Life Sciences Core Curriculum

Life Sciences Core Curriculum

The life sciences core curriculum is a set of courses that include a series of introductory- and intermediate-level courses in the physical and life sciences forming a foundation of knowledge necessary to understand modern biology and to prepare for the more advanced courses required for each major. Following are core courses:

1. 01:119:115-116 General Biology (4,4)

2. 01:119:117 Biological Research Laboratory (2)

3. 01:160:161-162 General Chemistry (4,4) or 01:160:163-164 Honors General Chemistry (4,4) or 01:160:165-166 Extended General Chemistry (4,4)

4. 01:160:171 Introduction to Experimentation (1)

5. 01:160:307-308 Organic Chemistry (4,4) or 01:160:315-316 Honors Organic Chemistry (4,4)

6. 01:160:311 Organic Chemistry Laboratory (2)

7. 01:750:203-204 General Physics (3,3) or 01:750:271-272 Honors Physics (3,3)*

8. 01:750:205-206 General Physics Laboratory (1,1)*

9. 01:640:135,136 Calculus for the Life and Social Sciences (4,4) or 01:640:151-152 Calculus for Mathematical and Physical Sciences (4,4)**

10. 01:447:380 Genetics (4)***.

*01:750:193-194 (4,4) or 01:750:201-202 (5,5) may be substituted for 01:750:203-204 (3,3) plus 01:750:205-206 (1,1).

**Basic Statistics for Research (01:960:401, 3 credits), Basic Probability and Statistics (01:960:379, 3 credits), or Statistics I and II (01:960:211 and 212) may be substituted for the second semester of Calculus.

***Students majoring in genetics must take 01:447:384-385 (4,4) instead of 01:447:380

Life Sciences (SAS)

Learning Goals

Learning Goals

Our overarching goal for educating our students majoring in biological sciences is to inspire them to want to discover and understand the natural world. In the process of achieving this goal, we expect our students to acquire not only facts and concepts, but also skills and perspectives. We hope that our learning goals will both prepare our students for a variety of career objectives and supply them with the tools to become lifelong learners in the ever-evolving world of biological sciences.

Learning Goals:

I. To acquire the appropriate factual and conceptual knowledge that provides students with a foundation to further their education and career in the areas of life science or health science. Students will be able to demonstrate basic knowledge (e.g., identify, define, explain, etc.) of the concepts, practices, and principles that comprise the biological sciences.

II. To develop data analysis and statistical reasoning skills that prepare students for a society increasingly reliant on the use of data and information. Students will be able to interpret/evaluate patterns in data presented in tables, figures, and graphs, as well as be able to organize, summarize, and present data.

III. To develop the ability to use scientific reasoning as embodied by the structured process commonly known as the scientific method to empower students with the ability to generate and refine knowledge. Students will be able to evaluate and apply the practice of science.

IV. To develop critical thinking and problem-solving skills necessary to prepare students to evaluate, synthesize, and generate knowledge that provides them with a competitive advantage to adapt to an evolving, global, and knowledge-based society. Students will be able to demonstrate application of higher-order thinking (e.g., classify, diagnose, evaluate, synthesize, hypothesize, etc.). Students will develop an understanding of not only the connections within biology, but also the connections between biology and other scientific disciplines.

Life Sciences (SAS)

Entry Requirements of the Major

Entry Requirements of the Major

Students wishing to major in biological sciences must have completed two semesters of General Biology and Biological Research Laboratory with a grade of C or better in each course. Both semesters of General Biology must have been completed at the same institution or on the same campus at Rutgers. No more than two courses with a grade of D may be used to fulfill the requirements of the major. A 2.0 grade-point average must be maintained in the life sciences core and elective courses applied toward the major. Students must meet with an adviser before they can successfully declare their major.

Life Sciences (SAS)

Major Requirements

Major Requirements

The program in biological sciences, administered through the Division of Life Sciences Office of Undergraduate Instruction, is intended to provide a broad and comprehensive training in modern biology. This course of study is recommended for those who wish to study biology as part of their liberal arts education, preparing them for a career in one of the health professions, graduate studies in biology, a teaching career in secondary schools (courses in education also are required), as well as employment in various areas of the life sciences. If a student wishes to concentrate his or her studies in a specific area of biology, he or she should consider a major offered by one of the departments in the Division of Life Sciences or in the School of Environmental and Biological Sciences. Faculty advisers are available to assist each student with course selection and program requirements.

A minimum of 20 credits of coursework from among general biology, genetics, and life sciences electives must be completed in residence. In other words, no more than 16 credits in this part of the major requirements may be transferred from any institution outside of Rutgers University-New Brunswick. This rule is intended to assure that students receiving degrees from Rutgers-New Brunswick have taken a minimum number of courses in their major with this faculty. Please keep in mind that although a course may transfer from another institution into one of the Rutgers-New Brunswick schools, it will not necessarily be accepted toward the major in biological sciences. Therefore, all transfer courses must be evaluated and accepted by the advising office of the Office of Undergraduate Instruction in order to count toward the major. As indicated earlier, students must complete both semesters of general biology at the same institution or on the same campus of Rutgers before becoming eligible to declare the biological sciences major. Any life sciences courses applied to the major in biological sciences should be taken within 10 years of graduating. Returning students must meet with their adviser to discuss their path to graduation. Credits for cooperative education and Winter Session courses (exceeding 1 credit) may not be used to satisfy requirements for the major in biological sciences. To be applied to the major, Summer Session courses must be offered over a minimum of five weeks. Online courses will be reviewed on a case-by-case basis to confirm that they meet departmental learning goals before they may be used to satisfy the requirements for the major.

The course requirements for the biological sciences major are divided into two sections: the life sciences core courses and the life sciences electives.

Required Life Sciences Core Courses (47 credits)

01:119:115-116 General Biology I,II (4,4)
01:119:117 Biological Research Laboratory (2)
01:160:161-162 General Chemistry (4,4) or 01:160:163-164 Honors General Chemistry (4,4) or 01:160:165-166 Extended General Chemistry (4,4)
01:160:171 Introduction to Experimentation (1)
01:160:307-308 Organic Chemistry (4,4) or 01:160:315-316 Honors Organic Chemistry (4,4)*
01:160:311 Organic Chemistry Laboratory (2)
01:750:203-204 General Physics (3,3) or 01:750:271-272 Honors Physics***
01:750:205-206 General Physics Laboratory (1,1)***
01:640:135,~~138~~136 Calculus for the Life and Social Sciences (4,4)** or 01:640:151-152 Calculus for Mathematical and Physical Sciences (4,4)
01:447:380 Genetics (4)
* With approval from a Biological Sciences Advisor, 01:160:308/316 may be replaced by another elective course. Please meet with an Advisor to discuss.

**01:750:193-194 (4,4) or 01:750:201-202 (5,5) may be substituted for 01:750:203-204 (3,3) plus 01:750:205-206 (1,1).
***Calculus II 01:640:13~~8~~6(4) may be substituted by 01:960:379 Basic Probability and Statistics (3), 01:960:401 Basic Statistics for Research (3), or 01:960:211-212 Statistics I,II (3,3).

Life Sciences Electives (24 credits)

It is highly recommended that students meet with a life sciences adviser in the Division of Life Sciences Office of Undergraduate Instruction when planning their elective courses. It is important that the courses taken complement each other as much as possible and are not merely a collection of unrelated topics.

The electives must include at least three laboratory courses, only one of which may be satisfied by research work. Biological Research Laboratory and "library research" do not qualify for this requirement. A minimum of six courses (18 credits) must be at the 300 or 400 level, including at least three separate laboratory courses or three courses with a laboratory component. The laboratory associated with genetics (01:447:382 or equivalent), if taken, may be used to satisfy one of the three laboratory requirements.

No course at the 100 level may be used to satisfy the life sciences elective requirements. A maximum of 6 credits of independent study/research/honors research may be used toward the 24 elective credits. Please keep in mind that a minimum grade-point average of 2.8 is required to enroll in an independent study/research course in biological sciences. Research courses can satisfy only one of the three laboratory requirements, regardless of number of credits. Courses taken on a pass/fail basis may not be used to satisfy requirements for the major in biological sciences. A grade-point average of 2.0 or better in courses credited toward the major is required. No more than two courses with a grade of D may be used to fulfill the requirements of the major.

The elective courses must include at least one course (3 or 4 credits) each from the Departments of Cell Biology and Neuroscience 146, Genetics 447, Molecular Biology and Biochemistry 694, and Ecology, Evolution, and Natural Resources 11:216 at the School of Environmental and Biological Sciences. A list of approved courses in subject areas in addition to those in the Division of Life Sciences (Biological Sciences 119, Cell Biology and Neuroscience 146, Genetics 447, and Molecular Biology and Biochemistry 694) will be published by the advising office of the Office of Undergraduate Instruction. It is strongly recommended that students consult this list, which is available

on the website, prior to registering for their courses. Generally, acceptable courses from other departments on any campus of Rutgers University have a year of general biology as a prerequisite; however, there are exceptions. It is imperative for students to consult the published list and meet with an adviser. Credits from cooperative education and Winter Session courses (exceeding 1 credit) may not be used to satisfy requirements for the major in biological sciences. To be applied to the major, Summer Session courses must be offered over a minimum of five weeksIf double majoring with another permitted life sciences major, at least four of the 3-4 credit life science courses applied to the Biology major may not overlap with courses used to fulfill second major requirements. Given that biological sciences is a dynamic and developing field, it is critical that coursework applied to the major must be current. Thus, any life sciences courses applied to the major in biological sciences should be taken within 10 years of graduating. Returning students must meet with their adviser to discuss their path to graduation.

Life Sciences (SAS)

Minor Requirements

Minor Requirements

The minor requires four courses of at least 3 credits each in life sciences subjects as well as General Biology and Biological Research Laboratory. Both semesters of General Biology must be completed at the same institution or on the same campus at Rutgers. No other course at the 100 level may be used to satisfy the minor. A minimum of 11 credits must be taken at Rutgers University-New Brunswick. A maximum of 3 credits of research in a life sciences subject may be used toward the minor. A minimum of three courses at the 300 level or above is required. If majoring in a permitted life sciences major, no more than two of the four life science courses applied to the minor requirements may overlap with courses used to fulfill major requirements. Only life sciences courses acceptable for the biological sciences major may be used for the minor. Courses in chemistry, mathematics, or physics do not count toward the minor. A grade-point average of 2.0 or better in courses credited toward the minor is required. No more than one course with a grade of D may be used to fulfill the requirements of the minor.

Life Sciences (SAS)

Independent Study and Research in Biology

Independent Study and Research in Biology

A minimum cumulative grade-point average of 2.8 is required for a student to register for an independent study/research course in biological sciences. A maximum of 6 credits of laboratory-based independent study, research, or honors projects may be used to fulfill the elective credits requirement in biology. The independent study/research form, available from the advising office of the Office of Undergraduate Instruction, must be completed and signed by the professor in whose laboratory the student will study prior to initiating the research project. Approval of a research proposal by the director of advising and a special permission number from the Office of Undergraduate Instruction is necessary for registration. Students may not earn academic credit for laboratory projects for which they are being paid. Students wishing to apply research credits from other departments toward the major in biological sciences must get approval from the advising office of the Office of Undergraduate Instruction, Division of Life Sciences, prior to beginning their research project.

Life Sciences (SAS)

Departmental Honors Program

Departmental Honors Program

To qualify, a student must have a cumulative grade-point average of 3.0 or better and an average of 3.4 or better in life sciences core and elective courses credited toward the biological sciences major at the end of the junior year and previous research experience. At that time, the student should apply formally to the advising office of the Office of Undergraduate Instruction. Accepted students are expected to complete at least 6 credits over two semesters in an independent research project, resulting in a thesis, and to pass an oral examination before a faculty committee in the general field of the student's program of emphasis. If the research is done in a laboratory outside of the Division of Life Sciences, the examination committee must include at least one individual from the Division of Life Sciences faculty. Departmental Honors is completed in the fall and spring of senior year. Students accepted into special programs (e.g. BA/MD) may complete honors during junior year.

Honors students must register either for an honors course sequence in life sciences or for a course sequence in a school honors program. These decisions should be discussed with an adviser. An approval form (available in the advising office) must be completed.

Life Sciences (SAS)

Joint B.A./M.D. Program (Rutgers Undergraduate-Robert Wood Johnson Medical School)

Joint B.A./M.D. Program (Rutgers Undergraduate-Robert Wood Johnson Medical School)

Rutgers Undergraduate/Robert Wood Johnson Medical School Joint Bachelor of Arts/Medical Degree (B.A./M.D.) Program

This program is designed for high-achieving premedical students of Rutgers University who are in their sophomore year. Specially selected students will obtain bachelor's and medical degrees in a seven-year program of study taken at Rutgers undergraduate units and Robert Wood Johnson Medical School (RWJMS).

Application to this program is open to all undergraduate students enrolled at Rutgers University, New Brunswick. It is not directly associated with any one school within the university but see below for specific restrictions.

Admission is a two-stage and highly competitive process. In the first stage, undergraduate students are admitted into the program by an executive committee consisting of faculty from the appropriate units. Eligible applicants are sophomores at any of the undergraduate schools of Rutgers University who have spent at least a year here. Prospective applicants from Rutgers University-Newark and Rutgers University-Camden must transfer to one of the units in New Brunswick for their sophomore year and complete at least 30 credits here. All applicants must have completed 4 semesters of college with a minimum of 60 credits. Applicants with an Associate¿s Degree, regardless of whether it was earned as a dual degree in high school or as a traditional degree after high school,

are ineligible to apply for the program. Admitted students will need to complete all of the core requirements of their undergraduate unit and major requirements with the exception of Biological Sciences and Cell Biology and Neuroscience majors, who may apply credit from the first professional year toward the major requirements. During the fourth year, students will be full time at the medical school and elective credits will count towards the undergraduate degree. The executive committee reviews applications and selects those students who are deemed most qualified for the program. The second stage occurs typically after the fourth year of study. It is the responsibility of the RWJMS Admissions Committee to review the credentials of students recommended by the Joint Program Executive Committee. Students who are deemed to have met the academic and nonacademic standards of the program will be recommended to the RWJMS Admissions Committee. The purpose of this second, noncompetitive review is to ascertain that the student has maintained adequate academic and nonacademic qualities appropriate for retention in the medical school. It is expected that students will have grades of A or B (Honors or High Pass) in courses taken at both universities. However, recommendation is not automatic. The final decision rests with the RWJMS Admissions Committee. Upon approval by this admissions committee, the student will be permitted to continue into the fifth year of study and will be matriculated formally as a candidate for the M.D. degree at RWJMS.

Applicants to the B.A./M.D. program must be in their fourth semester at Rutgers University. Applications are available in the Health Professions Office after spring break; they are due by the end of May. There is no rolling admissions policy. Decisions are expected to be made in July. By the end of the semester of application, applicants must have completed a minimum of 60 credits of which at least 30 credits must be at Rutgers, and they must have been in attendance at Rutgers, New Brunswick a minimum of one year. Additionally, applicants must have a minimum cumulative and science grade-point average of 3.5 by the end of the third semester and sustain it through the end of the fourth. The applicant must have completed, or be in the process of completing by the end of the fourth semester, two semesters of biology with lab, two semesters of general chemistry with lab, two semesters of organic chemistry, one semester of college-level mathematics, and one semester of English. Applicants who have not taken General Biology I and II and lab at Rutgers University, either because they have been awarded advanced placement biology credits or because they have transferred equivalent courses from another institution, must have at least one year of upper-division biology courses at Rutgers-New Brunswick (i.e., two courses of at least 3 or more credits each at the 200 level or higher). Those students who are admitted to the program without having two semesters of physics, two semesters of English, and organic chemistry lab must complete these requirements by the end of the third year of study. Students who did not take the SAT or ACT but who are admitted to the program will be required to take the MCAT by April of the junior year and score competitively with a total score of at least 508 (minimum single sub score of 123). An application form has been developed that allows the student to provide the executive committee with information it deems useful for its deliberations.

The bachelor's degree will be awarded upon completion of the undergraduate college and major requirements, by the end of year four. Upon satisfactory completion of year seven and all RWJMS requirements, the student will receive the medical degree.

Students who wish to pursue a major other than biological sciences must discuss their plans with the appropriate department in order to establish the requirements they need to complete for their major. For a student at Rutgers-New Brunswick who has elected to major in biological sciences, 15 credits from RWJMS will be applied toward the major (as stipulated below). The baccalaureate degree will be awarded upon completion of the undergraduate college requirements and major requirements, usually by the end of year four. The number of credits, however, is not directly translated between the two universities; no more than 4 credits per laboratory course and 3 credits per non-laboratory course taken at RWJMS may be used toward the bachelor's degree at Rutgers.

A student enrolled in the program completing a major in biological sciences at Rutgers-New Brunswick is required to complete remaining Life Science Core Curriculum coursework and Intro to Biochemistry (01:694:301) and three approved life sciences electives (3- or 4-credit courses) at Rutgers-New Brunswick. Students who have not taken General Biology I and II at Rutgers, either because they have been awarded AP biology credit or because they have transferred equivalent courses from another institution, must complete an additional approved life sciences electives (3- or 4-credit courses) at Rutgers-New Brunswick.

Students in the program must meet with advisers at the medical school and at their undergraduate school when planning their elective courses. No more than one independent study/research course may be applied toward the biological sciences major for students in the B.A./M.D. program. Please be sure to meet with a biological sciences adviser when selecting life science elective courses because not all course combinations are allowed given overlap in subject matter taught at Rutgers' undergraduate units and RWJMS.

For further information on this program, you may contact the Division of Life Sciences, Health Professions Office, Nelson Biological Laboratories, 604 Allison Road, Piscataway, NJ 08854-8082, at 848-445-5667.

Life Sciences (SAS)

Joint B.A./M.D. Program (Rutgers Undergraduate-New Jersey Medical School)

Joint B.A./M.D. Program (Rutgers Undergraduate-New Jersey Medical School)

Rutgers Undergraduate/New Jersey Medical School Joint Bachelor of Arts/Medical Degree (B.A./M.D.) Program

The Rutgers Undergraduate/New Jersey Medical School joint program started in the fall of 2003. The purpose of the program is to permit students to begin their medical education after their third year or at least 96 degree credits at Rutgers. Specially selected students will obtain bachelor's and medical degrees in a seven-year program of study taken at Rutgers undergraduate units and New Jersey Medical School (NJMS).

This program is only open to students enrolled in Rutgers University-New Brunswick schools.

Admission is a two-phase and highly competitive process. In the first phase, undergraduate students are admitted into the program by the Joint Program Executive Committee consisting of faculty from the appropriate units. Eligible applicants are sophomores at any of the undergraduate schools at the New Brunswick location of Rutgers University who have been enrolled here for at least one year. The executive committee reviews applications and selects those students who are deemed most qualified for the program. The second phase occurs typically after the third year of study. It is the responsibility of the NJMS Admissions Committee to review the credentials of students recommended by the Joint Program Executive Committee. The purpose of this second review is to ascertain that the student has maintained adequate academic and nonacademic qualities appropriate for retention in the medical school. It is expected that students will have grades of A or B in courses taken at Rutgers. Students must complete the Medical College Admission Test (MCAT) by January of the junior year before matriculating at NJMS and be required to be in the competitive range of other accepted NJMS students. This second review is noncompetitive. Students who are deemed to have met the academic and nonacademic standards of the program will be recommended to the NJMS Admissions Committee. However, recommendation is not automatic. The final decision

rests with the Medical School Admissions Committee. Upon approval by the Medical School Admissions Committee, the student will be permitted to continue into the next year of study and will be matriculated formally as a candidate for the M.D. degree at the New Jersey Medical School.

Applicants for the program must be in their fourth semester at Rutgers-New Brunswick. Applications are available in the Health Professions Office after spring break; they are due by the end of May. There is no rolling admissions policy. Decisions are expected to be made in July. By the end of the semester of application, applicants must have completed a minimum of 60 credits of which at least 30 credits must be at Rutgers, and they must have been in attendance at Rutgers a minimum of one year. Additionally, applicants must have a minimum cumulative and science grade-point average of 3.5 by the end of the third semester which must be maintained through the end of the fourth. The applicant must have completed, or be in the process of completing by the end of the fourth semester, two semesters of biology with lab, two semesters of general chemistry with lab, two semesters of organic chemistry, one semester of college-level mathematics, and one semester of English. Applicants who have not taken General Biology I and II and lab at Rutgers, either because they have been awarded advanced placement biology credits or because they have transferred equivalent courses from another institution, must have at least one year of upper-division biology courses at Rutgers (i.e., two courses of at least 3 or more credits each at the 200 level or higher). Those students who are admitted to the program without having two semesters of physics, organic chemistry lab, and two semesters of English must complete these requirements by the end of the third year of study. An application form has been developed that allows the student to provide the committee with information the committee deems useful for its deliberations.

Students will be admitted at the end of the spring semester of year two and be formal members of the program beginning with year three. Prior to leaving the Rutgers undergraduate unit, students must satisfy all college and major requirements, except for the credits which they will receive from NJMS (please see next paragraph). For a student at Rutgers-New Brunswick who has elected to major in biological sciences, 15 credits from NJMS will be applied toward the major.

The baccalaureate degree will be awarded upon completion of the undergraduate college requirements and major requirements by the end of year four. Upon satisfactory completion of year seven or eight, as well as all New Jersey Medical School requirements, the student will receive the medical degree.

A student enrolled in the program completing a major in biological sciences at Rutgers-New Brunswick is required to complete remaining Life Science Core Curriculum coursework and three approved life sciences electives (3- or 4-credit courses) at Rutgers-New Brunswick. Students who have not taken General Biology I and II at Rutgers, either because they have been awarded AP biology credit or because they have transferred equivalent courses from another institution, must take Genetics 01:447:380, and four approved life sciences electives (3- or 4-credit courses) at Rutgers-New Brunswick. No more than one independent study/research course may be applied toward the biological sciences major for students in the B.A./M.D. program. Please be sure to meet with a biological sciences adviser when selecting life science elective courses because not all course combinations are allowed given overlap in subject matter taught at Rutgers and NJMS.

For further information on this program, you may contact the Division of Life Sciences, Health Professions Office, Nelson Biological Laboratories, 604 Allison Road, Piscataway, NJ 08854-8082, at 848-445-5667.

Joint B.A./D.M.D. Program (Rutgers School of Arts and Sciences-Rutgers School of Dental Medicine)

Joint B.A./D.M.D. Program (Rutgers School of Arts and Sciences-Rutgers School of Dental Medicine)

Rutgers School of Arts and Sciences/Rutgers School of Dental Medicine Joint Bachelor of Arts/Doctor of Medicine in Dentistry (B.A./D.M.D.) Program

Rutgers School of Arts and Sciences/Rutgers School of Dental Medicine joint program started in the spring of 2002. The purpose of the program is to permit students to begin their dental education after their third year or at least 98 credits at Rutgers. Specially selected students will obtain bachelor's and dental degrees in a seven-year program of study taken at Rutgers undergraduate units and Rutgers School of Dental Medicine.

This program is open to students enrolled at the School of Arts and Sciences, Rutgers University-New Brunswick. The program is administered by the Health Professions Office.

Admission is a two-phase and competitive process. In the first phase, undergraduate students are admitted into the program by the Executive Committee of the Joint Program consisting of faculty from the appropriate units. The executive committee reviews applications and selects those students who are deemed most qualified for the program. The second phase occurs typically after the third year of study. It is the responsibility of the Rutgers School of Dental Medicine Admissions Committee to review the credentials of students recommended by the articulated program executive committee. The purpose of this second review is to ascertain that the student has maintained adequate academic and nonacademic qualities appropriate for admission to the dental school. It is expected that students will have grades of A or B in courses taken at Rutgers University. Students must complete the Dental Admissions Test (DAT) and earn scores of 20 or better in Total Science, Academic Average, Organic Chemistry, General Chemistry, and Biology. Students may only take the DAT one time to qualify for this program. The second review is noncompetitive. Students who are deemed to have met the academic and nonacademic standards of the program will be recommended to the Rutgers School of Dental Medicine Admissions Committee. However, recommendation is not automatic. The final decision rests with the Dental School Admissions Committee. Upon approval by the Dental School Admissions Committee, the student will be permitted to continue into the next year of study and will be matriculated formally as a candidate for the Doctor of Medicine in Dentistry (D.M.D.) degree at the Rutgers School of Dental Medicine.

Applicants to the program must be in their fourth semester at the School of Arts and Sciences, Rutgers-New Brunswick. Applications are available in the Health Professions Office after spring break; they are due by the end of May. There is no rolling admissions policy. Decisions are expected to be made in July. By the end of the semester of application, applicants must have completed a minimum of 60 credits of which at least 30 credits must be at Rutgers, and they must have been in attendance at the School of Arts and Sciences, Rutgers-New Brunswick a minimum of one year. Additionally, applicants must have a minimum cumulative and science grade-point average of 3.5 by the end of the third semester, which must be maintained through the end of the fourth. The applicant must have completed, or be in the process of completing by the end of the fourth semester, two semesters of biology with lab, two semesters of general chemistry with lab, two semesters of organic chemistry, two semesters of college-level mathematics (Calc I and either Calc II or an approved Statistics course) and one semester of English. Applicants who have not taken General Biology I and II and lab at Rutgers, either because they have been awarded

advanced placement biology credits or because they have transferred equivalent courses from another institution, must have at least one year of upper-division biology courses at Rutgers (i.e., two courses of at least 3 or more credits each at the 200 level or higher). If AP credit was granted for general chemistry, then organic chemistry I and II and laboratory and a course in biochemistry at Rutgers are required. If AP credit was granted for English, upper level English at Rutgers is required with the same amount of credit work. If AP credit was granted for physics, two approved courses from Physics or Kinesiology & Health at Rutgers are required. Those students who are admitted to the program without having two semesters of physics, biochemistry, organic chemistry lab, and two semesters of English, must complete these requirements by the end of the third year of study.

The B.A./D.M.D. program is a seven-year program with year one being the first undergraduate year. Students will be admitted at the end of the spring semester of year two and be formal members of the articulated program beginning with year three. Prior to leaving the School of Arts and Sciences, Rutgers-New Brunswick, students must satisfy all college and major requirements, except for the credits which they will receive from Rutgers School of Dental Medicine (please see below). For a student at the School of Arts and Sciences, Rutgers-New Brunswick who has elected to major in biological sciences, 15 credits from Rutgers School of Dental Medicine will be applied toward the major.

The baccalaureate degree will be awarded upon completion of the general education and major requirements by end of year four. Upon satisfactory completion of year seven or eight, as well as all Rutgers School of Dental Medicine requirements, the student will receive the dental degree.

A student enrolled in the joint program completing a major in biological sciences at Rutgers-New Brunswick is required to complete any remaining Life Sciences Core Curriculum coursework and three approved life sciences electives (3- or 4-credit courses) at Rutgers-New Brunswick. Students who have not taken General Biology I and II at Rutgers-New Brunswick, either because they have been awarded AP biology credit or because they have transferred equivalent courses from another institution, must take Genetics 01:447:380, and four approved life sciences electives (3- or 4-credit courses) at Rutgers-New Brunswick. No more than one independent study/ research course may be applied toward the biological sciences major for students in the B.A./D.M.D. program. Please be sure to meet with a biological sciences adviser when selecting life science elective courses because not all course combinations are allowed given overlap in subject matter taught at Rutgers-New Brunswick and Rutgers School of Dental Medicine.

For further information on this program, you may contact the Division of Life Sciences, Health Professions Office, Nelson Biological Laboratories, 604 Allison Road, Piscataway, NJ 08854-8082, at 848-445-5667.

Life Sciences (SAS)

Joint B.A./M.S. Physician Assistant Program (Rutgers School of Arts and Sciences-School of Health Professions)

Joint B.A./M.S. Physician Assistant Program (Rutgers School of Arts and Sciences-School of Health Professions)

Rutgers School of Arts and Sciences/Rutgers School of Health Professions Joint Bachelor of Arts/Master of Science Degree (B.A./M.S.) Physician Assistant Program

This is a six-year (3+3) program offered jointly by the School of Arts and Sciences and the School of Health Professions (SHP). The program can be looked at as a two-phase program, an undergraduate phase followed by a professional phase. This program is open to students enrolled at the School of Arts and Sciences, Rutgers University-New Brunswick, who are U.S. citizens, permanent residents of the United States, or international individuals currently on a student visa. At a minimum, applicants must be enrolled for one year at Rutgers-New Brunswick earning at least 30 credits.

The first phase of the program includes three years of undergraduate liberal arts and basic science education. Students may apply to the second (professional) phase in April of their second year by applying to the Physician Assistant (PA) program. Personal interviews will be required of those applicants being considered for admission. The interview will serve to determine the applicant's emotional and intellectual maturity, ability to communicate, and the potential to achieve career satisfaction within the physician assistant role. Applicants must have a cumulative and science GPA of 3.2. In cases where individuals may show high potential by improved performance, exceptions to this requirement may be considered. Please note that acceptance by Rutgers University does not guarantee acceptance by the PA program.

Applicants to the program must have completed the following courses with a grade of C or better: at least one semester (3 credits) of English composition, applied statistics or biostatistics (from Psychology, Biology, or Math departments), General Biology I and II with lab (119:115, 116, and 117, or equivalents); General Chemistry I and II with lab (160:161,162 and 171, or equivalents); and General Psychology (830:101, or equivalent). If the student has been granted AP credit by Rutgers for science courses, additional science courses will be required.

All applications must be received by June 1 and final notices of acceptance will be made by August 1. If the applicant is accepted into the program, it will be contingent on maintaining a 3.2 GPA through the end of the third undergraduate year at Rutgers-New Brunswick, and on all requirements for the undergraduate degree being met before the beginning of the fourth year. Students who are accepted into the second phase of the program will begin this phase at the beginning of their senior year. At the end of the senior year, these students will receive a bachelor of arts degree conferred by the School of Arts and Sciences, Rutgers University-New Brunswick. After completion of the remaining two years of the PA program, graduates will receive a master of science degree awarded by Rutgers School of Health Professions.

Before entering the second (professional) phase, a student accepted by this program must also complete for the PA program, Functional Human Anatomy (01:377:223), General Microbiology (01:447:390), Intro to Biochemistry (01:694:301) and Systems Physiology (01:146:356) (waived if Gen Bio II is completed at Rutgers-NB and not AP credit), and 6-8 additional credits of life science electives. Students majoring in biological sciences are required to have completed, in addition to the School of Arts and Sciences core distribution requirements, the Life Sciences Core requirements, Intro to Biochemistry (01:694:301) and General Microbiology (01:447:390) and one (three credit or more) course from the 216 subject area approved electives. Students with AP or transfer credit of General Biology I and II and lab must take an additional life science elective course for 3 or more credits. A maximum of 14 credits from SHP courses will be accepted toward the biological sciences major. Please be sure to meet with a biological sciences adviser when selecting life sciences elective courses because not all course combinations are allowed given overlap in subject matter taught at Rutgers and SHP.

For a complete description of the requirements for the major in biological sciences, please read the appropriate section under the Division of Life Sciences in this catalog.

For more information about this program, you may contact the PA program office at the School of Health Professions, 675 Hoes Lane, Piscataway, NJ 08854, at 732-235-4444; or the Division of Life Sciences, Health Professions Office at Rutgers University, Nelson Biological Laboratories, 604 Allison Road, Piscataway, NJ 08854-8082, at 848-445-5667.

Life Sciences (SAS)

Courses

Courses

With the exception of 01:119:115,116, and 117 General Biology I and II and Biological Research Laboratory, courses numbered at the 100 level may not be used for major credit in any of the majors within the Division of Life Sciences.

01:119:098 ***Foundations for Biological Science (E2)***
Selected topics in general biology: introduction to cellular organization, metabolism, genetics, reproduction, and organ systems. Development of analytical reasoning and science-oriented study techniques.
Preparation for college-level general biology.

01:119:103 ***Principles of Biology (4)***
Selected topics in general biology, including cell structure, genetics, plant and animal diversity, basic plant and animal biology, ecology, and evolution.
Lec. 3 hrs., lab. 3 hrs. Designed for students who must take a one-semester laboratory course in introductory biology to meet major requirements. Credit not given for this course if student has already completed 01:119:115. Not for life sciences major credit.

01:119:109,110 ***Biology Practice Group (1,1)***
Students will work actively to (1) organize the lecture content, (2) identify what they are expected to do with that content (outcomes), (3) prepare and explain study aids (organizers) to ensure that they correctly understand the week¿s content, and (4) begin the self-evaluation process to gauge exam preparedness. Discussion of the basic methods and principles.
Corequisite for 109 is 01:119:115; corequisite for 110 is 01:119:116.

01:119:111,112 ***Reading in General Biology (1,1)***
Discussion and reading providing extensive and advanced coverage of selected topics.
Corequisite for 111 is 01:119:115; corequisite for 112 is 01:119:116.

01:119:115 ***General Biology I (4)***
Broad principles of cell biology, genetics, and evolution; the diversity of life and its physiology, ecology, and population dynamics. Lec. 3 hrs., Wkshp. 80 min.
Prerequisite has two parts: writing (prerequisite of 01:355:101, 01:355:103, or 01:355:104, or placement into 355:101 or 355:104) and math (prerequisite of 01:640:026 or placement into 640:CMA, 640:PCA, 640:CLG, or 640:CLS).

01:119:116 *General Biology II (4)*
Broad principles of cell biology, genetics, and evolution; the diversity of life and its physiology, ecology, and population dynamics.
Lec. 3 hrs., Wkshp. 80 min. Prerequisite: 01:119:115 with a grade of C or better. Credit not given for both this course and 01:119:102.

01:119:117 *Biological Research Laboratory (2)*
Laboratory designed to introduce and explore principles of research in the biological sciences by engaging in semester-long research projects requiring students to analyze data, synthesize new experiments, and evaluate findings.
Prerequisite: 01:119:115 with a grade of C or better. Corequisite: 01:119:116.

01:119:120 *STEM Success Seminar (1.5)*
Increases ability to control academic success and improve transition to the university environment in furtherance of educational and career goals. Reflection on recent and current academic experience and career aspirations. Setting of priorities and alignment of time and effort towards those ends.
By special permission only.

01:119:127-128 *Anatomy and Physiology: Health Sciences (4,4)*
Structure and function of human organ systems. Some microanatomy and biochemical aspects of physiology included.
Lec. 3 hrs., lab. 3 hrs. For nursing, medical technology, physical therapy, and other professional students. Not for life sciences major credit.

01:119:131 *Microbiology for the Health Sciences (3)*
Introduction to microbes with emphasis on the nature and behavior of microorganisms, the interrelationships between microbes and the human host in health and disease, and the principles of prevention and control of infectious disease.
Not open to students who have taken 01:447:390. For nursing and other professional students. Not for life sciences major credit. Prerequisites: 01:199:115-116 or 01:119:127-128.

01:119:132 *Microbiology for the Health Sciences Laboratory (1)*
Laboratory to accompany 01:119:131.
Lab. 3 hrs. Pre- or corequisite: 01:119:131.

01:119:140 *The DNA Revolution (Honors) (3)*
Introduction to fundamentals of molecular genetics, biotechnology, and modern genetics, including a laboratory research project using molecular biology and bioinformatics techniques. Intended primarily for nonscience majors, but may also appeal to prospective chemists, physicists, engineers, and computer scientists.
Restricted to first-year and sophomore students in the School of Arts and Sciences Honors Program or the Honors College. Credit not given for both this course and 01:119:140 or 01:694:215 or 315, or 01:447:315. Not for life sciences major credit.

01:119:148 *Moving Bodies: The Biology of Movement (3)*
Considers fundamental processes that allow humans and other animals to move, including structural basis (bones and muscles), control (brain and nervous system), conversion of food into energy (digestion and nutrition),

movement of food and oxygen to muscles (circulation), and some common and familiar injuries and illnesses and their treatments.
Credit not given for both this course and 01:119:100, 103, 115-116, or 127-128. Not for life sciences major credit.

01:119:150 *Biology, Society, and Biomedical Issues (3)*
Discussion of current topics and issues in human health and medicine from a biological perspective.
Credit not given for both this course and 11:115:100. Not for life sciences major credit.

01:119:154 *Genetics, Law, and Social Policy (3)*
Principles of human and behavioral genetics and their legal, ethical, and social implications. Topics include genetic screening, counseling, and engineering; reproductive regulation; and human behavior genetics.
Prerequisite: Sophomore standing. Not for life sciences major credit or related major.

1:119:155 *Human Genetics (3)*
How our genes influence our development and health, how both normal traits and diseases are transmitted through families, how genetics is used in forensics and personalized medicine, and the genetic tests that are offered directly to consumers.
Not for life sciences major credit.

01:119:156 *Genetics, Evolution, and Human Health (4)*
The human body and human behavior, shaped by more than four billion years of evolutionary processes. Scientific and social implications of current ideas and controversies of evolution and genetics.
Not for life sciences major credit.

01:119:160 *Biology, Society, and Ecological Issues (3)*
Ecological and evolutionary ideas affecting space ecology; population increase, food supply, air and water pollution, war, and nuclear energy.
Not for life sciences major credit or related major.

01:119:182 *Essentials of Human Reproduction (3)*
Anatomical and physiological bases of human sexuality; biological and cultural aspects of sexual differentiation and psychosexual development, contraception, venereal disease, and sexual lifestyles.
Not for life sciences major credit or related major.

01:119:195 *Brain, Mind, and Behavior (3)*
Honors course discussing the interrelationship between the brain, the mind, and behavior.
Open to students in the School of Arts and Sciences Honors Program or the Honors College. Not for life sciences major credit or related major.

01:119:199 *Preparation for General Biology (4)*
For first- and second-year students planning science majors. Enrollment based on placement scores. Selected concepts in biology, proven learning strategies for college science courses, and instruction in the scientific method. Prepares students for success in the General Biology sequence (01:119:115-117).
Lec./rec. 3 hrs., lab. 3 hrs. Enrollment restricted by placement. Not for life sciences major credit.

01:119:201-202 ***Independent Study in Biology (1-3,1-3)***
Independent study under the direction of a member of the faculty. Written report required.
Prerequisites: Declared biological sciences major or minor. Permission of the Office of Undergraduate Instruction; cumulative grade-point average of 2.8 or better. May not be used to fulfill a laboratory requirement.

01:119:204 ***Outreach in Biology (1)***
Introduction to the basic principles and best practices of outreach in the biological sciences. Emphasis on understanding how to translate technical concepts and techniques to lay audiences incorporating best practices in active learning, public speaking and curriculum development. Recommended for students interested in teaching careers and related positions in science communication.
Prerequisites: 01:119:115, 01:119:116, and 01:119:117. By special permission.

01:119:205 ***Internship in Life Sciences (3)***
Development of experience and knowledge regarding the expectations, qualifications, competencies and responsibilities of professionals working within the life sciences through an internship experience with academic component. Integration of knowledge from life science coursework with the internship experience, development of new skills, and reflection on the learning experience.
Prerequisites: 01:119:116 and 01:119:117. Open only to 119 Biology Majors.

01:119:307-308 ***Research in Biology (1-3,1-3)***
Laboratory/field research on an original problem under the direction of a member of the faculty. Written report required.
Prerequisites: Declared biological sciences major or minor. Permission of the Office of Undergraduate Instruction; cumulative grade-point average of 2.8 or better. Open only to students majoring (or minoring) in biological sciences.

01:119:310 ***Communication in Biology (1)***
Effective skills for communicating science to a variety of audiences in a variety of forms including papers, grant proposals, teaching, and presentations to scientists and others. Provides support for students completing the 10-page research paper required for Research in Biology.
Prerequisites: 01:119:307, 308, 407, or 408. Corequisites: 01:119:307, 308, 407, or 408.

01:119:311 ***Current Topics in Life Sciences (1)***
Directed readings and discussion of selected scientific topics and career stories with Rutgers Life Sciences Alumni.
Junior or senior status and Division of Life Sciences major (subject code: 119, 146, 694, 447).

01:119:401 ***Clinical Practicum in the Health Professions (3)***
Development of advanced knowledge of and reflection on the qualifications, competencies, and responsibilities of physician health care providers through an internship experience and academic component integrating knowledge from life science coursework and the health care setting.
Prerequisites: 3.4 science GPA. By special permission of the Office of Undergraduate Instruction only.

01:119:406-407 ***Research in Biology (1-4,1-4)***
Laboratory/field research on an original problem under the direction of a member of the faculty. Written report is required.
Prerequisites: Declared biological sciences major or minor. Permission of the Office of Undergraduate Instruction; cumulative grade-point average of 2.8 or better. Open only to seniors majoring (or minoring) in biological sciences.

01:119:408-409 ***Honors in Biology (3-6,3-6)***
Laboratory/field research on an original problem under the direction of a member of the faculty. Written thesis, oral presentation, and defense are required.
Prerequisites: Declared biological sciences major. Permission of the Office of Undergraduate Instruction. Open only to seniors majoring in biological sciences who meet the requirements for departmental honors.

01:119:410 ***Honors Communication in Biological Sciences (1)***
Instruction on effective communication of scientific ideas and findings for both the scientific community as well as the general public. Support in writing honors theses and preparing for oral thesis defenses.
Prerequisite: 01:119:408. Corequisite: 01:119:409.

Cell Biology and Neuroscience 146

Cell Biology and Neuroscience 146

Department of Cell Biology and Neuroscience, School of Arts and Sciences

Chair: Megerditch Kiledjian

Vice Chair and Undergraduate Director: Gabriella D'Arcangelo

Distinguished Professors:

Joanna Burger, B.S., SUNY (Albany); M.S., Cornell; Ph.D., Minnesota

Megerditch Kiledjian, B.A., Rutgers; Ph.D., University of Pennsylvania

Melitta Schachner, Diploma in Biochemistry, Tübingen (Germany); Ph.D., Max-Planck Institut für Biochemie (Germany)

Wise Young, B.A., Reed; Ph.D., Iowa; M.D., Stanford

Professors:

Lori R. Covey, B.S., California (Riverside); Ph.D., Columbia

Gabriella D'Arcangelo, B.S., Bari (Italy); Ph.D., SUNY (Stony Brook)

Robin L. Davis, B.S., Pennsylvania State; M.A., San Diego State; Ph.D., Stanford

Bonnie Firestein, B.S., Michigan; Ph.D., California (San Diego)

Martin Grumet, B.S., Cooper Union; Ph.D., Johns Hopkins

Ronald P. Hart, B.S., Connecticut; Ph.D., Michigan

Arnold G. Hyndman, A.B., Princeton; Ph.D., California (Los Angeles)

Alice Y.-C. Liu, B.S., Chinese University of Hong Kong (China); Ph.D., Mount Sinai School of Medicine

Gary F. Merrill, B.S., Weber State; Ph.D., Michigan State

Kathleen M. Scott, B.A., Brown; Ph.D., Yale

Associate Professors:

Qian Cai, M.D., Shanghai Railway Med College (China); Ph.D., National Institutes of Health-Shanghai Second Medical University

Wei Dai, B.S., M.S., Beijing Normal (China); M.S., Texas Health Science Center; Ph.D., Baylor College of Medicine

Dunne Fong, B.S., Massachusetts; M.A., Ph.D., Princeton

Shu-Chan Hsu, B.S., Ph.D., British Columbia

Peng Jiang, B.S., Soochow (China); Ph.D., University of Science and Technology of China

Kelvin Y. Kwan, B.S., California Institute of Technology; Ph.D., Harvard

David Margolis, B.S., Brown; Ph.D., Washington (Seattle)

Ping Xie, B.S., Nanjing (China); Ph.D., Hong Kong University of Science and Technology

Assistant Professors:

Victoria Abraira, B.S., Southern California; Ph.D., Harvard

Santiago Cuesta, B.A., M.S., Ph.D., National University of Rosario (Argentina)

Brian Daniels, B.A., B.S., Southern Wesleyan (Central); Ph.D., Washington (Seattle)

Rafiq Huda, B.A., Carleton College; Ph.D., Northwestern University (Chicago)

Natasha O¿Brown, B.S., Davidson College; Ph.D., Stanford

Max Tischfield, B.A., Rutgers; Ph.D., Harvard

Associate Research Professors:
Xinfu Jiao, B. S., Xinxiang Medical College (China); M.S., Tongji Medical University (China); Ph.D., Shanghai Institute of Hematology (China)

Patricia Morton, B.S., Northwestern University; M.S., Ph.D., University of Wisconsin

Assistant Research Professor:

Dongming Sun, B.S., Beijing Medical University (China); Ph.D., Columbia University

Assistant Teaching Professors:

Anne Carr-Schmid, B.S., James Madison; Ph.D., Rutgers

Tara Cominski, B.S. St. Peter's University; Ph.D., Rutgers

Anne Keating, B.S., M.S., Ph.D., Rutgers

Life Sciences (SAS)

Learning Goals

Learning Goals

The Department of Cell Biology and Neuroscience offers a course of study that provides fundamental and comprehensive training in the areas of cell biology and neuroscience. The major objective of this program is to prepare students for graduate studies in cell biology and neuroscience; entry into professional schools in medicine, dentistry, or other health-related fields; or employment in industrial and pharmaceutical companies.

Learning Goals

Students will:

I. master factual and conceptual knowledge in cell biology and neuroscience that will provide a solid foundation for success in advanced training and professional careers;

II. develop an ability to summarize, integrate, and organize information; and

III. use scientific reasoning to evaluate the potential for current research and new discoveries to improve our understanding of cell biology and neuroscience and its relevance to human health and to our society.

Life Sciences (SAS)

Entry Requirements of the Major

Entry Requirements of the Major

The major in the Department of Cell Biology and Neuroscience is open to students after their first year who have completed Fundamentals of Neurobiology (01:146:245) or Fundamentals of Cell Biology (01:146:270), with a grade of C or better. Departmental approval is required.

A grade of C or better in all courses credited toward the major is required for graduation, and each course may be repeated only once to replace D/F grades.

Life Sciences (SAS)

Major Requirements

Major Requirements

The Department of Cell Biology and Neuroscience offers a program of study from which students can select one of two tracks, depending upon particular interests and career goals: a general track (default) and an honors track. Students can apply to enter the honors track at the beginning of the senior year. This track requires a minimum GPA of 3.4 in courses credited toward the major, and departmental approval. A number of core courses are required of all students in the cell biology and neuroscience major, regardless of the chosen track. No more than 16 credits from among the life science courses required for completion of the cell biology and neuroscience major may be fulfilled by credits transferred from any school outside of Rutgers University-New Brunswick. Any life science courses applied to the major should be taken within 10 years of graduating.

Required Core Courses (65 or more credits)

01:119:115-116 General Biology (4,4)

01:119:117 Biological Research Laboratory (2)

01:160:161-162 or 01:160:163-164 or 01:160:165-166 General Chemistry (4,4)

01:160:171 Introduction to Experimentation (1)

01:160:307-308 or 01:160:315-316 Organic Chemistry (4,4)

01:160:311 Organic Chemistry Laboratory (2)

01:750:203-204 General Physics (3,3) or 01:750:193-194 Physics for the Sciences(4,4)*or 01:750:271-272 Honors Physics (3,3)

01:750:205-206 General Physics Laboratory (1,1)

01:640:135,136 or 01:640:151-152 Calculus I and II (4,4) or 01:640:135 and 01:960:401 Basic Stat for Research (3) or 01:960:379 Basic Prob and Stat or 01:640:135 and 01:960:212 Statistics II (3)**

01:447:380 Genetics (4)

01:146:245 Fundamentals of Neurobiology (3)

01:146:270 Fundamentals of Cell Biology (3)

01:694:395 Biochemistry for Life Sciences (3) or 01:694:407 Biochemistry (3)

Advanced Cell Biology and Neuroscience Courses: choose three of the following:

01:146:445 Synapses, Neurons, and Circuits (3)

01:146:447 Clinical Neurobiology (3)

01:146:465 Neurobiology of Pain and Addiction (3)

01:146:472 Developmental Biology (3)

01:146:473¿ Genetic Regulation in Cell Biology¿(3)

01:146:474 Immunology (3) or 01:146:476¿ Honors Immunology (3)

01:146:481 Protein Dynamics in Cell Biology (3)

* with approval from the Undergraduate Director or CBN Advisor 01:160:308 may be replaced by an additional elective course.
** Students who take who take Physics for the Sciences 01:750:193-194 (4,4) do not need an additional Physics laboratory.
*** Students with AP statistics equivalent of 01:960:211, transfer credit for 01:960:211, or who have taken 01:960:211 at Rutgers must take 01:960:212.

Life Sciences (SAS)

Options

Options

General Track; 4 credits

This track is for students who, upon graduation, seek immediate employment or plan to attend professional schools in health-related fields. In addition to the required core courses, students must take the following courses:

1. One elective lecture courses at the 300-400 level in the life sciences area (equaling 36 or more credits)
2. One laboratory or research course (1-3 credits). Students can take a lecture course with an associated laboratory component (3-4 credits) to satisfy both requirements, or a stand-alone lecture plus a laboratory or research course.

Honors Track; 12 credits

This area of concentration is for students interested in research who, upon graduation, plan to attend graduate school or professional schools in health-related fields. A student must qualify for admission into the honors track. See the departmental honors program page in this catalog for student qualifications. In addition to the required core courses, students must complete the following courses, produce a written research thesis and an oral thesis presentation:

1. One elective lecture course at the 300-400 level in the life sciences area (3 or more credits).
2. 01:146:405 Honors Seminar (3).
3. 01:146:408-409 Honors Research (3,3).

Life Sciences (SAS)

Departmental Honors Program

Departmental Honors Program

Honors in cell biology and neuroscience are awarded to students who have successfully completed the honors track course requirements, submitted a written research thesis, and defended the thesis orally. To qualify for the honors track, a student must have attained a grade-point average of 3.4 or better in courses required for the major. The student should apply formally to the department for acceptance into the honors program by the end of the second semester of the junior year.

Life Sciences (SAS)

Courses

Courses

01:146:201,202 *Independent Study in Cell Biology and Neuroscience (1-3,1-3)*
Laboratory research under the direction of a Rutgers faculty member.
Written report required. Permission of department and an instructor willing to sponsor the student, and a cumulative grade-point average of 2.8 or better are required. May not be used to fulfill a laboratory requirement. Open only to students majoring or planning to major in cell biology and neuroscience.

01:146:245 *Fundamentals of Neurobiology (3)*
Introduction to the biology of the nervous system. Topics covered include nerve cell signaling, sensory and motor systems, and higher brain processes.
Prerequisites: 01:119:115-116.

01:146:270 *Fundamentals of Cell Biology (3)*
Principles of cell biology. Structure, function, and macromolecular organization of cellular organelles.
Prerequisites: 01:119:115-116.

01:146:295 *Essentials of Cell Biology and Neuroscience (3)*
Provides a background in the biology of neural cells and cognition.
Prerequisites: 01:119:115-116. Not intended for cell biology and neuroscience majors.

01:146:307,308 *Research in Cell Biology and Neuroscience (1-3,1-3)*
Laboratory research on an original problem under the direction of a member of the Rutgers faculty.
Written report required. Permission of department and an instructor willing to sponsor the student, and a cumulative grade-point average of 2.8 or better. Open only to students majoring or planning to major in cell biology and neuroscience.

01:146:322 *Human Histology (4)*
Structure of the tissues and organs of the human body. Lec. 3 hrs., lab. 3 hrs.
Prerequisite: 01:146:270 or 01:146:295.

01:146:328 ***Human Parasitology (3)***
Cell biology, epidemiology, pathogenesis, and clinical manifestations of human parasitic diseases.
Prerequisites: 01:119:115-116.

01:146:329 ***Human Parasitology Laboratory (1)***
Laboratory to accompany the Human Parasitology lecture course 01:146:328. Lab. 3 hrs.
Pre- or corequisite: 01:146:328.

01:146:340 ***Virology (3)***
Principles of virology including the molecular and cellular events that occur during virus replication, the host cell response, and pathogenesis. Emphasis on animal viruses that impact human health and disease. Strategies for controlling viruses.
Prerequisite: 01:146:270.

01:146:350 ***Introduction to Light Microscopy for the Life Sciences (1, minicourse)***
This course offers a comprehensive exploration of advanced imaging techniques essential for studying tissues, cells, and organelles in the life sciences.
Prerequisite: 01:146:270 or 01:146:295.

01:146:356 ***Systems Physiology (3)***
Comprehensive study of the principal organ systems of laboratory animals and humans.
Prerequisites: 01:119:115-116 and 01:160:161-162 or 163-164, and 171 Credit not given for both this course and 11:067:300.

01:146:357 ***Systems Physiology Laboratory (1)***
Laboratory to accompany the Systems Physiology lecture course 01:146:356. Lab. 3 hrs.
Pre- or corequisite: 01:146:356.

01:146:405 ***Honors Seminar (3)***
This course is intended to help students prepare a written research thesis and practice the oral thesis presentation.
Requires departmental permission. Open only to senior honors students majoring in cell biology and neuroscience. This course fulfills the SAS WCd core requirement.

01:146:406, 407 ***Research in Cell Biology and Neuroscience (1-3,1-3)***
Research under the direction of a Rutgers faculty member.
Written report required. Permission of department and an instructor willing to sponsor the student, and a cumulative grade-point average of 2.8 or better are required. Open only to students majoring in cell biology and neuroscience.

01:146:408-409 ***Honors Research (3-3)***
Two semester laboratory research sequence under the direction of a Rutgers faculty member. Written report and oral presentation required. Culminates in a written thesis and oral thesis defense.
Permission of department and an instructor willing to sponsor the student are required. Open only to seniors majoring in cell biology and neuroscience who meet the requirements for the departmental honors program.

01:146:410-411 ***Research Thesis in CBN I and II (3-3)***
Two semester laboratory research sequence under the direction of a Rutgers faculty member and the course coordinator.
Prerequisites: 01:146:307 or 01:146:308. Requires departmental permission and acceptance by a faculty mentor who will

host the student in the laboratory. Requires submission of a written thesis draft (I = Fall semester), and submission of a final written thesis and oral defense (II = Spring semester). Open to senior students majoring in cell biology and neuroscience who are not enrolled in the departmental honors program.

01:146:445 *Synapses, Neurons, and Circuits (3)*
Cellular and systems features of neurons and the fundamental unit of signaling in the nervous system, focusing on a small number of advanced topics. Focus on how to test hypotheses related to the topics addressed: intra- and inter- cellular communication; construction of neuronal networks; protein interactions at the synapse; and signal transduction pathways.
Prerequisites: 01:146:245 and 01:146:270.

01:146:447 *Clinical Neurobiology (3)*
Development and function of the nervous system with an emphasis on diseases and disorders. Topics include neurodevelopment, demyelination, tumors, and viral infections; neurological disorders/diseases; injury to the spinal cord and brain and repair; and clinical trials and the future of spinal cord and brain trauma.
Prerequisites: 01:146:245 and 01:146:270. Intended for senior students majoring in cell biology and neuroscience.

01:146:456 *Advanced Physiology (3)*
Preparation for advanced graduate study in physiology and for medical physiology (first-year medical school). Focus on mammalian physiology and the whole animal (whole organ) approach to classical experimental physiology.
Prerequisites: 01:146:356. Intended for senior and junior students.

01:146:464 *Topics in Cell Biology and Neuroscience (3)*
Directed readings and discussion of selected topics in cell biology and neuroscience.
Prerequisites: 01:146:245 and 01:146:270. Open to junior or senior students majoring in cell biology and neuroscience.

01:146:471 *Advanced Cell Biology Laboratory (3)*
Advanced laboratory methods in cell biology. Emphasis on light and electron microscopy, imaging, immunocytochemical techniques, tissue culture, and methods of identifying and separating macromolecules.
Prerequisite: 01:146:270 or permission of instructor.

01:146:472 *Developmental Biology (3)*
Genetic, molecular and cellular processes that lead from egg to embryo to mature organism.
Prerequisite: 01:146:270 or 01:447:380 or 01:447:384.

01:146:473 *Genetic Regulation in Cell Biology (3)*
Advanced topics in cell biology, focusing on genetic animal models, genomics, chromatin function, gene expression, and RNA biology.
Prerequisite: 01:146:270.

01:146:474 *Immunology (3)*
Fundamental principles of immunology with emphasis on antibody formation, immunoglobulin molecules and genes, hypersensitivity reactions, and the cellular basis for the immune response.
Prerequisites: 01:119:115-116 and 01:447:380 or 01:447:384. Recommended: 01:447:390.

01:146:475 ***Laboratory in Immunology (1)***
Biochemical and molecular analysis of immune cell function. Application of immunological techniques to the examination of normal and diseased states.
Pre- or corequisite: 01:146:474.

01:146:476 ***Honors Immunology (3)***
Introduction to the immune system, with a focus on mammalian organisms (particularly humans). Focus on critical thinking and problem-solving abilities, as well as introduction to primary research addressing contemporary immunological questions. Open only to students enrolled in the Honors College, SAS Honors Program or CBN Honors Program.
Prerequisites: 01:447:380 or 01:447:384. Credit not given for both this course and Immunology 01:146:474.

01:146:481 ***Protein Dynamics in Cell Biology (3)***
Advanced topics in cell biology, focusing on signal transduction (module 1), cell adhesion and protein transport (module 2) and cytoskeletal dynamics controlling cell movement (module 3).
Prerequisite: 01:146:270.

Chair: Tara C. Matise

Vice-Chair & Undergraduate Director: Gary A. Heiman

Distinguished Professors:

Maureen M. Barr, B.A., Rutgers; Ph.D., Columbia

James A. Knowles, B.S., Michigan; M. Sc., M.D., Ph.D., Albert Einstein Medicine

Tara C. Matise, B.S., Cornell; M.S., Ph.D., Pittsburgh

Jay A. Tischfield, B.S., City University of New York; M.Phil., Ph.D., Yale

Lei Yu, B.S., Jiangnan University (China); M.S., Institute of Genetics, National Academy of Sciences (China); Ph.D., California Institute of Technology

Professors:

Gary A. Heiman, B.A., Boston Univ.; M.Sc., Sarah Lawrence; Ph.D., Columbia

Kim S. McKim, B.A., Simon Fraser; Ph.D., British Columbia

Bryce E. Nickels, B.S., Miami; Ph.D., Harvard

Christopher G. Rongo, B.A., University of California, San Diego; Ph.D., Massachusetts Institute of Technology

Gleb P. Shumyatsky, B.A., Moscow State University; Ph.D., Institute of Molecular Biology (Moscow, Russia)

Andrew W. Singson, B.S., University of California, Davis; Ph.D., University of California, San Diego

Karen Schindler, B.S., Loyola; Ph.D., Thomas Jefferson

Michael Verzi, B.A., The College of New Jersey; Ph.D., University of California, San Francisco

Jinchuan Xing, B.S., Nankai (China); Ph.D., Louisiana State

Associate Professors:

Chris Ellison, B.A., Lewis and Clark; Ph.D., University of California, Berkeley

Derek Gordon, B.A., Rochester; Ph.D., State University of New York at Stony Brook

Assistant Professors:

Christina M. Bergey, B.A., M.A., Ph.D., New York University

Devanshi Jain, B.Sc. Hons., Ph.D., University College, London

Tetsuya Nakamura, B.S., Ph.D., Osaka (Japan)

Srujana Samhita Yadavalli, B. Tech., Anna University (India); Ph.D., Ohio State

Jiekun Yang B.,S., Renmin University (China), M.S. UW-Madison, Ph.D. University of Virginia

Associate Research Professors:

Juan Wang, B.S., Ph.D., China Agricultural University (Beijing)

Assistant Research Professors:

Marco Azaro, B.A., Ph.D., Brown

Teaching Professor:

Martha Haviland, B.A. Rutgers; MS, AM, Ph.D. Michigan

Associate Teaching Professor:

Jessica Rispoli, B.S., Richmond; M.G.C., Maryland

Christine Seymour, B.S., Scranton; M.S. Arcadia University

Associate Research Professor:

Oleg Evgrafov, B.S., Moscow Physical Engineering Institute; M.S., Moscow Physical Engineering Institute; Ph.D,. Institute of General Genetics (Moscow); D.Sc., Research Center for Med. Genetics (Moscow)

Assistant Teaching Professors:

Tara P. Cominski, B.S, Saint Peter's; M.S., Seton Hall; Ph.D., Rutgers

Doreen R. Glodowski Trotta, B.S., Wisconsin; M.S., Kansas State; Ph.D., Wisconsin

Anne Keating, B.S., Ph.D., Rutgers

Haiyang Lu, B.S., Hebei University, China; M.S., Beijing Normal University, China; Ph.D., City University of New York

Shama Khan, B.A., Rutgers University; M.P.H., Tulane; M.S. Epidemiology, Tulane University; M.S. Genetic Counseling, Arcadia University

Mai Soliman, B.S., M.Sc., Montclair State; Ph.D., Rutgers

Zainab Tanvir, B.A. Stonybrook University, M.S. Univ. Delaware, Ph.D., Rutgers

Learning Goals

Learning Goals

Learning Goals:

The Department of Genetics is committed to teaching science through the way we do science: through the process of doing research. The curriculum of the Department of Genetics is centered around four main goals. These goals shape our innovative courses and provide the basis for lifelong learning.

I. Knowledge specific goals: Know the terms, concepts, and theories of genetics.

II. Integrate the material from multiple courses and research to think holistically and to see the whole as well as the parts.

III. Use genetic information and ideas to critically analyze published research articles in genetics.

IV. At the end of four years, all of our students will be able to design an experiment, carry out the research using the appropriate laboratory techniques, and analyze and interpret their data. They will also be able to communicate their discoveries through a written article appropriate for publication in a peer-reviewed genetics journal, and through talks or posters appropriate for scientific meetings.

Life Sciences (SAS)

Entry Requirements of the Major

Entry Requirements of the Major

Students wishing to major in this department must have been enrolled at Rutgers for at least one semester. In addition, students must:

1. Be an SAS student

2. Have a cumulative GPA of at least 2.00, and a GPA of at least 2.8 at the time of taking research for credit.

3. Have earned a C or better in these prerequisite courses or equivalents (25-26 credits):

a. General Biology I 01:119:115

b. General Biology II 01:119:116

c. General Biology Lab 01:119:117

d. General Chemistry I either 01:160:161 or 01:160:163

e. General Chemistry II either 01:160:162 or 01:160:164

f. Calculus I either 01:640:135 or 01:640:151

g. Calculus II or Statistic either 01:640:136, or 01:640:152, or 01:640:192, or 01:960:401, or 01:960:212, or 01:960:379

4. Students with an overall GPA < 3.0 must meet with the UGD before declaring the major.

a. Genetics is a credit-intensive major and has a requirement of a 2.80 GPA at the time of taking research for credit

b. Students entering the major with a GPA of < 3.0 may struggle to complete the major on time

5. Watch a Genetics Major Declaration Video

Life Sciences (SAS)

Major Requirements

Major Requirements

The department offers a major with a strong emphasis on research. A minimum of 20 credits of coursework in the life sciences must be completed in residence. Genetics is a credit-intensive major. Excluding the prerequisite courses (25-26 credits) to get into the major (see above), there are between 54-56 credits to complete the major (60-62 for honors). A grade of "C" or better in courses credited toward the major is required for graduation, and each course may be repeated only once to replace D/F grades. Students may not double major in two Division of Life Sciences majors.

The requirements of the major consist of:

A. Life Science Core Courses (19-21 credits) - Required for all DLS Majors (Approved AP and Transfer credits may be substituted)

a. Intro to Experimentation 01:160:171

b. Organic Chemistry I 01:160:307 or 01:160:315

c. General Physics I (01:750:203 + 205 lab), or (01:750:271 + 275 lab), or 01:750:193, or 01:750 201
Note: 193 & 201 have integrated lab

d. General Physics II (01:750:204 + 206 lab) or (01:750:272 + 276 lab) or 01:750:194 or 01:750:202
Note: 194 & 202 have integrated lab

B. Genetics Core (17 credits) - Required for all Genetics Majors- All below credits must be completed at Rutgers

a. Genetic Analysis I 01:447:384

b. Genetic Analysis II 01:447:385

c. Lab Course Req. 01:447:315, or 01:447:302, or 01:447:203, or 01:447:303, or 01:694:214, or 01:694:215, or 01:694:316

d. Biochemistry for the Life Sciences 01:694:395 or 01:694:407

e. Communications in Genetics 01:447:430 or 01:447:414 + 01:447:415 (Honors, Thesis Writing senior year)

C. Genetics Independent Scholarship (minimum 6 credits but 12 credits for honors

Note: 2.8 minimum GPA to register for research

a. Independent Scholarship 01:227:460, 407, 408, 409, 410, 488, 489, 490

b. Independent Scholarship 01:227:460, 407, 408, 409, 410, 488, 489, 490

D. Genetics Electives (6 credits)

Fifty percent must be taken within the Genetics Major (i.e.; 01:447)

a. Genetics Electives See electives table

b. Genetics Electives See electives table

c. Genetics Electives See electives table

E. Electives OR Independent Scholarship (6 credits)

Note: Additional Genetics Lab may be used as an elective

a. Independent Scholarship 01:227:460, 407, 408, 409, 410, 488, 489, 490

b. Independent Scholarship 01:227:460, 407, 408, 409, 410, 488, 489, 490

c. Genetics Electives See electives table below

Lab Note: 01:694:214 and 01:694:215 are only offered to first-year students with AP Biology credit and AP General Chemistry credits (or taking General Chemistry concurrently). 01:447:203 is only offered to first-year students in the SAS Honors Program or the Honors College. Students cannot receive credit for both 01:447:203 and 01:447:302.

Organic Chemistry Note: If you are planning to pursue a graduate degree in which a full year of organic chemistry is suggested/required (e.g., med/dental school), we strongly recommend taking Organic Chemistry II + lab as an elective (6 credits)

Life Sciences (SAS)

Elective Courses

Life Sciences (SAS)

Departmental Honors

Departmental Honors

Departmental Honors

The Department of Genetics recognizes graduating students who have made outstanding academic achievements by awarding **departmental honors**. The department awards two types of departmental honors (see below) and these are awarded at the discretion of the Genetics Honors Committee. To be considered, students must meet all criteria for that type of honors and submit the honors request application by the deadline (April 1st of senior year).

The two types of departmental honors and their criteria are as follows:

1. GENETICS HONORS- RESEARCH

a. GPA requirement: a student must have attained, at the end of the junior year, a cumulative GPA of at least 3.4 and a Genetics major GPA of at least 3.4 (including prerequisites).

b. Complete 6 or more credits of Honors in Genetics (01:447:408-409) during senior year

c. Complete a total of 12 or more research credits (including the 6 credits of 01:447:408-409)

d. Complete Honors Thesis and Communication in Genetics 447:414 and 415 during senior year

e. Complete and defend a research thesis before a faculty committee (see Thesis Guidelines)

f. Present at Honors Day

Students can apply to do an Honors thesis by completing the relevant sections of the Independent Scholarship Form. Students must register either for an Honors course sequence in Genetics (01:447: 408 and 409) or for a course sequence in a college Honors Program (See Handbook) . These decisions should be discussed with an advisor and approved by the Department Vice Chair. Accepted students are expected to complete at least 12 credits in an independent research project, resulting in a thesis. Students may do research with Rutgers faculty outside of the Department with the approval of their advisor and the Vice Chair. Students will prepare a thesis and present an oral defense to a committee of three faculty. At least one member of the committee must come from the Department of Genetics. Students will present their research at a Departmental Symposium in April. Students contemplating an Honors thesis should refer to the much more detailed instructions and details in Section IX and Section X of the Student Handbook. For information on the thesis, see Thesis Guidelines.

Level of Honors: In determining the level of honors, the honors/awards committee takes into consideration multiple factors in aggregate, including but not limited to (1) cumulative GPA, (2) thesis defense committee recommendation, (3) research mentor evaluation, (4) faculty evaluation of presentation at Honors Day, and (5) whether or not the student took the honors versions of Genetic Analysis 1 and/or 2 (i.e., 01:447:384:H1 and/or 01:447:385:H1) and the grades received in those courses.

2. Genetics Honors - Certificate Program

a. GPA requirement: A student must have attained, by April 1st of senior year, a cumulative GPA of at least 3.4 and Genetics major GPA of at least 3.4 (including prerequisites).

b. Complete a departmental certification program (i.e.; CompGen, Cancer or Genetic Counseling).

c. By April 1st, the student must formally apply to request consideration for Certificate Honors by completing the Genetics Honors- Certificate Program Form

* *The honors committee may award Honors, High Honors or Highest Honors*

Life Sciences (SAS)

Undergraduate Certificate Programs

Undergraduate Certificate Programs

The Department of Genetics offers two certificate programs. Students who complete one of these Certificates are eligible to receive Departmental Honors.

1) Genetic Counseling Certificate Program

The Department of Genetics offers an undergraduate **Genetic Counseling Certificate Program (GCCP).** The GCCP program is intended for a select group of students interested in applying to the masters-level programs in genetic counseling. The goal is to provide students with guidance, coursework, and relevant clinical experience to improve their graduate school applications. This is a highly competitive option and is **only open to declared genetics majors**. Not all applicants will be accepted. The Certificate will be awarded only in conjunction with the awarding of a baccalaureate degree in genetics and does not replace minors. The certificate is NOT in lieu of completing the masters-level programs in genetic counseling. At the end of the program students will:

- understand genetic counseling as a profession ·
- understand application requirements for masters-level programs
- gain experience in talking with people who are in crisis
- gain experience in a clinical genetic counseling clinic

2) Certificate in Computational Genetics

The Department of Genetics offers a Certificate in Computational Genetics (CCG) for Genetics majors. The volume of data being generated in Genetics and related life science fields has been expanding tremendously in recent years, and career opportunities for geneticists with computational and quantitative expertise are simultaneously growing. This certificate program is intended for students who are either interested in applying to graduate-level programs,

or planning careers, in Computational Genetics/Biology, Statistical Genetics, Bioinformatics, or other programs in quantitative biomedical related research. The goal of the CCG is to provide students with guidance, coursework, and relevant data design and analysis experience to prepare them for graduate studies in the field or entry-level informatics jobs. This program is only open to declared Genetics Majors. The Certificate will be awarded only in conjunction with the awarding of a baccalaureate degree in Genetics. At the end of the program students will:

- Have gained competence in genetic data analysis using basic computer programming and statistical analysis.
- Be prepared to apply to M.S. or Ph.D. graduate programs in the areas of Computational Genetics and Bioinformatics.
- Be prepared to apply for career positions in industry, biotech companies, pharmaceutical companies, medical centers, or universities

3) Cancer Research Certificate

The Department of Genetics offers a Certificate in Cancer Research (CCR) for Genetics majors. Completion of the Certificate in Cancer Research will provide an advantage when applying to MD, PhD, and MS programs and facilitate transitions to careers with Cancer-related missions. The goal of the CCR is to provide students with a rigorous and Cancer-specialized curriculum. Students will do at least one year of research in a nation-leading Cancer Research Lab and students will be expected to participate in community engagement and develop skills to build community outside of academia. This program is only open to declared Genetics Majors. The Certificate will be awarded only in conjunction with the awarding of a baccalaureate degree in Genetics. At the end of the program students will:

- Have gained knowledge in Cancer Genetics with an expanded curriculum focused on Cancer biology.
- Have at least one year of experience conducting laboratory research in a Cancer research lab.
- Be prepared to apply to M.S., MD, or Ph.D. graduate programs in the areas of Cancer Genetics or for career positions in industry, biotech companies, pharmaceutical companies, medical centers, policy-driving institutes, or universities.

Life Sciences (SAS)

Courses

Courses

01:447:203 ***Honors Computational Genetics (Honors) (3)***
Honors computational genetics is a computer-based laboratory course that introduces students to the use of computers in biological research. This course is for students who are thinking of careers at the intersection of life sciences, statistics, and/or computer science, particularly students who are considering majoring in Genetics. The course fulfills the laboratory requirement for the Genetics major. In the first half of the course, students will receive instruction in introductory computer programming (Python). In the second half of the course, students will practice writing code in Python via in-depth computational projects in genetics and genomics. Each class consists of a mixture of lecture and computer-based demos and/or exercises, as well as time for students to work on

assignments. The course provides the introductory skills needed to conduct basic computational research in the life sciences, including many aspects of computer programming and genomic data analysis. Prior experience with computer programming is neither necessary nor is it expected for students who enroll in this course.

This course is for freshman or sophomore Honors students who are thinking of careers at the intersection of life sciences, statistics, and/or computer science, particularly students who are considering majoring in Genetics. The course fulfills the laboratory requirement for the Genetics major.The course fulfills the laboratory requirement for the Genetics major.
Prerequisites: Students must be in their first or second year at Rutgers in an approved Honors program (e.g., the Honors College or the SAS Honors Program). General Biology I (01:119:115) and be at least co-registered for General Biology II (01:119:116)) or have placed out of these two courses (e.g., through AP credit or approved transfer credit). Credit not given for both 01:447:203 and 01:447:302.

01:447:216 ***Analysis of Scientific Literature (Honors) (3)***
A systematic approach to the reading, analyzing, and understanding of primary literature in genetics; emphasis will be placed on data analysis and experimental design and demystifying the process of reading a scientific journal article.
Prerequisites: 01:119:115-116. Highly recommended: 01:694:215. Open only to freshmen and sophomores in the SAS or SEBS Honors Program. By permission only.

01:447:245 ***Introduction to Cancer (3)***
Introduction to Cancer provides the student with an overview of conventional and state-of-the-art aspects of oncogenesis. Students will become familiar with the process involved in neoplastic transformation to the cancer phenotype through aspects of epidemiology, pathophysiology, virology, in vitro and in vivo cellular transformation and genetics. They will then apply these aspects to the understanding of classic therapeutic modalities and new state-of-the-art rational therapies. This comprehensive course will concentrate on the human disease process by applying clinical aspects of oncogenesis during a series of Grand Rounds discussions that will include recent patient clinical cases and their outcomes.
Prerequisites: 01:119:115-116. Credit not given for both this course and 01:447:495.

01:447:302 ***Quantitative Biology and Bioinformatics (3)***
Introduction to the use of computers and computer programming to develop applications for research in genetics and molecular biology. Application topics will include evolutionary genetics, association analysis and genetics mapping, and structural biology.
Prerequisites: 01:447:380 or 01:447:384. May be used to fulfill an elective requirement or taken instead of 01:447:315 Introduction to Research in Genetics by students majoring in Genetics. Credit not given for both 01:447:203 and 01:447:302

01:447:303 ***Computational Genetics of Big Data (3)***
The main focus of this course is the application of R programming to the analysis of genetic data, particularly big data sets with multiple measurements. The primary data sets considered will contain RNA-seq and/or other expression data for multiple/all genes in a given set of individuals. This course is for junior or senior students who are thinking of careers at the intersection of life sciences, statistics, and/or computer science, particularly students who are majoring in Genetics. The course fulfills the laboratory requirement for the Genetics major. Students will learn how to acquire such data, format it for R, plot the data, and perform statistical analyses. In addition, students will learn how to simulate data under different hypotheses, and how to perform power and sample size calculations

for different statistical methods applied to real or simulated data. Each class consists of a mixture of lecture and computer-based demos and/or exercises, as well as time for students to work on assignments. Guest investigators will frequently make short presentations (in person or by skype) to provide illustrations of how programming and informatics is critical for their research. The course provides the introductory skills needed to conduct basic computational research in the life sciences, including many aspects of computer programming and data analysis.
Prerequisites: 01:447:380 or 01:447:384. May be used to fulfill the lab requirement by students majoring in genetics. May be used to fulfill an elective requirement by students majoring in genetics who have already fulfilled the lab requirement with a separate course.

01:447:315 *Introduction to Research in Genetics (3)*
Basic principles and methods of research with microbial model systems used in the analysis and manipulation of genes, followed by a research project in molecular genetics.
Prerequisites: 01:119:115,116, and 117; and 01:160:161-162, 171 (or equivalent) or 01:160:163-164, 171. May be used to fulfill the lab requirement by students majoring in genetics. May be used to fulfill an elective requirement by students majoring in genetics who have already fulfilled the lab requirement with a separate course. Credit not given for both this course and 01:694:315. Open only to genetics majors

01:447:354 *Social, Legal, and Ethical Implications of the New Genetics (3)*
Social, legal, and ethical implications of new modern genetic techniques, for example: genetic screening, stem cells and cloning, forensic genetics, genetic engineering of plants, animals, and humans, genetic enhancement, gene therapy, and the new eugenics.
Prerequisites: Genetics (01:447:380) or Genetics Analysis (01:447:384)

01:447:356 *Evolutionary Medicine (3)*
In this course, we examine human health from an evolutionary perspective, exploring the impact that our evolutionary heritage has on modern human diseases, both chronic and infectious. We will learn how the framework of evolutionary biology and modern genetic tools can inform our understanding of issues relevant to clinical and public health. Rather than focus on the immediate mechanisms underlying disease, we will endeavor to understand the ultimate factors that influence susceptibility, such as past natural selection. The course topics are wide-ranging, but particular attention is paid to emerging infectious diseases, as well as non-communicable diseases that may be exacerbated by facets of modern lifestyles.

Through lectures, critical analysis of the primary literature and popular science news, and class discussions, students will learn how evolutionary principles can be practically applied to medicine. Key readings each session will focus on genetic techniques for understanding evolutionary medicine, while additional readings will incorporate perspectives from diverse fields.

By fully participating in this course, students will be able to appreciate how modern susceptibility to non-communicable and infectious diseases has been influenced by past evolutionary processes; critically evaluate evolutionary hypotheses related to health and medicine, including those found in popular science articles; and know how genetic techniques are applied within an evolutionary framework to understand ultimate reasons for disease.
Prerequisites: (01:447:380 or 384) AND (01:960:401 or 01:960:212).

01:447:370 *Developmental Genetics (3)*
How genes influence the developmental processes of an organism. Topics include gene regulatory networks, signaling pathways, stem cell biology, and the role of developmental genetics in human disease.
Prerequisites: Genetics (01:447:380) or Genetic Analysis (01:447:384)

01:447:380 *Genetics (4)*
Introduction to the mechanisms of heredity and evolution. Mechanisms of Mendelian inheritance, meiosis, recombination, gene mutation, and mapping, and an introduction to modern biochemical, molecular, and population genetics.
Lec. 3 hrs., rec. 1 hr. Prerequisites: 01:119:115-116 and 01:160:161-162 or 01:160:163-164. Credit not given for both this course and 01:447:384-385 or 11:067:328 or 11:776:305.

01:447:382 *Genetics Laboratory (1)*
Laboratory to accompany 01:447:380. Not accepted for elective credit for Genetics majors.
Lab. 3 hrs. Pre- or corequisites: Genetics (01:447:380) or Genetic Analysis (01:447:384)

01:447:384-385 *Genetic Analysis I,II (4,4)*
Experimental methods and concepts in genetics, with emphasis on their application to genetic research. Part I covers transmission genetics and breeding analyses, basic molecular genetics, isolation and characterization of mutations, and chromosome structure and function. Part II covers mathematical genetics, recombinant DNA, genomics, and special topics relevant to modern genetic research.
Open only to majors in genetics or by permission of instructor. Credit not given for both this course and 01:447:380 or 11:067:328 or 11:776:305. Prerequisites for 01:447:384 are 01:119:115-116 (General Biology I & II) or 01:160:161-162 or 01:160:163-164 (General Chemistry I & II). Prerequisite for 01:447:385 is 01:447:384.

01:447:390 *General Microbiology (4 includes laboratory)*
Microorganisms are an essential component of the human environment and are significant not only for the disease they cause, but also for their ecological, agricultural, pharmaceutical, and industrial benefits. This course will introduce students to the physiology, morphology, pathogenicity, and genetics of groups of microorganisms and their applications. The lab component of the course will introduce microscopy and staining techniques, the growth cycle and generation of a standard curve, physiological characteristics of microorganisms, and bacterial transformation. The course is an introduction to the physiology, morphology, pathogenicity, and genetics of groups of microorganisms. Topics include: History and Overview of Microbiology, Cell Structure and function, Microbial Growth, Nutrition, culture, and metabolism, Virology, Bacterial genetics, Microbial evolution and systematics, Bacteria and Archaea, Nutrient cycles, Genetic Engineering and Biotechnology, Waste treatment, Anaerobic respiration and Nitrogen fixation, Antibiotics and chemotherapeutic agents, Normal Flora, Virulence, Toxins, Epidemiology, and Microbial Diseases.

This is an upper-level course that focuses on the basic principles of microbiology. The course is an introduction to the physiology, morphology, pathogenicity, and genetics of groups of microorganisms. Topics include:
Prerequisites: General Biology 01:119:115-116-117 or 01:119:101-102 and General Chemistry 01:160:161-162-171 (or higher) and Organic Chemistry 01:160:307. Credit not given for both this course and 11:680:390.

01:447:392 *Pathogenic Microbiology (3)*
This course will integrate basic microbiology and infectious diseases. The first quarter of the course will provide the conceptual basis of microbial morphology, metabolism and growth, heredity and variation, pathogenicity and antimicrobial chemotherapy. Then this course will introduce the students to one real life patient case study each week, moving the course toward an understanding of specific human diseases (e.g., pharyngitis, meningitis) as might be expected in a clinical environment. Each case will include a patient history, differential diagnosis, clinical cues, laboratory data, pathogenesis, treatment and prevention, additional points and references. The objective is not to attempt to cover every infectious disease or microorganism, but rather to use examples that would stress the key

principles of microbial pathogenesis, differential diagnosis and appropriate treatment and prevention. This course is intended for Life Science majors or those with a strong background in the Biological Sciences.
Prerequisites: General Biology (01:119:115-117), General Chemistry (01:160:161-162-171), and Organic Chemistry (01:160:305. and 01:160:315. Systems Physiology is recommended.

01:447:406-407 ***Research in Genetics (3)***
Laboratory research on original problem under the direction of a professor. Written thesis, oral presentation, and defense required.
Prerequisites: Permission of department and cumulative grade-point average of 2.8 or better. Open only to students majoring in Genetics.

01:447:408-409 ***Honors in Genetics (3-6,3-6)***
Laboratory research on original problem under the direction of a professor. Written thesis, oral presentation, and defense required.
Prerequisites: Open by permission to seniors majoring in genetics who meet the requirements for the departmental honors program. Corequisite: 01:447:414 (fall) and 415 (spring).

01:447:410 ***Research in Genetics - Writing Intensive (3)***
Research in Genetics- Writing Intensive is intended to provide you with an opportunity to engage in original laboratory research under the direct supervision of a faculty mentor, usually in the faculty member¿s research laboratory. You are expected to carry out your own research project. NOTE: this research requires a heavy commitment of time and effort and can impact your performance in coursework, especially if you have not yet managed the foundational material for the discipline. Fulfills the writing and communication requirements of the SAS Core Curriculum.
Prerequisites: 01:447:302, 447:315, or permission of department. Registration is by special permission only. Cumulative grade-point average of 2.8 or better. Declared genetics major.

01:447:414 ***Thesis Writing and Communication in Genetics (1.5)***
Assists students with their honors thesis; emphasis will be on library/internet research and thesis writing. Students will be expected to write the introduction, methods, and reference sections of their thesis and outline the results and discussion.
Corequisites: 01:447:408. For seniors completing departmental honors; by special permission only.

01:447:415 ***Thesis Writing and Communication in Genetics (1.5)***
Assists students with their honors thesis; emphasis will be on library/internet research and thesis writing. Students will be expected to write the introduction, methods and reference sections of their thesis and outline the results and discussion.
Prerequisite: 01:447:408. Corequisite: 01:447:409. For seniors completing departmental honors; by special permission only.

01:447:430 ***Effective Communication Skills in Genetics (3)***
Communication is an essential part of science. Whether it is communicating research findings to other scientists or conveying complex concepts to a lay audience, a scientist must be able to effectively communicate their research to succeed. Communication in science is typically through publications, posters, or oral presentations. The goal of this course is to provide students practice in effectively communicating scientific findings. This includes preparing and revising an introduction for scientific papers, writing a research description for general audience, and preparing and

giving presentations (both oral and poster).
Prerequisites: Declared major in Genetics; must have completed one semester of Research in Genetics, Advanced Independent Study, or Genetic Counseling Rotation. By special permission only.

01:447:451 *Genomes (3)*
This course will focus on Genomics, Proteomics and Bioinformatics from a Genetics perspective. Special attention will be given to the organization and functioning of the human genome.
Prerequisites: Genetics (01:447:380) or Genetic Analysis (01:447:384).

01:447:460 *Genetics of Compulsive Behavior (3)*
Compulsive urge can be channeled toward productive endeavors such as a strong drive to succeed in competitions, schooling, and career. On the other hand, improper handling of compulsive urge may lead to problematic behaviors such as alcoholism, drug use, gambling, and other undesirable behaviors. There are also conditions that are medically defined as disorders, with certain types of compulsive behaviors as part of the diagnostic symptoms, such as OCD and ADD/ADHD. There is evidence that genetics contribute to compulsive behavior in humans, and research in animal models has begun to uncover the molecular factors that underlie the genetic basis of compulsive behavior. Discussion of primary literature and other scientific publications that deal with the molecular and genetic basis of compulsive behavior. Emphasis will be placed on the development of skills for critical thinking and effective writing.
Prerequisites: Genetics (01:447:380) or Genetic Analysis (01:447:384).

01:447:465 *Genetic Approaches and Research Analysis (3)*
This class will teach students how to read, interpret and analyze research articles. The class will follow an active learning format, where we will discuss seminal and recent research articles in depth: What was the scientific question or problem? What methods and strategies were used to address it? What were the findings and conclusions? What are the alternative interpretations and methods that could have been applied? What questions are remaining?
This class will expose students to a diverse selection of research literature, involving genetic and molecular analyses in model organisms such as mice, worms, flies and yeast. The class series will begin with a research article presented by the teacher. During the majority of the class series, students will be divided into groups of 4-5. Each group will be assigned one research article and be required to work together to a) interpret, b) analyze and c) present the article in the form of an oral presentation to the class. Students will be graded on their ability to perform each of these tasks and on active participation during presentations by other groups. All groups will also be required to complete and be graded on a written discussion summary assignment at the end of each article discussion. This summary assignment may take many forms, e.g., preparation of a graphical abstract, subway advert, or other creative forms of expression.
Prerequisites: Genetics (01:447:380) or Genetic Analysis (01:447:384).

01:447:470 *Evolutionary Developmental Biology (3)*
Evolutionary origins of the vertebrate body plan are major problems in biology. While paleontology and comparative anatomy have revealed the evolutionary trajectories of the organs, recent genetics, genomics and embryology are becoming powerful tools to answer classical questions. The goals of this course are twofold; 1) obtain fundamental knowledge of anatomy, embryology, and the latest genomics and 2) learn how to integrate genetics, genomics and embryology to answer evolutionary questions through active discussion in the classroom. The training to discover and answer scientific questions in animal diversity will be performed at the American Museum of Natural History.
Prerequisites: Genetics (01:447:380) or Genetic Analysis (01:447:384)

01:447:478,479 ***Special Topics in Genetics (3,3)***
Directed readings and discussion of selected topics of special interest in genetics. Topics will vary according to semester and/or instructor.
Prerequisites: Genetics (01:447:380) or Genetic Analysis (01:447:384)

01:447:480 ***Topics in Molecular Genetics (3)***
Current research topics in microbial and molecular genetics. Lectures, discussions, and critical analyses of journal articles.
Prerequisites: Genetics (01:447:380) or Genetic Analysis (01:447:384).

01:447:484 ***Behavioral and Neural Genetics (3)***
Influence of genetics on the nervous system and behavior of various organisms. Overview of field including experimental analysis of behavior, development of the nervous system, and sensory systems. Emphasis on reading and interpreting original research,
Prerequisites: Genetics (01:447:380) or Genetic Analysis (01:447:384).

01:447:488 ***Genetic Counseling Rotation (3)***
The goal of this course is to provide students with an understanding of the genetic counseling career. Students will be placed at a local Genetic Counseling clinic to shadow a genetic counselor for one semester. During the semester, the student is expected to spend 8-9 hours a week at the rotation plus meet weekly with course director (attendance is mandatory). Course grade will be based on 1) Case presentation to Genetic Counseling group 2) ten Genetic Counseling case summary logs, and 3) evaluation by the clinical supervisor.
Prerequisites: Declared Genetics major, cumulative GPA of 2.8 or greater, and accepted into the undergraduate Genetic Counseling Certificate Program (GCCP).

01:447:489,490 ***Advanced Independent Study in Genetics (3,3)***
Advanced independent study in Genetics is an opportunity for students to complete a scholarly project under the direct supervision of a faculty mentor. Projects are varied; e.g. library research on a topic of mutual interest to both the student and the faculty member, computer simulations, informative website design, or development of teaching materials. This course may not used for laboratory research.
Prerequisites: 01:447:384 and permission of department. Open only to students majoring in Genetics

Life Sciences (SAS)

Molecular Biology and Biochemistry 694

MOLECULAR BIOLOGY AND BIOCHEMISTRY 694

Department of Molecular Biology and Biochemistry, School of Arts and Sciences

Life Sciences (SAS)

Learning Goals

Learning Goals

The Department of Molecular Biology and Biochemistry offers a course of study in which traditional and modern biochemistry are integrated with studies in molecular biology. In addition to traditional courses, students are required to carry out undergraduate research work in a Rutgers professor¿s lab who serves as the host and mentor. This course of study prepares students for graduate studies in molecular biology and biochemistry and related fields, entry into professional schools in medicine or other health professions, or employment in industries (e.g., biotechnology, pharmaceuticals) in which molecular biology and biochemistry skills are in demand. The same learning goals are also used for nonmajor students taking molecular biology and biochemistry courses.

Learning Goals:

I. Students should demonstrate an understanding of the knowledge that is needed to begin biomedical research and that is required for postgraduate exams and studies.

II. Students should demonstrate the ability to find and evaluate information about specific biological systems or problems.

III. Students should demonstrate the ability to design experiments and critically analyze data.

IV. Students should demonstrate the ability to communicate their research and findings orally through seminar and poster presentations and through written research papers.

Life Sciences (SAS)

Entry Requirements of the Major

Entry Requirements of the Major

The molecular biology and biochemistry (MBB) major is open to students beyond their first year who have a 2.0 cumulative grade-point average and have received grades of C or better in courses taken toward the major, except by special permission of the department undergraduate chair. The MBB major is also open to first year students with AP credits. In all cases, students interested in the MBB major should contact the Undergraduate Director, Sam Gunderson. A grade of C or better in all courses credited toward the major is required for graduation and each course may be repeated only once to replace D/F grades.

Departmental approval is required to declare the major in molecular biology and biochemistry. Students who want to register for the MBB major must first meet with the Undergraduate Chair Sam Gunderson, Nelson lab, Room A322/A320 (848-445-1016 gunderson@dls.rutgers.edu) to discuss details about the major.

Life Sciences (SAS)

Major Requirements

Major Requirements

A core of courses is required for completion of the major in molecular biology and biochemistry. Students supplement the core with additional required and elective courses in one of three options. Given that molecular biology and biochemistry is a dynamic and developing field, it is critical that coursework applied to the major must be current. Thus, any life science courses applied to the major in molecular biology and biochemistry should be taken within 10 years of graduating. Online courses will be reviewed on a case-by-case basis to confirm that they meet departmental learning goals before they may be used to satisfy the requirements for the major. Returning students must meet with their adviser to discuss their path to graduation. All students are required to write research reports and present them at a seminar.

Required Core Courses (58 credits)

01:119:115-116 General Biology (4,4)*
01:119:117 Biological Research Laboratory (2)*
01:160:161-162 or 01:160:163-164 or 01:160:165-166 General Chemistry (4,4)*
01:160:171 Introduction to Experimentation (1)*
01:160:309 Organic Chemistry Laboratory (2) (recommended)* or 01:160:311 Organic Chemistry Laboratory (2)
01:160:315-316 Principles of Organic Chemistry (4,4) (recommended)* or 01:160:307-308 Organic Chemistry (4,4)
01:447:380 Genetics (4)*
01:640:151-152 Calculus for Mathematical and Physical Sciences (4,4) *(recommended) or 01:640:135-136 Calculus for the Life and Social Sciences I,II (4,4)**
01:694:407 Molecular Biology and Biochemistry (3) or 01:694:395 Biochemistry for the Life Sciences (3)
01:694:315 Introduction to Molecular Biology and Biochemistry Research (3) or 01:694:215 Honors Introduction to Molecular Biology and Biochemistry Research (4) or 01:694:214 Introduction to Molecular Biology Research (3) or 01:694:316 Honors Introduction to Molecular Biology, Biochemistry, Genetics Research (4)
01:694:408 Molecular Biology and Biochemistry (3)
01:694:383 Molecular Biology and Biochemistry Seminar: Careers in Science (1)
01:694:484 Molecular Biology and Biochemistry Seminar: Research Presentations (1)
01:750:203-204 General Physics (3,3)***

01:750:205-206 General Physics Laboratory (1,1)***

*Life sciences core course
**01:960:401 Basic Statistics for Research (3) or 01:960:211-212 Statistics I,II (3,3) may be substituted for the second semester of calculus.
***01:750:193-194 (4,4) or 01:750:201-202 (5,5) may be substituted for 01:750:203-204 (3,3) plus 01:750:205-206 (1,1).

Life Sciences (SAS)

Course Requirement Options

Course Requirement Options

In addition to the required core courses, the Department of Molecular Biology and Biochemistry (MBB) offers two course options to students to fulfill the requirements for the major. Course option one comprises taking advanced electives and is intended to expose MBB students to different current topics in molecular biology and biochemistry. Course option two is for students interested in biophysical questions and research and comprises taking Physical Chemistry and Multivariable Calculus. Students completing course option two will also receive a minor in chemistry are encouraged to take the physical chemistry courses as they will fulfill the minor requirements. Course option two is intended to expose MBB students to different current topics in molecular biology and biochemistry.

Course Option One (13 credits)

Two 3-credit courses offered by the MBB department from the following list: 01:694:230; 01:694:390; 01:694:411; 01:694:412; 01:694:413; 01:694:420/421; 01:694:492

One 400-level, 3-credit elective course offered by any department in the Division of Life Sciences or approved by the MBB department. See degree navigator or the MBB department website for a list of approved courses.

Course Option Two (9 credits)

01:160:341-342 Physical Chemistry: Biochemical Systems (3,3) or 01:160:327-328 Physical Chemistry (3,3) (requires 01:640:251 as a prerequisite). Other combinations of Physical Chemistry are possible so see degree navigator for further details.

01:640:251 Multivariable Calculus (4)

One 3-credit course offered by the MBB department from the following list: 01:694:390; 01:694:411; 01:694:412; 01:694:413; 01:694:420/421; 01:694:492

Electives

Because the list of approved electives is changing, students should discuss their elective options directly with their departmental faculty advisers and with the MBB Undergraduate Director, Sam Gunderson. A list of currently approved electives can be found on the MBB department website. In addition to the undergraduate courses listed, advanced students are encouraged to choose electives from the School of Graduate Studies.

Life Sciences (SAS)

Research Options

Research Options

The Department of Molecular Biology and Biochemistry (MBB) offers two laboratory research options (laboratory option one and laboratory option two), as well as a nonlaboratory research option (nonlaboratory option). In all cases, students must take one of the Introduction to Molecular Biology and Biochemistry Research courses (01:694:214, 01:694:215, 01:694:315, or 01:694:316) and 01:694:383, 484 Seminars in Molecular Biology and Biochemistry. Course 01:694:215 is only for first-year honors students who have placed out of General Biology (01:119:115,116, and 117) by receiving a score of 4 or 5 on the AP biology exam. Course 01:694:214 is for first-year students who have placed out of General Biology (01:119:115,116, and 117) by receiving a score of 4 or 5 on the AP biology exam. Course 01:694:315 is for either qualified sophomores or junior students in the major. Course 01:694:316 is for either qualified sophomores or junior honors students in the major.

Laboratory Option One (>12 credits)

01:694:381,382, and 283 (Summer) or 384 (Summer) Undergraduate Laboratory Research (2-6,2-6)

01:694:481,482 Advanced Undergraduate Laboratory Research (2-6) or 01:694:495,496 Honors Laboratory Research (6,6)

A minimum of 12 credits is required in research courses. With the exception of Honors Laboratory Research (01:694:495/496), students who plan to take more than 3 credits of research a semester need approval from the MBB undergraduate chair.

Laboratory Option Two (6 to 11 credits)

01:694:381,382, and 283 (Summer) or 384 (Summer) Undergraduate Laboratory Research (2-6) or 01:694:481,482 Advanced Undergraduate Laboratory Research (2-6) or 01:694:495,496 Honors Laboratory Research (4-6,4-6)

One 3-credit course offered by the MBB department from the following list: 01:694:230 (3); 01:694:390; 01:694:411 (3); 01:694:412 (3); 01:694:413 (3); 01:694:420/421 (3); 01:694:492 (3).

A minimum accumulation of 6 credits is required in research courses. Students must take at least one MBB elective in addition to the course requirements to satisfy the requirements for this option. Note that students applying for honors must complete 4 up to 6 credits of honors coursework per semester for two semesters. With the exception of Honors Laboratory Research (01:694:495/496), students who plan to take more than 3 credits of research a semester need approval from the MBB undergraduate chair.

Nonlaboratory Option (9 credits)

01:694:489,490 Literature Research in Molecular Biology and Biochemistry (3,3). This non-lab option is almost never used and will need approval from the Undergraduate Director, Sam Gunderson

One 3-credit course offered by the MBB department from the following list: 01:694:230 (3); 01:694:390; 01:694:411 (3); 01:694:412 (3); 01:694:413 (3); 01:694:420/421 (3); 01:694:492 (3).

Students must take at least one MBB elective in addition to the course requirements to satisfy the requirements for this option. Students taking this option may not apply for departmental honors.

Life Sciences (SAS)

Departmental Honors Program

Departmental Honors Program

To qualify, a student must have attained, at the end of the junior year, a cumulative grade-point average of at least 3.4 and a grade-point average of 3.4 or better in courses required for the major. Exceptional students not meeting these criteria but wishing to apply for honors research may petition the Department of Molecular Biology and Biochemistry at the beginning of their senior year. Students accepted into the program are expected to complete two semesters (6 credits per semester) of honors coursework. A written honors thesis and an oral thesis presentation are required. Students enrolled in 01:694:495,496 Honors Laboratory Research or any of the various school honors programs are eligible to receive departmental honors at the time of graduation.

Life Sciences (SAS)

Courses

Courses

01:694:214 ***Introduction to Molecular Biology Research (3)***
Basic principles and methods of research, followed by a research project: analyses of molecular clones from eukaryotic cDNA libraries. Description of research opportunities available to undergraduates at the university.
Prerequisites: For first-year students only who have placed out of General Biology (01:119:115,116, and 117) with AP credits, and 01:160:161 or 01:160:163. Corequisite: 01:160:162 or 164.

01:694:215 ***Honors Introduction to Molecular Biology and Biochemistry Research (4)***
Basic principles and methods of research, followed by a research project: isolation and analyses of transcriptional regulatory mutants in yeast. Description of research opportunities that are available to undergraduates at the university.
Prerequisite: Limited only to first-year SAS Honors Program or Honors College students who have placed out of General Biology (01:119:115,116, and 117) with AP credits. Corequisites: 01:160:161 or 01:160:163 (or AP credits) and 01:640:135 or 01:640:151 (or AP credits).

01:694:230 ***Analytical Methods in Biology (3)***
Mathematical methods and tools to analyze and interpret biological and biomedical data, including probability theory; Bayes Theorem; the binomial, Poisson, and normal distributions; limit theorems; error analysis; tests of statistical significance; parameter estimation; curve fitting; sampling techniques; random number generation; and Monte Carlo methods. Analysis of sequencing and microarray data, such as sequence alignment, phylogeny inference, population structure, selection, and human migration.
Prerequisites: 01:119:115-116 and 01:640:135 or 151.

01:694:281,282 *Sophomore Laboratory Research (2-6,2-6). 281 is Fall, 282 is Spring*
Research project in the laboratory of a faculty member. Written report of research carried out during each semester required. Credits in this course cannot be used toward the required research credits for laboratory option. Students must complete a special permission form and have it signed by their research advisor and then send the signed form to the Undergraduate Director (Sam Gunderson) before they can register for the course.

01:694:283 *01:694:283 Undergraduate Laboratory Research (2-6). Summer semester*
Independent research project in the laboratory of a faculty member. A written report of research carried out during each semester required by the end of each semester.
Typically for rising Juniors and Seniors. Students must complete a special permission form and have it signed by their research advisor and then send the signed form to the Undergraduate Director (Sam Gunderson) before they can register for the course.

Prerequisite: Students must complete a special permission form and have it signed by their research and MBB faculty mentors before they can register of the course.

01:694:301 *Introductory Biochemistry and Molecular Biology (3)*
Chemistry and metabolism of proteins, carbohydrates, lipids, nucleic acids, and other biologically important compounds.
Prerequisite: 01:160:209 or 307. Not for students majoring in molecular biology and biochemistry. Credit not given for both this course and 01:694:407, 11:115:301, or 11:115:403.

01:694:313 *Introductory Biochemistry Laboratory (1)*
Techniques used in research, clinical, and food laboratories, including tests of biological materials, methods of separation, and determination of enzyme activities.
Lab. 3 hrs. Pre- or corequisite: 01:694:301. Not for students majoring in molecular biology and biochemistry.

01:694:315 *Introduction to Molecular Biology and Biochemistry Research (3)*
Basic principles and methods of research, followed by a research project: analyses of molecular clones from eukaryotic cDNA libraries. Description of research opportunities at the university available to undergraduates.
Pre- or corequisites: 01:119:115,116, and 117; and 01:160:161-162, 171 or 01:160:163-164, 171. Credit not given for both this course and 01:447:315, 01:694:214, 215, or 316. Open only to MBB majors.

01:694:316 *Honors Introduction to Molecular Biology, Biochemistry, Genetics Research (4)*
Basic principles and methods of research in molecular biology, biochemistry, and genetics, followed by a research project: isolation and analyses of transcriptional regulatory mutants in yeast. Description of research opportunities that are available to undergraduates at the university.
Prerequisites: 01:119:116 and (01:160:162 or 01:160:164). For MBB or genetics majors only or those planning on being MBB or genetics majors. Special permission required.

01:694:381,382 *Undergraduate Laboratory Research (3-6,3-6). 381 is Fall, 382 is Spring*
Research project in the laboratory of a faculty member. Written report of research carried out during each semester required. Students must complete a special permission form and have it signed by their research advisor and then send the signed form to the Undergraduate Director (Sam Gunderson) before they can register for the course.

01:694:383 *Molecular Biology and Biochemistry Seminar: Careers in Science (1)*
Discussion of career options in the life sciences, finding a research laboratory, performing literature searches, reading a scientific paper, and creating posters and abstracts. This course should be taken in the beginning of the third year.
Open to MBB majors only.

01:694:384 *Undergraduate Laboratory Research (1-6). Summer semester*
Independent research project in the laboratory of a faculty member. A written report of research carried out during each semester required by the end of each semester.
For rising Seniors. Students must complete a special permission form and have it signed by their research advisor and then send the signed form to the Undergraduate Director (Sam Gunderson) before they can register for the course.

For rising Seniors. Students must complete a special permission form and have it signed by their research advisor and then send the signed form to the Undergraduate Director (Sam Gunderson) before they can register for the course.

01:694:385 *MBB Research and Writing (3)*

Research project in the laboratory of a faculty member. Seminar on science communication. Written and oral reports of research carried out during the semester required.

Prerequisites: MBB majors only. Students need a GPA of 2.8 or better to enroll in research.

01:694:390 *Introductory Computational Biology (3)*
Disciplines of biochemistry and molecular biology and genomics all include collection and analysis of large data sets. Hands on use in a computer lab will permit students to learn and apply computer languages such as Python and R to analyze large data including for example DNA mutations and structural variations (SVs), RNA-seq and ChIP-seq as part of understanding genes and gene regulation.
Prerequisite: 01:447:380 or 01:447:384

01:694:395 *Biochemistry for Life Sciences (3)*
The course is intended for life science majors and takes a holistic approach to Biochemistry. You will learn the basics of proteins, enzymology, nucleic acids and metabolism and use these as foundations to discuss exemplary metabolic pathways for their importance to homeostasis and, when dysregulated, to disease including observable phenotypes and what current strategies are used to treat these disorders. Coursework will consist of quizzes, homework, exams and one graded paper.

Prerequisites: 01:160:307 or 01:160:315

01:694:407 *Biochemistry (3)*
Protein structure and function, structure of lipids, membranes and carbohydrates, catalysis of biochemical reactions, intermediary metabolism, oxidative phosphorylation, membrane transport, lipid metabolism, signal transduction, photosynthesis, protein secretion, targeting and turnover, nitrogen, amino acid, and nucleotide metabolism.
Pre- or corequisites: 01:160:307-308 or 315-316. Credit not given for both 01:694:407 and 01:694:301, 11:115:301, or 11:115:403.

01:694:408 *Molecular Biology and Biochemistry (3)*
Disciplines of biochemistry and molecular biology as interlocking and mutually complementary fields of study. Lectures on structure of DNA, RNA, recombinant DNA approaches, DNA replication, repair and recombination, mobile genetic elements, transcription, gene regulation, RNA splicing, translation, and viral gene expression.
Prerequisite: 01:694:407 or 01:694:301 or 01:694:395 or 11:115:403. Credit not given for both 01:694:408 and 01:146:478 or 11:126:481.

01:694:411 *Molecular Pathways and Signal Transduction (3)*
Lectures and discussion of current research areas of advanced molecular and structural biology: transcription, posttranscriptional regulation, cell cycle, neurobiology, protein folding, macromolecular recognition, and molecular virology.
Pre- or corequisites: 01:694:407 and 408, or 01:447:384-385 or 11:115:403-404 or 11:126:481.

01:694:412 *Proteomics and Functional Genomics (3)*
Survey of modern techniques of protein biochemistry, bioinformatics, proteomics, and functional genomics, including basic concepts of protein structure and function, protein folding, protein characterization and purification, enzyme kinetics, NMR and X-ray crystallography, mass spectrometry, yeast two hybrid, and various techniques and approaches to functional and structural genomics.
Prerequisites: [(01:694:301 OR 01:694:407 OR 01:694:395) AND (01:447:380) OR (01:447:384)]

01:694:413 *Chromatin and Epigenomics (3)*

Introduction to chromatin dynamics, particularly the structural and biochemical modifications of chromatin that underlie epigenetic states and their effects on gene expression and development.

Pre- or corequisites: Prerequisite: 01:694:408 or 01:146:478 or 01:447:385.

01:694:420,421 *Special Topics in Molecular Biology and Biochemistry (3,3)*
Directed reading and discussion of selected topics of special interest in molecular biology and biochemistry. Topics will vary according to semester and/or instructor.
Pre- or corequisites: [(01:694:301 or 01:694:407) and (01:447:380 or (01:447:384)] or equivalent.

01:694:481,482 *Advanced Undergraduate Laboratory Research (BA, BA). 481 is Fall, 482 is Spring.*
Research project in the laboratory of a faculty member. A written report of research carried out during each semester is required. Oral presentations of student research are required in 01:694:484.

01:694:484 *Molecular Biology and Biochemistry Seminar: Research Presentations (1)*
Oral presentation of student's own research results and the research interests of the laboratory with which the student is associated. Presentation at a required poster session.
Students should take this course in the spring semester of their senior year. MBB majors only.

01:694:489,490 *Literature Research in Molecular Biology and Biochemistry (1-3,1-3)*
Literature research projects on a selected subject under the direction of a faculty member. A written report of research carried out during each semester is required. Oral presentations of student research are required in 01:694:484. This course is rarely used, therefore contact the Undergraduate Director if you are considering to take this course.
Prerequisites: 01:694:214, 215 or 315, 407, 408, and 383.

01:694:492 ***Gene Regulation: Clocks to Cancer (3)***
Explanation of MBB as an experimental science and how molecular biologists know what they know. Covers all aspects of gene regulation from transcription to protein modification to explain how 25,000 human genes can make millions of different protein isoforms and mRNA and ncRNA. Mechanisms of molecular clocks and cancer addressed in terms of gene regulation complexity,feedback loops and rate-limiting steps with emphasis on the methods, experimental design,
Prerequisites:(01:694:407 BIOCHEM) OR (01:447:384 GEN ANALY) OR (11:126:481 MOLE GEN) OR (11:115:403 GEN BIOCHEM) OR (01:694:395 BioChem LS)

01:694:495,496 ***Honors Laboratory Research (BA)***
Two-semester-long Honors research project in the laboratory of a faculty member. In the Fall semester, 01:694:495 students are required to attend a seminar each week on writing a thesis and preparing an oral thesis presentation. In the Spring semester, students take 01:694:496 where they complete their Honors thesis and give their oral presentation to their honors committee.

Planning and Public Policy Major (762, 762D) and Minor (EJB-U)

PLANNING AND PUBLIC POLICY MAJOR (762, 762D) AND MINOR

Planning and Public Policy Major (37 credits)

The Planning and Public Policy major (762, 762D) provides students with a foundation in areas such as city dynamics, environmental aspects of cities, community health, urban poverty, public policy, housing issues, social concerns, fiscal matters, and land use planning. Students are prepared for entry-level professional management and planning positions focused on overseeing and improving public programs, such as transportation, housing, planning, the environment, finance, economic development, and urban renewal. These career paths can be found in business, government, education, banking, and nonprofit settings. This program also prepares students for graduate education in public administration, public policy, and urban planning.

Upon completing all degree requirements, the student will receive the bachelor of arts (B.A.) degree.

Rutgers School of Arts and Sciences and School of Environmental and Biological Sciences Students

This program is designed to accommodate the needs of traditional students at Rutgers University-New Brunswick.

Students in the School of Arts and Sciences (SAS) and students in the School of Environmental and Biological Sciences (SEBS) who wish to remain in their primary unit must apply for admission prior to declaring the major.

SAS students may pursue Planning and Public Policy as their first major and remain within SAS. SEBS students may pursue Planning and Public Policy as a second major to remain within SEBS.

Students can apply for the Planning and Public Policy major during one of our application cycles listed here. Applicants must have a minimum grade of 'C' or better in each of the prerequisite courses and be in good academic standing. The application may be found on the school's website at¿https://bloustein.rutgers.edu/undergraduate/planningandpublicpolicy/#sas

Students are advised to declare the Planning and Public Policy major no later than their first semester of junior year to ensure completion of the major by their anticipated graduation date.**A minor program is required for this major.**

Only courses with a 'C' or better may be counted towards the major, and students must complete the core curriculum requirements of their primary school.

The most current information for the Planning and Public Policy major may be found on the Bloustein School website at https://bloustein.rutgers.edu/undergraduate/planningandpublicpolicy/

Transfer Students

This program is designed to accommodate the needs of transfer, adult, and nontraditional students.

Students seeking the Planning and Public Policy major must have at least 30 credits before applying to the Bloustein School. Successful applicants will have completed the prerequisite courses with a grade of 'C' or better, and have achieved an overall GPA of at least 2.5.

Current Rutgers students seeking a school-to-school transfer from another Rutgers unit, or students transferring to Rutgers from another college or university, must apply via the Rutgers Office of Undergraduate Admissions. Contact ugadmissions@ejb.rutgers.edu for more information.

Transfer students from New Jersey community colleges are encouraged to complete lower-division prerequisite courses and the associate's degree to benefit from the NJ Statewide Transfer Agreement.

Only courses with a 'C' or better may be counted towards the major.**A minor program is required for this major.**

For more information about transferring, please see the school's website at https://bloustein.rutgers.edu/undergraduate/planningandpublicpolicy/#transfer

PLANNING AND PUBLIC POLICY MAJOR REQUIREMENTS (762, 762D)

(37 credits)

Prerequisite Courses (9-10 credits)

- 01:355:101 College Writing (3)
- 10:775:205 Basic Statistical Methods (4) or equivalent (3-4)
- 01:220:102 Introduction to Microeconomics (3)

Major Requirements (762, 762D) (37 credits)
Core Courses (16 credits)

- One of the following (3):
    - 01:220:103 Introduction to Macroeconomics (3)
    - 01:790:104 American Government (3)
    - 10:833:210 Principles of Public Policy (3)
    - 10:971:201 Intro to Urban Planning and Design (3)
- One of the following intensive writing courses (3):
    - 10:775:300 Writing for Professionals (3)
    - 01:355:302 Scientific and Technical Writing (3)
    - 01:355:303 Writing for Business and the Professions (3)
    - 01:355:315 Writing Grant Proposals (3)
- 10:775:395 Research Methods (4) *Open to majors only*
- 10:762:400 Internship with Seminar* (3) *Open to majors only*
- 10:762:499 Senior Seminar* (3) Open to majors only with at least 100 credits **and** no outstanding core requirements

** Students qualifying for departmental honors may replace 10:762:400 and 10:762:499 with 10:762:497, 498 Bloustein Honors Research.*

Required Electives (21 credits)

- 21 credits of electives from Bloustein School undergraduate courses, 15 credits of which must be at the 300-level or higher

Students interested in specific career paths should consider clustering their electives and seek advising early in their program of study.

Joint BA/MCRP or BS/MCRP Program

Exceptional, well-prepared students from any Rutgers University-New Brunswick matriculating unit with a GPA of 3.5 or higher, exceptional GRE scores, a dedication to public service and outstanding recommendations who wish to study urban planning are encouraged to seek advising about the 3-1-1 master of city and regional planning (M.C.R.P.) program. Contact ugadmissions@ejb.rutgers.edu for more information.

Planning and Public Policy Minor (18 credits)

The Bloustein School welcomes current and prospective Rutgers-New Brunswick students to consider the Planning and Public Policy minor. Students should declare a minor with their matriculating school. They need not apply for minor status with the Bloustein School. Only courses with a grade of 'C' or better can be counted toward the minor program of study.

This minor is well-matched to majors in economics; labor studies & employment relations; political science; geography; sociology; urban planning and design; as well as the pre-law track.

Students seeking the Planning and Public Policy minor must complete three core courses and five elective courses in course code 762, excluding those designated for 'majors only'.

- 10:775:101 Introduction to Planning, Policy and Health (3)
- Five electives selected from all the undergraduate Bloustein courses that are open to non-majors. At least four of the five must be 300 or 400-level.

For the most current configuration of courses for the Planning and Public Policy minor, please see the school's website at https://bloustein.rutgers.edu/undergraduate/planningandpublicpolicy/#minor

Planning and Public Policy Certificate Programs

The Bloustein School currently offers four Planning and Public Policy certificates open to all Rutgers-New Brunswick undergraduates. Certificate programs are open to students in any major and are awarded with, or subsequent to, a bachelor's degree. Only courses with a C or better may be applied toward a certificate program.

Certificates do not qualify as a minor. **Students must declare their intention to pursue a certificate program with the Bloustein School before their last semester of study in order to qualify to receive a certificate.** Awarded certificates appear on the student's final transcript.

For the most current configuration of courses for each certificate, please see the school's website at https://bloustein.rutgers.edu/undergraduate/#certificates;

- Community Development Certificate (24 credits)
- Community Sustainability Certificate (18 credits)
- Urban Planning Certificate (24 credits)
- Historic Preservation Certificate (15 credits)

Plant Science 776 (SEBS)

PLANT SCIENCE 776

Degree: B.S.

Director: Nrupali Patel (npatel@sebs.rutgers.edu)

Program Webpage: http://plantbiology.rutgers.edu/undergrad/plantbiology

Managing Department Webpage: http://plantbiology.rutgers.edu

The Plant Ccience undergraduate program prepares students for careers or further study in areas related to food and plant production, turfgrass, plant pathology and pest management, plant breeding, natural products, and bioenergy.

The curriculum offers three options: *General Plant Science (Research)*, for students intending to pursue careers in research laboratories or graduate study; *Horticulture or Turfgrass Industry*, for students intending to pursue careers in the plant business industries; and *Natural Products*, for students interested in historical and cultural botany, economic botany (the study of the interaction of people and plants), and indigenous and modern medicinal plants.

The curriculum also offers minors in agroecology, horticultural therapy, medicinal and economic botany, and plant science; and certificates in horticultural therapy, medicinal and economic botany, and turfgrass science.

Learning Goals

Learning Goals

Plant Science Major: Program Learning Goals

Students completing degree requirements will be able to:

1. Describe basic knowledge about plant structure and function, fundamentals of plant growth and physiology, and principles of horticulture [technical proficiency];
2. Summarize broadly the role of plants in agriculture, society, and the environment [context];
3. Communicate, in written and oral forms, plant science knowledge to peers and others in society [communication]; and
4. Critically formulate hypotheses, interpret data, and apply basic principles and practices of plant science to solve fundamental and practical problems [critical thinking].

Graduation Requirements for the Major

Graduation Requirements for the Major

For an up-to-date description of plant biology major requirements, courses, and course sequences please refer to the program webpage at https://plantbiology.rutgers.edu/undergrad/plantbiology.

SEBS UNDERGRADUATE CORE CURRICULUM (39 credits)

Contemporary Challenges (6 credits) *Two courses, one in each of the Contemporary Challenges areas: Diversities and Social Inequalities* [CC-D] *and Our Common Future* [CC-O]

Experiential Learning (3 credits) *Students must participate in a certified experience that meets this goal* [EL]

Natural Sciences (6 credits) *Students must take two courses, one each in two of the following areas: physical, biological, or environmental sciences* [NS]

Historical Analysis (3 credits) *Students must take one course* [HST]

Social Analysis (6 credits) *SEBS students must complete two courses, one in either social/cultural analysis or economic analysis, and one in governmental and regulatory analysis* [SCL]

Arts and Humanities (3 credits) *Students must complete one course* [AH]

Writing and Communication (6 credits) *Students must take 01:355:101 or its equivalent* [WC] *and one course that fulfills the learning goal, communicate effectively in modes appropriate to a discipline or area of inquiry* [WCD].

Quantitative and Formal Reasoning (6 credits) *Students must take two courses* [QQ; QR]

Graduation Requirements for the Major: Proficiency in Plant Science

A. Plant Science Major Requirements (37-38 credits)

General Biology and Laboratory (all) (10 credits)1

01:119:115 General Biology I (4)
01:119:116 General Biology II (4)
01:119:117 Biological Research Laboratory (2)

General Chemistry and Laboratory (all) (9 credits)2

01:160:161 General Chemistry (4)
01:160:162 General Chemistry (4)
01:160:171 Introduction to Experimentation (1)

Experienced-Based Education (3 credits).3 *Choose from the following (adviser approved):*

11:776:495,496 Special Problems in Plant Science
11:554:487,488 George H. Cook Scholars Program
11:902:300,301,400 SEBS Internship I,II, Coop
11:550:240 Public Garden Management
11:020:321 Principles and Practice of Small-scale Organic Farming
Study Abroad
SEBS International Summer Study Abroad Program
ARESTY Research Assistant Program

Quantitative Skills (1-2 courses)4

All students are required to complete one to two math courses, precalculus or higher, depending on option. See option for specific requirements.

Professional Ethics (3 credits). *Choose from the following:*

01:730:107 Introduction to Ethics (3)5
01:730:249 Bioethics (3)
01:730:250 Environmental Ethics (3)
11:607:385 The Ethical Leader (3)

Soils (3-4 credits). *Choose from the following:*

11:776:102 Soil and Society (3)
11:776:404 Soil Management for Sports and Landscape Applications (3)
11:776:440 Soil Fertility (3)
11:375:360 Soils and Water (4)
11:375:453 Soil Ecology (3)

Plant Science Fundamentals (all) (9 credits)

11:776:210 Principles of Botany (3)
11:776:211 Introduction to Horticulture (3)
11:776:242 Plant Science (3)

B. Plant Science Option Requirements
One of the following three options is required:

1. General Plant Biology (research focus area) (54-59 credits)
2. Horticulture and Turfgrass Industry (53-55 credits)
3. Natural Products (54-57 credits)

B1. General Plant Biology Option (54-59 credits)

Quantitative Methods (all) (7-8 credits)

01:640:135 Calculus I (4) or equivalent
01:640:136 Calculus II (4) or equivalent or 01:960:401 Basic Statistics for Research (3)

Chemistry (all) (15 credits)

01:160:307 Organic Chemistry (4)
01:160:308 Organic Chemistry (4)
11:115:403 General Biochemistry (4)
11:115:404 General Biochemistry (3)

Physics (6-10 credits). *Choose from the following sequences of courses:*

01:750:193 Physics for the Sciences (4)
01:750:194 Physics for the Sciences (4)
or
01:750:201 Extended General Physics (5)
01:750:202 Extended General Physics (5)
or
01:750:203 General Physics (3)
01:750:204 General Physics (3)

Advanced Plant Science (all) (14 credits)

11:776:305 Plant Genetics (4) or 01:447:380 Genetics (4)
11:776:382 Plant Physiology (4)
11:776:452 Plant Tissue Culture and Engineering (3)
11:126:413 Plant Molecular Biology (3) or 11:126:481 Molecular Genetics (3)

Plant Science Electives (12 credits) (if not already used above)

A total of 12 credits from any 11:776:xxx course at the 200 level or above (see https://plantbiology.rutgers.edu/undergrad/plantbiology/courses/courselistings.html), including:
01:960:401 Basic Statistics for Research (3)
or adviser-approved elective

B2. Horticulture and Turfgrass Industry Option (53-55 credits)

Quantitative Methods (4 credits)5

01:640:115 Precalculus (4) OR higher

Business Courses (all) (9 credits)

11:373:121 Principles and Applications of Microeconomics (3)6
11:373:231 Introduction to Marketing (3)
11:373:241 Introduction to Management (3) OR 11:373:341 Management: Human Systems Development (3)

Applied Major Requirements (all) (16-18 credits)

11:776:302 General Plant Pathology (3)
11:776:382 Plant Physiology (4) OR 11:776:202 Applied Physiology of Horticultural Crops (3)
11:776:391 Weeds, Diseases, and Insects of Plants (3)
11:776:406 Plant Breeding (4)
11:776:306 Weed Science Management (3)

Plant Science Electives (24 credits) (if not already used above)

A total of 24 credits from any 11:776:xxx course at the 200 level or above (see https://plantbiology.rutgers.edu/undergrad/plantbiology/courses/courselistings.html), including
01:960:401 Basic Statistics for Research (3)
or adviser-approved elective

B3. Natural Products Option (54-57 credits)
Students must complete required courses below AND one area of specialization

Required courses

Quantitative Methods (all) (7-10 credits)5

01:640:115 Precalculus (4) or higher AND
01:960:401 Basic Statistics for Research (3) OR
01:960:211,212 Statistics I, II (3,3) (must take both in series)

Business Courses (3 credits)

11:373:121 Principles and Applications of Microeconomics (3)6

Geography Courses (3 credits). *Choose from the following:*

01:450:211 Environment, Society, and Social Justice (3)
01:450:306 Global Ecosystems and Biodiversity (3)

Major Option Requirements (all) (14 credits)

11:776:205 Introduction to Ethnobotany (3)
11:776:312 Medicinal Plants (3)
11:776:313 Medicinal and Aromatic Plants Laboratory (1)
11:776:382 Plant Physiology (4)
11:776:438 Plants and Human Health (3)

Areas of Specialization

One of the following areas of specialization is required:

a. Ethnobotany and Global Health (27 credits
b. Production of Medicinal and Aromatic Plants (27 credits)

a. Ethnobotany and Global Health

Required (3 credits). *Choose one of the following:*
11:776:390 Hemp and Medical Cannabis (3)
11:776:400 Fungi in the Environment (3)
11:776:410 Plants and Innovative Technologies for Bioenergy (3)

Electives (24 credits). *Choose from the following (if not used above):*
11:776:201 People-Plant Relationships (3)
11:776:221 Principles of Organic Crop Production (3)
11:776:302 General Plant Pathology (3)
11:776:305 Plant Genetics (4)
11:776:390 Hemp and Medical Cannabis (3)
11:776:400 Fungi in the Environment (3)
11:776:406 Plant Breeding (4)
11:776:410 Plants and Innovative Technologies for Bioenergy (3)
11:776:415 Fungi and Human Health (3)
11:776:439 Nursery Crop Production (3)
11:776:442 Agroecology (3)
11:776:495,496 Special Problems in Plant Science (1-3)
11:020:436 Sustainable Agriculture (3)
11:216:217 Principles of Natural Resource Management (4)
11:216:369 Analytical Methods Ecology, Evolution, and Natural Resources (3)
11:216:411 Plant Diversity and Evolution (3)
11:216:412 Plant Diversity and Evolution Lab (1)
11:370:406 Medical and Veterinary Entomology (3)
11:373:362 Natural Resource Economics (3)
11:373:363 Environmental Economics (3)
11:375:201 Biological Principles of Environmental Sciences (3)
11:400:422 Food Safety: Fads, Facts, and Politics (3)
11:709:201 Culinary Nutrition (3)
11:709:255 Nutrition and Health (3)
11:709:363 World Food Customs and Nutrition (3)
or other adviser-approved electives

b. Production of Medicinal and Aromatic Plants

Required (3 credits). *Choose one of the following:*
11:776:390 Hemp and Medical Cannabis (3)
11:776:410 Plants and Innovative Technologies for Bioenergy (3)
11:776:439 Nursery Crop Production (3)

Electives (24 credits). *Choose from the following (if not used above)*:
11:776:221 Principles of Organic Crop Production (3)
11:776:302 General Plant Pathology (3)
11:776:305 Plant Genetics (4)

11:776:310 Plant Propagation (3)
11:776:311 General Plant Pathology Laboratory (1)
11:776:321 Greenhouse Systems Management (3)
11:776:341 Fruit Production (3)
11:776:390 Hemp and Medical Cannabis (3)
11:776:406 Plant Breeding (4)
11:776:410 Plants and Innovative Technologies for Bioenergy (3)
11:776:439 Nursery Crop Production (3)
11:776:495,496 Special Problems in Plant Science (1-3)
11:020:215 Applied Practical Applications in Agriculture and Food Systems (3)
11:020:321 Principles and Practices of Small-Scale Organic Farming (3)
11:020:340 Indoor Cultivation of High Value Crops (4)
11:020:442 Entrepreneurial Agriculture (3)
11:216:274 Field Techniques (4)
11:216:332 Plant Ecology (4)
11:216:411 Plant Diversity and Evolution (3)
11:216:412 Plant Diversity and Evolution Lab (1)
11:370:350 Agricultural Entomology and Pest Management (3)
11:373:205 Small Business Essentials (3)
11:400:422 Food Safety: Fads, Facts, and Politics (3)
11:550:235 Herbaceous Plants in the Landscape (3)
or other adviser-approved electives

Unspecified Electives (2-11 credits)

In addition to courses meeting the above requirements, students can take other courses offered by the university, for which they meet the course eligibility requirements, to bring their total number of credits to the minimum of 120 (matriculated 2018 or later) or 128 (matriculated prior to 2018) required for graduation.

1 Satisfies SEBS Natural Sciences [NS] - Biological Sciences requirement
2 Satisfies SEBS Natural Sciences [NS] - Physical Sciences requirement
3 Satisfies SEBS Experience-Based Education [EBE] requirement
4 Depending on option, satisfies one to two courses of SEBS Quantitative [QQ] and/or Formal Reasoning [QR] requirements
5 11:730:107 Introduction to Ethics satisfies SEBS Arts and Humanities Human Experience [AHo] requirement
6 11:373:121 Principles and Applications of Microeconomics satisfies SEBS Social Analysis [SCL] - Economic Analysis requirement

Polish 787 (SAS)

POLISH 787

Department of Germanic, Russian, and East European Languages and Literatures, School of Arts and Sciences

Website: https://reell.rutgers.edu/home

Lecturer:

Agnieszka Makles, M.A., Jan Dlugocz (Poland); M.A., Michigan State

Note: Refer to section Minor in Slavic and East European Studies 861

Polish 787 (SAS)

Courses in English

Courses in English

01:787:250 ***Contemporary Polish Literature (3)***
Survey of contemporary Polish literature, 1950s-2000s.

01:787:370 ***Special Topics in Polish Studies (3)***
Topics related to Poland and Polish culture. Specific titles available at time of registration.
Equivalent to 01:790:383, depending on instructor.

01:787:470 ***Advanced Special Topics in Polish Studies (3)***
Intensive study of a particular topic related to Poland and Polish culture. Specific titles available at time of registration.
Prerequisite: Permission of department.

Polish 787 (SAS)

Courses in Polish

Courses in Polish

01:787:101,102 ***Elementary Polish (4,4)***
Intended for students with no or minimal prior experience in the language. Polish sound and spelling system; basics of grammar and core vocabulary. Development of proficiency in listening, reading, speaking, and writing; introduction to Polish culture.

01:787:201,202 ***Intermediate Polish (4,4)***
Contemporary Polish language. Continued development of proficiency in listening, reading, speaking, and writing. Broadened grammatical understanding and vocabulary. Deepening knowledge of Polish history and culture.
Prerequisite: 01:787:102 or placement.

01:787:205, 206 ***Intensive Intermediate Polish Abroad (4,6)***
Intensive intermediate level study of the Polish language. Focus on speaking, listening, reading, writing; intermediate Polish morphology and syntax. Taught in Polish.
Prerequisite: 01:787:102 or placement. Credit not given for either of these courses and 01:787:201.

01:787:301 ***Advanced Polish I (3)***
Advanced work in grammar and stylistics. Discussion based on reading original literature, newspapers, and essays, and on contemporary films.
Prerequisites: 01:787:202 or placement, and permission of department.

01:787:302 ***Advanced Polish II (3)***
Advanced work in grammar, vocabulary, and stylistics. Discussion based on reading original literature, newspapers, and essays, and on contemporary films.
Prerequisite: 01:787:301 or placement.

01:787:305 ***Intensive Advanced Polish Abroad (4)***
Intensive advanced level study of the Polish language. Focus on speaking, listening, reading, writing; intermediate Polish morphology and syntax. Taught in Polish.
Prerequisite: 01:787:202 or placement.

01:787:493,494 ***Independent Study: Polish (3,3)***
Prerequisite: Permission of instructor.

Teaching Instructor:

Douglas Cantor, B.A. Rutgers University; M.A. University of Baltimore; PhD University of Illinois (Chicago)

The political science major is designed to engage students with the philosophical and practical problems of political organization, action, and governance and to encourage critical thinking about the nature of citizenship, rights, and duties in the modern world. The undergraduate political science curriculum is divided into three general areas: theoretical approaches to politics, American institutions and politics, and foreign and international politics. While majors may choose to focus their studies on one of these areas, they are required to develop a solid intellectual foundation and understanding that spans all three and to approach the study of political science within the broader context of the social sciences.

Students completing the political science major are expected to develop the ability to read and listen critically, to reason analytically and engage in thoughtful moral judgment, and to write and speak clearly and forcefully. The major emphasizes the enhancement of key intellectual skills and qualities of mind--the habits of questioning, debating, challenging, and shaping coherent and persuasive arguments and interpretation--and seeks to involve undergraduates in the active research life of the department.

Coursework is organized into two general levels. Classes at the 100 and 200 levels are regarded as introductory and are designed to familiarize students with general concepts, basic knowledge, and modes of inquiry, as well as to serve as a foundation for additional coursework. Classes at the 300 and 400 levels focus on more specialized issues, questions, or problems. In general, students should complete appropriate introductory coursework before enrolling in upper-division classes.

Political science majors are strongly encouraged to take advantage of opportunities to engage in experiential learning at Rutgers. These opportunities include the one-semester Washington Internship Program, Rutgers Study Abroad, and internships supervised by the department.

Prior to declaring a major in political science, a student must complete at least two 100-level political science courses with an average grade of C or better. These courses can be counted toward major credit.

Political Science 790 (SAS)

Learning Goals

Learning Goals

The undergraduate political science program creates educated members of society capable of organizing information, thinking critically, and communicating effectively. Students who complete a major in our department will be able to consider contemporary political issues in their historical and institutional contexts, evaluate and analyze competing political claims, and explain political phenomena using a variety of empirical methods and

interpretive frameworks. We aim to instill skills that encourage critical analysis of the philosophical and practical problems of the world and the polis. We aim further to teach students to synthesize these ideas in arguments about real world issues.

To do this we spur student reflection on civic membership while increasing student understanding of the definitions, theories, and approaches political scientists use to make sense of politics, power dynamics, and policy issues. We strive to create opportunities for students to engage in experiential learning in political, governmental, and related settings.

The end goal of a political science major is to create active, engaged members of society capable of being lifelong learners promoting the public good.

We operationalize these goals through the political science major. Each of the goals listed below matches one of the requirements of the major and connects directly with one or more courses approved for that part of the major.

1. Students will be able to collect, analyze, and synthesize substantive scholarly information relevant to the fundamental areas that comprise political science: political philosophy, American politics, international relations, and comparative politics. Examples of these fundamental questions include the origins of law, dimensions of liberty, processes of political change, the role of institutions, the consequences of cultural and economic differences, and the sources of international conflict. These are the focus of our introductory level classes, 101 Nature of Politics, 102 International Relations, 103 Comparative Politics, 104 American Government, and 106 Law and Politics.
2. Students are required to take at least one course on political science research methods. The research methods courses introduce students a range of tools scientists use to investigate social and political phenomena. Students will be exposed to and understand a range of methodological orientations (quantitative, qualitative, and interpretive) and elements of research processes, including, but not limited to, concept development, building and testing hypotheses, evaluating theories, and data management. In addition to learning foundational theories of power and investigating political norms and institutions, students will be able to understand the mechanisms, complexities and limits of quantifying and assessing human behavior. Students will be equipped to produce and analyze different types of research necessary for addressing critical political questions. This is the focus of our research methods requirement and is found in 300 Political Science Research Methods, 307 Survey Methods, 391 Data Science for Political Science, and 392 Qualitative Research Methods.
3. Students will develop a more in-depth, sophisticated understanding of at least one major topic in each of the following three areas of political science: theories from a diversity of historical contexts and global political traditions, American institutions and politics, and foreign and international politics. This is the primary goal of our upper-level classes.
4. Students finalize their education by developing experience in designing, completing, and defending a research project, which gives students exposure to the process of research and discovery in political science. This is the focus of the 395 Political Science Seminar.
5. Students will dig deeper into material and gain exposure to the range of questions that social scientists pose and the tools and approaches they use to develop answers. This is found in all upper-level courses.

Beyond the general learning goals indicated above, students pursuing the political science minor are expected to acquire:

1. A solid foundational understanding of the critical theoretical issues underlying political life: the individual vs. the community; political obligation vs. civil disobedience, stability, revolution, and change; legitimacy and justice; and freedom and power; and
2. An upper division competence in several areas of political activity, whether that is in comparative institutions, theories of justice, policy making, or something similar.

Those majors electing to complete the Certificate Program in Quantitative Political Science Methods will be able to:

1. Understand the mechanisms, complexities and limits of quantifying human behavior. Students will be equipped to produce and analyze different types of quantitative data necessary for addressing critical political questions; and
2. Put their methodological skills to use as part of a supervised research project.

Those majors electing to complete the Global Politics Certificate should acquire:

1. Competence in a relevant language;
2. First-hand exposure to and understanding of another political system or culture; and
3. A specialized knowledge of foreign and international politics through coursework in political science and in related fields that permits them to apply their language skills and incorporate this first-hand experience in developing an advanced understanding of or appreciation for some specific element of global politics or some particular region of the world.

In addition, students electing to complete the Eagleton Undergraduate Associates Certificate will:

1. Explore applications of political science to the practice and processes of American politics;
2. Connect classroom learning with the experience of working in government, politics, or public affairs;
3. Grasp the complexity of political decision-making amongst voters and elites alike by analyzing the positive and normative dimensions of particular political decisions; and
4. Examine the issues of representation, leadership, campaigning, lobbying, management, and ethics.

Political Science 790 (SAS)

Major Requirements

Major Requirements

The Political Science major shall be made up of 13 courses (39 credits). Requirements are as follows:

R1: Core Requirements
Any three of the following 3 credit courses:
01:790:101 Nature of Politics
01:790:102 Introduction to International Relations

01:790:103 Comparative Politics
01:790:104 American Government
01:790:106 Law and Politics

R2: Research Methods
Any one of the following 3 credit courses:
01:790:300 Political Science Research Methods
01:790:307 Survey Research
01:790:391 Data Science for Political Science
01:790:392 Qualitative Research Methods

R3: Political Philosophy
A total of one course from 300- or 400-level courses in political theory

R4: American Institutions and Politics
A total of one course from 300- or 400-level courses in American institutions and politics

R5: International and Comparative Politics
A total of one course from 300- or 400-level courses in international and comparative politics

R6: Political Science Seminar
A total of one course from 395 Political Science seminar or equivalent

R7: Political Science courses
A total of 15 credits from Political Science electives, of which

- 12 credits must be 300- of 400- level courses
- No more than 3 credits may be used from 1.5 credit mini courses
- No more than 6 credits may be used from internship, independent study, or senior honors thesis.
- No more than 12 credits may be used from non-Rutgers New Brunswick courses.

You must achieve a minimum grade of C in all courses.

Joint Major in History/Political Science 514
This major is administered entirely by the Department of History. For further information, see the heading History/ Political Science Joint Major 514 in this section of the catalog.

Political Science 790 (SAS)

Minor in Political Science

Minor in Political Science

Minors must complete six 3-credit courses in political science with a grade of C or better. At least four of these courses must be at the 300 level or above. In addition, no more than 6 credits of independent study or internships or combination of these may be applied toward the minor. No more than two political science courses taken outside the Rutgers University-New Brunswick Department of Political Science may be applied to the minor.

Political Science 790 (SAS)

Minor in Critical Intelligence Studies 205

Minor in Critical Intelligence Studies 205

Minor in Critical Intelligence Studies (18 credits total)
(housed in the Department of Political Science)

The interdisciplinary minor in critical intelligence studies enables students to use a broad range of information to understand potential sources of risk and how to apply their understanding to enhance domestic and global security. The minor consists of a basic element that provides students with essential knowledge related to the field of intelligence studies. A second element emphasizes cybersecurity, policy analysis and implementation, language acquisition, or data control depending on the chosen track, each of which results in a greater understanding of different regions, cultures, and value systems that inform the effective collection and use of intelligence. Course offerings in the first area present a mix of tools for intelligence gathering in a framework that offers a critical evaluation of the use and misuse of intelligence gathering and tensions between security and privacy. Course offerings in the second area cover language expertise, cultural competencies, technical computer skills, and public policy formation.

Learning Goals

At the end of this program students will be able to:

- explain the intelligence gathering process in various national and historical contexts;
- write clearly, critically, and analytically about intelligence issues;
- demonstrate intermediate-level language skills or cultural competence skills; and
- make strong arguments that strike a defensible balance between security and privacy in the context of the American constitutional system.

Tracks

The minor in critical intelligence studies offers five tracks for completion. Each of these has the same foundational courses: Introduction to Critical Intelligence Studies, Critical Thinking and Analytical Writing, and an experiential course focusing on an internship or an independent research program. Beyond this, most of the tracks require the acquisition of cultural competency, while the technology track exposes the student to issues of artificial intelligence and data science.

In order to declare a minor in critical intelligence studies, students are required to have a minimum cumulative grade-point average of at least 2.0 and to have completed 01:790:292 with at least a C. To fulfill the minor requirements, students must pass an additional five 3-credit courses with a grade of C or better.

The tracks are as follows:

1. Cyber Track

A. Three courses (9 credits) dealing with the theory and practice of critical intelligence studies, including the following:

01:790:292 Introduction to Critical Intelligence Studies
01:790:483 Seminar: Critical Thinking and Analytic Writing for the Intelligence Community
01:790:484 Research in Critical Intelligence Studies, OR
01:790:485 Intelligence Studies Internship

B. Cybersecurity (6 credits)

One course in foundational computer science
One course in computer security

C. One elective course (language or area studies, 3 credits) to promote awareness of the international context of intelligence work.

2. Policy Track

A. Three courses (9 credits) dealing with the theory and practice of critical intelligence studies, including the following:

01:790:292 Introduction to Critical Intelligence Studies
01:790:483 Seminar: Critical Thinking and Analytic Writing for the Intelligence Community
01:790:484 Research in Critical Intelligence Studies, OR
01:790:485 Intelligence Studies Internship

B: Policy (6 credits)

Two upper-level courses in American public policy pertaining to general policy making or national security including 01:790:325 National Security Policy

C. One elective course (language or area studies, 3 credits) to promote awareness of the international context of intelligence work.

3. Language Track

A. Three courses (9 credits) dealing with the theory and practice of critical intelligence studies, including the following:

01:790:292 Introduction to Critical Intelligence Studies
01:790:483 Seminar: Critical Thinking and Analytic Writing for the Intelligence Community
01:790:484 Research in Critical Intelligence Studies, OR
01:790:485 Intelligence Studies Internship

B: Language (6 credits)

Two language courses in the same language that would count for a major in that language. AP credit can be applied to one of these courses but not both.

C. Policy (3 credits)

01:790:366 National Security Policy

4. Engineering Track

A. Three courses (9 credits) dealing the theory and practice of critical intelligence studies, including the following:

01:790:292 Introduction to Critical Intelligence Studies
01:790:483 Seminar: Critical Thinking and Analytic Writing for the Intelligence Community
01:790:484 Research in Critical Intelligence Studies, OR
01:790:485 Intelligence Studies Internship

B: Security (6 credits)

One course in foundational computer science
01:790:366 National Security Policy

C. One elective course (language or area studies, 3 credits) to promote awareness of the international context of intelligence work.

5. Technology Track

A. Three courses (9 credits) dealing with the theory and practice of critical intelligence studies, including the following:

01:790:292 Introduction to Critical Intelligence Studies
01:790:483 Seminar: Critical Thinking and Analytic Writing for the Intelligence Community
01:790:484 Research in Critical Intelligence Studies, OR
01:790:485 Intelligence Studies Internship

B: Critical technology studies (9 credits)

One course in artificial intelligence
One course in data science
One course in design and analysis of computer algorithms

This program is administered jointly by the Department of Political Science and the Center for Critical Intelligence Studies. Inquiries should be directed to Ava Mailesi, associate director of the Center for Critical Intelligence Studies, who also serves as an adviser for the minor.

Political Science 790 (SAS)

Minor in Government and Business 793

Minor in Government and Business 793

Minor in Government and Business (18 credits total)

The minor "Government and Business" is designed to expose students to the practical problems of organizing and running human society with a particular focus on the interactions between government and business. The minor offers students a condensed exploration of the political world with a focus on the relationship between politics and political activity on the one hand and economic activity and social outcomes on the other. Government policy influences business decisions while business decisions and government policy influence individual human development choices and outcomes.

Students pursuing the Government and Business minor are expected to develop the ability to read and listen critically, to reason analytically concerning questions of public policy (especially economic policy), to engage in thoughtful moral judgment, and to write and speak clearly. The minor offers a coherent overview of the field of political science, including theories of human self-government, policy processes, decision-making, and institutional structures. Students completing the minor will have developed a greater understanding of the policy making process and the impact that government and business decisions together have in shaping "who gets what, when, and how".

Learning Goals:
At the end of this program students will be able to:

- Identify key theoretical factors in evaluating the moral foundations of individual behavior and the legitimacy of regulations about that behavior.
- Explain the process through which decisions about the public regulation of individual and group behavior are made.
- Critique boundaries between private market forces and public regulation.

The minor comprises 18 credits of course work drawn from the wider political science undergraduate curriculum. Students pursuing this minor may not also pursue a minor in political science and may not pursue a major in political science.

The following courses are required:

- 01:790:101 Nature of Politics
- 01:790:338 Government and Business

Students must take four additional three credit courses, drawn from the following list. No more than one may be at the introductory (100- or 200-) level.
01:790:102 Introduction to International Relations
01:790:103 Comparative Politics
01:790:104 American Government
01:790:106 Law & Politics
01:790:304 Congressional Politics
01:790:305 Public Policy Formation
01:790:306 American Presidency
01:790:308 New Jersey Politics
01:790:318 Comparative Public Policy
01:790:320 Politics and Social Policy: Lessons from Europe
01:790:327 International Political Economy
01:790:330 Interest Groups
01:790:332 Money and Modern America
01:790:335 Women and American Politics
01:790:338 Government and Business
01:790:341 Public Administration: American Bureaucracy
01:790:347 Political Representation

01:790:350 Environmental Politics-United States and International
01:790:356: Organizing for Social Change
01:790:357 Comparative Political Economy
01:790:362 International Law
01:790:481 Internship in Political Science
01:790:482 Internship in Political Science
01:790:488 Field Internships in Political Science

Political Science 790 (SAS)

Minor in Philosophy, Politics, and Economics 792

Minor in Philosophy, Politics, and Economics 792

Minor in Philosophy, Politics, and Economics (27 credits total)
(housed in the Department of Philosophy)

The minor in philosophy, politics, and economics (PPE) is designed to engage students with the practical problems of organizing and running human society. The minor stands at the confluence of three major fields of study--philosophy, political science, and economics--and combines elements of these into a coherent framework in which to address questions about the nature of citizenship and the role individuals can and must play in making critical decisions facing society.

Students pursuing the PPE minor are expected to develop the ability to read and listen critically, to reason analytically concerning questions of public policy (especially economic policy), to engage in thoughtful moral judgment, and to write and speak clearly. The minor combines the best of the three participating fields: confronting the ethical issues of philosophy, the policy questions of political science, and the quantitative analytical problems of economics.

Generally, students taking the PPE minor will be majoring in one of the three included disciplines: philosophy, political science, or economics, and the courses that can be used toward the PPE minor taken in the student's major department may be used for both the major and the PPE minor. In other words, while the minor requires nine courses (27 credits), students majoring in philosophy, political science, or economics will only need to take six courses (18 credits) outside the major.

Learning Goals

At the end of this program students will be able to:

- identify key factors in evaluating the morality of individual behavior and the legitimacy of regulations about that behavior;
- explain the process through which the public regulation of individuals and groups occurs;
- evaluate the economic ability of institutions to provide for the common welfare; and
- critique boundaries between private market forces and their just and efficient public regulation.

Minor Requirements

The minor requires students to take three courses (9 credits) in each of three fields of study. The course offerings in each field are structured to give students a solid grounding in each field, as well as a taste of what more advanced work in the field involves.

Students are permitted to bring in only 3 credits for each field from outside of Rutgers University-New Brunswick. In other words, at least two of the three classes for each field must be taken at Rutgers University-New Brunswick; only one course in each field can come from transfer credit, AP credit, study abroad, or other Rutgers campuses. Courses that are cross-listed may be used to satisfy only one requirement.

All courses must be completed with a grade of C or better in order to be used for the minor.

Below are the requirements for each field, which must be completed whether the student majors in the field or pursues them as other parts of the minor.

Requirements for the Philosophy Component of the PPE Minor (three courses, 9 credits)

Total of three philosophy courses, no more than one at the 100 level, and two from the following list, at least one of which must be at a 300 level or higher (other courses on a case-by-case basis):

01:730:105/106 Current Moral and Social Issues
01:730:107 Introduction Ethics
01:730:249 Bioethics
01:730:250 Environmental Ethics
01:730:251 Ethics and Business
01:730:255 Introduction to Social and Political Philosophy
01:730:330 Ethics of Harming and Helping
01:730:341 Ethics through History
01:730:342 Social and Political Philosophy through History
01:730:343 Marx and Marxism
01:730:345 Philosophy and the Law
01:730:347 Philosophical Issues in Feminism
01:730:358 Philosophy of Law
01:730:371 Philosophies of Death and Dying
01:730:441 Ethical Theory
01:730:442 Moral Responsibility
01:730:445 Topics in Social and Political Philosophy
01:730:450 Topics in Moral Philosophy
01:730:459 Advanced Seminar in Ethics
01:730:470 Ethics and Practical Reason

Requirements for the Political Science Component of the PPE Minor (three courses, 9 credits)

One course in political theory, from the following list:

01:790:101 Nature of Politics
01:790:365 Gender and Political Theory
01:790:371 Western Tradition: Plato to Machiavelli
01:790:372 Western Tradition: Hobbes to Mill

01:790:373 Legal Philosophy Rights and Justice
01:790:374 Democratic Political Philosophy
01:790:375 American Political Thought to 1865
01:790:376 American Political Thought from 1865
01:790:472 Religion and Politics
01:790:473 Critics of Modernity
01:790:477 Critical Theory and Society

Two courses in policy or group relations, from the following list:

01:790:305 Public Policy Formation
01:790:318 Comparative Public Policy
01:790:319 Issues of American Foreign Policy
01:790:320 Politics and Social Policy: Lessons from Europe
01:790:322 Strategy in International Relations
01:790:323 Defense Policy
01:790:330 Interest Groups
01:790:333 Race, Ethnicity, and Politics
01:790:334 Politics of Black America
01:790:335 Women and American Politics
01:790:338 Government and Business
01:790:350 Environmental Policy: U.S. and International
01:790:355 Women and Public Policy
01:790:358 Globalization, Democracy, and Contemporary Capitalism
01:790:360 Gender and Politics and Global Perspective
01:790:363 Conflict Resolution in World Politics
01:790:364 Global Order
01:790:386 Political Change in China
01:790:401 American Constitutional Law I
01:790:404 Politics of Criminal Justice

Requirements for the Economics Component of the PPE Minor (three courses, 9 credits)

Both of these two introductory courses:

01:220:102 Introduction to Microeconomics
01:220:103 Introduction to Macroeconomics

One course from the following list:

01:220:120 Inequality
01:220:327 History of Economic Thought
01:220:331 Economics of Crime
01:220:390 Choice and Strategy in Politics (Prerequisite: 01:220:102)
01:220:402 Labor Economics (Prerequisites: 01:220:320 and 01:220:322)
01:220:417 Health Economics (Prerequisites: 01:220:320 and 01:220:322)
01:220:432 Environmental Economics (Prerequisites: 01:220:320 and 01:220:322)

01:220:460 Public Economics (Prerequisites: 01:220:320 and 01:220:322)
01:220:463 Economics of Taxation (Prerequisites: 01:220:320 and 01:220:322)
01:220:482 Game Theory and Economics

Political Science 790 (SAS)

Departmental Honors Program

Departmental Honors Program

The departmental honors program is intended for senior majors in political science. Students who have successfully completed at least 15 credits in political science with a 3.4 grade-point average or better in these courses and a 3.0 overall grade-point average or better are invited to apply. Eligible candidates may pursue honors by either of two courses of study. The first is a 6-credit senior thesis option in which students are expected to conduct original research and prepare an original piece of scholarship as their senior thesis. It involves enrollment in two semesters of Honors in Political Science (01:790:495-496) in the senior year. Both semesters must be completed to receive credit. Individual students are responsible for recruiting an appropriate faculty member to supervise their research and thesis. Interested students should draft a thesis proposal and consult with faculty members whose expertise lies in an appropriate area or with whom the student has taken courses previously. Individual faculty members will indicate their specific requirements for the completion of departmental honors. During the second semester of work, a faculty committee will conduct an oral examination in which the honors candidate will defend his or her findings and will be expected to demonstrate a grasp of the literature in the area encompassed by the research undertaken.

The second way of achieving honors requires completion of an honors thesis in the School of Arts and Sciences. Students who select this option must meet the departmental grade-point average requirements for honors. Successful completion of such an honors thesis under the supervision of a faculty member in the Department of Political Science automatically will result in the award of departmental honors.

Political Science 790 (SAS)

Certificate Programs

Certificate Programs

Certificate Program in Quantitative Political Science Methods

The certificate program in quantitative political science methods is a program designed to lead to an understanding of how social scientists pose research questions, design tests of hypotheses, and analyze quantifiable information. These are valuable skills for the workforce and graduate school, as well as for informed citizens. A basic understanding of how social science research is conducted can help citizens evaluate the information they read about in the newspapers or hear about on television. Students completing the program will have put their methodological skills to use in their own in-class research projects, as part of their required Political Science Seminar (01:790:395).

Requirements

1. This program is only open to declared political science majors, and will be awarded only in conjunction with or subsequent to the awarding of a baccalaureate degree in political science.

2. To participate in the program, students must register by submitting an application, providing name and contact information. Applications are available in the undergraduate political science office, Hickman Hall, Room 509.

3. Students must satisfactorily complete 01:790:300 Introduction to Political Science Methods.

4. Students must satisfactorily complete an approved section of 01:790:395 as their political science seminar.

5. Students must satisfactorily complete any three of the following courses (those courses that satisfy requirements of the political science major may simultaneously be counted for that purpose):

Political Science

01:790:307 Survey Research (3)

01:790:392 Applied Research Methods (3)

01:790:481,482 Internship in Political Science (3,3) (with approved statistical or quantitative focus)

Economics

01:220:322 Econometrics (3)

01:220:326 Econometric Theory (3)

01:220:401 Advanced Cross-Sectional and Panel Econometrics (3)

01:220:481 Economics of Uncertainty (3)

01:220:482 Game Theory and Economics (3)

01:220:483 Economics of Information (3)

01:220:486 Operations Research I (3)

Mathematics

01:640:104 Introduction to Probability (3)

01:640:339 Mathematical Models in the Social Sciences (3)

Psychology

01:830:200 Quantitative Methods in Psychology (4)

01:830:300 Research Methods in Psychology (3)

01:830:323 Research Methods in Social Psychology (4)

Sociology

01:920:311 Social Research Methods (4)

01:920:312 Introduction to Statistics in Sociology (4)

Statistics

Any course in the statistics department

Eagleton Undergraduate Associates Certificate (Eagleton Institute of Politics)

Each year 20 to 25 juniors are selected to participate as undergraduate associates of the Eagleton Institute of Politics to study government and politics. Students selected for this program begin during the second semester of their junior year and continue through their senior year. By means of special seminars, a supervised internship, and a series of visits by governmental officials and political practitioners, undergraduate associates explore applications of political science to the practice and processes of American politics.

To complete the program and receive an undergraduate associates certificate from the institute upon graduation, each student must complete 12 credits of designated undergraduate and/or graduate courses in American politics with an average grade of at least a B. During the second semester of their junior year, students are required to take 01:790:428 The Practice of Politics, which focuses on the idea of politics as choice, with students analyzing different political decisions each week. During the spring semester of their senior year, students are required to take 01:790:429 Processes of Politics, which examines representation, leadership, campaigning, lobbying, management, and ethics. The remaining 6 credits must be satisfied by taking 300-level or above political science course(s) in American politics and/or an internship. Members of the faculty participate as guest lecturers in the entry seminar, while the exit course includes participation by political practitioners. Both courses emphasize individual and group participation by students.

The Eagleton undergraduate associates program also offers students the opportunity to connect classroom learning with the experience of working in government, politics, or public affairs through a required internship experience. In recent years, students have been placed in internships in the New Jersey legislature; the governor's Office of Policy and Planning; various state departments; and the public affairs' offices of corporations, public-interest groups, state associations, and lobbying firms.

Students must submit a completed application by the first week in October of their junior year to the director of the institute, along with an unofficial transcript and two letters of recommendation from faculty members, including at least one from a political science professor. For further information, see https://www.eagleton.rutgers.edu.

Note: The Eagleton undergraduate associates certificate is awarded only with or subsequent to the awarding of a baccalaureate degree in an approved major.

Global Politics Certificate

This program structures multidisciplinary coursework and overseas educational experiences to offer a course of study for students interested in understanding politics, political structures, and political institutions around the globe. The certificate requires overseas experience as well as language and political science training necessary to make such an experience valuable. It offers the opportunity to build upon the ideas and insights acquired abroad in research and other activities at Rutgers.

While the career interests of students undertaking this certificate program are diverse and there is no expectation that they will pursue any particular career track, the skills and experiences that can be acquired in this program will be valuable for students interested in transnational organizations or institutions; American foreign policy; or graduate study in international affairs, public policy, international business, law or an academic discipline.

Requirements:

- This program is open **only** to declared political science majors.
- Students must submit a letter of intent to participate in the certificate program to the Undergraduate Studies Office in the Department of Political Science (Room 509 Hickman on Douglass campus) **before the first semester of their junior year.** This letter should include a description of the student's interests and career aspirations and their plans for meeting the international experience requirement.
- Students must complete with a grade of C or better **all** political science major requirements as supplemented below. This includes a minimum of 13, 3-credit courses in political science, at least nine of which must be at the 300/400 level and one of which must be 01:790:395.
    - Global politics certificate students must complete both 01:790:102 Introduction to International Relations and 01:790:103 Comparative Politics
    - Global politics certificate students must complete a minimum of four 300/400-level courses in foreign and international politics, not including the senior thesis, internship, independent study, or 01:790:395 (Political Science Seminar).
    - Global politics certificate students must complete an international experience, defined as study abroad through Rutgers or another accredited university; a CASE international program through Rutgers; or work with an international or transnational agency. A one-semester experience is the norm; one year is recommended; and one summer is permissible under special circumstances. Arrangements for the international experience must be approved by the department in advance. Academic credit toward major is awarded on a case-by-case basis. Students should begin their search for placement at a foreign university or in an international program by visiting the Rutgers Study Abroad website.
- Global politics certificate students must demonstrate proficiency in a relevant foreign language, defined as qualifying for 300-level courses in that language.
- Global politics certificate students must participate in two extracurricular activities with global, international, or foreign focus that are approved by the advisers for the global politics certificate listed below. Students must provide a summary report for each activity using the forms provided by the department.

To receive the global politics certificate and have it so noted on your transcript, you must submit a Rutgers transcript with study abroad courses listed or a completed international experience plus literature; and four extracurricular activities forms plus literature. Submit all material, including the letter of interest, to Professor Christine Cahill, Undergraduate Advisor, at c.cahill@rutgers.edu

Courses

Courses

01:790:101 ***Nature of Politics (3)***
Crucial issues in politics: individual and community; political obligation and civil disobedience; stability, revolution, and change; legitimacy and justice; freedom and power.

01:790:102 ***Introduction to International Relations (3)***
Explanations of patterns of behavior in international systems. Topics include the state, sovereignty, war, power, nationalism, imperialism, security dilemmas, interdependence, international regimes, and ethical issues.

01:790:103 ***Comparative Politics (3)***
Selected political systems considered in a comparative framework. Cases taken from among both more and less economically developed countries. Focuses on governmental processes and institutions.

01:790:104 ***American Government***
Comprehensive analysis of American political institutions. Issues and problems faced by federal, state, and local governments under the impact of modern conditions. The leading political, economic, and social influences affecting democratic government.

01:790:106 ***Law and Politics (3)***
Inquiry into a role of law and politics in the federal court system. Focus on interaction between Supreme Court, Congress, and President. Assessment of role of courts in the United States.

01:790:204 ***Capitalism, Socialism, and Democracy (3)***
Genesis and development of democracies and dictatorship in advanced industrial societies and in the third world. Role of capitalism; revolutionary, conservative, and liberal movements; contemporary forms of imperialism and dependency.

01:790:220 ***The Civic Community as Theory and Practice (3)***
Critical examination of issues of civil community, citizenship, democracy, and civic responsibility. Includes special activities and discussion of community service performed in conjunction with course. Corequisite: 01:790:400 Independent Study: Civic Engagement and Service Education Partnerships (CESEP) program Community Service Placement (1).

01:790:237 ***Political Economy and Society (3)***
Introduction to issues raise by the changing role of government toward business and the economy; survey of major politics; introduction to competing schools and political economic though.

01:790:250, 251, 252, 253 ***Topics in Political Science (1.5)***
Special topics that vary with instructor.

01:790:254 ***Intro to Research Process: The Literature Review (1.5)***
Intensive examination of social science literature with an eye to understanding the structure of published research and writing a literature review. Topics vary by instructor.

01:790:264 ***Religion and Reproduction: Jewish and Christian Experiences (3)***
Exploration of the intersection of religion and reproduction the United States and Israel in shaping reproductive practices, norms, and policies. Ethnographic case studies of reproduction among Jews and Christians with some attention to historical analyses and philosophical commentaries. Gender and religion will form the two primary modes of analysis for the study of reproduction. Credit not given for this course and 01:563:264, 01:840:263, or 01:988:220.

01:790:280 ***Politics of Disability (3)***
Examines the politics behind the creation and implementation of public policy related to disability and the allocation of resources to support such policies. Teaches some basics of political activism.

01:790:292 ***Introduction to Critical Intelligence Studies (3)***
Provides an intellectual foundation for the study of intelligence, both as it has been practiced through history and as it is currently practiced by different nationals and other entities today. Offers critical assessment of primary American efforts.

01:790:300 ***Introduction to Political Science Methods (3)***
Logic and techniques of social science research. Topics may include survey research, experiments, content analysis, data processing, and elementary statistics. No special math skills required.

01:790:301 ***Political Campaigning (3)***
Development of campaign strategy, planning campaign activities, campaign organization, financing, public relations and media use, voter contact, polling, campaign ethics, the impact of campaigns on the American system.

01:790:302 ***American Party Politics (3)***
Nature and functioning of the two-party system, its causes and effects, Particular attention devoted to the electoral role of parties, including political leadership and organization, nominations, campaigns, finance, and party programs.

01:790:303 ***Elections and Participation (3)***
Mass political participation in the United States as reflected in voting, electoral politics, and other forms of political participation.

01:790:304 ***Congressional Politics (3)***
Functions of legislatures; their structure, organization, and procedure; the problems and principles of lawmaking; and the process by which law is created.

01:790:305 ***Public Policy Formation (3)***
Origin and impact of public policy decisions on society. How specific decisions are made. How these decisions affect the structure of society. Individual cases analyzed.

01:790:306 ***American Presidency (3)***
Historical and legal evolution of the office of the presidency. Role of the president as party leader, chief legislator, executive, and public spokesman.

01:790:307 ***Survey Research (3)***
Theory and practice of mass opinion surveys and their use in political science. Sampling theory, questionnaire format, question framing, interviewing, coding, and interpretation of results.

01:790:308 ***New Jersey Politics (3)***
Examination of various aspects of politics in New Jersey, including elections, governmental institutions, and public policies and the policy making process.

01:790:309 ***The Politics of Puerto Rican Development (3)***
Analysis of relationship between political and economic development in the 20th century, changing nature of U.S./Puerto Rican relations, formation of the colonial state, and the statehood and independence movements.Credit not given for both this course and 01:595:309.

01:790:310 ***UK Politics (3)***
Institutions and political practices in the United Kingdom. Emphasis on the functioning of democracy in the changing social, economic, and psychological conditions of the contemporary world.

01:790:311 ***European Politics (3)***
Analysis of national governments in western Europe and of the European Union (EU). Focus on contemporary issues including economic liberalization, welfare state reform, European law, foreign policy, and enlargement to eastern Europe.

01:790:312 ***Change in Latin America (3)***
Emerging political and social issues in Latin America: development, democratization, sovereignty, religion, gender, race, migration.

01:790:313 ***Political Economy of East Asia (3)***
Exploration of the principal states of eastern Asia and the western Pacific through the lens of political economy. Focus on internal politics, trade, and economic development.

01:790:314 ***Sub-Sahara African Policies (3)***
Patterns of political change and political development in Africa south of the Sahara. Credit not given for both this course and 01:016:314.

01:790:315 ***Politics and Culture (3)***
Relationship among various aspects of culture, e.g., the role of symbol, myth, ritual, and religion and its relationship to politics.

01:790:316 ***Politics, Literature, and the Arts (3)***
Discussion and analysis of political elements in selected aesthetic works that vary with the instructor

01:790:317 ***Globalization and the Non-Western World (3)***
Theoretical understanding of the political, economic, social, and cultural dimensions of globalization. Study of these theories within the context of selected non-Western countries using social science texts, literature, and films. Credit not given for both this course and 01:685:317.

01:790:318 ***Comparative Public Policy (3)***
Inquiry into a current major area of public policy drawn from the field of comparative politics or international relations. Policy area varies from year to year.

01:790:319 ***Issues of American Foreign Policy (3)***
Analysis of the major substantive questions facing U.S. foreign policy.

01:790:320 ***Politics and Social Policy: Lessons from Europe (3)***
European approaches to 21st-century policy challenges in common with the United States, such as health care, climate change, education, a fractured social safety net, an aging population, high unemployment, and growing deficits. Credit not given for both this course and 01:790:290 or 01:360:290 or 01:360:320.

01:790:321 ***Theories of World Politics (3)***
Alternative theories of world politics with emphasis on basic causal factors affecting global behavior.

01:790:322 ***Strategy in International Relations (3)***
Examination of the dynamics of contemporary international politics, including strategic and bargaining theory.

01:790:323 ***Defense Policy (3)***
Formulation of defense policy and doctrine, weapons development, the role of threats. Critical review of current U.S. military decisions.

01:790:324 ***Causes of War (3)***
Recent scientific research on the emergence of serious disputes, escalation, conflict spirals, arms races, the outbreak of war, consequences of war, and conditions of peace.

01:790:327 ***International Political Economy (3)***
Interdependence of political and economic structures and processes in the development and management of the modern world economy.

01:790:328 ***Caribbean Politics and Development (3)***
Politics and development of Caribbean nation-states with special emphasis on internal and regional politics and their relationship with social questions. Party politics, ideologies, economic development, leadership, and political/social movements. Credit not given for both this course and 01:595:328. Not open to first-year students.

01:790:329 ***Latino Politics in the United States (3)***
Political organization of Latino communities in the Northeast since World War II. Role of Latinos in shaping U.S. domestic and foreign policy; the impact of immigration and language policies on political organization.Credit not given for both this course and 01:595:329.

01:790:330 ***Interest Groups (3)***
Role interest groups play in the representation of constituent interests, formulation of public policy, and implementation of governmental programs.

01:790:331 ***Urban Politics (3)***
City politics and public policy. Urban government and major urban problems such as finance, poverty, housing and economic development, education, crime, transportation, and the environment.

01:790:332 ***Money and Modern America (3)***
Cultures of materialism and ostentatious displays of consumption; the ethics of money, from the meaning of an "honest day's work" to the gray areas of bribery, insider dealing, and profiting from the misery of others; recent financial crises and their impact on American life. Credit not given for both this course and 01:050:318.

01:790:333 ***Race, Ethnicity, and Politics (3)***
Development of race relations in the United States beginning with slavery. Relationship between the politics of race and the politics of class.

01:790:334 ***Politics of Black America (3)***
Political perspectives and strategies of black Americans and the responsiveness of the American political system to the interests and demands of the black community.Credit not given for both this course and 01:014:381.

01:790:335 ***Women and American Politics (3)***
Women's participation in American politics, with emphasis on the attitudes and behavior of women as voters, activists, and officeholders. Credit not given for both this course and 01:988:336.

01:790:336 ***American Political Movements (3)***
Origins and development of political and social movements in America; theories of their decay, reform, or absorption into the mainstream of American political life.

01:790:337 ***US Immigration Politics and Policy (3)***
Overview of the major immigration policies in the United States and exploration of relationship between immigration and national identity. Historical and contemporary policies examined, along with their cultural, economic, and political implications.

01:790:338 ***Government and Business (3)***
Relations between business and government. Assessment of impact of governmental action on business. Analysis of lobbying, business participation in electoral process, public service and public image activities, and legal relations with government.

01:790:340 ***Law and Society (3)***
Examination of different ways of understanding law and its social, cultural, and political significance. Topics may include the nature of law, crime and punishment, the "adversary ethic," law and morality, law's role in structuring social relationships, civil disputes, and feminism and the law.

01:790:341 ***Public Administration: American Bureaucracy (3)***
Institutional setting and political relationships in administration; leadership, decision-making, personnel and budgeting functions; administrative law and regulation; the problem of responsibility.

01:790:342 ***Politics of Authoritarian Regimes (3)***
Exploration of non-democratic government types, their foundations, politics, and policy processes.

01:790:343 ***Counterterrorism and Democracy (3)***
Explores the problem of developing a long-term strategy to address terrorism through the competing lenses of security and democracy.

01:790:344 ***Public Opinion (3)***
Theory and research on public opinion in the United States, including uses and abuses of polls, recent trends in political and social opinions, and relationship between public opinion and public policy.

01:790:345 ***Mass Media and U.S. Democracy (3)***
Theoretical and actual role of mass media in the United States, including the structure of mass media industry, news production, effects on political and social views, and how the media are regulated.

01:790:346 ***Political Socialization (3)***
Theory and process of the development of political attitudes. The influence of the family, school, media, occupation, personality, and social background.

01:790:347 ***Political Representation (3)***
Explores dynamics of political representation from multiple angles. Discusses classic concepts and theories, new directions in research, and empirical studies. Draws on work from diverse identity groups, world regions, and time periods.

01:790:348 ***Psychology and Politics (3)***
Political behavior of individuals and groups. Themes selected from personality and politics, attitude change, leadership, cognitive development, identity, ideology, psychology of oppression, and role theory.

01:790:349 ***Topics in American Politics (3)***
Special topics in American politics that vary with the instructor.Credit not given for both this course and 01:014:349.

01:790:350 ***Environmental Politics-United States and International (3)***
Environmental politics and policy from American, comparative, and international perspectives. National styles of regulation, trade-environment conflicts, role of international institutions.

01:790:351 ***Contemporary Politics in the Middle East (3)***
Contemporary politics of the Middle East through scholarly literature and through documentary-type films dealing with socioeconomic and cultural influences on politics. Credit not given for both this course and 01:563:351 or 01:685:351.

01:790:352 ***Israeli Politics (3)***
Basic understanding of the historical background of the establishment of the state of Israel; major characteristics of the political culture and institutions and how they have responded to the dynamic sociocultural and political changes that have shaped the society. Credit not given for both this course and 01:563:352 or01:685:352.

01:790:353 ***Ending Civil War and Building Peace (3)***
Exploration of contemporary civil wars and international efforts to end civil wars using international relations theory and case studies. Peacebuilding through conflict resolution, institutional design, transitional justice, development aid and other methods.

01:790:354 ***East Asia in World Affairs (3)***
Examination of the major states of East Asia in world affairs with specific reference to big-power diplomacy, the United Nations, regionalism, neutralism, and war.

01:790:355 ***Women and Public Policy (3)***
Examination of major public policy questions affecting women. Topics, drawn from the United States and other societies, may include reproduction issues, economic equality, violence against women, and political rights.Credit not given for both this course and 01:988:355.

01:790:356 ***Organizing for Social Change (3)***
Theory and practice of community organizing for social change for labor and community groups; membership building; leadership development; strategy development; community power analysis; campaign planning. Credit not given for both this course and 37:575:359

01:790:357 ***Comparative Political Economy (3)***
Analysis of different approaches to political economy and the interaction of political, social, and economic forces in historical perspective.

01:790:358 ***Globalization, Democracy, and Contemporary Capitalism (3)***
Comparison of contemporary market economies in developed and developing countries, how they are affected by integration into global markets, and the implications for democracy.

01:790:359 ***Women and Politics in the Middle East (3)***
Gender in the Middle East. How social, political, and cultural construction of sexual difference influence the nature and practice of political life in the Middle East. Credit not given for both this course and 01:685:359.

01:790:360 ***Gender and Politics in Global Perspective (3)***
Central topics in the study of gender and politics, covering such issues as women's participation in political parties and social movements, women as voters and candidates in political elections, feminism and the state, and gender and international politics. Draws on examples from various world regions and time periods to analyze similarities and differences across cases around the globe.

01:790:361 ***International Organizations (3)***
Review of League of Nations, United Nations, World Court, and specialized agencies.

01:790:362 ***International Law (3)***
Fundamental rules of international law in its relation to the state and the individual. Discussion of cases, status, treaties.

01:790:363 ***Conflict Resolution in World Politics (3)***
Nature and management of conflict in world politics, with emphasis on the instruments and limits of national power; sources of international conflict; changing patterns of alliance and alignment; and approaches to peace, reconciliation, and stability.

01:790:364 ***Global Order (3)***
Considers alternative perspectives on the nature of order in post-Cold War world politics and examines the major developments in international relations since 1989.

01:790:365 ***Gender and Political Theory (3)***
Role and place of gender in political thought. Readings drawn from major historical theorists and modern feminists. Credit not given for both this course and01:988:365.

01:790:366 ***Politics of National Security (3)***
The role of intelligence in National Security Policy since World War II with focus on constitutional and legal issues

01:790:367 ***Islam and Democracy in the Middle East (3)***
The evolving relationship of Islamist political parties and movements to democracy in the Middle East. Cases drawn from regions of the Middle East such as Turkey, Arab countries, and Iran among others. Credit not given for both this course and 01:685:357.

01:790:369 ***Topics in World Politics (3)***
Intensive examination of a number of significant questions related to world politics. Questions vary with instructor. Prerequisite: Permission of instructor.

01:790:370 ***Topics in Political Theory (3)***
Examination of major issues in political theory. Topics vary by instructor.

01:790:371 ***Western Tradition: Plato to Machiavelli (3)***
Relationship of man to society and the political order and the ethical foundations of politics as seen by the major Western political philosophers: Plato to Machiavelli.

01:790:372 ***Western Tradition: Hobbes to Mill (3)***
Relationship of man to society and the political order and the ethical foundations of politics as seen by the major Western political philosophers: Hobbes and Rousseau to Mill and Marx.

01:790:373 ***Legal Philosophy, Rights, and Justice (3)***
Place of law in the democratic state. The nature of law, its role in regulating behavior, legal reasoning, rival legal theories; the conflict between positivism and the theory of law; punishment and responsibility; various standards of justice.

01:790:374 ***Democratic Political Philosophy (3)***
Analysis of the relationship between ethics and politics in contemporary democracy and current challenges to traditional democratic theory. Political obligation, the justification of authority, disobedience and the right of resistance, freedom, social justice, and equality.

01:790:375 ***American Political Thought to 1865 (3)***
Philosophical and theoretical foundations of the American republic with attention to themes and conflicts in American thought and culture. European background and political thought of the colonial period to the Civil War.

01:790:376 ***American Political Thought from 1865 (3)***
American political thought and philosophy in the era of industrialism, world power, and mass society. The political thought of political movements since the Civil War.

01:790:377 ***Marx and Marxist Theory (3)***
Development of Marxist thought from Hegel to the 20th century. Alienation, class consciousness and class struggle, universal human emancipation, the labor theory of value, historical materialism, and the dialectic.

01:790:378 ***Human Rights Law (3)***
Principles, norms, and legal frameworks that govern the protection and promotion of human rights on a global scale.

01:790:379 ***Writing with Revision in Political Science (3)***
Promotes development of competence in reading, critical thinking, and writing, with emphasis on the intellectual and practical skills required for the research paper.

Prerequisite: 01:355:101 or 103 or 104 or equivalent. Open to majors only.

01:790:380 *Russian and Central European Political Thought (3)*
Russian and central European Marxism; its origins in the 19th-century political thought of the region; Marx, Engels, Lenin, Stalin, and their intellectual opponents. Intellectual roots of the 1989-1991 revolutions.

01:790:381 *Politics of Russia and Eastern Europe (3)*
Examination of the politics of Russia, Eastern Europe, and the post-Soviet states. Focus on the interaction between legacies of communism and new institutional designs in Russia and eastern Europe. Major patterns of post communist politics identified, compared, and analyzed. Democratic transition theories explored.

01:790:382 *Foreign Policy of Russia and the East European States (3)*
Foreign policies of Russia, other Soviet "successor" states, and East European countries since 1989. Includes discussion of main features of foreign policy of former Soviet Union, relations between the Soviet Union and its satellite states, and international ramifications of the collapse of the Soviet bloc.

01:790:383 *Politics of Postcommunist Economic Reforms (3)*
Specific patterns of interaction between postcommunist politics and economic reforms examined. Brief introduction to political economy of communism and its collapse. Politics of economic reforms. Discussion of neoliberalism, mechanisms of accountability, corruption, and clientelism.

01:790:384 *Jewish Politics, Jewish Power (3)*
Political relationship of the Jewish community to the Gentile authorities among whom they lived, from Rome in 70 CE to the contemporary period. Continuities and discontinuities of traditional conceptions of Jewish political behavior and rebellion and accommodation to structures of power in varying historical contexts. Credit not given for both this course and 01:563:389 or01:510:389.

01:790:385 *Arab Politics and Society (3)*
Study of Arab nationalism, civil-military relations, radical Islam, women in politics, and ethnic relations through social science readings and literature in translation.Credit not given for both this course and 01:685:385.

01:790:386 *Political Change in China (3)*
Changes taking place in China in the 20th century, with particular emphasis on the People's Republic of China. The utility of various types of comparative analysis.

01:790:388 *Ideologies of the Right (3)*
Centers upon the sociopolitical experience of conservative and often reactionary movements in selected countries. Leading theorists discussed.

01:790:389 *Topics in Comparative Politics (3)*
Selected topics in comparative politics that vary with the instructor.

01:790:390 *Choice and Strategy in Politics (3)*
Rational-choice approaches to understanding political behavior and institutions. Spatial models of direct and representative democracy; strategic behavior of political actors; ideal voting systems; selected applications in U.S. and other political systems. Credit not given for both this course and 01:220:390.
Prerequisite: 01:220:102

01:790:391 *Data Science for Political Science (3)*
Explores different ways to use data to understand social science phenomena. Teaches statistical analysis software, research question development, and hypothesis testing.

Prerequisite: 01:640:026 or placement above Intermediate Algebra.

01:790:392 *Qualitative Research Methods (3)*
Principles of research design and to the collection and analysis of qualitative data in the social science

01:790:393 *New Jersey State Legislature Internship (3)*
Internship with a New Jersey state legislator or in an office of the New Jersey state legislature, arranged through and supervised by the Rutgers Civic Engagementand Service Education Partnerships (CESEP) program. In addition to work in the internship placement, includes regular meetings in seminar or classroom setting and an appropriately designed academic project resulting in a paper.

Prerequisite: Permission of the department. Open to majors and nonmajors.

01:790:394 *Rutgers-Japan Exchange (3)*
Exchange program with Ritsumeikan University in Kyoto Japan focusing on a topic of interest to American and Japanese relations. Sample topics include world politics, collective memory, leadership, social movements, and culture. Spring semester includes visit from Japanese students.

01:790:395,396 *Political Science Seminar (3,3)*
Seminars involving analysis, discussion, and research of topics in political science. Open to political science majors only.

01:790:397 *Washington Internship (9)*
Internship in a government or public service agency in Washington, D.C.

Prerequisites: 12 credits in political science, including 3 credits of advanced American government, or equivalent with permission of department; and junior or senior standing Corequisite: 01:790:494. Graded Pass/No Credit. Field experience: 35 hours per week plus speaker series and group sessions. Residence in Washington, D.C., required.

01:790:398 *Washington Summer Internship and Research (9)*
Internship in a government or public policy-related agency/office in Washington, D.C; internship-related classroom activities; and research paper submitted to the department.

Prerequisites: 12 credits completed in political science, including 3 credits of introductory American government and 3 credits of advanced American government at the 300 level or above; 60 or more total credits completed toward graduation; and permission of the department. Residence in Washington, D.C., required.

01:790:399 *Independent Study (1)*
Prerequisite: Permission of department before registration. Must be taken in conjunction with a 3-credit political science course specified in course list.

01:790:400 *Independent Study (1.5)*
Prerequisite: Permission of department before registration. Must be taken in conjunction with a 3-credit political science course specified in course list.

01:790:401 ***American Constitutional Law I (3)***
Exploration of forms of legal reasoning and argumentation through close analysis of U.S. Supreme Court cases. Focus on economic policy, property rights, and substantive due process cases.

01:790:404 ***Politics of Criminal Justice (3)***
Systematic examination of the relationship between political variables, crime rates, police behavior, court dynamics and sentences, and prison practices and functions.
Prerequisite: 01:790:201 or 247 or permission of instructor.

01:790:406 ***Civil Liberties and Civil Rights (3)***
Political and civil rights and duties, such as freedom of the person; elementary freedoms of speech, press, assembly, and religion; freedom against arbitrary action; discrimination; free interchange of ideas.
Prerequisite: 01:790:201 or 247 or permission of instructor.

01:790:409 ***Courts and Public Policy (3)***
Examines the legitimacy, capacity , and effectiveness of policy making by the judicial branch.

01:790:410 ***Advanced Studies in Law I (3)***
Intensive seminar on selected public law issues.
Prerequisite: Permission of instructor.

01:790:411 ***Advanced Studies in Law II (3)***
Intensive seminar on selected public law issues.
Prerequisite: Permission of instructor.

01:790:412 ***Advanced Studies in Law III (3)***
Intensive seminar on selected public law issues

Prerequisite: Permission of instructor.

01:790:418 ***Democracy and Markets in Latin America (3)***
Transitions from authoritarian to democratic regimes in Latin America; economic policy challenges faced by new democratic governments; and prospects for the consolidation of democratic regimes.

01:790:419 ***Research Seminar on Causes of War (3)***
Survey of the leading theories of the causes of war; student research projects on the causes of individual wars; comparison of the causes of different wars.

Prerequisites: At least one course in international relations or foreign policy and permission of instructor.

01:790:423 ***Contemporary Feminist Theory (3)***
Survey of both classic and contemporary texts in feminist theory emphasizing the irrelevance for modern political thought and social praxis. Credit not given for both this course and 01:988:423.

01:790:424 ***Gender and Political Economy (3)***
Feminist theories of political economy. Effects of economic change on women, political responses of women's movements in the United States and internationally; differences of race, class, sexuality, and nation in shaping such effects and responses. Credit not given for both this course and 01:988:424.

01:790:426 ***Gender, Public Policy, and Law (3)***
Advanced topics in gender, public policy, and law, focusing on a selected cluster of current issues. Topics may include regulation of sexuality and reproduction, labor organizing and labor politics, politics of welfare and poverty, and issues in health policy and politics.Credit not given for both this course and 01:988:428.

01:790:428 ***The Practice of Politics (3)***
Emphasizes the interaction of political science theory and literature with the realities of political experience. Required of, and limited to, participants in the Eagleton Undergraduate Associates Certificate Program.

01:790:429 ***Processes of Politics (3)***
Exploration of significant aspects of the American political system, including representation, leadership, bargaining, advocacy, participation, and achievement. Open only to participants of the Eagleton Undergraduate Associates Certificate Program. Permission of instructor required.

01:790:430 ***Advanced Studies in Public Policy (3)***
Special topics in public policy that vary with the instructor.

01:790:437 ***Politics of American Capitalism (3)***
Impact of continuing industrial and technological development on politics in Western society. Impact of multinational corporations on national sovereignty, stagflation, alienation, feminism, race relations, trade unionism, and youth culture.

01:790:439 ***Advanced Studies in Political Economy (3)***
Selected topics in political economy that vary with the instructor.

01:790:440 ***Advanced Studies in American Politics (3)***
Selected topics in American politics that vary with the instructor.

01:790:441 ***Data Science for Political Science Capstone (1)***
Capstone course required of all students pursuing the Data Science minor. Semi-independent, supervised research
Pre- or corequisite: 01:790:391.

01:790:450 ***Advanced Studies in Comparative Politics (3)***
Selected topics in comparative politics that vary with the instructor.

01:790:451 ***Critical Perspectives on the Middle East (3)***
Promotes critical thinking about the Middle East by analyzing how stereotypes and Western political theories hinder intercultural understanding, and encourages students to think more dynamically about the relationship between the United States and the third world.

Prerequisite: 01:790:102 or 103 or 351 or permission of instructor. Credit not given for both this course and 01:563:451 or 01:685:451.

01:790:452 ***Advanced Topics in Middle Eastern Politics (3)***
Detailed analysis of selected topics including religious radicalism, Israeli-Palestinian conflict, gender politics, the authoritarian state, nationalism, politics of authenticity, and political economy of development.
Prerequisite: 01:790:102 or 103 or 351 or permission of instructor. Credit not given for both this course and 01:685:452.

01:790:453 ***Comparative Political Anthropology (3)***
Development of political anthropology and its relationship to political science. Major approaches and trends in the field; kinship, patron/client relations, social networks, political symbols, myths, rituals, ideology, and their roles in political change.

01:790:454 ***Political Development of Asia (3)***
Roots of modern nationalism in various Asian nations; emphasis on leaders and ideas.

01:790:455 ***Culture and Revolution in the Middle East (3)***
Middle Eastern culture and its relationships with revolutionary movements and radical Islam. Major perspectives on current discourses regarding revolution and Middle Eastern culture. Credit not given for both this course and 01:685:455.

01:790:457 ***Islamic Law and Jurisprudence (3)***
Introduction to Islamic legal theory in its historical and modern political contexts. Contrasts Islamic law and legal theory with Western legal theory and constitutional thought. Credit not given for both this course and 01:685:457.

01:790:470 ***Advanced Studies in Political Philosophy (3)***
Selected topics in political philosophy that vary with the instructor.

01:790:471 ***Machiavelli and the Renaissance (3)***
The Prince and other political works of Machiavelli in the context of the Renaissance.

01:790:472 ***Religion and Politics (3)***
Relationship between religion and political life. Emphasis on the work of religious and political theorists. The place of religion in American political life and discussion of religion in contemporary politics.

01:790:473 ***Critics of Modernity (3)***
Writings of Alexis de Tocqueville, Karl Marx, Friedrich Nietzsche, Sigmund Freud, and Max Weber and their impact on 20th-century social and political thought.

01:790:477 ***Critical Theory and Society (3)***
Course emphasizes the development of dialectical thought in the 20th century. Emphasis placed on "Frankfurt School" and its major representatives such as Max Horkhiemer, Theodore Adorno, Walter Benjamin, and Herbert Marcuse.

01:790:481,482 ***Internship in Political Science (3,3)***
Work in a designated agency; an appropriately designed academic project resulting in a paper.

Prerequisite: Permission of department before registration.

01:790:483 ***Critical Thinking and Analytic Writing for the Intelligence Community (3)***
Offers principles of and skills necessary for writing and briefing for the intelligence community in a seminar format.
Prerequisites: 01:790:292 and declared minor in critical intelligence studies.

01:790:484 ***Research in Critical Intelligence Studies (3)***
One-semester research project dealing with some aspect of intelligence studies under supervision of a faculty member participating in intelligence studies program. Open to juniors and seniors with a minimum cumulative GPA of 2.7 minoring in intelligence studies. May not be used toward the 790 Political Science major.

01:090:485 ***Intelligence Studies Internship (3)***
Professional, supervised work for a government agency or corporate entity with an emphasis on public safety, acquisition, analysis, and deployment of intelligence, and/or security, and completion of a course paper or project
Prerequisites: 01:790:292 and a minimum of 6 other credits fulfilling intelligence studies minor requirements. Open only to juniors and seniors with a minimum cumulative GPA of 2.7 in the minor.

01:790:488 ***Field Internships in Political Science (3 or 6)***
Internship in a government or public affairs office working 10 to 25 hours per week according to the number of credits elected. Graded on a pass/fail basis.
Pre-or corequisites: Junior or senior status and permission of department.

01:790:491,492 ***Advanced Independent Study and Research (3,3)***
Supervised individual study of selected topics of interest with extensive reading and/or independent research project.
Prerequisite: Permission of department before registration.

01:790:494 ***Washington Research (6)***
Internship-related seminar and research paper submitted to the department.

Corequisite: 01:790:397. Graded credits.

01:790:495-496 ***Honors in Political Science (3,3)***
Independent readings on a specialized topic of interest; completion of research paper and an oral defense. Open only to senior majors with 15 credits in political science and a 3.4 grade-point average or better in political science and a 3.0 or better cumulative grade-point average. Both 01:790:495 and 496 must be completed to receive credit.

01:790:497-498 ***Thesis in Political Science (6,6)***
Prerequisite: Permission of department. Both semesters must be completed in order to receive credit. For students writing an honors thesis.

Portuguese 810 (SAS)

PORTUGUESE 810

Department of Spanish and Portuguese, School of Arts and Sciences

Website: http://span-port.rutgers.edu

Chair: Nuria Sagarra

Undergraduate Director: Joseph V. Casillas

Assistant Professor:

Daniel da Silva, B.A., Rutgers; M.A., Ph.D., Columbia

Learning Goals

Learning Goals

Learning Goals for Portuguese Majors and Minors

Majors in Portuguese should be able to demonstrate proficiency in interpretive, interpersonal, and presentational modes of communication and a basic knowledge of cultural studies. Majors should be able to carry out conversations in which they can describe, compare, and contrast, in all tenses (present, past, and future), with an appropriate breadth of vocabulary and register, and to be understood by a nonsympathetic listener; and to read and write documents written in academic, formal, and/or literary registers of the language.

Majors should be able to conduct research projects according to the methodologies of the humanities, social, or cognitive sciences and demonstrate intercultural awareness and understanding of the Luso-Brazilian world. Honors students will be able to complete independent research, write a thesis, and defend it before a faculty committee.

Portuguese majors will be able to demonstrate knowledge of current issues and perspectives in literary and cultural studies in Portuguese and the fundamental body of works in Luso-Brazilian literature and culture; critically analyze verbal and visual texts; and demonstrate familiarity with a range of cultural works from different time periods and geographical regions within the Portuguese-speaking world and with the historical phenomena and sociocultural issues that these works negotiate.

Minors in Portuguese will be able to demonstrate a level of language proficiency that allows basic conversations on a variety of uncomplicated topics, with basic command of the language and some spontaneous creative ability; and basic familiarity with the main cultural, literary, and linguistic issues of the Luso-Brazilian world.

Portuguese 810 (SAS)

Major Requirements

Major Requirements

The requirements for the Portuguese major are:

1.The satisfaction of all the core course requirements, either by placement into a higher course initially or by completing the course.

2.The satisfactory completion of an oral exam in Portuguese in the final year.

3.A total of 36 credits in Portuguese courses, or approved courses from other departments.

- 100 level
    - 810:130 Intermediate Portuguese
    - 810:135 Portuguese for Speakers of Spanish

  200 level
    - 810:201 Portuguese for Native Speakers

- 810:203 Portuguese Conversation & Composition

300 level

- 810:309 Africa and Portugal: An introduction
- 810:310 Brazil: An Introduction
- 810:325 Advanced Grammar and Style
- 810:326 Advanced Composition

4.The completion of at least one 400-level course
5.Electives: Any 810 course at the 200-level or higher

Portuguese 810 (SAS)

Minor Requirements

Minor Requirements

A minor in Portuguese consists of 18 credits (six courses) taught in Portuguese with a grade of C or better in each course. Of the 18 credits, nine (9) credits must be in literature.The student's entire course of study must be approved by a departmental advisor.

Portuguese 810 (SAS)

Departmental Honors Program

Departmental Honors Program

To be eligible for graduation with departmental honors, majors must maintain a cumulative grade-point average of 3.5 or better in their major courses, and 3.25 or better overall. Students are admitted to the departmental honors program by selection of the honors committee. The honors project is two semesters in duration (3 credits each semester), and may focus on any aspect of Luso/Brazilian/Portuguese language, linguistics, literature, or culture. Prior to beginning the honors project, the student is expected to complete at least two courses at the 300 level. The student must present the honors project for an oral defense before a committee assembled by the project director, in consultation with the candidate. More detailed information is available at the departmental honors website.

Portuguese 810 (SAS)

Study Abroad

Study Abroad

We now offer a 3 credit Summer Study Abroad Program for an entire month in Lisbon, Portugal. Classes are taught in English and you will be part of a cohort of students from other universities in the U.S. All new declared Portuguese minors are eligible to apply for funding through the Cátedra Três Marias Grant beginning at $1000 towards Portuguese language learning.

Courses in English

Courses in English

01:810:160 ***Portuguese in the World (1.5)***
Current issues in the language, literature, and culture of the Portuguese-speaking world. Analysis of topics such as cultural identity, language contact, major literary authors, or historical implications of colonization.Course taught in English. Not for major or minor credit.

01:810:240 ***The Luso-Hispanic Dialogue: Multiple Perspectives (3)***
Relationship between the Portuguese-speaking and Spanish-speaking worlds as it manifests itself culturally, linguistically, and historically.
Credit not given for both this course and 01:940:240. Course taught in English.

01:810:241,242 ***The Portuguese-Speaking World: A Literary Introduction for English Speakers (3,3)***
Introduction to literary texts from the Portuguese-speaking world (Portugal, Brazil, and Lusophone Africa).
Course taught in English. Credit not given for both this course and 01:195:242.

01:810:248 ***The Jewish Diaspora in Spanish-Speaking America and Brazil (3)***
Study of Jewish experience in Latin America, both Spanish and Portuguese speaking.
Course taught in English.

01:810:250 ***Cultures of the Portuguese-Speaking Communities in the United States (3)***
Discussion of sociocultural issues concerning the diverse Portuguese-speaking communities of the United States.
Course taught in English. Course will count for the Portuguese major or minor if all written work is done in Portuguese. Credit not given for both this course and 01:050:250.

01:810:330 ***Literature and Culture of Brazil (3)***
Reading and discussion of selected works of fiction and nonfiction with emphasis on their place in the development of Brazilian literature and their relationship to Brazilian culture.
Course taught in English. Credit not given for both this course and 01:195:330.

01:810:335 ***Portugal: The 20th Century and Beyond (3)***
Major writers and movements from symbolism through Fernando Pessoa to the present.
Course taught in English.

01:810:350 ***Literatures and Cultures of Lusophone Africa (3)***
Study of the literatures from African countries whose official language is Portuguese. Emphasis on 20th-century colonial and post-independence literature and theory.
Texts available in English, and course taught in English. Credit not given for both this course and 01:016:350.

01:810:361 ***Brazil and the United States: Comparative Approaches (3)***
Comparative and interdisciplinary study of Brazilian literature and culture as it relates to contemporary issues of race relations, diversity, cultural dependency, and globalization.
Course taught in English. Credit not given for both this course and 01:195:361.

01:810:410 ***Contemporary Brazil (3)***
Interdisciplinary study of contemporary Brazilian society.
Course taught in English.

01:810:491,492 ***Topics in Luso-Brazilian Literature and Culture (3,3)***
Topics vary by semester. Consult department.
Course taught in English.

Portuguese 810 (SAS)

Courses in Portuguese

Courses in Portuguese

01:810:101-102 ***Elementary Portuguese (4,4)***
Speaking, reading, and writing; oral, aural, and written exercises.
Open only to those with no prior knowledge of Portuguese. Not open to speakers of Spanish.

01:810:130 ***Intermediate Portuguese (4)***
Study and practice of specific areas of grammar, linguistic structure, and style. Selected reading of modern authors with composition and class discussion.
Prerequisites: 01:810:101-102, placement exam, or permission of department. Not open to speakers of Spanish or native speakers of Portuguese.

01:810:135 ***Portuguese for Speakers of Spanish (4)***
Study of Portuguese as it contrasts to Spanish. Development of speaking and listening skills. Practice in specific areas of grammar, linguistic structure, and style.
Prerequisite: Permission of department. Open only to speakers of Spanish with no prior knowledge of Portuguese. Not open to native speakers of Portuguese.

01:810:136 ***Portuguese for Speakers of Spanish II (4)***
Continuation of study of Portuguese as it contrasts with Spanish. Development of speaking and listening skills. Practice in specific areas of grammar, linguistic structure, and style.
Only open to speakers of Spanish.

01:810:141-142 ***Accelerated Portuguese (4,4)***
Intensive study of Portuguese. Practice of specific areas of grammar, linguistic structure, style, and literary analysis. Selected readings of modern authors with composition and class discussions.
Open only to those with no prior knowledge of Portuguese. Credit not given for these courses and 01:810:101-102 or 130.

01:810:201 ***Portuguese for Native Speakers (4)***
Study of specific areas of grammar and orthography. Development of reading skills and vocabulary building. Practice in oral communication, grammar application, and composition.
Prerequisite: Placement exam or permission of department.

01:810:203 ***Portuguese Conversation and Composition (4)***
Development of oral fluency and writing skills in a variety of contexts. Conversation, vocabulary building, oral reports, and fundamentals of expository writing.
Prerequisites: 01:810:130 or 135 or 141-142, and permission of department. Not open to native speakers of Portuguese.

01:810:248 ***Introduction to the Jewish Diaspora in Spanish-Speaking America and Brazil (3)***
Study of Jewish experience in Latin America (both Spanish and Portuguese speaking).

01:810:309 ***Africa and Portugal: An Introduction (3)***
Discussion of significant historical, social, and cultural trends in Portugal and Lusophone Africa.
Prerequisite: 01:810:201 or 203, or placement exam, or permission of department.

01:810:310 ***Brazil: An Introduction (3)***
Discussion of significant historical, social, and cultural trends in Brazil.
Prerequisite: 01:810:201 or 203, or placement exam, or permission of department.

01:810:315,316 ***Literatures and Cultures of the Portuguese-Speaking World: An Introduction (3,3)***
Reading and discussion of literary works representative of significant movements and authors of the Portuguese-speaking world.
Prerequisite: 01:810:201 or 203, or placement exam, or permission of department.

01:810:325 ***Advanced Grammar and Style (3)***
Study of Portuguese grammatical forms and structures: vocabulary building, translation, composition.
Prerequisite: 01:810:201 or 203, or placement exam, or permission of department.

01:810:326 ***Advanced Composition (3)***
Development of sophisticated writing skills in Portuguese.
Prerequisite: 01:810:201 or 203, or placement exam, or permission of department.

01:810:340 ***Brazil: The 20th Century and Beyond (3)***
Reading and discussion of representative works of fiction, poetry, and theater from modernism to the present.
Prerequisite: 01:810:201 or 203, or placement exam, or permission of department.

01:810:345 ***Realism in Portuguese Literature (3)***
Readings from the works of Eça de Queiroz, the generation of 1870, and the neorealists.
Prerequisite: 01:810:201 or 203, or placement exam, or permission of department.

01:810:361 ***Brazil and the United States: Comparative Approaches (3)***
Comparative and interdisciplinary study of Brazilian literature and culture as it relates to contemporary issues of race relations, diversity, cultural dependency, and globalization.
Course taught in English. Credit not given for both this course and 01:195:361.

01:810:370 ***Portuguese Translation (3)***
Translation of a range of texts from Portuguese into English; discussion of language register.
Prerequisite: 01:810:325, or placement exam, or permission of department.

01:810:371 ***Portuguese Literary Translation (3)***
Translation of a range of literary texts from Portuguese into English and from English into Portuguese; discussion of language register and translation techniques.

01:810:417 ***History of the Portuguese Language (3)***
Development of Portuguese from its origins to the present. Settlement history and non-Roman influences in Portugal. Evolution of sounds, forms, sentence structures, and words. Dialectal variations.
Prerequisite: One semester of 300-level Portuguese or permission of department. Course may be taught in English, but knowledge of Portuguese and/or Spanish is necessary.

01:810:420 ***The Brazilian Narrative (3)***
Development of the Brazilian novel and short story from the colonial period to the present. Emphasis on 19th and 20th centuries. Reading and analysis of representative works.
Prerequisite: One semester of 300-level literature in Portuguese or permission of department.

01:810:430 ***Camões (3)***
Epic and lyric poetry of Camões and his contemporaries. Antecedents and repercussions of the Portuguese Renaissance.
Prerequisite: One semester of 300-level literature in Portuguese or permission of department.

01:810:440 ***The Portuguese-Speaking World: Multiple Perspectives (3)***
Main traits of the civilization of the Portuguese-speaking world. Evolution of its social institutions and customs. Representative literary, philosophical, and artistic works.
Prerequisite: One semester of 300-level literature in Portuguese or permission of department.

01:810:493,494 ***Independent Study (BA,BA)***
Independent readings under faculty supervision.
Prerequisites: One semester of 300-level Portuguese and permission of department and instructor.

01:810:497,498 ***Honors in Portuguese (BA,BA)***
Research paper under faculty supervision.
Prerequisites: Permission of department. Open only to seniors.

01:810:499 ***Readings in Portuguese (3)***
Independent readings under faculty supervision.
Prerequisites: One semester of 400-level literature in Portuguese and permission of department and instructor. May not be taken more than once for credit.

Psychology 830 (SAS)

PSYCHOLOGY 830

Department of Psychology, School of Arts and Sciences

Website: https://psych.rutgers.edu

Chair: Diana Sanchez

Undergraduate Vice Chair: Judith A. Hudson

Associate Undergraduate Vice Chair: Linnea R. Dickson

Distinguished Professors:

Lee Jussim, B.A., Massachusetts; Ph.D., Michigan

Eileen Kowler, B.A., CUNY (Queens College); Ph.D., Maryland

Tracey J. Shors, B.S., Alabama; Ph.D., Southern California

Juli Wade, B.A., Cornell; PhD University of Texas Austin

Board of Governors Professor (PIIs):

Alan M. Leslie, M.A., Edinburgh (UK); Ph.D., Oxford

Professors:

Richard Contrada, B.A., Long Island; Ph.D., CUNY

Maurice Elias, B.A., CUNY (Queens College); M.A., Ph.D., Connecticut

Jacob Feldman, A.B., Harvard; M.S., Ph.D., Massachusetts Institute of Technology

Arnold L. Glass, B.A., SUNY (Buffalo); Ph.D., Stanford

Pernille Hemmer, B.S., Ph.D.,California (Irvine)

Judith A. Hudson, B.A., Trinity College; Ph.D., CUNY

Alexander Kusnecov, B.A., Ph.D., Newcastle (New South Wales)

John P. McGann, B.A., Ph.D., Yale

Julien Musolino, B.A., Geneva; M.A., North Wales (UK); Ph.D., Maryland

Laurie A. Rudman, B.A., Ph.D., Minnesota

Diana Sanchez, B.A., Bard College; Ph.D., Michigan

Edward A. Selby, B.A., Wyoming; Ph.D., Florida State

Manish Singh, B.A., Delhi (India); M.A., Ph.D., California (Irvine)

Karin J. Stromswold, A.B., Harvard; Ph.D., Massachusetts Institute of Technology; M.D., Harvard

Elizabeth Torres, B.S., San Jose State; Ph.D., California (San Diego)

David S. Vicario, B.A., New Hampshire; Ph.D., Rockefeller

David Wilder, B.S., Pittsburgh; M.S., Ph.D., Wisconsin

Robert L. Woolfolk, B.A., Ph.D., Texas

Associate Professors:

Kasia M. Biezczad, B.S., McGill (Canada); Ph.D., California (Irvine)

Shana L. Cole, B.A., College of New Jersey; Ph.D., New York

Samantha Farris, B.A., Rutgers; Ph.D., Houston

Evan M. Kleiman, B.A., Temple; Ph.D., George Mason

Calvin Lai, B.A., Rutgers University; PhD., University of Virginia

Theresa M. Levro, B.A., Colby College; Ph.D., Vermont

Melchi Michel, B.A., SUNY (Oswego); Ph.D., Rochester

Benjamin Samuels, B.A., Johns Hopkins; Ph.d., Harvard

Assistant Professors:

David Barker, B.S., Arizona State; Ph.D., Rutgers

Luis Flores, B.A., University of California Berkeley; PhD., University of Illinois Urbana-Champaign

Jessica Hamilton, B.A., Swarthmore College; Ph.D., Temple

Michelle Hurst, BSc., McMaster University; Ph.D., Boston College

Gandalf Nicholas, B.A.,Pontifica Universidad Catolica Madre y Maestra (Dominican Republic); MA, College of William and Mary, PhD, Princeton

Bridget Matikainen-Ankney., B.Eng Stony Brook University; M.S Columbia University., Icahn School of Medicine at Mount Sinai

Philip Parker, B.S., Brown; Ph.D., California (San Francisco)

Jinjing Wang, B.S., Zhejiang University (China); Ph.D., Johns Hopkins

Qiong Zhang, B.S., National University of Singapore; Ph.D., Carnegie Mellon

Associate Research Professor:

Mimi L. Phan, B.A., Rutgers; Ph.D., California (Davis)

Associate Teaching Professors:

Linnea R. Dickson, B.S., Franklin and Marshall College; Ph.D., Rutgers

Margaret Ingate, B.A., Alabama; Ph.D., Rutgers

Estelle M. Y. Mayhew, B.S., Amsterdam; B.A., Seton Hall; Ph.D., Rutgers

Lyra Stein, B.A., Rutgers; M.S., Einstein College of Medicine, Ph.D., Rutgers

Assistant Teaching Professors:

Christopher Albin-Brooks, B.A., The Ohio State University; PhD., Arizona State University

Keiko T. Brynildsen, B.A., Drew; Ph.D., California (Riverside)

Sarah Carton, B.A., Boston; Ph.D., New York

Rob Foels, B.A., Iowa; Ph.D., Syracuse

Marina Gelfand, B.A. Boston; Ph.D., Catholic

Theresa Herman, B.A Saint Vincent University; MA., New York University; PsyD California Southern University

Stephen P. Kilianski, B.A., Ph.D., Rutgers

Psychology 830 (SAS)

Learning Goals

Learning Goals

Students will know the leading terms, concepts, theoretical perspectives, empirical findings, and historical trends in psychology. Students will apply basic research methods in psychology, including research design, and data analysis and interpretation, to standard lab problems. Those students pursuing research careers will also be able to design new experiments, use a subset of modern laboratory techniques, analyze information, and communicate their research effectively in reports that follow American Psychology research report style.

Students will use critical thinking, skeptical inquiry, and, when possible, the scientific approach to ask, answer, and understand questions related to behavior and mental processes. Students will apply psychological concepts and content to become engaged citizens. Some students will work in an applied setting under the supervision of trained mental health professionals and be able to integrate academic concepts and ideas with personal observations and provide programmatic and case reports.

Psychology 830 (SAS)

Major Requirements

Major Requirements

Note: Students who declared the major prior to fall 2017 are under different requirements, which may be found on the departmental website.

The prerequisite for declaring the major in psychology is completion of the following courses with a grade of C or better in each:

01:830:101 General Psychology (3)

01:830:200 Quantitative Methods in Psychology (3)*

The following requirements must be met to complete a major in psychology:

1. Four Subdiscipline Core Courses. (A separate course must be selected from each of the following four subdiscipline clusters and must be taken within the 01:830 subject index of the School of Arts and Sciences [SAS] Department of Psychology.)

Behavioral Neuroscience
01:830:310 Neuropsychology (3)
01:830:311 Learning Processes (3)
01:830:313 Physiological Psychology (3)
01:830:361 Developmental Psychobiology (3)

Clinical Psychology
01:830:310 Neuropsychology (3)
01:830:340 Psychopathology (3)
01:830:346 Atypical Development in Childhood and Adolescence (3)
01:830:394 Community Psychology and Community Mental Health (3)

Cognitive Psychology
01:830:301 Sensation and Perception (3)
01:830:303 Memory (3)
01:830:305 Cognition (3)
01:830:351 Psychology of Language (3)

Social Psychology
01:830:321 Social Psychology (3)
01:830:338 Personality Psychology (3)
01:830:339 Self and Identity (3)
01:830:377 Health Psychology (3)

2. One 4-Credit Content Course and Lab Combination.**

3. Completion of Six Psychology Electives. (To be selected from the department's complete set of course offerings.)

- These may include any additional courses from the subdiscipline core categories above (i.e., selections beyond those required to meet the subdiscipline distribution requirement), as well as additional 400-level courses.
- No more than 6 credits of nonclassroom courses such as fieldwork, research, or internships may be applied toward the major. The additional credits do, however, apply toward the overall graduation credits and students are encouraged to take additional credits.
- All 400-level psychology electives have the prerequisites of a 4-credit lab course plus at least one core course. Individual courses may have additional prerequisites and instructors may grant special permission to enroll.

- Transfer courses may be applied, but at least one of the six electives must be completed within the SAS Department of Psychology.
- No more than two 200-level courses (7 credits) may be applied.

4. Completion of One 400-Level Elective.

*May substitute without replacement by completing one of the following courses with a grade of C or better: 01:830:210 Behavioral Data Analysis; 01:960:212 Statistics II; 01:960:401 Statistics for Research; 01:220:322 Econometrics; 01:377:275 Basic Statistics for Exercise Science (except Winter Session); or an equivalent transfer course.
**Will also apply toward either the core course or psychology elective requirement as indicated above. General Psychology and Quantitative Methods in Psychology are prerequisites.

Psychology 830 (SAS)

Minor Requirements

Minor Requirements

It is not possible to double minor within psychology by completing both minor options. Students must choose between either the (general) psychology minor or the developmental psychology minor.

Psychology Minor Requirements

A psychology minor consists of at least six courses of 3 or more credits, including 01:830:101 General Psychology (3), with a grade of C or better. At least three of the six courses must be taken in the Rutgers University-New Brunswick psychology program (01:830). No more than two 200-level courses may be applied. Courses from nonpsychology departments may not be applied toward the minor. No more than one of the six required courses may be a nonclassroom course such as fieldwork, internship, or research. No School of Arts and Sciences honors courses (except those with the 830 subject code) may count toward this requirement. A combined grade-point average of 2.0 or better is required for all 01:830 courses counting toward the minor.

Developmental Psychology Minor Requirements

The developmental psychology minor is intended for students interested in concentrating on content and skills relevant to working with people at all points in the life span. It may be especially useful for students who plan on pursuing careers in the health professions, education, public policy, or law enforcement.

The developmental psychology minor consists of two required courses and four electives for a total of 18 credits.

Required

01:830:101 General Psychology (3)
01:830:271 Principles of Developmental Psychology (3)

Electives: (four courses from the following):

01:830:331 Infant and Child Development (3)
01:830:333 Adolescent Development (3)
01:830:335 Adult Development and Aging (3)
01:830:346 Atypical Development in Childhood and Adolescence (3)
01:830:361 Developmental Psychobiology (3)
01:830:394 Community Psychology and Community Mental Health (3)
01:830:432 Advanced Topics in Developmental Psychology (3)
01:830:484 Language Acquisition (3)

One semester of fieldwork can replace one of the four developmental electives:

01:830:380/381 Fieldwork: Foster Care I/II (3)
01:830:382/383 Fieldwork: Autism I/II (3)
01:830:388/389 Fieldwork: Child Development I/II (3)

Students must receive a grade of C or better in General Psychology and an overall GPA of 2.0 or better is required for all courses counting toward the minor.

At least three of the required six courses must be taken in the Rutgers University-New Brunswick psychology program (01:830).

Psychology 830 (SAS)

Departmental Honors Major Requirements

Departmental Honors Major Requirements

Acceptance into the honors major requires a 3.0 overall grade-point average (GPA), a 3.4 GPA in the major, and an approved research proposal. In addition to meeting all of the requirements for the standard major, students must complete a yearlong research project in their final year. Students who successfully complete 01:830:497,498 Honors Research in Psychology (3,3) plus 01:830:490 Honors Research Seminar (3) will be designated Honors Research Scholars in Psychology.

Further details are available at https://psych.rutgers.edu/academics/undergraduate/major#honors-major-requirements

Psychology 830 (SAS)

Psi Chi International Honor Society

Psi Chi International Honor Society

The department has an active chapter of Psi Chi, the International Honor Society in Psychology. Applicants must have earned a grade-point average of 3.4 or better in the major and 3.3 or better overall, plus meet additional criteria. Further details, can be found at https://psych.rutgers.edu/academics/undergraduate/undergraduate-main.

Psychology 830 (SAS)

Transfer Students

Transfer Students

Transfer students who wish to major in psychology must take at least seven in-class psychology courses at Rutgers University-New Brunswick; minors must take at least three courses at Rutgers-New Brunswick. Fieldwork, research in psychology, internship, and honors courses do not count toward meeting this requirement. No more than two 200-level courses will be applied to the major or minor.

Psychology 830 (SAS)

Courses

Courses

01:830:101 *General Psychology (3)*
Survey of main areas of contemporary psychology.

01:830:123 *Soul Beliefs: Causes and Consequences (3)*
Exploration of the causes and consequences of various beliefs about the soul. Topics such as the self, mind/body dualism, evolution, culture, death anxiety, afterlife, and religious and political conflict.

01:830:200 *Quantitative Methods in Psychology (4)*
Quantitative methods used in psychological research. Regular exercises required.
One semester of college-level mathematics recommended. Prerequisite: 01:640:025 or higher placement in mathematics.

01:830:201 *Principles and Issues in Psychological Science (3)*
Introduction to the field of human cognition, surveying methods, concepts, findings; and problems in perception, learning, memory, thinking, problem solving, psycholinguistics, and development.
Prerequisite: 01:830:101.

01:830:210 *Behavioral Data Analysis (1)*
Quantitative methods used in psychological research. Intended for students who have completed an introductory course in quantitative methods that included basic descriptive and inferential statistics, and correlation and regression, but did not include both single-factor and two-factor analysis of variance.
Special Notation: Students who complete the course with a grade of C or better will be considered to have met the quantitative methods requirement for the major in psychology. Prerequisite: Permission of psychology adviser. May not receive credit for both 01:830:200 and 210.

01:830:220 *Psychological Themes and Theories in Modern Films (3)*
Advanced analysis and critical investigation of psychological themes in modern cinema including life span development, stereotypes, personality, memory, learning processes, gender identity, personality disorders, trauma, autism, and clinical practice.
Prerequisite: 01:830:101.

01:830:230 *Media Psychology (3)*
Historical, theoretical, and methodological approaches to the study of media and its effects on cognitive, emotional, and social functioning with an emphasis on "new" media.
Prerequisite: 01:830:101.

01:830:250 *Psychology of Art (3)*
Art as powerful experience and driving force in human beings. Structure of works of art, fundamental principles by which the human mind organizes such works, and importance of art for human survival.
Prerequisite: 01:830:101 or 24 credits.

01:830:271 *Principles of Developmental Psychology (3)*
Survey of life-span human development covering prenatal, infant, child, adolescent, and adult periods.
Prerequisite: 01:830:101.

01:830:301 *Sensation and Perception (3)*
Principles of sensory processes in vision, audition, and other modalities, and of the perception of objects and events.
Prerequisite: 01:830:101.

01:830:302 *Sensation and Perception Laboratory (1)*
Experiments and written reports on a variety of topics in sensation and perception. Training in scientific method with respect to data analysis, experimental methods, and research design.
Writing intensive. Prerequisite: 01:830:200 or 01:830:210 or 01:960:212 or 01:960:401 or 01:220:322 or 01:377:275. Pre- or corequisite: 01:830:301. Credit not given for both this course and 01:830:306.

01:830:303 *Memory (3)*
Principles of acquisition, retention, recall, and forgetting of verbal and nonverbal material.
Prerequisite: 01:830:101.

01:830:304 *Memory Laboratory (1)*
Experiments and written reports on a variety of topics in learning and memory. Stresses training in scientific method with respect to data analysis, experimental methods, and research design.
Prerequisite: 01:830:200 or 01:830:210 or 01:960:212 or 01:960:401 or 01:220:322 or 01:377:275. Pre- or corequisite: 01:830:303.

01:830:305 *Cognition (3)*
Cognitive processes, including thinking, language, and memory, and their development.
Prerequisite: 01:830:101.

01:830:306 *Cognition Laboratory (1)*
Experiments and written reports on cognitive processes, including thinking, language, and memory.
Writing intensive. Prerequisite: 01:830:200 or 01:830:210 or 01:960:212 or 01:960:401 or 01:220:322 or 01:377:275. Pre- or corequisite: 01:830:305. Credit not given for both this course and 01:830:302.

01:830:307 *Perception in Cognitive Science (3)*
Approaches to visual perception that emphasize reasoning about stimulus properties (shading, texture, lines, movement, etc.) that give information about the structure of the environment.
Prerequisite: 01:830:101.

01:830:308 ***Psychosocial Foundations of Health and Medicine (3)***
Conceptual, methodological, and substantive approaches to psychosocial perspectives on health.
Prerequisite: 01:830:101 or 01:920:101. Credit not given for both this course and 01:920:308.

01:830:310 ***Neuropsychology (3)***
Survey of brain damage and plasticity, brain trauma and disease, neuropsychological assessment and testing, cognitive rehabilitation, and current controversies. Provides a basic understanding of brain structure and function along with an appreciation of clinical perspectives.
Prerequisite: 01:830:101.

01:830:311 ***Learning Processes (3)***
Topics include habituation, sensitization, associative learning, and rule and category learning. Data derived from animal and human research.
Prerequisite: 01:830:101.

01:830:312 ***Learning Processes Laboratory (1)***
Learning experiments conducted with animals.
Writing intensive. Prerequisite: 01:830:200 or 01:830:210 or 01:960:212 or 01:960:401 or 01:220:322 or 01:377:275. Pre- or corequisite: 01:830:311.

01:830:313 ***Physiological Psychology (3)***
Physiological determinants and mechanisms of behavior.
Prerequisite: 01:830:101.

01:830:314 ***Physiological Psychology Laboratory (1)***
Experiments with animals demonstrating or testing principles of physiology.
Writing intensive. Prerequisites: 01:830:200 and permission of instructor. Pre- or corequisite: 01:830:313.

01:830:315 ***Comparative Psychology (3)***
Evolution of behavior.
Prerequisite: 01:830:101.

01:830:316 ***Comparative Psychology Laboratory (1)***
Experiments designed and conducted with animals to demonstrate or test principles of comparative psychology.
Writing intensive. Prerequisite: 01:830:200 or 01:830:210 or 01:960:212 or 01:96:401 or 01:220:322 or 01:377:275. Pre- or corequisite: 01:830:315.

01:830:320 ***Forensic Psychology (3)***
Interface of psychology and the law with an emphasis on forensics. Specific topics may include landmark legal cases, police psychology, eyewitness and expert testimony, jury selection, psychopathy, repressed memories, profiling, victimless crimes, the insanity defense, lie detection, and custody evaluations.
Prerequisite: 01:830:101.

01:830:321 ***Social Psychology (3)***
Social aspects of behavior. Topics such as socialization, communication, small-group interaction, attitudes and attitude change, social perception, and social conflict.
Prerequisite: 01:830:101.

01:830:323 *Research Methods in Social Psychology (4)*
Research methods for laboratory and field studies in social psychology. Logic and design of behavioral experiments; analysis and interpretation of data; writing of formal laboratory reports.
Writing intensive. Prerequisites: 01:830:200, 321. Fulfills laboratory course requirement and also serves as a psychology elective.

01:830:325 *The Religious Mind (3)*
Exploration of the way human minds acquire, generate, and transmit religious thoughts and practices. Review of major theoretical and empirical advances pertaining to the nature, origins, and consequences of religious thought.
Prerequisite: 01:830:101 or by permission.

01:830:326 *Small Groups (3)*
Empirical findings and theories drawn from research on small-group behavior, group development, leadership, conformity, deviation, and intergroup relations.
Prerequisites: 01:830:321 and permission of instructor.

01:830:327 *Small Groups Laboratory (1)*
Laboratory and field studies in small-group behavior.
Writing intensive. Prerequisite: 01:830:200 or 01:830:210 or 01:960:212 or 01:960:401 or 01:220:322 or 01:377:275. Pre- or corequisite: 01:830:326.

01:830:331 *Infant and Child Development (3)*
Review of psychological theory and research on perceptual, cognitive, social, and personal growth during infancy and childhood.
Prerequisite: 01:830:101.

01:830:332 *Infant and Child Development Laboratory (1)*
Experiments and written reports based on observations of children in a school setting, interviews, application of research protocols, and existing databases, including videotapes.
Writing intensive. Prerequisite: 01:830:200 or 01:830:210 or 01:960:212 or 01:960:401 or 01:220:322 or 01:377:275. Pre- or corequisite: 01:830:331.

01:830:333 *Adolescent Development (3)*
Review of theory and research on adolescent growth, cognition, personality, and social development.
Prerequisite: 01:830:101 or permission of instructor.

01:830:335 *Adult Development and Aging (3)*
Review of psychological theory and research on cognitive, personality, and interpersonal development.
Prerequisite: 01:830:101.

01:830:338 *Personality Psychology (3)*
Major personality systems. Personality structure, dynamics, development, and assessment.
Prerequisite: 01:830:101.

01:830:339 *Self and Identity (3)*
Personal, relational, and collective levels of how we define our being and present the self to the social world.

Prerequisite: 01:830:101.

01:830:340 *Psychopathology*
Survey of etiology, diagnosis, and treatment of psychopathology.
Prerequisite: 01:830:101.

01:830:341 *Psychopathology Laboratory (1)*
Intensive lab course providing a solid foundation in clinical psychology research.
Prerequisite:Quantitative Methods in Psychology Pre- or Co-requisite: Psychopathology 01:830:340.01:830:200 Open to psychology majors only; by instructor's permission only

01:830:342 *Research in Personality (3)*
Research approaches to major issues in personality psychology.
Prerequisites: 01:830:101 and 01:830:338. Corequisite: 01:830:342.

01:830:343 *Research in Personality Laboratory (1)*
Research projects designed and conducted in personality psychology. Participation in ongoing research programs.
Writing intensive. Prerequisites: 01:640:112, 115, or placement in Calculus; and 01:830:200 or 01:830:210 or 01:960:212 or 01:960:401 or 01:220:322 or 01:377:275. Pre- or corequisite: 01:830:342.

01:830:346 *Atypical Development in Childhood and Adolescence (3)*
Origin, diagnosis, and treatment of deviations from normal physical, intellectual, psychological, and social development.
Prerequisites: 01:830:101 and one of the following: 01:830:271, 331, 333, or 340.

01:830:348 *Psychological Tests and Measurements (3)*
Theoretical, developmental, and methodological bases of psychological assessments. Includes introduction to selected applications in clinical, counseling, educational, forensic, organizational, and research settings.
Prerequisites: 01:830:101, 200, or permission of instructor. Corequisite: 01:830:349.

01:830:349 *Psychological Tests and Measurements Laboratory (1)*
Research projects using various assessment techniques.
Writing intensive. Prerequisites: 01:830:200 or 01:830:210 or 01:960:212 or 01:960:401 or 01:220:322 or 01:377:275. Pre- or corequisite: 01:830:348.

01:830:351 *Psychology of Language (3)*
Production, perception, and acquisition of language at the level of sound (phonology), words (morphology and the lexicon), and grammar (syntax).
Prerequisite: 01:830:101. Recommended: 01:615:101 or 201. Credit not given for both this course and 01:615:371.

01:830:352 *Psychology of Language Laboratory (1)*
Covers phonology and speech perception, morphology, lexical change and access, syntax and sentence processing, language acquisition, neurolinguistics, genetics, and evolution of language.
Writing intensive. Prerequisite: 01:830:200 or 01:830:210 or 01:960:212 or 01:960:401 or 01:220:322 or 01:377:275. Pre- or corequisite: 01:830:351.

01:830:355 *Research Methods in Psychology (3)*
Logic and design of behavioral experiments; interpretation of data.
Prerequisites: 01:830:200 or equivalent and permission of department. Credit not given for more than one of 01:830:300, 355, or 356.

01:830:356 ***Research Methods in Psychology Lab (4)***
Logic and design of behavioral experiments; interpretation of data; writing of formal laboratory reports.
Prerequisites: 01:830:200 or 01:830:210 or 01:960:212 or 01:960:401 or 01:220:322 or 01:377:275 and permission of department. Credit not given for more than one of 01:830:300, 355, or 356.

01:830:358 ***Exploring the Science of Perception and Cognition (3)***
Active learning course designed to explore current research in perception and cognition through projects requiring students to work in teams to design, conduct, analyze, and present their own original research. Introduction to experiment programming software such as PsychoPy.
Prerequisites: 01:830:200 and 01:830:302 or 01:830:306.

01:830:360 ***Drugs and Human Behavior (3)***
Drug classification; contexts of drug usage; effects of various drugs; analysis of drug action in the central nervous system; aspects of "human nature" revealed by drug usage.
Prerequisite: 01:830:101.

01:830:361 ***Developmental Psychobiology (3)***
Growth, maturation, and development of behavior with emphasis on physiological mechanisms and early experience.
Prerequisite: 01:830:101.

01:830:362 ***Psychology of Sex and Gender (3)***
Biological, psychological, and cultural determinants in sex differences in behavior with emphasis on humans. Sexual behavior, aggression, personality, intelligence, and social roles.
Prerequisite: 01:830:101. Credit not given for both this course and 01:830:381; 01:988:362, 381.

01:830:364 ***Motivation and Emotion (3)***
Psychological and physiological aspects of motivation and emotion in human and animal behavior.
Prerequisite: 01:830:101.

01:830:371 ***Group Dynamics (3)***
Basic aspects of group interaction. Participation in experiential group. Focus on a variety of topics related to group interaction, development, and change.
Prerequisites: 01:830:101 and written permission of instructor.

01:830:372 ***Psychological Approaches to Social Problems (3)***
How social problems are defined. Theories and methods used to study social problems such as crowding, poverty, education, and race relations.
Prerequisite: 01:830:321.

01:830:373 ***Organizational and Personnel Psychology (3)***
Social psychological research and theory applied to industrial problems. Personnel selection, job satisfaction and morale, organizational effectiveness, group and intergroup relationships, and communication in work settings.
Prerequisite: 01:830:101.

01:830:375 ***Stereotyping and Prejudice (3)***
Social psychology of development and consequences of stereotypes and attitudes toward outgroups; special emphasis on interactions within the classroom.
Prerequisites: 01:830:101

01:830:377 ***Health Psychology (3)***
Relationships between behavior and health. Stress, personality, and lifestyle as disease causes; modifying high-risk behaviors; coping with serious illness.
Prerequisite: 01:830:101.

01:830:379 ***Psychological Stress and Coping (3)***
Biological, environmental, and psychological aspects of stress. The coping process and stress management. Scientific, personal, and cultural representations of stress and coping.
Prerequisite: 01:830:101.

01:830:380,381 ***Fieldwork: Foster Care (3,3)***
Two-semester course involving weekly seminars and faculty-supervised fieldwork consisting of mentoring and transporting children in the foster care system.
Prerequisites: 01:830:101, 331, and 340 or 346, and interview with faculty. Open to juniors and seniors.

01:830:382 ***Fieldwork: Autism I (3)***
Faculty-supervised placements at the Douglass Developmental Disabilities Center, an on-campus program for people with autism spectrum disorders. Direct work with individuals with autism, supervision by professional teachers, and weekly meetings with classroom teachers. Readings and exam.
Prerequisites: 01:830:101 and 340 or 346. Open to juniors and seniors.

01:830:383 ***Fieldwork: Autism II (3)***
Faculty-supervised placements at the Douglass Developmental Disabilities Center, an on-campus program for people with autism spectrum disorders. Direct work with individuals with autism, supervision by professional teachers, and weekly meetings with classroom teachers. Readings and exam.
Prerequisite: 01:833:382. Open to juniors and seniors.

01:830:388 ***Fieldwork: Child Development I (3)***
Supervised placement in an on-campus child care facility, working as a teacher's assistant. Academic readings, projects, and a final paper required.
Pre- or Co-requisite: 01:830:331.

01:830:389 ***Fieldwork: Child Development II (3)***
Supervised placement in an on-campus child care facility, working as a teacher's assistant. Academic readings, projects, and a final paper required.
Prerequisite: 01:830:388.

01:830:391,392 ***Research in Psychology (BA,BA)***
Supervised research. Written agreement with the supervisor required. May include laboratory/library research. Final written report required.
Prerequisites: Satisfactory completion of application form and permission of instructor. May be taken more than once.

01:830:394 *Community Psychology and Community Mental Health (3)*
Influence of social and community forces on development, treatment, and prevention; applications to community problems.
Prerequisite: 01:830:321, 323, or 340. Open only to juniors and seniors.

01:830:398 *CESEP (2)*
Two-credit optional community service placement in psychology-related field setting. Please see the CESEP website for additional information.
Corequisite: Must be taken in conjunction with a designated Civic Engagement and Service Education Partnerships (CESEP) course offered in the Department of Psychology.

01:830:400 *Advanced Statistical Methods in Psychology (3)*
Reviews and expands on the concepts and computations covered in the Quantitative Methods in Psychology (01:830:200). New topics may include additional aspects of association, power analysis, nonparametric procedures, and repeated measures t- and F-tests. While conceptual understanding will be central, students will also learn computation using SPSS software.
Prerequisites: Majors only and a grade of B+ or better in 01:830:200, or permission of the instructor.

01:830:401 *Advanced Topics in Human Cognition (3)*
Multisectioned course with each section investigating advanced problems and issues in human cognition. Contact department for titles, descriptions, and requirements of sections.
Prerequisites: Majors only and 01:830:301, 303, 305 or 351. Additional prerequisites may apply for individual sections.

01:830:402 *Advanced Topics in Human Cognition (3)*
Multisectioned course with each section investigating advanced problems and issues in human cognition. Contact department for titles, descriptions, and requirements of sections.
Prerequisites: Majors only and 01:830:301, 303, 305 or 351. Additional prerequisites may apply for individual sections.

01:830:403 *Programming for Behavioral Scientists (3)*
Introduction to computer programming focused on the technical skills needed in behavioral research design. Solve problems in experimental psychology, including how to solicit subject responses, visualize experimental data, and perform basic statistical analysis.
Prerequisite: Majors only or permission of instructor.

01:830:408 *Reasoning, Problem Solving, and Decision-Making (3)*
Higher-level cognitive processes including reasoning, problem solving, hypothesis testing, judgment, and decision-making.
Prerequisites: Majors only; 01:830:200 and 301, 303, 305, or 351.

01:830:409 *Reasoning, Problem Solving, and Decision-Making (3)*
Higher-level cognitive processes including reasoning, problem solving, hypothesis testing, judgment, and decision-making.
Prerequisites: Majors only; 01:830:200 and 301, 303, 305, or 351.

01:830:410 *Advanced Topics in Psychobiology (3)*
Multisectioned course with each section investigating advanced problems and issues in psychobiology. Contact department for titles, descriptions, and requirements of sections.
Prerequisites: Majors only and 01:830:310, 311, or 313. Additional prerequisites may apply for individual sections.

01:830:411 *Advanced Topics in Psychobiology (3)*
Multisectioned course with each section investigating advanced problems and issues in psychobiology. Contact department for titles, descriptions, and requirements of sections.
Prerequisites: Majors only and 01:830:310, 311, or 313. Additional prerequisites may apply for individual sections.

01:830:412 *Neuropsychopharmacology (3)*
Effects of drugs on behavior. Emphasis on central nervous system mechanisms and clinical psychopharmacology.
Prerequisites: Majors only and 01:830:313. Credit not given for both this course and 01:830:414.

01:830:413 *Neuropsychopharmacology Laboratory (1)*
Research on the effect of drugs on animal behavior.
Prerequisite: 01:830:200 or 211 or permission of instructor. Pre- or corequisite: 01:830:412.

01:830:414 *Neuropsychopharmacology (3)*
Effects of drugs on behavior. Emphasis on central nervous system mechanisms and clinical psychopharmacology.
Prerequisites: Majors only and 01:830:313. Credit not given for both this course and 01:830:412.

01:830:415 *History of Brain Science (3)*
The discoveries and lives of neuroscientists that shaped how we think the mind functions in the brain and why; a biological perspective of psychology from neurons to circuits to systems and behavior.
Prerequisite: 01:830:313 or by permission.

01:830:421 *Advanced Topics in Social Psychology (3)*
Multisectioned course with each section investigating advanced problems and issues in social psychology. Contact department for titles, descriptions, and requirements of sections.
Prerequisites: Majors only and 01:830:321, 338, 373 or 377. Additional prerequisites may apply for individual sections.

01:830:422 *Advanced Topics in Social Psychology (3)*
Multisectioned course with each section investigating advanced problems and issues in social psychology. Contact department for titles, descriptions, and requirements of sections.
Prerequisites: Majors only and 01:830:321, 338, 373 or 377. Additional prerequisites may apply for individual sections.

01:830:425 *Advanced Topics in Health Psychology (3)*
Multisectioned course with each section investigating advanced problems and issues in health psychology. Contact department for titles, descriptions, and requirements of sections.
Prerequisite: Majors only and 01:830:308 or 01:830:321 or 01:830:341 or 01:830:377. Additional prerequisites may apply for individual sections.

01:830:426 *Advanced Topics in Helath Psychology (3)*
Multisectioned course with each section investigating advanced problems and issues in health psychology. Contact department for titles, descriptions, and requirements of sections.
Prerequisite: Majors only and 01:830:308 or 01:830:321 or 01:830:341 or 01:830:377. Additional prerequisites may apply for individual sections.

01:830:431 *Advanced Topics in Developmental Psychology (3)*
Multisectioned course with each section investigating advanced problems and issues in developmental psychology. Contact department for titles, descriptions, and requirements of sections.

01:830:432 *Advanced Topics in Developmental Psychology (3)*
Multisectioned course with each section investigating advanced problems and issues in developmental psychology. Contact department for titles, descriptions, and requirements of sections.
Prerequisites: Majors only and 01:830:331, 333, 335 or 346. Additional prerequisites may apply for individual sections.

01:830:441 *Advanced Topics in Personality Psychology (3)*
Multisectioned course with each section investigating advanced problems and issues in personality psychology. Contact department for titles, descriptions, and requirements of sections.
Prerequisites: Majors only and 01:830:321, 338, 373, or 377. Additional prerequisites may apply for individual sections.

01:830:442 *Advanced Topics in Personality Psychology (3)*
Multisectioned course with each section investigating advanced problems and issues in personality psychology. Contact department for titles, descriptions, and requirements of sections.
Prerequisites: Majors only and 01:830:321, 338, 373, or 377. Additional prerequisites may apply for individual sections.

01:830:451 *Advanced Topics in Clinical and Abnormal Psychology (3)*
Multisectioned course with each section investigating advanced problems and issues in clinical and abnormal psychology. Contact department for titles, descriptions, and requirements of sections.
Prerequisites: Majors only and 01:830:310, 340, 346, 309, or 393. Additional prerequisites may apply for individual sections.

01:830:452 *Advanced Topics in Clinical and Abnormal Psychology (3)*
Multisectioned course with each section investigating advanced problems and issues in clinical and abnormal psychology. Contact department for titles, descriptions, and requirements of sections.
Prerequisites: Majors only and 01:830:310, 340, 346, 309, or 393. Additional prerequisites may apply for individual sections.

01:830:453 *Systems of Psychotherapy (3)*
Examination of clinical, empirical, and theoretical foundations of therapeutic intervention.
Prerequisite: 01:830:340. Credit not given for both this course and 01:830:393.

01:830:454 *Systems of Psychotherapy (3)*
Examination of clinical, empirical, and theoretical foundations of therapeutic intervention.
Prerequisite: 01:830:340. Majors only.

01:830:455 *Positive Psychology (3)*
Introduction to positive psychology: positive emotions, positive individual traits, and positive institutions. Course combines didactic instruction and experiential learning in its coverage of each of these three issues central to this field.
Prerequisites: Majors only and 01:830:321, 330, 331, 333, 335, 338, or 364 and written permission of instructor.

01:830:456 *Positive Psychology (3)*
Introduction to positive psychology: positive emotions, positive individual traits, and positive institutions. Course combines didactic instruction and experiential learning in its coverage of each of these three issues central to this field.
Prerequisites: Majors only and 01:830:321, 330, 331, 333, 335, 338, or 364 and written permission of instructor.

01:830:463 *Behavioral Pharmacology (3)*
Effects of drugs on physiological and behavioral mechanisms.
Prerequisite: 01:830:313.

01:830:464 *Behavioral Pharmacology (3)*
Effects of drugs on physiological and behavioral mechanisms.
Prerequisites: Majors only and 01:830:313.

01:830:470 *History of Psychology (3)*
Philosophical and scientific antecedents of modern psychology. Schools of thought in psychology including structuralism, functionalism, behaviorism, Gestalt, and psychoanalysis. Recurrent issues in the history of psychology.
Prerequisites: Majors only and six courses in psychology. Open only to juniors and seniors.

01:830:471 *History of Psychology (3)*
Philosophical and scientific antecedents of modern psychology. Schools of thought in psychology including structuralism, functionalism, behaviorism, Gestalt, and psychoanalysis. Recurrent issues in the history of psychology.
Prerequisites: Majors only and six courses in psychology. Open only to juniors and seniors.

01:830:480 *Advanced Topics in Visual Perception (3)*
Current theories of human visual perception and its physiological correlates. Analogies to auditory perception and parallels with computer vision.
Prerequisite: Permission of instructor.

01:830:481 *Advanced Topics in Visual Perception (3)*
Current theories of human visual perception and its physiological correlates. Analogies to auditory perception and parallels with computer vision.
Prerequisite: Permission of instructor.

01:830:484 *Language Acquisition (3)*
In-depth investigation of the cognitive and neural bases of language acquisition, informed by state-of-the-art research in psychology, cognitive science, linguistics, and neuroscience. Topics covered: phonological, lexical, morphological, syntactic, and pragmatic development; bilingualism, learnability theory, atypical language acquisition, and neurolinguistics.
Prerequisites: 01:830:351 or two 300-level linguistics (615) courses, or 185:410, or permission of the instructor. Credit not given for both this course and 01:830:353 or 01:830:485.

01:830:485 *Language Acquisition (3)*
In-depth investigation of the cognitive and neural bases of language acquisition, informed by state-of-the-art research in psychology, cognitive science, linguistics, and neuroscience. Topics covered: phonological, lexical,

morphological, syntactic, and pragmatic development; bilingualism; learnability theory; atypical language acquisition; and neurolinguistics.
Prerequisites: 01:830:351 or two 300-level linguistics (615) courses, or 185:410, or permission of the instructor. Credit not given for both this course and 01:830:353 or 01:830:484.

01:830:490 *Honors Research Seminar (3)*
An advanced seminar for honors research students on experimental design, data analysis, interpretation and presentation, and thesis writing.
Prerequisite: Acceptance into psychology honors program. Corequisite: 01:830:497 or 498.

01:830:493 *Internship in Applied and Community Psychology (BA)*
Supervised full-time involvement in service settings, providing opportunity to apply knowledge in developmental, community, and clinical psychology; may include service delivery, planning, and evaluation research.
Prerequisites: At least five courses in psychology and permission of instructor. Corequisite: 01:830:494. Open only to junior and senior psychology majors.

01:830:494 *Internship Seminar in Applied and Community Psychology (3)*
With fellow interns, study dynamics of service organizations and forces influencing how professionals function; group and individual supervision around problems and issues arising from internship experiences.
Corequisite: 01:830:493.

01:830:495,496 *Advanced Research in Psychology (BA,BA)*
Supervised research. Written agreement with the supervisor required. May include laboratory/library research. Final written report required.
Prerequisites: Satisfactory completion of application form and permission of instructor. May be taken more than once.

01:830:497,498 *Honors Research in Psychology (3,3)*
Individual research projects to be written as honors thesis.
Prerequisite: Permission of department. Open only to seniors with 3.4 or better cumulative grade-point average in courses counting toward the major. Honors Research in Psychology (either 01:830:497 or 498) does not count as a laboratory course and does not fulfill the 400-level writing requirement.

Public Health 832 (SEBS)

PUBLIC HEALTH 832

Degree: B.S.

Contact: Christina Torian, Assistant Dean of Undergraduate Education (christina.torian@rutgers.edu)

Students in the School of Environmental and Biological Sciences (SEBS) may choose the major in public health, which is offered by the Edward J. Bloustein School of Planning and Public Policy. This major leads to a bachelor of science (B.S.) degree issued by both SEBS and the Bloustein School.

The major in Public Health (832) prepares students for entry-level careers in population health and disease prevention. Public health professionals work in a wide range of services including infectious disease control; health problems of children, older adults, and the medically underserved; chronic disease management; health monitoring and surveillance; environmental/occupational health and safety; and emergency preparedness. Students learn about the upstream factors that influence community health, particularly poverty, housing, work and unemployment, social exclusion, food security, transportation, access to health and social services, and evidence-based, data-driven decision-making.

See the Edward J. Bloustein School of Planning and Public Policy section of this catalog or visit https://bloustein.rutgers.edu/undergraduate/publichealth/.

Public Health 832 (SEBS)

Entry Requirements for the Major

Entry Requirements for the Major

Entry Requirements for the Major

To declare a major in public health, students must apply to the Edward J. Bloustein School of Planning and Public Policy. To be accepted, a student must have a GPA of 2.00 or higher, and must have completed the following prerequisite courses with grades of C or better in each course:

- 01:355:101 Expository Writing or equivalent (3)
- 10:775:205 Basic Statistical Methods (4) or any 200-level or higher statistics course
- One human biology course (3-4) (see approved human biology courses in Degree Navigator)
- One chemistry course (3-4)
    - 160:127 Impact of Chemistry (3)
    - 160:128 Chemistry of Life (3)
    - 160:161 or 162 General Chemistry I or II (4)

Applications to the Bloustein School are available online from the website: https://pppolicy.rutgers.edu/mcladmin/ugapp_add.php.

See the Edward J. Bloustein School of Planning and Public Policy section of this catalog or visit http://bloustein.rutgers.edu/undergraduate.

Public Health 832 (SEBS)

Graduation Requirements for the Major

Graduation Requirements for the Major

Major Requirements (58-61 credits)

The major in public health is offered by the Edward J. Bloustein School of Planning and Public Policy. It involves a total of 12-15 credits in prerequisite courses that students must complete (with grades of C or better in each of them) prior to declaring the major, plus 9 additional required courses (31 credits), plus five public health elective courses (15 credits).

The prerequisite courses for the major are as follows:

- 01:355:101 Expository Writing or equivalent (3)
- 10:775:205 Basic Statistical Methods (4) or any 200-level or higher statistics course
- One human biology course (3-4) (see approved human biology courses in Degree Navigator)
- One chemistry course (3-4)
    - 160:127 Impact of Chemistry (3)
    - 160:128 Chemistry of Life (3)
    - 160:161 or 162 General Chemistry I or II (4)

The major core requirements are as follows:

- 10:832:201 Principles of Public Health (3)
- 10:832:212 Health Disparities (3)
- 10:832:240 Global Health Perspectives (3)
- 10:832:335 Epidemiology (3)
- 10:832:339 Public Health Literature (3) or
  01:355:302 Scientific and Technical Writing (3) or
  01:355:303 Writing for Business and the Professions (3) or
  01:355:315 Writing Grant Proposals (3) or other preapproved writing course
- 10:832:356 Public Health Law & Ethics (3)
- 10:775:395 Research Methods (4)
- 10:775:450 Leadership Seminar (3)
- 10:775:499 Professional Practice Internship (6)

The five elective courses (at least three of which must be at the 300 level or above) must be public health (subject code 832) courses.

For additional information about the major in public health, please refer to the Edward J. Bloustein School section of the catalog.

Planning and Public Policy Major (762, 762D) and Minor (EJB-U)

PLANNING AND PUBLIC POLICY MAJOR (762, 762D) AND MINOR

Planning and Public Policy Major (37 credits)

The Planning and Public Policy major (762, 762D) provides students with a foundation in areas such as city dynamics, environmental aspects of cities, community health, urban poverty, public policy, housing issues, social concerns, fiscal matters, and land use planning. Students are prepared for entry-level professional management and planning positions focused on overseeing and improving public programs, such as transportation, housing, planning, the environment, finance, economic development, and urban renewal. These career paths can be found in business, government, education, banking, and nonprofit settings. This program also prepares students for graduate education in public administration, public policy, and urban planning.

Upon completing all degree requirements, the student will receive the bachelor of arts (B.A.) degree.

Rutgers School of Arts and Sciences and School of Environmental and Biological Sciences Students

This program is designed to accommodate the needs of traditional students at Rutgers University-New Brunswick.

Students in the School of Arts and Sciences (SAS) and students in the School of Environmental and Biological Sciences (SEBS) who wish to remain in their primary unit must apply for admission prior to declaring the major.

SAS students may pursue Planning and Public Policy as their first major and remain within SAS. SEBS students may pursue Planning and Public Policy as a second major to remain within SEBS.

Students can apply for the Planning and Public Policy major during one of our application cycles listed here. Applicants must have a minimum grade of 'C' or better in each of the prerequisite courses and be in good academic standing. The application may be found on the school's website at¿https://bloustein.rutgers.edu/undergraduate/planningandpublicpolicy/#sas

Students are advised to declare the Planning and Public Policy major no later than their first semester of junior year to ensure completion of the major by their anticipated graduation date.**A minor program is required for this major.**

Only courses with a 'C' or better may be counted towards the major, and students must complete the core curriculum requirements of their primary school.

The most current information for the Planning and Public Policy major may be found on the Bloustein School website at https://bloustein.rutgers.edu/undergraduate/planningandpublicpolicy/

Transfer Students

This program is designed to accommodate the needs of transfer, adult, and nontraditional students.

Students seeking the Planning and Public Policy major must have at least 30 credits before applying to the Bloustein School. Successful applicants will have completed the prerequisite courses with a grade of 'C' or better, and have achieved an overall GPA of at least 2.5.

Current Rutgers students seeking a school-to-school transfer from another Rutgers unit, or students transferring to Rutgers from another college or university, must apply via the Rutgers Office of Undergraduate Admissions. Contact ugadmissions@ejb.rutgers.edu for more information.

Transfer students from New Jersey community colleges are encouraged to complete lower-division prerequisite courses and the associate's degree to benefit from the NJ Statewide Transfer Agreement.

Only courses with a 'C' or better may be counted towards the major.**A minor program is required for this major.**

For more information about transferring, please see the school's website at https://bloustein.rutgers.edu/undergraduate/planningandpublicpolicy/#transfer

PLANNING AND PUBLIC POLICY MAJOR REQUIREMENTS (762, 762D)

(37 credits)

Prerequisite Courses (9-10 credits)

- 01:355:101 College Writing (3)
- 10:775:205 Basic Statistical Methods (4) or equivalent (3-4)
- 01:220:102 Introduction to Microeconomics (3)

Major Requirements (762, 762D) (37 credits)
Core Courses (16 credits)

- One of the following (3):
    - 01:220:103 Introduction to Macroeconomics (3)
    - 01:790:104 American Government (3)
    - 10:833:210 Principles of Public Policy (3)
    - 10:971:201 Intro to Urban Planning and Design (3)
- One of the following intensive writing courses (3):
    - 10:775:300 Writing for Professionals (3)
    - 01:355:302 Scientific and Technical Writing (3)
    - 01:355:303 Writing for Business and the Professions (3)
    - 01:355:315 Writing Grant Proposals (3)

- 10:775:395 Research Methods (4) *Open to majors only*
- 10:762:400 Internship with Seminar* (3) *Open to majors only*
- 10:762:499 Senior Seminar* (3) Open to majors only with at least 100 credits **and** no outstanding core requirements

** Students qualifying for departmental honors may replace 10:762:400 and 10:762:499 with 10:762:497, 498 Bloustein Honors Research.*

Required Electives (21 credits)

- 21 credits of electives from Bloustein School undergraduate courses, 15 credits of which must be at the 300-level or higher

Students interested in specific career paths should consider clustering their electives and seek advising early in their program of study.

Joint BA/MCRP or BS/MCRP Program

Exceptional, well-prepared students from any Rutgers University-New Brunswick matriculating unit with a GPA of 3.5 or higher, exceptional GRE scores, a dedication to public service and outstanding recommendations who wish to study urban planning are encouraged to seek advising about the 3-1-1 master of city and regional planning (M.C.R.P.) program. Contact ugadmissions@ejb.rutgers.edu for more information.

Planning and Public Policy Minor (18 credits)

The Bloustein School welcomes current and prospective Rutgers-New Brunswick students to consider the Planning and Public Policy minor. Students should declare a minor with their matriculating school. They need not apply for minor status with the Bloustein School. Only courses with a grade of 'C' or better can be counted toward the minor program of study.

This minor is well-matched to majors in economics; labor studies & employment relations; political science; geography; sociology; urban planning and design; as well as the pre-law track.

Students seeking the Planning and Public Policy minor must complete three core courses and five elective courses in course code 762, excluding those designated for 'majors only'.

- 10:775:101 Introduction to Planning, Policy and Health (3)
- Five electives selected from all the undergraduate Bloustein courses that are open to non-majors. At least four of the five must be 300 or 400-level.

For the most current configuration of courses for the Planning and Public Policy minor, please see the school's website at https://bloustein.rutgers.edu/undergraduate/planningandpublicpolicy/#minor

Planning and Public Policy Certificate Programs

The Bloustein School currently offers four Planning and Public Policy certificates open to all Rutgers-New Brunswick undergraduates. Certificate programs are open to students in any major and are awarded with, or subsequent to, a bachelor's degree. Only courses with a C or better may be applied toward a certificate program.

Certificates do not qualify as a minor. **Students must declare their intention to pursue a certificate program with the Bloustein School before their last semester of study in order to qualify to receive a certificate.** Awarded certificates appear on the student's final transcript.

For the most current configuration of courses for each certificate, please see the school's website at https://bloustein.rutgers.edu/undergraduate/#certificates¿

- Community Development Certificate (24 credits)
- Community Sustainability Certificate (18 credits)
- Urban Planning Certificate (24 credits)
- Historic Preservation Certificate (15 credits)

Assistant Professor of Teaching:

Dugan McGinley, B.A., Loretto Heights College; Ph.D., Temple

Religion 840 (SAS)

Learning Goals

Learning Goals

The religion graduate is expected to have an appreciation of the diversity of humanity's religious traditions. No student will recall all the factual information related to a religious tradition, but each should have enough knowledge to form a general picture of the religious traditions she or he has studied. Beyond the content of religious traditions, a religion graduate should be able to identify and coherently discuss the conceptual issues that shape the academic study of religion. There are many such issues, ranging from those usually identified with the humanities (such as philosophy, literature, music, history) to those studied more commonly in the social sciences (such as psychology, sociology, anthropology, political science).

In order to develop a deeper sense of religion as an academic discipline, students should familiarize themselves with the core learning goals that motivate the teaching of religion. These learning goals animate the basic structure and formal requirements of individual courses and underpin the structure of the major and minor in religion. In addition to the goals outlined here, individual courses may have more specific goals about the acquisition of factual information particular to the course. The goals outlined here are applicable to the entire range of departmental offerings and should be understood as working in conjunction with the goals specified for individual courses. The department's broad goals can be divided into three categories: conceptual learning goals that delineate the principles of the discipline; knowledge-based learning goals that relate to the specific features of particular religious traditions; and practical learning goals that define important skills that students can expect to develop by taking courses in religion.

Conceptual Learning Goals. Students who study religion at Rutgers University can expect to develop an understanding of the following concepts:

1. How religions are shaped by their own past and by the past of their society and institutions;

2. How religions continue to shape and be shaped by contemporary social and political structures;

3. How religions have shaped and been shaped by various forms of human expression, from philosophical and theological writing to ritual practices;

4. How the study of religion has developed as an academic discipline that stands outside particular religious traditions and studies religions through the methods and standards accepted in the secular academy;

5. How within the confines of that academic discipline there are many methods scholars use for understanding religion and many debates about and among those methods;

6. How to apply such methods to particular religious questions or situations.

Knowledge-Based Learning Goals. Students who study religion at Rutgers University can expect

1. to gain knowledge of the basic tenets and chronological data of at least one Western religious tradition: e.g., Judaism, Christianity, Islam. This will include knowledge of its primary texts, ritual, theology, ethics, and epistemology; its essential vocabulary; its influence on and the ways it has been influenced by its contexts; and its basic history as it has moved through time and into different places;

2. to gain knowledge of the basic tenets and chronological data of at least one eastern religion: e.g., Buddhism, Confucianism, Taoism, Hinduism. This will include knowledge of its primary texts, ritual, theology, ethics, and epistemology; its essential vocabulary; its influence on and the ways it has been influenced by its contexts; and its basic history as it has moved through time and into different places;

3. to gain knowledge of the universe of meaning internal to at least one particular religious tradition, including its central theological and philosophical questions, as well as the theological and philosophical answers proposed. This includes the ability to examine critically philosophical and other theoretical issues concerning the nature of reality, human experience, knowledge, value, ethics, and/or cultural production.

Practical Learning Goals. Students who study religion at Rutgers University can expect to develop the following practical skills:

1. The ability to read, understand, and discuss a variety of primary sources such as the scriptures of various religions, memoirs, rules for religious practice, theological and philosophical texts, and liturgical instructions;

2. The ability to read and understand analytical studies of religious issues written in academic prose;

3. The ability to conceptualize, research, structure, articulate, and defend an original thesis in both written and oral presentation;

4. The ability to work independently and to conduct independent research.

Religion 840 (SAS)

Major Requirements

Major Requirements

There are no prerequisites to declare a major in religion. A major in religion requires a minimum of 12 courses (36 credits) in the field, of which at least seven (21 credits) must be at the 300 level or higher. A maximum of five courses

(15 credits) numbered below the 300 level may be counted toward the major. All majors must take 01:840:211, 212 and a seminar course. A minimum grade of C is required for every course that counts toward the major.

Religion majors are required to take the vast majority of their 12 required religion courses in the Department of Religion at Rutgers University-New Brunswick. Students may use approved courses toward their major that are offered by other departments at Rutgers (cognate courses, determined on a case-by-case basis) or by non-Rutgers institutions (transfer courses). But the maximum number of the combination of cognate and transfer courses that can count toward a religion major is two. The department considers transfer courses in such cases based on whether they fit comparable courses in our department and are of a similar methodology, depth, and rigor. In some cases, the department will refuse to accept transfer courses or only allow them as general electives. Cross-listed courses count toward the major without prior approval as they are treated as regular courses offered by the department.

Religion 840 (SAS)

Minor Requirements

Minor Requirements

Students graduating with a minor in religion are required to have taken a minimum of six courses (18 credits) in the department of which at least three (9 credits) must have been at the 300 level or higher. A minimum grade of C is required for every course that counts toward the minor.

Religion minors are required to take the vast majority of their six required religion courses in the Department of Religion at Rutgers University-New Brunswick. Students may use approved courses toward their minor that are offered by other departments at Rutgers (cognate courses, determined on a case-by-case basis) or by non-Rutgers institutions (transfer courses). Cross-listed courses count toward the minor without prior approval as they are treated as regular courses offered by the department.

Religion 840 (SAS)

Departmental Honors Program

Departmental Honors Program

In order to graduate with honors, a student must complete a research thesis and departmental examination with grades of distinction. To qualify for honors in religion, a student must have a cumulative grade-point average of 3.0 or better and an average of 3.4 or better in the major. Qualified students should apply to the chair by March of their junior year. Those whose candidacy is accepted will consult with the department chair, and an adviser will be selected who will guide the student in the selection of an appropriate subject for the research thesis. Those whose candidacy is accepted should also enroll in 01:840:497 (3 credits) in the fall semester and 01:840:498 (3 credits) in the spring semester.

Religion 840 (SAS)

Courses

Courses

01:840:101 ***Gods, Myths, and Religions in a Secular Age (3)***
An introduction to the study of religion that focuses on myth; religious authority; purity and sacred space; ritual practices; and major theories of religion. Varied origins of religion and motifs in its development in different cultures.

01:840:105 ***Religions Now: 21st-Century Controversies (4)***
The role of religion in shaping major 21st-century events and issues, such as economic inequality, religious fundamentalism, and the roles of religion in politics.

01:840:111 ***The Hero's Quest: Religion, Mythology, and Harry Potter (3)***
A comparative study of religion focusing on the common theme of the hero's quest found in the mythologies of major world religions.

01:840:112 ***Death and Afterlife (3)***
Various religious concepts of death, resurrection, reincarnation, and other forms of afterlife; their relevance to this worldly life.
Open only to first-year students and sophomores.

01:840:115 ***The Birth and Death of God from Mesopotamia to Postmodernity (3)***
Explores how long-held conceptions of a cosmos full of many divine beings relate to more recent notions of monotheism and atheism.

01:840:118 ***Sports & Religion (3)***
Interpret sporting events, fan loyalty, stadium patriotism, and athletes¿ pre-game routines through the lens of ritual and religion. Case studies range from the ancient Near Eastern context, Bible, and ancient Olympics as classical war-related sports, as well as contemporary examples.

01:840:120 ***Jesus in the Movies (3)***
This course studies representations of Jesus of Nazareth in canonical Christian texts and in film.

01:840:121 ***Martyrdom: From the Maccabees to ISIS (1.5)***
Martyrdom as a historical, literary, and religious phenomenon. Tools that enable students to decipher martyrdom discourse in other contexts--including in interreligious conflicts (medieval and modern) and in American pop culture.

01:840:122 ***Saints, Sinners, and Scholars: A History of Christianity (1.5)***
Christian history, beginning with Jesus and the gospels (canonical and noncanonical), weaving through Late Antiquity, the Middle Ages, the Reformation, and the American context before ending with discussions of contemporary issues in Christianity.

01:840:123 ***The Bible in Aramaic (3)***
Introduction to Aramaic through biblical literature, including Aramaic Bible passages and vernacular translations into various Aramaic dialects, with a focus on Syriac version.
In English. Credit not given for this course and 01:563:146 or 01:013:111.

01:840:125 ***Political Islam: Past and Present (3)***
Introduction to Islamic political thought and practice. Emphasis on how historical knowledge can help us to understand contemporary debates over the place of Islam in the modern world.
Credit not given for both this course and 01:508:110 or 01:685:110.

01:840:132 ***Religion and the Arts (3)***
A survey of the ways the arts are used in religion and religion is used in the arts, with a focus on visual arts, music, dance and drama.

01:840:201 ***Introduction to the Bible I: Torah and Prose (3)***
Literature of the Bible, focusing on the Torah and the historical material in Joshua through Samuel. Emphasis placed on literary, historical, and theological matters. Special use made of archaeological discoveries. The Bible studied against the backdrop of ancient Near Eastern literature, history, religion, mythology, and law.
Credit not given for both this course and 01:563:220.

01:840:202 ***New Testament (3)***
Historical interpretation of early Christian literature, esp. the letters of Paul and the Gospels. The focus is on the influence of Jesus and Paul and the development of early Jesus-movements
Credit not given for both this course and 01:563:223.

01:840:203 ***Islamic Scriptures: Quran and Hadith (3)***
Introduction to sacred texts of Islam; emphasis on words and deeds of the prophet Muhammad, collectively known as the Hadith or Sunnah. Explores how revelation bridges the gap between the divine and human by examining Islamic scriptures in historical, theological, legal, and mystical contexts.
Credit not given for both this course and 01:685:233.

01:840:204 ***Hindu Scriptures (3)***
Interpretation of basic Hindu scriptures in their historical, literary, and theological contexts to see how they contributed to the development of various traditions and spiritual paths in Hinduism.

01:840:205 ***Introduction to Buddhism (3)***
Introduction to the diverse cultural, social, and intellectual histories of Buddhism across premodern and modern Asia.

01:840:206 ***Introduction to the Bible II: Prophets and Poetry (3)***
Literature of the Bible, focusing on the Prophets, the historical backdrop of the prophetic message as revealed mainly through the book of Kings, and other relevant poetic material (Psalms, Job, etc.).
Credit not given for both this course and 01:563:206.

01:840:207 ***Buddhist Literature and Film (3)***
An introduction to the diverse histories and cultures of Buddhism through an exploration of Buddhist literature and film.

01:840:208 ***Greek and Roman Religions (3)***
Study of Greek and Roman gods and goddesses, cults, and practices of the classical Greek world, Roman Republic, and Roman Empire.
Credit not given for both this course and 01:190:211.

01:840:211 ***Religions in Asia (3)***
Religious beliefs, practices, and sacred writings of Hinduism, Buddhism, Confucianism, Taoism, and Shinto.

01:840:212 ***Religions of the Western World (3)***
Religious beliefs, practices, and sacred writings of Judaism, Christianity, and Islam.

01:840:213 ***Christianity: Origins, History, Contemporary Issues (3)***
The Christian faith from its origins to the contemporary world with emphases on the earliest communities, Christians in the Roman Empire, the medieval dominance of the Christian Church, Protestant and Catholic Reformations, Christianity and colonialism, secularism, Christian responses to modernity, Christianity around the world in the 21st century.

01:840:220 ***Abortion: The Collision of History, Law, Religion, Medicine, and Human Rights in the 20th and 21st Centuries (3)***
Abortion is one of the most socially contested issue of our time. Using a historical and sociological lens, this course seeks to understand the issues in more contextual and less polemic manner. This course will explore the history of abortion, key legal and public health aspects, the anti-abortion social movement, the realities of abortion provision, abortion in popular culture and public opinion, and abortion in the international arena.
Credit not given for both this course and 01:512:221.

01:840:222 ***The Question of God in Modern Culture (3)***
Fundamental issues surrounding the question of God in modern culture.

01:840:224 ***Hinduism (3)***
Historical development of religious beliefs and practices in the culture of India; syncretism, mysticism, devotion, and personal disciplines.

01:840:226 ***Islam (3)***
Muhammad and the development of Muslim beliefs and practices; major movements and their effects on historical and current events.
Credit not given for both this course and 01:840:326, 01:685:226, or 01:685:326.

01:840:227 ***Islam in the Modern World (3)***
Survey of Islam from the colonialist period to the present. Examines the ways in which Islamic beliefs, values, and worldviews inform historical, social, and political movements globally. Includes recent phenomena such as the Arab Spring, the role of technology, and contemporary Muslim pop culture.

01:840:228 ***History of Islamophobia (3)***
This course surveys the history of Western anxiety about Islam from its origins to the present, exploring the theological, political, and cultural forces behind it. It examines how Islamophobia has been institutionalized through discrimination, exclusion and violence against Muslims and those perceived as Muslim. The term 'Islamophobia' is analyzed through engaging with multidisciplinary debates that interrogate the term and its limitations, and its complex relation to religious bias and racism.

Credit not given for both this course and 01:508:203 or 01:685:241.

01:840:229 *Introduction to the Qur'an (3)*
Academic study of the Qur'an including the origin of the Qur'an, its role as a cultural and historical phenomenon; various controversies and disputes that have revolved around the Qur'an; different schools of thought regarding interpretation of the Qur'an; and development interpretative schools over time as the needs and understandings of any given society have developed. Taught in English. No prior knowledge of the Arabic or of the Qur'an is required.
Credit not given for both this course and 01:013:220.

01:840:233 *Religion & Music (3)*
An examination of the ways music is used in religion and religious themes are used in music. Music in the major religions of the world will be addressed, along with a focus on music in Western and American culture, from classical to contemporary forms.

01:840:240 *Love as Ethic and Idea (3)*
Judeo-Christian religious tradition, viewed through the concept of love as moral and theological ideal, from the biblical period to the present.

01:840:241 *Introduction to Rabbinic Literature (3)*
Traces the historical developments that led to the establishment and eventual dominance of rabbinic Judaism. Close readings of various rabbinic texts (especially the Mishnah and the Tosefta).
Credit not given for both this course and 01:563:241. No prior knowledge required; all readings in English.

01:840:242 *Introduction to Ancient Judaism (3)*
Historical development of Judaism in ancient times from its origins in c.1200 BCE through the Roman period c.300 CE. Emphasis on the beliefs and practices of ancient Judaism during biblical and postbiblical periods as reflected in the literature of the times (such as the Bible, Dead Sea Scrolls, and Mishna) and in the archaeological record.
Credit not given for both this course and 01:563:222.

01:840:250 *Spirituality and Mysticism in Judaism*
This course offers a historical survey of Jewish mystical traditions from the Bible and early Rabbinic traditions through later medieval works, including the core book of Jewish Kabbalah, the Zohar. The course emphasizes Jewish mystical discussion of the relationship between God and man, the spiritual dimensions of everyday practices, and kabbalistic understanding of God.
Credit not given for both this course and 01:563:250.

01:840:263 *Religion and Reproduction: Jewish and Christian Experiences (3)*
Exploration of the intersection of religion and reproduction the United States and Israel in shaping reproductive practices, norms, and policies. Ethnographic case studies of reproduction among Jews and Christians with some attention to historical analyses and philosophical commentaries. Gender and religion will form the two primary modes of analysis for the study of reproduction.
Credit not given for this course and 01:790:264, 01:563:264 or 01:988:220.

01:840:265 *Women in the Bible (1.5)*
The role of women in the Jewish Bible/Old Testament stories; also addresses the question of the role of women in ancient Israelite society.

01:840:285 ***Sanskrit I (3)***
Sanskrit grammar instruction and some reading of primary Sanskrit texts. Acceptable for beginning and intermediate students.

01:840:286 ***Sanskrit II (3)***
Sanskrit grammar instruction and some reading of primary Sanskrit texts. Acceptable for beginning and intermediate students.
Prerequisite: 01:840:285 or placement.

01:840:301 ***Ancient Near Eastern Religions (3)***
Religious patterns in Mesopotamia, Anatolia, Canaan, Israel, and Egypt from texts in translation; their impact on cultural development of the Near East.
Not open to first-year students. Credit not given for both this course and 01:563:324.

01:840:302 ***The Bible and Archaeology (3)***
Analysis of material evidence, such as archaeological remains of monuments and inscriptions, from ancient Israel and Judah, as well as the broader ancient Near East, in order to develop a fuller reconstruction of biblical society and culture.
Prerequisite: 01:840:201 or 01:563:220 or permission of instructor.

01:840:303 ***Hebrew Prophets: Social and Religious Thoughts (3)***
Development and diffusion of Israelite prophetic thought from early associations with divination in Near Eastern culture through the Exile and later decline.
Prerequisite: 01:840:201 or 01:563:220 or permission of instructor. Not open to first-year students. Credit not given for both this course and 01:563:325.

01:840:305 ***Apocalypse Now? Religious Movements and the End of Time (3)***
Compares ancient, medieval, and contemporary apocalyptic movements. Case studies include the Jewish apocalyptic movement associated with the Dead Sea Scrolls and Pauline Christianity, medieval apocalypticism surrounding Joachim of Fiore and the Crusades, and more contemporary movements such as Jonestown and the Left Behind series of Christian thrillers.

01:840:306 ***Minorities in the Middle East (3)***
Survey of the peoples, languages, and religions found in the contemporary Middle East, with a focus upon underrepresented groups and transnational issues. Emphasizes their histories, their roles in the contemporary Middle East, and their evolving relationships with the dominant groups of the nations in which they are found.
Credit not given for both this course and 01:013:308 or 01:685:306.

01:840:307 ***Jesus (3)***
Career and teaching of Jesus viewed in historical context; development of the Gospel tradition and its effect on later concepts of Christ.

01:840:308 ***Paul (3)***
Letters of Paul in historical context: his background, conversion, and apostolic mission; the development and influence of his thought on later Christianity.

01:840:310 ***Jesus the Jew (3)***
Explores the historic figure of Jesus within the context of first-century Palestinian Judaism. Topics include Jesus and the Law, Jesus and the Temple, the problem of religious authority and types of religious leaders, the Sermon on the Mount, and the "Parting of the Ways."
Credit not given for both this course and 01:563:341.

01:840:311 ***Christians, "the Other," and Violence (3)***
History and analysis of Christians as victims and perpetrators of violence, from early Christianity to the early modern period. Includes the study of martyrdom, imperial and medieval Christianity, crusades, and the European Wars of Religion.

01:840:312 ***Greek Christianity (3)***
Eastern church tradition from the second through the eighth centuries; theological controversies and the development of liturgy, monasticism, and mysticism.

01:840:313 ***Latin Christianity (3)***
Western church tradition from the third through the 13th centuries; theological controversies and the development of sacraments, papacy, and religious orders.

01:840:314 ***Origins of Western Morality (3)***
Covers Hellenistic philosophy, the Greek translation of the Hebrew Bible, the letters of Paul, the teaching attributed to Jesus in writings from the end of first century CE, and the development of ascetic practices and ideology. Issues include the variety of ancient options available for thinking about ethical psychology, the concept of porneia and the attack on traditional Mediterranean religion, the family/household and opposition to it, wealth/poverty, slavery, sexual ethics, and gender.

01:840:315 ***Protestant Reformation (3)***
Reform movements in the Western Christian world from the 14th through 18th centuries; focus on figures who formed Protestant thought, such as Luther, Calvin, Cranmer, Fox, Wesley.

01:840:316 ***Evangelicalism in the United States (3)***
Explores key developments within contemporary American evangelicalism, focusing especially on evangelicals' varied responses to major political, economic, social, and cultural trends in the United States during the 20th and early 21st centuries.

01:840:317 ***Catholicism and the Modern World (3)***
Roman Catholicism from the French Revolution to the present; thinkers such as Lammenais, Newman, and Gilson; topics such as liturgy, political rights, theological pluralism.

01:840:318 ***Contemporary Catholic Theology (3)***
Selected themes in the thought of 20th-century Roman Catholic figures, such as Rahner, Schillebeeckx, Küng.

01:840:319 ***Religion in American History (3)***
Survey of American religious history, exploring the relationship between religion and trends in such areas as politics, science, technology, gender relations, economy, and immigration.

01:840:321 ***Yoga: History and Philosophy (3)***
Close reading of the *Yoga Sutras of Patanjali*, with particular attention to premodern commentaries on the text and the traditional understanding of the practice of classical yoga and its goals. History of yoga in India, its expressions in classical traditions of the subcontinent, and its transplantation to the West.

01:840:323 ***History of Buddhism (3***
)Rise of Buddhist theory and practice in the context of Indian culture; encounters with indigenous religions of East and Southeast Asia; development of Theravada, Mahayana, and Vajrayana.
Credit not given for both this course and 01:925:323.

01:840:324 ***Chinese Religions (3)***
Religious concepts and classic texts of Confucianism and Taoism; relation of religion to society and self in China, including role models and paradigms for self-transformation; alchemy and meditation.

01:840:325 ***Prophet Muhammad (3)***
Muhammad's prophetic career in historical context; mystical and devotional tradition centering on him in Sunni and Shi'i Islam; sociopolitical reform movements based on prophetic model.
Credit not given for both this course and 01:685:325.

01:840:327 ***Encounter of Religions (3)***
Religions in a pluralistic world; concepts of God, man, spirit, freedom as understood in East and West. Interreligious dialogue, religious synthesis, and universalism.

01:840:328 ***Shi'i Islam (3)***
History, doctrines, rituals, theosophy, and structure of authority of the major schools of Shi'i Islam, with a focus on the Twelver Imami tradition from its beginnings until the present day.

01:840:330 ***Religion in Latin America (3)***
Exploration of the religious complexity of Latin America, including Christianity, indigenous and syncretic practices, and traditions.
Credit not given for both this course and 01:590:330.

01:840:331 ***Myth and Religion: From Gilgamesh to White Nationalism (3)***
Surveys a range of myths and subtypes, including myths about place and location; creation and recreation (apocalypses); political-religious conquest and domination; common ancestors and ethno-religious identity; and diverse forms of nationalism. Surveys critical academic approaches to the study of myth and mythmaking.

01:840:333 ***Caribbean Religion (3)***
Examines the history and role of the diverse religious components of the Caribbean Basin from indigenous practices to Catholicism, Protestantism, Judaism, and the emergence of African belief systems such as Vodou, Santeria, and Rastafarianism from the 18th century to the present.
Credit not given for both this course and 01:595:333.

01:840:334 ***Healing: Sacred and Secular (3)***
Examination of healing as a religious process in various cultures; discussion of transition from sacred healing to secular medicine and psychotherapy in the West.

01:840:335 ***Buddhist Meditation Traditions (3)***
Introduction to Buddhism. Explores meditative techniques/practices for attaining enlightenment, with emphasis on Zen (Ch'an) meditation and roles played by Koan and Zazen in this process of transformation.

01:840:337 ***Tibetan Religions (3)***
Historical development of Tibetan religious beliefs and practices, with a focus on the four main Buddhist schools, the Bön tradition, and Muslim populations. Other topics include religion and politics, literature, pilgrimage and ritual, monasticism, gender, art and iconography, and global context.

01:840:339 ***Dead Bodies in Buddhism (3)***
Investigation of the significance of dead bodies in Buddhist history, thought, literature, and practice, across different Asian cultural contexts, from antiquity to the present.

01:840:340 ***The Dead Sea Scrolls (3)***
Introduction to the history and scholarship surrounding the Dead Sea Scrolls.
Credit not given for both this course and 01:563:340.

01:840:342 ***Religious Experience and Contemporary Culture (3)***
Religion and modern consciousness as investigated by the social sciences; topics such as the function of religion, secularism, and modernity.

01:840:343 ***Religion and Politics (3)***
Function of religion in initiating social and political changes by envisioning the future, formulating utopian blueprints, and providing transcendent norms for social criticism.
Not open to first-year students.

01:840:345 ***Hindu Gurus in the West (3)***
Lives and teachings of Vivekananda, Aurobindo, Sivananda, Yogananda, Rajneesh, and others. Classical texts and problems of innovations and preservation. Sociological and psychological issues of transplanting the guru-disciple relationship to Western soil.

01:840:346 ***Sexuality in the Western Religious Traditions (3)***
Ideas and problems in Catholic, Protestant, and Jewish normative traditions on sexuality. Topics include sexuality and human nature, sexual identity/roles, marriage and family.
Credit not given for this course and 01:888:337.

01:840:347 ***War, Peace, and Violence in Western Religious Thought (3)***
Ideas of just war, holy war, and pacifism in Judaism, Christianity, and Islam; their relation to contemporary issues of war and peace.

01:840:350 ***Women in Eastern Religions (3)***
Images and roles of women in major Asian religions: Hinduism, Buddhism, Confucianism, and Taoism. Women's autobiographical accounts of religious experiences, attitudes toward women expressed in these religious institutions, the feminine as a symbol of the divine, representative great goddesses such as Kuan-yin.

01:840:351 ***Women and Gender in Western Religions (3)***
Images and roles of women in Judaism, Christianity, and Islam; attitudes toward women expressed in these religious institutions; religious experiences of women mystics and religious practices favored by women; impact of gender roles and expectations on both women and men.
Credit not given for both this course and 01:988:349.

01:840:352 ***Religion and Science (3)***
Theories of religious and scientific knowledge, cosmology and astronomy, life and creation.

01:840:353 ***Origins of Hell in the Christian West (3)***
Myths about the underworld, the heavens, and post-mortem existence, especially focusing on the emergence of "hell" as a place of punishment in the Christian West.
Prerequisite: 01:840:212.

01:840:356 ***Sufism: Mystical Islam (3)***
Based essentially on primary sources. Examines both Islamic mystical theory and practice, paying particular attention to a range of core Sufi doctrines.
Credit not given for both this course and 01:685:356.

01:840:357 ***Krishna (3)***
Examination of the various faces and theologies of Krishna, one of the most important Hindu deities. Depiction in the Mahabharata, Bhagavad Gita, and Bhagavata Purana with reference to rasa theory, a medieval taxonomy of various moods in which the devotee approaches God as a lover, child, friend, or master.

01:840:358 ***Bhagavad Gita (3)***
Analysis of this important Hindu scripture. Study of influential commentaries. Attention to Indian and Western appropriations of the text.

01:840:359 ***Ayurveda--The Traditional Healing System of Ancient India (3)***
Study of Indian medicine through examination and analysis of its history, literature, fundamental concepts, principles, and methods using primary source materials as the chief basis for learning. Attention also given to Ayurveda in modern India along with its adoption by the West.
Some knowledge of Hinduism strongly recommended.

01:840:361 ***Women in the Bible (3)***
Literary readings of biblical stories about women, with special emphasis on their roles, representation, and literary types. All texts in English translation.
Credit not given for both this course and 01:563:322 or 01:988:314.

01:840:362 ***Postmodern Approaches to Sacred Literature (3)***
Postmodern literary analysis of religious texts drawn from Jewish, Christian, and Hindu traditions.
Credit not given for both this course and 01:359:366 or 01:195:318.

01:840:363 ***Women and Islam (3)***
An examination of women's role in Islam through analysis of the primary Islamic texts: the Qur'an, the Hadith, and Tafsir; and the narratives about the historical figures of the Prophet's wives and female relatives. Relevance of this tradition for Muslim women in the 21st century.

01:840:364 ***Sikhism and North Indian History (3)***
The history of the Sikh religious tradition from the 16th century up to the present day.

01:840:365 ***Law and Religion in Asian History (3)***
Comparative examination of relationships between religion and law in South, Southeast, and East Asian history. Thematic foci include issues related to class, cosmology, gender, power, jurisprudence, textual practice, legal ritual, secularism, and colonialism.

01:840:366 ***The Yoga of Devotion: Bhakti (3)***
Overview of some of the main forms Hindu devotion, Bhakti, has taken over the centuries. Attention paid to the main streams of Bhakti focused on Shiva, Vishnu, and the various forms of the Goddess.

01:840:367 ***Taoist Philosophy (3)***
Focuses on two foundational texts of classical Taoism, the *Dao De Jing (Tao Te Ching)* and the *Zhuangzi (Chuang Tzu)*. Close examination of texts and study of various interpretations, both traditional and contemporary. Brief examination of Taoist influence on the West as well as Western transformation of Taoism.

01:840:368 ***Hindu Philosophy (3)***
Upanishads, Patanjali, Bhagavad Gita; theories of matter, energy; states of consciousness; meditation. Yogas of knowledge, action, devotion. Karma. Ethics. Comparison of Hindu and Western cosmology.
Credit not given for both this course and 01:730:368.

01:840:369 ***Buddhist Philosophy (3)***
Interdependence, impermanence, relativity; suffering; path to liberation; meditation; karma as cosmic justice; death and rebirth. Compassion as a central ethical value. Theravada, Mahayana, and Tibetan Buddhism.
Credit not given for both this course and 01:730:369.

01:840:370 ***Buddhism, Society, and Politics in South East Asia (3)***
An exploration of the histories of Buddhist social and political culture in Southeast Asia from premodernity to the present.

01:840:371 ***Alternative Islams (3)***
Diversity of religious thought among Muslims, and their religion's dynamic development from Islam's formative period until the present day. Major schools which offer an alternative vision of Islam such as: Sufis, Twelver Shi'is, Ismailis, Alawites, Alevis, Wahhabis, Salfis, the Ahmadiyya, the Nation of Islam, and Progressive Muslims.

01:840:372 ***Islamic Mystical Literature (3)***
Examines literary output of mystics in the Islamic world. Focus on mystical teachings; attention also paid to poetry, biography, and the modern novel, all in English translation.
Credit not given for both this course and 01:013:372.

01:840:373 ***Islam in/and America (3)***
Explores the polycultural presence of Islam in the Americas from the early colonial period to the present, issues of gender and sexuality, U.S. foreign policy and its consequences, pre- and post-9/11 racializing practices, and the contemporary terrains of Muslim American culture.
Credit not given for both this course and 01:050:344.

01:840:374 ***Islamic Philosophy (3)***
Exploration of the main themes of Islamic philosophy, focusing on topics such as wisdom, the good life, and relations between metaphysical, moral, doctrinal, and practical knowledge.
Credit not given for both this course and 01:685:374 or 01:730:374.

01:840:375 ***Buddhism and the Family (3)***
Examines the relationship of Buddhism and the family in interdisciplinary and comparative context, across Asia, from antiquity to the present.

01:840:377 ***Islam and African Literature (3)***
Impact of Islam on African literature, and Islam as a theme of literary expression.
Credit not given for both this course and 01:013:314.

01:840:379 ***Early Chinese Religion and the Origins of Morality in China (3)***
Interconnected worlds of religion, politics, and morality in Confucian, Mohist, and Daoist (Taoist) thought and practice.

01:840:380 ***Religious Healing in the United States (3)***
History of religious healing in the United States, including major social, cultural, economic, and political trends and relationship with modern medicine.

01:840:381 ***Religion, Law, and the American Constitution (3)***
A course that studies Religion in American Constitutional Law, focusing especially on Supreme Court cases related to religion from the 19th century to the present. Interpretation of the establishment and free exercise of religion clauses in the First Amendment has been and remains a vital issue for American democracy and civil rights. This course seeks to provide context and analytical tools for understanding religion's role in American law, and vice versa

Credit not given for both his course and 01:512:222.

01:840:383 ***God and the Gods (3)***
Examination of three core issues in the way Judaism and other religious communities conceive of the divine: monotheism versus polytheism, the physical form of God, and God's gender.
Credit not given for this course and 01:563:313.

01:840:385 ***Reading Sanskrit (3)***
Reading of primary texts in the Sanskrit language. Acceptable for advanced intermediate and advanced students.
Prerequisite: 01:840:286 or placement.

01:840:386 ***Sanskrit: Reading Primary Texts II (3)***
Reading of primary texts in the Sanskrit language, continuing the course of study initiated in Sanskrit: Reading Primary Texts I (01:840:385) . Acceptable for advanced intermediate and advanced students.
Prerequisite: 01:840:385 or placement.

01:840:387 ***The English Bible (3)***
The English Bible, its literary variety, and the evolution of its text. Special attention will be given to problems of interpretation and translation and their Hebrew and Greek origins. Prerequisite: 01:355:101 or equivalent.
Prerequisite: 01:355:101 or 103 or 104 or equivalent. Credit not given for this course and 01:358:398 or 01:563:326.

01:840:403 *Seminar on the Vedanta Sutras (3)*
Overview of the main schools of Vedantic thought up to the medieval period--Sankara, Ramanuja, Madhva, Nimbarka, Vallabha, and Baladeva. Attention to some prominent points of agreement as well as contestation among some of these schools. Focus on primary texts.
Only open to majors in their junior or senior year. Some prior knowledge of Hindu philosophy recommended.

01:840:404 *Seminar in Christian Monasticism (3)*
Evolution and ideals of Christian Monasticism from early Christianity to the 17th century; interaction between monks and nuns and the rest of society.
Only open to majors in their junior or senior year.

01:840:405 *Western Encounter with Hinduism (3)*
Overview of representations of India on the Western religious landscape stemming from the earliest interactions between West and East, subsequent cultural and intellectual exchanges, eventual colonization of the subcontinent, and the postcolonial aftermath. Special attention paid to the Orientalist construction of Hinduism during this period.
Prerequisites: 01:840:211 and 212. Open only to majors in their junior or senior year.

01:840:410 *The Evolution of Christian Orthodoxy 300-787 CE (3)*
History, theology, and social context of the formation of Christian orthodoxy from the First Council of Nicea to the Second Council of Nicea.
Credit not given for both this course and 01:489:314. Open only to majors in their junior or senior year.

01:840:420 *Seminar in Religion and Psychology (3)*
Advanced topics in religion and psychology.
Prerequisites: At least one course in religion and one course in psychology or by permission of instructor. Open only to majors in their junior or senior year.

01:840:421 *Seminar in Religion and Society (3)*
Interaction of religion and society in the thought of selected theologians, ethicists, and sociologists of religion.
Prerequisite: One course in Western religious traditions or permission of instructor. Open only to majors in their junior or senior year.

01:840:423 *Seminar in Buddhism (3)*
Builds on a basic knowledge of Buddhism. Psychological implications of central Buddhist teachings--dependent origination, not-self/no-self, and emptiness--as discussed within key Indian Buddhist texts. Critical examination of modern scholars' attempts to interpret and/or appropriate them via modern psychology, especially psychoanalysis.
Prerequisite: 01:840:211 or 323 or permission of instructor. Open only to majors in their junior or senior year.

01:840:424 *Seminar in Religion and Science (3)*
Contemporary topics in the relationship between science and religion. Potential topics include evolution; cosmology and creation; mind, brain, and consciousness; religious and scientific methods. Topics change from year to year.
Prerequisite: One course in religion or permission of instructor. Open only to majors in their junior or senior year.

01:840:425 ***Seminar on Law and Religion (3)***
Examines recent scholarship concerning the relationship between religion and law in comparative historical, ethnographic, and theoretical perspective.

01:840:428 ***Topics in the Study of Religion (3)***
Topics in the study of religion.

01:840:430 ***Seminar on Religious Fundamentalisms and Modernisms in the United States (3)***
Assesses scholarly definitions of religious fundamentalisms and modernisms in the United States. Examines the evolution of these traditions as they responded to specific historical trends related to politics, science, technology, gender relations, the economy, and immigration.

01:840:456 ***Seminar on Rumi (3)***
On the basis of primary sources in English translation, focus on Rumi's didactic writings (poetry and prose) in order to identify his distinctive teachings and their place in the context of the Sufi tradition and Persian mystical literature. ***Prerequisite: 01:840:226 or 356 or 372. Open only to majors in their junior or senior year.***

01:840:457 ***Seminar in Islamic Spirituality (3)***
Investigates the historical development of Islamic mystical traditions and the most influential theories of mysticism, and the poetry exemplifying it, in relation to Islamic theological dogmas. No knowledge of foreign languages is required.

01:840:458 ***Seminar on Islamic Thought (3)***
Examines critically the development of Islamic intellectual traditions, from the first writings of the scholastic theological disciplines of theology and jurisprudence to contemporary reformist discourses.

01:840:497-498 ***Honors in Religion (3,3 or 6,6)***
Both semesters must be completed to receive credit.

RUSSIAN 860

Department of Germanic, Russian, and East European Languages and Literatures, School of Arts and Sciences

Website: http://reell.rutgers.edu

Chair: Martha Helfer (Acting): Michael Levine

Undergraduate Director: Chloë Kitzinger

Associate Professor:

Pavel Khazanov, B.A., California (Los Angeles); M.A., Center for Research in Modern European Philosophy (London); Ph.D., University of Pennsylvania

Chloë Kitzinger, B.A., Yale; M.A., Middlebury; Ph.D., University of California (Berkeley)

Emily Van Buskirk, B.A., Princeton; Ph.D., Harvard

Assistant Teaching Instructor:

Cori Anderson, B.A., North Carolina (Chapel Hill); M.A., Ph.D., Princeton

Lecturers:

Svetlana Bogomolny, B.A., Hebrew (Israel); Ed.D., Iowa

Lidia Levkovitch, B.S., Drexel; B.A. Ph.D., Rutgers (New Brunswick)

Mi E. Li (Tatiana), M.A., Sakhalin State (Russia); Ph.D., Moscow State Pedagogical (Russia)

Agnieszka Makles, M.A., Jan Dlugocz (Poland); M.A., Michigan State

Learning Goals

Learning Goals

Majors in Russian language and literature will:

1) have a solid foundation in the Russian language and a broad introduction to Russian culture, particularly literary culture, during the Imperial, Soviet, and post-Soviet periods;

2) demonstrate a grasp of critical practices, including close readings, and an ability to analyze Russian literature within specific historical, social, and cultural contexts;

3) be able to critically examine how Russian literature constructs a model of reality and a particular set of values;

4) be able to communicate complex ideas effectively in standard written English, and to critically evaluate sources and use the conventions of citation and attribution correctly;

5) be expected to study Russian literature within a broad interdisciplinary perspective in order to analyze and synthesize information and ideas from multiple sources (related fields include comparative literature, Russian history, art history, music, film, and the politics of Soviet and post-Soviet Russia);

6) learn how to effectively use tools (reference works, internet, etc.) and technology appropriate to learning Russian. Using primary sources, they will be able to analyze issues concerning Russia and relate them to other areas in the humanities and social sciences.

7) demonstrate language proficiency at the 300-level or above, i.e., be able to communicate effectively in the language; read a variety of literary and nonliterary texts in the original; achieve intermediate to advanced competency in speaking, reading, and writing; and have basic knowledge of the structure of Russian.

Major in Russian Language and Literature

Major in Russian Language and Literature

The major in Russian language and literature aims to provide a solid foundation in the Russian language and a broad introduction to Russian culture, particularly literary culture, during the Imperial, Soviet, and post-Soviet periods. Students are expected to achieve fluency in Russian that will allow them to communicate with native speakers of Russian in both oral and written form and to read a variety of literary and nonliterary texts in the original. The major grounds the study of literature within specific historical, social, and cultural contexts. It includes the study of Russian film, music, and elements of literary and cultural theory. It also fosters a broad interdisciplinary perspective by encouraging students to take additional coursework in Eastern European history, art history, and the culture and politics of eastern Europe and the former contiguous Soviet bloc.

Russian 860 (SAS)

Major Requirements

Major Requirements

The major consists of a minimum of 36 credits or 12 courses in Russian language and literature, including at least 18 credits at or above the 200 level. Students must complete all required coursework for the major with grades of C or better. All majors must fulfill the following requirements:

1. six language courses beyond 101. One semester of the Practicum may count toward language credit. Intensive Rutgers summer program 8-credit courses may count as two language courses, assuming adequate progress. Students whose knowledge of Russian places them beyond 01:860:302 are required to substitute other 860 courses to complete a total of 36 credits.
2. two surveys: 01:860:259 Introduction to 19th-Century Russian Literature and 01:860:260 Introduction to 20th-Century Russian Literature
3. 01:860:315 Reading Russian Literature in Russian
4. three electives offered in the department at 200-400 level, at least one of which will be a 400-level course

Up to two electives approved for the Minor in Slavic and East European Studies (861) may be counted toward the Russian major.

Russian 860 (SAS)

Minor Options

Minor Options

Students may choose from among three minor options:

1. Minors in Russian language and literature will have the ability to analyze works of literature in themselves and in their historical context. They will be able to critically assess sources and use the conventions of attribution and citation correctly. Depending on their entry level, they will have the ability to communicate in Russian and read original texts. All will have a basic understanding of the nature of the Russian language. This minor is fulfilled by successful completion of the following set of six courses with a grade of C or better:

- three language courses beyond 101 or 207
- three literature electives from the 200 or above-level courses offered in the department

2. Minors in Russian language will have a solid understanding of the Russian language and be able to communicate effectively in oral and written forms. They will also be able to read literature and other texts in the original. All will have a basic understanding of the nature of the Russian language. This minor is fulfilled by successful completion of the following set of six courses with a grade of C or better:

- five language courses beyond 101 or 207 (one semester of the Practicum may count toward this requirement)
- one literature course with readings in Russian, to be chosen from the following: 315, 401, 402, 403, 404, or 407 (a different course that requires reading texts in Russian, such as 01:860:332 or 01:860:433, may fulfill this requirement upon approval from the program director)

3. Minors in Russian literature (an option for students who wish to study Russian literature in translation) will have the ability to analyze works of literature in themselves and their historical context. They will be able to critically assess sources and use the conventions of attribution and citation correctly. Minors are also encouraged to study Russian literature within a larger European and global context by taking courses in comparative literature and other national literatures. This minor is fulfilled by successful completion of the following set of six courses with a grade of C or better:

- two survey courses: 259 and 260
- four electives in Russian literature

Note: Refer to section Minor in Slavic and East European Studies 861

Russian 860 (SAS)

Transfer Credit Policy

Transfer Credit Policy

Transfer students wishing to major in Russian language and literature must take at least eight of their 12 courses (above 101) at Rutgers. That is, the program will accept no more than four transfer credit courses toward the Russian major. Exceptions are made only in rare cases and require the permission of the program director.

Transfer students wishing to minor in Russian language, Russian literature, or Russian language and literature must take at least four of their six courses (above 101) at Rutgers. That is, the program will accept no more than two transfer credit courses toward the Russian minor, in any of its three tracks. Exceptions are made only in rare cases and require the permission of the program director.

Russian 860 (SAS)

Departmental Honors Program

Departmental Honors Program

To qualify, a student must have a cumulative grade-point average of 3.0 or better and an average of 3.4 or better in the major at the end of the junior year. At that time, the student should make a formal application. During their senior year, in addition to fulfilling major course requirements, candidates who are accepted by the discipline honors committee take 01:860:496-497, in which they complete a major research paper under the direction of an adviser.

Russian 860 (SAS)

Russian Language Courses

Russian Language Courses

01:860:101 ***Elementary Russian I (4)***
Spoken and written contemporary standard Russian, intended for students with no prior experience in the language. Development of proficiency in speaking, reading, listening, and writing, as well as the basics of Russian grammar. Introduction to Russian life, culture, history, geography, and traditions.

01:860:102 ***Elementary Russian II (4)***
Spoken and written contemporary standard Russian, intended for students with no prior experience in the language. Development of proficiency in speaking, reading, listening, and writing, as well as the basics of Russian grammar. Introduction to Russian life, culture, history, geography, and traditions.
Prerequisite: 01:860:101 or placement.

01:860:103 ***Elementary Russian Conversation I (1)***
A one-hour course to supplement Elementary Russian I, providing extra practice with speaking and listening, pronunciation, and grammar of standard contemporary Russian, while also exposing students to additional products and practices of Russian culture as well as history.
Corequisite: 01:860:101.

01:860:104 ***Elementary Russian Conversation II (1)***
A one-hour course to supplement Elementary Russian II, providing extra practice with speaking and listening, pronunciation, and grammar of standard contemporary Russian, while also exposing students to additional products and practices of Russian culture as well as history.
Corequisite: 01:860:102.

01:860:105 ***Intensive First Year Russian Abroad***
Intensive introduction to fundamentals of the Russian language for beginners. Focus on grammar, phonetics, and conversation. Taught in Russian. After completion, students may still receive credit for 860:102, depending on placement.
Credit not given for both this course and 01:860:101.

01:860:106 ***Intensive First Year Russian Abroad***
Intensive introduction to fundamentals of the Russian language for beginners. Focus on grammar, phonetics, and conversation. Taught in Russian. After completion, students may still receive credit for 860:102, depending on placement.
Credit not given for both this course and 01:860:101 and 102.

01:860:111 ***Russian Conversation I (1)***
Russian Conversation I is a one-credit, mixed-level course to supplement the four-credit language courses Elementary Russian I and Intermediate Russian I. The course provides extra practice with the pronunciation, phonetics, intonation, and grammar of Russian, while also introducing students to additional products and practices of Russian culture and history. The course may be repeated for credit, as the content changes each semester. Suitable for students in 01:860:101 and 01:860:201.

01:860:112 ***Russian Conversation II (1)***
Russian Conversation II is a one-credit, mixed-level course to supplement the four-credit language courses Elementary Russian II and Intermediate Russian II. The course provides extra practice with the pronunciation, phonetics, intonation, and grammar of Russian, while also introducing students to additional products and practices of Russian culture and history. The course may be repeated for credit, as the content changes each semester. Suitable for students in 01:860:102 and 01:860:202.
Prerequisite: 01:860:101 or placement.

01:860:120 ***Russian for Reading Knowledge (3)***
Grammar and readings of texts from various fields.
Does not satisfy prerequisite for 01:860:201.

01:860:201 ***Intermediate Russian I (4)***
Spoken and written contemporary standard Russian. Develops proficiency in speaking, reading, listening, and writing. Review and expansion of Russian grammar and vocabulary. Deepening of understanding of Russian life, culture, history, geography, and traditions.
Prerequisite: 01:860:102 or placement.

01:860:202 ***Intermediate Russian II (4)***
Spoken and written contemporary standard Russian. Develops proficiency in speaking, reading, listening, and writing. Review and expansion of Russian grammar and vocabulary. Deepening of understanding of Russian life, culture, history, geography, and traditions.
Prerequisite: 01:860:201 or placement.

01:860:203 ***Intermediate Conversation I (1)***
A one-hour course to supplement Intermediate Russian I, providing extra practice with speaking and listening, pronunciation, and grammar of standard contemporary Russian, while also exposing students to additional products and practices of Russian culture as well as history.
Pre- or corequisite: 01:860:201 or 202.

01:860:204 ***Intermediate Conversation II (1)***
A one-hour course to supplement Intermediate Russian II, providing extra practice with speaking and listening, pronunciation, and grammar of standard contemporary Russian, while also exposing students to additional products and practices of Russian culture as well as history.
Corequisite: 01:860:202.

01:860:205 ***Intensive Second Year Russian Abroad (NB)***
Intensive intermediate level study of the Russian language. Focus on grammar, phonetics, conversation. Taught in Russian.
Credit not given for this course and 01:860:201 or 207.

01:860:206 ***Intensive Second Year Russian Abroad***
Intensive intermediate level study of the Russian language. Focus on grammar, phonetics, conversation. Taught in Russian
Prerequisite: 01:860:102 or placement at equivalent level. Credit not given for both this course and 01:860:201-202 or 207-208.

01:860:207 ***Elementary Russian for Russian Speakers (4)***
An elementary course for students who learned to speak Russian in the home or from family members, with little or no formal study or experience with reading or writing Russian. Students will learn the Russian alphabet and how to write in Russian, solidify knowledge of Russian grammar, including case endings and verbal forms, and increase vocabulary. Students are introduced to Russian culture, literature, and history through authentic target-language texts, websites, and media.
Prerequisite: Placement. Credit not given for both this course and 01:860:201.

01:860:208 ***Intermediate Russian for Russian Speakers (4)***
An intermediate course for students who learned Russian at home or from family members, and some formal study, including Russian 207. This course improves grammatical control, and expands active vocabulary for discussing abstract topics. Students improve reading skills through literary and nonliterary texts, and writing skills, to create cohesive and organized texts. Students also increase knowledge of Russian history, culture, geography, and traditions through authentic materials.
Prerequisite: 01:860:207 or placement. Credit not given for both this course and 01:860:202.

01:860:211 ***Russian Conversation I (1)***
Russian Conversation I is a one-credit, mixed-level course to supplement the four-credit language courses Elementary Russian I and Intermediate Russian I. The course provides extra practice with the pronunciation, phonetics, intonation, and grammar of Russian, while also introducing students to additional products and practices of Russian culture and history. The course may be repeated for credit, as the content changes each semester. Suitable for students in 01:860:101 and 01:860:201.
Prerequisite: 01:860:102 or placement.

01:860:212 ***Russian Conversation II (1)***
Russian Conversation II is a one-credit, mixed-level course to supplement the four-credit language courses Elementary Russian II and Intermediate Russian II. The course provides extra practice with the pronunciation, phonetics, intonation, and grammar of Russian, while also introducing students to additional products and practices

of Russian culture and history. The course may be repeated for credit, as the content changes each semester. Suitable for students in 01:860:102 and 01:860:202.
Prerequisite: 01:860:201 or placement.

01:860:301 ***Advanced Russian I (3)***
Spoken and written contemporary standard Russian. Strengthens grammatical control and develops proficiency in speaking, reading, listening, and writing. Development of ability to summarize, develop narration, and use complex grammatical structures and syntactic constructions. Covers many elements of modern Russian life.
Prerequisite: 01:860:202, 208, or placement.

01:860:302 ***Advanced Russian II (3)***
Spoken and written contemporary standard Russian. Strengthens grammatical control and develops proficiency in speaking, reading, listening, and writing. Development of ability to summarize, develop narration, and use complex grammatical structures and syntactic constructions. Covers many elements of modern Russian life.
Prerequisite: 01:860:301 or placement.

01:860:303 ***Advanced Russian Conversation I (1)***
Conversational skills in standard Russian including proper pronunciation and intonation. Engagement with authentic Russian-language materials such as print media and films.
Prerequisite: 01:860:202 or 208, or placement.

01:860:304 ***Advanced Russian Conversation II (1)***
Conversational skills in standard Russian including proper pronunciation and intonation. Engagement with authentic Russian-language materials such as print media and films.
Prerequisite: 01:860:301, or placement.

01:860:305 ***Intensive Third-Year Russian Abroad (6)***
Intensive high intermediate level study of the Russian language. Focus on grammar, conversation, phonetics, reading, and the language of media. Taught in Russian.
Prerequisite: 01:860:202, 205, 208 or placement. Credit not given for both this course and 01:860:301.

01:860:306 ***Intensive Third-Year Russian Abroad (8)***
Intensive high intermediate level study of the Russian language. Focus on grammar, conversation, phonetics, reading, and the language of media. Taught in Russian.
Prerequisite: 01:860:202, 01:860:208 or placement at equivalent level. Credit not given for both this course and 01:860:301 or 302.

01:860:311 ***Advanced Russian Grammar Review I (1)***
Advanced Russian Grammar Review I is a one-credit course, conducted primarily in Russian, which supplements work in Advanced Russian I (01:860:301) and 400-level courses taught in Russian. It provides extra review of topics in Russian grammar and syntax, as well as supplemental speaking and listening practice. The course may be repeated for credit, as the content changes each semester. Suitable for students in 01:860:301 and 400-level courses conducted in Russian.
Prerequisite: 01:860:202 or 01:860:208 or placement

01:860:312 ***Advanced Russian Grammar Review II (1)***
Advanced Russian Grammar Review II is a one-credit course, conducted primarily in Russian, which supplements work in Advanced Russian II (01:860:302) and 400-level courses taught in Russian. It provides extra review of topics in Russian grammar and syntax, as well as supplemental speaking and listening practice. The course may be repeated for credit, as the content changes each semester. Suitable for students in 01:860:302 and 400-level courses conducted in Russian.
Prerequisite: 01:860:208 or 01:860:301 or placement

01:860:351,352 ***Structure of the Russian Language (3,3)***
Advanced course with emphasis on morphology, difficult points of grammar. Theory and extensive drill work.
Prerequisite: 01:860:202, or permission of instructor.

01:860:355 ***Russian Phonetics (3)***
Analysis of the Russian phonetic system, intonation, and transcription; emphasis on reading of texts and dialogues.
Prerequisite: 01:860:202, or permission of instructor.

01:860:401 ***America through Russian Eyes (3)***
Taught primarily in Russian. Fosters advanced language skills of conversational fluency, listening comprehension, writing and composition, expanded vocabulary, recognition of stylistic registers, and advanced syntax. Skills are practiced while exploring the topic of Russian attitudes to America in the course of the last century.
Prerequisite: 01:860:302 or placement. May be taken out of sequence with 01:860:402, 403, 404, or 407.

01:860:402 ***Russian Media and Film (3)***
Taught primarily in Russian, the course fosters advanced language skills of conversational fluency, listening comprehension, writing and composition, expanded vocabulary, recognition of stylistic registers, and advanced syntax. These skills are practiced while exploring the topic of Russian media and film.
Prerequisite: 01:860:302 or placement. May be taken out of sequence with 01:860:401, 403, 404, or 407.

01:860:403 ***Contemporary Russian Culture: From Perestroika to the Present (3)***
Taught primarily in Russian. Fosters advanced language skills of conversational fluency, listening comprehension, writing and composition, and advanced syntax while exploring the changing contemporary culture of Russia through the economic structure, the family structure, domestic politics, foreign policy, and recollections of Perestroika (political reforms of the 1980s).
Prerequisite: 01:860:302 or 306 or placement. May be taken out of sequence with 01:860:401, 402, 404, or 407.

01:860:404 ***Debating Global Issues in Russian (3)***
Taught primarily in Russian. Fosters advanced language skills of conversational fluency, listening comprehension, writing and composition, and advanced syntax while exploring various questions of global importance.
Prerequisite: 01:860:302 or 306 or placement. May be taken out of sequence with 01:860:401, 402, 403, or 407.

01:860:405 ***Intensive Fourth-Year Russian Abroad (6)***
Intensive advanced level study of the Russian language. Focus on advanced points of grammar, stylistics, conversation. Reading of newspapers and Russian literature. Taught in Russian.
Prerequisite: 01:860:302 or placement.

01:860:406 ***Intensive Fourth-Year Russian Abroad (8)***
Intensive advanced level study of the Russian language. Focus on advanced points of grammar, stylistics, conversation. Reading of newspapers and Russian literature. Taught in Russian.
Prerequisite: 01:860:302 or placement.

01:860:407 ***Contemporary Russian Culture: The Thaw (3)***
Taught primarily in Russian, the course fosters advanced language skills of conversational fluency, listening comprehension, writing and composition, expanded vocabulary, recognition of stylistic registers, and advanced syntax. These skills are practiced while exploring topics in Russian history and culture in the post-Stalin Soviet era.
Prerequisite: 01:860:302 or placement. May be taken out of sequence with 01:860:401, 402, 403, or 404.

01:860:411 ***Advanced Russian Grammar Review I (1)***
Advanced Russian Grammar Review I is a one-credit course, conducted primarily in Russian, which supplements work in Advanced Russian I (01:860:301) and 400-level courses taught in Russian. It provides extra review of topics in Russian grammar and syntax, as well as supplemental speaking and listening practice. The course may be repeated for credit, as the content changes each semester. Suitable for students in 01:860:301 and 400-level courses conducted in Russian.
Prerequisite: 01:860:208 or 01:860:302 or placement.

01:860:412 ***Advanced Russian Grammar Review II (1)***
Advanced Russian Grammar Review II is a one-credit course, conducted primarily in Russian, which supplements work in Advanced Russian II (01:860:302) and 400-level courses taught in Russian. It provides extra review of topics in Russian grammar and syntax, as well as supplemental speaking and listening practice. The course may be repeated for credit, as the content changes each semester. Suitable for students in 01:860:302 and 400-level courses conducted in Russian.
Prerequisite: 01:860:208 or 01:860:302 or placement.

01:860:452 ***Seminar in Slavic Linguistics (3)***
Devoted to specific problems in the area of Slavic linguistics. Variable content, e.g., history of the Russian language, readings in Old Russian, advanced problems of morphology.

01:860:491,492 ***Russian Practicum (3,3)***
Drill methods, techniques of facilitating classroom interaction, error analysis, grammar review, and weekly drill sessions conducted in beginning Russian sections under faculty supervision.
Prerequisites: 01:860:302 and/or permission of instructor. Corequisites: 01:860:401, 402, if applicable.

Russian 860 (SAS)

Courses in Russian Literature (may be taught in English)

Courses in Russian Literature (may be taught in English)

01:860:160 ***How to Read a Russian Novel (1.5)***
A slow journey through one famous Russian novel. Guides students in the basics of reading a literary text from

a culture different than our own, providing the rudimentary cultural and historical context. Novels will vary by semester.
All readings and discussions in English.

01:860:259 ***Introduction to 19th-Century Russian Literature (3)***
A survey of 19th-century Russian literature in its historical context.
All readings and discussion in English.

01:860:260 ***Introduction to 20th-Century Russian Literature (3)***
A survey of 20th-centutry Russian literature.
Taught fully in English.

01:860:268 ***Art and Power (3)***
Russian art of the Soviet era (1917-1991), especially its intersection with politics. Survey of main trends and media (visual arts, architecture, theater, and film).
Credit not given for both this course and 01:082:204 or 01:195:265.

01:860:270 ***Language and Power Behind the Iron Curtain (3)***
The role of language in empire, national identity and decolonization in Eastern Europe and post-Soviet spaces. Language status and policy in this region from the Middle Ages to the present day.

01:860:272 ***Russia: Between Empire and Nation (3)***
Study of Russia's imperial culture, history, and politics from the 19th to the 21st century, as a window onto geopolitical shifts in contemporary Russia's relations to the wider world.
Credit not given for both this course and 01:195:272 or 01:510:277.

01:860:289 ***Tolstoy's War and Peace (3)***
Detailed study of Leo Tolstoy's monumental novel *War and Peace* (1869) in its historical, cultural, and critical context. All readings and discussion in English.
Taught in English.

01:860:315 ***Reading Russian Literature in Russian (3)***
Introduction to critical issues involved in reading literary texts in Russian. Stylistic register, how grammar is used to create meaning, historical dimensions of style, and lexicon.
All readings in Russian. Required of all majors. Prerequisite: 01:860:202 or 207 or permission of instructor.

01:860:319 ***Special Topics in Russian Studies (3)***
Variable content. Intensive study of a particular topic related to Russia and Russian culture. Specific topics available at time of registration.

01:860:320 ***Special Topics in Russian and East European Studies (3)***
Variable content. Intensive study of a particular topic related to Russian and/or other East European culture. Specific topics available at time of registration.
Readings and discussion in English.

01:860:322 ***Love and Death in the Russian Short Story (3)***
Russian short fiction from the 19th to the 21st century. Includes readings in genre theory and the study of critical concepts useful for analyzing fiction.
All readings and discussion in English.

01:860:325 ***St. Petersburg: The City as Monument (3)***
Variable content. Intensive study of a particular topic related to St. Petersburg. Specific topics available at time of registration.
Corequisites: Language courses during the summer program in St. Petersburg, Russia. All readings and discussion in English. Offered only as part of summer program in St. Petersburg.

01:860:326 ***Russian and East European Science Fiction (3)***
This course explores the 19th-21st-century tradition of Russian and East European science fiction in literature and film. The course is organized around the big questions that have driven the genre since its first inception: What does it mean to build utopia? How will new technologies transform moral, social, and political norms in everyday life on Earth? How does scientific exploration challenge, and how does it enrich, our understanding of what it is to be human?
Credit not given for both this course and 01:195:312.

01:860:329 ***The World According to Gogol (3)***
Study of fiction and comedies by Nikolai Gogol (1809-1852), including *The Government Inspector* and *Dead Souls*. Focus on Gogol's idiosyncratic narrative techniques.
All readings and discussion in English.

01:860:330 ***Dostoevsky (3)***
Major works in historical, intellectual, and aesthetic contexts. *The Idiot*, *Crime and Punishment*, *Notes from the Underground*, and short works.
All readings and discussion in English. Credit not given for both this course and 01:195:311.

01:860:331 ***Tolstoy (3)***
Study of Tolstoy's major novel *Anna Karenina* and his short fiction, drama, and excerpts from autobiographical writings.
All readings and discussion in English.

01:860:332 ***Russian Poetry (3)***
Reading, analysis, and discussion of 19th- and 20th-century poetry.
Prerequisite: 01:860:202 or 207 or 208; or permission of instructor. All readings in Russian.

01:860:335 ***Landscapes of the Mind: Country and City in Russian Literature and Art (3)***
Moscow and St. Petersburg; the Russian countryside versus the exotic sublime; the idyll versus the reality of peasant life; the city and modernism; utopia and antiurban impulse.
Credit not given for both this course and 01:082:356.

01:860:337 ***Russian and Soviet Cinema (3)***
Survey of 20th- and 21st-century Russian cinema.
No knowledge of Russian required.

01:860:338,339 ***Zimmerli Museum Internship in Russian Art (3,3)***
Research work related to Dodge and Riabov collections; assisting in development, coordination of special exhibitions, translation, and compiling artists' files.
Prerequisite: Permission of program director. Credit not given for both these courses and 01:082:359,360. Knowledge of Russian necessary.

01:860:340 ***Nabokov (3)***
Study of the literary and autobiographical works by the Russian-American writer Vladimir Nabokov (1899-1977) in their historical, political, and cultural contexts.

01:860:345 ***Serial Storytelling across Media (3)***
Investigation of serial narrative as a modern mode of storytelling, from serialized novels in 19th-century Britain and Russia through the multimedia serials of our digital age. Exploration of this narrative form's enduring power, in multiple media, to interweave fiction with the course of current events and the rhythms of everyday life, and to bring together international audiences shaped by cultural, social, and geographic differences.
All readings and discussions in English. Credit not given for both this course and 01:195:345 or 01:359:347.

01:860:347 ***Russian Theater (3)***
Reading, analysis, and discussion of major Russian playwrights.

01:860:348 ***Stories of Russian Life: Memory, Invention, Experience (3)***
Examination of how Russian writers have imagined and represented the self in various kinds of life narratives (such as autobiography, diary, memoir, and semifiction). Memory and invention, history and personality, genre and technique, from the medieval era to the present, with emphasis on the 20th century.
All readings and discussion in English. Credit not given for both this course and 01:195:348.

01:860:349 ***Russia's Wars on Page and Screen (3)***
Interpretation of the Russian experience and memory of World War II through a study of films, short stories, novels, poetry, music, diaries, documentary, and journalistic accounts.
All readings and discussion in English.

01:860:433 ***Pushkin and His Age (3)***
Historical examination of Russian literary scene during the period 1740 to 1841, in Russian.
Prerequisites: 01:860:301 and at least one 300-level course in Russian literature or permission of instructor. All readings in Russian.

01:860:435 ***Gender and Sexuality in Russian Literature (3)***
A study of gender and sexuality in Russian literature and culture in the framework of gender theory. Topics include: erotic utopias; gender, desire, and dystopia; sexuality and morality; same-sex love and cultural taboos; cross-dressing; gender stereotypes and their defiance.
Credit not given for both this course and 01:988:435.

01:860:484 ***Russia after Stalin: Literature, History, Theory (3)***
Recent past of Russian culture and politics. Study of how the Stalinist past influenced late Soviet Russian culture, contributed to the collapse of the USSR, and shaped post-Soviet Russia through examination of powerful fiction

texts and films that defined the post-Stalin era, from 1950s onward, as well as nonfiction and theoretical texts on Stalinism and its aftermath.
Taught in English. Credit not given for this course and 01:510:484 or 01:195:484.

01:860:485 *Russia's Rival Capitals: Moscow and St. Petersburg (3)*
Cultural heritage of Russia's rival capitals, with attention to the interactions between city and text. Topics include evolving cultural myths of St. Petersburg and Moscow; the city as a place for negotiating national identity and history; representations across different genres and media; the city and the imaginary (urban phantasmagoria, dreams, terrors).

01:860:486 *Seminar in Russian Literature (3)*
Intensive reading and research in one specific aspect of Russian letters. Critical and analytical paper required.
Prerequisites: 01:860:301 and at least one 300-level course in Russian literature or permission of instructor.

01:860:487 *Senior Thesis (3)*
Extended research paper written in close consultation with an instructor.
Prerequisite: 01:860:486.

01:860:488 *Seminar: Dostoevsky's The Brothers Karamazov (3)*
Intensive reading of Dostoevsky's last novel in the context of other classic writings on science, religion, and faith: Freud, Nietzsche, the Bible, Kierkegaard, and others.
All readings and discussion in English.

01:860:493,494 *Independent Study: Russian (BA, BA)*
Prerequisite: Permission of instructor.

01:860:496-497 *Honors in Russian (3,3)*
Preparation for research paper and oral examination under direction of a faculty adviser.
Prerequisite: Permission of honors committee. Both semesters must be completed to receive credit.

Sexualities Studies 888 (SAS)

SEXUALITIES STUDIES 888

Department of Women's, Gender, and Sexuality Studies, School of Arts and Sciences

Website: http://womens-studies.rutgers.edu/academics/undergraduate/minors/94-minor-in-critical-sexualities-studies

The 18-credit critical sexualities minor introduces students to pioneering thinking on sex, sexuality, queer studies, global and ethno-racial issues, health, activism, and social justice. Two required courses (Introduction to Critical Sexualities Studies and Research on Sexualities) introduce students to the politics and challenges related to research and activism around sexuality. The four elective courses can be drawn from a broad range of historical and cross-cultural perspectives related to the central themes of the minor.

Minor Requirements

Minor Requirements

Students are required to complete six 3-credit courses (with a grade of C or better) in the minor, for a total of 18 credits.

01:888:290 Introduction to Critical Sexualities Studies (3)

01:888:339 Research on Sexualities (3)

Four (4) electives from the approved list:

American Studies
01:050:325 Women on the Fringe: Perceptions of Women as Social and Sex-Role Deviants in American Civilization
01:050:342 American Sexuality

Anthropology
01:070:222 Sexuality and Eroticism in Global Perspective
01:070:371 The Politics of Culture
01:070:372 Body Politics
01:070:389 Ethnography of Gender in South Asia

Comparative Literature
01:195:308 Gender, Race, and Textual Imagination
01:195:326 Sexuality and Literary Studies

Criminal Justice
01:202:327 Sex, Crime, and Justice

English
01:351:348 Literature and Sexuality
01:353:346 Theories of Gender and Sexuality

Jewish Studies
01:563:323 Women in the Bible
01:563:335 Jewish-American Women: Contested Lives

Latino and Caribbean Studies
01:595:326 Gender, Sexualities, and the Caribbean
01:595:327 Gender, Sexualities, and Representation in U.S. Latina/o Communities

Psychology
01:830:362 Psychology of Sex and Gender

Russian
01:860:435 Gender and Sexuality in Russian Literature

Sociology
01:920:440 Sexuality and Society

Women's, Gender, and Sexuality Studies
01:888:215 Introduction to Transgender Studies
01:888:285 Lesbians and Gay Men and Society
01:888:291 Francophilia: Literature and Sexuality in Modern France
01:988:318 The Gendered Body
01:888:321 Queer Contexts
01:988:331 Theorizing Gender and Sexuality
01:988:332 The Color of AIDS: The Politics of Race during the AIDS Crisis
01:888:338 Transnational Sexualities
01:988:392 Thinking Bodies
01:988:398 Freud and Feminism: The Unconscious

Courses

Courses

01:888:215 *Introduction to Transgender Studies (3)*
Survey of key themes in transgender studies. Explores the category across medicine, history, anthropology, and women's and gender studies; transgender practices as embedded in race, class, sexuality, nationality, and ability.

01:888:285 *Lesbians and Gay Men and Society (3)*
Introduction to various disciplines' contributions to understanding the relationship of homosexuality, particularly lesbianism, to society. Includes a section on the political organization and recent theory coming out of the gay movement.

01:888:290 *Introduction to Critical Sexualities Studies (3)*
Introduction to the study of sexuality as well as sexual and gendered identity from multidisciplinary and historical perspectives. Includes U.S. and European approaches to sexology, legal regulation of sexual practices, and family formation.

01:888:291 *Francophilia: Literature and Sexuality in Modern France (3)*
Explores cultural representations of nonconforming sexualities in France from the late-19th century to the present. The approach combines writing exercises with close reading and analytical discussion of literature, theory, and film within evolving historical context.
Credit not given for both this course and 01:420:271. Taught in English.

01:888:321 *Queer Contexts: Same-Sex Desire, Culture, and Representation (3)*
Cultural construction and representation of same-sex desire in Western societies. Debates about identity, subjectivity, and the uses of experience included.

01:888:338 ***Transnational Sexualities (3)***
Considers how globalization alters conceptualizations of sexuality and its relationship to gender. Issues include global, diasporic, and postcolonial gay, lesbian, bisexual, and transgender activism; tourism and travel; HIV/AIDS organizing; "sexual rights" discourses; sex work; and asylum based on gender and sexual orientation.
Prerequisite: 01:988:101 or 190 or 201 or 202 or 235.

01:888:339 ***Research on Sexualities (3)***
Historical, cross-cultural, and multidisciplinary approaches to sexuality research. Social, moral, and political meanings of sexuality in U.S. and transnational contexts. Current issues and debates around sexual norms.
Prerequisite: 01:988:280 or 01:888:290.

Slavic and East European Studies Minor 861 (SAS)

SLAVIC AND EAST EUROPEAN STUDIES MINOR 861

Website: https://seell.rutgers.edu/academics/undergraduate/minor

Director: Chloë Kitzinger

Note: The director of the Russian & East European Program will also always be the director for the minor.

The primary objective of the minor is to serve students who are studying a relevant regional language and have interest in the history, culture, and politics of eastern Europe and the former contiguous Soviet bloc. Minors in Slavic and East European Studies will demonstrate: a basic competency in Russian or Polish (or by special arrangement, a different relevant regional language that we do not offer at Rutgers, via BTAA course share); historical, cultural, and/or policy-related knowledge of eastern Europe; and a synthesis of this knowledge in at least one substantial written assignment (for any elective taken within the minor) focused on a region of eastern Europe or the former contiguous Soviet bloc, preferably a region where the language that has been the student¿s focus in the minor is widely used. This minor is fulfilled by successful completion of the following set of six courses with a grade of C or better:

- 3 or 4 courses in Polish or Russian language. Note: Courses in other Slavic or regional languages (Ukrainian, Czech, Bosnian/Serbian/Croatian, etc.), offered via Course Share or through Study Abroad, may be substituted by special arrangement with the REELL Program Director.

- RUSSIAN: 860:101, 102, 201, 202, 207, 208, or other courses depending on placement.

- POLISH: 787:101, 102, 201, 202, or higher level courses through study abroad or Course Share.

- 2 or 3 electives approved for the minor. Electives are drawn from all departments with relevant offerings, including (but not limited to) REELL, European Studies, History, Jewish Studies, Political Science, Anthropology, Geography, Art History, and comparative Literature. For a list of pre-approved classes, see: https://reell.rutgers.edu/academics/undergraduate/minor/288-pre-approved-elective-courses-for-the-minor-in-slavic-east-european-studies.

Social Justice 904 (SAS)

SOCIAL JUSTICE 904

Department of Women's, Gender, and Sexuality Studies, School of Arts and Sciences

Website: http://womens-studies.rutgers.edu/academics/undergraduate/minors/13-minor-in-social-justice

Social Justice Minor

The social justice minor is designed to introduce students to the complexity of social justice issues, cultivate their capacity to identify key determinants of structural inequities, familiarize them with various social justice practices and strategies, and prepare them for advocacy and activism to address these pressing issues.

The social justice minor draws upon resources in multiple academic units, disciplines, and interdisciplinary programs to involve students in ongoing struggles to define and achieve social justice locally and globally. Through individual courses that incorporate service learning, as well as internships, study abroad, and alternative spring break experiences, students are encouraged to recognize injustice and work to eradicate it. Among the manifold dimensions of injustice, the social justice minor pays particular attention to modes of exploitation, marginalization, structural and physical violence, and cultural imperialism that produce systems of advantage and disadvantage.

Students who complete the 18-credit program will learn to think analytically; integrate social justice theory and practice; identify structural constraints and trace their operation across social, economic, political, cultural, and environmental terrains; understand the effects of various social and economic policies on the scope and intensification of inequality; and grasp the complex interrelation of local and global justice issues. Students are required to achieve a grade of C or better in all courses that count for the minor.

Minor Requirements

Required Courses

Students are required to complete six 3-credit courses (with a grade of C or better) in the minor, for a total of 18 credits; 9 credits must be in required 904 courses and 9 credits must be in courses that fulfill at least two of the learning goals listed below.

01:904:201 Introduction to Social Justice (3)
01:904:202 Practicing Social Justice (3)

01:904:399/400 Social Justice Internship (1.5-3, 1.5-3)
or
01:904:401/402 Social Justice Capstone Seminar (3,3)
or
01:988:422 CLASP Seminar/Internship in Women's and Gender Studies

Elective Courses (9 credits)

Choice of three electives from the approved listed. To qualify as a social justice elective, a course must fulfill at least two of the following learning goals:

- Critically engage histories and geographies of domination
- Critically engage particular population's experiences of oppression
- Explore theories of justice in relation to reduction of social inequalities
- Examine policy alternatives that foster collective action or redistributive effects

NOTE:*Students my count, at most, one course toward both their major and their social justice minor electives.*

Social Justice 904 (SAS)

Courses

Courses

01:904:201 ***Introduction to Social Justice (3)***
Through case studies of pressing social justice issues, examines dynamics of oppression, linking competing theories of social justice to hierarchies grounded in race, ethnicity, nationality, gender, class, and sexuality, and to particular strategies for social transformation.

01:904:202 ***Practicing Social Justice (3)***
Introduces students to diverse practices of social justice activism including grassroots organizing, labor organizing, political organizing, and transnational organizing. Readings about social change efforts are combined with student participation in community mobilizations, labor organizing efforts, political campaigns, and transnational social movement and nongovernmental organization (NGO) activism.

01:904:309 ***Justice and Violence (3)***
Justice, violence, and the law are entangled in complex ways. While we may think that following the law will always ensure a just outcome, justice inevitably exceeds the boundaries of legal stipulations. In fact, it is quite uncertain whether and how it is possible to make a just decision, to act or speak justly. While the law is never fully able to represent justice, it is also fundamentally reliant on violence. But how is legal violence different from the unrestrained violence of lawlessness?
Taught in English. Credit not given for both this course and 01:195:373 or 01:470:309.

01:904:391,392 ***Topics in Social Justice (1.5,1.5)***
Intensive investigation of particular social justice issues such as environmental justice, outsourcing of reproductive labor, the informal economy, the prison-industrial complex. Topic varies each semester. Designed for social justice living-learning communities.

01:904:399,400 ***Social Justice Internship (1.5-3,1.5-3)***
Interns work in social justice organizations. Supervision by assigned staff at the placement site. Seminar, student journal, paper, and assessment of work experience required.
Prerequisites: 01:904:201 and 202. Designed for social justice minors. Permission of social justice faculty adviser required.

01:904:401,402 ***Social Justice Capstone Seminar (3,3)***
In-depth exploration of a particular social justice issue such as globalizing inequality, gendered migration, war and displacement, refugee camps, militarization, the color of AIDS, asylum seeking, the prison-industrial complex. Topic varies with instructor.

01:904:493,494 ***Social Justice Independent Study (3,3)***
Supervised individual study of selected topics of interest with extensive reading and a research paper.
Reserved for social justice minors.

Social Work 910 (SSW-U)

SOCIAL WORK 910

Baccalaureate Social Work Program, School of Social Work

Website: https://socialwork.rutgers.edu/academics/bachelor-arts-social-work-basw

Dean: George Leibowitz, Dean and Distinguished Professor; M.S.W., Denver; Ph.D., Denver

Assistant Dean of Undergraduate Education, Teaching Professor, and Director of B.A. in Social Work Program, New Brunswick: V. DuWayne Battle, B.A., Barton College; M.Div., D.Min., Southeastern Theological Seminary; M.S.W., Ph.D., Rutgers

The major in social work is accredited by the Council on Social Work Education. Students who successfully complete the program receive a Bachelor of Arts degree from the School of Arts and Sciences. The program prepares students for beginning-level generalist social work practice. The focus for practice addresses work with special populations including the poor, the oppressed, and other at-risk groups. Participants are expected to acquire the knowledge base, professional ethics, values, and skills to work effectively within individual, family, group, organizational, and community levels of practice. The program also prepares students for graduate study in social work and related fields.

Students apply to the major in the spring semester of their sophomore year, as they near the completion of approximately 60 credits of coursework. If accepted, students are admitted to begin the major courses in the fall semester at the beginning of their junior year. A cumulative grade-point average of 3.0 is required for acceptance into the program. Information and the application can be found at: https://socialwork.rutgers.edu/admissions/bachelor-arts-social-work-basw.

Following acceptance into the program, all social work majors are assigned a faculty advisor within the School of Social Work. To continue in this major, students must maintain a 3.0 grade-point average in social work courses. In order to graduate, students must have grades of C or better with a cumulative grade-point average of 3.0 in all social work core-content courses and a 2.0 cumulative grade-point average in the courses making up the liberal arts foundation.

Social Work 910 (SSW-U)

Major Requirements

Major Requirements

Prerequisites

Students should complete the following courses prior to enrollment in the social work program:

01:119:150 Biology, Society, and Biomedical Issues (3); or 01:119:154 Genetics, Law, and Social Policy (3); or 01:119:160 Biology, Society, and Ecological Issues (3); or 01:119:182 Human Sexuality (3); (Other biology courses may be considered)

01:830:101 General Psychology (3)

01:920:101 Introduction to Sociology (3)

01:960:211 Statistics (3) or 01:960:212 Statistics II or 01:830:200 Quantitative Methods in Psychology (4) or 01:920:312 Introduction to Statistics in Sociology (3) or 10:775:205 Basic Statistical Methods

Two additional courses, one from each of two of the following areas: anthropology, art, communication, history, literature, music, philosophy, political science, religion, and theater.

Course Sequence

The required courses and their recommended sequence are as follows:

Junior Year

Fall Semester

09:910:220 Introduction to Social Work and Social Justice (3) **[This course is open to all Rutgers undergraduate students as an elective and meets a SAS core requirement . Required for Social Work major.]**

09:910:311 Social Welfare Policy and Services I (3) **[Required for Social Work major.]**

09:910:402 Human Behavior I and the Social Environment I (3) **[Required for Social Work major.]**

Social Work Electives (3 credits) open to Juniors & Seniors (check semester offered)

09:910:222 Confronting Anti-Black Racism (3) **[This course is open to all Rutgers undergraduate students as an elective and meets a SAS core requirement.]**

09:910:223 Aging & Society (3) **[This course is open to all Rutgers undergraduate students as an elective.]**

09:910:224 Housing Inequality & Homelessness (3) **[This course is open to all Rutgers undergraduate students as an elective and meets a SAS core requirement.]**

09:910:226 Childhood Inequalities (3) **[This course is open to all Rutgers undergraduate students as an elective and meets a SAS core requirement.]**

09:910:227 Global Social Work (3) **[This course is open to all Rutgers undergraduate students as an elective.]**

09:910:228 Understanding Violence: Causes, Consequences, and Social Justice Change (3) **[This course is open to all Rutgers undergraduate students as an elective and meets a SAS core requirement.]**

09:910:476 Child Welfare Services and Practices (3) **[required of Baccalaureate Child Welfare Education Program (BCWEP) students and elective for other students in the major]**

Spring Semester

09:910:312 Social Welfare Policy and Services II (3) **[Required for Social Work major.]**

09:910:332 Foundations of Professional Development (3) **[Required for Social Work major.]**

09:910:403 Human Behavior and the Social Environment II (3) **[Required for Social Work major.]**

09:910:405 Methods of Social Work Research I (3)**[Required for Social Work major.]**

Social Work Electives (3 credits) open to Juniors & Seniors (check semester offered).

Senior Year

Fall Semester

09:910:406 Diversity & Oppression (3) **[Required for Social Work major.]**

09:910:471 Practicum I (6) **[Required for Social Work major.]**

09:910:472 Generalist Practice I (3) **[Required for Social Work major.]**

Social Work Electives (3 credits) open to Juniors & Seniors (check semester offered).

Spring Semester

09:910:473 Practicum II (6) **[Required for Social Work major.]**

09:910:474 Generalist Practice II (3) **[Required for Social Work major.]**

09:910:475 Integration Seminar (3) **[Required for Social Work major.]**

09:910:476 Child Welfare Services and Practices (3) **[required of Baccalaureate Child Welfare Education Program (BCWEP) students and elective for other students in the major]**

Social Work Electives (3 credits) (if needed) open to Juniors & Seniors (check semester offered).

- Empowerment Through Community Engagement in the Yucatan, Mexico 01:959:396
- Romania's [R]Evolution: Investing in Children and Families Across the Life Cycle 01:959:396

Social Work 910 (SSW-U)

BA in Social Work Program Goals

BA in Social Work Program Goals

Create an environment that prepares students to utilize a liberatory consciousness framework with an emphasis on one's responsibility to disrupt and dismantle racism and oppression based in an anti-racist pedagogy.

Prepare students for foundation level practice within a variety of agency and community settings and with diverse populations, including minoritized groups, in the State of New Jersey and elsewhere.

Prepare entry-level social work practitioners who serve effectively in a variety of capacities,from rural settings to complex metropolitan contexts of social work practice in New Jersey.

Develop practitioners sensitive to the diverse racial, ethnic, and cultural composition of the State and the region who work with a range of client systems to meet the needs of citizens and communities.

Provide a high-quality educational experience through a curriculum grounded in a liberal arts perspective, metacognitive skills,and centered on the professional foundation content designed to prepare entry-level professionals for beginning social work practice with client systems of various size and types.

Educate students to understand and use social work knowledge, values, skills, cognitive and affective processes, and behaviors throughout their professional practice.
Support students preparation to continue their professional education, including pursuit of master's degree programs in social work.

Social Work 910 (SSW-U)

Courses

Courses

09:910:220 ***Introduction to Social Work and Social Justice (3)***
Overview of social work values, ethics, arenas of practice, and social problems through a social justice lens, which focuses on equal rights, opportunities, and treatment by analyzing unbalanced social power systems. Includes a twenty-hour (20) experiential learning (volunteer placement or civic engagement) within a social service agency that promotes social justice by analyzing contemporary social justice issues and unbalanced social power systems. Understanding that social justice is at the core of social work, everything done in this course will focus on social, economic, racial, and environmental justice by analyzing diversity and differences, privilege and oppression that shape individual and group experiences of, and perspectives on, contemporary issues.
Required for social work major. Should be taken by premajors by the sophomore year. This course is open to all Rutgers undergraduate students as an elective. This course is CORE certified.

09:910:222 ***Confronting Anti-Black Racism (3)***
"Black lives matter. Black thought matters. Black writing matters. Black writing about Black lives matters. Black thought matters. Black scholarship, criticism, and research matter. Black memory matters" Louis-Chude Sokei, 2020 in 'What Was Black Studies?' Blackness is not a monolith. Racism does not require the actions nor the intent of individuals. In understanding Anti-Black Racism, we must also understand the nuance within 'Black' as a culture, race, and lived experience. In this course, reading, critical thinking, and skills building to confront Anti-Black racism are our main concern. This class will delve into the varied experiences, thoughts, and scholarship of Black and African writers. The readings should make you question your beliefs, positionality, actions, and as social justice advocates, inactions. Using Black writers from various disciplines, including social work, we will explore ways to actively and daily disrupt Anti-Black racism. Guided by the authors, and those who came before us, as a class we will choose a social action to take that will aid in the movement to eliminate Anti-Black racism. This class will create opportunities for metacognition (thinking about your thinking), introspection, and reflection. These opportunities will be elicited and integrated throughout the semester as you engage in vulnerability and critically reflect in writings and discussion posts with your classmates. Let us get used to the sound of your voice, words, and thought 'because it matters and is part of the journey to understanding Anti-Black racism. We will approach reading as a personal transaction between you and the text. What did the book(s) make you think of, feel, remember, wonder about? Are you uncomfortable yet? Good, that means we are doing this right.
This course is open to all Rutgers undergraduate students as an elective. This course is CORE certified.

09:910:223 ***Aging & Society (3)***
The purpose of this course is to help students learn about different experiences that can occur during mid and older adulthood and prepare them for engaging with older members of society in their personal and professional roles. Systems that impact the aging experience during mid and older adulthood will be reviewed and analyzed. Students will be encouraged to reimagine their understanding about older members of society and identify anti-oppressive approaches for supporting this subpopulation.
This course is open to all Rutgers undergraduate students as an elective.

09:910:228 ***Understanding Violence: Causes, Consequences, and Social Justice Change (3)***
This course provides an overview of the contemporary challenge of interpersonal violence through the lens of social justice, which is a foundation of the field of social work. It describes the causes and consequences of child

maltreatment, peer violence, intimate partner violence, and sexual assault. Students will discuss research/science informed prevention and response solutions in schools, health care, and community settings from a multidisciplinary perspective.
This course is open to all Rutgers undergraduate students as an elective.This course is CORE certified.

09:910:224 *Housing Inequality & Homelessness (3)*
This course provides an overview of housing inequality in the United States, and homelessness as a product of this type of inequity. It uses theory, first-person accounts from people experiencing housing insecurity, and a social justice/equity lens to examine whether homelessness is an intractable social issue or a solvable policy problem. Students will reflect on their own perceptions of homelessness, explore causes and consequences of housing inequity, and learn about programmatic and advocacy efforts to address this issue in the United States.
This course is open to all Rutgers undergraduate students as an elective. This course is CORE certified.

09:910:226 *Childhood Inequalities (3)*
This course focuses on understanding, and analyzing childhood (birth through 18) in the United States context, examine the multiple social systems that children/youth come into contact with and consider how these systems perpetuate inequitable outcomes. These include: the school system, child welfare and juvenile justice system, the health system and the immigration system. The course will use developmental theories and a social justice/equity lens to examine childhood and explore how race, gender and social class may influence inequality within these systems. Theory application in regards to social justice will also be explored. Particular consideration will be given to theories of change, culturally responsive practice, and privilege.
This course is open to all Rutgers undergraduate students as an elective. This course is CORE certified.

09:910:311 *Social Welfare Policy and Services I (3)*
In historical perspective, exploration of social welfare, social policy, and the emergence of the social work profession. Philosophical, political, and practical bases of social policies and programs.
Restricted to Social Work majors.

09:910:312 *Social Welfare Policy and Services II (3)*
Process of social policy development and theoretic frameworks for the analysis of social policy. Emphasis on policies addressing problems of poverty, mental health, child welfare, and vulnerable groups such as the elderly, gays/lesbians, women, and persons of color.
Restricted to Social Work majors.

09:910:332 *Foundations of Professional Development (3)*
Professional skills necessary for baccalaureate-level generalist practitioners. Emphasizes development of a professional social work identity and skills needed to work within an organizational context.
Restricted to Social Work majors.

09:910:352 *Groups at Risk in Contemporary Society (3)*
Analysis of the relationship between institutionalized practices and the functioning level of key high-risk groups within our society: aged, veterans, people with disabilities, refugees, women, ethnic and racial minorities, and participants in alternative lifestyles. Obstacles impeding the functioning of these groups explored.
This course is open to all Rutgers undergraduate students as an elective.

09:910:471 ***Practicum I (6)***
Participation in a supervised practicum applying the tenets of generalist practice. Gain greater understanding of the goals, organization, and delivery system of the practicum setting and the application of social work methods, values, ethics, and skills.
Requires two days per week of supervised field instruction in a social service agency. Restricted to Social Work majors. Corequisite: 09:910:472.

09:910:472 ***Generalist Practice I (3)***
Beginning preparation for generalist practice with client systems of all sizes and levels. Essential skills, values, concepts, and ethical considerations as they pertain to generalist practice.
Restricted to Social Work majors. Corequisite 09:910:471.

09:910:473 ***Practicum II (6)***
Development and enhancement of essential values, skills, use of self, and use of supervision in interventive work with individuals, families, groups, organizations, and communities.
Requires two days per week of supervised field instruction in a social service agency. Restricted to Social Work majors. Corequisite: 09:910:474.

09:910:474 ***Generalist Practice II (3)***
Basic concepts and skills, including ethnic, racial, and gender-sensitive practice. Application of problem-solving model to micro- and macro-level intervention.
Restricted to Social Work majors. Corequisite: 09:910:473.

09:910:475 ***Integration Seminar (3)***
This seminar course integrates all areas of prior and current coursework learning as it applies to "real-life" field situations. Critical thinking skills and use of the social work profession's knowledge base will be emphasized.
Restricted to Social Work majors.

09:910:476 ***Child Welfare Services and Practices (3)***
Focus is on child maltreatment, the development and evolution of child protective services in the United States, and emerging practices in the treatment and prevention of child neglect and abuse. Students look at different models of child maltreatment; the development of skills in recognition; assessment; use of authority; provision of continuing services; risk factors, such as substance abuse, mental illness, and domestic violence; substitute care; and professional issues.
Course is required for the concentration in child welfare and will usually be taken in conjunction with a supervised internship in an agency addressing the needs of children and families.

09:910:402 ***Human Behavior in the Social Environment I (3)***
Theories, themes, and issues concerning the ongoing interaction between people as they grow, change, and develop over the life course and the social context in which this occurs. Assumptions about human behavior that may interfere with recognition of diversity in the ongoing interaction between individual, family, and group identity, social context, and social life. Content about values and ethical issues related to biopsychosocial development highlighted.
Restricted to social work majors.

09:910:403 ***Human Behavior in the Social Environment II (3)***
Theories and knowledge of action groups, organizations, and communities as the context for micro and macro social practice. Ways in which systems promote or deter people in the maintenance or attainment of optimal health and well-being. Evaluation and application of theory to client situations to understand how macro systems affect client benefit.
Restricted to social work majors.

09:910:405 ***Methods of Social Work Research I (3)***
Introduction to scientific, analytic approach to building knowledge and skills, including: role of concepts and theory, hypothesis formulation, operationalization, research design, data collection, data processing, statistical analysis, introductory computer skills, and report writing.
Restricted to social work majors.

09:910:227 ***Global Social Work***
This course explores global social work, past and present, and the application of social work to vulnerable groups around the globe. Students will learn about different applications of social work and social services delivery systems around the globe. Students will apply social work values, knowledge and skills to address global problems. Student will explore the peer-reviewed literature, grey literature, and databases on international development applied to a selected country and specialized field of practice of the student¿s choice. Students will explore their international career goals through the focused exploration of a specific development issue within a country or region of the globe.
This course is open to all Rutgers undergraduate students as an elective.

Sociology 920 (SAS)

Learning Goals

Learning Goals

1. *Students will understand* the sociological perspective, a distinctive analysis of the ways people think, feel, and behave that focuses on how they are situated in historically, culturally, and socially specific environments.

2. *Students will understand* key questions addressed by the discipline and the ways in which social structure and social interaction shape human behavior.

3. *Students will develop* the skills necessary to read and evaluate social science research in an intelligent and critical manner.

4. *Students will understand* the role of theory in the construction of sociological inquiry. Majors will demonstrate a solid grasp of the central ideas of major classical and contemporary theorists.

5. *Students will understand* sociological methods of research. Majors will achieve a solid understanding of the full research process including conceptualization, operationalization, data collection, analysis, consideration of ethical issues, and presentation of results. Sociology honors students will demonstrate their understanding of the research process via completion of a senior thesis.

Sociology 920 (SAS)

Major Requirements

Major Requirements

The major in sociology consists of 11 courses totaling 36 credits. Grades of C or better are required in each of the courses

Of these eleven courses, five are required courses and six are electives.

Prior to declaring the major in sociology, students must complete Introduction to Sociology (01:920:101) and one of the following courses: 01:920:215, 01:920:311, 01:920:312, 01:920:316.
Only courses with a C grade or higher may be counted toward the major.

11 Total Courses
5 Required Courses

01:920:101 Introduction to Sociology (3 credits)
01:920:215 Six Great Reads: Explorations in Sociology (3 credits)
01:920:311 Social Research Methods (4 credits)
01:920:312 Introduction to Statistics in Sociology (4 credits)
01:920:316 Social Theory (4 credits)

6 Sociology Elective Courses:

3 Courses - any level (each in a different thematic - see checklist)
3 Courses - 300-level or higher (in any thematic)

Sociology Elective Internship

Sociology undergraduates can earn up to three academic credits by working at an internship (01:920:482). Students who participate in an internship for credit must have a GPA of 3.0 or higher and have junior or senior class standing. The internship must be approved by the department undergraduate director.

Sociology 920 (SAS)

Minor Requirements

Minor Requirements

The minor in sociology consists of at least six courses totaling 19 credits. Grades of C or better are required in each of the courses.

Courses required for the minor are 01:920:101 Introduction to Sociology and any one of three courses:
01:920:311 Social Research Methods
01:920:312 Introduction to Statistics in Sociology
01:920:316 Social Theory

Of the four elective courses, at least two must be at the 300 to 400 level (does not include 311, 312, or 316).
1 course - any level
1 course - 200-level or higher
1 course - 300-level or higher
1 course - numbered 315 or higher

The course 01:920:222 (Criminology) cannot be counted toward the sociology minor by criminal justice majors. Furthermore, no more than three courses may be counted jointly for the criminal justice major and the sociology minor. No more than 6 credits at the 100 level and no more than 3 credits of Field Study (01:920:385,386) or Civic Engagement and Service Education Partnerships (CESEP) (01:920:399) may be applied toward the minor.

Sociology 920 (SAS)

Departmental Honors Program

Departmental Honors Program

Students who by the end of their junior year have earned 18 credits in sociology and have obtained a 3.5 grade-point average or better in these courses and a 3.0 cumulative grade-point average are eligible for the departmental honors program. Admission is competitive and by permission of the department. In their senior year, honors students take two semesters of honors research, which include participation in an honors seminar and the completion of a major research project. An oral presentation on their research is made to the department in the spring.

Sociology 920 (SAS)

Transfer Students

Transfer Students

Students majoring in sociology must complete at least six courses (21 credits) at Rutgers University-New Brunswick. Each of the three 300-level core courses must be completed in New Brunswick.

Sociology minors must complete at least three courses (10 credits) at Rutgers-New Brunswick.

Sociology 920 (SAS)

Recommended Course Clusters

Recommended Course Clusters

For the convenience of both majors and nonmajors, the department suggests the following groupings of 01:920 courses that may be relevant to different student interests and career plans:

Business and Organizational Structures: 218, 315, 331, 353, 375, 378

Crime and Social Control: 222, 304, 349, 361

Culture and Community: 205, 220, 318, 319

Gender and Sexuality: 216, 272, 324, 340

Global Perspectives: 227, 270, 273, 354, 370, 380

Health and Society: 115, 210, 226, 232, 303, 307, 308, 335

Race, Ethnicity, and Immigration: 108, 225, 301, 306, 435

Social Justice: 103, 111, 241, 280, 281, 290, 332, 362

Sociology 920 (SAS)

Independent Study

Independent Study

Students wishing to conduct an independent study in sociology must apply to the department in writing. Majors and minors must have a 3.0 grade-point average in sociology courses and have taken two of 311, 312, or 316. All applications will be evaluated on a case-by-case basis.

Sociology 920 (SAS)

Courses

Courses

Course Prerequisites

In the following course list, the "Introductory Sociology" prerequisite may be fulfilled with 01:920:101 or any other 920 course at the 100 or 200 level and permission of the instructor. The prerequisite for courses numbered between 315 and 399 is any one of 01:920:311, 312 or 316. For courses numbered 400 or higher, the prerequisite is any two of 01:920:311, 312 or 316.

01:920:101 *Introduction to Sociology (3)*
Introduction to the systematic study of society and social behavior.
Not open to majors in their senior year.

01:920:103 *Sociological Analysis of Social Problems (3)*
Understanding the major social problems of our times through the application of sociological principles and methods.
Not open to majors in their senior year.

01:920:108 *Minority Groups in American Society (3)*
Historical experiences of racial and ethnic groups in American society. Contemporary movements of minorities for greater power in the society, including the young, women, and senior citizens.
Not open to majors in their senior year.

01:920:111 *Social Class (3)*
Development of classes in Western society. Relation of class to race and ethnicity. Relevance of class to understanding modern society.
Not open to majors in their senior year.

01:920:115 *The Color of Health: How Does Inequality Get Under the Skin? (4)*
Nature of racial/ethnic structural inequalities in the United States. How these inequities manifest into poor health outcomes among people of color. Sociological imagination employed to understand how social and health inequities based on race, ethnicity, and immigration status are a function of structural inequalities.

01:920:205 *Mass Communication in Modern Society (3)*
Who says what, to whom, with what kinds of interests, within which media, and with what kinds of outcomes. The historical forerunners, development, ownership, and interests of the mass media.

01:920:210 *Sociology of Medicine and Health Care (3)*
Dynamics of health behavior. Social organization and development of health care institutions and professions. Issues of cost and quality of health care.

01:920:215 *Six Great Reads: Explorations in Sociology (3)*
Engages with six award-winning books written by sociologists that explore a variety of topics. In-depth discussion and debate around specific works of sociology. Larger public conversations around controversial topics as well as how sociologists makes claims about society.

01:920:216 *Sociology of Women (3)*
Overview of contemporary issues affecting women's lives: family, health, employment, discrimination, poverty. The women's movement and the antimovement backlash.
Credit not given for both this course and 01:988:216.

01:920:218 ***Sociology of Education (3)***
Focus on elementary and secondary education. Education and class systems; education and social change; alternative schools.
Credit not given for both this course 01:920:218 and 01:920:345.

01:920:220 ***Sociology of Culture (3)***
An introduction to the concept of culture from a sociological standpoint. Introduces different cultural explanations for social behavior, examines the production of culture as objects, and outlines cultural perspectives on diverse aspects of social life.

01:920:222 ***Criminology (3)***
Crime and the criminal in modern society. Theories regarding causes of crime, methods of treatment, and preventive programs.
May not be counted by criminal justice majors as an elective toward the sociology minor.

01:920:225 ***Immigration and Society (3)***
Provides a sociological perspective and comparative lens on international migration by looking at the causes and consequences of immigration for the United States, Canada, France, Germany, and the United Kingdom. Explores why people migrate, examines different modes of assimilation, and compares immigration policies.
Credit not given for this course and 01:595:224

01:920:226 ***Health, Culture, and Society (3)***
Integrates perspectives from sociology, history, public health, medicine, and the humanities to define health; understand the diverse ways scholars study health; and identify factors that influence the prevalence, distribution, and experience of four health conditions: obesity, depression, cancer, and HIV/AIDS. Implications of research for medical practice, ethics, and policies to enhance health worldwide.
Credit not given for both this course and 01:506:227.

01:920:227 ***Population and Society (3)***
Study of population dynamics: causes and consequences of population explosions; societal factors such as baby bust, aging, migration, family (abortion, teenage pregnancy), residential segregation, income distribution.

01:920:232 ***Sociology of Food and Eating (3)***
Draws upon a variety of perspectives to examine the social processes that shape how food is produced, prepared, and consumed in the United States. Topics include farm labor, food security, the politics of nutrition advice, dieting, and the rise of alternative food movements.

01:920:241 ***Technology and Society (3)***
Considers how the adoption of new technologies (such as the refrigerator, the telephone, the electric car, Twitter, and the nanochip) introduces both solutions and challenges for addressing current social problems and the future.

01:920:248 ***Sociology of Sports (3)***
Sociological perspective on sports. Topics include mobility through sports, stratification in sports, deviance and violence within sports, and racial and gender inequalities in sports. Examples illustrate common sociological concepts.

01:920:270 ***Global Inequalities (3)***
Examination of the persistence of cultural, political, and economic inequalities between industrialized nations and nations in the Global South. Linkages between historical forms of global domination (imperialism, colonialism, dependent development) and neoliberal globalization. Gender, ethnicity, and religion as bases of social change and social protest in the contemporary world.

01:920:272 ***Sociology of the Family (3)***
Family as a social institution: family formation and dissolution; life in families; varieties of family experiences; and the future of the family.
Credit not given for both this course and 01:988:272.

01:920:273 ***War: Critical Perspectives (3)***
Critical examination of the nature, functions, and effects of war with particular attention to racialized and gendered dynamics of militarization, terrorism, counterterrorism, and genocide.
Credit not given for both this course and 01:988:270.

01:920:280 ***Collective Behavior and Social Movements (3)***
Analysis of spontaneous and organized efforts to promote or resist social change. Cases from movements such as temperance, civil rights, religious cults, youth, and women's movements.

01:920:287 ***Caribbean Societies (3)***
This course examines Caribbean societies through the perspective of social development. The course surveys the social, economic, political, and cultural realities in contemporary Caribbean societies with an eye to the policy interventions devised to address them. The course is divided in two parts. In the first part, students are introduced to the central policy areas for social and economic development in the Caribbean, the definition of a social problem, and the history and theory behind ideas of development. In the second part, students examine a number of social development areas in order to assess the policies utilized to address them and begin to think about alternative social policy directions.

Credit not given for both this course and 01:595:297

01:920:290 ***Political Sociology (3)***
Bases and structure of power in modern societies: political socialization, ideology, political parties, movement organizations. Forms of participation linked to social change.

01:920:291,292 ***Topics in Sociology (3,3)***
Special topics in sociology, to be determined each time the courses are offered.

01:920:301 ***Latinos and Race (3)***
Various ways in which race is constituted and how dominant racial identities create a framework for Latino identity in the United States. How notions of white people, white culture, and whiteness are understood by populations racialized as the Other, particularly Latinos.

Not open to first-year students. Credit not given for this course and 01:595:301.
Prerequisite: 01:920:101 or 21:920:201 or 50:920:207

01:920:303 *Social Gerontology (3)*
Social aspects of aging and old age. Analysis of public policy, social roles, and population characteristics of the elderly, including variations by sex, class, and race.
Prerequisite: 01:920:101 or 21:920:201 or 50:920:207

01:920:304 *Sociology of Deviant Behavior (3)*
Major forms of social deviance, theories accounting for them, and societal responses to them.
Prerequisite: Prerequisite: 01:920:101 or 21:920:201 or 50:920:207

01:920:306 *Race Relations (3)*
Dynamics of U.S. race relations seen in theoretical and historical perspectives; significance of racial domination/subordination in world context; current issues.
Prerequisite: Prerequisite: 01:920:101 or 21:920:201 or 50:920:207

01:920:307 *Mental Illness (3)*
Social and cultural variations in the definitions, causes, and treatment of mental illness. Analysis of institutions and professions dealing with mental illness.
Prerequisite: 01:920:101 or 21:920:201 or 50:920:207.

01:920:308 *Psychosocial Foundations of Health and Medicine (3)*
Conceptual, methodological, and substantive approaches to psychosocial perspectives on health.
Prerequisite: 01:830:101 or 01:920:101 or 21:920:201 or 50:920:207. Credit not given for both this course and 01:830:308.

01:920:311 *Social Research Methods (4)*
Major methods and techniques of social research: various types of research design; sampling; methods of data gathering; analysis and interpretation of research findings.
Prerequisite: 01:920:101 or 21:920:201 or 50:920:207 or permission of instructor.

01:920:312 *Introduction to Statistics in Sociology (4)*
Introduction for social science majors to computer data processing and analysis. Individually designed projects. Emphasis on logical, nonmathematical explanations of techniques and procedures.
Prerequisite: 01:920:101 or 21:920:201 or 50:920:207 or permission of instructor.

01:920:315 *How Organizations Work (3)*
Sociological analysis of public and private organizations and bureaucracies in the modern world, with attention to formal and informal structures, power, careers, status systems, and organizational change. Case materials from government, universities, business.
Prerequisite: One of 01:920:311, 312, 316

01:920:316 *Social Theory (4)*
Study of theory in sociology from the sociological classics of the 19th- and early 20th-century theorists as Marx, Durkheim, and Weber to later theorists like Polanyi, Gramsci, and Habermas. Application to contemporary social issues.
Prerequisite: 01:920:101 or 21:920:201 or 50:920:207 or permission of instructor.

01:920:318 ***Sociology of Trauma and Collective Memory (3)***
Considers how social scientists make sense of the social and emotional impact of catastrophic disruptions such as genocide, terrorism, slavery, sexual abuse, AIDS, and natural disaster. Explores how membership in different groups (religious, ethnic, gender) shapes the ways people remember, forget, and deny traumatic events.
Prerequisite: One of 01:920:311, 312, 316

01:920:319 ***Sociological Approaches to Social Psychology (3)***
Topics include interpersonal exchange, cognitive consistency, conceptions of justice, small groups, friendship networks, social support networks, and techniques for analyzing networks. Topics vary each semester; consult department.
Prerequisite: One of 01:920:311, 312, 316

01:920:321 ***Urban Development and Community Change (3)***
Historical development of the contemporary community form. Emergence of modern patterns of urban life.
Prerequisite: One of 01:920:311, 312, 316

01:920:323 ***Sociology of Childhood and Adolescence (3)***
Study of social interaction during childhood and adolescence; emphasis on social interaction in various types of families and peer groups.
Prerequisite: One of 01:920:311, 312, 316

01:920:324 ***Sociology of Gender (3)***
Study of sources, maintenance, consequences, and change of men's and women's roles in society. Cultural, social, political, economic, and psychological perspectives.
Prerequisite: One of 01:920:311, 312, 316. Credit not given for both this course and 01:988:324.

01:920:326 ***Sociology of Communities (3)***
Study of villages, towns, cities, suburbs, and metropolitan areas. Their social problems, organization, and change.
Prerequisite: One of 01:920:311, 312, 316

01:920:332 ***Social Inequalities (3)***
Facts and theories of unequal distribution of income, honor, prestige, life chances, opportunities, social mobility, status attainment. Implications for social integration and conflict.
Prerequisite: One of 01:920:311, 312, 316

01:920:335 ***Health and Inequality (3)***
Social disparities in health outcomes and inequalities in the provision of health care, examined from a sociological perspective. Health inequality pertaining in the United States and important challenges in global public health.
Prerequisite: One of 01:920:210, 311, 312, 316.

01:920:340 ***Sociology of Sexuality (3)***
Examines the social dimensions of, and social influences on, the expression of human sexuality. Includes analysis of topics such as hook-up culture, sexual double standards, same-sex marriage, virtual sex, and contemporary sexual politics.
Prerequisite: One of 01:920:311, 312, 316.

01:920:345 *Education and Society (3)*
Organization and functions of school systems; differential opportunities and stratification; educational developments as effects and causes of social change; community conflict; internal organization of schools.
Prerequisite: One of 01:920:311, 312, 316. Credit not given for both this course and 01:920:218 and 01:920:345.

01:920:349 *Law and Society (3)*
How social forces affect law and how law affects society. The relationships among legal and other institutions in society. The roles of lawyers, judges, and juries.
Prerequisite: One of 01:920:311, 312, 316.

01:920:353 *Sociology of Housing and the Built Environment (3)*
Social and cultural influence on housing and urban design and the reciprocal impact of the built environment on social organization, interaction, and personality.
Prerequisite: One of 01:920:311, 312, 316.

01:920:354 *Global Gender Issues (3)*
Comparative analysis of objective conditions and subjective experiences of women in Africa, Asia, Latin America, and of disadvantaged women in the United States and other industrialized nations. Exploration of new forms of women's empowerment.
Prerequisite: One of 01:920:311, 312, 316. Credit not given for both this course and 01:988:354.

01:920:357 *Labor and Climate Migration from Africa to Europe - Study Abroad (3)*
International migration and refugee flows; poverty, political violence, and the violence of climate change; differential risks and opportunities of crossing the Morocco-Spain border; backlashes against migrants; the impact of the climate crisis; the politics of South-to-North migration; includes practical exercises in fieldwork and analysis.

Credit not given for both this course and 01:070:357.

01:920:359 *Environmental Sociology (3)*
Interaction between people and the environment, with emphasis on such problems as air and water quality, energy, and land use.
Prerequisite: One of 01:920:311, 312, 316.

01:920:360 *Computational Social Science (3)*
Analysis of social data using a range of techniques including natural language processing, machine learning, and agent-based modeling. Ethical implications of big data and artificial intelligence. Coding in the R programming language to analyze several different datasets.
Prerequisite: 01:198:142.

01:920:361 *Sociology of Drug Use (3)*
Causes and extent of illegal drug use, nature and effectiveness of law enforcement, treatment-oriented efforts to control drugs, and the criminalization and decriminalization of drugs.
Prerequisite: One of 01:920:311, 312, 316.

01:920:362 ***Interventions and Social Change (3)***
Examines intentional attempts to change large-scale social behavior in a sustained or chronic way, especially in areas such as poverty relief, education, politics, health, and financial reform. Explores the use of coercion, incentives, information, social norms, and social networks to engineer change.
Prerequisite: One of 01:920:311, 312, 316.

01:920:363 ***Sociology of Work and Occupations (3)***
Meaning of work; occupational development and socialization; occupations and careers; social control of work; occupational cultures and lifestyles; relations between occupations.
Prerequisite: One of 01:920:311, 312, 316.

01:920:370 ***Global Structures and Change (3)***
Explores transformations of global structures during the roughly 500-year history of world capitalism and explores today's global structures and their potential for change. Some focus on the European Union as an engine and illustration of global change.
Prerequisite: One of 01:920:311, 312, 316.

01:920:375 ***Economic Sociology (3)***
Analysis of economic institutions from a sociological perspective. Historical and contemporary viewpoints drawing on material from developed and underdeveloped, capitalist, and state socialist societies.
Prerequisite: One of 01:920:311, 312, 316.

01:920:378 ***Social Network Analysis (3)***
Introduction to social network analysis as a paradigm for understanding social structure and social relations. Concepts, methods, and software for describing and analyzing networks. Concrete applications of network methods in diverse settings, such as friendship networks, corporate interlocks, disease diffusion, internet-based interaction, and social movement mobilization.
Prerequisite: One of 01:920:311, 312, 316.

01:920:380 ***Global Health: Sociological Perspectives (3)***
Sociological introduction to the field of global health, focusing on the disease burden in developing countries. Focus on how poverty, inequality, culture, socioeconomic development, globalization, and health systems are related to health. Using existing statistics and literature, we will explore the economic, social, environmental, and institutional determinants of various diseases across population groups.
Prerequisite: One of 01:920:311, 312, 316.

01:920:393 ***Topics for Sociological Analysis (3)***
Topics vary each semester. Consult department.
Prerequisite: One of 01:920:311, 312, 316.

01:920:399 ***CESEP (1)***
One-credit community service placement in sociology.
Prerequisite: One of 01:920:311, 312, 316. Corequisite: Must be taken in conjunction with a designated CESEP (Civic Engagement and Service Education Partnerships) course offered in the sociology department.

01:920:406 ***Sociology of Religion (3)***
Orientations to the superempirical; the interaction of religious beliefs and institutions with secular society. Classical and contemporary theories and data.
Prerequisite: Two of 01:920:311, 312, 316.

01:920:410 ***Alcohol Problems (3)***
Social, social-psychological, and physiological functions of alcohol; relations to institutional values; efforts at social control.
Prerequisite: Two of 01:920:311, 312, 316.

01:920:433 ***Race, Science, and Medicine (3)***
History of race in science and medicine. Contemporary research of race and health disparities. Significance of race in scientific claims about difference.
Prerequisite: Two of 01:920:311, 312, 316; permission of department.

01:920:434 ***Social Science and Public Policy (3)***
Federal government and policy making; roles of foundations, private agencies, and policy sciences. Data bank and social indicators in the study of policy. Game theory and policy making.
Prerequisite: Two of 01:920:311, 312, 316.

01:920:435 ***Immigrant Minorities in the United States (3)***
Study of migrations to the United States and their impact; detailed consideration of pluralist versus assimilationist hypotheses about the effects of immigration; effects of ethnicity on U.S. culture. Case study materials on various ethnic Americans.
Prerequisite: Two of 01:920:311, 312, 316.

01:920:438 ***Sociology of Age (3)***
Age stratification and society; conflict and cooperation among young, middle-aged, and old; aging, succession of generations, and social change. Implications for public policy and professional practice.
Prerequisite: Two of 01:920:311, 312, 316.

01:920:440 ***Sexuality and Society (3)***
Description of sexual conduct and variation; patterns of sexual behavior and attitudes analyzed in terms of social, historical, and cross-cultural antecedents and consequences.
Prerequisite: Two of 01:920:311, 312, 316. Credit not given for both this course and 01:988:440.

01:920:442 ***Mass Media and Popular Culture (3)***
Analysis of popular culture, with stress on propaganda techniques and myth dissemination. Touches on such topics as romantic love, pop music, and sports.
Prerequisite: Two of 01:920:311, 312, 316.

01:920:461,462 ***Sociology of Selected Institutions (3,3)***
Intensive analysis of such institutions as prisons, hospitals, mental hospitals, schools. Different institutions considered in different semesters.
Prerequisite: Two of 01:920:311, 312, 316.

01:920:482 ***Sociology Elective Internship (1.5 or 3)***
Sociology undergraduates can earn up to three academic credits by working at an internship. Students who participate in an internship program for credit must have a GPA of 3.0 or higher and have junior or senior class standing. All internships for academic credit must be approved by the internship director and are by special permission only. Students can receive 1.5 or 3 credits, which would count as a 315-level elective for the major.

01:920:491,492 ***Advanced Seminar in Sociology (3,3)***
Topics vary by section.
Prerequisite: Two of 01:920:311, 312, 316. Open only to advanced undergraduates by permission of instructor.

01:920:493,494 ***Independent Study in Sociology (BA,BA)***
Faculty-guided research on a project of the faculty member's devising.
Prerequisite: Two of 01:920:311, 312, 316; or permission of department.

01:920:495, 496 ***Research in Sociology (BA, BA)***
Faculty-guided research on a project of the faculty member's devising.
Prerequisite: Two of 01:920:311, 312, 316; or permission of department.

01:920:497,498 ***Honors in Sociology (3,3)***
Prerequisite: Two of 01:920:311, 312, 316; permission of department.

South Asian Studies Program, School of Arts and Sciences

Website: https://southasia.rutgers.edu

Program Director: Johan Mathew

Program Faculty:

Sadia Abbas, English (Newark); Ph.D., Brown

Sarada Balagopalan, Childhood Studies (Camden); Ph.D., NYU

Radhika Balakrishnan, Women's, Gender, and Sexuality Studies; Ph.D., Rutgers

Sanjib Bhuyan, Agricultural, Food, and Resource Economics; Ph.D., Connecticut

Ethel Brooks, Women's, Gender, and Sexuality Studies, and Sociology; Ph.D., New York

Edwin F. Bryant, Religion; Ph.D., Columbia

Ali Chaudhary, Sociology; Ph.D. Californinia (Davis)

Karishma Desai, Education; Ed.D. Columbia Teachers College

Danielle Falzon, Sociology; Ph.D. Brown

Sunanda Gaur, Robert Wood Johnson Medical School; M.D., King George Medical College (India)

Parvis Ghassem-Fachandi, Anthropology; Ph.D., Cornell

Asher Ghertner, Geography; Ph.D., California (Berkeley)

Ramu Govindsamy, Agricultural, Food, and Resource Economics; Ph.D., Iowa State

Chie Ikeya, History; Ph.D., Cornell

Arpana Inman, Applied and Professional Psychology; Ph.D., Temple

Kevin Kolben, Business (Newark); J.D., Michigan

Triveni Kuchi, Research and Instructional Services (Libraries); M.L.S., Rutgers

Mukti Lakhi-Mangharam, English; Ph.D., Cornell

D. Christian Lammerts, Religion; Ph.D. Cornell

Preetha Mani, AMESALL; Ph.D., California (Berkeley)

Johan Mathew, History; Ph.D., Harvard

Jawid Mojaddedi, Religion; Ph.D., Manchester

Anjali Nerlekar, AMESALL; Ph.D., Kansas

Shaheen Parveen, AMESALL; Ph.D. Lucknow

Tamara Sears, Art History; Ph.D., Pennsylvania

Meheli Sen, AMESALL; Ph.D., Emory

Julia Stephens, History; Ph.D., Harvard

Audrey Trushke, History (Newark); Ph.D., Columbia

Simon Wikhamsmith, Writing Program; Ph.D., Washington

Janet Walker, Comparative Literature; Ph.D., Harvard

Learning Goals

Learning Goals

Minors will be able to demonstrate a strong grounding in the interdisciplinary study of South Asia and/or diasporic South Asian communities. Through coursework in at least three different disciplines, they will become familiar with the languages, cultures, religions, and histories of South Asia and the South Asian diaspora.

South Asian Studies 925 (SAS)

Minor Program

Minor Program

The interdisciplinary minor consists of a minimum of six courses (totaling at least 18 credits) from the following list of approved courses. One of these courses must be a South Asian history survey course or equivalent. Not more than three of the six courses can come from any one discipline. Cross-listed courses can be counted only once, but may be considered as being in either of the departments in which they are listed. Courses taken as part of university-approved study abroad programs in South Asia may be included in the six, subject to the approval of a faculty adviser. Consult the program for a list of courses.

Survey Courses

01:195:243 Introduction to the Literatures of South Asia (3)

01:195:249 Modern Literatures of South Asia (3)

01:450:341 South Asia (3)

01:508:230 The Making of Modern India and Pakistan (3)

Elective Courses (five courses required)

01:013:160 Elementary Hindi I (4) (hybrid online) (fall & spring)

01:013:161 Elementary Hindi II (4) (hybrid online) (spring)

01:013:162 Elementary Urdu I (4) (fall)

01:013:163 Elementary Urdu II (4) (spring)

01:013:176 or 01:723:176 Elementary Persian I (4) (hybrid online) (fall)

01:013:177 Elementary Persian II (4) (hybrid online) (spring)

01:013:201 Crossroads: Classical Literatures of Africa, the Middle East, and South Asia (3)

01:013:231 Introduction to the Literatures of South Asia (3)

01:013:232 Women Writers of South Asia (3)

01:013:260 Intermediate Hindi I (4) (hybrid online) (fall)

01:013:261 Intermediate Hindi II (4) (hybrid online) (spring) AHq

01:013:276 or 01:723:276 Intermediate Persian I (4) (hybrid online) (fall)

01:013:304 Introduction to Translation Studies (3) (spring) CCD

01:013:307 Introduction to Postcolonial Literatures and Theories (3) (spring) CCO, CCD, AHo or AHp

01:013:331 Modern Literatures of South Asia (3) (fall) AHo or AHp

01:013:337 Film and Literature in South Asia (3) (spring)

01:013:360 Advanced Hindi I (3) (hybrid online) (fall)

01:013:361 Advanced Hindi II (3) (hybrid online) (spring)

01:013:365 Bollywood (3)

01:013:376 or 01:723:376 Advanced Persian (3)

01:013:430 Gender Nation and Literature in South Asia (3) (fall) WCD

01:013:433 Modern Urdu Literature and Popular Culture (3)

01:070:244 South Asian Ethnography (3)

01:082:205 Introduction to Asian Art (3)

01:082:206 Art of India (3)

01:098:321 Interdisciplinary Topics in South Asia (3)

01:195:232 Women Writers of South Asia (3)

01:195:243 Introduction to the Literatures of South Asia (3)

01:195:249 Modern Literatures of South Asia (3)

01:450:341 South Asia (3)

Learning Goals

Learning Goals

Goals for Spanish Majors and Minors

Majors in all areas will be able to demonstrate proficiency in interpretive, interpersonal, and presentational modes of communication and basic knowledge of linguistics, cultural studies, or translation as disciplines. The top 75 percent of Spanish or Portuguese majors will be able to carry out conversations in which they can describe, compare, contrast, in all tenses (present, past, and future), with an appropriate breadth of vocabulary and register, and to be understood by a nonsympathetic listener; and to read and write documents written in academic, formal, and/or literary registers of language. Majors will be able to conduct research projects according to the methodologies of the humanities, social, or cognitive sciences and demonstrate intercultural awareness and understanding of the Hispanic or Luso-Brazilian world. Honors students (top 15 percent) will be able to complete independent research, write a thesis, and defend it before a faculty committee.

Spanish majors who choose electives in linguistics will also be able to demonstrate familiarity with basic concepts of linguistics, in particular with issues related to language contact and bilingualism and bilingual education, and be able to design and implement a research project.

Spanish majors who choose electives in translation/interpreting will also be able to demonstrate proficiency at the levels required by preprofessional and professional training for employment in legal, medical, and commercial translation and in other areas; and for further study in law, medicine, editing/journalism, and business, as well as graduate studies in both linguistics and literature.

Spanish majors who choose electives in literature and culture will also be able to demonstrate knowledge of current issues and perspectives in literary and cultural studies in Spanish and the basic body of works in Spanish literature and culture; critically analyze verbal and visual texts; demonstrate familiarity with a range of cultural works from different time periods and geographical regions within the Spanish-speaking world and with the historical phenomena and sociocultural issues that these works negotiate. The top 15 percent of majors will be prepared for acceptance to graduate programs in Spanish.

Portuguese majors will also be able to demonstrate knowledge of current issues and perspectives in literary and cultural studies in Portuguese and the basic body of works in Luso-Brazilian literature and culture; critically analyze verbal and visual texts; demonstrate familiarity with a range of cultural works from different time periods and geographical regions within the Portuguese-speaking world and with the historical phenomena and sociocultural issues that these works negotiate. The top 15 percent of majors will be prepared for acceptance to graduate programs in Portuguese.

Minors in Spanish or Portuguese will be able to demonstrate a level of language proficiency that allows basic conversations on a variety of uncomplicated topics, with basic command of the language, and some spontaneous creative ability; and basic familiarity with the main cultural, literary, and linguistic issues of the Hispanic or Luso-Brazilian world.

Spanish 940 (SAS)

Introductory Courses and Placement

Introductory Courses and Placement

Students who have had two or more years of high school Spanish are not eligible to take Elementary Spanish (101 or 102) and must take a placement test.

Students who have grown up in Spanish-speaking homes and/or who have received any formal education in Spanish must also take the placement test, and they may not take elementary (101-102), intermediate (131-132), or conversation courses (203-204); they should instead take the sequence of language courses designated for native speakers, which is specially tailored to their needs, or upper-level courses, in accordance with their placement test results.

The only students who are not required to take the placement test are non-native speakers who have had less than two years of high school Spanish. Please note, however, that if you have had fewer than two years of high school Spanish and choose to take the placement test, you must enroll in the level in which you are placed.

The department encourages students to reach out to the Undergraduate Director with any questions or concerns about placement level.

Spanish 940 (SAS)

Major Requirements

Major Requirements

The Spanish major consists of a minimum of 38 credits at the 200-400 level completed with a grade of C or better in each course.

At the 200 level, Spanish majors are required to take 940:215 and 940:261. At the 300 level, majors are required to take 940:325, 3 credits in literature (940:331, 940:332, 940:333, 940:334, 940:335, or 940:336), 3 credits in linguistics (940:362, 940:363, 940:364, 940:365, or 940:366, 940:367), and 1 oral proficiency credit (940:389). At the 400 level, majors are required to take two 3-credit courses and 1 oral proficiency credit (940:499). To complete the 38-credit minimum, students are required to take electives at the 200-400 level.

Please note: 1) The first course to count towards the major is SPA 203 (SPA 201 for heritage speakers) not including SPA 205, 206, 207, or 225; 2) no more than 15 credits may be taken at the 200 level; 3) only juniors and seniors in Spanish may register for 940:389 and 940:499; 4) students may count up to 6 elective credits in Portuguese (810) at the 200-400 level toward the Spanish major; and 5) in some cases, up to 6 credits of courses taught in another discipline may count for the Spanish major if the courses are preapproved with partial work completed in Spanish and approval by the undergraduate director. Students are responsible for consulting the catalog course listing for a description of prerequisites and special conditions prior to registration of classes. All major programs must be reviewed and approved by a departmental adviser. Majors in Spanish must take both 389 and 499 to successfully complete the major. Students must take the OPI once both courses have been completed. Students who have taken the OPI exam without taking 389 and 499 will not be certified. Exceptions will not be made.

Spanish 940 (SAS)

Minor Requirements

Minor Requirements

A minor in Spanish consists of a minimum of 18 credits of courses given in Spanish (940) completed with a grade of C or better in each course. Of the 18 credits, 9 credits must be at the 300 level or above. The first course to count towards the minor is 940:132 (940:139 for heritage speakers) not including 205, 205, 207, or 225. No more than 3 credits may be taken in courses not taught in the Spanish language.

Spanish 940 (SAS)

Departmental Honors Program

Departmental Honors Program

To be eligible for graduation with departmental honors, majors must maintain a cumulative grade-point average of 3.5 or better in their major courses, and 3.25 or better overall. Students are admitted to the departmental honors program by selection of the honors committee. The honors project is two semesters in duration (3 credits each semester), and may focus on any aspect of Luso/Brazilian/Portuguese language, linguistics, literature, or culture. Prior to beginning the honors project, the student is expected to complete at least two courses at the 300 level. The student must present the honors project for an oral defense before a committee assembled by the project director, in consultation with the candidate. More detailed information is available at the departmental honors website.

Spanish 940 (SAS)

Study Abroad

Study Abroad

Rutgers University sponsors a Junior Year in Argentina, Brazil, Chile, Mexico, and Spain; and a Departmental Program for Summer Study in Spain and Peru. Information on these and other study abroad opportunities is available in the department office and the Center for Global Education office.

Certificate of Proficiency in Spanish-English and English-Spanish Translation

Certificate of Proficiency in Spanish-English and English-Spanish Translation

Spanish 940 (SAS)

Certificate of Proficiency in Spanish-English Translation/ Interpreting

Certificate of Proficiency in Spanish-English Translation/ Interpreting

This certificate is offered to students who complete 19-21 credits in the following courses: 01:940:363 (or 419), 364, 401, 402, 471, 475, 476, 477, 478 (or 479), 486, and 487. The three courses in interpreting (475, 477, and 487) are required. A 3.5 or better cumulative grade-point average for the entire 19-21 credit sequence is required, with a minimum grade of B in all courses except 01:940:401 and 402, which require a B+ or better. For further information, contact the department.

Spanish Language House

Spanish Language House

The Casa Hispánica on the Douglass campus is open to qualified students. For additional information, visit the Global Village website.

Spanish 940 (SAS)

Courses in English

Courses in English

01:940:160 ***Spanish in the World (1.5)***
Current issues in the language, literature, and culture of the Spanish-speaking world. Analysis of topics such as cultural identity, language contact, major literary authors, or historical implications of colonization.
Taught in English. Not for major or minor credit.

01:940:240 ***The Luso-Hispanic Dialogue: Multiple Perspectives (3)***
Relationship between the Portuguese-speaking and Spanish-speaking worlds as it manifests itself culturally, linguistically, and historically.
Credit not given for both this course and 01:810:240. Course taught in English, but knowledge of Spanish and/or Portuguese is necessary. Course will count for the Spanish major or minor if all written work is done in Spanish.

01:940:241,242 ***Masterpieces of Hispanic Literature in Translation (3,3)***
Reading and interpretation of outstanding Hispanic writers.
Credit not given for both these courses and 01:195:231. Prerequisite: 01:940:201, 202, 203, or 204. Only open to students who wish to count this course for the Spanish major or minor, and if all written work is done in Spanish.

01:940:250 ***Sports in Latin America and the Caribbean (3)***
Sports and games in Latin American and Caribbean cultures. Analysis of their contexts and evolution. Topics may include Maya ballgame, capoeira, soccer fever, baseball, recreation and education, women in sports, sport management, and resources.
Credit not given for both this course and 01:590:250 or 01:595:250. Taught in English. Course will count for the Spanish major or minor if all written work is done in Spanish.

01:940:270 ***Introduction to Caribbean Literature (3)***
Reading and discussion of poetry, prose, and drama by major literary figures representative of different histories and cultures of the Caribbean and its diaspora.
Credit not given for both this course and 01:595:270 or 01:195:260.

01:940:303 ***Language and U.S. Latino/a Culture (3)***
Interrelation of diverse linguistic traits and practices in the production of U.S. Latino/a culture. Emphasis on Chicano/a, Mexican-American, Nuyorican/Puerto Rican, Dominican-American, Cuban, and Cuban-American contributions, in the context of historical and political processes.
Credit not given for both this course and 01:595:303. Taught in English. Course will count for the Spanish major or minor if all written work is done in Spanish.

01:940:345 ***Spanish Film-English (3)***
Topics in Spanish-language cinema. Emphasis on close analysis and contextual understanding of individual films. Course may count for the Spanish major if student has: 1) already taken one semester of 300-level literature in Spanish, 2) done all written work in Spanish, and 3) obtained approval from the Undergraduate Director.
Credit not given for both this course and 01:940:346.

01:940:347 ***Latin American Cinema-English (3)***
Topics in Spanish-language and Portuguese-language cinema. Analysis and contextual understanding of films and documentaries as a major expression of Latin American cultures. Course may count for the Spanish major if student has: 1) already taken one semester of 300-level literature in Spanish; 2) done all written work in Spanish; and 3) obtained approval from the Undergraduate Director.
Credit not given for both this course and 01:940:348.

01:940:351 ***Women Writers of the Hispanic World-English (3)***
Reading and discussion of works by women writers, visual artists, and performance artists of the Spanish-speaking world.
Taught in English. Credit not given for both this course and 01:988:351 or 01:940:342 or 01:988:342.

01:940:368 ***The Bilingual Mind (3)***
Cognitive mechanisms underlying the bilingual mind. Selective attention and memory, models of bilingual representation and processing, cognitive and linguistic effects of bilingualism.
Student will receive credit for the Spanish major or minor if all written work completed in Spanish. Prerequisite: 01:940:261 or 01:830:101.

01:940:445 ***Cervantes in Translation (3)***
Critical study of Cervantes. *Don Quixote*, selected *Exemplary Novels*, and the *Interludes*.

01:940:446 ***Contemporary Latin American Literature in Translation (3)***
Selected major authors of present-day Spanish America including Borges, Carpentier, Fuentes, Paz, and García Márquez.

01:940:452 ***Readings in U.S. Latino/a Literature and Culture (3)***
Study of recent texts produced by and about Latino/as in the United States. Examination of issues of exile, integration and assimilation, political presence, and nationalism.
Prerequisite: One semester of 300-level literature in Spanish or permission of department. When taught in English, course will count for the Spanish major or minor if all written work is done in Spanish.

Spanish 940 (SAS)

Courses in Spanish

Courses in Spanish

01:940:101-102 ***Elementary Spanish (4,4)***
For students with little or no previous study of Spanish. Designed to develop basic skills in speaking, understanding, reading, and writing. Integrated laboratory sessions.
Not open to students who have had two or more years of secondary school Spanish. Credit not given for both these courses 101:940:111 and 01:940:100.

01:940:110 ***Introduction to Heritage Cultural Studies (3)***
Hybrid online course. Analyze and understand cognitive, social, and cultural aspects related to bilingual speakers of a minority language in a majority-language society.

01:940:121 *Spanish Review and Continuation (3)*
Review of basic structures and further development of Spanish language skills.
Not open to students who have taken 01:940:100 or 01:940:101-102. Open only by placement exam or permission of department to students who have had two or more years of secondary school Spanish.

01:940:131-132 *Intermediate Spanish (4,4)*
Study and practice of specific areas of grammar, linguistic structure, and style. Selected readings of modern authors, with composition and class discussion.
Prerequisites: For 01:940:131: 01:940:100 or 101-102 or 121, or permission of department. For 01:940:132: 01:940:131, or permission of department. Credit not given for both these courses and 01:940:130 or 01:940:139.

01:940:139 *Spanish for Heritage Speakers I (3)*
Study of specific areas of grammar and orthography. Practice in oral communication and grammar application.
Prerequisite: Placement exam or permission of department. Credit not given for both this course and 01:940:130 or 131-132.

01:940:201 *Spanish for Heritage Speakers II (3)*
Continued study of specific areas of Spanish grammar through translation and compositions. Development of reading skills and vocabulary building through newspapers and magazines.
Prerequisite: 01:940:139 or equivalent or placement exam. Credit not given for both this course and 01:940:203.

01:940:202 *Culture and Composition for Heritage Speakers (3)*
Development of communicative skills in Spanish with emphasis on cultural, technological, and communicative competencies related to Hispanic culture of both the past and the present.
Prerequisite: 01:940:201, placement exam or permission of department. Credit not given for both this course and 01:940:204.

01:940:203 *Spanish Conversation and Composition (3)*
Designed to develop oral fluency and writing skills in a variety of contexts. Conversation, vocabulary building, oral reports, fundamentals of expository writing.
Prerequisites: 01:940:131-132, placement exam or equivalent. Not open to native speakers or other students already conversant in the language.

01:940:204 *Culture and Composition (3)*
Introduction to culture and civilization in the Hispanic world from prehistoric times to the present. Development of reading skills and expository writing abilities.
Prerequisite: 01:940:203 or permission of department. Not open to native speakers or other students already conversant in the language.

01:940:205 *Spanish for the Health Professions (3)*
Online course for those working in the medical field. Designed for students with a basic knowledge of Spanish (native and heritage speakers or those with at least one year of college-level Spanish). Begins with a review of basic Spanish grammar.
Prerequisite: Placement, 01:940:132 or equivalent, or permission of the department. No credit given for minor or major in Spanish

01:940:206 ***Spanish for Business I (3)***
Survey of interpretive, cultural, interpersonal, and presentational situations necessary for conducting and managing projects in Spanish through the acquisition of vocabulary and knowledge of the Spanish-speaking business world, use of appropriate grammar, and interpersonal communication.
Prerequisite: 01:940:132 level proficiency. No credit given for minor or major in Spanish.

01:940:207 ***Spanish for Social Work (3)***
Survey of interpretive, cultural, interpersonal and presentational situations in Spanish related to Social Work through the acquisition of vocabulary and knowledge, use of appropriate grammar and interpersonal communication.
Prerequisite: 01:940:132 level proficiency. No credit given for minor or major in Spanish.

01:940:215 ***Introduction to Hispanic Literature (3)***
Introduction to the fundamental concepts of the study of Hispanic literature. Emphasis on genre and textual analysis of selected works.
Prerequisite: 01:940:202 or 204; FSH placement, or permission of department. Credit not given for both this course and 01:940:217.

01:940:220 ***Literature and Activism on the US-Mexico Border (3)***
Analysis and contextual understanding of literature and performance that explore the geopolitical space of the U.S.-Mexico border, with a special emphasis on the intersections of activism and the humanities. Taught in English.

Credit not given for this course and 01:595:220.

01:940:225 ***Spanish for the Health Professions II (3)***
Online course for those working in the medical field. Designed for students with a basic knowledge of Spanish (native and heritage speakers or those with at least one year of college-level Spanish). Begins with a review of basic Spanish grammar.
No credit given for minor or major in Spanish.

01:940:230 ***Food for Thought: Food Culture in the Spanish-speaking World (3)***
This course examines how food shapes our identity, gender, race, and ethnicity by exploring its cultural and historical significance in Spain and Latin America. We will analyze how food has been instrumentalized to reinforce dominant ideologies by regulating its distribution, classifying it by gender and race, and producing it in abundance.

Prerequisite: 01:940:215.

01:940:261 ***Introduction to the Study of Language (3)***
Review of the different aspects of language from the point of view of its internal organization, relationship with cognitive sciences, and relationship to the world.
Prerequisites: 01:940:202, 204; FSH placement, or permission of department.

01:940:280 ***Spanish Civil War and Political Struggles for Equality and Diversity (3)***
This course explores the Spanish Civil War (1936-1939) as a crucial historical and cultural event rooted in divergent discussions on modernity in the 19th century. Despite the tragic ending of the war, which resulted in thirty-six years of dictatorship and political repression, Spain has emerged as one of the most progressive European countries in recent times.
Prerequisite: 01:940:215.

01:940:289 ***Culture of Ladino: An Introduction (3)***
Introduction to Ladino literature and culture. Ladino is the language of the Sephardic Jews ¿ Jews whose ancestors came from Spain and Portugal. Traces Ladino literary and cultural history in proverbs, folktales, ballads, popular songs, satirical creations, journalistic writings, selections from modern fiction and historical accounts. Course taught in English.
Credit not given for both this course and 01:013:289, 01:563:289, or 01:617:289.

01:940:313 ***Advanced Spanish Conversation and Contemporary Issues (3)***
Intensive class discussions, oral reports, and debates based on cultural materials taken from newspapers, journals, radio, television, and films.
Prerequisite: 01:940:215, 261, 325, or permission of department. Credit not given for both this course and 01:195:334.

01:940:325 ***Advanced Grammar and Composition (3)***
Intensive grammatical study of selected Spanish forms and structures; vocabulary building and composition.
Prerequisite: 01:940:202 or 204, FSH placement, or permission of department.

01:940:326 ***Advanced Composition and Introduction to Translation Studies (3)***
Continued development of reading and writing skills and oral proficiency. Detailed rhetorical analysis and discussion of writing techniques using texts taken from various fields. Introduction to basic principles of translation studies and practice in translation.
Prerequisite: 01:940:202 or 01:940:204 or by placement.

01:940:331,332 ***Literature and Culture of the Hispanic Caribbean (3,3)***
Reading and discussion of representative works from the Hispanic Caribbean with emphasis on their cultural content and elements reflecting literary periodization.
Prerequisite: 01:940:215 or 217 or permission of department. Credit not given for these courses and 01:595:266.

01:940:333 ***Power and Nation-Building in Spanish America (3)***
Study of Spanish-American texts from European expansion, colonialism, and independence through Modernismo from the 15th through the 19th centuries.
Prerequisite: 01:940:215 or 217 or permission of department.

01:940:334 ***Modernity and New Identities in Spanish America (3)***
Exploration of avant-garde through contemporary literary and cultural movements in Spanish America from the 20th century to the present.
Prerequisite: 01:940:215 or 217 or permission of department.

01:940:335,336 ***Literature and Culture of Spain (3,3)***
Reading and discussion of representative works from Spain with emphasis on their cultural content and elements reflecting literary periodization.
Prerequisite: 01:940:215 or 217 or permission of department.

01:940:342 ***Women Writers of the Hispanic World (3)***
Reading and discussion of works by women writers, visual artists, and performance artists of the Spanish-speaking world.
Prerequisite: 01:940:215 or 217 or permission of department. Credit not given for this course and 01:940:351 or 01:988:342 or 01:988:351.

01:940:346 ***Spanish Film (3)***
Topics in Spanish-language cinema. Emphasis on close analysis and contextual understanding of individual films.
Prerequisite: One semester of 300-level literature in Spanish. Credit not given for both this course and 01:940:345.

01:940:348 ***Latin American Cinema (3)***
Topics in Spanish-language and Portuguese-language cinema. Analysis and contextual understanding of films and documentaries as a major expression of Latin American cultures.
Prerequisite: One semester of 300-level literature in Spanish. Credit not given for both this course and 01:940:347.

01:940:353 ***Spanish for Community Engagement (3)***
Exploring the challenges and posing critical questions relevant to the building of Spanish-speaking communities in the United States through examining issues related to housing, education, business, health, law, and environment.
Prerequisite: 01:940:215 or 261 or 325.

01:940:360 ***Spanish for Commerce (3)***
Fundamental principles governing commercial organization in Spanish-speaking countries. Advertising strategies used to reach Spanish-speaking clients, including localization of webpages.
Prerequisite: 01:940:325 or equivalent or permission of department.

01:940:362 ***Spanish Phonetics and Phonology (3)***
Study of Spanish phonetics in theory and practice. Exercises in transcription. Contrastive analysis of the English and Spanish sound systems.
Prerequisite: 01:940:261 or equivalent.

01:940:363 ***Bilingualism in the Spanish-Speaking World (3)***
History and theory of Spanish-English bilingualism in the United States and its application in the field. Bilingualism in Spanish America and Spain. Social issues raised by theories of bilingualism.
Prerequisite: 01:940:261.

01:940:364 ***Contrastive Analysis in Spanish and English (3)***
Study of basic notions of morphosyntactic structures (internal structure of words and sentences). Emphasis on differences between Spanish and English.
Prerequisite: 01:940:261 or equivalent.

01:940:365 ***Research Methods in Spanish Linguistics (3)***
Foundations in research methodology in various linguistic disciplines. Development of skills in tool selection, collection and analysis of data, and ethical concerns.
Prerequisite: 01:940:261 or equivalent or permission of department.

01:940:366 ***Methods of Teaching Spanish (K-12) (3)***
Introduction to communicative methods of language teaching and New Jersey standards for world language teaching. Creative approaches to assessment.
Prerequisite: 01:940:261 or equivalent or permission of department.

01:940:367 ***Sociolinguistics in the Spanish-Speaking World (3)***
How language is shaped by society. Student fieldwork examining Spanish usage by heritage and nonheritage speakers required.
Prerequisite: 01:940:261 or permission of department.

01:940:368 ***The Bilingual Mind (3)***
Cognitive mechanisms underlying the bilingual mind. Selective attention and memory, models of bilingual representation and processing, cognitive and linguistic effects of bilingualism.
Prerequisite: 01:940:261 or 01:830:101 (psychology).

01:940:388, 389 ***Spanish Lab for Oral Proficiency I (1)***
Online. Designed to provide oral practice and to improve language skills. Activities are tailored to respond to specific linguistic background. Students will have the opportunity to practice their language skills by completing weekly assignments. All students are expected to understand their level of oral proficiency in order to improve their language skills. In all tasks students will be exposed to topics, real-life situations, role plays, and linguistic functions expected at this level. This course requires three mandatory meetings during the semester.
Open only to majors in Spanish in their junior or senior year. Not open to heritage speakers.

01:940:390 ***Topics in Hispanic Literature and Culture (3)***
Study of a specific topic in the field of Hispanic literature, film, or culture. Topics vary from semester to semester.
Prerequisite: 01:940:215 or 217 or permission of department.

01:940:399 ***Service Learning Internship (1)***
Community-service placement in Spanish-related field setting.
Corequisite: In conjunction with a designated unit in civic engagement and service education in the Department of Spanish. No more than 3 credits of 01:940:399 may be counted toward the major; none may be counted toward the minor.

01:940:401 ***Advanced Translation I (3)***
Introduction to the theory of translation and guidance in the use of materials essential to the translation process. Intensive practice in the translation of short texts in various fields from Spanish into English and English into Spanish.
Prerequisites: It is recommended that students enrolled in this class have a B+ or better in the following classes: 01:940:325, 326, and 01:355:101 or 103 or 104 or equivalent. Students with a minimum of B in each of these three courses may be required to submit a writing sample. Not open to first-year students or sophomores.

01:940:402 ***Introduction to Translation of Specialized Texts (3)***
Advanced theoretical and practical training in translation in specialized areas such as scientific, legal, institutional, medical, or technical. Introduction to specialized language and specialized terminology research. Intensive individual and group practice in the translation of texts in various specialized fields from Spanish into English and English into Spanish.
Prerequisite: 01:940:401 or permission of the department.

01:940:403,404 ***Civilization of Spanish America (3,3)***
Main traits of the civilization of Spanish America. Evolution of its social institutions and customs. Representative literary, philosophical, and artistic works.
Prerequisite: One semester of 300-level Spanish or permission of department. Credit not given for both these courses and 01:590:401, 402.

01:940:405,406 ***Civilization of Spain (3,3)***
Main traits of the civilization of Spain. Evolution of its social institutions and customs. Representative literary, philosophical, and artistic works.
Prerequisite: One semester of 300-level Spanish or permission of department.

01:940:411 ***Creative Writing (3)***
General practice in the writing of essay, verse, and narrative in the Spanish language.
Prerequisites: One semester of 300-level literature in Spanish and permission of the department. Departmental permission subject to the approval of a writing sample.

01:940:415 ***Medieval Spanish Literature (3)***
Study of selected works from the medieval period including the various types of poetry and the development of prose, with emphasis on *El Cid*, *El Libro de Buen Amor*, and *La Celestina*.
Prerequisite: One semester of 300-level literature in Spanish or permission of department.

01:940:416 ***Field Methods in Spanish Linguistics (3)***
Methods and techniques of data collection (observational and experimental). Introduction to electronic compilation of data.
Prerequisite: 01:940:261 or equivalent or permission of department.

01:940:417 ***History of the Spanish Language (3)***
Development of Spanish from its origins to the present. Settlement history and non-Roman influences in Spain. Evolution of sounds, forms, sentence structures, and words.
Prerequisite: 01:940:261 or 01:940:362 or 01:615:201, or permission of department.

01:940:418 ***The Spanish Language in Social Contexts (3)***
Social and linguistic issues and their theoretical concepts of Spanish throughout its sphere of influence; contact areas; language and gender, identity, and politics; neologisms and variation.
Prerequisite: 01:940:261 or 363 or permission of department.

01:940:419 ***Dialectology of the Spanish-Speaking World (3)***
Study of major dialects in the Spanish-speaking world. Theories of dialectology, geolinguistics, and social dialects as applied to Spanish. Survey of defining phonological, morphological, syntactic, and lexical features of modern dialects in Spain, Spanish America, and the United States.
Prerequisite: 01:940:261 or 362 or permission of department.

01:940:420 ***Current Issues in Second Language Acquisition (3)***
Theory and research in second language acquisition and second language development. Research as linguistic knowledge, as cognitive skill, and as a social and personality mediated process.
Prerequisite: 01:940:261 or permission of department.

01:940:421 ***Spanish Syntax (3)***
Analysis of Spanish syntactic structures using foundations of generative grammar. Development of reasoning and analytical skills. Testing and argument of hypotheses.
Prerequisite: 01:940:364 or equivalent or permission of department.

01:940:422 ***Spanish Semantics (3)***
Formal theories of semantics applied to Spanish. Compositional and contextual meaning, conceptual prototypes, metaphors, and representation of lexical meaning.
Prerequisite: 01:940:364 or equivalent or permission of department.

01:940:423 ***Poetry of the Golden Age (3)***
Spanish poetry of the Renaissance and baroque periods. Garcilaso and the Italianate School; San Juan de la Cruz and the conceptismo and culteranismo.
Prerequisite: One semester of 300-level literature in Spanish or permission of department.

01:940:424 ***Drama of the Golden Age (3)***
Spanish drama from its early manifestations through the baroque period. Reading and discussion of dramatists such as Lope de Vega, Tirso de Molina, Ruiz de Alarcón, and Calderón de la Barca.
Prerequisite: One semester of 300-level literature in Spanish or permission of department.

01:940:425 ***Prose of the Golden Age (3)***
Study of representative works with emphasis on the picaresque novel and Cervantes' novelas ejemplares.
Prerequisite: One semester of 300-level literature in Spanish or permission of department.

01:940:426 ***Don Quixote (3)***
Critical study of Cervantes' masterpiece within its Golden Age context.
Prerequisite: One semester of 300-level literature in Spanish or permission of department.

01:940:434,435 ***Nineteenth-Century Spanish Literature (3,3)***
Reading and discussion of representative works from the neoclassic, romantic, realistic, and naturalistic periods.
Prerequisite: One semester of 300-level literature in Spanish or permission of department.

01:940:437,438 ***Twentieth-Century Spanish Literature (3,3)***
Representative works by authors from the Generation of 98, the Generation of 27, and the post-civil war period.
Prerequisite: One semester of 300-level literature in Spanish or permission of department.

01:940:440 ***Colonial Spanish-American Literature (3)***
Study of colonial Spanish-American literature. Reading and analysis of representative works.
Prerequisite: One semester of 300-level literature in Spanish or permission of department.

01:940:441 ***Nineteenth-Century Spanish-American Literature (3)***
Reading and discussion of representative works from the main literary movements since the wars of independence through the early 1900s (romanticism, regionalism, naturalism, and modernism).
Prerequisite: One semester of 300-level literature in Spanish or permission of department.

01:940:443 ***Spanish-American Short Story (3)***
Study of the Spanish-American short story since modernism. Reading and analysis of representative works.
Prerequisite: One semester of 300-level literature in Spanish or permission of department.

01:940:444 ***Spanish-American Poetry (3)***
Study of Spanish-American poetry since modernism. Reading and analysis of representative works.
Prerequisite: One semester of 300-level literature in Spanish or permission of department.

01:940:447 ***Spanish-American Novel I (3)***
Study of the Spanish-American novel from modernism through the boom. Reading and analysis of representative works.
Prerequisite: One semester of 300-level literature in Spanish or permission of department.

01:940:448 ***Spanish-American Novel II (3)***
Study of the Spanish-American novel; covers post-boom literature. Reading and analysis of representative works.
Prerequisite: One semester of 300-level literature in Spanish or permission of department.

01:940:449 ***Spanish-American Essay (3)***
Study of the Spanish-American essay since modernism. Reading and analysis of representative works.
Prerequisite: One semester of 300-level literature in Spanish or permission of department.

01:940:450 ***Spanish-American Theater and Social Change (3)***
Analysis and contextual understanding of the intersections of theater and social change in Spanish America from the twentieth century to the present day. Taught in Spanish.
Prerequisite: Any 01:940:300 course or higher or permission of department

01:940:451 ***Literature of Latin American Exile and Displacement (3)***
Study of works concerning geographical displacement; focus on political exile from Cuba, the Southern Cone, and other displaced Hispanic communities in the United States.
Prerequisite: One semester of 300-level literature in Spanish or permission of department.

01:940:452 ***Readings in U.S. Latino/a Literature and Culture (3)***
Study of recent texts produced by and about Latino/as in the United States. Examination of issues of exile, integration and assimilation, political presence, and nationalism.
Prerequisite: One semester of 300-level literature in Spanish or permission of department. When taught in English, course will count for the Spanish major or minor if all written work is done in Spanish.

01:940:460 ***Race, Class, and Ethnicity in Latin America (3)***
Investigation of ethnic conflicts and racial formation and renegotiation in Latin America through literary and nonliterary sources. Consideration of class, racism, miscegenation, marginalization, and ethnonym.
Prerequisite: One semester of 300-level literature in Spanish or permission of department. Credit not given for both this course and 01:590:460.

01:940:461 ***Literacy and Orality in Hispanic Literature and Culture (3)***
Study of the relationship of writing to speech, oral tradition, and/or oral history in the context of Spanish, Spanish American, and/or U.S. Latino/a cultures.
Prerequisite: One semester of 300-level literature in Spanish or permission of department.

01:940:462 ***Environment and Literature in Hispanic Culture (3)***
Study of the relationship of literature to space, place, and landscape. Focus on ideas of nature and/or the city chosen each semester.
Prerequisite: One semester of 300-level literature in Spanish or permission of department.

01:940:465 ***Spain in Africa/Africa in Spain: Cultural Representations and Historical Legacy (3)***
Examination of the historical and cultural representation between Spain and Africa in a wide range of literary, artistic, and cinematographic texts.
Prerequisite: One semester of 300-level literature in Spanish or permission of department.

01:940:471 ***Internship in Translation/Interpreting (1-3)***
Supervised training in a business firm, social service agency, or government office. Weekly discussions of specific texts and problems arising from the fieldwork experience. Supplementary written and laboratory assignments.
Rec. 1 hr., fieldwork 2 hrs. per credit. Maximum of 3 credits. Prerequisite: 01:940:401 with a grade of B+ or better. Pre- or corequisite: 01:940:402 or 475 or permission of department.

01:940:475 ***Community and Introduction to Simultaneous Interpreting (3)***
Introduction to theory and practice of community interpreting and all its related modalities: liaison, consecutive, sight. Introduction to simultaneous interpreting. Spanish-English and English-Spanish. Intensive classroom and language laboratory exercises. Ethics and principles of practice.
Prerequisite: 01:940:401.

01:940:476 ***Legal Translation (1.5)***
Practice in sight and written translation of legal documents, court records, and language of courtroom procedures. Spanish-English and English-Spanish.
Pre- or corequisites: 01:940:401, 475.

01:940:477 ***Court Interpreting (3)***
Intensive practice in interpreting courtroom and other legal procedures. Development of bilingual legal glossary. Review of New Jersey and federal standards for interpreters.
Pre- or corequisites: 01:940:401, 475.

01:940:478 ***Theory and Practice in Translation (3)***
Introduction to translation studies. Application of linguistic theory and computer technology to translation. Intensive practice in nonliterary and literary translation, including narrative and theater.
Prerequisites: 01:940:401, 402 with a grade of B+ or better, or permission of department.

01:940:479 ***Translation, Media, and Technology (3)***
Intensive workshop practice in advanced translation, Spanish to English and English to Spanish. Translation of audiovisual, digital, multimedia, and technical texts. Introduction to translation technologies, CAT tools, and subtitling technologies. Theoretical discussions on audiovisual, translation technologies, and translation localization and globalization. Individual and group projects, with emphasis on translation into the native tongue.
Prerequisite: 01:940:401.

01:940:486 ***Medical/Technical Translation (1.5)***
Practice in translation in such areas as medical, pharmaceutical, communications, computers, and science textbooks. Development of specialized glossaries. Spanish-English and English-Spanish.
Pre- or corequisite: 01:940:401 or permission of department.

01:940:487 ***Hospital/Community Interpreting (1.5)***
Theory and practice of hospital, medical, and other sensitive community interpreting roles. Development of specialized glossaries. Field assignments in area hospitals and clinics.
Prerequisites: 01:940:203 or 01:940:205 or 01:940:313, or placement, or permission of department.

01:940:488 ***Topics in Spanish Linguistics (3)***
In-depth study of specific themes in Spanish linguistics. Topics may include language contact phenomena, pidgin and Creole, language acquisition, and historical linguistics.
Prerequisite: 01:940:261 or permission of department.

01:940:489,490,491,492 ***Topics in Hispanic Literature and Culture (3,3,3,3)***
Specific topic chosen each semester.
Prerequisite: One semester of 300-level literature in Spanish or permission of department.

01:940:493,494 ***Independent Study (BA,BA)***
Independent readings under faculty supervision. Project must not be one already treated in a formal course.
Prerequisites: Minimum of one semester of 400-level Spanish and permission of department and instructor.

01:940:497,498 ***Honors in Spanish (BA,BA)***
Research paper prepared under faculty supervision.
Prerequisite: Permission of department. Open only to seniors.

01:940:499 ***Oral Proficiency Interview (1)***
Online. Instructor-guided practice sessions in advance of the Oral Proficiency Interview (OPI). OPI scheduled through Language Lab.
Open only to junior and senior majors in Spanish. Prerequisite: 01:940:389.

Sport Management 955 (SAS)

Learning Goals

Learning Goals

The Sport Management major is designed to inspire students to make a meaningful impact in the sport industry. The curriculum allows students to learn and apply their skills in areas such as sustainability and diversity, coaching and athlete development, sport marketing & finance, sport analytics, administration, facilities and event management,

and legal issues. Students who graduate majoring in sport management leave with the knowledge and skills to become successful professionals in the ever-evolving world of sport. Our strategically designed curriculum empowers students to:

I. Analyze legal issues in sport.

Students start with a foundational understanding of risk assessments and sports governance structures, essential for navigating the complexities of sport law. They analyze sport law and ethical standards to manage rights and draft sport contracts, including sponsorship agreements. Students develop negotiation plans and strategies for arbitration and dispute resolution. This enables them to handle detailed contract terms and navigate complex negotiations.

II.Organize, administer and manage sport organizations and events.

Students develop expertise in organizing and managing sports organizations and events, starting with the creation of strategic visions that align sport programs with organizational goals. They evaluate organizational performance and design management strategies for sport programs to coordinate and evaluate event logistics. Furthermore, they build skills in recruiting and professional development. This comprehensive approach implements best practices in organizational management to boost revenue and operational efficiency.

III. Conduct sport business analyses and communication.

Students acquire skills in effective communication, professional writing, and presentations. This emphasizes the use and visualization of data to enhance sport business communications. They develop analytical skills to inform decision-making. Proficiency in software and the application of theoretical concepts and frameworks further empower students to transform raw data into actionable sports business strategies.

IV. Implement effective marketing, sales and finance strategies.

Students develop and implement marketing and sales strategies based on consumer behavior and modern marketing concepts. Students learn to use financial statement analysis and budgeting methods to manage operations effectively. Their training covers comprehensive financial planning and the nuances of management and funding differences between public and private sports entities, preparing them for diverse fiscal environments in the sports industry.

V. Evaluate human behavior in the field of sport.

Students gain insights into the behavior of sport personnel across different levels and demographics by studying psychological and sociological aspects of sport. This prepares students to successfully collaborate with and inspire others in performance contexts. They learn to conduct ethical decision-making, resolve ethical dilemmas, and implement effective leadership techniques. Students also develop strategies to create accessible sport organizations and programs that ensure high quality sport experiences for all.

VI. Contextualize the historical and cultural significance of sports.

Students analyze the impact of sports on individuals, communities, and societies to understand their historical and cultural significance. This knowledge informs their decisions in event and product design, organizational management, and broader business practices. They also examine contemporary issues in sports, emphasizing the importance of staying informed about ongoing and emerging developments.¿

The 18-credit sport management minor is designed to give students majoring in other disciplines such as business, communications, labor relations, and psychology an opportunity to learn about the sport industry. Students will be exposed to such areas as marketing, administration, law, psychology, and sociology as they relate to the business of sport.

Sport Management 955 (SAS)

Major and Minor Requirements

Major and Minor Requirements

Declaring the Major

Students who wish to declare a major in sport management must:

1. Have completed a minimum of one semester at Rutgers University with a minimum overall grade-point average of 2.0
OR
Have transferred into Rutgers University with a minimum of 15 credits

2. Attend a department declaration meeting

Meetings for declaring a major are scheduled throughout the fall and spring semesters. At the start of each semester, the link to register for a declaration meeting will be available and posted on: https://kines.rutgers.edu/

Students in the School of Arts and Sciences (SAS) will use the MyMajor system to submit the major declaration request. The declaration request will be approved after the student attends the department declaration meeting.

Students from other schools within Rutgers University can declare a major in sport management only with approval of the dean of their school and attendance at a declaration meeting.

Major Requirements

To graduate with a degree in sport management, students must have at least a 2.0 grade-point average from the required courses.

The following courses are required for the sport management major:

01:198:170 Computer Applications for Business (3)

01:220:102 Introduction to Microeconomics (3) or 11:373:121 Principles and Applications of Microeconomics (3)

01:220:103 Introduction to Macroeconomics (3) or 11:373:122 Principles and Applications of Macroeconomics (3)

01:355:203 Business Writing Essentials (3) or 01:355:303 Writing for Business and the Professions (3)

01:377:140 Foundations of Kinesiology and Health (1.5)

01:830:101 General Psychology (3)

01:920:101 Introduction to Sociology (3)

01:955:203 Sport and the Law (1.5)

01:955:204 Risk Management in Sport (1.5)

01:955:276 Basic Statistics for Sport Management (3)

01:955:305 Sport Sociology (3)

01:955:311 Sport Marketing (3)

01:955:330 Organizational Behavior in Sport Management (3) or 01:955:332 Leadership Development in Sport (3)

01:955:355 Professional Presentations in Sport Management (3)

01:955:406 Administration in Sport Management (3)

01:955:485 Sport Informatics and Analytics

01:955:490 Internship in Sport Management (6)

33:010:272 Introduction to Financial Accounting (3)

Concentration Requirement- Must select one and complete 9 credits within that selection

Sport Marketing & Revenue

01:955:306 Finance in Sport (3)

01:220:312 Economics of College and Professional Sports (3) or 11:373:403 Innovation and Entrepreneurship (3)

01:955:412 Advanced Sport Marketing (3)

Coaching

01:955:226 Coaching Theory and Technique (3)

01:955:308 Teaching and Coaching Individual and Team Sports (3)

01:377:301 Psychology of Sport and Exercise (3)

Administration & Events

01:955:312 Facilities Planning and Design (1.5)

01:955:318 Organization & Administration of College Recreational Sports (1.5)

01:955:333 Event Management and Sponsorship in Sport (3)

01:955:316 Fitness Management (3)

Elective Requirement - Must complete 6 credits of electives

The sport management major requires 6 credits of electives. Students should consult the university online catalog, Degree Navigator, or speak to an academic adviser to determine if any of the courses have prerequisites or restrictions.

A minimum of 3 elective credits must be within the department (377 or 955 subject code). At least 3 elective credits must be at the 300+ level. A maximum of 3 elective credits can be at the 200 or lower level.

Minor Requirements

Students from any school within Rutgers University can choose to minor in sport management. Students in the School of Arts and Sciences or the School of Environmental and Biological Sciences will use the MyMajor system to submit the minor declaration request. Students from other schools within Rutgers can declare a minor in sport management only with approval of the dean of their school.

The following course are required for a minor in sport management (18 credits):

01:955:203 Sport and the Law (1.5)

01:955:204 Risk Management in Sport (1.5)

01:955:311 Sport Marketing (3)

01:955:330 Organizational Behavior in Sport Management (3) or 01:955:332 Leadership Development in Sport (3)

01:955:355 Professional Presentations in Sport Management (3)

Elective Requirement - Must complete 6 credits of electives

The sport management minor requires 6 credits of electives. Students should consult the university online catalog, Degree Navigator, or speak to an academic adviser to determine if any of the courses have prerequisites or restrictions. All 6 credits must be within the department in sport management (955 subject code). Note: Only one course (maximum of 3 credits) may overlap between a minor and the major for credit.

Sport Management 955 (SAS)

Internship Program

Internship Program

Students in the sport management major must complete a 6-credit internship 01:955:490 (252 hours) during their senior year. The internship provides the students with the opportunity to practice and/or apply knowledge and skills in various professional environments.

To qualify for the senior internship, students must satisfy the following criteria:

1. Complete a minimum of 90 credits, with a minimum of 20 credits in the major.
2. Overall GPA must be at least 2.0.
3. Major GPA must be at least 2.0.
4. Meet all deadlines for submission of the application document.
5. Attend the mandatory pre-internship meeting as well as a course meeting prior to the start of their internship hours.

Sport Management 955 (SAS)

Departmental Honors Program

Departmental Honors Program

There are three categories of honors in sport management: honors, high honors, and highest honors. The criteria for achieving honors is based on academic performance, as evidenced by the student's major grade-point average (GPA).

Honors Criteria

Honors: 3.600 major GPA

High Honors: 3.800 major GPA

Highest Honors: 4.000 major GPA

Sport Management 955 (SAS)

Courses

Courses

01:955:111 ***Foundations in Sport Management (3)***
Foundations of Sport Management is an introductory course designed to prepare aspiring professionals in the field of sport management. This course offers a comprehensive overview, providing students with foundational knowledge and a broad understanding of various aspects critical to the sport industry. This includes sport-related legal issues, management, business communication, marketing, leadership and history.

01:955:203 ***Sport and the Law (1.5)***
Legal issues affecting sport, recreation, and physical education. Topics include equal opportunity legislation, tort liability, product liability, participant liability, and legal rights of supervisors and participants.

01:955:204 ***Risk Management in Sport (1.5)***
In-depth study of factors essential to the safe and effective delivery of exercise programs and sport activities and events.

01:955:226 *Coaching Theory and Technique (3)*
Basic philosophical, psychological, and physiological aspects of coaching.

01:955:276 *Basic Statistics for Sports Management (3)*
Introduction to applied descriptive and inferential statistics for sport management.
Prerequisite: 01:640:026 or above. Credit not given for both this course and 01:377:275.

01:955:282 *Current Topics in Kinesiology and Health (1.5)*
Current issues within the fields of Kinesiology and Health. Contact the department for titles, descriptions, and requirements of each section offered.

01:955:305 *Sport Sociology (3)*
Examination of organized sport in modern-day North America. Analysis of sport roles and sport functions. Sport viewed as a major societal institution.
Prerequisite: 01:830:101 or 01:920:101.

01:955:306 *Finance in Sport (3)*
Examination of finance issues and successful approaches to fiscal management applied to the fields of sport management and exercise science. Topics include diversification of revenues, financial accountability, purchasing, sales operations, fundraising, grants and sponsorship, and fiscal challenges that confront sport and fitness organizations.
Prerequisite: 01:640:111 or 01:640:115.

01:955:308 *Teaching and Coaching Individual and Team Sports (3)*
This course explores the challenges facing sport coaches in developing advanced athletes within individual, dual and team sports. The course will explore skill instruction, ethical issues, disciplinary situations, relationship building, team management, recruiting plans, competition analysis, and equipment needs. The course uses the coaching education framework established by the International Council for Coaching Excellence (ICCE).

01:955:311 *Sport Marketing (3)*
Principles of marketing applied to sport. Examines sport industry trends that heighten the need for scientific, professional approaches to sport marketing. Examines consumer behavior, marketing research, pricing, distribution, and promotion of goods and services.

01:955:312 *Facilities Planning and Design (1.5)*
Basic study of facilities planning and design. Planning, financing, safety, and maintenance issues important in the development of sport, recreation, and fitness indoor and outdoor facilities.

01:955:316 *Fitness Management (3)*
Management theories and operational methods for running health and fitness programs. Topics may include fitness programming, building and events management, staffing, facility design, customer service, budgeting, sales, and promotions as they relate to the fitness industry.
Prerequisite: 01:377:140.

01:955:317 *Ethics and Values in Sport (1.5)*
Examination of contemporary issues regarding the integrity of sport, which present moral and ethical challenges to the sport manager.

01:955:318 ***Organization and Administration of College Recreational Sports (1.5)***
Philosophical and practical approach to the development and implementation of recreational sports and activities promoted within the confines of an educational institution.

01:955:321 ***The Business of Personal Training (1.5)***
The purpose of this course is to examine the fundamental occupational and entrepreneurship principles of owning or managing a personal training business.
Prerequisite: 01:955:311 or 01:955:316

01:955:330 ***Organizational Behavior in Sport Management (3)***
Organization and personnel behavior theory applied to contemporary sports organizations. Issues in industrial, professional, collegiate, and scholastic contexts examined.

01:955:331 ***Gender Issues in Sport (1.5)***
Examination of impact of gender on attitudes, practices, and challenges confronting the contemporary sport manager. Open only to juniors and seniors.

01:955:332 ***Leadership Development in Sport (3)***
Examination of leadership theories and processes and their application for effective sport management.
Open only to juniors and seniors.

01:955:333 ***Event Management and Sponsorship in Sport (3)***
Organizational event structure and sponsorship in the sport industry. History, needs assessment, planning process, networking, scope of services available, and associated career opportunities.

01:955:342 ***Independent Study in Sport Management (3)***
Supervised individual research or study in the field of sport. Open only to junior and senior majors by permission of department.

01:955:355 ***Professional Presentations in Sport Management (3)***
Development and presentation of public addresses emphasizing command of the English language and electronic delivery systems for both small and large group presentations.

01:955:406 ***Administration in Sport Management (3)***
Concepts of administrative processes, systems, and styles with application to various sport environments. Includes program, facility, fiscal, and personnel management.
Open only to senior majors. Must have 90 credits.

01:955:412 ***Advanced Sport Marketing (3)***
Sport marketing strategy, design, and management. Concepts and methods essential to identifying and analyzing marketing threats and opportunities and developing and evaluating marketing strategies. Develops an understanding of the nature and role of marketing in the sport organization.
Prerequisite: 01:955:311.

01:955:485 ***Sport Informatics and Analytics (3)***
In this course, you will learn key skills in data analysis, data management and infrastructure, client-server application development, and ethical and professional management of data projects. This applies to competencies in sports sales, the management of large, high-throughput data sources, and cloud computing.
Prerequisite: 01:955:276.

01:955:490 ***Internship in Sport Management (6)***
Supervised individual fieldwork in sport management. Prerequisites: Permission of department via its application process, 90 credits, and a 2.0 cumulative grade-point average both overall and in the major.
Open only to sport management majors.

01:955:497 ***Internship 2 in Sport Management (3)***
Additional supervised individual fieldwork.
Prerequisites: 01:955:490, with a C or higher. Permission of department via its application process, and 2.0 cumulative and major grade-point averages.

The department offers a statistics major and a joint statistics/mathematics major in cooperation with the mathematics department. The joint statistics/mathematics major provides a stronger preparation for graduate study in statistics. Students who are most interested in applying statistics in industry, government, or in applied areas of graduate study can take the statistics major. The department encourages interdisciplinary study, and students should consult with departmental advisers to plan their program.

Statistics 960 (SAS)

Learning Goals

Learning Goals

Students will think statistically and probabilistically, developing an understanding of the value of critical analysis of data; understand the language of statistics and probability used in the news, advertisements, government releases, survey reports, and research studies to make informed decisions about health, voting, and societal needs; interpret statistical research results; and continue in their chosen discipline with the foundation needed for the statistical and probabilistic skills required.

Majors will also recognize basic situations relative to analysis in the areas covered by our program; critically discuss the appropriateness of a wide variety of fundamental statistical methodology used in published articles, reports, and research; interpret the meaning of the results; see connections between the different methodologies covered in different courses and discuss their pros and cons; understand the theoretical criteria used in the development of statistical procedures; and use the SAS or R statistical computer packages to do data analysis. At least 50 percent of our seniors will be well positioned to enter a master's program, and the mathematically strongest will be capable of pursuing a doctoral program.

Minors will also recognize basic situations relative to analysis in the areas covered by our program; discuss the appropriateness of many of the fundamental statistical methods used in published articles, reports, etc.; and interpret the meaning of the results.

Statistics 960 (SAS)

Major Requirements

Major Requirements

Statistics

To declare the major an overall C average or above, based on all times they were taken, must be achieved in Calculus I and II combined (01:640:151-152).

Grades of C or better must be earned in all courses counted toward the major.

A total of 46 credits is required: 18 credits in mathematics, 25 credits in statistics, and 3 credits in computer science, as follows:

1. Computer Science 01:198:107, 110, 111, or 170
2. Mathematics 01:640:151, 152, 250, 251
3. Statistics 01:960:381, *382*, 384, 295 or 390, 463, 486, 490
4. Two courses chosen from 01:960:365, 467, 476, 483
5. Three credits in mathematics electives (01:640:252 or a course at the 300 level or above, but not 01:640:477 or 01:640:481)

*01:640:477 and 01:640:481 may be taken instead of 01:960:381, 382. Credit is not given for both 01:640:477 and 01:960:381, nor for both 01:640:481 and 01:960:382.

Statistics/Mathematics

To declare the major an overall C average or above, based on all times they were taken, must be achieved in Calculus I and II combined (01:640:151-152).

Grades of C or better must be earned in all courses counted toward the major.

A total of 56 credits is required: 28 credits in mathematics, 25 credits in statistics, and 3 credits in computer science, as follows:

1. Computer Science 01:198:107, 110, 111, or 170
2. Mathematics 01:640:151, 152, 250, 251, 252, 300, 311, 478
3. Statistics 01:960:381, *382*, 384, 295 or 390, 463, 486, 490
4. Two courses chosen from 01:960:365, 467, 476, 483

*01:640:477 and 01:640:481 may be taken instead of 01:960:381, 382. Credit is not given for both 01:640:477 and 01:960:381, nor for both 01:640:481 and 01:960:382.

Statistics 960 (SAS)

Sequence of Courses for Nonmajors

Sequence of Courses for Nonmajors

Statistics 960 (SAS)

Minor Requirements

Minor Requirements

A minor in statistics consists of 960:390 or 960:295 and six additional courses in the Department of Statistics (or 01:198:142, 01:640:477, or 01:640:481), of which at least three of which must be from 01:960:365, 381, 382, 463, 467, 476, 483, 486, 490, 01:640:477, or 01:640:481. No one course can be used to fulfill two requirements. At most two grades of D can be counted towards the Statistics minor.

Statistics 960 (SAS)

Courses

Courses

In the following course list, the Level II Statistics prerequisite may be fulfilled with 01:960:212 or 291 or 384 or 401 or 484 or equivalent. Credit is not given for more than one course fulfilling the Level II Statistics prerequisite.

01:960:142 *Data 101 (3)*
Topics in data literacy for students not majoring in computer science or statistics.
Prerequisite: 01:640:025 or placement into Intermediate Algebra or higher. Credit not given for both this course and 01:198:142.

01:960:211 *Statistics I (3)*
Principles and methods of statistics, including probability distributions, sampling, estimation, hypothesis testing, regression and correlation analysis.
Prerequisite: Any course equal to or greater than 01:640:112.

01:960:212 *Statistics II (3)*
Application of statistical techniques to the analysis of data, tests of significance, correlation and regression analysis, confidence intervals, analysis of variance and some design of experiments, analysis of cross-classified data, chi-square tests.
Prerequisite 01:960:211 or 01:960:285. See Level II Statistics restrictions. Credit not given for both this course and either 01:960:384 or 484. Credit not given for both this course and 01:960:401 unless 401 is being used, with permission of the department, as a prerequisite for this course.

01:960:285 *Introductory Statistics for Business (3)*
Topics include descriptive statistics, probability, random variables, sampling distributions, principles of hypothesis testing, and one- and two-sample t-tests.
Prerequisite: Any course equal to or greater than 01:640:112. Credit not given for more than one of 01:960:201, 211, 285, or 401.

01:960:291 *Statistical Inference for Data Science (3)*
Introduction to probability and statistics underlying data science. Topics include regression, resampling, confidence intervals, hypothesis testing, and related probability distributions.
Prerequisites: 01:640:115 and (01:198:142 or 01:960:142).

01:960:295 *Data Management and Wrangling with R (3)*
An introduction to the tools and principles to retrieve, tidy, clean, and visualize data in preparation for statistical analysis. The R statistical environment is used but no prior knowledge is required. Interactions with databases will be included.
Prerequisite:01:198:142 or 01:960:142, or 01:960:291, or 01:960:212, or 01:960:384, or 01:960:401

01:960:365 *Introduction to Bayesian Data Analysis (3)*
Principles of Bayesian data analysis and application of them to varied data analysis problems. Topics include: Bayes Theorem, linear and nonlinear models, hierarchical models, and the use of Markov chain Monte Carlo methods.
Prerequisites: 01:640:152 and (01:960:212 or 01:960:384 or 01:960:401 or 01:960:484 or 01:960:291).

01:960:379 *Basic Probability and Statistics (3)*
Methods of presenting data; basic statistical measures of location; frequency distributions; elementary probability theory; probability distributions; the binomial, Poisson, and normal distributions; basic sampling theory.
Prerequisite: One semester of calculus.

01:960:381 *Theory of Probability (3)*
Probability distributions; the binomial, geometric, exponential, Poisson, and normal distributions; moment-generating functions; sampling distributions; applications of probability theory.
Prerequisites: Three semesters of calculus.

01:960:382 *Theory of Statistics (3)*
Statistical inference methods, point and interval estimation, maximum likelihood estimators, information inequality, hypothesis testing, Neyman-Pearson lemma, linear models.
Prerequisite: 01:960:381 or equivalent.

01:960:384 *Intermediate Statistical Analysis (3)*
Application of statistical techniques to the analysis of data, tests of significance, correlation and regression analysis, confidence intervals, analysis of variance, and some design of experiments; analysis of cross-classified data, chi-square tests.
Prerequisite: One of the following courses: 01:960:201, 211, 285, 379, 381, or permission of instructor. Credit not given for both this course and 01:960:212 or 484. Credit not given for both this course and 01:960:401 unless 401 is being used, with permission of the department, as a prerequisite for this course.

01:960:390 *Introductory Computing for Statistics (1)*
Introduction to the use of statistics computer packages with main focus on the SAS system. Includes generating random samples, estimation, testing hypothesis, ANOVA.
Five-week course; 3 hrs. lec. and lab. Prerequisite: Level II Statistics. Graded on a Pass/Fail (undergraduate) and S/U (graduate) basis.

01:960:391,392 *Honors Seminars in Probability/Statistics (3,3)*
Real-life examples or case studies on statistics and probability theory and their ramifications. Topics may vary each semester. Extensive data analysis required.
Prerequisite: Calculus 1 or permission of department. Corequisite: Calculus 2. Open to students in school honors programs.

01:960:401 *Basic Statistics for Research (3)*
As applied in fields other than statistics; treats research projects dependent on the use of observed data from planned experiments. Includes inference methods in estimation and hypothesis testing and general linear models.
Prerequisite: Any course equal to or greater than 01:640:112. Credit not given for both this course and 01:960:211, 212, 384, and/or 484. Students who have already taken 01:960:401 and wish to take any of these courses should consult with the department.

01:960:425 *Lessons for Probability and Statistics from their History (3)*
What is the difference between statistics and data science? How should we choose between confidence intervals and posterior probabilities? Can you prove causality from observational data? This course looks at the history of these questions, from 13th-century calculations for dice to 21st-century developments in data science. Students will learn to use, discuss, and criticize statistical methods in a way that is both mathematically sound and historically informed.
Prerequisites: (01:960:212 or 01:960:291 or 01:960:384 or 01:960:401 or 01:960:484) and (01:640:135 or 01:640:151)

01:960:435 *Seminar in Probability and Statistical Inference (3)*
Examines statistical theory, including topics such as Bayesian inference, confidence intervals, and maximum likelihood, to prepare students to use, discuss, and criticize statistical methods in a way that is both mathematically sound and historically informed.
Prerequisite: 01:960:382 or equivalent or permission of instructor.

01:960:463 *Regression Methods (3)*
Multiple and nonlinear correlation and regression techniques for analysis of events in time and space: analysis of variance and covariance, related multivariate techniques, response surface approaches.
Prerequisite: Level II

01:960:467 *Applied Multivariate Analysis (3)*
Introduction to the methodology of multivariate analysis. Multiple linear regression, discriminant analysis, profile analysis, canonical correlation, principal components, and factor analysis.
Prerequisite: Level II-Statistics.

01:960:476 *Introduction to Sampling (3)*
Principles of sampling applied for economical procurement or assessment of data. Current techniques for area sampling, sampling of accounts, large-scale surveys, stratification, cluster sampling, systematic sampling, two-stage sampling, and construction of estimates.
Prerequisites: Level II Statistics and 01:960:379 or 381 or equivalent with a grade of C or better, or permission of department.

01:960:482 *Advanced Issues in Probability and Statistics (3)*
Focus on understanding both the power and limitations of statistical techniques and principles as applied in real-world settings. Includes projects involving the collection of data to be analyzed and discussed.
Prerequisites: 01:960:382 and permission of instructor.

01:960:483 ***Statistical Quality Control (3)***
Statistical measures; histogram analysis; construction and analysis of control charts for variables and attributes; use of Dodge-Romig and Military Standards acceptance sampling plans; statistical aspects of tolerances.
Prerequisite: Level II Statistics or 33:623:385.

01:960:484 ***Basic Applied Statistics (3)***
Confidence estimation, hypothesis testing, chi-square methods, correlation and regression analysis, basis of design of experiments.
Prerequisite: One of the following courses: 01:960:201, 211, 285, 379, 381, or permission of instructor. Credit not given for both this course and 01:960:212 or 384 or 401.

01:960:486 ***Applied Statistical Learning (3)***
Introduction to machine learning methods from a statistical perspective. Both traditional methods such as logistic regression, naive Bayes classification, and discriminant analysis as well as more recent statistical methods such as regularization, boosting, and random forests will be applied to datasets of varying size. The emphasis will not be on programming the techniques from scratch but on understanding and applying the methods using a high level language such as R. Prerequisites: Level II Statistics.
Prerequisite: Level II Statistics.

01:960:490 ***Introduction to Experimental Design (3)***
Basic concept and principles of designs. Nature and analysis of various designs; randomized blocks, Latin squares, factorial designs. Applications to specific problems.
Prerequisite: Level II Statistics.

01:960:491 ***Reliability-Quality Control (3)***
Survey of current theory and practice in this field.
Prerequisites: 01:640:251 and Level II Statistics.

01:960:492 ***Special Topics in Statistics and Probability (3)***
Readings and presentations related to the development of probability and statistics.
Prerequisite: Permission of instructor.

01:960:495 ***Independent Studies in Statistics (3)***
Prerequisite: Permission of department.

The department offers a statistics major and a joint statistics/mathematics major in cooperation with the mathematics department. The joint statistics/mathematics major provides a stronger preparation for graduate study in statistics. Students who are most interested in applying statistics in industry, government, or in applied areas of graduate study can take the statistics major. The department encourages interdisciplinary study, and students should consult with departmental advisers to plan their program.

Statistics 960 (SAS)

Learning Goals

Learning Goals

Students will think statistically and probabilistically, developing an understanding of the value of critical analysis of data; understand the language of statistics and probability used in the news, advertisements, government releases, survey reports, and research studies to make informed decisions about health, voting, and societal needs; interpret statistical research results; and continue in their chosen discipline with the foundation needed for the statistical and probabilistic skills required.

Majors will also recognize basic situations relative to analysis in the areas covered by our program; critically discuss the appropriateness of a wide variety of fundamental statistical methodology used in published articles, reports, and research; interpret the meaning of the results; see connections between the different methodologies covered in different courses and discuss their pros and cons; understand the theoretical criteria used in the development of

statistical procedures; and use the SAS or R statistical computer packages to do data analysis. At least 50 percent of our seniors will be well positioned to enter a master's program, and the mathematically strongest will be capable of pursuing a doctoral program.

Minors will also recognize basic situations relative to analysis in the areas covered by our program; discuss the appropriateness of many of the fundamental statistical methods used in published articles, reports, etc.; and interpret the meaning of the results.

Statistics 960 (SAS)

Major Requirements

Major Requirements

Statistics

To declare the major an overall C average or above, based on all times they were taken, must be achieved in Calculus I and II combined (01:640:151-152).

Grades of C or better must be earned in all courses counted toward the major.

A total of 46 credits is required: 18 credits in mathematics, 25 credits in statistics, and 3 credits in computer science, as follows:

1. Computer Science 01:198:107, 110, 111, or 170
2. Mathematics 01:640:151, 152, 250, 251
3. Statistics 01:960:381, *382*, 384, 295 or 390, 463, 486, 490
4. Two courses chosen from 01:960:365, 467, 476, 483
5. Three credits in mathematics electives (01:640:252 or a course at the 300 level or above, but not 01:640:477 or 01:640:481)

*01:640:477 and 01:640:481 may be taken instead of 01:960:381, 382. Credit is not given for both 01:640:477 and 01:960:381, nor for both 01:640:481 and 01:960:382.

Statistics/Mathematics

To declare the major an overall C average or above, based on all times they were taken, must be achieved in Calculus I and II combined (01:640:151-152).

Grades of C or better must be earned in all courses counted toward the major.

A total of 56 credits is required: 28 credits in mathematics, 25 credits in statistics, and 3 credits in computer science, as follows:

1. Computer Science 01:198:107, 110, 111, or 170

2. Mathematics 01:640:151, 152, 250, 251, 252, 300, 311, 478
3. Statistics 01:960:381, *382*, 384, 295 or 390, 463, 486, 490
4. Two courses chosen from 01:960:365, 467, 476, 483

*01:640:477 and 01:640:481 may be taken instead of 01:960:381, 382. Credit is not given for both 01:640:477 and 01:960:381, nor for both 01:640:481 and 01:960:382.

Statistics 960 (SAS)

Sequence of Courses for Nonmajors

Sequence of Courses for Nonmajors

Statistics 960 (SAS)

Minor Requirements

Minor Requirements

A minor in statistics consists of 960:390 or 960:295 and six additional courses in the Department of Statistics (or 01:198:142, 01:640:477, or 01:640:481), of which at least three of which must be from 01:960:365, 381, 382, 463, 467, 476, 483, 486, 490, 01:640:477, or 01:640:481. No one course can be used to fulfill two requirements. At most two grades of D can be counted towards the Statistics minor.

Courses

Courses

In the following course list, the Level II Statistics prerequisite may be fulfilled with 01:960:212 or 291 or 384 or 401 or 484 or equivalent. Credit is not given for more than one course fulfilling the Level II Statistics prerequisite.

01:960:142 ***Data 101 (3)***
Topics in data literacy for students not majoring in computer science or statistics.
Prerequisite: 01:640:025 or placement into Intermediate Algebra or higher. Credit not given for both this course and 01:198:142.

01:960:211 ***Statistics I (3)***
Principles and methods of statistics, including probability distributions, sampling, estimation, hypothesis testing, regression and correlation analysis.
Prerequisite: Any course equal to or greater than 01:640:112.

01:960:212 *Statistics II (3)*
Application of statistical techniques to the analysis of data, tests of significance, correlation and regression analysis, confidence intervals, analysis of variance and some design of experiments, analysis of cross-classified data, chi-square tests.
Prerequisite 01:960:211 or 01:960:285. See Level II Statistics restrictions. Credit not given for both this course and either 01:960:384 or 484. Credit not given for both this course and 01:960:401 unless 401 is being used, with permission of the department, as a prerequisite for this course.

01:960:285 *Introductory Statistics for Business (3)*
Topics include descriptive statistics, probability, random variables, sampling distributions, principles of hypothesis testing, and one- and two-sample t-tests.
Prerequisite: Any course equal to or greater than 01:640:112. Credit not given for more than one of 01:960:201, 211, 285, or 401.

01:960:291 *Statistical Inference for Data Science (3)*
Introduction to probability and statistics underlying data science. Topics include regression, resampling, confidence intervals, hypothesis testing, and related probability distributions.
Prerequisites: 01:640:115 and (01:198:142 or 01:960:142).

01:960:295 *Data Management and Wrangling with R (3)*
An introduction to the tools and principles to retrieve, tidy, clean, and visualize data in preparation for statistical analysis. The R statistical environment is used but no prior knowledge is required. Interactions with databases will be included.
Prerequisite:01:198:142 or 01:960:142, or 01:960:291, or 01:960:212, or 01:960:384, or 01:960:401

01:960:365 *Introduction to Bayesian Data Analysis (3)*
Principles of Bayesian data analysis and application of them to varied data analysis problems. Topics include: Bayes Theorem, linear and nonlinear models, hierarchical models, and the use of Markov chain Monte Carlo methods.
Prerequisites: 01:640:152 and (01:960:212 or 01:960:384 or 01:960:401 or 01:960:484 or 01:960:291).

01:960:379 *Basic Probability and Statistics (3)*
Methods of presenting data; basic statistical measures of location; frequency distributions; elementary probability theory; probability distributions; the binomial, Poisson, and normal distributions; basic sampling theory.
Prerequisite: One semester of calculus.

01:960:381 *Theory of Probability (3)*
Probability distributions; the binomial, geometric, exponential, Poisson, and normal distributions; moment-generating functions; sampling distributions; applications of probability theory.
Prerequisites: Three semesters of calculus.

01:960:382 *Theory of Statistics (3)*
Statistical inference methods, point and interval estimation, maximum likelihood estimators, information inequality, hypothesis testing, Neyman-Pearson lemma, linear models.
Prerequisite: 01:960:381 or equivalent.

01:960:384 *Intermediate Statistical Analysis (3)*
Application of statistical techniques to the analysis of data, tests of significance, correlation and regression analysis, confidence intervals, analysis of variance, and some design of experiments; analysis of cross-classified data, chi-square tests.
Prerequisite: One of the following courses: 01:960:201, 211, 285, 379, 381, or permission of instructor. Credit not given for both this course and 01:960:212 or 484. Credit not given for both this course and 01:960:401 unless 401 is being used, with permission of the department, as a prerequisite for this course.

01:960:390 *Introductory Computing for Statistics (1)*
Introduction to the use of statistics computer packages with main focus on the SAS system. Includes generating random samples, estimation, testing hypothesis, ANOVA.
Five-week course; 3 hrs. lec. and lab. Prerequisite: Level II Statistics. Graded on a Pass/Fail (undergraduate) and S/U (graduate) basis.

01:960:391,392 *Honors Seminars in Probability/Statistics (3,3)*
Real-life examples or case studies on statistics and probability theory and their ramifications. Topics may vary each semester. Extensive data analysis required.
Prerequisite: Calculus 1 or permission of department. Corequisite: Calculus 2. Open to students in school honors programs.

01:960:401 *Basic Statistics for Research (3)*
As applied in fields other than statistics; treats research projects dependent on the use of observed data from planned experiments. Includes inference methods in estimation and hypothesis testing and general linear models.
Prerequisite: Any course equal to or greater than 01:640:112. Credit not given for both this course and 01:960:211, 212, 384, and/or 484. Students who have already taken 01:960:401 and wish to take any of these courses should consult with the department.

01:960:425 *Lessons for Probability and Statistics from their History (3)*
What is the difference between statistics and data science? How should we choose between confidence intervals and posterior probabilities? Can you prove causality from observational data? This course looks at the history of these questions, from 13th-century calculations for dice to 21st-century developments in data science. Students will learn to use, discuss, and criticize statistical methods in a way that is both mathematically sound and historically informed.
Prerequisites: (01:960:212 or 01:960:291 or 01:960:384 or 01:960:401 or 01:960:484) and (01:640:135 or 01:640:151)

01:960:435 *Seminar in Probability and Statistical Inference (3)*
Examines statistical theory, including topics such as Bayesian inference, confidence intervals, and maximum likelihood, to prepare students to use, discuss, and criticize statistical methods in a way that is both mathematically sound and historically informed.
Prerequisite: 01:960:382 or equivalent or permission of instructor.

01:960:463 *Regression Methods (3)*
Multiple and nonlinear correlation and regression techniques for analysis of events in time and space: analysis of variance and covariance, related multivariate techniques, response surface approaches.
Prerequisite: Level II

01:960:467 ***Applied Multivariate Analysis (3)***
Introduction to the methodology of multivariate analysis. Multiple linear regression, discriminant analysis, profile analysis, canonical correlation, principal components, and factor analysis.
Prerequisite: Level II-Statistics.

01:960:476 ***Introduction to Sampling (3)***
Principles of sampling applied for economical procurement or assessment of data. Current techniques for area sampling, sampling of accounts, large-scale surveys, stratification, cluster sampling, systematic sampling, two-stage sampling, and construction of estimates.
Prerequisites: Level II Statistics and 01:960:379 or 381 or equivalent with a grade of C or better, or permission of department.

01:960:482 ***Advanced Issues in Probability and Statistics (3)***
Focus on understanding both the power and limitations of statistical techniques and principles as applied in real-world settings. Includes projects involving the collection of data to be analyzed and discussed.
Prerequisites: 01:960:382 and permission of instructor.

01:960:483 ***Statistical Quality Control (3)***
Statistical measures; histogram analysis; construction and analysis of control charts for variables and attributes; use of Dodge-Romig and Military Standards acceptance sampling plans; statistical aspects of tolerances.
Prerequisite: Level II Statistics or 33:623:385.

01:960:484 ***Basic Applied Statistics (3)***
Confidence estimation, hypothesis testing, chi-square methods, correlation and regression analysis, basis of design of experiments.
Prerequisite: One of the following courses: 01:960:201, 211, 285, 379, 381, or permission of instructor. Credit not given for both this course and 01:960:212 or 384 or 401.

01:960:486 ***Applied Statistical Learning (3)***
Introduction to machine learning methods from a statistical perspective. Both traditional methods such as logistic regression, naive Bayes classification, and discriminant analysis as well as more recent statistical methods such as regularization, boosting, and random forests will be applied to datasets of varying size. The emphasis will not be on programming the techniques from scratch but on understanding and applying the methods using a high level language such as R. Prerequisites: Level II Statistics.
Prerequisite: Level II Statistics.

01:960:490 ***Introduction to Experimental Design (3)***
Basic concept and principles of designs. Nature and analysis of various designs; randomized blocks, Latin squares, factorial designs. Applications to specific problems.
Prerequisite: Level II Statistics.

01:960:491 ***Reliability-Quality Control (3)***
Survey of current theory and practice in this field.
Prerequisites: 01:640:251 and Level II Statistics.

01:960:492 ***Special Topics in Statistics and Probability (3)***
Readings and presentations related to the development of probability and statistics.
Prerequisite: Permission of instructor.

01:960:495 ***Independent Studies in Statistics (3)***
Prerequisite: Permission of department.

Study Abroad 959 (SAS)

STUDY ABROAD 959

Rutgers offers over 180 study abroad and service-learning abroad programs in more than 50 countries around the world. Students can study overseas for a full year, a single semester, or a Summer or Winter Session. The majority of study abroad programs are offered in English and are open to students of any major.

Interested students should contact the Center for Global Education, Rutgers, The State University of New Jersey, 102 College Avenue, New Brunswick, NJ 08901-8543, or visit the website at https://global.rutgers.edu/study-abroad.

Students wishing to study abroad with programs other than those hosted by Rutgers may contact other American colleges or may seek admission directly from a foreign university. Students making these arrangements should speak with their academic dean about the acceptability of the program and the transfer of credit.

Study Abroad 959 (SAS)

Courses

Courses

01:959:191,192,193,194 ***Study Abroad - Honors (1)***
Field experience course, either embedded in an existing honors course or a free-standing honors experience.
Graded Pass/No Credit.

01:959:200 ***Study Abroad - Nursing (BA)***

01:959:210 ***Study Abroad - SEBS (BA)***

01:959:220 ***Study Abroad in Journalism and Media Studies (BA)***
Students will explore issues such as war, corruption, family, food, the arts, and the influence of the sea.

01:959:300 ***Study Abroad in Guatemala (BA)***

01:959:301,302 ***Study Abroad in Argentina (BA,BA)***
Study for a year or a semester in Buenos Aires at the CIEE Study Center at the Facultad Latinoamericana de Ciencias Sociales (FLACSO).

01:959:304,305 ***Study Abroad in Australia (BA,BA)***
Study for a year or a semester at the University of Melbourne, the University of Queensland, or Macquarie University.

01:959:307,308 ***Study Abroad in Barbados (BA,BA)***
Study for a year or a semester at the University of West Indies at Cave Hill.

01:959:310,311,312 ***Study Abroad in Belgium (BA,BA,BA)***
Study for a year, semester, or Summer Session in Brussels at Vesalius College.

01:959:315 ***Study Abroad in Bolivia (BA)***
Study for a Summer Session in Cochabamba and environs in the Rutgers Latin American Studies Program/ Department of Anthropology's International Service Learning Program.

01:959:316,317 ***Study Abroad in Brazil (BA,BA)***
Study for a year or a semester in either Saõ Paulo at the University of Saõ Paulo (USP), or the USP Escola Superior de Agricultura "Luiz de Queiroz" (ESALQ), or in Rio de Janeiro at the Universidade Estadual do Norte Fluminense Darcy Ribeiro.

01:959:320,321 ***Study Abroad in the Cayman Islands (BA,BA)***
Study for either a Winter or Summer Session on Little Cayman Island at the Central Caribbean Marine Institute.

01:959:322,323 ***Study Abroad in Chile (BA,BA)***
Study for a year or a semester in Santiago at the CIEE Study Center at the Pontificia Universidad Católica de Chile and the Universidad de Chile.

01:959:325,326,327 ***Study Abroad in China (BA,BA,BA)***
Study for a year or a semester at Jilin University, or for a Summer Session in Jilin in the Rutgers Asian Languages and Cultures Department's intensive Chinese program, or the School of Social Work's summer program in Beijing.

01:959:328,329,330 ***Study Abroad in Costa Rica (BA,BA,BA)***
Study for a year or a semester in San José at the Universidad de Costa Rica.

01:959:331,332 ***Study Abroad in the Dominican Republic (BA,BA)***
Study for a year or a semester in Santiago at the CIEE Study Center at the Facultad Latinoamericana de Ciencias Sociales (FLACSO-Dominican Republic).

01:959:334,335 ***Study Abroad in Egypt (BA,BA)***
Study for a year or a semester in Dokki, near Cairo, at the AMIDEAST Semester/Academic Year in Cairo Program.

01:959:337,338,339 ***Study Abroad in France (BA,BA,BA)***
Study for a year or a semester either in Tours, at the Université François Rabelais; Paris variously at fourteen locations (Paris I, III, IV, VI, VII, VIII, X, XI, XII, XIII; Université d'Évry Val-d'Essonne; Institut Catholique de Paris; Université Paris-Est Marne-la-Vallée; and Université de Versailles St. Quentin-en-Yvellines); or at Sciences Politique, or for a Summer Session either in Paris, in the Rutgers Art History Department's Summer Institute in Art History; or Cluny in the Rutgers School of Environmental and Biological Sciences Department of Biochemistry and Microbiology's Science of Wine and Cheese course.

01:959:340,341,342 ***Study Abroad in Germany (BA,BA,BA)***
Study for a year or a semester either in Constance at the Universität Konstanz, or Berlin at the Freie Universität (direct enroll or FU-BEST), or Munich in the Technische Universität München, or Östrich-Winkel at the European Business School (EBS); or for a Summer Session in EBS's intensive summer seminar, or Rutgers landscape architecture program in Berlin and Munich.

01:959:343,344,345 ***Study Abroad in Ghana (BA,BA,BA)***
Study for a year or a semester in Accra at the University of Ghana, or for a Summer Session in the Rutgers Center for African Studies/Department of Women's, Gender, and Sexuality Studies International Service Learning in Ghana program.

01:959:346,347,348 ***Study Abroad in Greece (BA,BA,BA)***
Study for a year or a semester in Athens at College Year in Athens (CYA), or in Thessaloniki at the American College of Thessaloniki (ACT), or for a Summer Session in Athens in CYA's various programs, or in Thessaloniki at Aristotle University's intensive modern Greek program, or throughout Greece in the Rutgers Department of Classics' Summer Semester in Greece Program, or in Athens in the Rutgers Department of Art History's Cultural Heritage Preservation Program.

01:959:349,350 ***Study Abroad in Hungary (BA,BA)***
Study for a year or a semester in Budapest at the University of California's Central European Studies Center.

01:959:352,353 ***Study Abroad in India (BA,BA)***
Study for a year or a semester in Delhi either at St. Stephen's College or Ramjas College.

01:959:355,356 ***Study Abroad in Ireland (BA,BA)***
Study for a year or a semester either at University College Dublin, University College Cork, or the Limerick Institute of Technology.

01:959:358,359 ***Study Abroad in Israel (BA,BA)***
Study for a year or a semester at the University of Haifa, in Beer Sheva at Ben-Gurion University, or at the Hebrew University of Jerusalem.

01:959:361,362,363 ***Study Abroad in Italy (BA,BA,BA)***
Study for a year or a semester in Rome at John Cabot University (JCU), or in Ferrara through CIEE's programs in language and culture and liberal arts; or for a Summer Session in Rome in JCU's various programs, or the Rutgers Summer Art History program in Rome.

01:959:364,365,366 ***Study Abroad in Japan (BA,BA,BA)***
Study for a year or a semester either in Kyoto at Ritsumeikan University, Beppo at Ritsumeikan Asia Pacific University, or International Christian University in Tokyo; or for a Summer Session in Kyoto in the Rutgers Department of Political Science's course on Japanese international relations.

01:959:367,368 ***Study Abroad in Jordan (BA,BA)***
Study for a year or a semester at the AMIDEAST Semester/Academic Year in Amman Program.

01:959:371 ***Study Abroad in Kenya (BA)***
Study for a Summer Session throughout Kenya in the Rutgers Department of Anthropology's program on primatology (Laikippia Plateau region).

01:959:372 ***Study Abroad in Kenya (BA)***
Study for a Summer Session throughout Kenya in the Rutgers Department of Anthropology's program on palaeoanthropolgy (Koobi Fora).

01:959:373,374,375 ***Study Abroad in Mexico (BA,BA,BA)***
Study for a year or a semester in Merida at the Universidad Autónoma de Yucatán, or for a Winter Session throughout the Yucatan in the Rutgers School of Environmental and Biological Sciences (SEBS) Department of Landscape Architecture's course on Cities and Monuments of the Yucatan, or for a Summer Session at Oaxaca in the Rutgers Latin American Studies Program/SEBS Department of Human Ecology International Service Learning Program.

01:959:378 ***Study Abroad in Morocco (BA)***
Study for a Summer Session in Rabat at the AMIDEAST intensive modern Arabic program.

01:959:379,380 ***Study Abroad in the Netherlands (BA,BA)***
Study for a year or a semester at the University of Leiden.

01:959:382,383 ***Study Abroad in New Zealand (BA,BA)***
Study for a year or a semester at the University of Auckland.

01:959:385,386 ***Study Abroad in Norway (BA,BA)***
Study for a year or a semester at the University of Oslo.

01:959:388,389 ***Study Abroad in Peru (BA,BA)***
Study for a year or a semester in Cusco and environs in the ProWorld International Service Learning Semester Program.

01:959:396 ***Study Abroad in Romania (BA)***
Study for a Summer Session in Cluj and environs in the Rutgers School of Social Work's International Service Learning Program.

01:959:397 ***Study Abroad in Uruguay (BA)***

01:959:398,399 ***Study Abroad in Russia (BA,BA)***
Study for the spring semester at the European University at St. Petersburg, or for a Summer Session in the Rutgers Russian language and literature program's intensive Russian courses.

01:959:400,401 ***Study Abroad in South Africa (BA,BA)***
Study for a year or a semester in Pietermaritzburg at the University of Kwazulu Natal, or through CIEE's programs in arts and sciences or service learning in Cape Town at the University of Cape Town, or at the University of Stellenbosch.

01:959:402 ***Study Abroad CIEE Open Campus LA (BA)***

01:959:403,404,405 ***Study Abroad in South Korea (BA,BA,BA)***
Study for a year, a semester, or a Summer Session in one of various programs in Seoul at Ewha Woman's University.

01:959:406,407,408 ***Study Abroad in Spain (BA,BA,BA)***
Study for a year or a semester in Valencia at the Universitat de València.

01:959:409,410 ***Study Abroad in Thailand (BA,BA)***
Study for a year or a semester in Bangkok and environs in the ProWorld International Service Learning Semester Program.

01:959:412,413 ***Study Abroad in Turkey (BA,BA)***
Study for a year or a semester in Istanbul at Koç University or Ankara at Bilkent University.

01:959:415,416,417 ***Study Abroad in the United Kingdom (BA,BA,BA)***
Study for a year or a semester variously in 10 locations (Bristol University, Cardiff University, City University London, University College London, University of East Anglia, University of Exeter, University of Manchester, University of Reading, University of Sussex, and University of York), or for a Summer Session in Sussex either at the University of Sussex in various courses or in the Rutgers creative writing program.

01:959:418,419 ***Study Abroad on Euroscholars Program (BA,BA)***
Study for a year or a semester on a research project in one of 12 major European universities.

01:959:421,422,423 ***Field Experience (BA,BA,BA)***
Various service learning projects supplementing enrollment in semester/year-length study abroad programs.

01:959:424,425,426 ***Supplemental Language Study (BA,BA,BA)***
Elementary language instruction supplementing Rutgers faculty-led summer programs.

01:959:427 ***Study Abroad in Austria (BA)***
Study for a summer at Graz University of Technology and the University of Graz, Austria.

01:959:428,429 ***Study Abroad in Austria (BA, BA)***
Study for a semester or year at Graz University of Technology and the University of Graz, Austria.

01:959:431 ***Study Abroad in the Czech Republic (BA)***
Study for a summer on the Council for International Educational Exchange's Program in Central European Studies in Prague.

01:959:432,433 ***Study Abroad in the Czech Republic (BA,BA)***
Study for a semester or year on the Council for International Educational Exchange's Program in Central European Studies in Prague.

01:959:434,435 ***Study Abroad in Hong Kong (BA,BA)***
Study for a semester or year at the Hong Kong University of Science and Technology.

01:959:437,438 ***Study Abroad in Portugal (BA,BA)***
Study for a semester or year on the Council for International Educational Exchange's Language and Culture Program at the School of Social Sciences and Humanities, Universidade Nova de Lisboa.

01:959:440,441 ***Study Abroad in Sweden (BA,BA)***
Study for a semester or year at the Royal Institute of Technology in Stockholm.

01:959:442 ***Study Abroad in Poland (BA)***
Study cultural heritage and preservation studies in Krakow, Poland, and Prague, Czech Republic.

01:959:446 ***Study Abroad in Taiwan (BA)***
Study for a semester or a year at the College of Management, National Taiwan University, Taiwan.

01:959:447 ***Study Abroad in Taiwan (BA)***
Study for a semester or a year at the College of Management, National Taiwan University, Taiwan.

01:959:448 ***Study Abroad in Bonaire (BA)***
Study chemistry and marine biology in Bonaire during the summer.

01:959:449 ***Study Abroad in South Africa (BA)***
Study for a Summer Session in South Africa.

01:959:450 ***Study Abroad in Cuba (BA)***
Study comparative health care systems in Cuba in the summer.

01:959:451 ***Study Abroad in Indonesia (BA)***
Study primates, ecology, and conservation in Indonesia in the summer.

01:959:454 ***Study Abroad in Senegal (BA)***
Study in Senegal in the summer.

01:959:457 ***Study Abroad at the UN (BA)***
Study the UN and visit UN headquarters in the summer.

01:959:460 ***Study Abroad in Iceland (BA)***
Study renewable energy in Iceland in the summer.

01:959:463 ***Study Abroad in Oman (BA)***
Study for a semester or a year with AMIDEAST in Muscat, Oman.

01:959:466 ***Study Abroad in Belize (BA)***
Study animal science in Belize in the summer.

799 Supply Chain Management (RBS-NB)

799 Supply Chain Management

Major requirements for students who entered RBS ***from fall 2016 to fall 2022:***

Business Core

33:010:275 Introduction to Managerial Accounting (3) (prerequisite: 33:010:272)
33:011:300 Business Forum (2)
33:136:370 Management Information Systems OR 33:010:458 Accounting Information Systems (3) (33:010:458 required if double majoring in Accounting, Prerequisite for 33:010:458: 33:010:272)
33:136:385 Statistical Methods in Business (3)
33:136:386 Operations Management (3)
33:140:320 Business Law I (3) OR 33:522:334 Business Ethics (3) (junior or senior year33:140:320 required if

double majoring in Accounting)
33:390:300 Financial Management OR 33:390:310 Financial Management for Finance Majors (3) (33:390:310 required if double majoring in Finance)
33:620:301 Introduction to Management (3)
33:620:302 Management Skills (3)
33:620:492 Business Policy and Strategy (3) (prerequisites: 33:390:300 or 33:390:310, 33:620:301, 33:630:301, and senior year)
33:630:301 Introduction to Marketing (3)
33:799:301 Introduction to Supply Chain Management (3)

Required SCM Courses

33:799:305 Global Procurement and Sourcing Strategies (3) (prerequisite: 33:799:301)
33:799:330 Business Logistics and Transportation (3) (prerequisite: 33:799:301)
33:799:310 Demand Planning and Fulfillment (3) (prerequisite: 33:799:301)
33:799:380 Introduction to Project Management (3) (prerequisite: 33:799:301)
33:799:493 Internship in Supply Chain Management (3) (prerequisite: 33:799:301) OR 33:799:421 Co-op in Supply Chain Management (3) (prerequisite: 33:799:301) OR 33:799:420 SCM Industry Client Projects (3)** (prerequisites: 33:799:380 and seniors only)

Three Supply Chain Electives (9)**

There are two introductory Finance courses that can fulfill a business core requirement. If you intend to double major in Finance or declare a Finance concentration you will need to take Financial Management for Finance Majors (33:390:310). You can take Financial Management (33:390:300) if you have no intention of majoring in Finance or declaring a Finance Concentration. Credit will not be given for both courses if you take both due to switching to a Finance major/declaring a Finance concentration at a later date.

If you major in Accounting as your first, second, or third major, you are required to take 33:010:458 Accounting Information System and 33:140:320 Business Law I. You will not earn credit for taking 33:136:370 Management Information System. You can earn credit towards graduation if you take 33:522:334 Business Ethics but it will not fulfill a major requirement.

Students with more than one Business School major may only double count one RBS course between those majors.

**Students may only take one experiential learning course towards their SCM required courses from among these three categories: Industry Client Projects, Internship in Supply Chain Management, and Co-op in Supply Chain Management. Co-op in Supply Chain Management and Internship in Supply Chain Management for SCM required credits are by application only through the Supply Chain department. If you choose to take Co-op in Supply Chain as your one SCM required course you will also be registered for both 799:421 (SCM Co-op) and 799:422 (SCM Elective Co-op) with 799:422 counting toward SCM elective credit. This is the only exception for experiential learning toward SCM elective credit. Any other experiential learning experience after your one allowed for SCM required credit must apply through to the Office of Career Management and you will be registered for general elective credit only.

Major requirements for students who entered RBS ***in the fall 2024 semester or later:***

Business Core

33:010:275 Introduction to Managerial Accounting (3) (prerequisite: 33:010:272)
33:011:301 Foundations for Your Career Journey (1)
33:011:302 Building Your Brand (1) (prerequisite: 33:011:301)
33:011:303 Conquering Your Transition (1) prerequisite: 33:011:302)
33:136:370 Management Information Systems OR 33:010:458 Accounting Information Systems (3) (33:010:458 required if double majoring in Accounting, Prerequisite for 33:010:458: 33:010:272)
33:136:385 Statistical Methods in Business (3)
33:136:386 Operations Management (3)
33:140:320 Business Law I (3) OR 33:522:334 Business Ethics (3) (33:140:320 required if double majoring in Accounting)
33:390:300 Financial Management (3)
33:620:301 Introduction to Management (3)
33:620:302 Management Skills (3)
33:620:492 Business Policy and Strategy (3) (prerequisites: 33:390:300 or 33:390:310, 33:620:301, 33:630:301, and senior year)
33:630:301 Introduction to Marketing (3)
33:799:301 Introduction to Supply Chain Management (3)

Required SCM Courses

33:799:305 Global Procurement and Sourcing Strategies (3) (prerequisite: 33:799:301)
33:799:330 Business Logistics and Transportation (3) (prerequisite: 33:799:301)
33:799:310 Demand Planning and Fulfillment (3) (prerequisite: 33:799:301)
33:799:380 Introduction to Project Management (3) (prerequisite: 33:799:301)
33:799:493 Internship in Supply Chain Management (3)** (prerequisite: 33:799:301) OR 33:799:421 Co-op in Supply Chain Management (3)** (prerequisite: 33:799:301) OR 33:799:420 SCM Industry Client Projects (3)** (prerequisites: 33:799:380 and seniors only)

Three Supply Chain Electives (9)**

** Students may only take **one** experiential learning course towards their SCM required courses from among these three categories: Industry Client Projects, Internship in Supply Chain Management, and Co-op in Supply Chain Management. Co-op in Supply Chain Management and Internship in Supply Chain Management for SCM required credits are by application only through the Supply Chain department. If you choose to take Co-op in Supply Chain as your **one** SCM required course you will also be registered for both 799:421 (SCM Co-op) and 011:482 (Special Topics in Admin Studies) with 011:482 counting for general elective credit only. SCM students are limited to one experiential learning experience. After your **one** course allowed for SCM required credit, you must apply through to the Office of Career Management and you will be registered for general elective credit only.

A grade of B or better is required to take any additional Finance department courses beyond 33:390:300 Financial Management.

If you major in Accounting as your first, second, or third major, you are required to take 33:010:458 Accounting Information System and 33:140:320 Business Law I. You will not earn credit for taking 33:136:370 Management Information System. You can earn credit towards graduation if you take 33:522:334 Business Ethics but it will not fulfill a major requirement.

Students with more than one Business School major may only double count one RBS course between those majors.

Theater 965 (MGSA)

THEATER 965

Department of Theater, Mason Gross School of the Arts

The bachelor of arts (B.A.) program in theater is designed for those students seeking a liberal arts education coupled with a solid fundamental overview of the professional theater. The program provides a high-quality, general perspective of theater encompassing academic study, performance studies, production practice, and appropriate internships and/or project work. Several opportunities exist for students to study abroad in university-sponsored programs. B.A. students enjoy several performing/production outlets with extracurricular theater organizations on campus: the Cabaret Theater, the College Avenue Players, Hillel Theater, and the Livingston Theater Company.

See the Mason Gross School of the Arts section of this catalog for faculty listing and bachelor of fine arts (B.F.A.) information. Students who wish to specialize in acting, design, or production should consider auditioning or interviewing to be a B.F.A. student. Please note that casting opportunities in departmental Rutgers Theater Company productions are limited to bachelor of fine arts (B.F.A.) students.

Theater 965 (MGSA)

Major Requirements

Major Requirements

As a means to explore potential aptitude for a theater major, School of Arts and Sciences students should take: 07:965:211 Theater Appreciation and 07:965:271 Basic Acting or 07:965:215 Intro to Theatrical Design & Production.

Bachelor of arts (B.A.) theater majors should complete courses in 07:965:281-282 Theater History (or the online equivalent 07:965:231-232); 07:965:215 Intro to Theatrical Design & Production; and 07:966:123 Theater Practice (taken twice) by the end of the junior year, since they are required of all majors and are prerequisites for most advanced theater courses. Theater History is a two-semester course, which must be taken in sequence, beginning in the fall semester for the in-person section. The Theater History course is also offered online each semester. Students are expected to achieve grades of C+ or better in the major and no course with a grade of D or lower will count toward the major.

Depending on the student's interest, Theater arts students are encouraged to take correlative courses in dramatic literature (modern drama, Shakespeare) as well as courses in art, dance, and music history and appreciation.

Theater majors in the B.A. program are required to take a minimum of 47 credits, distributed as follows:

*16 Credits in Academic Courses (*Required)*
07:965:231-232 (online)* Theater History I and II (3,3) fall/spring
07:965:390* Theater Horizons (1)
07:965:211 Theater Appreciation I (3) fall and spring
07:965:214 Black Theater History (3) spring
07:965:234 Intro to Dramaturgy (3) fall
07:965:260 Musical Theater Appreciation (3) spring
07:965:290 Broadway: American Musical (3) spring
07:965:300 New York Theater Experience (3) spring
07:965:302 Theater for Social Development (3)
07:965:314 Playwriting (3) fall
07:965:370 Global Theater I (3)
07:965:401 Theater Criticism (3) spring
07:965:473 Clothing and Culture (3) fall

9-10 Credits in Physical Theater Courses (Required):*
07:965:215* Introduction to Theatrical Design & Production (3) fall
07:966:123* Theater Practice (2,2) **course is taken twice and must take different sections**
07:965:310-11 Introduction to Costume Design (3,3) fall/spring
07:966:315 Intro to Stage Management (3) fall
07:965:216 Scenic Art II (3) spring
07:9656:219 Intro to Scenic Construction (2)
07:966:242 Intro to Stage Lighting (2)
07:966:249 Intro to Stage Management (3)
07:966:219 Costume Construction (2)
07:966:310 Costume Design I (3)
07:966:361 Sound Tech & Design for Theater (2)
07:966:490 Advanced Light Lab (2)
07:965:496 Seminar Topics: Embellishments (BA)
07:966:277 Production Properties (2)
07:966:305 Advanced Lighting Techniques (2)
07:966:350 Fabric Dyeing (2)

*6 Credits in Performance (Acting and/or Directing) (*Required):*
07:965:210 Intro to Medical Acting (3) fall
07:965:271* Basic Acting (3) fall/spring
07:965:272 Intermediate Acting: Scene Study (3) fall/spring
07:965:275 On Camera Acting (3)
07:965:325 Advanced Acting (3) spring
07:965:326 Performance Workshop (3) by audition only fall
07:965:421 Directing (3) fall
07:965:422 Advanced Directing Project (3) by special permission only spring

9-10 Credits in Theater Electives chosen from among any of the following that were not taken to fill another requirement in academic, physical theater, or performance elective:
07:965:214 Black Theater History (3) spring
07:965:222 Performing Solo from Stage to YouTube Online (3) online
07:965:225 Creating Characters Onstage and Online (3) online
07:965:227 Voice & Speech I (2)
07:965:240 Staging Resistance: Theater, Protest, and Social Change Online (3) online
07:966:242 Introduction to Stage Lighting (2) spring
07:965:260 Musical Theatre Appreciation (3) spring
07:965:272 Intermediate Acting (3) fall and spring
07:965:275 On Camera Acting (3)
07:965:290 Broadway: American Musical (3) spring
07:965:300 New York Theater Experience (3) spring
07:965:302 Theater for Social Development (3) fall
07:965:310 Introduction to Costume Design (3) fall
07:965:311 Introduction to Costume Design (3) spring
07:966:315 Intro to Stage Management (3) fall
07:965:325 Advanced Acting (3) spring
07:965:326 Performance Workshop (3) fall
07:965:330 Improving Communication Through Improv (3)
07:965:350 Improvisation and Theater Games (2) fall
07:965:364 Theater Management (3) alternate falls
07:965:365 Theater Management: Producing (3) alternate falls
07:965:371 Global Theater II (3) spring
07:965:410 Theater Criticism (3) spring
07:965:421 Directing (3) fall
07:965:422 Advanced Directing Project (3) spring
07:965:451 Storytelling Workshop (2) spring
07:965:471 Creative Dramatics for Children (2) fall
07:965:472 Creative Dramatics for Children (2) spring
07:965:473 Clothing and Culture (3) fall
07:966:496 Race, Identity & Theater (3)

**9 credits in Physical Theater requires 10 credits to be completed in Theater Electives to reach the required 47 credits for completion of the major.

Other 966 Theater Classes Are Also Available as Theater Electives
Most require prerequisites or permission of instructor. Note: the semester a course is offered is subject to change. Courses offered by the English Department may also be accepted towards the major, but must be approved in advance.

6 Credits in Required Project Work or Internship
Working closely with the B.A. adviser, and any additional faculty adviser, junior or senior students develop and propose appropriate work for the advanced Internship and/or Project Work. Internships involve the student

working in a professional theater environment outside of the university. Project Work is comprised of major involvement on a theatrical project such as writing or directing a production. On rare occasions an appropriate acting project can be considered.

07:965:396 Internship/Theater (BA)
07:965:491-492 Project Work (BA,BA)
07:965:493 Honors Project (BA)
Approved study abroad credits may be substituted.
All credits in this category must be planned and supervised by the B.A. theater arts adviser.

Theater 965 (MGSA)

Minor Requirements

Minor Requirements

The minor in theater arts requires 18 credits. Students are required to take 07:965:281-282 Theater History (3,3) (or the online equivalent 07:965:231-232 [3,3]) and 07:965:215 Intro to Theatrical Design & Production (3). In addition, theater arts minors take 3 credits toward the Physical Theater requirement and 6 credits in theater arts electives. Bachelor of arts (B.A.) advisers in theater arts must be consulted for approval of elective selections.

Theater arts minors who are declaring in the senior year must preregister for classes to ensure availability; space is limited. Theater History is a two-semester course, which must be taken in sequence, beginning in the fall semester. The course is also offered online. 07:965:215 Intro to Theatrical Design & Production is required and is offered in the fall semester. It is a prerequisite for all other theater electives. Students are expected to achieve grades of C+ or better in the minor. A course with a grade of D will not count toward the minor.

6 Credits in Required Academic Courses
07:965:281-282 Theater History I and II (3,3) or the online equivalent 07:965:231-232 (3,3)
07:965:390* Theater Horizons (1)
07:965:211 Theater Appreciation I (3) fall and spring
07:965:214 Black Theater History (3) spring
07:965:234 Intro to Dramaturgy (3) fall
07:965:260 Musical Theater Appreciation (3) spring
07:965:290 Broadway: American Musical (3) spring
07:965:300 New York Theater Experience (3) spring
07:965:302 Theater for Social Development (3)
07:965:314 Playwriting (3) fall
07:965:370 Global Theater I (3)
07:965:410 Theater Criticism (3) spring
07:965:473 Clothing and Culture (3) fall
07:966:306 Aesthetics of Space (3) fall

6 Credits in Physical Theater (Required)*
07:966:123 Theater Practice (2,2 **course is taken twice and must take different sections**
07:965:215* Intro to Theatrical Design & Productio (3) fall

07:965:216 Scenic Art II (3) spring
07:965:310 Introduction to Costume Design (3) fall
07:965:311 Introduction to Costume Design (3) spring
07:966:242 Introduction to Stage Lighting (2) spring
07:966:219 Intro to Scenic Construction (2)
07:966:249 Intro to Stage Management (3)
07:966:219 Costume Construction (2)
07:966:361 Sound Tech & Design for Theater (2)
07:965:490 Advanced Light Lab (2)
07:965:496 Seminar Topics: Embellishments (BA)
07:966:277 Production Properties (2)
07:966:305 Advanced Lighting Techniques (2)
07:966:350 Fabric Dyeing (2)

6 Credits in Theater Electives chosen from among any of the following which were not taken to fill another requirement in curricular core or physical theater (see course listing for prerequisites):
07:965:211 Theater Appreciation I (3) fall and spring
07:965:214 Black Theater History (3) spring
07:965:222 Performing Solo from Stage to YouTube Online (3) online
07:965:225 Creating Characters Onstage and Online (3) online
07:965:240 Staging Resistance (3) online
07:965:260 Musical Theatre Appreciation (3) spring
07:965:271 Basic Acting (3)
07:965:272 Intermediate Acting (3) fall and spring
07:965:275 On Camera Acting (3)
07:965:290 Broadway: American Musical (3) spring
07:965:300 New York Theater Experience (3) spring
07:965:302 Theater for Social Development (3) fall
07:965:310 Introduction to Costume Design (3) fall
07:965:311 Introduction to Costume Design (3) spring
07:965:325 Advanced Acting (3) spring
07:965:326 Performance Workshop (3) fall
07:965:330 Improving Communication Through Improv (3)
07:965:350 Improvisation and Theater Games (2) fall
07:965:364 Theater Management (3) alternate falls
07:965:365 Theater Management: Producing (3) alternate falls
07:965:370 Global Theater I (3) fall
07:965:410 Theater Criticism (3) spring
07:965:421 Directing (3) fall
07:965:422 Advanced Directing Project (3) spring
07:965:451 Storytelling Workshop (2) spring
07:965:471 Creative Dramatics for Children (3) fall
07:965:472 Creative Dramatics for Children (3) spring
07:965:473 Clothing and Culture (3) fall

07:965:490 Advanced Light Lab (2)
07:966:242 Introduction to Stage Lighting (2) spring
07:965:496 Race, Identity & Theater (3)

Note: The semester a course is offered is subject to change.

Theater 965 (MGSA)

Departmental Honors Program

Departmental Honors Program

A student in the theater arts major qualifies as a candidate for departmental honors after meeting several requirements: at the time the proposal for candidacy is submitted, the student must have a cumulative grade-point average of 3.0 or better and an average of 3.5 or better in the major; the student must submit to their bachelor of arts (B.A.) adviser a project proposal that has the sanction of one member of the department, approved by the B.A. adviser who has agreed to serve as mentor. The project may take the form of a paper in theater history; or aesthetics and criticism; or may be a creative work in areas of acting and directing, design, or playwriting.

The candidate whose proposal is accepted must enroll in 07:965:493, an honors seminar, or 07:965:494, the thesis project. This project must be completed by May 1 and is judged by the student's mentor and the B.A. adviser and one other faculty member who determine whether the student's work merits high honors, honors, or no honors.

Theater 965 (MGSA)

Courses (965)

Courses (965)

07:965:210 ***Introduction to Medical Acting (3)***
This course will provide students with an opportunity to use theatre training to learn how to portray patients in the physician training program at RWJ Medical School and beyond. Improvisation and actor training techniques will be used to develop skills as actor/educators in this unique course.

07:965:211 ***Theater Appreciation I (3)***
Designed for students in theater. Students attend a wide spectrum of theater offerings: Broadway, Off-Broadway, Off-Off-Broadway, repertory, and university theater performances and, through discussion and lectures by professional artists, gain an appreciation of performance. Theater tickets and in-class presentation course fee (generally, no text is required).

07:965:214 ***Black Theater History (3)***
This course is designed to further develop the student's understanding of the evolution of black theater in America coupled with the historical impact of race as a fundamental component. The class dictates an analysis of the student's understanding/acceptance of racial inequities to further explore how movements, institutions, artists, and writers used theater and live performance as a form of expression.
Prerequisite: 07:965:211.

07:965:215 ***Intro to Theatrical Design and Production(3)***
An introductory course in basic theatrical design and production. Lectures (given twice a week) cover a wide range of topics relating to the technical, historical, and aesthetic aspects of designing scenery, costumes, and lighting for the stage.
Fall only.

07:965:216 ***Scenic Art (3)***
Lecture/workshop course in theatrical set design that expands on concepts covered in the fall semester. Lectures cover both conceptual/artistic and technical topics, and lab periods will be used to learn hands-on technical skills. The class culminates in a single set design project, formally presented at the end of the semester.
Prerequisite: 07:965:215. Spring only.

07:965:222 ***Performing Solo: From Stage to YouTube Online (3)***
This is a performance-based elective course designed for students of all disciplines who wish to persuasively communicate in person or on video. If you¿re scared of public speaking, then this class is a great way to find your comfort zone, from the comfort of your own home. Students will try vlogging, stand-up, monologues, narration, and even multi-character dialogue, with the help of a supportive instructor and class. Students will study these formats through lectures and by watching videos. Students will have the freedom to write their own scripts on a variety of topics important to them. Performance experience is not required to take this course. These skills are not only used in entertainment, but also in video conferencing and marketing for any profession. No matter your major or future career, this course can help you be the person who is confident, comfortable, and stands out.

07:965:225 ***Creating Characters Onstage and Online (3)***
This is a performance-based elective course designed for students of all disciplines who wish to persuasively communicate in person or on video. If you¿re scared of public speaking, then this class is a great way to find your comfort zone, from the comfort of your own home. Students will try vlogging, stand-up, monologues, narration, and even multi-character dialogue, with the help of a supportive instructor and class. Students will study these formats through lectures and by watching videos. Students will have the freedom to write their own scripts on a variety of topics important to them. Performance experience is not required to take this course. These skills are not only used in entertainment, but also in video conferencing and marketing for any profession. No matter your major or future career, this course can help you be the person who is confident, comfortable, and stands out.

07:965:230 ***Theater Apprciation Online (3)***
Students attend a wide spectrum of theater offerings including Broadway, off-Broadway, off-off-Broadway, regional, educational, and community events, and, through viewing those theatrical productions and online lectures, gain an appreciation of performance and everything that goes into producing theater.
Note: Students will not receive credit for both 07:965:230 and 07:965:211. This course does not fulfill any SAS core requirements.

07:965:231 ***Theater History I (3)***
The objective is to examine the traditions of primarily Western theater from its origins to the English Restoration, within the context of wider cultural and political developments. The class focuses on the relationship of these dramatic traditions to current issues such as gender, race, power, and identity, as well as theater as a vital expression of universal human empathy.
Students may not receive credit for both 07:965:231-232 and 07:965:281-282.

07:965:232 ***Theater History II Online (3)***
Theater II picks up where the first class leaves off and takes us to the present time. A survey of key theater developments, concepts, and trends, primarily Western, from the 18th Century to the present, within the broader context of emergent modernity, the crises this radical change produced, and the range of artistic responses to this new and destabilizing reality.
Prerequisites: 07:965:231 or 07:965:281. Students may not receive credit for both 07:965:231-232 and 07:965:281-282.

07:965:240 ***Staging Resistance: Theater, Protest, and Social Change Online (3)***
Through plays and other performance texts, videos, graphics, media accounts, and critical theory readings, this class will explore the vibrant tradition of the atricalized or staged resistance to the injustice and inequality endemic to contemporary culture. Sources include: plays and films that explicitly challenge embedded power hierarchies; radical performative disruptions such as Pussy Riot, Occupy Wall Street, and Take a Knee protests; and participatory community-engaged theater for social change.

07:965:255 ***Upcycling (3)***
This course focuses on utilizing ancient techniques, rooted in culture and tradition, to counteract the current effects of fast fashion on the future of our environment. The class combines exploring how what we wear negatively affects the environment and reimagines ancient crafts through the art of upcycling fashion which has grown out of the need for environmental stewardship among artists and craftspeople.

The class combines lectures covering the effects of fast fashion on our environment and hands on pedagogy in the art of upcycling as a response.

07:965:260 ***Musical Theatre Appreciation (3)***
An overview of the American art form. This course will explore the history, vocabulary, style, and growth of musical theatre through lectures, special guest demonstrators, and live performances. Theater tickets and in-class presentation course fee.

07:965:271 ***Basic Acting (3)***
This course is designed to provide students a basic understanding of the technique of acting. Students discover the basic approaches to the technique of acting through active participation in exercises, improvisations, and scene work

07:965:272 ***Intermediate Acting (3)***
This course builds on the skills acquired in Basic Acting; upon that foundation, students will study and practice specific techniques designed to interpret and rehearse scripted material. Students will explore genuine and spontaneous responses to imaginary circumstances that they will both craft and interpret from established texts.
Prerequisite: 07:965:271.

07:965:275 ***On-Camera Acting (3)***
To provide hands-on experience for students interested in film and television acting techniques for the camera. This course covers acting techniques that are used in various film and television productions.
Summer only.

07:965:281 ***Theater Histories I (3)***
All of theater is a conversation with collaborators, audiences, contemporaries and the past. In order to criticize and reflect on our present day, we need to understand where we have been. THEATER HISTORIES I is the tart of that conversation. It is a first step in understanding what came before this very moment we find ourselves living in today. This course aims to develop a set of conceptual and analytical tools for the close reading and interpretation of plays and historical texts as blueprints or scores for theatrical performance. It provides an analytical vocabulary and dramaturgical skillset useful both to students with a general interest in theater as an artistic and cultural form and to aspiring theater-makers, whether in acting, directing, design, dramaturgy or other areas.
Students may not receive credit for both 07:965:231-232 and 07:965:281-282.

07:965:282 ***Theater Histories II (3)***
This course aims to develop a set of conceptual and analytical tools for the close reading and interpretation of plays and historical texts as blueprints or scores for theatrical performance. It provides an analytical vocabulary and dramaturgical skillset useful both to students with a general interest in theater as an artistic and cultural form and to aspiring theater-makers, whether in acting, directing, design, dramaturgy, or other areas.
Prerequisites: 07:965:281 or 07:965:231. Students may not receive credit for both 07:965:231-232 and 07:965:281-282.

07:965:290 ***Broadway: American Musical (3)***
Examine the masterworks to explore musical theater history, execution, and cultural significance. Live discussion will be interwoven with multimedia and attendance at shows to highlight the contributions of important artists and productions. Course fee for tickets to live theater and in-class presentation. Travel costs to see assigned plays are not included.

07:965:300 ***New York Theater Experience (3)***
This course is designed to provide the student with an enhanced, detailed experience as an audience member of contemporary theater. This is done by examining and challenging the plays in deep analytical terms: examining play/script structure, elements of design, performance truth, and directing/staging. Students attend up to 12 professional productions--Broadway, Off Broadway, and regional. The class attends plays every Wednesday night, and an in-depth student panel discussion occurs the following Monday evening. Course fee for tickets to live theater. Travel costs to see assigned plays are not included. Attendance is required for seeing plays.
Prerequisites: 07:965:211

07:965:302 ***Theater for Social Development (3)***
Theater for Social Development is designed to develop students' understanding of how the arts can be integrated into community development and engaged social interventions.

07:965:310 ***Introduction to Costume Design (3)***
Introduction to Costume Design is a lecture course that covers the fundamentals of costume design; character analysis, basic research techniques, and rendering are covered as they pertain to costume design.

07:965:311 ***Introduction to Costume Design (3)***
This is an introductory course on the fundamentals of costume design. In this course, we will cover the practical application of methods, materials, and techniques used in the creative storytelling process. Character analysis, costume research, and rendering will be introduced with the focus on providing students with a working

understanding of the theatrical design process as well as the essential skills needed to design costumes for live performance.
Prerequisites: 07:965:310

07:965:314 *Playwriting (3)*
This course will introduce you to the fundamentals of playwriting. During the semester, we will practice short-form exercises and peer critiques in preparation for writing and presenting a final, fully original one-act play.
Prerequisites: 07:965:211 or 07:965:230

07:965:325 *Advanced Acting (3)*
This course is designed to deepen the acting student's understanding of the craft of acting using structured improvisations, acting exercises, and a study of the rehearsal process as it relates to the production of a one-act play. Actor training will focus on and make use of individual and group exercises that challenge both the mind and the body.
Prerequisites: 07:965:326. Approval of instructor or audition required for admission.

07:965:326 *Performance Workshop (3)*
An active, process-oriented approach to play devising, this course will be concerned with the creation of a single one-act play. Though there will be many opportunities for writing in the class, the nature of this writing will be focused more on active on-your-feet crafting of the elements that make up a piece of dramatic writing than on the traditional pen-to-paper approach. Each student will act as a scribe in collaboration with the group to record and fashion our process into a completed play which will then be rehearsed and performed as a culminating experience for the class.
Prerequisites: 07:965:271 and 07:965:272. Approval of instructor or audition required for admission.

07:965:330 *Improving Communication through Improv (3)*
In this introductory course the theories of improvisation are adapted to the goals and objectives of communication for scientists of various disciplines. The game is a natural form that encourages individual involvement through cooperation with others to achieve a collective goal. In this workshop, participants will develop skills through direct involvement with each other and with the problem-solving process that is required for the playing of theatre games. The only necessity is an open mind and an interest in exploring the power of intuition as a spontaneous and effective tool for experiencing your own creativity.

07:965:350 *Improvisation and Theater Games (2)*
This course is designed will provide the student with the skills needed to keep the actor's instrument (body, voice, mind) tuned and in good working order. Various improvisational techniques and theatre games are utilized to this end. While the techniques are fun, the skills acquired are tangible.
Prerequisite: 07:965:271.

07:965:359-360 *Independent Study (BA,BA)*
This course allows students to work and study on a project independently which provides the opportunity to develop and refine their theater skills with one-on-one support and direction from professional faculty.
Prerequisites: Open only to upper-class theater arts majors with permission of instructor and student's theater arts adviser.

07:965:364 *Theater Management (3)*
This course is designed to develop students' understanding of the fundamental concepts and practices of today's theater manager, which includes several management aspects of professional regional theater, including organizational design, administration, marketing, budgeting, and fundraising.
Open to 965/966 majors or by permission of instructor.

07:965:365 *Theater Management: Producing (3)*
This course is designed to further develop the student's understanding of the fundamental concepts of producing theatrical shows. The class presents an in-depth examination of the art of producing by assessing such theater management aspects as leadership, script selection, AEA & other unions, contract negotiation, and marketing.

07:965:370 *Global Theater I (3)*
This course explores the theories and practices ¿ the ideas behind the art ¿ of theater and theatrical performance in the 21st century, with an emphasis on historical perspectives and contemporary applications. Through questioning the nature and function of the art form and interdisciplinary comparisons, the students are encouraged to examine their own values and beliefs and how those values and beliefs might shape the future.**Listed on website & catalog, but not in CSS.
Prerequisite: 07:965:281-282 or 07:965:231-232.

07:965:371 *Global Theater II (3)*
Builds on the classwork of the first semester in Global I. The class examines shared and divergent ideas about the nature of theater and its diverse expressions across and between contemporary world theatre-makers, with a particular emphasis on challenging global issues and currents. The class places the student in the context of and in dialogue with a wide array of artists around the world.
Prerequisite: 07:965:370. Open to 966 majors or by permission of instructor.

07:965:390 *Theater Horizons (1)*
Students are provided with a comprehensive integration of career development approaches, entrepreneurial strategies, and explorations of regional, national, and global markets, movements, and players. With the guidance of theater faculty, alumni, and outside guests, this class also considers the business of being an artist, from the presentation of oneself as a working professional to the handling of different contracts, finances, and a freelance lifestyle.
Required of all Theater Arts 965 majors.

07:965:396 *Internship/Theater (BA)*
Supervised work experience in a department of a professional theater organization. Includes design and production, performance, stage management, business management, or literary management.
Prerequisite: Permission of instructor.

07:965:410 *Theater Criticism (3)*
Study of criteria for analyzing and evaluating plays and performances; workshops in critical writing.
Prerequisites: 07:965:281-282 or 231-232

07:965:421 *Directing (3)*
The focus of this course is to introduce the student to the theoretical definitions of directing as well as the craft required to achieve success as a stage director. This includes, but is not limited to, research, casting, table work and

staging. The class will also investigate the thoughts, values, and practices of highly successful stage directors both past and present.
Prerequisites: 07:965:271 or 07:965:215.

07:965:422 *Advanced Directing Project (3)*
Advanced Directing is designed for students who have successfully completed the first semester of Directing and have demonstrated a strong interest in deepening their knowledge about the craft and role of a director. This is a select in-person studio class that focuses on an exploration of dramaturgy and scene work stemming from a variety of styles and sensibilities. A smaller class size allows each student ample opportunity to collaborate with volunteer acting students to create fully articulated presentations.
Prerequisites: 07:965:421

07:965:451 *Storytelling Workshop (2)*
An introduction to the art and practice of storytelling including the writing of stories for children using important universal iconography. The different techniques for reading aloud and for telling stories will be taught and practiced throughout the semester. Students will have a chance to perform for elementary school classes. The instructor will provide the placements.

07:965:471-472 *Creative Drama for Children (3,3)*
This course is designed to provide the student with the skills to utilize the creative process in order to positively impact a child¿s imagination within the school environment. The students will work with elementary school children in the children¿s own classrooms to bring appropriate literature to life. They will teach the children to use their bodies, voices, and imaginations in ways that are freeing and joyful.

07:965:473 *Clothing & Culture I (3)*
This course introduces the human phenomenon of dress and adornment, with themes from the fields of psychology, anthropology, art, textile, fashion, and cultural history. Diverse examples of global dress from prehistory to the late 20th century provide rich comparisons. Enhancing the curriculum of students preparing for careers in the arts, the class examines the role of fashion in the cultural construction of identity.

07:965:490 *Advanced Light Lab (2)*
A weekly discussion and exploration of the properties of light and how to manipulate the medium to support storytelling, affect perception and inform overall point of view.

07:965:491-492 *Project Work (BA, BA)*
Application of performance, production, or critical theory under professional supervision in an outside theatrical organization. Activities include, but are not limited to, literary management, directing, stage management, design, and theater management. In certain instances, an acting project can be proposed by the student.
Permission of student's B.A. adviser required. Open to juniors and seniors.

07:965:494 *Honors Project in Theater Arts (3)*
Students with 3.0 GPA within the major are eligible to select performance, production, or critical theory under faculty supervision. An Honors Committee comprised of three university professors evaluate the student's project. Students need to possess the ability to work independently.
Permission of B.A. adviser required. Student must have at least a 3.0 within the major.

07:965:495-496 ***Seminar: Topics in Theater (BA,BA)***
Open to B.F.A./B.A. students by permission of instructor.

07:965:497-498 ***Workshop Topics in Theater (BA,BA)***
Open to B.F.A./B.A. students by permission of instructor.

Ukrainian 967 (SAS)

UKRAINIAN 967

Department of Germanic, Russian, and East European Languages and Literatures, School of Arts and Sciences

Website: http://reell.rutgers.edu/home

Ukrainian 967 (SAS)

Course in English

Course in English

01:967:259 ***Ukrainian Literature in Translation (3)***
Reading and interpretation of major writers.

Ukrainian 967 (SAS)

Courses in Ukrainian

Courses in Ukrainian

NOTE: Rutgers currently offers Ukrainian language courses only through BTAA course share. For more information, visit: https://tlc.rutgers.edu/btaa . Please contact the REELL Program Director with questions.

01:967:101,102 ***Elementary Ukrainian (4,4)***
Introductory course in spoken and written standard Ukrainian for students with minimal or no prior experience with the language. Development of proficiency in speaking, reading, listening, and writing.

01:967:121,122 ***Ukrainian in Review (4,4)***
Overview of grammar; development of conversation, reading, and composition skills.
Prerequisite: Placement test or permission of instructor.

01:967:493,494 ***Independent Study: Ukrainian (3,3)***
Prerequisite: Permission of instructor.

Urban Planning and Design Major (971, 971D) and Minor (EJB-U)

URBAN PLANNING AND DESIGN MAJOR (971, 971D) AND MINOR

Urban Planning and Design Major (51 credits)

The major in Urban Planning and Design (971, 971D) combines the processes of urban design and urban planning to provide students with a sharper focus on city design, community development, GIS and graphic communication, as well as planning practice.

It prepares students for entry-level positions in the planning sector and graduate studies in city and regional planning. Students learn graphic communications, video software, geographic information systems, and web communication. They help design, promote, and administer plans to address issues involving land use, zoning, transportation, infrastructure, housing, community facilities, and more. Studios allow students to conduct field and observational studies and surveys, and analyze data that evaluate community demands for land uses and services.

Upon completing all degree requirements, the student will receive the bachelor of science (B.S.) degree.

Rutgers School of Arts and Sciences and School of Environmental and Biological Sciences Students

This program is designed to accommodate the needs of traditional students at Rutgers University-New Brunswick.

Students in the School of Arts and Sciences (SAS) must apply for admission prior to declaring the major. SAS students may pursue UPD as their first major and remain within SAS. Students in the School of Environmental and Biological Sciences (SEBS) wishing to declare Urban Planning & Design (UPD) as their second major should contact the Bloustein School¿s Office of Student and Academic Services at ugadmissions@ejb.rutgers.edu.

To ensure degree completion by their anticipated graduation date, students are advised to declare the UPD major no later than the first semester of their junior year. **However, students must start planning their scheduled set of courses with a Bloustein advisor during the first semester of sophomore year.**

Students can apply for the UPD major during one of our application cycles listed here. Applicants must have a minimum grade of 'C' or better in each of the prerequisite courses and be in good academic standing. The application may be found on the school's website at¿https://bloustein.rutgers.edu/undergraduate/urbanplanninganddesign/#sas

The UPD major is *sequence-dependent*. To prepare students for two capstone design studios during their final undergraduate year, the curriculum builds knowledge and skills in urban planning and design over the preceding two semesters. The required sequence of courses is listed below. Please note that the capstone courses, Planning

and Design Studio I and II are only offered consecutively in the fall and spring semester. **Because all required courses are sequenced, it is important that a student develop an academic plan with their Bloustein advisor when they declare the UPD major.**

As a credit intensive major, UPD does not require declared students to complete a minor. However, students may benefit from completing a minor and this option should be discussed with the Bloustein School advisor while developing their academic plan. In addition, if choosing a minor, students are encouraged to meet with the UPD Program Coordinator for career advice.

Only courses with 'C' or better may be counted towards the health administration major, and students must complete the core curriculum requirements of their primary school.

The most current information for the Planning and Public Policy major may be found on the Bloustein School website at https://bloustein.rutgers.edu/undergraduate/urbanplanninganddesign/

Transfer Students

This program is designed to accommodate the needs of transfer, adult, and nontraditional students.

Students seeking the Urban Planning and Design major must have at least 30 credits before applying to the Bloustein School. Successful applicants will have completed the prerequisite courses with a grade of 'C' or better, and have achieved an overall GPA of at least 2.5.

Current Rutgers students seeking a school-to-school transfer from another Rutgers unit, or students transferring to Rutgers from another college or university, must apply via the Rutgers Office of Undergraduate Admissions. Contact ugadmissions@ejb.rutgers.edu for more information.

Transfer students from New Jersey community colleges are encouraged to complete lower-division prerequisite courses and the associate's degree to benefit from the NJ Statewide Transfer Agreement.

Only courses with a 'C' or better may be counted towards the major.

For more information about transferring, please see the school's website at https://bloustein.rutgers.edu/undergraduate/urbanplanninganddesign/#transfer

URBAN PLANNING AND DESIGN MAJOR REQUIREMENTS

(51 credits)

Effective Spring 2024

Prerequisite Courses (3 credits)

- 01:355:101 College Writing (3) or equivalent

Major Requirements (971, 971D) (51 credits)

Core Courses (36 credits)

- 10:775:205 Basic Statistical Methods or equivalent (3-4)
- 10:971:201 Introduction to Urban Planning and Design (3)
  or Environmental Design Analysis (3)
- 10:971:202 Designing Healthy Cities (3)
- 10:971:250 Introduction to GIS (3)
- 10:971:314 Graphic Communication for Planning (3)
- 10:971:315 Fundamentals of Urban Planning & Design (3)
- 10:971:316 Introduction to Site Planning and Urban Design (3)
- 10:971:318 History and Theory of Urban Planning & Design (3)
- 10:971:395 Methods of Planning Analysis (3)
- 10:971:403 Advanced Graphic Communication (3)
- 10:971:404 Planning and Design Studio I (3)
- 10:971:405 Planning and Design Studio II (3)
- 10:971:463 Environmental Law and Policy (3)

Required Electives (15 credits)

- Five, 3-credit courses see approved list in¿Degree Navigator

Joint BA/MCRP or BS/MCRP Program

Exceptional, well-prepared students from any Rutgers University-New Brunswick matriculating unit with a GPA of 3.5 or higher, exceptional GRE scores, a dedication to public service and outstanding recommendations who wish to study urban planning are encouraged to seek advising about the 3-1-1 master of city and regional planning (M.C.R.P.) program. Contact ugadmissions@ejb.rutgers.edu for more information.

Urban Planning & Design Minor (18 credits)

The Bloustein School welcomes current and prospective Rutgers-New Brunswick students to consider the Planning and Public Policy minor. Students should declare a minor with their matriculating school. They need not apply for minor status with the Bloustein School. Only courses with a grade of 'C' or better can be counted toward the minor program of study.

This minor is well-matched to majors in art history; civil engineering; environmental science; public health; geography; landscape architecture; sociology; and more.

Students seeking the urban planning and design minor must complete three core courses and three 300-level or higher 971 electives, excluding those designated for 'majors only'.

- 10:971:201 Introduction to Urban Planning and Design (3)

- 10:971:202 Designing Healthy Cities (3)
- 10:971:314 Graphic communication for Planners (3)
- 10:971:315 Fundamentals of Urban Planning and Design (3)
- Three upper-level 971 (or substituted upper-level 762) electives, as above (9)

For the most current configuration of courses for the Urban Planning and Design minor, please see the school's website at https://bloustein.rutgers.edu/undergraduate/urbanplanninganddesign/#minor

Urban Studies Minor (EJB-U)

URBAN STUDIES MINOR

The 18-credit Urban Studies (975) minor is well matched to majors in sociology, economics, labor studies and employment relations, political science, social justice, geography, psychology, ethnic studies, public health, and urban planning and design, as well as the pre-law track

Students seeking the Urban Studies minor must complete one core course and five elective courses, four of which must be 300-level or higher, excluding those designated for 'majors only'.

- 10:975:101 Introduction to Urban Studies (3)
- Five electives

For the most current configuration of courses for the Urban Studies minor, please see the school's website at https://bloustein.rutgers.edu/undergraduate/urbanstudies/

Art 080 (MGSA)

ART 080

(See also Art History 082)

Department of Art & Design, Mason Gross School of the Arts

See the Mason Gross School of the Arts section for faculty listing and bachelor of fine arts (B.F.A.) program information.

The bachelor of arts (B.A.) program in art provides students the opportunity to explore the techniques, processes, materials, places, events, and images that are the basis for creative work. The program offers a curriculum that seeks to develop professional skills as well as an understanding of the cultural and social implications of art. All B.A. students begin with the same foundation studio curriculum as those in the B.F.A. Track. These courses are designed to familiarize students with core concepts and basic skills in preparation for a rigorous studio practice. The course's emphasis is on the study of drawing, color, and composition, as well as time and screen-based contemporary art practices. Beyond the foundations level, the B.A. art program offers studio and critical study courses. Studio courses

focus on the mastery of skills within specialized media such as sculpture, drawing, painting, design, media, photography, and print. Critical studies courses focus on art in relation to social, environmental, psychological, and philosophical systems. This focus provides a basis for understanding the position of the artist in the modern world.

Art 080 (MGSA)

Major Requirements: B.A. Program

Major Requirements: B.A. Program

Art majors in the bachelor of arts (B.A.) degree program are required to complete a total of 42 credits as follows:

Foundation Courses (28 credits)

Drawing Fundamentals and 4D Fundamentals 121-122 (4,4)

Introduction to Art History 105 and 106 (3,3)

Seminar in Contemporary Art A and B 200-201 (3,3)

Visual Thinking A and B 227-228 (4,4)

Studio Electives (12 credits)

Visual Arts Practice (2 credits Pass/Fail)

Each student plans a cohesive program of study with faculty and staff advisers.

Dual majors and special interdisciplinary degree programs that include those offered through the Department of Art & Design should be arranged through the School of Arts and Sciences and the Art & Design faculty and staff advisers.

Bachelor of arts students who desire to major in art must submit a portfolio and transcripts for review by the Art & Design Evaluation Committee for acceptance into the program. Additionally, students submit a request to declare the art major in myMajor.

Please click here for details.

Art 080 (MGSA)

Courses (081)

Courses (081)

The following bachelor of fine arts (B.F.A.) courses serve as the advanced courses for the bachelor of arts (B.A.) curriculum and are open to all B.A. majors after fundamental requirements have been met.

Note: All but a few of these courses have prerequisites. See Art 081 in the Course Listing chapter in the Mason Gross School of the Arts section of this catalog for prerequisites and course descriptions.

07:081:105 Visual Arts Practice (1-3)

07:081:121 Drawing Fundamentals (4)

07:081:122 4-D Fundamentals: Time and Space (4)

07:081:200-201 Seminar in Contemporary Art A and B (3,3)

07:081:221-222 Drawing I-A and I-B (4,4)

07:081:227 Visual Thinking A: Black and White (4)

07:081:228 Visual Thinking B: Color (4)

07:081:231-232 Design I-A and I-B (4,4)

07:081:243-244 Media I-A and I-B (4,4)

07:081:251-252 Painting I-A and I-B (4,4)

07:081:261-262 Photography I-A and I-B (4,4)

07:081:271-272 Print I-A and I-B (4,4)

07:081:281-282 Sculpture I-A and I-B (4,4)

07:081:303 Seminar in Media (3)

07:081:306 Seminar in Print (3)

07:081:308 Seminar in Design A: History (3)

07:081:310 Seminar in Photography (3)

07:081:313 Ceramics/Sculpture (3)

07:081:317 Seminar in Sculpture (3)

07:081:321-322 Drawing II-A and II-B (4,4)

07:081:324 Figure Drawing (3)

07:081:329 Seminar in Painting (3)

07:081:331-332 Design II-A and II-B (4,4)

07:081:343-344 Media II-A and II-B (4,4)

07:081:351-352 Painting II-A and II-B (4,4)

07:081:361-362 Photography II-A and II-B (4,4)

07:081:371-372 Print II-A and II-B (4,4)

07:081:381-382 Sculpture II-A and II-B (4,4)

07:081:391,392 Independent Study (3,3)

07:081:393,394 Internships (3,3)

07:081:421-422 Drawing III-A and III-B (4,4)

07:081:431-432 Design III-A and III-B (4,4)

07:081:433-434 Advanced Design A and B (4,4)

07:081:441-442 Media III-A and III-B (4,4)

07:081:446-447 Advanced Media A and B (4,4)

07:081:451-452 Painting III-A and III-B (4,4)

07:081:453-454 Advanced Painting A and B (4,4)

07:081:455-456 Advanced Drawing A and B (4,4)

07:081:461-462 Photography III-A and III-B (4,4)

07:081:463-464 Advanced Photography A and B (4,4)

07:081:471-472 Print III-A and III-B (4,4)

07:081:473-474 Advanced Print A and B (4,4)

07:081:481-482 Sculpture III-A and III-B (4,4)

07:081:483-484 Advanced Sculpture A and B (4,4)

07:081:491-492 Independent Study (3,3)

07:081:493,494 Internships (3,3)

Yael Zerubavel, Jewish Studies; Ph.D., Pennsylvania

Women's, Gender, and Sexuality Studies has a rich history at Rutgers University. Inaugurated as a department in 2001, Women's, Gender, and Sexuality Studies has grown from offering a few courses at the university in 1973 to becoming one of the strongest interdisciplinary graduate and undergraduate programs in the United States.

At the undergraduate level, we offer a major (women's, gender, and sexuality studies) and four minors (women's, gender, and sexuality studies; critical sexualities; social justice; and gender and media). We have developed each of these minors to introduce pathbreaking research that addresses concerns of particular interdisciplinary constituencies. Reflecting the fundamental commitments of feminist pedagogy, our major and minors provide students with critical tools to engage the challenges of contemporary life and to work toward social transformation and social justice. Annually we teach approximately 4,000 undergraduate students and over 200 graduate students enrolled in courses offered by the department.

Women's, Gender, and Sexuality Studies 988 (SAS)

Learning Goals

Learning Goals

The curriculum of the Department of Women's, Gender, and Sexuality Studies is centered around the following learning goals:

- Understand and critique the formation of categories of gender and sexuality as they function in social, economic, cultural, and/or political contexts and as they intersect with other categories of difference such as race and ethnicity.
- Communicate effectively using gender analytics as a tool for academic research, for creative production, for collaborative work, and/or for practices of social change.
- Know the complexity and variety of differently gendered lives and livelihoods around the globe.
- Recognize stereotypes and the naturalization of hierarchies of difference through analyzing power dynamics from the micro to the macro level.
- Identify the politics of issue framing and knowledge production.

Honors students (10-15 percent) will complete independent research and present it to a public audience.

Women's, Gender, and Sexuality Studies 988 (SAS)

Major Requirements

Major Requirements

Students are required to complete 12, 3-credit courses (with a grade of C or better) in the major, for a total of 36 credits.

18 credits must be in required 988 courses, and 18 credits must be in elective 988 courses or in approved cognate courses from other departments.

I. 988:101 Introduction to Gender, Race, and Sexuality (3 credits)
or
988:130 Knowledge and Power (3 credits)

II. 988:201 Feminist Practices (3 credits)
or
988:284 Feminist Knowledge Production¿¿(3 credits)

III. 01:988:301 Feminist Theory: Historical Perspectives (3)
(Prerequisites: 01:988:101, 201, 202, or 235, or by special permission)
or
01:988:302 Feminist Theory: Contemporary Engagements (3)
(Prerequisites: 01:988:101, 201, 202, or 235, or by special permission)

IV. 01:988:303 Global Feminisms (3)
(Prerequisites: 01:988:101, 130, 201, 202, or 235, or by special permission)
or
One approved WGSS Transnational Feminism Course
Approved WGSS courses that focus on transnational feminisms
01:888:338 Transnational Sexualities
01:988:270 War: Critical Perspectives
01:988:310 South Asian Feminism
01:988:312 African Feminism
01:988:337 Globalization, Sex, and Families
01:988:405 Gender and Human Rights
01:988:407 Women's Global Health Movements
01:988:408 Impacts of Economic Inequality on Women's Health
01:988:409 The Growth Imperative, Global Ecology, and Women's Health
01:988:410 Debt, Crisis, and Women's Health
01:988:411 Gendered Health Impacts of Structural Adjustment Programs
01:988:412 Health Consequences of Global Trade in Food Commodities
01:988:413 Health Consequences in the Global Trade in Pharmaceuticals
01:988:414 Gendered Professions and the Transnational Care Economy
01:988:416 Women's Global Health: Special Topics
01:988:447 Gender-Based Violence as Human Rights Violations: Histories and Trajectories (3)
01:988:486 Gender, Development, Environment: Policies, Politics, Perspectives

V. 988:235 Dynamics of Class, Race, and Sex (3 credits)
or
One approved WGSS Intersectionality Course

VI. Internship (988:422 or 988:426) or Senior Seminar (988:490) or 400-level special topics (988:491 or 988:492) or Honors Seminar (988:497 or 988:498)

VII. 6 elective courses
At least 4 approved electives must be 300 level or above

Women's, Gender, and Sexuality Studies 988 (SAS)

Minor Requirements

Minor Requirements

Students are required to complete six 3-credit courses (with a grade of C or better) in the minor, for a total of 18 credits.

01:988:101 Introduction to Gender, Race, and Sexuality (3)
or
988:130 Knowledge & Power (3)
or
01:988:201 Feminist Practices (3)
or
01:988:202 Gender, Culture, and Representation (3)
or
01:988:235 Dynamics of Race, Class, Sex (3)
01:988:301 Feminist Theory: Historical Provocations (3)
(Prerequisites: 01:988:101, 130, 201, 202, or 235, or by special permission)
or
01:988:302 Feminist Theory: Contemporary Engagements (3)
(Prerequisites: 01:988:101, 130, 201, 202, or 235, or by special permission)
or
01:988:303 Global Feminisms (3)
(Prerequisites: 01:988:101, 130, 201, 202, or 235, or by special permission)

Four women's, gender, and sexuality studies electives

Elective courses chosen from either the women's, gender, and sexuality studies core course list or the approved cognate course list or other courses approved by a program adviser, at least one of which must have race, class, or sexuality at its center. Of the four elective courses, not more than two can be from the same department. At least one elective must be at the 300 level and one at the 400 level.

Note that only a few select courses are available each semester. You may also obtain a list from the department.

Women's, Gender, and Sexuality Studies 988 (SAS)

Honors in Women's, Gender, and Sexuality Studies

Honors in Women's, Gender, and Sexuality Studies

Honors in Women's, Gender, and Sexuality Studies

Women's, gender, and sexuality studies majors may petition to obtain honors if they have an overall cumulative grade-point average of 3.0 or better and a 3.4 average or better in women's, gender, and sexuality studies courses at the end of their junior year.

Candidates are required to write an honors thesis of 75-100 pages on a topic related to women's, gender, and sexuality studies; participate in a 6-credit yearlong honors research seminar (01:988:497,498); and orally present the completed thesis to the Rutgers community at the end of the year.

Thesis

The thesis, though grounded in a discussion of what other scholars have written about the topic in question, should be based on the student's original research. Each student will work with at least two faculty advisers in developing his or her project: a primary adviser with expertise in the student's particular field of research and the instructor of the honors research seminar, who will serve as a second adviser.

Seminar

The purpose of the honors research seminar is to establish a feminist learning community that will support each student's project. In seminar meetings, students will explore issues in the production of feminist knowledge production as well as read and critique each others' work. In addition to the seminar, we strongly suggest you take Critical Feminist Investigation (01:988:370), but this is not required.

Presentation

Students will give an oral presentation of their honors thesis before students, faculty, and staff in the Department of Women's, Gender, and Sexuality Studies and other invited guests in mid- to late April.

National Honor Society - IOTA IOTA IOTA

In April 2018, the Department of Women's, Gender, and Sexuality Studies was recognized as the Epsilon Beta Chapter of the National Women's and Gender Studies Honor Society Iota, Iota, Iota.

Iota Iota Iota (Triota) is a National Women's Studies Honor Society with over 50 chapters nationwide. The Greek letter, iota, was selected for the name to represent the three goddesses Inanna, Ishtar, and Isis. Iota Iota Iota strives to maintain the feminist values central to women's studies and encourage diversity, egalitarianism, and a supportive academic environment for all students.

The purpose of Triota is to promote interest in women's studies and research in social problems affecting all women. This society also encourages volunteerism, advocacy, and activism within the community as important methods for promoting and maintaining the feminist values central to women's studies.

Requirements:

- Second-semester sophomore, junior, or senior
- Have taken five women's, gender, and sexuality studies courses (including cross-listed courses),
- Overall GPA of 3.0 or above and minimum GPA of 3.3 in women's, gender, and sexuality studies courses

If you meet these requirements, please complete the application. You can find it here: https://womens-studies.rutgers.edu/images/Forms/Rutgers_WGS_IOTA_Membership_Form__4bf37.pdf.

Return the completed form to undergraduate director Kyla Schuller at upd@womenstudies.rutgers.edu.

Women's, Gender, and Sexuality Studies 988 (SAS)

Institute for Women's Leadership (IWL) Scholars Certificate Program

Institute for Women's Leadership (IWL) Scholars Certificate Program

The Leadership Scholars program is a two-year selective, interdisciplinary certificate program of the Institute for Women's Leadership (IWL) that prepares Rutgers undergraduates to be informed, innovative, and socially responsible leaders.

IWL Leadership Scholars explore women's leadership and contributions to social change in contexts that range from politics and government, law and advocacy, business and communications, media and the arts. IWL Leadership Scholars examine how different institutions inform our understanding and practice of leadership and how they encourage--or inhibit--civic innovation.

Women's, Gender, and Sexuality Studies 988 (SAS)

Online Certificate Program in Women's Global Health Leadership

Online Certificate Program in Women's Global Health Leadership

The Department of Women's, Gender, and Sexuality Studies has developed an innovative online Certificate Program in Women's Global Health Leadership in collaboration with the Institute for Women's Leadership (IWL) and National Nurses United (NNU), the largest nurses' union in the United States. This certificate program capitalizes on the expertise of the women's, gender, and sexuality studies faculty in the science and health studies, and the commitment of the IWL Consortium to foster women's leadership in all aspects of human endeavor, to provide a series of courses that addresses some of the most pressing issues on the global agenda. The certificate program also draws on the expertise of National Nurses United, which has been at the forefront in championing a comprehensive approach to women's health and preparing nurses in the United States to serve the health needs of women, families, and communities in all regions of the world.

Required Courses (students must take both/6 credits):
01:988:407 Global Women's Health Movements
01:988:408 Gender, Economic Inequality, and Health

Elective Courses (students must take three/9 credits):
01:988:409 Gender, Environmental Justice, and Health
01:988:410 Debt, Crisis, and Women's Health

01:988:412 Global Food Politics: Health Consequences
01:988:413 The Global Pharmaceutical Economy and Health
01:988:414 Care Work

Women's, Gender, and Sexuality Studies 988 (SAS)

Approved Cognate Courses

Approved Cognate Courses

The women's, gender, and sexuality studies program accepts certain courses offered by other departments as cognate courses, which may be counted toward the women's, gender, and sexuality studies major or minor. These courses are cross-listed below. The courses in this cross-listing have counterparts offered by the women's, gender, and sexuality studies program that *utilize the same last three digits of the course number as the cross-listed course*, but with the women's, gender, and sexuality studies school/subject code designation of 01:988. (For example, course 01:014:206, an Africana studies course, also is offered by the women's, gender, and sexuality studies program as course 01:988:206.)

There are 31 courses that do not follow this pattern, cross-referenced as follows:

01:013:430 = 01:988:431

01:014:481 = 01:988:483

01:050:344 = 01:988:315

01:070:324 = 01:988:337

01:354:385 = 01:988:376

01:358:261 = 01:988:265

01:358:307 = 01:988:388

01:358:327 = 01:988:382

01:358:337 = 01:988:383

01:358:348 = 01:988:385

01:358:362 = 01:988:384

01:358:379 = 01:988:366

01:358:395 = 01:988:353

01:358:396 = 01:988:357

01:359:330 = 01:988:346

01:359:335 = 01:988:340

01:359:336 = 01:988:364

01:359:435 = 01:988:495

01:450:361 = 01:988:367

01:470:384 = 01:988:391

01:508:307 = 01:988:308

01:512:381 = 01:988:390

01:563:323 = 01:988:314

01:563:384 = 01:988:391

01:595:323 = 01:988:328

01:790:335 = 01:988:336

01:790:426 = 01:988:428

01:840:350 = 01:988:343

01:840:351 = 01:988:349

01:840:360 = 01:988:361

01:840:361 = 01:988:314

Full course descriptions for all cross-listed courses can be found under the appropriate originating department's subject code listing. Credit is ***not given*** for both a women's, gender, and sexuality studies course (01:988:) and its corresponding cross-listed course.

01:013:232 or 01:195:232 Women Writers of South Asia (3) (01:988:232)

01:013:430 or 01:195:430 Gender, Nation, and Literature in South Asia (3) (01:988:431)

01:014:206 The Black Woman (3) (01:988:206)

01:014:306 The Black Woman in Political Context (3) (01:988:306)

01:014:481 The Black Family (3) (01:988:483)

37:575:309 Working Women in American Society (3) (01:988:309)

37:575:335 Women and Labor Movements: A Global Perspective (3)

Courses

Courses

01:988:101 ***Introduction to Gender, Race, and Sexuality (3)***
Introductory survey examining key concepts and themes in women's and gender studies, including: body image and media, class, feminisms, gender/sex, globalization and neoliberalism, intersectionality, patriarchy and privilege, race, reproductive justice, sexuality and queer theory, social justice and human rights, violence, conflict, and terrorism.

01:988:130 ***Knowledge and Power: Issues in Women's Leadership (3)***
Study of gender, in the construction of knowledge in different fields, and the factors that encourage women to achieve agency and leadership.

01:988:160 ***Women in the Global Economy: Feminist Perspectives (3)***
This course examines issues related to women's paid and unpaid work as world markets integrate. Analyzes actions of governments, unions, women's movements, employers, and nongovernmental organizations (NGOs) to promote equality and women's well-being.

01:988:201 ***Feminist Practices (3)***
Examines development of women's and gender studies as interdisciplinary field of study; explores relationship of feminist scholarship to activism; introduces students to basic research techniques.
Required for major.

01:988:202 ***Gender, Culture, and Representation (3)***
Examines how gender is represented in cultural texts and artifacts; introduces students to theories of representation.

01:988:221 ***Breaking the Glass Ceiling: Women Religious Leaders (3)***
Interdisciplinary approach to analyzing women's religious leadership in Judaism, Christianity, and Islam. Ethnographic case studies of religious communities. Topics include: strategies that preclude women from leadership; informal and formal leadership for women; differences across traditions; feminism; Internet and religious authority. Readings, films, discussions, interviews with female religious leaders.

Credit not given for both this course and 01:070:284 or 01:563:224.

01:988:235 ***Dynamics of Class, Race, and Sex (3)***
Examination of dynamics of, and connections among, classism, racism, and sexism in contemporary American society; ways they influence and are influenced by the structure of society at large; their effect on individuals; and strategies for personal and social change.

01:988:240 ***Gender and Science (3)***
Role of gender, race, and class in production and use of scientific and medical knowledge. Impact of gender bias on research in the life, physical, and social sciences.

01:988:250 ***Feminist Perspectives (3)***
Feminist examination of significant contemporary issues. The issue chosen will vary each year. Students should check the department's website for information. Issues to be considered include war, trafficking, poverty, environment, migration, globalization, and religion.

01:988:252 ***Mentoring, Leadership, and Young Women's Lives (3)***
Feminist theory, model, and practice of mentoring. Topics include definitions and history of mentoring; personal narratives and mentoring practices; and mentoring women's leadership for social change.

01:988:255 ***Gender, Art, and Society (3)***
Women artists, their achievements, and impact. Social and cultural reasons for their neglect in the visual arts and how that neglect is being remedied today. Different ways in which men and women are depicted in art and how those differences relate to culture and society.
Please note that this is an online course.

01:988:257 ***Gender and the Body: Representation and Pornography (3)***
Examination of representations of gendered bodies in art, sexuality, gender, politics, and pornography. Examines how to understand who defines what is obscene and why some work is called pornography.

01:988:258 ***Gender, Race, and Contemporary Art (3)***
Intersection of gender and race in contemporary American art. Black and white racial politics in relation to gender and contemporary art in the United States. Special focus on African-American artists.

01:988:259 ***Homosexuality and Visual Culture (3)***
Central role of homosexuality and homoeroticism in visual culture in the distant and recent past as well as the present. Marginalization of homosexual artists, critics, and patrons despite direct participation in cultural production of art and popular culture.

01:988:260 ***The Modern Girl (3)***
Examines the so-called "modern girl" of the 1920s and 1930s. Representations in fiction, film, and advertisements. Concentrates on the West, with comparative evidence from Asia and Africa.
Credit not given for both this course and 01:506:215.

01:988:261 ***Resisting Petrocapitalism: Oceanians against Climate Collapse (3)***
Analysis of how literary works of the Pacific Islands' Indigenous activists across Oceania denounce the entanglement of capitalism, imperialism, and environmental crises and use their strategic position at the heart of the global fluxes of oil, goods, and capital transiting between Asia and North America to challenge petrocapitalism and the military industrial complex protecting it.

Credit not given for both this course and 01:195:271.

01:988:270 ***War: Critical Perspectives (3)***
Critical examination of the nature, functions, and effects of war with particular attention to racialized and gendered dynamics of militarization, terrorism, counterterrorism, and genocide.
Credit not given for both this course and 01:920:273.

01:988:280 ***Introduction to Critical Study of Masculinities (3)***
Interdisciplinary and comparative introduction to the study of masculinities in the United States. Includes social history, and analyses of contemporary national and international contexts.

01:888:285 ***Lesbians and Gay Men and Society (3)***
Introduction to various disciplines' contributions to understanding the relationship of homosexuality, particularly lesbianism, to society. Includes a section on the political organization and recent theory coming out of the gay movement.

01:888:290 ***Introduction to Critical Sexualities (3)***
Introduction to the study of sexuality as well as sexual and gendered identity from multidisciplinary and historical perspectives. Includes U.S. and European approaches to sexology, legal regulation of sexual practices, and family formation.

01:988:295 ***Reilly BOLD Professional Development (1)***
Professional development curriculum to accompany the Reilly BOLD at Douglass externships, advancing career preparation of Douglass women. Students will develop an understanding of new trends in leadership and other business concepts; and identify measures to sustain diversity, equity, and inclusion for women in the workplace. Some key concepts that will be covered include bias in the workplace, salary negotiation, the gender pay gap, mentoring and sponsorship, and future of work for women.

DRC students only, SPN required

01:988:299 ***Mentoring Leadership and Practice (3)***
Explores meaning of women's leadership, knowledge, and power through the mentor experience. Topics include how gender shapes knowledge and power; the challenges women's colleges present to orthodox conceptions of leadership; and practical and theoretical applications of feminist pedagogies.

01:988:301 ***Feminist Theory: Historical Perspectives (3)***
Introduction to feminist theories about women, sex, gender, sexuality, embodiment, politics, social relations; examination of feminist theories' challenge to Western literary, philosophical, and scientific traditions.
Prerequisite: 01:988:101 or 130 or 201 or 202 or 235 or by special permission.

01:988:302 ***Feminist Theory: Contemporary Engagements (3)***
Introduction to basic concepts central to contemporary feminist thought; exploration of the critical, productive relationship between feminist and patriarchal theory.
Prerequisite: 01:988:101 or 130 or 201 or 202 or 235 or by special permission.

01:988:303 ***Comparative Feminisms (3)***
Compares the development of feminist writing in several historical periods across different cultures.
Prerequisite: 01:988:101 or 130 or 201 or 202 or 235 or by special permission.

01:988:307 ***Women and the Law (3)***
Areas of law that regulate the position of women, including birth control, abortion, marriage, alimony, child support and custody, child care, education, employment, criminal law (including rape, prostitution, women in prison, and the juvenile justice system), and constitutional rights. Readings in court decisions, statutes, and supplementary materials.

01:988:310 ***South Asian Feminism (3)***
Women's activism in South Asia in autonomous feminist movements, as participants in organized political movements, and in family and community.

01:988:311 ***Gender, Race, and Visual Media (3)***
Examines visual culture, especially Hollywood cinema and television, in light of the economic structure of neoliberalism. Race, gender, and sexuality as sites of power; visual texts; connections between culture and politics.

01:988:312 ***African Feminism (3)***
What feminism means to Africa; how gender affects female socialization, women as state subjects; how diverse African feminist strategies differ from and/or parallel other feminisms.
Prerequisite: 01:988:101 or 235. Credit not given for both this course and 01:016:312.

01:988:313 ***Gender and Sexuality in Modern France and the Francophone World (3)***
An introduction to the tools and principles to retrieve, tidy, clean, and visualize data in preparation for statistical analysis. The R statistical environment is used but no prior knowledge is required. Interactions with databases will be included.

Credit not given for this course and 01:420:313. Taught in English.

01:988:317 ***Gender and Consumption (3)***
Introduces feminist approaches to consumption through readings that examine the relation of consumption to body, race, nation, and sex work.
Prerequisite: 01:988:101 or 201 or 235 or permission of instructor.

01:988:318 ***The Gendered Body (3)***
Explores the processes by which the body is gendered in different cultures. How is the relationship between physical body, gender, and sexuality forged?

01:888:321 ***Queer Contexts: Same-Sex Desire, Culture, and Representation (3)***
Cultural construction and representation of same-sex desire in Western societies. Debates about identity, subjectivity, and the uses of experience included.

01:988:325 ***Women on the Fringe: Perceptions of Women as Social and Sex-Role Deviants in American Civilization (3)***
Societal reaction to female behavior deviating from social and feminine norms. Use of historical narratives, literature, and film to treat such themes as heresy, madness, prostitution, adultery, criminality, political protest, and lesbianism.
Credit not given for both this course and 01:050:325.

01:988:326 ***Psychology of Women (3)***
Evaluation of some major psychological conceptualizations of women in light of current research. Bases for these formulations and their influence on the position of women today.
Credit not given for both this course and 01:830:381.

01:988:329 ***History of Race and Sex in America (3)***
Examines how race and gender have independently and jointly determined life chances throughout American history.
Credit not given for both this course and 01:014:366 and 01:512:366.

01:988:330 ***Memoir and Autobiography (3)***
Reading of several women's memoirs, all written within the last 50 years; some by "famous" and some by "ordinary" women.

01:988:331 ***Theorizing Sexuality and Gender (3)***
Examines how sexuality and gender became meaningful categories in Western culture through the emergence of sexual politics and queer theory.

01:988:332 ***The Color of AIDS: The Politics of Race During the AIDS Crisis (3)***
Focuses on AIDS crisis, explores relationships between illness, race, ethnicity, and gender in health policy, research, and care for communities of color.

01:988:333 ***Power, Subjectivity, and Resistance (3)***
Examines development of feminist concepts of power and the relations between feminist and patriarchal theories.

01:988:337 ***Globalization, Sex, and Families (3)***
Transnational intimacies, travel, and migration. Case studies of transnational adoption, marriage, sex work, and domestic work. Larger contexts of globalization and impact on families and sexual relations.
Prerequisite: 01:070:101 or 01:988:101 or permission of instructor. Credit not given for both this course and 01:070:324.

01:888:338 ***Transnational Sexualities (3)***
Considers how globalization alters conceptualizations of sexuality and its relationship to gender. Issues include global, diasporic, and postcolonial gay, lesbian, bisexual, and transgender activism, tourism and travel, HIV/AIDS organization, "sexual rights" discourses, sex work, and asylum based on gender and sexual orientation.

01:988:341 ***Gender and Popular Culture (3)***
Use of varied theoretical approaches to examine how popular culture texts shape everyday perceptions of race, gender, family, and nation. Texts include film, television, and radio.
Prerequisite: 01:988:101 or 201 or 235 or permission of instructor.

01:988:344 ***Women and Leadership (3)***
Course explores women's leadership for social change at work, in politics, communities, and the household in a variety of historical and contemporary meetings.
Prerequisites: By special permission of instructor. Students for this course must have applied and been accepted into the IWL Leadership Scholars Program.

01:988:350 ***Gender and Spirituality (3)***
Class explores women's spirituality, feminist theology, and spiritual systems from around the world. How are spiritual systems and practices gendered?

01:988:368 ***Producing Identities: Race, Gender, Class, and Sexualities (3)***
Social constitution of the self and communities through emergence and transformation of concepts and categories (race, gender, ethnicity, and sexuality) associated with personal identity.

01:988:369 ***Feminism, Space, and Visuality (3)***
Examines how space and vision have been associated with historically developed concepts of femininity and masculinity.

01:988:370 ***Critical Feminist Investigation (3)***
Introduces modes of knowledge production, research methods, and strategies for interdisciplinary feminist scholarship.
Required for students pursuing honors in women's, gender, and sexuality studies.

01:988:371 ***Making Change (3)***
In-depth analysis of different ways women have organized for change. Focus on three or four case studies using cross-cultural perspectives to illustrate various themes of gender and collective action by women.
Credit not given for both this course and 01:560:313.

01:988:372 ***Contemporary Feminist Activism (3)***
Autonomous women's movements in the 20th and 21st centuries. Select case studies illustrate themes of gender and collective action.
Credit not given for both this course and 01:506:314.

01:988:387 ***Feminism, Signs, and Representation (3)***
Introduces major theories in contemporary critical theory including structuralism, recent critiques of structuralism. Focuses on the models and criteria to analyze cultural and social life.

01:988:392 ***Thinking Bodies (3)***
Examines work of theorists questioning the subordination of body to mind in modern Western thought.

01:988:394 ***Black Women in the United States (3)***
Examines cultural stereotypes; political, economic, and social challenges confronting black women in the United States; and strategies of resistance developed by black women.
Prerequisite: 01:988:101 or 235 or by permission.

01:988:395 ***Race, Gender, Media, and the Law (3)***
Considers relationship between gender, law, and race in contemporary popular and political culture. Addresses impact of rise in televised court cases on perceptions of legal system and in stimulating public debates about justice.
Prerequisite: 01:988:101 or 201 or 202 or 235.

01:988:396 ***Topics in Women's and Gender Studies (3)***
Selected topics in women's and gender studies. Topics vary each semester. Consult department.

01:988:397 ***Freud and Feminism: Sexuality (3)***
Introduces Freudian concepts, methods and terminology, and the corresponding issues and debates in feminist theory.

01:988:398 ***Freud and Feminism: The Unconscious (3)***
Examines Freud's account of the unconscious and its relevance to theories of subjectivity, especially to feminist theory and antiracist theory.

01:988:399 ***CESEP (1)***
Community service placement in women's and gender studies.
Corequisite: Must be taken in conjunction with a designated CESEP (Civic Engagement and Service Education Partnerships) course offered in the women's, gender, and sexuality studies program.

01:988:405 ***Gender and Human Rights (3)***
Examines history and discourse of women's human rights; uses of humanitarian law in wartime; issues of gender-based violence, health, and sexuality.
Prerequisite: 01:988:101 or 235 or permission of instructor.

01:988:406 ***Women, Work, and Social Change (3)***
Study of problems faced by women working in industry, unions, the home, and professions in light of modern agitation and social trends; analysis of sex-differentiated occupations, legislation, and service roles with attention to biological, psychological, and social differences between the sexes.

01:988:407 ***Women's Global Health Movements (3)***
Politics and structure of global women's health movements. Relationship between health and phenomena such as international politics, globalization, economic policy, and conflict and war.

01:988:408 ***Gender, Economic Inequality, and Health (3)***
Fully online. Examines how resource distribution shapes health risk, access to health care, and clinical outcomes. Relationship of gender, class, race, sexuality, and nation to health.

01:988:409 ***Gender, Environmental Justice, and Health (3)***
Fully online. Examines women's health in relationship to contradictions between capitalist growth and resource exhaustion. Health consequences of environmental crises linked to new markets and technologies.

01:988:410 ***Debt, Crisis, and Women's Health (3)***
Explores relationship between debt and economic crisis; examines impact of austerity policies on women's health in various nations.

01:988:411 ***Gendered Health Impacts of Structural Adjustment Programs (3)***
Compares global impact of World Bank and International Monetary Fund aid to developing countries. Investigates impact of cuts in public services on women's health.

01:988:412 ***Global Food Politics: Health Consequences (3)***
Fully online. Investigates shifting modes of food production, distribution, diet, and health. Compares consequences of changes for women in global North with women in global South.

01:988:413 ***The Global Pharmaceutical Economy and Health (3)***
Fully online. Explores aspects of pharmaceutical industry. Analyzes burdens and benefits of drug research and development on different populations.

01:988:414 ***Care Work (3)***
Fully online. Overview of "care economy." Explores recent efforts to heighten its profit-making potential; considers long-term implications of efforts to deskill and outsource care work.

01:988:416 ***Women's Global Health: Special Topics (3)***
Topic varies with instructor. The requirements for the course would be the equivalent of any 400-level course in the department.

01:988:420,421 ***Women's Global Health Internship (3,3)***
RN Response Network provides medical assistance in the context of natural disasters wherever they may occur. This internship placement involves 150-180 hours of professional work with RN Response Network in conjunction with a research paper that links this professional experience with relevant academic work on humanitarian intervention.

01:988:422 ***Internship in Women's and Gender Studies (3)***
Students work in organizations related to women's and gender studies. Supervision by assigned staff at the placement. Paper, student journal, and assessment of work performed at placement required.
Permission of undergraduate director required.

01:988:425 ***Internship in Women's and Gender Studies (6)***
Interns work in organizations related to women's and gender studies. Supervision by assigned staff at the placement site. Seminar, student journal, paper, and assessment of work experience required.
Prerequisite: 01:988:301 or 302 or 303. Permission of undergraduate director required.

01:988:426 ***Internship for IWL Scholars (BA)***
Examination of women, community activism, and leadership for change; explores how women's leadership shapes organizations, social movements, and policy development. Interns work in placements relevant to their policy interests and produce proposals for social action projects.
Prerequisites: Acceptance into IWL Leadership Scholars Program and 01:988:344, or by permission of instructor.

01:988:429 ***Engendering Development (3)***
Examines gender differences in economic opportunity, human rights, and political representation across developing countries.
Prerequisite: 01:988:101 or 235 or 301.

01:988:430 ***IWL Social Action Project (BA)***
Independent action projects designed to address a particular problem or women's policy issue relevant to the work done at the internship site. Projects include gender component and development of leadership skills. Class meets biweekly.

01:988:447 ***Gender-Based Violence as Human Rights Violations: Histories and Trajectories (3)***
Grasp key concepts such as structural and interpersonal violence, sexism, heterosexism, heteropatriarchy, privilege and oppression, intersectionality, and decoloniality, through multi-disciplinary perspectives. Explore the histories, presents, and futures of varied movements eradicating gender-based violence across the globe. Develop feminist writing, researching, and reflective and transformative learning and practical skills.

01:988:465 ***The Queering of Theory (3)***
Considers the historical and conceptual events that precipitated the emergence of queer theory.

01:988:480 ***Ethics and Leadership (3)***
Explores contemporary relations between ethics and politics, between conceptions of leadership and the production of depoliticized masses, between individual values and public beliefs.

01:988:481 *Feminism and Visual Culture (3)*
Examines the history of cultural contexts of visual narratives that address gender and sexuality and their influence on cultural policies.
Prerequisite: 01:988:101 or 201 or 202 or 235 or permission of instructor.

01:988:482 *Feminism, Policy, and the Poor (3)*
Explores the contributions of feminist analysis, advocacy, and policy making to antipoverty policy and social justice politics.
Prerequisite: 01:988:101 or 201 or 202 or 235 or permission of instructor. Fulfills capstone requirement for IWL Leadership Scholars Certificate.

01:988:485 *Motherhood: Nature and Culture, Policy, and Politics (3)*
Investigates how motherhood is shaped by intentional public policies and social, economic, political, and cultural forces in the United States and globally.
Prerequisite: 01:988:101 or 201 or 202 or 235 or permission of instructor. Fulfills capstone requirement for IWL Leadership Scholars Certificate.

01:988:486 *Gender, Development, Environment: Policies, Politics, Perspectives (3)*
Using ethnography and gender as a category of analysis, examines the experiences and implications of transnational development and environmental policies in specific localities.
Prerequisite: 01:988:101 or 201 or 202 or 235 or permission of instructor. Credit not given for both this course and 01:070:486. Course fulfills the capstone requirement for the IWL Leadership Scholars Certificate.

01:988:487 *Language of Women's Health and Health Policy (3)*
Examines the creation of narratives of women's health and health policy; through visits from health care experts, considers the impact of these narratives on practice.
Prerequisite: 01:988:101 or 201 or 202 or 235 or permission of instructor. Fulfills the capstone requirement for the IWL Leadership Scholars Certificate.

01:988:490 *Seminar: Women and Contemporary Issues (3)*
Intensive reading and discussion; designed for graduating seniors. Topic changes annually.
Prerequisite: 01:988:301 or 302 or 303 or by permission of instructor.

01:988:491 *Seminar in Women's and Gender Studies (3)*
Advanced course on a selected topic in women's and gender studies. Paper is required.
Prerequisite: 01:988:301 or 302 or 303 or by permission of instructor.

01:988:492 *Seminar: Special Topics in Women's and Gender Studies (3)*
Selected interdisciplinary topics in women's and gender studies. Past topics included sexuality, popular culture, women and religion, and women and the arts.
Prerequisite: 01:988:301 or 302 or 303 or by permission of instructor. Open to junior and senior majors and minors; others with instructor's permission.

01:988:493,494 *Independent Study (3,3)*
Independent study project under the guidance of a faculty supervisor.
Permission of associate director required.

01:988:497-498 ***Honors Research in Women's and Gender Studies (3,3)***
Individual research project to be written as honors thesis.
Open only to seniors who are candidates for honors in women's and gender studies. Permission of undergraduate director required. Both semesters required.

World Language Proficiency Certificates (SAS)

WORLD LANGUAGE PROFICIENCY CERTIFICATES

Several of the world language and literature departments (AMESALL, French, German, Italian, Russian, and Spanish) award a certificate in world language proficiency and/or translation based on demonstrated ability to comprehend, speak, read, and write the world language. The usual requirement is a grade of B or better in 6 credits of work taken in courses at or above the 300 level conducted entirely in the world language. Individual departments may specify particular courses or examinations to be completed in demonstrating this standard. For further information, consult the appropriate world language department.

Note: The world language proficiency certificates are awarded only with or subsequent to the awarding of a baccalaureate degree in an approved major.

History and Aims of the School (SAS)

HISTORY AND AIMS OF THE SCHOOL

School of Arts and Sciences

Websites: sas.rutgers.edu
sasundergrad.rutgers.edu

The School of Arts and Sciences (SAS) has deep roots at Rutgers University.

Rutgers was founded in 1766 with the mission of providing a classical liberal arts education that at the time included such subjects as Latin, Greek, arithmetic, and geometry.

As it grew from a small colonial college to a major public research university, Rutgers built an expansive liberal arts program while striving to create the ideal setting and structure for undergraduate education.

By the 1970s, four outstanding undergraduate colleges were educating Rutgers¿New Brunswick students: Douglass College, Livingston College, Rutgers College, and University College.

The School of Arts and Sciences was launched in 2007, bringing together the talent, traditions, energy, and resources of all four colleges with a new, unifying vision.

The classical liberal arts education that the first Rutgers students received now finds full expression in the more than 100 majors and minors at SAS, covering the spectrum of life sciences, mathematical and physical sciences, humanities, and social and behavioral sciences.

Today, the School of Arts and Sciences is a diverse, dynamic, and creative community, dedicated to preparing students for meaningful lives and advancing knowledge that improves the world.

Requirements (SAS)

REQUIREMENTS

Requirements (SAS)

Credits and Residency

Credits and Residency

All students must earn at least 120 credits, with a minimum cumulative grade-point average of 2.000. Students should successfully complete 15 degree credits each fall and spring semester, or a total of 30 degree credits a year including Summer Session in order to earn the required 120 credits in four years. Students admitted with placement into noncredit remedial courses and students in majors with rigid sequencing requirements that require certain courses be taken in the first year will need to plan very carefully to complete their baccalaureate requirements in four years of full-time study. The deans and advisors in the SAS Office of Advising and Academic Services can assist in developing an academic plan.

Students matriculated (i.e., registered in pursuit of a degree) at the School of Arts and Sciences (SAS) must earn 30 of their last 42 credits while registered in classes offered by Rutgers University-New Brunswick departments or registered in special programs, such as Study Abroad, approved in writing by the SAS Office of Advising and Academic Services. Students who transfer into SAS from other institutions with senior status must earn a minimum of 30 credits while registered as SAS students in order to receive a bachelor's degree from the school.

Requirements (SAS)

Core Curriculum

Core Curriculum

The School of Arts and Sciences (SAS) requires that all students complete a goal-based Core Curriculum, as well as an approved major and an approved minor. Students who are pursuing an approved credit-intensive major or who are double majoring will have the minor requirement waived.

The distinctive SAS Core Curriculum is structured as a set of core arts and sciences learning goals. All are framed as activities students will be able to do at a foundational level by virtue of meeting the specified core goal. Courses may be counted as meeting up to two learning goals; students generally will complete the core in 10 to 14 courses of 3 or 4 credits each. A course used to meet core goals may also be used to fulfill a major or minor requirement. Only graded degree credit-bearing courses worth at least 3 credits and certified by the SAS faculty may be used to meet core goals. For lists of courses certified as meeting each goal, see https://sasundergrad.rutgers.edu.
SAS Core Curriculum course lists are also available in the Rutgers online degree audit system, Degree Navigator, and each semester the Schedule of Classes is searchable by Core Code.

AREAS OF INQUIRY

CONTEMPORARY CHALLENGES [CCD], [CCO] Students must take two approved courses that meet these goals.

Diversities And Social Inequalities [CCD]

- Analyze the degree to which forms of human differences and stratifications among social groups shape individual and group experiences of, and perspectives on, contemporary issues. Such differences and stratifications may include race, language, religion, ethnicity, country of origin, gender identity, sexual orientation, economic status, abilities, or other social distinctions and their intersections.
- Analyze contemporary social justice issues and unbalanced social power systems.
- **Our Common Future [CCO]** Analyze a contemporary global issue from a multidisciplinary perspective.
- Analyze the relationship that science and technology have to a contemporary social issue.

Natural Sciences [NS] Students must take two approved courses that meet one or both of these goals.

- Understand and apply basic principles and concepts in the physical or biological sciences.
- Explain and be able to assess the relationship among assumptions, method, evidence, arguments, and theory in scientific analysis.

Social and Historical Analysis [HST] [SCL] Students must take two approved courses that meet one or both of these goals.

Historical Analysis [HST] Students must take one approved course that meets one or both of these goals.

- Explain the development of some aspect of a society or culture over time, including the history of ideas or history of science.
- Employ historical reasoning to study human endeavors, using appropriate assumptions, methods, evidence, and arguments.

Social Analysis [SCL] Students must take one approved courses that meets one or both of these goals.

- Understand different theories about human culture, social identity, economic entities, political systems, and other forms of social organization.
- Employ tools of social scientific reasoning to study particular questions or situations, using appropriate assumptions, methods, evidence, and arguments.

Arts and Humanities [AH] Students must take two approved courses that meet one or more of these goals.

- Examine critically philosophical and other theoretical issues concerning the nature of reality, human experience, knowledge, value, and/or cultural production. [AHo]
- Analyze arts and/or literatures in themselves and in relation to specific histories, values, languages, cultures, and technologies. [AHp]
- Understand the nature of human languages and their speakers. [AHq]
- Engage critically in the process of creative expression. [AHr]

COGNITIVE SKILLS AND PROCESSES [WC] [WCr] [WCd]

Writing and Communication [WC] Students must take three approved courses that meet all 5 of these goals, including College Writing 01:355:101 or College Writing Extended 01:355:104; one WCr; and one WCd.

- Communicate complex ideas effectively, in standard written English, to a general audience.
- Respond effectively to editorial feedback from peers, instructors, and/or supervisors through successive drafts and revision. [WCr]
- Communicate effectively in modes appropriate to a discipline or area of inquiry. [WCd]
- Evaluate and critically assess sources and use the conventions of attribution and citation correctly.
- Analyze and synthesize information and ideas from multiple sources to generate new insights.

Students receiving a score of 4 or above on the AP English composition or literature tests, or transferring in an equivalent to College Writing, are exempted from College Writing 01:355:101. For such students the writing and communication goals become a two-course requirement: WCr and WCd.

The Revision-Based Writing and Communication learning goal [WCr] must be fulfilled by taking a class at Rutgers University-New Brunswick; transfer and AP courses are not certified to meet this learning goal.

Quantitative and Formal Reasoning [QQ] [QR] Students must take two approved courses that meet one or more of these goals.

- Formulate, evaluate, and communicate conclusions and inferences from quantitative information. [QQ]
- Apply effective and efficient mathematical or other formal processes to reason and to solve problems. [QR]

Completion of a Major and a Minor

Completion of a Major and a Minor

Students must complete an approved major and an approved minor listed in the Programs of Study chapter in this section. The requirement for a minor may be waived for students completing multiple majors or credit-intensive majors. Students in credit-intensive majors are encouraged to complete a minor, even though they are not required to do so, if their graduation plan can support it.

All students are responsible for consulting with the undergraduate director in the department of their major and of their minor to ensure that they will have fulfilled all requirements by the time of graduation.

Requirements (SAS)

Declaration and Change of Major and Minor

Declaration and Change of Major and Minor

Students are not admitted to the School of Arts and Sciences (SAS) by major. Full-time students normally declare their major in the second semester of their second year, although some majors encourage students to declare even earlier in order to facilitate the planning needed for an appropriate sequence of the courses required to complete the major within four years. Part-time students normally declare their major by the time they have completed 60 credits. Declaration requirements vary by department; some academic departments have prerequisites and/or require approval by a department advisor.

Students who are not able to declare their major by their third year are encouraged to seek advising to ensure timely degree completion.

A list of majors open to SAS students is included under the Programs of Study and Courses for Liberal Arts and Sciences Students in this catalog and online at https://sasundergrad.rutgers.edu. Students are strongly urged to consult with an academic advisor and the specific departments offering the majors they are considering during their first year at SAS. Some majors, including many in the sciences and in world languages, require that courses be sequenced in a particular way, making planning during the first year critical to timely completion of the major.

The major and the minor may not be selected from the same academic program. In general, there are no other SAS restrictions on selection of available majors and minors; however, some combinations are prohibited. Please see the Major/Minor restrictions at https://sasundergrad.rutgers.edu.

Please check the requirements of the specific majors and minors you are considering.

Students are advised to consult Degree Navigator and department webpages for the most up-to-date information on the requirements for majors and minors.

In addition, certain bachelor of arts (B.A.) and bachelor of science (B.S.) majors offered in other Rutgers University-New Brunswick schools may require separate admission. These schools include: the Edward J. Bloustein School of Planning and Public Policy; the School of Communication and Information; the School of Management and Labor Relations, and the School of Social Work. SAS students completing these majors will receive a single bachelor's degree conferred by SAS in conjunction with the cognate professional school.

Prospective applicants to any of these professional schools at Rutgers University need to refer to the section of the catalog for the school of interest for specific application guidelines and a listing of the courses to be completed prior to application. All students should meet with an academic advisor to determine how the sequence of courses to be completed for application will affect their graduation from SAS if their application to the professional school is unsuccessful.

Change of Major or Minor. Students wishing to apply for a change of major or minor should complete the appropriate form online here. Please note that changes or additions of major/minor that would delay degree completion will not be approved. Students should have their major and minor declarations set by Junior year at the latest to ensure on-time graduation.

Requirements (SAS)

Second Baccalaureate Degree

Second Baccalaureate Degree

Students who have already completed a bachelor's degree at an accredited college or university may pursue a second bachelor's degree at the School of Arts and Sciences (SAS) in a major area entirely different from their previous major.

If you intend to take a course which requires a pre-requisite, you may be required to take a placement test. Students with international bachelor's degrees are required to take the English placement test.

1. A minimum of 30 credits at Rutgers University-New Brunswick beyond those applied to the initial degree
2. All requirements for a new major
3. The SAS Core Curriculum

Students may apply approved coursework completed during the first degree toward the Areas of Inquiry and Cognitive Skills and Processes components of the Core Curriculum. However, all second-degree candidates must complete at least the Contemporary Challenges [CC] learning goals and one Writing and Communication with revision [WCr] course at Rutgers-New Brunswick as part of the second degree; courses taken as part of the first degree cannot be used to satisfy these requirements. Second Degree students are not eligible to have their SAS Core Curriculum waived through the New Jersey Statewide Transfer Agreement (NJSWTA).

Two baccalaureate degrees may not be earned concurrently except through approved dual-degree programs, such as that between SAS and the School of Engineering. Students who complete multiple majors earn a single bachelor's degree.

Graduation (SAS)

GRADUATION

Degrees are conferred at the annual commencement at the end of the spring semester. Students completing degree requirements in August (after Summer Session) or January (after the fall semester) will receive a letter of completion by the end of their graduation month, and will have the degree noted on the official Rutgers transcript approximately one month after graduation. All diplomas are mailed to the student's permanent mailing address within three months of degree completion.

Graduation with Honors. The bachelor's degree is conferred with the distinction summa cum laude for graduates with a Rutgers cumulative grade-point average of 3.850 or higher; magna cum laude for those with an average of 3.700 or higher; and cum laude for those with an average of 3.500 or higher. Averages are not rounded to the next higher number in the calculation of honors. Students who successfully complete the Rutgers School of Arts and Sciences Honors Program receive special recognition at graduation. Academic departments may recommend students for departmental honors or recognition based on special work and/or examinations. See statements under individual department listings.

Phi Beta Kappa. Phi Beta Kappa, established in 1776, is the oldest and most widely recognized liberal arts honorary society in the United States. Each spring semester, the Phi Beta Kappa Society invites to membership the outstanding students of the junior and senior classes. Election to the society is based on high academic achievement, a record of coursework that is at least three-quarters liberal in nature, proficiency in a world language through the intermediate level, a minimum of two years equivalent of full-time coursework at Rutgers University, and breadth of scholarship.

Departmental Honors. Many departments have a departmental honors program for outstanding students in their majors. Small group seminars, honors course sequences, specialized advising, and senior thesis programs are available in certain departments. For further information about the specific offerings of the departmental honors program in a particular department, see the website for each major program.

National Society of Collegiate Scholars. The National Society of Collegiate Scholars is an honors organization which recognizes outstanding academic achievement among first- and second-year college students. The society was founded in 1994 at The George Washington University in Washington, D.C., and has grown to nearly 300 colleges and universities nationwide. The three pillars of the society are: scholarship, leadership, and service.

Prizes and Honors. The School of Arts and Sciences, academic departments, and other units of Rutgers University offer a variety of prizes and awards for students with excellent academic records or special eligibility. Students should consult with their academic departments and visit the corresponding websites for additional information.

Post-Obitum Degrees. In the unfortunate event of the death of a student while registered at the School of Arts and Sciences as a senior, requests will be considered for the awarding of the degree that was being earned. The request may be submitted in writing to the Rutgers Office of the Dean of Students.

Programs of Study for Arts and Sciences Students (SAS)

PROGRAMS OF STUDY FOR ARTS AND SCIENCES STUDENTS

Students are advised to consult Degree Navigator and department webpages for the most up-to-date information on the requirements for majors and minors.

Majors

MAJORS

Students must declare and complete a major from among the following disciplines, as well as a minor from among those listed under Minors.

- African, Middle Eastern, and South Asian Languages and Literatures
- Africana Studies
- American Studies
- Anthropology, Cultural
- Anthropology, Evolutionary
- Art
- Art History
- Asian Studies
- Astrophysics
- Biological Sciences
- Biomathematics
- Cell Biology and Neuroscience
- Chemistry
- Chinese
- Cinema Studies
- Classics
- Cognitive Science
- Communication
- Comparative Literature
- Computer Science
- Criminal Justice
- Dance
- Data Science
- Earth and Planetary Sciences
- Economics
- English

- Environmental Studies (available as a second major only)
- European Studies
- Exercise Science
- French
- Genetics
- Geography
- German
- Health Administration
- History
- History/French
- History/Political Science
- Human Resource Management
- Information Technology and Informatics
- Italian
- Japanese
- Jewish Studies
- Journalism and Media Studies
- Korean
- Labor Studies and Employment Relations
- Latin American Studies
- Latino and Caribbean Studies
- Linguistics
- Mathematics
- Medieval Studies
- Middle Eastern Studies
- Molecular Biology and Biochemistry
- Music
- Philosophy
- Physics
- Political Science
- Portuguese
- Psychology
- Public Health
- Public Policy
- Religion
- Russian
- Social Work
- Sociology
- Spanish
- Sport Management
- Statistics
- Statistics/Mathematics

- Theater Arts
- Urban Planning and Design
- Women's, Gender, and Sexuality Studies

A bachelor of arts degree is conferred for all majors except the following, for which a bachelor of science degree is awarded: astrophysics; chemistry; evolutionary anthropology; exercise science; geological sciences; health administration; public health; sport management; and urban planning and design. Either a bachelor of arts degree or a bachelor of science degree is available in the following subjects: computer science, data science, mathematics, and physics. For subjects offering both a bachelor of arts and a bachelor of science degree, students may not graduate with a bachelor of arts degree, then return to complete the courses necessary for a bachelor of science degree. All courses required for the desired degree must be completed at the time of graduation.

For information, see the departmental listing in the Programs of Study and Courses for Liberal Arts and Sciences Students chapter.

Minors

MINORS

- African Area Studies
- African Languages
- African, Middle Eastern, and South Asian Languages and Literatures

- Sociology
- South Asian Studies
- Spanish
- Sport Management
- Statistics
- Theater Arts
- Turkish
- Urban Planning and Design
- Urban Studies
- Women's, Gender, and Sexuality Studies

Many of the five year, accelerated graduate programs that are offered to School of Arts and Sciences students will substitute for the minor requirement; please see an academic advisor for details.

Programs of Study for Arts and Sciences Students (SAS)

CertificatePrograms

CERTIFICATE PROGRAMS

A number of academic departments and programs offer a variety of certificates to School of Arts and Sciences students. Certificates are awarded only with or subsequent to the awarding of a baccalaureate degree. Please visit the certificate programs page in the Undergraduate Education in New Brunswick chapter of this catalog.

Programs of Study for Arts and Sciences Students (SAS)

Other Academic Programs

OTHER ACADEMIC PROGRAMS

- Accelerated M.A. Degree Program in Political Science - Concentration in the United Nations and Global Policy Studies
- Arts and Sciences Coordinated B.A. or B.S./M.B.A. in Professional Accounting
- Bachelor's Degree/J.D. Degree Program with Rutgers Law School
- Bachelor's Degree/Master of Applied Psychology
- Bachelor's Degree/Master of Arts Co-Terminal Degree in Art History
- Bachelor's Degree/Master of Arts Degree in Criminal Justice Program
- Bachelor's Degree/Master of Arts in Feminist Practices for Social Change
- Bachelor's Degree/Master's Degree Programs with the Edward J. Bloustein School of Planning and Public Policy
- Bachelor's Degree / Master in Communication and Media (BA/MCM) Dual Degree Pathway
- Bachelor's Degree (ITI)/ Master of Information (BA/MI) Dual Degree Pathway
- Bachelor's Degree/M.P.H. Degree Program with Rutgers School of Public Health
- Doctor of Physical Therapy (DPT) 4+3 Program
- Five-Year, Dual-Degree Program in Engineering and Liberal Arts/Sciences
- Bachelor of Science / Entry Level-Master of Science Clinical Nutrition Program
- Five-Year, Dual-Degree Program MA/BA in Religion
- Five-Year Teacher Certification Program
- Future Leaders M.B.A. (B.A./B.S. Accelerated M.B.A. for Undergraduates)
- Joint Programs (Economics 4 + 1 Masters Program)
- Master of Science in Speech-Language Pathology (MSSLP)
- Postbaccalaureate Prehealth Program
- School of Arts and Sciences Honors Program
- School of Arts and Sciences/Rutgers Biomedical and Health Sciences Articulated Programs
- School of Management and Labor Relations joint Bachelor's and Master's Five-Year Program
- Study Abroad
- Thesis Programs

Administration (SAS)

ADMINISTRATION

Administration

Juli Wade, Executive Dean

James Masschaele, Executive Vice Dean

Zaire Dinzey-Flores, Vice Dean of Diversity, Equity, and Inclusion

Susan Lawrence, Vice Dean for Undergraduate Education

Bob Maruca, Vice Dean of Administration

Tom Vosseler, Executive Director of IT and Data Analytics

Rob Eccles, Senior Director of Development

Kareem Mumford, Senior Director of Communications and Marketing

Division Deans

Lori Covey, Dean of Life Sciences

Robin Leichenko, Dean of Social and Behavioral Sciences

James Masschaele, Dean of Humanities (Interim 2024-2025)

Thu Nguyen, Dean of Mathematical and Physical Sciences

Office of Undergraduate Education

Susan Lawrence, Vice Dean for Undergraduate Education

Sharon Bzostek, Senior Associate Dean for Undergraduate Education

Courtney Stanzione, Associate Dean and Director of Advising and Academic Services

Vanessa Coleman, Assistant Dean and Director for Student Records and Administrative Systems

A. Musu Davis, Administrative Dean of the SAS Honors Program

Michelle Shostack, Associate Dean and Director of the SAS Educational Opportunity Fund

History and Aims (SEBS)

HISTORY AND AIMS

Our History: How George H. Cook Shaped Rutgers

George Hammell Cook (1818-1889) was raised on a small farm in Morris County, NJ, in the early 1800s. After high school, he spent a number of years as an itinerant, working as an engineer with a railroad in the Catskills, teaching and studying at the Rensselaer Institute, managing a glassmaking house in Albany, NY, and teaching at the Albany Academy. He came to Rutgers College as professor of chemistry and natural sciences in 1853 at the invitation of then President Theodore Frelinghuysen. By the time he came to Rutgers, Cook had expertise in geology, chemistry, engineering, and agriculture. Among Cook's first research projects was the chemical analysis of "greensand marl," a soil deposit found in central and south Jersey. This research led to his appointment as assistant state geologist. A thorough geological survey of New Jersey, published in 1840, was already out of date, and Professor Cook was appointed to undertake its revision. His work would become the model for the U.S. Geological Survey.

In 1862, the Morrill Act was signed into law by President Abraham Lincoln. The Morrill Act was driven by the idea that everyone (every young man, at least) could benefit from an education in the sciences. The act provided for the establishment of a college in each state where students would receive an education that included scientific and classical studies, military tactics, agriculture, and the mechanic arts. A unique American contribution to higher education, the land-grant concept applied scientific research to local problems. Cook, who was a strong believer in the concept of scientific agriculture, led successful lobbying efforts (against Princeton and the state Normal School at Trenton) to have Rutgers designated as the site of the land-grant college. The Rutgers Scientific School (as it was then called) was founded in 1864 as New Jersey's land-grant college, with George H. Cook at the head. A 100-acre farm on the outskirts of New Brunswick was purchased from the estate of James Neilson to serve as the school's experimental farm. (Rutgers was given 210,000 acres of what is now Utah under the Morrill Act, which was sold to establish the college and purchase land for the experimental farm.) That land is now the heart of the G. H. Cook Campus.

In 1887, the Morrill Act was amended by the Hatch Act, which established funds for state agricultural experiment stations. These federal- and state-appropriated funds were used to build New Jersey Hall, which housed Rutgers Scientific School, and to acquire additional faculty and farmland. George H. Cook became the first director of the New Jersey Agricultural Experiment Station, which now includes offices in all 21 New Jersey counties. In 1912, the (by then) College of Agriculture moved from the College Avenue Campus to the campus of the experiment station. The land-grant triad was completed in 1914 with the Smith-Lever Act. This act established the Agricultural Extension Service, which located College of Agriculture faculty in each of the counties.

Under the land-grant framework, campus-based academic programs complement experiment station research, which in turn is disseminated to the public by local extension agents. Residents call extension agents with a problem, who either work to resolve the problem or initiate research into it. In 1917, the New Jersey legislature designated the Rutgers Scientific School, also called the State College of Agriculture, as the State University of New Jersey. In 1924, Rutgers College assumed the name Rutgers University, but the College of Agriculture remained as a distinct unit. It was not until 1945 that Rutgers University as a whole (with the College of Agriculture as a unit) achieved state university status. In 1965, the College of Agriculture became the College of Agriculture and Environmental Sciences (CAES).

The creation of Cook College from the CAES in 1971 was in many ways transformative. Cook College aimed to offer an interdisciplinary, problem-oriented curriculum that emphasized environmental studies as well as the arts and sciences. This combination of features in a land-grant school was unique at the time. Today, with the transformation to the School of Environmental and Biological Sciences (SEBS), the focus on creating a multidisciplinary learning environment remains, and new efforts have begun to enhance the learning environment for students. Through living-learning communities, an emphasis on hands-on and service learning, as well as international education opportunities, SEBS students will gain a deeper, more nuanced understanding of their curricular work. Together with NJAES, Rutgers and, more specifically the School of Environmental and Biological Sciences, works to fulfill the goals of land-grant institutions by enlarging the land-grant mission to include the study of environmental problems, natural resources, economic and community development, fisheries, nutrition, public health, and youth development--all of which address the diverse needs of a highly developed state.

The Morrill Act laid the foundation for the development of our nation's great public university system. The commitment of Rutgers University to the land-grant concept makes us unique among the universities in New Jersey. Rutgers students and faculty are part of a proud tradition of academic study, research, and public service, a tradition that began with the remarkable efforts of George H. Cook--educator, innovator, and public servant. As committed

to science-based solutions as George H. Cook was in the 19th century, the faculty of the School of Environmental and Biological Sciences and the New Jersey Agricultural Experiment Station are equally committed to addressing the socioeconomic issues that face our state's residents today.

History and Aims (SEBS)

Mission-Oriented Education, Research, and Outreach

Mission-Oriented Education, Research, and Outreach

The School of Environmental and Biological Sciences pursues excellence in research, teaching, and outreach in areas of study that address the biological spectrum from organisms to ecosystems. Its emphasis is on both the fundamental sciences and the social and human dimensions. The school offers 21 undergraduate majors, including plant biology and animal sciences; entomology; microbiology; biotechnology; biochemistry; agriculture and food systems; landscape architecture; environmental planning and design; food and nutritional sciences; ecology, evolution, and natural resources; marine science and oceanography; environmental sciences and meteorology; environmental policy, institutions, and behavior; and environmental and business economics.

In addition to instruction in the classroom, field, and laboratory, students have opportunities for experiential learning on and off campus, including a growing emphasis on international experiences through short- and long-term study abroad. Students also have access to a robust program of applied research and outreach hosted by the New Jersey Agricultural Experiment Station laboratories, farms, business incubators, and marine stations throughout the state.

History and Aims (SEBS)

Scholarships

Scholarships

Students attending the School of Environmental and Biological Sciences have the opportunity to compete on both a merit and a need basis for school-based scholarships.

In February of each academic year, the school's Office of Academic Programs notifies students matriculated in the School of Environmental and Biological Sciences (except seniors) of the start of the annual scholarship application process for the following academic year.

Academic prizes and departmental scholarships are also awarded through academic departments to the schools' students in various fields of study, often on the recommendation of the faculty in the appropriate curriculum. Students automatically are considered for all awards for which they are eligible. For additional scholarship information, visit: http://www.sebs.rutgers.edu/scholarships.

History and Aims (SEBS)

General Information

General Information

Faculty, staff, and students are the core of the School of Environmental and Biological Sciences community. There are about 240 on-campus faculty members and about 3,700 undergraduate students. The school offers an education that encompasses the personal and professional development of its students in a small campus setting within the larger Rutgers community.

The school's undergraduate instruction programs are closely linked to the rest of the university. Its students, like all Rutgers students, are able to take courses offered by the schools at Rutgers University-New Brunswick.

Credits and Residency (SEBS)

CREDITS AND RESIDENCY

To be awarded a degree, a student in the School of Environmental and Biological Sciences must complete a minimum of 120 credits* of coursework with a cumulative grade-point average of 2.000 or better. The student must satisfactorily complete the requirements of one of the curricula (major programs of study) available to the school's students. These curricula are listed and their requirements are outlined in the chapter on Programs of Study. In addition, the student must complete 30 of the last 42 credits at Rutgers. With careful planning, full-time students who begin their higher education at the School of Environmental and Biological Sciences, and who have not placed into remedial courses or changed majors, should be able to complete their degree requirements in four years.

*Students completing the Fall 2015 SEBS Core must complete 128 credits. Students completing the Environmental Engineering degree will complete 129 credits.

Double Majors (SEBS)

DOUBLE MAJORS

Students seeking to complete the requirements of a second program of study offered by the School of Environmental and Biological Sciences and/or another school of Rutgers University must complete a second major form available both at the Office of Academic Programs in Martin Hall and online, in order to have that declaration verified by the curriculum or department offering the program. Satisfactory completion of these requirements is noted on the student's final transcript, but only one bachelor's degree is conferred upon graduation. Students should consult with an academic adviser at the Office of Academic Programs, Martin Hall, when considering adding any additional majors, minors or certificate programs.

Second Bachelor's Degree (SEBS)

SECOND BACHELOR'S DEGREE

Students with a previously earned bachelor's degree from another institution who matriculate at the School of Environmental and Biological Sciences for the purpose of earning a second degree must: 1) complete a minimum of 30 credits from Rutgers University, and 2) fulfill the course requirements listed under experience-based education and proficiency in a field/concentration for the major (see the Programs of Study chapter). These requirements may, however, be modified by the undergraduate program director, in consultation with the student, and subject to final approval by the school's Admissions and Scholastic Standing Committee.

Mission, Goals, and Core Curriculum of the Undergraduate Program (SEBS)

MISSION, GOALS, AND CORE CURRICULUM REQUIREMENTS OF THE UNDERGRADUATE PROGRAM

Human impacts on the earth's ecosystem are profound and far reaching. The faculty of the School of Environmental and Biological Sciences is committed to educating students to understand and sustain the integrity of this ecosystem, as both specialists within their fields of concentration and well-informed citizens. The programs of study offered by the school apply the natural and social sciences to this dynamic system.

The curricula are designed to achieve the following goals for graduates of the School of Environmental and Biological Sciences:

To understand and appreciate the interaction between the natural and social sciences as they relate to the earth's ecosystem, students master the basic knowledge and approaches of a field of specialization and are introduced to multidisciplinary perspectives that locate their field and its contributions in this larger context.

To evaluate issues critically, so that graduates may become autonomous, versatile, and productive people who understand that they are inextricably related to the natural world and to other people. Mastery of both quantitative and qualitative modes of inquiry develops each student's ability to deal with the complexity and dynamism of real-world issues.

To understand and appreciate human impacts on the earth's ecosystem, students develop a historical, global, and multicultural consciousness in order to expand their bases for decision making.

To sustain the integrity of the global ecosystem, students develop the ethical sensitivity and analytical skills necessary to address questions of social responsibility, environmental ethics, moral choice, and social equity.

Core Curriculum Requirements

CORE CURRICULUM REQUIREMENTS

The School of Environmental and Biological Sciences (SEBS) offers bachelor's degree programs in 21 programs of study (curricula), many with several areas of further concentration (options). All programs of study are designed to achieve the goals outlined in the section on Missions, Goals, and Core Curriculum Requirements of the Undergraduate Program.

First-year students matriculating fall 2015 to fall 2018 and transfer students matriculating fall 2016 to spring 2019 must complete a goal-based Core Curriculum: sebs.rutgers.edu/core. Students wishing to adopt the fall 2019 Core Curriculum must meet with a dean at the Office of Academic Programs.

First-year and transfer students matriculating fall 2019 must complete a goal-based Core Curriculum: sebs.rutgers.edu/core.

The SEBS goal-based Core Curriculum is structured as a set of core liberal arts and sciences learning goals framed as activities that students will be able to do at a foundational level by virtue of meeting the specific core goal. Courses may be counted as meeting multiple learning goals; students generally will complete the core in 10 to 13 courses of 3 or 4 credits each. A course used to meet core goals may also be used to fulfill a major or minor requirement. Only graded degree credit-bearing courses worth at least 3 credits and certified by the faculty may be used to meet core goals. Lists of courses certified as meeting each goal can be found in the Degree Navigator system.

Contemporary Challenges

(6 credits) Students must take two courses and meet one goal in each of the Contemporary Challenges areas. [CC-D, CC-O]

Diversities and Social Inequalities [CC-D]

- Analyze the degree to which forms of human differences and stratifications among social groups shape individuals and group experiences of, and perspectives on, contemporary issues. Such differences and stratifications may include race, language, religion, ethnicity, country of origin, gender identity, sexual orientation, economic status, abilities, or other social distinctions and their intersections.
- Analyze contemporary social justice issues and unbalanced social power systems.

Our Common Future [CC-O]

- Analyze a contemporary global issue from a multidisciplinary perspective.
- Analyze the relationship that science and technology have to a contemporary social issue.

Experiential Learning (previously called Experience-Based Education, EBE)

(3 credits) Practical application of disciplinary knowledge. Students must participate in a certified experience that meets this goal. [EL]

- Complete and report on an applied experience (e.g., professional practice, service learning, or research) in order to examine and evaluate ideas within a discipline.

Areas of Inquiry

Natural Sciences (6 credits) Students must meet two goals with courses in two of the following disciplines: physical, biological or environmental sciences. [NS]

- Understand and apply basic principles and concepts in the physical or biological sciences.
- Explain and be able to assess the relationship among assumptions, method, evidence, arguments, and theory in scientific analysis.
- Identify and critically assess ethical and societal issues in science.

Social and Historical Analysis (9 credits; see HST and SCL below.)

- Understand the bases and development of human and societal endeavors across time and place.
- Explain and be able to assess the relationship among assumptions, method, evidence, arguments, and theory in social and historical analysis.
- Identify and critically assess ethical issues in social science and history.

Historical Analysis (3 credits) Students must meet one goal. [HST]

- Explain the development of some aspect of a society or culture over time, including the history of ideas or history of science.
- Employ historical reasoning to study human endeavors.

Social Analysis (6 credits) Students must meet one goal in each area below. [SCL]

Social Cultural Analysis/ Economic Analysis (3 credits) [SCL-SCA/ECN]

- Understand different theories about human culture, social identity, economic entities, political systems, and other forms of social organization.
- Apply concepts about human and social behavior to particular questions or situations.
- Use the principles of economics, finance, and accounting to analyze and solve problems related to institutions, policies, and management.
- Evaluate the institutional factors that underlie and influence policy decisions.

Governance and Regulation Analysis (3 credits) [GVT]

- Analyze ethical, moral, and legal dimensions of environmental resource use, regulation, and management spanning governmental and nongovernmental institutions.
- Use theory and evidence from the social sciences to analyze the decisions made by organizations that affect resource use, the environment, and health; including the organizations involved, the influences on those decisions, and the intended and unintended consequences that are likely to result.

Arts and Humanities (3 credits) Students must meet one goal. [AH]

- Examine critically philosophical and other theoretical issues concerning the nature of reality, human experience, knowledge, value, and/or cultural production.
- Analyze art and/or literature in themselves and in relation to specific histories, values, languages, cultures, and technologies.
- Understand the nature of human languages and their speakers.
- Engage critically in the process of creative expression.

Cognitive Skills and Processes

Writing and Communication (6 credits) Students must meet one goal in two areas. [WC, WCd]

Expository Writing (101) or Exposition and Argument (103) (3 credits) [WC]

- Communicate complex ideas effectively, in standard written English, to a general audience.
- Evaluate and critically assess sources and use the conventions of attribution and citation correctly.
- Analyze and synthesize information and ideas from multiple sources to generate new insights.

Writing in a Discipline (3 credits) [WCd]

- Communicate effectively in modes appropriate to a discipline or area of inquiry. [WCd]

Quantitative and Formal Reasoning (6 credits) Students must meet two goals. [QQ; QR]

- Formulate, evaluate, and communicate conclusions and inferences from quantitative information. (Includes various quantitative methods courses as well as 640 courses) [QQ]
- Apply effective and efficient mathematical or other formal processes to reason and to solve problems. (Includes 640 courses and formal reasoning course--or placement out of) [QR]

Area Requirements for Students Matriculating Prior to Fall 2015

AREA REQUIREMENTS FOR STUDENTS MATRICULATING PRIOR TO FALL 2015

In the following descriptions of the first seven of these area requirements, the numbers of credits indicated are the minimum requirements established by the school's faculty for all bachelor's degree programs. Many programs require specific courses that must be used to fulfill some of these areas and in some cases these program-specific requirements may exceed the school's minimum requirements. No course may be used to fulfill simultaneously more than one of the general school core requirements (Areas I-VII); however, a given course may fulfill simultaneously both a general school core requirement in Areas I-VII and a major program requirement (Area VIII--proficiency in a field). Before selecting courses, students should consult the requirements for each program that they are considering, and discuss these with their academic adviser.

Lists of courses that fulfill the various requirements can be found in the Degree Navigator system (http://nbdn.rutgers.edu).

Descriptions of some of the courses available for fulfillment of Areas I to VII can be found in the New Brunswick Undergraduate Catalog 2013-2015.

Area I. School Mission: Interdisciplinary Critical Analysis

The undergraduate program's goals are to help students develop the abilities to think critically; address problems with a variety of modes of inquiry; and recognize and assess ethical problems related to the environment, natural resources, food and human nutrition, and agriculture, in order to make decisions based upon an understanding of the long- and short-term implications of the various choices. As a means of meeting these goals, students are required to complete one 3-credit junior/senior colloquium course. This colloquium course is a capstone, integrative educational experience for students concluding their undergraduate studies, enabling them to synthesize information and techniques gained in previous courses. Working cooperatively with peers who have different capabilities and interests and using the case study method, students in these courses devise creative, interdisciplinary solutions to multifaceted problems with ethical, social, political, and technical content in the school's mission areas. Current lists of the junior/ senior colloquia offerings are posted on the school's website: https://agricultureandfoodsystems.rutgers.edu/eaprogram/colloquium.html.

Area II. Introductory Life and Physical Sciences

To provide a foundation for understanding and evaluating important questions related to the life and physical sciences, students are required to complete courses in both the life sciences and in the physical sciences, as follows:

A. Life Sciences (4-8 credits). Introductory courses in biological sciences (subject 119), plant biology (subject 776), animal sciences (subject 067), ecology and evolution (subject 216) with a laboratory.

B. Physical Sciences (3-5 credits). A basic chemistry (subject 160) or physics (subject 750) course, or an introductory course that applies the physical sciences to earth systems including geography (subject 450), geology (subject 460), environmental sciences (subject 375), marine dciences (subject 628), meteorology (subject 670).

Many programs of study require specific courses and additional credits in the life and physical sciences. Students should consult the requirements of the specific program(s) of study they are considering before selecting courses from this list.

Area III. Humanities and the Arts

To develop an understanding and appreciation of the humanities, art forms, and modes of critical response and interpretation, students are required to complete a minimum of 6 credits in the following subject areas. Upper-level literature and art courses in a foreign language may satisfy this requirement, but elementary and intermediate foreign language courses (i.e., conversation, grammar, and composition courses) do not satisfy this requirement. The two courses selected may be from the same or different disciplines.

Area IV. Multicultural and International Studies

To encourage students to see the world through the eyes of people whose culture differs from their own, students are required to complete a minimum of 6 credits in multicultural and international studies. These courses are intended to expose students to international, cross-cultural, and historical perspectives; to acquire an appreciation for the diversity and variability of institutions, cultures, and individuals; and to consider the complex and changing interactions of cultural, situational, and institutional factors that affect human behavior.

Several programs of study require specific courses or additional credits in multicultural and international studies. Students should consult their advisers and/or the requirements of the specific majors they are considering before selecting courses from the list.

Students who have studied outside the United States at an accredited institution for one semester or more may waive 3 credits of this requirement.

Area V. Human Behavior, Economic Systems, and Political Processes

Civic engagement in our democratic society is enhanced by an understanding of human behavior and of the political processes and institutional frameworks within which public policies are developed, and by the ability to evaluate policy issues through the application of economic concepts and theory. To develop these understandings, students are required to complete courses in human behavior, in economic systems, and in political processes.

Area VI. Oral and Written Communication

To develop the speaking and writing skills essential for success in both the university and in the professions that students are preparing to enter, written and oral presentations are incorporated into all courses, where feasible. Students are further required to complete a minimum of 6 credits.

Area VII. Experienced-Based Education

To develop the ability to apply curricular and extracurricular-based learning, including leadership development and personal as well as interpersonal management skills, within settings appropriate to their fields, each of the school's programs of study specifies a course or mechanism of study. Examples of currently available options are internships and cooperative education placements through the Student to Professional Internship Network (SPIN) Program, practica, independent research, and the George H. Cook Scholars Program.

Students completing two major programs offered by the School of Environmental and Biological Sciences must complete at least one experience-based education course, approved by both curricula.

Area VIII. Proficiency in a Field/Concentration

To develop proficiency in a field/concentration related to the environment, natural resources, food and human health, or agriculture, each curriculum specifies required courses, elective courses, and, where applicable, option requirements. Every program of study also specifies minimum requirements in quantitative skills and in professional ethics as they apply to the particular field/concentration for which it prepares its students.

Quantitative Skills. The quantitative skills requirement is designed to help students develop mathematical literacy and skills for analytical reasoning, including an understanding of statistical methodologies appropriate to the field for which students are preparing.

Professional Ethics. The professional ethics requirement is designed to help students develop the ability to recognize, assess, and respond to ethical problems that could be encountered in the careers students are preparing to enter.

Additional Requirements. Each degree program stipulates additional required courses in the field and may require students also to fulfill requirements in more specialized options.

Area IX. Unspecified Electives

All students must complete a minimum of 128 credits for the bachelor's degree (or 159 credits for the five-year bioenvironmental engineering curriculum). The minimum credit requirements to satisfy areas I-VIII total 125 credits or less for at least one option in every major available at the school (with the exception of the five-year bioenvironmental engineering major). The additional 3 or more credits required for graduation may be fulfilled by any courses for which the student has met all the prerequisites. Students who have completed at least 60 credits of coursework may register for up to two of these unspecified elective courses (no more than one per semester) on a Pass/No Credit basis.

Graduation (SEBS)

GRADUATION

Degrees are conferred by Rutgers University on the recommendation of the faculty of the School of Environmental and Biological Sciences only at the annual commencement in May. Students completing degree requirements in August or January may obtain a letter from the Office of Academic Programs or ask the university registrar for a certificate attesting to their completion of degree requirements, provided they have filed a Diploma Information Card.

Degrees are conferred in absentia when the candidate has advised the school's Office of Academic Programs in advance of his or her inability to attend the University Commencement ceremony.

Students who complete courses at other institutions or return to Rutgers to complete degree deficiencies must notify the school's Office of Academic Programs of their intent to graduate and arrange to have an official transcript forwarded to the School of Environmental and Biological Sciences, Office of Academic Programs, Rutgers, The State University of New Jersey, 88 Lipman Drive, New Brunswick, NJ 08901-8525. Deadlines for this notification are February 1 for May graduation, August 1 for an August degree date, and November 1 for a January degree date.

Diplomas will be withheld from all students whose financial accounts are not clear.

Graduation with Honors. Academic excellence is recognized by the school faculty's recommendation that the bachelor's degree be conferred with summa cum laude to students whose cumulative grade-point average is 3.850 or higher; magna cum laude to those whose cumulative grade-point average is 3.700 to 3.849; and cum laude to those whose cumulative grade-point average is 3.500 to 3.699.

Phi Beta Kappa. Each spring semester, the Phi Beta Kappa Society invites to membership outstanding students of the junior and senior classes. Election to the society is based on high academic achievement, a record of coursework that involves the pursuit of a liberal arts major, proficiency in a foreign language through the intermediate level, a minimum of two years equivalent of full-time coursework at Rutgers University, and breadth of scholarship. Phi Beta Kappa, established in 1776, is the oldest and most widely recognized liberal arts honorary society in the United States.

Prizes and Honors. The School of Environmental and Biological Sciences, its individual academic departments, and other units of the university offer a variety of prizes and awards for students with excellent academic records or special eligibility. Students should consult with their academic departments for additional information.

Post-Obitum Award of Degree. In the unfortunate event of the death of a student who was enrolled in the School of Environmental and Biological Sciences as a senior in good standing, requests will be considered for the awarding of the degree that was being earned. The request may be submitted in writing to the school's Admissions and Scholastic Standing Committee.

Summary (SEBS)

SUMMARY

Graduation from the School of Environmental and Biological Sciences requires the successful completion of one of the curricula (major programs of study) listed below. Any student in the school who decides to double-major may choose the second major from those offered by other faculties or schools at Rutgers University; however, only one bachelor's degree is conferred upon graduation. Students in the School of Environmental and Biological Sciences may also minor in programs offered by other faculties and schools. They may also enroll in individual courses offered by other faculties and schools of the university.

Any potential student who does not wish to major in a curriculum that is on the list below should apply directly to the school at Rutgers that offers the desired major. Any student already enrolled in the School of Environmental and Biological Sciences, but who no longer wishes to major in a curriculum on the list below should consult with one of the school's deans in the Office of Academic Programs in Martin Hall about initiating an application for a school-to-school transfer within Rutgers (http://admissions.rutgers.edu/schooltoschool).

The School of Environmental and Biological Sciences uses a system of adviser codes to aid in the advising and registration process. Adviser codes are indicated in the lists of faculty advisers for each curriculum.

Summary (SEBS)

Premedical, Predental, and Prelaw Programs

Premedical, Predental, and Prelaw Programs

Please note that there are no specific programs of study for students interested in medical, dental, or law school. Individuals can major in any of the programs available to students in the School of Environmental and Biological Sciences and complete the necessary admission requirements for these professional programs.

Agriculture and Food Systems 020 (SEBS)

AGRICULTURE AND FOOD SYSTEMS 020

Degree: B.S.

Director: -

Program Website: http://agricultureandfoodsystems.rutgers.edu

*(Sunsetting curriculum)*Agriculture and food systems aim to appeal to those who are interested in an entrepreneurial and innovative education in the agricultural sciences, spanning the entire range from production to table. The A&FS major targets students who seek careers in agribusiness, government service, and agricultural education and extension, as well as those preparing to be owners/operators of farming enterprises.
Students interested in agricultural education can enroll in the Agricultural Education option within the Agriculture and Food Systems major. This option must be combined in a 4 + 1 program with the Graduate School of Education.

Agriculture and Food Systems 020 (SEBS)

Graduation Requirements for the Major

Graduation Requirements for the Major

Students matriculating prior to the fall semester of 2015 in the School of Environmental and Biological Sciences (SEBS) must complete the SEBS general education requirements. In addition, students majoring in agriculture and food systems must complete the major requirements described below.

Students matriculating fall 2015 or after and transfer students matriculating in 2016 and after must complete a goal-based Core Curriculum in place of general education requirements. The goal-based core is described here: http://sebs.rutgers.edu/core. Courses are certified for the Core Curriculum by a faculty committee. A current list of certified courses can be found here: http://sebs.rutgers.edu/core.

Agriculture and food systems major requirements are as described below. The program has flexibility so academic advising is provided to ensure that students choose courses that support their career goals.

For an up-to-date description of agriculture and food systems major requirements, courses, and course sequences please refer to the program webpage at http://agricultureandfoodsystems.rutgers.edu.

Total Credits: 60 to 63 credits

A. Required Courses:

i. Science Requirements:

- At least one introductory biology course (01:119:101 or 103 or 119 or 199)
- At least one introductory chemistry course (01:160:126 or 127 or 128 or 134 or 140 or 159 or 161 or 163)
- At least one introductory earth science, ecology, or geological sciences course (01:460:100 or 101; or 11:216:101 or 217 or 351; or 11:374:101; or 11:375:101; or 11:573:445)

ii. Agriculture and Food Systems Requirements:

11:020:210 Introduction to Agriculture and Food Systems
11:020:215 Applied Practical Applications in Agriculture and Food Systems

iii. Soils Requirement (choose one course):

11:216:422 Soil Organismal Diversity
11:375:360 Soils and Water
11:375:453 Soil Ecology
11:776:102 Soils and Society
11:776:440 Soil Fertility

iv. Economics Requirement (choose one course):

01:220:102 Introduction to Microeconomics
01:220:103 Introduction to Macroeconomics
11:373:101 Economics, People, and Environment
11:373:121 Principles and Applications of Microeconomics
11:373:122 Principles and Applications of Microeconomics

v. Quantitative Requirements (2 courses):

01:640:026 Intermediate Algebra or place into Pre-calculus (01:640:111)

and

One quantitative skills course (Pre-calculus I or II; or calculus; or statistics or applied statistics)

vi. Experiential Learning (choose one course):

11:020:490 ¿Agriculture and Food Systems Practicum
11:020:495 or 495 Special Problems in Agriculture and Food Systems
11:067:201, 202, 203, 205, or 207 Animal Science Practicum
11:554:488 ¿G. H. Cook Scholars Program
11:776:350 ¿Agroecology Practicum
11:776:495 or 496 Special Problems in Plant Science
11:902:301 or 302 or 400 School of Environmental and Biological Sciences (SEBS) Internship

B. Foundational Courses for Agriculture and Food Systems (3 courses from):

01:830:101 General Psychology (NB)
01:920:101 Introduction to Sociology (NB)
11:020:305 Starting and Managing A Small Farm (NB)
11:020:315 Direct Farm Marketing and Agritourism (NB)
11:067:142 Animal Science (NB)
11:216:101 Introduction to Ecology and Evolution (NB)
11:216:217 Principles of Natural Resource Management (NB)
11:216:272 Dendrology (NB)
11:216:332 Plant Ecology (NB)
11:216:351 Principles of Ecology (NB)
11:370:226 Pesticide Impacts on Humans and Environmental Health (NB)
11:370:308 Apiculture (NB)
11:370:350 Agricultural Entomology and Pest Management (NB)
11:370:381 Insect Biology (NB)
11:374:101 Introduction to Human Ecology (NB)
11:375:101 Intro to Environmental Sciences (NB)
11:400:103 Science of Food (NB)
11:400:104 Food and Health (NB)
11:400:106 Food as Medicine (NB)
11:400:201 Principles of Food Science (NB)
11:628:120 Introduction to Oceanography (NB)
11:709:201 Culinary Nutrition (NB)
11:709:255 Nutrition and Health (NB)
11:776:210 Principles of Botany (NB)
11:776:211 Introduction to Horticulture (NB)
11:776:231 Commercial Floral Design (NB)
11:776:242 Plant Science (NB)

C. Additional course selected in consultation with an advisor:
A total of 30 credits from {Area of Inquiry 1: Agricultural Sciences, Area of Inquiry 2: Agribusiness and Entrepreneurship, Area of Inquiry 3: Food Systems; Culture; Community Food Justice and Advocacy; Nutrition & Health, Area of Inquiry 4: Policy, Politics, Economics, Ethics and Law, Area of Inquiry 5: Education, Communication, Leadership, Foundational Course Taught by the School of Arts and Sciences}

- with at least 3 credits from {Area of Inquiry 1: Agricultural Sciences, Foundational Course Taught by the School of Arts and Sciences}
- and at least 3 credits from {Area of Inquiry 2: Agribusiness and Entrepreneurship}
- and at least 3 credits from {Area of Inquiry 3: Food Systems; Culture; Community Food Justice and Advocacy; Nutrition & Health}
- and at least 3 credits from {Area of Inquiry 4: Policy, Politics, Economics, Ethics, and Law}
- and at least 3 credits from {Area of Inquiry 5: Education, Communication, Leadership}

Agriculture and Food Systems 020 (SEBS)

Agriculture and Food Systems Teacher Education Track

Agriculture and Food Systems Teacher Education Track

The B.S. in Agriculture and Food Systems Teacher Education Track is designed for preparation to become a certified K-12 Teacher of Agriculture. It also prepares students for agricultural extension and outreach work.

This program provides agricultural science, subject area preparation toward teacher certification at the Rutgers Graduate School of Education (Five Year, 4+1 Agricultural Science Education, teacher education program). However, graduates will also be prepared to pursue teacher certification at other graduate schools or the Alternative Route teaching certificate. Successful completion of N. J. Teacher Certification is required to qualify as a K-12 Teacher of Agriculture. Students apply to the 5-year program at GSE by February 1, ideally in their Junior year.

For more information, contact Dr. Xenia Morin or Dr. Thomas Leustek.

Graduation Requirements

A minimum of 120 earned credits are required to graduate with a B.S. in Agriculture and Food Systems, Teacher Education Track. Students must fulfill the SEBS Core graduation requirements and the following Agriculture and Food Systems Education Option requirements.

R1: Science Requirements (all AFS majors) (9 credits)
A total of 3 courses, one in each of the following categories:

- One chemistry course
- One biology course*
- One ecology, earth science, or geology class

*Note: These are minimum science requirements. Students are encouraged to take the biology course sequence 01:119:115, 01:119:116 and 01:119:117 if they intend to become certified to also teach biological sciences or if these biology classes are pre-requisites for other classes.

R2: Agriculture and Food Systems Required Foundation Courses for the Education Track (15 credits)

A total of 5 courses as agriculture and food systems foundational classes (for all AFS Majors)(6 credits)

- 11:020:210 Introduction to Agriculture and Food Systems
- 11:020:215 Applied Practical Applications in Agriculture and Food Systems

And two of these three classes (6 credits):

- 11:067:142 Animal Science
- 11:776:211 Introduction to Horticulture
- 11:776:242 Plant Science

One of these (3 credits):

- 11:776:391 Weeds, Diseases, and Insects of Plants (3)
- 11:776:105 Stories of Plant Diseases (3)
- 11:776:402 Weeds: Impact and Management (3)
- 11:067:330 Animal Nutrition (3) along with 11:067:331 Animal Nutrition Laboratory (1)

R3: Educational Foundation Courses specific to the Education Track (18 credits)
Five classes from this list:

Pre-admission to the 5-year program and taken in Sophomore or Junior Year

- 05:300:200 Introduction to Education (3) 05:300:201
- Introduction to Education Field Based Lab - Clinical Experience (0.5)
- 05:300:306 Educational Psychology: Principles of Classroom Learning (3)
- 11:374:416 Environmental Education in the School (3)

SEBS Senior Year, Fall Semester (also Year 1 of 2 of GSE requirements)

- 05:300:498 Clinical Experience Phase I (0.5)
- 05:300:450 Urban Education 1 (1.5)
- 05:300:307 Human Development: Infancy through Early Adulthood (3)
- 11:020:425 Developing Ideas in Agricultural Education (3) or 11:300:425 Developing Ideas in Agriculture (3)

Senior year, Spring semester (also Year 1 of 2 of GSE requirements)

- 05:300:498 Clinical Experience Phase 2 (0.5)
- 11:020:426 Teaching Agriculture and Food Systems (3) or 11:300:426 Teaching Agriculture (3)

Note: The 11:300:425/426 will be replaced by 11:020:425/426 starting in Fall 2019.

R4: Soils Requirement (all AFS Majors) (3 credits)
A total of 1 class from a list of soils classes:

- 11:776:102 Soil and Society (3)
- 11:776:440 Soil Fertility (3).

Note: Soils and Water or Soils and Organisms can be taken if you have the prerequisites.

R5: Economics Requirement (all AFS Majors) (3 Credits)
A total of 1 class:

- 11:373:121 Microeconomics

R6: Quantitative Skills (all AFS Majors*)(3 credits)
Complete one of the following:

- Placement into pre-calculus or complete Intermediate Algebra (01:640:026) or equivalent transfer credit.
- Total of 1 quantitative course which meet the QQ and QR requirements for the SEBS Core. (3 credits): (*New expanded list!)

R7 Experiential Learning (6 credits)
6 credits from an approved experiential learning course(s) (one course, or a combination of courses to make 3 credits):

- 11:300:417 Supervised Ag Educational Experience Practicum (3)
- 11:020:255 Special Topics in Agriculture and Food Systems (3) Subtopics: Ag Tech

Acceptable alternatives if related to agriculture and food systems or education:

- 11:067:200-207 Animal Practicums (1-3 credits)
- 11:020:490 Agriculture and Food Systems Practicum (1-3 credits)
- 11:902:300 SEBS Internship I (3)
- 11:902:301 SEBS Internship II (3)

R8 Approved electives for the Agriculture and Food Systems Education Track (minimum 21 credits; at least 12 credits should be at, or above, 300 level)
A minimum of 12 credits in agricultural sciences, food science, ecology, and natural resource management, landscape architecture with 6 credits coming from agriculture and food systems or plant science:

At least 12 credits from:

- 11:020:296 Honors Seminar in Agriculture and Food Systems
- 11:020:321 Principles and Practices of Small Organic Farming (summer farm course)
- 11:020:340 Indoor Cultivation of High Value Crops
- 11:020:455 Special Topics in Agriculture and Food Systems
- 11:020:436 Sustainable Agriculture

Any of the following 200 or higher:

- 11:776:202 Applied Physiology of Horticultural Crops (3)
- 11:776:205 Intro to Ethnobotany (3)
- 11:776:242 Plant Science (3)*
- 11:776:221 Principles of Organic Crop Production (3)
- 11:776:257 Edible and Poisonous Fungi (3)
- 11:776:390 Hemp and Medical Cannabis (3)
- 11:776:302 General Plant Pathology (3)
- 11:776:310 Plant Propagation (3)
- 11:776:321 Greenhouse Systems Management (3)
- 11:776:341 Fruit Production (3)
- 11:776:391 Weeds, Diseases and Insects of Plants (3)
- 11:776:439 Nursery Crop Production (3)
- 11:776:440 Soil Fertility (3)
- 11:776:442 Agroecology

Other approved elective courses:

Approved Animal Science Courses

- 11:067:200-207 Animal Practicum, Cattle; Sheep; Swine; Lab Animal; Horse (2);
- 11:067:330 Animal Nutrition (3) with 11:067:331 Animal Nutrition Laboratory (1)

Approved Entomology Courses

- 11:370:226 Pesticide Impacts on Human and Environmental Health (3)
- 11:370:350 Agricultural Entomology and Pest Management (3)
- 11:370:308 Apiculture (3)

Approved Food Science Courses

One of:

- 11:400:103 Science of Food (3)
- 11:400:106 Food as Medicine (3)
- 11:400:107 Foods: From Field to Table (3)

Approved Landscape Agriculture Courses (035) such as

- 11:550:271 Agriculture and the Landscape (3)

Approved Agriculture and Natural Resource Courses

- 11:035:268 Environmental Pollution - Issues in Agriculture, Industry, and Communities (2)
- 11:035:272 River and Stream Ecology (1)
- 11:035:274 Organic Farming and Gardening (2)
- 11:035:280 American Lawns and Turfgrass (1.5)

- 11:035:288 Edible Gardening for Enrichment and Education (2)

Approved Urban Forestry Courses

- 11:216:332 Plant Ecology (4)
- 11:216:365 Arboriculture (4)
- 11:216:377 Practicum in Forest Management (1-12)
- 11:216:403 Urban Forestry (3)
- 11:770:391 Diseases of Urban and Forest Trees (1.5)

Approved Marine Science Courses

- 11:628:309 Fishery Science (3)
- 11:628:317 Aquaculture (3)

Approved Microbiology Course

- 11:680:103 Microbiology of Agricultural Products in New Jersey (3)

Note: Other courses approved with permission of the undergraduate program director for agriculture and food systems. At least 3 credits in agribusiness or entrepreneurship.

- 11:020:305 Starting and Managing a Small Farm (3)
- 11:020:340 Indoor Cultivation of High Value Crops (4)
- 11:020:442 Entrepreneurial Agriculture (3)
- 11:373:231 Introduction to Marketing (3)
- 11:373:241 Introduction to Management (3)
- 11:373:331 Economics of the Food Marketing System (3)
- 11:035:300 Agricultural Commodities and Markets

A least 3 credits in food systems, policy, economics, ethics, or law:

- 11:020:333 Community Food Justice and Advocacy
- 11:020:337 Sustainability: Tackling Food Waste\
- 11:020:465 Feeding America's Cities
- 11:374:279 Politics of Environmental Issues (3) (also a SEBS core class)
- 11:374:289 Sustainable Food: Politics, Policy and Ethics (3)
- 11:374:313 U.S. Environmental Policy (3)
- 11:373:218 Sustainable Food Policy for Developing Countries (3)
- 11:373:323 Agriculture and Food Policy (3)
- 11:373:362 Natural Resource Economics
- 11:373:371 Food, Nutrition and Health Policy (3)
- 11:373:XXX Food Policy and other approved 11:373:XXX approved courses

Optional credits in education, communication, leadership, and youth development.

- 11:374:227 Agriculture in Society and Mass Media (3)

- 11:607:200 Principles of Leadership (3)
- 11:607:202 Leadership and Civic Engagement (3)
- 11:607:203 Foundations of Volunteer Management (3)
- 11:607:401 Foundations of Program Planning (3)
- 11:607:402 Building Community Partnerships (3)
- 11:607:484 Practical Leadership Applications in Agricultural Science (4)

Animal Science 067 (SEBS)

ANIMAL SCIENCE 067

Degree: B.S.

Director: Aparna Zama (zama@rutgers.edu)

Undergraduate Program Website: http://animalsciences.rutgers.edu/undergraduate

Department: Carol Bagnell

Chair: Nicholas Bello

Department Website: http://animalsciences.rutgers.edu

The animal science curriculum provides training and career development for students that have an interest in animal biology or related fields including veterinary medicine, biomedical research, laboratory animal care, companion animal-related careers, equine science, agribusiness, and livestock production and management. The biological sciences form a basis for the study and management of animals. Options are offered in preveterinary medicine/research, companion animal science, laboratory animal science, and equine and production animal science. .

Options within the Animal Science Major

1. Preveterinary Medicine/Research. Rigorous instruction and experience are provided in the biological and molecular basis of animal sciences in preparation for further education in medical or graduate studies. This option fulfills the academic course requirements of most U.S. veterinary colleges. Students completing this option may also enter medical and dental schools or pursue graduate studies leading to advanced degrees.

2. Companion Animal Science. Instruction and practical experience in companion animal science (selection, breeding/reproduction, nutrition, physiology, behavior) and appropriate business courses provide students the basic knowledge and skills to manage commercial or not-for-profit companion animal science enterprises.

3. Laboratory Animal Science. Instruction and practical experience are provided in research techniques and the care and use of laboratory animals. Many graduates choose careers in animal care programs as well as research laboratories of major pharmaceutical and related industries, many of which are located in New Jersey.

4. Equine and Production Animal Science. Instruction and practical experience in equine and production animal science (selection, breeding/reproduction, nutrition, physiology, behavior) and appropriate business courses provide students with the basic knowledge and skills needed to manage commercial or research enterprises in the horse and livestock (dairy/beef, poultry, sheep, swine) industries, or pursue careers in related/supporting fields such as the feed and animal health care industries, zoos, or wildlife preserves.

Animal Science 067 (SEBS)

Learning Goals

Learning Goals

Learning goals for students who successfully complete the program in animal science:

1. Students will gain a broad knowledge of the animal science discipline to understand the future of the field and its diversity
2. Students will apply biological and chemical principles and quantitative reasoning to concepts presented in core subject areas in animal science such as physiology, nutrition, genetics, and reproduction.
3. Students will develop an in-depth understanding of option-specific subject areas such as preveterinary medicine, equine and production animal science, companion animal science, and lab animal science.
4. Students will acquire skills for handling and caring for laboratory animals and livestock species.
5. Students will develop critical thinking skills to identify scientific questions and devise solutions, including designing experiments, analyzing and interpreting research data, and summarizing findings.
6. Students will develop oral and written communication skills to effectively deliver scientific and technical information to scientists as well as the public.
7. Students will develop an understanding of the principles of animal welfare and the ethical treatment of animals.

Animal Science 067 (SEBS)

Graduation Requirements for the Major

Graduation Requirements for the Major

Students matriculating fall 2015 or after and transfer students matriculating in 2016 and after must complete a goal-based Core Curriculum. The goal-based core is described here: http://sebs.rutgers.edu/core. Courses are certified for the Core Curriculum by a faculty committee. A current list of certified courses can be found here: http://sebs.rutgers.edu/core. Animal science major requirements are as described below.

For an up-to-date description of animal sciences major requirements, courses, and course sequences please refer to the program webpage at http://animalsciences.rutgers.edu/undergraduate.

Major Requirements for All Students Regardless of Matriculation Date

A. REQUIRED COURSES (35-37)

01:119:115,116 General Biology I, II (4,4) or 01:119:101,102 General Biology (4,4)
01:119:117 Biological Research Laboratory (2)
01:160:161,162 General Chemistry I, II (4,4) or equivalent
01:160:171 Introduction to Experimentation (1)

11:067:142 Animal Science (3)

11:067:300 Integrative Physiology (4) or 01:146:356 Systems Physiology (3)

11:067:327 Animal Reproduction (3)

11:067:328 Animal Genetics (3) or 01:447:380 Genetics (4 cr)

11:067:330 Animal Nutrition (3)

11:067:331 Animal Nutrition Laboratory (1)

B. OPTIONS (42-61)

1. Preveterinary Medicine and Research (57-61)

Required Courses (35-36)

01:160:307-308 Organic Chemistry (4,4)

01:160:311 Organic Chemistry Laboratory (2)

01:640:135 Calculus I (4) or 01:640:151 Calculus for Mathematical and Physical Sciences (4)

01:750:193-194 Physics for the Sciences (4,4) or equivalent

01:960:401 Basic Statistics for Research (3)

11:115:403,404 General Biochemistry (4,3) or 01:694:407,408 Molecular Biology and Biochemistry (3,3)

11:680:390 General Microbiology (4) or 01:447:390 General Microbiology (4)

Option-specific Electives: at least three of the following (9-12):

01:146:322 Human Histology (4)

01:146:328 Human Parasitology (3)

01:146:474 Immunology (3)

01:377:213 Functional Human Anatomy (4)

01:377:424 Human Anatomy (4)

01:640:136 Calculus II (4) or equivalent

01:694:315 Introduction to Molecular Biology and Biochemistry Research (3) or equivalent

11:067:390 Equine Nutrition (3)

11:067:391 Comparative Mammalian Anatomy (3)

11:067:398 Advanced Equine Health Care and Management (3)

11:067:404 Animal Diseases (3)

11:067:410 Neuroendocrinology (3)

11:067:416 In Vivo Lab Animal Techniques

11:067:430 Animal Microtechniques and Tissue Culture (4)

11:067:450 Endocrinology (4)

11:067:490 Pathophysiology (3)

11:067:491 Reproductive and Developmental Toxicology (3)

11:067:492 Molecular and Cellular Physiology (3)

11:126:481 Molecular Genetics (3) and 11:126:482 Molecular Genetics Laboratory (4)

11:216:441 Animal Behavior (3) or equivalent

11:370:406 Medical and Veterinary Entomology (3)

Experiential Learning courses (7); no more than 6 credits from practicum or research courses.

01:090:320 Peer Instructor Education (3)

11:015:483 Research Problems: Agriculture and Environmental Science (BA)

11:015:484 Research Problems: Agriculture and Environmental Science (BA)

11:067:150 Introduction to Animal Handling (P/NC 1)

11:067:175 Animal Handling, Fitting, and Exhibition (P/NC 1)

11:067:176 Animal Handling, Fitting, and Exhibition Supervisor (P/NC 1)

11:067:201 Cattle Practicum (2)

11:067:202 Small Ruminant Practicum (2)

11:067:203 Swine Practicum (2)

11:067:205 Laboratory Animal Practicum (2)

11:067:207 Horse Practicum (2)

11:067:210 Introduction to Veterinary Technology (3)

11:067:260 Animal Evaluation and Selection (3)

11:067:275 Laboratory Animal Science: Management and Techniques (3)

11:067:322 Dairy Cattle Artificial Insemination (1)

11:067:406 Farm Productivity Analysis (3)

11:067:411 Studies in Animal Science (BA)

11:067:414 Teaching in Animal Science (BA)

11:067:415 Leadership in Animal Science (BA)

11:067:416 In Vivo Lab Animal Techniques (3)

11:067:493,494 Research in Animal Science (BA, BA)

11:902:300,301,400 SPIN (3-6)

11:554:487,488 George H. Cook Scholars Program (3-6, 3-6)

Animal Science Electives (6)
At least 6 additional credits approved by the adviser, depending on the student's interests and career goals. See additional courses listed in the Animal Science (067) section of the Course Listings chapter.

2. Companion Animal Science (49)

Required courses (36)

01:160:209 Elementary Organic Chemistry (3) or equivalent

01:160:211 Elementary Organic Chemistry Laboratory (1) or equivalent

01:640:115 Precalculus College Mathematics (4) or equivalent

11:115:301 Introductory Biochemistry (3)

11:115:313 Introductory Biochemistry Laboratory (1)

11:373:121,122 Principles and Applications if Microeconomics/Macroeconomics (3,3)

11:067:101 Careers in Animal Science (3)

11:067:250 Companion Animal Science (3)

11:067:404 Animal Diseases (3)

11:704:441 Animal Behavior (3)

At least two of the following (6):

01:830:311 Learning Processes (3)

01:830:313 Physiological Psychology (3)

01:830:315 Comparative Psychology (3)

11:067:395 Animal Assisted Therapy (3)

11:067:460 Animals and the Law (3)

11:067:461 Topics in Companion Animal Science Issues (3)

11:216:240 Behavioral Biology (3)

11:216:269 Evolution of Animal Behavior (3)

Option-specific Electives (6):

11:067:275 Laboratory Animal Science: Management and Techniques (3)

11:067:322 Dairy Cattle Artificial Insemination (1)

11:067:336 Livestock Production and Management II (3)

11:067:384 Horse Management (3)

11:067:390 Equine Nutrition (3)

11:067:391 Comparative Mammalian Anatomy (3)

11:067:395 Animal Assisted Therapy (3)

11:067:398 Advanced Equine Health Care & Management (3)

11:067:401 Topics in Equine Science (3)

11:067:402 Equine Exercise Physiology (3)

11:067:406 Farm Productivity Analysis (3)

11:067:410 Neuroendocrinology (3)

11:067:413 Developing Future Leaders for the Equine Industry (1)

11:067:450 Endocrinology (4)

11:216:323 Ornithology (4)

11:216:325 Vertebrate Zoology (4)

Experiential Learning courses (7); no more than 6 credits from practicum or research courses.

01:090:320 Peer Instructor Education (3)

11:015:483 Research Problems: Agriculture and Environmental Science (BA)

11:015:484 Research Problems: Agriculture and Environmental Science (BA)

11:067:150 Introduction to Animal Handling (P/NC 1)

11:067:175 Animal Handling, Fitting, and Exhibition, Section DO (P/NC 1)

11:067:176 Animal Handling, Fitting, and Exhibition, Supervisor (P/NC 1)

11:067:201 Cattle Practicum (2)

11:067:202 Small Ruminant Practicum (2)

11:067:203 Swine Practicum (2)

11:067:205 Laboratory Animal Practicum (2)

11:067:207 Horse Practicum (2)

11:067:210 Introduction to Veterinary Technology (3)

11:067:275 Laboratory Animal Science: Management and Techniques (3)

11:067:322 Dairy Cattle Artificial Insemination (1)

11:067:336 Production Animal Management (3)

11:067:406 Farm Productivity Analysis (3)

11:067:411 Studies in Animal Science (BA)

11:067:414 Teaching in Animal Science (BA)

11:067:415 Leadership in Animal Science (BA)

11:067:416 In Vivo Lab Animal Techniques (3)

11:067:493,494 Research in Animal Science (BA,BA)

11:902:300,301,400 SPIN (3-6) in a companion animal-related field

11:554:487,488 George H. Cook Scholars Program (3-6, 3-6) or equivalent

3. Laboratory Animal Science (49)

Required Courses (36)

01:160:307-308 Organic Chemistry (4,4)

01:160:311 Organic Chemistry Laboratory (2) or 01:160:313,314 Organic Chemistry Laboratory (1,1)

01:640:115 Precalculus College Mathematics (4) or equivalent

01:960:401 Basic Statistics for Research (3)

11:067:205 Laboratory Animal Practicum (2)

11:067:275 Laboratory Animal Science: Management and Techniques (3)

11:067:404 Animal Diseases (3)

11:067:430 Animal Microtechniques and Tissue Culture (4)

11:373:121 Principles and Applications or Microeconomics (3)

11:680:390 General Microbiology (4) or 01:447:390 General Microbiology (4)

Experiential Learning courses (7); no more than 6 credits from practicum or research courses.

01:090:320 Peer Instructor Education (3)

11:015:483 Research Problems: Agriculture and Environmental Science (BA)

11:015:484 Research Problems: Agriculture and Environmental Science (BA)

11:067:150 Introduction to Animal Handling (P/NC 1)

11:067:175 Animal Handling, Fitting, and Exhibition (P/NC 1)

11:067:176 Animal Handling, Fitting, and Exhibition Supervisor (P/NC 1)

11:067:201 Cattle Practicum (2)

11:067:202 Small Ruminant Practicum (2)

11:067:203 Swine Practicum (2)

11:067:207 Horse Practicum (2)

11:067:210 Introduction to Veterinary Technology (3)

11:067:260 Animal Evaluation and Selection (3)

11:067:322 Dairy Cattle Artificial Insemination (1)

11:067:336 Production Animal Management (3)

11:067:406 Farm Productivity Analysis (3)

11:067:411 Studies in Animal Science (BA)

11:067:414 Teaching in Animal Science (BA)

11:067:415 Leadership in Animal Science (BA)

11:067:416 In Vivo Lab Animal Techniques (3)

11:067:493,494 Research in Animal Science (BA, BA)

11:902:300,301,400 SPIN (3-6)

11:554:487,488 George H. Cook Scholars Program (3-6, 3-6)

Option-specific Electives (6)

11:067:101 Careers in Animal Science (3)

11:067:322 Dairy Cattle Artificial Insemination (1)

11:067:336 Livestock Production and Management II (3)

11:067:384 Horse Management (3)

11:067:390 Equine Nutrition (3)

11:067:391 Comparative Mammalian Anatomy (3)

11:067:395 Animal Assisted Therapy (3)

11:067:398 Advanced Equine Health Care & Management (3)

11:067:401 Topics in Equine Science (3)

11:067:402 Equine Exercise Physiology (3)

11:067:406 Farm Productivity Analysis in the Animal Sciences (3)

11:067:410 Neuroendocrinology (3)

11:067:416 In Vivo Lab Animal Techniques (3)

11:067:450 Endocrinology (4)

11:067:460 Animals and the Law (3)

11:067:490 Pathophysiology (3)

4. Equine and Production Animal Science (50)

Required courses (33)

01:640:111,112 Precalculus Pts1, 2 (2,2) or 01:640:115 Precalculus College Mathematics (4) or 01:640:135 Calculus I (4) or 01:640:151 Calculus for Mathematical and Physical Sciences (4)

11:960:285 Introductory Statistics for Business (3)

11:067:336 Production Animal Management (3)

11:067:384 Horse Management (3)

11:067:406 Farm Productivity Analysis (3)

11:373:121,122 Principles and Applications of Microeconomics/Macroeconomics (3,3) or 01:220:102,103 Introduction to Microeconomics/Macroeconomics (3,3)

11:373:231 Introduction to Marketing (3) or 11:020:305 Starting and Managing a Small Farm (3)

11:373:241 Introduction to Management (3)

33:010:272 Introduction to Financial Accounting (3) or 11:373:200 Agricultural Accounting (3)

Experiential Learning courses (7); no more than 6 credits from practicum or research courses.

01:090:320 Peer Instructor Education (3)

11:015:483 Research Problems: Agriculture and Environmental Science (BA)

11:015:484 Research Problems: Agriculture and Environmental Science (BA)

11:067:150 Introduction to Animal Handling (P/NC 1)

11:067:175 Animal Handling, Fitting, and Exhibition, Section HO (P/NC 1)

11:067:176 Animal Handling, Fitting, and Exhibition Supervisor (P/NC 1)

11:067:201 Cattle Practicum (2)

11:067:202 Small Ruminant Practicum (2)

11:067:203 Swine Practicum (2)

11:067:205 Laboratory Animal Practicum (2)

11:067:207 Horse Practicum (2)

11:067:210 Introduction to Veterinary Technology (3)

11:067:260 Animal Evaluation and Selection (3) 11:067:275 Laboratory Animal Science: Management and Techniques (3)

11:067:322 Dairy Cattle Artificial Insemination (1)

11:067:411 Studies in Animal Science (BA), with equine research faculty

11:067:414 Teaching in Animal Science (BA)

11:067:415 Leadership in Animal Science (BA)

11:067:416 In Vivo Lab Animal Techniques (3)

11:067:493,494 Research in Animal Science (BA,BA), with equine research faculty

11:902:300,301,400 SPIN (3-6), in equine-related field

11:554:487,488 George H. Cook Scholars Program (3-6, 3-6)

Option-specific Electives (6)

11:067:310 Domestic Animal Behavior and Welfare (3)

11:067:390 Equine Nutrition (3)

11:067:391 Comparative Mammalian Anatomy (3)

11:067:398 Advanced Equine Health Care and Management (3)

11:067:401 Topics in Equine Science (3)

11:067:402 Equine Exercise Physiology (3)

11:067:404 Animal Diseases (3)

11:067:460 Animals and the Law (3)

11:216:360 Animal Physiological Ecology (3)

11:373:321 Economics of Production (3)

11:375:453 Soil Ecology (3)

11:776:301 The Grain Crops (3)

11:776:440 Soil Fertility (3)

Animal Science Electives

At least 6 additional credits approved by the adviser, depending on the student's interests and career goals. See additional courses listed in the Animal Science (067) section of the Course Listings chapter. Suggested courses are:

11:020:210 Introduction to Agriculture and Food Systems (3)

11:067:101 Careers in Animal Science (3)

11:067:260 Animal Evaluation and Selection (3), also EL

11:067:250 Companion Animal Science (3)

11:067:275 Lab Animal Science: Management and Techniques (3)

11:067:295 Biosecurity in Animal Agriculture (3)

11:067:296 Honors Seminar (3)

11:067:310 Domestic Animal Behavior and Welfare (3)

11:067:322 Dairy Cattle Artificial Insemination (1)

11:067:391 Comparative Mammalian Anatomy (3)

11:067:410 Neuroendocrinology (3)

11:067:430 Animal Microtechniques and Tissue Culture (4)

11:067:450 Endocrinology (4)

11:067:460 Animals and the Law (3)

11:067:490 Pathophysiology (3)

11:067:491 Reproductive and Developmental Toxicology (3)

11:067:492 Molecular and Cellular Physiology (3)

11:373:205 Small Business Essentials (3)

11:776:200 Modern Crop Production (3)

11:776:221 Principles of Organic Crop Production (3)

C. UNSPECIFIED ELECTIVES

In addition to courses meeting the above requirements, students can take other courses offered by the university, for which they meet the course eligibility requirements, to bring their total number of credits to the minimum of 120 (matriculated 2018 or later) or 128 (matriculated prior to 2018) required for graduation.

Biochemistry 115 (SEBS)

BIOCHEMISTRY 115

Degree: B.S.

Director: Lori A. White (lori.white@rutgers.edu)

Undergraduate Program Website: https://dbm.rutgers.edu/biochemistry/

Department Managing the Undergraduate Program in Biochemistry: Biochemistry and Microbiology

Department Chair: Max Haggblom

Department Website: http://dbm.rutgers.edu

The biochemistry major provides students with an integrated education in biochemistry that brings together the basics of biochemistry and its application to biological systems. The major takes advantage of the diversity of molecular/biochemical research and coursework that is offered at Rutgers atSchool of Environmental and Biological Sciences (SEBS) and the other schools. Students will apply their basic understanding of biochemistry to a specific area of interest, ranging from toxicology/pharmacology to food and nutritional sciences, microbiology, animal science, and plant biology. This redesigned and enhanced curriculum follows the recommendations of the American Society for Biochemistry and Molecular Biology (ASBMB) and has components of both a traditional course-centered approach to teaching and the more current content- and outcome-centered approach. The purpose of the major is to prepare students for futures in science, either through obtaining advanced degrees or through entering the workforce in the pharmaceutical, biotechnological and chemical industries, government service, communications, law, and many other fields.

Biochemistry 115 (SEBS)

Learning Goals

Learning Goals

Upon graduation, students will have an understanding of the following:

1. Biochemistry graduates will be able to describe and discuss the basic concepts of biochemistry, including metabolism, enzymatic structure and function, and regulation of gene and protein expression.
2. Biochemistry Major graduates will be able to apply the scientific method, stating and testing a hypothesis, and will be able to design experiments to solve problems in biochemistry.
3. Graduates will gain hands-on experience in current biochemical techniques and be able to evaluate and present scientific data.
4. Upon completion, students will be able to critically analyze scientific data and scientific papers and be able to be effective science communicators
5. Graduates will be able to discuss and communicate a fundamental understanding of ethical and current issues in biochemistry and demonstrate an understanding of the importance of ethics in scientific research.

Biochemistry 115 (SEBS)

Graduation Requirements for the Major

Graduation Requirements for the Major

Students matriculating prior to the fall semester 2015 in the School of Environmental and Biological Sciences (SEBS) must complete the SEBS general education requirements. In addition, students majoring in biochemistry must complete the major requirements described below.

Students matriculating fall 2015 or after and transfer students matriculating in 2016 and after must complete a goal-based Core Curriculum in place of general education requirements. The goal-based core is described here: http://sebs.rutgers.edu/core. Courses are certified for the Core Curriculum by a faculty committee. A current list of certified courses can be found here: http://sebs.rutgers.edu/core. Biochemistry major requirements are as described below.

For an up-to-date description of biochemistry major requirements, courses, and course sequences please refer to the program webpage at http://dbm.rutgers.edu/biochem.

Proficiency in Biochemistry (90 credits)

The major in Integrated biochemistry consists of the six parts listed immediately below. They are described briefly here; the specific requirements are listed below.

- **Life and Physical Sciences Core**
  These courses prepare students to enter the major. These courses are normally completed in the first two years of college.
- **Quantitative Methods**
  Quantitative reasoning, computational facility, and a grasp of calculus are essential skills for people to be well educated in molecular biosciences. As with the life and physical sciences core, students should normally complete this requirement within the first two years of college.
- **Biochemistry Core**
  This set of courses is required for all majors and prepares the student for both advanced coursework and research experience.
- **Professional Ethics**
  Ethical conduct has at least two components: general ethical behavior and the ethical implications for society at large as a consequence of advances in biochemistry. Although Contemporary Issues in Biochemistry will meet the formal requirement, all courses within the major will include ethical components and examples. In addition, all students in the major and in any of our courses will be required to adhere to a strict honor code.
- **Major-Related Experiential Learning**
  It is important that students be able to apply their knowledge of biochemistry in a laboratory setting. Therefore, all students will be required to take 6 credits of Experiential Learning. The School of Environmental and Biological Sciences requires 3 cr for graduation; therefore, Biochemistry Majors take an additional 3 cr. This can be accomplished through working in an academic laboratory at Rutgers, either at SEBS or the other campuses. This requirement can also be met through the George H. Cook Honors program, the General Honors Program, the Aresty Program, summer research opportunities (RISE or SURF), or through research experience through the Student Professional Internship Network (SPIN). The Research Experience may be structured to satisfy the college's experiential learning requirement.

- **Biochemistry Options**

    - **Biochemistry of Microbial Systems**
      This option blends biochemistry with microbiology, allowing students to become proficient in the biochemistry of microbial organisms and systems. This will include aspects of clinical microbiology and infection, as well as environmental microbiology. Microbial infections of higher organisms

are of continuing importance in human and animal health. Microorganisms also have profound environmental implications. Microbial systems detoxify toxic substances and contribute to nutrient cycling in the ecosphere. Another area of study is the use of microbial organisms to synthesize useful materials and to convert biomass to fuels.

- **Biochemical Toxicology**
  This option will allow the student to gain specific understanding of the study of toxic compounds. Toxicology is of critical importance in food and nutrition, the environment, and in pharmacological science. Understanding the biochemical effects allows one to design appropriate treatments of illness, and to learn what exposures must be avoided. An equally important second purpose, the study of how biochemical systems are made to go awry by toxic substances, illuminates normal functioning and development of organisms. This understanding applies equally to all animals, including humans, as well as to plants and microorganisms. It applies also to ecological communities of organisms, as toxic substances alter the interactions within ecosystems.
- **Biochemistry of Plant Systems**
  Plants are not only at the root of the human and animal food chains, they are one of the dominant components of the planet's ecosphere. Understanding their biochemistry is a large and growing area of basic and applied research and public policy development.
- **Protein and Structural Biochemistry**
  Biochemistry stands on two legs: structure and function. Neither can be understood without the other. The principles that confer thermodynamic stability--or the lack of it--on proteins, nucleic acids, and other biomolecules are universal to all forms of life as are the principles by which enzyme catalysis and other functions arise from three-dimensional structure. Evolution drives the formation of structure based on the functional needs of the organism and on the prior constraints imposed by the species' evolutionary history. In addition to basic understanding, study in this area develops the bases for protein design to solve practical problems.

Detailed Requirements

I. Life and Physical Sciences Core
The following are required
01:119:115/116 General Biology I, II (4,4)
01:119:117 Biological Research Laboratory (2)
01:160:161,162 General Chemistry I, II (4,4) or equivalent
01:160:171 Introduction to Experimentation (1)
01:750:193,194 Physics for the Sciences* (4,4) or
01:750:201,202 Extended General Physics (5,5) or
01:750:203,204 General Physics I, II (3,3)
01:160: 307,308 or 315,316 Honors Organic Chemistry I, II (4,4)
01:160:309 (2.5) or 311 Organic Chemistry Laboratory (2)
01:447:380 Genetics (4)

II.Quantitative Core
01:640:135 Calculus I for the Life & Social Sciences (4) OR
01:640:151 Calculus I for Mathematical & Physical Science (4)

01:640:136 Calculus II for the Life & Social Sciences (4) OR
01:640:152 Calculus II for Mathematical & Physical Science (4) OR
01:960:401) Basic Stats for Research (4) OR
01:960:211 Statistics I (4) and 01:960:212 Statistics II (4)
**FOR PROTEIN AND STRUCTURAL BIOLOGY OPTION Calc II is Required.

III. Biochemistry Core
11:115:201 Contemporary Issues in Biochemistry** (2)
11:115:403/404 General Biochemistry I, II (4,3)
Note: To enroll in 11:115:403,404 General Biochemistry (4,3), students, be they majors in biochemistry or not, must have completed 01:160:307-308 Organic Chemistry (4,4) or 160:315-316 Honors Organic Chemistry with grades of C or higher.
11:115:413/414 Experimental Biochemistry I, II (3,3)
11:115:409 Principles of Biophysical Chemistry (3) or
01:160:341Phys Chem Bio System (3)
11:115:491 Biochemical Communications (3)

***Normally taken in the sophomore year. Transfer students entering in the fall of the junior year will take it in the fall of that year. Among other matters included in it, this class will satisfy the ethics requirement for biochemistry majors.*

IV. Upper Level Lab Courses(two of the following courses)
11:115:436 Molecular Toxicology (3)
11:680:494 Applied Microbiology (4)
11:126:383 Nucleotide Sequence Analysis (3)
11:126:482 Molecular Genetics Laboratory (4)
11:126:484 Tools for Bioinformatic Analysis (3)
11:126:485 Bioinformatics (3)
11:776:452 Plant Tissue Culture (3)
01:146:357 Systems Physiology Lab (1)
01:160:251 Analytical Chemistry (3)
11:115:493/494 Research Problems in Biochemistry (3)
01:198:111 Intro to Comp Sci (3)
01:198:142 Data 100 Data Literacy (3)

V. Ethics
11:115:201 Contemporary Issues in Biochemistry (3)
11:115:321 Ethical Issues in Biochemical Research (3)
11:015:405 Ethics in Science (3)
11:015:433 Critical Scientific Thinking (3)
01:730:249 Bioethics (3)

VI. Research Experience (3 cr)

The curriculum is designed to provide students with the basics of laboratory experimentation followed by independent research experience in a research lab. A minimum of two semesters of research is required. With the approval of the undergraduate program director, Experiential Learning may be accepted to meet this requirement. Biochemical Communications provides the opportunity for students to present their own research, in both written and oral formats, as well as research from the biochemical literature.

11:115:493,494 (Research Problems in Biochemistry May be replaced by 11:015:497, 498 George H. Cook Honors Research,11:554:302 Aresty Research Assistantship

VII. Options:

Requires four classes from the specific lists below. Biochemistry electives, including option requirements, must equal at least 12 credits.

*Course(s) indicated by an * in each option is(are) required.*

Biochemistry of Microbial Systems

11:115:423 Fundamentals of Genomics (3)
11:680:390 General Microbiology (4)*
11:680:494 Applied Microbiology (4)
11:680:475 Microbiomes and Health (3)
11:680:480 Microbial Genetics andGenomics (3)
11:680:481 Microbial Physiology (3)
11:067:490 Pathophysiology (3)
11:126:486 Analytical Methods in Microbiology (3)
11:126:407 Comparative Virology (3)
11:126:481 Molecular Genetics (3)
01:146:481 Virology (3)
01:146:474 Immunology (3)
11:216:405 Evolution in Infectious Disease (3)
11:400:423 Food Microbiology

Biochemical Toxicology

11:115:421 Biochemistry of Cancer (3)
11:115:422 Biochemical Mechanisms of Toxicology (3)*
11:115:436 Molecular Toxicology Laboratory (3)
11:067:450 Endocrinology (4)
11:067:300 Integrative Physiology (4)
11:067:301 Integrative Physiology Lab (1)
11:067:490 Pathophysiology (3)
11:067:491 Reproductive and Developmental Toxicology (3)
01:146:356 Systems Physiology (3)
01:146:474 Immunology (3)
11:126:481 Molecular Genetics (3)
01:146:245 Fundamentals Of Neurobiology (3)

01:146:270 Fundamentals of Cell and Developmental Biology (3)
01:146:295 Essentials of Cell Biology and Neurobiology (3)
01:146:445 Advanced Neurobiology I (3)
01:146:447 Advanced Neurobiology II (3)

Biochemistry of Plant Systems
11:115:423 Fundamentals of Genomics (3)
16:765:520 Plant Biochemistry and Metabolism (3)*
11:776:382 Plant Physiology (4)
11:776:302 General Plant Pathology (3)
11:776:312 Medicinal Plants (3)
11:776:242 Plant Science (3)
11:776:305 Plant Genetics (4)
11:776:312 Medicinal Plants (3)
11:776:415 Hemp and Medical Cannabis (3)
11:776:403 Plant Science Techniques (3)
11:776:415 Fungi and Human Health (3)
11:776:438 Plants and Human Health (3)
11:776:452 Plant Tissue Culture & Engineering (3)

Protein and Structural Biochemistry
11:115:423 Fundamentals of Genomics (3)
11:115:485 Advanced Methods for 3D Structure Determination of Biomolecules (3)
11:216:405 Evolution in Infectious Diseases (3)
01:160:344 Introduction to Molecular Biophysics Research (3)
01:160:410 Introduction to Molecular Modeling (3)
01:160:418 Bioorganic Mechanisms (3)
01:160:480 Structural Biology, Structural Biophysics, and Chemical Biology of Transcription (3)01:640:251 Multivariable Calculus III (4)
01:694:412 Proteomics and Functional Genomics (3)
01:694:413 Chromatin and Epigenomics: The Science of Chromatin Modifications in Development and Disease (3)
01:160:480 Structural Biology, Structural Biophysics, and Chemical Biology (3)
11:115:485 Structural Biochemistry (3)

General Option (12 cr total)
12 credits of classes taken from any of the above lists

Unspecified Electives
In addition to courses meeting the above requirements, students can take other courses offered by the university, for which they meet the course eligibility requirements, to bring their total number of credits to the minimum of 120 (matriculated 2018 or later) or 128 (matriculated prior to 2018) required for graduation.

Bioenvironmental Engineering 117 (SEBS)

BIOENVIRONMENTAL ENGINEERING 117

Degrees: B.S., School of Engineering; B.S., School of Environmental and Biological Sciences

Department Managing the Undergraduate Program: Department of Environmental Sciences

Department Chair: Donna Fennell

Departmental Website: envsci.rutgers.edu

Undergraduate Program Director: A.J. Both

Undergraduate Program Website: envsci.rutgers.edu/academics/bee

Program Description

Beginning in fall 2020, Bioenvironmental Engineering 116 (4-year) and Bioenvironmental 117 (5-year) will be replaced by Environmental Engineering 366, a joint SEBS and SoE program.

Bioenvironmental engineering utilizes engineering principles and the physical, chemical, and biological sciences to prevent and solve environmental problems related to human activities. This program prepares students for immediate employment as practicing engineers with engineering consulting firms; drinking water, wastewater, solid waste, and air pollution treatment facilities; manufacturing industries; environmental regulatory and planning agencies; research laboratories; international development agencies, and public-interest groups. The undergraduate program in BioEnvironmental Engineering is accredited by the Engineering Accreditation Commission of ABET, https://www.abet.org, under the commission's General Criteria and Program Criteria for Environmental Engineering. This enables graduates to take examinations leading to a professional engineering license. The bioenvironmental engineering curriculum provides a strong foundation in engineering and physical, chemical, and biological sciences during the first two years. In the upper-level major courses of the program, these fundamentals are applied to multidisciplinary problem solving in various environmental fields.

Bachelor of science degrees from the School of Engineering and the School of Environmental and Biological Sciences are awarded upon completion of the five-year curriculum. A four-year program of study in bioenvironmental engineering is offered jointly by the School of Engineering and the School of Environmental and Biological Sciences starting in fall 2020.

Learning Goals

Learning Goals

https://soe.rutgers.edu/academics/majors-and-areas-study/environmental-engineering

Program Educational Objectives

- Graduates will meet the expectations of employers of environmental engineers.
- Qualified graduates will pursue advanced study if they so desire.
- Graduates will pursue leadership positions in their profession and/or communities.

Student Outcomes

1. An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics
2. An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors
3. An ability to communicate effectively with a range of audiences
4. An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts
5. An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives
6. An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
7. An ability to acquire and apply new knowledge as needed, using appropriate learning strategies

Graduation Requirements for the Major

Graduation Requirements for the Major

Students must complete both, the SEBS Undergraduate Core Curriculum and the graduation requirements for the major as described below.

For an up-to-date description of the bioenvironmental engineering major requirements, courses, and course sequences please refer to the program webpage at http://envsci.rutgers.edu/academics/bee.

SEBS UNDERGRADUATE CORE CURRICULUM (39 credits)

Contemporary Challenges(6 credits)*Two courses, one in each of the Contemporary Challenges areas: Diversities and Social Inequalities*[CC-D]*and Our Common Future*[CC-O]

Experiential Learning(3 credits)*Students must participate in a certified experience that meets this goal*[EL]

Natural Sciences(6 credits)*Students must take two courses, one each in two of the following areas: physical, biological, or environmental sciences*[NS]

Historical Analysis(3 credits)*Students must take one course*[HST]

Social Analysis(6 credits)*SEBS students must complete two courses, one in either social/cultural analysis or economic analysis, and one in governmental and regulatory analysis*[SCL]

Arts and Humanities(3 credits)*Students must complete one course*[AH]

Writing and Communication(6 credits)*Students must take 01:355:101 or its equivalent [WC] and one course that fulfills the learning goal tocommunicate effectively in modes appropriate to a discipline or area of inquiry*[WCD]

Quantitative and Formal Reasoning (6 credits) *Students must take two courses* [QQ; QR]

Graduation Requirements for the Major (129 credits)

A. REQUIRED COURSES (117 credits)

01:119:103 Principles of Biology (4) a)
01:160:159-160 General Chemistry for Engineers (3,3) a)
01:160:171 Introduction to Experimentation (1)
01:160:209 Elementary Organic Chemistry (3)
01:160:211 Elementary Organic Chemistry Laboratory (1)
01:640:151-152 Calculus for Mathematical and Physical Sciences (4,4) b)
01:640:244 Differential Equations for Engineering and Physics (4)
01:640:251 Multivariable Calculus (4)
01:750:123-124 Analytical Physics I (2,2)
01:750:227 Analytical Physics IIA (3) a)
01:750:229 Analytical Physics IIA Laboratory (1)
11:117:100 Introduction to Bioenvironmental Engineering (1)
11:117:333 Environmental Engineering Tools (3)
11:117:413,414 Unit Processes in Environmental Engineering I, II (3,3)
11:117:423,424 Environmental Unit Processes Laboratory I, II (1,1)
11:117:462 Design of Solid Waste Treatment Systems (3)
11:117:468 Hazardous Waste Treatment Engineering (3)
11:117:474 Air Pollution Engineering (3)
11:117:488,489 Environmental Engineering Design I, II (2,2) c)
11:216:351 Principles of Ecology (3)
11:374:279 Politics of Environmental Issues (3) d)
11:374:460 Environmental Law and Policy I (3)
11:375:201 Biological Principles of Environmental Sciences (3)
11:375:202 Chemical Principles of Environmental Sciences (3)
11:375:203 Physical Principles of Environmental Sciences (3)
11:375:303 Numerical Methods in Environmental Science (3) (or 300+ level statistics course)
11:375:423 Environmental Fate and Transport (3)
11:670:453 Air Quality Modeling (3) (or 11:375:322 Energy Technology and Its Environmental Impact)
11:680:201 Introduction to Microbiology (3)
14:180:215 Engineering Graphics (1)
14:180:243 Mechanics of Solids (3)

14:180:387 Fluid Mechanics (3)
14:180:389 Fluid Mechanics Laboratory (1)
14:440:127 Introduction to Computers for Engineers (3)
14:440:221-222 Engineering Mechanics (3,3)
14:540:343 Engineering Economics (3)
14:650:351 Thermodynamics (3)

B. ELECTIVES (12 credits must be fulfilled)

01:460:414 Hydrologic Processes (3)
01:460:428 Hydrogeology (3)
01:640:250 Introductory Linear Algebra (3)
01:640:350 Linear Algebra (3)
01:750:326 Computer-Based Experiments (4)
01:750:327 Modern Instrumentation (3)
11:117:450 Applied Instrumentation and Control (4)
11:117:494 Contaminant Hydrogeology Engineering (3)
11:117:495 Surface Water Quality Engineering (3)
11:117:496 Planning and Design of Land Treatment Systems (3)
11:117:497,498 Special Problems in Environmental Engineering (Up to 6 credits count toward technical electives)
11:375:312 Environmental Microbiology Laboratory (3)
11:375:322 Energy Technology and its Environmental Impacts (3)
11:375:340 Environmental Applications of Organic Chemistry (3)
11:375:346 Introduction to Atmospheric Chemistry (3)
11:375:360 Soils and Water (4)
11:375:407 Environmental Toxicology (3)
11:375:411 Environmental Microbiology (3)
11:375:421 Fundamentals of Air Pollution (3)
11:375:424 Air Sampling and Analysis Techniques (3)
11:375:430 Hazardous Wastes (3)
11:375:434 Principles of Industrial Hygiene (3)
11:375:444 Water Chemistry (3)
11:375:453 Soil Ecology (3)
11:573:232, 233 Fundamentals of Environmental Geomatics (3) and Laboratory (1) (4)
11:670:102 Introduction to Climate Science (3)
11:670:323 Thermodynamics of the Atmosphere (3)
11:670:324 Dynamics of the Atmosphere (3)
11:670:453 Air Quality Modeling (3)
11:680:390 General Microbiology (4)
14:180:372,374 Soil Mechanics (3) and Laboratory (1) (4)
14:180:382 Hydraulic and Environmental Engineering (3)
14:180:443 Advanced Hydraulics (3)
14:180:448 Elements of Hydrology (3)

14:650:462 Power Plants (3)
14:650:481 Heat Transfer (3)
14:xxx:2xx/3xx/4xx 200+ level engineering courses

Notes:

a) Fulfills Natural Sciences [NS] requirement of SEBS Core Curriculum (6 credits).
b) Fulfills Quantitative and Formal Reasoning [QQ, QR] requirement of SEBS Core Curriculum (6 credits).
c) Fulfills Experiential Learning [EL] requirement of SEBS Core Curriculum (3 credits).
d) Partially fulfills Social Analysis [SCL] and Contemporary Challenges [CC-O] requirements of SEBS Core Curriculum (6 credits).

Unspecified Electives
In addition to courses meeting the above requirements, students can take any other courses offered by the university, for which they meet the course eligibility requirements, to bring their total number of credits to the minimum of 159 required for graduation in bioenvironmental engineering.

Biological Sciences 119 (SEBS)

BIOLOGICAL SCIENCES 119

Degree: B.A.

Program Director: Martha Haviland (haviland@biology.rutgers.edu)

Director of Advising: Anne Carr-Schmid (schmid@biology.rutgers.edu)

Adviser: Joseph Ventola (ventola@rutgers.edu)

Students in the School of Environmental and Biological Sciences (SEBS) may choose the major in biological sciences, which is offered by the School of Arts and Sciences (SAS). Completion of the major prepares students for graduate study; for careers in government, industry, or secondary school teaching; and also satisfies the entrance requirements for medical and dental schools.

Students interested in more specialized majors in the life/biological sciences (such as agriculture and food systems; animal science; biochemistry; biotechnology; cell biology and neuroscience; ecology, evolution, and natural resources; exercise science; food science; genetics; marine sciences; microbiology; molecular biology and biochemistry; nutritional sciences; or plant biology) should refer to the relevant sections of the catalog and should also contact the program coordinator or adviser for the specific major of interest.

Learning Goals

Learning Goals

Our overarching goal for educating our students majoring in biological sciences is to inspire them to want to discover and understand the natural world. In the process of achieving this goal, we expect our students to acquire not only facts and concepts but also skills and perspectives. We hope that our learning goals will both prepare our students for a variety of career objectives and supply them with the tools to become lifelong learners in the ever-evolving world of biological sciences.

Learning Goals

I. To acquire the appropriate factual and conceptual knowledge that provides students with a foundation to further their education and career in the areas of life science or health science. Students will be able to demonstrate basic knowledge (e.g., identify, define, explain, etc.) of the concepts, practices, and principles that comprise the biological sciences.

II. To develop data analysis and statistical reasoning skills that prepare students for a society increasing reliant on the use of data and information. Students will be able to interpret/evaluate patterns in data presented in tables, figures, and graphs as well as be able to organize, summarize, and present data.

III. To develop the ability to use scientific reasoning as embodied by the structured process commonly known as the scientific method to empower students with the ability to generate and refine knowledge. Students will be able to evaluate and apply the practice of science.

IV. To develop critical thinking and problem-solving skills appropriate to prepare students to evaluate, synthesize, and generate knowledge that provides them with a competitive advantage to adapt to an evolving, global, and knowledge-based society. Students will be able to demonstrate application of higher order thinking (e.g., classify, diagnose, evaluate, synthesize, hypothesize, etc.). Students will develop an understanding of not only the connections within biology but also the connections between biology and other scientific disciplines.

Entry Requirements for the Major

Entry Requirements for the Major

Students wishing to major in biological sciences must have completed two semesters of General Biology and the Biological Research Laboratory with a grade of C or better in each course. Both semesters of General Biology must have been completed at the same institution or on the same campus at Rutgers. No more than two courses with a grade of D may be used to fulfill the requirements of the major. A 2.0 GPA must be maintained in the life sciences core and elective courses applied toward the major. Students must meet with an adviser before they can successfully declare their major.

Graduation Requirements for the Major

Graduation Requirements for the Major

A. Major Requirements (73 credits)

The major in biological sciences is offered by the School of Arts and Sciences (SAS). It involves 49 credits of required life science core courses, and 24 credits of approved life science electives. No more than two courses with a grade of D may be used to fulfill the requirements of the major. Please refer to the SAS section of the catalog for the Life Sciences for a full description of the requirements of the major.

B. Additional SEBS Requirements for Students Majoring in Biological Sciences

School of Environmental and Biological Sciences (SEBS) biological sciences majors matriculating fall 2015 or after and transfer students matriculating in 2016 must complete a goal-based Core Curriculum: http://sebs.rutgers.edu/core. A current list of certified courses can be found here: http://sebs.rutgers.edu/core.

SEBS biological sciences majors matriculating prior to the fall semester 2015 must complete major requirements as described in the SAS section of the catalog for the Life Sciences as well as the general education requirements.

Biotechnology 126 (SEBS)

BIOTECHNOLOGY 126

Degree: B.S.

Director: Paul Meers (paul.meers@rutgers.edu)

Program Website: http://biotech.rutgers.edu

The field of biotechnology has emerged as a major contributor to the advancement of agriculture, medicine, and environmental sciences. Recent developments in biotechnology, particularly molecular biology, promise major improvements in agricultural productivity, breakthroughs in human health care, and new solutions to environmental problems.

The biotechnology curriculum is designed to provide students with fundamental knowledge and laboratory skills in biotechnology, including applied genetics, molecular biology, biochemistry and a firm foundation in biology and the physical sciences. The primary objectives of the program are to broadly educate students for positions in the rapidly developing biotechnology industry and to prepare students for graduate and graduate/professional study in the life sciences. The strong life and physical sciences foundation of the curriculum involves extensive laboratory and coursework and research experience, as well as specializations in the following fields: animal biotechnology, microbial biotechnology, plant biotechnology, bioinformatics, and bioscience policy and management.

Learning Goals

Learning Goals

As a biotechnology major, each student will:

1. be able to describe the basic molecular concepts essential for understanding the field of biotechnology and the applications of biotechnology;
2. demonstrate proficiency in using the tools of biotechnology in an applied laboratory setting;
3. be able to find and read published scientific research in biotechnology and summarize and communicate that research effectively and critically;
4. acquire knowledge of ethical aspects of biotechnology and be able to analyze alternate viewpoints; and
5. learn to work as a team in the laboratory setting or group presentations.

By achieving these goals the student will have the knowledge base, technical proficiency, and communication skills for postbaccalaureate employment in the biotechnology field or for graduate/professional advanced education.

Biotechnology 126 (SEBS)

Entry Requirements for the Major

Entry Requirements for the Major

To take biotechnology (11:126) courses, students must have completed 01:119:115 General Biology and 01:160:161 General Chemistry with grades of C or better and achieved a cumulative grade-point average of 2.0 or higher. Students whose cumulative grade-point average falls below 2.0 will be allowed one semester to restore the average to 2.0 or higher.

Biotechnology 126 (SEBS)

Graduation Requirements for the Major

Graduation Requirements for the Major

For an up-to-date description of biotechnology major requirements, courses, and course sequences please refer to the program webpage at http://biotech.rutgers.edu.

SEBS UNDERGRADUATE CORE CURRICULUM (39 credits)

Contemporary Challenges (6 credits) *Two courses, one in each of the Contemporary Challenges areas: Diversities and Social Inequalities* [CC-D] *and Our Common Future* [CC-O]

Experiential Learning (3 credits) *Students must participate in a certified experience that meets this goal* [EBE]

Natural Sciences (6 credits) *Students must take two courses, one each in two of the following areas: physical, biological, or environmental sciences* [NS]

Historical Analysis (3 credits) *Students must take one course* [HST]

Social Analysis (6 credits) *SEBS students must complete two courses, one in either social/cultural analysis or economic analysis, and one in governmental and regulatory analysis* [SCL]

Arts and Humanities (3 credits) *Students must complete one course* [AH]

Writing and Communication (6 credits) *Students must take 01:355:101 or its equivalent [WC] and one course that fulfills the learning goal, communicate effectively in modes appropriate to a discipline or area of inquiry* [WCD].

Quantitative and Formal Reasoning (6 credits) *Students must take two courses* [QQ; QR]

Major Requirements for All Students Regardless of Matriculation Date

Proficiency in Biotechnology (70-74 credits)

Courses usually taken first year that are prerequisites for many required biotechnology courses (22):

- 01:355:101 Expository Writing (3) - required before or concurrently with General Biology 1
- 01:119:115 General Biology 1 (4) and 01:119:116 General Biology 2 (4)
- 01:119:117 General Biology Laboratory (2)
- 01:160:161 General Chemistry 1 (4) and 01:160:162 General Chemistry 2 (4)
- 01:160:170 Introduction to Experimentation (1)

Further courses for proficiency in biotechnology:

Quantitative Skills (7-8)

- 01:640:135 Calculus 1 (4)
- 01:960:401 Basic Statistics for Research (3)* or 01:640:136 Calculus 2 (4) or 01:960:212 Statistics II (3) (this course has prereqs)

*Basic Statistics for Research 01:960:401 (or equivalent - 01:960:212) required for bioinformatics option (see below)

Computer and information technology competence (3)

- 11:126:383 Nucleotide Sequence Analysis (3)

Professional Ethics (1.5)

- 11:126:111 Ethical and Scientific Challenges in Biotechnology (3)** or with approval,11:126:110 Concepts and Issues in Biotechnology (1.5)

***11:126:111 is certified in SEBS core curriculum categories NS-1 and -2 (natural science) and CCO-2 (contemporary challenges)*

Other biotechnology required courses:

- 01:447:380 Genetics (4) or 11:776:305 Plant Genetics (4) (only for plant biotechnology option)
- 11:680:390 General Microbiology (4)
- 01:750:193-194 Physics for the Sciences (4,4) or equivalent**
- 01:160:307-308 Organic Chemistry (4,4)**
- 11:115:403-404 General Biochemistry (4,3) or equivalent
- 11:115:313 Introductory Biochemistry Laboratory (1)
- 11:126:481 Molecular Genetics (3)
- 11:126:482 Molecular Genetics Laboratory (4)
- 11:126:401 Seminar in Biotechnology (1.5)
- 11:126:427 Methods and Applications in Molecular Biology (4)

**If Basic Statistics for Research is chosen to satisfy the Quantitative Skills requirement, it cannot also be used as an option elective.*

***Physics for the Sciences requires coregistration in a 0-credit laboratory section. If students opt for the 01:750:203-204 General Physics 1 and 2 sequence instead, they must also take a corresponding lab section in 01:750:205 and 206. Students intending to apply to medical or dental school and certain Ph.D. programs should be aware that many professional schools and some graduate schools require two semesters of calculus and 01:160:311 Organic Chemistry Laboratory and a physics laboratory.*

B. OPTIONS (14-18)

General Biotechnology (15-17)

Required Courses
Choose one of the following:
11:067:430 Animal Microtechniques and Tissue Culture (4)
or
11:776:452 Plant Tissue Culture (3)

Choose one of the following courses (3):
01:146:474 Immunology (3)
11:115:421 Biochemistry of Cancer (3)
11:115:422 Biochemical Mechanisms of Toxicology (3)
11:115:436 Molecular Toxicology Lab (3)
11:115:452 Biochemical Separations (3)
11:126:407 Comparative Virology (3)
11:126:484 Tools for Bioinformatic Analysis (3)
11:126:485 Bioinformatics (3)
11:126:486 Analytical Methods in Microbiology (3)

11:680:480 Microbial Genomics (3)
11:776:410 Plants for Bioenergy (3)
11:776:486 Functional Genomics for Research (3)

Electives (9-10)
Three additional electives from the required and elective courses listed in each of the
six biotechnology curriculum options. One to three credits of Research in Biotechnology may be substituted for an equal number of credits of elective work.

Animal Biotechnology (16-17)

Required Courses (7)
Two courses:
11:067:300 Integrative Physiology (3) or
11:067:492 Molecular and Cellular Physiology (3)
11:067:430 Animal Microtechniques and Tissue Culture (4)

Electives (9-10) - Choose from the following courses:
11:067:327 Animal Reproduction (3)
11:067:450 Endocrinology (3)
11:067:492 Molecular and Cellular Physiology (3)
11:126:407 Comparative Virology (3)
11:126:410 Process Biotechnology (3)
11:126:484 Tools for Bioinformatic Analysis (3)
11:126:485 Bioinformatics (3)
11:709:400 Advanced Nutrition I (3)
11:709:401 Advanced Nutrition II (3)
11:146:474 Immunology (3) with or without 01:146:475 Immunology Lab (1)
01:447:451 Genomes (3)
01:447:481 Topics in Human Genetics (3)
01:447:486 Evolutionary Genetics (3)
01:447:495 Cancer (3)
01:694:412 Proteomics and Functional Genomics (3)
01:694:492 Gene Regulation of Cancer and Development (3)
01:960:401 Basic Statistics for Research (3)
11:115:421 Biochemistry of Cancer (3)
11:115:422 Biochemical Mechanisms of Toxicology (3)
11:115:436 Molecular Toxicology Lab (3)
11:115:452 Biochemical Separations (3)
11:776:486 Functional Genomics for Research (3)

One to three additional credits of research in biotechnology may be substituted for an equal number of credits of elective work.

Bioinformatics (17)

Bioinformatics option students should take 01:640:135 Calculus 1 and 01:960:401 Basic Statistics for Research to satisfy their quantitative skills requirement.

Required Courses (17)
01:198:111 Introduction to Computer Science (4) or equivalent
01:198:112 Data Structures (4)
11:126:484 Tools for Bioinformatic Analysis (3) or 11:776:486 Functional Genomics for Research (3)
11:126:485 Bioinformatics (3)

Elective (3)
Choose from the general biotechnology electives or one approved programming course (suggested). Students in the option who would like to take Calculus 2 to meet medical school or graduate school requirements may use that course for this elective.

Bioscience Policy and Management (18)

Required Courses (15)
11:373:121 Principles and Applications of Microeconomics (3)
11:373:231 Introduction to Marketing (3)
11:373:241 Introduction to Management (3)
11:373:403 Innovation and Entrepreneurship (3)
11:373:404 Bioscience Policy (3) or suitable alternative

Electives (3)
One course from **either** of the following areas of concentration:

Business Management Concentration:
11:373:351 Business Finance I (3)
11:373:352 Economics of Futures Markets (3)
11:373:402 Global Marketing (3)
11:373:451 Business Finance II (3)
OR
Bioscience Policy Concentration:
11:373:323 Public Policy toward the Food Industry (3)
11:374:341 Social and Ecological Aspects of Health and Disease (3)
11:373:371 Food Health and Safety Policy (3)

Microbial Biotechnology (15.5-17)

Required courses (7)
11:680:494 Applied Microbiology (4)
and at least one from the list:
11:680:480 Microbial Genetics and Genomics (3)
or

11:680:481 Microbial Physiology (3)
or
11:680:491 Microbial Ecology and Diversity (3)

Electives (8.5-10)
01:146:328 Human Parasitology (3)
01:146:329 Human Parasitology Laboratory (1)
01:146:470 Advanced Cell Biology (3)
01:146:474 Immunology (3)
01:146:475 Laboratory in Immunology (1)
01:447:495 Cancer (3)
11:067:430 Animal Microtechniques and Tissue Culture (4)
11:067:492 Molecular and Cellular Physiology (3)
11:115:452 Biochemical Separations (3)
11:126:407 Comparative Virology (3)
11:126:410 Process Biotechnology (3)
11:126:486 Analytical Methods in Microbiology (4)
11:375:411 Environmental Microbiology (3)
11:400:419 Food Physical Systems (3)
11:400:423 Food Microbiology (3)
11:400:424 Food Microbiology Laboratory (1)
11:680:480 Microbial Genomics (3)
11:680:481 Microbial Physiology (3)
11:680:491 Microbial Ecology and Diversity (3)
11:680:492 Microbial Ecology and Diversity Laboratory (2)
11:126:484 Tools for Bioinformatic Analysis (3)
11:126:485 Bioinformatics (3)
11:776:486 Functional Genomics for Research (3)

One to three additional credits of research in biotechnology may be substituted for an equal number of credits of elective work.

Plant Biotechnology (15-16)

Required courses (6)
11:776:242 Plant Science (3)
11:776:452 Plant Tissue Culture and Engineering (3)

Electives, three courses (9-10):
01:146:470 Advanced Cell Biology (3)
01:694:492 Gene Regulation of Cancer and Development (3)
01:960:401 Basic Statistics for Research (3)
11:115:452 Biochemical Separations (3)
11:126:407 Comparative Virology (3)
11:126:410 Process Biotechnology (3)

11:126:413 Plant Molecular Biology (3)
11:400:419 Food Physical Systems (3)
11:680:486 Analytical Methods in Microbiology (3)
11:680:491 Microbial Ecology and Diversity (3)
11:776:310 Plant Propagation (3)
11:776:312 Medicinal Plants (3)
11:776:406 Plant Physiology (4)
11:776:405 Plant Biosecurity (3)
11:776:406 Plant Breeding (3)
11:776:410 Plants for Bioenergy (3)
11:776:452 Plant Tissue Culture and Engineering (3)
11:776:486 Functional Genomics for Research (3)

One to three additional credits of research in biotechnology may be substituted for an equal number of credits of elective work.

Ecology, Evolution, and Natural Resources 216 (SEBS)

ECOLOGY, EVOLUTION, AND NATURAL RESOURCES 216

(Formerly 704)

Degree: B.S.

Director: Kimberly N. Russell; 124 ENR Building, 848-932-9383, (Kimberly.russell@rutgers.edu)

Program Webpage: http://deenr.rutgers.edu/undergrad

Department of Ecology, Evolution, and Natural Resources Webpage:https://deenr.rutgers.edu

The ecology, evolution, and natural resources curriculum provides an understanding of how natural living systems function and evolve, and how they can be managed to conserve biodiversity while providing benefits to people. Students may pursue coursework that prepares them for traditional careers in resource management or they may take a broader array of courses that meets interests related to the conservation of natural resources and the ecology and evolution of natural systems. Graduates may pursue further study at the graduate level or find career opportunities in academia and in public or private organizations involved in the management of natural resources. The major provides a broad general understanding of the functioning, significance, and conservation of living systems. In addition to the general major curriculum, we offer two specialized disciplinary tracks with a more focused sequence of courses in 1) Natural Resources and Ecosystem Management, or 2) Urban Forestry (https://urbanforestry.rutgers.edu). The flexibility of this major is intended to meet a variety of student interests and needs. Students are encouraged to organize curricular and elective courses to fulfill simultaneously the requirements of a minor or certificate program. Particularly appropriate are the Minor in Sustainability; the Certificate in Environmental Geomatics; and the Certificate in Evolutionary Medicine.

Learning Goals

Learning Goals

Goal 1: Explain basic population, community ecology, and ecosystem-level concepts.

Goal 2: Describe the evolutionary origins, processes, and patterns over geologic time.

Goal 3: Create a natural resource management plan demonstrating an understanding of societal values and interests.

Goal 4: Effectively utilize software, hardware, field, and laboratory techniques commonly used in the study of ecology, evolution, and natural resource management.

Goal 5: Use quantitative methods to analyze and understand ecological systems, including interpretation of numeric and graphical data.

Goal 6: Communicate effectively orally and through written text and graphics.

Goal 7: Evaluate ecology, evolution, and natural resource management concepts in a global context.

Natural Resources and Ecosystem Management Track Specific Learning Goals:

Goal 3a: Utilize common forestry inventory methods and apply a fundamental knowledge of silviculture and ecology to create a forestry management plan that fosters the long-term capacity of the land and demonstrates an understanding of societal values and interests.

Goal 8: Evaluate conflicts and dilemmas through a lens of professional ethics.

Goal 9: Describe natural resource relevant laws and policies in New Jersey and at the national level.

Urban Forestry Track Specific Learning Goals:

Goal 3b: Utilize common urban forestry analysis tools to create a community forestry management plan demonstrating an understanding of societal values and interests as well as the long-term capacity of the urban forest.

Goal 10: Apply a fundamental knowledge of tree biology and professional ethics to tree care management and practice.

Goal 11: Describe urban forestry relevant laws and policies in New Jersey and at the national level.

The department has publicly posted mission statement and curricular learning goals on its website athttp://deenr.rutgers.edu/undergrad/.

Graduation Requirements for the Major

Graduation Requirements for the Major

EENR General Track

Biology: Required
01:119:115 Gen Bio I
01:119:116 Gen Bio 2
01:119:117 Bio Res. Lab

Chemistry & Physics - Choice of: 1 Year of Chemistry (with lab) OR 1 Year of Physics (with lab) OR 1 Semester of Each (with labs)
01:160:161 Gen Chem 1
01:160:162 Gen Chem 2
01:160:171 Intro to Exp.
01:750:203 Gen Physics 1
01:750:204 Gen Physics 2
01:750:205 Gen Physics 1 Lab
01:750:206 Gen Physics 2 Lab
01:750:193 Phys for the Sci. 1
01:750:194 Phys for the Sci. 2

Experienced Based Education: Required (3 cr)
11:216:440 Pract Exp in EENR
11:216:484 Res. Probl in EENR
11:216:376 Pract Fish.
11:216:377 Pract Forestry
11:554:488 GHCook
11:902:300 SEBS Internship I
11:902:301 SEBS Internship II
01:556:221/2 or 301/302 Aresty

Math - Choice of 1
01:640:135 Calculus 1 for Life/SS
01:640:151 Calculus 1 for Math/Phy

Core Courses: Required
11:216:104 Topics in EENR
11:216:217 Principles of Natural Resource Management
11:216:351 Principles of Ecology
11:216:352 Principles of Ecology lab
11:216:369 Analytical Methods (SEBS Core QQ)
11:216:431 FEEM
11:216:499 Capstone in EENR

Evolution Core: Choice of 1
11:216:486 Principles of Evolution
11:216:251 Fundamentals of Evolution
Required
11:216:252 Fundamentals of Evol. Lab

Ecology Electives: Choice of 2
11:216:272 Dendrology
11:216:317 Conservation Ecology (SEBS Core CCO/WCd)
11:216:332 Plant Ecology
11:216:360 Anim Phys. Ecol
11:216:450 Landscape Ecology
11:216:451 Global Change Ecology
11:216:487 Urban Ecology
11:216:296 Honors Seminar
11:216:435 Freshwater and Wetland Ecosystems

Evolution Electives: Choice of 2
11:216:240 Behavioral Biology
11:216:269 Evol of Animal Behavior
11:216:296 Honors Seminar
11:216:323 Ornithology
11:216:324 Invertebrate Zoology
11:216:325 Vertebrate Zoology
11:216:405 Evolution of Infec. Dis.
11:216:441 Animal Behavior
11:216:411 & 412 Plant Diversity & Evol

Natural Resources/Techniques Electives: Choice of 2
11:216:314 Forest Measurements
11:216:274 Field Techniques
11:216:371 Introduction to Remote Sensing
11:216:464 Wildlife Ecology & Cons
11:216:471 Silviculture
11:216:477 Forest Management Applications
11:573:232 & 233 Fund. of Geom. & lab
11:216:403 Urban Forestry
11:573:362 Intem. Envi. Geom.
11:573:462 Advan. Envi. Geom.
11:216:210 Nature Journaling
11:216:315 Conservation Techniques
11:216:320 Controversies in Sustainability
11:216:365 Arboriculture
11:216:474 Adv. Remote Sensing
11:216:475 Winter Field Ecology

Additional Courses: Choice of 4
Any 216 or 573 course listed above and/or:
11:216:101 Intro to Ecol & Evol (SEBS Core NS)
11:216:110 Evol Disease and Med (SEBS Core NS)
11:216:115 Evol Sex & Gender (SEBS Core NS/CCO)
11:216:199 Trees in the Environment (SEBS Core NS) Fall Only
Non-216 (approval possible for 200+ level courses)
11:067:300 Integrative Physiology
11:067:328 Animal Genetics
11:067:404 Animal Diseases
11:115:301 Introductory Biochemistry
11:115:423 Fundamentals of Genomics
11:370:300 Insects & The Environment
11:370:320 Insect Ecology and Evolution
11:370:308 Apiculture
11:370:355 Applied Acarology
11:370:380 Insect Biotechnology
11:370:381 Insect Biology
11:370:402 Aquatic Entomology
11:370:403 Insect Structure and Function
11:370:404 Insect Structure and Function II
11:370:406 Medical and Veterinary Entomology
11:370:409 Insect Classification
11:370:430 Urban Entomology
11:573:231 Fundamentals of Environmental Planning
11:573:322 Land Measurement and Mapping
11:573:371 Air-Photo Interpretation
11:373:362 Natural Resource Economics
11:373:363 Environmental Economics
11:374:313 U.S. Environmental Policy
11:374:314 Natural Resource Policy
11:374:325 Environmental Communication
11:375:346 Introduction to Atmospheric Chemistry
11:375:360 Soils and Water
11:375:407 Environmental Toxicology
11:375:411 Environmental Microbiology
11:375:421 Air Pollution
11:375:444 Water Chemistry
11:375:450 Terrestrial Carbon Cycle
11:375:453 Soil Ecology
11:628:309 Fishery Science
11:628:320 Dynamics of Marine Ecosystems
11:628:342 Marine Conservation
11:670:201 Elements of Meteorology
11:670:202 Elements of Climatology

11:680:491 Microbial Ecology and Diversity
11:776:210 Principles of Botany
11:776:242 Plant Science
11:776:305 Plant Genetics
11:776:306 Weed Science and Management
11:776:382 Plant Physiology
11:776:400 Fungi in the Environment
01:460:101 Introductory Geology
01:460:303 Paleontology
01:070:212 Life of Primates
01:070:348 Primate Behavioral Ecology
01:070:402 Primate Conservation
01:070:409 Primate Nutritional Ecology
01:160:209 Elementary Organic Chemistry
01:160:307 Organic Chemistry
01:160:308 Organic Chemistry
01:447:380 Genetics
01:640:136 Calculus II for the Life and Social Sciences
01:640:138 Calculus II for the Biological Sciences

EENR Urban Forestry Track

Biology: Required
01:119:115 Gen Bio I
01:119:116 Gen Bio 2
01:119:117 Bio Res. Lab

Chemistry: Required
01:160:161 Gen Chem 1
01:160:171 Intro to Exp.

Physics: Choice of 1
01:750:203 Gen Physics 1 & 01:750:205 Gen Physics 1 Lab
01:750:193 Phys for the Sci. 1

Experienced Based Education: Choice (3 cr)
11:216:440 Pract Exp in EENR
11:216:484 Res. Probl in EENR
11:216:377 Pract Forestry
11:554:488 GHCook
11:902:300 SEBS Internship I
11:902:301 SEBS Internship II

Math: Choice of 1
01:640:135 Calculus 1 for Life/SS
01:640:151 Calculus 1 for Math/Phy

Core Courses: Required
11:216:104 Topics in EENR
11:216:217 Principles of Natural Resource Management
11:216:351 Principles of Ecology
11:216:352 Principles of Ecology lab
11:216:369 Analytical Methods (SEBS Core QQ)
11:216:431 FEEM
11:216:499 Capstone in EENR

Ecology: Required
11:216:272 Dendrology
11:216:487 Urban Ecology

Evolution: Required
11:216:411 & 412 Plant Diversity & Evol

Natural Resources/Techniques: Required
11:216:371 Introduction to Remote Sensing
11:216:471 Silviculture
11:573:232 & 233 Fund. of Geom. & lab
11:216:403 Urban Forestry
11:216:365 Arboriculture

Additional Courses: Required
11:373:101 Economics, People, and the Environment (SEBS Core CCO/ECN/SCL)
11:573:202 Environmental Issues in US (SEBS Core CCO/WCd)
11:776:302 General Plant Pathology
11:374:250 Environmental Justice (SEBS Core CCD)
Additional Courses: Choice of 2
11:370:350 Agricultural Entomology and Pest Management
11:373:362 Natural Resource Economics (SEBS Core GVT/SCL)
11:375:360 Soils and Water
11:573:231 Fundamentals of Environmental Planning
11:776:202 Applied Physiology of Horticultural Crops
11:776:404 Soil Management for Sport and Landscapes
11:550:230 Environmental Design Analysis
11:216:199 Trees in the Environment
11:573:413 Open Space Planning

EENR: Natural Resources and Ecosystem Management Track

Biology: Required
01:119:115 Gen Bio I
01:119:116 Gen Bio 2
01:119:117 Bio Res. Lab

Chemistry: Required
01:160:161 Gen Chem 1
01:160:171 Intro to Exp.

Physics: Choice of 1
01:750:203 Gen Physics 1 & 01:750:205 Gen Physics 1 Lab
01:750:193 Phys for the Sci. 1

Experienced Based Education: Choice (3 cr)
11:216:440 Pract Exp in EENR
11:216:484 Res. Probl in EENR
11:216:377 Pract Forestry
11:554:488 GHCook
11:902:300 SEBS Internship I
11:902:301 SEBS Internship II

Math: Choice of 1
01:640:135 Calculus 1 for Life/SS
01:640:151 Calculus 1 for Math/Phy

Core Courses: Required
11:216:104 Topics in EENR
11:216:217 Principles of Natural Resource Management
11:216:351 Principles of Ecology
11:216:352 Principles of Ecology lab
11:216:369 Analytical Methods (SEBS Core QQ)
11:216:431 FEEM
11:216:499 Capstone in EENR

Ecology: Required
11:216:272 Dendrology
Ecology: Choice of 1
11:216:317 Conservation Ecology
11:216:332 Plant Ecology
11:216:360 Animal Physiological Ecology
11:216:450 Landscape Ecology
11:216:451 Climate Change Ecology
11:216:487 Urban Ecology
11:216:296 Honors Seminar

Evolution: Required
11:216:411 & 412 Plant Diversity & Evol

Natural Resources/Techniques (Required)
11:216:371 Introduction to Remote Sensing
11:216:471 Silviculture
11:573:232 & 233 Fund. of Geom. & lab

11:216:314 Forest Measurements
11:216:274 Field Techniques
11:216:464 Wildlife Ecology & Conservation
11:216:477 Forest Management Applications

Additional Courses: Required
11:373:101 Economics, People, and the Environment (SEBS Core CCO/ECN/SCL)
11:573:202 Environmental Issues in US (SEBS Core CCO/WCd)
11:776:302 General Plant Pathology
11:374:250 Environmental Justice (SEBS Core CCD)
Additional Courses: Choice of 2
11:370:350 Agricultural Entomology and Pest Management
11:373:362 Natural Resource Economics (SEBS Core GVT/SCL)
11:375:360 Soils and Water
11:573:231 Fundamentals of Environmental Planning
11:776:202 Applied Physiology of Horticultural Crops
11:776:404 Soil Management for Sport and Landscapes
11:374:201 Research Methods in Human Ecology
11:216:199 Trees in the Environment
11:375:453 Soil Ecology

Entomology 370 (SEBS)

ENTOMOLOGY 370

Degree: B.S.

Director: Chloe Hawkings (c.hawkings@rutgers.edu)

Program Webpage: http://entomology.rutgers.edu/undergraduate

Managing Department Webpage: http://entomology.rutgers.edu

The entomology major is the study of insects and their arthropod relatives. Insects are one of the most diverse and abundant organisms on the planet and play important roles in their ecosystems. Insects are exceptional models for understanding fundamental aspects of genetics, ecology, and evolution. Society benefits from diverse roles of insects as critical pollinators, sources of food in agricultural and wildlife food chains, as well as decomposers; on the flip side, many insects as well as ticks pose a danger to human health, our structures, and agriculture. Students in the Entomology major gain career opportunities in corporate and private agribusiness, urban pest management companies, scientific and technical organizations, public health agencies, local, state, and federal governments, and international organizations. Employment also exists in conservation biology, scientific policy, and environmental quality assurance. Our curriculum is flexible so students may expand their knowledge to interdisciplinary areas to meet their career goals. Students interested in the major or a double major should contact an academic advisor for additional information.

In addition to offering a major in entomology, the School of Environmental and Biological Sciences offers a minor in entomology.

Entomology 370 (SEBS)

Learning Goals

Learning Goals

Graduates of the undergraduate entomology major will have demonstrated:

1. Broad knowledge of the systematics, anatomy, physiology, ecology, and biochemistry of insects
2. Ability to explain and assess the detrimental and beneficial impacts that insects have on plants, animals, and humanity
3. Ability to design, implement, and analyze experiments or pest management programs and interpret data
4. Communication of entomological information to the scientific community and to the general public
5. Ethical principles required in professional fields

Entomology 370 (SEBS)

Graduation Requirements for the Major

Graduation Requirements for the Major

For an up-to-date description of the entomology program major requirements, courses, and course sequences, please refer to the program webpage at https://entomology.rutgers.edu/undergraduate.

SEBS UNDERGRADUATE CORE CURRICULUM (39 credits)

Options are chosen from lists of courses certified in each learning goal: https://sebs.rutgers.edu/core.

Note: The SEBS Core Curriculum requirements differ slightly from SAS Core Curriculum requirements

I. Contemporary Challenges (total 6 credits, 3 in CCO and 3 in CCD)
Suggested Course: 11:373:101 Economics, People, and Environment (CCO)
Suggested Course: 11:550:371 Agriculture and the Landscape (CCD)

II. Natural Sciences (total 6 credits, 3 in A and 3 in B)
A. Life Sciences (3 credits)
Required: 01:119:115 or 116 General Biology (4)

B. **Physical Sciences** (3 credits)
Required 01:750:193 Physics for the Sciences (4)

III. Historical Analysis (3 credits)
Suggested Course: 01:070:102 Introduction to Human Evolution

IV. Social Analysis (6 credits)
Suggested Course: 11:373:362 Natural Resource Economics
Suggested Course: 11:372:202 Environmental Issues in the USA
Suggested Course: 11:373:101 Economics, People, and Environment*
**also counted under Contemporary Challenge.*

V. Arts and the Humanities (3 credits)
Suggested Course: 01:190:101 Word Power
Suggested Course: 01:730:103 Introduction to Philosophy

VI. Writing and Communication (6 credits)
One from 01:355:101 Expository Writing (3) or 01:355:103 Exposition and Argument (3)
One from 01:355:302 Scientific and Technical Writing (3), 01:355:312 Writing for Biology and Natural Science (3), or 01:355:342 Science Writing (3)

VII. Quantitative and Formal Reasoning (6 credits)
Major required: 01:640:135 Calculus I (4)
One from 01:960:211 Statistics I (3), or 01:640:136 Calculus II for the Quantitative Social and Life Sciences (3)

VIII. Experiential Learning (3 credits)
All students are required to obtain practical experience in an area of entomology. Students can demonstrate appropriate employment or volunteer service with a public agency, private industry, nonprofit organization, or fulfill the requirement by research or field experience in suitable courses. Before starting an experienced-based course students must get the approval of their adviser. Possible courses include:
11:370:493, 494 Research problems in Entomology
11:015:497, 498 George H. Cook Scholars Program
11:902:300 and 400 SPIN Student to Professional Internship Network

Required: Entomology Major
Total 44-45 credits

01:119:115-116, 117 General Biology and Lab (4,4,2).
Note: 4 credits can be counted as SEBS core - Natural Sciences

01:160:161-162, 171 General Chemistry & Lab (4,4,1)
Note: 4 credits can be counted as SEBS core - Natural Sciences

01:640:135 Calculus I (4) or 01:960:211 Statistics I (3)
or 11:216:369 Analytical Methods in EENR (3)

11:216:351 Principles of Ecology (3)

11:370:350 Agricultural Entomology & Pest Management (3)
11:370:381 Insect Biology (4)
11:370:409 Insect Classification (4)
11:370:403 Insect Structure and Function (4)
11:370:407 Careers and Professional Development in Entomology (1)
11:370:495, 496 Seminar in Entomology (3)

Note: Seminar in Entomology is 1 credit per semester. Students are required to take a total of three times to equal 3 credits
Note: Juniors and seniors may, with the permission of the instructor and the graduate dean, register for appropriate graduate courses in entomology for elective credits.

Entomology Electives
At least 5 (15+ credits)

11:370:308 Apiculture (3)
11:370:355 Applied Acarology (3)
11:370:414 Forensic Entomology (3)
11:370:352 Toxicology of Insecticides (3)
11:776:408 Turfgrass Pest Science (4)
11:370:406 Medical & Veterinary Entomology (3)
11:370:430 Urban Entomology (3)
11:370:404 Insect Structure & Function (4)
11:370:415 Decomposition Ecology (3)
11:370:380 Insect Biotechnology (3)

Note: Additional entomology electives can be taken and counted for approved elective credits

Note: For Careers in Pest Management, the following entomology elective courses are recommended:
11:370:430 Urban Entomology (3)
11:370:352 Toxicology of Pesticides (3)
11:776:408 Turfgrass Pest Science (4)
11:370:380 Insect Biotechnology (3)

Approved General Electives
At least 8 (24+ credits)

11:573:232 Fundamentals of Environmental Geomatics (4)
11:216:371 Intro to Remote Sensing Image Analysis (3)
11:776:302 General Plant Pathology (3)

11:776:402 Principles of Weed Science (3)
11:776:405 Plant Biosecurity Issues & Technologies (3)
01:160:209 Elementary Organic Chemistry (4)
01:160:307-308 Organic Chemistry (4,4)
01:447:380 Genetics (4)
11:115:301 Introductory Biochemistry (3)
11:115:403 Biochemistry (4)
11:115:404 Biochemistry (4)
11:776:305 Plant Genetics (4)
11:216:302 Parasite Ecology (4)
11:216:317 Conservation Ecology (3)
11:216:324 Invertebrate Zoology (4)
11:216:332 Plant Ecology (4)
11:216:411 Plant Diversity & Evolution (3)
11:216:421 Wetland Ecology (3)
11:216:441 Animal Behavior (3)
11:216:464 Wildlife Ecology & Conservation (3)
11:375:407 Environmental Toxicology (3)
11:776:210 Principles of Botany (4)
11:776:382 Plant Physiology (4)
11:680:390 General Microbiology (4)
11:216:269 Evolution of Animal Behavior (3)
11:067:328 Animal Genetics (3)
11:126:481 Molecular Genetics (3)
11:126:484 Tools for Bioinformatic Analysis (3)
11:776:485 Functional Genomics for Research (3)
11:776:391 Weeds, Disease, and Insects of Plants (3)
11:020:436 Sustainable Agriculture (3)
11:020:321 Principles and Practices of Organic Farming (3)
11:375:453 Soil Ecology (3)

Note: For Careers in Pest Management, the following courses nonentomology elective courses are recommended:
11:115:301 Introductory Biochemistry (3)
11:115:403 Biochemistry (4)
11:115:404 Biochemistry (4)
11:375:407 Environmental Toxicology (3)

Environmental and Business Economics 373 (SEBS)

ENVIRONMENTAL AND BUSINESS ECONOMICS 373

Degree: B.S.

Director: Isaac Vellangany; Cook Office Building Room 112, 848-932-9131, isaacv@sebs.rutgers.edu

Program Webpage: http://dafre.rutgers.edu/ebe.html

Department of Environmental and Business Economics Webpage:http://dafre.rutgers.edu

The environmental and business economics program provides students with a foundation in the principles of economics, a knowledge of practical economic and analytical problem-solving techniques, an ability to apply economic concepts to the analysis of public and private policy issues, and an understanding of the institutional factors underlying and influencing policy decisions. The program qualifies students for a broad spectrum of positions in business and government, or for continued study at the graduate level.

To encourage students to develop depth in their understanding of the applications of economics, the curriculum offers the following four options:

Business Economics. This option includes all of the same foundation courses required in traditional business school curricula plus the additional analytical tools provided in the program's economic courses. It is this rich blend of courses such as Finance, Management, Marketing, Demand and Price Analysis, and Economics of Production that make graduates of this option so attractive to employers in business and industry as well as to those in government agencies and nonprofit organizations. Indeed, many of the graduates from this option are among the ranking economists, analysts, financial advisers, managers, marketing specialists, consultants, and policy directors in agencies and companies ranging from biotechnology and pharmaceutical industries on Wall Street to smaller organizations including small business and entrepreneurial ventures. The option familiarizes students both with analytical and decision-making techniques used in the business world and with the public and private institutional framework within which businesses operate. It is also appropriate for students who are interested in graduate studies in business management or economics.

Environmental and Natural Resource Economics. This option emphasizes the application of economics to policy issues associated with environmental problems and the utilization of natural resources. It familiarizes students both with analytical and decision-making techniques used in assessing problems of the environment and natural resources and with the institutional framework within which environmental policy must be developed. It is appropriate for students interested in employment either by private organizations concerned with environmental policies or by government agencies responsible for policies relating to the environment and natural resources and for students interested in graduate study in environmental or natural resource economics.

Food Industry Economics. This option emphasizes the application of economics in the areas of food policy, marketing, and finance. It is appropriate for students interested in employment in the food industry or by federal or state departments of agriculture and for students interested in graduate study in agricultural economics.

Food Science and Management Economics. This option, offered in cooperation with the food science curriculum, is designed for students with a strong interest in the management aspects of food science, process, production, and product development. While the option requirements of both programs are similar, students seeking degrees in environmental and business economics take additional courses in economics. This option is appropriate for students interested in employment in the food industry or in graduate study in agricultural economics, economics, or business administration.

Learning Goals

Learning Goals

After completing the program in environmental and business economics students will be able to:

1. utilize and explain core economic, management, financial, and accounting concepts;

2. apply economic theories and concepts to contemporary social issues, as well as the formulation of policy;

3. demonstrate quantitative reasoning skills;

4. recognize the role of ethical values in economic decisions; and

5. demonstrate critical and effective communication skills.

Environmental and Business Economics 373 (SEBS)

Entry Requirements for the Major

Entry Requirements for the Major

Official admission to the major requires completion of introductory courses in micro- and macroeconomics, a semester of calculus, and a semester of statistics, with grades of C or better. These four courses are prerequisites to junior- and senior-level courses in the required option areas. Students may, however, declare the major before completing these four courses.

Environmental and Business Economics 373 (SEBS)

Graduation Requirements for the Major

Graduation Requirements for the Major

For an up-to-date description of environmental and business economics major requirements, courses, and course sequences please refer to the program webpage at http://dafre.rutgers.edu/ebe.html.

SEBS UNDERGRADUATE CORE CURRICULUM (39 credits)

Contemporary Challenges (6 credits) *Two courses, one in each of the Contemporary Challenges areas: Diversities and Social Inequalities* [CC-D] *and Our Common Future* [CC-O]

Experiential Learning (3 credits) *Students must participate in a certified experience that meets this goal* [EL]

Natural Sciences (6 credits) *Students must take two courses, one each in two of the following areas: physical, biological, or environmental sciences* [NS]

Historical Analysis (3 credits) *Students must take one course* [HST]

Social Analysis (6 credits) *SEBS students must complete two courses, one in either social/cultural analysis or economic analysis, and one in governmental and regulatory analysis* [SCL]

Arts and Humanities (3 credits) *Students must complete one course* [AH]

Writing and Communication (6 credits) *Students must take 01:355:101 or its equivalent [WC] and one course that fulfills the learning goal, communicate effectively in modes appropriate to a discipline or area of inquiry* [WCD].

Quantitative and Formal Reasoning (6 credits) *Students must take two courses* [QQ; QR]

Major Requirements for All Students Regardless of Matriculation Date

Proficiency in Environmental and Business Economics (55-70 credits)

A. REQUIRED COURSES (22-23)

Quantitative Skills (10)

11:373:211 Applied Mathematical Concepts in Ag Economics I (4) or 01:640:1__ CALC1 (4)

11:373:215 Applications of Statistics in Business Economics (3) or 01:960:285 Introductory Statistics for Business (3) or 01:960:211 Statistics I (3)

11:373:200 Agricultural Accounting (3) or 33:010:272 Introduction to Financial Accounting (3)

Computer and Information Technology Competence (3)

11:373:210 Business Decision Computer Tools (4) or 01:198:170 Computer Applications for Business (3)

Professional Ethics

11:373:201 Corporate Social Responsibility (3)

Additional Requirements (9)

11:373:241 Introduction to Management (3)

11:373:321 Economics of Production (3)

11:373:422 Demand and Price Analysis (3)

B. OPTIONS (33-44)

Majors must complete all option-required courses with a grade of C or better. No more than one grade of D is allowed in the remaining option elective courses.

1. Business Economics (33-35)

Required courses (12)

11:373:201 Corporate Social Responsibility (3) or equivalent

11:373:231 Introduction to Marketing (3)

11:373:341 Organizational Dynamics (3)

11:373:351 Business Finance I (3)

Electives (21-23)

At least three of the following business/economics courses:

01:220:300 International Economics (3)

01:220:301 Money and Banking (3)

01:220:302 Labor Economics (3)

01:220:308 Introduction to Managerial Economics (3)

01:220:311 Methods of Cost Benefit Analysis (3)

01:220:322 Econometrics (3)

01:220:394 Economics of Capital Markets (3)

01:220:415 Portfolio Theory (3)

11:373:331 Economics of Food Marketing Systems (3)

11:373:352 Economics of Futures Markets (3)

11:373:402 Global Marketing (3)*

11:373:403 Innovation and Entrepreneurship (3)*

11:373:425 Econometric Applications (3)

11:373:451 Business Finance II (3)

11:373:465 Business Research (4)*

At least two of the following policy courses:

11:373:202 Sustainability Decision Tools (3)

11:373:218 Sustainable Food Policy for Developing Countries (3)

11:373:323 Agricultural and Food Policy (3)

11:373:335 Energy Economics and Policy (3)

11:373:361 Land Economics (3)

11:373:362 Natural Resource Economics (3)

11:373:363 Environmental Economics (3)

11:373:371 Food, Nutrition, and Health (3)

11:373:404 Bioscience Policy (3)

11:373:431 International Trade Policy (3)

11:374:313 Environmental Policy and Institutions (3)

11:374:314 Human Dimensions of Natural Resource Management (3)

01:790:237 Political Economy and Society (3)

01:790:305 Public Policy Formation (3)

01:790:327 International Political Economy (3)

01:790:337 American Political Economy (3)

01:790:338 Government and Business (3)

11:374:315 International Environmental Policy (3)

At least two additional courses in environmental and business economics (373), economics (220), or Calculus II.

2. Environmental and Natural Resource Economics (33-34)

Required courses (12)

11:373:201 Corporate Social Responsibility (3) or equivalent

11:373:361 Land Economics (3)

11:373:362 Natural Resource Economics (3)

11:373:363 Environmental Economics (3) or 01:220:332 Environmental Economics (3)

Electives (21-22)

At least three of the following courses in problem solving or policy analysis:

01:220:311 Methods of Cost Benefit Analysis (3)

01:220:386 Operations Research I (3)

01:220:395 Law and Economics (3)

01:790:305 Public Policy Formation (3)

01:960:337 Managerial Statistics (3)

11:372:232 Fundamentals of Environmental Geomatics (3)

11:373:351 Business Finance I (3)

11:373:425 Application of Econometrics in Agricultural Economics (3)

11:375:333 Environmental Law I (3)

11:375:409 Environmental Statement and Impact (3)

At least one of the following courses in policy applications:

01:450:140 The Greenhouse Effect (3)

01:450:370 Global and Regional Climate Change (3)

11:373:231 Introduction to Marketing (3)

11:373:335 Energy Economics and Policy (3)

11:373:404 Bioscience Policy (3)

11:374:315 International Environmental Policy (3)

11:375:301 Environment and Health (3)

11:375:410 Workshop in Environmental Assessment and Impact (3)

11:375:421 Air Pollution (3)

11:628:401 Science in Shoreline Management (3)

11:704:451 Ecosystems Ecology and Global Change (3)

At least one of the following interdisciplinary courses:

01:512:323,324 History of the North American Environment (3,3)

10:975:315 Theory and Methods of Land-Use Planning (3)

11:372:231 Fundamentals of Environmental Planning (3)

11:372:384 A Systems Approach to Environmental and Agricultural Issues (3)

11:373:431 International Trade Policy (3)

11:375:333,334 Environmental Law I,II (3,3)

11:704:351 Principles of Ecology (3)

Two additional courses in environmental and business economics (373), economics (220), or Calculus II.

3. Food Industry Economics (33-35)

Required courses (12)

11:373:201 Corporate Social Responsibility (3) or equivalent

11:373:231 Introduction to Marketing (3)

11:373:331 Economics of Food Marketing Systems (3)

11:373:341 Management: Human Systems Development (3)

Electives (21-23)

Four of the following courses, of which at least three must come from group A:

A. Courses in business strategy/policy

11:373:205 Small Business Essentials (3)

11:373:323 Agriculture and Food Policy (3)

11:373:351 Business Finance I (3)

11:373:352 Economics of Futures Markets (3)

11:373:371 Food, Nutrition, and Health (3)

11:373:402 Global Marketing (3)*

11:373:403 Innovation and Entrepreneurship (3)*

11:373:425 Econometric Applications (3) *or* 01:220:322 Econometrics (3)

11:373:451 Business Finance II (3)

11:373:465 Business Research (4)*

B. Courses in environmental/resource economics

11:373:335 Energy Economics and Policy (3)

11:373:361 Land Economics (3)

11:373:362 Natural Resource Economics (3)

11:373:363 Environmental Economics (3)

At least 3 credits of courses in one of the following areas: animal science (067), soils (in environmental sciences 375), food science (400), nutritional sciences (709), or plant biology (776).

At least two additional courses in environmental and business economics (373), economics (220) or Calculus II.

4. Food Science and Management Economics (43-44)

Required courses in the sciences (26)

01:160:209 Elementary Organic Chemistry (3)

11:400:201 Principles of Food Science (3)

11:400:301 Food Processing Technologies (4)

11:400:405 Sensory Evaluation of Foods (3)

11:400:411 Food Chemistry (3)

11:400:412 Food Product Development (3)

11:400:423 Food Microbiology (3)

11:680:390 General Microbiology (4)

Required courses related to business management (17-18)

11:373:201 Corporate Social Responsibility (3) or 11:400:314 Current Issues in Food Science (2) or equivalent

11:373:231 Introduction to Marketing (3)

11:373:321 Economics of Production (3)

11:373:323 Agricultural and Food Policy (3) or 11:373:371 Food, Nutrition, and Health (3)

11:373:351 Business Finance I (3)

11:373:422 Demand and Price Analysis (3)

**Fulfills SEBS Experience-Based Education requirement.*

Unspecified Electives

In addition to courses meeting the above requirements, students can take other courses offered by the university, for which they meet the course eligibility requirements, to bring their total number of credits to the minimum of 120 (matriculated 2018 or later) or 128 (matriculated prior to 2018) required for graduation.

Environmental Engineering 366 (ENG)

Environmental Engineering 366 (ENG)

Field of Study

Field of Study

Environmental engineers utilize engineering principles and physical, chemical, and biological science fundamentals to devise effective solutions for current and emerging environmental problems related to human activities. Environmental engineers practice in many areas: green infrastructure for urban stormwater and flood management; air pollution prevention and control; safe drinking water production and supply; sustainable treatment of wastewater and solid wastes; remediation of contaminated sites; ensuring industry compliance with environmental regulations; environmental health and safety in the workplace; alternative energy technologies; design of green buildings; and analysis and modeling of big data to guide societal responses to global environmental change.

This program prepares students for immediate employment as practicing engineers with engineering consulting firms; green energy and sustainable development companies; drinking water, wastewater, solid waste, and air pollution treatment facilities; manufacturing industries; environmental regulatory and planning agencies; industry and academic research laboratories; international development agencies; and public-interest groups.

The environmental engineering curriculum provides a strong foundation in engineering and the physical, chemical, and biological sciences during the freshman and sophomore years. In the upper-level major courses these fundamentals are applied to multidisciplinary problem solving in various environmental engineering fields. The faculty has extensive experience in teaching, research, and consulting with private firms and government agencies, and close ties to our strong alumni network.

The environmental engineering program is a unique joint program between the School of Engineering and the School of Environmental and Biological Sciences. Students matriculate into the environmental engineering program through the School of Engineering. The undergraduate program in Environmental Engineering is accredited by the Engineering Accreditation Commission of ABET, https://www.abet.org, under the commission's General Criteria and Program Criteria for Environmental Engineering. The program prepares graduates for taking the Fundamentals of Engineering (FE) examination pursuant to becoming a licensed professional engineer (PE).

Notes

*For the water resources concentration, it is optional to take 14:180:431 instead of 11:117:488/489.

Option electives may be selected for one of four concentrations from the following:

Water Resources: 11:117:494, 11:117:495, 11:117:497, 11:117:498, 11:372:232, 233, 11:375:434, 14:180:372, 374, 14:180:382, 14:180:443; 11:682:451; 11:628:425

Environmental Unit Processes and Remediation: 11:117:468, 11:117:494, 11:117:497, 11:117:498, 11:375:340, 11:375:407, 11:375:411, 11:375:434, 11:375:444, 11:375:453, 11:680:201

Air Quality: 11:117:497, 11:117:498, 11:375:346; 11:375:407, 11:375:424, 11:375:434, 11:670:453, 14:650:461

Sustainable Environmental Systems: 11:117:468, 11:117:497, 11:117:498, 11:375:360; 11:375:430, 11:375:434, 11:375:450, 11:375:474; 11:776:382; 14:332:443; 14:635:405; 14:440:378: 10:971:202: 11:020:340

Environmental Planning 573 (SEBS)

ENVIRONMENTAL PLANNING 573

Degree: B.S.

Director: Frank Gallagher (gallagher@sebs.rutgers.edu)

Program Webpage: https://landarch.rutgers.edu/environmental-planning.html

Managing Department Webpage: http://landarch.rutgers.edu

The Environmental Planning curriculum provides a broad educational experience emphasizing an understanding of planning and management of the physical and cultural environments. The program strives to consider our relationship with the land, in an effort to foster ethical planning solutions. A program that promotes sustainability regardless of location, strives for social equity, and envisions a post-industrial landscape that provides ecological services.

Environmental Planning Major: The environmental planning curriculum provides a broad educational experience emphasizing an understanding of planning and management of the physical and cultural environments. The program strives to consider our relationship with the land, in an effort to foster ethical planning solutions. The program promotes sustainability regardless of location, strives for social equity, and envisions a postindustrial landscape that provides ecological services.

Environmental Planning Minor: Environmental planning requires the integration of environmental information into the planning process and is concerned with the protection and enhancement of environmental systems while meeting demands for growth and development. This minor is intended for students from any discipline, who are interested in pursuing professional careers in environmental planning and related areas. It also provides a basis for graduate and professional studies. An environmental planning certificate program is also available for students in other programs of study as well as all minors of this major. View course requirements for minor.

Environmental Geomatics Minor: Environmental geomatics synthesizes a number of concepts and techniques, including remote sensing, spatial analysis, geographic information systems (GIS), and global positioning systems (GPS) that are used to improve the planning and management of natural resource systems. These techniques include the development of complex spatial databases from a wide range of data sources and the application of this information to solve environmental problems. The minor is intended for students interested in pursuing professional careers in environmental planning/management, remote sensing, and geomatics, and provides a basis for graduate and professional studies. An environmental geomatics certificate program also is available for students in other programs of study as well as all minors of this major. View course requirements for minor.

Green Technologies Minor: As individuals, businesses, and communities seek solutions to pressing environmental concerns, the green technology minor is positioned as an emerging source of innovation, entrepreneurialism, and action towards the development of sustainable land use practices. This minor seeks to provide students with a broad-based education in preparation for careers in landscape-related industries such as contracting, maintenance,

nursery production, and garden-center operations. While covering pragmatic issues associated with the maintenance and management of gardens and properties, the curriculum also gives students opportunities to study best practices and new approaches to on-site stormwater management, energy production, and healthy ecological systems. View course requirements for minor.

Urban Forestry Minor: Urban and community forestry is the fastest growing segment of the forestry profession, especially in the northeast, where the total expenditure of time and money on community forestry (nursery, planting, pruning, removals, and line clearance) exceeds that spent on woodlands. This certificate is designed to provide students with the necessary credentials for employment by providing the fundamental knowledge and expertise required for this field. View course requirements for minor.

Environmental Planning 573 (SEBS)

Learning Goals

Learning Goals

1) Understand, analyze, and incorporate natural features and systems in planning and land management practices.

2) Analyze and incorporate social, cultural, and behavioral factors in planning.

3) Understand the history of environmental planning and policy, including contemporary and sustainable practices and their impact on people and the land.

4) Evaluate implications of institutions and policy in terms of their ability to shape sustainable regions.

5) Effectively communicate with the public, communities, and policy makers on issues of land stewardship, environmental justice, and social well-being.

Environmental Planning 573 (SEBS)

Graduation Requirements for the Major

Graduation Requirements for the Major

SEBS UNDERGRADUATE CORE CURRICULUM (39 credits)

Contemporary Challenges (6 credits) *Two courses, one in each of the Contemporary Challenges areas: Diversities and Social Inequalities* [CC-D] *and Our Common Future* [CC-O]

Experiential Learning(3 credits)*Students must participate in a certified experience that meets this goal*[EL]

Natural Sciences(6 credits)*Students must take two courses, one each in two of the following areas: physical, biological, or environmental sciences*[NS]

Historical Analysis(3 credits)*Students must take one course*[HST]

Social Analysis(6 credits)*SEBS students must complete two courses, one in either social/cultural analysis or economic analysis, and one in governmental and regulatory analysis*[SCL]

Arts and Humanities(3 credits)*Students must complete one course*[AH]

Writing and Communication(6 credits)*Students must take 01:355:101 or its equivalent [WC] and one course that fulfills the learning goal, communicate effectively in modes appropriate to a discipline or area of inquiry*[WCD].

Quantitative and Formal Reasoning (6 credits) *Students must take two courses* [QQ; QR]

Graduation Requirements: Major in Environmental Planning (573)

The environmental planning curriculum provides a broad educational experience emphasizing an understanding of planning and management of the physical and cultural environments. The program strives to consider our relationship with the land, in an effort to foster ethical planning solutions. A program that that promotes sustainability regardless of location, strives for social equity and envisions a post-industrial landscape that provides ecological services.

Course Number	Credits	Name	SEBS
Requirement I	***9***	***Physical Sciences***	***Core***
01:119:103	3	Principles Biology	
Plus 3 credits from:			
01:450:101	3	Earth Systems *or*	
01:460:100	3	Planet Earth *or*	NS
11:776:102	3	Soil and Society	
Plus 3 credits from:			
11:670:102	3	Intro. Climate Science *or*	
11:670:101	3	Intro. Meteorology	
Requirement II	***4***	***Quantitative Methods***	
01:640:115	4	Pre-calculus College Math	
01:640:111	2	Pre-calculus I *plus*	QQ
01:640:112	2	Pre-calculus II	
Requirement III	***34***	***Environmental Planning Core***	
11:573:202	3	Environmental Issues	
11:573:231	3	Fundamentals of Environmental Planning	
11:550:231	5	Intro. Environmental Design	
11:573:232	3	Fundamentals of Environmental Geomatics	
11:573:233	1	Fundamentals of Environmental Geomatics Laboratory	
11:550:237	3	Visualization I-Drawing and Drafting	
11:573:413	3	Open Space Planning and Management	
11:550:241	4	Construction I: Mapping and Engineering	
Plus 5-6 credits from:			
11:573:232	3	Intro. Geomatics	
11:372:462	3	Adv. Geomatics	
11:573:409	3	Challenges and Opportunities	

11:550:301	3	Social and Cultural Aspects of Design	EBE
11:550:331	5	Environmental Planning Studio	
Plus 3 credits from:			
11:550:442	3	Planting Design	
11:373:202	3	Sustainability Decision Tools	
11:216:101	3	Intro. Ecology	
Requirement IV	***9***	***Environmental Sequence***	
3 credits from:			
11:375:360	4	Soils and Water	
11:776:440	3	Soil Fertility	
11:776:102	3	Soils and Society	
Plus 3 credits from:			
11:216:272	4	Dendrology	
11:550:233	3	Landscape Plants I	
Plus 3 credits from:			
11:375:101	3	Intro. Environmental Science	
11:573:445	3	Ecological Design and Stewardship	
11:216:332	3	Plant Ecology	
11:216:351	3	Principles of Ecology	
Requirement V	***6***	***History/Theory Sequence***	
11:550:230	3	Environmental Design Analysis	
11:550:250	3	History of Landscape Architecture	AH/ CC
11:573:302	3	Ecological History of North America	
Requirement VI	***9***	***Planning Electives***	
3 credits from:			
11:375:202	3	Water and Wastewater Treatment	
11:375:307	3	Solid Waste Management and Treatment	

10:762:335	3	Gender, Family, and Public Policy	
10:762/832/971:202	3	Designing Healthy Cities (studio format)	
11:373:362	3	Natural Resource Economics	
11:373:363	3	Environmental Economics	
11:573:437	3	Sustainability Decision Tools	
Plus 3 credits from:			
11:573:444	3	Watershed Planning and Management	
10:762:233	3	Urban World	
10:762/833/843:210	3	Principles of Public Policy	
10:762/971:201, 10:762:306	3	Intro. Urban Planning and Design	
10:762:413	3	Urban Revitalization	
Plus 3 credits from:			
11:550:332	5	Praxis Studio I (Junior) Section CD	EBE
11:550:332	5	Praxis Studio I (Junior) Section EC	EBE
11:550:332	5	Praxis Studio I (Junior) Section OD	EBE
11:550:234	3	Landscape Plants II	
11:550:235	3	Herbaceous Plants in the Landscape	
11:573:437	3	Spatial Data Visualization	
16:550:545	3	Intro. Geomatics	
11:216:474	3	Adv. Geomatics	
TOTAL	**71**		
Cannot use planning electives twice within the major.			

List of suggested but not required certificates/minors and required number of credits:

Certificate Programs:
Environmental Geomatics (19)

Minor Programs:
Agroecology (21-24)
Ecology, Evolution, and Natural Resources (20-23)
Environmental and Business Economics (21-23)
Entomology (19-26)
Environmental Policy, Institutions, and Behavior (21)
Environmental Sciences (21)
Marine Sciences (18)
Meteorology (18)
Plant Science (18-20)
Urban Forestry (21)

Environmental Policy, Institutions, and Behavior 374 (SEBS)

ENVIRONMENTAL POLICY, INSTITUTIONS, AND BEHAVIOR 374

Degree: B.S.

Director: Rachael Shwom (shwomrac@sebs.rutgers.edu)

Program Website: http://humeco.rutgers.edu/undergrad.asp

Managing Department (Department of Human Ecology): http://humeco.rutgers.edu

Program Description

Environmental policy, institutions, and behavior (EPIB) examines the human dimensions of environmental problems. It addresses such issues as how human actions affect the environment; how societies adapt to changes in natural resource availability; and how individuals, nations, and international agencies respond to environmental hazards. Courses in the program deal with local, regional, and national differences in the use of resources; social and environmental aspects of health and illness; alternative strategies for environmental management; ethical, moral, and legal dimensions of environmental and resource issues; and the roles of governmental and nongovernmental agencies in environmental affairs.

To understand these topics, students are exposed to a multidisciplinary view of the environment and draw upon concepts from a variety of fields, including anthropology, ecology, economics, geography, sociology, political science, and psychology.

The objectives of the curriculum are to teach basic concepts and methods from the social, biological, and physical sciences as they relate to the interactions among people and the environment; to train students in the techniques of empirical research; to provide opportunities for experiences in real-world situations; to guide students in acquiring practical skills such as environmental assessment, professional writing, data analysis, and demographic analysis; and to broaden students' knowledge regarding environmental problems and how people cope with them.

Graduates are prepared for careers in health and environmental agencies at all levels of government, nonprofit organizations in the United States and internationally, and private companies, including environmental consulting firms, pharmaceutical companies, and green businesses. Some students also pursue graduate or professional studies in the social sciences, public health and medicine, public administration, law, and international development.

Environmental Policy, Institutions, and Behavior 374 (SEBS)

Learning Goals

Learning Goals

Learning goals for the environmental policy, institutions, and behavior major:

Goal 1

Students graduating from the major will understand and analyze the varied perspectives offered by the social and natural sciences regarding the causes and consequences of social, ecological, and environmental change. This includes interactions among natural resources, climate, population, energy use and technology, health, forces of globalization, social institutions, and cultural values.

Graduates should be able to:

1.1 Describe major patterns and drivers of natural resource use, pollution, and climate and environmental change.

1.2 Identify different approaches to the governance and management of human activities that affect the environment, both in the United States and abroad, including institutions, property relations, management regimes, politics, and policies.

1.3 Explain characteristics of human populations, including population growth, demographic transitions, social stratification, consumption, and indicators of human welfare.

1.4 Describe technological trends affecting human well-being and the environment including energy use and development, biotechnology, and geospatial and communication technologies.

1.5 Evaluate major issues in health, including race, gender, and socioeconomic position, food and nutrition access and policies, cultural factors, and understanding of risk and vulnerability.

1.6 Discuss the dynamics of development and globalization, including historical antecedents, current trends and pathways, and local responses to global forces.

1.7 Explain how social forces, cultural values, and behavior affect human environmental interactions, including issues such as political and economic relations, inequality, access to resources, and interactions between human diversity and biological diversity.

Goal 2

Students will acquire the skills to use appropriate conceptual and methodological tools to structure inquiries about human-environment interactions.

Graduates should be able to:

2.1. Assess the relevant contexts for addressing environmental problems at the appropriate spatial, temporal, and organizational scale(s).

2.2. Identify the relevant biological, historical, sociocultural, governance, and political issues that need to be addressed.

2.3. Identify what constitutes valid and relevant evidence to address the question and demonstrate an ability to understand and work with quantitative information.

2.4. Conduct ethical primary and secondary research using appropriate methods and considering relevant community norms.

2.5. Analyze and interpret evidence.

2.6. Identify appropriate governance tools to manage human-environment impacts and be capable of engaging with regulatory, legislative, and other democratic processes.

2.7. Apply this understanding to identify policies and plans that address the problem.

2.8. Identify different decision-making processes and criteria for selecting from among alternatives.

2.9. Evaluate the alternatives' environmental and differentiated social consequences.

2.10. Identify relevant audiences, determine communication goals, and communicate the results in oral and/or written form in a manner effective for each targeted audience.

2.11. Work effectively in team settings.

Goal 3

Students will undertake their work guided by ethical considerations. They will identify their own values with respect to environmental, health, and food issues. They will evaluate and address the ethical dimensions and implications of related problems, assessments, plans, and communication, including their differentiated social impacts.

Environmental Policy, Institutions, and Behavior 374 (SEBS)

Graduation Requirements for the Major

Graduation Requirements for the Major

For an up-to-date description of environmental policy, institutions, and behavior major requirements, courses, and course sequences please refer to the program webpage at http://humeco.rutgers.edu/undergrad.asp.

SEBS UNDERGRADUATE CORE CURRICULUM (39 credits)

Contemporary Challenges (6 credits) *Two courses, one in each of the Contemporary Challenges areas: Diversities and Social Inequalities* [CC-D] *and Our Common Future* [CC-O]

Experiential Learning (3 credits) *Students must participate in a certified experience that meets this goal* [EL]

Natural Sciences (6 credits) *Students must take two courses, one each in two of the following areas: physical, biological, or environmental sciences* [NS]

Historical Analysis (3 credits) *Students must take one course* [HST]

Social Analysis (6 credits) *SEBS students must complete two courses, one in either social/cultural analysis or economic analysis, and one in governmental and regulatory analysis* [SCL]

Arts and Humanities (3 credits) *Students must complete one course* [AH]

Writing and Communication (6 credits) *Students must take 01:355:101 or its equivalent* [WC] *and one course that fulfills the learning goal, communicate effectively in modes appropriate to a discipline or area of inquiry* [WCD].

Quantitative and Formal Reasoning (6 credits) *Students must take two courses* [QQ; QR]

Major Requirements for All Students Regardless of Matriculation Date

Requirement V8: Foundation courses (15 credits)

11:374:101 Introduction to Human Ecology
11:374:279 Politics of Environmental Issues
11:374:305 Globalization, Development, and Environment
11:374:312 Environmental History
11:374:460 Environmental Law and Policy

Requirement V9: Methods (9 credits)

Statistics (choose one):
01:960:211 Statistics I
01:960:401 Basic Statistics for Research
10:762:205 Basic Statistical Methods for Policy, Planning, and Health
11:374:302 Data Analysis in Human Ecology

Required:
11:374:110 Theories and Reasoning in Human Ecology
11:374:201 Research Methods

Requirement V10: Math Proficiency

Notes: All students must place in Precalculus or higher or complete Intermediate Algebra (01:640:026)

Requirement V11: Skills (9 credits)

Required:
11:374:220 Environmental Solutions
11:374:280 Careers in EPIB

Communication, choose one:
11:374:225 Environment in Society and Mass Media
11:374:240 Visualizing Information: Storytelling with Data
11:374:310 Storytelling About Science
11:374:311 Environmental Writing
11:374:325 Environmental Communication

Requirement V12: Experiential Learning Requirement (3 credits)

Choose one:
11:374:399 Practicum in Sustainability
11:374:481 Watershed Management Internship
11:374:482 Climate Action Internship
11:374:483 Science and Communication Internship
11:374:490 Readings and Practicum in Human Ecology
11:374:492 Environmental Studies Internship

Requirement V13: Policy, Governance, and Management Cluster (3 credits)

Choose one:
11:374:175 Energy and Society
11:374:115 Water and Society
11:374:313 U.S. Environmental Policy
11:374:314 Natural Resource Policy
11:374:428 Marine Fisheries Policy
11:374:462 International Environmental Law

Requirement V14: Food, Health, and Disease Cluster (3 credits)

Choose one:
11:374:141 Health and Society
11:374:430 Risk, Health, and Safety
11:374:436 Segregation and Health
11:374:437 Culture and Health
11:374:438 Health in the Latino Community

Requirement V15: Globalization, Development, and Sustainability Cluster (3 credits)

Choose one:
11:374:289 Sustainable Food: Politics, Policy, and Ethics
11:374:299 Introduction to Sustainability
11:374:426 Climate Change Policy
11:374:429 Agrarian Landscapes

Requirement V16: People, Communities, and the Environment Cluster (3 credits)

Choose one:
11:374:223 Urban Society and Environment
11:374:322 Environmental Behavior
11:374:335 Communities and Environmental Change
11:374:440 Race and the Environment
11:374:416 Environmental Education
11:374:433 Environmental Justice

Requirement V17: Upper-Level Classes (6 credits)

Choose two additional 374 courses at the 300-400 level that are not being counted to fulfill other requirements. **Please note: 11:374:490, 11:374:491, and 11:374:492 cannot count toward this requirement.**

Requirement V18: Capstone (3 credits)

Choose one:
11:374:499 Capstone in Human Ecology
11:015:497 George H. Cook Honors
11:015:498 George H. Cook Honors
11:374:491 Capstone Independent Study

Unspecified Electives

In addition to courses meeting the above requirements, students can take other courses offered by the university, for which they meet the course eligibility requirements, to bring their total number of credits to the minimum of 120 (matriculated 2018 or later) or 128 (matriculated prior to 2018) required for graduation.

Environmental Sciences 375 (SEBS)

ENVIRONMENTAL SCIENCES 375

Degree: B.S.

Department: Environmental Sciences

Department Chair: Donna Fennell

Department Website: www.envsci.rutgers.edu

Undergraduate Program Director: Jeffra Schaefer

The environmental sciences program is designed to provide students with an understanding of the application of the biological, chemical, and physical sciences to problems in the environment. The core emphasizes the chemical, physical, and biological principles, and options and electives allow specialization in the study of air, water, or soils, as well as pollution and treatment sciences, and environmental health.

With the consultation of a faculty adviser, students can design a program to meet the requirements for graduate study or to provide the basis for a professional career in government, education, consulting, or industry.

The program offers a bachelor of science (B.S.) in environmental sciences, as well as a minor in environmental sciences. Within the B.S. program, we offer three options: environmental science, applied environmental science, and environmental health. The differences between the options are not large, but generally the environmental science option is more theoretical and is preferred by students considering graduate school, while the applied option is more practical and is intended to prepare students for careers in the environmental field. The environmental health option is geared toward careers in health, such as the occupational health and safety arena.

Environmental science offers a co-terminal 4+1 BS+MS program where students can pursue a 5-year joint Bachelor of Science (B.S.) and Master of Science (M.S.) degree in environmental science (website: https://envsci.rutgers.edu/academics/envsci_grad/). Likewise, students can apply for the Accelerated Bachelors and Masters of Public Health degrees (BS/MPH) at Rutgers (website: https://sph.rutgers.edu/academics/ba-ru.html). Students interested in this either opportunity should discuss specific course requirements with their adviser or the undergraduate program director of environmental science.

Students can meet the requirements for the 40-hour OSHA Hazardous Waste Operations and Emergency Response certification by including the following course in their program:

11:375:434 Principles of Industrial Hygiene (3)

Environmental Sciences 375 (SEBS)

Learning Goals

Learning Goals

Students completing this program will be able to:

1. Apply knowledge, skills, and techniques from the sciences and mathematics to identify, characterize and provide solutions to environmental problems
2. Design and conduct experiments, analyze, and interpret data to draw informed conclusions
3. Communicate technical information effectively (orally, in writing, and through electronic media)
4. Function effectively on teams to accomplish collaborative tasks
5. Recognize and discuss the ethical and professional responsibilities of environmental scientists in addressing contemporary environmental science issues and the impact of environmental science in a global and societal context

Environmental Sciences 375 (SEBS)

Graduation Requirements for the Major

Graduation Requirements for the Major

For an up-to-date description of the environmental science major requirements, courses and course sequences please refer to the program webpage at http://envsci.rutgers.edu/academics/envsci/graduation_requirements.html.

SEBS UNDERGRADUATE CORE CURRICULUM (39 credits)

Options are chosen from lists of courses certified in each learning goal: https://sebs.rutgers.edu/core.

Note: The SEBS Core Curriculum requirements differ slightly from SAS Core Curriculum requirements

Contemporary Challenges (6 credits) *Two courses, one in each of the Contemporary Challenges areas: Diversities and Social Inequalities* [CC-D] *and Our Common Future [CC-O]*

Experiential Learning (3 credits) *Students must participate in a certified experience that meets this goal* [EL]

Natural Sciences (6 credits) *Two courses, one each in two of the following areas: physical, biological, or environmental sciences* [NS]

Historical Analysis (3 credits) *One course* [HST]

Social Analysis (6 credits) *Two courses, one in either social/cultural analysis or economic analysis, and one in governmental and regulatory analysis* [SCL]

Arts and Humanities (3 credits) *One course* [AH]

Writing and Communication (6 credits) *01:355:101 or its equivalent* [WC] *and one course in communicating effectively in modes appropriate to a discipline or area of inquiry* [WCD]

Quantitative and Formal Reasoning (6 credits) *Two courses* [QQ; QR]

Graduation Requirements for the Major

Students matriculating prior to the fall semester 2015 in the School of Environmental and Biological Sciences (SEBS) must complete the SEBS general education requirements. In addition, students majoring in environmental sciences must complete the major requirements described below.

Students matriculating fall 2015 or after and transfer students matriculating in 2016 and after must complete a goal-based Core Curriculum in place of general education requirements. The goal-based core is described here: http://sebs.rutgers.edu/core. Courses are certified for the Core Curriculum by a faculty committee. A current list of certified courses can be found here: http://sebs.rutgers.edu/core. Environmental sciences major requirements are as described below.

For an up-to-date description of environmental sciences major requirements, courses, and course sequences please refer to the program webpage at http://envsci.rutgers.edu/academics/envsci/graduation_requirements.html.

PROFICIENCY IN THE ENVIRONMENTAL SCIENCES (63-82 credits)

1. Biological and Physical Sciences (24-34)

01:119:103 Principles of Biology (3) or 01:119:115-116 General Biology I & II (3,3)1
01:160:161-162 General Chemistry (4,4)1
01:160:171 Introduction to Experimentation (1)
01:160:209 Elementary Organic Chemistry (3) or 01:160:307-308 Organic Chemistry (4,4)
01:750:193-194 Physics for the Sciences (4,4) or 01:750:203-204 General Physics (3,3)1
11:216:351 Principles of Ecology (3)

2. Quantitative Skills (7)

Calculus I (4)2
Choose one of the following:

i. 01:960:211 Statistics I (3)3 or equivalent
ii. 11:375:303 Numerical Methods in Environmental Science (3)
iii. 11:573:232 Fundamentals of Geomatics (3)

3. Environmental Sciences (12)

11:375:201 Biological Principles of Environmental Sciences (3)
11:375:202 Chemical Principles of Environmental Sciences (3)
11:375:203 Physical Principles of Environmental Sciences (3)
11:375:310 Analytical Environmental Chemistry Laboratory (3)4

4. Environmental Science Lab Course, *choose one* (2-4)

11:375:312 Environmental Microbiology Laboratory (2)
11:375:360 Soils and Water (4)
11:375:424 Air Sampling Techniques (3)

Also choose from one of the following options:

Environmental Science Option (25)
01:640:1 Calculus 2 (4)
11:375:423 Environmental Fate and Transport (3)
Environmental Science Option Courses, choose *three* (9)
- 11:375:346 Introduction to Atmospheric Chemistry (3)
- 11:375:340 Environmental Applications of Organic Chemistry (3)
- 11:375:302 Water and Wastewater Treatment (3)
- 11:375:411 Environmental Microbiology (3)
- 11:375:444 Water Chemistry (3)
- 11:375:453 Soil Ecology (3)

Electives, *see below (9)*

Applied Environmental Option (24)
11:375:302 Water and Wastewater Treatment (3)
11:375:307 Solid Waste Management and Treatment (3)
11:375:430 Hazardous Waste (3)
11:375:407 Environmental Toxicology (3)
Electives, *see below (12)*

Environmental Health Option (23-25)
11:375:302 Water and Wastewater Treatment (3)
11:375:307 Solid Waste Management and Treatment (3)
11:375:407 Environmental Toxicology (3) or ENOH 0594 Environmental and Occupational Toxicology (3)*
10:832:335 Epidemiology (3) or PHCO 0502 Principles and Methods of Epidemiology (3)*
Microbiology course, choose one (2-4):
- 11:375:312 Environmental Microbiology Laboratory (2) (if not already used for other major requirement)
- 11:680:201 Introduction to Microbiology (3)
- 11:680:390 General Microbiology (4)

Electives, see below (9)

*School of Public Health classes for B.S./M.P.H students or B.S. students with permission.

ELECTIVES

Students can choose from any 300- or 400-level 375 course or any of the following list of non-375 courses. **Note that to satisfy as an elective course, it must not already be used to satisfy other environmental science major or option requirements.**

Possible electives:
11:680:201 Introduction to Microbiology (3)
11:680:390 General Microbiology (4)
11:374:460 Environmental Law and Policy I - Nature, Law, and Society (3)
11:375:302 Water and Wastewater Treatment (3)
11:375:303 Numerical Methods (3)
11:375:307 Solid Waste Management and Treatment (3)
11:375:322 Energy, Technology, and its Environmental Impact (3)

11:375:340 Environmental Applications of Organic Chemistry (3)
11:375:346 Introduction to Atmospheric Chemistry (3)
11:375:360 Soils and Water (4)
11:375:407 Environmental Toxicology (3)
11:375:411 Environmental Microbiology (3)
11:375:421 Principles of Air Pollution (3)
11:375:423 Environmental Fate and Transport (3)
11:375:424 Air Sampling and Analysis Techniques (3)
11:375:430 Hazardous Wastes (3)
11:375:434 Principles of Industrial Hygiene (3)
11:375:444 Water Chemistry (3)
11:375:450 The Terrestrial Carbon Cycle (3)
11:375:453 Soil Ecology (3)
11:375:474 Coastal Biogeochemical Cycles in a Changing World (3)

_____

1Satisfies SEBS Natural Science [NS] requirement
2Satisfies SEBS Mathematical or Formal Reasoning [QR] requirement
3Satisfies SEBS Quantitative Information [QQ] requirement
4Satisfies SEBS Discipline-Based Writing and Communication [WCd] requirement

Exercise Science 377 (SEBS)

EXERCISE SCIENCE 377

Offered in cooperation with the Department of Kinesiology and Health of the School of Arts and Sciences (SAS) students from the School of Environmental and Biological Sciences (SEBS) matriculating prior to the fall semester in 2015 must complete the SEBS general education requirements. SEBS students matriculating fall 2015 or after and transfer students matriculating in 2016 and after must complete a goal-based core curriculum in place of general education requirements. The goal-based core is described here: http://sebs.rutgers.edu/core. SEBS students are advised that the SEBS core is very similar to the SAS core, but it is not identical.

In addition, SEBS students majoring in exercise science must complete major requirements as described on the SAS program catalog page. The learning goals, options, entry requirements, major, and courses are also as described on the exercise science catalog pages in the Programs of Study and Courses for Liberal Arts and Sciences Students chapter of this catalog.

SEBS students who qualify for departmental honors may undertake the George H. Cook Scholars Program in conjunction with departmental honors.

Food Science 400 (SEBS)

FOOD SCIENCE 400

Degree: B.S.

Director: Chitra Ponnusamy (chitra.ponnusamy@rutgers.edu)

Program Webpage: http://foodsci.rutgers.edu/undergrad.html

Managing Department Webpage: http://foodsci.rutgers.edu

Food science is the study of the chemical, biological, and engineering aspects of food and its components. While this curriculum applies principles acquired in biology, chemistry, physics, and mathematics to food, there is emphasis on the development of important problem-solving skills, giving students experience in reasoning and the use of scientific and mathematical techniques. Attention also is devoted to current issues, innovations, and ethical issues in foods and food processing. Finally, students are given an opportunity to utilize their creative abilities in a course devoted to the development of new foods and food products.

All Food Science majors are required to complete basic sciences and Food Science courses, along with the current SEBS Core Curriculum. Starting Fall 2022, all Food Science majors must follow One Pathway to Food Science Major. Upon graduation, students can choose to apply for jobs in food, beverage, and related industries or pursue graduate studies.

Learning Goals

Learning Goals

Program Goal 1: Graduates will demonstrate and apply knowledge of the core competencies in food processing and engineering.

Program Goal 2: Graduates will demonstrate and apply knowledge of the core competencies in food chemistry and analysis.

Program Goal 3: Graduates will demonstrate and apply knowledge of the core competencies of food microbiology.

Program Goal 4: Graduates will demonstrate critical thinking and quantitative reasoning skills to solve technical and applied problems in food science.

Program Goal 5: Graduates will effectively communicate food science issues.

Program Goal 6: Graduates will demonstrate effective professional and leadership skills.

Graduation Requirements for the Major

Graduation Requirements for the Major

For an up-to-date description of food science major requirements, courses, and course sequences please refer to the program webpage http://foodsci.rutgers.edu/undergrad.html.

SEBS UNDERGRADUATE CORE CURRICULUM (39 credits)

Contemporary Challenges(6 credits)*Two courses, one in each of the Contemporary Challenges areas: Diversities and Social Inequalities*[CC-D]*and Our Common Future*[CC-O]

Experiential Learning(3 credits)*Students must participate in a certified experience that meets this goal*[EL]

Natural Sciences(6 credits)*Students must take two courses, one each in two of the following areas: physical, biological, or environmental sciences*[NS]

Historical Analysis(3 credits)*Students must take one course*[HST]

Social Analysis(6 credits)*SEBS students must complete two courses, one in either social/cultural analysis or economic analysis, and one in governmental and regulatory analysis*[SCL]

Arts and Humanities(3 credits)*Students must complete one course*[AH]

Writing and Communication(6 credits)*Students must take 01:355:101 or its equivalent*[WC]*and one course that fulfills the learning goal, communicate effectively in modes appropriate to a discipline or area of inquiry*[WCD]

Quantitative and Formal Reasoning(6 credits)*Students must take two courses*[QQ; QR]

Graduation Requirements for One Pathway to Food Science (400) Major
Starting Fall 2022, all Food Science majors must follow One Pathway to Food Science Major. One Pathway provides all majors with a unified, comprehensive education in Food Science major. All Food Science majors are required to complete basic sciences and Food Science courses, along with the current SEBS Core Curriculum. Upon graduation, students can choose to apply for jobs in food, beverage, and related industries or pursue graduate studies.

A. CORE + FOOD SCIENCE MAJOR REQUIRED COURSES (18 Cr)

QQ - 01:640:135/151 (4) Calculus I
QR - 01:960:211/285/401/11:373:215 (3) Statistics
NS - 01:119:115 (4) General Biology I
NS - 01:160:161 (4) General Chemistry I
EL - 11:400:493/494/11:902:300 SPIN (3) Experiential Learning

B. SEBS CORE COURSES (24 cr)

WC - 01:355:101 (3) Expository Writing
CC Contemporary Challenges (6)
A & H Arts and Humanities (3)
HST, SCL Historical, Social Analysis (9)
WCD 2nd writing course (3)

C. REQUIRED FOOD SCIENCE COURSES (38 cr)

11:400:103 OR 104 (3) Science of Food/Food and Health
[Satisfies NS-core requirements]. This course satisfies Food Science Program Learning Goal: Graduates will effectively communicate food science issues.
Prerequisites: None. Need to complete only one.

11:400:201+ 202 (5) Principles of Food Science + lab
This course satisfies the Food Science Program Learning Goal: Graduates will demonstrate and apply knowledge of the core competencies in food chemistry and analysis.
Prerequisites: General Biology I and II (01:119:115-116) and General Chemistry I and II (01:160:161-162). Pre- or corequisites for 201: Organic Chemistry (01:160:209 or 307).
Co-requisite for 202: Principles of Food Science (11:400:201)

11:400:301 (4) Food Processing Technologies
This course satisfies the Food Science Program Learning Goal: Graduates will demonstrate and apply knowledge of the core competencies in food processing and engineering.
Prerequisites: Physics I (01:750:193 or 201 or 203 and 205) and Calculus I (01:640:135 or 151).

11:400:302 (3) Food Process Engineering
This course fulfills Food Science Program Learning goal: Graduates will demonstrate and apply knowledge of the core competencies in Food Processing and Engineering.
Pre-requisite: Food Processing Technologies 11:400:301

11:400:304+305 (4) Food Analysis + Laboratory
This course fulfills Food Science Program Learning Goal: Graduates will demonstrate and apply knowledge of the core competencies in Food Chemistry and analysis. Students MUST register for 304 and 305 in the same semester.
Pre-requisites for 304: Principles of Food Science (11:400:201), Organic Chemistry (01:160:209)
Co-requisite for 305: Food Analysis (11:400:304).

11:400:314 (2) Current Issues in Food Science Food Laws
This course satisfies Food Science Program Learning Goal: Graduates will effectively communicate food science issues.
Prerequisite: Principles of Food Science (11:400:201).

11:400:405 (3) Sensory Evaluation of Foods
This course satisfies Food Science Program Learning Goal: Graduates will demonstrate critical thinking and quantitative reasoning skills to solve technical and applied problems in food science.
Prerequisite: Statistics (01:960:211/285/401 or 11:373:215).

11:400:411+ 413 (4) Food Chemistry + laboratory
This course satisfies Food Science Program Learning Goal: Graduates will demonstrate and apply knowledge of the core competencies in food chemistry and analysis.
Prerequisites for 411: Principles of Food Science 11:400:201; Must have previously taken Biochemistry (11:115:301 or 403) or be registered this semester.
Co-requisite for 413: Food Chemistry 11:400:411

11:400:412 (3) Food Product Development
This course satisfies Food Science Program Learning Goal: Graduates will demonstrate effective professional and leadership skills.
Prerequisites: Food Processing Technologies (11:400:301) and Current Issues in Food Science and Food Law (11:400:314) and Food Chemistry (11:400:411) and Sensory Evaluation of Foods (11:400:405).
Pre-or corequisite: Food Microbiology (11:400:423).

11:400:419 (3) Food Physical Systems
This course satisfies Food Science Program Learning Goal: Graduates will demonstrate and apply knowledge of the core competencies in Food Chemistry and analysis.
Prerequisite: Biochemistry 11:115:301 or 403.

11:400:423+ 424 (4) Food Microbiology + laboratory
This course satisfies Food Science Program Learning Goal: Graduates will demonstrate and apply knowledge of the core competencies of food microbiology.
Prerequisite: Elementary Organic Chemistry (01:160:209) OR Orgo I (01:160:307) OR Introduction to Microbiology (11:680:201) OR General Microbiology (01:447:390/11:680:390)
Pre- or corequisite: Food Microbiology 11:400:423

D. REQUIRED SCIENCE COURSES (22 cr)

01:160:209+ 211 (4)	Elementary Organic Chemistry + lab
01:750:193/201/203,205(4)	Physics with lab
11:115:301 OR 01:694:301 (3)	Biochemistry
01:119:116 + 117 (6)	General Biology II + lab
01:160:162 + 171 (5)	General Chemistry II + lab

E. ELECTIVE COURSES (18 cr)
Students can choose their area of specialization using elective course credits. There is sufficient flexibility for each student to add a minor of their choosing (although some minors will require credits beyond the 120 required for graduation.) This flexibility allows students to build expertise in a complementary field (Microbiology, Spanish, Entrepreneurship, etc.) that may enhance their career prospects in food technology (Business Economics for management positions, Sustainability for specialized positions, Animal Sciences to work within pet food industries, etc.) or even to satisfy a purely personal academic interest (philosophy, history, linguistics, etc.).

Elective Courses offered by the Food Science department

11:400:106 (3) Food as Medicine
11:400:107 (3) Foods: from Field to Table
11:400:315 (3) Food and Sustainability: Study abroad in Thailand
11:400:316 (3) Sustainable Food Production: Study abroad in Ireland
11:400:350 (1.5) Wine Basics from Field to Glass
11:400:410 (3) Nutrigenomics and Nutraceuticals
11:400:422 (3) Food Safety: Fads, Facts, and Politics
11:400:490 (3) Applying immersive learning to rural Agro-Food issues: Study Abroad in Southern India

Landscape Architecture 550 (SEBS)

LANDSCAPE ARCHITECTURE 550

Degree: B.S.L.A.

Director: Holly Grace Nelson (Holly.Nelson@rutgers.edu)

Program Webpage: http://landarch.rutgers.edu/landscape-architecture-program

Managing Department Webpage: http://landarch.rutgers.edu/index.html

Landscape Architecture is the planning and design of outdoor environments at the residential, city, and regional scale. The program engages students in art, science, theory, and practice with a commitment to equitable, sustainable, and resilient solutions that contribute to human and environmental health and well-being.

Our nationally accredited program prepares students for Landscape Architecture licensure through a creative, analytic, and interdisciplinary approach to stewardship of the environment. Set in the School of Environmental and Biological Sciences, the program examines the ideas shaping the interaction of people and landscape and integrates scientific knowledge creatively in the designed environment. Interdisciplinary courses with environmental planning students provide a mutual foundation for both majors, promote collaboration between programs, and sets the groundwork for professional practice where landscape architects are part of or lead interdisciplinary teams of planners, engineers, ecologists, and social scientists.

The program also has a Minor in Landscape Design for students interested in
exploring design solutions to the environmental issues of our time--climate change, demographic shifts, increasing income inequality, food scarcity, and the spread of global pandemics to make our world more sustainable, viable, just, healthy, inclusive, and beautiful.

Learning Goals

Learning Goals

Our Program's Learning Goals

Explore . . . the potential of space and spatial relationships to create socially vibrant and culturally inclusive design solutions.

Analyze . . . and thoughtfully incorporate natural features and systems to create enduring and ecologically sensitive design solutions.

Understand . . . social, cultural, and behavioral factors in the historical development of designed and everyday landscapes to equitably shape our public realm.

Master . . . technical and industry standards to effectively and sustainability foster safe accessible environments using the materials, methods, and technologies of site design and engineering.

Apply . . . design principles at large as well as small scales.

Demonstrate . . . knowledge of the professional practice skills required for the Landscape Architecture Accreditation licensure exam and manifest sensitivity to issues of power.

Communicate . . . creatively with the public, communities, and policymakers in graphic, written, and verbal formats to advance social justice

Landscape Architecture 550 (SEBS)

Graduation Requirements for the Major

Graduation Requirements for the Major

For an up-to-date description of the landscape architecture major requirements, courses, and course sequences please refer to the program webpage at http://landarch.rutgers.edu/landscape-architecture-program.

SEBS UNDERGRADUATE CORE CURRICULUM (39 credits)

Contemporary Challenges (6 credits) *Two courses, one in each of the Contemporary Challenges areas: Diversities and Social Inequalities* [CC-D] *and Our Common Future* [CC-O]

Experiential Learning (3 credits) *Students must participate in a certified experience that meets this goal* [EL]

Natural Sciences (6 credits) *Students must take two courses, one each in two of the following areas: physical, biological, or environmental sciences* [NS]

Historical Analysis (3 credits) *Students must take one course* [HST]

Social Analysis (6 credits) *SEBS students must complete two courses, one in either social/cultural analysis or economic analysis, and one in governmental and regulatory analysis [SCL]*

Arts and Humanities (3 credits) *Students must complete one course* [AH]

Writing and Communication (6 credits) *Students must take 01:355:101 or its equivalent* [WC] *and one course that fulfills the learning goal, communicate effectively in modes appropriate to a discipline or area of inquiry* [WCD].

Quantitative and Formal Reasoning (6 credits) *Students must take two courses* [QQ; QR]

Graduation Requirements: Major in Landscape Architecture (550)

No more than one course with a grade equal to D may be used from (landscape architecture courses) in any requirements or conditions.

Year 1

11:460:100* Planet Earth or 01:450:101 Earth Systems

01:640:115* Pre-Calculus or 11:640:111 and 11:640:112 or 11:640:135 or 11:640:139 or 11:640:151

11:573:231 Fundamentals of Environmental Planning

11:550:237* Landscape Drawing and Drafting

11:550:133* Architectural Design

Core requirements (contemporary challenges, writing, economics, social analysis). (See also http://landarch.rutgers.edu/courses.html for core classes met by major requirements.)

Year 2

11:550:231	11:550:232
11:550:241*	11:573:232
11:550:233	11:573:233
11:119:103*	11:550:341
	11:550:345, 11:550:347

Year 3

11:550:331	*11:550:332*
11:550:250*	11:550:340
11:216:332	11:550:301* or Theory Elective (see DN List)
or 11:216:101	
11:550:350	Plant/Ecology Elective (see DN List)

Year 4

11:550:431	11:550:432 or 11:550:333 or 11:550:443
11:550:441	11:550:435
Electives	11:550:499

*Meets core requirement

Marine Sciences 628 (SEBS)

MARINE SCIENCES 628

Marine Sciences 628

Degree: B.S.

Director: Silke Severmann, Marine and Coastal Sciences Building, Room 303D, 848-932-3488 (silke@marine.rutgers.edu)

Program Webpage:https://marine.rutgers.edu/main/academics/undergraduate

Marine science is the study of the marine environment and its interactions with the Earth, the biosphere, and the atmosphere. It is, therefore, an interdisciplinary science requiring a knowledge of the principles of physics, geology and geophysics, mathematics, chemistry, and biology. A major in marine sciences provides students with a broad curriculum in the sciences, which demonstrates how the different disciplines can be brought to bear on understanding marine processes and managing ocean resources wisely.

The major prepares students for graduate work in oceanography or one of the basic disciplines, civil service careers in environmental management, employment in the many applied environmental and marine science fields, or teaching in secondary schools.
