RUTGERS

THE STATE UNIVERSITY
OF NEW JERSEY

Rutgers University

2025-2026 New Brunswick Undergraduate Catalog

Major Programs of Study (NBUG) 14
Minor Programs of Study (NBUG) 17
Certificate Programs (NBUG) 20
Honors Programs (NBUG) 24
Prizes and Awards (NBUG) 24
Organization of the Catalog (NBUG) 25
Programs, Faculty, and Courses (SAS) 25
Availability of Majors (SAS) 29
Course Notation Information (SAS) 29
010 Accounting (RBS-NB) 35
African Area Studies 016 (SAS) 38
African, Middle Eastern, and South Asian Languages and Literatures 013 (SAS) 46
Africana Studies 014 (SAS) 64
Agriculture and Food Systems 020 (SEBS) 75
History (SAS) 83
English (SAS) 132
American Studies 050 (SAS) 177
Animal Science 067 (SEBS) 194
Anthropology 070 (SAS) 206
Archaeology 075 (SAS) 244
Architectural Studies 076 (SAS) 247
Armenian 078 (SAS) 252
Art 080 (MGSA) 253
Art History 082 (SAS) 256
Arts and Sciences 090 (SAS) 271
Asian Studies 098 (SAS) 278
Astrobiology 101 (SAS) 291
Astrophysics 105 (SAS) 293
Biochemistry 115 (SEBS) 297
Biological Sciences 119 (SEBS) 303
Mathematics 640 (SAS) 305
Life Sciences (SAS) 327
Biotechnology 126 (SEBS) 379
136 Business Analytics and Information Technology (BAIT) (RBS-NB) 386
Programs of Study: Majors and Minors (RBS-NB) 388
Life Sciences (SAS) 389
Chemistry 160 (SAS) 441
Chinese 165 (SAS) 453
Cinema Studies 175 (SAS) 461
Classics (SAS) 469
Cognitive Science 185 (SAS) 484
Communication (SC&I-U) 497
Planning and Public Policy Major (762, 762D) and Minor (EJB-U) 501

Comparative Literature 195 (SAS) 504
Computer Science 198 (SAS) 525
Criminal Justice 202 (SAS) 536
Criminology 204 (SAS) 544
Dance 203 (MGSA) 546
Data Science 219 (SAS) 554
Medicine and Dentistry (SAS) 567
Ecology, Evolution, and Natural Resources 216 (SEBS) 568
Economics 220 (SAS) 576
Education 300 (GSE) 599
School of Engineering (ENG) 619
English (SAS) 619
Entomology 370 (SEBS) 665
Environmental and Business Economics 373 (SEBS) 670
Minors and Certificate Programs (SEBS) 678
Environmental Planning 573 (SEBS) 679
Environmental Policy, Institutions, and Behavior 374 (SEBS) 686
Environmental Sciences 375 (SEBS) 691
Environmental Studies 381 (SAS) 696
European Studies 360 (SAS) 703
Exercise Science 377 (SAS) 708
Cinema Studies 175 (SAS) 719
390 Finance (RBS-NB) 727
Food Science 400 (SEBS) 729
French 420 (SAS) 733
Gender and Media 438 (SAS) 748
Life Sciences (SAS) 753
Geography 450 (SAS) 805
Geological Sciences 460 (SAS) 815
German 470 (SAS) 827
Classics (SAS) 842
Greek, Modern Greek Studies 489 (SAS) 858
Programs of Study (EJB-U) 861
Health and Society 502 (SAS) 863
African, Middle Eastern, and South Asian Languages and Literatures 013 (SAS) 867
History (SAS) 885
History/French Joint Major 513 (SAS) 934
History/Political Science Joint Major 514 (SAS) 936
Holocaust Studies 564 (SAS) 936
Human Resource Management 533 (SMLR-U) 939
Hungarian 535 (SAS) 944
Information Technology and Informatics (SC&I-U) 947
Interdisciplinary Studies, SAS 556 (SAS) 949

International and Global Studies 558 (SAS) 953
Italian 560 (SAS) 955
Japanese 565 (SAS) 967
Jewish Studies 563 (SAS) 973
Journalism and Media Studies 567 (SC&I-U) 992
Study Abroad 959 (SAS) 1004
Korean 574 (SAS) 1009
Labor Studies and Employment Relations 575 (SMLR-U) 1016
Landscape Architecture 550 (SEBS) 1028
Classics (SAS) 1031
Latin American Studies 590 (SAS) 1046
Latino and Caribbean Studies 595 (SAS) 1053
Law (SAS) 1067
605 Leadership and Management (RBS-NB) 1067
Life Sciences (SAS) 1069
Linguistics 615 (SAS) 1121
Programs of Study: Majors and Minors (RBS-NB) 1130
Marine Sciences 628 (SEBS) 1131
630 Marketing (RBS-NB) 1140
Mathematics 640 (SAS) 1142
Medicine and Dentistry (SAS) 1163
Medieval Studies 667 (SAS) 1164
Meteorology 670 (SEBS) 1170
Microbiology 680 (SEBS) 1174
Middle Eastern Studies 685 (SAS) 1179
Military Education, Air Force 690 (SAS) 1191
Military Education, Army 691 (SAS) 1195
Military Education, Naval 692 (SAS) 1202
Military Science Minor (Military Science 691N, Naval Science 692N, Aerospace Science 693N, Non-Commissioning 695N) (SAS) 1210
Music (MGSA) 1213
Life Sciences (SAS) 1215
Nursing (SON-U) 1268
Nutritional Sciences 709 (SEBS) 1268
Organizational Leadership 713 (SAS) 1274
Pharmacy (PHARM) 1278
Philosophy 730 (SAS) 1278
Physics 750 (SAS) 1303
Life Sciences (SAS) 1319
Planning and Public Policy Major (762, 762D) and Minor (EJB-U) 1371
Plant Science 776 (SEBS) 1375
Polish 787 (SAS) 1381
Political Science 790 (SAS) 1383

Portuguese 810 (SAS) 1413
Psychology 830 (SAS) 1419
Public Health 832 (SEBS) 1437
Planning and Public Policy Major (762, 762D) and Minor (EJB-U) 1440
Religion 840 (SAS) 1443
Russian 860 (SAS) 1459
Sexualities Studies 888 (SAS) 1472
Slavic and East European Studies Minor 861 (SAS) 1475
Social Justice 904 (SAS) 1476
Social Work 910 (SSW-U) 1478
Sociology 920 (SAS) 1485
South Asian Studies 925 (SAS) 1499
Spanish 940 (SAS) 1504
Sport Management 955 (SAS) 1520
Statistics 960 (SAS) 1529
Statistics 960 (SAS) 1536
Study Abroad 959 (SAS) 1544
799 Supply Chain Management (RBS-NB) 1549
Theater 965 (MGSA) 1552
Ukrainian 967 (SAS) 1564
Urban Planning and Design Major (971, 971D) and Minor (EJB-U) 1565
Urban Studies Minor (EJB-U) 1568
Art 080 (MGSA) 1568
Women's, Gender, and Sexuality Studies 988 (SAS) 1571
World Language Proficiency Certificates (SAS) 1594
History and Aims of the School (SAS) 1594
Requirements (SAS) 1595
Graduation (SAS) 1600
Programs of Study for Arts and Sciences Students (SAS) 1601
Administration (SAS) 1607
History and Aims (SEBS) 1608
Credits and Residency (SEBS) 1611
Double Majors (SEBS) 1611
Second Bachelor's Degree (SEBS) 1612
Mission, Goals, and Core Curriculum of the Undergraduate Program (SEBS) 1612
Graduation (SEBS) 1618
Summary (SEBS) 1619
Agriculture and Food Systems 020 (SEBS) 1620
Animal Science 067 (SEBS) 1628
Biochemistry 115 (SEBS) 1639
Bioenvironmental Engineering 117 (SEBS) 1646
Biological Sciences 119 (SEBS) 1650
Biotechnology 126 (SEBS) 1652

Ecology, Evolution, and Natural Resources 216 (SEBS) 1659
Entomology 370 (SEBS) 1667
Environmental and Business Economics 373 (SEBS) 1671
Environmental Engineering 366 (ENG) 1679
Environmental Planning 573 (SEBS) 1683
Environmental Policy, Institutions, and Behavior 374 (SEBS) 1689
Environmental Sciences 375 (SEBS) 1694
Exercise Science 377 (SEBS) 1699
Food Science 400 (SEBS) 1700
Landscape Architecture 550 (SEBS) 1704
Marine Sciences 628 (SEBS) 1707
Meteorology 670 (SEBS) 1715
Microbiology 680 (SEBS) 1719
Nutritional Sciences 709 (SEBS) 1724
Plant Science 776 (SEBS) 1729
Public Health 832 (SEBS) 1736
Minors and Certificate Programs (SEBS) 1738
Minor in Agriculture and Food Systems (18 credits) (SEBS) 1740
Minor in Agroecology (21-24 credits) (SEBS) 1740
Minor in Animal Science (22-24 credits) (SEBS) 1742
Minor in Biochemistry (23-25 credits) (SEBS) 1743
Minor in Community Health Outreach (22 credits) (SEBS) 1744
Minor in Creative Expression and the Environment (18 credits) (SEBS) 1746
Minor in Culinary Nutrition (SEBS) 1750
Minor in Ecology, Evolution, and Natural Resources (20-23 credits) (SEBS) 1750
Minor in Entomology (19-26 credits) (SEBS) 1752
Minor in Environmental and Business Economics (21-23 credits) (SEBS) 1753
Minor in Environmental Geomatics (19 credits) (SEBS) 1755
Minor in Environmental Planning (18 credits) (SEBS) 1755
Minor in Environmental Policy, Institutions, and Behavior (21 credits) (SEBS) 1756
Minor in Environmental Sciences (21 credits) (SEBS) 1758
Minor in Fisheries Science (21-22 credits) (SEBS) 1759
Minor in Food Science (18-21 credits) (SEBS) 1760
Minor in Green Technology (20 credits) (SEBS) 1761
Minor in Horticultural Therapy (18 credits) (SEBS) 1763
Minor in Landscape Design (SEBS) 1764
Minor in Leadership Skills (21-22 credits) (SEBS) 1765
Minor in Marine Sciences (18 credits) (SEBS) 1767
Minor in Medicinal and Economic Botany (18-19 credits) (SEBS) 1768
Minor in Meteorology (18 credits) (SEBS) 1769
Minor in Microbiology (19-21 credits) (SEBS) 1770
Minor in Nonprofit Leadership (23 credits) (SEBS) 1771
Minor in Nutrition (20-24 credits) (SEBS) 1772

Minor in Plant Science (18-20 credits) (SEBS) 1773
Minor in Public Garden Management (SEBS) 1774
Minor in Science Communication (18 credits) (SEBS) 1776
Minor in Sustainable Global Food Systems (18 credits) (SEBS) 1778
Minor in Sustainability (SEBS) 1780
Minor in Urban Forestry (21 credits) (SEBS) 1782
Certificate in Environmental Geomatics (19 credits) (SEBS) 1783
Certificate in Environmental Planning (21 credits) (SEBS) 1784
Certificate in Evolutionary Medicine (SEBS) 1785
Certificate in Food Systems Education and Administration (21-22 credits) (SEBS) 1786
Certificate in Horticultural Therapy (34-37 credits) (SEBS) 1788
Certificate in Medicinal and Economic Botany (25 credits) (SEBS) 1789
Certificate in Plant Biosecurity (25 credits) (SEBS) 1790
Turfgrass Science Certificate Program (25-28 Credits) (SEBS) 1791
Student to Professional Internship Network (SPIN) (SEBS) 1792
Military Education (SEBS) 1793
Honors Programs (SEBS) 1794
Study Abroad Programs (SEBS) 1797
Educational Opportunity Fund (EOF) (SEBS) 1797
Preprofessional Programs (SEBS) 1798
Combined Degree Programs (SEBS) 1800
Joint Bachelor/Medical Degree Programs (SEBS) 1800
Five-Year B.A. or B.S./M.B.A. Program (SEBS) 1801
Five-Year B.A. or B.S./M.P.P. Program (SEBS) 1801
Articulated 3-1-1 Program B.S./M.P.H. or B.A./M.P.H. (SEBS) 1802
5-Year BS/EdM Teacher Education Programs (SEBS) 1802
4+1 BS/MBS (Master of Business and Science) Programs (SEBS) 1804
Accelerated Programs (SEBS) 1811
Explanatory Note (SEBS) 1818
Agriculture and Food Systems 020 (SEBS) 1819
Agriculture and Natural Resource Management 035 (SEBS) 1822
Animal Science 067 (SEBS) 1824
Arts and Sciences 090 (SEBS) 1829
Biochemistry 115 (SEBS) 1829
Bioenvironmental Engineering 117 (SEBS) 1832
Biotechnology 126 (SEBS) 1834
Community Health Outreach 193 (SEBS) 1836
Ecology, Evolution, and Natural Resources 216 (SEBS) 1838
Educational Opportunity Fund 364 (SAS) 1846
Entomology 370 (SEBS) 1847
Environmental and Biological Sciences 015 (SEBS) 1849
Environmental and Business Economics 373 (SEBS) 1850
Environmental Planning 573 (SEBS) 1855

Environmental Policy, Institutions, and Behavior 374 (SEBS) 1857
Environmental Sciences 375 (SEBS) 1862
Food Science 400 (SEBS) 1866
Interdisciplinary Studies 554 (SEBS) 1869
Landscape Architecture 550 (SEBS) 1870
Leadership Skills 607 (SEBS) 1876
Marine Sciences 628 (SEBS) 1879
Meteorology 670 (SEBS) 1883
Microbiology 680 (SEBS) 1886
Nutritional Sciences 709 (SEBS) 1889
Plant Science 776 (SEBS) 1892
Student to Professional Internship Network (SPIN) 902 (SEBS) 1897
Administration (SEBS) 1897
Campus Centers (SEBS) 1899
Faculty (SEBS) 1901
History and Aims of the School (MGSA) 1916
Admission (MGSA) 1917
Scholarships (MGSA) 1917
Facilities (MGSA) 1922
Requirements (MGSA) 1925
Graduation (MGSA) 1933
Programs of Study (MGSA) 1933
Dance 206 (MGSA) 1934
Design 208 (MGSA) 1939
Filmmaking 211 (MGSA) 1940
Music 702 (MGSA) 1943
Theater 966 (MGSA) 1950
Visual Arts 081 (MGSA) 1953
Explanation of Three-Part Course Numbers (MGSA) 1956
Art 081 (MGSA) 1957

Major Programs of Study (NBUG)

MAJOR PROGRAMS OF STUDY

A wide variety of academic programs are offered at the ten undergraduate schools at Rutgers University-New Brunswick. The following list summarizes the major programs available at one or more of the schools. Students should consult the individual schools' sections for a list of majors offered at each school.

In addition, academic departments offer numerous options and specialized programs of study within these general fields, as well as opportunities for interdisciplinary work. Several dual-degree programs also are available, and in some subjects both liberal arts and professional programs are offered. Thus, the list of majors merely serves to suggest the breadth of academic programs for undergraduate students.

Certificate Programs (NBUG)

CERTIFICATE PROGRAMS

Certificate programs are available in a number of fields and are open to all undergraduate students at Rutgers University-New Brunswick, regardless of school affiliation.

The certificate programs are designed to allow students to complement their major program with study in either a broad, but well-defined, area or a specialized field. Since the certificate programs are intended to enhance a major program, a certificate may be awarded only in conjunction with the awarding of a baccalaureate degree in a major field.

Honors Programs (NBUG)

HONORS PROGRAMS

As part of its ongoing commitment to academic excellence, Rutgers University-New Brunswick offers numerous honors programs that provide outstanding students with challenges beyond those found in regular coursework.

The Honors College of Rutgers University-New Brunswick selects top students from among those admitted to the different schools at Rutgers. It provides a living-learning experience in the first year, and prepares engaged, talented students for the challenges of the 21st century with special curricula and opportunities. With its emphasis on interdisciplinary thinking, hands-on research, and creative problem solving, students will work closely with Rutgers' world-renowned faculty in small classes, workshops, and mentorships.

Many of the undergraduate schools offer specially designed honors programs that involve introductory seminars for well-prepared first-year students. Selection into a school honors program is based on SAT or ACT scores and high school record, and is at the invitation of each school.

In addition, exceptional upper-class students who are not in school honors programs may be selected to participate in honors seminars offered by the department of their major. Information on school honors programs may be found in the school sections of this catalog; departmental honors programs are described under each major.

Students who participate in honors programs receive a high degree of individual attention from faculty. Seminars, tutorials, lectures, discussions, and independent research afford an opportunity for sophisticated scholarship and growth in self-understanding and also may assist Rutgers students in pursuing their special interests and professional ambitions after graduation.

Prizes and Awards (NBUG)

PRIZES AND AWARDS

Many academic departments offer prizes and awards for outstanding achievement. In some cases, eligibility is based on achievement in specific courses. Information about these awards should be obtained from the departments so that students are aware in advance of the criteria for selection.

Organization of the Catalog (NBUG)

ORGANIZATION OF THE CATALOG

This catalog includes all undergraduate education at Rutgers University-New Brunswick.

The catalog begins with the Programs of Study and Courses for Liberal Arts and Sciences Students section, a large A-to-Z listing of undergraduate programs and courses offered by several faculties, principally to students at the School of Arts and Sciences. Students should also consult the School of Arts and Sciences section, which includes important information about the school's specific aims, policies, academic programs, and degree requirements.

The professional school sections include similar school information and also include detailed programs of study and course listing chapters covering the academic programs offered by each of their faculties. Professional students also should refer to the large introductory A-to-Z listing both for courses required in their curriculum that are taught by other faculties and for elective courses in the arts and sciences.

In general, individual undergraduate courses offered at Rutgers in New Brunswick are open to students at all the undergraduate schools, subject to prerequisite restrictions and space limitations.

The General Information chapter, later in the catalog, covers university policies and procedures that are relevant for students at all the undergraduate schools in New Brunswick. It is important for students to familiarize themselves with these chapters as well as with their own particular school's section on policy and procedures.

Some courses are cross-listed in more than one department. Students should note that a cross-listed course is the same course listed under two or more subject indexes, and they cannot receive credit for repeating the same course under a different course number.

Availability of Majors (SAS)

AVAILABILITY OF MAJORS

The programs of study outlined in this section are, in general, available to undergraduate students enrolled in the School of Arts and Sciences. (In addition, a few of the major programs described here are open to School of Environmental and Biological Sciences students.) Therefore, it is important to consult the school sections of this catalog for lists of the majors available to students at each of these schools:

- School of Arts and Sciences
- School of Environmental and Biological Sciences

Individual undergraduate courses offered at the School of Arts and Sciences are, in general, open to students at all the undergraduate schools, subject to prerequisite restrictions and space limitations.

Course Notation Information (SAS)

COURSE NOTATION INFORMATION

Course Notation Information (SAS)

Changes in Course Numbers and/or Titles

Changes in Course Numbers and/or Titles

It is the student's responsibility to read course descriptions carefully, and, when in doubt, to check with his or her advisor or the appropriate department to avoid registering for a course that the student already may have taken. Credit will not be given twice for the same course, despite a change in number and/or title.

Course Notation Information (SAS)

Cross-Listed Courses

Cross-Listed Courses

Some courses are cross-listed in more than one department. Students should note that a cross-listed course is the same course listed under two or more subject indexes. Credit will not be given twice for the same course.

Course Notation Information (SAS)

Explanation of Three-Part Course Numbers

Explanation of Three-Part Course Numbers

The number preceding each course title is divided into three parts. The first two digits are the administrative code (standing for a faculty or a school), the next three digits are the subject code, and the final three digits are the course code. (Example: 01:830:101 is SAS:Psychology:General Psychology)

Administrative Codes

The following administrative codes are used in this catalog and are positioned as the first two digits in all course numbers.

01 School of Arts and Sciences

03 ROTC

04 School of Communication and Information (undergraduate)

05 Graduate School of Education (undergraduate)

07 Mason Gross School of the Arts (undergraduate)

09 School of Social Work (undergraduate)

11 School of Environmental and Biological Sciences

14 School of Engineering

16 School of Graduate Studies

19 School of Social Work (graduate)

21 Newark College of Arts and Sciences

30 Ernest Mario School of Pharmacy (undergraduate)

31 Ernest Mario School of Pharmacy (last two years of the doctoral program)

33 Rutgers Business School: Undergraduate-New Brunswick

37 School of Management and Labor Relations

50 Camden College of Arts and Sciences

Subject Codes

A subject code comprises the third through fifth digits in all course numbers and indicates the subject matter of the course. Courses with the following subject codes are listed in this section of the catalog. (This list does not constitute a list of majors. See the Major Programs of Study page for a list of majors. This list also does not¿constitute a list of all subjects offered at the university. See the individual professional-school sections of this catalog for further subject and course listings.)

Course Codes

The course code comprises the sixth, seventh, and eighth digits in all course numbers. Course codes from 100 to 299 indicate introductory and intermediate undergraduate courses. Codes from 300 to 499 indicate advanced undergraduate courses. Courses coded from 500 to 799 are graduate courses and are described in the graduate catalogs of the university.

Two course codes separated by a comma indicate that each semester course may be taken independently of the other (example: 01:000:101,202). Two course codes separated by a hyphen indicate that satisfactory completion of the first semester course is a prerequisite to the second semester (example: 01:000:110-111); the first semester may be taken for credit without taking the second, except if a statement is added to indicate that both semester courses must be completed in order to receive credit.

Credits awarded for the successful completion of each course are indicated in parentheses following the course title. The notation BA indicates that the number of credits is determined by arrangement with the department offering the course.

Unless otherwise indicated, a course normally meets each week for a number of lecture hours equal to the number of credits to be earned. Special hours or modes of class, other than lecture, are usually indicated in italics below the course title.

010 Accounting (RBS-NB)

010 Accounting

Major requirements for students who enter Rutgers Business School: Undergraduate-New Brunswick (RBS) ***in the fall 2018 semester to the fall 2022 semester:***

Business Core

33:010:275 Introduction to Managerial Accounting (3) (prerequisite: 33:010:272)
33:011:300 Business Forum (2)
33:010:458 Accounting Information Systems (3) (prerequisite: 33:010:272)
33:136:385 Statistical Methods in Business (3)
33:136:386 Operations Management (3)
33:140:320 Business Law I (3) (junior or senior year)
33:390:300 Financial Management OR 33:390:310 Financial Management for Finance Majors (3) (33:390:310 required if double majoring in Finance)
33:620:301 Introduction to Management (3)
33:620:302 Management Skills (3)
33:620:492 Business Policy and Strategy (3) (prerequisites: 33:390:300 or 33:390:310, 33:620:301, 33:630:301, and senior year)
33:630:301 Introduction to Marketing (3)
33:799:301 Introduction to Supply Chain Management (3)

Required Accounting Courses

33:010:325 Intermediate Accounting I (3) (prerequisite: 33:010:272)
33:010:458 Accounting Information Systems (3) (prerequisite: 33:010:272)
33:010:326 Intermediate Accounting II (3) (prerequisite: 33:010:325)
33:010:451 Cost Accounting (3) (prerequisite: 33:010:275)
33:010:415 Concepts of Auditing (3) (prerequisite: 33:010:325)
33:010:421 Income Tax Accounting (3) (prerequisite: 33:010:325)
33:010:401 Advanced Accounting (3) (prerequisite: 33:010:326)
33:010:416 Audit Analytics (3) (prerequisite: 33:010:415)

In order to declare Accounting as a major, you must earn a grade of B or better in Intro to Financial Accounting, 33:010:272.

There are two introductory Finance courses that can fulfill a business core requirement. If you intend to double major in Finance or declare a Finance concentration you will need to take Financial Management for Finance Majors (33:390:310). You can take Financial Management (33:390:300) if you have no intention of majoring in Finance or declaring a Finance Concentration. Credit will not be given for both courses if you take both due to switching to a Finance major/declaring a Finance concentration at a later date.

If you major in Accounting as your first, second, or third major, you are required to take 33:010:458 Accounting Information System and 33:140:320 Business Law I. You will not earn credit for taking 33:136:370 Management Information System. You can earn credit towards graduation if you take 33:522:334 Business Ethics but it will not fulfill a major requirement.

Students with more than one Business School major may only double count one RBS course between those majors.

Major requirements for students who entered RBS ***in the fall 2022 semester to the fall 2023 semester:***

Business Core

33:010:275 Introduction to Managerial Accounting (3) (prerequisite: 33:010:272)
33:011:300 Business Forum (2)
33:010:458 Accounting Information Systems (3) (prerequisite: 33:010:272)
33:136:385 Statistical Methods in Business (3)
33:136:386 Operations Management (3)
33:140:320 Business Law I (3) (junior or senior year)
33:390:300 Financial Management OR 33:390:310 Financial Management for Finance Majors (3) (33:390:310 required if double majoring in Finance)
33:620:301 Introduction to Management (3)

33:799:301 Introduction to Supply Chain Management (3)

Required Accounting Courses

33:010:325. Intermediate Accounting I (3) (prerequisite: 33:010:272)
33:010:458 Accounting Information Systems (3) (prerequisite: 33:010:272)
33:010:326 Intermediate Accounting II (3) (prerequisite: 33:010:325)
33:010:451 Cost Accounting (3) (prerequisite: 33:010:275)
33:010:415 Concepts of Auditing (3) (prerequisite: 33:010:325)
33:010:421 Income Tax Accounting (3) (prerequisite: 33:010:325)
33:010:401 Advanced Accounting (3) (prerequisite: 33:010:326)
33:010:416 Audit Analytics (3) (prerequisite: 33:010:415)
33:010:422 Topics in Income Taxation (3) (prerequisite: 33:010:421)

In order to declare Accounting as a major, you must earn a grade of B or better in Intro to Financial Accounting, 33:010:272.

If you major in Accounting as your first, second, or third major, you are required to take 33:010:458 Accounting Information System and 33:140:320 Business Law I. You will not earn credit for taking 33:136:370 Management Information System. You can earn credit towards graduation if you take 33:522:334 Business Ethics but it will not fulfill a major requirement.

A grade of B or better is required to take any additional Finance department courses beyond 33:390:300 Financial Management.

Students with more than one Business School major may only double count one RBS course between those majors.

African Area Studies 016 (SAS)

Learning Goals

Learning Goals

Students will demonstrate linguistic exposure to one of the approved African languages. They will demonstrate an interdisciplinary awareness of the diversity of African countries, cultures, histories, geography, literatures, economics, public health, and environmental and sociocultural issues.

African Area Studies 016 (SAS)

Minor Program

Minor Program

The curricular program in African area studies is designed to complement major degrees in the applied sciences, fine arts, humanities, social sciences, and professional schools. The field of African area studies emphasizes continental Africa and embraces all the major regions of the continent. The interdisciplinary minor in African area studies requires a minimum of six courses, including two African language courses (8 credits), two core courses (6 credits), and two elective courses chosen from among the core courses and the approved course list (6 credits; 20 credits total).

Students do not have to register under the Center for African Studies number to apply credits toward the minor. Credits earned through relevant honors or topics courses, independent study, internships, and study abroad in Africa can be applied toward the electives requirements and may in some cases, with the approval of the director of the program in African languages, be applied toward the language requirement.

Students must earn a grade of C or better in all courses counted toward the minor. At least three courses must be at the 300 level or above, and at least three courses must be taken outside the student's major. Students are strongly advised to consult with the curriculum director regularly about their programs of study.

African Area Studies 016 (SAS)

Study Abroad

Study Abroad

Students may apply toward the minor up to 9 credits earned in courses offered as part of a recognized Rutgers African study abroad program. Rutgers currently has programs in Ghana, Kenya, Morocco, Senegal, and South Africa. Students are encouraged to contact the Center for Global Education office for these and other study abroad opportunities.

African Area Studies 016 (SAS)

Applied Learning Opportunities

Applied Learning Opportunities

The Center for African Studies (CAS) values courses with applied learning opportunities, including internships, honors courses, and independent study programs arranged through CAS and through the departments. The appropriate number of credits for these learning experiences and their application toward distribution requirements will be determined in consultation with the curriculum director.

01:016:301,302 Independent Study in African Area Studies (BA,BA)
01:016:303,304 Directed Internship in African Studies (BA,BA)

African Area Studies 016 (SAS)

Student Research Award

Student Research Award

The Center for African Studies awards the Claude Ake Prize annually to the best undergraduate student paper in African studies.

African Area Studies 016 (SAS)

Courses

Courses

Core Courses (Minors must take at least two of the following courses)
01:016:220 Ancient Africa (3)
01:016:222 Modern Africa (3)
01:016:224 Women and Gender in African History (3)
01:016:250 Comparative Approaches to African Literatures (3)
01:016:312 African Feminism (3)

01:016:314 Sub-Saharan African Policies (3)
01:016:321 African Cultural History (3)
01:016:337 Anthropology of Africa (3)
01:016:338 Geography of Africa (3)
01:016:350 Literature and Cultures of Lusophone Africa (3)
01:016:363 African Women Writers (3)
01:016:410 Sub-Saharan African Literature (3)
01:016:411 North African Literature (3)

Language Courses (Minors must take two semesters of a language)

African Languages and Literatures
01:013:140-141, 240-241, 340-341 Arabic (Elementary, Intermediate, Advanced) (4,4,4,4,3,3)
01:013:186-187, 286-287 Swahili (Elementary, Intermediate) (4,4,4,4)
01:013:192-193, 292-293 Twi (Elementary, Intermediate) (4,4,4,4)
01:013:194-195, 294-295 Yoruba (Elementary, Intermediate) (4,4,4,4)
Approved Courses

African, Middle Eastern, and South Asian Languages and Literatures (AMESALL)
01:013:201 Crossroads: Classical Literatures of Africa, the Middle East, and South Asia (3)
01:013:211 Introduction to the Literatures of Africa (3)
01:013:217 African Immigrant Literature
01:013:226 Rhythm of Resistance: Global Hip Hop
01:013:312 African Folklore and Myth (3)
01:013:313 African Linguistics (3)
01:013:314 Islam and African Literature (3)
01:014:212 Politics and Power in Modern Africa (3)
01:014:330 Contemporary Issues in Southern Africa (3)
01:014:360 Writers of Africa and the New World (3)
01:014:371 The New Scramble for Africa (3)
01:014:376 Pan-African Movement (3)

Anthropology
01:070:243 Anthropology of Africa (3)
01:070:326 Life in the Pleistocene (3)
01:070:336 Primatology, Wildlife Ecology, and Conservation in Kenya (3)
01:070:337 Field Methods and Analysis in Primatology in Kenya (3)
01:070:379 or 01:988:379 Gender and Power in Africa (3)
01:070:397 Practicum in Vertebrate Paleontology (4)
01:070:398 Field Study in Paleoanthropology (4)
01:070:412 Topics in African Prehistory and Paleoanthropology (3)
01:070:426 South African Archaeology (3)

Art History
01:082:250 Introduction to Oceanic, African, and Pre-Columbian Art (3)
01:082:371 Arts of West Africa (3)
01:082:376 Arts of Central Africa (3)
01:082:420 African Architecture (3)

Biology
01:146:328 Human Parasitology (3)

Comparative Literature
01:195:250 Comparative Approaches to African Literatures (3)
01:195:363 or 01:013:311 Women Writers of Africa (3)

Criminal Justice
01:202:312 Crimes Against Humanity (3)

Economics
01:220:350 Economics of Africa (3)

French
01:420:251 France in the World/The World in France
01:420:281 French and Francophone Text(s) and Image(s)
01:420:409 Studies in Cultures of the Francophone World (3)
01:420:410 or 01:016:410 Sub-Saharan African Literature (3)
01:420:411 North African Literature (3)
01:420:413 Caribbean Literature (3)

Geography
01:450:338 Africa (3)

History
01:508:220 Ancient Africa (3)
01:508:221 West Africa (3)
01:508:222 Modern Africa (3)
01:508:224 or 01:016:224 or 01:988:224. Women and Gender in African History (3)
01:508:318 Nationalism in Modern Africa (3)
01:508:320 History of Southern Africa (3)
01:508:321 African Cultural History (3)
01:508:325 Africa from the 15th to the 19th Centuries (3)
01:508:326 Islam in African History (3)
01:508:327 World War II and Africa (3)
01:508:420 or 01:014:367 African Labor History (3)
01:508:424 African Cities Past and Present (3)
01:508:429 Research in African Historical Studies (3)

Political Science
01:790:314 or 01:016:314 Sub-Saharan African Policies (3)
01:790:389 Topics in Comparative Politics (3)
01:790:495 Honors in Political Science (3)

Religion
01:840:332 or 01:014:332 African Religions (3)

Spanish and Portuguese
01:810:241-242 The Portuguese-Speaking World: A Literary Introduction for English-Speakers (3,3)
01:810:309 Africa and Portugal: An Introduction (3)
01:810:350 or 01:016:350 Literature and Cultures of Lusophone Africa (3)
01:810:440 Portuguese-Speaking World: Multiple Perspectives (3)
01:940:465 Spain in Africa/Africa in Spain: Cultural Representations and Historical Legacy (3)

Study Abroad

01:016:100 Study Abroad Benin: History Culture and Memory (3)
This interdisciplinary cross-cultural study abroad program explores the African side of the Atlantic World. Students spend two weeks in Benin based at our sister institution, the Ecole du Patrimoine Africaine in Porto Novo. In partnership with our Beninois colleagues, faculty and students will explore how trans-Atlantic connections have shaped religion, language, and identity; the relationship between tourism and historical memory; and the dynamism of the contemporary art scene.
Credit not given for both this course and 01:508:100.

01:959:400,401 Study Abroad in South Africa (variable credit)
See the Center for Global Education office for other opportunities.
Women's, Gender, and Sexuality Studies
01:988:224 or 01:016:224 Women and Gender in African History (3)
01:988:312 or 01:016:312 African Feminism (3)

01:016:220 ***Ancient Africa (3)***
Precolonial African societies and kingdoms: family life, cities, Islam, growth and decline of states, impact of the slave trade, African culture in the Americas.
Credit not given for both this course and 01:508:220.

01:016:222 ***Modern Africa (3)***
Nineteenth-, 20th-, and 21st-century Africa: resistance and accommodation to colonialism, impact of Christianity, African workers and new elites, changing roles of women, nationalism, revolution.
Credit not given for both this course and 01:508:222.

01:016:224 ***Women and Gender in African History (3)***
Issues in the history of gender in Africa: female slavery, women and power formations, women in production and trade, family and community, gender and protest.
Credit not given for both this course and 01:508:224 or 01:988:224.

01:016:250 *Comparative Approaches to African Literatures (3)*
Reading and discussion of literature in translation from different geographic, linguistic, and cultural areas of Africa.
Credit not given for both this course and 01:195:250.

01:016:301,302 *Independent Study in African Area Studies (1-3,1-3)*
Independent work on an issue in African area studies under the supervision and guidance of African studies faculty.

01:016:303,304 *Directed Internship in African Studies (1-3,1-3)*
Learning about Africa in applied settings through internships.
Prerequisites: Permission of Center for African Studies curriculum coordinator, learning contract, and approval of internship site supervisor.

01:016:312 *African Feminism (3)*
What feminism means to Africa; how gender affects female socialization; women as state subjects; how diverse African feminist strategies differ from and/or parallel other feminisms.
Credit not given for both this course and 01:988:312.

01:016:314 *Sub-Saharan African Policies (3)*
Patterns of political change and political development in Africa south of the Sahara.
Credit not given for both this course and 01:790:314.

01:016:321 *African Cultural History (3)*
History of African music, art, religion, and other cultural practices in social and political context.
Credit not given for both this course and 01:508:321.

01:016:337 *Anthropology of Africa (3)*
Precolonial, colonial, and postcolonial African cultures and societies. Gender, ethnicity, and class. Representations and realities of Africa in a global context, including issues of development, conservation, tourism. Popular culture, contemporary rural and urban experiences.
Credit not given for both this course and 01:070:338.

01:016:338 *Geography of Africa (3)*
Regional associations of peoples and nation states; analysis of resource endowment, economic development, and Africa's changing position in the world.
Credit not given for both this course and 01:450:338.

01:016:350 *Literature and Cultures of Lusophone Africa (3)*
Study of the literatures from African countries whose official language is Portuguese. Emphasis on 20th-century colonial and postindependence literature and theory.
Prerequisite: 01:810:315 or 01:810:316 or permission of Portuguese department. Credit not given for both this course and 01:810:350.

01:016:363 *African Women Writers (3)*
Reading and discussion of recent writings by women from a variety of cultural, linguistic, and regional areas of Africa.
Credit not given for both this course and 01:195:363.

01:016:410 ***Sub-Saharan African Literature (3)***
Study of literature in French by writers in or from Sub-Saharan Africa.
Credit not given for both this course and 01:420:410. Course conducted in French.

01:016:411 ***North African Literature (3)***
Study of literature in French by writers in or from North Africa.
Credit not given for both this course and 01:420:411. Course conducted in French.

Jehan Mohamed, M.A. Rutgers University

The Department of African, Middle Eastern, and South Asian Languages and Literatures offers a major program (013) with two options: regional concentration and global humanities. The department currently offers six minor programs:

- African Languages (013A)
- Arabic (074)
- Hindi (505)
- Languages and Literatures (013)
- Persian (723)
- Turkish (973)

For more information on these minor programs, please read the descriptions below.

Learning Objectives for the Major

Learning Objectives for the Major

Regional Option (013J)

As an African, Middle Eastern, and South Asian languages and literatures (AMESALL) major with the regional major option, you will demonstrate:

1. listening, speaking, writing, and reading proficiency in one of the languages taught through AMESALL at a level of advanced-low or higher according to the guidelines of the American Council for the Teaching of Foreign Languages (ACTFL);

2. familiarity with a cross-section of the classical literatures of all three regions; and
3. a broad understanding of the literatures of one of the three regions.

Global Humanities Option (013G)

As an AMESALL major with the global humanities option, you will demonstrate:

1. appreciation of major global issues as articulated in Africa, the Middle East, and South Asia and from the perspective of these three regions;
2. understanding of a variety of epistemologies rooted in the cultures of Africa, the Middle East, and South Asia; and
3. proficiency in critical, theoretical, and research-oriented skills in global and comparative cultural studies.

Major Requirements

Major Requirements

Regional Option

The regional option in the African, Middle Eastern, and South Asian languages and literatures (AMESALL) major requires the successful completion of at least 33 credits, with the first two years of language study/proficiency as a prerequisite.

This option is designed to allow students to explore in depth one of the literatures offered by AMESALL, within a regional context. All majors must take the following two courses to complete this major option:

- 01:013:201 Crossroads: Classical Literatures of Africa, the Middle East, and South Asia (3) and
- 01:013:401 Senior Seminar in Literature and Society (3)

Students enrolling in this option must complete at least 6 credits of language courses at the advanced 300 level or higher.

Students must also take one of the following courses, as appropriate to their region of study:

- 01:013:211 Introduction to the Literatures of Africa (3) or
- 01:013:221 Introduction to the Literatures of the Middle East (3) or
- 01:013:231 Introduction to the Literatures of South Asia (3)

Finally, students must complete 18 credits of additional literature, sociolinguistics, or linguistics courses on the region of their concentration. Of these, 9 credits must be upper-level courses at the 300 level or above. These courses must either be taught in AMESALL, cross-listed with AMESALL, or approved by the department chair.

Global Humanities Option

The global humanities option in African, Middle Eastern, and South Asian languages and literatures requires the successful completion of at least 36 credits.

This is an interdisciplinary program of study that provides opportunities to view the world from multiple perspectives, and a framework for understanding and negotiating global realities and challenges in the 21st century.

All majors must take the following three courses to complete this major option:

- 01:013:201 Crossroads: Classical Literatures of Africa, the Middle East, and South Asia (3)
- 01:013:205 Cultural Forces in International Politics (3)
- 01:013:401 Senior Seminar in Literature and Society (3)

Students enrolling in this option must also take two courses from each of the following categories:

Transregional Sociolinguistics Courses

- 01:013:115 History of the Alphabet (1.5)
- 01:013:203 Language and Society in Africa, the Middle East, and South Asia (3)
- 01:013:204 Introduction to Discourse Analysis (3)
- 01:013:225 Global Arabic
- 01:013:285 Language and Globalization (3)
- 01:013:305 Languages in Peril (3)
- 01:013:409 Introduction to Semitic Languages (3)

Transregional Culture Courses

- 01:013:202 Cinemas of Africa and Asia (3)
- 01:013:206 Banned Books (4)
- 01:013:210 World Literature and Social Change (3)
- 01:013:304 Introduction to Translation Studies (3)
- 01:013:307 Introduction to Postcolonial Literature and Theory (3)
- 01:013:365 Bollywood (3)
- 01:013:324 Ottoman Africa (3)
- 01:013:412 Literature and Religion
- 01:013:445 Storytelling in the Muslim World (3)

Majors must also take at least three courses (a total of 9 credits) in any combination of their choice, from the following departmental courses:

- African literature/cinema courses
- Middle Eastern literature/cinema courses
- South Asian literature/cinema courses

In addition, majors will take at least 6 credits, in any combination of their choice, from the following:

- AMESALL's literature/sociolinguistics/cinema/culture courses
- AMESALL's language courses at the intermediate level or above
- Study Abroad program courses
- Approved courses from other units with significant AMESALL content

African, Middle Eastern, and South Asian Languages and Literatures 013 (SAS)

Learning Objectives and Requirements for African Languages Minor (013A)

Learning Objectives and Requirements for African Languages Minor (013A)

Learning Objectives

The objective of the African languages minor is to develop listening, speaking, writing, and reading skills in an African language to the intermediate mid level, as based on the guidelines of the American Council for the Teaching of Foreign Languages (ACTFL).

Requirements

The minor program in African languages consists of 20-22 credits, which must be completed with a grade of C or better in each course.

Minors must take four courses in one African language (Akan/Twi, Arabic, Swahili, or Yoruba) (14-16 credits). They must also take EITHER:

- Two 300-level courses in the language (6 credits), OR
- 01:013:201 Crossroads: Classical Literatures of Africa, the Middle East, and South Asia (3) and *either* 01:013:312 African Folklore and Myth (3) *or* 01:013:211 Introduction to the Literatures of Africa (3)

African, Middle Eastern, and South Asian Languages and Literatures 013 (SAS)

Learning Objectives and Requirements for Arabic Minor (074)

Learning Objectives and Requirements for Arabic Minor (074)

Learning Objectives

The objective of the Arabic minor is to develop listening, speaking, writing, and reading skills in Modern Standard Arabic to the advanced level, as based on the guidelines of the American Council for the Teaching of Foreign Languages (ACTFL).

Requirements

The minor program in Arabic consists of 20 credits, which must be completed with a grade of C or better in each course.

The minor in Arabic consists of four courses in Arabic language beyond the elementary level plus two additional courses:

- 01:013:201 Crossroads: Classical Literatures of Africa, the Middle East, and South Asia (3)
- 01:013:221 Introduction to the Literatures of the Middle East (3)

African, Middle Eastern, and South Asian Languages and Literatures 013 (SAS)

Learning Objectives and Requirements for Hindi Minor (505)

Learning Objectives and Requirements for Hindi Minor (505)

Learning Objectives

The objective of the Hindi minor is to develop listening, speaking, writing, and reading skills in Hindi to the advanced level, as based on the guidelines of the American Council for the Teaching of Foreign Languages (ACTFL).

Requirements

The minor program in Hindi consists of 20 credits, which must be completed with a grade of C or better in each course.

The minor in Hindi consists of four courses in Hindi language beyond the elementary level plus two additional courses:

- 01:013:201 Crossroads: Classical Literatures of Africa, the Middle East, and South Asia (3)
- 01:013:221 Introduction to the Literatures of the Middle East (3)

African, Middle Eastern, and South Asian Languages and Literatures 013 (SAS)

Learning Objectives and Requirements for Languages and Literatures Minor (013)

Learning Objectives and Requirements for Languages and Literatures Minor (013)

Learning Objectives

Students in the languages and literatures minor will demonstrate familiarity with a cross-section of the classical literatures of Africa, the Middle East, and South Asia, and a broad understanding of the modern literatures of one of the three regions. They will also develop listening, speaking, writing, and reading skills in one of the languages of their chosen region of study (Africa/the Middle East/South Asia) at a proficiency level of intermediate-low or higher, based on the guidelines of the American Council for the Teaching of Foreign Languages (ACTFL).

Requirements

The languages and literatures minor consists of 18-20 credits, which must be completed with a grade of C or better in each course.

- Two courses beyond the elementary 100 level in one of the languages offered by the department.
- 01:013:201 Crossroads: Classical Literatures of Africa, the Middle East, and South Asia (3)
- One of the following three courses, as appropriate to the chosen language of study:
  01:013:211 Introduction to the Literatures of Africa (3) or
  01:013:221 Introduction to the Literatures of the Middle East (3) or
  01:013:231 Introduction to the Literatures of South Asia (3)
- Six elective credits of additional literature, sociolinguistics, or linguistics courses at the 300 level or above, offered through AMESALL, by cross-listing through other departments, or with the approval of the department chair.

African, Middle Eastern, and South Asian Languages and Literatures 013 (SAS)

Learning Objectives and Requirements for Persian Minor (013P or 723)

Learning Objectives and Requirements for Persian Minor (013P or 723)

Learning Objectives

The objective of the Persian minor is to develop listening, speaking, writing, and reading skills in Persian language to the intermediate mid level, as based on the guidelines of the American Council for the Teaching of Foreign Languages (ACTFL).

Requirements

The minor in Persian consists of 20-22 credits hours, which must be completed with a minimum grade of C.

Minors must take four Persian language courses (14-16 credits). They must also take EITHER:

- Two 300-level Persian language courses (6 credits), OR
- 01:013:201: Crossroads: Classical Literatures of Africa, the Middle East, and South Asia (3), and *either* 01:013:203 Language and Society (3), *or* 01:013:221 Introduction to the Literatures of the Middle East (3)

African, Middle Eastern, and South Asian Languages and Literatures 013 (SAS)

Learning Objectives and Requirements for Turkish Minor (013T or 973)

Learning Objectives and Requirements for Turkish Minor (013T or 973)

Learning Objectives

The objective of the Turkish minor is to develop listening, speaking, writing, and reading skills in Turkish language to the intermediate mid level, as based on the guidelines of the American Council for the Teaching of Foreign Languages (ACTFL).

Requirements

The minor in Turkish consists of 20-22 credits, which must be completed with a minimum grade of C.

Minors must take four Turkish language courses (14-16 credits). They must also take EITHER:

- Two 300 level Turkish language (6 credits), OR
- 01:013:201 Crossroads: Classical Literatures of Africa, the Middle East, and South Asia (3), and *either* 01:013:203 Language and Society (3), *or* 01:013:221 Introduction to the Literatures of the Middle East (3)

Certificate in Translation

Certificate in Translation

The translation certificate in African, Middle Eastern, and South Asian languages and literatures (AMESALL) consists of 18 credits, completed with a grade of B or better in each course. The requirements for the translation certificate program are:

1. Two courses beyond the intermediate level in any of the languages offered through AMESALL or the equivalent level as determined by placement testing
2. 01:013:203 Language and Society in Africa, the Middle East, and South Asia (3)
3. 01:013:304 Introduction to Translation Studies (3)
4. 01:013:403 Translation Practicum I (3), or equivalent
    a. 403a: Arabic
    b. 403b: Hindi
    c. 403c: Swahili
    d. 403d: Persian
    e. 321: Independent Language Practicum

5. 01:013:404 Translation Practicum II (3), or equivalent
    a. 404a: Arabic
    b. 404b: Hindi
    c. 404c: Swahili
    d. 404d: Persian
    e. 321: Independent Language Practicum

Credits earned in any of the above courses can also be used to fulfill the requirements of the minor or major in African, Middle Eastern, and South Asian languages and literatures. 01:013:203 Language in Society in Africa, the Middle East, and South Asia (3) is regularly offered in the fall semester, and 01:013:304 Introduction to Translation Studies (3) is regularly offered in the spring semester. The language practicum courses are offered according to student interest. If you are interested in pursuing the translation certificate, but a practicum course if not being offered in the language of your choice, please contact one of our full-time faculty members about taking 01:013:321 Independent Study: Language Practicum (3) to fulfill the certificate requirements.

In order to enroll in the translation certificate program, please contact the AMESALL department administrator, Michele Frishberg (mf532@amesall.rutgers.edu), with your name, RUID, and anticipated year of graduation (class). The translation certificate program is also available to nonmatriculating students (i.e., those not enrolled in a degree program).

African, Middle Eastern, and South Asian Languages and Literatures 013 (SAS)

Courses

Courses

01:013:110 ***Introduction to Aramaic (3)***
Introduces students to study of Aramaic, including Aramaic portions of the Bible, by developing reading comprehension and vocabulary.
Credit not given for both this course and 01:563:145 or 01:685:145.

01:013:111 ***The Bible in Aramaic (3)***
Introduction to Aramaic through biblical literature, including Aramaic Bible passages and vernacular translations into various Aramaic dialects, with a focus on Syriac version.
In English. Credit not given for this course an 01:53:146 or 01:840:123.

01:013:120 ***Literary Egypt (3)***
Introduction to the works of Egypt's Nobel Laureate Naguib Mahfouz (1911-2006) dealing with conflict between tradition and modernity, faith and freedom, ambition and social mobility, and existential crisis of individuals in a corrupt and suffocating society.
Credit not be given for this course and 01:074:120.

01:013:130 ***Comics in the Middle East (3)***
Introduction to the study of comics and graphic narratives in the Middle East. Genres and media include the comic strip, graphic novel, satirical cartoon, graffiti, and internet memes. We will also look at parallels between modern sequential art and premodern graphic narratives, such as illuminated manuscripts, and examine connections with

American and Japanese comics. No previous knowledge of Middle Eastern literatures or languages required. All readings are in English.
Credit not given for both this course and 01:685:130.

01:013:140-141 *Elementary Arabic I,II (4,4)*
Introductory course in Modern Standard Arabic (MSA) for beginner students. Course emphasizes development of oral and written proficiency.
Prerequisite for 141: 01:013:140, 01:074:140, or placement test. Credit not given for both this course and 01:013:145, 01:013:148-149, 01:074:140-141, or 01:074:148-149.

01:013:143-144 *Arabic Lab I,II (1,1)*
Instructor-guided laboratory practicum for improving oral proficiency practice in aural/oral skills and communication styles. Evaluation of pronunciation and fluency.
Corequisite: 01:013:140-141. Not open to students with any level of prior knowledge of spoken and/or written Arabic.

01:013:145 *Accelerated Arabic (4)*
Introductory Arabic course designed for heritage learners, meaning those who have some proficiency in written or spoken Arabic. Covers all material in 01:013:140-141 Elementary Arabic I and II (4,4).
Credit not given for both this course and 01:013:140, 01:013:141, 01:013:148, 01:013:149, 01:074:140, 01:074:141, 01:074:145, 01:074:148, or 01:074:149.

01:013:148-149 *Elementary Arabic for Arabic Speakers I,II (4,4)*
Introduction to Modern Standard Arabic (MSA) for students who have prior knowledge of Arabic script and spoken dialects, but not enough competencies to speak, read, or write MSA.
Credit not given for both this course and 01:013:140-141, 01:013:145, or 01:074:140-141.

01:013:152-153 *Elementary Modern Hebrew I,II (4,4)*
Speaking, reading, and writing; oral-aural and written exercises.
Prerequisite: Placement test to determine level of language competence. Not open for credit to students who have had two or more years of secondary school Hebrew. Credit not given for both these courses and 01:563:101-102 or 01:685:101-102.

01:013:154-155 *Biblical Hebrew I,II (3,3)*
Introduction to Biblical Hebrew, with a focus on basic grammar and lexicon, leading to reading ability and comprehension of simple narrative prose texts.
Credit not given for both this course and 01:563:141-142.

01:013:156 *Hebrew Review and Continuation (4)*
Development of primary language skills.
Prerequisites: Previous exposure to Hebrew and placement into Hebrew 121. Credit not given for both this course and 01:563:121. Prerequisite: 01:013:152.

01:013:160-161 *Elementary Hindi I,II (4,4)*
Introduction to sound, grammar, and writing system of Hindi; practice and exercises in speaking, reading, and writing. Continuation of Elementary Hindi I; practice and exercises in speaking, reading, and writing.
Prerequisite for 161: 01:013:160. 01:505:160, or placement. Credit not given for both this course and 01:505:160-161.

01:013:162-163 *Elementary Urdu I,II (4,4)*
Introduction to Urdu, focusing on development of elementary-level proficiency in all four language skills.

01:013:176 ***Elementary Persian I (4)***
Introduction to Persian, focusing on development of elementary-level proficiency in all four language skills.
Credit not given for both this course and 01:723:176.

01:013:177 ***Elementary Persian II (4)***
Builds on skills acquired in Elementary Persian I. Focus on Persian orthography, spelling, grammar, vocabulary, and the four language skills. Emphasis on actively using the language for interpersonal, interpretive, and presentational modes of communication.
Prerequisite: 01:013:176 or 01:723:176 or placement exam. Credit not given for this course and 01:723:177.

01:013:186-187 ***Elementary Swahili I,II (4,4)***
Introduction to Swahili, focusing on development of elementary-level proficiency in all four language skills.

01:013:188 ***Introduction to Syriac (3)***
Introduction to reading and writing in Classical Syriac (Aramaic), with focus on understanding basic Syrian grammar and writing simple short texts in Syriac.

01:013:190-191 ***Elementary Turkish I,II (4,4)***
Introduction to Turkish, focusing on development of elementary-level proficiency in all four language skills.
Credit not given for both this course and 01:973:190-191.

01:013:192-193 ***Elementary Twi I,II (4,4)***
Introduction to Twi, focusing on development of elementary-level proficiency in all four language skills.
Credit not given for both this course and 01:974:192-193.

01:013:201 ***Crossroads: Classical Literatures of Africa, the Middle East, and South Asia (3)***
Survey of classical literary traditions of Africa, the Middle East, and South Asia in comparative context.
Credit not given for both this course and 01:685:204.

01:013:202 ***Cinemas of Africa and Asia (3)***
Survey of the cinemas of Africa, the Middle East, and South Asia.

01:013:203 ***Language and Society in Africa, the Middle East, and South Asia (3)***
This course is about language in society. It introduces language within its social context with special reference to African, Middle Eastern, and South Asian speech communities. It examines the interaction and inter-sectionality of language and variables such as power, class, ethnicity, gender, and education. It also looks at the range of articulations of politico-linguistic problems and challenges, including language conflicts, linguistic inequalities, and minority language rights.

01:013:204 ***Introduction to Discourse Analysis (3)***
Introduction to theories, approaches, and methodologies for the study of socially situated language use. Multidisciplinary examination of written and spoken languages/texts to understand the linguistic qualities of language use and the impact of discourse on people's beliefs, attitudes, assumptions, actions, interactions, and social behaviors.

01:013:205 ***Cultural Forces in International Politics (3)***
Exploration of cultural forces in world politics, with a focus on language and literature as important factors in the shaping of political relations across cultures and nations.

01:013:206 ***Banned Books (4)***
Global history of censorship with a focus on the political and cultural contexts of countries like the USA, Niger, Egypt, and India. How ideas in great books have been suppressed through debates about sedition, blasphemy, obscenity, and sexuality and strategies that people used to undermine that suppression, such as book smuggling, underground markets, exile, and translation.
Credit not given for this course and 01:195:206.

01:013:208 ***Jewish-Muslim Relations: History and Culture (3)***
Surveys the cultural history of Jewish-Muslim relations from the seventh century up to our present. Analyzes this important and unique aspect of Jewish and Muslim pasts and the place of the Jews in the cultural history of Islam. Course taught in English.
Credit not given for both this course and 01:508:208 or 01:563:208.

01:013:210 ***World Literature and Social Change (3)***
Critical investigation of diverse fiction from a global perspective with a particular ficus on social change in Africa, the Middle East, and South Asia.

01:013:211 ***Introduction to the Literatures of Africa (3)***
Literatures of Africa from their origins to the present.

01:013:217 ***African Immigrant Literature (3)***
A historical survey of the literary works of several writers from various parts of Africa living in Europe and the USA.
Taught in English.

01:013:220 ***Introduction to the Qur'an (3)***
Academic study of the Qur'an including the origin of the Qur'an, its role as a cultural and historical phenomenon; various controversies and disputes that have revolved around the Qur'an; different schools of thought regarding interpretation of the Qur'an; and development interpretative schools over time as the needs and understandings of any given society have developed. Taught in English. No prior knowledge of the Arabic or of the Qur'an is required.
Credit not given for both this course and 01:840:229.

01:013:221 ***Introduction to the Literatures of the Middle East (3)***
Literatures of the Middle East from their origins to the present.
Credit not given for both this course and 01:195:221 or 01:685:221.

01:013:225 ***Global Arabic (3)***
Traces the historical development of Arabic as a global language, the various meaning Arabic has come to acquire in various parts of the world, and the functions it has come to serve in different periods and different global spaces. Arabic's iterations with other languages and their sociolinguistic implications.
Taught in English. Credit not given for this course and 01:685:225.

01:013:226 ***Rhythms of Resistance: Global Hip Hop (3)***
Explores how hip hop is used across different cultural, linguistic, and geographical localities as an artistic technology for framing issues of racial, gender, sexual, political, economic, health, and philosophical concern.

01:013:229 ***War and Literature in the Arab World (3)***
Examines war and literature through a multifaceted approach, exposing diverse experiences and perspectives that shape creative process of writing during times of high conflict and crisis. No previous knowledge of Middle Eastern languages or literatures assumed.

01:013:231 ***Introduction to the Literatures of South Asia (3)***
Literatures of South Asia from their origins to the present.
Credit not given for both this course and 01:195:243. All works studied in translation.

01:013:232 ***Women Writers of South Asia (3)***
Survey of recent writings by women from a variety of cultural, linguistic, and regional areas of South Asia.
Credit not given for both this course and 01:195:232 or 01:988:232.

01:013:240-241 ***Intermediate Arabic I,II (4,4)***
Continued development of oral and written proficiency. Elementary literary material. Detailed exploration of the underlying linguistic structures of the language.
Prerequisites: 01:013:141, 01:013:145, 01:074:141, 01:074:145, or placement. Credit not given for both this course and 01:074:240-241.

01:013:243 ***Classical Arabic (3)***
Introduction to classical and Qur'anic Arabic.
Prerequisites: 01:013:141 or 01:074:141 or equivalent.

01:013:244 ***Egyptian Arabic I (3)***
Introduction to Egyptian Arabic or masri, most widely spoken of Arabic vernaculars, with focus in speaking, listening, writing, and reading, with an eye to future study in Egypt.
Credit not given for both this course and 01:074:244.

01:013:245 ***Arabic Graphic Narratives (3)***
Introduction to Arabic graphic narratives (comics, graphic novels, newspaper cartoons, graffiti, and internet memes) in global context in translation. No previous knowledge of Middle Eastern languages or literatures assumed.

01:013:252-253 ***Intermediate Modern Hebrew I,II (4,4)***
Development of language skills; selected readings.
Prerequisite: 01:013:152, 01:685:102, 01:563:102, or placement. Credit not given for both these courses and 01:563:131-132 or 01:685:131-132.

01:013:260-261 ***Intermediate Hindi I,II (4,4)***
Continued development of oral and written proficiency. Elementary literary material. Detailed exploration of the underlying linguistic structures of the language.
Prerequisite: 01:505:161 or 01:013:161 or placement. Credit not given for both this course and 01:505:260-261.

01:013:266 ***Ancient Egypt (1.5)***
Introduction into ancient Egypt. Topics include a historical overview, religion, art, interconnections between ancient Egypt and ancient Israel, and Hieroglyphic Egyptian language and literature.
Credit not given for both this course and 01:563:266.

01:013:276-277 ***Intermediate Persian I,II (4,4)***
Continued development of oral and written proficiency. Elementary literary material. Detailed exploration of the underlying linguistic structures of the language.
Prerequisite: 01:013:177 or 01:723:177 or placement. Credit not given for both this course and 01:723:276-277.

01:013:280-281 ***Intermediate Sanskrit I,II (4,4)***
Reading of intermediate-level Sanskrit technical literature: grammar, logic, and textual exegesis.
Prerequisite: 01:013:181 or permission of instructor.

01:013:285 ***Language and Globalization (3)***
Linguistic and sociolinguistic dimensions of globalization and current debates surrounding language and globalization.

01:013:286-287 ***Intermediate Swahili I,II (4,4)***
Continued development of oral and written proficiency. Elementary literary material. Detailed exploration of the underlying linguistic structures of the language.
Prerequisite: 01:013:187.

01:013:290-291 ***Intermediate Turkish I,II (4,4)***
Continued development of oral and written proficiency. Elementary literary material. Detailed exploration of the underlying linguistic structures of the language.
Prerequisite: 01:013:191 or 01:973:191 or placement. Credit not given for both this course and 01:973:290-291.

01:013:292-293 ***Intermediate Twi I,II (4,4)***
Continued development of oral and written proficiency. Elementary literacy material. Detailed exploration underlying linguistic structures of the language.
Prerequisite: 01:013:193 or placement.

01:013:294-295 ***Intermediate Yoruba I,II (4,4)***
Continued development of written and oral proficiency. Elementary literary material. Detailed exploration of the underlying linguistic structures of the language.
Prerequisite: 01:013:134 or 01:013:195.

01:013:301 ***Topics in African, Middle Eastern, and South Asian Languages and Literatures (3)***
Variable content. Studies in particular ideas, themes, forms, and historic units in literature, linguistics, or sociolinguistics in one or more regions covered by AMESALL.

01:013:302 ***Topics in African, Middle Eastern, and South Asian Languages and Literatures (1.5)***
Variable content. Studies in particular ideas, themes, forms, and historic units in literature, linguistics, or sociolinguistics in one or more regions covered by AMESALL.

01:013:304 ***Introduction to Translation Studies (3)***
Introduction to the main themes and issues in contemporary translation studies.

01:013:305 ***Languages in Peril: African, Middle Eastern, and South Asian (3)***
Introduction to local languages, their scientific and cultural value, and the threat posed by their extinction, with a focus upon the endangered languages of Africa and Asia.

01:013:307 ***Introduction to Postcolonial Literatures and Theories (3)***
Study of novels, poetry, essays, and films from regions of the world deemed postcolonial, which may include Africa, Latin America, South and Southeast Asia, and the Caribbean, among others. Discussion of major issues in postcolonial theory and criticism.
Credit not given for both this course and 01:195:307.

01:013:308 ***Minorities in the Middle East (3)***
Examination of various ethno-linguistic and religious minority groups, their origins, their oral and written literatures, their recent history (from 1798 onwards), their current status, and their future prospects, and how these factors influence their experiences of and perspectives on the world.
Credit not given for both this course and either 01:685:306 or 01:840:306.

01:013:311 ***Women Writers of Africa (3)***
Survey of recent writings by women from a variety of cultural, linguistic, and regional areas of Africa.
Credit not given for both this course and 01:195:363.

01:013:312 ***African Folklore and Myth (3)***
Survey of the folklore of Africa and the African diaspora.

01:013:314 ***Islam and African Literature (3)***
Impact of Islam on African literature, and Islam as a theme of literary expression.
Credit not given for both this course and 01:840:377.

01:013:315 ***Political Thought in African Literatures (3)***
Literatures of Africa as an instrument of political thought and political activism.

01:013:316 ***African Literature of the South Asian Diaspora (3)***
Imaginative works of writers of the South Asian diaspora in East Africa and Southern Africa.

01:013:320 ***The Ottoman Middle East: Politics, Culture, Literature (3)***
A study of the sociocultural atmosphere of the Middle East in the late 19th-early 20th century under Ottoman rule.

01:013:322 ***Middle Eastern Folklore and Myth (3)***
A survey of the folklore of the Middle East, with a focus upon Jewish, Christian, Mandaean, and Muslim folktales from Iraq and the Levant.
Credit not given for both this course and 01:685:323.

01:013:324 ***Ottoman Africa (3)***
Cultural legacy of Ottoman-Turkish rule in Africa during 19th century in context of radical political and cultural shifts, through historical narratives, novels, short stories, essays, articles, and poetry.

01:013:325 ***Women Writers of the Middle East (3)***
Survey of recent writings by women from a variety of cultural, linguistic, and regional areas of the Middle East.

01:013:326 ***Orhan Pamuk (3)***
Introduction to Turkish Nobel Prize laureate Orhan Pamuk through novels, essays and articles, interviews and autobiographical narratives, offering practical instruction in literary and cultural criticism.

01:013:331 *Modern Literatures of South Asia (3)*
Literary works from modern South Asia.
Credit not given for both this course and 01:195:249. All works studied in translation.

01:013:334 *The Modern Indian Woman (3)*
Course focuses on how representations of women have shaped ideas of modern Indian citizenship and belonging in colonial and postcolonial periods.

01:013:335 *Caribbean Pluralities and Indo-Caribbean Literature (3)*
A study of some of the major canonical works of the Anglophone Caribbean and Indo-Caribbean writers.
Credit not given for both this course and 01:195:335 or 01:195:338.

01:013:337 *Film and Literature in South Asia (3)*
A critical study of a wide range of South Asian films and the literary works they are based on/inspired by.

01:013:340-341 *Advanced Arabic I,II (3,3)*
Reinforcement of oral and written proficiency developed within a cultural context. Comprehensive understanding of linguistic structures. Readings in literature.
Prerequisite: 01:013:241 or 01:074:241 or permission of instructor. Credit not given for both this course and 01:074:340-341.

01:013:342 *Modern Arabic Literatures (3)*
Survey of representative works of modern Arabic literature in translation, including poetry, the novel, the short story, and plays.
Credit not given for both this course and 01:195:365.

01:013:343 *Arabic Classical Literatures (3)*
Survey of a wide selection of Arabic literary texts in translation, dating from the sixth to the 12th centuries, including poetry and prose in both classical and colloquial Arabic.
Credit not given for both this course and 01:195:237. All works studied in translation.

01:013:346 *Literature and Memory in the Arab World (3)*
The course explores the interconnections between memory and literature through close readings of memoirs, novels, poems, short stories, films, and graphic art.
Credit not given for both this course and 01:195:337 or 01:685:347.

01:013:352-353 *Advanced Modern Hebrew I,II (3,3)*
Intensive training in Hebrew grammar and reinforcement of already acquired higher-level language skills: speaking, listening, comprehension, reading, and writing. Text analysis includes newspaper articles and essays.
Prerequisite: 01:563:132, 01:685:132, 01:103:253, or placement. Credit not given for both these courses and 01:563:210-211 or 01:685:210-211.

01:013:354 *Contemporary Hebrew Literature and Media (3)*
Addresses current issues facing Israeli society as reflected in Israeli literature and press. Texts include poetry, songs, essays, newspaper articles, and films.
Prerequisite: 01:563:211 or 01:013:353 or placement. Credit not given for both this course and 01:563:371.

01:013:355 ***Introduction to Modern Israeli Literature (3)***
Introduces students to major writers of modern Hebrew literature with the goal of developing their own critical reading and writing skills. Readings include modern Hebrew poetry, prose, and plays.
Credit not given for both this course and 01:563:372.

01:013:360-361 ***Advanced Hindi I,II (3,3)***
Reading, textual analysis, and content discussion of selected short essays from Hindi newspapers, fictional works, and ethnographic material. Introduction to Hindi discourse structure.
Prerequisite: 01:013:261 or 01:505:261. Credit not given for both this course and 01:505:360-361.

01:013:365 ***Bollywood (3)***
A broad overview of the Bollywood industry and its cinematic productions over the years.
Credit not given for both this course and 01:175:365.

01:013:372 ***Islamic Mystical Literatures (3)***
Examines literary output of mystics in Islamic world. Main focus will be on mystical teachings, although attention will be also paid to literary genres, including not only poetry of various forms and from diverse regions and periods, but also biography and modern novels, all in English translation.
Credit not given for both this course and 01:840:372.

01:013:376-377 ***Advanced Persian I,II (3,3)***
Reinforcement of oral and written proficiency developed within a cultural context. Comprehensive understanding of linguistic structures. Readings in literature.
Prerequisite: 01:013:277 or placement. Credit not given for both this course and 01:723:376-377.

01:013:386-387 ***Advanced Swahili I,II (3,3)***
Reinforcement of oral and written proficiency developed within a cultural context. Comprehensive understanding of linguistic structures. Readings in literature.
Prerequisite: 01:013:287 or 01:956:287 or placement.

01:013:390-391 ***Advanced Turkish I,II (3,3)***
Reinforcement of oral and written proficiency developed within a cultural context. Comprehensive understanding of linguistic structures. Readings in literature.
Prerequisite: 01:013:291 or placement. Credit not given for both this course and 01:973:390-391

01:013:392-393 ***Advanced Twi I,II (3,3)***
Develop advanced-level proficiency in all four language skills: writing, speaking, listening, and reading Twi (Akan).
Prerequisite: 01:013:293 or placement.

01:013:401 ***Senior Seminar in Literature and Society (3)***
Advanced seminar on critical theories and methods of analysis related to modern and contemporary literatures of Africa, Middle East, and South Asia.
Prerequisites: 01:013:201. Open only to students with senior standing or by permission of instructor.

01:013:402 ***Advanced Topics in African, Middle Eastern, and South Asian Languages and Literatures (3)***
Variable content. Advanced studies in particular ideas, themes, forms, and historic units in literature, linguistics, or sociolinguistics in one or more regions covered by AMESALL.

01:013:403-404 ***Translation Practicum I,II (3,3)***
Practical course in translation into English.***Prerequisites: 01:013:304.***

01:013:409 ***Introduction to the Semitic Languages (3)***
Survey of the Semitic languages and their history from a comparative perspective.
Prerequisite: One year of a Semitic language (such as Hebrew or Arabic) or permission of instructor. Credit not given for both this course and 01:563:409.

01:013:410 ***African Immigrant Voices (3)***
An examination of the literary works of African immigrant writers in the United States and Europe.

01:013:412 ***Literature and Religion (3)***
Addresses relationship between literature and religion through close reading of select literary works and survey of major schools of interpretation within contemporary literary and cultural criticism.

01:013:430 ***Gender, Nation, and Literature in South Asia (3)***
Course focuses on how representations of women have shaped ideas of modern Indian citizenship and belonging in colonial and postcolonial periods.
Credit not given for both this course and 01:195:430 or 01:988:431.

01:013:432 ***Readings in Modern Hindi Literature (3)***
Introduces students to modern Hindi literature and its various genres. Course conducted entirely in Hindi.
Prerequisite: 01:013:261 or 01:505:261. Credit not given for both this course and 01:505:432.

01:013:433 ***Modern Urdu Literature and Popular Culture (3)***
Introduces students to modern Urdu literature and popular culture in various genres and cultural contexts. Provides overview of diverse manifestations of South Asian culture and history in Urdu literature. Conducted entirely in Urdu.

01:013:442 ***Readings in Modern Arabic Literature (3)***
Critical readings of selected short stories from the modern Arab world.
Prerequisite: Advanced Arabic 01:013:341, near-native proficiency in Arabic, or permission of instructor. Credit not given for both this course and 01:074:442.

01:013:445 ***Storytelling in the Muslim World (3)***
Exploration of storytelling traditions from culturally diverse communities of the Muslim world, from medieval times to present.

01:013:452 ***Readings in Modern Hebrew Literature (3)***
Reading and analysis of modern Hebrew poetry and short prose, with an emphasis on major Israeli authors.
Prerequisite: 01:563:372 or 01:013:355 or placement. Credit not given for both this course and 01:563:471.

01:013:453 ***The Hebrew Novel (3)***
Reading and analysis of the modern Hebrew novel, with an emphasis on major Israeli authors.
Prerequisite: 01:563:372, 01:013:355, or placement. Course taught in Hebrew. Credit not given for both this course and 01:563:472.

01:013:454 ***Love and Desire in Hebrew Prose and Poetry (3)***
Explores the themes of love and desire in modern Hebrew prose, poetry, and film. Special attention paid to how the literature and films handle the issues of love, desire, and personal relationships in contemporary Israeli culture.
Prerequisite: 01:563:372, 01:013:355, or placement. Course taught in Hebrew. Credit not given for both this course and 01:563:484.

01:013:455 ***Hebrew Literature and Israeli Society (3)***
Traces the development of modern Israeli literature, from the establishment of the state of Israel in 1948 to the present day. Of special interest will be the manner in which these stories define the quintessential Israeli hero and contend with the question of Israeli identity.
Prerequisite: 01:563:372, 01:013:355, or placement. Course taught in Hebrew. Credit not given for both this course and 01:563:485.

Africana Studies 014 (SAS)

AFRICANA STUDIES 014

Department of Africana Studies, School of Arts and Sciences

Website: Here

Chair: Alex Zamalin

Undergraduate Director: Walton Johnson

Professor:

Noura Erakat, B. A., J.D., California (Berkeley); LL.M., Georgetown; LL.M., Temple

Walton R. Johnson, B.A., Oberlin College; M.A., Ph.D., London

Alex Zamalin, B.A., Rutgers College; Ph.D., CUNY Graduate Center

Associate Professors:

Kim D. Butler, B.A., Sarah Lawrence College; M.A., Howard; M.A., Ph.D., Johns Hopkins

Brittney Cooper, B.A., Howard; M.A., Ph.D., Emory

Edward Ramsamy, B.A. (Hons), Durban-Westville (South Africa); M.C.R.P., Ph.D., Rutgers

Gayle T. Tate, B.A., CUNY (City College); M.S., Columbia; M.A., New York; Ph.D., CUNY

Assistant Professors:

Akissi Britton, B.A., Hampton; Ph.D., CUNY

JT Roane, B.A., University of Virginia; M.A and MPhil, Columbia; Ph.D. Columbia

Assistant /Teaching Professor:

Kavitha Ramsamy, B.A., M.A., Ph.D., Rutgers

Professor Emeritus:

Leonard L. Bethel, B.A., Lincoln (Pennsylvania); M.A., New Brunswick Theological Seminary; M.Div., Johnson C. Smith; Ed.D., Rutgers

Africana Studies 014 (SAS)

Learning Goals

Learning Goals

To develop students' knowledge of African-American, African, and Caribbean cultural, social, political, and economic experiences; to teach students the value of multidisciplinary scholarship; to equip students with intellectual and interpersonal skills that will enable them to function in a variety of professional careers; to produce graduates who use scholarship in the service of social justice. Majors will be able to demonstrate knowledge of the interrelated experiences of African people in Africa, America, and in other parts of the African diaspora, including their history, philosophy, cultures, and contemporary issues; apply the research methodologies appropriate to Africana studies; and employ critical and analytical skills with respect to Africa and its diaspora.

Africana Studies 014 (SAS)

Major Requirements

Major Requirements

The major in Africana studies requires the satisfactory completion of 11 courses (3 credits each) in the department, with a grade of C or better. These 11 courses are comprised of four required courses and seven elective courses. At least six of the courses credited toward the major must be at the 300 or 400 level. Students are encouraged to take courses offered by other departments pertaining to their area of concentration or interest. Two of those courses may be applied toward the major. Study abroad is strongly recommended for Africana studies majors. The department offers assistance in long-term curriculum planning and in securing financial aid. Students participating in one- or two-semester study abroad programs in countries of the African diaspora--Brazil, Costa Rica, Ghana, Kenya, Morocco, Namibia, and South Africa--can receive course credit (in consultation with the chair) toward the Africana studies major or minor.

The compulsory core courses are:

01:014:103 Introduction to Africana Studies (3)

01:014:203 or 204 The Black Experience in America (3)

01:014:233 Introduction to the Methodology of Africana Studies (3)

01:014:490 Seminar in Africana Studies (3)

Africana Studies 014 (SAS)

Minor Requirements

Minor Requirements

The minor in Africana studies consists of six semester courses (of at least 3 credits each) offered by the department, including 01:014:103 Introduction to Africana Studies, 01:014:203 or 204 The Black Experience in America, and 01:014:490 Seminar in Africana Studies. At least three of these six courses must be at the 300 level or above. Students must earn a grade of C or better in all courses counted toward the minor.

Africana Studies 014 (SAS)

Departmental Honors Program

Departmental Honors Program

To qualify for departmental honors, an Africana studies major must have a cumulative grade-point average of 3.0 or better and a cumulative grade-point average of 3.4 or better in Africana studies. The department awards a Paul Robeson Africana Prize to students graduating with honors. In order to graduate with highest honors, a student must participate in the departmental honors project, or, upon petition and with the approval of the faculty, a student may participate in the School of Arts and Sciences Honors Program.

Africana Studies 014 (SAS)

The Africana Studies Scholars Project

The Africana Studies Scholars Project

The department sponsors the Africana Studies Scholars Project, a two-semester, 12-credit (01:014:497-498) senior-year course for honors majors in the discipline. To be eligible, students must have a cumulative grade-point average of 3.0 or better and a cumulative grade-point average of 3.4 or better in Africana studies by the end of the junior year. They also must have completed 01:014:103 Introduction to Africana Studies, 01:014:203 or 204 The Black Experience in America, 01:014:233 Introduction to the Methodology of Africana Studies, and three electives at the 300 or 400 level.

Africana Studies 014 (SAS)

African Diaspora Field Study

African Diaspora Field Study

The Department of Africana Studies sponsors a course 01:014:495 African Diaspora Field Study, which allows students to study, firsthand, the cultures of the African diaspora through collaborations with foreign institutions and university study abroad programs.

Africana Studies 014 (SAS)

Courses

Courses

01:014:101 ***Topics in Africana Studies (1.5)***
Analysis of special topics in Africana studies from an interdisciplinary perspective. Course focuses on issues affecting people of African descent in continental Africa, the United States, and throughout the global African diaspora.

01:014:103 ***Introduction to Africana Studies (3)***
Interdisciplinary survey of the social, economic, political, and historical aspects of the black experience in America and abroad.

01:014:107 ***African-American Folklore (3)***
Introductory course on the forms and applications of African-American folklore.

01:014:130 ***African-American Literature (3)***
Contemporary African-American expressive literatures--poetry, critical essays, novels, films, folklores, plays--analyzed for cosmology, style, structure, and content.

01:014:132 ***Black Experience and Film Medium (3)***
Critical evaluation of images of blacks in films. Screening of films.

01:014:140 ***Introduction to American Cultures (1.5)***
Develops an understanding of the historical, social, and political factors that distinguish the diverse cultures of present-day America.
Credit not given for both this course and 01:512:140.

01:014:201 ***African Belief Systems and the Latino Community (3)***
Historical examination of ancestor worship, Santeria (Cuba), Vodun (Santa Domingo), Espiritismo (Puerto Rico), and other African-based belief systems. Formation from African to slave societies and use in contemporary period.
Credit not given for both this course and 01:595:201.

01:014:202 ***What Everyone Should Know about "Race" (3)***
Race is a powerful social construct that is central to understanding life in the 21st century, both in the United States and abroad. Through analysis of the historical, biological, political, social, psychological, and economic dimensions of race, from multiple theoretical perspectives, this course provides a solid grasp of a complex and frequently bewildering phenomenon.

01:014:203,204 ***The Black Experience in America (3,3)***
Interdisciplinary examination of African Americans within the context of American political economy, special conditions of oppression, responses to exploitation, and resultant social changes.
Credit not given for both 01:014:203 and 01:050:246.

01:014:205 ***Islamic Civilization (3)***
Survey of Islamic societies from seventh-century Arabia to modern times. Religious, political, military, social, economic, and cultural institutions and organizational patterns.
Credit not given for both this course and 01:508:201.

01:014:206 ***The Black Woman (3)***
Role of black women in survival and evolution of the black race as presented in fictional and nonfictional literature.
Credit not given for both this course and 01:988:206.

01:014:207 ***Black Male Identity in the United States (3)***
Examines historical, sociological, psychological, and political factors that influence the identity of black men in the United States.

01:014:208 ***The Sociology of Black Economic Development (3)***
Socioeconomic, spatial, and political development of alternatives to minority or black capitalism within the local, regional, and national development strategies of the United States.

01:014:209 ***Mentoring and Civic Responsibility (1.5)***
Introduces prospective mentors to competencies that will aid them to serve as peer mentors with a focus on mentoring students who are first-generation, low-income, and/or underrepresented in higher education.
Prerequisite: By special permission.

01:014:210 ***Africa: Continent of the Future? (3)***
Introduction to the history, culture, politics, and development of Africa. Corrects some dominant myths and stereotypes about the continent that abound in the American mainstream.

01:014:211 ***Experimental Blackness (3)***
Introduction to the use of experiments in social science research through an exploration of how experiments have been used to investigate a variety of social phenomena such as how Black Americans encounter housing and employment discrimination; the impact of neighborhood change on poverty; and how bias underpins police behavior. Analysis of how these experiments are designed and implemented, and how the data they produce are analyzed.

01:014:212 ***Politics and Power in Modern Africa (3)***
Social and political changes in 20th-century Africa, with an emphasis on South Africa since 1950.

01:014:213 ***Blacks in History (3)***
Roles played by Africans and people of African descent in world history. An African-centric approach to historical inquiry.

01:014:214 ***Feeling Race: The Emotional Politics of Race (3)***
Analysis of the role of emotions in understanding racism and racial politics, using the fields of psychology, biology, sociology, political science, law and Black studies.

01:014:215 ***Contemporary Issues and Their Background (3)***
Key controversial issues important to understanding the contemporary black experience. Primary focus on three basic dimensions: double-consciousness, decolonization and neocolonialism, and cultural control. Systematic conceptual analysis.

01:014:222 ***The Black Elite (3)***
Emergence of a black elite; social relationships with the white community and the black masses.

01:014:223,224 ***Independent Study (1-4,1-4)***
Prerequisites: 01:014:103, a minimum of 9 credits in department or approved equivalent, and good academic standing. Faculty proctor required. Registration by permission only.

01:014:230 ***Psychology of the Black Experience (3)***
Evaluation of psychological principles, theories, and assessment techniques in relation to the personality and behavioral development of African Americans.

01:014:233 ***Introduction to the Methodology of Africana Studies (3)***
Introduction to Africana studies through lectures, multidisciplinary approaches to the study of Africana materials, original research projects, and introduction to major archival resources.

01:014:235 ***Global Black Asian Encounters (3)***
General introduction to encounters and intersections between Blacks and Asians in a global context, exploring identities, solidarities, conflicts, and social movements.

01:014:237 ***Decolonizing God: Religion and Resistance in the African Diaspora (3)***
Role of religion and spiritual practices in African and African-descended communities in strategies for both survival and liberation. Role of religious traditions such as Rastafari in Jamaica, Vodou in Haiti, Lucumí/Santeriá in Cuba, and the Black Church and Islam in the United States in the identities, cultures and liberation struggles of Black people and their resistance to the oppressive structures that defined their lives throughout the diaspora.

01:014:240 ***Third-World Creative Writing (3)***
Third-world contemporary prose classics as models of creative expression and as a basis for creative writing exercises, geared to meet individual aptitudes, needs, and interests.

01:014:250 ***African Diaspora Cultural History (3)***
Introductory survey of the African roots of American and world cultures, focusing on their history and processes of culture change. Survey of African-based arts and cultural expressions in the diaspora.

01:014:255 ***History of Black Education in the United States (3)***
Principles and policies underlying the educational process among blacks; social and political impact.

01:014:258 ***Intellectual Thought in the African Diaspora (3)***
Basic social and political ideas in the history of black ideology.

01:014:264 ***Black Lives Matter (3)***
Explores the development of the #BlackLivesMatter movement beginning with the colonial era and ending with the contemporary moment.

01:014:265 ***Afro-Brazilian History (3)***
Overview of history of largest African diaspora community in world. Encourages critical analysis of major issues in African-Atlantic diaspora studies. Principal scholarship supplemented with selected readings in literature, oral history, Afro-Brazilian movement documents, and iconography.
Credit not given for both this course and 01:508:265 or 01:590:265.

01:014:269 ***Black Religion (3)***
Social, philosophical, historical, and sociopsychological understanding of black America's oldest and largest institution. Influence in economic, political, social, and spiritual life of the black community.

01:014:274 ***Black Civilizations (3)***
Introduction to ancient and medieval black African civilizations with emphasis on the political and religious thought and technological achievement of African empires.

01:014:276 ***Black Social and Political Development (3)***
Survey of the recent trends regarding health, unemployment, poverty, economics, electoral politics, and international relations.

01:014:285 ***African-American Narrative Analysis (3)***
Collection and analysis of African-American narrative material. Evaluation based on various analytical structures and approaches.

01:014:286 ***Mentoring as Public Service I (3)***
Introduces students to the Rutgers Future Scholars (RFS) program and the basic skills, practices, and ethics of mentoring. Examines contemporary inequalities and barriers to access higher education and initiatives to address educational access. Required weekly meetings with RFS high school students.
Prerequisite: By special permission.

01:014:301,302 ***Topics in Africana Studies (3,3)***
Analysis of special topics in Africana studies from an interdisciplinary perspective. Course focuses on issues affecting people of African descent in continental Africa, the United States, and throughout the global African diaspora.
May be repeated for credit when topic differs.

01:014:303 ***Seminar in Black Diasporic Media (3)***
Examines a range of visual media by black cultural producers. Offers a diasporic framework as an opportunity to trace how technologies, genres, styles, and issues circulate through various historical moments, media, conceptualizations of blackness, and locations.
Credit not given for both this course and 01:050:311.

01:014:304 ***Afromusicology (3)***
Various forms of African-American music: spiritual, gospel, blues, folk, and jazz. African and Western influences: role, development patterns, and function in sociocultural context.

01:014:305 ***Race, International Law & Empire (3)***
Critical examination of the role of international law establishing racial regimes in a global order using TWAIL (Third World Approaches to International Law). Topics may include laws of armed conflict, international criminal law, sovereignty, self-determination, and human rights using an interdisciplinary approach combining law, history, anthropology, geography, and political science. Credit not given for this course and 01:202:315.

01:014:306 ***The Black Woman in Political Context (3)***
Takes political-historical approach from precolonial traditional African women to contemporary black feminism and liberation; emphasis on the black woman's distinct consciousness, family relationships, organizations, institutions, political activities, and revolutionary ideologies.

01:014:307 ***Africana Community Health Care Experience: Perspectives from Patients and Physicians (3)***
Admission by special permission only. Mentoring and "shadowing" a physician or another health care provider including weekly observation, reflection, and study of factors impacting African American health.
Prerequisite: 01:014:347

01:014:316 ***Caribbean Society in Literature (3)***
Introduction to the political, social, and historical life of the Caribbean (Jamaica, Trinidad, Barbados, Guyana, and St. Lucia) through the novels, poems, and essays of its writers.

01:014:317 ***Black Profiles (3)***
Portrayal of the movements and events of Africa and dispersion through studies of black leaders--their lives, works, and writings.

01:014:318 ***Bigotry, Prejudice, and Racism: Psychological Foundations (3)***
Basic conscious and unconscious psychological factors in racist behavior and attitudes. Evaluation of explanatory theories and empirical data as presented by contemporary psychiatrists and psychologists.

01:014:321 ***African Presence in American Cultures (3)***
Examination of African influence on black life and culture in the New World--on language, art, music, and cuisine.

01:014:323 ***Seminar in the Philosophy of Africana Studies (3)***
Disciplinary problems involved in constructing a paradigm for the philosophy of the discipline.

01:014:330 ***Contemporary Issues in Southern Africa (3)***
Examines contemporary events in Southern Africa with particular focus on the transition in South Africa from apartheid to democracy.

01:014:340 ***Third-World Writing and Criticism (3)***
Essays in literary criticism with third-world prose classics as a basis for critiques. Study of the short story and exercises in short-story writing.

01:014:341,342 ***Supervised Community Placement (3,3)***
Supervised study and experience in a black community of the United States, the Caribbean, South America, or Africa.

01:014:347 ***Health Issues in the African-American Community (3)***
Health problems affecting black communities and their relevance to understanding black political, social, and psychological attitudes.

01:014:349 ***Topics in American Politics (3)***
Special topics in American politics that vary with the instructor.
Prerequisite: Special permission. Credit not given for both this course and 01:790:349.

01:014:350 ***African-American Linguistics (3)***
Historical and varying manifestations of black English in the Western hemisphere.

01:014:353 ***Black Community Law and Social Change (3)***
Origins of racism in the judicial process and its effects on the black community since slavery.

01:014:355 ***Blacks and Economic Structures (3)***
Scope and organization of economic activity in the black community; investments, ownership of capital, exploitation of the consumer and wage earner.

01:014:356 ***Muslims and Islamic Institutions in America (3)***
Explores the bonds of the Muslim community, the meaning of Muslim-American identity, how immigrant groups are assimilating into American society, and how institutional frameworks are adopted for national integration.
Credit not given for both this course and 01:685:355.

01:014:357 ***Islam in the Global Black Experience (3)***
Examination of the sociopolitical dimensions of Islam in Africa and the African diaspora, and the interactions between Islam and such ideologies as nationalism and race consciousness in black communities internationally.

01:014:359 ***Race, Culture, and Politics: Blacks and Jews in America (3)***
How Black and Jewish identities have evolved in relationship to one another through an examination of social and political history, literature, and film.
Credit not given for both this course and 01:050:359 or 01:512:359 or 01:563:359.

01:014:360 ***Writers of Africa and the New World (3)***
Comparison of black writers of Africa, the United States, and the Caribbean, with focus on areas of commonality and divergence.

01:014:362 ***Black Identity, Religion, and Politics (3)***
Analysis of social, psychological, and institutional forces shaping group and individual identity of blacks.

01:014:363 ***Race, Class, Gender, and Schooling (3)***
Examines racial and gender differences in adolescents' school performance. Structural, historical, and cultural foci. Ethnographic and autobiographical cases of black students and other students of color.
Pre- or corequisite: 01:070:101 or permission of instructor. Credit not given for both this course and 01:070:363 or 01:988:363.

01:014:365 ***Black Migration and Urbanization (3)***
Black migration to industrial-urban centers; problems of urbanization. Present interrelationships among racial demography, ecology, social psychology, and the planning process within cities.
Credit not given for both this course and 01:050:371.

01:014:366 ***The History of Race and Sex in America (3)***
Examines how race and gender have independently and jointly determined life chances throughout American history.
Credit not given for both this course and 01:512:366 or 01:988:329.

01:014:367 ***African Labor History (3)***
Precolonial and colonial labor mobilization, control, and resistance; working class formation; the labor process and worker consciousness.
Credit not given for both this course and 01:508:420.

01:014:369 ***Black Theology (3)***
Exploration into theological concepts, terms, and expressions as they relate to the African and the African American.
Pre- or corequisite: 01:014:269.

01:014:370 ***The Afro-Atlantic Diaspora (3)***
Introduction to history of African diaspora in the Americas and the Caribbean. Traces origins and development of the Atlantic slave trade and the creation of new African-based cultures in the Americas.

01:014:371 ***The New Scramble for Africa (3)***
Analysis of the historical, political, demographic, economic, and sociocultural problems of African underdevelopment within world spatial structure and the contemporary scene.
Prerequisite: 01:014:212.

01:014:376 ***Pan-African Movement (3)***
Pan-Africanism and its development among the black elite on both sides of the Atlantic from the early 19th century to the present.

01:014:380 ***Blacks in Science: Ancient and Modern (3)***
Lost sciences of inner Africa; African contributions to early dynastic Egyptian science and, with Arabs, to medieval Moorish science; African-American science and invention.
Pre- or corequisite: 01:014:274 or 321.

01:014:381 ***Politics of Black America (3)***
Political perspectives and strategies of black Americans and the responsiveness of the American political system to the interests and demands of the black community.
Credit not given for both this course and 01:790:334.

01:014:382 ***Politics of Minority Coalitions (3)***
Exploration of the politics surrounding the efforts to build viable coalitions among various minority groups within the United States.

01:014:383 *Everyday Forms of Resistance (3)*
How ordinary citizens forge ways to address the political system when, for various reasons, "normal" channels are unavailable. Activities include social movements and everyday forms of resistance.

01:014:384 *The Black Community and Social Issues (3)*
Examines a variety of social issues that impact the life chances of African Americans in the United States.
Credit not given for both this course and 01:050:370.

01:014:385 *Mentoring as Public Service II (3)*
Part two of the Rutgers Future Scholars (RFS) mentoring course. In-depth analysis of mentoring and practical experience. Topics include urban education, youth activism and advocacy, school-to-prison pipeline, and other issues affecting historically underserved communities. Required weekly meetings with RFS high school students.
Prerequisites: 01:014:286. By special permission.

01:014:386 *African Americans and Sports (3)*
The role that sports have played in African Americans' quest for freedom and equality in American society. The notion that African Americans' success on sports fields translates into success in the larger American society is critically examined.

01:014:404 *Race in Today's World (3)*
Theoretical analysis of the structure of race relations, and evaluation of its relevance to research in today's world.

01:014:413 *Colonialism and Neocolonialism (3)*
Political and economic aspects of colonialism. Colonized mind and behavior as portrayed by such authors as Mannoni, Balandier, Memmi, and Fanon. Neocolonialism as a technique of control.

01:014:418 *Major African-American Writers (3)*
Study of one to three major African-American writers, such as Richard Wright, Ralph Ellison, James Baldwin, Langston Hughes, and Imamu Baraka; social implications of their creative work.

01:014:423 *Black Thought: A Philosophical Inquiry (3)*
Investigation into a notion of a black philosophy as various philosophical terminologies are explored.
Prerequisite: 01:014:323.

01:014:436 *Segregation and Health (3)*
The connection between black-white health disparities and black-white residential segregation.
Credit not given for both this course and 11:374:436.

01:014:460 *Methodologies in Africana Studies Research (3)*
Techniques of research. Historical and contemporary research models used. Methodologies and theories of research.

01:014:461 *African Political Economy (3)*
Examination of the explanation for the contradictions between Africa's wealth and apparent poverty. Analysis of various national development paths, such as capitalism, African socialism, Ujamaa, and communism.

01:014:481 ***The Black Family (3)***
Consideration of the black family in historical and contemporary contexts: nuclear versus extended families; two-parent and female-headed households; rural and urban environmental effects.
Prerequisite: Junior, senior, or graduate standing. Recommended: Previous seminar coursework.

01:014:490 ***Seminar in Africana Studies (3)***
Independent research under faculty guidance, or classroom orientation focusing on a major topic exploring the black experience.

01:014:491,492 ***Independent Study (1-4,1-4)***
Prerequisites: 01:014:233, a minimum of 18 credits in department or approved equivalent, and good academic standing. Faculty proctor required. Registration by permission only.

01:014:495 ***African Diaspora Field Study (3)***
Social and cultural study of selected communities of the African diaspora including African heritage, historical development, and analysis of contemporary issues.
Prerequisite: Appropriate foreign language competency for non-English speaking locations.

01:014:497-498 ***Africana Studies Scholars Project (6,6)***
To graduate with highest honors, students must participate in this departmental honors project or, with approval, substitute the School of Arts and Sciences (SAS) Honors Program.
Both semesters must be completed to receive credit.

Agriculture and Food Systems 020 (SEBS)

AGRICULTURE AND FOOD SYSTEMS 020

Degree: B.S.

Director: -

Program Website: http://agricultureandfoodsystems.rutgers.edu

*(Sunsetting curriculum)*Agriculture and food systems aim to appeal to those who are interested in an entrepreneurial and innovative education in the agricultural sciences, spanning the entire range from production to table. The A&FS major targets students who seek careers in agribusiness, government service, and agricultural education and extension, as well as those preparing to be owners/operators of farming enterprises.
Students interested in agricultural education can enroll in the Agricultural Education option within the Agriculture and Food Systems major. This option must be combined in a 4 + 1 program with the Graduate School of Education.

Graduation Requirements for the Major

Graduation Requirements for the Major

Students matriculating prior to the fall semester of 2015 in the School of Environmental and Biological Sciences (SEBS) must complete the SEBS general education requirements. In addition, students majoring in agriculture and food systems must complete the major requirements described below.

Students matriculating fall 2015 or after and transfer students matriculating in 2016 and after must complete a goal-based Core Curriculum in place of general education requirements. The goal-based core is described here: http://sebs.rutgers.edu/core. Courses are certified for the Core Curriculum by a faculty committee. A current list of certified courses can be found here: http://sebs.rutgers.edu/core.

Agriculture and food systems major requirements are as described below. The program has flexibility so academic advising is provided to ensure that students choose courses that support their career goals.

For an up-to-date description of agriculture and food systems major requirements, courses, and course sequences please refer to the program webpage at http://agricultureandfoodsystems.rutgers.edu.

Total Credits: 60 to 63 credits

A. Required Courses:

i. Science Requirements:

- At least one introductory biology course (01:119:101 or 103 or 119 or 199)
- At least one introductory chemistry course (01:160:126 or 127 or 128 or 134 or 140 or 159 or 161 or 163)
- At least one introductory earth science, ecology, or geological sciences course (01:460:100 or 101; or 11:216:101 or 217 or 351; or 11:374:101; or 11:375:101; or 11:573:445)

ii. Agriculture and Food Systems Requirements:

11:020:210 Introduction to Agriculture and Food Systems
11:020:215 Applied Practical Applications in Agriculture and Food Systems

iii. Soils Requirement (choose one course):

11:216:422 Soil Organismal Diversity
11:375:360 Soils and Water
11:375:453 Soil Ecology
11:776:102 Soils and Society
11:776:440 Soil Fertility

iv. Economics Requirement (choose one course):

01:220:102 Introduction to Microeconomics
01:220:103 Introduction to Macroeconomics
11:373:101 Economics, People, and Environment
11:373:121 Principles and Applications of Microeconomics
11:373:122 Principles and Applications of Microeconomics

v. Quantitative Requirements (2 courses):

01:640:026 Intermediate Algebra or place into Pre-calculus (01:640:111)

and

One quantitative skills course (Pre-calculus I or II; or calculus; or statistics or applied statistics)

vi. Experiential Learning (choose one course):

11:020:490 ¿Agriculture and Food Systems Practicum
11:020:495 or 495 Special Problems in Agriculture and Food Systems
11:067:201, 202, 203, 205, or 207 Animal Science Practicum
11:554:488 ¿G. H. Cook Scholars Program
11:776:350 ¿Agroecology Practicum
11:776:495 or 496 Special Problems in Plant Science
11:902:301 or 302 or 400 School of Environmental and Biological Sciences (SEBS) Internship

B. Foundational Courses for Agriculture and Food Systems (3 courses from):

01:830:101 General Psychology (NB)
01:920:101 Introduction to Sociology (NB)
11:020:305 Starting and Managing A Small Farm (NB)
11:020:315 Direct Farm Marketing and Agritourism (NB)
11:067:142 Animal Science (NB)
11:216:101 Introduction to Ecology and Evolution (NB)
11:216:217 Principles of Natural Resource Management (NB)
11:216:272 Dendrology (NB)
11:216:332 Plant Ecology (NB)
11:216:351 Principles of Ecology (NB)
11:370:226 Pesticide Impacts on Humans and Environmental Health (NB)
11:370:308 Apiculture (NB)
11:370:350 Agricultural Entomology and Pest Management (NB)
11:370:381 Insect Biology (NB)
11:374:101 Introduction to Human Ecology (NB)
11:375:101 Intro to Environmental Sciences (NB)
11:400:103 Science of Food (NB)
11:400:104 Food and Health (NB)
11:400:106 Food as Medicine (NB)

11:400:201 Principles of Food Science (NB)
11:628:120 Introduction to Oceanography (NB)
11:709:201 Culinary Nutrition (NB)
11:709:255 Nutrition and Health (NB)
11:776:210 Principles of Botany (NB)
11:776:211 Introduction to Horticulture (NB)
11:776:231 Commercial Floral Design (NB)
11:776:242 Plant Science (NB)

C. Additional course selected in consultation with an advisor:
A total of 30 credits from {Area of Inquiry 1: Agricultural Sciences, Area of Inquiry 2: Agribusiness and Entrepreneurship, Area of Inquiry 3: Food Systems; Culture; Community Food Justice and Advocacy; Nutrition & Health, Area of Inquiry 4: Policy, Politics, Economics, Ethics and Law, Area of Inquiry 5: Education, Communication, Leadership, Foundational Course Taught by the School of Arts and Sciences}

- with at least 3 credits from {Area of Inquiry 1: Agricultural Sciences, Foundational Course Taught by the School of Arts and Sciences}
- and at least 3 credits from {Area of Inquiry 2: Agribusiness and Entrepreneurship}
- and at least 3 credits from {Area of Inquiry 3: Food Systems; Culture; Community Food Justice and Advocacy; Nutrition & Health}
- and at least 3 credits from {Area of Inquiry 4: Policy, Politics, Economics, Ethics, and Law}
- and at least 3 credits from {Area of Inquiry 5: Education, Communication, Leadership}

Agriculture and Food Systems 020 (SEBS)

Agriculture and Food Systems Teacher Education Track

Agriculture and Food Systems Teacher Education Track

The B.S. in Agriculture and Food Systems Teacher Education Track is designed for preparation to become a certified K-12 Teacher of Agriculture. It also prepares students for agricultural extension and outreach work.

This program provides agricultural science, subject area preparation toward teacher certification at the Rutgers Graduate School of Education (Five Year, 4+1 Agricultural Science Education, teacher education program). However, graduates will also be prepared to pursue teacher certification at other graduate schools or the Alternative Route teaching certificate. Successful completion of N. J. Teacher Certification is required to qualify as a K-12 Teacher of Agriculture. Students apply to the 5-year program at GSE by February 1, ideally in their Junior year.

For more information, contact Dr. Xenia Morin or Dr. Thomas Leustek.

Graduation Requirements

A minimum of 120 earned credits are required to graduate with a B.S. in Agriculture and Food Systems, Teacher Education Track. Students must fulfill the SEBS Core graduation requirements and the following Agriculture and Food Systems Education Option requirements.

R1: Science Requirements (all AFS majors) (9 credits)
A total of 3 courses, one in each of the following categories:

- One chemistry course
- One biology course*
- One ecology, earth science, or geology class

*Note: These are minimum science requirements. Students are encouraged to take the biology course sequence 01:119:115, 01:119:116 and 01:119:117 if they intend to become certified to also teach biological sciences or if these biology classes are pre-requisites for other classes.

R2: Agriculture and Food Systems Required Foundation Courses for the Education Track (15 credits)

A total of 5 courses as agriculture and food systems foundational classes (for all AFS Majors)(6 credits)

- 11:020:210 Introduction to Agriculture and Food Systems
- 11:020:215 Applied Practical Applications in Agriculture and Food Systems

And two of these three classes (6 credits):

- 11:067:142 Animal Science
- 11:776:211 Introduction to Horticulture
- 11:776:242 Plant Science

One of these (3 credits):

- 11:776:391 Weeds, Diseases, and Insects of Plants (3)
- 11:776:105 Stories of Plant Diseases (3)
- 11:776:402 Weeds: Impact and Management (3)
- 11:067:330 Animal Nutrition (3) along with 11:067:331 Animal Nutrition Laboratory (1)

R3: Educational Foundation Courses specific to the Education Track (18 credits)
Five classes from this list:

Pre-admission to the 5-year program and taken in Sophomore or Junior Year

- 05:300:200 Introduction to Education (3) 05:300:201
- Introduction to Education Field Based Lab - Clinical Experience (0.5)
- 05:300:306 Educational Psychology: Principles of Classroom Learning (3)
- 11:374:416 Environmental Education in the School (3)

SEBS Senior Year, Fall Semester (also Year 1 of 2 of GSE requirements)

- 05:300:498 Clinical Experience Phase I (0.5)
- 05:300:450 Urban Education 1 (1.5)
- 05:300:307 Human Development: Infancy through Early Adulthood (3)
- 11:020:425 Developing Ideas in Agricultural Education (3) or 11:300:425 Developing Ideas in Agriculture (3)

Senior year, Spring semester (also Year 1 of 2 of GSE requirements)

- 05:300:498 Clinical Experience Phase 2 (0.5)
- 11:020:426 Teaching Agriculture and Food Systems (3) or 11:300:426 Teaching Agriculture (3)

Note: The 11:300:425/426 will be replaced by 11:020:425/426 starting in Fall 2019.

R4: Soils Requirement (all AFS Majors) (3 credits)
A total of 1 class from a list of soils classes:

- 11:776:102 Soil and Society (3)
- 11:776:440 Soil Fertility (3).

Note: Soils and Water or Soils and Organisms can be taken if you have the prerequisites.

R5: Economics Requirement (all AFS Majors) (3 Credits)
A total of 1 class:

- 11:373:121 Microeconomics

R6: Quantitative Skills (all AFS Majors*)(3 credits)
Complete one of the following:

- Placement into pre-calculus or complete Intermediate Algebra (01:640:026) or equivalent transfer credit.
- Total of 1 quantitative course which meet the QQ and QR requirements for the SEBS Core. (3 credits): (*New expanded list!)

R7 Experiential Learning (6 credits)
6 credits from an approved experiential learning course(s) (one course, or a combination of courses to make 3 credits):

- 11:300:417 Supervised Ag Educational Experience Practicum (3)
- 11:020:255 Special Topics in Agriculture and Food Systems (3) Subtopics: Ag Tech

Acceptable alternatives if related to agriculture and food systems or education:

- 11:067:200-207 Animal Practicums (1-3 credits)
- 11:020:490 Agriculture and Food Systems Practicum (1-3 credits)
- 11:902:300 SEBS Internship I (3)
- 11:902:301 SEBS Internship II (3)

R8 Approved electives for the Agriculture and Food Systems Education Track (minimum 21 credits; at least 12 credits should be at, or above, 300 level)
A minimum of 12 credits in agricultural sciences, food science, ecology, and natural resource management, landscape architecture with 6 credits coming from agriculture and food systems or plant science:

At least 12 credits from:

- 11:020:296 Honors Seminar in Agriculture and Food Systems
- 11:020:321 Principles and Practices of Small Organic Farming (summer farm course)

- 11:020:340 Indoor Cultivation of High Value Crops
- 11:020:455 Special Topics in Agriculture and Food Systems
- 11:020:436 Sustainable Agriculture

Any of the following 200 or higher:

- 11:776:202 Applied Physiology of Horticultural Crops (3)
- 11:776:205 Intro to Ethnobotany (3)
- 11:776:242 Plant Science (3)*
- 11:776:221 Principles of Organic Crop Production (3)
- 11:776:257 Edible and Poisonous Fungi (3)
- 11:776:390 Hemp and Medical Cannabis (3)
- 11:776:302 General Plant Pathology (3)
- 11:776:310 Plant Propagation (3)
- 11:776:321 Greenhouse Systems Management (3)
- 11:776:341 Fruit Production (3)
- 11:776:391 Weeds, Diseases and Insects of Plants (3)
- 11:776:439 Nursery Crop Production (3)
- 11:776:440 Soil Fertility (3)
- 11:776:442 Agroecology

Other approved elective courses:

Approved Animal Science Courses

- 11:067:200-207 Animal Practicum, Cattle; Sheep; Swine; Lab Animal; Horse (2);
- 11:067:330 Animal Nutrition (3) with 11:067:331 Animal Nutrition Laboratory (1)

Approved Entomology Courses

- 11:370:226 Pesticide Impacts on Human and Environmental Health (3)
- 11:370:350 Agricultural Entomology and Pest Management (3)
- 11:370:308 Apiculture (3)

Approved Food Science Courses

One of:

- 11:400:103 Science of Food (3)
- 11:400:106 Food as Medicine (3)
- 11:400:107 Foods: From Field to Table (3)

Approved Landscape Agriculture Courses (035) such as

- 11:550:271 Agriculture and the Landscape (3)

Approved Agriculture and Natural Resource Courses

- 11:035:268 Environmental Pollution - Issues in Agriculture, Industry, and Communities (2)
- 11:035:272 River and Stream Ecology (1)
- 11:035:274 Organic Farming and Gardening (2)
- 11:035:280 American Lawns and Turfgrass (1.5)
- 11:035:288 Edible Gardening for Enrichment and Education (2)

Approved Urban Forestry Courses

- 11:216:332 Plant Ecology (4)
- 11:216:365 Arboriculture (4)
- 11:216:377 Practicum in Forest Management (1-12)
- 11:216:403 Urban Forestry (3)
- 11:770:391 Diseases of Urban and Forest Trees (1.5)

Approved Marine Science Courses

- 11:628:309 Fishery Science (3)
- 11:628:317 Aquaculture (3)

Approved Microbiology Course

- 11:680:103 Microbiology of Agricultural Products in New Jersey (3)

Note: Other courses approved with permission of the undergraduate program director for agriculture and food systems. At least 3 credits in agribusiness or entrepreneurship.

- 11:020:305 Starting and Managing a Small Farm (3)
- 11:020:340 Indoor Cultivation of High Value Crops (4)
- 11:020:442 Entrepreneurial Agriculture (3)
- 11:373:231 Introduction to Marketing (3)
- 11:373:241 Introduction to Management (3)
- 11:373:331 Economics of the Food Marketing System (3)
- 11:035:300 Agricultural Commodities and Markets

A least 3 credits in food systems, policy, economics, ethics, or law:

- 11:020:333 Community Food Justice and Advocacy
- 11:020:337 Sustainability: Tackling Food Waste\
- 11:020:465 Feeding America's Cities
- 11:374:279 Politics of Environmental Issues (3) (also a SEBS core class)
- 11:374:289 Sustainable Food: Politics, Policy and Ethics (3)
- 11:374:313 U.S. Environmental Policy (3)
- 11:373:218 Sustainable Food Policy for Developing Countries (3)
- 11:373:323 Agriculture and Food Policy (3)
- 11:373:362 Natural Resource Economics

- 11:373:371 Food, Nutrition and Health Policy (3)
- 11:373:XXX Food Policy and other approved 11:373:XXX approved courses

Optional credits in education, communication, leadership, and youth development.

- 11:374:227 Agriculture in Society and Mass Media (3)
- 11:607:200 Principles of Leadership (3)
- 11:607:202 Leadership and Civic Engagement (3)
- 11:607:203 Foundations of Volunteer Management (3)
- 11:607:401 Foundations of Program Planning (3)
- 11:607:402 Building Community Partnerships (3)
- 11:607:484 Practical Leadership Applications in Agricultural Science (4)

History (SAS)

Chair: Melissa Feinberg

Associate Chairs: Jennifer Jones and Samantha Kelly

Undergraduate Vice Chair: James Delbourgo

Distinguished Professors:

James Delbourgo, B.A., East Anglia (UK); M.Phil., Cambridge; Ph.D., Columbia

Erica Armstrong Dunbar, B.A., Pennsylvania, M.A., Ph.D., Columbia

Jochen Hellbeck, B.A., Free University of Berlin; M.A., Ph.D., Columbia

Seth Koven, B.A., Swarthmore; A.M., Ph.D., Harvard

T.J. Jackson Lears, B.A., Virginia; M.A., North Carolina (Chapel Hill); M.A., Ph.D., Yale

Louis Masur, B.A., SUNY (Buffalo); M.A., Ph.D., Princeton

Richard L. McCormick, B.A., Amherst College; Ph.D., Yale

Gary A. Rendsburg, B.A., North Carolina (Chapel Hill); M.A., Ph.D., New York

Camilla Townsend, B.A., Bryn Mawr College; M.A., Ph.D., Rutgers

Professors:

Leslie Alexander, B.A., Stanford; M.A., Ph.D., Cornell

Alastair J. Bellany, B.A., Oxford; M.A., Ph.D., Princeton

Paul G.E. Clemens, B.S., Maryland; Ph.D., Wisconsin

Barbara Cooper, B.A., St. John's (Maryland); M.A., Ph.D., Boston

Belinda Davis, B.A., Wesleyan; M.A., Ph.D., Michigan

Rachel Devlin, B.A., Barnard College; M.A., Ph.D., Yale

Leah DeVun, B.A., Washington; M.A., M.Phil, Ph.D., Columbia

Melissa Feinberg, B.A., Stanford; M.A., Ph.D., Chicago

David S. Foglesong, B.A., Amherst College; M.A., Ph.D., California (Berkeley)

David Greenberg, B.A., Yale; M.A., M.Phil., Ph.D., Columbia

Paul Hanebrink, B.A., Columbia; M.A., Ph.D., Chicago

Samantha Kelly, B.A., Yale; M.A., Ph.D., Northwestern

Aldo A. Lauria-Santiago, B.A., Princeton; M.A., New York; Ph.D., Chicago

James P. Masschaele, B.A., Western Ontario; M.A., Ph.D., Toronto

Matt K. Matsuda, B.A., M.A., Ph.D., California (Los Angeles)

Jennifer Mittelstadt, B.A., Wesleyan; M.A., Ph.D., Michigan

Johanna Schoen, B.A., Universität Hamburg (Germany); M.A., Ph.D., North Carolina

Nancy Sinkoff, B.A., Harvard; M.A., Columbia and Jewish Theological Seminary of America; Ph.D., Columbia

Judith Surkis, B.A., Brown; Ph.D., Cornell

Paola Tartakoff, B.A., Harvard; Ph.D., Columbia

Associate Professors:

Yesenia Barragan, B.A., Brown; Ph.D., Columbia

Kim D. Butler, B.A., Sarah Lawrence College; M.A., Howard; M.A., Ph.D., Johns Hopkins

Marissa J. Fuentes, B.A., California (Santa Cruz); Ph.D., California (Berkeley)

Tiffany Gill, B.A., Georgetown; Ph.D., Rutgers

Chie Ikeya, B.A., Ph.D., Cornell

Jennifer M. Jones, B.A., Grinnell College; M.A., Ph.D., Princeton

Toby C. Jones, B.A., M.A., Auburn; Ph.D., Stanford

Sukhee Lee, B.A., M.A., Yonsei (Korea); Ph.D., Harvard

Xun Liu, B.A., Huazhong Normal (China); M.A., California (Long Beach); Ph.D., Southern California

Kathleen López, B.A., Virginia; M.A., Cornell; Ph.D., Michigan

Norman Markowitz, B.A., CUNY (City College); A.M., Ph.D., Michigan

Johan Mathew, B.A., Princeton; Ph.D., Harvard

Donna Murch, B.A., Williams College; M.A., Ph.D., California (Berkeley)

Jamie Pietruska, B.A., Brown; Ph.D., Massachusetts Institute of Technology

Tatiana Seijas, B.A., M.A., Columbia; Ph.D., Yale

Peter Silver, B.A., Harvard; M.A., Ph.D., Yale

Julia Stephens, B.A., Harvard; M.Phil., Cambridge; Ph.D., Harvard

Andrew T. Urban, B.A., Middlebury; M.A., Ph.D., Minnesota

Assistant Professors:

Jack Bouchard, B.A., Brandeis; M.A. McGill; Ph.D., Pittsburgh

Nicole Burrowes, B.A., NYU; M.A., Ph.D., CUNY Graduate Center

Elaine LaFay, B.A., Michigan; Ph.D., Pennsylvania

Kristin O'Brassill-Kulfan, B.A., Millersville; M.A., Queen's (UK); Ph.D., Leicester (UK)

Research Professor:

Paul Israel, B.A., California Polytechnic (San Luis Obispo); Ph.D., Rutgers

Associate Teaching Professor:

Sandra Russell-Jones, B.A., Dickinson College; Ph.D., Pennsylvania

Assistant Teaching Professors:

Mark Bray, B.A. Wesleyan; Ph.D., Rutgers

The study of history allows students to understand the past as well as the present--how and why our world became the way it is today. The Department of History offers an array of two hundred course offerings and many research opportunities. The courses are designed to (1) provide the student with an understanding of the social, political, and cultural forces that have shaped the course of history and our present world; and (2) teach the student the important skills of critical reading and research, logical analysis, and effective written and oral communication.

Students should begin with introductory-level courses (100 or 200), proceed to the upper-level courses that are at the center of the history major (300), and finally to the advanced courses (400), which usually require significant research.
The history major is designed to expose students to the histories of various civilizations over time and place. However, it also affords specialization in one area, time, or theme (e.g., African history, medieval Europe, or women in history, etc.) to interested students, in consultation with departmental advisers.

For additional information, visit the department's website.

History (SAS)

Learning Goals

Learning Goals

Conceptual Learning Goals. Students who study history at Rutgers University can expect to develop an understanding of the following concepts:

1) The role of human agency in bringing about change in society and institutions. This includes:

- understanding how individuals are shaped by their own past and by the past of their society and institutions
- the role of diversity and difference in shaping human experience

2) The operation of large-scale forces responsible for causing change over time, such as politics, economics, and religion

Practical Learning Goals. Students who study history at Rutgers University can expect to develop the following practical skills:

1) The ability to understand a variety of historical primary sources such as archival documents, diplomatic correspondence, journalistic reports, and private papers

2) The ability to read and understand secondary sources written in academic prose and to understand the substance of debates

3) The ability to analyze information effectively and to use different kinds of historical sources to a historical argument

4) The ability to write persuasively and communicate effectively

5) The ability to work independently and to conduct independent research

History (SAS)

Major Requirements

Major Requirements

History majors must complete 12 courses in history (36 credits) with a grade of C or better in each course. A minimum of eight courses for the major must be taken at Rutgers University-New Brunswick. All history majors must fulfill the following requirements:

1. At least five courses at the 300 or 400 level

2. At least eight courses at the 200 through 400 level

3. History Workshop, 01:506:299, taken by the end of the sophomore year; transfer students must take 01:506:299 in their first semester at Rutgers

4. A History Seminar, either 01:506:401 or 402,or Public History Internship (01:506:451), or History Honors Thesis (01: 506:495 and 496) usually taken in the junior year, or senior year

5. Of the 12 history courses, at least two must be in each of the following three areas:

a. Global, African, Asian, Latin American, or Native American history (selected 506 courses and all 508 courses)

b. European history (510)

c. United States history (512)

6. At least one course focusing on the period before 1500 C.E.

7. History majors shall not count more than two overlapping courses between history and any other majors or minors.

Ancient History and Classics Option

The ancient history and classics option in the history major requires 15, 3-credit courses (of which at least three must be history department courses and at least three must be classics department courses), apportioned as follows:

1. At least two courses in ancient languages (at least two languages: Latin, Greek, and/or other ancient languages offered at the university, e.g., Sanskrit and Hebrew). One of the courses must be a Greek or Latin course at the 200 level or above. Advanced placement can substitute for either or both of the courses, if at the appropriate level. Suggested intermediate courses are 01:490:207 Classical Greek Prose (3) and 01:580:203 Intermediate Latin Prose (3).

2. Three ancient history or classics survey courses at the 200 level, from among:

01:190:205 Greek Civilization (3)
01:190:206 Roman Civilization (3)
01:508:200 Ancient Near East (3)
01:510:201 Ancient Greece (3)
01:510:202/01:190:209 Ancient Rome (3)
01:510:205 History of the Byzantine Empire (3)
01:510:207 Byzantine Civilization (3)

In consultation with an adviser, appropriate higher-level courses or courses from other departments may be substituted for any of the 200-level courses mentioned above.

3. Six ancient history or classics lecture courses at the 300 level, from among:

01:190:310 Augustan Rome (3)
01:190:320 Women in Antiquity (3)
01:190:322 Greek Political Philosophy (3)
01:190:325 Cults, Magic, and Witchcraft (3)
01:190:350/01:510:350 Greek Society (3)
01:190:355 Ancient Mythology and Society (3)
01:190:372 Cities of the Classical World (3)
01:190:373 Pompeii: The Life and Death of a Roman Town (3)
01:490:306 From Athens to Alexandria (3)
01:490:391 Readings in Greek Prose (historical topic/author) (3)
01:510:301 Early Greece (3)
01:510:302 Classical Greece (3)
01:510:303 Hellenistic World (3)
01:510:304 The Rise of the Roman Republic (3)
01:510:305 The Crisis of the Roman Republic (3)
01:510:306/01:190:306 Roman Empire (3)
01:510:307 The Roman World in Late Antiquity (3)
01:510:308 Creating Culture and History in the Ancient World (3)
01:510:403 Ancient Warfare and Diplomacy (3)
01:580:304 Cicero: Orations (3)
01:580:325 The History of Livy (3)
01:580:329 Tacitus (3)

4. One ancient history or classics course at the 300 or 400 level focusing on research and writing such as:

01:490:391 Readings in Greek Prose (historical readings) (3)
01:506:401,402 History Seminar (ancient topic) (3,3)
01:506:471,472 Research in History (ancient topic) (3,3)
01:510:407 Rome in the Age of Augustus (3)
01:580:369,370 The Seminar in Latin (historical readings) (3,3), college honors, or departmental project (appropriate topic)

5. Three additional courses in history, classics, Latin, or Greek (in any combination, but no more than two of them at the 100 level)

History (SAS)

Minor Programs and Requirements

Minor Programs and Requirements

General History Minor

The minor in history consists of six 3-credit courses, passed with a grade of C or better, including three courses at the 300 to 400 level. A minimum of four courses for the minor must be taken at Rutgers University. No more than two courses used to complete a major or minor in another department can be used to fulfill the requirements of the history minor.

Law and History Minor

The minor in law and history provides an interdisciplinary introduction to the study of law, with a particular focus on the role of history in examining law and legal culture in their social contexts. The minor in law and history consists of six 3-credit courses, passed with a grade of C or better, from the following list. No more than one course used to complete a major or minor in another department can be used to fulfill the requirements of the law and history minor.

01:506:216 Law and History (required introductory course)

Four of the following history courses:
01:506:210 Sex and Power
01:506:220 Piracy: A Global History
01:506:236 Poverty in World History
01:506:255 Science, Nature, and Empire
01:506:260 Wars, Wayfarers, and the Wall: A History of the U.S.-Mexican Border
01:508:110 Political Islam: Present and Past
01:508:367 The Afro-Latin American Experience
01:510:245 The Arts of Power
01:510:261 History of the Holocaust
01:510:268 Fascism
01:510:335 Modern France
01:510:345 English Constitutional History to 1688
01:510:394 Human Rights

01:512:215 American Legal History
01:512:216 Famous Trials
01:512:221 Abortion: The Collision of History, Law, Religion, Medicine, and Human Rights
01:512:229 History of Medical Ethics
01:512:238 History of Homelessness
01:512:250 Natives and Newcomers: Immigration and Migration in U.S. History
01:512:253 Asian American History
01:512:264 Black Lives Matter
01:512:308 History and Asylum Law
01:512:317 Murder in American History
01:512:318 Political Corruption in America
01:512:322 Drugs: A Social History
01:512:342 Policing in Black Communities: From Slavery to Mass Incarceration (3)
01:512:368 History of Civil Rights, 1900-1980
01:512:383 Women's Rights in America, 1800-1930
01:512:385 Women Behaving Badly
01:512:402 American Constitutional History to 1865
01:512:404 American Constitutional History from 1865
One of the following electives from outside of the Department of History:

Africana Studies
01:014:353 Black Community Law and Social Change
Anthropology
01:070:360 Law, Justice, Rights
Criminal Justice
(Special permission numbers are required for the following courses):
01:202:201 Introduction to Criminal Justice (recommended)
01:202:202 Police
01:202:203 Prisons and Prisoners
01:202:204 Crime and Public Policy
01:202:205 Criminal Procedure
Economics
01:220:395 Law and Economics
(01:220:102 and 01:220:103 are prerequisites for 01:220:395, and precalculus math is a prerequisite for 01:220:102 and 01:220:103)
Latino and Caribbean Studies
01:595:370 Law and the Latino Community
Middle Eastern Studies
01:685:457 Islamic Law and Jurisprudence
Philosophy
01:730:345 Philosophy and the Law
01:730:358 Philosophy of Law
01:730:341 Ethics through History
01:730:342 Seventeenth- and Eighteenth-Century Social and Political Philosophy
Political Science

01:790:340 Law and Society
01:790:373 Legal Philosophy, Rights, and Justice
01:790:401 American Constitutional Law I
01:790:404 Politics of Criminal Justice
01:790:406 Civil Liberties and Civil Rights
01:790:426 Gender, Public Policy, and the Law
Religion
01:840:425 Seminar on Law and Religion
Sociology
01:920:349 Law and Society
01:920:222 Criminology
01:920:304 Sociology of Deviant Behavior
01:920:361 Sociology of Drug Use
Women's, Gender, and Sexuality Studies
01:988:307 Women and the Law

STEM in Society Minor

The minor in STEM in society examines science, technology and engineering, environment, medicine, and quantification in their historical contexts from the ancient world to the 21st century. The minor in STEM in society consists of six 3-credit courses, passed with a grade of C or better, from the following list:

01:506:226 Contemporary Challenges in International Health
01:506:227 Health, Culture, and Society
01:506:233 History of the Future
01:506:247 The Seas Around Us: Ocean History in Global Perspective
01:506:249 Climate Politics: A Deep History
01:506:250 Science, Collecting, and Power
01:506:251 History of Science and Society
01:506:252 History of Technology and Society I
01:506:253 History of Technology and Society II
01:506:254 History of Oil
01:506:255 Science, Nature, and Empire
01:506:321 Disease in History
01:506:322 Black Death to Obesity Epidemic: History of Public Health in the West
01:506:324 History of AIDS Pandemic
01:506:325 Living on the Edge: Human Societies in Extreme Environments
01:508:255 Global Environmental History
01:508:328 History of Health and Healing in Africa
01:508:364 Environmental History of Latin America
01:510:248 The Last Climate Crisis: Histories of ¿The Little Ice Age¿ c. 1300-1800
01:512:121 Health and Environment in America
01:512:210 Food in the United States and the World
01:512:221 Abortion: The Collision of History, Law, Religion, Medicine, and Human Rights
01:512:229 History of Medical Ethics
01:512:230 History of Medicine in Film

01:512:235 Accidents and Disasters in the United States and the World
01:512:237 Data: A Social History
01:512:321 Health Care and Society in America
01:512:322 Drugs: A Social History
01:512:323, 324 History of the North American Environment
01:512:328 Science in American Culture
01:512:329 Technology and Nature in American History
01:880:210 The Edison Effect: Technological Innovation in American Culture
01:880:212 Science and Dollars: The Business of Innovation Since the Age of Edison

History (SAS)

Certificate Programs and Requirements

Certificate Programs and Requirements

Law and History Certificate

The certificate in law and history provides an interdisciplinary introduction to the study of law, with a particular focus on the role of history in examining law and legal culture in their social contexts. The certificate in law and history consists of five 3-credit courses, passed with a grade of C or better, from the following list. No more than one course used to complete a major or minor in another department can be used to fulfill the requirements of the law and history certificate.

01:506:216 Law and History (required introductory course)

Four of the following history courses:

01:506:210 Sex and Power
01:506:220 Piracy: A Global History
01:506:236¿Poverty in World History
01:506:255 Science, Nature, and Empire
01:506:260 Wars, Wayfarers, and the Wall: A History of the U.S.-Mexican Border
01:508:110 Political Islam: Present and Past
01:508:367 The Afro-Latin American Experience
01:510:245 The Arts of Power
01:510:261 History of the Holocaust
01:510:268 Fascism
01:510:335 Modern France
01:510:345 English Constitutional History to 1688
01:510:394 Human Rights
01:512:215 American Legal History
01:512:216 Famous Trials
01:512:221 Abortion: The Collision of History, Law, Religion, Medicine, and Human Rights
01:512:229 History of Medical Ethics
01:512:238 History of Homelessness

01:512:250 Natives and Newcomers: Immigration and Migration in U.S. History
01:512:253 Asian American History
01:512:264 Black Lives Matter
01:512:308 History and Asylum Law
01:512:317 Murder in American History
01:512:318 Political Corruption in America
01:512:322 Drugs: A Social History
01:512:342 Policing in Black Communities: From Slavery to Mass Incarceration (3)
01:512:368 History of Civil Rights, 1900-1980
01:512:383 Women's Rights in America, 1800-1930
01:512:385 Women Behaving Badly
01:512:402 American Constitutional History to 1865
01:512:404 American Constitutional History from 186

One of the following electives from outside of the Department of History:

Africana Studies
01:014:353 Black Community Law and Social Change
Anthropology
01:070:360 Law, Justice, Rights
Criminal Justice
(Special permission numbers are required for the following courses):
01:202:201 Introduction to Criminal Justice (recommended)
01:202:202 Police

01:790:340 Law and Society
01:790:373 Legal Philosophy, Rights, and Justice
01:790:401 American Constitutional Law I
01:790:404 Politics of Criminal Justice

01:790:406 Civil Liberties and Civil Rights
01:790:409 Courts and Public Policy
01:790:426 Gender, Public Policy, and the Law
Religion
01:840:425 Seminar on Law and Religion
Sociology
01:920:349 Law and Society
01:920:222 Criminology
01:920:304 Sociology of Deviant Behavior
01:920:361 Sociology of Drug Use
Women's, Gender, and Sexuality Studies
01:988:307 Women and the Law

Public History Certificate

Public history explores interpretations of the past produced for the general public in a variety of different settings such as museums, archives, historical preservation, monuments, etc. The certificate in public history consists of the following five courses:

1. History Workshop 01:506:299
2. Public History: Theory, Method, and Practice 01:506:301
3. Introduction to Oral History 01:506:302 or Digital History 01:506:303 or a class on digital humanities (01:506:299 and 01:506:301 should be prerequisites for coursework in oral history or digital history)
4. One elective. See history department's website for approved electives: https://history.rutgers.edu/academics/public-history.
5. Public History Internship 01:506:451

STEM in Society Certificate

The certificate in STEM and society examines science, technology and engineering, environment, medicine, and quantification in their historical contexts from the ancient world to the 21st century. The certificate in STEM and society consists of five 3-credit courses, passed with a grade of C or better, from the following list:

01:506:226 Contemporary Challenges in International Health
01:506:227 Health, Culture, and Society
01:506:233 History of the Future
01:506:247 The Seas Around Us: Ocean History in Global Perspective
01:506:249 Climate Politics: ADeep History01:506:250 Science, Collecting, and Power01:506:251 History of Science and Society
01:506:250 Science, Collecting, and Power
01:506:251 Science and Society
01:506:252 History of Technology and Society I
01:506:253 History of Technology and Society II
01:506:254 History of Oil
01:506:255 Science, Nature, and Empire
01:506:321 Disease in History
01:506:322 Black Death to Obesity Epidemic: History of Public Health in the West

01:506:324 History of AIDS Pandemic
01:506:325 Living on the Edge: Human Societies in Extreme Environments
01:508:255 Global Environmental History
01:508:328 History of Health and Healing in Africa
01:508:364 Environmental History of Latin America
01:510:248 The Last Climate Crisis: Histories of `The Little Ice Age¿ c. 1300-1800
01:512:121 Health and Environment in America
01:512:210 Food in the United States and the World
01:512:221 Abortion: The Collision of History, Law, Religion, Medicine, and Human Rights
01:512:229 History of Medical Ethics
01:512:230 History of Medicine in Film
01:512:235 Accidents and Disasters in the United States and the World
01:512:237 Data: A Social History
01:512:321 Health Care and Society in America
01:512:322 Drugs: A Social History
01:512:323, 324 History of the North American Environment
01:512:328 Science in American Culture
01:512:329 Technology and Nature in American History
01:880:210 The Edison Effect: Technological Innovation in American Culture
01:880:212 Science and Dollars: The Business of Innovation Since the Age of Edison

History (SAS)

Teacher Certification

Teacher Certification

History majors interested in entering the five-year program in social studies education should contact advisers in the Department of History and in the Graduate School of Education in their first year or as soon as possible thereafter.

History (SAS)

Departmental Honors Program

Departmental Honors Program

The departmental honors program enables students to pursue their individual interests in history and helps prepare them for future research work or graduate study. Qualified students take a two-semester honors thesis seminar (in the spring of the junior year and fall of the senior year) and work with a faculty adviser to conduct original historical research and write a thesis. Interested students should read the program description available on the department website and discuss their plans thoroughly and well in advance with a faculty adviser. Approval of the proposed thesis topic by a faculty member who will serve as thesis adviser is required for acceptance to the program.

For more information, see the department website: https://history.rutgers.edu/academics/undergraduate/honors-program.

History (SAS)

General/Comparative History Courses (506)

General/Comparative History Courses (506)

01:506:101 ***World History I (3)***
Traces human history from the development of modern humans to the beginning of the first era of globalization with the voyage of Columbus to the Americas.

01:506:102 ***World History II (3)***
World history since the late 15th century.

01:506:105 ***Honors Colloquium (3)***
Study of a contemporary social issue from the perspective of the discipline of history. Specific title available at time of registration through the School of Arts and Sciences honors programs.
By permission of the department. Open to students in school honors.

01:506:110 ***Age of European Global Expansion (3)***
Traces the rise of Europe to global dominance beginning with early explorers and empire builders, and focuses on Europe's impact on Africa, Asia, and the Americas.

01:506:112 ***Patterns in Civilization: Love (3)***
Love and its literary expression in Japan and Europe since the Middle Ages. Comparative analysis of culture and society, political and economic transformations, and religion.

01:506:113 ***Patterns in Civilization: Death (3)***
Individual and societal responses to death in Japan, Europe, and the United States. Comparative analysis of culture and society, political and economic transformation, and religion.

01:506:114 ***World Civilizations: Europe, Africa, and America (3)***
Family, economy, government, and religion in major civilizations of West Africa, Europe, and North America. Interaction of these three geographical areas through the slave trade, colonialism, and the movement of ideas and culture.

01:506:115 ***World War II in World History (3)***
Examines the political, military, economic, social, and cultural dimensions of World War II from the perspectives of its different combatants. Considers the war from the perspective of states, soldiers, and civilians around the world.

01:506:118 ***Looking at 21st-Century World History (3)***
Interdisciplinary examination of the role of the visual in both our daily lives and in the way we remember the past. Taught through a series of topics ranging from war and violence to gender, work, and play.
Credit not given for both this course and 01:082:118.

01:506:151 ***History and the News (3)***
Analysis of the historical background to events in the current week's news; emphasis on how historical knowledge deepens understanding of contemporary issues.

01:506:201 ***Twentieth-Century Global History to 1945 (3)***
Emphasis on themes in political-military and social-cultural history worldwide, including imperialism, origins and impact of two world wars, revolutions, fascism, Nazism, and race and gender issues.

01:506:202 ***Twentieth-Century Global History from 1945 (3)***
Focus on critical themes from Hiroshima to September 11, 2001, including the atomic age, superpower rivalries, decolonization, population growth and development, globalization, environmental degradation, and terrorism.

01:506:203 ***Histories of the Pacific (3)***
Survey of Pacific island peoples and cultures from early navigators and settlers to the colonial and postcolonial eras of the 19th and 20th centuries.

01:506:205 ***Paris/Tokyo: 1700-Present (3)***
Comparative study of French and Japanese cultures from 1700 to the present, drawing on literary and visual representations from both traditions.

01:506:210 ***Sex and Power (3)***
Investigates how gender relations have changed over time and place by considering different moments in world history. Examines how states, religions, families, and other social or political institutions have created and enforced sex and gender norms.

01:506:211 ***Women in Europe and the Americas until 1800 (3)***
Survey of women's roles in Western society and culture--covering Europe and the New World up to about 1800.
Credit not given for both this course and 01:988:211

01:506:212 ***Women in Europe and the United States since 1800 (3)***
Survey of women's roles in Western society and culture--covering the 19th and 20th centuries.
Credit not given for both this course and 01:988:212.

01:506:215 ***The Modern Girl (3)***
Examines the so-called "modern girl" of the 1920s and 1930s. Representations in fiction, film, and advertisements. Concentrates on the West, with comparative evidence from Asia and Africa.
Credit not given for both this course and 01:988:260.

01:506:216 ***Law and History (3)***
Explores the law through historical and contemporary cases, including disputes about legalization of drugs, religious freedom, and immigration controls, from U.S. and global perspectives.
Required for the Law and History Minor/Certificate.

01:506:218 ***Terrorism (3)***
Global historical survey of the development and importance of terrorism from the eighteenth century to the present.

01:506:220 ***Piracy: A Global History (3)***
Examines piracy in world history from Ancient Egypt until the 21st century. Considers its social, political, and economic meanings in different societies.

01:506:221 ***History of Exploration (3)***
Exploring expeditions from Columbus to the moon flights. Experiences of explorers; political, economic, and cultural motives for exploration; effects of exploration on society and on views of the world.

01:506:224 ***Slavery in World History (3)***
Historical survey of the institution of slavery from antiquity to the present day, with particular attention to the relationship of human bondage to broader progress of social and economic change.

01:506:225 ***The Black Atlantic World (3)***
Black Atlantic World (Europe, Atlantic Africa, and the Americas) from the 16th century to the present. Historical, cultural, sociopolitical, and intellectual formations, movements, and connections crisscrossing the Atlantic.

01:506:226 ***Contemporary Challenges in International Health (3)***
Examines the history of Western efforts to promote health and nutrition in the developing world, including Africa, Asia, Latin America, and the former Soviet Republics. Emphasizes the economic, political, and cultural assumptions associated with international health and development.

01:506:233 ***History of the Future (3)***
Examines the global history of human attempts to predict the future from antiquity to the present, with an emphasis on the 19-21st century. Engages with topics and concepts from disciplines including meteorology, economics, statistics, computer science, behavioral economics, psychology, and literature to look at attempts to anticipate the future, from fortune telling to sports picks to weather forecasting.

01:506:227 ***Health, Culture, and Society (3)***
Integrates perspectives from sociology, history, public health, medicine, and the humanities to define health, understand the diverse ways scholars study health, and identify factors that influence the prevalence, distribution, and experience of four health conditions: obesity; depression; cancer; and HIV/AIDS. Implications of research for medical practice, ethics, and policies to enhance health worldwide.
Credit not given for both this course and 01:920:220.

01:506:236 ***Poverty in World History (3)***
Explores poverty as people have experienced and understood it in various times, places, and circumstances through world history.

01:506:241 ***Film and History (3)***
Presentation of films relating to history and culture, combined with readings and discussions of standard history accounts.

01:506:247 ***The Seas Around Us: Ocean History in Global Perspective (3)***
Explores maritime history in a global context from antiquity to the modern period, with a special focus on Polynesian, Malay, Dutch, and Greek mariners, among others.

01:506:249 ***Climate Politics: A Deep History (3)***
Studies climate change in the past and present; explores the legitimacy and manipulation of scientific knowledge; analyzes the connections between climate and imperialism in a global context.

01:506:250 ***Science, Collecting, and Power (3)***
Explores scientific collections from the ancient world to the present in a global context. Examines the relationship between collecting and science, and how science derives its power from making and using collections.
Credit not given for both this course and 16:082:594.

01:506:251 ***History of Science and Society (3)***
Science and its social context from 1500 to the present. Development of ideas; interaction with philosophy, religion, and art; science as a profession.

01:506:252 ***History of Technology and Society I (3)***
Global perspective on the history of materials, energy, manufacturing, transportation, and communication technologies from earliest times to the Industrial Revolution. Central themes include interplay between technology and the pursuits of material wealth, political power, and military, as well as the relationship between early science and burgeoning technology.

01:506:253 ***History of Technology and Society II (3)***
History of production, transportation, and communication technologies worldwide from the Industrial Revolution to the present. Integration of science and technology, rise of consumer technologies, and emergence of the United States as a center for technological, economic, military, and political power.
Special Notation: Does not fulfill global requirement for majors.

01:506:254 ***History of Oil (3)***
Political and economic history of oil over the 20th and into the 21st century. Oil's impact on the rise and fall of empires, the fates of nation-states, its role in war, as well as its varied impact on social and cultural life.

01:506:255 ***Science, Nature, and Empire (3)***
Explores key episodes in the history of science, imperialism, and colonialism in a global context from the 15th to the 21st century.

01:506:260 ***Wars, Wayfarers, and the Wall: A History of the U.S.-Mexican Border (3)***
The history of the U.S.-Mexican border from the colonial era to the present and its contemporary significance for national well-being and national identities in the United States and Mexico. Emphasis on this history's influence on contemporary debates regarding immigration, national borders, and the United States' relationship with Mexico and Mexicans.

01:506:271 ***Jewish History I: Ancient and Medieval (3)***
Social, economic, religious, and political experiences of the Jewish people from the Biblical world of the ancient Near East until the Middle Ages.
Credit not given for both this course and 01:563:201 or 01:685:208.

01:506:272 ***Jewish History II: Modern (3)***
Jewish life from the breakdown of traditional society in Europe in the 1700s until the rise of the modern state of Israel in the 20th century.
Credit not given for both this course and 01:563:202.

01:506:291,292 ***Topics in History (3,3)***
Study of special topics in history at the intermediate level.

01:506:299 ***History Workshop (3)***
Introduction to historical research, analysis, and interpretation. Topical lectures and hands-on workshops.
Required for all history majors.

01:506:301 ***Public History: Theory, Method, and Practice (3)***
Introduction to theory, methods, practice, and politics of public history, exploring production and dissemination of histories in nonacademic settings. Includes workshops conducted by professionals in the field, site visits.

01:506:302 ***Introduction to Oral History (3)***
Introduction to oral history and its methods. How to design an oral history project and how to integrate technology into that design.

01:506:303 ***Digital History (3)***
History of the United States through space and geography. Focus on three key topics: colonial North America, the American Civil War, and the racial landscape of the modern US.

01:506:305 ***Special Topics in Politics, History, and Heritage (3)***
Special topics emphasizing politics, history, and cultural heritage and preservation studies. Special studies in particular theoretical and practical aspects of historic preservation and conservation. Designed by individual instructor.
Credit not given for both this course and 01:082:441.

01:506:313 ***Women and Social Movements to 1945 (3)***
In-depth analysis of different ways women have organized for change. Focus on three or four case studies using cross-cultural perspectives to illustrate various themes of gender and collective action by women.
Credit not given for both this course and 01:988:371.

01:506:314 ***Women and Social Movements since 1945 (3)***
Twentieth-century autonomous women's movements, emphasizing the second wave of feminism from cross-cultural perspectives. Selected case studies to illustrate themes of gender and collective action.
Credit not given for both this course and 01:988:372.

01:506:321 ***Disease in History (3)***
Human disease on a global scale from the Paleolithic period to the present, with emphasis on infectious disease and diet.

01:506:322 ***Black Death to Obesity Epidemic: History of Public Health in the West (3)***
Surveys attempts to protect the health of human populations from the Black Death in Europe to rising concern about obesity in the United States. Explores shifting patterns of disease and illness, and emergence and growth of public health as a domain of expert knowledge and policy in the United States and Europe.

01:506:324 ***History of AIDS Pandemic (3)***
Explores the AIDS epidemic from a range of historical vantage points: science, health care, and social and cultural life in a variety of local, national, international, and institutional contexts. Focuses on United States, Haiti, and Africa.

01:506:325 ***Living on the Edge : Human Societies in Extreme Environments (3)***
Focuses on important changes in human history and their origins in extreme environments. Looks closely at environments such as deserts, mountains, and icescapes, from antiquity to the present day, and in a global context.

01:506:328 ***Atlantic Cultures 1500-1800 (3)***
Encounters between peoples of Europe, Africa, and the Americas from the 16th through the 18th centuries. Team-taught, interdisciplinary course with an emphasis on the interpretation of texts and visual images from the era.

01:506:329 ***Jamestown, 1607, and the Atlantic World (3)***
The original permanent English New World settlement at Jamestown in 1607, from the perspective of the larger Atlantic World of which it was a part. Course approaches topic through history and other fields such as archaeology, art history, and literature, and is taught from an interdisciplinary perspective.

01:506:330 ***African Diaspora Liberation Movements (3)***
Examines liberation movements in Africa and the African diaspora in Europe and the Americas, focusing on common intellectual, political, and social currents. Concentrates on abolitionism, Pan-Africanism, and nationalism, investigating the relationship between elite and mass movements in each case.

01:506:361 ***History of Socialism and Communism (3)***
History of movements for socialism and communism, their diverse development on the world scene, and impact on modern history.

01:506:362 ***Capitalism: The History (3)***
Explores the nature of capitalism, the relationship between capitalism and history, questions about the relation between capitalism and ideas or events of the modern age.

01:506:363 ***Imperialism (3)***
Causes of colonial expansion by European powers, Russia, Japan, and the United States; the nature of colonial empires; and the impact of imperialism on Africa and Asia.

01:506:364 ***Colonialism to Globalism (3)***
Differences and similarities of the major European encounters with non-Europeans in modern history.

01:506:373 ***History of Jewish Women (3)***
Jewish women's history; examines the religious, social, intellectual, and cultural environments of Jewish women from the biblical period through the 20th century.
Credit not given for both this course and 01:563:373 or 01:988:373.

01:506:375 ***Jewish Immigrant Experience (3)***
Modern Jewish immigrant experience, focusing on European and Middle Eastern communities resettled in America, Israel, and Europe.
Credit not given for both this course and 01:563:375 or 01:685:375.

01:506:388 ***Touching History: The World of Medieval Manuscripts (3)***
An introduction to medieval manuscripts and to book culture from before the age of printing, with particular attention to the scribal transmission of ancient and classical texts (Bible, Homer, Qur¿an, Beowulf, etc.).

Credit not given for both this course and 01:563:387 or 01:677:387 or 01:840:388

01:506:390 ***Historiography: The History of History (3)***
Explores the history of writing history and the philosophy of history over time.

01:506:391,392 ***Historical Studies (3,3)***
Separate sections focusing on different topics at different times and in different areas. Specific titles available at time of registration.

01:506:393 ***Advanced Topics in the History of Women (3)***
Advanced course on specialized topic in the history of women.

01:506:401,402 ***History Seminar (3,3)***
Introduction to skills and techniques of historical research, including writing a research paper based on primary sources. Specific topics of sections available at time of registration.

01:506:424 ***Reading and Writing about Nature (3)***
Exploration of political, philosophical, fictional, and visual texts on relationship between humans and nature in Anglo-North America, late-16th century to present.
Prerequisite: Permission of instructor.

01:506:451 ***Public History Internship (3)***
Professional, supervised work for historical society, site, archives, museum, legislative office, or equivalent; 112 hours required. Faculty coordinator evaluates student's paper/product and agency's assessment.
Open only to junior and senior history majors.

01:506:452 ***General History Internship (3)***
Includes internships in the fields of law, politics, and government. In addition, includes other internships that do not meet the criteria for the Public History Internship Program; 112 hours required. Faculty coordinator evaluates student's paper/product and agency's assessment.
Open only to junior and senior history majors. Not eligible for major credit without special permission of undergraduate adviser.

01:506:471,472 ***Research in History (BA, BA)***
One-semester independent study projects.
Not open to honors candidates.

01:506:473,474 ***Readings in History (BA, BA)***
Independent readings under supervision of a member of the department.

01:506:495-496 ***Honors Program in History (BA,BA)***
Focus on writing of a major research paper working with an individual professor. A seminar guides students through stages of writing, using short papers as the vehicle for the exploration; includes outlines, rough drafts, etc.
Both semesters must be completed to receive degree credit.

African, Asian, and Latin American History Courses (508)

African, Asian, and Latin American History Courses (508)

01:508:100 ***Study Abroad Benin: History Culture and Memory (3)***
This interdisciplinary cross-cultural study abroad program explores the African side of the Atlantic World. Students spend two weeks in Benin based at our sister institution, the Ecole du Patrimoine Africaine in Porto Novo. In partnership with our Beninois colleagues, faculty and students will explore how trans-Atlantic connections have shaped religion, language, and identity; the relationship between tourism and historical memory; and the dynamism of the contemporary art scene.

Credit not given for both this course and 01:016:100.

01:508:110 ***Political Islam: Present and Past (3)***
Introduction to Islamic political thought and practice. Emphasis on how historical knowledge can help us to understand contemporary debates over the place of Islam in the modern world.
Credit not given for both this course and 01:685:110 and 01:840:125.

01:508:191,192 ***Global Topics (3,3)***
Study of special topics in global history at the introductory level.

01:508:200 ***Ancient Near East (3)***
Origins and development of the societies of Mesopotamia, Egypt, Asia Minor, and the Levant, through the period of the Persian Empire.
Credit not given for both this course and 01:190:200, 01:563:200, or 01:685:200.

01:508:201 ***Islamic Civilization (3)***
Survey of Islamic societies from seventh-century Arabia to modern times. Religious, political, military, social, economic, and cultural institutions and organizational patterns.
Credit not given for both this course and 01:014:205 or 01:685:201

01:508:203 ***History of Islamophobia (3)***
This course surveys the history of Western anxiety about Islam from its origins to the present, exploring the theological, political, and cultural forces behind it. It examines how Islamophobia has been institutionalized through discrimination, exclusion and violence against Muslims and those perceived as Muslim. The term ¿Islamophobia¿ is analyzed through engaging with multidisciplinary debates that interrogate the term and its limitations, and its complex relation to religious bias and racism.

Credit not given for both this course and 01:685:241 or 01:840:228

01:508:205 ***History of the Modern Middle East (3)***
Shaping of Middle Eastern politics and society since 1800 out of the Islamic/Ottoman legacies and under the impact of modernity and Western encroachment.
Credit not given for both this course and 01:563:205 or 01:685:203.

01:508:208 ***Jewish-Muslim Relations: History and Culture (3)***
Surveys the cultural history of Jewish-Muslim relations from the seventh century up to our present. Analyzes this important and unique aspect of Jewish and Muslim pasts and the place of the Jews in the cultural history of Islam. Course taught in English. Credit not given for both this course and 01:013:208 or 01:563:208.

01:508:209 ***Jerusalem Contested: A City's History from Jewish, Christian, and Muslim Perspectives (3)***
Introduces students to the history of Jerusalem. Causes for and evolution of the profound attachment of Judaism, Christianity, and Islam.
Credit not given for both this course and 01:563:280 or 01:685:280.

01:508:211 ***Modern Israeli Culture (3)***
Approaches modern Israel as a case study in creating a new national culture in relation to ancient history and traditions and a longstanding diaspora. Explores the evolution of Israeli culture between 1940s and the 1990s from an interdisciplinary perspective.
Credit not given for both this course and 01:508:310, 01:563:310, 01:563:281, 01:685:310, or 01:685:281.

01:508:212 ***Israeli-Palestinian Conflict (3)***
Overview of the hundred-year-old Arab-Israeli conflict, the controversies it has generated, the attempts to resolve it, and how outsiders to the conflict learn about it and experience it.
Credit not given for both this course and 01:508:300; 01:563:282; 01:563:300; 01:685:282 or 01:685:300.

01:508:220 ***Ancient Africa (3)***
Precolonial African societies and kingdoms: family life, cities, Islam, growth and decline of states, impact of the slave trade, and African culture in the Americas.
Credit not given for both this course and 01:016:220.

01:508:221 ***West Africa (3)***
Politics in past and present states, rise of new social and economic groups, various reactions to the West during precolonial and colonial eras.

01:508:222 ***Modern Africa (3)***
Nineteenth-, 20th-, and 21st-century Africa: resistance and accommodation to colonialism; impact of Christianity; African workers and new elites; changing roles of women, nationalism, and revolution.
Credit not given for both this course and 01:016:222.

01:508:224 ***Women and Gender in African History (3)***
Issues in the history of gender in Africa: female slavery; women and power formations; women in production and trade; family and community; and gender and protest.
Credit not given for both this course and 01:016:224 or 01:988:224.

01:508:226 ***War and Violence in Africa (3)***
Explores the history of warfare and violence in Africa with a view toward understanding how war has shaped African states, societies, and economies. Topics include different patterns of military organization over time; evolution of weaponry, tactics, and strategy; and increasing prevalence of warfare and militarism in African political and economic systems.

01:508:230 ***The Making of Modern India and Pakistan (3)***
Introduction to the history of the Indian subcontinent from the advent of the Mughal Empire to the creation of the modern states of India, Pakistan, and Bangladesh.
Credit not given for both this course and 01:925:230.

01:508:231 ***South Asian Civilization: The First Five Millennia (3)***
History and culture of South Asia from protohistoric beginnings in the Indus Valley to the late first millennium CE. Emphasizes processes of sociocultural change such as social organization and ideology, religious institutions and patronage, and the evolution of classical culture.

01:508:235 ***Business and Society in Historical and Contemporary India (3)***
Introduction to the long history of commerce and society in the Indian subcontinent up to the present. Includes study of the sociology of economic activity and its representation in popular culture.

01:508:240 ***Classical Asia (3)***
Introduction to the three great civilizations of Asia: India, China, and Japan. Emphasis on traditional family life, art, literature, and the spread of Buddhism.

01:508:242 ***Modern East Asia (3)***
Development of China and Japan in the 19th and 20th centuries: the response to Western imperialism; the rise of Chinese communism and Japanese fascism.

01:508:243 ***War and Society in Early Modern East Asia: Hideyoshi Invasions (3)***
Examination of background, unfolding, and consequences of Hideyoshi Invasions of Korea (1592-1598) as a major international war. Considers the war's influence on Korea, Japan, and China and the political, military, socioeconomic, and cultural history of early modern East Asia more broadly. Transcends the boundary of national history to reach a comprehensive understanding of the "international" connectedness of East Asia.

01:508:244 ***China and the United States (3)***
History of contacts between the two peoples since 1784. Concentrates on period from 1941 to present. Includes all aspects of cultural, economic, and political relations.

01:508:246 ***History of Chinese Civilization (3)***
Introduction to foundational elements of Chinese civilization and society from a historical perspective. Evolution of main Chinese intellectual, political, social, economic, and religious traditions and institutions from the Neolithic to the present period.

01:508:247 ***China, 1800 to the Present (3)***
Continuity and change in Chinese society, politics, culture, international relations, and the economy. Industrialization, rural life, nationalism, socialism, the party-state, gender issues, democracy movements.
Credit not given for both this course and 01:508:342.

01:508:250 ***Southeast Asia and the World (3)***
Introduction to Southeast Asia--one of the crossroads of the world--from ancient civilizations until the end of the 20th century. Includes the histories of Brunei, Burma/Myanmar, Cambodia, Indonesia, Laos, Malaysia, Philippines, Singapore, Thailand, Timore Leste, and Vietnam.

01:508:260 ***Colonial Latin America (3)***
Study of formation of culture and society in Latin America through intermingling and merger of Native Americans, Iberians, and Africans.

01:508:262 ***War and Politics in Latin America (3)***
Examines the causes and political consequences of war and revolution in Latin America (including the Wars of Independence in the 19th century, Cuban Revolution in the 20th century, and US intervention in the region). Special emphasis on international geo-politics and US-Latin American relations.
Credit not given for both this course and 01:590:262.

01:508:264 ***Latin America and the United States (3)***
Survey of the relations between the United States and Latin American nations from the 1780s to the present.

01:508:265 ***Afro-Brazilian History (3)***
Overview of the history of the largest African diaspora community in the world from the pre-history of slavery through the present day. Critical analysis of major issues in Afro-Brazilian and African diaspora studies.
Credit not given for both this course and 01:014:265 or 01:590:265.

01:508:271 ***History of the Caribbean to 1898 (3)***
History of the Caribbean from before the Spanish conquest until the consolidation of the US Imperial sphere in 1898. Emphasis on Spanish, English, and French colonialism and the formation of Jamaica, Saint Domingue/Haiti, Puerto Rico, Cuba, and Española/Dominican Republic.
Credit not given for both this course and 01:595:204.

01:508:272 ***History of teh Caribbean since 1898 (3)***
Overview of the history of the Caribbean since the formation of the US sphere of influence in 1898. Emphasis on the Hispanic Caribbean and Haiti with consideration of the English-speaking nations.
Credit not given for both this course and 01:595:205.

01:508:280 ***Early Native American History (3)***
Examines the images and realities of Native American cultures and histories from America before Columbus through the early period of European-Native American interaction.
(Formerly 01:508:379)

01:508:282 ***Modern Native American History (3)***
Examines the images and realities of Native American cultures and histories from the colonial period through the present day.

01:508:291,292 ***Topics in History (3,3)***
Study of special topics in global history at the intermediate level.

01:508:303 ***The Classical Age of Islam (3)***
Rise and expansion of Islam and formation of Islamic civilization in the Middle East from 600 to the demise of the Abbasid Caliphate ca. 1250.
Credit not given for both this course and 01:685:303.

01:508:304 ***Ottoman Empire (3)***
Political, socioeconomic, and cultural history of the Ottoman Empire, 1300-1900, from frontier principality, to world empire, to post-Suleymanic crisis and change.
Credit not given for both this course and 01:685:304.

01:508:305 ***Modern Turkey (3)***
Introduction to the political, social, and cultural history of modern Turkey, from its late Ottoman origins to the recent past.

01:508:306 ***War and Revolution in Iran and Iraq (3)***
Examines key episodes of conflict between Iran and Iraq in the 20th century, including Iran's Islamic revolution, the Iran-Iraq war, and the two U.S. led wars on Iraq. Investigates the longer-term roots of conflict and its social, political, and ideological consequences.

01:508:307 ***Women and Society in the Islamic Middle East (3)***
History of women and gender relations in the Islamic Middle East: origins of gender inequalities; women's functioning within society; reality versus literary depictions; and recent transformations.
Credit not given for both this course and 01:988:308 or 01:685:307.

01:508:316 ***Israeli Women: Historical and Literary Perspectives (3)***
Impact of socialism, nationalism, ethnicity, religion, and feminism on Israeli women's roles within the family, labor force, army, kibbutz, and politics.
Credit not given for both this course and 01:563:316 or 01:685:316 or 01:988:316.

01:508:318 ***Nationalism in Modern Africa (3)***
Development of African political thought from the 18th century to the modern period with a focus on nationalism. Topics will include African responses to European conquest and colonization; efforts to situate Africa in world history; the emergence of African independence movements; and the influence of race, class, and gender on nationalist thought.

01:508:320 ***History of Southern Africa (3)***
Precolonial African societies and kingdoms, family life, religion, European colonialism, and African nationalist and revolutionary movements. Emphasis on South Africa, apartheid, and the freedom struggle.

01:508:321 ***African Cultural History (3)***
History of African music, art, religion, and other cultural practices in social and political context.
Credit not given for both this course and 01:016:321.

01:508:324 ***Africans in the Americas (3)***
Africans in the Americas: Latin America, the Anglophone and Francophone Caribbean, and the United States. Focus on the African background, slavery, and race relations.

01:508:325 ***Africa from the 15th to the 19th Centuries (3)***
Explores the history of Africa between the 15th and 19th centuries. Focuses on themes such as state formation, economic development, and the imperial conquest.

01:508:326 ***Islam in African History (3)***
Relation of Islam to the history of long distance trade, the rise of urban centers, shifting identity formations, gender dynamics, and religious conflict.

01:508:327 ***World War II and Africa (3)***
Focuses on the history of Africa's involvement in World War II and the impact of this involvement on African political and economic history, with special emphasis on the war's role in nationalist movements.

01:508:328 ***History of Health and Healing in Africa (3)***
Impact of colonial and postcolonial history on patterns of health and health care in sub-Saharan Africa. Focus on African responses to changing new medical technologies and cultures, and emerging patterns of disease.

01:508:330 ***Early Modern South Asia, 1500-1800 (3)***
The Mughal Empire between the 16th and 19th centuries and the making of modernity in the region.

01:508:331 ***Women in South Asian History (3)***
Origins and development of modern Indian feminist struggles in their historical contexts between the late-18th and late-20th centuries.
Not open to first-year students.

01:508:332 ***Slavery in South Asian History (3)***
Covers military, monastic, and household forms of slave employment in the economy of the region between the 12th and 19th centuries. Also traces changes in the legal and economic statuses of slaves in the latter half of the period.

01:508:333 ***Culture and Power in South Asia (3)***
Explores connections between sacred power, "sciences," courts, nation-building and developments in music, dance, drama, and cinema.

01:508:334 ***Passages to India: South Asia through Travel Narratives (3)***
Introduces students to South Asian and comparative history through reading of travelogues by visitors from other civilizations, seventh century to 20th century.

01:508:335 ***Modern South Asia (3)***
Modern history of South Asia; focuses on the transition to and through colonialism.

01:508:336 ***South Asia, 1947 to the Present (3)***
Follows social and political development of South Asia after decolonization, assessing the developmental agendas and international relations of the new regimes.

01:508:337 ***Pirates, Pilgrims, and Poets: Globalization in Indian Ocean History (3)***
Examines the history of globalization by looking at the Indian Ocean as a space of economic and cultural exchange. Themes include technology and exchange, politics and space, people and mobility, and culture and representation.

01:508:338 ***Asian Migrations (3)***
Traces the modern history and contemporary cultures of Asian migration, from approximately 1850 to the present. Explores how global historical trends, including overseas exploration, colonialism, capitalism, nation-building, and war, have shaped patterns of Asian migration.

01:508:340 ***Late Imperial Chinese Culture and Society (3)***
Chinese history from the 16th to the 19th centuries. Focus on power, gender, and ethnicity in a comparative framework of analysis.

01:508:341 ***Chinese Renaissance, 1000 to 1400 (3)***
History of China from 1000 CE to 1400 CE, exploring the social, cultural, and intellectual changes in the period beginning with the transition from the Tang to Song dynasties.

01:508:344 ***China's Socialist Revolution (3)***
History of socialism and revolution in China, emphasizing rise of Chinese Communist Party, its victory in 1949, and post-1949 People's Republic of China.

01:508:346 ***TransAsia: A Transnational History of Gender and Sexuality in Asia (3)***
Transnational history of Asia; how (trans)regional movements in peoples, ideas, commodities, technologies, and capital have shaped and been shaped by gender/sexuality.

01:508:348 ***Chinese Intellectual History (3)***
Key topics and themes of Chinese intellectual history from antiquity to the modern period.

01:508:349 ***Modern China through Film and Fiction (3)***
Use of film and fiction to examine selected topics in modern Chinese history: origins and rise of Chinese nationalism; geneses and development of Chinese social revolutions and political movements; trajectories of China's rise and transformation from a declining empire to a global power and evolving modern society.

01:508:352 ***Japan's Rise to World Power (3)***
Japan's emergence from 1800 to present. The path to industrialization, military expansion, and postwar recovery. Emphasis on changing lifestyles depicted in literature and film.

01:508:360 ***The History of Brazil (3)***
Social, economic, and political developments of the Colonial Period, the Independence Movement, the Empire, the First Republic, the era of Getulio Vargas, and the Second Republic.

01:508:362 ***Mexico (3)***
Surveys Mexican history from pre-Columbian times to the present with special emphasis on the 20th century and the Mexican Revolution.

01:508:364 ***Environmental History of Latin America (3)***
Mutual reshaping of physical environment and human society in Latin America, from pre-Colombian through contemporary times.
Credit not given for both this course and 01:590:364.

01:508:365 ***Revolution in Latin America (3)***
Compares and contrasts the causes and effects of major revolutionary movements in 20th-century Latin America: Mexico, Bolivia, Cuba, and Central America.

01:508:366 ***Central American Revolutions (3)***
Central America since independence. Topics include revolt and revolution; formation of repressive states and labor-repressive capitalism; emergence of reformist and revolutionary movements.
Credit not given for both this course and 01:595:391.

01:508:367 ***The Afro-Latin American Experience (3)***
Examines profound impact of African diaspora on Latin American societies where persons of African descent represent significant minorities and numerical majorities. Explores how Afro-Latin Americans remember the past and experience the present.
Credit not given for both this course and 01:590:367 or 01:595:367.

01:508:369 ***Gender in Latin American History (3)***
Study of the position of men and women in Latin American society from pre-European times to the present.

01:508:370 ***The History of Cuba (3)***
Study of Cuba from pre-Columbian times to the present day. Deals with the long battle for freedom during the 19th and 20th centuries.
Credit not given for both this course and 01:595:390.

01:508:371 ***History of Puerto Rico (3)***
Examination from pre-Columbian to present times. Focus on Spanish colonial policy, slavery and land tenure systems, emergence of national identity, U.S. invasion and rapid economic changes, and population control and migration.
Credit not given for both this course and 01:595:371.

01:508:372 ***History of the Dominican Republic (3)***
From French invasion of Hispaniola to present. Role in Spanish Empire, U.S. control in transition to sugar economy, Trujillismo, U.S. invasion in 1965, and impact of migration on society.
Credit not given for both this course and 01:595:372.

01:508:374 ***Slavery in the Caribbean (3)***
Analysis of different institutions of slavery in the Caribbean and the rise of the plantation societies. Investigating the effects on Europe and the Western Hemisphere and its legacy.
Credit not given for both this course and 01:595:300.

01:508:381 ***Ancient Kingdoms: A History of the Aztecs, Incas and Mayas (3)***
This course treats the history of the three most powerful Native American states: the Aztecs, Incas and Mayas. It begins long before contact with Europeans and ends about two generations after the arrival of the newcomers. Students will learn what scholars have been able to uncover, now that we are relying more on sources written by Indigenous people and less on those produced by Europeans.

Credit not given for both this course and 01:590:381.

01:508:383 ***History of Native American Women (3)***
Explores the lives and experiences of Native American women from 16th-century contact with Europeans through the present-day United States.
Credit not given for both this course and 01:988:387.

01:508:391,392 ***Historical Studies (3,3)***
Separate sections focusing on different topics at different times and in different areas. Specific titles available at time of registration.

01:508:393 ***Global Diasporas in Caribbean History (3)***
Intraregional migrations of Caribbean since 18th century. Theories and concepts of migration; slavery; Asian indentured workers; European and American presence; labor migration; Panama Canal; export economies; race; citizenship; transnational dynamics.
Credit not given for both this course and 01:595:393.

01:508:410 ***Medieval Turkey, 1071-1481 (3)***
Origins and development of Turkish states in Asia Minor including Seljuk Sultanate of Rum, its successor beyliks, and early Ottoman Empire.
Credit not given for both this course and 01:685:410.

01:508:420 ***African Labor History (3)***
African labor history: precolonial labor mobilization, control, and resistance; working-class formation; the labor process and worker consciousness.
Credit not given for both this course and 01:014:367.

01:508:424 ***African Cities Past and Present (3)***
Social, cultural, economic, and political history of African cities with focus on student-led comparative research.
Not open to first-year students. Prerequisite recommended: One course on Africa.

01:508:429 ***Research in African Historical Studies (3)***
Construction of the African past through extended study of sources for one region or theme. Requires research paper based on primary sources.

01:508:450 ***Society and Culture in Japan (3)***
Topical approach to traditional Japanese history. Focus on social institutions, the courtly and martial arts, and the endurance of traditional values in postindustrial Japan.

History (SAS)

European History Courses (510)

European History Courses (510)

01:510:101 ***Ancient and Medieval Europe (3)***
Introductory survey of European history from ancient times to the early modern period. Introduction to historical interpretation and historical inquiry.

01:510:102 ***Europe in the Global Age (3)***
Introductory survey of European history from the early modern period to the present. Introduction to historical interpretation and historical inquiry.

01:510:191,192 ***Topics in History (3,3)***
Study of special topics in European history at the introductory level.

01:510:201 ***Ancient Greece (3)***
Civilization of the eastern Mediterranean world in ancient times, with emphasis on the origins of Western civilization and the Greek contribution to Western culture.
Credit not given for both this course and 01:190:201.

01:510:202 ***Ancient Rome (3)***
The Roman Republic and the Empire, with emphasis on the rise and decline of a Mediterranean world civilization under Roman leadership.
Credit not given for both this course and 01:190:209.

01:510:205 ***History of the Byzantine Empire (3)***
Survey of political, military, religious, and socioeconomic development of the eastern Roman Empire, centered at Constantinople, from late third century to Ottoman conquest in 1453.
Credit not given for both this course and 01:489:205 or 01:685:205.

01:510:207 ***Byzantine Civilization (3)***
History of Byzantine culture and civilization, including political ideology and statecraft, orthodox Christianity, transmitting classical traditions of science and literature, art and architecture, and laying foundations of modern Greek culture.
Credit not given for both this course and 01:489:207 or 01:685:207.

01:510:209 ***Emergence of Medieval Europe, 400-1150 (3)***
Europe from the fall of Rome through the Dark Ages and into the feudal age--the era of Charlemagne, the Vikings, and the Crusades.
Credit not given for both this course and 01:667:281.

01:510:211 ***Harvest of the Middle Ages, 1150-1520 (3)***
From feudalism to the Protestant Reformation, with emphasis on social and economic developments. Religious, political, institutional, and cultural changes.
Credit not given for both this course and 01:667:282.

01:510:213 ***The Crusades (3)***
Ideology and expressions of the crusades, 11th to 14th centuries, including crusades against Muslims, heretics, and other papal enemies. Extensive use of film.
Credit not given for both this course and 01:685:213.

01:510:217 ***From Byzantium to the Ottomans: 1204-1460 (3)***
Development of Byzantine society and culture from the Latin crisis (1204-1261) through the Ottoman conquest (1453), including the Byzantine impact on West European, Slavic, and Ottoman cultures.
Credit not given for both this course and 01:489:217 and 01:685:217.

01:510:222 ***Greek Food from Antiquity to Today (3)***
Food and foodways of Greek-speaking peoples from ancient times to the present, with special emphasis on problems of continuity and change.
Credit not given for this course and 01:489:220, 01:685:220, 01:667:220, or 01:190:220.

01:510:224 ***Europe: Gender, Sex, and Society (3)***
Explores the varieties of gendered experience in Europe from the Enlightenment to the 20th century, including the relationship between gender, class, ethnicity, and sexual orientation. Course material will emphasize interdisciplinary and comparative approaches.

01:510:231 ***A History of the Britannic Isles: From the Beginnings to the 18th Century (3)***
Explores the histories of the Britannic Isles--modern England, Ireland, Scotland, and Wales--from the beginnings until the Act of Union of 1707; emphasis on history of migration, invasion, and cultural exchange.

01:510:232 ***Fashion & Design in Europe: Between the West and the World (3)***
Focuses on a series of "moments" in European history when aesthetic styles in clothing became a flashpoint for cultural change. Explores the history and culture of clothing and fashion through a range of disciplinary and interdisciplinary perspectives from the European Renaissance to the 20th century.

01:510:245 ***The Arts of Power: Ritual, Myth, and Propaganda (3)***
Investigates how paintings, movies, poems, and ceremonies have been manipulated to bolster the political authority of rulers, including Louis XIV, Lincoln, Hitler, and Elizabeth II.

01:510:248 ***The Last Climate Crisis: Histories of the "Little Ice Age", c.1300-1800 (3)***
Analyzes the social, environmental, political, and cultural impact of the centuries-long climatic cooling often known as the ¿Little Ice Age¿ (c.1300-1800). Students consider what the historical study of the last climate crisis can teach us about what awaits us in the current crisis of anthropogenic climate change.

01:510:253 ***History of Witchcraft and Magic (3)***
Witchcraft in relation to the history of religion; the phenomena of crime, deviance, and demographic change; and the history of women in Europe and America.

01:510:255 ***Dracula: Facts and Fictions (3)***
History of Dracula in context of early modern Balkan and Ottoman political and military history. Historical and literary legacies of Dracula from the 15th century to the late 19th century.

01:510:260 ***Remembering the Shtetl (3)***
How Jewish life in eastern European small towns has been documented and recalled from 19th century to present in fiction, art, ethnography, film, and memoir.
Credit not given for both this course and 01:563:260.

01:510:261 ***History of the Holocaust (3)***
Development of anti-Semitism in modern European history culminating in the "Final Solution"; special emphasis on Jewish responses and resistance.
Credit not given for both this course and 01:563:261.

01:510:263 ***Between Nazism and Communism (3)***
Explores the experiences of Poles and Polish Jews under Nazi and Communist rule through history, travel writing, memoir, poetry, and film.
Credit not given for both this course and 01:563:270.

01:510:265 ***Jewish-Christian Relations through the Ages (3)***
Jewish-Christian relations from the first century CE to the start of the 21st century. Focuses both on the history of interactions between Jews and Christians--persecutions, collaborations, conversions, etc.--and the history of theological stances and popular attitudes.
Credit not given for both this course and 01:563:240.

01:510:268 ***Fascism (3)***
Examines connections between alt-right, white power, and neo-Nazi groups today to the historical fascist movements and regimes of the 1930s and 1940s. Historical perspective on what fascism is, what fascists believe, and they want to do. Considers the historical conditions that have produced fascism, the legacies of the fascist movements of the 1930s for our own time, and the relevance of fascism's history to the challenges of the present day.

01:510:269 ***Antisemitism (3)***
History of negative attitudes toward Jews and Judaism from the ancient and medieval world to modern Europe, the United States, and the Middle East. Explores continuities and turning points in the history of antisemitism as well as the significance of antisemitism as an analytic category. Focus on contemporary discourses and media representations of antisemitism in light of their historical precedents and resonances.
Credit not given for both this course and 01:563:269.

01:510:271 ***Russia and the West (3)***
Formation of traditional Russian society in isolation from the West; the impact of the West on Russia from Peter the Great to the present.

01:510:277 ***Russia: Between Empire and Nation (3)***
Study of Russia's imperial culture, history, and politics from the 19th to the 21st century as a window onto geopolitical shifts in contemporary Russia's relations to the wider world.
Credit not given for both this course and 01:195:272 or 01:860:272.

01:510:291,292 ***Topics in History (3,3)***
Study of special topics in European history at the intermediate level.

01:510:300 ***Greek and Roman Slavery (3)***
Social, economic, legal, and political aspects of slavery in Ancient Greece and Rome. The sources and numbers of slaves, forms of servitude, manumission, and slave labor.
Credit not given for both this course and 01:190:300.

01:510:301 ***Early Greece (3)***
History of the Greek world from Minoan Crete through the Persian War. Readings (in translation) range from Homer through Herodotus.

01:510:302 ***Classical Greece (3)***
Greek history from the Persian War to the Macedonian conquest of Greece. Readings (in translation) from Thucydides, Xenophon, Demosthenes, Plutarch, and others.

01:510:303 ***Hellenistic World (3)***
Expansion and development of Greek culture from Alexander through the successor kingdoms in Greece, Egypt, Syria-Palestine, and Asia Minor.
Credit not given for both this course and 01:190:303.

01:510:304 ***The Rise of the Roman Republic (3)***
Roman political, social, and cultural history from the beginning of urban settlement through the emergence of the Roman state as the dominant power in the Mediterranean basin to the end of the second century BC.

01:510:305 ***The Crisis of the Roman Republic (3)***
Roman political, social, and cultural history during the crisis of the late republic from 133 BC, the tribunate of Tiberius Gracchus, through the establishment of the principate by the Emperor Augustus.
Credit not given for both this course and 01:190:305.

01:510:306 ***Roman Empire (3)***
Political, social, and intellectual developments of the imperial period until the age of Constantine, with emphasis on the first two centuries AD.
(Formerly 01:510:305) Credit not given for both this course and 01:190:306.

01:510:307 ***The Roman World in Late Antiquity (3)***
Development of the Roman state and society from the late third through early seventh centuries. The transformation of the late classical world, and the origins of Byzantium and the medieval West.
(Formerly 01:510:306)

01:510:308 ***Creating Culture and History in the Ancient World (3)***
Aspects of cultural, religious, and intellectual developments in the classical world.
(Formerly 01:510:307)

01:510:309 ***A History of Western Morals: Antiquity and Middle Ages (3)***
Examines the formative period of moral ideas in Western civilization in ancient Greek, Roman, and Hebrew societies, then traces the evolution of those ideas through the Middle Ages.

01:510:310 ***Pompeii: The Life and Death of a Roman Town (3)***
Pompeii and Herculaneum, as laboratories for the study of Roman life: the economy and society; public and private architecture, art, and inscriptions; and the birth of archaeology.
Prerequisites: One course in Roman history or culture, Latin or ancient art, or permission of instructor. Credit not given for both this course and 01:190:373.

01:510:311 ***Cities of the Classical World (3)***
Study of urban development in antiquity, focusing on Athens and Rome, and synthesizing the evidence of literary, historical, and archaeological sources.
Credit not given for both this course and 01:190:372.

01:510:312 ***Cleopatra (3)***
Examines the historical Cleopatra and the reception of her image from antiquity to the present in literature, art, and film. Issues considered include female power in a man's world, east versus west, and politics and propaganda.
Credit not given for both this course and 01:190:318 or 01:988:321.

01:510:313 ***Muslims, Christians, and Jews in Medieval Spain (3)***
History of medieval Spain with a focus on cultural, religious, and political diversity.
Credit not given for both this course and 01:563:307.

01:510:314 ***Jews, Heretics, and the Inquisition (3)***
Survey of the Medieval, Spanish, and Roman inquisitions focusing on these institutions' attitudes toward--and treatment of--heretics, Jews, and conversos. Examines how these inquisitions operated and their legal precedents as well as their relations to the social, political, and religious tensions of their day, in the context of broader historical questions about forms of intolerance and modes of persecution.
Credit not given for both this course and 01:563:314.

01:510:315 ***Reform and Dissent in the Middle Ages (3)***
Christian unity and its implementation, church structure, canon law, monastic reform, conciliar movement, academic and popular heresy, and church-state relations, with emphasis on Italy and Germany. Integrated, interdisciplinary study of the age of the Renaissance in Italy and northern Europe from 1300 to 1550.
(Formerly 01:510:417)

01:510:316 ***Food and Drink in Medieval Europe (3)***
Food history at the crossroads of environmental, economic, agricultural, dietary, social, gender, ethnic, everyday life, religious, and political-diplomatic investigations. Examination of these themes within the millennial trajectory of medieval Europe and the Mediterranean from ca. 450 CE to ca. 1450 CE.

01:510:317 ***The Renaissance (3)***
Integrated, interdisciplinary study of the age of the Renaissance in Italy and northern Europe from 1300 to 1550.

01:510:318 ***Era of World War I (3)***
Causes, course, and consequences of World War I in the light of political, social, and military forces.
(Formerly 01:510:417)

01:510:319 ***The Age of Reformation, 1500-1648 (3)***
The Protestant and Catholic reformations and their significance for European society.

01:510:320 ***Women in Antiquity (3)***
Women in the ancient societies of Greece and Rome. Their roles and images in the social, legal, political, domestic, philosophical, and artistic spheres examined using primary sources.
(Formerly 01:510:251). Credit not given for both this course and 01:190:320.

01:510:321 ***The Age of Enlightenment (3)***
Eighteenth-century European philosophy and philosophers examined within their historical contexts. The role of ideas in movements for social, moral, and political change.

01:510:325 ***Nineteenth-Century Europe (3)***
Examination of the formative period of modern Europe, including the industrial and democratic revolutions, nationalism, imperialism, and the crises culminating in World War I.

01:510:327 ***Twentieth-Century Europe (3)***
Major economic and social forces shaping life in 20th-century Europe, and efforts of major social groups to cope with and shape these forces.

01:510:329 ***World War II in Europe (3)***
Exploration of causes, events, and consequences of WW II in Europe. Focus on political, military, economic, social, and cultural history dimensions.

01:510:330 ***The Spanish Civil War (3)***
Analysis of the historical factors that led to war in twentieth-century Spain, how major powers influenced the conflict's outcome, and the war's impact on European and global politics.

01:510:333 ***France, Old Regime, and Revolution (3)***
French history from Louis XIV to the fall of Napoleon. The absolutist state and the impact of revolution, stressing the interplay of political, social, cultural, and economic history.

01:510:335 ***Modern France (3)***
History of France from the fall of Napoleon to the present, with particular emphasis on the relation of political developments to social, intellectual, and economic change.

01:510:337 ***Medieval Kings and Queens (3)***
Rulership in theory and practice, from Germanic chieftains to divine-right monarchs, with attention to royal rivals, myths and rituals, marriage, and gender.

01:510:338 ***England in the Middle Ages (3)***
Political development of England from William the Conqueror to the War of the Roses.

01:510:340 ***British Atlantic World (3)***
Explores the forms of knowledge and networks of communication that shaped British colonization in the early modern Atlantic. Themes include early contact with Native Americans; commerce, piracy, and slavery; political communications and the American Revolution; and the campaign to abolish the slave trade.

01:510:343 ***A Century of Revolution: Politics and Culture in England 1588-1720 (3)***
Explores the tumultuous political history of England during the "long seventeenth century," focusing on the long-term origins and consequences of the revolutions of 1640-60 and 1688-89, the impact of religion on politics, and the operations and transformations of monarchical and popular political culture.

01:510:344 ***The Social History of England, 1580-1780: The First Modern Society? (3)***
Explores the socioeconomic and cultural history of early modern England. Topics include popular culture; religion; sex and gender; urbanization; and the rise of consumerism, industrialism, and capitalism.

01:510:345 ***English Constitutional History to 1688 (3)***
Developments of English governments to 1688, with emphasis on those institutions and political and legal ideas that form the background for American constitutional development.

01:510:346 ***The English Revolution, 1640-1660 (3)***
Explores the most tumultuous period in English history. Topics include causes and revolution, the Civil War, regicide and republicanism, radical politics and religion, and Oliver Cromwell.

01:510:347 ***The British Empire and the British Isles, 1485-1763 (3)***
History of British overseas enterprise from opening phases of Atlantic exploration through the end of the Seven Years' War. Special attention to impact of empire on British Isles.

01:510:348 *Great Britain, 1685-1815 (3)*
Explores Great Britain's rise to dominant global power. Focuses on internal developments as well as colonial experiences.

01:510:349 *Modern Britain (3)*
Developments since the 18th century that have shaped the character of contemporary Britain, including parliamentary democracy, industrialization, rise and fall of empire, and cultural change.

01:510:350 *Greek Society (3)*
Social and economic life of the Greeks from the Mycenaean period through the Hellenistic age. Written and material evidence employed.
Prerequisite: Recommended: 01:510:201. Credit not given for both this course and 01:190:350.

01:510:351 *Medieval Italy, 476-1300 (3)*
The Italian peninsula from the fall of the empire in the west to the age of the communes; social, political, and religious history.

01:510:354 *History of Italy's People (3)*
Topical approach. Etruscans to present. Emphasis on culture, geography, religion, philosophy, family structures, agricultural systems, urban development, and universities.

01:510:357 *Medieval Germany (3)*
Survey of German history from the late Roman Empire to the threshold of the Reformation, ca 300 to ca 1500.

01:510:360 *Society and Culture in Germany 1750-1870 (3)*
Introduction to the classical period of German culture, including study of Kant, Fichte, Lessing, Goethe, and Shiller in historical context.

01:510:363 *Germany from 1871 to Present (3)*
Analysis of the collapse of imperial Germany, the failure of democracy in the Weimar Republic, Hitler's Third Reich, the Holocaust, and restructuring of Germany since 1945.

01:510:368 *Jews of Germany and Austria-Hungary, 1780-Present (3)*
Jewish history in modern Central Europe. Focus on Germany, Austria, Hungary, and Czechoslovakia (now the Czech Republic and Slovakia) from the late 1700s until the present day.
Credit not given for both this course and 01:563:368.

01:510:370 *Remembering the Holocaust (3)*
Holocaust remembrance in contemporary social and cultural practices in the United States and globally considered as a paradigm for deriving lessons from the past in order to respond to traumatic losses, address present social injustices, and prevent future acts of intolerance.
Credit not given for both this course and 01:563:360 and 01:470:369.

01:510:372 *Armenian Genocide in Comparative Perspective (3)*
Overview of the Armenian Genocide in comparative perspective, drawing from a wide spectrum of cases of mass violence and genocide, the development of the concept of genocide in International Law, genocide denial, responsibility to protect, reparations, and reconciliation; organization and implementation of the genocide, humanitarian and armed resistance to it, and the aftermath of genocide.

01:510:373 ***State and Society in Imperial Russia (3)***
Autocratic government as a dynamic force in the 18th century and a conservative one in the 19th century in the face of intellectual and socioeconomic development.

01:510:375 ***Revolutionary Russia and the Soviet Union (3)***
Crisis of the old regime; revolution; building socialism in an underdeveloped country; Stalin's terror; expansion and the Cold War; the post-Stalin attempts at reform; and the breakup of the Soviet Union.

01:510:377 ***Russia in War and Peace (3)***
History of Russia from the war against Japan in 1904 to post-Soviet wars in Chechnya. Focus on how international conflicts affected Russian politics, culture, and society: Revolution of 1905, turmoil in First World War, revolutions of 1917, Russian Civil War, "socialism in one country," mythology of Great Patriotic War, xenophobia in Cold War, war in Afghanistan, and collapse of communism.

01:510:378 ***Jews and Revolution (3)***
Jewish experience in modern Russia, with special focus on the involvement of Jews in the Russian Revolution and socialism and nationalism during the Soviet Union, and the challenges to Russian-Jewish relations in the post-Soviet era.
Credit not given for both this course and 01:563:331.

01:510:379 ***St. Petersburg (3)***
Intensive study of the historical development of St. Petersburg and its role in Russian and European history. Variable topics; specific topics will be available at time of registration.
No knowledge of Russian required. Offered only as part of summer program in St. Petersburg.

01:510:381 ***Eastern Europe, 1800-1948 (3)***
Emergence of national movements and independent states in Poland, Czechoslovakia, Hungary, Yugoslavia, Romania, and Bulgaria. Problem of national minorities in nation-states, and solutions offered by nationalist, fascist, and communist regimes.

01:510:382 ***History of Modern Greece (3)***
Greek experience under Ottoman rule; revolution and independence; development of national state and society 1830s to present.
Credit not given for both this course and 01:489:382 or 01:685:382.

01:510:383 ***Eastern Europe, 1945-Present (3)***
Impact of communism and neoliberalism on Eastern Europe. Collapse of the Soviet Bloc, transition to liberal market capitalism, and its social consequences.

01:510:384 ***Cyprus: A Global History (3)***
History of Cyprus from the 16th to the 21st century.
Credit not given for both this course and 01:489:381 or 01:685:384.

01:510:385 ***The History of East European Jewry (3)***
Economic, legal, and political conditions of Jewish life from the 16th century to World War II. Forms of Jewish response: autonomism, messianism, Hasidism, emigration, and socialism.
Credit not given for both this course and 01:563:385.

01:510:386 *Zionism: Meanings and Challenges (3)*
Origins of Zionism in the mid-19th century and its development to the present day. Topics addressed include Zionism¿s political and social contexts, how other ideologies shaped Zionism, critics of Zionism, and the effect of Zionism on Jews¿ relationship to each other and to their surrounding societies.

Credit not given for both this course and 01:563:343

01:510:389 *Jewish Politics, Jewish Power (3)*
Political relationship of the Jewish community to the Gentile authorities among whom they lived, from Rome in 70 CE to the contemporary period. Continuities and discontinuities of traditional conceptions of Jewish political behavior; rebellion and accommodation to structures of power in varying historical contexts.
Prerequisite: At least one course in Jewish or European history after 1500. Credit not given for both this course and 01:563:389 and 01:790:384.

01:510:390 *Jewish Memory (3)*
Course explores various forms of Jewish memory shaped in response to major events, including myths, holidays, monuments, pilgrimages, testimonies, museums, literature, and film.
Credit not given for both this course and 01:563:390.

01:510:391,392 *Historical Studies (3,3)*
Separate sections focusing on different topics at different times and in different areas. Specific titles available at time of registration.

01:510:393 *Jewish Historical Fiction (1.5)*
Explores a variety of Jewish historical novels and their relationship to the historical periods they purport to represent, from late antiquity to the modern period. Special emphasis is given to comparing works of history with works of fiction. Topics include: Second Temple sectarianism, medieval Jewish marriage law and customs, mysticism, sabbatianism, and revolution in the Soviet Union.
Credit not given for both this course and 01:563:336.

01:510:394 *Human Rights (3)*
Examines the history of human rights as a set of ideas and as a motivation for social action. Special emphasis on the role of human rights in Europe, but includes comparisons with rights-based activism in other parts of the world.

01:510:401 *The Idea of Europe: 18th Century to the Present (3)*
Exploration of the concepts "Europe" and "Europeans" from 1700 to the present.
Prerequisite: 01:510:101-102 or permission of instructor. Credit not given for both this course and 01:360:401.

01:510:403 *Ancient Warfare and Diplomacy (3)*
International politics and military history in the Greek and Roman world. Readings include ancient sources (in translation) and modern interpretations.

01:510:407 *Rome in the Age of Augustus (3)*
Examination of the career of Augustus and the developments in the Roman world during this period. Treatment of the problems of change and continuity through revival and innovation in political, social, and intellectual spheres, with emphases on growth of imperial system and on the literary works and social legislation.

01:510:419 ***Europe in the Contemporary World (3)***
Europe from 1930s to present, focusing on European responses to challenges of American power, Soviet revolution, and anticolonial movements.

01:510:425 ***Intellectual History of Early Modern Europe (3)***
Study of major currents of thought (religious, scientific, political, and social) from the end of the Middle Ages to the 18th century.

01:510:441 ***The Social History of Medieval England (3)***
Concentrates on the interaction between individual and society in medieval England with special emphasis on the life experiences of the common people.

01:510:484 ***Russia after Stalin: Literature, History, Theory (3)***
Recent past of Russian culture and politics. Study of how the Stalinist past influenced late Soviet Russian culture, contributed to the collapse of the USSR, and shaped post-Soviet Russia through examination of powerful fiction texts and films that defined the post-Stalin era, from 1950s onward, as well as nonfiction and theoretical texts on Stalinism and its aftermath.
Taught in English. Credit not given for both this course and 01:86:484 and 01:195:484.

History (SAS)

American History Courses (512)

American History Courses (512)

01:512:103 ***Making of America: Colonization to Civil War (3)***
Political, economic, and social history of the United States from colonial times to the Civil War.

01:512:104 ***Making of America: Gilded Age to Global Power (3)***
Political, economic, and social history of the United States from the Civil War to the present.

01:512:107 ***Gateway to Making of America: Colonization to Civil War (4)***
U.S. history to 1877, with weekly recitation section.
Registration through school dean.

01:512:108 ***Gateway to Making of America: Gilded Age to Global Power (4)***
U.S. history since 1877, with weekly recitation section.
Registration through school dean.

01:512:111 ***Race, Place, and Space in American History (3)***
Explores the interplay of social, historical, and spatial forces in configuring American racial formations and identities--white, black, Indian, and Asia--from the colonial period to the present. Situates race in geographical context and assesses how modern America has been influenced by the historical development of racialized spaces and places.

01:512:121 ***Health and Environment in America (3)***
Changing manner in which Americans perceived and responded to health-related problems involving both the individual and the physical and social environment from the 17th to the 20th century.

01:512:191,192 ***American Topics (3,3)***
Study of special topics in American history at the introductory level.

01:512:205 ***The American Presidency (3)***
Examines the American presidency in historical perspective, including the powers of the office, its place in the American imagination, and the substantive achievement of the most significant presidents.

01:512:210 ***Food in the United States and the World (3)***
Examines the histories of food production and consumption in the United States and the world from the colonial era to the 21st century, with particular emphasis on the 19th and 20th centuries. Considers how political and economic power relations, social norms, and cultural traditions regarding food production and consumption have changed over time.

01:512:212 ***Cowboys and Indians on the Western Frontier (3)***
Introduction to the history of the west and tensions between native people and settlers.

01:512:215 ***American Legal History (3)***
American legal history from the 18th century to the contemporary era. Focus on specific case studies in the history of American law.

01:512:216 ***Famous Trials (3)***
Examines famous American trials (Sacco and Vanzetti, Scopes, Scottsboro, Hiss) with comparative trials from world history (Galileo, Dreyfus, Oscar Wilde). Includes film portrayals and 21st-century parallels.

01:512:220 ***Your Family in History (3)***
American history from the perspective of a student's own family or ethnic group. Impact of social, cultural, economic, and religious changes on the family.

01:512:221 ***Abortion: The Collision of History, Law, Religion, Medicine, and Human Rights in the 20th and 21st Centuries (3)***
Abortion is one of the most socially contested issue of our time. Using a historical and

sociological lens, this course seeks to understand the issues in more contextual and less polemic manner. This course will explore the history of abortion, key legal and public health aspects, the anti-abortion social movement, the realities of abortion provision, abortion in popular culture and public opinion, and abortion in the international arena.

Credit not given for both this course and 01:840:220.

01:512:225 ***Sexuality in America (3)***
The history of sexuality in American history from early colonization to contemporary America. Explores the factors that shaped people's sexual lives and introduces students to the historical study of sexuality.

01:512:229 ***History of Medical Ethics (3)***
Overview of medical ethics in 19th and 20th century United States and the historical milestones that led to our current system of research oversight. Traces history of research with human subjects prior to the establishment of bioethics as a field and examines discussion and practice surrounding human subjects research in late 19th and 20th centuries. Topics include Tuskegee Syphilis Experiment, ethical issues in human reproduction, ethics of death and dying, ethics of commodification of medical care.

01:512:230 ***History of Medicine in Film (3)***
Portrayals of medicine and medical care in American film over the past 80 years. What popular films can tell us about the cultural images of physicians, technology, and medicine in American society.

01:512:231 ***American Jewish History (3)***
History of the Jews in the New World, beginning in the middle of the 17th century, and then focusing on the United States until the present.
Credit not given for both this course and 01:563:231.

01:512:235 ***Accidents and Disasters in the United States and the World (3)***
Examines the histories of accidents and disasters in the United States and the world from the 17th to the 21st centuries, with particular emphasis on the 19th and 20th centuries.

01:512:236 ***Edison and His Era (3)***
Work of Thomas Edison as a vehicle for understanding the transformation of the American economy and culture from 1880-1930.

01:512:237 ***Data: A Social History (3)***
Explores data in American society. How and why data became central to government, business, and daily life in the United States, from the nineteenth century to the present day.

01:512:238 ***History of Homelessness: Unhoused Populations in US History (3)***
Examines social and legal history of homelessness and unhoused populations in the United States, from the colonial period to the present.

01:512:240 ***World War I (3)***
Study of the causes, course, and consequences of World War I, with particular emphasis on American culture and foreign policy within Western civilization.

01:512:242 ***World War II (3)***
Study of the causes, course, and aftermath of World War II, with particular emphasis on the place of American culture and foreign policy within world politics.

01:512:250 ***Natives and Newcomers: Immigration and Migration in U.S. History (3)***
Immigration and migration in U.S. history from precolonial societies to the present. Critical examination of the dynamics of immigration over several centuries, challenging common fundamental views. Considers immigration from the perspective of natives or "the nation" and from the view of newcomers.

01:512:253 ***Asian American History (3)***
Introduction to the political, economic, and sociocultural aspects of immigrants from Asia and their descendants in the United States from the 16th to the 21st century.
Credit not given for both this course and 01:050:253.

01:512:260 ***American Slavery (3)***
Examines the institution of slavery from 1619 through the Civil War. Considers how slavery changed over time and how it was experienced in different regions.

01:512:262 ***African-American History to 1877 (3)***
African-American history from origins in Atlantic Africa to the end of the Civil War. Focal points include the Atlantic African background, the Atlantic slave trade, Antebellum slavery, slave culture, and the Civil War. Explores forces which have converged to create African-American peoples and shape their lives, communities, and cultures in early North America.

01:512:263 ***African-American History, 1877 to Present (3)***
African-American history from defeat of Reconstruction to present. Topics covered include the post-Reconstruction period, Jim Crow, urbanization, and migration, as well as African-Americans' experiences with education, housing, and justice in the U.S. legal system. Examines key social justice movements such as the Civil Rights Movement and Black Power.

01:512:264 ***Black Lives Matter (3)***
Explores the development of the #BlackLivesMatter movement beginning with the colonial era and ending with the contemporary moment.
Credit not given for this course and 01:014:264.

01:512:266 ***History of the Black American (3)***
Survey of the history of the black American from the colonial era to the present. Includes such topics as slavery, the Reconstruction era, the Washington-DuBois controversy, the Harlem Renaissance, and the Civil Rights movement.

01:512:267 ***History of Black Travel and Migration (3)***
Examines the various travels taken by African Americans. From the forced migration of African peoples in the transatlantic slave trade to contemporary heritage tours to Africa, this class explores the meaning of travel for African Americans.

01:512:268 ***Plantation to White House (3)***
Exploration of the history of blackness in America, from colonial times to the present, with key questions focusing on slavery, citizenship, gender, and racial identity.

01:512:278 ***Popular Music in American History (3)***
Popular music examined within the broader social and cultural context of America's past. Significant historical changes in musical expression.

01:512:280 ***News Media and Government in American History (3)***
Examines relationship between media and institutions, and the processes through which people and societies make political choices.
Credit not given for both this course and 04:567:278.

01:512:282 ***Sport in History (3)***
Role of sport in ancient and preindustrial societies; modernization of sport following the Industrial Revolution; social functions and aesthetics of sport; women in sport; sport in contemporary society.

01:512:291,292 ***Topics in History (3,3)***
Study of special topics in American history at the intermediate level.

01:512:300 ***History of Colonial America (3)***
From the Age of Discovery through the American Revolution, with particular emphasis on political, economic, and social history.

01:512:301 ***The American Revolution (3)***
Coming of the American Revolution seen in its world setting; various interpretations of the causes: ideological, constitutional, social, economic, political, diplomatic, and military perspectives.

01:512:302 ***The United States: The Young Republic (3)***
Examination of the principal political, economic, and social forces that were responsible for the development of the new nation.

01:512:303 ***American Civil War and Reconstruction, 1848-1880 (3)***
Analysis of major forces 1848 to 1880. Emphasis on the more immediate background to the war; how the war began; how it was fought; and why Reconstruction developed and collapsed.

01:512:304 ***The Forging of Modern America, 1880-1920 (3)***
Political reform movements against the background of industrial development, urbanization, and immigration in the United States from 1880 to 1920.

01:512:305 ***U.S. History, 1914-1945 (3)***
U.S. history from World War I through World War II, emphasizing major themes in U.S. politics, society, culture, and diplomacy.

01:512:306 ***U.S. History, 1945 to the Present (3)***
U.S. history emphasizing the cold war, McCarthyism, and the major political, social, and economic trends of the 1960s and 1970s.

01:512:308 ***History and Asylum Law in the United Stats (3)***
Advanced research seminar and practicum; explores the history of asylum in the United States; shows how historical research can be applied to the practice of asylum law.

01:512:310 ***New Jersey History (3)***
New Jersey from its proprietorial beginnings to the present. Emphasis on those factors that have been most influential in determining the character of the state today.

01:512:311 ***History of American Education (3)***
A historical survey of American education from the colonial period to the present. Topics considered will include the following: 1) colonial American education; 2) the origins of common schools; 3) the development of a public school system; and 4) 20th- and 21st-century educational reform.
Credit not given for both this course and 05:300:364.

01:512:313 ***Childhood in America (3)***
Introduction to childhood as a subject of historical inquiry, exploring both childhood as a cultural expression and children as historical subjects over the course of 400 years of American experience in psychological, religious, social, educational, economic, and political terms.

01:512:314 ***The City in American History (3)***
Urbanization from the colonial city to the 20th-century metropolis; urban population, institutions, problems, and planning; urbanism in American culture.

01:512:315 ***Famous Trials in Modern America (3)***
Civil liberties and civil rights trials in 20th-century America: Abrams, Sacco and Vanzetti, Scopes, Scottsboro, Rosenbergs, Hiss, *Roe v. Wade*.

01:512:316 ***Radicalism in America (3)***
Ideas of the outstanding radicals in American history (18th century to the present), the areas of discontent, and an analysis of the response of the American community.

01:512:317 ***Murder in American History (3)***
Famous murders (and other capital crimes) illustrating major cultural and political trends in American life. May include Salem witchcraft, the Boston Massacre, Sacco and Vanzetti, Lindbergh, Leopold and Loeb, and Emmett Till.

01:512:318 ***History of Political Corruption and Reform in America (3)***
The long history of political corruption in America, and the reform movements designed to combat corruption. From colonial America to the present.

01:512:319 ***Nineteenth-Century Architecture and Society in the United States (3)***
Overview of the social and intellectual history of architecture in the United States to 1900. Role of architecture in societal transformations (the development of nationhood, industrialization, and urbanization). Emphasis on the invention of new building types, including universities, government buildings, prisons, hospitals, railroad stations, and the architecture of World's Fairs.
Credit not given for both this course and 01:082:391.

01:512:320 ***American Frontier History (3)***
Mythology, theory, and reality of the frontier in American social, cultural, and environmental development from discovery to the present.

01:512:321 ***Health Care and Society in America (3)***
History of disease in America from the age of smallpox and scarlet fever to the era of AIDS; and history of health and health care from the colonial era to present.

01:512:322 ***Drugs: A Social History (3)***
History of drug use in modern America, drugs in the underground and informal economy, drug epidemics, and government response in the United States after World War II.

01:512:323,324 ***History of the North American Environment (3,3)***
Comparative study of the interplay of culture, society, and environment in Canadian, U.S., and Mexican history.

01:512:328 ***Science in American Culture (3)***
Place of science in U.S. history. Science and exploration, war, the economy, and social problems; growth of research and educational institutions; popular science and antiscience.

01:512:329 ***Technology and Nature in American History (3)***
Historical exploration of the shaping of American history by technological and natural forces. From colonial America to the 21st century; from Walden Pond to Yosemite National Park, an exploration of land-use patterns, transportation networks, suburbanization, ideas about wilderness, environmental politics, and other topics.

01:512:332 ***American Economic Growth since 1860 (3)***
Main currents and major factors in American economic growth, welfare, and decision making, 1860 to the present. Critical evaluation and interpretation of economic issues.

01:512:335 ***History on Film (3)***
Examination of films that interpret the American past and engage major historical issues.

01:512:342 ***Policing in Black Communities: From Slavery to Mass Incarceration (3)***
This course examines the history of policing in Black communities from its origins in colonial slavery to the present. It reveals how Black people's desire for freedom from slavery led fearful local, state, and federal authorities to establish a complex web of laws, policies and social practices that monitored and governed Black people's lives, laying a durable foundation for systems of racial and social control that continue to exist in modified forms in contemporary society.

01:512:347 ***War, Peace, and the Military of the United States to 1877 (3)***
Survey of American attitudes toward and developments in regard to war, peace, and the military from colonial times through the Civil War and the end of Reconstruction.

01:512:348 ***War, Peace, and the Military of the United States since 1877 (3)***
Survey of American attitudes toward and developments in regard to war, peace, and the military from modernization of the army and navy beginning in the late 19th century through the Spanish-American War, two world wars, the Korean and Vietnam wars, to the present military situation.

01:512:350 ***From Colonies to Empire: American Foreign Relations to 1898 (3)***
American foreign relations from the colonists' conflicts with Native Americans to the Spanish-American War. Territorial expansion, diplomatic principles, economic expansion, and rise of the "New Empire."

01:512:351 ***Mexican-American History (3)***
Examination of major themes in Mexican American/Chicano history since the 19th century. Topics include Spanish empire, Anglo-American conquest, racial hierarchies, labor migration, politics, popular culture, gender, sexuality, and social movements.
Credit not given for both this course and 01:595:351.

01:512:352 ***U.S. Foreign Relations since 1898 (3)***
American foreign relations from the Spanish-American War to the end of the cold war: Imperialism, Wilsonian interventionism, World War II, cold war, and détente.

01:512:354 ***America, Russia, and the Cold War (3)***
Examines the shift from friendship to antipathy between Russia and America in the late 19th century and early 20th century; the roots of Soviet-American ideological rivalry; superpower competition and global conflicts after 1945; détente; the ending of the Cold War; and the question of a "new Cold War" in the 21st century.

01:512:355 ***America's Rise to Global Power (3)***
Technology as the key source of U.S. identity and projection of power and culture overseas. Focus on the interaction of United States and Asian and African societies.

01:512:356 ***The Thirty Years' War: America in Vietnam (3)***
Examination of the causes and effects of the war in Vietnam with special emphasis on the United States and its role.

01:512:359 ***Race, Culture, and Politics: Blacks and Jews in America (3)***
How black and Jewish identities have evolved in relationship to one another through an examination of social and political history, literature, and film.
Credit not given for both this course and 01:563:359 or 01:014:359 or 01:050:339.

01:512:360 ***Latino History (3)***
History of people of Latin American and Hispanic Caribbean descent in the United States over the last two centuries. Experiences of exile, labor migrants, refugees, and colonial subjects. Formation of communities, political and labor struggles, and racial/ethnic identities.
Special Notation: Not open to first-year students. Credit not given for both this course and 01:595:369.

01:512:361 ***History of the South (3)***
Development of southern society from the settlements of Virginia to the present. Aspects of life in the South that distinguish this region from others in the United States.

01:512:362 ***Black Family in American History (3)***
Defines and interprets the black family at different points in American history. Also explores such contemporary topics as the rise of the "underclass" black family, and the tendency toward "singleness" in black America.

01:512:363 ***African-American Women's History (3)***
Examines the diversity of African-American women's lives and the development of women, work, and culture from the colonial era through the late 20th century.

01:512:364 ***History of Blacks in Urban America (3)***
Explores aspects of black urban life from the early years of the nation to the present. Migration. Examination of contemporary black urban America.

01:512:365 ***African-American History Since 1945 (3)***
Social history, politics, and culture of African-American life in the United States from 1945 to the present.

01:512:366 ***History of Race and Sex in America (3)***
Examines how race and gender have independently and jointly determined life chances throughout American history.
Credit not given for both this course and 01:014:366 and 01:988:329.

01:512:368 ***History of Civil Rights, 1900-1980 (3)***
Politico-economic, demographic, cultural, and legal forces generating and shaping the struggle for racial justice in the United States from the beginning of the 20th century.

01:512:370 ***History of American Thought to 1850 (3)***
Principal ideas about humanity, God, nature, and society in American history from Puritan America to 1850.

01:512:372 ***History of American Thought since 1850 (3)***
Principal ideas about humanity, God, nature, and society in American history from 1850 to present.

01:512:373 ***African Americans in a Revolutionary World, 1910-1940 (3)***
History of black migration to the urban South and North, Harlem Renaissance and the New Negro movement, the entrance of black people into industrial employment, the establishment of black urban communities, the development of black political activism and artistic production, pan-Africanism and the connection of black activists to global networks of activists and intellectuals in the Caribbean and Europe.

01:512:374 ***Cultural History of the United States: 20th Century (3)***
Nature of American culture by study of folk, popular, and elite cultural products, verbal and nonverbal, in a world of mass production and consumption.

01:512:375 ***Gay and Lesbian History in the United States (3)***
Introduction to gay and lesbian history in the United States; explores same-sex desire, queer identities, community formation, and social movements from the colonial period to present. Particular emphasis on queer history's place in the larger context of U.S. political, social, and cultural movements in history.

01:512:376 ***American Culture in the 1950s (3)***
Survey of major cultural and political developments of the 1950s. Growth of advertising, consumerism, television, popular music, the "Ike Age," and McCarthy; perceptions of race and sex.

01:512:377 ***The 1960s (3)***
Examines the political culture of the 1960s, centering on conflicts between the forces of order, consensus, and containment, and the social forces of protest, resistance, and liberation.

01:512:379 ***African-American History, 1877 to Present (3)***
African-American history from defeat of Reconstruction to present.

01:512:380 ***Women in American History I (3)***
Changing status of women from settlement to Reconstruction, including the study of work, family, religion, sexuality, organizations, and feminism.
Credit not given for both this course and 01:988:380.

01:512:381 ***Women in American History II (3)***
Changing status of women from Reconstruction to the present, including the study of work, family, religion, sexuality, organizations, and feminism.
Credit not given for both this course and 01:988:390.

01:512:383 ***Women's Rights in America, 1800-1930 (3)***
Explores women's rights movements in the United States from 1800-1930 in the context of larger developments in the Atlantic World. Movements studied include abolition of slavery, legal rights, labor organizing, peace, suffrage, and sex radicalism.

01:512:385 ***Women Behaving Badly (3)***
History of women behaving badly in the late 19th- and early 20th-century United States. Examines histories of women criminals as well as experiences of women who transgressed racial, gendered, and sexual boundaries. Analysis of crime and female sexual deviance as well as efforts to curtail and reform disorderly women. Emphasis on social constructions of morality, delinquency, and womanhood.

01:512:388 ***Religion, Law, and the American Constitution (3)***
A course that studies Religion in American Constitutional Law, focusing especially on Supreme Court cases related to religion from the 19th century to the present. Interpretation of the establishment and free exercise of religion clauses in the First Amendment has been and remains a vital issue for American democracy and civil rights. This course seeks to provide context and analytical tools for understanding religion's role in American law, and vice versa.

Credit not given for both this course and 01:840:381.

01:512:391,392 ***Historical Studies (3,3)***
Separate sections focusing on different topics at different times and in different areas. Specific titles available at time of registration.

01:512:395 ***The Electronic Century: Technology and Popular Culture Description (3)***
Shaping of American social and cultural life in the 20th century by electrical, electronic, communications, and computer technologies.

01:512:400 ***History of American Politics (3)***
Conduct of politics in the United States, including the origin and development of political parties, characteristic forms of political behavior, and relationship of parties to democratic government.

01:512:402 ***American Constitutional History to 1865 (3)***
Study of the origins of the American Constitutional system: American Revolution; Constitutional Convention of 1787; Bill of Rights; Marshall and Taney courts; slavery, racism, and the Civil War.

01:512:404 ***American Constitutional History from 1865 (3)***
Supreme Court's role in interpreting the Constitution from the Civil War and Reconstruction (and passage of the 14th Amendment) to the present. Regulation of the economy and the "right to work"; free speech in war and peace; the New Deal; the due process "revolution"; abortion; affirmative action; and freedom of and from religion.

01:512:432 ***History of Business in America (3)***
Historical view of the growth and change of business institutions in the United States from the colonial era to the present.

01:512:434 ***History of Labor Movement (3)***
Impact of industrialization on the workforce of the United States. Economic pressures, technological developments, and ethnic subcultures as related to the social history of the working class.

01:512:438 *Oral History Fieldwork (3)*
Problems, theories, and methods of conducting field interviews and transcribing, editing, and analyzing oral sources. Students document New Jersey families; ethnic communities; and labor, business, religious, and political groups.

English (SAS)

Student Responsibility to Keep Informed

Student Responsibility to Keep Informed

Before registering for the semester, students should consult the English department website. Students can also consult with advisers in the undergraduate office (Murray Hall, Room 102, 104, or 106, College Avenue campus). All English department information can be found online here.

English (SAS)

Learning Goals

Learning Goals

Students who major in English will demonstrate

1) knowledge of literatures in English: their historical, cultural, and formal dimensions and diversity;

2) strategies of textual interpretation, including an ability to use critical and theoretical terms, concepts, and methods;

3) the ability to write persuasively and precisely, in scholarly or creative forms; and

4) the ability to engage with the work of other critics and writers, using and citing such sources effectively.

English (SAS)

Major Requirements

Major Requirements

The major consists of a minimum of 36 credits in English above the 100 level, including at least 18 credits at or above the 300 level. All majors must fulfill the following requirements:

1. Principles of Literary Study, 01:359:201, which should be taken early in the major.

2. Four courses in different historical periods, taken at the 300 or 400 level: one each in four of the following five categories:

   a. Medieval

   b. Renaissance

   c. Restoration/18th century

   d. Nineteenth century

   e. Twentieth century and contemporary

3. One course in African-American Literature, taken at the 300 or 400 level.

4. One course in Literature's of the Global South

5. One course in literary theory

6. One 400-level seminar

A course taken to fulfill a period requirement may also be used to fulfill the African-American, Ethnic American, or Global Anglophone literature or the seminar requirement, if it is so designated on the departmental webpage. Likewise, a seminar may be used to meet the literary theory or African-American, Ethnic American, or Global Anglophone literature requirement, if it is so designated. However, no course may be used to fulfill more than two requirements.

Courses that may count as credits toward the major and minor are listed under the subject codes 351 (English: Creative Writing), 354 (English: Film Studies), 355 (Writing Program only at the 300 level), 358 (English: Literature), and 359 (English: Theories and Methods).

A maximum of four English courses taken outside the Department of English at Rutgers University-New Brunswick may be applied toward the major. Students who participate in Study Abroad may apply a total of six courses from outside toward the major. Transfer students who wish to apply transfer courses toward the major must first obtain approval from the undergraduate director. Enrolled English majors who wish to take English courses outside Rutgers-New Brunswick must have prior approval from the undergraduate director. Students are urged to consult the English department for further information.

Grades of C or better must be earned in all courses used to fulfill the requirements of the major.

English (SAS)

Minor Requirements

Minor Requirements

The minor consists of 18 credits in English above the 100 level, including at least 12 credits at or above the 300 level. All minors are required to take at least one 300- or 400-level course designated as medieval, Renaissance, or Restoration/18th century (period a, b, or c, as indicated on the major requirements page). A maximum of 6 credits total in creative writing and in film may be counted toward the minor. A maximum of one 01:355:300-level Writing Program course may be counted toward the minor. Grades of C or better must be earned in all courses used to fulfill the requirement of the minor.

English (SAS)

Minor in Creative Writing

Minor in Creative Writing

The minor in creative writing gives students a rigorous background in the fundamentals of creative work by providing them with the opportunity to study with established poets, prose writers, and dramatists. At the same time, the minor also ensures that students pursue creative work within the larger context of academic study. The curriculum (21 credits) begins with a foundational course in creative writing, followed by a series of electives in a variety of genres and media, culminating in an advanced workshop. Concurrently with their course work in creative writing, students are also required to elect a total of two courses from the English department's offerings in literature (358), theory and methods (359), or film (354), thus further coordinating their creative pursuits with critical study.

Creative Writing Minor Program Learning Goals

Students who minor in creative writing will demonstrate

1) knowledge of the traditions and conventions of literary expression in a variety of genres and media;

2) the ability to engage deeply with the process of composition, and with the work of other writers and critics; and

3) the ability to write persuasively and precisely in creative and scholarly forms.

If English majors would like to minor in creative writing, NO creative writing minor courses can count toward the English major. There can, however, be overlap for literature classes.

In addition, if a student double-minors in creative writing and English, NO creative writing minor courses can count toward the English minor. There can, however, be overlap for literature classes.

Students also cannot complete the creative writing minor and the creative writing certificate at the same time. They must choose one or the other.

Minor Requirements

The minor consists of 21 course credits (seven courses). Grades of C or better must be earned in all courses used to fulfill the minor requirements:

One (1) required introductory course:

351:211 or 351:212 Introduction to Creative Writing

Any three (3) of the following courses:

351:209 Introduction to Multimedia Composition

351:220 Experimental Filmmaking

351:303 Screenwriting for Film

351:304 Screenwriting for Television

351:305 Creative Nonfiction

351:306 Form and Technique in Poetry

351:307 Form and Technique in Fiction

351:308 Form and Technique in Playwriting

351:309 Digital Composition (Digital Storytelling)

351:314 Documentary Filmmaking for Writers

Any one (1) of the following courses:

351:405 Advanced Workshop: Multi-Genre

351:406 Advanced Workshop: Poetry

351:407 Advanced Workshop: Fiction

Any two (2) courses in literature (358) and/or theory (359)

English (SAS)

Minor in Business and Technical Writing

Minor in Business and Technical Writing

The Writing Program offers a minor in business and technical writing to all interested undergraduates in the School of Arts and Sciences.

The primary goal of the business and technical writing minor is to enhance students' writing proficiency in order to increase their eligibility for employment in business and technical professions that require advanced writing competency. The minor provides students with writing training, research practice, computer knowledge, and an internship experience designed to give students professional writing experience. Students must complete a minimum of 18 credits for the minor and any one course cannot be used in more than one skill area. Twelve out of the 18 required credits must be completed from Writing Program (01:355) courses.

Requirements

The minor requires six courses (for a total of 18 credits) in four key skill areas. Students must achieve a grade of C or better in each of these courses in order to qualify for the minor.

1. Writing Training (6 credits) Since writing competence is at the heart of the minor, students must complete two writing courses intended to improve writing, editing, collaboration, and general communication skills. Electives may be chosen from among the following writing courses:

01:351:209 Introduction to Multimedia (3)

01:355:202 Technical Writing Essentials (3)

01:355:203 Business Writing Essentials (3)

01:355:315 Grant Writing (3)

01:355:342 Science Writing (3)

01:355:352 Writing as a Naturalist (3)

01:355:355 Writing in the Professions (3)

01:355:365 Technical Editing (3)

04:192:315 Professional Writing and Communication (3)

04:192:380 Public Speaking (3)

11:374:325 Environmental Communication

11:374:435 Advanced Communication in the Sciences

2. Research Writing (3 credits) In the information and technology economy, the ability to conduct research and use information to develop viable plans of action is essential to success and advancement. Students therefore must complete a research writing course in business or technical writing. These courses will also fulfill most students' second-level writing requirements (consult with your school's academic advising office for specific requirements in your program). Research writing courses include:

01:355:302 Scientific and Technical Writing (3)

01:355:303 Writing for Business and the Professions (3)

01:355:312 Writing for Biology (3)

01:355:315 Writing Grant Proposals (3)

01:355:322 Writing for Engineers (3)

3. Digital Image Fundamentals (6 credits) Basic computer knowledge and the ability to learn new programs quickly are essential to success in business and technical writing environments. Students in the program will be introduced to general and advanced writing software in many classes and they will be required to pass an introductory course in computer science.

a) Though several courses will expect students to learn relatively simple programs (such as Microsoft Word and PowerPoint), students are also required to take one of the following courses, which teach advanced writing software, covered in our upper-level workshop courses. These include:

01:351:312 Digital Literary Studies (3)

01:355:375 Collaborative Writing Practices (3)

01:355:402 Advanced Writing Workshop (3)

01:355:410 Composing Graphic Narratives (3)

01:355:415 Information Design (3)

01:355:425 Web Authoring (3)

11:374:240 Visualizing Information: Storytelling with Data (3)

b) Students will also need to pass one of the following introductory computer science courses:

01:198:107 Computing for Math and the Sciences (3)

01:198:110 Principles of Computer Science (3)

01:198:111 Introduction to Computer Science (4)

01:198:170 Computer Applications for Business (3)

04:189:103 Information Technology and Informatics (3)

04:547:220 Retrieving and Evaluating Electronic Information (3)

14:440:127 Introduction to Computers for Engineers (3)

4. Internship Experience (3 credits) Hands-on training in work environments offers an invaluable, practical component to the minor, providing students with useful experience while encouraging professional attitudes toward work. As part of the minor program, students must complete an independent internship in one of the following options:

01:355:395/396 Internship (3,3)

01:355:397/398 Writing Internship for Business and Technical Writing Minor (3, 3)

Please see the internships course webpage for more information.

5. In addition, a minimum of 12 out of the 18 required credits are to be selected from Writing Program (01:355) courses.

The Writing Program also offers Professional Writing and Technical Writing Certificates. Please see Certificates for more information. Please speak with your academic advising office regarding declaration of majors and minors. Students graduating with the minor may want to consider pursuing a Master of Business and Science degree in the field of User Experience Design-UDX.

There is also a BS/MS (4+!) for Rutgers undergraduate students.

English (SAS)

Departmental Honors Program 350

Departmental Honors Program 350

Departmental Honors Program

English Honors provides an opportunity for students to pursue an independent project under the guidance of Department faculty. Students choose one of two options: a critical/research thesis or a creative writing thesis. The program begins in the second half of spring semester junior year and runs through senior year.

Candidates for honors in English must have a cumulative grade point average of 3.0 or better and an average of 3.6 or better in English at the end of junior year. They will also have completed 359:201 and at least one 400-level course in either the 358 or 359 subject codes for a critical/research thesis or 351 subject codes for a creative writing thesis. (Note that students, especially transfer students, with strong records of achievement who have not fulfilled these requirements will be reviewed on a case-by-case basis.)

Interested students should register for the Junior Honors Seminar (359:496), a 1.5-credit mini course running in the second half of spring semester. Students who are studying abroad or have other obligations that take them off campus in the spring of junior year will be able to join the course remotely. Upon completion of the course, students continuing with departmental honors will have secured the approval of a faculty advisor for their thesis proposal.

Completion of English Honors entails a total of 9 credits of coursework: the Junior Honors Seminar (359:496, 1.5 credits); the Senior Honors Seminar (359:497, 1.5 credits); and two semesters of independent study, the Senior Honors Tutorials (359:498 and 359:499, 3 credits each). The completed thesis will be evaluated by the advisor and a second reader. A grade of B+ or better will be required in order to earn the honors designation.

Students wishing to complete an English honors project in conjunction with the Honors College, SAS Honors, or other College Honors Programs will also be required to secure the approval of the appropriate College Dean by the end of the spring semester of the junior year.

Consult the departmental website for more detailed information: https://english.rutgers.edu/.

English (SAS)

Certificate Programs

Certificate Programs

Certificate in Drama and Performance Studies (16 credits)

The certificate in drama and performance studies offers the opportunity for students pursuing the English major or minor to develop a specialized concentration in the study of the performing arts. The certificate program curriculum (a total of 16 credits) requires a foundational course in the field (Introduction to Dramatic Literature or Introduction to Performance Theory), four approved electives, and a 1-credit capstone in which students produce a portfolio. Students who fulfill all requirements with a minimum grade-point average (GPA) of 3.0 in these courses will be awarded the certificate. For more information, contact the faculty director, Professor Thomas Fulton tfulton@english.rutgers.edu

The certificate consists of 16 course credits, with a minimum 3.0 GPA in the following courses:

1. One (1) required introductory course:

358:240 Introduction to Dramatic Literature

359:220 Introduction to Performance Theory

2. Any four (4) of the following courses:*

351:303 Screenwriting for Film

351:304 Screenwriting for Television

351:308 Creative Writing Playwriting

351:408 Advanced Creative Writing Workshop: Playwriting

358:202 Shakespeare

358:240 Introduction to Dramatic Literature*

358:310 Medieval Drama

358:313 Drama in the Age of Shakespeare

358:314 Shakespeare: The Elizabethan Plays

358:315 Shakespeare: The Jacobean Plays

358:320 Shakespeare in England

358:325 Restoration and 19th-Centurey Theater and Drama

358:335 19th-Century Theater and Drama

358:347 American Theater and Drama

358:356 Early 20th-Century Theater and Drama

358:357 Later 20th-Century Theater and Drama

358:372 Black Theater and Drama

358:378 Black Music and Literature

358:394 Theater and Drama by Women

358:426 Seminar: Shakespeare

359:220 Introduction to Performance Theory

*At the discretion of the faculty director of the certificate, new and other courses in the department not listed above, as well as courses in other departments, might also count.

Other Certificate Programs (16-18 credits)

The primary goal of the certificate programs is to enhance the writing proficiency of business and science students in order to increase their eligibility for employment in professions that require advanced writing competency. Any student working toward the business and technical writing minor is eligible to receive either the professional writing certificate or the technical writing certificate upon completion of all required courses with a grade of C or above.

These certificates are only available to students enrolled in the business and technical writing minor at Rutgers University.

Professional Writing Certificate (16-18 credits)

Any student may request this certificate upon completion of the minor. There is a significant need for college graduates who can research and communicate information at a high level of competence in business, industry, and government. The professional writing certificate is designed to give students a firm grounding in the skills of oral, written, and electronic communication and prepare them to enter professions that require extensive writing skills.

Technical Writing Certificate (18 credits)

This certificate is open to undergraduates with majors or minors in approved scientific or technical subject areas (such as biology, mathematics, engineering, or computer science). The need for technical writers capable of communicating scientific or technically sophisticated information to various audiences is well established, and technical writing skills are in demand in a wide range of fields. This certificate program is designed to give students with a science or technical background a strong foundation in the skills of oral, written, and electronic communication.

Certificate Requirements

Both certificates require six courses in four key skill areas:

1. Writing Training (6 credits)

Since writing competence is at the heart of the certificate program, students must complete two writing courses intended to improve writing, editing, collaboration, and general communication skills. Electives may be chosen from among the following writing courses:

01:355:202 Technical Writing Essentials (3)

01:355:203 Business Writing Essentials (3)

01:355:315 Grant Writing (3)

01:355:342 Science Writing (3)

01:355:352 Writing as a Naturalist (3)

01:355:355 Writing in the Professions (3)

01:355:365 Technical Editing (3)

01:355:375 Collaborative Writing Practices (3)

04:192:315 Professional Writing and Communication (3)

04:192:380 Public Speaking (3)

04:567:205 Digital News Reporting and Writing (3)

2. Research Practice (3 credits)

In the information and technology economy, the ability to conduct research and use information to develop viable plans of action is essential to success and advancement. Students therefore must complete a research writing course in business or technical writing. These courses will also fulfill most students' second level writing requirements (consult with your school's academic advising office for specific requirements in your program). Research writing courses include:

01:355:302 Scientific and Technical Writing (3)

01:355:303 Writing for Business and the Professions (3)

01:355:315 Grant Writing (3)

01:355:322 Writing for Engineers (3)

3. Computer Knowledge (6 credits)

Basic computer knowledge and the ability to learn new programs quickly are essential to success in business and technical writing environments. Students in our program will be introduced to general and advanced writing software in many classes, and they will be required to pass an introductory course in computer science.

a) Though several of our courses will expect students to learn relatively simple programs (such as Microsoft Word and PowerPoint), students are also required to take one of the following courses, which teach advanced writing software, covered in our upper-level workshop courses. These include:

01:355:402 Advanced Writing Workshop (3)

01:355:415 Information Design (3)

01:355:425 Web Authoring (3)

b) Students will also need to pass one of the following introductory computer science courses:

01:198:107 Computing for Math and the Sciences (3)

01:198:110 Introduction to Computers and Their Application (3)

01:198:111 Introduction to Computer Science (4)

01:198:170 Computer Applications for Business (3)

04:198:103 Information Technology and Informatics (3)

04:547:220 Retrieving and Evaluating Electronic Information (3)

4. Internship Experience (1 or 3 credits for a professional writing certificate; 3 credits for a technical writing certificate)

Hands-on training in the work environment offers an invaluable, practical component to the certificate program, providing students with useful experience while encouraging professional attitudes toward work. In our program, students will have the option of fulfilling an independent internship or taking credits through the CESEP Program:

01:355:395,396,397,398 Internship (3,3,3,3)

Please see the internships website for more information.

For information on the Writing Program's business and technical writing minor through the School of Arts and Sciences, please see the Minor in Business and Technical Writing page in this catalog. For more information on the certificate programs or the minor, please see http://wp.rutgers.edu.

Students completing the certificate should fill out the Application for Professional and Technical Writing Certificates form. This form should be completed and submitted to donald.dow@rutgers.eduDonaldDow@rutgers.edu. All information will be verified and the certificate will be processed.

01:358:206 ***Introduction to Literary Studies (1.5)***
Fundamentals of literary interpretation, focusing on a particular period, genre, or author.

01:358:207 ***Writing After the End of the World (3)***
An introduction to stories about the end of the world.

01:358:210 ***British Literature from the Middle Ages to 1800 (3)***
Survey of poetry, prose, and drama from the Middle Ages through the 18th century.

01:358:211 ***British Literature from 1800 to the Present (3)***
Survey of poetry, prose, and drama from the romantic period to the present.

01:358:212 ***Introduction to American Literature (3)***
Survey of poetry, prose, and drama from the colonial period to the Civil War.

01:358:213 ***Major Topics and Authors in American Literature (3)***
Survey of poetry, prose, and drama from the Civil War to the present.

01:358:214 ***Introduction to 20th-Century Literature (3)***
Introduction to major works of 20th-century literature in English.

01:358:215 ***Introduction to 21st-Century Literatures (3)***
Literary works and emergent forms of the current century.

01:358:216 ***Introduction to World Literatures in English (3)***
Survey of English language literatures including Asian, African, and Caribbean in a global context.
Credit not given for both this course and 01:195:216.

01:358:217 ***Black Literature from the Colonial Period to 1930 (3)***
Survey of poetry, prose, and drama from the 18th century through the Harlem Renaissance.

01:358:218 ***Black Literature from 1930 to the Present (3)***
Survey of poetry, prose, and drama from 1930 to the present.

01:358:222 ***Introduction to South Asian Literature (3)***
Overview of South Asian literatures of the 19th, 20th, and 21st centuries, including literatures representing historical events such as the independence struggle, partition, women's rights, religious conflicts, and caste politics.

01:358:230 ***Major Topics and Authors in British Literature (3)***
Introduces major topics and authors in British literature.

01:358:240 ***Introduction to Dramatic Literature (3)***
Major plays from several periods, chiefly British and American, with some attention to form, theory, and the development of the genre.

01:358:241 ***Introduction to Poetry (3)***
Major poems from several periods, chiefly British and American, with some attention to form, theory, and the development of the genre.

01:358:242 ***Introduction to the Novel (3)***
Major novels from several periods, chiefly British and American, with some attention to form, theory, and the development of the genre.

01:358:243 ***Introduction to the Short Story (3)***
Major short stories from several periods, chiefly British and American, with some attention to form, theory, and the development of the genre.

01:358:244 ***Introduction to Myth (3)***
Myths of various cultures; their structures and functions in social and especially literary contexts.

01:358:245 ***Introduction to Folklore (3)***
Major genres of folklore, including folktale, folk song, and legend, with attention to the methods of collecting and analyzing these materials.
Credit not given for both this course and 01:195:245.

01:358:246 ***Introduction to the Gothic (3)***
Genre of the Gothic from its beginnings in the 18th century to the present.

01:358:247 ***Introduction to Comic Literature (3)***
Theory and practice of comedy organized around the topics of satire, farce, nonsense, parody, jokes, and the humor of daily life.

01:358:248 ***Introduction to Tragic Literature (3)***
Literature and theory of tragedy from the Greeks through Shakespeare to the 20th century; chiefly plays, supplemented by some poetry and fiction.

01:358:249 ***Introduction to Satiric Literature (3)***
Satire's variety of postures and games, across an array of such forms as novel, epigram, film, and cartoon, ranging from the Renaissance to the present.

01:358:250 ***Introduction to Autobiography (3)***
Historical and formal development of autobiography in English, with special attention to theories of identity and narrative.

01:358:251 ***Introduction to Travel Literature (3)***
Readings of works, mainly in English, concerning geographical exploration and speculation; relation to literary and nonliterary genres; and attention to imperial dimensions.

01:358:252 ***Introduction to Children's Literature (3)***
Introduction to children's literature. Fairy tales, classics, and contemporary examples of literature for children and young adults.

01:358:253 ***Introduction to Crime Fiction (3)***
Introduction to crime fiction. Works by such authors as Chandler, Highsmith, Himes, and Mankell.

01:358:254 ***Introduction to Science Fiction (3)***
Introduction to science fiction. Works by such authors as Butler, Dick, Delany, and Gibson.

01:358:255 ***Introduction to Modern Literary Fantasy (3)***
Literary conventions and distinctions between the surreal and the unreal, nonsense and the sublime in different forms of modern literary fantasy written in English.

01:358:256 ***Introduction to the Graphic Novel (3)***
The history, techniques, structure, verbal-visual form, and thematic range of graphic narratives.

01:358:260 ***Introduction to Multiethnic Literatures of the United States (3)***
Survey of multiethnic literatures of the United States through a comparative framework. Fiction, poetry, autobiography, graphic narrative, film, and personal essays by and about African Americans, Asian Americans, Native Americans, and Latinos/as.

01:358:261 ***Introduction to the Study of Women Writers (3)***
Range of literature in English by women writers, analyzed in relation to the impact of authorial gender.

01:358:262 ***Introduction to Literature and the Environment (3)***
General introduction to environmental writing, focusing on nonfiction, novels, and poems from the mid-19th century to the present day.

01:358:263 ***Civilization and Its Discontents (3)***
Introduction to texts of fundamental importance for the imagination of the individual in society, focusing on the forms through which a culture understands itself including dialogue, tragedy, parable, and public address.

01:358:275 ***The Cultural History of Now (3)***
Analysis of an issue of pressing global concern from a multidisciplinary perspective, but especially from that of literary and cultural history. Topics vary according to individual instructors; consult departmental information.

01:358:301 ***History of the English Language (3)***
Growth and structure of the English language from its origins to the present with some attention to methods of linguistic description.
Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:358:302 ***Classical Backgrounds of Literature in English (3)***
Influence on literature in English of classical Greek and Roman epic, tragedy, comedy, and other literary forms.
Credit not given for both this course and 01:195:346. Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:358:303 ***Literature of Medieval Courts (3)***
Concepts of nobility, rule, courtship, and faith in works such as *Beowulf*, *Sir Gawain and the Green Knight*, *Pearl*, and Malory's *Morte d'Arthur*.
Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:358:304 ***Medieval Literature of Dissent (3)***
Traditions of dissent in later medieval England. Texts may include writings by Wulfstan and Ælfric, *Chronicle* poems, *Piers Plowman*, Lollard writings, macro-plays, the Wakefield cycle, and *The Book of Margery Kempe*.
Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:358:305 ***Medieval Romance (3)***
Medieval romances and their origins in the British Isles and on the continent, with emphasis on English versions of Arthurian material, especially *Sir Gawain and the Green Knight* and Malory's *Morte d'Arthur.*
Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:358:306 ***Chaucer (3)***
Selected works of Chaucer, with an emphasis on *The Canterbury Tales.*
Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:358:307 ***Medieval and Early Modern Women Writers (3)***
Selections from significant women writers of the medieval and early modern period, including Julian of Norwich, Margery Kempe, Aemelia Lanyer, Elizabeth Cary, Lady Mary Wroth, Katherine Philips, and others.
Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:358:308 ***Cultures of the Middle Ages (3)***
Detailed introduction to a particular aspect of the rich cultural diversity of the European Middle Ages. Topics vary.
Credit not given for both this course and 01:195:388 or 01:667:388. Prerequisite: 01:355:101 or equivalent.

01:358:309 ***Issues and Problems in Medieval Literature and Culture (3)***
Studies in particular themes, questions, forms, and historical issues in medieval literature and culture. Sections designed by individual instructors; students should consult departmental announcement.
Prerequisite: 01:355:101 or equivalent.

01:358:310 ***Medieval Drama (3)***
Surveys works of medieval drama, investigating relationships between history and religion, world and stage, work and play, and actors and audience.

01:358:311 ***Renaissance Literature: The 16th Century (3)***
Poetry, plays, and prose from the Henrician to the Elizabethan periods.
Prerequisite: 01:355:101 or equivalent.

01:358:312 ***Renaissance Literature: The 17th Century (3)***
Poetry, plays, and prose from the Jacobean to Restoration periods.
Prerequisite: 01:355:101 or equivalent.

01:358:313 ***Drama in the Age of Shakespeare (3)***
Early modern drama, with emphasis on Marlowe, Jonson, Beaumont, Fletcher, Webster, and others.
Prerequisite: 01:355:101 or equivalent.

01:358:314 ***Shakespeare: The Elizabethan Plays (3)***
Selected comedies, tragedies, and English history plays written between the beginning of Shakespeare's career and the death of Elizabeth I in 1603.
Prerequisite: 01:355:101 or equivalent.

01:358:315 ***Shakespeare: The Jacobean Plays (3)***
Selected comedies, tragedies, and tragicomedies written after the succession of James I in 1603.
Prerequisite: 01:355:101 or equivalent.

01:358:316 ***Milton (3)***
Paradise Lost, *Paradise Regained*, *Samson Agonistes*, the shorter poems, and selected prose.
Prerequisite: 01:355:101 or equivalent.

01:358:317 ***Major Renaissance Writers (3)***
Selected writings of Milton studied in relation to other 16th- or 17th-century writers, such as Spenser, Shakespeare, Donne, Marvell, Cavendish, or Dryden.
Prerequisite: 01:355:101 or equivalent.

01:358:318 ***Sixteenth-Century Poetry (3)***
Forms, styles, and development of poetry from Skelton to Spenser.
Prerequisite: 01:355:101 or equivalent.

01:358:319 ***Seventeenth-Century Poetry (3)***
Forms, styles, and development of poetry from Jonson and Donne to Milton and Marvell.
Prerequisite: 01:355:101 or equivalent.

01:358:320 ***Issues and Problems in Renaissance Literature and Culture (3)***
Studies in particular themes, questions, forms, and historical issues in Renaissance literature and culture. Sections designed by individual instructors; students should consult departmental announcement.
Prerequisite: 01:355:101 or equivalent.

01:358:321 ***Renaissance Women Writers (3)***
Selections from significant women writers of the Renaissance including Mary Sidney, Emelia Lanyer, Mary Wroth, Anne Bradstreet, Margaret Cavendish, and Aphra Behn.

01:358:322 ***Restoration and Early 18th-Century Literature (3)***
Poetry, prose, and drama by writers such as Dryden, Rochester, Behn, Pope, Haywood, Swift, and their contemporaries.
Prerequisite: 01:355:101 or equivalent.

01:358:323 ***Later 18th-Century Literature (3)***
Poetry, prose, and drama by writers such as Johnson, Sterne, Burney, Cowper, Sheridan, Equiano, Wollstonecraft and their contemporaries.
Prerequisite: 01:355:101 or equivalent.

01:358:324 ***Restoration and 18th-Century Poetry (3)***
Poems by authors such as Philips, Dryden, Behn, Swift, Pope, Gray, Cowper, and Wheatley.
Prerequisite: 01:355:101 or equivalent.

01:358:325 ***Restoration and 18th-Century Theater and Drama (3)***
Comedies and tragedies from the British modern age, by Congreve, Behn, Wycherly, Etheridge, Centlivre, Gay, Lillo, Sheridan, and others.
Prerequisite: 01:355:101 or equivalent.

01:358:326 ***Eighteenth-Century Novel (3)***
The early novel to Jane Austen, including authors such as Behn, Defoe, Haywood, Fielding, Richardson, Lennox, Sterne, and Burney.
Prerequisite: 01:355:101 or equivalent.

01:358:327 ***Restoration and 18th Century Women Writiers (3)***
Writing by women between the Restoration and the Romantic period, including authors such as Behn, Haywood, Montagu, Burney, Wheatley, and Austen.
Prerequisite: 01:355:101 or equivalent.

01:358:328 ***Issues and Problems in 18th-Century Literature and Culture (3)***
Studies in particular themes, questions, forms, and historical issues in Restoration and 18th-century literature and culture. Sections designed by individual instructors; students should consult departmental announcement.
Prerequisite: 01:355:101 or equivalent.

01:358:330 ***Early Romantic Literature (3)***
Works of poetry and prose by Austen, Blake, Coleridge, Wordsworth, and their contemporaries.
Prerequisite: 01:355:101 or equivalent.

01:358:331 ***Later Romantic Literature (3)***
Works of poetry and prose by Keats, P.B. Shelley, M. Shelley, Byron, Hemans, De Quincey, and their contemporaries.
Prerequisite: 01:355:101 or equivalent.

01:358:332 ***Victorian Literature (3)***
Poetry and prose from the 1830s to 1900, by Barrett Browning, Tennyson, Browning, Carlyle, Arnold, Christina Rossetti, the Brontës, Dickens, George Eliot, and Hardy.
Prerequisite: 01:355:101 or equivalent.

01:358:333 ***Late Victorian and Edwardian Literature (3)***
Poetry and prose of the transition to modernism by such authors as Pater, Wilde, the Decadents, the New Women novelists, Olive Shriner, Yeats, Hardy, Lawrence, and Woolf.
Prerequisite: 01:355:101 or equivalent.

01:358:334 ***Victorian Poetry (3)***
Major poetry of Tennyson, Barrett Browning, Browning, Arnold, the Pre-Raphaelites, Christina Rossetti, Hopkins, Yeats, and others.
Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:358:335 ***Nineteenth-Century Theater and Drama (3)***
Drama from 1800 to the 1880s in England and America. Melodrama, the development of social realism, and the rise of modern drama. Plays by Holcroft, Jerrold, Boucicault, Taylor, Lewis, and others.
Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:358:336 ***Nineteenth-Century British Fiction (3)***
Development of the novel into the major popular literary genre in England. Writers include Scott, Dickens, the Brontës, Thackeray, Gaskell, Eliot, Hardy, and others.
Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:358:337 ***Nineteenth-Century Women Writers (3)***
Appearance of women writers as major public voices in British literature. Writers include Wollstonecraft, Austen, Mary Shelley, the Brontës, Gaskell, George Eliot, and Christina Rossetti.
Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:358:338 ***Issues and Problems in 19th-Century Literature and Culture (3)***
Studies in particular themes, questions, forms, and historical issues in 19th-century literature and culture. Sections designed by individual instructors; students should consult departmental announcement.
Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:358:340 ***Literature and Culture of the Colonial Americas (3)***
English writing of the New World, from exploration through colonization, on both sides of the Atlantic. Puritanism, the Enlightenment, empire, and the development of nationalism.
Prerequisite: 01:355:101 or equivalent.

01:358:341 ***Antebellum American Literature (3)***
American writing from Romanticism to the Civil War. Works by Equiano, Irving, Apess, Cooper, Sedgwick, Poe, Emerson, Fuller, Douglass, Hawthorne, Melville, Stowe, Thoreau, Whitman, Wilson, Jacobs, and others.
Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:358:342 ***Nineteenth-Century American Poetry (3)***
Primary focus on Whitman and Dickinson, with additional readings in Wheatley, Bryant, Sigourney, Longfellow, Emerson, Fuller, Poe, Whittier, Horton, Melville, Harper, Dunbar
Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:358:343 ***Nineteenth-Century American Fiction (3)***
Novels, stories, and sketches by Irving, Cooper, Poe, Fern, Stowe, Hawthorne, Melville, Alcott, Twain, James, Wharton, Chesnutt, and others.
Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:358:344 ***American Realism and Naturalism (3)***
American writing from the Civil War to modernism. Works by Dickinson, Alcott, Twain, James, Howells, Jewett, Chopin, Sui Sin Far, Zitkala-Sa, Crane, Wharton, Dreiser, Du Bois, Johnson, Cather.
Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:358:345 ***Early 20th-Century American Literature (3)***
Writing by American authors from 1900 to 1945.
Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:358:346 ***Later 20th-Century American Literature (3)***
Writing by American authors from 1945 to the end of the century.
Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:358:347 ***American Theater and Drama (3)***
American theatrical traditions from the 18th century to the present, with emphasis on such 20th-century playwrights as O'Neill, Hellman, Williams, Miller, Albee, Hansberry, Wilson, Mamet, and Baraka.
Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:358:348 ***American Women Writers (3)***
Writing by American women including Bradstreet, Wheatley, Sedgwick, Wilson, Stowe, Jacobs, Child, Dickinson, Stoddard, Harper, Hopkins, Chopin, Wharton, Cather, Hurston, O'Connor, Le Guin, Angelou and Morrison
Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:358:349 ***American Autobiography (3)***
Changing representations of self in narrative form. Readings range from conversion, captivity, and slave narratives, to modern autobiographies and memoirs.
Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:358:351 ***Literatures of the Americas (3)***
Literatures of the Western Hemisphere from the 19th century to the present.
Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:358:352 ***Early 20th-Century Literature (3)***
Writing from 1900 to 1945, including one or more of the following: American, British, and other literatures in English.
Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:358:353 *Later 20th-Century Literature (3)*
Writing from 1945 to the end of the century, including one or more of the following: American, British, and other literatures in English.
Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:358:354 *Early 20th-Century Poetry (3)*
Poetry from 1900 to 1945, including one or more of the following: American, British, and other literatures in English.
Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:358:355 *Later 20th-Century Poetry (3)*
Poetry from 1945 to the end of the century, including one or more of the following: American, British, and other literatures in English.
Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:358:356 *Early 20th-Century Theater and Drama (3)*
Drama from the 1880s to the 1920s in relation to modernism and contemporary social movements. Plays by Ibsen, Strindberg, Chekhov, Wilde, Jarry, Glaspell, and others.
Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:358:357 *Later 20th-Century Theater and Drama (3)*
Expressionism through the Absurd (1920s through 1960s), in artistic and social contexts. Plays by Pirandello, O'Neill, Brecht, Genet, Beckett, Pinter, Williams, Hansberry, and others.
Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:358:358 *Early 20th-Century Fiction (3)*
Fiction from 1900 to 1945, including one or more of the following: American, British, and other literatures in English.
Prerequisite: 01:355:101 or equivalent.

01:358:360 *Later 20th-Century Fiction (3)*
Fiction from 1945 to the end of the century, including one or more of the following: American, British, and other literatures in English.
Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:358:361 *Twentieth-Century Literature in a Global Context (3)*
Twentieth-century writing in English other than British and American.
Credit not given for both this course and 01:195:324. Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:358:362 *Twentieth-Century Women Writers (3)*
Twentieth-century writing by women, including one or more of the following: American, British, and other literatures in English.
Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:358:363 *Issues and Problems in 20th-Century Literature and Culture (3)*
Studies in particular themes, questions, forms, and historical issues in 20th-century literature and culture. Sections designed by individual instructors; students should consult departmental announcement.
Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:358:365 ***Twenty-First-Century Literature (3)***
Writing from the last 20 years, including one or more of the following: American, British, and other literatures in English.
Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:358:370 ***Black Narrative (3)***
Historical and stylistic range of prose forms; slave narratives, folklore, biography and autobiography, short fiction; social, literary, and cultural criticism; Douglass, Du Bois, Toomer, Hurston, and Walker.
Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:358:371 ***Black Poetry (3)***
History of black American poetry, including the influence of oral traditions; poems by such writers as Wheatley, Dunbar, Hughes, and Brooks.
Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:358:372 ***Black Theater and Drama (3)***
Work of modern black American playwrights, including Hansberry, Baraka, Baldwin, Bullins, Gordone, Fuller, and Shange.
Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:358:373 ***Black Novel (3)***
Thematic and structural development of the black novel as a voice for social and political change, including works by Wright, Ellison, Baldwin, Marshall, Walker, and Morrison.
Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:358:374 ***Black Autobiography (3)***
Examination of self-representation by major black autobiographers, including Frederick Douglass, Harriet Jacobs, Solomon Northup, Booker T. Washington, Maya Angelou, and Malcolm X.
Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:358:375 ***Nineteenth-Century Black Literature (3)***
Prominent African-American writers of fiction, poetry, autobiography, and essays of the 19th century, including Frederick Douglass, Harriet Wilson, Pauline Hopkins, Charles Chesnutt, and W.E.B. Du Bois.
Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:358:376 ***Harlem Renaissance (3)***
Black literature during the 1920s and 1930s in the context of African-American social and cultural history; essays, poems, and novels by such authors as Cullen, Hughes, Hurston, McKay, and Toomer.
Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:358:377 ***Black Writers and the 1960s (3)***
Innovations in black literature of the 1960s in light of the tumultuous social, cultural, and political movements of the decade.
Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:358:378 ***Black Music and Literature (3)***
Thematic and structural influences of black music on American poetry, fiction, and drama; writers may include Sterling Brown, Hughes, Baraka, Cortez, Bambara, Kerouac, Shepard, and August Wilson.
Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:358:379 ***Black Women Writers (3)***
Fiction and poetry by African-American women such as Brooks, Hurston, Marshall, Morrison, and Alice Walker; discussion of issues of literary influence and comparable traditions.
Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:358:380 ***Literature of the Black World (3)***
Comparative study of writing in English by African-American, Caribbean, and African authors, including Derek Walcott, V.S. Naipaul, Paule Marshall, and Chinua Achebe.
Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:358:381 ***Issues and Problems in Black Literature (3)***
Studies in particular themes, questions, forms, and historical issues in black literature and culture. Sections designed by individual instructors; students should consult departmental announcement.
Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:358:382 ***Southern African Literature (3)***
Study of selected literary works from the region of Southern African written or translated in English. Topics vary; consult departmental announcement.

Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:358:383 ***Readings in Colonial and Postcolonial Literature (3)***
Study of literature and criticism that explore facets of Western imperial expansion.
Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:358:384 ***Literatures of Migration, Immigration, and Diaspora (3)***
Writings that feature representations of place, community, and identity in relation to national and international movement and displacement.
Credit not given for both this course and 01:195:336. Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:358:385 ***Literatures of Africa in English (3)***
Study of selected literary works from Africa written in English. Topics vary; consult departmental announcement.
Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:358:386 ***Literatures of Asia in English (3)***
Study of selected literary works from Asia written in English. Topics vary; consult departmental announcement.
Prerequisite: 01:355:101 or 103 or 104 or equivalent

01:358:387 ***Ethnic Literature in the United States (3)***
Selected literary works by Asian-American, black, Chicano/Chicana, and Native American writers. Topics vary; consult departmental information.
Prerequisite: 01:355:101 or 103 or 104 or equivalent

01:358:388 ***Native American Literatures in English (3)***
Fiction, poetry, and autobiography by such writers as Apes, Momaday, Welch, Silko, and Erdrich. Attention to issues of Native American representation.
Credit not given for both this course and 01:050:376. Prerequisite: 01:355:101 or 103 or 104 or equivalent

01:358:389 ***Asian-American Literatures in English (3)***
Theme or genre-based study of selected Asian-American writing in English. Topics chosen by individual instructors; consult departmental announcement.
Prerequisite: 01:355:101 or 103 or 104 or equivalent. Credit not given for both this course and 01:050:377.

01:358:390 ***Chicano/Chicana Literature (3)***
Theme or genre-based study of selected Chicano/Chicana literature; attention to comparative contexts (Puerto Rican, Cuban, and Dominican).
Prerequisite: 01:355:101 or 103 or 104 or equivalent

01:358:391 ***Irish Writing in English (3)***
Works of Irish writers in English from 1800 to the present.
Prerequisite: 01:355:101 or 103 or 104 or equivalent

01:358:393 ***Independent Study (3)***
Individual work on a topic designed by the student in conference with an instructor who directs the project.
Prerequisite: Permission of department. Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:358:394 ***Theater and Drama by Women (3)***
Selected plays in English by women writers, with emphasis on the study of forms, conventions, and cultural contexts. Topics vary; consult departmental announcement.
Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:358:395 ***Fiction by Women (3)***
Selected works of fiction in English by women writers, with emphasis on the study of forms, conventions, and cultural contexts. Topics vary; consult departmental announcement.
Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:358:396 ***Poetry by Women (3)***
Selected poetry in English by women writers, with emphasis on the study of forms, conventions, and cultural contexts. Topics vary; consult departmental announcement.
Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:358:398 ***The English Bible (3)***
The English Bible, its literary variety, and the evolution of its text. Special attention will be given to problems of interpretation and translation and their Hebrew and Greek origins.
Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:358:411 ***Old English Language and Literature (3)***
Intensive study of the English language and an introduction to its literature.
Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:358:412 ***Seminar: Old English Language and Literature (3)***
Intensive study, in a discussion-oriented format, of Old English poems, such as *Beowulf*, and prose writings studied in their original language. Topics vary according to individual instructors; consult departmental information.
Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:358:420 ***Seminar: Chaucer (3)***
Intensive study of *The Canterbury Tales, Troilus and Criseyde*, and other selected works.
Prerequisites: 01:359:201 or 202; English major.

01:358:422 ***Seminar: Topics in Medieval Literature and Culture (3)***
Intensive study, in a discussion-oriented format, of a specifically defined area of medieval literature and culture. Topics vary according to individual instructors; consult departmental information.
Prerequisites: 01:359:201 or 202; English major.

01:358:424 ***Seminar: Spenser (3)***
The Faerie Queene, *The Shepherd's Calendar*, *Amoretti*, *Epithalamion*, and selected minor works.
Prerequisites: 01:359:201 or 202; English major.

01:358:426 ***Seminar: Shakespeare (3)***
Special studies in selected plays and poems. Consult departmental announcement.
Prerequisites: 01:359:201 or 202; English major.

01:358:428 ***Seminar: Milton (3)***
Special studies in Milton's poetry and prose.
Prerequisites: 01:359:201 or 202; English major.

01:358:434 ***Seminar: Topics in Renaissance Literature and Culture (3)***
Intensive study, in a discussion-oriented format, of a specifically defined area of Renaissance literature and culture. Topics vary according to individual instructors; consult departmental information.
Prerequisites: 01:359:201 or 202; English major.

01:358:435 ***Seminar: Topics in Restoration and 18th-Century Literature and Culture (3)***
Intensive study, in a discussion-oriented format, of a specifically defined area of 18th-century literature and culture. Topics vary according to individual instructors; consult departmental information.
Prerequisites: 01:359:201 or 202; English major.

01:358:436 ***Seminar: Topics in 19th-Century Literature and Culture (3)***
Intensive study, in a discussion-oriented format, of a specifically defined area of 19th-century literature and culture. Topics vary according to individual instructors; consult departmental information.
Prerequisites: 01:359:201 or 202; English major.

01:358:437 ***Seminar: Topics in 20th-Century Literature and Culture (3)***
Intensive study, in a discussion-oriented format, of a specifically defined area of 20th-century literature and culture. Topics vary according to individual instructors; consult departmental information.
Prerequisites: 01:359:201 or 202; English major.

01:358:438 ***Seminar: Topics in 21st-Century Literature (3)***
Focuses on topics and issues in 21st-century literature of all genres.
Prerequisites: 01:359:201 or 202; English major.

01:358:440 ***Seminar: Topics in Genre (3)***
Intensive study, in a discussion-oriented format, of a particular genre (e.g., pastoral, epic, comedy, and lyric) or relationship among genres. Topics vary; consult departmental information.
Credit not given for both this course and 01:195:440. Prerequisites: 01:359:201 or 202; English major.

01:358:441 ***Seminar: Topics in American Literature and Culture to 1800 (3)***
Intensive study, in a discussion-oriented format, of a specifically defined area of American literature and culture to 1800. Topics vary according to individual instructors; consult departmental information.
Prerequisites: 01:359:201 or 202; English major.

01:358:442 ***Seminar: Topics in 19th-Century American Literature and Culture (3)***
Intensive study, in a discussion-oriented format, of a specifically defined area of 19th-century American literature and culture. Topics vary according to individual instructors; consult departmental information.
Prerequisites: 01:359:201 or 202; English major.

01:358:445 ***Seminar: Topics in Black Literature and Culture (3)***
Intensive study, in a discussion-oriented format, of a specifically defined area of black literature and culture. Topics vary according to individual instructors; consult departmental information.
Prerequisites: 01:359:201 or 202; English major.

01:358:452 ***Seminar: Special Topics in American Literature (3)***
Special studies in particular ideas, themes, forms, and historical units in American literature. Sections designed by individual instructors; consult departmental announcement.
Prerequisites: 01:359:201 or 202; English major.

01:358:460 ***Seminar: Topics in Colonial and Postcolonial Literature (3)***
Intensive study, in a discussion-oriented format, of a specifically defined area of colonial and postcolonial literature. Topics vary; consult departmental information.
Prerequisites: 01:359:201 or 202; English major.

01:358:491 ***Seminar: Special Topics in Literature (3)***
Special studies in particular ideas, themes, forms, and historical units in literature. Sections designed by individual instructors; consult departmental announcement.
Prerequisites: 01:359:201 or 202; English major.

01:358:493 ***Independent Study (3)***
Individual work on a topic designed by the student in conference with an instructor who directs the project.
Prerequisites: Permission of department; 01:359:201 or 202; English major.

01:358:495 ***Independent Study (BA)***
Individual work on a topic designed by the student with an instructor who directs the project.
Prerequisites: 01:359:201 or 202; English major.

English Theories and Methods Courses (359)

English Theories and Methods Courses (359)

01:359:201 ***Principles of Literary Study (3,3)***
An introduction to principal methods and materials in contemporary literary studies. This course will include close attention to works from at least two genres and two historical periods to be selected by the instructor. The course will introduce students to the meaning and use of key terms in literary studies.
Required of all English majors.

01:359:205 ***Introduction to Research Methods (3)***
Workshop in advanced library skills and the use of secondary scholarship.
Open only to junior English majors in the departmental honors program.

01:359:207 ***Data and Culture (3)***
Introduction to understanding and using data in humanistic scholarship.

01:359:209 ***Introduction to Health, Medicine, and Literature (3)***
Examines how literature about disease, disability, or the body opens questions concerning language, metaphor, narrative traditions, and the shifting cultural meanings of health, medicine, and human experience.

01:359:210 ***Introduction to Literary Theory (3)***
Literary theory through the close reading of texts with common themes; representation of diverse historical periods and theoretical frameworks.

01:359:211 ***The Culture of Sport (3)***
Explores the cultural aspects of sport, focusing on basketball, soccer, and American football, using literature, film, journalism, televised events, and some secondary material.

01:359:220 ***Introduction to Performance Theory (3)***
Interdisciplinary course introduces students to key concepts of performance and performativity from a variety of critical perspectives, including those of literary studies, critical theory, philosophy, theatre history, and anthropology, among others.

01:359:310 ***History of Literary Theory I (3)***
Literary and rhetorical theory from antiquity to the Enlightenment.
Prerequisite: 01:355:101 or 103 or 104 or equivalent

01:359:311 ***History of Literary Theory II (3)***
Selected trends and texts of literary theory from Romanticism to the present.
Prerequisite: 01:355:101 or 103 or 104 or equivalent

01:359:312 ***Issues and Problems in Literary Theory (3)***
Close investigation of a specifically defined area of literary theory. Topics vary according to individual instructors; consult departmental information.
Prerequisite: 01:355:101 or 103 or 104 or equivalent

01:359:315 ***Theories of Genre (3)***
Introduction to the ways in which criticism has theorized literature according to genre, form, and kind.
Prerequisite: 01:355:101 or 103 or 104 or equivalent

01:359:316 ***Issues and Problems in Genre Theory (3)***
Formal and cultural issues within the development of a particular genre, or in the relation between genres, in literature in English.
Prerequisite: 01:355:101 or 103 or 104 or equivalent

01:359:320 ***Cultural Theory in Literary Studies (3)***
Approaches to defining what culture is and how to theorize culture in relation to the production and consumption of literary and nonliterary texts.
Prerequisite: 01:355:101 or 103 or 104 or equivalent

01:359:321 ***Popular Culture (3)***
Exploration of how popular forms like TV, movies, music video, rap, rock, comics, magazines, and advertising shape meaning and value in contemporary America.
Prerequisite: 01:355:101 or 103 or 104 or equivalent

01:359:322 ***Marxist Literary Theory (3)***
Marxist analysis of literature, culture, and society. Attention to dialectical philosophy, the problem of base and superstructure, and theories of ideology and fetishism.
Prerequisite: 01:355:101 or 103 or 104 or equivalent

01:359:325 ***Psychoanalytic Literary Theory (3)***
Impact of psychoanalysis upon theories of literature, language, and interpretation; Freud and beyond; attention to theories of subjectivity, trauma, affect, sexuality, textuality, and culture.
Prerequisite: 01:355:101 or 103 or 104 or equivalent

01:359:326 ***Literature and Psychology (3)***
Exploration of interrelationships of literature and psychology (from Freud to feminists and contemporary theorists); topics include subjectivity, affect, trauma, gender, intersubjectivity, and identity.
Prerequisite: 01:355:101 or 103 or 104 or equivalent

01:359:330 ***Theories of Gender and Sexuality (3)***
History and critique of gender and sexuality as discursive categories. May include nonliterary as well as literary texts and involve various theoretical perspectives.
Prerequisite: 01:355:101 or 103 or 104 or equivalent

01:359:331 ***Literature and Sexuality (3)***
Themes and assumptions of sexual literature and its basis in sexual fantasy, including gender issues. Reading in major works of sexual literature.
Prerequisite: 01:355:101 or 103 or 104 or equivalent

01:359:335 ***Feminist Theory in Literary Study (3)***
"Woman," "gender," and related concepts as discursive categories deployed in theoretical, literary, philosophical, and popular texts. Attention to historical issues and current debates.
Prerequisite: 01:355:101 or 103 or 104 or equivalent

01:359:336 ***Issues and Problems in Feminist Literary Studies (3)***
Themes, questions, forms, and historical issues in feminist literary studies. Sections designed by individual instructors; consult departmental announcement.
Prerequisite: 01:355:101 or 103 or 104 or equivalent

01:359:340 ***Deconstruction and Poststructuralist Theory (3)***
Poststructuralism and its origins in France in the late 1960s; attention to the theoretical writings of Derrida, Barthes, Kristeva, and de Man.
Prerequisite: 01:355:101 or 103 or 104 or equivalent

01:359:345 ***Colonial and Postcolonial Theory (3)***
Theories of colonial and postcolonial discourse; attention to issues of imperialism, primitivism, creolization, and globalization in fiction, film, and travel narratives.
Prerequisite: 01:355:101 or 103 or 104 or equivalent

01:359:347 ***Serial Storytelling (3)***
Investigation of serial narrative as a modern mode of storytelling, from serialized novels in 19th-century Britain and Russian through the multimedia serials of our digital age. Exploration of this narrative form's enduring power, in multiple media, to interweave fiction with the course of current events and the rhythms of everyday life, and to bring together international audiences shaped by cultural, social, and geographical differences.
Prerequisite: 01:355:101 or 103 or 104 or equivalent. Credit not given for 359:347 and either 01:195:345 or 01:860:345.

01:359:351 ***Literature and Medicine (3)***
Literature about medicine, exploring the meeting place of disease, medical treatment, and literary culture, along with shifting understandings of patient and healer, health and illness, and the reach and responsibility of medicine.
Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:359:352 ***Literary and Scientific Writings (3)***
Readings in English that explore the impact of science upon literary writing and the literary and discursive dimensions of selected scientific texts.
Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:359:360 ***Theories of Text and Image (3)***
Exploration of the field of media theory, especially as it has developed in dialogue with literary and cultural studies. Course materials and class projects will include works in multiple media.
Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:359:361 ***Literature and Visual Culture (3)***
Interactions of word and image on the page, on the stage, and onscreen. Examples may include graphic narratives, tableaux, public spectacles, photography, film, and digital culture, read alongside literary and theoretical texts.
Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:359:362 ***Digital Literary Studies (3)***
The relationship between literary practices and the technologies of recording, transmitting, data mining, and archiving. Topics: the history of the book, media shift, the history of reading, literature in relation to other media, hypertext, and digital literacies and analysis.
Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:359:365 ***Literature, Religion, and Theory (3)***
Relationships between theological and literary ways of reading texts, including both sacred and secular examples.
Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:359:366 ***Literary Approaches to Sacred Texts (3)***
Literary analysis of the formation and structure of the major texts of several world religions. Attention to style, genre, and cross-cultural interpretation.
Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:359:370 ***Literary Editing and Publishing (3)***
The place and purpose of literary journals within the publishing world; history and current state of the publishing industry, including mainstream book publishing, independent presses, and literary magazines.

Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:359:394 ***Independent Study (3)***
Individual work on a topic designed by the student in conference with an instructor who directs the project.
Prerequisites: Permission of department and 01:355:101 or equivalent.

01:359:395 ***Junior Honors Seminar (3)***
Focus on particular text, theme, or approach in order to develop reading and writing skills using critical and theoretical materials.
Open only to junior English majors in the departmental honors program.

01:359:410 ***Seminar: Topics in Literary Theory (3)***
Intensive study, in a discussion-oriented format, of a specifically defined area of literary theory. Topics vary according to individual instructors; consult departmental information.
Prerequisites: 01:359:201 or 202; English major.

01:359:425 ***Seminar: Topics in Literature and Psychology (3)***
Examines literary texts and the processes of reading them through the lens of psychological theory, including psychoanalytic and cognitive.
Prerequisites: 01:359:201 or 202; English major.

01:359:435 ***Seminar: Topics in Feminist Theory (3)***
Intensive study, in a discussion-oriented format, of a specifically defined area of feminist theory. Topics vary according to individual instructors; consult departmental information.
Prerequisites: 01:359:201 or 202; English major.

01:359:460 ***Seminar: Media Theory (3)***
Explores the field of media theory, especially as it has developed in dialogue with literary and cultural studies.
Prerequisites: 01:359:201 or 202; English major.

01:359:470 ***History and Theory of Tragedy (3)***
Explores, contextualizes, and assesses the most prominent and influential works in the history and theory of tragedy, beginning with the dramas of Greek antiquity and extending through modern philosophy.
Prerequisites: 01: 359:201 or 202; English major

01:359:494 ***Independent Study (3)***
Individual work on a topic designed by the student in conference with an instructor who directs the project.
Permission of department; 01:359:201 or 202; English major.

01:359:495 ***Independent Study (3)***
Individual work on a topic designed by the student in conference with an instructor who directs the project.

Prerequisites: Permission of department; 01:359:201 or 202; English major.

01:359:496 ***Junior Honors Seminar (1.5)***
Workshop focusing on methodological and theoretical aspects of literary study or creative writing, with particular emphasis on preparing to write an honors thesis.
Open only to junior English majors in the departmental honors program.

01:359:497 ***Senior Honors Seminar (3)***
Workshop focusing on methodological and theoretical aspects of literary study, with particular emphasis on the senior thesis.
Open only to senior English majors in the departmental honors program.

01:359:498,499 ***Senior Honors Tutorial (3,3)***
Workshop focusing on methodological and theoretical aspects of literary study, with particular emphasis on the senior thesis.
Open only to senior English majors in the departmental honors program.

English (SAS)

English Creative Writing Courses (351)

English Creative Writing Courses (351)

01:351:209 ***Introduction to Multimedia Composition (3)***
Introduction to composition across digital media platforms, with attention to the conceptual challenges it poses. Individual digital media projects, blog posts, and group exercises to provide experience composing and sharing works that are both thought provoking and entertaining.

01:351:211,212 ***Introduction to Creative Writing (3,3)***
Practice in creative writing in various forms (fiction, poetry, drama, and essay); critical analysis of students' manuscripts in class and/or individual conferences.

01:351:220 ***Writing for Experimental Film (3)***
A hands-on film making experience focusing on writing and producing experimental film.

01:351:303 *Screenwriting for Film (3)*
Practice in screenwriting for film focused on dramatic action, narrative structure, and character.
Prerequisite: 01:351:211 or 212.

01:351:304 *Screenwriting for Television (3)*
Practice in screenwriting for television focused on dramatic action, scene structure, and character.
Prerequisite: 01:351:211 or 212.

01:351:305 *Creative Nonfiction (3)*
Investigation, through weekly reading and writing assignments, of creative nonfiction, emphasizing modes of first-person writing such as memoirs, travel narratives, and personal essays.
Prerequisite: 01:351:211 or 212.

01:351:306 *Form and Technique in Poetry (3)*
Prerequisite: One 200-level course in creative writing or permission of instructor. Pre- or corequisite: A literature course in poetry.

01:351:307 *Form and Technique in Fiction (3)*
Prerequisite: One 200-level course in creative writing or permission of instructor. Pre- or corequisite: A literature course in fiction.

01:351:308 *Form and Technique in Playwriting (3)*
Prerequisite: One 200-level course in creative writing or permission of instructor. Pre- or corequisite: A literature course in drama.

01:351:309 *Digital Composition (3)*
Filmmaking as creative writing, including study of film language, grammar, and narrative structure, with focus on visual composition, placement of dialogue, and editing to assemble a story for the screen.
Prerequisite: 01:355:101 or 103 or 104 or equivalent

01:351:314 *Documentary Filmmaking for Writers (3)*
This course focuses on the importance of storytelling in documentaries and teaches students about the various filmic techniques, elements, and choices needed to create their own successful short film.
Prerequisite: 01:355:101 or 103 or 104 or equivalent

01:351:405 *Advanced Workshop: Multi-Genre (3)*
Advanced work in creative writing; criticism of manuscripts in individual conferences and/or class.
Prerequisite: One 300-level course in creative writing or permission of instructor.

01:351:406 *Advanced Workshop: Poetry (3)*
Advanced workshop in poetry.
Prerequisite: One 300-level course in creative writing and/or permission of instructor.

01:351:407 *Advanced Workshop: Fiction (3)*
Advanced workshop in fiction.
Prerequisite: One 300-level course in creative writing and/or permission of instructor.

01:351:408 *Advanced Workshop: Playwriting (3)*
Advanced workshop in playwriting.
Prerequisite: One 300-level course in creative writing and/or permission of instructor.

English (SAS)

English Film Studies Courses (354)

English Film Studies Courses (354)

01:354:201 *Introduction to Film I (3)*
Film study, with emphasis on basic concepts of film analysis (narrative, editing, mise-en-scène, and sound) and the historical development of cinema as an institution.
Credit not given for both this course and 01:175:201.

01:354:202 *Introduction to Film II (3)*
Film study, with emphasis on commercial cinema as an institution (genres, directors, and stars) and on nonnarrative types of film (documentary, experimental).
Credit not given for both this course and 01:175:202.

01:354:205 *Cinema Today (4)*
This course surveys contemporary cinema from 2000 to the present.

01:354:210 *Close Readings of Cinema (4)*
Formal analyses of six or seven individual films; emphasis on visual track, sound track, and scenario-narrative construction.
Credit not given for both this course and 01:175:210. Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:354:250 *The Films of Alfred Hitchcock (4)*
A survey of the major films of the "master of suspense" from the silent era through the 1970s.

01:354:270 *American Screen Comedy (4)*
Classical American screen comedy: American screen comedy from the 1920s to the 1960s, ranging from the films of comedians to those of writers and directors.

01:354:301 *Digital Cinema (4)*
A study of the role played by digital technology in shaping the imaging and sound practices found in the contemporary cinematic landscape from the 1990s to the present.
Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:354:308 *The Craft of Screenwriting (3)*
Nature and theory of the screenplay; practice in writing for the screen, from short scenes to longer projects.
Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:354:312 *Cinema and the Arts (3)*
Relationship between film and aesthetic movements in literature and the arts, such as expressionism, cubism, futurism, constructivism, and surrealism.
Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:354:315 *American Cinema I (3)*
American film from the silent period to 1940; emphasis on the development of American cinema both as a social institution and a symbolic form.
Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:354:316 *American Cinema II (3)*
American film from 1940 to the present; emphasis on the height of the Hollywood studio and its decline in the late 1950s and 1960s.
Prerequisite: 01:355:101 or 103 or 104 or equivalent. Credit not given for both this course and 01:175:316.

01:354:318 *Cinema of New York and New Jersey (4)*
A history of the development of the motion picture industry in New York and New Jersey, where filmmakers unhappy with conditions of industrial mass production on the west coast worked to create an alternative "Hollywood on the Hudson."
Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:354:320 *World Cinema I (3)*
Developments in French, Italian, British, Russian, and other national cinemas from 1896 to World War II; also examines cross-influences between foreign and American cinema.
Credit not given for both this course and 01:195:320 or 01:175:320. Prerequisite: 01:355:101 or 103 or 104 or equivalent

01:354:321 *World Cinema II (3)*
Developments in French, Italian, British, Russian, Japanese, and other national cinemas after World War II; also examines cross-influences between foreign and American cinema.
Credit not given for both this course and 01:195:321 or 01:175:321. Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:354:330,331 *Critical Methodology in Film (3,3)*
Critical methodology, reviewing genre theory, theories of authorship, Marxist, feminist, cultural-materialist, and psychoanalytic criticism as applied to film.
Prerequisite: 01:355:101 or 103 or 104 or equivalent

01:354:335 *Film Sound (4)*
An international history of film sound with emphasis on the development of sound technology, the stylistic and aesthetic conventions of film sound, and theoretical discourses surrounding sound in the cinema.
Prerequisite: 01:355:101 or 103 or 104 or equivalent

01:354:350,351 *Major Filmmakers (3,3)*
Questions of meaning in film through the work of such major directors as Ford, Renoir, Hawks, Ophuls, Bergman, Mizoguchi, and Hitchcock.
Prerequisite: 01:355:101 or 103 or 104 or equivalent. Credit not given for both this course and 01:175:350, 351.

01:354:355 *Films of John Ford (4)*
A study of films made by American cinema's poet laureate that explores topics such as Ford, Lincoln, and history; race and ethnicity; populism and politics; and women, native Americans, and the West.
Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:354:356 *Films of Jean Renoir and Fritz Lang (4)*
A comparison of the work of two European directors who, after achieving international prominence in their respective countries (France, Germany), fled Hitler and came to Hollywood in the 1940s
Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:354:360 *Film Noir (4)*
Survey of American hard-boiled cinema from the early 1940s to 1958 with a focus on private eyes, lone wolves, femme fatales, and losers.
Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:354:370 *Film Genres (3)*
Analysis of film genres, such as the western, comedy, horror film, film noir, and the musical; theory of genre; and history of genre criticism. May cover more than one genre.
Prerequisite: 01:355:101 or 103 or 104 or equivalent. Credit not given for both this course and 01:175:370.

01:354:371 *Film Melodrama (4)*
Survey of film melodrama from the silent era to the present, including subgenres such as the family melodrama, the romantic melodrama, melodramatic triangles, the maternal melodrama, and race and melodrama.
Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:354:373 *The Documentary (3)*
History, theory, and practice of documentary film, including ethnographic film, propaganda, newsreel, direct cinema, video verite, social activist film, postmodern documentary, and antidocumentary.
Prerequisite: 01:355:101 or 103 or 104 or equivalent. Credit not given for both this course and 01:175:373.

01:354:374 *Science Fiction Film (4)*
A survey of science fiction cinema that explores the relationship between the human and the inhuman, the fantastic and the realistic, the familiar and the "other," and the present and the future.
Prerequisite: 01:355:101 or 103 or 104 or equivalent. Credit not given for both this course and 01:050:322 or 01:175:322.

01:354:375 *Film and Society (3)*
Analysis of films in their sociopolitical contexts, including issues of race, class, and gender; relation between film as art form and the politics of culture.
Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:354:385 *Theories of Women and Film (3)*
Basic concepts in feminist film theory; the female voice in cinema; representations of women in classical Hollywood film; and films made by women.
Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:354:391,392 ***Special Topics in Film Studies (3,3)***
Intensive study of a particular national cinema, period in film history, studio, or genre. Sections designed by individual instructors; consult departmental announcement.
Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:354:410 ***Seminar in Film Studies (3)***
Contemporary issues in film studies, ranging from the return to history to questions about the role of theory in the age of post-theory.
Prerequisite: 01:359:201 or 202.

01:354:420 ***Seminar: Film Theory (3)***
Major developments in film theory from the silent era to the present; writings on film by Eisenstein, Kracauer, Bazin, Metz, Barthes, and others; practice in using different methods to analyze films.
Prerequisites: 01:359:201 or 202 plus any 200-level English department film course (01:354:201, 202, or 210). Credit not given for both this course and 01:175:420.

English (SAS)

English Composition and Writing Courses (355)

English Composition and Writing Courses (355)

Learning Goals

Students who complete English 201 and 301 will be able to read and understand specialized texts from a range of disciplines; cite and explicate key passages in support of specific claims; evaluate the claims of individual texts and synthesize information provided by multiple sources; engage in independent research using print and online sources; develop a written argument with a thesis supported by reasoning, explanation, illustration, and the use of evidence; understand the major conventions of argument, quotation, paraphrase, and citation; understand the conventions of standard written English including paragraphing, grammar, and punctuation; evaluate the quality of information; and make a public presentation of their course research.

Students who complete Writing Program courses beyond 201 will be able to demonstrate proficiencies in the specialized areas indicated by the course title and description.

01:355:090 ***Grammar Workshop (E1.5)***
The Grammar Workshop is a support class in grammar skills featuring both group and individualized instruction.
Open to all students in Writing Program courses.

01:355:096 ***Writing Center (E1.5)***
At the tutorial centers located on the College Avenue, Livingston, and Douglass campuses, registered students receive concentrated assistance in specific writing skills.
The Writing Center is open to all undergraduates.

01:355:100 *Basic Composition (4.5)*
Basic Composition focuses primarily on the reading-comprehension skills necessary for success in Expository Writing (01:355:101) and in future college courses. Students read eight complex nonfiction essays and write four expository papers.
Prerequisites: 01:355:099 or 01:355:098 or 01:356:156.

01:355:101 *Expository Writing I (3)*

College Writing introduces students to the strategies and practices necessary to become a successful writer at the university level and beyond. As the required writing course for undergraduate students at Rutgers University-New Brunswick, College Writing challenges students to reflect upon and cultivate their strengths as readers and writers at this new stage of their education careers. College Writing is required of all students except those who are exempt through AP credit or transfer equivalency. Prerequisites: Placement,.

May not be used for credit toward the English major or minor. Prerequisites: 01:355:100, 01:356:156, or placement.

01:355:103 *Exposition and Argument (3)*

Exposition and Argument is an intensive writing course for first-year students who demonstrate advanced reading and writing skills.

Open only to honors students, and is not open to students who have taken 01:355:101. Credit is not given for both this course and 01:355:101.

Prerequisites: Placement in 01:355:101.

01:355:104 *College Writing Extended (4.5)*
College Writing Extended introduces students to the strategies and practices necessary to become a successful writer at the university level and beyond. Students develop their critical reading abilities and written communication skills through meaningful writing projects of diverse genres, including multimodal composition. Satisfies The College Writing core curricular requirement. Prerequisites: placement.
Prerequisites: placement.

01:355:197 *SAS Summer Writing Practicum (1)*
The Summer Writing Practicum will focus on developing reading strategies that encourage connective and analytical thinking, drafting an academic paper that presents a coherent and independent claim, and revising a rough draft for submission. Students will read nonfiction texts, discuss those texts, and develop claims of their own using textual evidence.

01:355:201 *Research in the Disciplines (3)*
Research in the Disciplines promotes further development of competence in reading, thinking, and writing, with emphasis on the intellectual and practical skills required for the research paper.
May not be used for English major or minor credit. Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:355:202 *Technical Writing Essentials (3)*
Technical Writing Essentials is designed to meet the fundamental workplace communication needs of students and professionals in a wide range of fields, including scientific and technical careers. The course teaches students how to effectively communicate using various kinds of documents common to the workplace including memos, business

letters, research reports, and instructions.
May not be used for English major or minor credit. Credit not given for both this course and 01:355:203. Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:355:203 *Business Writing Essentials (3)*
Business Writing Essentials is designed to meet both the basic communication needs of students planning careers in business and the writing improvement needs of current working professionals. The class writing assignments will be structured around scenarios where students will apply both writing and critical thinking skills in the context of real business situations.
May not be used for English major or minor credit. Credit not given for both this course and 01:355:202. Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:355:301 *College Writing for Transfer Students (3)*
If you have received WC credit for English 101 College Writing, consider taking English 301 College Writing for Transfer Students to fulfill one of your upper-level Core Curriculum WCr or WCd writing requirements. Students will write two four page essays that emphasize the writing, reading, and critical thinking skills valued by Rutgers, then complete an 8-10 page research paper on a subject of personal interest.
Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:355:302 *Scientific and Technical Writing (3)*
Scientific and Technical Writing offers students practice in the forms and discourses of scientific and technical writing as they develop, research, and revise an independent project. The purpose of the class is to prepare students for their professional lives in scientific, technical, or public service fields by helping them organize their knowledge while exploring ways of applying it, thus developing their professional expertise.
Credit not given for both this course and 01:355:303. Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:355:303 *Writing for Business and the Professions (3)*
Writing for Business and the Professions offers students practice writing for a business or professional audience as they develop, research, and revise an independent project. The purpose of the class is to prepare students to think as managers capable of putting information to practical use.
Credit not given for this both course and 01:355:302. Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:355:312 *Writing for Biology and Natural Science(3)*
This project-focused course is designed to address the needs of students doing research in natural sciences. Coursework covers grant proposals, research papers, and journal publications.
Prerequisites 01:355:101 or 01:355:103 or 01:355:104.

Prerequisites 01:355:101 or 01:355:103 or 01:355:104.

01:355:315 *Writing Grant Proposals (3)*
This course focuses on the theory and practice of grant writing to support research, education, or community. It includes a focus on identifying appropriate sources of grant funding, organizing research, and tailoring projects to specific audiences.
Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:355:322 ***Writing for Engineers (3)***
This project-focused course is designed to address the needs of students in engineering. Covers project proposals, patent applications, technical reports, and other engineering documents.
Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:355:342 ***Science Writing (3)***
This course provides students with practice in writing about science for general readers and presenting scientific issues or information in the genres common to journals, magazines, newspapers, and the internet.
Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:355:352 ***Writing as a Naturalist (3)***
Advanced writing course focusing on observing and writing about animals and the natural world.
Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:355:355 ***Writing in the Professions (3)***
Provides specialized writing training for professional, business, scientific, or technical fields.
Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:355:365 ***Technical Editing (3)***
Practice editing technical documents for grammar, syntax, organization, style, emphasis, and audience awareness.

Prerequisites: 01:355:101 or or 01:355:103 or 01:355:104.

01:355:375 ***Collaborative Writing Practices (3)***
Students will engage in the theory and practice of managing collaborative writing in organizations. Students will collaborate on group projects involving planning, writing, presentation, and editing tasks.
Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:355:395,396,397,398 ***Internship (3,3,3,3)***
These internships include the application of skills learned in literary studies in professional settings and an appropriately designed academic project resulting in a paper.
Prerequisite: Permission of department required to enroll in these internships. Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:355:399,400 ***CESEP Internship (1,1)***
The Civic Engagement and Service Education Partnerships (CESEP) internship is a one-credit community service placement in English.
Not for English major or minor credit. Must be taken in conjunction with designated Civic Engagement and Service Education Partnerships (CESEP) program course in the English department.

01:355:402 ***Advanced Writing Workshop (3)***
Focuses on advanced work in expository, scientific, technical, or business writing. Topics vary from semester to semester.
Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:355:410 ***Composing Graphic Narratives (3)***
Composing Graphic Narratives is an advanced writing workshop devoted to producing both fiction and non-fiction comics and other forms of text image communication. We'll explore ways to communicate information, construct

arguments, and tell stories through the medium of graphic narrative. The course approaches graphic narrative as a flexible form of writing that uses images, text, narrative structure, and page design as active parts of its language. ***Prerequisites: 01:350:101 or 01:355:101 or 01:350:103 or 01:355:103.***

01:355:415 ***Information Design (3)***
This project-focused workshop course uses specialized writing software to design and produce a portfolio of user-friendly documents for a specific audience and purpose.
Prerequisite: Complete 01:355:101 or 103 or 104 or equivalent before enrolling.

01:355:425 ***Web Authoring (3)***
This project-focused workshop course uses specialized software to design, research, generate content for, and publish a website.
Prerequisite: 01:355:101 or 103 or 104 or equivalent. May not be used for major or minor credit.

English (SAS)

English for Academic Purposes Courses (356)

English for Academic Purposes Courses (356)

01:356:152 ***Discussion and Presentation Skills (1)***This course improves listening and note-taking skills and builds confidence to speak in front of groups through individual and collaborative projects. Skills acquired through this course include planning oral presentations, developing visual aids such as PowerPoint, and responding to audience questions.***Pre- or corequisite: 01:356:155 or 156.***

01:356:155 ***English for Academic Purposes I: Writing Across Cultures (4.5)***First-year writing course for learners of English as an additional language. Reading, responding to, and critically analyzing texts from a range of perspectives and fields addressing the relationship between culture and communication.***Prerequisite Note: Placement required**

01:356:156 ***English for Academic Purposes II: Academic Writing in the United States (4.5)***First-year writing course for learners of English as an additional language. Narrative, analytical, and synthetic writing assignments, a discipline specific research project, and a final digital project showcasing critical thinking and composition.***Prerequisite: EAP I: Writing Across Cultures (01:356:155)**

Louisa Schein, Anthropology; Ph.D., California (Berkeley)

Jeffrey Shandler, Jewish Studies; Ph.D., Columbia

Karen R. Stubaus, B.A., Ph.D., Rutgers

Carla Yanni, Art History; Ph.D., Pennsylvania

The Department of American Studies encompasses the richness, breadth, and evolution of the field of American Studies.¿ From early America to 9/11, from the blues to rock `n¿ roll to hip hop, through the study of race, indigeneity, migration, empire, diaspora, and ever-evolving forms of national identity, American Studies examines a wide range of materials that emphasize a variety of critical approaches to the study of American history, politics, and culture. American Studies introduces students to interdisciplinary scholarship and methods in the study of the nation. In our classes, students develop their critical skills in thinking, analysis, and writing. They learn to locate and evaluate primary sources and scholarly texts, to write effectively and clearly, and to apply conceptual frameworks to their lived experience and practice.

Our faculty is dedicated to helping students learn to write well, to speak articulately, and to think analytically and creatively. These are skills necessary for success in any field. We are a small department, and we give students a great deal of individual attention. We try to maintain a small-college atmosphere within our enormous state university.

Departmental Major and Minor Goals

Departmental Major and Minor Goals

Cultural Competency: American studies students will be knowledgeable about historical and present-day diversity (including gender, race, class, and sexuality, among many others) of American experiences. Students will be able to apply conceptual frameworks about cultural and historical analysis to their lived experience and practice and future aspirations.

Research Competency: Students will learn how to write and speak effectively and clearly, demonstrating the ability to explain the complex meaning and significance of a text and formulate a cogent argument supported by evidence.

Global Competency: American studies students will understand the history, culture, and politics of the United States in the context of large-scale global changes.
the context of large-scale global changes.

American Studies 050 (SAS)

Major Requirements

Major Requirements

Coursework for the American studies major is composed of (1) six core courses in American studies that present the methodology and the conceptual framework for a cultural approach to the civilization of the United States; and (2) six elective courses totaling at least 18 credits.

Students who wish to major in American studies must complete the following courses:

01:050:101 Introduction to American Studies (3)
01:050:225 Thought and Society in the American Past (3)
01:050:227 Nineteenth-Century American Literature and Culture (3)
01:050:310 Approaches to American Studies (3)
01:050:389 Junior Seminar in American Studies (3)
01:050:487,488,489 Seminars in American Studies (3,3,3)

Another 18 credits from American studies course offerings are required. No more than 9 of these credits (three courses) may be selected from courses numbered below 300.

Independent Studies 01:050:390,391 or 01:050:490,491; Independent Study/Project in American Culture (01:050:390,391); and Senior Essay or Senior Project in American Culture (01:050:490,491) allow American studies majors, minors, and other students to do independent work for credit.

For double-majors, only 3 of the 12 elective credits may overlap with the major requirements of other departments.

Grades of C or better must be earned in all courses in order to fulfill the requirements for the major.

Students must take required courses in the following sequence: 101 in their first or second year; 310 after completing 101, and before taking junior seminar; junior seminar is required for senior seminar.

American studies majors interested in certification for teaching should consult the Office of Teacher Education at the Graduate School of Education.

Students may not take any courses in fulfillment of the major on a pass/no credit basis.

American Studies 050 (SAS)

American Studies Minor Requirements

American Studies Minor Requirements

Students who wish to minor in American studies must complete 18 credits consisting of three American studies courses at or above 300 level (3 credits each), including 01:050:310 or 01:050:389, and three more American studies courses at any level (3 credits each).

Please be aware that these courses must be in the American studies department only, except with permission of the undergraduate adviser. All courses used for the minor must have a grade of C or better.

American Studies 050 (SAS)

Minor in Comparative and Critical Race and Ethnic Studies (CCRES)

Minor in Comparative and Critical Race and Ethnic Studies (CCRES)

The minor in comparative and critical race and ethnic studies (CCRES) gives students the opportunity to study race, migration, and diverse American community histories with courses from various departments, including Africana, Latino and Caribbean, and women's, gender, and sexuality studies.

The minor requires six courses, at least three of which must be at 300 level or above:

1. an introductory course in comparative race and ethnic studies (050:102) offered in American studies or an approved 100- or 200- level course in African-American, U.S. Latina/o, Native American, or Asian American history or literary tradition;
2. one course in non-U.S. or global processes of racial and ethnic formation; and
3. four more courses on race and ethnicity, two of each must deal with two different traditional racial groupings or in comparative context.

Students may count at most two courses toward both their major outside of American studies and the CCRES minor. All courses used for the minor must have a grade of C or better.

To qualify as a comparative race and ethnicity elective, a course must fulfill at least two of the following learning goals: 1) critically engage histories and geographies of race and difference; 2) critically engage a particular population's experience with power; 3) explore critical race issues and theories with one or more historical categories; and 4) examine non-U.S. racial formations. A list of approved electives will be updated yearly.

American Studies 050 (SAS)

Asian American Studies Initiative

Asian American Studies Initiative

The field of Asian American studies explores the politics and history of racialization of Asian-descent peoples, including East, South, Southeast, and Southwest Asian Americans, both within the United States and in the Americas. These multiple diasporic groups share historical and legal connections with other racial and ethnic groups in the United States.

The department offers content courses and a Minor in Asian American studies, houses the Asian/Asian American Studies undergraduate certificate (see below), the Asian American Studies Living/Learning Community, and develops programming for the interdisciplinary field, such as the annual Undergraduate Symposium on Asians in the Americas and the Diaspora.

American Studies 050 (SAS)

Minor in Asian American Studies 051

Minor in Asian American Studies 051

The minor in Asian American Studies gives students the opportunity to study race, politics, history, migration, labor, literature, art, and popular cultural production of Americans with personal or ancestral connections to the continent of Asia, conceived broadly to include the Pacific Islands, East Asia, Southeast Asia, South Asia, Central Asia, and West Asia/the Middle East. Courses eligible for the minor will originate in the American Studies department and a number of other departments, including Asian languages and cultures, Africana, Latino and Caribbean, History, and English.

The minor requires six courses, at least two of which must be at 300 level or above:

1. an introductory course in Asian American Experience (050:245) offered in American studies or an approved 100- or 200- level course centered on Asian American history or culture;
2. one course in Asian histories, literature, cultures, or civilizations in a non-U.S. context; and
3. four more courses with substantial Asian American content, either from a list of approved courses or by the approval of the department. Students may count at most three courses toward both their major outside of American Studies and the Asian American Studies minor. All courses used for the minor must have a grade of C or better.

To qualify for the Asian American Studies minor, a course must contain substantial Asian or Asian American content, defined as one of the following: 1) the course is primarily about the literature, histories, arts, cultural production, politics, or societies associated with one or more nations or regions within the Asian continent or Americans who identify with one or more regions of the Asian continent on a personal or ancestral level; 2) the course compares the experiences or cultures of multiple groups of people on a common subject, and Asians or Asian Americans must be the subject of at least one-third of the case studies under comparison. A list of approved electives will be updated yearly. Please consult with the Undergraduate Director.

American Studies 050 (SAS)

Undergraduate Certificate in Asian/Asian American Studies

Undergraduate Certificate in Asian/Asian American Studies

The Department of American Studies (AMS) and the Department of Asian Languages and Cultures (ALC) offer in cooperation a certificate in Asian/Asian American studies (13 credits) comprised of Asian American studies-content courses offered in American studies, English, history, anthropology, among other units; and courses in English on aspects of modern Asian cultures offered by ALC.

The certificate in Asian/Asian American studies is intended for students majoring in other disciplines in the School of Arts and Sciences (SAS), planning or already pursuing careers in education, business, international relations, policy, law, medicine and allied health professions, medical research, public health, or global development. It is anticipated that students may earn the certificate as part of their intercultural learning and training in the course of an undergraduate degree as a supplement or as continuing education for those pursuing careers in social work, health policy, education, among other career paths in which diverse cultural knowledge and learning is necessary. Some examples of potential alumni of the certificate program might be:

- educators, all levels;
- health professionals, including general practitioners, specialists, and nurses;
- immigration and law enforcement officials;
- legal professionals; and
- social workers.

Requirements for Undergraduate Certificate Program

1. Complete two contemporary Asian culture courses in English with a grade of C or better from the course list.
2. Complete two Asian American studies-content courses with a grade of C or better from the course list.
3. Complete an additional credit-bearing Asian American-content course (1 or 1.5 credit[s], Byrne Seminars, First-Year Interest Group Seminars [FIGS], learning community, or independent study).
4. Register with SAS American studies for the certificate in Asian/Asian American studies.

American Studies 050 (SAS)

Certificate in Curation and Cultural Programming (CCP)

Certificate in Curation and Cultural Programming (CCP)

The CCP certificate draws on the American Studies department's strengths in public humanities, digital humanities, folklore, curation, and visual and material culture. Over twelve credits, the CCP certificate prepares students to apply humanities frameworks to careers in event management, project management, museums and other cultural institutions, libraries, nonprofits, education, and more.

Requirements for Curation and Cultural Programming Undergraduate Certificate Program (12 credits total):

1. Complete 12 credits of the list below of department-approved courses with a grade of C or higher

Certificate-Eligible Courses (Four courses, 12 credits required):

AMST 263: American Folklore
AMST 264: American Folklife
AMST 333: Cultures of Consumption
AMST 350: Folk Festival Curation
AMST 355: Museums, Monuments, and American Culture
AMST 389: Junior Seminar: Digital Humanities
History 301: Public History: Theory, Method, Practice

History 451: Public History Internship
History 302: Oral History
History 303: Digital History
History 310: New Jersey History
Art History 430: Foundations in Cultural Heritage and Preservation Studies
Art History 563: Curatorial Training
Art History 441: Topics in Historical Preservation: Museums, Collections, & Preservation
Art History 442: Topics in Historical Preservation: Methods in Cultural Heritage and Preservation Studies
Other courses at discretion of certificate director, Dr. Carla Cevasco

American Studies 050 (SAS)

Departmental Honors Program

Departmental Honors Program

Students with cumulative grade-point averages of 3.0 or better and averages of 3.4 or better in courses taken for the major are eligible to do honors work. Honors students must complete an adviser-guided, distinguished two-semester independent essay or project in connection with enrollment in 01:050:495 and 496 in their senior year. They also must satisfactorily pass an oral examination administered by the American studies faculty, based largely on the essay or project. Students are encouraged to speak with an adviser in their junior year to discuss a program of study and schedule of work.

American Studies 050 (SAS)

The American Studies Prize

The American Studies Prize

The American Studies Prize is awarded annually to the best interdisciplinary student project that illuminates the culture of the United States. Projects must be submitted to the American studies faculty by April 30.

American Studies 050 (SAS)

Courses

Courses

01:050:101 ***Introduction to American Studies (3)***
Introduces the American studies method through the use of primary documents including novels, autobiographies, paintings, photographs, and films.

01:050:102 ***Introduction to Race and Ethnicity in America (3)***
Examines the logics of race and racism within political, legal, and cultural discourses both in and beyond the United States.

01:050:200,201 ***Topics in American Studies (3,3)***
Varied field topics in American studies that lend themselves to interdisciplinary treatment.
May be repeated for credit when topic differs.

01:050:202 ***American Regionalism (3)***
Multidisciplinary study of the regions of the United States, with focus on their literature, folklore, music, and other arts.

01:050:203 ***The American West (3)***
Introduction to the American West through the classic Western film genre, Native American literature, and American Western writers.

01:050:204 ***American Environmental History and Thought (3)***
Connections among America's natural environment, its national development, and how Americans thought about both. Classic readings to understand the formation of environmental ideas and their influence on environmental action.
Credit not given for both this course and 10:762:297:01.

01:050:210 ***The American Dream (4)***
The change in the "American Dream" over time and the stories we tell about it. How our assumptions about American identity shape challenges on such broad issues as democracy, freedom, and social justice.

01:050:215 ***Springsteen's American Vision (3)***
The changing persona of Bruce Springsteen and his representation in photography, documentary, and autobiography.

01:050:216 ***America in the Arts (3)***
What is "American" about American art and design; examination of the architecture as well as fine, folk, and industrial arts and artifacts of the United States. Normally a craft project required of students.

01:050:218 ***Visual Culture in the United States (3)***
Examination of visual culture in the United States in terms of picture theory including print, advertising, and digital media.

01:050:223 ***Learning from the Past: Early America and the 21st Century (3)***
Twenty-first century challenges--climate change, income inequality, epidemic disease, border disputes, identities, new technologies--were faced by early America (c. 1500-1865), where diverse peoples navigated a rapidly changing world.

01:050:225 ***Thought and Society in the American Past (3)***
Examines American cultural constructions from the Revolutionary era to the eve of World War I. Analyzes a variety of historical, visual, literary, and performance texts from the era.

01:050:227 ***Nineteenth-Century American Literature and Culture (3)***
Examines classic 19th-century texts written by Emerson, Thoreau, Melville, Hawthorne, Twain, Whitman, and Dickinson, among others, with attention paid to the social and cultural context of these writings, including Transcendentalism, the Abolitionist movement, and the whaling industry.
Credit not given for both this course and 01:350:227.

01:050:228 ***The Contemporary American (3)***
The emerging American of our times. Forces shaping American culture as revealed in literature, the media, social criticism, and psychology.

01:050:230 ***Transforming Bodies and American Identities (3)***
Examines identities through the lens of gender, sexuality, race, socioeconomic class, ability, and culture. Social media, film, art, comics, fashion, and pop culture as sites and spaces of American body formations.

01:050:240 ***Latina/o Literature and Culture (3)***
Survey of Latino/a literary voices drawn from the Mexican, Puerto Rican, Dominican, Cuban, and other Latin American migrations to the United States. Discussion of exile, resistance, and assimilation; political presence and identity formation; race, ethnicity, gender, and sexuality; and examination of literary modes and genres (autobiography, poetry, novel, film, music).
Credit not given for both this course and 01:595:240.

01:050:244 ***American Land Patterns (3)***
Exploring the diverse connections between America's national development and its land environment. This is essentially a course in ecological history.
Credit not given for both this course and 10:762:244.

01:050:245 ***Asian American Experience: Identity and Ethnicity (3)***
General introduction to history and culture of Asian America and major debates in Asian American studies.
Credit not given for both this course and 01:098:262.

01:050:247 ***History and Culture of Hip-Hop (3)***
Historical, social, political, and aesthetic roots of hip-hop culture and music. The place of hip-hop in a larger global commercial exchange, advertising, fashion, cinema, music video, and popular literature.

01:050:248 ***Native American Experience (3)***
Introductory survey of Native American history, cultures, literature, language, and current issues. Themes include colonialism, racism, and federal Indian policy but especially Indian political activism, resistance, and cultural continuity and revitalization.

01:050:250 ***Cultures of the Portuguese-Speaking Communities in the United States (3)***
Discussion of sociocultural issues concerning the diverse Portuguese-speaking communities of the United States.
Course taught in English; will count for the Portuguese major or minor if all written work is done in Portuguese. Credit not given for both this course and 01:810:250.

01:050:253 Asian American History (3)
Introduction to the political, economic, and sociocultural aspects of immigrants from Asia and their descendants in the United States from the 16th to the 21st century.
Credit not given for both this course and 01:512:253.

01:050:259 ***Popular Culture (3)***
How popular culture shapes and reflects society in advertising, music, popular entertainment, fads, fashion, radio, television, sports, and games.

01:050:260 ***On the Road: Mobility in America (3)***
Considers mobility, mainly physical but also social, as a singularly American trait if not obsession. Includes films as well as literature (both fiction and nonfiction) and music.

01:050:261 ***The American Best Seller (3)***
Representative best-selling novels of recent decades and what they and their popularity indicate about American values and assumptions.

01:050:262 ***American Film and American Myth (3)***
American film and its relationship to American myths, society, and culture. Representative classic films screened.

01:050:263 ***American Folklore (3)***
Traditional verbal and material lore. American folk narratives, myths, legends, tales, ballads, and songs. How folklore functions in American society and institutions.
One field trip: $10.

01:050:264 ***American Folklife (3)***
Examination of the lifestyles of American folk groups with emphasis on artifacts: folk architecture, handicrafts, art, costume, and foods.
One field trip: $10.

01:050:265 ***American Experimental Film and Video (3)***
Survey course on history and development of American experimental cinema movements from beginning to present. Filmmakers include Andy Warhol, Maya Deren, Stan Brakhage, Sidney Peterson, Kenneth Anger, Yoko Ono, and others.
Credit not given for both this course and 01:175:265.

01:050:266 ***Cult Films in American Culture (3)***
Focus on the American "cult" film from its origins in the 1920s and its evolution in American culture. Close analyses of cult films will be paired with critical readings in film, theory, and cultural history.
This course previously given as a 300-level topics course. Credit not given for that course and 01:175:266.

01:050:267 ***American Film Directors (3)***
In-depth analyses of the structure and content of films of Stanley Kubrick, Orson Welles, John Frankenheimer, David Lynch, Val Lewton, Andy Warhol, and others. Emphasis on the mise-en-scène, narrative form, set design, sound, and special effects in the films of these celebrated filmmakers.
Credit not given for both this course and 01:175:267.

01:050:268 ***David Lynch and the American Film Avant-Garde (3)***
Focuses on the surreal films of David Lynch and the American Film Avant-Garde. Includes in-depth analyses of the structure and content of many of Lynch's bizarre and unique films, including *Eraserhead*, *Mulholland Drive*, and *Blue Velvet*.
Credit not given for both this course and 01:175:268.

01:050:269 ***The Concept of Home (3)***
Examination of the concept of "home" in the United States, and the competing cultural, political, and economic meanings that have been attached to American domesticity. Historical examination of the place of "home" in the way Americans think about gender, sexuality, race, legal rights, and the organization of labor.

01:050:272 American Food, Past and Present (3)
A history of the collision of people, animals, plants, recipes, and flavors from all over the globe and encounters between Native American, enslaved Africans, and immigrants that created a national cuisine that is as diverse and varied as its people.

01:050:281,282,283,284 ***Topics in American Studies (1.5,1.5,1.5,1.5)***
Half-semester minicourses given each year on topics of contemporary interest that lend themselves to interdisciplinary treatment.
May be repeated for credit when topic differs.

01:050:285 ***Independent Study/Project: Media Culture (1.5)***
For students undertaking an independent study project in media culture.

01:050:291 ***Jerseyana: New Jersey as a Culture (3)***
Interdisciplinary, regional approach to New Jersey, examining its landscape, the peculiarities of its history, its folklore and myths, arts and architecture, music, and literature.

01:050:295 ***Latino and Caribbean Cultural Studies (3)***
Comparative study of Latino and Caribbean cultures by reviewing key definitions of culture, paying attention to the historical and disciplinary development of the term, as well as the key debates on cultural studies in the humanities.
Reading knowledge of Spanish recommended. Credit not given for both this course and 01:595:295 or 01:195:295.

01:050:300,301,302 ***Topics in American Studies (3,3,3)***
Topics of contemporary interest that lend themselves to interdisciplinary treatment.
May be repeated for credit when topic differs.

01:050:303 ***A Decade in American Culture (3)***
Interdisciplinary approach to understanding a particular decade in American culture, employing the arts, humanities, and social sciences. Decade studied depends on the instructor.

01:050:304 ***The American City (3)***
Interdisciplinary approach to the origin, development, and problems of the American city.

01:050:305 ***Images and Narratives of War (3)***
Examination of the various ways that wars, post-WWII (such as Korea, Vietnam, the Gulf Wars, and others), have been represented in American popular culture. Material includes films, novels, memoirs, reportage, and histories.

01:050:306 ***American Detective Fiction and Film (3)***
Examination of the distinctively American literary genre of the hard-boiled detective novel and the many films that this genre has inspired, including a look at film noir.

01:050:307 ***The Culture of the 1960s (3)***
Examination of the culture of the 1960s, with emphasis on the civil rights movement, the war in Vietnam and student radicalism, Woodstock, women's liberation, and the sexual revolution, using social history, literature, music, and film.

01:050:308 ***The Culture of Metropolis (3)***
Examination of the urban culture of New York City in the 19th and 20th centuries, emphasizing the impact of race, class, gender, and ethnicity on developing subcultures.

01:050:309 ***Nineteenth-Century Architecture in the United States (3)***
Overview of the social and intellectual history of architecture in the United States to 1900. Role of architecture in societal transformations (the development of nationhood, industrialization, and urbanization). Emphasis on the invention of new building types, including universities, government buildings, prisons, hospitals, railroad stations, and the architecture of World's Fairs.
Credit not given for both this course and 01:082:391.

01:050:310 ***Approaches to American Studies (3)***
Introduction to interdisciplinary approaches in American studies. Examination and analysis of debates that have shaped and transformed the discipline.
Prerequisite: 01:050:101. Required for the major. Restricted to majors, or with special permission.

01:050:311 ***Seminar in Black Diasporic Media (3)***
Examines a range of visual media by black cultural producers. Offers a diasporic framework as an opportunity to trace how technologies, genres, styles, and issues circulate through various historical moments, media, conceptualizations of blackness, and locations.
Credit not given for both this course and 01:014:303.

01:050:312 ***Sports in American Culture (3)***
Examines the place of sports in American life and how sports may be thought of as "the American religion," as a metaphor for American ideals and values. Figures from the world of sports (players and coaches) will be regular guest speakers.

01:050:313 ***America as a Business Culture (3)***
Interdisciplinary approach explaining how living in a market-based society impacts various aspects of everyday life--spending, savings, and investing. Examine social, cultural, and political underpinnings of economic constructs such as money, the market, and consumption.

01:050:314 ***Technology and Culture in America (3)***
Cultural responses to the growth and elaboration of American technology as reflected in literature, art, and popular culture.

01:050:315 ***Documentary Expression in America (3)***
Relationship between the social and aesthetic functions of documentary in film, photography, journalism, biography, and the nonfiction novel.

01:050:316 ***Twenty-First Century Expression (3)***
Exploration of the carryover of mass media from older analog mediums (records, books, etc) and how they interact and create meaning on the internet we know today with access to vast resources of human knowledge. Exploration of ways by which forms of expression, by both individuals and groups, form new communities and new identities online and off and how those human interactions with technology impact our present time and the future.

01:050:317 ***Law and American Culture (3)***
Exploration of law in the United States in literature, popular culture, feminism, postmodernism, and political philosophy.

01:050:318 ***Money and Modern America (3)***
Cultures of materialism and ostentatious displays of consumption; the ethics of money, from the meaning of an "honest day's work" to the gray areas of bribery, insider dealing, and profiting from the misery of others; recent financial crises and their impact on American life.
Credit not given for both this course and 01:790:332.

01:050:320 ***American Life During the Cold War (3)***
Examines American domestic life during the Cold War (roughly 1945-1991), when U.S. culture was shaped decisively by its geopolitical rivalry with the Soviet Union.

01:050:321 ***American Conservatism (3)***
Exploration of the conservative tradition in U.S. politics and culture, from the American Revolution to the present day. Investigation of the major impulses and ideas associated with the political right and discussion of how conservatism has been manifested in American politics, government, literature, and culture.

01:050:322 Science Fiction Film (4)
Introduction to science fiction cinema that explores the relationship between the human and the inhuman, the fantastic and the realistic, the familiar and the "other", and the present and the future.
Credit not given for this course and 01:1775:322 or 01:354:374.

01:050:324 ***Wayward Americans (3)***
Exploration various normal/abnormal dichotomies within American culture and how normal is determined. Examination of groups that have been described as different, weird, deviant, strange, abnormal, disobedient or unnatural and the historical, sociological and psychological underpinnings of the cultural norms from which these groups are/were excluded.

01:050:325 ***Women on the Fringe: Perceptions of Women as Social and Sex-Role Deviants in American Civilization (3)***
Societal reaction to female behavior deviating from social and feminine norms. Use of historical narratives, literature, and film to treat such themes as heresy, madness, prostitution, adultery, criminality, political protest, and lesbianism.

01:050:326 ***The Culture of American Women (3)***
Construction of feminine culture as distinct from the dominant patriarchal culture, examining social history, religion, psychology, sociology, oral history, literature, and film.

01:050:327 ***Latino Ethnography (3)***
Cultural description of U.S. Latinos and their communities; introduction to reading, writing, and theorizing ethnography; ethnographic film; ethnography of migration and diaspora; *testimonio* as ethnography; locating anthropology within Latino studies.
Credit not given for both this course and 01:070:321 or 01:595:307.

01:050:329 ***The United States as Seen from Abroad (3)***
United States as perceived by foreign commentators, such as Dickens, Trollope, and Waugh, and American expatriate intellectuals and artists, such as James, Hemingway, and Baldwin.

01:050:330 ***American Cults and Communes (3)***
Examination of historic and fictional communal and religious experiments, illuminating their surprising similarities and what they tell us about American society and culture. From the Shakers and the Oneida community through Jonestown and the Hare Krishnas. Texts include novels and feature films.

01:050:331 ***Ethnic America (3)***
Examination of cultural pluralism and the means by which ethnic groups such as Irish, Italians, Jews, African Americans, Asian Americans, and Hispanics have constructed their ethnic identities and the political and cultural forces that shaped those constructions.

01:050:332 ***American Jewish Culture (3)***
Examination of the evolution of Jewish identities through the prisms of acculturation, religion, race, gender, ethnicity, and sexuality though literature, film, and other visual media.
Credit not given for both this course and 01:563:332.

01:050:333 ***The Cultures of Consumption (3)***
Examination of the development of mass society, mass production, and consumption from the 1880s to the present. Areas considered may include industrialization and the development of work in relation to leisure, the development of the advertising industry, television, technology, and popular and mass production and consumption.
Credit not given for both this course and 01:512:333.

01:050:335 ***Jewish-American Women: Contested Lives (3)***
Explores the Jewish-American female identity in autobiography and memoir, social history, literature, and film. Examines interplay of religious belief, secularism, social mobility, and acculturating influences within American experience.
Credit not given for both this course and 01:563:335 or 01:988:334.

01:050:336 ***American Jews and the Media (3)***
Examines the roles that the news media (film, recordings, radio, television, and computers) played in American Jewish life throughout the 20th century.
Credit not given for both this course and 01:563:306.

01:050:337 ***Contemporary Jewish Culture (3)***
Study of contemporary Jewish life, especially in America--in communities, institutions, rituals, personal histories, etc.--through the approach of fieldwork and ethnographic writing.
Credit not given for both this course and 01:563:346.

01:050:340 ***Race Matters (3)***
How "race" is represented and narrated as a political, cultural, and critical category. Discussions on racial formations in contemporary American culture; race as social construction; race as "natural" and as a "performance"; inquiry and debate on self-hatred, racisms, whiteness, Orientalism; race, gender, and queer intersectionality; and color.

01:050:341 ***American Childhoods (3)***
Evolution of concepts of childhood and adolescence in America and of child-rearing practices through an examination of social history, religious tracts, novels, poetry, film, and child care manuals.

01:050:342 ***American Sexuality (3)***
Changing American attitudes toward sexual expression and changes in sexual behavior. Examination of literature, film, 19th- and 20th-century advice manuals, and reports on sexual behavior such as the Kinsey Report and the works of Masters and Johnson.

01:050:344 ***Islam in/and America (3)***
Explores the polycultural presence of Islam in the Americas from the early colonial period to the present, issues of gender and sexuality, U.S. foreign policy and its consequences, pre- and post-9/11 racializing practices, and the contemporary terrains of Muslim-American culture.
Credit not given for both this course and 01:840:373 or 01:988:315.

01:050:350 ***Festival Curation Seminar (3)***
Fundamentals of public humanities curation and communication to multiple audiences through original research that will provide the basis for curation of a future New Jersey Folk Festival.

01:050:351 ***American Art, 1776-1913 (3)***
Visual and material culture of the United States from the American Revolution to the Armory Show. Survey of painting, sculpture, photography, and print culture in relation to American social, political, and cultural history.
Prerequisite: 01:082:105 or 106 or permission of instructor. Credit not given for this course and 01:082:351.

01:050:353 American Animated Cinema (4)
Explores how American animated films by everyone from Winsor McCay in the early 1900s to Walt Disney and Tim Burton have shaped and been shaped by national and international visual cultures. Reflects essential questions about the medium's potential as an art of movement and transformation, an art of time, and an art of dreams.
Credit not given for both this course and 01:175:353.

01:050:355 ***Museums, Monuments, and American Culture (3)***
Introduction to museum studies. Theories of societal roles of museums, monuments, and historical sites: history versus heritage, preservation laws, restoration, and governmental censorship. Includes field trips and collaborative projects.

01:050:359 ***Race, Culture, and Politics: Blacks and Jews in America (3)***
How black and Jewish identities have evolved in relationship to one another through an examination of social and political history, literature, and film.
Credit not given for both this course and 01:512:359 or 01:014:359 or 01:563:359.

01:050:365 ***American Folk Song and Ballad (3)***
Social concerns in folk songs--sources and circulation in oral tradition, with reference to lyrical folk songs, narrative folk songs, traditional ballads, broadside ballads, and Native American ballads.

01:050:366 ***Folklore of American Occupational and Regional Groups (3)***
Folklore of occupational groups such as sailors, lumbermen, cowboys, and miners, and of regional groups such as southern mountaineers, Mississippi Delta blacks, Louisiana Cajuns, and Jersey Pineys.

01:050:370 ***The Black Community and Social Issues (3)***
Examines a variety of social issues that impact the life chances of African Americans in the United States.
Credit not given for both this course and 01:014:384.

01:050:376 ***Native American Literatures in English (3)***
Fiction, poetry, and autobiography by such writers as Apes, Momaday, Welch, Silko, and Erdrich. Attention to issues of Native American representation.
Credit not given for both this course and 01:351:376 or 01:358:388.

01:050:377 ***Asian-American Literatures in English (3)***
Theme or genre-based study of selected Asian-American writing in English. Topics chosen by individual instructors; consult departmental announcement.
Credit not given for both this course and 01:351:377 or 01:358:389.

01:050:380,381 ***Internship in American Studies (3,3)***
Professional, supervised work in an approved organization or agency; an appropriately designed academic project required.
Prerequisite: Permission of the department before registration. No more than one internship can count toward the major or minor.

01:050:389 ***Junior Seminar in American Studies (3)***
A required interdisciplinary seminar for majors. Theme dependent on instructor.
Prerequisites: Two 300-level American studies courses, or one American studies 300-level course and one approved section of 01:355:201 (Research in the Disciplines). To be taken by American studies majors in their junior year.

01:050:390,391 ***Special Problems in American Culture (3,3)***
Independent study of an interdisciplinary nature, which may be expressed in a paper, audiovisual project, or other creative enterprise.
Prerequisite: Permission of department during preceding semester required. May be repeated for credit with permission of department.

01:050:400,401 ***Advanced Topics in American Studies (3,3)***
Advanced topics and readings in American studies. May be repeated for credit when topic differs.

01:050:449 ***Principles of Folk Festival Management (3)***
Introduction to the folk festival's organizational structure, approaches to project management, technical skills, and key processes and philosophies of the project. Students learn to develop project plan.
Prerequisite for the 3 credit spring semester course Folk Festival Management (01:050:450).

01:050:450 ***Seminar: Folk Festival Management (3)***
Designed to accompany presentation of the New Jersey Folk Festival. Readings in histories of folk performance and fieldwork in folklore, as well as planning and production of public event.
Prerequisite: 01:050:449 or Permission of instructor during preceding semester required.

01:050:455 ***Maritime Culture (3)***
Uses a number of disciplines to explore the influence of the sea on American life. A study of marine policy that embraces both economic and environmental issues, as well as current policy regarding world trade and regulatory reform, conservation and fisheries, national defense, and admiralty law.

01:050:465 ***Cultures of U.S. Imperialism (3)***
An exploration of American nation-building through the imperial projections of the United States. Topics include the economic, political, social, and cultural dynamics between the United States and its colonies, both formal and informal. Focus might be on a single location or on a comparative approach to imperialist projects.

01:050:487,488,489 ***Seminars in American Studies (3,3,3)***
Interdisciplinary seminars for majors. Themes dependent on instructor.
Prerequisite: For American studies majors who have completed 01:050:389.

01:050:490 ***Senior Essay or Senior Project in American Studies (3)***
Independent study of an interdisciplinary nature, which may be expressed in a paper, audiovisual project, or other creative enterprise.
Prerequisites: Permission of department and instructor during preceding semester required. May be repeated for credit with permission of department.

01:050:491 ***Independent Study/Project in American Culture (BA)***
For students undertaking an independent study project.

01:050:495 and 496 ***Honors in American Studies (3,3)***
Research essay or project, designed by the student and prepared under faculty supervision. An oral defense is required.
Prerequisite: Permission of department. Open only to seniors

Animal Science 067 (SEBS)

ANIMAL SCIENCE 067

Degree: B.S.

Director: Aparna Zama (zama@rutgers.edu)

Undergraduate Program Website: http://animalsciences.rutgers.edu/undergraduate

Department: Carol Bagnell

Chair: Nicholas Bello

Department Website: http://animalsciences.rutgers.edu

The animal science curriculum provides training and career development for students that have an interest in animal biology or related fields including veterinary medicine, biomedical research, laboratory animal care, companion animal-related careers, equine science, agribusiness, and livestock production and management. The biological sciences form a basis for the study and management of animals. Options are offered in preveterinary medicine/research, companion animal science, laboratory animal science, and equine and production animal science. .

Options within the Animal Science Major

1. Preveterinary Medicine/Research. Rigorous instruction and experience are provided in the biological and molecular basis of animal sciences in preparation for further education in medical or graduate studies. This option fulfills the academic course requirements of most U.S. veterinary colleges. Students completing this option may also enter medical and dental schools or pursue graduate studies leading to advanced degrees.

2. Companion Animal Science. Instruction and practical experience in companion animal science (selection, breeding/reproduction, nutrition, physiology, behavior) and appropriate business courses provide students the basic knowledge and skills to manage commercial or not-for-profit companion animal science enterprises.

3. Laboratory Animal Science. Instruction and practical experience are provided in research techniques and the care and use of laboratory animals. Many graduates choose careers in animal care programs as well as research laboratories of major pharmaceutical and related industries, many of which are located in New Jersey.

4. Equine and Production Animal Science. Instruction and practical experience in equine and production animal science (selection, breeding/reproduction, nutrition, physiology, behavior) and appropriate business courses provide students with the basic knowledge and skills needed to manage commercial or research enterprises in the horse and livestock (dairy/beef, poultry, sheep, swine) industries, or pursue careers in related/supporting fields such as the feed and animal health care industries, zoos, or wildlife preserves.

Animal Science 067 (SEBS)

Learning Goals

Learning Goals

Learning goals for students who successfully complete the program in animal science:

1. Students will gain a broad knowledge of the animal science discipline to understand the future of the field and its diversity
2. Students will apply biological and chemical principles and quantitative reasoning to concepts presented in core subject areas in animal science such as physiology, nutrition, genetics, and reproduction.
3. Students will develop an in-depth understanding of option-specific subject areas such as preveterinary medicine, equine and production animal science, companion animal science, and lab animal science.
4. Students will acquire skills for handling and caring for laboratory animals and livestock species.
5. Students will develop critical thinking skills to identify scientific questions and devise solutions, including designing experiments, analyzing and interpreting research data, and summarizing findings.
6. Students will develop oral and written communication skills to effectively deliver scientific and technical information to scientists as well as the public.
7. Students will develop an understanding of the principles of animal welfare and the ethical treatment of animals.

Animal Science 067 (SEBS)

Graduation Requirements for the Major

Graduation Requirements for the Major

Students matriculating fall 2015 or after and transfer students matriculating in 2016 and after must complete a goal-based Core Curriculum. The goal-based core is described here: http://sebs.rutgers.edu/core. Courses are certified for the Core Curriculum by a faculty committee. A current list of certified courses can be found here: http://sebs.rutgers.edu/core. Animal science major requirements are as described below.

For an up-to-date description of animal sciences major requirements, courses, and course sequences please refer to the program webpage at http://animalsciences.rutgers.edu/undergraduate.

Major Requirements for All Students Regardless of Matriculation Date

A. REQUIRED COURSES (35-37)

01:119:115,116 General Biology I, II (4,4) or 01:119:101,102 General Biology (4,4)
01:119:117 Biological Research Laboratory (2)
01:160:161,162 General Chemistry I, II (4,4) or equivalent
01:160:171 Introduction to Experimentation (1)

11:067:142 Animal Science (3)

11:067:300 Integrative Physiology (4) or 01:146:356 Systems Physiology (3)

11:067:327 Animal Reproduction (3)

11:067:328 Animal Genetics (3) or 01:447:380 Genetics (4 cr)

11:067:330 Animal Nutrition (3)

11:067:331 Animal Nutrition Laboratory (1)

B. OPTIONS (42-61)

1. Preveterinary Medicine and Research (57-61)

Required Courses (35-36)

01:160:307-308 Organic Chemistry (4,4)

01:160:311 Organic Chemistry Laboratory (2)

01:640:135 Calculus I (4) or 01:640:151 Calculus for Mathematical and Physical Sciences (4)

01:750:193-194 Physics for the Sciences (4,4) or equivalent

01:960:401 Basic Statistics for Research (3)

11:115:403,404 General Biochemistry (4,3) or 01:694:407,408 Molecular Biology and Biochemistry (3,3)

11:680:390 General Microbiology (4) or 01:447:390 General Microbiology (4)

Option-specific Electives: at least three of the following (9-12):

01:146:322 Human Histology (4)

01:146:328 Human Parasitology (3)

01:146:474 Immunology (3)

01:377:213 Functional Human Anatomy (4)

01:377:424 Human Anatomy (4)

01:640:136 Calculus II (4) or equivalent

01:694:315 Introduction to Molecular Biology and Biochemistry Research (3) or equivalent

11:067:390 Equine Nutrition (3)

11:067:391 Comparative Mammalian Anatomy (3)

11:067:398 Advanced Equine Health Care and Management (3)

11:067:404 Animal Diseases (3)

11:067:410 Neuroendocrinology (3)

11:067:416 In Vivo Lab Animal Techniques

11:067:430 Animal Microtechniques and Tissue Culture (4)

11:067:450 Endocrinology (4)

11:067:490 Pathophysiology (3)

11:067:491 Reproductive and Developmental Toxicology (3)

11:067:492 Molecular and Cellular Physiology (3)

11:126:481 Molecular Genetics (3) and 11:126:482 Molecular Genetics Laboratory (4)

11:216:441 Animal Behavior (3) or equivalent

11:370:406 Medical and Veterinary Entomology (3)

Experiential Learning courses (7); no more than 6 credits from practicum or research courses.

01:090:320 Peer Instructor Education (3)

11:015:483 Research Problems: Agriculture and Environmental Science (BA)

11:015:484 Research Problems: Agriculture and Environmental Science (BA)

11:067:150 Introduction to Animal Handling (P/NC 1)

11:067:175 Animal Handling, Fitting, and Exhibition (P/NC 1)

11:067:176 Animal Handling, Fitting, and Exhibition Supervisor (P/NC 1)

11:067:201 Cattle Practicum (2)

11:067:202 Small Ruminant Practicum (2)

11:067:203 Swine Practicum (2)

11:067:205 Laboratory Animal Practicum (2)

11:067:207 Horse Practicum (2)

11:067:210 Introduction to Veterinary Technology (3)

11:067:260 Animal Evaluation and Selection (3)

11:067:275 Laboratory Animal Science: Management and Techniques (3)

11:067:322 Dairy Cattle Artificial Insemination (1)

11:067:406 Farm Productivity Analysis (3)

11:067:411 Studies in Animal Science (BA)

11:067:414 Teaching in Animal Science (BA)

11:067:415 Leadership in Animal Science (BA)

11:067:416 In Vivo Lab Animal Techniques (3)

11:067:493,494 Research in Animal Science (BA, BA)

11:902:300,301,400 SPIN (3-6)

11:554:487,488 George H. Cook Scholars Program (3-6, 3-6)

Animal Science Electives (6)
At least 6 additional credits approved by the adviser, depending on the student's interests and career goals. See additional courses listed in the Animal Science (067) section of the Course Listings chapter.

2. Companion Animal Science (49)

Required courses (36)

01:160:209 Elementary Organic Chemistry (3) or equivalent

01:160:211 Elementary Organic Chemistry Laboratory (1) or equivalent

01:640:115 Precalculus College Mathematics (4) or equivalent

11:115:301 Introductory Biochemistry (3)

11:115:313 Introductory Biochemistry Laboratory (1)

11:373:121,122 Principles and Applications if Microeconomics/Macroeconomics (3,3)

11:067:101 Careers in Animal Science (3)

11:067:250 Companion Animal Science (3)

11:067:404 Animal Diseases (3)

11:704:441 Animal Behavior (3)

At least two of the following (6):

01:830:311 Learning Processes (3)

01:830:313 Physiological Psychology (3)

01:830:315 Comparative Psychology (3)

11:067:395 Animal Assisted Therapy (3)

11:067:460 Animals and the Law (3)

11:067:461 Topics in Companion Animal Science Issues (3)

11:216:240 Behavioral Biology (3)

11:216:269 Evolution of Animal Behavior (3)

Option-specific Electives (6):

11:067:275 Laboratory Animal Science: Management and Techniques (3)

11:067:322 Dairy Cattle Artificial Insemination (1)

11:067:336 Livestock Production and Management II (3)

11:067:384 Horse Management (3)

11:067:390 Equine Nutrition (3)

11:067:391 Comparative Mammalian Anatomy (3)

11:067:395 Animal Assisted Therapy (3)

11:067:398 Advanced Equine Health Care & Management (3)

11:067:401 Topics in Equine Science (3)

11:067:402 Equine Exercise Physiology (3)

11:067:406 Farm Productivity Analysis (3)

11:067:410 Neuroendocrinology (3)

11:067:413 Developing Future Leaders for the Equine Industry (1)

11:067:450 Endocrinology (4)

11:216:323 Ornithology (4)

11:216:325 Vertebrate Zoology (4)

Experiential Learning courses (7); no more than 6 credits from practicum or research courses.

01:090:320 Peer Instructor Education (3)

11:015:483 Research Problems: Agriculture and Environmental Science (BA)

11:015:484 Research Problems: Agriculture and Environmental Science (BA)

11:067:150 Introduction to Animal Handling (P/NC 1)

11:067:175 Animal Handling, Fitting, and Exhibition, Section DO (P/NC 1)

11:067:176 Animal Handling, Fitting, and Exhibition, Supervisor (P/NC 1)

11:067:201 Cattle Practicum (2)

11:067:202 Small Ruminant Practicum (2)

11:067:203 Swine Practicum (2)

11:067:205 Laboratory Animal Practicum (2)

11:067:207 Horse Practicum (2)

11:067:210 Introduction to Veterinary Technology (3)

11:067:275 Laboratory Animal Science: Management and Techniques (3)

11:067:322 Dairy Cattle Artificial Insemination (1)

11:067:336 Production Animal Management (3)

11:067:406 Farm Productivity Analysis (3)

11:067:411 Studies in Animal Science (BA)

11:067:414 Teaching in Animal Science (BA)

11:067:415 Leadership in Animal Science (BA)

11:067:416 In Vivo Lab Animal Techniques (3)

11:067:493,494 Research in Animal Science (BA,BA)

11:902:300,301,400 SPIN (3-6) in a companion animal-related field

11:554:487,488 George H. Cook Scholars Program (3-6, 3-6) or equivalent

3. Laboratory Animal Science (49)

Required Courses (36)

01:160:307-308 Organic Chemistry (4,4)

01:160:311 Organic Chemistry Laboratory (2) or 01:160:313,314 Organic Chemistry Laboratory (1,1)

01:640:115 Precalculus College Mathematics (4) or equivalent

01:960:401 Basic Statistics for Research (3)

11:067:205 Laboratory Animal Practicum (2)

11:067:275 Laboratory Animal Science: Management and Techniques (3)

11:067:404 Animal Diseases (3)

11:067:430 Animal Microtechniques and Tissue Culture (4)

11:373:121 Principles and Applications or Microeconomics (3)

11:680:390 General Microbiology (4) or 01:447:390 General Microbiology (4)

Experiential Learning courses (7); no more than 6 credits from practicum or research courses.

01:090:320 Peer Instructor Education (3)

11:015:483 Research Problems: Agriculture and Environmental Science (BA)

11:015:484 Research Problems: Agriculture and Environmental Science (BA)

11:067:150 Introduction to Animal Handling (P/NC 1)

11:067:175 Animal Handling, Fitting, and Exhibition (P/NC 1)

11:067:176 Animal Handling, Fitting, and Exhibition Supervisor (P/NC 1)

11:067:201 Cattle Practicum (2)

11:067:202 Small Ruminant Practicum (2)

11:067:203 Swine Practicum (2)

11:067:207 Horse Practicum (2)

11:067:210 Introduction to Veterinary Technology (3)

11:067:260 Animal Evaluation and Selection (3)

11:067:322 Dairy Cattle Artificial Insemination (1)

11:067:336 Production Animal Management (3)

11:067:406 Farm Productivity Analysis (3)

11:067:411 Studies in Animal Science (BA)

11:067:414 Teaching in Animal Science (BA)

11:067:415 Leadership in Animal Science (BA)

11:067:416 In Vivo Lab Animal Techniques (3)

11:067:493,494 Research in Animal Science (BA, BA)

11:902:300,301,400 SPIN (3-6)

11:554:487,488 George H. Cook Scholars Program (3-6, 3-6)

Option-specific Electives (6)

11:067:101 Careers in Animal Science (3)

11:067:322 Dairy Cattle Artificial Insemination (1)

11:067:336 Livestock Production and Management II (3)

11:067:384 Horse Management (3)

11:067:390 Equine Nutrition (3)

11:067:391 Comparative Mammalian Anatomy (3)

11:067:395 Animal Assisted Therapy (3)

11:067:398 Advanced Equine Health Care & Management (3)

11:067:401 Topics in Equine Science (3)

11:067:402 Equine Exercise Physiology (3)

11:067:406 Farm Productivity Analysis in the Animal Sciences (3)

11:067:410 Neuroendocrinology (3)

11:067:416 In Vivo Lab Animal Techniques (3)

11:067:450 Endocrinology (4)

11:067:460 Animals and the Law (3)

11:067:490 Pathophysiology (3)

4. Equine and Production Animal Science (50)

Required courses (33)

01:640:111,112 Precalculus Pts1, 2 (2,2) or 01:640:115 Precalculus College Mathematics (4) or 01:640:135 Calculus I (4) or 01:640:151 Calculus for Mathematical and Physical Sciences (4)

11:960:285 Introductory Statistics for Business (3)

11:067:336 Production Animal Management (3)

11:067:384 Horse Management (3)

11:067:406 Farm Productivity Analysis (3)

11:373:121,122 Principles and Applications of Microeconomics/Macroeconomics (3,3) or 01:220:102,103 Introduction to Microeconomics/Macroeconomics (3,3)

11:373:231 Introduction to Marketing (3) or 11:020:305 Starting and Managing a Small Farm (3)

11:373:241 Introduction to Management (3)

33:010:272 Introduction to Financial Accounting (3) or 11:373:200 Agricultural Accounting (3)

Experiential Learning courses (7); no more than 6 credits from practicum or research courses.

01:090:320 Peer Instructor Education (3)

11:015:483 Research Problems: Agriculture and Environmental Science (BA)

11:015:484 Research Problems: Agriculture and Environmental Science (BA)

11:067:150 Introduction to Animal Handling (P/NC 1)

11:067:175 Animal Handling, Fitting, and Exhibition, Section HO (P/NC 1)

11:067:176 Animal Handling, Fitting, and Exhibition Supervisor (P/NC 1)

11:067:201 Cattle Practicum (2)

11:067:202 Small Ruminant Practicum (2)

11:067:203 Swine Practicum (2)

11:067:205 Laboratory Animal Practicum (2)

11:067:207 Horse Practicum (2)

11:067:210 Introduction to Veterinary Technology (3)

11:067:260 Animal Evaluation and Selection (3) 11:067:275 Laboratory Animal Science: Management and Techniques (3)

11:067:322 Dairy Cattle Artificial Insemination (1)

11:067:411 Studies in Animal Science (BA), with equine research faculty

11:067:414 Teaching in Animal Science (BA)

11:067:415 Leadership in Animal Science (BA)

11:067:416 In Vivo Lab Animal Techniques (3)

11:067:493,494 Research in Animal Science (BA,BA), with equine research faculty

11:902:300,301,400 SPIN (3-6), in equine-related field

11:554:487,488 George H. Cook Scholars Program (3-6, 3-6)

Option-specific Electives (6)

11:067:310 Domestic Animal Behavior and Welfare (3)

11:067:390 Equine Nutrition (3)

11:067:391 Comparative Mammalian Anatomy (3)

11:067:398 Advanced Equine Health Care and Management (3)

11:067:401 Topics in Equine Science (3)

11:067:402 Equine Exercise Physiology (3)

11:067:404 Animal Diseases (3)

11:067:460 Animals and the Law (3)

11:216:360 Animal Physiological Ecology (3)

11:373:321 Economics of Production (3)

11:375:453 Soil Ecology (3)

11:776:301 The Grain Crops (3)

11:776:440 Soil Fertility (3)

Animal Science Electives

At least 6 additional credits approved by the adviser, depending on the student's interests and career goals. See additional courses listed in the Animal Science (067) section of the Course Listings chapter. Suggested courses are:

11:020:210 Introduction to Agriculture and Food Systems (3)

11:067:101 Careers in Animal Science (3)

11:067:260 Animal Evaluation and Selection (3), also EL

11:067:250 Companion Animal Science (3)

11:067:275 Lab Animal Science: Management and Techniques (3)

11:067:295 Biosecurity in Animal Agriculture (3)

11:067:296 Honors Seminar (3)

11:067:310 Domestic Animal Behavior and Welfare (3)

11:067:322 Dairy Cattle Artificial Insemination (1)

11:067:391 Comparative Mammalian Anatomy (3)

11:067:410 Neuroendocrinology (3)

11:067:430 Animal Microtechniques and Tissue Culture (4)

11:067:450 Endocrinology (4)

11:067:460 Animals and the Law (3)

11:067:490 Pathophysiology (3)

11:067:491 Reproductive and Developmental Toxicology (3)

11:067:492 Molecular and Cellular Physiology (3)

11:373:205 Small Business Essentials (3)

11:776:200 Modern Crop Production (3)

11:776:221 Principles of Organic Crop Production (3)

C. UNSPECIFIED ELECTIVES

In addition to courses meeting the above requirements, students can take other courses offered by the university, for which they meet the course eligibility requirements, to bring their total number of credits to the minimum of 120 (matriculated 2018 or later) or 128 (matriculated prior to 2018) required for graduation.

ANTHROPOLOGY 070

Department of Anthropology, School of Arts and Sciences

Website: Here

Chair: Omar Dewachi

Undergraduate Director: Dan Cabanes

Professors:

Susan Marie Cachel, B.A., M.A., Ph.D., Chicago

Lee Cronk, B.A., Northwestern; M.A., Wisconsin; Ph.D., Northwestern

Craig S. Feibel, B.A., Dartmouth; M.S., Iowa; Ph.D., Utah

David M. Hughes, B.A., Princeton; M.A., Ph.D., California (Berkeley)

Carmel Schrire, B.A., Capetown (South Africa); B.A., Cambridge; Ph.D., Australian National

Erin Vogel, B.A., Colby; Ph.D., Stony Brook

Associate Professors:

Ulla Berg, B.A., M.Phil., Copenhagen; M.A., Ph.D., New York

Omar Dewachi, M.B.Ch.B., University of Baghdad; M.A., Ph.D., Harvard

Parvis Ghassem-Fachandi, B.A., M.A., Freie Universität (Germany); M.A., Ph.D., Cornell

Zeynep Gürsel, B.A., Yale; M.A., Ph.D., California (Berkeley)

Ryne Palombit, B.A., B.S., New Mexico State; Ph.D., California (Davis)

Louisa Schein, B.A., Brown; M.A., Ph.D., California (Berkeley)

Robert S. Scott, B.A., Yale; M.A., Ph.D., Texas (Austin)

Dan Cabanes, B.A., M.A., Ph.D., Rovira i Vigili (Tarragona, Spain)

Assistant Professors:

Becky L. Schulthies, B.A., M.A., Brigham Young; Ph.D., Arizona

Christien Tompkins, B.A., Columbia; Ph.D., Chicago

Assistant Teaching Professor:

Pilar Rau, B.A., Maryland (Baltimore County); M.Phil., Ph.D., New York

Hylke De Jong, Doctoraal,Leiden (the Netherlands); Ph.D., Bristol (UK)

Teaching Instructors:

Anthropology 070 (SAS)

Learning Goals

Learning Goals

1. Students gain knowledge that will allow them to identify, explain, and historically contextualize the primary objectives, fundamental concepts, modes of analysis, and central questions in their major field and demonstrate proficiency in their use of this knowledge.
2. Students are able to demonstrate proficiency in critical thinking skills.
3. Students are able to demonstrate proficiency using current methods in their major fields, including library research skills.
4. Students are able to express themselves knowledgeably and proficiently in writing about central issues in their major field.
5. Students are able to express themselves knowledgeably and proficiently in speaking about central issues in their major field.

Anthropology 070 (SAS)

Major Requirements

Major Requirements

There are three options for completing a major in anthropology: a B.A. track in anthropology, a B.A. track in cultural anthropology, and a B.S. in evolutionary anthropology.

Bachelor of Arts (B.A.) in Anthropology

The B.A. track in anthropology trains students in the discipline's four traditional subfields: cultural, biological, linguistic anthropology, and archaeology, providing them with a holistic understanding of humans as biological, cultural, and linguistic beings, both in the present and the past. This track is intended for students who seek a comprehensive understanding of human cultural and physical diversity within a broad social, historical, and evolutionary framework.

Requirements for a major in anthropology. The degree code is 070.

Total number of required credits: 40 credits, of which at least 18 credits are at the 300 or 400 level.

Requirements for anthropology track

INTRODUCTORY COURSES: four courses required (16 credits)

01:070:101 Culture and Social Life

01:070:102 Introduction to Human Evolution

01:070:105 Introduction to Archaeology

01:070:108 Language, Culture, and Society

300- OR 400-LEVEL COURSES: one course in three of the four anthropology subdisciplines (9 credits):

300- OR 400-LEVEL CULTURAL ANTHROPOLOGY COURSES

01:070:302 Culture and the Environment

01:070:303 Wealth and Culture

01:070:304 Political Anthropology

01:070:305 Anthropology of Development

01:070:306 Space, Place, and Practice

01:070:307 Medical Anthropology

01:070:308 Anthropology of Religion

01:070:309 Visual Anthropology

01:070:311 History of Anthropology

01:070:317 Method and Analysis in Cultural Anthropology

01:070:318 Reading Ethnographic Writing

01:070:319 Anthropology and Human Rights

01:070:320 Diaspora, Race, and Ethnicity in the United States

01:070:321 Latino Ethnography

01:070:322 Anthropology of Islam

01:070:323 Women Writing Culture

01:070:324 Globalization, Sex, and Families

01:070:338 Culture, Wealth, and Power in Africa

01:070:360 Law, Justice, Rights

01:070:367 Anthropology Goes to the Movies

01:070:368 Media and Culture

01:070:370 Life and Death in Anthropological Perspective

01:070:371 The Politics of Culture

01:070:372 Body Politics

01:070:373 Visual Ethnography of Everyday Life

01:070:374 Localities and Global Systems

01:070:376 Power and Difference

01:070:378 The Anthropology of Gender

01:070:379 Gender and Power in Africa

01:070:380 Culture, Memory, History

01:070:389 Ethnography of Gender in South Asia

01:070:406 Rights and Wrongs of Indigenous Peoples

01:070:407 Documenting Latino Lives

01:070:408 Video Production Lab for Latino Lives

01:070:410 Explanation in Anthropology

01:070:417 Writing Ethnography

01:070:486 Gender Development, Environment: Policies, Politics, Perspectives

300- OR 400-LEVEL LINGUISTIC ANTHROPOLOGY COURSES

01:070:312 Language and Social Diversity

01:070:341 Language, Food, and Society

300- OR 400-LEVEL BIOLOGICAL ANTHROPOLOGY COURSES

01:070:316 Quantitative Methods in Evolutionary Anthropology

01:070:325 Evolution and Culture

01:070:328 Evolution, Cooperation, and Conflict

01:070:329 Human Evolutionary Genetics

01:070:336 Primatology, Wildlife Ecology, and Conservation in Kenya

01:070:337 Field Methods and Analysis in Primatology in Kenya

01:070:345 Study Abroad - Applied Conservation and Ecosystem Management

01:070:346 Honors Study Abroad - Applied Conservation and Ecosystem Management

01:070:347 Study Abroad - Advanced Primate Behavior and Ecology

01:070:348 Primate Behavioral Ecology

01:070:350 Primatology and Human Evolution

01:070:356 Human Variation

01:070:358 Human Osteology

01:070:359 Human Osteology Laboratory

01:070:361 Hunters and Gatherers

01:070:362 Evolution of Human Diet

01:070:377 Evolution and Religion

01:070:390 Fossil Hominin Anatomy

01:070:398 Field Study in Paleoanthropology

01:070:402 Primate Conservation Biology

01:070:409 Primate Nutritional Ecology

01:070:422 Theories in Physical Anthropology

01:070:491 Capstone Colloquium in Evolutionary Medicine

300- OR 400-LEVEL ARCHAEOLOGY COURSES

01:070:313 Historical Archaeology

01:070:314 Prehistoric Funerary Archaeology

01:070:326 Life in the Pleistocene

01:070:327 Life in the Early Holocene

01:070:330 Archaeology of Australia

01:070:332 North American Archaeology

01:070:333 Colonial Archaeology

01:070:334 Field Study in Archaeology

01:070:335 Analysis of Archaeological Data

01:070:339 Caribbean Archaeology

01:070:391 Lithic Analysis in Archaeology

01:070:392 Faunal Analysis in Archaeology

01:070:393 Cultural Resource Management

01:070:394 Geological Context in Paleoanthropology

01:070:395 Quantification of Archaeological Data

01:070:404 Advanced Seminar in Archaeology

01:070:412 Topics in African Prehistory and Paleoanthropology

01:070:426 South African Archaeology

ELECTIVE COURSES: five courses required, of which at least three are at the 300 or 400 level (15 credits)

Honors in Anthropology credit, and one approved independent study course, may be used toward elective credit. No course may fulfill more than one subdisciplinary requirement. Credit may be given for courses in other departments if approved. All courses applied to this major must be completed with a grade of C or better.

Bachelor of Arts (B.A.) in Cultural Anthropology

The B.A. track in cultural anthropology focuses on the issues, modes of inquiry, fieldwork strategies, methods of data collection and analysis, and forms of ethnographic representation that characterize contemporary cultural anthropology. The cultural anthropology track is intended for students interested in current cultural, social, and political issues, especially in understanding the relationship of global processes to new cultural forms and social inequalities. Students learn how cultural theory is integrated with empirical ethnographic research and how to balance knowledge of worldwide interconnections with in-depth knowledge of particular geographic regions (e.g., Africa, Asia, Latin America, and the United States). Students trained in cultural anthropology develop a unique set of skills enabling them to work successfully in many different cultural environments; a major in cultural anthropology also provides excellent preparation for students planning graduate training in anthropology or other disciplines, including professional training in law, teaching, and social work.

Requirements for cultural anthropology track

Total number of required credits: 40 credits

INTRODUCTORY COURSES: both required (8 credits)

01:070:101 Culture and Social Life

01:070:108 Language, Culture, and Society

GEOGRAPHIC AREA COURSES: two courses required (6 credits)

01:070:223 Anthropology of Latin America

01:070:238 Anthropology of Europe

01:070:242 Anthropology of the Middle East

01:070:243 Anthropology of Africa

01:070:244 Ethnographies of South Asia

01:070:246 Anthropology of Southeast Asia

01:070:248 Anthropology of China

01:070:250 Anthropology of the Contemporary United States

01:070:320 Diaspora, Race, and Ethnicity in the United States

01:070:338 Culture, Wealth, and Power in Africa

01:070:379 Gender and Power in Africa

01:070:389 Ethnography of Gender in South Asia

GLOBAL PERSPECTIVES ON JUSTICE, INEQUALITY, AND DIFFERENCE: one course required (3 credits)

01:070:303 Wealth and Culture

01:070:304 Political Anthropology

01:070:305 Anthropology of Development

01:070:312 Language and Social Diversity

01:070:319 Anthropology and Human Rights

01:070:324 Globalization, Sex, and Families

01:070:360 Law, Justice, Rights

01:070:371 The Politics of Culture

01:070:372 Body Politics

01:070:374 Localities and Global Systems

01:070:376 Power and Difference

01:070:378 The Anthropology of Gender

01:070:380 Culture, Memory, History

01:070:406 Rights and Wrongs of Indigenous Peoples

01:070:486 Gender, Development, Environment: Policies, Politics, Perspectives

METHODS AND ANALYSIS IN CULTURAL ANTHROPOLOGY: one course required (3 credits)

01:070:317 Method and Analysis in Cultural Anthropology

ELECTIVE COURSES: seven cultural anthropology courses required (21 credits)

01:070:111 Extinction

01:070:216 Anthropology and Contemporary Issues

01:070:217 Psychology and Culture

01:070:220 Food and Culture

01:070:222 Sexuality and Eroticism in Global Perspective

01:070:223 Anthropology of Latin America

01:070:225 Gender in Global Perspective

01:070:230 Anthropology of Native North Americans

01:070:238 Anthropology of Europe

01:070:242 Anthropology of the Middle East

01:070:243 Anthropology of Africa

01:070:244 Ethnographies of South Asia

01:070:246 Anthropology of Southeast Asia

01:070:248 Anthropology of China

01:070:250 Anthropology of the Contemporary United States

01:070:293 Current Issues in Cultural and Linguistic Anthropology

01:070:294 Current Issues in Cultural and Linguistic Anthropology

01:070:295 Current Issues in Cultural and Linguistic Anthropology

01:070:302 Culture and the Environment

01:070:303 Wealth and Culture

01:070:304 Political Anthropology

01:070:305 Anthropology of Development

01:070:306 Space, Place, and Practice

01:070:307 Medical Anthropology

01:070:308 Anthropology of Religion

01:070:309 Visual Anthropology

01:070:311 History of Anthropology

01:070:312 Language and Social Diversity

01:070:317 Method and Analysis in Cultural Anthropology

01:070:318 Reading Ethnographic Writing

01:070:319 Anthropology and Human Rights

01:070:320 Diaspora, Race, and Ethnicity in the United States

01:070:321 Latino Ethnography

01:070:322 Anthropology of Islam

01:070:323 Women Writing Culture

01:070:338 Culture, Wealth, and Power in Africa

01:070:341 Language, Food, and Society

01:070:360 Law, Justice, Rights

01:070:367 Anthropology Goes to the Movies

01:070:368 Media and Culture

01:070:370 Life and Death in the Anthropological Perspective

01:070:371 Politics of Culture

01:070:372 Body Politics

01:070:373 Visual Ethnography of Everyday Life

01:070:374 Localities and Global Systems

01:070:376 Power and Difference

01:070:378 The Anthropology of Gender

01:070:379 Gender and Power in Africa

01:070:380 Culture, Memory, History

01:070:389 Ethnography of Gender in South Asia

01:070:406 Rights and Wrongs of Indigenous Peoples

01:070:407 Documenting Latino Lives

01:070:408 Video Production Lab for Latino Lives

01:070:410 Explanation in Anthropology

01:070:417 Writing Ethnography

01:070:486 Gender, Development, Environment: Policies, Politics, Perspectives

Honors in Anthropology credit, and one approved independent study course, may be used toward the elective requirement. No course may fulfill more than one requirement. All courses applied to this major must be completed with a grade of C or better.

Bachelor of Science (B.S.) in Evolutionary Anthropology

The B.S. degree in evolutionary anthropology is designed for students who plan to go to graduate school in archaeology, biological anthropology, paleoanthropology, geoarchaeology, or other related fields in human evolutionary studies (e.g., skeletal biology, forensic science, primatology). This option prepares students with a multidisciplinary, science-oriented background for careers in the field of evolutionary anthropology. This degree is also useful and desirable for careers in the medical sciences.

Requirements for evolutionary anthropology track

INTRODUCTORY COURSES: three courses required (070:102 and 105, and 201 or 212) (11 credits)

01:070:102 Introduction to Human Evolution

01:070:105 Introduction to Archaeology

01:070:201 Evolution and Human Behavior

01:070:212 The Life of Primates

STATISTICS COURSE: one course required (3 credits)

01:070:316 Quantitative Methods in Evolutionary Anthropology

01:070:395 Quantification of Archaeological Data

BIOLOGY OR GEOLOGY COURSES: courses required in either subject (8 or 4 credits)

01:119:115 General Biology (4 credits) (formerly 01:119:101)

01:119:116 General Biology (4 credits) (formerly 01:119:102)

01:460:101 Introductory Geology (4 credits)

200 -- 400 LEVEL COURSES: One course in each of the six subdisciplines of evolutionary anthropology, of which four are at the 300- or 400-level (18 credits):

I. PRIMATOLOGY: one course required (3 credits)

01:070:212 The Life of Primates

01:070:336 Primatology, Wildlife Ecology, and Conservation in Kenya

01:070:337 Field Methods and Analysis in Primatology in Kenya

01:070:347 Study Abroad - Advanced Primate Behavior and Ecology

01:070:348 Primate Behavioral Ecology

01:070:350 Primatology and Human Evolution

01:070:402 Primate Conservation Biology

01:070:409 Primate Nutritional Ecology

II. SOCIAL EVOLUTION: one course required (3 credits)

01:070:201 Evolution and Human Behavior

01:070:325 Evolution and Culture

01:070:328 Evolution, Cooperation, and Conflict

01:070:356 Human Variation

01:070:361 Hunters and Gatherers

01:070:377 Evolution and Religion

III. SKELETAL BIOLOGY/HOMINID PALEONTOLOGY: one course required (3 credits)

01:070:215 Survey of Fossil Primates

01:070:358 Human Osteology

01:070:359 Human Osteology Laboratory

01:070:362 Evolution of Human Diet

01:070:390 Fossil Hominin Anatomy

01:070:398 Field Study in Paleoanthropology

IV. ARCHAEOLOGY: one course required (3 credits)

01:070:206 Survey of New World Prehistory

01:070:207 Prehistoric Archaeology of Europe

01:070:313 Historical Archaeology

01:070:314 Prehistoric Funerary Archaeology

01:070:326 Life in the Pleistocene

01:070:327 Life in the Early Holocene

01:070:330 Archaeology of Australia

01:070:332 North American Archaeology

01:070:333 Colonial Archaeology

01:070:334 Field Study in Archaeology

01:070:335 Analysis of Archaeological Data

01:070:339 Caribbean Archaeology

01:070:391 Lithic Analysis in Archaeology

01:070:392 Faunal Analysis in Archaeology

01:070:393 Cultural Resource Management

01:070:404 Advanced Seminar in Archaeology

01:070:412 Topics in African Prehistory and Paleoanthropology

01:070:415 Prehistoric Archaeology of New Jersey

01:070:426 South African Archaeology

V. GEOARCHAEOLOGY/PALEOECOLOGY: one course required (3 credits)

01:070:213 Environment and Human Evolution

01:070:351 Fieldwork in Paleoecology

01:070:352 Practicum in Geoarchaeology

01:070:394 Geological Context in Paleoanthropology

01:460:340 Sedimentary Geology

01:460:396 Geochronology in Geosciences and Anthropology

VI. ANTHROPOLOGICAL GENETICS: one course required (3 credits)

01:070:240 Introduction to Molecular Evolutionary Anthropology

01:070:329 Human Evolutionary Genetics

ELECTIVE COURSES: four or five courses in evolutionary anthropology required (10 or 14 credits)

01:070:111 Extinction

01:070:201 Evolution and Human Behavior

01:070:206 Survey of New World Prehistory

01:070:207 Prehistoric Archaeology of Europe

01:070:212 The Life of Primates

01:070:213 Environment and Human Evolution

01:070:215 Survey of Fossil Primates

01:070:218 Introduction to Forensic Anthropology

01:070:240 Introduction to Molecular Evolutionary Anthropology

01:070:296 Current Issues in Evolutionary Anthropology

01:070:297 Current Issues in Evolutionary Anthropology

01:070:298 Current Issues in Evolutionary Anthropology

01:070:313 Historical Archaeology

01:070:314 Prehistoric Funerary Archaeology

01:070:316 Quantitative Methods in Evolutionary Anthropology

01:070:325 Evolution and Culture

01:070:326 Life in the Pleistocene

01:070:327 Life in the Early Holocene

01:070:328 Evolution, Cooperation, and Conflict

01:070:329 Human Evolutionary Genetics

01:070:330 Archaeology of Australia

01:070:332 North American Archaeology

01:070:333 Colonial Archaeology

01:070:336 Primatology, Wildlife Ecology, and Conservation in Kenya

01:070:337 Field Methods and Analysis in Primatology in Kenya

01:070:339 Caribbean Archaeology

01:070:345 Study Abroad - Applied Conservation and Ecosystem Management

01:070:346 Honors Study Abroad - Applied Conservation and Ecosystem Management

01:070:348 Primate Behavioral Ecology

01:070:350 Primatology and Human Evolution

01:070:351 Fieldwork in Paleoecology

01:070:352 Practicum in Geoarchaeology

01:070:356 Human Variation

01:070:358 Human Osteology

01:070:359 Human Osteology Laboratory

01:070:361 Hunters and Gatherers

01:070:362 Evolution of Human Diet

01:070:364 Sex Roles and Social Structure

01:070:377 Evolution and Religion

01:070:390 Fossil Hominin Anatomy

01:070:391 Lithic Analysis in Archaeology

01:070:392 Faunal Analysis in Archaeology

01:070:393 Cultural Resource Management

01:070:394 Geological Context in Paleoanthropology

01:070:395 Quantification of Archaeological Data

01:070:397 Practicum in Vertebrate Paleontology

01:070:398 Field Study in Paleoanthropology

01:070:402 Primate Conservation Biology

01:070:404 Advanced Seminar in Archaeology

01:070:409 Primate Nutritional Ecology

01:070:412 Topics in African Prehistory and Paleoanthropology

01:070:415 Prehistoric Archaeology of New Jersey

01:070:422 Theories in Physical Anthropology

01:070:426 South African Archaeology

Honors in Anthropology credit, and one approved independent study course, may be used toward elective credit. No course may fulfill more than one requirement. Credit may be given for courses in other departments if approved. All courses applied to this major must be completed with a grade of C or better.

Anthropology 070 (SAS)

Minor Requirements

Minor Requirements

Minor in Anthropology

This minor is designed for students who seek an overview of the discipline's four traditional subfields: cultural, biological, and linguistic anthropology and archaeology.

Total number of required credits: 20 credits

Required courses include one introductory course in cultural anthropology (01:070:101 or 108) and one in evolutionary anthropology (01:070:102 or 105). Of the remaining 12 credits, at least 6 must be at the 300 level or above. All courses applied to this minor must be completed with a grade of C or better.

Minor in Cultural Anthropology

This minor is intended for students interested in an overview of the issues, modes of inquiry, fieldwork strategies, methods of data collection and analysis, and forms of ethnographic representation that characterize contemporary cultural anthropology. It is designed for students interested in current cultural and political issues, especially in understanding the relationship of global processes to local cultural forms and social inequalities. All courses applied to this minor must be completed with a grade of C or better.

Total number of required credits: 20 credits, of which 6 are at the 300 level or above

INTRODUCTORY COURSES: both courses required (8 credits)

01:070:101 Culture and Social Life

01:070:108 Language, Culture, Society

GEOGRAPHIC AREA COURSES: one course required (3 credits)

01:070:223 Anthropology of Latin America

01:070:238 Anthropology of Europe

01:070:242 Anthropology of the Middle East

01:070:243 Anthropology of Africa

01:070:244 Ethnographies of South Asia

01:070:246 Anthropology of Southeast Asia

01:070:248 Anthropology of China

01:070:250 Anthropology of the Contemporary United States

01:070:320 Diaspora, Race, and Ethnicity in the United States

01:070:338 Culture, Wealth, and Power in Africa

01:070:379 Gender and Power in Africa

01:070:389 Ethnography of Gender in South Asia

ELECTIVE COURSES: three courses required (9 credits)

01:070:111 Extinction

01:070:216 Anthropology and Contemporary Issues

01:070:217 Psychology and Culture

01:070:220 Food and Culture

01:070:222 Sexuality and Eroticism in Global Perspective

01:070:223 Anthropology of Latin America

01:070:225 Gender in Global Perspective

01:070:230 Anthropology of Native North Americans

01:070:238 Anthropology of Europe

01:070:243 Anthropology of Africa

01:070:244 Ethnographies of South Asia

01:070:246 Anthropology of Southeast Asia

01:070:248 Anthropology of China

01:070:250 Anthropology of the Contemporary United States

01:070:293 Current Issues in Cultural and Linguistic Anthropology

01:070:294 Current Issues in Cultural and Linguistic Anthropology

01:070:295 Current Issues in Cultural and Linguistic Anthropology

01:070:302 Culture and the Environment

01:070:303 Wealth and Culture

01:070:304 Political Anthropology

01:070:305 Anthropology of Development

01:070:306 Space, Place, and Practice

01:070:307 Medical Anthropology

01:070:308 Anthropology of Religion

01:070:309 Visual Anthropology

01:070:311 History of Anthropology

01:070:312 Language and Social Diversity

01:070:317 Method and Analysis in Cultural Anthropology

01:070:318 Reading Ethnographic Writing

01:070:319 Anthropology and Human Rights

01:070:320 Diaspora, Race, and Ethnicity in the United States

01:070:321 Latino Ethnography

01:070:322 Anthropology of Islam

01:070:323 Women Writing Culture

01:070:324 Globalization, Sex, and Families

01:070:338 Culture, Wealth, and Power in Africa

01:070:341 Language, Food, and Society

01:070:365 Anthropology of Childhood

01:070:367 Anthropology Goes to the Movies

01:070:368 Media and Culture

01:070:370 Life and Death in Anthropological Perspective

01:070:371 The Politics of Culture

01:070:372 Body Politics

01:070:373 Visual Ethnography of Everyday Life

01:070:374 Localities and Global Systems

01:070:376 Power and Difference

01:070:378 The Anthropology of Gender

01:070:379 Gender and Power in Africa

01:070:380 Culture, Memory, History

01:070:389 Ethnography of Gender in South Asia

01:070:406 Rights and Wrongs of Indigenous Peoples

01:070:407 Documenting Latino Lives

01:070:408 Video Production Lab for Latino Lives

01:070:410 Explanation in Anthropology

01:070:417 Writing Ethnography

01:070:486 Gender, Development, Environment: Policies, Politics, Perspectives

Minor in Evolutionary Anthropology

The evolutionary anthropology minor is for students interested in an overview of the diverse approaches and knowledge used by archaeologists, biological anthropologists, cultural anthropologists, paleoanthropologists, geoarchaeologists, and paleoecologists to understand the evolution of human form, physiology, behavior, culture, and ecology, including these aspects of nonhuman primates.

Total number of required credits: 20 credits

Required courses include at least 20 credits, of which 6 are at the 300-level or above. All courses applied to this minor must be completed with a grade of C or better. No pass/fail courses will be accepted.

INTRODUCTORY COURSES: 102, 105, AND 201 or 212 (11 credits)

01:070:102 Introduction to Human Evolution

01:070:105 Introduction to Archaeology

01:070:201 Evolution and Human Behavior

01:070:212 The Life of Primates

ELECTIVE COURSES: 3 courses required; 9 credits, of which 6 are at the 300 level or above

01:070:111 Extinction

01:070:112 World Prehistory

01:070:113 Introduction to Greek and Roman Archaeology

01:070:201 Evolution and Human Behavior

01:070:206 Survey of New World Prehistory

01:070:207 Prehistoric Archaeology of Europe

01:070:212 The Life of Primates

01:070:213 Environment and Human Evolution

01:070:215 Survey of Fossil Primates

01:070:240 Introduction to Molecular Evolutionary Anthropology

01:070:296 Current Issues in Evolutionary Anthropology

01:070:297 Current Issues in Evolutionary Anthropology

01:070:298 Current Issues in Evolutionary Anthropology

01:070:316 Quantitative Methods in Evolutionary Anthropology

01:070:325 Evolution and Culture

01:070:326 Life in the Pleistocene

01:070:327 Life in the Early Holocene

01:070:345 Study Abroad - Applied Conservation and Ecosystem Management

01:070:346 Honors Study Abroad - Applied Conservation and Ecosystem Management

01:070:347 Study Abroad - Advanced Primate Behavior and Ecology

01:070:348 Primate Behavioral Ecology

01:070:350 Primatology and Human Evolution

01:070:356 Human Variation

01:070:358 Human Osteology

01:070:359 Human Osteology Laboratory

01:070:361 Hunters and Gatherers

01:070:362 Evolution of Human Diet

01:070:377 Evolution and Religion

01:070:390 Fossil Hominin Anatomy

01:070:391 Lithic Analysis in Archaeology

01:070:392 Faunal Analysis in Archaeology

01:070:393 Cultural Resource Management

01:070:394 Geological Context in Paleoanthropology

01:070:395 Quantification of Archaeological Data

01:070:397 Practicum in Vertebrate Paleontology

01:070:398 Field Study in Paleoanthropology

01:070:402 Primate Conservation Biology

01:070:404 Advanced Seminar in Archaeology

01:070:409 Primate Nutritional Ecology

01:070:412 Topics in African Prehistory and Paleoanthropology

01:070:415 Prehistoric Archaeology of New Jersey

01:070:426 South African Archaeology

Anthropology 070 (SAS)

Certificate in Evolutionary Medicine

Certificate in Evolutionary Medicine

The certificate in evolutionary medicine is intended for students planning or already pursuing careers in medicine and allied health professions, medical research, public health, or global development. It is anticipated that students may earn the certificate as part of premed preparation in the course of an undergraduate degree, in preparation for an advanced research-oriented degree, as a supplement to a degree in public health, or as continuing education for those pursuing careers in health policy or global development.

Codirectors

Siobain Duffy, Foran Hall 316, 848-932-6299 (siobain@rci.rutgers.edu)

Rob Scott, BIO 210 (robertsc@rutgers.edu)

Prerequisites for Certificate (two courses)

Complete one introductory evolution course with a grade of B or better from among any one of the following:

01:070:102 Introduction to Human Evolution (3)

11:216:110 Evolution, Disease, and Medicine (3)

11:216:251 Fundamentals of Evolution (3)

01:090:274 SAS Honors Program Seminar with a focus on evolution (3)

Complete one quantitative perspectives course with a grade of B or better from among any one of the following:

01:070:316 Quantitative Methods in Evolutionary Anthropology (3)

01:447:302 Quantitative Biology and Bioinformatics (3)

01:960:401 Basic Statistics for Research (3)

Another quantitative course approved by either the SAS or SEBS certificate in evolutionary medicine program codirector

Certificate Requirements (five courses, minimum of 13 credits)

Genetics or Evolutionary Anthropology: one course required (3-4 credits)

01:070:240 Introduction to Molecular Evolutionary Anthropology (3)

01:070:356 Human Variation (3)

01:447:380 Genetics (4)

01:447:384 Genetic Analysis (4)

Evolutionary Approaches to Diet or Evolutionary Physiology: one course required (3 credits)

01:070:362 Evolution of Human Diet (3)

01:070:409 Primate Nutritional Ecology (3)

11:216:360 Animal Physiological Ecology (3)

Genetic Variation and Evolution in Humans or Infectious Microbes: one course required (3 credits)

01:070:356 Human Variation (3)

11:216:302 Parasite Ecology (3)

11:216:405 Evolution of Infectious Disease (3)

Advanced Evolution or Evolutionary Medicine: one course required (3 credits)

01:070:328 Evolution, Cooperation, and Conflict (3)

01:070:348 Primate Behavioral Ecology (3)

01:070:422 Theories in Physical Anthropology (3)

01:447:356 Evolutionary Medicine (3)

01:447:486 Evolutionary Genetics (3)

11:216:486 Principles of Evolution (3)

Capstone Colloquium: (1 credit)

01:070:491 Evolutionary Medicine Capstone Colloquium (1)

Anthropology 070 (SAS)

Departmental Honors Program

Departmental Honors Program

Students with a 3.0 or better cumulative grade-point average and a 3.4 or better average in anthropology at the end of the junior year may make a written application for honors to the undergraduate director in the spring semester of the junior year or the first week of the senior year. Candidates who are accepted spend two semesters conducting original research and writing an honors thesis under the supervision of a faculty member in anthropology (or other qualified faculty approved by the undergraduate director) and take an oral examination on the paper at the end of the senior year. The faculty adviser and one other faculty member will decide the level of honors, if any, after completion of the oral defense.

Anthropology 070 (SAS)

Courses

Courses

01:070:100 ***Introduction to Anthropology (3)***
Central approaches, concepts, and methods of anthropology's four subfields: archaeology and biological, cultural, and linguistic anthropology. Anthropology as comparative study of human physical and cultural diversity, past and present. Provides background for students seeking a firm foundation in the discipline before moving on to higher-level courses.
Does not count toward the major or minor in anthropology.

01:070:101 ***Culture and Social Life (4)***
History of cultural anthropology; changing theoretical and methodological approaches; fieldwork, ethnographic writing, and the culture concept; cross-cultural analyses and comparisons; complex society; local, regional, and global perspectives.

01:070:102 ***Introduction to Human Evolution (4)***
Evolutionary processes, including adaptation and speciation; fossil and archaeological records of human morphological and social-behavioral evolution.

01:070:104 ***Introduction to Microbiomes (3)***
Evolution of microbial life and hosts, symbioses, ecology, pathogens, degradation of the human microbiota and restoration potential; principles of host-associated microbes, how do humans acquire them, their functions; principles relevant to microbiomes such as resilience, resistance, diversity and stability.

Credit not given for this course and 11:680:104.

01:070:105 ***Introduction to Archaeology (4)***
Overview of human prehistory over the past 5 million years, from origins in Africa to the spread of people first to Asia and Europe, and later to Australia and the Americas, culminating in the archaeology of colonial contact between Europe and distant lands.

01:070:108 ***Language, Culture, and Sociey (3)***
Introduction to linguistic anthropology. Language as social action, language and culture, language use in specific sociocultural contexts.
Credit not given for both this course and 01:615:101.

01:070:111 ***Extinction (4)***
An interdisciplinary approach to understanding the idea and the reality of the extinction process. Extinction as a challenge of the 21st century. Topics include extinctions of fossil hominins, cultures, religions and ethnic groups, language, and endangered species; and the possible extinction of our own species.

01:070:112 ***World Prehistory (3)***
An overview of world prehistory from the first human-made tools to the development of farming and herding.

01:070:113 ***Introduction to Greek and Roman Archaeology (3)***
Introductory survey of the archaeology, architecture, and material culture of the Mediterranean world from the Bronze Age throughout the transformation of the Roman Empire following the reign of Constantine. Consideration given to chronological developments, Greek and Roman artistic production in its social and cultural settings, and Classical Art.
Credit not given for both this course and 01:190:215.

01:070:152 ***Bones and Stones Laboratory (1.5)***
Basics of human bone and lithic material analysis; human paleoanthropological fossil record; lithic technologies through time.
Prerequisite: Special permission. This course in conjunction with 3 transfer credits of an introductory course in physical anthropology fills the same evolutionary anthropology requirement as 01:070:102.

01:070:153 ***Anthropology of Art (1.5)***
Issues of cultural relativism, emic and etic description, ethnocentrism, symbolism, ritual, and the politics of representation through the lens of art.

01:070:161 ***Anthropology of Robots and Artificial Intelligence (1.5)***
Anthropological approach to robotics, artificial intelligence, artificial life, and cyborgs; concurrent exploration of anthropological methods and theory, ideas about kinship, personhood, gender, class, race, religion, and "culture."

01:070:170 ***Learning an Endangered Language (1.5)***
Linguistic structure and function; language in ethnohistorical and sociocultural contexts; social life of languages; language shift, obsolescence, endangerment, and revitalization; linguistic relativity; performativity; techniques used by linguists and anthropologists heading to the field to work with endangered languages.

01:070:201 ***Evolution and Human Behavior (3)***
Introduction to the evolutionary biological study of human behavior, including basic evolutionary theory, cultural learning, mating, parenting, and cooperation.

01:070:202 ***Reading Culture and the Environment in Spanish (1.5)***
A Spanish language module attached to 01:070:302 Culture and the Environment. Oral and reading proficiency in environmental topics. Different perspectives on the environment and social justice as shaped by the different histories of Spain, Latin America, and Equatorial Guinea. Taught in Spanish.
Prerequisite: 01:940:201 or 01:940:203.

01:070:203 ***Climate Change, Disaster, and Reconstruction (3)***
Politics of climate change, disaster as social phenomenon, intersectional analysis of the political economy of reconstruction, New Orleans, Puerto Rico, USA, philosophy of neoliberalism, epistemology of crisis, translation of political models.

01:070:206 ***Survey of New World Prehistory (3)***
Focus on the major cultural traditions and adaptations from the earliest appearance of humans in the Americas through the colonial period.
Prerequisite: 01:070:105.

01:070:207 ***Prehistoric Archaeology of Europe (3)***
Prehistory of Europe from the arrival of the first humans until the end of the Viking Age, focusing on Neanderthal and modern human interactions, ritual systems of Paleolithic cave painters, Atlantic societies that built megalithic monuments, beginnings of agriculture, Mycenaean culture, Northern European "barbarians" who terrorized Rome, trade, metallurgy, early states, writing, religion, and women in ancient societies.
Prerequisite: 01:070:105 or permission of instructor.

01:070:209 ***The Prehistory of Iberia (3)***
Overview of the prehistory of Iberia from the first human arrival to the expansion of the Neolithic.
Prerequisite: 01:940:202 or 01:940:204.

01:070:212 ***The Life of Primates (3)***
Introduction to the biology of monkeys, apes, and other primates, covering features of anatomy, ecology, and especially social behavior, communication, and thinking.

01:070:213 ***Environment and Human Evolution (3)***
Analysis of influence of environment on evolution in record of human ancestry. Morphological and physiological adaptations of humans in reaction to environmental controls.

01:070:215 ***Survey of Fossil Primates (3)***
Outline of primate evolution; origin of primates and primate relatives; description and paleoecology of fossil species, including Paleocene and Eocene species, Malagasy lemurs, first higher primates, New World and Old World monkeys, and Miocene apes; hominid origins.

01:070:216 ***Anthropology and Contemporary Issues (3)***
Cross-cultural perspectives on contemporary issues such as urban poverty, international migration, health epidemics, and human rights. Interconnections of social problems in contemporary global world.

01:070:217 ***Psychology and Culture (3)***
Influence of culture on mind and of mind on culture. Relationship of the individual to culture and of personal experience to collective meaning. Topics include religious experience and altered states of consciousness; cultural basis of emotions, the senses, and psychosomatic and mental illnesses; relationship of selfhood and identity to nationhood and citizenship.
Prerequisite: 01:070:101 or permission of instructor.

01:070:218 ***Introduction to Forensic Anthropology (3)***
Application of biological anthropology techniques, methods, and theory to the medico-legal setting; establishment of a positive identification for unknown human remains; analysis of skeletal trauma for insight to an individual's cause of death; techniques and underlying theory used by anthropologists to recover skeletal remains, reconstruct biological profiles from the skeleton, interpret skeletal trauma, and assist in the identification process.

01:070:219 ***Anthropology of Music (3)***
Concepts, principles, and theoretical models used by anthropologists to study myths, beliefs, and traditions expressed in musical systems of selected cultures; analysis of music making as behavior grounded in both cultural aesthetics and societal customs and practices.
Credit not given for both this course and 07:700:292.

01:070:220 ***Food and Culture (3)***
Culinary customs studied cross-culturally. Food in relation to sex, kinship, politics, economics, and religion. Visual, olfactory, textural, and gastronomic food preferences. Values and nutrition. World nutritional systems.

01:070:221 ***Culture and the Museum (3)***
Critical examination of different kinds of museum exhibitions from an anthropological perspective.

01:070:222 ***Sexuality and Eroticism in Global Perspective (3)***
Exploration of sexual diversity, meanings, and cultures in a variety of ethnographic contexts and impact of global processes on them; sexuality as key dimension of difference in the United States and diverse societies around the world.

01:070:223 ***Anthropology of Latin America (3)***
Overview of the diverse societies of Latin America from an anthropological perspective. Explores cultural, economic, political, and religious aspects of life in the region; urbanization and urban life; migration and transnationalism; indigenous peoples and their role in recent political transformations in the region; the war on drugs.

01:070:225 ***Gender in Global Perspective (3)***
Introductory exploration of the role of gender in organizing social relations and symbolic systems across the globe. Draws on comparative ethnographic readings to examine issues of gender and inequality, family, religion, work, sexuality, popular culture, and global processes.

01:070:226 ***The Archaeology of What We Eat (3)***
Food in prehistory, evidence for historic cuisine, approaches to food and culture based on archaeological evidence.
Prerequisite: 01:070:105 or 01:070:102 or 01:070:112.

01:070:230 ***Anthropology of Native North Americans (3)***
Richness and diversity of Native American cultures; major social, economic, religious, and political forms of organization; conquest, colonialism, and contemporary issues such as survival, maintenance of cultural traditions, health, and casinos.

01:070:238 ***Anthropology of Europe (3)***
European societies and cultures in modern history; changing anthropological perspectives. Gender, ethnicity, and class. Representations and realities of Europe in the making, including issues of nation-building, colonialism, mass culture, and violence.

01:070:240 ***Introduction to Molecular Evolutionary Anthropology (3)***
Demonstrates how genetic data are used in biological anthropology to address major questions of human and primate evolution, including origins, patterns of migration and dispersal, characteristics of genome organization, and evidence of molecular adaptations and selection.
Prerequisites: 01:070:102 or 212.

01:070:242 ***Anthropology of the Middle East (3)***
Introduction to ethnographic studies of the Middle East.

01:070:243 ***Anthropology of Africa (3)***
Precolonial, colonial, and postcolonial African cultures and societies. Gender, ethnicity, and class. Representations and realities of Africa in a global context, including issues of development, conservation, and tourism. Popular culture and contemporary rural and urban experiences.
Prerequisite: One introductory course in social science or permission of instructor. Credit not given for both this course and 01:016:337.

01:070:244 ***Ethnographies of South Asia (3)***
Traditional South Asia, emphasizing Hindus; contemporary reconstructions and contestations. Sexuality, gender, family, village, caste, religion; regional and national identities; class, urban South Asia, contemporary pop culture; and the diaspora.

01:070:246 ***Anthropology of Southeast Asia (3)***
Peoples of Indonesia, the Philippines, Malaysia, and Singapore, indigenous and immigrant. Relative gender egalitarianism in relation to various subsistence types and religious systems. Intercultural relations in multiethnic societies.

01:070:248 *Anthropology of China (3)*
Chinese society and culture before and after 1949. Socialism and reform. Issues of gender, ethnicity, popular culture, ecology, and population. Internal diversity; China in a world context.
No knowledge of Chinese required.

01:070:250 *Anthropology of the Contemporary United States (3)*
Older characterizations and analyses of American culture; current constructions and contestations of U.S. national, regional, and local culture(s). Ethnographic descriptions and analyses.

01:070:252 *Fundamentals of Evolution Lab (1)*
Hands-on activities indoors and outdoors to investigate, test, reconstruct, and observe evolution in a broad sense; phylogenetic reconstruction, species concepts and boundaries (including DNA barcoding), population evolution, and evolution at the molecular level.
Prerequisite: 01:070:102. Open to evolutionary anthropology (071) majors only.

01:070:283 *French Gastronomy and Global Food Culture (3)*
Cultural codes and socioeconomic contexts that shape the preparation and consumption of food in France and the United States. Cross-cultural interdisciplinary perspectives on contemporary issues such as technology and cultural identity, cultural heritage in a globalized world, food and migration, sustainable communities, food insecurity, food justice, and food sovereignty.

01:070:284 *Breaking the Glass Ceiling: Women Religious Leaders (3)*
Interdisciplinary approach to analyzing women¿s religious leadership in Judaism, Christianity, and Islam. Ethnographic case studies of religious communities. Topics include: strategies that preclude women from leadership; informal and formal leadership for women; differences across traditions; feminism; Internet and religious authority. Readings, films, discussions, interviews with female religious leaders.

Credit not given for both this course and 01:563:224 or 01:988:221.

01:070:291 *Special Topics in Anthropology (1.5)*
A brief survey of a relevant topic applying tools from anthropology.

01:070:292 *Current Issues in Anthropology (3)*
Topics vary with semester and instructor.

01:070:293 *Current Issues in Cultural and Linguistic Anthropology (3)*
Full-semester course on special topics in cultural or linguistic anthropology. Topics vary with semester and instructor.
Prerequisite: 01:070:101 or 108, or permission of instructor.

01:070:294 *Current Issues in Cultural and Linguistic Anthropology (3)*
Full-semester course on special topics in cultural or linguistic anthropology. Topics vary with semester and instructor.
Prerequisite: 01:070:101 or 108, or permission of instructor.

01:070:295 ***Current Issues in Cultural and Linguistic Anthropology (3)***
Full-semester course on special topics in cultural or linguistic anthropology. Topics vary with semester and instructor.
Prerequisite: 01:070:101 or 108, or permission of instructor.

01:070:296 ***Current Issues in Evolutionary Anthropology (3)***
Full-semester course on special topics in evolutionary anthropology. Topics vary with semester and instructor.
Prerequisite: 01:070:102 or 105 or 201 or 212, or permission of instructor.

01:070:297 ***Current Issues in Evolutionary Anthropology (3)***
Full-semester course on special topics in evolutionary anthropology. Topics vary with semester and instructor.
Prerequisite: 01:070:102 or 105 or 201 or 212, or permission of instructor.

01:070:298 ***Current Issues in Evolutionary Anthropology (3)***
Full-semester course on special topics in evolutionary anthropology. Topics vary with semester and instructor.
Prerequisite: 01:070:102 or 105 or 201 or 212, or permission of instructor.

01:070:299 ***Current Issues in Anthropology (3)***
Topics vary with semester and instructor.

01:070:302 ***Culture and the Environment (3)***
Relationships between cultural and environmental phenomena; how the relationships are studied and explained. Readings deal with culture and environment in Asia, Africa, the Americas, Europe, and Oceania.
Prerequisite: 01:070:101 or permission of instructor.

01:070:303 ***Wealth and Culture (3)***
Introduction to economic anthropology. Cultural notions of wealth in the United States, Africa, Asia, Latin America, and Europe. Anthropological perspectives on economic inequality, individualism, rationality, moral economy, exchange, consumption, production, and globalization.
Prerequisite: 01:070:101 or permission of instructor.

01:070:304 ***Political Anthropology (3)***
Comparative analysis of political systems and practices. Emergent anthropological theories of power, violence, and patterns of domination. Relation of culture to power and political practice. Politics in local and global contexts.
Prerequisite: 01:070:101 or permission of instructor.

01:070:305 ***Anthropology of Development (3)***
Anthropological theories of and approaches to social, cultural, and economic development. Use of concepts such as "culture" and "social change" in construction of development paradigms and policies; role of anthropologists as practitioners, consultants, and critics in development projects; relation of "development" to lived experience of people being "developed."
Prerequisite: 01:070:101 or permission of instructor.

01:070:306 ***Space, Place, and Practice (3)***
Social space as a product of social life; approaches to the anthropological study and analysis of space, place, and sociopolitical and cultural landscapes; spatial practices across cultures, societies, and institutions.
Prerequisite: 01:070:101 or permission of the instructor.

01:070:307 ***Medical Anthropology (3)***
Cultural diversity and similarity in the interpretation of health, illness, and death. Preventive and therapeutic medicine. Premodern and modern populations. Interaction between western and other medical systems.
Prerequisite: 01:070:101 or permission of instructor.

01:070:308 ***Anthropology of Religion (3)***
Cross-cultural comparison of religious concepts, roles, and practices. The analysis of religious symbolism. Sociopolitical and economic concomitants.
Prerequisite: 01:070:101 or permission of instructor.

01:070:309 ***Visual Anthropology (3)***
Use of film, videotape, still photography, and painting as media of anthropological analysis.
Prerequisite: 01:070:101 or 04:567:334 or permission of instructor.

01:070:311 ***History of Anthropology (3)***
Development of contemporary professional western anthropology from 18th- and 19th-century roots to modern schools of thought.
Prerequisite: 01:070:101 or permission of instructor.

01:070:312 ***Language and Social Diversity (3)***
Language and communication in social life. Class, ethnic, and sex-role differences in language use. Bilingualism and linguistic diversity studied cross-culturally.
Prerequisite: 01:070:108 or permission of instructor.

01:070:313 ***Historical Archaeology (3)***
Introduction to the archaeology of historic times; the interpretation of the past using both archaeological residues and written documents. Emphasis on Africa, Britain, and North America.
Prerequisite: 01:070:105 or 102 or permission of instructor.

01:070:314 ***Prehistoric Funerary Archaeology (3)***
Introduction to the theories, methods, and applications of funerary archaeology; the evolution of funerary practices among prehistoric societies.
Prerequisite: 01:070:105 or 01:070:102 or by permission of the instructor.

01:070:316 ***Quantitative Methods in Evolutionary Anthropology (3)***
Quantitative and statistical approaches to questions asked by evolutionary anthropologists and the quantitative methods employed to answer these questions. Topics include what is a scientific question, how to read the primary literature, scientific methodology, hypothesis testing, ethical research design and presentation, descriptive statistics, and basic inferential statistics.
Prerequisites: 01:070:102 or 105; 01:640:025 or placement or permission of instructor.

01:070:317 ***Method and Analysis in Cultural Anthropology (3)***
Designing and implementing research projects: formulating problems; selecting methodologies; methods of collecting, constructing, and analyzing qualitative, quantitative, and textual data (emphasis on computer-based techniques). Training in participant-observation, census and questionnaire construction and coding, interview techniques, and narrative analysis.
Prerequisite: 01:070:101 or permission of instructor.

01:070:318 ***Reading Ethnographic Writing (3)***
Exemplary fieldwork-based monographs in cultural anthropology, with an emphasis on most recent ones. Ethnography as text; ethnography as cultural description, inscription, interpretation, and criticism; ethnography as theory-laden versus ethnography as data for theorizing.
Prerequisite: 01:070:101 or permission of instructor.

01:070:319 ***Anthropology and Human Rights (3)***
Anthropological perspective on human rights; explores how this idea is deployed and negotiated by nation-states, transnational bodies, and localized groups in a variety of different contexts around the world today.
Prerequisite: 01:070:101 or permission of instructor.

01:070:320 ***Diaspora, Race, and Ethnicity in the United States (3)***
Theory and ethnography of recent immigrations; community, identity construction; class, race, gender, and age; local, national, and transnational factors; various case studies.
Prerequisite: 01:070:101 or permission of instructor.

01:070:321 ***Latino Ethnography (3)***
Cultural description of U.S. Latinos and their communities; introduction to reading, writing, and theorizing ethnography; ethnographic film; ethnography of migration and diaspora; testimonio as ethnography; locating anthropology within Latino studies.
Credit not given for both this course and 01:595:307 or 01:050:327.

01:070:322 ***Anthropology of Islam (3)***
Anthropological perspectives on lived experiences of Islam; the politics of Muslim diasporas; social lives of Islamic texts and media Islam; ethnicity, race, and Islam; leisure, consumption, and morality.
Prerequisite: 01:070:101.

01:070:323 ***Women Writing Culture (3)***
How gender, power, and difference shape the writings of women ethnographers. Interpretation, analysis, authority, intellectual representation, and creativity; life experiences and ethnography.
Prerequisite: 01:070:101 or permission of instructor. Credit not given for both this course and 01:988:323.

01:070:324 ***Globalization, Sex, and Families (3)***
Transnational intimacies, travel, and migration. Case studies of transnational adoption, marriage, sex work, and domestic work. Larger contexts of globalization and impact on families and sexual relations.
Prerequisite: 01:070:101 or permission of instructor. Credit not given for both this course and 01:988:337.

01:070:325 ***Evolution and Culture (3)***
Examination of current research on the relationship between evolutionary biology and culture. Topics include animal culture studies, cultural transmission theory, gene-culture coevolution, and the application of signaling theory to human cultural phenomena.
Prerequisite: 01:070:201, 212 or permission of instructor.

01:070:326 ***Life in the Pleistocene (3)***
Cultural and biological aspects of hominin evolution during the Pleistocene.
Prerequisite: 01:070:102 or 105 or permission of instructor.

01:070:327 ***Life in the Early Holocene (3)***
African, Asian, and European cultural developments in the Early Holocene, including origins of farming, village life, and complex society.
Prerequisite: 01:070:105 or permission of instructor.

01:070:328 ***Evolution, Cooperation, and Conflict (3)***
Use of evolutionary theory to study cooperation and conflict in anthropology and related fields. Topics include the origins of multicellularity, kin selection, reciprocity, costly signaling theory, collective action and coordination problems, and the emergence of social norms and conventions.
Prerequisites: 01:070:201 and 212, or permission of instructor.

01:070:329 ***Human Evolutionary Genetics (3)***
Presents the most recent work on human evolutionary genetics, including selection in the past 10,000 years, the genome of Neanderthals, genomic imprinting, the importance of miRNAs, and internal genetic conflict. Includes student presentations of assigned articles.
Prerequisites: 01:070:102 or 01:119:115 and 116.

01:070:330 ***Archaeology of Australia (3)***
Prehistory of Australia in its worldwide perspective, with special reference to Asian origins, impact of human colonization, and interpretative models based on modern aboriginal hunter-gatherer behavior.
Prerequisite: 01:070:105.

01:070:331 ***Xenophobia and the Other in Europe Today (3)***
Contemporary world refugee crisis; migration into Europe; anxieties about the presence of the foreign; cultural and legal categories of friend, guest, neighbor, and enemy; national and ethnic-racial identification; encounter, and transference and counter-transference, racism and discrimination; Islamophobia and anti-Semitism; the sociopsychology of xenophilia and xenophobia; projection and projective identification; main focus is Germany and France.
Prerequisite: 01:070:101 or 01:070:238.

01:070:332 ***North American Archaeology (3)***
Prehistory of North America from the appearance of humans on the continent to European discovery. Varieties of adaptation, cultural interrelationships, and developmental trends.
Prerequisite: 01:070:105.

01:070:333 ***Colonial Archaeology (3)***
Archaeology of post-Colombian European colonial spread worldwide, with particular reference to North America and Africa. Strong focus on practical laboratory work, specifically analysis of colonial artifacts, including ceramics, glass, pipes, and fauna.
Prerequisite: 01:070:105 or 208 or permission of instructor.

01:070:334 ***Field Study in Archaeology (3)***
Emphasis on archaeological field work and methods. Topics include cognitive abilities of early humans implied by their technologies, early human adaptation and social behavior, and the interrelationships between stone tool technology, paleoecology, and hominin biological evolution. Associated with field school.
By permission. Origins Field School, Turkana Basin Institute, or equivalent approved by undergraduate director.

01:070:336 ***Primatology, Wildlife Ecology, and Conservation in Kenya (3)***
Overview of wildlife ecology and conservation in the tropics, with emphasis on primate behavioral ecology and studies of living primates.
Corequisite: 01:070:337. Offered only during the summer.

01:070:337 ***Field Methods and Analysis in Primatology in Kenya (3)***
Training in the methodology of tropical field biology, with emphasis on primate behavioral ecology and studies of living primates.
Corequisite: 01:070:336. Offered only during the summer.

01:070:338 ***Culture, Wealth, and Power in Africa (3)***
Cultural dimensions of wealth and power in historical and contemporary Africa. Popular culture, media, ethnicity, genocide, urban and rural life, globalization, social change, development, gender relations, political ecology, conservation, tourism, and Africa as discursive and imaginative object.
Prerequisite: 01:070:101 or permission of instructor.

01:070:339 ***Caribbean Archaeology (3)***
Archaeological perspectives on Caribbean prehistory and history.
Prerequisite: 01:070:105.

01:070:341 ***Language, Food, and Society (3)***
How food is grown and distributed, cooked and consumed, discussed and represented around the world in culturally diverse ways. Includes culinary fieldwork.
Prerequisite: 01:070:101 or 01:070:108.

01:070:342 ***Urban Ecologies (3)***
Relationships among culture, ecology, and the city; histories of capitalism, urbanization, and globalization; case studies from world cities of contemporary urban environmental issues, including resources and their distribution, disasters and responses, and planning and sustainability.
Prerequisite: 01:070:101 or 01:070:100.

01:070:343 ***North American Ethnography (3)***
The first of two modules of the Fez, Morocco Study Abroad program; emphasis on representations of peoples and place in ethnographies of North Africa; exploration of anthropological theories of personhood, identity, gender, religion, illness, politics, and economics. Topics include customs and rituals, Sufism and spirituality, medicine and magic, as well as youth and social movements.

01:070:344 ***Practicum in Ethnographic Field Methods (3)***
The second of the two modules of the Fez, Morocco Study Abroad program; focus on a theoretical understanding of and hands-on practice in how ethnographic research is formulated and conducted.

01:070:345 ***Study Abroad - Applied Conservation and Ecosystem Management (3)***
Students must apply to enroll in this course and participation is conditioned on the approval of the instructor. Topics in conservation and ecosystem management as part of the "Primates, Ecology, and Conservation in Indonesia" Field School.
Prerequisites: 01:070:212 or 11:704:101 or permission of instructor(s). Corequisite: 01:070:347.

01:070:346 ***Honors Study Abroad - Applied Conservation and Ecosystem Management (3)***
Topics in conservation and ecosystem management as part of the Primates, Ecology, and Conservation in Indonesia Field School. Includes a faculty-mentored School of Arts and Sciences Honors Program project.
Prerequisites: 01:070:212, 11:704:101 or permission of instructor(s). Corequisite: 01:070:347. Students must apply to enroll in this course and participation is conditioned on the approval of the instructor.

01:070:347 ***Study Abroad - Advanced Primate Behavior and Ecology (3)***
Topics in primate behavior and ecology as part of the Primates, Ecology, and Conservation in Indonesia Field School.
Prerequisites: 01:070:212, 11:704:101 or permission of instructor(s). Corequisite: 01:070:345 or 346. Students must apply to enroll in this course and participation is conditioned on the approval of the instructor.

01:070:348 ***Primate Behavioral Ecology (3)***
Understanding the diversity of primate social and reproductive strategies as adaptive solutions to problems posed by foods, predators, mates, rivals, friends, and offspring.
Pre- or corequisite: 01:070:212 or permission of instructor.

01:070:350 ***Primatology and Human Evolution (3)***
History of primatology and paleoanthropology; how the study of nonhuman primate anatomy, social organization, culture, tool behavior, and cognition contributes to ideas about human evolution.
Pre- or corequisite: 01:070:212 or 215 or permission of instructor.

01:070:351 ***Fieldwork in Paleoecology (3)***
Introduction to ecosystems and habitats through examples of present-day flora, fauna, and ecology of the Lake Turkana Basin, in context of evolution of various taxa and general principles of evolutionary biology. Turkana Basin Field School, Kenya, Africa.

01:070:352 ***Practicum in Geoarchaeology (3)***
A field-based course involving visits to important geological and fossil sites. Geologic concepts and methods are linked to modern and ancient environments, archaeology, and paleoanthropology.

01:070:356 ***Human Variation (3)***
History of the concept of race in the West. Physical anthropological perspective, with emphases on human variation through time and on the principles of study of modern human variability.
Prerequisite: 01:070:102 or permission of instructor.

01:070:357 ***Labor and Climate Migration from Africa to Europe - Study Abroad (3)***
International migration and refugee flows; poverty, political violence, and the violence of climate change; differential risks and opportunities of crossing the Morocco-Spain border; backlashes against migrants; the impact of the climate crisis; the politics of South-to-North migration; includes practical exercises in fieldwork and analysis.

Credit not given for both this course and 01:920:357.

01:070:358 ***Human Osteology (3)***
Intensive introduction to human osteology, bone biology and growth, and paleopathology. Basis for advanced work in paleoanthropology, forensic anthropology, bioarchaeology, and osteometry.
Prerequisites: 01:070:102, or 01:119:115 and 116, or permission of instructor. Corequisite: 01:070:359.

01:070:359 ***Human Osteology Laboratory (3)***
Accompanies 01:070:358. Intensive practical training in osteology lab identification and analysis techniques.
Prerequisites: 01:070:102, or 01:119:115 and 116, or permission of instructor. Corequisite: 01:070:358.

01:070:360 ***Law, Justice, Rights (3)***
Meanings and practices of justice and rights. Course reviews key texts in the anthropology of law, politics, governance, and contemporary ethnographic studies.
Prerequisite: 01:070:101 or 108, or permission of instructor.

01:070:361 ***Hunters and Gatherers (3)***
Consideration of data from aboriginal Australia, the Southern African bushmen, and elsewhere, in light of social theory, including gender studies.
Prerequisite: 01:070:101 or permission of instructor.

01:070:362 ***Evolution of Human Diet (3)***
Diet as a basic component of the human lifeway. Exploration of its significance in human evolution; introduction to technical approaches to studying hominid diets; exploration of application of evolutionary approaches to studying diet-related illness.
Prerequisite: 01:070:102 or 105 or 11:704:110 or 251 or 01:090:274.

01:070:365 ***Anthropology of Childhood (3)***
Differing conceptualizations of children as a socially relevant category or identity. Influence of culture, language, and history on meanings and social realities pertaining to ideas of childhood and what these reveal about social order, social change and power dynamics. Western notions of children as innocent; understandings childhood under conditions of forced migration, poverty, and war; children as marginalized street workers and child-soldiers.

Prerequisite: 01:070:101 or 01:070:108

01:070:367 ***Anthropology Goes to the Movies (3)***
Role of film in ethnographic representation and ethnographic representation in popular film. Relationship of anthropology to the construction of popular film and of popular film to the construction of culture.
Prerequisite: 01:070:101 or 04:567:334 or permission of instructor.

01:070:368 ***Media and Culture (3)***
Media and culture; impact of media on the production and consumption of cultural identities; media production, consumption, and circulation; political life of media.
Prerequisite: 01:070:101 or 04:567:334 or permission of instructor.

01:070:370 ***Life and Death in Anthropological Perspective (3)***
How cultural, medical, religious, political, economic, and forensic anthropologists approach the study of issues pertaining to life and death and the transition between them.
Prerequisite: 01:070:101 or 108 or permission of instructor.

01:070:371 ***The Politics of Culture (3)***
Politics of cultural processes. Race, gender, ethnicity, and sexuality in representations. Theories of cultural production, domination, distribution, and consumption. Resistance and nonmainstream culture; ethnographic examples of ideology, economy, and global cultural flows.
Prerequisite: 01:070:101 or permission of instructor.

01:070:372 *Body Politics (3)*
Body in history and society. Comparative approaches to cultural construction of bodies. Impact of gender, sexuality, ethnonational, racial, and class differences on body practices. Formation of normative discourses on the body in medical science, consumer culture, and mass media.
Prerequisite: 01:070:101 or permission of instructor. Recommended: an additional course in cultural anthropology.

01:070:373 *Visual Ethnography of Everyday Life (3)*
The poetics and politics of producing ethnographic images using commonly-owned digital media; analysis of ethnographic, documentary, vernacular, and fine art media; aesthetic and technical dimensions of digital image production; narrative, observational, and antinarrative experimental shooting and editing, as well as the ethical, political, ethnographic, semiotic, and philosophical concerns such decisions entail.
Prerequisite: 01:070:101.

01:070:374 *Localities and Global Systems (3)*
Interaction of transnational and local processes through case studies and theory. Political economy, world systems, and cultural imperialism. Global culture and media. Intercultural representation and stereotyping. Diaspora, transnational movements, and nation-state.
Prerequisite: 01:070:101 or permission of instructor. Recommended: An additional course in cultural anthropology.

01:070:376 *Power and Difference (3)*
Emergent theories of inequality. Social constructions of difference. Topics challenging conventional notions of cultural anthropology--identity, representation, discrimination, exclusion, marginalization, contestation, and resistance.
Prerequisite: 1:070:101 or permission of instructor. Recommended: two additional courses in cultural anthropology. Intended for majors.

01:070:377 *Evolution and Religion (3)*
Examination of recent evolutionary theories regarding the origins and functions of religious phenomena.
Prerequisite: 01:070:201 or 212.

01:070:378 *The Anthropology of Gender (3)*
Gender as an analytic category; exchange, production, reproduction, binarism, representation. Intersections of gender with class, race, and ethnicity. Theoretical and ethnographic readings.
Prerequisite: 01:070:101 or permission of instructor. Credit not given for both this course and 01:988:378.

01:070:379 *Gender and Power in Africa (3)*
Experiences and expressions of gender in historical and contemporary Africa emphasizing issues of diversity and commonality, modalities of power, and articulation with other forms of difference, such as ethnicity, class, and nationality.
Prerequisite: 01:070:101 or permission of instructor. Credit not given for both this course and 01:988:379.

01:070:380 *Culture, Memory, History (3)*
Anthropological approaches to history and memory. Theory, method; comparative study of remembering, forgetting, commemorating, narrating, ritualizing, and structuring time. Early, contemporary scholarship; political economy, identity, authority, representation in shaping cultural memory, and historical constructions.
Prerequisite: 01:070:101 or permission of instructor.

01:070:382,384,385 ***Advanced Issues in Cultural and Linguistic Anthropology (3,3,3)***
Full-semester courses on special topics in cultural or linguistic anthropology. Topics vary with semester and instructor.
Prerequisite: 01:070:101 or 108, or permission of instructor.

01:070:383 ***Anthropology and Activism (3)***
Anthropological research practice that is both academically rigorous and socially concerned. Impacts, ethical dilemmas, political implications, and creative possibilities of anthropology beyond the academy.
Prerequisite: 01:070:101 or 108 or permission of instructor.

01:070:386 ***Internship in Anthropology (3)***
Internship with an anthropological focus.

01:070:387,388 ***Advanced Issues in Evolutionary Anthropolgy (3,3)***
Full-semester courses on special topics in evolutionary anthropology. Topics vary with semester and instructor.
Prerequisite: 01:070:102 or 105 or 204 or 212, or permission of instructor.

01:070:389 ***Ethnography of Gender in South Asia (3)***
An explanation of gendered practices in South Asia. Ethnographies from Hindu, Buddhist, and Muslim communities explore the various aspects of gender in particular South Asian contexts.
Prerequisite: 01:070:101 or 244. Credit not given for both this course and 01:925:389 or 01:988:389.

01:070:390 ***Fossil Hominin Anatomy (3)***
Hominin fossil record: taxonomy, phylogenetics, and functional morphology. Origins of Hominidae, diversity in Australopithecus and Paranthropus, rise of Homo and of Homo sapiens. Casts and published reports; methods of inference.
Prerequisite: 01:070:102 or permission of instructor.

01:070:391 ***Lithic Analysis in Archaeology (3)***
Archaeological study of how stone tools were made and used. Consideration of manufacturing technology, use and wear, experimental replication, and their implications for archaeological interpretation.
Prerequisite: 01:070:105.

01:070:392 ***Faunal Analysis in Archaeology (3)***
Identification of animal bones, teeth, and other faunal remains in archaeological contexts. Quantifying number of individuals and skeletal elements; butchery techniques and bone modification and their implications for archaeological interpretation.
Prerequisite: 01:070:105.

01:070:393 ***Cultural Resource Management (3)***
Legal, administrative, executive, and practical aspects of the theory and practice of cultural resource management, with emphasis on archaeological resources. One field trip.
Prerequisite: 01:070:105.

01:070:394 ***Geological Context in Paleoanthropology (3)***
Field and laboratory studies of geological context in archaeological sites. Data collection and sampling, sediment analysis, and reporting. Interpretation of depositional and postdepositional features.
Recommended: 01:460:340 (may be concurrently enrolled). Credit not given for both this course and 01:460:394.

01:070:395 *Quantification of Archaeological Data (3)*
Data analysis, coding schemes, data management, and the application of statistical techniques to problems in archaeology. Emphasis on creating, maintaining, and using computer files of archaeological data.
Prerequisite: 01:070:105.

01:070:397 *Practicum in Vertebrate Paleontology (3)*
A course focused on the practice of vertebrate paleontology used to solve diverse theoretical questions. Vertebrate fossils as important sources of information about the appearance, evolution, and extinction of major organisms. Relevance of these fossils to understanding climate, selection pressures, hominin discoveries, and reconstructing paleoenvironments. Turkana Basin Field School, Kenya, Africa.
Prerequisite: By permission. Origins Field School, Turkana Basin Institute or equivalent approved by undergraduate director.

01:070:398 *Field Study in Paleoanthropology (3)*
A course on field study in paleoanthropology. Fossils as important sources of information concerning human evolution. Field methods and techniques in hominin paeleontology. Turkana Basin Field School, Kenya, Africa.

01:070:402 *Primate Conservation Biology (3)*
Ecological diversity of primates. Biological, abiotic, and anthropogenic factors related to primate extinction risk. Means of monitoring threatened populations and efforts to increase the likelihood of their survival.
Prerequisite: 01:070:212.

01:070:404 *Advanced Seminar in Archaeology (3)*
Selected topics and problems in archaeology.
Prerequisite: 01:070:105. Open only to juniors and seniors.

01:070:406 *Rights and Wrongs of Indigenous Peoples (3)*
History, agendas, and local-global dynamics of indigenous peoples and the indigenous rights movement in several regions of the world.
Prerequisites: 01:070:101 and 6 credits in anthropology or permission of instructor.

01:070:407 *Documenting Latino Lives (3)*
Video-production seminar on the social experience of Latinos in the United States. Project development, advanced production techniques, narrative structure, storytelling strategies, and ethical issues in filmmaking. Students will produce their own 5-10-minute documentary film.
Prerequisite: By permission of instructor only. Not open to first- and second-year students. Credit not given for both this course and 01:595:402.

01:070:408 *Video Production Lab for Latino Lives (1)*
Video production laboratory taken with 01:070:407 or 01:595:402 Documenting Latino Lives.
Not open to first- and second-year students. Credit not given for both this course and 01:595:403.

01:070:409 *Primate Nutritional Ecology (3)*
How primates meet their nutritional needs through interactions with their environments including foraging theory, dietary ecology, macronutrient and micronutrient acquisition, and digestive ecology. Overview of methods to analyze primate diets, primate anatomy, physiology, microbiology, ecology, behavior, and life history in relation to primate nutrition.
Prerequisite: 01:070:102 or 01:070:212 or 01:119:103 or 01:119:115-116.

01:070:410 ***Explanation in Anthropology (3)***
Analysis of anthropologists' explanations, with consideration of such topics as the explanatory use of generalizations, models, narratives, culture-specific categories, and causal, functionalist, and essentialist claims.
Prerequisites: 6 credits in anthropology or permission of instructor.

01:070:412 ***Topics in African Prehistory and Paleoanthropology (3)***
Focused consideration of current research and explanatory theory on topics ranging from hominid origins to Holocene adaptations in Africa.
Prerequisite: 01:070:326 or 327 or permission of instructor.

01:070:415 ***Prehistoric Archaeology of New Jersey (4)***
Prehistoric life in the state since 13,000 years before present examined in the context of cultural adaptations to changing environmental conditions.
Prerequisite: 01:070:105.

01:070:417 ***Writing Ethnography (3)***
Reviews recent and current debates on ethnography as a literary form. Ideal for students planning or beginning honors theses or other independent projects. Writing intensive.
Prerequisites: 6 credits of upper-level anthropology courses or permission of instructor.

01:070:422 ***Theories in Physical Anthropology (3)***
Introduction to the formal definition of science and theories in science. Analyzes several topics rich in theoretical arguments that have been areas of contention for over 150 years, since the inception of anthropology as a science, placed within the context of the history of evolutionary anthropology from the 19th through the 21st centuries.
Prerequisite: 01:070:102.

01:070:426 ***South African Archaeology (3)***
Archaeology, ecology, and historical archaeology of South Africa. Covers two million years, early hominids to colonial contact.
Prerequisite: 01:070:102 or 105 or permission of instructor.

01:070:486 ***Gender, Development, Environment: Policies, Politics, Perspectives (3)***
Examines the experiences and implications of transnational development and environmental policies, using ethnography as a method and gender as a category of analysis.
Prerequisites: 6 credits in anthropology or permission of instructor. Credit not given for both this course and 01:988:486.

01:070:490 ***Preparation for Honors Thesis (1)***
Preparation for work the following year on an honors thesis.
Prerequisite: Permission of undergraduate program director.

01:070:491 ***Capstone Colloquium in Evolutionary Medicine (1)***
Student development of a portfolio of short papers using evolutionary theory to generate predictions, synthesize contributions of evolutionary theory to medical research and treatment, and integrate evolutionary predictions and concepts with medical problems and applications.
Prerequisite: Permission of instructor.

01:070:495,496 ***Independent Study in Anthropology (BA,BA)***
Supervised study or research on selected anthropological topics.
Prerequisite: Permission of instructor.

01:070:497,498 ***Honors in Anthropology (3,3)***
Two-semester supervised project, usually resulting in a thesis, for qualified seniors.
Prerequisites: Senior standing and acceptance into departmental honors program.

Archaeology 075 (SAS)

ARCHAEOLOGY 075

Website: Here

Program Director: Dan Cabanes

Program Faculty:

Dan Cabanes, Anthropology, Ph.D., Universitat Rovira i Vigili (Tarragona, Spain)

Hylke De Jong, Anthropology; Ph.D., Bristol (UK)

Gary Farney, History, SAS-Newark; Ph.D., Bryn Mawr

Craig S. Feibel, Geology and Anthropology; Ph.D., Utah

Trinidad Rico, Art History; Ph.D., Stanford

Carmel Schrire, Anthropology; Ph.D., Australian National

Learning Goals

Learning Goals

Students will understand the archaeological perspective.

1. Students will develop the skills necessary to read archaeological research in an intelligent and critical manner.
2. Students will understand the role of theory and methods in archaeological sciences.
3. Students will understand how key questions in human history and human evolution can be better analyzed using key concepts in archaeology.

Minor Program

Minor Program

This minor is designed for students interested in the multidisciplinary study of archaeology and includes courses drawn from the Departments of Anthropology, Art History, Classics, Geography, History, Jewish Studies, and Statistics.

Total number of required credits: 19 credits.

Required courses include 01:070:105 Introduction to Archaeology, which is a general introduction to the methods and techniques used in archaeology, regardless of the chronological or geographical specialization. Four elective courses from at least two departments must include at least one course from each of the three areas: chronology, geographic area, and methodology. In addition, all students must complete one of the practicum options listed below.

INTRODUCTORY COURSE. Required (4 credits):

01:070:105 Introduction to Archaeology (4)

CHRONOLOGY COURSES. At least one course required (3 credits):

Courses in the chronology group emphasize a particular chronological range and students will be able to make diachronic comparisons within this range.

01:070:112 World Prehistory
01:082:105 Introduction to Western Art History, Pre-History to 1400
01:190:215 Introduction to Greek and Roman Archaeology
01:090:295:H6 Historical Archaeology of Slavery
01:070:313 Historical Archaeology
01:070:326 Life in the Pleistocene
01:070:327 Life in the Holocene
01:070:333 Colonial Archaeology

GEOGRAPHIC AREA COURSES. At least one course required (3 credits):
Courses in the geographic area group emphasize the archaeology of a particular geographic area. Students will be afforded the opportunity to develop some proficiency with a particular geographic area.

01:070:206 Survey of New World Prehistory
01:070:207 Prehistoric Archaeology of Europe
01:070:209 The Prehistory of Iberia
01:070:330 Archaeology of Australia
01:070:332 North American Archaeology
01:070:339 Caribbean Archaeology
01:070:426 South African Archaeology
01:082:321 Art of Early China
01:082:333 Pre-Columbian Art

01:082:362 Native Arts of North America
01:082:388 The City of Rome
01:190:372 Cities of the Classical World
01:190:373 Pompeii: The Life and Death of a Roman Town
01:506:271 Jewish History: Ancient and Medieval
01:190:205 Greek Civilization

METHODOLOGY COURSES. At least one course required (3 credits):
These courses emphasize sets of methods or practices in archaeology defined very broadly.

01:070:314 Prehistoric Funerary Archaeology
01:070:352 Practicum in Geoarchaeology
01:070:391 Lithic Analysis in Archaeology
01:070:392 Faunal Analysis in Archaeology
01:070:335 Analysis of Archaeological Data
01:070:395 Quantification of Archaeological Data
01:070:393 Cultural Resource Management
01:082:430 Foundations in Cultural Heritage and Preservation
01:082:440 Cultural Heritage and Preservation Studies: Museums, Collecting, and Preservation
01:070:394 Geological Context in Paleoanthropology
01:450:321 Geographic Information Systems
01:450:322 Remote Sensing
01:960:401 Basic Statistics for Research or one of the following: 01:960:201, 01:960:211, 01:960:285.

PRACTICUM. Required (3 credits):
The practicum requirement can be fulfilled through a variety of options involving research and professional experience, either in the field, in the laboratory, or in another professional setting

1. By completing 01:070:334 by attending either of the Rutgers archaeological field schools: the Turkana Basin Field School or the Archaeological Field School in Italy (Vacone).
2. By completing at least 3 credits in a non-Rutgers field school approved by the minor director. An example of such a field school that has been frequently used by Rutgers students is the Slavia Field School in Mortuary Archaeology, Drawsko, Poland.
3. By completing a professional internship relevant to archaeology whether in the field, in the lab, or in another professional setting. The internship will require the approval of the minor director. The course of record may be 01:070:386 any Rutgers internship course with the specific internship approved by the minor director.
4. By completing an advanced-level course. With preapproval from the program director, students unable to fulfill the practicum requirements via options 1, 2, or 3 may enroll in an advanced undergraduate or a graduate level course with significant hands-on experiences.

Students are advised to consult the anthropology department webpage for suggested course combinations for specializations in human origins, prehistoric archaeology, zooarchaeology, or heritage and recent archaeology.

Architectural Studies 076 (SAS)

ARCHITECTURAL STUDIES 076

Website: Here

Director: Carla Yanni, Art History, B.A., Wesleyan; Ph.D., Pennsylvania

Architectural Studies Minor and Certificate 076

The minor (for students not majoring in art history) and the certificate (for art history majors) serve as an interdisciplinary introduction to the historical, social, and artistic study of architecture. The minor and certificate in architectural studies combine required coursework in art history and landscape architecture, allowing students to better understand the form and meaning of the built environment. The curriculum (18 credits for the minor and 15 credits for the certificate) begins with three foundational courses in architectural design, contemporary architecture, and the history of western architecture. Electives may be selected from a wide variety of disciplines.

Learning Outcomes and Career Relevance

Learning Outcomes and Career Relevance

Learning Outcomes

- Students will demonstrate the ability to read critically, to think critically, to design creatively, and to write synthetically.
- Students will acquire a foundation in the history and theory of architecture and urbanism.
- Students will effectively analyze visual, spatial, and structural issues in architecture.
- Students will demonstrate the ability to conduct research, manage evidence, and construct an argument concerning a topic in architecture, landscape architecture, or urbanism.
- Students will achieve basic skills in architectural drawing and model-making (both traditional and digital).

Career Relevance

This minor/certificate may be of special interest to students considering careers in architecture, interior design, real estate development, land use law, historic preservation, and urban planning.

This minor/certificate is a general introduction to a topic that may take the student on a variety of career paths. The process of becoming a professional architect, however, requires years of study beyond the undergraduate level, approximately two years as a supervised paid intern, and the successful completion of a battery of standardized examinations managed by state licensing boards and based on national standards. The practice of architecture is highly professionalized for reasons of public safety.

Architectural Studies 076 (SAS)

Minor and Certificate Requirements

Minor and Certificate Requirements

Summary of the Minor (for Majors other than Art History)
The minor in architectural studies consists of six courses (18 credits): 3 required classes and 3 electives.

Summary of the Certificate (for Art History Majors only)
The certificate in architectural studies consists of five courses (15 credits): 3 required classes and 2 electives.

Requirements

The following three courses are required. Grades of C or better must be earned in all courses used to fulfill the minor or certificate:

11:550:133 Architectural Design (3)
Concepts of architectural and urban design process, systems, and practice. Built environments in relation to human functions, perception, and needs. Space and form design and sketch studies. One 80-min. lec., lab. 3 hrs. Additional field trips by arrangement. (This requirement may be satisfied by completion of an intensive summer architectural design course from an accredited architecture school, e.g., Design Discovery at Harvard's Graduate School of Design.)

01:082:101 Building the Future: An Introduction to Architecture (3)
Introduction to architecture emphasizing building for the future. Overview of the social and intellectual history of cities an architecture using global examples.

01:082:105 Introduction to Art History: Prehistory to 1400 (3)
Survey of the major monuments and trends in the history of painting, sculpture, and architecture before 1400.

Important Note about the Minor for School of Environmental and Biological Sciences Students

Students in the bachelor of science (B.S.) in landscape architecture or the B.S. in environmental planning degree programs may use a total of 6 credits (but no more than 6 credits) in landscape architecture toward the completion of the architectural studies minor. Given that all students who complete the minor will have taken the required class 11:550:133 Architectural Design, this means that students majoring in landscape architecture or environmental design may take one 3-credit landscape architecture class from the list of electives. Additional electives must come from other departments.

Elective Courses

Elective Courses

List of Elective Courses for the Architectural Studies Minor or Certificate

Students may petition the Department of Art History to request credit for courses not on this list, including study abroad classes, courses from other universities, and relevant internships.

Anthropology

01:070:342 Urban Ecologies (3)
Relationships among culture, ecology, and the city; histories of capitalism, urbanization, and globalization; case studies from world cities of contemporary urban environmental issues, including resources and their distribution, disasters and responses, and planning and sustainability.

Art History

01:082:205 Introduction to Asian Art (3)
Survey of the history of art across Asia, with particular emphasis on India, China, and Japan, and with forays into Southeast Asia. Strong emphasis on parallel developments, important cultural connections, and moments of cultural contact through pilgrimage.

01:082:206 Art of India (3)
Introduction to the history of art in the Indian subcontinent, from the rise of early empires through the grandeur of the Taj Mahal and up to the challenges of globalization today. No background in Asian art is necessary for the successful completion of this course.

01:082:275 Cinema and the City (3)
Urbanism and architecture as read through film, urban planning, and social history associated with 20th-century cities.

01:082:329 The South Asian Temple: Art and Devotion in South Asia (3)
History of South Asian temples from their inception to present day. Stylistic, anthropological, and ethnographic analysis reading of the temple architecture as communal living space.

01:082:378 Nineteenth-Century Architecture in Europe (3)
Overview of the social and intellectual history of architecture in Great Britain, France, and present-day Germany to 1900. Role of architecture in societal transformations (the development of nationhood, industrialization, and urbanization). Emphasis on the invention of new building types, including universities, government buildings, prisons, hospitals, railroad stations, and the architecture of World's Fairs.

01:082:392 Twentieth-Century Architecture (3)
European and American architecture and planning from 1900 to the present.

01:082:428 The Modern City (3)
Architecture and urban design in select European and American cities from the 18th century to the present. Attention to political, socioeconomic, and cultural contexts.

01:082:430 Foundations in Cultural Heritage and Preservation Studies (3)
Examines historic preservation and heritage conservation issues within a global and transcultural context. Topics include the illicit trade in historic material, looting and pillage of monuments and sites, national and international preservation laws and treaties, and model historic preservation projects.

01:082:431 Theories and Methods of Architectural Preservation (3)
Political, social, and cultural significance of historic buildings and sites throughout the United States and abroad. Overview of the origins of architectural conservation in Europe. Contemporary theories, methods, techniques, and problems in the field of historic preservation.

01:082:394-395 Study Abroad in Paris (6)
Development of architecture, sculpture, and painting in the city from the time of the Caesars through the present. Changes in art in relation to political and social conditions. Taught on site.

01:082:339-340 Study Abroad in Rome (6)
Architecture, sculpture, and painting of the Eternal City from Antiquity to the present. Emphasis on historical context with all classes taught on site. 339: From Antiquity through the Middle Ages; 340: From the Renaissance to the Present.

01:082:446 Studies in American Architecture (3)
The role of North American architecture in art history. Contribution of individual architects, periods, and styles from Federalist beginnings through the 19th and early 20th century.

Geography

01:450:241 The City: Introduction to Urban Geography (3)
The role of cities in the world and overview of various aspects of the city, spanning geographical, political, climactic, psychological, and socioeconomic analysis. Credit not given for both this course and 01:450:240 or 01:450:250.

01:450:250 Cities (4)
Spatial organization and functioning of cities in different world regions. Emphasis on societal system factors that influence urban development. Credit not given for both this course and 01:450:240 or 01:450:241.

History

01:508:424 African Cities Past and Present (3)
Social, cultural, economic, and political history of African cities with focus on student-led comparative research. Not open to first-year students. Prerequisite recommended: one course on Africa.

01:510:311 Cities of the Classical World (3)
Study of urban development in antiquity, focusing on Athens and Rome, and synthesizing the evidence of literary, historical, and archaeological sources. Credit not given for both this course and 01:190:372.

01:512:314 The City in American History (3)
Urbanization from the colonial city to the 20th-century metropolis; urban population, institutions, problems, and planning; urbanism in American culture.

01:512:319 Nineteenth-Century Architecture and Society in the United States (3)
Overview of the social and intellectual history of architecture in the United States to 1900. Role of architecture in societal transformations (the development of nationhood, industrialization, and urbanization). Emphasis on the invention of new building types, including universities, government buildings, prisons, hospitals, railroad stations, and the architecture of World's Fairs. Credit not given for both this course and 01:082:391.

Landscape Architecture

11:550:237 Visualization I - Drawing and Drafting (3)
A drawing is not just a personal expression but also a tool for observing the world, developing design ideas, and exploring spatial issues. The student will learn to depict three-dimensional objects and spaces in a two-dimensional drawing format.

11:550:230 Environmental Design Analysis (3)
Students will learn about the evolution of designed spaces in a global and local context. Design, by its very nature, is multidisciplinary, incorporating the creative arts, social sciences, environmental science, political science, and other perspectives

11:550:301 Social and Cultural Aspects of Design (3)
This course engages students in the complex relationship of people and the environment. Our discussions focus on the design and use of everyday environments as expressions of the individual, community, and civic society. We consider how our environment shapes our everyday life and how we shape the environment.

11:550:480 Topology Seminar (3)
The term "topology" derives from the Greek words for "place," "space," and "study," "word," "sense". It comprises a theory of place (concept of "genius loci") and a method of presenting arguments in a discourse. As a design approach, topology advocates to pay attention to deeper spatial, physical, poetic, and philosophical values in a long tradition of designed nature.

Latino and Caribbean Studies

01:595:305 Caribbean Urbanism and Urban Policy (3)
Urbanism in the Caribbean since the colonial period; the social, economic, and political dynamics that have shaped the urban form and the experiences of those who inhabit these cities. Not open to first-year students.

Urban Planning and Design

10:971:201 Introduction to Urban Planning and Design (3)
Introduction to the purpose of plans and planning including planning domains such as housing, land use, and transportation with an emphasis on solutions to local problems. Credit not given for both this course and 10:762:201.

10:971:202 Designing Healthy Cities (3)
A review of the nature of America's cities and suburbs from their original planning stage to their ultimate reality and how it affects human health and well-being. Digital camera required. Credit not given for both this course and 10:762:202 or 10:832:202.

10:971:314 Graphics Communications for Planners (3)
Development of basic graphic skills necessary to communicate the visual and spatial characteristics of streets, buildings, and neighborhoods using Autocad, Sketchup, and Photosimulations. Credit not given for both this course and 10:971:314.

01:971:316 Introduction to Site Planning and City Design
Understanding the impact of physical design on quality of life with a focus on analytic processes for the basic elements of human environments. Fieldwork is required. Prerequisite: 10:971:201. Credit not given for both this course and 10:762:316.

10:971:318 History and Theory of Urban Planning and Design (3)
Assessment of major ideas in city and regional planning since the early 19th century. Origin, growth, and impact of these ideas on the evolution of planning in the context of intellectual, social, and technological change. Credit not given for both this course and 10:762:318.

10:762:448 Historic Preservation
Overview of historical evolution of the preservation movement in the United States, examining important public preservation regulations and programs and the economics of historic preservation. Credit not given for both this course and 10:082:431 or 34:970:521.

10:762:484 Special Topics in International Historic Preservation (3)
Overview of the evolution of the historic preservation movement in an international context, examining the regulations, programs, and economics impacting historic preservation.

Armenian 078 (SAS)

School of Arts and Sciences

For more information about these courses, contact the School of Arts and Sciences Office of Undergraduate Education.

Armenian 078 (SAS)

Courses

01:078:115,116 ***Elementary Armenian (3,3)***
Introduction to speaking, reading, and writing modern western Armenian.

01:078:117,118 ***Intermediate Armenian (3,3)***
Development of fluency in written and spoken modern western Armenian.

Art 080 (MGSA)

ART 080

(See also Art History 082)

Department of Art & Design, Mason Gross School of the Arts

See the Mason Gross School of the Arts section for faculty listing and bachelor of fine arts (B.F.A.) program information.

The bachelor of arts (B.A.) program in art provides students the opportunity to explore the techniques, processes, materials, places, events, and images that are the basis for creative work. The program offers a curriculum that seeks to develop professional skills as well as an understanding of the cultural and social implications of art. All B.A. students begin with the same foundation studio curriculum as those in the B.F.A. Track. These courses are designed to familiarize students with core concepts and basic skills in preparation for a rigorous studio practice. The course's emphasis is on the study of drawing, color, and composition, as well as time and screen-based contemporary art practices. Beyond the foundations level, the B.A. art program offers studio and critical study courses. Studio courses focus on the mastery of skills within specialized media such as sculpture, drawing, painting, design, media, photography, and print. Critical studies courses focus on art in relation to social, environmental, psychological, and philosophical systems. This focus provides a basis for understanding the position of the artist in the modern world.

Art 080 (MGSA)

Major Requirements: B.A. Program

Major Requirements: B.A. Program

Art majors in the bachelor of arts (B.A.) degree program are required to complete a total of 42 credits as follows:

Foundation Courses (28 credits)

- Drawing Fundamentals and 4D Fundamentals 121-122 (4,4)
- Introduction to Art History 105 and 106 (3,3)
- Seminar in Contemporary Art A and B 200-201 (3,3)
- Visual Thinking A and B 227-228 (4,4)

Studio Electives (12 credits)

Visual Arts Practice (2 credits Pass/Fail)

Each student plans a cohesive program of study with faculty and staff advisers.

Dual majors and special interdisciplinary degree programs that include those offered through the Department of Art & Design should be arranged through the School of Arts and Sciences and the Art & Design faculty and staff advisers.

Bachelor of arts students who desire to major in art must submit a portfolio and transcripts for review by the Art & Design Evaluation Committee for acceptance into the program. Additionally, students submit a request to declare the art major in myMajor.

Please click here for details.

Art 080 (MGSA)

Courses (081)

Courses (081)

The following bachelor of fine arts (B.F.A.) courses serve as the advanced courses for the bachelor of arts (B.A.) curriculum and are open to all B.A. majors after fundamental requirements have been met.

Note: All but a few of these courses have prerequisites. See Art 081 in the Course Listing chapter in the Mason Gross School of the Arts section of this catalog for prerequisites and course descriptions.

07:081:105 Visual Arts Practice (1-3)

07:081:121 Drawing Fundamentals (4)

07:081:122 4-D Fundamentals: Time and Space (4)

07:081:200-201 Seminar in Contemporary Art A and B (3,3)

07:081:221-222 Drawing I-A and I-B (4,4)

07:081:227 Visual Thinking A: Black and White (4)

07:081:228 Visual Thinking B: Color (4)

07:081:231-232 Design I-A and I-B (4,4)

07:081:243-244 Media I-A and I-B (4,4)

07:081:251-252 Painting I-A and I-B (4,4)

07:081:261-262 Photography I-A and I-B (4,4)

07:081:271-272 Print I-A and I-B (4,4)

07:081:281-282 Sculpture I-A and I-B (4,4)

07:081:303 Seminar in Media (3)

07:081:306 Seminar in Print (3)

07:081:308 Seminar in Design A: History (3)

07:081:310 Seminar in Photography (3)

07:081:313 Ceramics/Sculpture (3)

07:081:317 Seminar in Sculpture (3)

07:081:321-322 Drawing II-A and II-B (4,4)

07:081:324 Figure Drawing (3)

07:081:329 Seminar in Painting (3)

07:081:331-332 Design II-A and II-B (4,4)

07:081:343-344 Media II-A and II-B (4,4)

07:081:351-352 Painting II-A and II-B (4,4)

07:081:361-362 Photography II-A and II-B (4,4)

07:081:371-372 Print II-A and II-B (4,4)

07:081:381-382 Sculpture II-A and II-B (4,4)

07:081:391,392 Independent Study (3,3)

07:081:393,394 Internships (3,3)

07:081:421-422 Drawing III-A and III-B (4,4)

07:081:431-432 Design III-A and III-B (4,4)

07:081:433-434 Advanced Design A and B (4,4)

07:081:441-442 Media III-A and III-B (4,4)

07:081:446-447 Advanced Media A and B (4,4)

07:081:451-452 Painting III-A and III-B (4,4)

07:081:453-454 Advanced Painting A and B (4,4)

07:081:455-456 Advanced Drawing A and B (4,4)

07:081:461-462 Photography III-A and III-B (4,4)

07:081:463-464 Advanced Photography A and B (4,4)

07:081:471-472 Print III-A and III-B (4,4)

07:081:473-474 Advanced Print A and B (4,4)

07:081:481-482 Sculpture III-A and III-B (4,4)

07:081:483-484 Advanced Sculpture A and B (4,4)

07:081:491-492 Independent Study (3,3)

07:081:493,494 Internships (3,3)

Learning Goals

Learning Goals

Students who major in Art History will develop:

1. The ability to interpret the formal attributes, discuss the historical contexts, and assess the social functions of artworks and objects of material and visual culture from a broad chronological and geographic span and from diverse media.

2. The visual literacy necessary to analyze and critically evaluate the images that comprise our increasingly media rich and technologically driven world.

3. The ability to write and speak about images with clarity and rigor.

4. The ability to construct historical and theoretical arguments that demonstrate an awareness of the relevant critical terms and interpretive approaches of the discipline of art history, engage the appropriate methods for conducting research, and practice proper conventions of citation.

Major Requirements

Major Requirements

Art history majors are required to complete 33 credits in the department. You must receive a grade of C or better for the class to count toward the major.

Introductory Classes: Students must take two introductory courses: 01:082:105 and 01:082:106. Students may use a 4 or 5 on the AP Art History to place out of these two classes.

Upper-Level Distribution Requirements
Students must take at least one upper-level courses in each of the following chronological periods:

- Prehistory to 1500
- 1500 to 1900
- 1900 to present
- Transhistorical

Students must take upper-level courses in three out of the five geographical regions:

- Africa and the Middle East
- East, South, and Southeast Asia and Pacific Islands
- Europe and Eurasia
- The Americas
- Cross-Cultural Exchange/Transregional

Individual courses may be used to meet two, but no more than two, of the distribution requirements. In the course list maintained by the department, the requirements that each course can be used to meet are clearly listed. Note: 200, 300, and 400-level courses count as upper level courses for this part of the major.

Capstone Seminar: You must take 01:082: 491 (Fall) or 01:082:492 (Spring). These are capstone seminars for majors; the subjects vary, but in every case you will be asked to conduct original research, give an oral presentation, and write a research paper. Students are encouraged to take more than one capstone seminar. If you take more than one Capstone seminar, you may use the second one in the chronological and geographical distribution.

Minor Requirements

Minor Requirements

Students minoring in art history are expected to complete 18 credits (six courses) in the department including two introductory courses: 01:082:105 and 01:082:106. Twelve credits must be at the 200 level or above. There are no distribution requirements. Only courses completed with grades of C or better are counted toward the minor.

Art History 082 (SAS)

Departmental Honors Program

Departmental Honors Program

Candidates for honors in art history must, at the end of their junior year, have a cumulative grade-point average of 3.0 or better and an average of 3.5 or better in the major. In their senior year, students enroll in 01:082:497-498, in which independent research on a specific topic is undertaken, and an honors thesis is written under the supervision of a department faculty member. The supervisor and a second reader determine the level of honors based on the thesis. Students planning to write an honors thesis are strongly encouraged to enroll in 01:082:403, Approaches to Art History, before beginning the thesis. For a more complete description of the honors program guidelines, refer to the art history website: https://arthistory.rutgers.edu/academics/undergraduate-welcome/honors-program-in-art-history.

Art History 082 (SAS)

Architectural Studies Minor

Architectural Studies Minor

Please note that Art History Majors and Minors must enroll in the Architectural Studies Certificate, not the Architectural Studies Minor.

The Minor in Architectural Studies consists of six courses (18 credits): 3 required classes and 3 electives

3 Foundational Courses (Required):

Grades of C or better must be earned in all courses used to fulfill the minor or certificate:

Landscape Architecture, SEBS 11:550:133 Architectural Design (3)

Building the Future: Introduction to Architecture 01:082:101, an introduction to architecture using global examples

Introduction to Art History, 01:082:105 (F2F and online) Survey of the major monuments and trends in the history of painting, sculpture, and architecture before 1400.

Art History 082 (SAS)

Architectural Studies Certificate

Architectural Studies Certificate

(The certificate is for Art History Majors and Art History Minors only.)

The Certificate in Architectural Studies consists of five courses (15 credits): 3 required classes and 2 electives

Grades of C or better must be earned in all courses used to fulfill the minor or certificate:

3 Foundational Courses (Required):
Landscape Architecture, SEBS 11:550:133 Architectural Design (3)

Building the Future: Introduction to Architecture 01:082:101, an introduction to architecture using global examples

Introduction to Art History, 01:082:105 (F2F and online) Survey of the major monuments and trends in the history of painting, sculpture, and architecture before 1400

and

2 electives.

Art History 082 (SAS)

Courses

Courses

01:082:101 ***Building the Future: An Introduction to Architecture (3)***
Introduction to architecture emphasizing building for the future. Overview of the social and intellectual history of cities and architecture using global examples.
Credit not given for both this course and 01:082:392.

01:082:105 ***Introduction to Art History: Prehistory to 1400 (3)***
Survey of major artworks, buildings, and objects of material and visual culture as related to their social, economic, and political contexts from prehistory to 1400.

01:082:106 ***Introduction to Art History: 1400 to the Present) (3)***
Survey of the major monuments and trends in the history of painting, sculpture, and architecture across the globe from 1400 to the present.

01:082:118 ***Looking at 21st-Century World History (3)***
Interdisciplinary examination of the role of the visual in both our daily lives and in the way we remember the past. Taught through a series of topics ranging from war and violence and gender to work and play.
Credit not given for both this course and 01:506:118.

01:082:202 ***Contemporary Art (3)***
Developments in painting and sculpture since 1950. Classes include field trips to galleries and museums.

01:082:203 ***Sacred Sites. Materializing and Experiencing the Divine (3)***
A consideration of the spatial and visual strategies by which site-bound holiness was materially evoked, staged and experienced.

01:082:205 ***Asian Art (3)***
Survey of the history of art across Asia, with particular emphasis on India, China, and Japan, and with forays into Southeast Asia. Strong emphasis on parallel developments, important cultural connections, and moments of cultural contact through pilgrimage and trade.

01:082:206 ***Art of India (3)***
Introduction to the history of art in the Indian subcontinent, from the rise of early empires through the grandeur of the Taj Mahal and up to the challenges of globalization today.

01:082:214 ***Renaissance Art in Europe (3)***
Masterpieces of the European tradition from the 14th through 16th centuries that reveal artistic forms intrinsic to culture north and south of the Alps. Provides a background for an understanding of the development of early modern culture.

01:082:215 ***Baroque Magnificence (3)***
Introduction to major monuments and themes of 17th- and 18th-century European art.

01:082:220 ***Critical Issues in Art History (3)***
An introduction to critical issues in the history of art and an exploration of the way that art resonates with contemporary society.

01:082:226 ***Art and Visual Culture of the Caribbean (3)***
Introduction to art and visual culture of the Caribbean from pre-Conquest to the present. Representational practices in relation to the region's diversity, history of colonization, dictatorships, and revolutions. Role of the visual in defining national, gendered, classed, racial, and regional identities.
Credit not given for both this course and 01:595:226.

01:082:230 ***Latinx Art (3)***
Survey of art produced by Latinas and Latinos across the United States from the 1950s to the present.
Credit not given for both this course and 01:595:230.

01:082:240 ***Modern and Contemporary African Art (3)***
An overview of modern and contemporary African art, including photography as well as installation art, paintings, and sculptures.

01:082:250 ***Oceanic, African, and Pre-Columbian Art (3)***
Basic concepts in the arts of pre-Columbian Mesoamerica, Africa, and Oceania: time, natural landscape and architecture, and the ritual functions of art.

01:082:251 ***Russian Art (3)***
Introduction to the art of Russia covering the 10th century through the 20th century.

01:082:252 ***East Asian Art (3)***
Discussion of major works (painting, sculpture, and architecture) of China and Japan. Stress on techniques and styles radically different from those of Western art.

01:082:253 ***Contemporary Photography (3)***
Explores a broad range of contemporary photographs from around the world and asks what typifies the medium's everyday popularity and changing aesthetic practices.

01:082:255 ***History of Jewish Art (3)***
Synagogue frescoes and architecture, medieval Illuminations, Jewish ritual art, and Israeli art.
Credit not given for both this course and 01:563:226.

01:082:275 ***Cinema and the City (3)***
Urbanism and architecture as read through film, urban planning, and social history associated with 20th-century cities.

01:082:276 ***Radical Modernism and Anti-Art (3)***
Introduction to major movements and protagonists of early 20th-century European modernism. Artists, styles, spaces, and political agendas of Expressionism, Futurism, Dada, and Surrealism to be explored by means of a story map and in multimedia assignments. Examples from visual arts (Kirchner, Kandinsky, Duchamp, Höch), literature (Rimbaud, Wedekind, Benn, Marinetti, Kokoschka, Kafka), cinema (Wiene, Richter, Buñuel), music (Schönberg), and avant-garde journals and books. Taught in English.
Credit not given for this course and 01:195:276 or 01:470:276.

01:082:277 ***Art and Medicine (3)***
Explores the evolving relationship between western art and medicine in the modern period. Representations of doctors, patients, disease, pain, and medical technologies in paintings, prints, photography, early film, and new media.

01:082:291,292,293,294 ***Topics in Art History (3,3,3,3)***
Various topics. Detailed descriptions available at time of registration.

01:082:295 ***Topics in Art History (1)***
Various topics. Detailed descriptions available at time of registration.

01:082:296 ***Topics in Art History (2)***
Various topics. Detailed descriptions available at time of registration.

01:082:300 ***History of Modern Crafts and Design (3)***
Crafts from the mid-19th century to the present, with particular attention to major developments such as art nouveau, art deco, and functionalism.

01:082:301 ***Ancient Architecture (3)***
Survey of the architecture of ancient civilizations, emphasizing development of monumental architecture in Egypt, Mesopotamia, Greece, and Rome. Development of classical orders and principles of design are stressed.

01:082:303 ***Art of Egypt and the Ancient Near East (3)***
Introductory survey of the architecture, painting, and sculpture of the ancient civilizations of the Nile Valley, Asia Minor, and Persia.

01:082:308 ***Italy, 1250-1400: The Hinge between Medieval and Renaissance (3)***
Italian art and architecture from ca. 1250 to ca. 1400, with an emphasis on the stylistic and thematic innovations of Giotto and his successors and the developments of the schools of Florence, Siena, and Venice.

01:082:309 ***Fifteenth-Century Italy: The Birth of the Renaissance (3)***
Italian art and architecture of the 15th century, focusing on such masters as Masaccio, Donatello, Botticelli, and Alberti; the triumph of naturalism; Renaissance humanism and art theory.

01:082:310 ***The High Renaissance in Italy (3)***
Sixteenth-century art and architecture, emphasizing the achievements of the great central Italian masters: Leonardo da Vinci, Raphael, and Michelangelo; the artistic cult of personality and rivalry with classical antiquity; the crisis of Mannerism.

01:082:311 ***Egyptian Art (3)***
Survey of art and architecture in ancient Egypt from pre-Dynastic to Ptolemaic times. Extensive examination of the culture of Egypt--burial customs, religion, kingship, etc. Related discussions centered on the legacy of Egypt in Western art and popular culture.

01:082:312 ***Byzantine Art (3)***
Art and architecture of the Eastern Roman Empire, third through the 15th centuries. Emphasis on sources of Byzantine style and iconography and on the historical context of Byzantine art.
Credit not given for both this course and 01:489:315.

01:082:313 ***The Renaissance in Northern Europe (3)***
Religious and secular art in Germany, the Netherlands, and France during the 16th century; painting, sculpture, and prints; impact of reformation and humanism.

01:082:314 ***The Etruscans (3)***
Study of the social history, material culture, and artistic expression of the Etruscans. Survey of urbanism and architecture, trade, funerary practices, painted decoration, sculpture, and minor arts between the 9th and 2nd centuries BC.
Credit not given for both this course and 01:190:314.

01:082:316 ***Mexican Art Across Borders (3)***
Art, visual culture, and cultural history, with emphasis on the 20th century. Modernism, muralism, varied minor media and artists, post-revolutionary art, Mexican-American/Chicano Civil Rights Movement art, visual production, and politics.
Credit not given for both this course and 01:595:316.

01:082:317 ***Ancient Painting (3)***
Survey of Greek, Etruscan, and Roman painting from the eighth century BC through the Roman Empire. Emphasis on the development of style and on the cultural significance of painted images in different social contexts.
Credit not given for both this course and 01:190:317.

01:082:318 ***Myth and Legend in Art (3)***
Mythology and the artist's response to the myths and legends of his or her civilization, from antiquity through the Middle Ages. Continuity and transformation of central themes.

01:082:319 ***Celtic and Early Irish Art (3)***
Celtic, early Irish, and Anglo-Saxon art ca. 800 BC to AD 800. Emphasis on sculpture, metalwork, and enamel, and manuscript illumination.

01:082:320 ***Islamic Art and Architecture (3)***
Intensive overview of the art and architecture of the Islamic world, from Spain to India.
Credit not given for both this course and 01:667:320 or 01:685:320.

01:082:321 ***Art of Early China (3)***
Concentration on archaeological finds: pottery, jade, bronze, precious metals, lacquer from the Neolithic through the early great dynasties (5000 BC to AD 600).

01:082:322 ***Japanese Art (3)***
The many facets of Japanese art (5000 BC to modern times). Study of sculpture and painting, temples, and decorative arts.
Credit not given for both this course and 01:082:324.

01:082:324 ***Japanese Painting (3)***
Religious and secular painting from 700 to 1800. Secular paintings as decorations reflecting famous literary themes and sensitivity to nature.
Credit not given for both this course and 01:082:322.

01:082:325 ***Chinese Painting (3)***
Special techniques, special link to calligraphy, format, subject matter, aesthetic principles, and symbolism governing artistic process, from 400 to 1600.

01:082:326 ***Chinese Sculpture (3)***
Major religious (Buddhist and Taoist) and secular sculpture of China of the three great dynasties, Han, Tang, and Song (from common era to 1250).

01:082:328 ***Modern Islamic Art and Architecture (3)***
Modern and contemporary histories of visual culture including architecture, painting, sculpture, photography, and cinema in the Islamic world. Special focus on the Arabic, Turkish, and Persian spheres.

01:082:329 ***The South Asian Temple: Art and Devotion in South Asia (3)***
History of South Asian temples from their inception to present day. Stylistic, anthropological, and ethnographic analysis reading of the temple architecture as communal living space.

01:082:332 ***African-American Art (3)***
Art of people of African descent in the United States between the 18th century and the present.

01:082:333 ***Meso-American Art (3)***
Art and archaeology of pre-Hispanic North and South America; major contributions of the Olmec, Mayan, and Aztec peoples.

01:082:339-340 ***Study Abroad in Rome: From Ancient Capital to Modern Metropolis (3,3)***
Architecture, sculpture, and painting of the Eternal City from Antiquity to the present. Emphasis on historical context with all classes taught on site. 339: from Antiquity through the Middle Ages; 340: from the Renaissance to the present.
Offered only in summer program in Rome. Taught on site.

01:082:341 ***Venice (3)***
City and art of Venice considered in context of social/cultural history as reflected in masters such as Bellini, Titian, Palladio; their interpretation of favored Venetian themes: sensuality, religion, politics.

01:082:342 ***Early Greek Art (3)***
Survey of art in the Aegean from the early Bronze Age through the Archaic period (ca. 2500-500 BC).

01:082:343 ***Later Greek Art (3)***
Survey of classical and Hellenistic Greek art.

01:082:345 ***Field Study (6)***
Provides supervised participation in fieldwork. Involves participation and instruction in techniques of archaeological excavation and in analysis, evaluation, and conservation of objects.
Prerequisite: Permission of instructor. Offered only in summer (eight weeks).

01:082:347 ***Early Northern European Painting (3)***
Development of 15th-century easel painting in France, the Netherlands, and Germany; relationship of painting to decorative arts; symbolism, realism, invention from Van Eyck to Bosch.

01:082:348 ***Northern European Painting of the 17th Century (3)***
Styles, themes, and historical context of painting in 17th-century Northern Europe, with emphasis on the Netherlands. Artists include Rubens, Van Dyck, Rembrandt, and Vermeer.

01:082:351 ***Art in the United States, 1776-1913 (3)***
Visual and material culture of the United States from the American Revolution to the Armory Show. Survey of painting, sculpture, photography, and print culture in relation to social, political, and cultural history.
Credit not given for both this course and 01:050:351.

01:082:357 ***Art and Literature of the Soviet Period and the Varieties of Nonconformism (3)***
Official and unofficial literature and art; literary and art institutions; alternative venues.
Credit not given for both this course and 01:860:336.

01:082:359,360 ***Zimmerli Museum Internship in Russian Art (3,3)***
Research work related to Riabov and Dodge collections, assisting in development and coordination of special exhibitions, translations, and compiling artists' files.
Prerequisite: Permission of program director. Credit not given for both this course and 01:860:335. Knowledge of Russian necessary.

01:082:361 ***Russian and Soviet Avant-Gardes (3)***
Avant-garde art in Russia and the Soviet Union, 1905 through the perestroika period.

01:082:362 ***Native Arts of North America (3)***
The traditional arts and architecture of the indigenous peoples of the United States, Canada, and Greenland surveyed through archaeological data and ethnohistoric records. Field trips to museums with relevant collections.

01:082:364 ***Arts in Baroque Rome (3)***
Review of practical and aesthetic concerns in painting, sculpture, and architecture, with discussions of urbanism, stage design, theater and ephemeral arts, and antiquarian studies.

01:082:365 ***Baroque Visions (3)***
Baroque painting and sculpture from Caravaggio to Giordano.

01:082:366 ***Spanish Painting (3)***
Major Spanish painters from El Greco to Goya.
Prerequisites: 01:082:105,106 or permission of instructor.

01:082:367 ***Art in United States before 1876 (3)***
Visual and material culture from colonial times to 1876.
Prerequisites: 01:082:105,106 or permission of instructor.

01:082:368 ***Art in the United States, 1876-1945 (3)***
Visual and material culture in the U.S. from 1876 to the mid-20th century.

01:082:371 ***Arts of West Africa (3)***
In-depth history of the traditional arts of West Africa (Guinea, Mali, Togo, Ghana, and Nigeria).

01:082:372 ***History of the Print (3)***
Media of woodcut, engraving, etching, lithography, and silkscreen, from the 15th century through the present; processes, functions, and historical development exemplified by principal artists represented in the Zimmerli Art Museum.

01:082:373 ***Early Medieval Art (3)***
Art of western Europe from Constantine to ca. AD 1000, with emphasis on transformation of the classical image of physical man to the medieval image of spiritual man.

01:082:374 ***Romanesque and Gothic Art (3)***
Art and architecture of Western Europe from AD 1000 to 1400, from Romanesque symbolic style to Gothic realism.

01:082:376 ***Arts of Central Africa (3)***
In-depth survey of the traditional arts of Cameroon, Gabon, the Central African Republic, Zaire, and Angola.

01:082:377 ***Gothic (3)***
Gothic artistic production in Northern Europe from the mid-12th through the early 15th century in architecture, sculpture, manuscript illumination, and various crafts, in their religious, social, political, and economic context. Topics include liturgy and ceremony, mysticism and devotion, pictorial narrative, lay literacy, attitudes towards death, courtly love, and the construction of the "other."
Credit not given for both this course and 01:082:374.

01:082:378 ***Nineteenth-Century Architecture in Europe (3)***
Overview of the social and intellectual history of architecture in Great Britain, France, and present-day Germany to 1900. Role of architecture in societal transformations (the development of nationhood, industrialization, and urbanization). Emphasis on the invention of new building types, including universities, government buildings, prisons, hospitals, railroad stations, and the architecture of World's Fairs.

01:082:379 ***Imagery and Architecture of Medieval Rome (3)***
Traces the development of the imagery and architecture of medieval Rome from the legitimization of Christianity to the removal of the papacy to Avignon. Imagery includes frescoes, mosaics, sculpture, and architecture; encompasses both religious and secular buildings.

01:082:380 ***Modern Jewish Art (3)***
The Jewish experience in modern art.

Credit not given for both this course and 01:563:38

01:082:381 ***Contemporary Latin American Art (3)***
Surveys the artistic production of Latin America from post-World War II to the present. Topics include social realism, surrealism and the fantastic, geometric abstraction, conceptualism, performance art, and the effects of globalization on contemporary Latin American art.

01:082:382 ***Nineteenth-Century Photography (3)***
Overview of the social, cultural, and art history of photography from circa 1839 to 1900.

01:082:383 ***Twentieth-Century Photography (3)***
Overview of the social, cultural, and art history of photography from 1900 to 2000.

01:082:387 ***Realism (3)***
Analysis of themes and characteristics of 19th-century realist art, especially in England and France, and topics such as photographic realism, orientalists, pre-Raphaelites.

01:082:388 ***The City of Rome (3)***
Archaeology and architectural mythology of a city, its buildings, and its planning from Romulus to Mussolini.

01:082:389 ***European Modern Art: 19th Century (3)***
19th-century art, including painting, sculpture, prints, and other media.

01:082:390 ***European Modern Art: 20th Century (3)***
20th--century art, including painting, sculpture, prints, and other media.

01:082:391 ***Nineteenth-Century Architecture and Society in the United States (3)***
Overview of the social and intellectual history of architecture in the United States to 1900. Role of architecture in societal transformations (the development of nationhood, industrialization, and urbanization). Emphasis on the invention of new building types, including universities, government buildings, prisons, hospitals, railroad stations, and the architecture of World's Fairs.
Credit not given for both this course and 01:512:319.

01:082:392 ***Twentieth-Century Architecture in Europe and North America (3)***
European and North American architecture and planning from 1900 to the present; emphasis on major architects, styles, and buildings from art nouveau to postmodernism.
Credit not given for both this course and 01:082:101.

01:082:393 ***Modern Latin American Art (3)***
Overview of the origins and development of Latin American art from the post-independence period through the first half of the 20th century.
Credit not given for both this course and 01:590:393.

01:082:394-395 ***Study Abroad in Paris(3,3)***
Development of architecture, sculpture, and painting in the city from the time of the Caesars through the present. Changes in art in relation to political and social conditions.
Offered only in summer program in Paris. Taught on site.

01:082:396 ***Impressionism (3)***
Subjects, style, and social significance of 19th-century French impressionism, including Manet, Monet, Degas, and themes of women, cafe society, urbanization, leisure.

01:082:397 ***Medieval Architecture (3)***
Western European and Byzantine architecture from the 3rd through the 14th century. Emphasis on planning and structure in the Early Christian basilica, the Middle Byzantine church, and the Gothic cathedral.

01:082:403 ***Approaches to Art History (3)***
An overview of the literature and methods of art history from 1400 to the present day; emphasizing close reading and class participation and discussion.
Prerequisites: 01:082:105,106 or permission of the instructor

01:082:420 ***African Architecture (3)***
In-depth study of various concepts and traditional forms of shelter in Africa south of the Sahara.
Prerequisites: 01:082:105,106 or permission of instructor.

01:082:428 ***The Modern City (3)***
Architecture and urban design from the 18th century to the present. Attention to political, socioeconomic, and cultural contexts.
Prerequisites: 01:082:105,106 or permission of instructor.

01:082:430 ***Foundations in Cultural Heritage and Preservation Studies (3)***
Examines historic preservation and heritage conservation issues within a global and trans-cultural context. Topics include the illicit trade in historic material, looting and pillaging of monuments and sites, national and international preservation laws and treaties, and model historic preservation projects.
Prerequisites: 01:082:105,106 or permission of instructor. Credit not given for both this course and 16:082:530 or 01:506:391.

01:082:431 ***Theories and Methods of Architectural Preservation (3)***
Political, social, and cultural significance of historic buildings and sites throughout the United States and abroad. Overview of the origins of architectural conservation in Europe. Contemporary theories, methods, techniques, and problems in the field of historic preservation.
Prerequisites: 01:082:105,106 or permission of instructor.

01:082:440 ***Museums, Collecting, and Preservation: CHAPS (3)***
Examines the history of museums, modes of collecting, and the preservation of the past, and considers these activities in the context of contemporary political issues.
Credit not given for both this course and 01:190:440.

01:082:441 ***Special Topics in Politics, History, and Heritage: CHAPS (3)***
Special studies in particular theoretical and practical aspects of cultural heritage and preservation studies. Designed by individual instructor. Open to students in program in historic preservation or by permission of instructor.
Credit not given for both this course and 01:506:305.

01:082:444 ***Special Topics in Architectural Preservation: CHAPS (3)***
Exploration of the documentation and investigative techniques, modern methods of conservation, regulatory and legal concerns, and designs for historic districts.

01:082:445 ***Studies in the Art and Architecture of New Jersey (3)***
The distinct contributions of New Jersey's art and architecture to a broader history of the visual arts in the U.S., from colonial times to the present day.
Prerequisites: 01:082:105,106 or permission of instructor.

01:082:446 ***Studies in North American Architecture (3)***
The role of North American architecture in art history. Contribution of individual architects, periods, and the social history of architecture from colonial period through the 19th and early 20th century.
Prerequisites: 01:082:105,106 or permission of instructor.

01:082:447,448 ***Internship in CHAPS (3,3)***
Supervised internship in the field of cultural heritage conservation and preservation at an approved institution.

01:082:450 ***Seminar: Major Italian Renaissance Artists and Themes (3)***
Special studies in Italian Renaissance art. Deals with different subjects, changing from year to year, such as artists (Donatello, Michelangelo, Titian); themes (death, women, patronage); and genres of art (portraits, nudes, altarpieces).
Prerequisites: 01:082:105,106 or permission of instructor.

01:082:451 ***Seminar: Public Monuments in America, 19th-21st Centuries (3)***
Addresses the issues surrounding public monuments from the 19th century through the present day. Focuses on sculptures commissioned to commemorate major events in the United States, but will also consider some important European examples.
Prerequisites: 01:082:105,106 or permission of instructor.

01:082:452 ***Interior Architecture in the United Statesfrom the Colonial to the Modern Era (3)***
Introduction to the major decorative periods and social and cultural movements that influenced the choice of furnishings and the organization of interiors. Emphasis on domestic interiors; discussion of major commercial and institutional spaces. Includes field trips.
Prerequisites: 01:082:105,106 or permission of instructor.

01:082:454 ***Seminar: Major Baroque Artists and Themes (3)***
Principal artists of the 17th and 18th centuries in Italy, Spain, France, and/or England in monographic format.
Prerequisites: 01:082:105,106 or permission of instructor.

01:082:462 ***Workshop in Curatorial Practices (3)***
Practical experience for students interested in curatorial work in museums and/or galleries. Investigation of various responsibilities of museum professionals through field trips to museums and galleries in New York. Organizing exhibitions and preparing accompanying catalogs.
Prerequisites: 01:082:105,106 or permission of instructor.

01:082:473 ***Seminar: Illuminated Manuscripts (3)***
Materials, techniques, and styles of decoration and illustration of manuscripts from antiquity to the introduction of printing. Relationship of ornament to text in various genres and style periods, and to patterns of use and patronage. Types of functional and ornamental bindings and their relationship to function and storage of luxury manuscripts.
Prerequisites: 01:082:105,106 or permission of instructor.

01:082:478 ***Seminar: Latin American Art (3)***
Latin American art and visual culture. Topics may vary with instructor.
Prerequisites: 01:082:105,106 or permission of instructor.

01:082:479 ***Seminar: Asian Art (3)***
Asian art and visual culture. Topics may vary with instructor.
Prerequisites: 01:082:105,106 or permission of instructor.

01:082:483 ***From Text to Image in Japanese Art (3)***
Impact of classic literature on Japanese paintings; artistic transformations of emotions and events of literary masterpieces into images.
Corequisite: 01:082:324 or permission of instructor. Credit not given for both this course and 01:565:483.

01:082:484 ***Seminar: Ancient Art (3)***
Focus on various problems of Greek, Etruscan, and Roman art, such as style, iconography, painting, sculpture, portraits, minor arts, architecture, cities, and sanctuaries.
Prerequisite: 01:082:105, 106, or permission of instructor.

01:082:486 ***Seminar: Medieval Art History (3)***
Particular genre, medium, monument, or area within medieval art (e.g., ivory carving, seals, the Bayeux tapestry, Chartres cathedral).
Prerequisites: 01:082:105,106 or permission of instructor.

01:082:487 ***Seminar: Modern Art (3)***
Specialized study in 19th- and 20th-century art and architecture. Seminar may be organized by the time period, thematic content, artistic movement, artist, type of monument, or genre.
Prerequisite: 01:082:105, 01:082:106 or permission of instructor.

01:082:488 ***Seminar: American Art (3)***
Specialized study in American art and visual culture. Seminar considers various topics, such as artists, monuments, artistic and cultural movements, genres, and periods.
Prerequisites: 01:082:105,106 or permission of instructor.

01:082:489 ***Public Policy and the Arts (3)***
Public policies that have created a vigorous world-class arts culture. Changes in domestic and international politics, market economics, globalization, and technology reshaping the cultural policy debate worldwide.
Prerequisites: 01:082:105,106 or permission of instructor. Credit not given for both this course and 10:975:499.

01:082:491,492 ***Capstone in Art History (3,3)***
Advanced study in selected area of art history. Required of art history majors. All others (including minors) need permission of instructor.
Prerequisites: 01:082:105,106 or permission of instructor.

01:082:493,494 ***Individual Studies in Art History (3,3)***
Guided independent research in a particular area of interest. Open only to seniors in art history or by special permission of instructor.
Prerequisites: 01:082:105,106 or permission of instructor.

01:082:495,496 ***Internship in Art History (3,3)***
Open only to majors. Supervised internship, usually at a museum or gallery.
Prerequisites: 01:082:105,106. Permission required.

01:082:497-498 ***Honors in Art History (3,3)***Independent research on a specific topic leading to an honors thesis written under the supervision of a department faculty member. Candidates for honors in art history must, at the end of their junior year, have a cumulative grade-point average of 3.0 or better and an average of 3.5 or better in the major. Both semesters must be completed in order to receive the total credits (6) for both courses.

Arts and Sciences 090 (SAS)

ARTS AND SCIENCES 090

Arts and Sciences 090 (SAS)

School of Arts and Sciences

School of Arts and Sciences

01:090:100 ***SAS Summer Institute First-Year Experience (1)***
Introduction to the university. Tools and resources for academic success at the university level.

01:090:101 *The Byrne Seminars (1)*
Focusing on the research and interests of the faculty and introducing students to the range of intellectual and career possibilities offered to them at Rutgers.
For first-year students. Graded Pass/No Credit.

01:090:102 *Costa Rica Study Seminar (1)*
Study abroad in Costa Rica.

01:090:103 *Cross-Cultural Competency (1)*
Theory and practice of creating a cross-cultural community based on respect, communication, and empathy. Encouraging student advocacy, course seeks to advance inclusion, belonging, and respect in the Rutgers community through discussions, readings, and activities. Three units: Identity, Interaction, and Interdependence. Culminates in a collaborative, Advancing True Inclusion Project.

01:090:105 *RU1st (1.5)*
First-year seminar for international students.

01:090:109 *Purpose Project Part 1: Discover Yourself (1.5)*
Guided process of defining what a purposeful life and work mean to individual students while building affinity as a team. Preparation for a joint service project in spring semester.
Requires enrollment in the JFEW Scholars program.

01:090:110 *Purpose Project Part 2: Connecting to a Wider Purpose (1.5)*
Guided, team-based project management will give students hands-on experience connecting their values and strengths with a larger goal and purpose while building teamwork, networking, continuous reflection and project management skills.
Prerequisite: 01:090:109 or permission. Requires enrollment in the JFEW Scholars program.

01:090:111,112 *Honors Colloquium (1,1)*
Ongoing series of meetings, lectures, discussions, and cultural events. Topics vary each semester.
Open to all students in the School of Arts and Sciences Honors Program. Graded Pass/No Credit.

01:090:120 *First-Year Interest Group Seminar (FIGS) (1)*
Highly interactive seminars on selected topics focusing on career goals/potential majors of first-year students. Analysis and discussion of presentations by a broad spectrum of faculty and alumni speakers; introduction to and utilization of university resources. Each seminar led by a peer instructor closely supervised by the FIGS curriculum coordinator.
Open to first-year students only. Graded Pass/No Credit. May not be repeated for credit.

01:090:121 *International Student Transition Seminar I (1)*
For students in the International Living-Learning Community. Introduces tools that promote success for international students in and outside the classroom during their first semester; provides an in-depth introduction to Rutgers University and the School of Arts and Sciences. Topics designed to assist international students in their transition and adjustment to the university and to enrich their knowledge of American culture and life in an American university.
Special permission required. Graded Pass/No Credit.

01:090:122 ***International Student Transition Seminar II (1)***
For international students.
Special permission required.

01:090:123 ***RU Path (1)***
For students in the RU Path Program. Topics designed to assist international students in their transition and adjustment to the University and to enrich their knowledge of American culture and life in an American University.
Special permission required. Pass/No credit.

01:090:125 ***Honors College Forum (3)***

01:090:126 ***IDEA Incubator (3)***

IDEA Incubator focuses on the development of social innovation focusing on community-centered research. IDEA Incubator is structured as a practicum to allow you to develop knowledge of social innovation whilst acquiring a special skillset applicable to other areas of life.

01:090:127 ***Honors College Innovation Lab (BA)***
First-year honors college course.
For Honors College students.

01:090:128 ***Global Dialogues (1)***
Provides international students practical opportunities to learn and engage in structured speaking situations on internationally relevant topics collaboratively. Builds core communication competencies on global issues.
For international students only.

01:090:130 ***Cohort Seminar I (1)***
First-year fall semester seminar for Cohort Program Scholars.
Pass/No credit. Special permission required.

01:090:131 ***Cohort Seminar II (1)***

First-year spring semester seminar for Cohort Program Scholars.

Pass/No credit. Special permission required.

01:090:132 ***Cohort Seminar III (1)***

Sophomore fall semester seminar for Cohort Program Scholars.

Pass/No credit. Special permission required.

01:090:133 ***Cohort Seminar IV (1)***
Sophomore spring semester seminar for Cohort Program Scholars.
Pass/No credit. Special permission required.

01:090:170 ***Summer Institute Math Practicum (1)***
Development of mathematical skills at placement level.

01:090:171 *Study Skills (1.5)*
Not for degree credit.

01:090:172 *Strategies for College Success (1.5)*
Development of strategies for time management, organizing course preparation time, accessing university resources, and learning new ways to enhance studying efforts. Not for degree credit.

01:090:173 *Special Topics (1.5)*
Not for degree credit.

01:090:174 *Approaches to Mathematical Problem Solving (2)*
Cognitive Science based approaches to solving mathematical problems commonly found not only in Calculus but in a broad range of disciplines and careers, given the increasingly widespread use of mathematical thinking.
Pass/No Credit.

01:090:175 *LSAT Skills (1.5)*
Not for degree credit.

01:090:176 *GRE Skills (1.5)*
Not for degree credit.

01:090:177 *GMAT Skills (1.5)*
Nor for degree credit.

01:090:178 *MCAT Prep Workshop (3)*

01:090:179 *SAT Prep Workshop (3)*

01:090:180 *GRE Prep Workshop (3)*

01:090:181 *Academic Success Seminar (1.5)*
Graded on a Pass/No Credit basis.

01:090:182 *MCAT Prep Workshop (1.5)*

01:090:183 *MCAT Prep Workshop (1.5)*

01:090:195,196 *Introduction to Honors Research (BA)*
Introduction to research. Topics and faculty members vary.
Special permission required.

01:090:199 *Preparing for an Internship (1.5)*
This course will build on the Career Explorations and Arts and Sciences course by helping students to refine their job application skills based on their values, strengths, and interests. It will prepare students to apply to an internship and to develop a plan for success in the internship and beyond.
Prerequisite: 01:090:210 or SPN

01:090:200 *Internship (1)*
Not for degree credit.

01:090:201,202 ***Internship in Arts and Sciences (3,3)***
Integrated academic and work experience.
By permission of dean, School of Arts and Sciences Office of Undergraduate Education. Graded Pass/No Credit.

01:090:203 ***Co-op in Arts and Sciences (6)***
Integrated academic and work experience; six months.
By permission of dean, School of Arts and Sciences Office of Undergraduate Education. Graded Pass/No Credit.

01:090:204 ***Rutgers Experiential Learning and Condensed Internship Course (1)***
One credit elective internship course which can accommodate shorter-term or on-campus learning-focused work experiences that may not meet the hours requirements for 3-credit internship courses.
Registration by special permission.

01:090:210 ***Career Explorations in Arts and Sciences (1.5)***
Increases career readiness though investigation, reflection, and planning. Makes transparent the contributions of the liberal arts and sciences curriculum to students' professional lives. Students will learn a framework for choosing a career, articulate career relevant skills developed in arts and sciences, and practice job search skills (networking, resume, interviews).
Recommended for School of Arts and Sciences sophomores and juniors. Special sections for seniors

01:090:215 ***Introduction to Mentoring (3)***
Fundamental mentoring skills, communication skills, and ethics; relevant concepts in psychology. Motivation and goal-setting, the teenage brain, self-concept, grit and resilience, social problem solving, and culturally sensitive mentoring practices.
Special permission required.

01:090:220 ***Students in Transition Seminar (1)***
Introduction to the university and services for transfer students. Topics designed to assist students in the adjustment to the university and to facilitate better first-semester academic performance; characterized by small-group learning.
Open to entering transfer-year students only. Graded Pass/No Credit. May not be repeated for credit.

01:090:223 ***Bibliography and Research Techniques (3)***

01:090:224 ***Special Topics (1)***
Exploration of problems and issues relating to a particular theme.

01:090:225,226 ***Special Topics (3,3)***
Exploration of problems and issues relating to a particular theme.

01:090:227,228 ***Academic Coaching for International Students (1,1)***
Exploration of problems and issues relating to a particular theme.

01:090:250, . . . ,297 ***SAS Honors Program Interdisciplinary Seminar (3, . . . ,3)***
Selected topics in the arts and sciences. Titles vary from semester to semester.
Open only to School of Arts and Sciences Honors Program students and New Brunswick General Honors Program students.

01:090:298 ***Public Scholarship and Service Internship (1-2)***
One- or two-credit service-learning placement in an approved Civic Engagement and Service Education Partnership (CESEP) field setting.

01:090:299 ***Public Scholarship and Service Internship (1-2)***
One- or two-credit service-learning placement in an approved field setting related to the public good. Must be taken in conjunction with a designated Civic Engagement and Service Education Partnership (CESEP) course.

01:090:301,302 ***Princeton/Rutgers Exchange (BA)***

01:090:303,304 ***Spelman/Rutgers Exchange (BA)***

01:090:305,306 ***"Behind the Camera" Learning Community (1.5, 3)***
Exploration of global film through screenings, discussions, and field trips to cinemas and festivals in the area. Yearlong collaborative project related to film.
Corequisite: One cinema studies course, taken in either the fall or the spring semester of the year the student is enrolled in the "Behind the Camera" Learning Community. Limited to and required of participants in the "Behind the Camera" Learning Community.

01:090:308 ***Institute for Research on Women Learning Community (1.5)***
Explores Institute for Research on Women (IRW) annual theme through readings, weekly discussions, lectures, and interactions with IRW seminar fellows, visiting scholars, and distinguished lecturers. Development and presentation of research/action project.
Limited to and required of participants in the IRW Learning Community. Graded Pass/No Credit.

01:090:309 ***Women in Community Service (1)***

01:090:312 ***Purpose Project Part VI: Launching with Purpose (1.5)***

This sixth and final course in the Purpose Project Scholars program. Scholars will build on the work students completed in earlier courses. Launching with Purpose is designed to assist senior undergraduate students in navigating the transition from college to their post-graduation endeavors. Through readings, discussions, assignments, and activities, students will explore their values, interests, strengths, and identities, and develop essential skills and strategies.

Prerequisite: 01:090:204

01:090:315 ***Mentoring and Youth Challenges (3)***
Understanding of adolescent development, with a focus on physical, cognitive, social, and emotional development. Examination of positive and destructive issues related to mental health and wellness, including positive psychology, dating violence/domestic abuse, substance abuse, and bullying.
Prerequisite: Special permission of program.

01:090:316 ***Mentoring, Communication, and Ecological-Community Context (3)***
Advanced communication micro-skills and strategies. Development of broader understanding of adolescent identity development by examination of a variety of theories related to identity development.
Prerequisite: Special permission of program.

01:090:320 ***Peer Instructor Education (3)***
Student peer educators learn how to teach a first-year interest group seminar and help new students make the transition to university life. Selected topics focus on effective methods of college teaching and program strategies to increase understanding of the first-year and transfer experience. Discussions center on teaching techniques to integrate faculty, current research topics, academic advising, developmental and adjustment issues, and cooperative/group-learning experiences.
Open to selected upper-class students only. May not be repeated for credit.

01:090:321,322 ***Peer Instructor Education (3,3)***
Selected topics focus on effective methods of college teaching and program strategies.
Open to selected upper-class students only.

01:090:325,326 ***Special Topics (3,3)***
Exploration of problems and issues relating to a particular theme.

01:090:327,328 ***Special Topics (BA,BA)***
Exploration of problems and issues relating to a particular theme.

01:090:391,392 ***Introduction to the Thesis (1,1)***
Provides prospective thesis writers with the background, resources, and understanding necessary to produce independent research work.
Special permission required. Graded Pass/No Credit.

01:090:393,394 ***Independent Study and Research (BA,BA)***
Individualized study supervised by a faculty member.

01:090:395,396 ***Honors Independent Study and Research (3,3)***
Individualized study supervised by a faculty member.

01:090:399 ***Public Scholarship and Service Internship (1-2)***
One- or two-credit service-learning placement in an approved field setting related to the public good. Must be taken in conjunction with a designated Civic Engagement and Service Education Partnership (CESEP) course.

01:090:491,492 ***Research Workshop (1,1)***
Provides prospective thesis writers with the background, resources, and understanding necessary to produce independent research work.

01:090:493,494 ***Independent Study and Research (BA,BA)***
Individual research supervised by a faculty member.

01:090:495,496 ***Honors Interdisciplinary Thesis (3,3)***
Independent research supervised by a faculty member leading to an interdisciplinary senior honors thesis.
Open only to students in the School of Arts and Sciences Honors Program.

01:090:497,498 ***Honors College Interdisciplinary Thesis (3,3)***
Independent research supervised by a faculty member leading to an interdisciplinary senior honors thesis.

01:090:EC ***Advanced Placement Elective Credits (3)***

01:090:EC1 *Elective Credit (BA)*

ASIAN STUDIES 098

Department of Asian Languages and Cultures, School of Arts and Sciences

Website: Here

Chair: Wendy Swartz

Director of Undergraduate Studies: Satoru Saito

Distinguished Professor:

Senko K. Maynard, B.A., Tokyo University of Foreign Studies; M.A., Illinois (Chicago); Ph.D., Northwestern

Professors:

Young-mee Yu Cho, B.A., Seoul National (South Korea); Ph.D., Stanford

Suzy Kim, B.A., California (Los Angeles); Ph.D., Chicago

Paul Schalow, B.A., Hampshire College; M.A., Ph.D., Harvard

Wendy Swartz, B.A., California (San Diego); Ph.D., California (Los Angeles)

Associate Professors:

Jessey Choo, B.A., Rochester; M.A., Ph.D., Princeton

Satoru Saito, B.A., Virginia; M.A., Ph.D., Columbia

Weijie Song, B.S., Xi'an Jiaotong (China); M.A., Ph.D., Peking; Ph.D., Columbia

Xiaojue Wang, B.A., M.A., Peking; Ph.D., Columbia

Assistant Professors:

Jae Won Edward Chung, B.A., Swarthmore; M.F.A., M.A., Ph.D., Columbia

Hieu Phung, B.A., M.A., Vietnam National University-Hanoi; Ph.D., Hawaii

Associate Teaching Professor:

Haruko Wakabayashi, B.A., Sophia (Japan); Ph.D., Princeton

Yuan-Chen Jenny Yang, B.A., National Taiwan; M.A., University College London; Ph.D., Yale

Assistant Teaching Professors:

Hee Chung Chun, M.A., Ewha Womans (South Korea); Ph.D. candidate (Rutgers)

Jiro Harasaki, M.A., Columbia

Jaehyun Jo, B.A., M.A., Yonsei; Ph.D., California (Los Angeles)

Peng Liu, B.A., M.A., Soochow; Ph.D., Fudan; Ph.D., Columbia

Teaching Instructors:

Jane Huang, B.A., Penn State; M.A., Rutgers

Michiru Ichihara Lowe, B.A., Nanzan; M.A., Columbia

Kyoung-eun Jang Moon, B.A., Seoul National (South Korea); M.A,, Rutgers

Faculty Emeriti:

Peter Li, B.A., Washington; Ph.D., Chicago

Richard VanNess Simmons, B.A., M.A., Ph.D., Washington

Ching-I Tu, B.A., National Taiwan; Ph.D., Washington

Major Program Learning Goals and Requirements

Major Program Learning Goals and Requirements

Learning Goals

Majors in Asian studies will acquire an interdisciplinary knowledge of Asia through a wide range of course offerings in the humanities and social science disciplines such as: Asian languages, literature, visual culture, history, religion, economics, political science, art history, geography, anthropology, sociology, musicology, and linguistics. Students will develop critical skills in analyzing and interpreting texts from these disciplines and acquire the competency necessary for continuing on to graduate study or employment requiring such knowledge.

Requirements

The major in Asian studies requires 12 courses (of 3 credits or more) distributed as follows:

1. Two courses in Asian studies, chosen from East Asian Civilizations: Traditional Era (01:098:241), East Asian Civilizations: Modern Era (01:098:242), or Global East Asia (01:098:250)
2. Nine elective courses in Asian Studies, at least four of which must be offered in subject codes 098, 165, 565, or 574, and may include language courses above the 100-level
3. Capstone Seminar on East Asian Societies (01:098:444)

Minor Program Learning Goals and Requirements

Minor Program Learning Goals and Requirements

Learning Goals

Minors will be introduced to the cultural heritage of East Asia (China, Japan, and Korea) through a wide and coherent curriculum, which includes courses in the following humanities and social science disciplines: literature, visual culture, history, religion, language, and linguistics. Minors will learn critical skills in analyzing and interpreting literary, historical, and cultural materials appropriate to the student's area of specialization. Students will be able to relate relevant issues to other areas in the humanities.

Requirements

The minor program in Asian studies consists of six courses (of 3 credits or more) distributed as follows:

1. Two courses in Asian studies, chosen from East Asian Civilizations: Traditional Era (01:098:241), East Asian Civilizations: Modern Era (01:098:242) or Global East Asia (01:098:250)
2. Four elective courses in Asian studies, at least three of which must be offered in subject codes 098, 165, 565, or 574, and may include language courses above the 100 level

Asian Studies 098 (SAS)

Asian Studies Courses

Asian Studies Courses

01:098:101 ***Elementary Filipino (4)***
Introduction to sound, grammar, and writing system of Tagalog; practice and exercises in speaking, reading, and writing.

01:098:102 ***Elementary Filipino (4)***
Continued acquisition of conversational skills; deeper understanding of the language's grammar and syntax; broadening of vocabulary and feel for contemporary Tagalog, or Filipino. Focus on real situations and modes of interaction.
Prerequisite: 01:098:101 or equivalent.

01:098:111 ***Elementary Vietnamese (4)***
Introduction to sound, grammar, and writing system of modern Vietnamese; practice and exercises in speaking, reading, and writing.

01:098:112 ***Elementary Vietnamese (4)***
Basic skills requisite for modern conversational Vietnamese. Communicative and interactive listening and speaking skills; higher register of written Vietnamese. Introduction to folktale literature with written critiques.
Prerequisite: 01:098:111 or equivalent.

01:098:151 ***Elementary Manchu (4)***
Introduction to sound, grammar, and writing system of Manchu; practice and exercises in speaking, reading, and writing.

01:098:201 ***Intermediate Tagalog/Culture I (3)***
Further practice of conversational skills learned in Elementary Filipino/Tagalog I and II; understand more completely the grammar and syntax of the language; and build a vocabulary and feel for natural, contemporary Tagalog/Filipino. Contextual lessons in Philippine history, culture, values, and literature, to be conducted progressively in Tagalog/Filipino.
Prerequisite: 01:098:101, 01:098:102, or equivalent.

01:098:202 ***Intermediate Tagalog/Culture II (3)***
Continues an understanding, and appreciation of, contemporary Tagalog/Filipino and its cultural context. Grammatical and syntactical principles, vocabulary expansion and improvement of reading, speaking, and writing. Examination of Tagalog/Filipino as living tongue though exploration of its cultural, literary, and historical contexts.
Prerequisite: 01:098:201 or equivalent.

01:098:211 ***Intermediate Vietnamese I (4)***
Development of intermediate language skills; vocabulary building, oral proficiency, listening, and reading comprehension.
Prerequisite: 01:098:112 or equivalent.

01:098:212 ***Intermediate Vietnamese II (4)***
Continued development of intermediate language skills; vocabulary building, oral proficiency, listening,and reading comprehension.
Prerequisite: 098:098:211 or placement.

01:098:215 ***Introduction to Vietnamese Literature in Translation (3)***
Introduces traditional Vietnamese literature from its beginnings in the early second millennium to the advent of the French conquest in the mid-19th century.
No knowledge of Vietnamese language necessary.

01:098:235 ***Mongolian Literature in Translation (3)***
Examines the development of modern Mongolian literature since the socialist revolution of 1921 as an expression of the broader social, political, and cultural forces which have shaped Mongolia during the Soviet and post-Soviet periods.

01:098:241 ***East Asian Civilizations: Premodern Era (3)***
Introduction to traditional Chinese, Japanese, and Korean civilizations, including governmental institutions, educational systems, belief systems, language, literature, art, and everyday life.

01:098:242 ***East Asian Civilizations: Modern Era (3)***
Introduction to modern Chinese, Japanese, and Korean civilizations, including the impact of modernization, East-West contact, governmental institutions, belief systems, educational systems, language, literature, art, and everyday life.

01:098:250 ***Global East Asia (4)***
Critical analysis of social, cultural, and political narratives and counter-narratives used to describe and discuss East Asia. Global and regional dynamics and interrelated issues of modernity, war, gender, and the geopolitical balance of power, shaping events of the 21st century.

01:098:252 ***Southeast Asia and the World (3)***
Introduction to Southeast Asia¿ one of the crossroads of the world ¿from ancient civilizations until the end of the twentieth century. Includes the histories of Brunei, Burma/Myanmar, Cambodia, Indonesia, Laos, Malaysia, Philippines, Singapore, Thailand, Timore Leste, and Vietnam.
Credit not given for both this course and 01:508:250.

01:098:255 ***Heroism (4)***
Offers global and comparative examination of different conceptions of heroism across cultures, time, and gender. Explores cultural conditioning, ethical reasoning, and moral compass behind heroes and heroines in history and literature, from Greek epic heroes to Chinese assassin-retainers, women warriors to samurais, civil rights leaders to women's rights crusaders, and comic superheroes to modern day heroes.

01:098:262 ***Asian American Experience: Identity and Ethnicity (3)***
General introduction to history and culture of Asian America and major debates in Asian American studies.
Credit not given for both this course and 01:050:245.

01:098:280 ***Modern Vietnam in Literature and Film (3)***
This course drops you into Vietnam, a place right at the crossroads of Southeast and East Asia.You will learn to analyze a wide range of approaches by which the Vietnamese, including their diaspora, have come to identify themselves, memorialize their histories, and reproduce their cultures. Taught in English.

01:098:321 ***Topics in Asian Studies (3)***
Study of specific topics in Asian studies. Topics change per semester.
May be repeated for credit with department permission.

01:098:322 ***Interdisciplinary Topics in East Asia: Understanding Asian Community (3)***
Interdisciplinary introduction to East Asia and Asian community with critical approaches to modern literature, film, history, and culture in China, Japan, Korea, other Asian regions and beyond.

01:098:326 ***Immorality Suffering and Retribution in the Great Romances of East Asia (3)***
This course provides an introduction to vernacular narrative traditions of East Asia.

01:098:331 ***The Sounds of Asia: Music of the East in the Global Era (3)***
Introduction to musical sound, musical activities, and musicians as a means of understanding Asia. Analysis of musical genres, instruments, musicians, and associated artistic/cultural ideas that have developed historically, and are current today.

01:098:338 ***Religious Themes in East Asian Literature (3)***
Religious ideas and attitudes as expressed in Indian, Chinese, and Japanese classics.
Credit not given for both this course and 01:840:338.

01:098:340 ***TransAsia: A Transnation History of Asia, Gender, and Sexuality (3)***
Transnational history of Asia; how (trans)regional movements in peoples, ideas, commodities, technologies, and capital have shaped and been shaped by gender/sexuality.

01:098:345 ***Asia-Pacific in Cross-Cultural Perspective (3)***
Explores the social, cultural, and political interactions in the Asia-Pacific region from the late nineteenth century to the present from a cross-cultural perspective.

01:098:373 ***Classical Tibetan (3)***
Introduction to the grammar and writing system of classical Tibetan, working directly with original Buddhist texts.

01:098:393 ***Independent Study of Asian Languages and Literatures (3)***
Intensive study of a specific Asian language and/or literature not covered in regularly scheduled classes.
Prerequisites: Permission of instructor and department approval.

01:098:394 ***Independent Study of Asian Languages and Literatures (3)***
Intensive study of a specific Asian language and/or literature not covered in regularly scheduled classes.
Prerequisites: Permission of instructor and department approval.

01:098:410 ***The History of East Asian Writing Systems (3)***
General survey of writing and literacy in the East Asian countries of the Sinitic cultural sphere.

01:098:444 ***Seminar on East Asian Societies (3)***
Examines major social and cultural issues of contemporary East Asia (China, Japan, Korea) from nineteenth century to present through a variety of disciplinary perspectives such as literary approaches, visual studies, social history, women¿s and gender studies, and global studies. Provides systematic introduction to research process and equips students with necessary knowledge and skills to understand major issues in the larger context of East Asian culture and societies.
Prerequisites: 01:098:241, 01:098:242, 01:098:250, or by Department Permission.

01:098:473 ***The Silk Road: A History of Cultural and Material Exchanges (3)***
An interdisciplinary introduction to the history of the Silk Road with a focus on the cultural and material exchanges between the peoples and cultures it connected over the period from 500 BCE to 1500 CE.
Credit not given for both this course and 01:165:473.

01:098:477 ***Gender in East Asian Religiosity (3)***
Examines the religious beliefs and practices of and about women in Buddhism, Confucianism, Daoism, and other religious traditions popular in China, Japan, and Korea.

01:098:479 ***Environmental Crises in Southeast Asia (3)***
Examines the diversity of human relationships with nature and the various perceptions humans have about environmental crisis.

Astrobiology 101 (SAS)

ASTROBIOLOGY 101

Website: Here

Astrobiology is an interdisciplinary scientific field of study that examines the origins and distribution of life in the universe. The astrobiology minor is designed to educate students to cover the range of scientific disciplines that contribute to our general understanding of life, the origin of life, the past history of life on Earth, and the possible existence of life on other planets and moons. The principal goal of the minor is to develop student literacy in astrobiology so that they can critically evaluate claims related to this field reported in the news media and popular culture.

Contact: For information about the minor, students should contact Nathan Yee, the astrobiology faculty adviser, at nyee@envsci.rutgers.edu; or Lauren Adamo, the Department of Earth and Planetary Sciences undergraduate program director, at Lneitzke@eps.rutgers.edu.

Learning Goals

Learning Goals

Students completing this program will be able to:

1. Critically evaluate scientific issues related to astrobiology discussed in the media and popular culture;
2. Apply the scientific method to investigate problems in multiple scientific disciplines;
3. Interpret and analyze field and laboratory data; and
4. Communicate technical information effectively (orally, in writing, and/or through electronic media).

Astrobiology 101 (SAS)

Minor Requirements

Minor Requirements

Requirements

Students must complete 01:460:225 Astrobiology (3) plus 9 credits from Group A Courses and 6 credits from Group B courses for a total 18 credits. At least two courses must be 300-level or higher. Students cannot use the same course to satisfy requirements in a major and the astrobiology minor. The minor is not open to students with majors in the Department of Earth and Planetary Sciences. Other restrictions are noted below.

Group A Courses

01:460:203 Building and Maintaining a Habitable Planet (3)
01:460:212 Earth and Life through Time (3)
01:460:222 Planet Mars (3)
01:460:224 Geology of Moons and Planets (3)
01:460:304 Introduction to Geochemistry (4)
Prerequisites: Both 01:460:100 and 01:460:103 or 01:460:101 or 01:160:161 General Chemistry

01:460:305 Evolution and Geologic Time (3)
Prerequisites: 01:460:100 or 01:460:101.

01:460:441 Structure and Formation of the Terrestrial Planets (3)
Prerequisites: 01:460:302 or 01:460:304 or 01:460:306 Introduction to Geophysics or by permission of instructor.

01:460:476 History of the Earth System (3)
Prerequisites: Any three of 01:119:102, 01:160:162, 01:460:101, 01:750:204, or permission of instructor.

01:460:480 Major Events in Earth History (3)
Prerequisite: Permission of instructor.

Group B Courses

01:750:341 Principles of Astrophysics (3)
Prerequisites: Two semesters of introductory physics and two semesters of calculus. Credit not given for both this course and 01:105:341. Astrophysics majors must select another course.

01:750:342 Principles of Astrophysics (3)
Prerequisites: Two semesters of introductory physics and two semesters of calculus. Credit not given for both this course and 01:105:341. Astrophysics majors must select another course.

11:115:100 Molecules of Life (3)
Students will not receive credit for 11:115:100 if they have already completed 01:119:150 Biology, Society, and Biomedical Issues. Biochemistry and molecular biology and biochemistry majors must select another course.

11:680:201 Introduction to Microbiology (3)
Prerequisites: Two semesters of general biology and two semesters of general chemistry or by permission. Microbiology majors must select another course.

11:216:251 Fundamentals of Evolution (3)
Prerequisites: 01:119:102 or 01:119:117. Ecology, evolution, and natural resources majors must select another course.

Astrophysics 105 (SAS)

Learning Goals

Learning Goals

Majors will demonstrate knowledge of fundamental physics principles and their application to astronomy. They will make astronomical observations using optical and radio telescopes, and demonstrate knowledge of how to analyze the data. The top 25 percent of majors will demonstrate preparedness for graduate study in astrophysics, conduct frontier astrophysics research with a faculty member, and demonstrate high quality of work.

Astrophysics 105 (SAS)

Major Requirements

Major Requirements

The astrophysics major, leading to a bachelor of science degree, provides a thorough introduction to the subject. It is suitable for those with an interest in astronomy who aspire to a career in astronomy research, science education, science journalism, technical development, and other professional areas. Prospective majors should consult an adviser in the Department of Physics and Astronomy before choosing their courses.

In the astrophysics major, at least 15 credits of physics or astrophysics courses at the 300 level or higher that are applied toward the major must be completed at Rutgers University-New Brunswick.

Required courses and suggested curricula for honors students and other well-prepared students:

First year: 01:750:271-272, 275-276; 01:640:151-152

Second year: 01:750:273, 381-382, 351; 01:750:341,342; 01:640:251, 244

Third year: 01:750:361, 385-386; 01:750:343, 344; 01:640:423 or 421; 01:750:368 recommended

Fourth year: At least two courses out of 01:750:441, 442, 443, 444. Students who plan to take the physics subject test of the Graduate Record Examination should take 01:750:417 in a prior semester.

An alternate curriculum is available for students who did not begin with the Honors Physics sequence:

First year: 01:750:123-124; 01:640:151-152

Second year: 01:750:227-228, 229-230, 381-382; 01:640:251, 244

Third year: 01:750:361, 385-386, 351; 01:750:341,342; 01:750:368 recommended

Fourth year: 01:640:423 or 421, 01:750:343, 344, and at least two courses out of 01:750:441, 442, 443, 444

Students who took 01:750:203-204 (or 201-202) as their introductory physics sequence should consult a departmental adviser to plan an appropriate curriculum for the astrophysics major.

Astrophysics 105 (SAS)

Astronomy Minor Requirements

Astronomy Minor Requirements

The following courses are required for the astronomy minor:

01:750:203-204 (or any other equivalent physics sequence)

01:750:205-206 (or 229-230 or 275-276)

01:750:341,342, 343, 344

The grade-point average for all courses applied toward the minor must be at least 2.0. No more than one D may be applied toward the minor. Three of the four 300-level courses must be taken at Rutgers University-New Brunswick. Physics majors or minors who also wish to minor in astronomy must complete 01:750:341,342, 343, 344. These courses may not also be used to satisfy requirements for the major or minor in physics.

Astrophysics 105 (SAS)

Departmental Honors Program

Departmental Honors Program

The chair of the department will invite astrophysics majors who have shown considerable ability by the end of their junior year to participate in the departmental honors program. Candidates for honors either (1) take 01:750:497,498, write a thesis, and conduct a seminar on a project undertaken in the senior year; or (2) take two physics and astronomy graduate courses. They also take advanced courses in addition to the required courses of the astrophysics curriculum. Honors are awarded on the basis of the excellence of the honors project (if applicable), general performance in physics and astrophysics courses, and recommendations of the faculty.

Astrophysics 105 (SAS)

Courses

Courses

For a description of the physics courses that are required for the astrophysics major, see the Physics 750 subject heading in this catalog.

01:750:341,342 ***Principles of Astrophysics (3,3)***
Properties and processes of the solar system, the stars, and the galaxies; origin of the elements; evolution of the stars and the universe; neutron stars and black holes.
Prerequisites: Two semesters of introductory physics and two semesters of calculus.

01:750:343 ***Observational Radio Astronomy (3)***
Observational study of the solar system, stars, and galaxies, using the Serin 3 meter radio telescope. Emphasizes computer techniques for data reduction and analysis. Topics may include calibrating system properties; the variability of the Sun, Jupiter, or quasars; and mapping the distribution of hydrogen in our Milky Way galaxy and measuring its rotation.
Lec. 1.5 hrs., lab. 3 hrs. Prerequisites: 01:750:341,342 or permission of instructor. Lab schedule will vary through the semester. Credit not given for both this course and 01:105:343.

01:750:344 ***Observational Optical Astronomy (3)***
Observational study of the solar system, stars, and galaxies, using the Serin 0.5 meter optical telescope. Emphasizes computer techniques for data reduction and analysis. Topics may include the dimensions of lunar features, planetary satellite orbits, color-magnitude diagrams for star clusters, and the structure and colors of galaxies.
Lec. 1.5 hrs., lab. 3 hrs. Prerequisites: 01:750:341,342, or permission of instructor. Students must have nighttime hours free for observing.

01:750:441 ***Stars and Star Formation (3)***
Observed properties of stars. Internal structure of stars, energy generation and transport, neutrinos, and solar oscillations. Evolution of isolated and double stars, red giants, white dwarfs, variable stars, supernovae. Challenges presented by formation of stars, importance of magnetic fields. Pre-main sequence stellar evolution.
Prerequisites: 01:750:361, 385-386.

01:750:442 ***High Energy Astrophysics and Radiative Processes (3)***
Radiation and scattering processes in plasma. Detection and X- and gamma-rays. Supernovae and remnants, pulsars. Gamma-ray bursts. Accretion disks and binary star outbursts. Quasars and active galactic nuclei. Cosmic rays.
Prerequisites: 01:750:361, 385-386.

01:750:443 ***Galaxies and the Milky Way (3)***
Properties of galaxies: photometry, kinematics, and masses. Disk galaxies; spiral patterns, bars and warps, gas content, star formation rates, chemical evolution. Elliptical galaxies; shapes. Structure of the Milky Way. Nature of dark matter.
Prerequisites: 01:750:381-382, 385-386.

01:750:444 ***Introduction to Cosmology (3)***
Expansion of the universe, techniques for distance estimation. Large-scale structure of the universe. Cosmological models: open, closed, flat, and accelerating universes. Microwave background: observations, properties, and origin. Problems of standard cosmology and preliminary concept of inflation.
Prerequisites: 01:750:361, 385-386.

01:750:497,498 ***Honors in Astronomy (1-6 BA,1-6 BA)***
Supervised independent research or reading in astronomy, culminating in a seminar conducted by the student.
Prerequisite: Invitation of chair.

Biochemistry 115 (SEBS)

BIOCHEMISTRY 115

Degree: B.S.

Director: Lori A. White (lori.white@rutgers.edu)

Undergraduate Program Website: https://dbm.rutgers.edu/biochemistry/

Department Managing the Undergraduate Program in Biochemistry: Biochemistry and Microbiology

Department Chair: Max Haggblom

Department Website: http://dbm.rutgers.edu

The biochemistry major provides students with an integrated education in biochemistry that brings together the basics of biochemistry and its application to biological systems. The major takes advantage of the diversity of molecular/biochemical research and coursework that is offered at Rutgers atSchool of Environmental and Biological Sciences (SEBS) and the other schools. Students will apply their basic understanding of biochemistry to a specific area of interest, ranging from toxicology/pharmacology to food and nutritional sciences, microbiology, animal science, and plant biology. This redesigned and enhanced curriculum follows the recommendations of the American Society for Biochemistry and Molecular Biology (ASBMB) and has components of both a traditional course-centered approach to teaching and the more current content- and outcome-centered approach. The purpose of the major is to prepare students for futures in science, either through obtaining advanced degrees or through entering the workforce in the pharmaceutical, biotechnological and chemical industries, government service, communications, law, and many other fields.

Learning Goals

Learning Goals

Upon graduation, students will have an understanding of the following:

1. Biochemistry graduates will be able to describe and discuss the basic concepts of biochemistry, including metabolism, enzymatic structure and function, and regulation of gene and protein expression.
2. Biochemistry Major graduates will be able to apply the scientific method, stating and testing a hypothesis, and will be able to design experiments to solve problems in biochemistry.
3. Graduates will gain hands-on experience in current biochemical techniques and be able to evaluate and present scientific data.
4. Upon completion, students will be able to critically analyze scientific data and scientific papers and be able to be effective science communicators
5. Graduates will be able to discuss and communicate a fundamental understanding of ethical and current issues in biochemistry and demonstrate an understanding of the importance of ethics in scientific research.

Graduation Requirements for the Major

Graduation Requirements for the Major

Students matriculating prior to the fall semester 2015 in the School of Environmental and Biological Sciences (SEBS) must complete the SEBS general education requirements. In addition, students majoring in biochemistry must complete the major requirements described below.

Students matriculating fall 2015 or after and transfer students matriculating in 2016 and after must complete a goal-based Core Curriculum in place of general education requirements. The goal-based core is described here: http://sebs.rutgers.edu/core. Courses are certified for the Core Curriculum by a faculty committee. A current list of certified courses can be found here: http://sebs.rutgers.edu/core. Biochemistry major requirements are as described below.

For an up-to-date description of biochemistry major requirements, courses, and course sequences please refer to the program webpage at http://dbm.rutgers.edu/biochem.

Proficiency in Biochemistry (90 credits)

The major in Integrated biochemistry consists of the six parts listed immediately below. They are described briefly here; the specific requirements are listed below.

- **Life and Physical Sciences Core**
  These courses prepare students to enter the major. These courses are normally completed in the first two years of college.

- **Quantitative Methods**
  Quantitative reasoning, computational facility, and a grasp of calculus are essential skills for people to be well educated in molecular biosciences. As with the life and physical sciences core, students should normally complete this requirement within the first two years of college.
- **Biochemistry Core**
  This set of courses is required for all majors and prepares the student for both advanced coursework and research experience.
- **Professional Ethics**
  Ethical conduct has at least two components: general ethical behavior and the ethical implications for society at large as a consequence of advances in biochemistry. Although Contemporary Issues in Biochemistry will meet the formal requirement, all courses within the major will include ethical components and examples. In addition, all students in the major and in any of our courses will be required to adhere to a strict honor code.
- **Major-Related Experiential Learning**
  It is important that students be able to apply their knowledge of biochemistry in a laboratory setting. Therefore, all students will be required to take 6 credits of Experiential Learning. The School of Environmental and Biological Sciences requires 3 cr for graduation; therefore, Biochemistry Majors take an additional 3 cr. This can be accomplished through working in an academic laboratory at Rutgers, either at SEBS or the other campuses. This requirement can also be met through the George H. Cook Honors program, the General Honors Program, the Aresty Program, summer research opportunities (RISE or SURF), or through research experience through the Student Professional Internship Network (SPIN). The Research Experience may be structured to satisfy the college's experiential learning requirement.

- **Biochemistry Options**

    - **Biochemistry of Microbial Systems**
      This option blends biochemistry with microbiology, allowing students to become proficient in the biochemistry of microbial organisms and systems. This will include aspects of clinical microbiology and infection, as well as environmental microbiology. Microbial infections of higher organisms are of continuing importance in human and animal health. Microorganisms also have profound environmental implications. Microbial systems detoxify toxic substances and contribute to nutrient cycling in the ecosphere. Another area of study is the use of microbial organisms to synthesize useful materials and to convert biomass to fuels.
    - **Biochemical Toxicology**
      This option will allow the student to gain specific understanding of the study of toxic compounds. Toxicology is of critical importance in food and nutrition, the environment, and in pharmacological science. Understanding the biochemical effects allows one to design appropriate treatments of illness, and to learn what exposures must be avoided. An equally important second purpose, the study of how biochemical systems are made to go awry by toxic substances, illuminates normal functioning and development of organisms. This understanding applies equally to all animals, including humans, as well as to plants and microorganisms. It applies also to ecological communities of organisms, as toxic substances alter the interactions within ecosystems.

- **Biochemistry of Plant Systems**
  Plants are not only at the root of the human and animal food chains, they are one of the dominant components of the planet's ecosphere. Understanding their biochemistry is a large and growing area of basic and applied research and public policy development.
- **Protein and Structural Biochemistry**
  Biochemistry stands on two legs: structure and function. Neither can be understood without the other. The principles that confer thermodynamic stability--or the lack of it--on proteins, nucleic acids, and other biomolecules are universal to all forms of life as are the principles by which enzyme catalysis and other functions arise from three-dimensional structure. Evolution drives the formation of structure based on the functional needs of the organism and on the prior constraints imposed by the species' evolutionary history. In addition to basic understanding, study in this area develops the bases for protein design to solve practical problems.

Detailed Requirements

I. Life and Physical Sciences Core
The following are required
01:119:115/116 General Biology I, II (4,4)
01:119:117 Biological Research Laboratory (2)
01:160:161,162 General Chemistry I, II (4,4) or equivalent
01:160:171 Introduction to Experimentation (1)
01:750:193,194 Physics for the Sciences* (4,4) or
01:750:201,202 Extended General Physics (5,5) or
01:750:203,204 General Physics I, II (3,3)
01:160: 307,308 or 315,316 Honors Organic Chemistry I, II (4,4)
01:160:309 (2.5) or 311 Organic Chemistry Laboratory (2)
01:447:380 Genetics (4)

II.Quantitative Core
01:640:135 Calculus I for the Life & Social Sciences (4) OR
01:640:151 Calculus I for Mathematical & Physical Science (4)
01:640:136 Calculus II for the Life & Social Sciences (4) OR
01:640:152 Calculus II for Mathematical & Physical Science (4) OR
01:960:401) Basic Stats for Research (4) OR
01:960:211 Statistics I (4) and 01:960:212 Statistics II (4)
**FOR PROTEIN AND STRUCTURAL BIOLOGY OPTION Calc II is Required.

III. Biochemistry Core
11:115:201 Contemporary Issues in Biochemistry** (2)
11:115:403/404 General Biochemistry I, II (4,3)
Note: To enroll in 11:115:403,404 General Biochemistry (4,3), students, be they majors in biochemistry or not, must have completed 01:160:307-308 Organic Chemistry (4,4) or 160:315-316 Honors Organic Chemistry with grades of C or higher.

11:115:413/414 Experimental Biochemistry I, II (3,3)
11:115:409 Principles of Biophysical Chemistry (3) or
01:160:341Phys Chem Bio System (3)
11:115:491 Biochemical Communications (3)

***Normally taken in the sophomore year. Transfer students entering in the fall of the junior year will take it in the fall of that year. Among other matters included in it, this class will satisfy the ethics requirement for biochemistry majors.*

IV. Upper Level Lab Courses(two of the following courses)
11:115:436 Molecular Toxicology (3)
11:680:494 Applied Microbiology (4)
11:126:383 Nucleotide Sequence Analysis (3)
11:126:482 Molecular Genetics Laboratory (4)
11:126:484 Tools for Bioinformatic Analysis (3)
11:126:485 Bioinformatics (3)
11:776:452 Plant Tissue Culture (3)
01:146:357 Systems Physiology Lab (1)
01:160:251 Analytical Chemistry (3)
11:115:493/494 Research Problems in Biochemistry (3)
01:198:111 Intro to Comp Sci (3)
01:198:142 Data 100 Data Literacy (3)

V. Ethics
11:115:201 Contemporary Issues in Biochemistry (3)
11:115:321 Ethical Issues in Biochemical Research (3)
11:015:405 Ethics in Science (3)
11:015:433 Critical Scientific Thinking (3)
01:730:249 Bioethics (3)

VI. Research Experience (3 cr)
The curriculum is designed to provide students with the basics of laboratory experimentation followed by independent research experience in a research lab. A minimum of two semesters of research is required. With the approval of the undergraduate program director, Experiential Learning may be accepted to meet this requirement. Biochemical Communications provides the opportunity for students to present their own research, in both written and oral formats, as well as research from the biochemical literature.

11:115:493,494 (Research Problems in Biochemistry May be replaced by 11:015:497, 498 George H. Cook Honors Research,11:554:302 Aresty Research Assistantship

VII. Options:
Requires four classes from the specific lists below. Biochemistry electives, including option requirements, must equal at least 12 credits.
*Course(s) indicated by an * in each option is(are) required.*

Biochemistry of Microbial Systems
11:115:423 Fundamentals of Genomics (3)
11:680:390 General Microbiology (4)*
11:680:494 Applied Microbiology (4)
11:680:475 Microbiomes and Health (3)
11:680:480 Microbial Genetics andGenomics (3)
11:680:481 Microbial Physiology (3)
11:067:490 Pathophysiology (3)
11:126:486 Analytical Methods in Microbiology (3)
11:126:407 Comparative Virology (3)
11:126:481 Molecular Genetics (3)
01:146:481 Virology (3)
01:146:474 Immunology (3)
11:216:405 Evolution in Infectious Disease (3)
11:400:423 Food Microbiology

Biochemical Toxicology

01:694:413 Chromatin and Epigenomics: The Science of Chromatin Modifications in Development and Disease (3)
01:160:480 Structural Biology, Structural Biophysics, and Chemical Biology (3)
11:115:485 Structural Biochemistry (3)

General Option (12 cr total)
12 credits of classes taken from any of the above lists

Unspecified Electives
In addition to courses meeting the above requirements, students can take other courses offered by the university, for which they meet the course eligibility requirements, to bring their total number of credits to the minimum of 120 (matriculated 2018 or later) or 128 (matriculated prior to 2018) required for graduation.

Biological Sciences 119 (SEBS)

BIOLOGICAL SCIENCES 119

Degree: B.A.

Program Director: Martha Haviland (haviland@biology.rutgers.edu)

Director of Advising: Anne Carr-Schmid (schmid@biology.rutgers.edu)

Adviser: Joseph Ventola (ventola@rutgers.edu)

Students in the School of Environmental and Biological Sciences (SEBS) may choose the major in biological sciences, which is offered by the School of Arts and Sciences (SAS). Completion of the major prepares students for graduate study; for careers in government, industry, or secondary school teaching; and also satisfies the entrance requirements for medical and dental schools.

Students interested in more specialized majors in the life/biological sciences (such as agriculture and food systems; animal science; biochemistry; biotechnology; cell biology and neuroscience; ecology, evolution, and natural resources; exercise science; food science; genetics; marine sciences; microbiology; molecular biology and biochemistry; nutritional sciences; or plant biology) should refer to the relevant sections of the catalog and should also contact the program coordinator or adviser for the specific major of interest.

Learning Goals

Learning Goals

Our overarching goal for educating our students majoring in biological sciences is to inspire them to want to discover and understand the natural world. In the process of achieving this goal, we expect our students to acquire not only facts and concepts but also skills and perspectives. We hope that our learning goals will both prepare our students for a variety of career objectives and supply them with the tools to become lifelong learners in the ever-evolving world of biological sciences.

Learning Goals

I. To acquire the appropriate factual and conceptual knowledge that provides students with a foundation to further their education and career in the areas of life science or health science. Students will be able to demonstrate basic knowledge (e.g., identify, define, explain, etc.) of the concepts, practices, and principles that comprise the biological sciences.

II. To develop data analysis and statistical reasoning skills that prepare students for a society increasing reliant on the use of data and information. Students will be able to interpret/evaluate patterns in data presented in tables, figures, and graphs as well as be able to organize, summarize, and present data.

III. To develop the ability to use scientific reasoning as embodied by the structured process commonly known as the scientific method to empower students with the ability to generate and refine knowledge. Students will be able to evaluate and apply the practice of science.

IV. To develop critical thinking and problem-solving skills appropriate to prepare students to evaluate, synthesize, and generate knowledge that provides them with a competitive advantage to adapt to an evolving, global, and knowledge-based society. Students will be able to demonstrate application of higher order thinking (e.g., classify, diagnose, evaluate, synthesize, hypothesize, etc.). Students will develop an understanding of not only the connections within biology but also the connections between biology and other scientific disciplines.

Biological Sciences 119 (SEBS)

Entry Requirements for the Major

Entry Requirements for the Major

Students wishing to major in biological sciences must have completed two semesters of General Biology and the Biological Research Laboratory with a grade of C or better in each course. Both semesters of General Biology must have been completed at the same institution or on the same campus at Rutgers. No more than two courses with a grade of D may be used to fulfill the requirements of the major. A 2.0 GPA must be maintained in the life sciences core and elective courses applied toward the major. Students must meet with an adviser before they can successfully declare their major.

Biological Sciences 119 (SEBS)

Graduation Requirements for the Major

Graduation Requirements for the Major

A. Major Requirements (73 credits)

The major in biological sciences is offered by the School of Arts and Sciences (SAS). It involves 49 credits of required life science core courses, and 24 credits of approved life science electives. No more than two courses with a grade of D may be used to fulfill the requirements of the major. Please refer to the SAS section of the catalog for the Life Sciences for a full description of the requirements of the major.

B. Additional SEBS Requirements for Students Majoring in Biological Sciences

School of Environmental and Biological Sciences (SEBS) biological sciences majors matriculating fall 2015 or after and transfer students matriculating in 2016 must complete a goal-based Core Curriculum: http://sebs.rutgers.edu/core. A current list of certified courses can be found here: http://sebs.rutgers.edu/core.

SEBS biological sciences majors matriculating prior to the fall semester 2015 must complete major requirements as described in the SAS section of the catalog for the Life Sciences as well as the general education requirements.

Bertram Walsh, Ph.D., Michigan

Robert Wilson, Ph.D., Yale

Learning Goals

Learning Goals

Majors will be able to employ problem-solving skills in a wide range of modern mathematics, analyze quantitative information and apply advanced mathematics techniques and concepts where appropriate, communicate rigorous mathematical ideas and reasoning effectively, appropriately use supporting technology, and work cooperatively as part of a team to solve mathematical problems. Top students will demonstrate experience in research. Students in combined math/education programs will be able to demonstrate a broad perspective on mathematics, including the history of the subject, and an understanding of the connections between college mathematics and the state's curriculum framework. Students in the bachelor of science (B.S.) program (honors track) will be prepared to engage in graduate-level work in a doctoral program.

Minors will be able to demonstrate an understanding of the special nature of mathematical thinking, create and communicate mathematical arguments, and apply mathematical knowledge and techniques in advanced courses in their major discipline.

Biomath majors will be able to employ problem-solving skills in a wide range of modern mathematics; solve mathematical problems and apply mathematics, mathematical concepts, and mathematical models to problems in biology; communicate rigorous mathematical ideas and mathematical reasoning effectively; conduct laboratory work in the biological sciences; and pursue graduate study, medical school, or research jobs in government and industry.

The general liberal arts student will be able to employ elementary mathematics and discuss bringing abstract mathematics to bear on areas related to everyday life, such as political science, personal finance, or games of chance. Students whose majors require more advanced mathematics will be adequately prepared. Students aiming toward careers in elementary school education will be able to pass state-mandated examinations before certification, and to satisfy the university's course requirements related to certification. Students aiming at actuarial careers will be able to pass the exams for professional certification, including the P, FM, and LTAM exams.

Major Requirements

Major Requirements

The Department of Mathematics annually publishes a *Brochure for Math Majors*, which contains detailed information about the math major program; copies of this brochure may be obtained on the web at http://www.math.rutgers.edu/academics/undergraduate/majors.

The requirements for a math major are as follows:

1. Three semesters of calculus (01:640:151-152, and 251 or equivalent), Introductory Linear Algebra (01:640:250), and Elementary Differential Equations (01:640:252). Courses 01:640:250, 251, and 252 must be passed with grades of C or better. Majors normally should take both 01:640:250 and 251 no later than the first semester of their sophomore year.

2. 01:198:107 Computing for Mathematics and the Sciences with a grade of C or better. (01:198:111 Introduction to Computer Science or 14:332:252 Programming Methodology I may be substituted for 01:198:107.) It is recommended strongly that this course be completed by the end of the second semester of the sophomore year.

3. The completion of all the requirements in one of the mathematics major options listed below. (Students must notify the mathematics department in writing if they are not following the standard mathematics major option. Courses in other departments may not be substituted).

Grade Requirements for Mathematics Majors

To be admitted to the mathematics major program, a student normally must have completed three semesters of calculus with a grade of C or better in each course. To continue as a mathematics major, a student must make satisfactory progress toward completing the program. Satisfactory progress for a full-time student normally means passing at least one mathematics course at an appropriate level each semester with a grade of C or better. To complete the mathematics major program, a student must receive grades of C or better in 01:640:250, 251, and 252 and in all but one of the further mathematics courses. A student also must receive grades of C or better in the courses in other departments (e.g., computer science) used to fulfill the requirements of the program.

Mathematics Major Options

Option A, Standard Mathematics (Curriculum Code 640). In addition to the requirements above, to complete the standard mathematics major a student must pass eight 300- to 400-level mathematics courses, excluding 01:640:491,492. All but one of these courses (curriculum code 640) must be passed with a grade of C or better. At least four of the upper-level courses used to complete the major must be taken at Rutgers University-New Brunswick, including one of 01:640:311,312, 411-412, and one of 01:640:350, 351, 451-452. An appropriate Rutgers graduate mathematics course may be substituted for the required analysis and/or algebra course, with departmental approval.

Recommended are probability (01:640:477), statistics (01:640:481), a course in mathematical modeling (01:640:321, 338, or 478), and a course in discrete mathematics (01:640:338, 354, 428, or 454). Also recommended is a two-semester sequence of mathematically oriented courses in some other discipline.

Option B, Honors Track. The Department of Mathematics offers a special honors track to qualified students. Admission to the honors track is by application, which is available from the mathematics undergraduate office or from the mathematics department website. Students should normally apply no later than the end of the first semester of their sophomore year. Students in the honors track will have their progress reviewed by the honors committee, and are expected to earn a B or better in their advanced math courses (300 level and above). Students who successfully complete the honors track are eligible for graduation with a bachelor of science.

Each student in the honors track will be assigned a faculty adviser. Together with the adviser, he or she will formulate a proposed course plan, subject to the approval of the mathematics honors committee. This course of study will normally include 01:640:291 and 292 (01:640:151,152, 251, and 252 may be accepted if approved by the Honors Committee); either 01:198:107 or 01:198:111; 01:640:250, 300 (honors), 411-412, and 451-452; two semesters of 1-credit honors seminar, at least one at the junior/senior level; and four mathematics electives as approved by the honors committee.

Option C, Actuarial Mathematics Track. The actuarial track in mathematics requires 66 credits, primarily in mathematics and economics, as indicated below. See Brochure for Math Majors.

I. Core Math and Computer Science Courses (21 credits total)
Calculus I-IV; 01:640:151, 152, 251, 252
Linear Algebra; 01:640:250
Computer Science; 01:198:107 or 01:198:111

II. Core Economics and Accounting Courses (9 credits total)
Micro- and macroeconomics; 01:220:102, 01:220:103
Accounting 33:010:272

III. Additional Mathematics Courses (21 credits total)
Required courses:

01:640:285 Introduction to Interest Theory for Actuarial Sciences (3) (covers material on the SOA FM exam; students who pass the FM exam may be excused from this requirement)

01:640:477 Mathematical Theory of Probability (3) (Covers Material on the SOA P exam)

01:640:481 Mathematical Theory of Statistics (3) (Covers Material on the SOA P exam)

01:640:486 Mathematics of Life Contingent Risk Models I (3) (covers material on the SOA LTAM exam)

Elective courses: three additional mathematics courses at the level of 300 and above. The following are recommended:
01:640:485 Introduction to Mathematical Finance (3) (covers material on the SOA FM exam)
01:640:478 Introduction to Stochastic Processes (3)
01:640:487 Mathematics of Life Contingent Risk Models II (3) (covers material on the SOA LTAM exam)
01:640:354 Linear Optimization (3)
01:640:373 Numerical Analysis (3)

IV. Additional Economics courses (15 credits)
Required:
01:220:320 Intermediate Microeconomic Analysis (3)
01:220:321 Intermediate Macroeconomic Analysis (3)
01:220:322 Econometrics (3)

Students must take two additional electives from the following list:

Other 300/400-level math courses
01:220:421 Economic Forecasting and Big Data (3)
01:220:413 Financial Economics (3)
01:220:423 Advanced Time Series and financial Econometrics (3)
01:220:481 Economics of Uncertainty (3)

Biomathematics Interdisciplinary Major (Curriculum Code 122)

The biomathematics interdisciplinary major requires 63-67 credits distributed as follows: mathematics 33 credits, and biology and cognate fields 30-34 credits. A grade of C or better in courses credited toward the major is required for graduation, and each course may be repeated only once to replace D/F grades. See *Brochure for Math Majors.*

Core biology and chemistry required courses:

01:119:115-116 General Biology I and II (4,4), or equivalent
01:160:161-162 General Chemistry I and II (4,4), or equivalent
01:160:171 Introduction to Experimentation (1)

Mathematics required courses:

01:640:151,152, 251 Calculus for Mathematical and Physical Sciences I, II, and III (4,4,4)
01:640:250 Introductory Linear Algebra (3)
01:640:252 Elementary Differential Equations (3)
01:640:336 Dynamical Models in Biology (3)
01:640:338 Discrete and Probabilistic Models in Biology (3)
01:640:477 Mathematical Theory of Probability (3)
01:640:481 Mathematical Theory of Statistics (3)

One of the following courses:

01:640:350 Linear Algebra (3)
01:640:373 Numerical Analysis (3)
01:640:423 Elementary Partial Differential Equations (3)
01:640:428 Graph Theory (3)
01:640:454 Combinatorics (3)
01:640:478 Introduction to Stochastic Processes (3)

Required lab, one of the following:

01:146:357 (1); 01:146:475 (1); 14:125:315 (1)

Note: 01:447:390 is a 4-credit elective (see below) and includes a lab that satisfies this requirement.

Electives:
Four courses from the following list. 01:447:380 is highly recommended. No more than one course from 14:125 (biomedical engineering) can count as an elective.

01:146:245 Fundamentals of Neurobiology (3)
01:146:270 Fundamentals of Cell and Developmental Biology (3)
01:146:302 or 01:447:302 Computers in Biology (3)
01:146:356 Systems Physiology (3)
01:146:445 Advanced Neurobiology (3)
01:146:470 Advanced Cell Biology (3)
01:146:474 Immunology (3)
01:185:335 Neural Structure of Language (3)
01:185:350 Fundamentals of Cognitive Neuroscience (3)
01:160:305 (3) or 307 (4) or 315 (4) Organic Chemistry
01:160:306 (3) or 308 (4) or 316 (4) Organic Chemistry
01:447:380 Genetics (4)
01:447:384 Genetic Analysis (4)
01:447:390 General Microbiology (4)
01:447:480 Topics in Molecular Genetics (3)
01:447:486 Evolutionary Genetics (3)
11:704:486 Principles of Evolution (3)
11:216:351 Principles of Applied Ecology (3)
11:216:431 Fundamentals of Ecological and Environmental Modeling (4)
11:216:486 or 11:704:486 Principles of Evolution (3)
11:776:495 Functional Genomics for Research (3)
16:215:513 Population Genetics (01:447:380) (3)

No more than one of:

01:146:478 Molecular Biology (3)
01:694:301 Introductory Biochemistry and Molecular Biology (3)
01:694:407 Biochemistry (3)
01:694:408 Molecular Biology and Biochemistry (3)

No more than one of:

14:125:303 Biomedical Transport Phenomena (3)
14:125:403 Cardiovascular Engineering (3)
14:125:407 Fundamentals of Computer Tomography (3)
14:125:410 Sensory Processes, Mechanisms, and Computational Models (3)
14:125:437 Computational Systems Biology (3)

Graduation with Honors in Biomathematics

The interdisciplinary major in biomathematics has a program to recognize graduating biomathematics majors for outstanding performance. Such students, upon graduation, may be awarded honors in biomathematics.

Note that the requirements for graduation with honors in biomathematics are distinct from other honors graduation programs such as the honors program of the School of Arts and Sciences. Students may qualify for one or more honors programs, in multiple departments.

Students who will meet the requirements for biomathematics graduation honors and wish to be considered for graduation with honors in biomathematics should file the Intent to Complete Biomathematics Honors by February of their senior year, in order to ensure consideration.

To graduate with biomathematics honors, a biomathematics major must:

1. have a cumulative grade-point average of 3.4 or better in the five mathematics courses at or above the 300 level taken to fulfill the biomathematics required and elective courses;
2. have a cumulative grade-point average of 3.4 or better in the four courses taken to fulfill the biomathematics required upper-level science courses;
3. have an overall cumulative grade-point average of 3.0;
4. at least one of 01:640:336 and 01:640:338 must be completed with a grade of B+ or better; and
5. must have completed with a B+ or better grade in the biomathematics research courses 01:122:491 and 01:122:492.

Statistics-Mathematics Interdisciplinary Major (Curriculum Code 961)

See Statistics 960.

Mathematics 640 (SAS)

Minor Requirements

Minor Requirements

A minor in mathematics consists of three semesters of calculus (ordinarily 01:640:151-152, 251), linear algebra (01:640:250), and four additional 3- or 4-credit courses, one of which may be either 01:640:244 or 252, and the rest of which must be 300- or 400-level mathematics courses (curriculum code 640). Three of the four courses beyond 01:640:251 must be taken at Rutgers University-New Brunswick. Grades of C or better are required in 01:640:250 and 251; at most, one D is permitted in the four courses beyond 01:640:250.

Mathematics 640 (SAS)

Departmental Honors Programs

Departmental Honors Programs

Eligible first-year students and sophomores may take 01:640:291 and 292, which are honors courses in second-, third-, and fourth-semester calculus, respectively. The department also offers an honors version of 01:640:300 Introduction to Mathematical Reasoning and honors versions of proof-based courses in abstract algebra and real analysis.

Entry into these courses is determined by the department and is based on the student's previous performance in mathematics. The department occasionally offers honors sections of other courses.

To graduate with departmental honors, a mathematics major must have a cumulative grade-point average of at least 3.4 or better in mathematics courses at the 300 level or above and an overall cumulative grade-point average of at least 3.0, and must complete successfully two courses that are either approved independent study courses, approved graduate courses, approved sections of 300- or 400-level courses, or an approved project. A student who would like to have a course count toward the two-course honors requirement must apply at the department office no later than the first week of classes of the semester during which he or she takes the course. The determination of whether a candidate graduates with departmental honors depends on the student's total performance in mathematics (including the written exposition of mathematical ideas). A more detailed description of the honors program can be obtained at the departmental offices or on the website.

Mathematics 640 (SAS)

Preparation for Secondary School Teaching

Preparation for Secondary School Teaching

There are several paths that Rutgers students can follow to prepare for a career in secondary school teaching.

1. The five-year mathematics teacher preparation program in the Rutgers University Graduate School of Education (GSE) integrates the mathematics undergraduate program with teaching preparation, leading to a bachelor of arts (B.A.) degree in mathematics, a master of education (M.Ed.) degree, and New Jersey teacher certification. Students must apply for admission (usually in the junior year), complete a standard mathematics major, satisfy undergraduate requirements set by the GSE as well as those set by the School of Arts and Sciences, and, in the fifth year, complete additional coursework, including an additional mathematics elective, and do a student teaching internship. The nine required mathematics courses at the 300 to 400 level must include 01:640:300, 311, 351, 435, 437, 477, 481, and an applied math course.

2. After completing the mathematics major, students may obtain an M.Ed. and New Jersey teacher certification through the Rutgers GSE postbaccalaureate certification program or through postbaccalaureate certification programs at other institutions. Application to the program may be made in the fall of a student's senior year or anytime after graduation. This 45-credit program requires coursework in both mathematics and education as well as a student teaching internship, and may be pursued either full time or part time.

3. Other paths to secondary school mathematics teaching include: 1) "alternate route" certification, which usually requires a period of apprenticeship in a high school and 200 hours of coursework at a cooperating college or university; and 2) teaching without certification in a private independent or parochial school.

Prospective teachers should contact the mathematics department and/or the Office of Teacher Education in the Graduate School of Education as early as possible in their undergraduate careers and should stay informed about the rapidly evolving procedures and standards for certification. Further information on all Rutgers teaching programs can be obtained from GSE or from the website https://gse.rutgers.edu.

Mathematics 640 (SAS)

Five-Year Bachelor of Arts/Master's Programs

Five-Year Bachelor of Arts/Master's Programs

Many career paths in business, industry, and government depend on mathematical modeling and mathematical analysis. Rutgers offers five-year B.A./M.S. tracks that help to prepare students for entry into such careers. Tracks leading to master's degrees are available in fields such as economics, mathematical finance, industrial and systems engineering, and statistics. There is also a five-year, dual-degree track with the Graduate School of Education (see the catalog section Preparation for Secondary School Teaching). With proper planning, students in these tracks can finish a bachelor of arts degree in mathematics and a master's degree from one of these fields within five years.

The various tracks differ in details and requirements, but share the following common features. Undergraduate math majors apply for entry into a five-year track before their senior year. Accepted applicants are admitted to the master's program contingent upon successful completion of their undergraduate mathematics degree, plus additional coursework in their area of applied interest. Typically, this requires students to take as undergraduates more than the standard 120 credits needed for graduating with a bachelor of arts degree. Some of these credits will be in graduate courses and will count toward the master's degree. In the fifth year, accepted students complete the coursework for the master's program. More detailed information on the five-year tracks is available on the mathematics department webpage.

Students will find that a mathematics major is excellent preparation for graduate study in statistics, operations research, industrial engineering, economics, or financial mathematics, even if they choose not to pursue a five-year track. Such students would apply to graduate programs in these areas in their senior year, as normal. Departmental advisers can guide students in their selection of coursework outside the mathematics department to best prepare them for the graduate programs of their choice.

Mathematics 640 (SAS)

Before Taking Mathematics Courses

Before Taking Mathematics Courses

Entering first-year students and most transfer students are required to take the mathematics placement test before registering for any mathematics course at Rutgers University-New Brunswick. Students will be informed by their school of the times for taking the test.

Mathematics 640 (SAS)

Courses

Courses

The following abbreviations are used in the course listing.

1. CALC1 indicates that the prerequisite is any one of 01:640:135 or 151.

2. CALC2 indicates that the prerequisite is 01:640:152.

3. CALC3 indicates that the prerequisite is any one of 01:640:251 or 291.

4. CALC4 indicates that the prerequisite is any one of 01:640:244, 252, or 292.

5. CR1 indicates that students may not receive credit for more than one of the first-semester calculus courses 01:640:135 or 151.

6. CR2 indicates that students may not receive credit for more than one of the courses including second-semester topics 01:640:136 or 152.

7. CR3 indicates that students may not receive credit for more than one of the courses including third-semester topics 01:640:251 or 291.

8. CR4 indicates that students may not receive credit for more than one of the fourth-semester courses 01:640:244, 252, or 292.

01:640:011 ***Precalculus I Workshop (E2)***
Workshop to accompany 01:640:111.
Corequisite: 01:640:111.

01:640:012 ***Precalculus II Workshop (E2)***
Workshop to accompany 01:640:112.
Corequisite: 01:640:112.

01:640:013 ***Preparation for Calculus Workshop (E2)***
Workshop to accompany 01:640:123. Hybrid online.
Corequisite: 01:640:123.

01:640:025 ***Elementary Algebra (E3)***
Operations with polynomials, rational and square root expressions, exponents, solving linear and quadratic equations, basic applications, and graphing.

01:640:026 ***Intermediate Algebra (E3)***
Absolute value equations and inequalities, radical expressions, rational exponents, quadratic equations and inequalities, introduction to functions, and topics in analytic geometry.
Prerequisite: 01:640:025 or appropriate performance on the placement test in mathematics.

01:640:103 *Topics in Mathematics for the Liberal Arts (3)*
Topics in mathematics including voting theory, apportionment, fair division, exponential growth in nature and finance, Euler circuits, Traveling Salesman Problem, and networks.
An elementary course for liberal arts majors. Prerequisite: 01:640:025 or appropriate performance on the placement test in mathematics. May not be used as an elective for the math major or minor.

01:640:104 *Introduction to Probability (3)*
Concrete introduction to probability and its applications, with some statistics. Intended for majors in social science or liberal arts disciplines.
Prerequisite: 01:640:026 or 027 or placement. May not be used as an elective for the math major or minor. May not be taken for credit simultaneously with or after a student has received credit for any of the following courses: 01:640:477, 01:198:206, 01:960:379, 01:960:381, 14:332:226, 14:540:210.

01:640:106 *Mathematics of Money (3)*
Introduction to the uses of college-level mathematics in personal finance applications, including mortgages, student loans, and leasing. Some related nonfinancial applications. May not be used as an elective for the math major or minor. Not intended for students majoring in business, economics, or STEM fields.
Prerequisite: 01:640:025.

01:640:107 *Number and Operation for K-8 Teaching (3)*
Reexamination of familiar mathematical ideas, primarily about number systems and arithmetic operations, in the context of mathematics as a whole and from the perspective of young students first learning them. Emphasis on reasoning and communication.
Prerequisites: 01:640:025 or appropriate performance on the placement test in mathematics, and permission of department. For students interested in pursuing a career in elementary school teaching. May not be used as an elective for the math major or minor.

01:640:108 *Problem Solving and Reasoning with Discrete Mathematics (3)*
Discrete mathematics as a tool for developing problem-solving and reasoning skills. Applications of vertex-edge graphs and systematic counting, which can be introduced at K-8 grade levels. For students interested in a career in teaching in elementary or middle schools.
Prerequisites: 01:640:026 or 027 or appropriate performance on the placement test in mathematics, and permission of department. May not be used as an elective for the math major or minor.

01:640:109 *Geometry and Measurement for Middle Grades Teaching (3)*
Math content course on geometry and measurement stressing depth of understanding needed for effective middle grade teaching. Justifying procedures and formulas. Multiple points of view in explanations. Geometric objects in two and three dimensions. Transformations, symmetry, congruences, similarity, scaling. Perimeter, area, volume. Error estimates in measurement. Changing units.
Prerequisites: 01:640:026 or 107 or placement into 01:640:111, and permission of department. Primarily for those intending to teach in grades K-8.

01:640:110 *Algebra for Middle School Teachers (3)*
Examines algebraic thinking in the context of middle school algebra, with emphasis on mathematical reasoning, conceptual reasoning, and communicating concepts effectively.
Intended for future and current K-8 teachers. Prerequisite: 01:640:107 or permission of the department.

01:640:111-112 *Precalculus I,II (2,2)*
Math 111: Algebraic expressions, algebraic equations, inequalities, functions, and graphing. Math 112: Exponential, logarithmic, and trigonometric functions.
Prerequisite: 01:640:026 or appropriate performance on the placement test in mathematics. Corequisites: 01:640:011 for 111; 01:640:012 for 112. These two courses cover the same material as 01:640:115, but at a slower pace. Students may not receive more than 4 normal credits for any combination of 01:640:111-112 and 115.

01:640:115 *Precalculus College Mathematics (4)*
Algebraic expressions, algebraic equations, inequalities, functions, and graphing. Exponential, logarithmic, and trigonometric functions.
Prerequisite: 01:640:026 or appropriate performance on the placement test in mathematics. Students may not receive more than 4 normal credits for any combination of 01:640:111-112 and 115. Students who feel unprepared for this course (who have not had math for several years or whose mathematical background is weak) should consider taking 01:640:111-112, which covers the same material as 115 but at a slower pace and begins with an extensive review of intermediate algebra.

01:640:123 *Preparation for Calculus I (2)*
Beginning after six weeks of the semester for students who start Calculus 1 and encounter serious difficulties. Intensive review of topics in algebra and precalculus, in context of how they are used in Calculus 1. Hybrid online.
Prerequisite: Placement into CALC1.

01:640:125 *Methods of Mathematical Problem Solving (2)*
Equips students with effective methods for mathematical problem solving drawing on research into the relevent cognitive science and expert practices. Provides the scientifically-based strategic knowledge to succeed in the mathematics courses.

01:640:131 *Calculus I Practicum (1)*
Application of algorithms studied in 01:640:135 to problems.
Corequisite: 01:640:135.

01:640:135-136 *Calculus I,II for the Life and Social Sciences (4,4)*
Primarily for majors in the social sciences, business, and pharmacy. Students in the life sciences should take 135-136 or 151-152. Students intending to take more than two semesters of calculus should take 151-152. Students should review the requirements for their intended major when choosing between 135-136 and 151-152.
Prerequisite for 135: 01:640:112 or 115 or appropriate performance on the placement test in mathematics. Prerequisite for 136: CALC1. Credit restrictions: CR1, CR2.

01:640:138 *Calculus II for the Biological Sciences (4)*
Techniques of integration, elementary differential equations and their applications to biological sciences, and an introduction to linear algebra. For students who do not intend to continue beyond 01:640:250.
For biological sciences majors. Prerequisite: CALC1. Credit restriction: CR2.

01:640:151-152 *Calculus I, II for Mathematical and Physical Sciences (4,4)*
For mathematics, physics, computer science, statistics, chemistry, or engineering majors. Techniques of integration, elementary differential equations, sequences, infinite series, Taylor series, parametric equations, polar coordinates. Students should review the requirements for their intended major when choosing between 135-136 and 151-152.
Prerequisite for 151: 01:640:112 or 115 or appropriate performance on the placement test in mathematics. Prerequisite for 152: 01:640:151 or 01:640:135 with a C or better. Credit restrictions: CR1, CR2.

01:640:195,196 ***Seminar in Mathematics I,II (1,1)***
Discussion of selected topics in mathematics. For first- and second-year students.
Prerequisite: Permission of department. Corequisite: Enrollment in a calculus course.

01:640:197 ***Topics in Mathematics for K-8 Teaching I (3)***
Topics covered vary. Details available at registration.
Prerequisites: 01:640:026 or 027 or appropriate performance on the placement test in mathematics, and permission of the department. For students interested in a career in K-8 teaching. May not be used as an elective for the math major or minor. May be repeated for credit, with permission of the department.

01:640:198 ***Topics in Mathematics (3)***
Topics covered vary. Details available at registration.
Prerequisite: 01:640:026 or 027 or appropriate performance on the placement test in mathematics, and permission of the department. May not be used as an elective for the math major or minor. May be repeated for credit, with permission of the department.

01:640:244 ***Differential Equations for Engineering and Physics (4)***
First- and second-order ordinary differential equations; introduction to linear algebra and systems of ordinary differential equations.
Prerequisite: CALC3. Credit restriction: CR4. Pre- or corequisite: 01:640:247 or 01:640:250.

01:640:247 ***Fundamentals of Matrix Algebra (3)***
Basics of linear algebra; matrix operations, linear independence, inverses, determinants. Equivalent in content to the first third of 01:640:250.
Prerequisite: CALC1.

01:640:250 ***Introductory Linear Algebra (3)***
Systems of linear equations, Gaussian elimination, matrices and determinants, vectors in two- and three-dimensional Euclidean space, vector spaces, introduction to eigenvalues and eigenvectors. Possible additional topics: systems of linear inequalities and systems of differential equations.
Prerequisite: 640:112 or 115, or Placement.

01:640:251 ***Multivariable Calculus (4)***
Analytic geometry of three dimensions, partial derivatives, optimization techniques, multiple integrals, vectors in Euclidean space, and vector analysis.
Prerequisite: CALC2. Credit restriction: CR3.

01:640:252 ***Elementary Differential Equations (3)***
First- and second-order ordinary differential equations; systems of ordinary differential equations.
Prerequisites: 01:640:250 and CALC3. Credit restriction: CR4.

01:640:285 ***Introduction to Interest Theory for Actuarial Sciences (3)***
Compound interest rate theory and application to valuation of financial instruments; measurement of interest; present value; equations of value and yield rates; amortization; annuities; bond valuation; duration; immunization.
Prerequisite: 01:640:251.

01:640:291 ***Honors Calculus III (4)***
Covers the same material as 01:640:251 and 252 in a more thorough and demanding fashion.
Registration by special permission of department. Credit restriction: CR3. Grades of B or better are required to continue in the honors sequence.

01:640:292 ***Honors Calculus IV (4)***
First- and second-order ordinary differential equations; systems of ordinary differential equations. A more thorough and demanding alternative to 01:640:244 or 252.
Prerequisite: 01:640:291 or permission of department. Pre- or corequisite: 01:640:250. Credit restrictions: CR4. Grades of B or better are required to continue in the honors sequence.

01:640:300 ***Introduction to Mathematical Reasoning (3)***
Fundamental abstract concepts common to all branches of mathematics. Special emphasis placed on ability to understand and construct rigorous proofs.
Prerequisite: 01:640:250 or 01:640:251 or 01:640:291.

01:640:311 ***Introduction to Real Analysis I (4)***
Introduction to language and fundamental concepts of analysis. The real numbers, sequences, limits, continuity, and differentiation in one variable.
Prerequisites: CALC4 and C or better in 01:640:300; or permission of department.

01:640:312 ***Introduction to Real Analysis II (3)***
Series of numbers and functions, integration of functions of one variable, pointwise and uniform convergence, differential calculus in several variables, implicit and inverse function theorems.
Prerequisite: 01:640:311.

01:640:321 ***Introduction to Applied Mathematics (3)***
Mathematical models of mechanical vibrations, population dynamics, and traffic flow, involving ordinary differential equations and nonlinear first-order partial differential equations.
Prerequisite: CALC4.

01:640:325 ***Foundations of Quantum Mechanics (3)***
Interdisciplinary course, intended primarily for juniors and seniors majoring in mathematics, physics, or philosophy, dealing with what can be concluded from quantum mechanics about the nature of reality.
Prerequisite: CALC4 or permission of instructor. Credit not given for both this course and 01:556:325.

01:640:336 ***Dynamical Models in Biology (3)***
Models for biological processes based on ordinary and partial differential equations. Topics selected from models of population growth, predator-prey dynamics, biological oscillators, reaction-diffusion systems, pattern formation, neuronal and blood flow physiology, neural networks, and biomechanics.
Prerequisites: CALC4 and 01:640:250.

01:640:338 ***Discrete and Probabilistic Models in Biology (3)***
Models for biological processes based on discrete mathematics (graphs, combinatorics), probabilistic and optimization methods, Markov chains and Markov fields, Monte-Carlo simulation, maximum-likelihood estimation, entropy, and information. Applications selected from epidemiology, inheritance and genetic drift, combinatorics and sequence alignment of nucleic acids, energy optimization in protein structure prediction, and topology of

biological molecules.
Prerequisites: 01:640:250, 251; and either 01:198:206, 01:640:477, 01:960:381, 14:332:321, or 14:540:210. Only one of 01:640:338 and 339 may count for credit toward any math major or minor option.

01:640:339 *Mathematical Models in the Social Sciences (3)*
Introduction to the modeling process and survey of mathematical models from such areas as economics, sociology, psychology, and urban and policy science. Models dealing with energy use, air pollution, currency transfer, transportation, bargaining, voting, auctions, ecommerce, learning, and allocation of scarce resources. Models use graphs, signed graphs, Markov chains, n-person games, consensus functions, and differential equations.
Prerequisites: 01:640:250; and either 01:640:477, 01:198:206, or 01:960:381. Only one of 01:640:338 and 339 may count for credit toward any math major or minor option.

01:640:348 *Cryptography (3)*
Applications of algebra and number theory to cryptography (encryption/decryption) and cryptanalysis (attacking encrypted messages). Topics include congruences, finite fields, finding large primes, pseudoprimes, and primality testing, as well as the Vigenere and Hill ciphers, the Data Encryption Standard, probabilistic, trapdoor attacks on encrypted messages, and public key ciphers.
Prerequisites: 01:640:250; one of 01:640:300, 356, or 477; or permission of department.

01:640:350 *Linear Algebra (3)*
Continuation of 01:640:250. Abstract vector spaces and linear transformations, inner product spaces, diagonalization, and canonical forms. Possible additional topics: systems of ordinary differential equations and numerical techniques.
Prerequisites: CALC4, 01:640:250, and C or better in 01:640:300; or permission of department.

01:640:351-352 *Introduction to Abstract Algebra I,II (4,3)*
Abstract algebraic systems, including groups, rings, fields, polynomials, and some Galois theory.
Prerequisites: CALC3, 01:640:250, and C or better in 01:640:300; or permission of department.

01:640:354 *Linear Optimization (3)*
Linear programming problems, the simplex method, duality theory, sensitivity analysis, introduction to integer programming, the transportation problem, network flows, and other applications.
Prerequisite: 01:640:250. Credit not given for both this course and 01:640:453 or 01:711:453.

01:640:356 *Theory of Numbers (3)*
Properties of the natural numbers, congruences, diophantine equations, and elementary arithmetical functions.
Prerequisites: CALC3 and 01:640:300, or permission of department.

01:640:357 *Topics in Applied Algebra (3)*
Material relevant for various applications. Topics chosen from finite Fourier and wavelet transforms for signal and image processing, coding theory, algebraic graph theory, algebraic combinatorics, and algebraic computational complexity. Details available at time of registration.
Prerequisites: CALC3 and 01:640:250.

01:640:361 *Set Theory (3)*
Introduction to set theory. The set-theoretic foundations of mathematics, including the construction of the real number system. Countable and uncountable sets, cardinal numbers, and ordinals, the axiom of choice.
Prerequisites: 01:640:300 and one of 01:640:250 or CALC3, or permission of department. Credit not given for both this course and 01:730:423.

01:640:373-374 *Numerical Analysis I,II (3,3)*
Analysis of numerical methods for the solution of linear and nonlinear equations, approximation of functions, numerical differentiation and integration, and the numerical solution of initial and boundary value problems for ordinary differential equations.
Prerequisites: CALC4 and familiarity with a computer language. Credit not given for both these courses and 01:198:323, 324.

01:640:395 *Studies in Mathematics (3)*
Topics vary from semester to semester. Details available at time of registration.

01:640:403 *Introductory Theory of Functions of a Complex Variable (3)*
First course in the theory of a complex variable. Cauchy's integral theorem and its applications. Taylor and Laurent expansions, singularities, conformal mapping.
Prerequisite: CALC4.

01:640:411-412 *Mathematical Analysis I,II (3,3)*
Rigorous analysis of the differential and integral calculus of one and several variables.
Prerequisites: Permission of department and instructor. For students preparing for graduate study in the mathematical sciences.

01:640:421 *Advanced Calculus for Engineering (3)*
Laplace transforms, numerical solution of ordinary differential equations, Fourier series, and separation of variables method applied to the linear partial differential equations of mathematical physics (heat, wave, and Laplace's equation).
Primarily for mechanical engineering majors. Prerequisite: CALC4. Credit not given for both this course and 01:640:423.

01:640:423 *Elementary Partial Differential Equations (3)*
Linear partial differential equations of mathematical physics (heat, wave, and Laplace's equation), separation of variables, Fourier series.
Prerequisite: CALC4. Credit not given for both this course and 01:640:421.

01:640:428 *Graph Theory (3)*
Colorability, connectedness, tournaments, Eulerian and Hamiltonian paths, orientability, and other topics from the theory of finite linear graphs, with an emphasis on applications chosen from social, biological, computer science, and physical problems.
Prerequisites: CALC3 and 01:640:250.

01:640:432 *Introduction to Differential Geometry (3)*
Investigation of the properties of curves and surfaces using methods of analysis.
Prerequisite: 01:640:311.

01:640:435 *Geometry (3)*
Various geometries, including projective and non-Euclidean geometries, and geometric axiom systems.
Prerequisites: CALC3, 01:640:250 and 300; or permission of department.

01:640:436 *History of Mathematics until 1800 (3)*
Selected topics from the history of mathematics including number systems; Euclidean geometry; the development of algebra in China, India, the Islamic world, and Europe; and calculus.
Prerequisites: 01:640:250 and 01:640:251. Credit not given for both this course and 01:640:437. Recommended to be taken after 01:640:435.

01:640:437 *History of Mathematics (3)*
Selected topics from the history of mathematics including number systems; Euclidean geometry; the development of algebra in China, India, the Islamic world, and Europe; and calculus; selected modern topics.
Prerequisites: 01:640:250 and 01:640:251 or 01:640:291. Recommended to be taken after Geometry. Credit not given for both this course and 01:640:436. Open only to Math (640) and Stats/Math (961) majors.

01:640:441-442 *Introductory Topology I,II (3,3)*
Math 441: Introduction to topology with emphasis on the foundations of analysis; Euclidean spaces, metric spaces, topological spaces, and their properties; applications to analysis. Math 442: Basic concepts of algebraic topology, including the fundamental group, plane curves, homotopy, and a brief introduction to homology.
Prerequisites: CALC4 and either 01:640:311 or permission of department.

01:640:451-452 *Abstract Algebra I,II (3,3)*
Rigorous study of abstract algebraic systems including groups, rings, and fields.
Prerequisites: Permission of department and instructor. For students preparing for graduate study in the mathematical sciences.

01:640:453 *Theory of Linear Optimization (3)*
Emphasis on the theory of linear optimization. Topics include convex sets, polyhedra, Farkas lemma, canonical forms, simplex algorithm, duality theory, revised simplex method, primal-dual methods, complementary slackness theorem, maximal flows, transportation problems, and two-person game theory.
Prerequisite: 01:640:250. Credit not given for both this course and 01:640:354 or 01:711:453. Cross-listed with 01:711:453.

01:640:454 *Combinatorics (3)*
Existence and enumeration of designs and patterns such as codes, graphs, and block designs, and extremal problems related to such objects. Emphasis on applications to computer, biological, physical, and social problems.
Prerequisites: CALC2 and 01:640:250.

01:640:461 *Mathematical Logic (3)*
Intuitive and formal development of the sentential and predicate calculus. Special emphasis given to questions of consistency, completeness, and independence. Formal systems; incompleteness and undecidability; theorems of Gödel. Exploration of which properties of structures can be defined in the first-order language.
Prerequisites: CALC3 and either 01:640:300 or permission of department.

01:640:468 *Connecting Advanced Mathematics to High School Content (3)*
Connects math major course content to curricular content of grades 9 through 12. Shows how advanced mathematics justifies and elucidates high school material taught without full justification. Provides connections between concepts and procedures to facilitate recall and application of content knowledge both for exposition and for response to student misconceptions. Focus on applications of reasoning, real analysis, and abstract algebra to high school topics.
Prerequisite: Permission of instructor. Primarily for fifth-year students in the high school mathematics certification program.

01:640:477 *Mathematical Theory of Probability (3)*
Basic probability theory in both discrete and continuous sample spaces, combinations, random variables and their distribution functions, expectations, law of large numbers, central limit theorem.
Prerequisite: CALC3. Credit not given for both this course and 01:198:206, 14:332:226, 14:332:321, 14:540:210, or 01:960:381.

01:640:478 *Introduction to Stochastic Processes (3)*
Markov chains for discrete-time models, Poisson processes, Markov chains for continuous-time models, queueing theory, renewal processes.
Prerequisites: 01:640:250 and either 01:640:477 or both 01:640:251 and 01:960:381. Credit not given for both this course and 01:640:424.

01:640:481 *Mathematical Theory of Statistics (3)*
Fundamental principles of mathematical statistics, sampling distributions, estimation, testing hypotheses, correlation analysis, regression, analysis of variance, nonparametric methods.
Prerequisites: 01:640:250 and either 01:640:477 or both 01:640:251 and 01:960:381. Credit not given for both this course and 01:960:382.

01:640:485 *Introduction to Mathematical Finance (3)*
Study of the mathematical theory and financial concepts used to model and analyze financial derivatives. Topics include martingales, Brownian motion, and stochastic differentials, with applications to discrete and continuous time stochastic models of asset prices, option pricing, the Black-Scholes pricing model, and hedging.
Prerequisites: 01:640:250, CALC4, and 01:640:477 or 01:960:381 or 14:332:226. Recommended for students interested in economics, statistics, finance, or actuarial mathematics.

01:640:486 *Mathematics of Life Contingent Risk Models I (3)*
Survival models, life tables. Valuation of benefits, premiums, and standard single life insurance and annuity products. Covers part of the syllabus for Exam LTAM of the Society of Actuaries.
Prerequisites: 01:640:285 and (01:640:477 or 01:960:381). May not be used as an elective for the math major. May be used for the math minor.

01:640:487 *Mathematics of Life Contingent Risk Models II (3)*
Continuation of Mathematics of Life Contingent Risk Models I. Policy values, multiple state models, pension mathematics, effect of interest rate risk, emerging costs of traditional life insurance. Covers part of the syllabus for Exam LTAM of the Society of Actuaries.
Prerequisite: C or better in 01:640:486. Credit not given for both this course and 01:640:478.

01:640:491,492 ***Undergraduate Mathematics Seminar (1,1)***
Reading, presentation, and discussion of mathematical topics.
Prerequisite: Permission of department. Pass/no credit only.

01:640:493,494 ***Individual Study in Mathematics (1-3 BA,1-3 BA)Prerequisite: Permission of department.***

01:640:495 ***Selected Topics in Mathematics (3)***

01:640:496 ***Research in Mathematics (3)***

01:640:497,498 ***Honors in Mathematics (3,3)***

01:122:491,492 ***Research in Biomathematics (3,3)***
Research in a selected subject conducted with the supervision of a faculty member. Research proposals must receive prior approval of the director and codirector of the biomathematics program.
Prerequisite: Permission of program director.

Life Sciences (SAS)

LIFE SCIENCES

Division of Life Sciences, School of Arts and Sciences

Website: http://lifesci.rutgers.edu

Dean: Lori R. Covey

Director, Office of Undergraduate Instruction: Martha Haviland

Chair, Department of Cell Biology and Neuroscience: Megerditch Kiledjian

Chair, Department of Genetics: Tara C. Matise

Chair, Department of Kinesiology and Health: Brandon Alderman

Chair, Department of Molecular Biology and Biochemistry: Barth Grant

The following majors are available in the Division of Life Sciences:

Biological Sciences 119
Cell Biology and Neuroscience 146
Exercise Science 377
Genetics 447
Molecular Biology and Biochemistry 694
Sport Management 955

Students interested in the life sciences also may consider related tracks within major programs offered by the Department of Chemistry and Chemical Biology (chemical biology option) and the Department of Psychology (specialization in behavioral neuroscience).

The Division of Life Sciences coordinates, fosters, and integrates the instructional and research activities of a broad range of faculty with interests in the biological sciences. The principal units of the division include four departments: Cell Biology and Neuroscience, Genetics, Kinesiology and Health, and Molecular Biology and Biochemistry, as well as two sections, the biological chemistry section of the Department of Chemistry and Chemical Biology, and the biopsychology and behavioral neuroscience section of the Department of Psychology. The division's primary goal is to provide a high caliber of interdisciplinary teaching and research in the life sciences as it trains the next generation of teachers, researchers, and future health professionals.

Instruction in the life sciences has undergone enormous changes over the past 15 to 20 years. These changes reflect the intellectual revolution of the last two decades, as well as technical advances that have expanded greatly the tools available to life scientists. Today, students majoring in the life sciences at Rutgers University-New Brunswick experience an exciting atmosphere of learning that exposes them to the concepts and methods of these intellectual and technological advances. The students have open to them a plethora of learning avenues, ranging from thought-provoking lecture presentations to original and cutting-edge research opportunities in state-of-the-art laboratories. A first-class faculty and modern laboratory equipment reflect the division's commitment to provide its students with the best learning environment.

The division offers a wide spectrum of majors for students interested in the life sciences. These options range from a division-based major in biological sciences, designed to provide a general life sciences education, to department-based majors in cell biology and neuroscience, exercise science, genetics, molecular biology and biochemistry, and sport management aimed at providing specialized training, with a strong emphasis on research. Graduates of the division will be highly competitive for a range of postbaccalaureate opportunities, including graduate education and research, health-professions training, and biomedical and biotechnological research positions, as well as teaching careers in the sciences.

The first two years of the student's tenure at Rutgers is expected to revolve around the life sciences core curriculum, a series of basic offerings designed to provide the general background required for pursuing upper-division courses in any of the individual majors. Regardless of the major chosen, students are encouraged to participate in independent study within a research laboratory in order to take advantage of the rich expertise of the many life sciences faculty in New Brunswick and Piscataway. The exercise science and the sport management majors require an internship experience. The division also has a highly developed advising system, with dedicated and knowledgeable faculty advisers available to work with individual students in their selection of courses, completion of major requirements, and preparation for future careers.

Students may not major in more than one of the following majors in the Division of Life Sciences: Biological Sciences (119), Cell Biology and Neuroscience (146), Exercise Science (377), Genetics (447), Molecular Biology and Biochemistry (694), or Sport Management (955). Furthermore, students majoring in one of these four majors may not minor in Biological Sciences (119). Life science majors or minors may not be combined as double majors or as major/minors with Biomathematics (122), Biochemistry (115), or Microbiology (680).

No more than 16 credits from among the life science courses required for completion of any Division of Life Sciences major may be fulfilled by credits transferred from any school outside of Rutgers-New Brunswick.

For additional information and announcements about the Division of Life Sciences, please visit the division's website.

Life Sciences Core Curriculum

Life Sciences Core Curriculum

The life sciences core curriculum is a set of courses that include a series of introductory- and intermediate-level courses in the physical and life sciences forming a foundation of knowledge necessary to understand modern biology and to prepare for the more advanced courses required for each major. Following are core courses:

1. 01:119:115-116 General Biology (4,4)

2. 01:119:117 Biological Research Laboratory (2)

3. 01:160:161-162 General Chemistry (4,4) or 01:160:163-164 Honors General Chemistry (4,4) or 01:160:165-166 Extended General Chemistry (4,4)

4. 01:160:171 Introduction to Experimentation (1)

5. 01:160:307-308 Organic Chemistry (4,4) or 01:160:315-316 Honors Organic Chemistry (4,4)

6. 01:160:311 Organic Chemistry Laboratory (2)

7. 01:750:203-204 General Physics (3,3) or 01:750:271-272 Honors Physics (3,3)*

8. 01:750:205-206 General Physics Laboratory (1,1)*

9. 01:640:135,136 Calculus for the Life and Social Sciences (4,4) or 01:640:151-152 Calculus for Mathematical and Physical Sciences (4,4)**

10. 01:447:380 Genetics (4)***.

*01:750:193-194 (4,4) or 01:750:201-202 (5,5) may be substituted for 01:750:203-204 (3,3) plus 01:750:205-206 (1,1).

**Basic Statistics for Research (01:960:401, 3 credits), Basic Probability and Statistics (01:960:379, 3 credits), or Statistics I and II (01:960:211 and 212) may be substituted for the second semester of Calculus.

***Students majoring in genetics must take 01:447:384-385 (4,4) instead of 01:447:380

Life Sciences (SAS)

Learning Goals

Learning Goals

Our overarching goal for educating our students majoring in biological sciences is to inspire them to want to discover and understand the natural world. In the process of achieving this goal, we expect our students to acquire not only facts and concepts, but also skills and perspectives. We hope that our learning goals will both prepare our students for a variety of career objectives and supply them with the tools to become lifelong learners in the ever-evolving world of biological sciences.

Learning Goals:

I. To acquire the appropriate factual and conceptual knowledge that provides students with a foundation to further their education and career in the areas of life science or health science. Students will be able to demonstrate basic knowledge (e.g., identify, define, explain, etc.) of the concepts, practices, and principles that comprise the biological sciences.

II. To develop data analysis and statistical reasoning skills that prepare students for a society increasingly reliant on the use of data and information. Students will be able to interpret/evaluate patterns in data presented in tables, figures, and graphs, as well as be able to organize, summarize, and present data.

III. To develop the ability to use scientific reasoning as embodied by the structured process commonly known as the scientific method to empower students with the ability to generate and refine knowledge. Students will be able to evaluate and apply the practice of science.

IV. To develop critical thinking and problem-solving skills necessary to prepare students to evaluate, synthesize, and generate knowledge that provides them with a competitive advantage to adapt to an evolving, global, and knowledge-based society. Students will be able to demonstrate application of higher-order thinking (e.g., classify, diagnose, evaluate, synthesize, hypothesize, etc.). Students will develop an understanding of not only the connections within biology, but also the connections between biology and other scientific disciplines.

Life Sciences (SAS)

Entry Requirements of the Major

Entry Requirements of the Major

Students wishing to major in biological sciences must have completed two semesters of General Biology and Biological Research Laboratory with a grade of C or better in each course. Both semesters of General Biology must have been completed at the same institution or on the same campus at Rutgers. No more than two courses with a grade of D may be used to fulfill the requirements of the major. A 2.0 grade-point average must be maintained in the life sciences core and elective courses applied toward the major. Students must meet with an adviser before they can successfully declare their major.

Life Sciences (SAS)

Major Requirements

Major Requirements

The program in biological sciences, administered through the Division of Life Sciences Office of Undergraduate Instruction, is intended to provide a broad and comprehensive training in modern biology. This course of study is recommended for those who wish to study biology as part of their liberal arts education, preparing them for a career in one of the health professions, graduate studies in biology, a teaching career in secondary schools (courses in education also are required), as well as employment in various areas of the life sciences. If a student wishes to concentrate his or her studies in a specific area of biology, he or she should consider a major offered by one of the departments in the Division of Life Sciences or in the School of Environmental and Biological Sciences. Faculty advisers are available to assist each student with course selection and program requirements.

A minimum of 20 credits of coursework from among general biology, genetics, and life sciences electives must be completed in residence. In other words, no more than 16 credits in this part of the major requirements may be transferred from any institution outside of Rutgers University-New Brunswick. This rule is intended to assure that students receiving degrees from Rutgers-New Brunswick have taken a minimum number of courses in their major with this faculty. Please keep in mind that although a course may transfer from another institution into one of the Rutgers-New Brunswick schools, it will not necessarily be accepted toward the major in biological sciences. Therefore, all transfer courses must be evaluated and accepted by the advising office of the Office of Undergraduate Instruction in order to count toward the major. As indicated earlier, students must complete both semesters of general biology at the same institution or on the same campus of Rutgers before becoming eligible to declare the biological sciences major. Any life sciences courses applied to the major in biological sciences should be taken within 10 years of graduating. Returning students must meet with their adviser to discuss their path to graduation. Credits for cooperative education and Winter Session courses (exceeding 1 credit) may not be used to satisfy requirements for the major in biological sciences. To be applied to the major, Summer Session courses must be offered over a minimum of five weeks. Online courses will be reviewed on a case-by-case basis to confirm that they meet departmental learning goals before they may be used to satisfy the requirements for the major.

The course requirements for the biological sciences major are divided into two sections: the life sciences core courses and the life sciences electives.

Required Life Sciences Core Courses (47 credits)

01:119:115-116 General Biology I,II (4,4)
01:119:117 Biological Research Laboratory (2)
01:160:161-162 General Chemistry (4,4) or 01:160:163-164 Honors General Chemistry (4,4) or 01:160:165-166 Extended General Chemistry (4,4)
01:160:171 Introduction to Experimentation (1)
01:160:307-308 Organic Chemistry (4,4) or 01:160:315-316 Honors Organic Chemistry (4,4)*
01:160:311 Organic Chemistry Laboratory (2)
01:750:203-204 General Physics (3,3) or 01:750:271-272 Honors Physics***
01:750:205-206 General Physics Laboratory (1,1)***
01:640:135,~~138~~136 Calculus for the Life and Social Sciences (4,4)** or 01:640:151-152 Calculus for

Mathematical and Physical Sciences (4,4)
01:447:380 Genetics (4)
* With approval from a Biological Sciences Advisor, 01:160:308/316 may be replaced by another elective course. Please meet with an Advisor to discuss.

**01:750:193-194 (4,4) or 01:750:201-202 (5,5) may be substituted for 01:750:203-204 (3,3) plus 01:750:205-206 (1,1).
***Calculus II 01:640:13~~8~~6(4) may be substituted by 01:960:379 Basic Probability and Statistics (3), 01:960:401 Basic Statistics for Research (3), or 01:960:211-212 Statistics I,II (3,3).

Life Sciences Electives (24 credits)

It is highly recommended that students meet with a life sciences adviser in the Division of Life Sciences Office of Undergraduate Instruction when planning their elective courses. It is important that the courses taken complement each other as much as possible and are not merely a collection of unrelated topics.

The electives must include at least three laboratory courses, only one of which may be satisfied by research work. Biological Research Laboratory and "library research" do not qualify for this requirement. A minimum of six courses (18 credits) must be at the 300 or 400 level, including at least three separate laboratory courses or three courses with a laboratory component. The laboratory associated with genetics (01:447:382 or equivalent), if taken, may be used to satisfy one of the three laboratory requirements.

No course at the 100 level may be used to satisfy the life sciences elective requirements. A maximum of 6 credits of independent study/research/honors research may be used toward the 24 elective credits. Please keep in mind that a minimum grade-point average of 2.8 is required to enroll in an independent study/research course in biological sciences. Research courses can satisfy only one of the three laboratory requirements, regardless of number of credits. Courses taken on a pass/fail basis may not be used to satisfy requirements for the major in biological sciences. A grade-point average of 2.0 or better in courses credited toward the major is required. No more than two courses with a grade of D may be used to fulfill the requirements of the major.

The elective courses must include at least one course (3 or 4 credits) each from the Departments of Cell Biology and Neuroscience 146, Genetics 447, Molecular Biology and Biochemistry 694, and Ecology, Evolution, and Natural Resources 11:216 at the School of Environmental and Biological Sciences. A list of approved courses in subject areas in addition to those in the Division of Life Sciences (Biological Sciences 119, Cell Biology and Neuroscience 146, Genetics 447, and Molecular Biology and Biochemistry 694) will be published by the advising office of the Office of Undergraduate Instruction. It is strongly recommended that students consult this list, which is available on the website, prior to registering for their courses. Generally, acceptable courses from other departments on any campus of Rutgers University have a year of general biology as a prerequisite; however, there are exceptions. It is imperative for students to consult the published list and meet with an adviser. Credits from cooperative education and Winter Session courses (exceeding 1 credit) may not be used to satisfy requirements for the major in biological sciences. To be applied to the major, Summer Session courses must be offered over a minimum of five weeksIf double majoring with another permitted life sciences major, at least four of the 3-4 credit life science courses applied to the Biology major may not overlap with courses used to fulfill second major requirements. Given that biological sciences is a dynamic and developing field, it is critical that coursework applied to the major must be current. Thus, any life sciences courses applied to the major in biological sciences should be taken within 10 years of graduating. Returning students must meet with their adviser to discuss their path to graduation.

Life Sciences (SAS)

Minor Requirements

Minor Requirements

The minor requires four courses of at least 3 credits each in life sciences subjects as well as General Biology and Biological Research Laboratory. Both semesters of General Biology must be completed at the same institution or on the same campus at Rutgers. No other course at the 100 level may be used to satisfy the minor. A minimum of 11 credits must be taken at Rutgers University-New Brunswick. A maximum of 3 credits of research in a life sciences subject may be used toward the minor. A minimum of three courses at the 300 level or above is required. If majoring in a permitted life sciences major, no more than two of the four life science courses applied to the minor requirements may overlap with courses used to fulfill major requirements. Only life sciences courses acceptable for the biological sciences major may be used for the minor. Courses in chemistry, mathematics, or physics do not count toward the minor. A grade-point average of 2.0 or better in courses credited toward the minor is required. No more than one course with a grade of D may be used to fulfill the requirements of the minor.

Life Sciences (SAS)

Independent Study and Research in Biology

Independent Study and Research in Biology

A minimum cumulative grade-point average of 2.8 is required for a student to register for an independent study/research course in biological sciences. A maximum of 6 credits of laboratory-based independent study, research, or honors projects may be used to fulfill the elective credits requirement in biology. The independent study/research form, available from the advising office of the Office of Undergraduate Instruction, must be completed and signed by the professor in whose laboratory the student will study prior to initiating the research project. Approval of a research proposal by the director of advising and a special permission number from the Office of Undergraduate Instruction is necessary for registration. Students may not earn academic credit for laboratory projects for which they are being paid. Students wishing to apply research credits from other departments toward the major in biological sciences must get approval from the advising office of the Office of Undergraduate Instruction, Division of Life Sciences, prior to beginning their research project.

Life Sciences (SAS)

Departmental Honors Program

Departmental Honors Program

To qualify, a student must have a cumulative grade-point average of 3.0 or better and an average of 3.4 or better in life sciences core and elective courses credited toward the biological sciences major at the end of the junior year and previous research experience. At that time, the student should apply formally to the advising office of the Office of Undergraduate Instruction. Accepted students are expected to complete at least 6 credits over two semesters in

an independent research project, resulting in a thesis, and to pass an oral examination before a faculty committee in the general field of the student's program of emphasis. If the research is done in a laboratory outside of the Division of Life Sciences, the examination committee must include at least one individual from the Division of Life Sciences faculty. Departmental Honors is completed in the fall and spring of senior year. Students accepted into special programs (e.g. BA/MD) may complete honors during junior year.

Honors students must register either for an honors course sequence in life sciences or for a course sequence in a school honors program. These decisions should be discussed with an adviser. An approval form (available in the advising office) must be completed.

Life Sciences (SAS)

Joint B.A./M.D. Program (Rutgers Undergraduate-Robert Wood Johnson Medical School)

Joint B.A./M.D. Program (Rutgers Undergraduate-Robert Wood Johnson Medical School)

Rutgers Undergraduate/Robert Wood Johnson Medical School Joint Bachelor of Arts/Medical Degree (B.A./M.D.) Program

This program is designed for high-achieving premedical students of Rutgers University who are in their sophomore year. Specially selected students will obtain bachelor's and medical degrees in a seven-year program of study taken at Rutgers undergraduate units and Robert Wood Johnson Medical School (RWJMS).

Application to this program is open to all undergraduate students enrolled at Rutgers University, New Brunswick. It is not directly associated with any one school within the university but see below for specific restrictions.

Admission is a two-stage and highly competitive process. In the first stage, undergraduate students are admitted into the program by an executive committee consisting of faculty from the appropriate units. Eligible applicants are sophomores at any of the undergraduate schools of Rutgers University who have spent at least a year here. Prospective applicants from Rutgers University-Newark and Rutgers University-Camden must transfer to one of the units in New Brunswick for their sophomore year and complete at least 30 credits here. All applicants must have completed 4 semesters of college with a minimum of 60 credits. Applicants with an Associate¿s Degree, regardless of whether it was earned as a dual degree in high school or as a traditional degree after high school, are ineligible to apply for the program. Admitted students will need to complete all of the core requirements of their undergraduate unit and major requirements with the exception of Biological Sciences and Cell Biology and Neuroscience majors, who may apply credit from the first professional year toward the major requirements. During the fourth year, students will be full time at the medical school and elective credits will count towards the undergraduate degree. The executive committee reviews applications and selects those students who are deemed most qualified for the program. The second stage occurs typically after the fourth year of study. It is the responsibility of the RWJMS Admissions Committee to review the credentials of students recommended by the Joint Program Executive Committee. Students who are deemed to have met the academic and nonacademic standards of the program will be recommended to the RWJMS Admissions Committee. The purpose of this second, noncompetitive review is to ascertain that the student has maintained adequate academic and nonacademic

qualities appropriate for retention in the medical school. It is expected that students will have grades of A or B (Honors or High Pass) in courses taken at both universities. However, recommendation is not automatic. The final decision rests with the RWJMS Admissions Committee. Upon approval by this admissions committee, the student will be permitted to continue into the fifth year of study and will be matriculated formally as a candidate for the M.D. degree at RWJMS.

Applicants to the B.A./M.D. program must be in their fourth semester at Rutgers University. Applications are available in the Health Professions Office after spring break; they are due by the end of May. There is no rolling admissions policy. Decisions are expected to be made in July. By the end of the semester of application, applicants must have completed a minimum of 60 credits of which at least 30 credits must be at Rutgers, and they must have been in attendance at Rutgers, New Brunswick a minimum of one year. Additionally, applicants must have a minimum cumulative and science grade-point average of 3.5 by the end of the third semester and sustain it through the end of the fourth. The applicant must have completed, or be in the process of completing by the end of the fourth semester, two semesters of biology with lab, two semesters of general chemistry with lab, two semesters of organic chemistry, one semester of college-level mathematics, and one semester of English. Applicants who have not taken General Biology I and II and lab at Rutgers University, either because they have been awarded advanced placement biology credits or because they have transferred equivalent courses from another institution, must have at least one year of upper-division biology courses at Rutgers-New Brunswick (i.e., two courses of at least 3 or more credits each at the 200 level or higher). Those students who are admitted to the program without having two semesters of physics, two semesters of English, and organic chemistry lab must complete these requirements by the end of the third year of study. Students who did not take the SAT or ACT but who are admitted to the program will be required to take the MCAT by April of the junior year and score competitively with a total score of at least 508 (minimum single sub score of 123). An application form has been developed that allows the student to provide the executive committee with information it deems useful for its deliberations.

The bachelor's degree will be awarded upon completion of the undergraduate college and major requirements, by the end of year four. Upon satisfactory completion of year seven and all RWJMS requirements, the student will receive the medical degree.

Students who wish to pursue a major other than biological sciences must discuss their plans with the appropriate department in order to establish the requirements they need to complete for their major. For a student at Rutgers-New Brunswick who has elected to major in biological sciences, 15 credits from RWJMS will be applied toward the major (as stipulated below). The baccalaureate degree will be awarded upon completion of the undergraduate college requirements and major requirements, usually by the end of year four. The number of credits, however, is not directly translated between the two universities; no more than 4 credits per laboratory course and 3 credits per non-laboratory course taken at RWJMS may be used toward the bachelor's degree at Rutgers.

A student enrolled in the program completing a major in biological sciences at Rutgers-New Brunswick is required to complete remaining Life Science Core Curriculum coursework and Intro to Biochemistry (01:694:301) and three approved life sciences electives (3- or 4-credit courses) at Rutgers-New Brunswick. Students who have not taken General Biology I and II at Rutgers, either because they have been awarded AP biology credit or because they have transferred equivalent courses from another institution, must complete an additional approved life sciences electives (3- or 4-credit courses) at Rutgers-New Brunswick.

Students in the program must meet with advisers at the medical school and at their undergraduate school when planning their elective courses. No more than one independent study/research course may be applied toward the biological sciences major for students in the B.A./M.D. program. Please be sure to meet with a biological sciences adviser when selecting life science elective courses because not all course combinations are allowed given overlap in subject matter taught at Rutgers' undergraduate units and RWJMS.

For further information on this program, you may contact the Division of Life Sciences, Health Professions Office, Nelson Biological Laboratories, 604 Allison Road, Piscataway, NJ 08854-8082, at 848-445-5667.

Life Sciences (SAS)

Joint B.A./M.D. Program (Rutgers Undergraduate-New Jersey Medical School)

Joint B.A./M.D. Program (Rutgers Undergraduate-New Jersey Medical School)

Rutgers Undergraduate/New Jersey Medical School Joint Bachelor of Arts/Medical Degree (B.A./M.D.) Program

The Rutgers Undergraduate/New Jersey Medical School joint program started in the fall of 2003. The purpose of the program is to permit students to begin their medical education after their third year or at least 96 degree credits at Rutgers. Specially selected students will obtain bachelor's and medical degrees in a seven-year program of study taken at Rutgers undergraduate units and New Jersey Medical School (NJMS).

This program is only open to students enrolled in Rutgers University-New Brunswick schools.

Admission is a two-phase and highly competitive process. In the first phase, undergraduate students are admitted into the program by the Joint Program Executive Committee consisting of faculty from the appropriate units. Eligible applicants are sophomores at any of the undergraduate schools at the New Brunswick location of Rutgers University who have been enrolled here for at least one year. The executive committee reviews applications and selects those students who are deemed most qualified for the program. The second phase occurs typically after the third year of study. It is the responsibility of the NJMS Admissions Committee to review the credentials of students recommended by the Joint Program Executive Committee. The purpose of this second review is to ascertain that the student has maintained adequate academic and nonacademic qualities appropriate for retention in the medical school. It is expected that students will have grades of A or B in courses taken at Rutgers. Students must complete the Medical College Admission Test (MCAT) by January of the junior year before matriculating at NJMS and be required to be in the competitive range of other accepted NJMS students. This second review is noncompetitive. Students who are deemed to have met the academic and nonacademic standards of the program will be recommended to the NJMS Admissions Committee. However, recommendation is not automatic. The final decision rests with the Medical School Admissions Committee. Upon approval by the Medical School Admissions Committee, the student will be permitted to continue into the next year of study and will be matriculated formally as a candidate for the M.D. degree at the New Jersey Medical School.

Applicants for the program must be in their fourth semester at Rutgers-New Brunswick. Applications are available in the Health Professions Office after spring break; they are due by the end of May. There is no rolling admissions policy. Decisions are expected to be made in July. By the end of the semester of application, applicants must have

completed a minimum of 60 credits of which at least 30 credits must be at Rutgers, and they must have been in attendance at Rutgers a minimum of one year. Additionally, applicants must have a minimum cumulative and science grade-point average of 3.5 by the end of the third semester which must be maintained through the end of the fourth. The applicant must have completed, or be in the process of completing by the end of the fourth semester, two semesters of biology with lab, two semesters of general chemistry with lab, two semesters of organic chemistry, one semester of college-level mathematics, and one semester of English. Applicants who have not taken General Biology I and II and lab at Rutgers, either because they have been awarded advanced placement biology credits or because they have transferred equivalent courses from another institution, must have at least one year of upper-division biology courses at Rutgers (i.e., two courses of at least 3 or more credits each at the 200 level or higher). Those students who are admitted to the program without having two semesters of physics, organic chemistry lab, and two semesters of English must complete these requirements by the end of the third year of study. An application form has been developed that allows the student to provide the committee with information the committee deems useful for its deliberations.

Students will be admitted at the end of the spring semester of year two and be formal members of the program beginning with year three. Prior to leaving the Rutgers undergraduate unit, students must satisfy all college and major requirements, except for the credits which they will receive from NJMS (please see next paragraph). For a student at Rutgers-New Brunswick who has elected to major in biological sciences, 15 credits from NJMS will be applied toward the major.

The baccalaureate degree will be awarded upon completion of the undergraduate college requirements and major requirements by the end of year four. Upon satisfactory completion of year seven or eight, as well as all New Jersey Medical School requirements, the student will receive the medical degree.

A student enrolled in the program completing a major in biological sciences at Rutgers-New Brunswick is required to complete remaining Life Science Core Curriculum coursework and three approved life sciences electives (3- or 4-credit courses) at Rutgers-New Brunswick. Students who have not taken General Biology I and II at Rutgers, either because they have been awarded AP biology credit or because they have transferred equivalent courses from another institution, must take Genetics 01:447:380, and four approved life sciences electives (3- or 4-credit courses) at Rutgers-New Brunswick. No more than one independent study/research course may be applied toward the biological sciences major for students in the B.A./M.D. program. Please be sure to meet with a biological sciences adviser when selecting life science elective courses because not all course combinations are allowed given overlap in subject matter taught at Rutgers and NJMS.

For further information on this program, you may contact the Division of Life Sciences, Health Professions Office, Nelson Biological Laboratories, 604 Allison Road, Piscataway, NJ 08854-8082, at 848-445-5667.

Life Sciences (SAS)

Joint B.A./D.M.D. Program (Rutgers School of Arts and Sciences-Rutgers School of Dental Medicine)

Joint B.A./D.M.D. Program (Rutgers School of Arts and Sciences-Rutgers School of Dental Medicine)

Rutgers School of Arts and Sciences/Rutgers School of Dental Medicine Joint Bachelor of Arts/Doctor of Medicine in Dentistry (B.A./D.M.D.) Program

Rutgers School of Arts and Sciences/Rutgers School of Dental Medicine joint program started in the spring of 2002. The purpose of the program is to permit students to begin their dental education after their third year or at least 98 credits at Rutgers. Specially selected students will obtain bachelor's and dental degrees in a seven-year program of study taken at Rutgers undergraduate units and Rutgers School of Dental Medicine.

This program is open to students enrolled at the School of Arts and Sciences, Rutgers University-New Brunswick. The program is administered by the Health Professions Office.

Admission is a two-phase and competitive process. In the first phase, undergraduate students are admitted into the program by the Executive Committee of the Joint Program consisting of faculty from the appropriate units. The executive committee reviews applications and selects those students who are deemed most qualified for the program. The second phase occurs typically after the third year of study. It is the responsibility of the Rutgers School of Dental Medicine Admissions Committee to review the credentials of students recommended by the articulated program executive committee. The purpose of this second review is to ascertain that the student has maintained adequate academic and nonacademic qualities appropriate for admission to the dental school. It is expected that students will have grades of A or B in courses taken at Rutgers University. Students must complete the Dental Admissions Test (DAT) and earn scores of 20 or better in Total Science, Academic Average, Organic Chemistry, General Chemistry, and Biology. Students may only take the DAT one time to qualify for this program. The second review is noncompetitive. Students who are deemed to have met the academic and nonacademic standards of the program will be recommended to the Rutgers School of Dental Medicine Admissions Committee. However, recommendation is not automatic. The final decision rests with the Dental School Admissions Committee. Upon approval by the Dental School Admissions Committee, the student will be permitted to continue into the next year of study and will be matriculated formally as a candidate for the Doctor of Medicine in Dentistry (D.M.D.) degree at the Rutgers School of Dental Medicine.

Applicants to the program must be in their fourth semester at the School of Arts and Sciences, Rutgers-New Brunswick. Applications are available in the Health Professions Office after spring break; they are due by the end of May. There is no rolling admissions policy. Decisions are expected to be made in July. By the end of the semester of application, applicants must have completed a minimum of 60 credits of which at least 30 credits must be at Rutgers, and they must have been in attendance at the School of Arts and Sciences, Rutgers-New Brunswick a minimum of one year. Additionally, applicants must have a minimum cumulative and science grade-point average of 3.5 by the end of the third semester, which must be maintained through the end of the fourth. The applicant must have completed, or be in the process of completing by the end of the fourth semester, two semesters of biology with lab, two semesters of general chemistry with lab, two semesters of organic chemistry, two semesters of college-level mathematics (Calc I and either Calc II or an approved Statistics course) and one semester of English. Applicants who have not taken General Biology I and II and lab at Rutgers, either because they have been awarded

advanced placement biology credits or because they have transferred equivalent courses from another institution, must have at least one year of upper-division biology courses at Rutgers (i.e., two courses of at least 3 or more credits each at the 200 level or higher). If AP credit was granted for general chemistry, then organic chemistry I and II and laboratory and a course in biochemistry at Rutgers are required. If AP credit was granted for English, upper level English at Rutgers is required with the same amount of credit work. If AP credit was granted for physics, two approved courses from Physics or Kinesiology & Health at Rutgers are required. Those students who are admitted to the program without having two semesters of physics, biochemistry, organic chemistry lab, and two semesters of English, must complete these requirements by the end of the third year of study.

The B.A./D.M.D. program is a seven-year program with year one being the first undergraduate year. Students will be admitted at the end of the spring semester of year two and be formal members of the articulated program beginning with year three. Prior to leaving the School of Arts and Sciences, Rutgers-New Brunswick, students must satisfy all college and major requirements, except for the credits which they will receive from Rutgers School of Dental Medicine (please see below). For a student at the School of Arts and Sciences, Rutgers-New Brunswick who has elected to major in biological sciences, 15 credits from Rutgers School of Dental Medicine will be applied toward the major.

The baccalaureate degree will be awarded upon completion of the general education and major requirements by end of year four. Upon satisfactory completion of year seven or eight, as well as all Rutgers School of Dental Medicine requirements, the student will receive the dental degree.

A student enrolled in the joint program completing a major in biological sciences at Rutgers-New Brunswick is required to complete any remaining Life Sciences Core Curriculum coursework and three approved life sciences electives (3- or 4-credit courses) at Rutgers-New Brunswick. Students who have not taken General Biology I and II at Rutgers-New Brunswick, either because they have been awarded AP biology credit or because they have transferred equivalent courses from another institution, must take Genetics 01:447:380, and four approved life sciences electives (3- or 4-credit courses) at Rutgers-New Brunswick. No more than one independent study/ research course may be applied toward the biological sciences major for students in the B.A./D.M.D. program. Please be sure to meet with a biological sciences adviser when selecting life science elective courses because not all course combinations are allowed given overlap in subject matter taught at Rutgers-New Brunswick and Rutgers School of Dental Medicine.

For further information on this program, you may contact the Division of Life Sciences, Health Professions Office, Nelson Biological Laboratories, 604 Allison Road, Piscataway, NJ 08854-8082, at 848-445-5667.

Life Sciences (SAS)

Joint B.A./M.S. Physician Assistant Program (Rutgers School of Arts and Sciences-School of Health Professions)

Joint B.A./M.S. Physician Assistant Program (Rutgers School of Arts and Sciences-School of Health Professions)

Rutgers School of Arts and Sciences/Rutgers School of Health Professions Joint Bachelor of Arts/Master of Science Degree (B.A./M.S.) Physician Assistant Program

This is a six-year (3+3) program offered jointly by the School of Arts and Sciences and the School of Health Professions (SHP). The program can be looked at as a two-phase program, an undergraduate phase followed by a professional phase. This program is open to students enrolled at the School of Arts and Sciences, Rutgers University-New Brunswick, who are U.S. citizens, permanent residents of the United States, or international individuals currently on a student visa. At a minimum, applicants must be enrolled for one year at Rutgers-New Brunswick earning at least 30 credits.

The first phase of the program includes three years of undergraduate liberal arts and basic science education. Students may apply to the second (professional) phase in April of their second year by applying to the Physician Assistant (PA) program. Personal interviews will be required of those applicants being considered for admission. The interview will serve to determine the applicant's emotional and intellectual maturity, ability to communicate, and the potential to achieve career satisfaction within the physician assistant role. Applicants must have a cumulative and science GPA of 3.2. In cases where individuals may show high potential by improved performance, exceptions to this requirement may be considered. Please note that acceptance by Rutgers University does not guarantee acceptance by the PA program.

Applicants to the program must have completed the following courses with a grade of C or better: at least one semester (3 credits) of English composition, applied statistics or biostatistics (from Psychology, Biology, or Math departments), General Biology I and II with lab (119:115, 116, and 117, or equivalents); General Chemistry I and II with lab (160:161,162 and 171, or equivalents); and General Psychology (830:101, or equivalent). If the student has been granted AP credit by Rutgers for science courses, additional science courses will be required.

All applications must be received by June 1 and final notices of acceptance will be made by August 1. If the applicant is accepted into the program, it will be contingent on maintaining a 3.2 GPA through the end of the third undergraduate year at Rutgers-New Brunswick, and on all requirements for the undergraduate degree being met before the beginning of the fourth year. Students who are accepted into the second phase of the program will begin this phase at the beginning of their senior year. At the end of the senior year, these students will receive a bachelor of arts degree conferred by the School of Arts and Sciences, Rutgers University-New Brunswick. After completion of the remaining two years of the PA program, graduates will receive a master of science degree awarded by Rutgers School of Health Professions.

Before entering the second (professional) phase, a student accepted by this program must also complete for the PA program, Functional Human Anatomy (01:377:223), General Microbiology (01:447:390), Intro to Biochemistry (01:694:301) and Systems Physiology (01:146:356) (waived if Gen Bio II is completed at Rutgers-NB and not AP credit), and 6-8 additional credits of life science electives. Students majoring in biological sciences are required to have completed, in addition to the School of Arts and Sciences core distribution requirements, the Life Sciences Core requirements, Intro to Biochemistry (01:694:301) and General Microbiology (01:447:390) and one (three credit or more) course from the 216 subject area approved electives. Students with AP or transfer credit of General Biology I and II and lab must take an additional life science elective course for 3 or more credits. A maximum of 14 credits from SHP courses will be accepted toward the biological sciences major. Please be sure to meet with a biological sciences adviser when selecting life sciences elective courses because not all course combinations are allowed given overlap in subject matter taught at Rutgers and SHP.

For a complete description of the requirements for the major in biological sciences, please read the appropriate section under the Division of Life Sciences in this catalog.

For more information about this program, you may contact the PA program office at the School of Health Professions, 675 Hoes Lane, Piscataway, NJ 08854, at 732-235-4444; or the Division of Life Sciences, Health Professions Office at Rutgers University, Nelson Biological Laboratories, 604 Allison Road, Piscataway, NJ 08854-8082, at 848-445-5667.

Life Sciences (SAS)

Courses

Courses

With the exception of 01:119:115,116, and 117 General Biology I and II and Biological Research Laboratory, courses numbered at the 100 level may not be used for major credit in any of the majors within the Division of Life Sciences.

01:119:098 ***Foundations for Biological Science (E2)***
Selected topics in general biology: introduction to cellular organization, metabolism, genetics, reproduction, and organ systems. Development of analytical reasoning and science-oriented study techniques.
Preparation for college-level general biology.

01:119:103 ***Principles of Biology (4)***
Selected topics in general biology, including cell structure, genetics, plant and animal diversity, basic plant and animal biology, ecology, and evolution.
Lec. 3 hrs., lab. 3 hrs. Designed for students who must take a one-semester laboratory course in introductory biology to meet major requirements. Credit not given for this course if student has already completed 01:119:115. Not for life sciences major credit.

01:119:109,110 ***Biology Practice Group (1,1)***
Students will work actively to (1) organize the lecture content, (2) identify what they are expected to do with that content (outcomes), (3) prepare and explain study aids (organizers) to ensure that they correctly understand the week¿s content, and (4) begin the self-evaluation process to gauge exam preparedness. Discussion of the basic methods and principles.
Corequisite for 109 is 01:119:115; corequisite for 110 is 01:119:116.

01:119:111,112 ***Reading in General Biology (1,1)***
Discussion and reading providing extensive and advanced coverage of selected topics.
Corequisite for 111 is 01:119:115; corequisite for 112 is 01:119:116.

01:119:115 ***General Biology I (4)***
Broad principles of cell biology, genetics, and evolution; the diversity of life and its physiology, ecology, and population dynamics. Lec. 3 hrs., Wkshp. 80 min.
Prerequisite has two parts: writing (prerequisite of 01:355:101, 01:355:103, or 01:355:104, or placement into 355:101 or 355:104) and math (prerequisite of 01:640:026 or placement into 640:CMA, 640:PCA, 640:CLG, or 640:CLS).

01:119:116 *General Biology II (4)*
Broad principles of cell biology, genetics, and evolution; the diversity of life and its physiology, ecology, and population dynamics.
Lec. 3 hrs., Wkshp. 80 min. Prerequisite: 01:119:115 with a grade of C or better. Credit not given for both this course and 01:119:102.

01:119:117 *Biological Research Laboratory (2)*
Laboratory designed to introduce and explore principles of research in the biological sciences by engaging in semester-long research projects requiring students to analyze data, synthesize new experiments, and evaluate findings.
Prerequisite: 01:119:115 with a grade of C or better. Corequisite: 01:119:116.

01:119:120 *STEM Success Seminar (1.5)*
Increases ability to control academic success and improve transition to the university environment in furtherance of educational and career goals. Reflection on recent and current academic experience and career aspirations. Setting of priorities and alignment of time and effort towards those ends.
By special permission only.

01:119:127-128 *Anatomy and Physiology: Health Sciences (4,4)*
Structure and function of human organ systems. Some microanatomy and biochemical aspects of physiology included.
Lec. 3 hrs., lab. 3 hrs. For nursing, medical technology, physical therapy, and other professional students. Not for life sciences major credit.

01:119:131 *Microbiology for the Health Sciences (3)*
Introduction to microbes with emphasis on the nature and behavior of microorganisms, the interrelationships between microbes and the human host in health and disease, and the principles of prevention and control of infectious disease.
Not open to students who have taken 01:447:390. For nursing and other professional students. Not for life sciences major credit. Prerequisites: 01:199:115-116 or 01:119:127-128.

01:119:132 *Microbiology for the Health Sciences Laboratory (1)*
Laboratory to accompany 01:119:131.
Lab. 3 hrs. Pre- or corequisite: 01:119:131.

01:119:140 *The DNA Revolution (Honors) (3)*
Introduction to fundamentals of molecular genetics, biotechnology, and modern genetics, including a laboratory research project using molecular biology and bioinformatics techniques. Intended primarily for nonscience majors, but may also appeal to prospective chemists, physicists, engineers, and computer scientists.
Restricted to first-year and sophomore students in the School of Arts and Sciences Honors Program or the Honors College. Credit not given for both this course and 01:119:140 or 01:694:215 or 315, or 01:447:315. Not for life sciences major credit.

01:119:148 *Moving Bodies: The Biology of Movement (3)*
Considers fundamental processes that allow humans and other animals to move, including structural basis (bones and muscles), control (brain and nervous system), conversion of food into energy (digestion and nutrition),

movement of food and oxygen to muscles (circulation), and some common and familiar injuries and illnesses and their treatments.
Credit not given for both this course and 01:119:100, 103, 115-116, or 127-128. Not for life sciences major credit.

01:119:150 *Biology, Society, and Biomedical Issues (3)*
Discussion of current topics and issues in human health and medicine from a biological perspective.
Credit not given for both this course and 11:115:100. Not for life sciences major credit.

01:119:154 *Genetics, Law, and Social Policy (3)*
Principles of human and behavioral genetics and their legal, ethical, and social implications. Topics include genetic screening, counseling, and engineering; reproductive regulation; and human behavior genetics.
Prerequisite: Sophomore standing. Not for life sciences major credit or related major.

1:119:155 *Human Genetics (3)*
How our genes influence our development and health, how both normal traits and diseases are transmitted through families, how genetics is used in forensics and personalized medicine, and the genetic tests that are offered directly to consumers.
Not for life sciences major credit.

01:119:156 *Genetics, Evolution, and Human Health (4)*
The human body and human behavior, shaped by more than four billion years of evolutionary processes. Scientific and social implications of current ideas and controversies of evolution and genetics.
Not for life sciences major credit.

01:119:160 *Biology, Society, and Ecological Issues (3)*
Ecological and evolutionary ideas affecting space ecology; population increase, food supply, air and water pollution, war, and nuclear energy.
Not for life sciences major credit or related major.

01:119:182 *Essentials of Human Reproduction (3)*
Anatomical and physiological bases of human sexuality; biological and cultural aspects of sexual differentiation and psychosexual development, contraception, venereal disease, and sexual lifestyles.
Not for life sciences major credit or related major.

01:119:195 *Brain, Mind, and Behavior (3)*
Honors course discussing the interrelationship between the brain, the mind, and behavior.
Open to students in the School of Arts and Sciences Honors Program or the Honors College. Not for life sciences major credit or related major.

01:119:199 *Preparation for General Biology (4)*
For first- and second-year students planning science majors. Enrollment based on placement scores. Selected concepts in biology, proven learning strategies for college science courses, and instruction in the scientific method. Prepares students for success in the General Biology sequence (01:119:115-117).
Lec./rec. 3 hrs., lab. 3 hrs. Enrollment restricted by placement. Not for life sciences major credit.

01:119:201-202 ***Independent Study in Biology (1-3,1-3)***
Independent study under the direction of a member of the faculty. Written report required.
Prerequisites: Declared biological sciences major or minor. Permission of the Office of Undergraduate Instruction; cumulative grade-point average of 2.8 or better. May not be used to fulfill a laboratory requirement.

01:119:204 ***Outreach in Biology (1)***
Introduction to the basic principles and best practices of outreach in the biological sciences. Emphasis on understanding how to translate technical concepts and techniques to lay audiences incorporating best practices in active learning, public speaking and curriculum development. Recommended for students interested in teaching careers and related positions in science communication.
Prerequisites: 01:119:115, 01:119:116, and 01:119:117. By special permission.

01:119:205 ***Internship in Life Sciences (3)***
Development of experience and knowledge regarding the expectations, qualifications, competencies and responsibilities of professionals working within the life sciences through an internship experience with academic component. Integration of knowledge from life science coursework with the internship experience, development of new skills, and reflection on the learning experience.
Prerequisites: 01:119:116 and 01:119:117. Open only to 119 Biology Majors.

01:119:307-308 ***Research in Biology (1-3,1-3)***
Laboratory/field research on an original problem under the direction of a member of the faculty. Written report required.
Prerequisites: Declared biological sciences major or minor. Permission of the Office of Undergraduate Instruction; cumulative grade-point average of 2.8 or better. Open only to students majoring (or minoring) in biological sciences.

01:119:310 ***Communication in Biology (1)***
Effective skills for communicating science to a variety of audiences in a variety of forms including papers, grant proposals, teaching, and presentations to scientists and others. Provides support for students completing the 10-page research paper required for Research in Biology.
Prerequisites: 01:119:307, 308, 407, or 408. Corequisites: 01:119:307, 308, 407, or 408.

01:119:311 ***Current Topics in Life Sciences (1)***
Directed readings and discussion of selected scientific topics and career stories with Rutgers Life Sciences Alumni.
Junior or senior status and Division of Life Sciences major (subject code: 119, 146, 694, 447).

01:119:401 ***Clinical Practicum in the Health Professions (3)***
Development of advanced knowledge of and reflection on the qualifications, competencies, and responsibilities of physician health care providers through an internship experience and academic component integrating knowledge from life science coursework and the health care setting.
Prerequisites: 3.4 science GPA. By special permission of the Office of Undergraduate Instruction only.

01:119:406-407 ***Research in Biology (1-4,1-4)***
Laboratory/field research on an original problem under the direction of a member of the faculty. Written report is required.
Prerequisites: Declared biological sciences major or minor. Permission of the Office of Undergraduate Instruction; cumulative grade-point average of 2.8 or better. Open only to seniors majoring (or minoring) in biological sciences.

01:119:408-409 ***Honors in Biology (3-6,3-6)***
Laboratory/field research on an original problem under the direction of a member of the faculty. Written thesis, oral presentation, and defense are required.
Prerequisites: Declared biological sciences major. Permission of the Office of Undergraduate Instruction. Open only to seniors majoring in biological sciences who meet the requirements for departmental honors.

01:119:410 ***Honors Communication in Biological Sciences (1)***
Instruction on effective communication of scientific ideas and findings for both the scientific community as well as the general public. Support in writing honors theses and preparing for oral thesis defenses.
Prerequisite: 01:119:408. Corequisite: 01:119:409.

Cell Biology and Neuroscience 146

Cell Biology and Neuroscience 146

Department of Cell Biology and Neuroscience, School of Arts and Sciences

Chair: Megerditch Kiledjian

Vice Chair and Undergraduate Director: Gabriella D'Arcangelo

Distinguished Professors:

Joanna Burger, B.S., SUNY (Albany); M.S., Cornell; Ph.D., Minnesota

Megerditch Kiledjian, B.A., Rutgers; Ph.D., University of Pennsylvania

Melitta Schachner, Diploma in Biochemistry, Tübingen (Germany); Ph.D., Max-Planck Institut für Biochemie (Germany)

Wise Young, B.A., Reed; Ph.D., Iowa; M.D., Stanford

Professors:

Lori R. Covey, B.S., California (Riverside); Ph.D., Columbia

Gabriella D'Arcangelo, B.S., Bari (Italy); Ph.D., SUNY (Stony Brook)

Robin L. Davis, B.S., Pennsylvania State; M.A., San Diego State; Ph.D., Stanford

Bonnie Firestein, B.S., Michigan; Ph.D., California (San Diego)

Martin Grumet, B.S., Cooper Union; Ph.D., Johns Hopkins

Ronald P. Hart, B.S., Connecticut; Ph.D., Michigan

Arnold G. Hyndman, A.B., Princeton; Ph.D., California (Los Angeles)

Alice Y.-C. Liu, B.S., Chinese University of Hong Kong (China); Ph.D., Mount Sinai School of Medicine

Gary F. Merrill, B.S., Weber State; Ph.D., Michigan State

Kathleen M. Scott, B.A., Brown; Ph.D., Yale

Associate Professors:

Qian Cai, M.D., Shanghai Railway Med College (China); Ph.D., National Institutes of Health-Shanghai Second Medical University

Wei Dai, B.S., M.S., Beijing Normal (China); M.S., Texas Health Science Center; Ph.D., Baylor College of Medicine

Dunne Fong, B.S., Massachusetts; M.A., Ph.D., Princeton

Shu-Chan Hsu, B.S., Ph.D., British Columbia

Peng Jiang, B.S., Soochow (China); Ph.D., University of Science and Technology of China

Kelvin Y. Kwan, B.S., California Institute of Technology; Ph.D., Harvard

David Margolis, B.S., Brown; Ph.D., Washington (Seattle)

Ping Xie, B.S., Nanjing (China); Ph.D., Hong Kong University of Science and Technology

Assistant Professors:

Victoria Abraira, B.S., Southern California; Ph.D., Harvard

Santiago Cuesta, B.A., M.S., Ph.D., National University of Rosario (Argentina)

Brian Daniels, B.A., B.S., Southern Wesleyan (Central); Ph.D., Washington (Seattle)

Rafiq Huda, B.A., Carleton College; Ph.D., Northwestern University (Chicago)

Natasha O¿Brown, B.S., Davidson College; Ph.D., Stanford

Max Tischfield, B.A., Rutgers; Ph.D., Harvard

Associate Research Professors:
Xinfu Jiao, B. S., Xinxiang Medical College (China); M.S., Tongji Medical University (China); Ph.D., Shanghai Institute of Hematology (China)

Patricia Morton, B.S., Northwestern University; M.S., Ph.D., University of Wisconsin

Assistant Research Professor:

Dongming Sun, B.S., Beijing Medical University (China); Ph.D., Columbia University

Assistant Teaching Professors:

Anne Carr-Schmid, B.S., James Madison; Ph.D., Rutgers

Tara Cominski, B.S. St. Peter's University; Ph.D., Rutgers

Anne Keating, B.S., M.S., Ph.D., Rutgers

Life Sciences (SAS)

Learning Goals

Learning Goals

The Department of Cell Biology and Neuroscience offers a course of study that provides fundamental and comprehensive training in the areas of cell biology and neuroscience. The major objective of this program is to prepare students for graduate studies in cell biology and neuroscience; entry into professional schools in medicine, dentistry, or other health-related fields; or employment in industrial and pharmaceutical companies.

Learning Goals

Students will:

I. master factual and conceptual knowledge in cell biology and neuroscience that will provide a solid foundation for success in advanced training and professional careers;

II. develop an ability to summarize, integrate, and organize information; and

III. use scientific reasoning to evaluate the potential for current research and new discoveries to improve our understanding of cell biology and neuroscience and its relevance to human health and to our society.

Life Sciences (SAS)

Entry Requirements of the Major

Entry Requirements of the Major

The major in the Department of Cell Biology and Neuroscience is open to students after their first year who have completed Fundamentals of Neurobiology (01:146:245) or Fundamentals of Cell Biology (01:146:270), with a grade of C or better. Departmental approval is required.

A grade of C or better in all courses credited toward the major is required for graduation, and each course may be repeated only once to replace D/F grades.

Life Sciences (SAS)

Major Requirements

Major Requirements

The Department of Cell Biology and Neuroscience offers a program of study from which students can select one of two tracks, depending upon particular interests and career goals: a general track (default) and an honors track. Students can apply to enter the honors track at the beginning of the senior year. This track requires a minimum GPA of 3.4 in courses credited toward the major, and departmental approval. A number of core courses are required of all students in the cell biology and neuroscience major, regardless of the chosen track. No more than 16 credits from among the life science courses required for completion of the cell biology and neuroscience major may be fulfilled by credits transferred from any school outside of Rutgers University-New Brunswick. Any life science courses applied to the major should be taken within 10 years of graduating.

Required Core Courses (65 or more credits)

01:119:115-116 General Biology (4,4)

01:119:117 Biological Research Laboratory (2)

01:160:161-162 or 01:160:163-164 or 01:160:165-166 General Chemistry (4,4)

01:160:171 Introduction to Experimentation (1)

01:160:307-308 or 01:160:315-316 Organic Chemistry (4,4)

01:160:311 Organic Chemistry Laboratory (2)

01:750:203-204 General Physics (3,3) or 01:750:193-194 Physics for the Sciences(4,4)*or 01:750:271-272 Honors Physics (3,3)

01:750:205-206 General Physics Laboratory (1,1)

01:640:135,136 or 01:640:151-152 Calculus I and II (4,4) or 01:640:135 and 01:960:401 Basic Stat for Research (3) or 01:960:379 Basic Prob and Stat or 01:640:135 and 01:960:212 Statistics II (3)**

01:447:380 Genetics (4)

01:146:245 Fundamentals of Neurobiology (3)

01:146:270 Fundamentals of Cell Biology (3)

01:694:395 Biochemistry for Life Sciences (3) or 01:694:407 Biochemistry (3)

Advanced Cell Biology and Neuroscience Courses: choose three of the following:

01:146:445 Synapses, Neurons, and Circuits (3)

01:146:447 Clinical Neurobiology (3)

01:146:465 Neurobiology of Pain and Addiction (3)

01:146:472 Developmental Biology (3)

01:146:473¿ Genetic Regulation in Cell Biology¿(3)

01:146:474 Immunology (3) or 01:146:476¿ Honors Immunology (3)

01:146:481 Protein Dynamics in Cell Biology (3)

* with approval from the Undergraduate Director or CBN Advisor 01:160:308 may be replaced by an additional elective course.
** Students who take who take Physics for the Sciences 01:750:193-194 (4,4) do not need an additional Physics laboratory.
*** Students with AP statistics equivalent of 01:960:211, transfer credit for 01:960:211, or who have taken 01:960:211 at Rutgers must take 01:960:212.

Life Sciences (SAS)

Options

Options

General Track; 4 credits

This track is for students who, upon graduation, seek immediate employment or plan to attend professional schools in health-related fields. In addition to the required core courses, students must take the following courses:

1. One elective lecture courses at the 300-400 level in the life sciences area (equaling 36 or more credits)
2. One laboratory or research course (1-3 credits). Students can take a lecture course with an associated laboratory component (3-4 credits) to satisfy both requirements, or a stand-alone lecture plus a laboratory or research course.

Honors Track; 12 credits

This area of concentration is for students interested in research who, upon graduation, plan to attend graduate school or professional schools in health-related fields. A student must qualify for admission into the honors track. See the departmental honors program page in this catalog for student qualifications. In addition to the required core courses, students must complete the following courses, produce a written research thesis and an oral thesis presentation:

1. One elective lecture course at the 300-400 level in the life sciences area (3 or more credits).
2. 01:146:405 Honors Seminar (3).
3. 01:146:408-409 Honors Research (3,3).

Life Sciences (SAS)

Departmental Honors Program

Departmental Honors Program

Honors in cell biology and neuroscience are awarded to students who have successfully completed the honors track course requirements, submitted a written research thesis, and defended the thesis orally. To qualify for the honors track, a student must have attained a grade-point average of 3.4 or better in courses required for the major. The student should apply formally to the department for acceptance into the honors program by the end of the second semester of the junior year.

Life Sciences (SAS)

Courses

Courses

01:146:201,202 *Independent Study in Cell Biology and Neuroscience (1-3,1-3)*
Laboratory research under the direction of a Rutgers faculty member.
Written report required. Permission of department and an instructor willing to sponsor the student, and a cumulative grade-point average of 2.8 or better are required. May not be used to fulfill a laboratory requirement. Open only to students majoring or planning to major in cell biology and neuroscience.

01:146:245 *Fundamentals of Neurobiology (3)*
Introduction to the biology of the nervous system. Topics covered include nerve cell signaling, sensory and motor systems, and higher brain processes.
Prerequisites: 01:119:115-116.

01:146:270 *Fundamentals of Cell Biology (3)*
Principles of cell biology. Structure, function, and macromolecular organization of cellular organelles.
Prerequisites: 01:119:115-116.

01:146:295 *Essentials of Cell Biology and Neuroscience (3)*
Provides a background in the biology of neural cells and cognition.
Prerequisites: 01:119:115-116. Not intended for cell biology and neuroscience majors.

01:146:307,308 *Research in Cell Biology and Neuroscience (1-3,1-3)*
Laboratory research on an original problem under the direction of a member of the Rutgers faculty.
Written report required. Permission of department and an instructor willing to sponsor the student, and a cumulative grade-point average of 2.8 or better. Open only to students majoring or planning to major in cell biology and neuroscience.

01:146:322 *Human Histology (4)*
Structure of the tissues and organs of the human body. Lec. 3 hrs., lab. 3 hrs.
Prerequisite: 01:146:270 or 01:146:295.

01:146:328 ***Human Parasitology (3)***
Cell biology, epidemiology, pathogenesis, and clinical manifestations of human parasitic diseases.
Prerequisites: 01:119:115-116.

01:146:329 ***Human Parasitology Laboratory (1)***
Laboratory to accompany the Human Parasitology lecture course 01:146:328. Lab. 3 hrs.
Pre- or corequisite: 01:146:328.

01:146:340 ***Virology (3)***
Principles of virology including the molecular and cellular events that occur during virus replication, the host cell response, and pathogenesis. Emphasis on animal viruses that impact human health and disease. Strategies for controlling viruses.
Prerequisite: 01:146:270.

01:146:350 ***Introduction to Light Microscopy for the Life Sciences (1, minicourse)***
This course offers a comprehensive exploration of advanced imaging techniques essential for studying tissues, cells, and organelles in the life sciences.
Prerequisite: 01:146:270 or 01:146:295.

01:146:356 ***Systems Physiology (3)***
Comprehensive study of the principal organ systems of laboratory animals and humans.
Prerequisites: 01:119:115-116 and 01:160:161-162 or 163-164, and 171 Credit not given for both this course and 11:067:300.

01:146:357 ***Systems Physiology Laboratory (1)***
Laboratory to accompany the Systems Physiology lecture course 01:146:356. Lab. 3 hrs.
Pre- or corequisite: 01:146:356.

01:146:405 ***Honors Seminar (3)***
This course is intended to help students prepare a written research thesis and practice the oral thesis presentation.
Requires departmental permission. Open only to senior honors students majoring in cell biology and neuroscience. This course fulfills the SAS WCd core requirement.

01:146:406, 407 ***Research in Cell Biology and Neuroscience (1-3,1-3)***
Research under the direction of a Rutgers faculty member.
Written report required. Permission of department and an instructor willing to sponsor the student, and a cumulative grade-point average of 2.8 or better are required. Open only to students majoring in cell biology and neuroscience.

01:146:408-409 ***Honors Research (3-3)***
Two semester laboratory research sequence under the direction of a Rutgers faculty member. Written report and oral presentation required. Culminates in a written thesis and oral thesis defense.
Permission of department and an instructor willing to sponsor the student are required. Open only to seniors majoring in cell biology and neuroscience who meet the requirements for the departmental honors program.

01:146:410-411 ***Research Thesis in CBN I and II (3-3)***
Two semester laboratory research sequence under the direction of a Rutgers faculty member and the course coordinator.
Prerequisites: 01:146:307 or 01:146:308. Requires departmental permission and acceptance by a faculty mentor who will

host the student in the laboratory. Requires submission of a written thesis draft (I = Fall semester), and submission of a final written thesis and oral defense (II = Spring semester). Open to senior students majoring in cell biology and neuroscience who are not enrolled in the departmental honors program.

01:146:445 *Synapses, Neurons, and Circuits (3)*
Cellular and systems features of neurons and the fundamental unit of signaling in the nervous system, focusing on a small number of advanced topics. Focus on how to test hypotheses related to the topics addressed: intra- and inter- cellular communication; construction of neuronal networks; protein interactions at the synapse; and signal transduction pathways.
Prerequisites: 01:146:245 and 01:146:270.

01:146:447 *Clinical Neurobiology (3)*
Development and function of the nervous system with an emphasis on diseases and disorders. Topics include neurodevelopment, demyelination, tumors, and viral infections; neurological disorders/diseases; injury to the spinal cord and brain and repair; and clinical trials and the future of spinal cord and brain trauma.
Prerequisites: 01:146:245 and 01:146:270. Intended for senior students majoring in cell biology and neuroscience.

01:146:456 *Advanced Physiology (3)*
Preparation for advanced graduate study in physiology and for medical physiology (first-year medical school). Focus on mammalian physiology and the whole animal (whole organ) approach to classical experimental physiology.
Prerequisites: 01:146:356. Intended for senior and junior students.

01:146:464 *Topics in Cell Biology and Neuroscience (3)*
Directed readings and discussion of selected topics in cell biology and neuroscience.
Prerequisites: 01:146:245 and 01:146:270. Open to junior or senior students majoring in cell biology and neuroscience.

01:146:471 *Advanced Cell Biology Laboratory (3)*
Advanced laboratory methods in cell biology. Emphasis on light and electron microscopy, imaging, immunocytochemical techniques, tissue culture, and methods of identifying and separating macromolecules.
Prerequisite: 01:146:270 or permission of instructor.

01:146:472 *Developmental Biology (3)*
Genetic, molecular and cellular processes that lead from egg to embryo to mature organism.
Prerequisite: 01:146:270 or 01:447:380 or 01:447:384.

01:146:473 *Genetic Regulation in Cell Biology (3)*
Advanced topics in cell biology, focusing on genetic animal models, genomics, chromatin function, gene expression, and RNA biology.
Prerequisite: 01:146:270.

01:146:474 *Immunology (3)*
Fundamental principles of immunology with emphasis on antibody formation, immunoglobulin molecules and genes, hypersensitivity reactions, and the cellular basis for the immune response.
Prerequisites: 01:119:115-116 and 01:447:380 or 01:447:384. Recommended: 01:447:390.

01:146:475 ***Laboratory in Immunology (1)***
Biochemical and molecular analysis of immune cell function. Application of immunological techniques to the examination of normal and diseased states.
Pre- or corequisite: 01:146:474.

01:146:476 ***Honors Immunology (3)***
Introduction to the immune system, with a focus on mammalian organisms (particularly humans). Focus on critical thinking and problem-solving abilities, as well as introduction to primary research addressing contemporary immunological questions. Open only to students enrolled in the Honors College, SAS Honors Program or CBN Honors Program.
Prerequisites: 01:447:380 or 01:447:384. Credit not given for both this course and Immunology 01:146:474.

01:146:481 ***Protein Dynamics in Cell Biology (3)***
Advanced topics in cell biology, focusing on signal transduction (module 1), cell adhesion and protein transport (module 2) and cytoskeletal dynamics controlling cell movement (module 3).
Prerequisite: 01:146:270.

Genetics 447

GENETICS 447

Department of Genetics, School of Arts and Sciences

Website: http://genetics.rutgers.edu

Chair: Tara C. Matise

Vice-Chair & Undergraduate Director: Gary A. Heiman

Distinguished Professors:

Maureen M. Barr, B.A., Rutgers; Ph.D., Columbia

James A. Knowles, B.S., Michigan; M. Sc., M.D., Ph.D., Albert Einstein Medicine

Tara C. Matise, B.S., Cornell; M.S., Ph.D., Pittsburgh

Jay A. Tischfield, B.S., City University of New York; M.Phil., Ph.D., Yale

Lei Yu, B.S., Jiangnan University (China); M.S., Institute of Genetics, National Academy of Sciences (China); Ph.D., California Institute of Technology

Professors:

Gary A. Heiman, B.A., Boston Univ.; M.Sc., Sarah Lawrence; Ph.D., Columbia

Kim S. McKim, B.A., Simon Fraser; Ph.D., British Columbia

Bryce E. Nickels, B.S., Miami; Ph.D., Harvard

Christopher G. Rongo, B.A., University of California, San Diego; Ph.D., Massachusetts Institute of Technology

Gleb P. Shumyatsky, B.A., Moscow State University; Ph.D., Institute of Molecular Biology (Moscow, Russia)

Andrew W. Singson, B.S., University of California, Davis; Ph.D., University of California, San Diego

Karen Schindler, B.S., Loyola; Ph.D., Thomas Jefferson

Michael Verzi, B.A., The College of New Jersey; Ph.D., University of California, San Francisco

Jinchuan Xing, B.S., Nankai (China); Ph.D., Louisiana State

Associate Professors:

Chris Ellison, B.A., Lewis and Clark; Ph.D., University of California, Berkeley

Derek Gordon, B.A., Rochester; Ph.D., State University of New York at Stony Brook

Assistant Professors:

Christina M. Bergey, B.A., M.A., Ph.D., New York University

Devanshi Jain, B.Sc. Hons., Ph.D., University College, London

Tetsuya Nakamura, B.S., Ph.D., Osaka (Japan)

Srujana Samhita Yadavalli, B. Tech., Anna University (India); Ph.D., Ohio State

Jiekun Yang B.,S., Renmin University (China), M.S. UW-Madison, Ph.D. University of Virginia

Associate Research Professors:

Juan Wang, B.S., Ph.D., China Agricultural University (Beijing)

Assistant Research Professors:

Marco Azaro, B.A., Ph.D., Brown

Teaching Professor:

Martha Haviland, B.A. Rutgers; MS, AM, Ph.D. Michigan

Associate Teaching Professor:

Jessica Rispoli, B.S., Richmond; M.G.C., Maryland

Christine Seymour, B.S., Scranton; M.S. Arcadia University

Associate Research Professor:

Oleg Evgrafov, B.S., Moscow Physical Engineering Institute; M.S., Moscow Physical Engineering Institute; Ph.D,. Institute of General Genetics (Moscow); D.Sc., Research Center for Med. Genetics (Moscow)

Assistant Teaching Professors:

Tara P. Cominski, B.S, Saint Peter's; M.S., Seton Hall; Ph.D., Rutgers

Doreen R. Glodowski Trotta, B.S., Wisconsin; M.S., Kansas State; Ph.D., Wisconsin

Anne Keating, B.S., Ph.D., Rutgers

Haiyang Lu, B.S., Hebei University, China; M.S., Beijing Normal University, China; Ph.D., City University of New York

Shama Khan, B.A., Rutgers University; M.P.H., Tulane; M.S. Epidemiology, Tulane University; M.S. Genetic Counseling, Arcadia University

Mai Soliman, B.S., M.Sc., Montclair State; Ph.D., Rutgers

Zainab Tanvir, B.A. Stonybrook University, M.S. Univ. Delaware, Ph.D., Rutgers

Alexandra Walczak, B.S., Ramapo College of NJ, Ph.D., Rutgers

Learning Goals

Learning Goals

Learning Goals:

The Department of Genetics is committed to teaching science through the way we do science: through the process of doing research. The curriculum of the Department of Genetics is centered around four main goals. These goals shape our innovative courses and provide the basis for lifelong learning.

I. Knowledge specific goals: Know the terms, concepts, and theories of genetics.

II. Integrate the material from multiple courses and research to think holistically and to see the whole as well as the parts.

III. Use genetic information and ideas to critically analyze published research articles in genetics.

IV. At the end of four years, all of our students will be able to design an experiment, carry out the research using the appropriate laboratory techniques, and analyze and interpret their data. They will also be able to communicate their discoveries through a written article appropriate for publication in a peer-reviewed genetics journal, and through talks or posters appropriate for scientific meetings.

Life Sciences (SAS)

Entry Requirements of the Major

Entry Requirements of the Major

Students wishing to major in this department must have been enrolled at Rutgers for at least one semester. In addition, students must:

1. Be an SAS student

2. Have a cumulative GPA of at least 2.00, and a GPA of at least 2.8 at the time of taking research for credit.

3. Have earned a C or better in these prerequisite courses or equivalents (25-26 credits):

a. General Biology I 01:119:115

b. General Biology II 01:119:116

c. General Biology Lab 01:119:117

d. General Chemistry I either 01:160:161 or 01:160:163

e. General Chemistry II either 01:160:162 or 01:160:164

f. Calculus I either 01:640:135 or 01:640:151

g. Calculus II or Statistic either 01:640:136, or 01:640:152, or 01:640:192, or 01:960:401, or 01:960:212, or 01:960:379

4. Students with an overall GPA < 3.0 must meet with the UGD before declaring the major.

a. Genetics is a credit-intensive major and has a requirement of a 2.80 GPA at the time of taking research for credit

b. Students entering the major with a GPA of < 3.0 may struggle to complete the major on time

5. Watch a Genetics Major Declaration Video

Life Sciences (SAS)

Major Requirements

Major Requirements

The department offers a major with a strong emphasis on research. A minimum of 20 credits of coursework in the life sciences must be completed in residence. Genetics is a credit-intensive major. Excluding the prerequisite courses (25-26 credits) to get into the major (see above), there are between 54-56 credits to complete the major (60-62 for honors). A grade of "C" or better in courses credited toward the major is required for graduation, and each course may be repeated only once to replace D/F grades. Students may not double major in two Division of Life Sciences majors.

The requirements of the major consist of:

A. Life Science Core Courses (19-21 credits) - Required for all DLS Majors (Approved AP and Transfer credits may be substituted)

a. Intro to Experimentation 01:160:171

b. Organic Chemistry I 01:160:307 or 01:160:315

c. General Physics I (01:750:203 + 205 lab), or (01:750:271 + 275 lab), or 01:750:193, or 01:750 201
Note: 193 & 201 have integrated lab

d. General Physics II (01:750:204 + 206 lab) or (01:750:272 + 276 lab) or 01:750:194 or 01:750:202
Note: 194 & 202 have integrated lab

B. Genetics Core (17 credits) - Required for all Genetics Majors- All below credits must be completed at Rutgers

a. Genetic Analysis I 01:447:384

b. Genetic Analysis II 01:447:385

c. Lab Course Req. 01:447:315, or 01:447:302, or 01:447:203, or 01:447:303, or 01:694:214, or 01:694:215, or 01:694:316

d. Biochemistry for the Life Sciences 01:694:395 or 01:694:407

e. Communications in Genetics 01:447:430 or 01:447:414 + 01:447:415 (Honors, Thesis Writing senior year)

C. Genetics Independent Scholarship (minimum 6 credits but 12 credits for honors

Note: 2.8 minimum GPA to register for research

a. Independent Scholarship 01:227:460, 407, 408, 409, 410, 488, 489, 490

b. Independent Scholarship 01:227:460, 407, 408, 409, 410, 488, 489, 490

D. Genetics Electives (6 credits)

Fifty percent must be taken within the Genetics Major (i.e.; 01:447)

a. Genetics Electives See electives table

b. Genetics Electives See electives table

c. Genetics Electives See electives table

E. Electives OR Independent Scholarship (6 credits)

Note: Additional Genetics Lab may be used as an elective

a. Independent Scholarship 01:227:460, 407, 408, 409, 410, 488, 489, 490

b. Independent Scholarship 01:227:460, 407, 408, 409, 410, 488, 489, 490

c. Genetics Electives See electives table below

Lab Note: 01:694:214 and 01:694:215 are only offered to first-year students with AP Biology credit and AP General Chemistry credits (or taking General Chemistry concurrently). 01:447:203 is only offered to first-year students in the SAS Honors Program or the Honors College. Students cannot receive credit for both 01:447:203 and 01:447:302.

Organic Chemistry Note: If you are planning to pursue a graduate degree in which a full year of organic chemistry is suggested/required (e.g., med/dental school), we strongly recommend taking Organic Chemistry II + lab as an elective (6 credits)

Life Sciences (SAS)

Elective Courses

Departmental Honors

Departmental Honors

Departmental Honors

The Department of Genetics recognizes graduating students who have made outstanding academic achievements by awarding **departmental honors**. The department awards two types of departmental honors (see below) and these are awarded at the discretion of the Genetics Honors Committee. To be considered, students must meet all criteria for that type of honors and submit the honors request application by the deadline (April 1st of senior year).

The two types of departmental honors and their criteria are as follows:

1. GENETICS HONORS- RESEARCH

a. GPA requirement: a student must have attained, at the end of the junior year, a cumulative GPA of at least 3.4 and a Genetics major GPA of at least 3.4 (including prerequisites).

b. Complete 6 or more credits of Honors in Genetics (01:447:408-409) during senior year

c. Complete a total of 12 or more research credits (including the 6 credits of 01:447:408-409)

d. Complete Honors Thesis and Communication in Genetics 447:414 and 415 during senior year

e. Complete and defend a research thesis before a faculty committee (see Thesis Guidelines)

f. Present at Honors Day

Students can apply to do an Honors thesis by completing the relevant sections of the Independent Scholarship Form. Students must register either for an Honors course sequence in Genetics (01:447: 408 and 409) or for a course sequence in a college Honors Program (See Handbook) . These decisions should be discussed with an advisor and approved by the Department Vice Chair. Accepted students are expected to complete at least 12 credits in an independent research project, resulting in a thesis. Students may do research with Rutgers faculty outside of the Department with the approval of their advisor and the Vice Chair. Students will prepare a thesis and present an oral defense to a committee of three faculty. At least one member of the committee must come from the Department of Genetics. Students will present their research at a Departmental Symposium in April. Students contemplating an Honors thesis should refer to the much more detailed instructions and details in Section IX and Section X of the Student Handbook. For information on the thesis, see Thesis Guidelines.

Level of Honors: In determining the level of honors, the honors/awards committee takes into consideration multiple factors in aggregate, including but not limited to (1) cumulative GPA, (2) thesis defense committee recommendation, (3) research mentor evaluation, (4) faculty evaluation of presentation at Honors Day, and (5) whether or not the student took the honors versions of Genetic Analysis 1 and/or 2 (i.e., 01:447:384:H1 and/or 01:447:385:H1) and the grades received in those courses.

2. Genetics Honors - Certificate Program

a. GPA requirement: A student must have attained, by April 1st of senior year, a cumulative GPA of at least 3.4 and Genetics major GPA of at least 3.4 (including prerequisites).

b. Complete a departmental certification program (i.e.; CompGen, Cancer or Genetic Counseling).

c. By April 1st, the student must formally apply to request consideration for Certificate Honors by completing the Genetics Honors- Certificate Program Form

* *The honors committee may award Honors, High Honors or Highest Honors*

Life Sciences (SAS)

Undergraduate Certificate Programs

Undergraduate Certificate Programs

The Department of Genetics offers two certificate programs. Students who complete one of these Certificates are eligible to receive Departmental Honors.

1) Genetic Counseling Certificate Program

The Department of Genetics offers an undergraduate **Genetic Counseling Certificate Program (GCCP).** The GCCP program is intended for a select group of students interested in applying to the masters-level programs in genetic counseling. The goal is to provide students with guidance, coursework, and relevant clinical experience to improve their graduate school applications. This is a highly competitive option and is **only open to declared genetics majors**. Not all applicants will be accepted. The Certificate will be awarded only in conjunction with the awarding of a baccalaureate degree in genetics and does not replace minors. The certificate is NOT in lieu of completing the masters-level programs in genetic counseling. At the end of the program students will:

- understand genetic counseling as a profession ·
- understand application requirements for masters-level programs
- gain experience in talking with people who are in crisis
- gain experience in a clinical genetic counseling clinic

2) Certificate in Computational Genetics

The Department of Genetics offers a Certificate in Computational Genetics (CCG) for Genetics majors. The volume of data being generated in Genetics and related life science fields has been expanding tremendously in recent years, and career opportunities for geneticists with computational and quantitative expertise are simultaneously growing. This certificate program is intended for students who are either interested in applying to graduate-level programs,

or planning careers, in Computational Genetics/Biology, Statistical Genetics, Bioinformatics, or other programs in quantitative biomedical related research. The goal of the CCG is to provide students with guidance, coursework, and relevant data design and analysis experience to prepare them for graduate studies in the field or entry-level informatics jobs. This program is only open to declared Genetics Majors. The Certificate will be awarded only in conjunction with the awarding of a baccalaureate degree in Genetics. At the end of the program students will:

- Have gained competence in genetic data analysis using basic computer programming and statistical analysis.
- Be prepared to apply to M.S. or Ph.D. graduate programs in the areas of Computational Genetics and Bioinformatics.
- Be prepared to apply for career positions in industry, biotech companies, pharmaceutical companies, medical centers, or universities

3) Cancer Research Certificate

The Department of Genetics offers a Certificate in Cancer Research (CCR) for Genetics majors. Completion of the Certificate in Cancer Research will provide an advantage when applying to MD, PhD, and MS programs and facilitate transitions to careers with Cancer-related missions. The goal of the CCR is to provide students with a rigorous and Cancer-specialized curriculum. Students will do at least one year of research in a nation-leading Cancer Research Lab and students will be expected to participate in community engagement and develop skills to build community outside of academia. This program is only open to declared Genetics Majors. The Certificate will be awarded only in conjunction with the awarding of a baccalaureate degree in Genetics. At the end of the program students will:

- Have gained knowledge in Cancer Genetics with an expanded curriculum focused on Cancer biology.
- Have at least one year of experience conducting laboratory research in a Cancer research lab.
- Be prepared to apply to M.S., MD, or Ph.D. graduate programs in the areas of Cancer Genetics or for career positions in industry, biotech companies, pharmaceutical companies, medical centers, policy-driving institutes, or universities.

Life Sciences (SAS)

Courses

Courses

01:447:203 ***Honors Computational Genetics (Honors) (3)***
Honors computational genetics is a computer-based laboratory course that introduces students to the use of computers in biological research. This course is for students who are thinking of careers at the intersection of life sciences, statistics, and/or computer science, particularly students who are considering majoring in Genetics. The course fulfills the laboratory requirement for the Genetics major. In the first half of the course, students will receive instruction in introductory computer programming (Python). In the second half of the course, students will practice writing code in Python via in-depth computational projects in genetics and genomics. Each class consists of a mixture of lecture and computer-based demos and/or exercises, as well as time for students to work on

assignments. The course provides the introductory skills needed to conduct basic computational research in the life sciences, including many aspects of computer programming and genomic data analysis. Prior experience with computer programming is neither necessary nor is it expected for students who enroll in this course.

This course is for freshman or sophomore Honors students who are thinking of careers at the intersection of life sciences, statistics, and/or computer science, particularly students who are considering majoring in Genetics. The course fulfills the laboratory requirement for the Genetics major.The course fulfills the laboratory requirement for the Genetics major.
Prerequisites: Students must be in their first or second year at Rutgers in an approved Honors program (e.g., the Honors College or the SAS Honors Program). General Biology I (01:119:115) and be at least co-registered for General Biology II (01:119:116)) or have placed out of these two courses (e.g., through AP credit or approved transfer credit). Credit not given for both 01:447:203 and 01:447:302.

01:447:216 ***Analysis of Scientific Literature (Honors) (3)***
A systematic approach to the reading, analyzing, and understanding of primary literature in genetics; emphasis will be placed on data analysis and experimental design and demystifying the process of reading a scientific journal article.
Prerequisites: 01:119:115-116. Highly recommended: 01:694:215. Open only to freshmen and sophomores in the SAS or SEBS Honors Program. By permission only.

01:447:245 ***Introduction to Cancer (3)***
Introduction to Cancer provides the student with an overview of conventional and state-of-the-art aspects of oncogenesis. Students will become familiar with the process involved in neoplastic transformation to the cancer phenotype through aspects of epidemiology, pathophysiology, virology, in vitro and in vivo cellular transformation and genetics. They will then apply these aspects to the understanding of classic therapeutic modalities and new state-of-the-art rational therapies. This comprehensive course will concentrate on the human disease process by applying clinical aspects of oncogenesis during a series of Grand Rounds discussions that will include recent patient clinical cases and their outcomes.
Prerequisites: 01:119:115-116. Credit not given for both this course and 01:447:495.

01:447:302 ***Quantitative Biology and Bioinformatics (3)***
Introduction to the use of computers and computer programming to develop applications for research in genetics and molecular biology. Application topics will include evolutionary genetics, association analysis and genetics mapping, and structural biology.
Prerequisites: 01:447:380 or 01:447:384. May be used to fulfill an elective requirement or taken instead of 01:447:315 Introduction to Research in Genetics by students majoring in Genetics. Credit not given for both 01:447:203 and 01:447:302

01:447:303 ***Computational Genetics of Big Data (3)***
The main focus of this course is the application of R programming to the analysis of genetic data, particularly big data sets with multiple measurements. The primary data sets considered will contain RNA-seq and/or other expression data for multiple/all genes in a given set of individuals. This course is for junior or senior students who are thinking of careers at the intersection of life sciences, statistics, and/or computer science, particularly students who are majoring in Genetics. The course fulfills the laboratory requirement for the Genetics major. Students will learn how to acquire such data, format it for R, plot the data, and perform statistical analyses. In addition, students will learn how to simulate data under different hypotheses, and how to perform power and sample size calculations

for different statistical methods applied to real or simulated data. Each class consists of a mixture of lecture and computer-based demos and/or exercises, as well as time for students to work on assignments. Guest investigators will frequently make short presentations (in person or by skype) to provide illustrations of how programming and informatics is critical for their research. The course provides the introductory skills needed to conduct basic computational research in the life sciences, including many aspects of computer programming and data analysis.
Prerequisites: 01:447:380 or 01:447:384. May be used to fulfill the lab requirement by students majoring in genetics. May be used to fulfill an elective requirement by students majoring in genetics who have already fulfilled the lab requirement with a separate course.

01:447:315 *Introduction to Research in Genetics (3)*
Basic principles and methods of research with microbial model systems used in the analysis and manipulation of genes, followed by a research project in molecular genetics.
Prerequisites: 01:119:115,116, and 117; and 01:160:161-162, 171 (or equivalent) or 01:160:163-164, 171. May be used to fulfill the lab requirement by students majoring in genetics. May be used to fulfill an elective requirement by students majoring in genetics who have already fulfilled the lab requirement with a separate course. Credit not given for both this course and 01:694:315. Open only to genetics majors

01:447:354 *Social, Legal, and Ethical Implications of the New Genetics (3)*
Social, legal, and ethical implications of new modern genetic techniques, for example: genetic screening, stem cells and cloning, forensic genetics, genetic engineering of plants, animals, and humans, genetic enhancement, gene therapy, and the new eugenics.
Prerequisites: Genetics (01:447:380) or Genetics Analysis (01:447:384)

01:447:356 *Evolutionary Medicine (3)*
In this course, we examine human health from an evolutionary perspective, exploring the impact that our evolutionary heritage has on modern human diseases, both chronic and infectious. We will learn how the framework of evolutionary biology and modern genetic tools can inform our understanding of issues relevant to clinical and public health. Rather than focus on the immediate mechanisms underlying disease, we will endeavor to understand the ultimate factors that influence susceptibility, such as past natural selection. The course topics are wide-ranging, but particular attention is paid to emerging infectious diseases, as well as non-communicable diseases that may be exacerbated by facets of modern lifestyles.

Through lectures, critical analysis of the primary literature and popular science news, and class discussions, students will learn how evolutionary principles can be practically applied to medicine. Key readings each session will focus on genetic techniques for understanding evolutionary medicine, while additional readings will incorporate perspectives from diverse fields.

By fully participating in this course, students will be able to appreciate how modern susceptibility to non-communicable and infectious diseases has been influenced by past evolutionary processes; critically evaluate evolutionary hypotheses related to health and medicine, including those found in popular science articles; and know how genetic techniques are applied within an evolutionary framework to understand ultimate reasons for disease.
Prerequisites: (01:447:380 or 384) AND (01:960:401 or 01:960:212).

01:447:370 *Developmental Genetics (3)*
How genes influence the developmental processes of an organism. Topics include gene regulatory networks, signaling pathways, stem cell biology, and the role of developmental genetics in human disease.
Prerequisites: Genetics (01:447:380) or Genetic Analysis (01:447:384)

01:447:380 *Genetics (4)*
Introduction to the mechanisms of heredity and evolution. Mechanisms of Mendelian inheritance, meiosis, recombination, gene mutation, and mapping, and an introduction to modern biochemical, molecular, and population genetics.
Lec. 3 hrs., rec. 1 hr. Prerequisites: 01:119:115-116 and 01:160:161-162 or 01:160:163-164. Credit not given for both this course and 01:447:384-385 or 11:067:328 or 11:776:305.

01:447:382 *Genetics Laboratory (1)*
Laboratory to accompany 01:447:380. Not accepted for elective credit for Genetics majors.
Lab. 3 hrs. Pre- or corequisites: Genetics (01:447:380) or Genetic Analysis (01:447:384)

01:447:384-385 *Genetic Analysis I,II (4,4)*
Experimental methods and concepts in genetics, with emphasis on their application to genetic research. Part I covers transmission genetics and breeding analyses, basic molecular genetics, isolation and characterization of mutations, and chromosome structure and function. Part II covers mathematical genetics, recombinant DNA, genomics, and special topics relevant to modern genetic research.
Open only to majors in genetics or by permission of instructor. Credit not given for both this course and 01:447:380 or 11:067:328 or 11:776:305. Prerequisites for 01:447:384 are 01:119:115-116 (General Biology I & II) or 01:160:161-162 or 01:160:163-164 (General Chemistry I & II). Prerequisite for 01:447:385 is 01:447:384.

01:447:390 *General Microbiology (4 includes laboratory)*
Microorganisms are an essential component of the human environment and are significant not only for the disease they cause, but also for their ecological, agricultural, pharmaceutical, and industrial benefits. This course will introduce students to the physiology, morphology, pathogenicity, and genetics of groups of microorganisms and their applications. The lab component of the course will introduce microscopy and staining techniques, the growth cycle and generation of a standard curve, physiological characteristics of microorganisms, and bacterial transformation. The course is an introduction to the physiology, morphology, pathogenicity, and genetics of groups of microorganisms. Topics include: History and Overview of Microbiology, Cell Structure and function, Microbial Growth, Nutrition, culture, and metabolism, Virology, Bacterial genetics, Microbial evolution and systematics, Bacteria and Archaea, Nutrient cycles, Genetic Engineering and Biotechnology, Waste treatment, Anaerobic respiration and Nitrogen fixation, Antibiotics and chemotherapeutic agents, Normal Flora, Virulence, Toxins, Epidemiology, and Microbial Diseases.

This is an upper-level course that focuses on the basic principles of microbiology. The course is an introduction to the physiology, morphology, pathogenicity, and genetics of groups of microorganisms. Topics include:
Prerequisites: General Biology 01:119:115-116-117 or 01:119:101-102 and General Chemistry 01:160:161-162-171 (or higher) and Organic Chemistry 01:160:307. Credit not given for both this course and 11:680:390.

01:447:392 *Pathogenic Microbiology (3)*
This course will integrate basic microbiology and infectious diseases. The first quarter of the course will provide the conceptual basis of microbial morphology, metabolism and growth, heredity and variation, pathogenicity and antimicrobial chemotherapy. Then this course will introduce the students to one real life patient case study each week, moving the course toward an understanding of specific human diseases (e.g., pharyngitis, meningitis) as might be expected in a clinical environment. Each case will include a patient history, differential diagnosis, clinical cues, laboratory data, pathogenesis, treatment and prevention, additional points and references. The objective is not to attempt to cover every infectious disease or microorganism, but rather to use examples that would stress the key

principles of microbial pathogenesis, differential diagnosis and appropriate treatment and prevention. This course is intended for Life Science majors or those with a strong background in the Biological Sciences.
Prerequisites: General Biology (01:119:115-117), General Chemistry (01:160:161-162-171), and Organic Chemistry (01:160:305. and 01:160:315. Systems Physiology is recommended.

01:447:406-407 ***Research in Genetics (3)***
Laboratory research on original problem under the direction of a professor. Written thesis, oral presentation, and defense required.
Prerequisites: Permission of department and cumulative grade-point average of 2.8 or better. Open only to students majoring in Genetics.

01:447:408-409 ***Honors in Genetics (3-6,3-6)***
Laboratory research on original problem under the direction of a professor. Written thesis, oral presentation, and defense required.
Prerequisites: Open by permission to seniors majoring in genetics who meet the requirements for the departmental honors program. Corequisite: 01:447:414 (fall) and 415 (spring).

01:447:410 ***Research in Genetics - Writing Intensive (3)***
Research in Genetics- Writing Intensive is intended to provide you with an opportunity to engage in original laboratory research under the direct supervision of a faculty mentor, usually in the faculty member¿s research laboratory. You are expected to carry out your own research project. NOTE: this research requires a heavy commitment of time and effort and can impact your performance in coursework, especially if you have not yet managed the foundational material for the discipline. Fulfills the writing and communication requirements of the SAS Core Curriculum.
Prerequisites: 01:447:302, 447:315, or permission of department. Registration is by special permission only. Cumulative grade-point average of 2.8 or better. Declared genetics major.

01:447:414 ***Thesis Writing and Communication in Genetics (1.5)***
Assists students with their honors thesis; emphasis will be on library/internet research and thesis writing. Students will be expected to write the introduction, methods, and reference sections of their thesis and outline the results and discussion.
Corequisites: 01:447:408. For seniors completing departmental honors; by special permission only.

01:447:415 ***Thesis Writing and Communication in Genetics (1.5)***
Assists students with their honors thesis; emphasis will be on library/internet research and thesis writing. Students will be expected to write the introduction, methods and reference sections of their thesis and outline the results and discussion.
Prerequisite: 01:447:408. Corequisite: 01:447:409. For seniors completing departmental honors; by special permission only.

01:447:430 ***Effective Communication Skills in Genetics (3)***
Communication is an essential part of science. Whether it is communicating research findings to other scientists or conveying complex concepts to a lay audience, a scientist must be able to effectively communicate their research to succeed. Communication in science is typically through publications, posters, or oral presentations. The goal of this course is to provide students practice in effectively communicating scientific findings. This includes preparing and revising an introduction for scientific papers, writing a research description for general audience, and preparing and

giving presentations (both oral and poster).
Prerequisites: Declared major in Genetics; must have completed one semester of Research in Genetics, Advanced Independent Study, or Genetic Counseling Rotation. By special permission only.

01:447:451 *Genomes (3)*
This course will focus on Genomics, Proteomics and Bioinformatics from a Genetics perspective. Special attention will be given to the organization and functioning of the human genome.
Prerequisites: Genetics (01:447:380) or Genetic Analysis (01:447:384).

01:447:460 *Genetics of Compulsive Behavior (3)*
Compulsive urge can be channeled toward productive endeavors such as a strong drive to succeed in competitions, schooling, and career. On the other hand, improper handling of compulsive urge may lead to problematic behaviors such as alcoholism, drug use, gambling, and other undesirable behaviors. There are also conditions that are medically defined as disorders, with certain types of compulsive behaviors as part of the diagnostic symptoms, such as OCD and ADD/ADHD. There is evidence that genetics contribute to compulsive behavior in humans, and research in animal models has begun to uncover the molecular factors that underlie the genetic basis of compulsive behavior. Discussion of primary literature and other scientific publications that deal with the molecular and genetic basis of compulsive behavior. Emphasis will be placed on the development of skills for critical thinking and effective writing.
Prerequisites: Genetics (01:447:380) or Genetic Analysis (01:447:384).

01:447:465 *Genetic Approaches and Research Analysis (3)*
This class will teach students how to read, interpret and analyze research articles. The class will follow an active learning format, where we will discuss seminal and recent research articles in depth: What was the scientific question or problem? What methods and strategies were used to address it? What were the findings and conclusions? What are the alternative interpretations and methods that could have been applied? What questions are remaining?
This class will expose students to a diverse selection of research literature, involving genetic and molecular analyses in model organisms such as mice, worms, flies and yeast. The class series will begin with a research article presented by the teacher. During the majority of the class series, students will be divided into groups of 4-5. Each group will be assigned one research article and be required to work together to a) interpret, b) analyze and c) present the article in the form of an oral presentation to the class. Students will be graded on their ability to perform each of these tasks and on active participation during presentations by other groups. All groups will also be required to complete and be graded on a written discussion summary assignment at the end of each article discussion. This summary assignment may take many forms, e.g., preparation of a graphical abstract, subway advert, or other creative forms of expression.
Prerequisites: Genetics (01:447:380) or Genetic Analysis (01:447:384).

01:447:470 *Evolutionary Developmental Biology (3)*
Evolutionary origins of the vertebrate body plan are major problems in biology. While paleontology and comparative anatomy have revealed the evolutionary trajectories of the organs, recent genetics, genomics and embryology are becoming powerful tools to answer classical questions. The goals of this course are twofold; 1) obtain fundamental knowledge of anatomy, embryology, and the latest genomics and 2) learn how to integrate genetics, genomics and embryology to answer evolutionary questions through active discussion in the classroom. The training to discover and answer scientific questions in animal diversity will be performed at the American Museum of Natural History.
Prerequisites: Genetics (01:447:380) or Genetic Analysis (01:447:384)

01:447:478,479 ***Special Topics in Genetics (3,3)***
Directed readings and discussion of selected topics of special interest in genetics. Topics will vary according to semester and/or instructor.
Prerequisites: Genetics (01:447:380) or Genetic Analysis (01:447:384)

01:447:480 ***Topics in Molecular Genetics (3)***
Current research topics in microbial and molecular genetics. Lectures, discussions, and critical analyses of journal articles.
Prerequisites: Genetics (01:447:380) or Genetic Analysis (01:447:384).

01:447:484 ***Behavioral and Neural Genetics (3)***
Influence of genetics on the nervous system and behavior of various organisms. Overview of field including experimental analysis of behavior, development of the nervous system, and sensory systems. Emphasis on reading and interpreting original research,
Prerequisites: Genetics (01:447:380) or Genetic Analysis (01:447:384).

01:447:488 ***Genetic Counseling Rotation (3)***
The goal of this course is to provide students with an understanding of the genetic counseling career. Students will be placed at a local Genetic Counseling clinic to shadow a genetic counselor for one semester. During the semester, the student is expected to spend 8-9 hours a week at the rotation plus meet weekly with course director (attendance is mandatory). Course grade will be based on 1) Case presentation to Genetic Counseling group 2) ten Genetic Counseling case summary logs, and 3) evaluation by the clinical supervisor.
Prerequisites: Declared Genetics major, cumulative GPA of 2.8 or greater, and accepted into the undergraduate Genetic Counseling Certificate Program (GCCP).

01:447:489,490 ***Advanced Independent Study in Genetics (3,3)***
Advanced independent study in Genetics is an opportunity for students to complete a scholarly project under the direct supervision of a faculty mentor. Projects are varied; e.g. library research on a topic of mutual interest to both the student and the faculty member, computer simulations, informative website design, or development of teaching materials. This course may not used for laboratory research.
Prerequisites: 01:447:384 and permission of department. Open only to students majoring in Genetics

Life Sciences (SAS)

Learning Goals

Learning Goals

The Department of Molecular Biology and Biochemistry offers a course of study in which traditional and modern biochemistry are integrated with studies in molecular biology. In addition to traditional courses, students are required to carry out undergraduate research work in a Rutgers professor¿s lab who serves as the host and mentor. This course of study prepares students for graduate studies in molecular biology and biochemistry and related fields, entry into professional schools in medicine or other health professions, or employment in industries (e.g., biotechnology, pharmaceuticals) in which molecular biology and biochemistry skills are in demand. The same learning goals are also used for nonmajor students taking molecular biology and biochemistry courses.

Learning Goals:

I. Students should demonstrate an understanding of the knowledge that is needed to begin biomedical research and that is required for postgraduate exams and studies.

II. Students should demonstrate the ability to find and evaluate information about specific biological systems or problems.

III. Students should demonstrate the ability to design experiments and critically analyze data.

IV. Students should demonstrate the ability to communicate their research and findings orally through seminar and poster presentations and through written research papers.

Life Sciences (SAS)

Entry Requirements of the Major

Entry Requirements of the Major

The molecular biology and biochemistry (MBB) major is open to students beyond their first year who have a 2.0 cumulative grade-point average and have received grades of C or better in courses taken toward the major, except by special permission of the department undergraduate chair. The MBB major is also open to first year students with AP credits. In all cases, students interested in the MBB major should contact the Undergraduate Director, Sam Gunderson. A grade of C or better in all courses credited toward the major is required for graduation and each course may be repeated only once to replace D/F grades.

Departmental approval is required to declare the major in molecular biology and biochemistry. Students who want to register for the MBB major must first meet with the Undergraduate Chair Sam Gunderson, Nelson lab, Room A322/A320 (848-445-1016 gunderson@dls.rutgers.edu) to discuss details about the major.

Life Sciences (SAS)

Major Requirements

Major Requirements

A core of courses is required for completion of the major in molecular biology and biochemistry. Students supplement the core with additional required and elective courses in one of three options. Given that molecular biology and biochemistry is a dynamic and developing field, it is critical that coursework applied to the major must be current. Thus, any life science courses applied to the major in molecular biology and biochemistry should be taken within 10 years of graduating. Online courses will be reviewed on a case-by-case basis to confirm that they meet departmental learning goals before they may be used to satisfy the requirements for the major. Returning students must meet with their adviser to discuss their path to graduation. All students are required to write research reports and present them at a seminar.

Required Core Courses (58 credits)

01:119:115-116 General Biology (4,4)*
01:119:117 Biological Research Laboratory (2)*
01:160:161-162 or 01:160:163-164 or 01:160:165-166 General Chemistry (4,4)*
01:160:171 Introduction to Experimentation (1)*
01:160:309 Organic Chemistry Laboratory (2) (recommended)* or 01:160:311 Organic Chemistry Laboratory (2)
01:160:315-316 Principles of Organic Chemistry (4,4) (recommended)* or 01:160:307-308 Organic Chemistry (4,4)
01:447:380 Genetics (4)*
01:640:151-152 Calculus for Mathematical and Physical Sciences (4,4) *(recommended) or 01:640:135-136 Calculus for the Life and Social Sciences I,II (4,4)**
01:694:407 Molecular Biology and Biochemistry (3) or 01:694:395 Biochemistry for the Life Sciences (3)
01:694:315 Introduction to Molecular Biology and Biochemistry Research (3) or 01:694:215 Honors Introduction to Molecular Biology and Biochemistry Research (4) or 01:694:214 Introduction to Molecular Biology Research (3) or 01:694:316 Honors Introduction to Molecular Biology, Biochemistry, Genetics Research (4)
01:694:408 Molecular Biology and Biochemistry (3)
01:694:383 Molecular Biology and Biochemistry Seminar: Careers in Science (1)
01:694:484 Molecular Biology and Biochemistry Seminar: Research Presentations (1)
01:750:203-204 General Physics (3,3)***

01:750:205-206 General Physics Laboratory (1,1)***

*Life sciences core course
**01:960:401 Basic Statistics for Research (3) or 01:960:211-212 Statistics I,II (3,3) may be substituted for the second semester of calculus.
***01:750:193-194 (4,4) or 01:750:201-202 (5,5) may be substituted for 01:750:203-204 (3,3) plus 01:750:205-206 (1,1).

Life Sciences (SAS)

Course Requirement Options

Course Requirement Options

In addition to the required core courses, the Department of Molecular Biology and Biochemistry (MBB) offers two course options to students to fulfill the requirements for the major. Course option one comprises taking advanced electives and is intended to expose MBB students to different current topics in molecular biology and biochemistry. Course option two is for students interested in biophysical questions and research and comprises taking Physical Chemistry and Multivariable Calculus. Students completing course option two will also receive a minor in chemistry are encouraged to take the physical chemistry courses as they will fulfill the minor requirements. Course option two is intended to expose MBB students to different current topics in molecular biology and biochemistry.

Course Option One (13 credits)

Two 3-credit courses offered by the MBB department from the following list: 01:694:230; 01:694:390; 01:694:411; 01:694:412; 01:694:413; 01:694:420/421; 01:694:492

One 400-level, 3-credit elective course offered by any department in the Division of Life Sciences or approved by the MBB department. See degree navigator or the MBB department website for a list of approved courses.

Course Option Two (9 credits)

01:160:341-342 Physical Chemistry: Biochemical Systems (3,3) or 01:160:327-328 Physical Chemistry (3,3) (requires 01:640:251 as a prerequisite). Other combinations of Physical Chemistry are possible so see degree navigator for further details.

01:640:251 Multivariable Calculus (4)

One 3-credit course offered by the MBB department from the following list: 01:694:390; 01:694:411; 01:694:412; 01:694:413; 01:694:420/421; 01:694:492

Electives

Because the list of approved electives is changing, students should discuss their elective options directly with their departmental faculty advisers and with the MBB Undergraduate Director, Sam Gunderson. A list of currently approved electives can be found on the MBB department website. In addition to the undergraduate courses listed, advanced students are encouraged to choose electives from the School of Graduate Studies.

Life Sciences (SAS)

Research Options

Research Options

The Department of Molecular Biology and Biochemistry (MBB) offers two laboratory research options (laboratory option one and laboratory option two), as well as a nonlaboratory research option (nonlaboratory option). In all cases, students must take one of the Introduction to Molecular Biology and Biochemistry Research courses (01:694:214, 01:694:215, 01:694:315, or 01:694:316) and 01:694:383, 484 Seminars in Molecular Biology and Biochemistry. Course 01:694:215 is only for first-year honors students who have placed out of General Biology (01:119:115,116, and 117) by receiving a score of 4 or 5 on the AP biology exam. Course 01:694:214 is for first-year students who have placed out of General Biology (01:119:115,116, and 117) by receiving a score of 4 or 5 on the AP biology exam. Course 01:694:315 is for either qualified sophomores or junior students in the major. Course 01:694:316 is for either qualified sophomores or junior honors students in the major.

Laboratory Option One (>12 credits)

01:694:381,382, and 283 (Summer) or 384 (Summer) Undergraduate Laboratory Research (2-6,2-6)

01:694:481,482 Advanced Undergraduate Laboratory Research (2-6) or 01:694:495,496 Honors Laboratory Research (6,6)

A minimum of 12 credits is required in research courses. With the exception of Honors Laboratory Research (01:694:495/496), students who plan to take more than 3 credits of research a semester need approval from the MBB undergraduate chair.

Laboratory Option Two (6 to 11 credits)

01:694:381,382, and 283 (Summer) or 384 (Summer) Undergraduate Laboratory Research (2-6) or 01:694:481,482 Advanced Undergraduate Laboratory Research (2-6) or 01:694:495,496 Honors Laboratory Research (4-6,4-6)

One 3-credit course offered by the MBB department from the following list: 01:694:230 (3); 01:694:390; 01:694:411 (3); 01:694:412 (3); 01:694:413 (3); 01:694:420/421 (3); 01:694:492 (3).

A minimum accumulation of 6 credits is required in research courses. Students must take at least one MBB elective in addition to the course requirements to satisfy the requirements for this option. Note that students applying for honors must complete 4 up to 6 credits of honors coursework per semester for two semesters. With the exception of Honors Laboratory Research (01:694:495/496), students who plan to take more than 3 credits of research a semester need approval from the MBB undergraduate chair.

Nonlaboratory Option (9 credits)

01:694:489,490 Literature Research in Molecular Biology and Biochemistry (3,3). This non-lab option is almost never used and will need approval from the Undergraduate Director, Sam Gunderson

One 3-credit course offered by the MBB department from the following list: 01:694:230 (3); 01:694:390; 01:694:411 (3); 01:694:412 (3); 01:694:413 (3); 01:694:420/421 (3); 01:694:492 (3).

Students must take at least one MBB elective in addition to the course requirements to satisfy the requirements for this option. Students taking this option may not apply for departmental honors.

Life Sciences (SAS)

Departmental Honors Program

Departmental Honors Program

To qualify, a student must have attained, at the end of the junior year, a cumulative grade-point average of at least 3.4 and a grade-point average of 3.4 or better in courses required for the major. Exceptional students not meeting these criteria but wishing to apply for honors research may petition the Department of Molecular Biology and Biochemistry at the beginning of their senior year. Students accepted into the program are expected to complete two semesters (6 credits per semester) of honors coursework. A written honors thesis and an oral thesis presentation are required. Students enrolled in 01:694:495,496 Honors Laboratory Research or any of the various school honors programs are eligible to receive departmental honors at the time of graduation.

Life Sciences (SAS)

Courses

Courses

01:694:214 ***Introduction to Molecular Biology Research (3)***
Basic principles and methods of research, followed by a research project: analyses of molecular clones from eukaryotic cDNA libraries. Description of research opportunities available to undergraduates at the university.
Prerequisites: For first-year students only who have placed out of General Biology (01:119:115,116, and 117) with AP credits, and 01:160:161 or 01:160:163. Corequisite: 01:160:162 or 164.

01:694:215 ***Honors Introduction to Molecular Biology and Biochemistry Research (4)***
Basic principles and methods of research, followed by a research project: isolation and analyses of transcriptional regulatory mutants in yeast. Description of research opportunities that are available to undergraduates at the university.
Prerequisite: Limited only to first-year SAS Honors Program or Honors College students who have placed out of General Biology (01:119:115,116, and 117) with AP credits. Corequisites: 01:160:161 or 01:160:163 (or AP credits) and 01:640:135 or 01:640:151 (or AP credits).

01:694:230 ***Analytical Methods in Biology (3)***
Mathematical methods and tools to analyze and interpret biological and biomedical data, including probability theory; Bayes Theorem; the binomial, Poisson, and normal distributions; limit theorems; error analysis; tests of statistical significance; parameter estimation; curve fitting; sampling techniques; random number generation; and Monte Carlo methods. Analysis of sequencing and microarray data, such as sequence alignment, phylogeny inference, population structure, selection, and human migration.
Prerequisites: 01:119:115-116 and 01:640:135 or 151.

01:694:281,282 *Sophomore Laboratory Research (2-6,2-6). 281 is Fall, 282 is Spring*
Research project in the laboratory of a faculty member. Written report of research carried out during each semester required. Credits in this course cannot be used toward the required research credits for laboratory option. Students must complete a special permission form and have it signed by their research advisor and then send the signed form to the Undergraduate Director (Sam Gunderson) before they can register for the course.

01:694:283 *01:694:283 Undergraduate Laboratory Research (2-6). Summer semester*
Independent research project in the laboratory of a faculty member. A written report of research carried out during each semester required by the end of each semester.
Typically for rising Juniors and Seniors. Students must complete a special permission form and have it signed by their research advisor and then send the signed form to the Undergraduate Director (Sam Gunderson) before they can register for the course.

Prerequisite: Students must complete a special permission form and have it signed by their research and MBB faculty mentors before they can register of the course.

01:694:301 *Introductory Biochemistry and Molecular Biology (3)*
Chemistry and metabolism of proteins, carbohydrates, lipids, nucleic acids, and other biologically important compounds.
Prerequisite: 01:160:209 or 307. Not for students majoring in molecular biology and biochemistry. Credit not given for both this course and 01:694:407, 11:115:301, or 11:115:403.

01:694:313 *Introductory Biochemistry Laboratory (1)*
Techniques used in research, clinical, and food laboratories, including tests of biological materials, methods of separation, and determination of enzyme activities.
Lab. 3 hrs. Pre- or corequisite: 01:694:301. Not for students majoring in molecular biology and biochemistry.

01:694:315 *Introduction to Molecular Biology and Biochemistry Research (3)*
Basic principles and methods of research, followed by a research project: analyses of molecular clones from eukaryotic cDNA libraries. Description of research opportunities at the university available to undergraduates.
Pre- or corequisites: 01:119:115,116, and 117; and 01:160:161-162, 171 or 01:160:163-164, 171. Credit not given for both this course and 01:447:315, 01:694:214, 215, or 316. Open only to MBB majors.

01:694:316 *Honors Introduction to Molecular Biology, Biochemistry, Genetics Research (4)*
Basic principles and methods of research in molecular biology, biochemistry, and genetics, followed by a research project: isolation and analyses of transcriptional regulatory mutants in yeast. Description of research opportunities that are available to undergraduates at the university.
Prerequisites: 01:119:116 and (01:160:162 or 01:160:164). For MBB or genetics majors only or those planning on being MBB or genetics majors. Special permission required.

01:694:381,382 *Undergraduate Laboratory Research (3-6,3-6). 381 is Fall, 382 is Spring*
Research project in the laboratory of a faculty member. Written report of research carried out during each semester required. Students must complete a special permission form and have it signed by their research advisor and then send the signed form to the Undergraduate Director (Sam Gunderson) before they can register for the course.

01:694:383 *Molecular Biology and Biochemistry Seminar: Careers in Science (1)*
Discussion of career options in the life sciences, finding a research laboratory, performing literature searches, reading a scientific paper, and creating posters and abstracts. This course should be taken in the beginning of the third year.
Open to MBB majors only.

01:694:384 *Undergraduate Laboratory Research (1-6). Summer semester*
Independent research project in the laboratory of a faculty member. A written report of research carried out during each semester required by the end of each semester.
For rising Seniors. Students must complete a special permission form and have it signed by their research advisor and then send the signed form to the Undergraduate Director (Sam Gunderson) before they can register for the course.

For rising Seniors. Students must complete a special permission form and have it signed by their research advisor and then send the signed form to the Undergraduate Director (Sam Gunderson) before they can register for the course.

01:694:385 *MBB Research and Writing (3)*

Research project in the laboratory of a faculty member. Seminar on science communication. Written and oral reports of research carried out during the semester required.

Prerequisites: MBB majors only. Students need a GPA of 2.8 or better to enroll in research.

01:694:390 *Introductory Computational Biology (3)*
Disciplines of biochemistry and molecular biology and genomics all include collection and analysis of large data sets. Hands on use in a computer lab will permit students to learn and apply computer languages such as Python and R to analyze large data including for example DNA mutations and structural variations (SVs), RNA-seq and ChIP-seq as part of understanding genes and gene regulation.
Prerequisite: 01:447:380 or 01:447:384

01:694:395 *Biochemistry for Life Sciences (3)*
The course is intended for life science majors and takes a holistic approach to Biochemistry. You will learn the basics of proteins, enzymology, nucleic acids and metabolism and use these as foundations to discuss exemplary metabolic pathways for their importance to homeostasis and, when dysregulated, to disease including observable phenotypes and what current strategies are used to treat these disorders. Coursework will consist of quizzes, homework, exams and one graded paper.

Prerequisites: 01:160:307 or 01:160:315

01:694:407 *Biochemistry (3)*
Protein structure and function, structure of lipids, membranes and carbohydrates, catalysis of biochemical reactions, intermediary metabolism, oxidative phosphorylation, membrane transport, lipid metabolism, signal transduction, photosynthesis, protein secretion, targeting and turnover, nitrogen, amino acid, and nucleotide metabolism.
Pre- or corequisites: 01:160:307-308 or 315-316. Credit not given for both 01:694:407 and 01:694:301, 11:115:301, or 11:115:403.

01:694:408 *Molecular Biology and Biochemistry (3)*
Disciplines of biochemistry and molecular biology as interlocking and mutually complementary fields of study. Lectures on structure of DNA, RNA, recombinant DNA approaches, DNA replication, repair and recombination, mobile genetic elements, transcription, gene regulation, RNA splicing, translation, and viral gene expression.
Prerequisite: 01:694:407 or 01:694:301 or 01:694:395 or 11:115:403. Credit not given for both 01:694:408 and 01:146:478 or 11:126:481.

01:694:411 *Molecular Pathways and Signal Transduction (3)*
Lectures and discussion of current research areas of advanced molecular and structural biology: transcription, posttranscriptional regulation, cell cycle, neurobiology, protein folding, macromolecular recognition, and molecular virology.
Pre- or corequisites: 01:694:407 and 408, or 01:447:384-385 or 11:115:403-404 or 11:126:481.

01:694:412 *Proteomics and Functional Genomics (3)*
Survey of modern techniques of protein biochemistry, bioinformatics, proteomics, and functional genomics, including basic concepts of protein structure and function, protein folding, protein characterization and purification, enzyme kinetics, NMR and X-ray crystallography, mass spectrometry, yeast two hybrid, and various techniques and approaches to functional and structural genomics.
Prerequisites: [(01:694:301 OR 01:694:407 OR 01:694:395) AND (01:447:380) OR (01:447:384)]

01:694:413 *Chromatin and Epigenomics (3)*

Introduction to chromatin dynamics, particularly the structural and biochemical modifications of chromatin that underlie epigenetic states and their effects on gene expression and development.

Pre- or corequisites: Prerequisite: 01:694:408 or 01:146:478 or 01:447:385.

01:694:420,421 *Special Topics in Molecular Biology and Biochemistry (3,3)*
Directed reading and discussion of selected topics of special interest in molecular biology and biochemistry. Topics will vary according to semester and/or instructor.
Pre- or corequisites: [(01:694:301 or 01:694:407) and (01:447:380 or (01:447:384)] or equivalent.

01:694:481,482 *Advanced Undergraduate Laboratory Research (BA, BA). 481 is Fall, 482 is Spring.*
Research project in the laboratory of a faculty member. A written report of research carried out during each semester is required. Oral presentations of student research are required in 01:694:484.

01:694:484 *Molecular Biology and Biochemistry Seminar: Research Presentations (1)*
Oral presentation of student's own research results and the research interests of the laboratory with which the student is associated. Presentation at a required poster session.
Students should take this course in the spring semester of their senior year. MBB majors only.

01:694:489,490 *Literature Research in Molecular Biology and Biochemistry (1-3,1-3)*
Literature research projects on a selected subject under the direction of a faculty member. A written report of research carried out during each semester is required. Oral presentations of student research are required in 01:694:484. This course is rarely used, therefore contact the Undergraduate Director if you are considering to take this course.
Prerequisites: 01:694:214, 215 or 315, 407, 408, and 383.

01:694:492 ***Gene Regulation: Clocks to Cancer (3)***
Explanation of MBB as an experimental science and how molecular biologists know what they know. Covers all aspects of gene regulation from transcription to protein modification to explain how 25,000 human genes can make millions of different protein isoforms and mRNA and ncRNA. Mechanisms of molecular clocks and cancer addressed in terms of gene regulation complexity,feedback loops and rate-limiting steps with emphasis on the methods, experimental design,
Prerequisites:(01:694:407 BIOCHEM) OR (01:447:384 GEN ANALY) OR (11:126:481 MOLE GEN) OR (11:115:403 GEN BIOCHEM) OR (01:694:395 BioChem LS)

01:694:495,496 ***Honors Laboratory Research (BA)***
Two-semester-long Honors research project in the laboratory of a faculty member. In the Fall semester, 01:694:495 students are required to attend a seminar each week on writing a thesis and preparing an oral thesis presentation. In the Spring semester, students take 01:694:496 where they complete their Honors thesis and give their oral presentation to their honors committee.

Biotechnology 126 (SEBS)

BIOTECHNOLOGY 126

Degree: B.S.

Director: Paul Meers (paul.meers@rutgers.edu)

Program Website: http://biotech.rutgers.edu

The field of biotechnology has emerged as a major contributor to the advancement of agriculture, medicine, and environmental sciences. Recent developments in biotechnology, particularly molecular biology, promise major improvements in agricultural productivity, breakthroughs in human health care, and new solutions to environmental problems.

The biotechnology curriculum is designed to provide students with fundamental knowledge and laboratory skills in biotechnology, including applied genetics, molecular biology, biochemistry and a firm foundation in biology and the physical sciences. The primary objectives of the program are to broadly educate students for positions in the rapidly developing biotechnology industry and to prepare students for graduate and graduate/professional study in the life sciences. The strong life and physical sciences foundation of the curriculum involves extensive laboratory and coursework and research experience, as well as specializations in the following fields: animal biotechnology, microbial biotechnology, plant biotechnology, bioinformatics, and bioscience policy and management.

Learning Goals

Learning Goals

As a biotechnology major, each student will:

1. be able to describe the basic molecular concepts essential for understanding the field of biotechnology and the applications of biotechnology;
2. demonstrate proficiency in using the tools of biotechnology in an applied laboratory setting;
3. be able to find and read published scientific research in biotechnology and summarize and communicate that research effectively and critically;
4. acquire knowledge of ethical aspects of biotechnology and be able to analyze alternate viewpoints; and
5. learn to work as a team in the laboratory setting or group presentations.

By achieving these goals the student will have the knowledge base, technical proficiency, and communication skills for postbaccalaureate employment in the biotechnology field or for graduate/professional advanced education.

Biotechnology 126 (SEBS)

Entry Requirements for the Major

Entry Requirements for the Major

To take biotechnology (11:126) courses, students must have completed 01:119:115 General Biology and 01:160:161 General Chemistry with grades of C or better and achieved a cumulative grade-point average of 2.0 or higher. Students whose cumulative grade-point average falls below 2.0 will be allowed one semester to restore the average to 2.0 or higher.

Biotechnology 126 (SEBS)

Graduation Requirements for the Major

Graduation Requirements for the Major

For an up-to-date description of biotechnology major requirements, courses, and course sequences please refer to the program webpage at http://biotech.rutgers.edu.

SEBS UNDERGRADUATE CORE CURRICULUM (39 credits)

Contemporary Challenges (6 credits) *Two courses, one in each of the Contemporary Challenges areas: Diversities and Social Inequalities* [CC-D] *and Our Common Future* [CC-O]

Experiential Learning (3 credits) *Students must participate in a certified experience that meets this goal* [EBE]

Natural Sciences (6 credits) *Students must take two courses, one each in two of the following areas: physical, biological, or environmental sciences* [NS]

Historical Analysis (3 credits) *Students must take one course* [HST]

Social Analysis (6 credits) *SEBS students must complete two courses, one in either social/cultural analysis or economic analysis, and one in governmental and regulatory analysis* [SCL]

Arts and Humanities (3 credits) *Students must complete one course* [AH]

Writing and Communication (6 credits) *Students must take 01:355:101 or its equivalent [WC] and one course that fulfills the learning goal, communicate effectively in modes appropriate to a discipline or area of inquiry* [WCD].

Quantitative and Formal Reasoning (6 credits) *Students must take two courses* [QQ; QR]

Major Requirements for All Students Regardless of Matriculation Date

Proficiency in Biotechnology (70-74 credits)

Courses usually taken first year that are prerequisites for many required biotechnology courses (22):

- 01:355:101 Expository Writing (3) - required before or concurrently with General Biology 1
- 01:119:115 General Biology 1 (4) and 01:119:116 General Biology 2 (4)
- 01:119:117 General Biology Laboratory (2)
- 01:160:161 General Chemistry 1 (4) and 01:160:162 General Chemistry 2 (4)
- 01:160:170 Introduction to Experimentation (1)

Further courses for proficiency in biotechnology:

Quantitative Skills (7-8)

- 01:640:135 Calculus 1 (4)
- 01:960:401 Basic Statistics for Research (3)* or 01:640:136 Calculus 2 (4) or 01:960:212 Statistics II (3) (this course has prereqs)

*Basic Statistics for Research 01:960:401 (or equivalent - 01:960:212) required for bioinformatics option (see below)

Computer and information technology competence (3)

- 11:126:383 Nucleotide Sequence Analysis (3)

Professional Ethics (1.5)

- 11:126:111 Ethical and Scientific Challenges in Biotechnology (3)** or with approval,11:126:110 Concepts and Issues in Biotechnology (1.5)

***11:126:111 is certified in SEBS core curriculum categories NS-1 and -2 (natural science) and CCO-2 (contemporary challenges)*

Other biotechnology required courses:

- 01:447:380 Genetics (4) or 11:776:305 Plant Genetics (4) (only for plant biotechnology option)
- 11:680:390 General Microbiology (4)
- 01:750:193-194 Physics for the Sciences (4,4) or equivalent**
- 01:160:307-308 Organic Chemistry (4,4)**
- 11:115:403-404 General Biochemistry (4,3) or equivalent
- 11:115:313 Introductory Biochemistry Laboratory (1)
- 11:126:481 Molecular Genetics (3)
- 11:126:482 Molecular Genetics Laboratory (4)
- 11:126:401 Seminar in Biotechnology (1.5)
- 11:126:427 Methods and Applications in Molecular Biology (4)

**If Basic Statistics for Research is chosen to satisfy the Quantitative Skills requirement, it cannot also be used as an option elective.*

***Physics for the Sciences requires coregistration in a 0-credit laboratory section. If students opt for the 01:750:203-204 General Physics 1 and 2 sequence instead, they must also take a corresponding lab section in 01:750:205 and 206. Students intending to apply to medical or dental school and certain Ph.D. programs should be aware that many professional schools and some graduate schools require two semesters of calculus and 01:160:311 Organic Chemistry Laboratory and a physics laboratory.*

B. OPTIONS (14-18)

General Biotechnology (15-17)

Required Courses
Choose one of the following:
11:067:430 Animal Microtechniques and Tissue Culture (4)
or
11:776:452 Plant Tissue Culture (3)

Choose one of the following courses (3):
01:146:474 Immunology (3)
11:115:421 Biochemistry of Cancer (3)
11:115:422 Biochemical Mechanisms of Toxicology (3)
11:115:436 Molecular Toxicology Lab (3)
11:115:452 Biochemical Separations (3)
11:126:407 Comparative Virology (3)
11:126:484 Tools for Bioinformatic Analysis (3)
11:126:485 Bioinformatics (3)
11:126:486 Analytical Methods in Microbiology (3)

11:680:480 Microbial Genomics (3)
11:776:410 Plants for Bioenergy (3)
11:776:486 Functional Genomics for Research (3)

Electives (9-10)
Three additional electives from the required and elective courses listed in each of the
six biotechnology curriculum options. One to three credits of Research in Biotechnology may be substituted for an equal number of credits of elective work.

Animal Biotechnology (16-17)

Required Courses (7)
Two courses:
11:067:300 Integrative Physiology (3) or
11:067:492 Molecular and Cellular Physiology (3)
11:067:430 Animal Microtechniques and Tissue Culture (4)

Electives (9-10) - Choose from the following courses:
11:067:327 Animal Reproduction (3)
11:067:450 Endocrinology (3)
11:067:492 Molecular and Cellular Physiology (3)
11:126:407 Comparative Virology (3)
11:126:410 Process Biotechnology (3)
11:126:484 Tools for Bioinformatic Analysis (3)
11:126:485 Bioinformatics (3)
11:709:400 Advanced Nutrition I (3)
11:709:401 Advanced Nutrition II (3)
11:146:474 Immunology (3) with or without 01:146:475 Immunology Lab (1)
01:447:451 Genomes (3)
01:447:481 Topics in Human Genetics (3)
01:447:486 Evolutionary Genetics (3)
01:447:495 Cancer (3)
01:694:412 Proteomics and Functional Genomics (3)
01:694:492 Gene Regulation of Cancer and Development (3)
01:960:401 Basic Statistics for Research (3)
11:115:421 Biochemistry of Cancer (3)
11:115:422 Biochemical Mechanisms of Toxicology (3)
11:115:436 Molecular Toxicology Lab (3)
11:115:452 Biochemical Separations (3)
11:776:486 Functional Genomics for Research (3)

One to three additional credits of research in biotechnology may be substituted for an equal number of credits of elective work.

Bioinformatics (17)

Bioinformatics option students should take 01:640:135 Calculus 1 and 01:960:401 Basic Statistics for Research to satisfy their quantitative skills requirement.

Required Courses (17)
01:198:111 Introduction to Computer Science (4) or equivalent
01:198:112 Data Structures (4)
11:126:484 Tools for Bioinformatic Analysis (3) or 11:776:486 Functional Genomics for Research (3)
11:126:485 Bioinformatics (3)

Elective (3)
Choose from the general biotechnology electives or one approved programming course (suggested). Students in the option who would like to take Calculus 2 to meet medical school or graduate school requirements may use that course for this elective.

Bioscience Policy and Management (18)

Required Courses (15)
11:373:121 Principles and Applications of Microeconomics (3)
11:373:231 Introduction to Marketing (3)
11:373:241 Introduction to Management (3)
11:373:403 Innovation and Entrepreneurship (3)
11:373:404 Bioscience Policy (3) or suitable alternative

Electives (3)
One course from **either** of the following areas of concentration:

Business Management Concentration:
11:373:351 Business Finance I (3)
11:373:352 Economics of Futures Markets (3)
11:373:402 Global Marketing (3)
11:373:451 Business Finance II (3)
OR
Bioscience Policy Concentration:
11:373:323 Public Policy toward the Food Industry (3)
11:374:341 Social and Ecological Aspects of Health and Disease (3)
11:373:371 Food Health and Safety Policy (3)

Microbial Biotechnology (15.5-17)

Required courses (7)
11:680:494 Applied Microbiology (4)
and at least one from the list:
11:680:480 Microbial Genetics and Genomics (3)
or

11:680:481 Microbial Physiology (3)
or
11:680:491 Microbial Ecology and Diversity (3)

Electives (8.5-10)
01:146:328 Human Parasitology (3)
01:146:329 Human Parasitology Laboratory (1)
01:146:470 Advanced Cell Biology (3)
01:146:474 Immunology (3)
01:146:475 Laboratory in Immunology (1)
01:447:495 Cancer (3)
11:067:430 Animal Microtechniques and Tissue Culture (4)
11:067:492 Molecular and Cellular Physiology (3)
11:115:452 Biochemical Separations (3)
11:126:407 Comparative Virology (3)
11:126:410 Process Biotechnology (3)
11:126:486 Analytical Methods in Microbiology (4)
11:375:411 Environmental Microbiology (3)
11:400:419 Food Physical Systems (3)
11:400:423 Food Microbiology (3)
11:400:424 Food Microbiology Laboratory (1)
11:680:480 Microbial Genomics (3)
11:680:481 Microbial Physiology (3)
11:680:491 Microbial Ecology and Diversity (3)
11:680:492 Microbial Ecology and Diversity Laboratory (2)
11:126:484 Tools for Bioinformatic Analysis (3)
11:126:485 Bioinformatics (3)
11:776:486 Functional Genomics for Research (3)

One to three additional credits of research in biotechnology may be substituted for an equal number of credits of elective work.

Plant Biotechnology (15-16)

Required courses (6)
11:776:242 Plant Science (3)
11:776:452 Plant Tissue Culture and Engineering (3)

Electives, three courses (9-10):
01:146:470 Advanced Cell Biology (3)
01:694:492 Gene Regulation of Cancer and Development (3)
01:960:401 Basic Statistics for Research (3)
11:115:452 Biochemical Separations (3)
11:126:407 Comparative Virology (3)
11:126:410 Process Biotechnology (3)

11:126:413 Plant Molecular Biology (3)
11:400:419 Food Physical Systems (3)
11:680:486 Analytical Methods in Microbiology (3)
11:680:491 Microbial Ecology and Diversity (3)
11:776:310 Plant Propagation (3)
11:776:312 Medicinal Plants (3)
11:776:406 Plant Physiology (4)
11:776:405 Plant Biosecurity (3)
11:776:406 Plant Breeding (3)
11:776:410 Plants for Bioenergy (3)
11:776:452 Plant Tissue Culture and Engineering (3)
11:776:486 Functional Genomics for Research (3)

One to three additional credits of research in biotechnology may be substituted for an equal number of credits of elective work.

136 Business Analytics and Information Technology (BAIT) (RBS-NB)

136 Business Analytics and Information Technology (BAIT)

Major requirements for students who entered RBS ***prior to the fall 2023 semester***

Business Core

33:010:275 Introduction to Managerial Accounting (3) (prerequisite: 33:010:272)
33:011:300 Business Forum (2)
33:136:370 Management Information Systems OR 33:010:458 Accounting Information Systems (3) (33:010:458 required if double majoring in Accounting, Prerequisite for 33:010:458: 33:010:272)
33:136:385 Statistical Methods in Business (3)
33:136:386 Operations Management (3)
33:140:320 Business Law I (3) OR 33:522:334 Business Ethics (3) (junior or senior year 33:140:320 required if double majoring in Accounting)
33:390:300 Financial Management OR 33:390:310 Financial Management for Finance Majors (3) (33:390:310 required if double majoring in Finance)
33:620:301 Introduction to Management (3)
33:620:302 Management Skills (3)
33:620:492 Business Policy and Strategy (3) (prerequisites: 33:390:300 or 33:390:310, 33:620:301, 33:630:301, and senior year)
33:630:301 Introduction to Marketing (3)
33:799:301 Introduction to Supply Chain Management (3)

Required BAIT Courses

33:136:388 Foundations of Business Programming (3)
33:136:485 Time Series Modeling for Business (3) (prerequisite: 33:136:385)
33:136:470 Business Data Management (3) (prerequisites: 33:136:370 or 33:010:458; and 33:136:388)
33:136:400 Business Decision Analytics under Uncertainty (3) (prerequisite: 33:136:386)

Three BAIT electives (9), 3 credits of which must be from the Department of Management Science and Information Systems (136).

There are two introductory Finance courses that can fulfill a business core requirement. If you intend to double major in Finance or declare a Finance concentration you will need to take Financial Management for Finance Majors (33:390:310). You can take Financial Management (33:390:300) if you have no intention of majoring in Finance or declaring a Finance Concentration. Credit will not be given for both courses if you take both due to switching to a Finance major/declaring a Finance concentration at a later date.

If you major in Accounting as your first, second, or third major, you are required to take 33:010:458 Accounting Information System and 33:140:320 Business Law I. You will not earn credit for taking 33:136:370 Management Information System. You can earn credit towards graduation if you take 33:522:334 Business Ethics but it will not fulfill a major requirement.

Students with more than one Business School major may only double count one RBS course between those majors.

Major requirements for students who entered RBS *in the fall 2024 semester or later:* **Business Core**

33:010:275 Introduction to Managerial Accounting (3) (prerequisite: 33:010:272)
33:011:301 Foundations for Your Career Journey (1)
33:011:302 Building Your Brand (1) (prerequisite: 33:011:301)
33:011:303 Conquering Your Transition (1) prerequisite: 33:011:302)
33:136:370 Management Information Systems OR 33:010:458 Accounting Information Systems (3) (33:010:458 required if double majoring in Accounting, Prerequisite for 33:010:458: 33:010:272)
33:136:385 Statistical Methods in Business (3)
33:136:386 Operations Management (3)
33:140:320 Business Law I (3) OR 33:522:334 Business Ethics (3) (33:140:320 required if double majoring in Accounting)
33:390:300 Financial Management (3)
33:620:301 Introduction to Management (3)
33:620:302 Management Skills (3)
33:620:492 Business Policy and Strategy (3) (prerequisites: 33:390:300 or 33:390:310, 33:620:301, 33:630:301, and senior year)
33:630:301 Introduction to Marketing (3)
33:799:301 Introduction to Supply Chain Management (3)

Required BAIT Courses

33:136:388 Foundations of Business Programming (3)
33:136:485 Time Series Modeling for Business (3) (prerequisite: 33:136:385)
33:136:470 Business Data Management (3) (prerequisites: 33:136:370 or 33:010:458; and 33:136:388)
33:136:400 Business Decision Analytics under Uncertainty (3) (prerequisite: 33:136:386)

Three BAIT electives (9), 3 credits of which must be from the Department of Management Science and Information Systems (136).

A grade of B or better is required to take any additional Finance department courses beyond 33:390:300 Financial Management.

If you major in Accounting as your first, second, or third major, you are required to take 33:010:458 Accounting Information System and 33:140:320 Business Law I. You will not earn credit for taking 33:136:370 Management Information System. You can earn credit towards graduation if you take 33:522:334 Business Ethics but it will not fulfill a major requirement.

Students with more than one Business School major may only double count one RBS course between those majors.

Programs of Study: Majors and Minors (RBS-NB)

PROGRAMS OF STUDY: MAJORS AND MINORS

The business studies program is only part of the student's academic program. Students will complement their professional education with coursework in the humanities, mathematics, natural sciences, and social and behavioral sciences. In order to design an integrated academic program, full-time students should plan their program over four years. During the first three semesters, the student should formulate a schedule that is comprised of the six prerequisite courses and liberal arts core curriculum requirements. During the remaining five semesters, the schedule focuses on completing the remaining credits required of the business major. Students should also plan to take additional general elective credits to ensure that their total degree credits equals 120, the number of credits needed for the bachelor of science degree. Business majors should consult with a Rutgers Business School: Undergraduate-New Brunswick advisor when they are planning their academic program.

The following are prerequisite courses that students must complete during their first three (four at most) semesters and before they are eligible to take additional business courses:

Prerequisite Courses (19 credits)
01:198:170 Computer Applications for Business (3)
01:220:102 Introduction to Microeconomics (3)
01:220:103 Introduction to Macroeconomics (3)
01:640:135 Calculus I (4)
01:960:285 Introductory Statistics for Business (3)
33:010:272 Introduction to Financial Accounting (3)

Liberal Arts Core Curriculum Requirements (minimum 27 credits)
In addition to the six eligibility courses and courses that are required for the major, all Rutgers Business School: Undergraduate-New Brunswick students must complete the following liberal arts core curriculum requirements:

1) Contemporary Challenges (two courses)
2) Areas of Inquiry (six courses)
3) Cognitive Skills and Processes (five courses).
All courses must be at least 3 credits and must be taken for degree credit. Pass/no credit courses may not be used to fulfill these requirements. Students should see Degree Navigator for specific courses and conditions.

Major Requirements (56-62 credits)
The major requirements for Rutgers Business School: Undergraduate-New Brunswick programs of study can be divided into two parts: business core course requirements that all students must complete regardless of their choice of major program (accounting, business analytics and information technology, finance, leadership and management, marketing, or supply chain management), and a combination of required and elective courses that students take according to their choice of major. Students must complete the requirements of the major that are in effect at the time of their admission into the major. All core courses and required courses specific to the major must be completed with a grade of C or better.

- 010 Accounting
- 136 Business Analytics and Information Technology (BAIT)
- 390 Finance
- 605 Leadership and Management
- 630 Marketing
- 799 Supply Chain Management
- 135 Business Administration Minor
- 382 Entrepreneurship Minor

Life Sciences (SAS)

LIFE SCIENCES

Division of Life Sciences, School of Arts and Sciences

Website: http://lifesci.rutgers.edu

Dean: Lori R. Covey

Director, Office of Undergraduate Instruction: Martha Haviland

Chair, Department of Cell Biology and Neuroscience: Megerditch Kiledjian

Chair, Department of Genetics: Tara C. Matise

Chair, Department of Kinesiology and Health: Brandon Alderman

Chair, Department of Molecular Biology and Biochemistry: Barth Grant

The following majors are available in the Division of Life Sciences:

Biological Sciences 119
Cell Biology and Neuroscience 146
Exercise Science 377
Genetics 447
Molecular Biology and Biochemistry 694
Sport Management 955

Students interested in the life sciences also may consider related tracks within major programs offered by the Department of Chemistry and Chemical Biology (chemical biology option) and the Department of Psychology (specialization in behavioral neuroscience).

The Division of Life Sciences coordinates, fosters, and integrates the instructional and research activities of a broad range of faculty with interests in the biological sciences. The principal units of the division include four departments: Cell Biology and Neuroscience, Genetics, Kinesiology and Health, and Molecular Biology and Biochemistry, as well as two sections, the biological chemistry section of the Department of Chemistry and Chemical Biology, and the biopsychology and behavioral neuroscience section of the Department of Psychology. The division's primary goal is to provide a high caliber of interdisciplinary teaching and research in the life sciences as it trains the next generation of teachers, researchers, and future health professionals.

Instruction in the life sciences has undergone enormous changes over the past 15 to 20 years. These changes reflect the intellectual revolution of the last two decades, as well as technical advances that have expanded greatly the tools available to life scientists. Today, students majoring in the life sciences at Rutgers University-New Brunswick experience an exciting atmosphere of learning that exposes them to the concepts and methods of these intellectual and technological advances. The students have open to them a plethora of learning avenues, ranging from thought-provoking lecture presentations to original and cutting-edge research opportunities in state-of-the-art laboratories. A first-class faculty and modern laboratory equipment reflect the division's commitment to provide its students with the best learning environment.

The division offers a wide spectrum of majors for students interested in the life sciences. These options range from a division-based major in biological sciences, designed to provide a general life sciences education, to department-based majors in cell biology and neuroscience, exercise science, genetics, molecular biology and biochemistry, and sport management aimed at providing specialized training, with a strong emphasis on research. Graduates of the division will be highly competitive for a range of postbaccalaureate opportunities, including graduate education and research, health-professions training, and biomedical and biotechnological research positions, as well as teaching careers in the sciences.

The first two years of the student's tenure at Rutgers is expected to revolve around the life sciences core curriculum, a series of basic offerings designed to provide the general background required for pursuing upper-division courses in any of the individual majors. Regardless of the major chosen, students are encouraged to participate in independent study within a research laboratory in order to take advantage of the rich expertise of the many life sciences faculty in New Brunswick and Piscataway. The exercise science and the sport management majors require an internship experience. The division also has a highly developed advising system, with dedicated and knowledgeable faculty advisers available to work with individual students in their selection of courses, completion of major requirements, and preparation for future careers.

Students may not major in more than one of the following majors in the Division of Life Sciences: Biological Sciences (119), Cell Biology and Neuroscience (146), Exercise Science (377), Genetics (447), Molecular Biology and Biochemistry (694), or Sport Management (955). Furthermore, students majoring in one of these four majors may not minor in Biological Sciences (119). Life science majors or minors may not be combined as double majors or as major/minors with Biomathematics (122), Biochemistry (115), or Microbiology (680).

No more than 16 credits from among the life science courses required for completion of any Division of Life Sciences major may be fulfilled by credits transferred from any school outside of Rutgers-New Brunswick.

For additional information and announcements about the Division of Life Sciences, please visit the division's website.

Life Sciences (SAS)

Life Sciences Core Curriculum

Life Sciences Core Curriculum

The life sciences core curriculum is a set of courses that include a series of introductory- and intermediate-level courses in the physical and life sciences forming a foundation of knowledge necessary to understand modern biology and to prepare for the more advanced courses required for each major. Following are core courses:

1. 01:119:115-116 General Biology (4,4)

2. 01:119:117 Biological Research Laboratory (2)

3. 01:160:161-162 General Chemistry (4,4) or 01:160:163-164 Honors General Chemistry (4,4) or 01:160:165-166 Extended General Chemistry (4,4)

4. 01:160:171 Introduction to Experimentation (1)

5. 01:160:307-308 Organic Chemistry (4,4) or 01:160:315-316 Honors Organic Chemistry (4,4)

6. 01:160:311 Organic Chemistry Laboratory (2)

7. 01:750:203-204 General Physics (3,3) or 01:750:271-272 Honors Physics (3,3)*

8. 01:750:205-206 General Physics Laboratory (1,1)*

9. 01:640:135,136 Calculus for the Life and Social Sciences (4,4) or 01:640:151-152 Calculus for Mathematical and Physical Sciences (4,4)**

10. 01:447:380 Genetics (4)***.

*01:750:193-194 (4,4) or 01:750:201-202 (5,5) may be substituted for 01:750:203-204 (3,3) plus 01:750:205-206 (1,1).

**Basic Statistics for Research (01:960:401, 3 credits), Basic Probability and Statistics (01:960:379, 3 credits), or Statistics I and II (01:960:211 and 212) may be substituted for the second semester of Calculus.

***Students majoring in genetics must take 01:447:384-385 (4,4) instead of 01:447:380

Life Sciences (SAS)

Learning Goals

Learning Goals

Our overarching goal for educating our students majoring in biological sciences is to inspire them to want to discover and understand the natural world. In the process of achieving this goal, we expect our students to acquire not only facts and concepts, but also skills and perspectives. We hope that our learning goals will both prepare our students for a variety of career objectives and supply them with the tools to become lifelong learners in the ever-evolving world of biological sciences.

Learning Goals:

I. To acquire the appropriate factual and conceptual knowledge that provides students with a foundation to further their education and career in the areas of life science or health science. Students will be able to demonstrate basic knowledge (e.g., identify, define, explain, etc.) of the concepts, practices, and principles that comprise the biological sciences.

II. To develop data analysis and statistical reasoning skills that prepare students for a society increasingly reliant on the use of data and information. Students will be able to interpret/evaluate patterns in data presented in tables, figures, and graphs, as well as be able to organize, summarize, and present data.

III. To develop the ability to use scientific reasoning as embodied by the structured process commonly known as the scientific method to empower students with the ability to generate and refine knowledge. Students will be able to evaluate and apply the practice of science.

IV. To develop critical thinking and problem-solving skills necessary to prepare students to evaluate, synthesize, and generate knowledge that provides them with a competitive advantage to adapt to an evolving, global, and knowledge-based society. Students will be able to demonstrate application of higher-order thinking (e.g., classify, diagnose, evaluate, synthesize, hypothesize, etc.). Students will develop an understanding of not only the connections within biology, but also the connections between biology and other scientific disciplines.

Life Sciences (SAS)

Entry Requirements of the Major

Entry Requirements of the Major

Students wishing to major in biological sciences must have completed two semesters of General Biology and Biological Research Laboratory with a grade of C or better in each course. Both semesters of General Biology must have been completed at the same institution or on the same campus at Rutgers. No more than two courses with a grade of D may be used to fulfill the requirements of the major. A 2.0 grade-point average must be maintained in the life sciences core and elective courses applied toward the major. Students must meet with an adviser before they can successfully declare their major.

Life Sciences (SAS)

Major Requirements

Major Requirements

The program in biological sciences, administered through the Division of Life Sciences Office of Undergraduate Instruction, is intended to provide a broad and comprehensive training in modern biology. This course of study is recommended for those who wish to study biology as part of their liberal arts education, preparing them for a career in one of the health professions, graduate studies in biology, a teaching career in secondary schools (courses in education also are required), as well as employment in various areas of the life sciences. If a student wishes to concentrate his or her studies in a specific area of biology, he or she should consider a major offered by one of the departments in the Division of Life Sciences or in the School of Environmental and Biological Sciences. Faculty advisers are available to assist each student with course selection and program requirements.

A minimum of 20 credits of coursework from among general biology, genetics, and life sciences electives must be completed in residence. In other words, no more than 16 credits in this part of the major requirements may be transferred from any institution outside of Rutgers University-New Brunswick. This rule is intended to assure that students receiving degrees from Rutgers-New Brunswick have taken a minimum number of courses in their major with this faculty. Please keep in mind that although a course may transfer from another institution into one of the Rutgers-New Brunswick schools, it will not necessarily be accepted toward the major in biological sciences. Therefore, all transfer courses must be evaluated and accepted by the advising office of the Office of Undergraduate Instruction in order to count toward the major. As indicated earlier, students must complete both semesters of general biology at the same institution or on the same campus of Rutgers before becoming eligible to declare the biological sciences major. Any life sciences courses applied to the major in biological sciences should be taken within 10 years of graduating. Returning students must meet with their adviser to discuss their path to graduation. Credits for cooperative education and Winter Session courses (exceeding 1 credit) may not be used to satisfy requirements for the major in biological sciences. To be applied to the major, Summer Session courses must be offered over a minimum of five weeks. Online courses will be reviewed on a case-by-case basis to confirm that they meet departmental learning goals before they may be used to satisfy the requirements for the major.

The course requirements for the biological sciences major are divided into two sections: the life sciences core courses and the life sciences electives.

Required Life Sciences Core Courses (47 credits)

01:119:115-116 General Biology I,II (4,4)
01:119:117 Biological Research Laboratory (2)
01:160:161-162 General Chemistry (4,4) or 01:160:163-164 Honors General Chemistry (4,4) or 01:160:165-166 Extended General Chemistry (4,4)
01:160:171 Introduction to Experimentation (1)
01:160:307-308 Organic Chemistry (4,4) or 01:160:315-316 Honors Organic Chemistry (4,4)*
01:160:311 Organic Chemistry Laboratory (2)
01:750:203-204 General Physics (3,3) or 01:750:271-272 Honors Physics***
01:750:205-206 General Physics Laboratory (1,1)***
01:640:135,~~138~~136 Calculus for the Life and Social Sciences (4,4)** or 01:640:151-152 Calculus for Mathematical and Physical Sciences (4,4)
01:447:380 Genetics (4)
* With approval from a Biological Sciences Advisor, 01:160:308/316 may be replaced by another elective course. Please meet with an Advisor to discuss.

**01:750:193-194 (4,4) or 01:750:201-202 (5,5) may be substituted for 01:750:203-204 (3,3) plus 01:750:205-206 (1,1).
***Calculus II 01:640:13~~8~~6(4) may be substituted by 01:960:379 Basic Probability and Statistics (3), 01:960:401 Basic Statistics for Research (3), or 01:960:211-212 Statistics I,II (3,3).

Life Sciences Electives (24 credits)

It is highly recommended that students meet with a life sciences adviser in the Division of Life Sciences Office of Undergraduate Instruction when planning their elective courses. It is important that the courses taken complement each other as much as possible and are not merely a collection of unrelated topics.

The electives must include at least three laboratory courses, only one of which may be satisfied by research work. Biological Research Laboratory and "library research" do not qualify for this requirement. A minimum of six courses (18 credits) must be at the 300 or 400 level, including at least three separate laboratory courses or three courses with a laboratory component. The laboratory associated with genetics (01:447:382 or equivalent), if taken, may be used to satisfy one of the three laboratory requirements.

No course at the 100 level may be used to satisfy the life sciences elective requirements. A maximum of 6 credits of independent study/research/honors research may be used toward the 24 elective credits. Please keep in mind that a minimum grade-point average of 2.8 is required to enroll in an independent study/research course in biological sciences. Research courses can satisfy only one of the three laboratory requirements, regardless of number of credits. Courses taken on a pass/fail basis may not be used to satisfy requirements for the major in biological sciences. A grade-point average of 2.0 or better in courses credited toward the major is required. No more than two courses with a grade of D may be used to fulfill the requirements of the major.

The elective courses must include at least one course (3 or 4 credits) each from the Departments of Cell Biology and Neuroscience 146, Genetics 447, Molecular Biology and Biochemistry 694, and Ecology, Evolution, and Natural Resources 11:216 at the School of Environmental and Biological Sciences. A list of approved courses in subject areas in addition to those in the Division of Life Sciences (Biological Sciences 119, Cell Biology and Neuroscience 146, Genetics 447, and Molecular Biology and Biochemistry 694) will be published by the advising office of the Office of Undergraduate Instruction. It is strongly recommended that students consult this list, which is available

on the website, prior to registering for their courses. Generally, acceptable courses from other departments on any campus of Rutgers University have a year of general biology as a prerequisite; however, there are exceptions. It is imperative for students to consult the published list and meet with an adviser. Credits from cooperative education and Winter Session courses (exceeding 1 credit) may not be used to satisfy requirements for the major in biological sciences. To be applied to the major, Summer Session courses must be offered over a minimum of five weeksIf double majoring with another permitted life sciences major, at least four of the 3-4 credit life science courses applied to the Biology major may not overlap with courses used to fulfill second major requirements. Given that biological sciences is a dynamic and developing field, it is critical that coursework applied to the major must be current. Thus, any life sciences courses applied to the major in biological sciences should be taken within 10 years of graduating. Returning students must meet with their adviser to discuss their path to graduation.

Life Sciences (SAS)

Minor Requirements

Minor Requirements

The minor requires four courses of at least 3 credits each in life sciences subjects as well as General Biology and Biological Research Laboratory. Both semesters of General Biology must be completed at the same institution or on the same campus at Rutgers. No other course at the 100 level may be used to satisfy the minor. A minimum of 11 credits must be taken at Rutgers University-New Brunswick. A maximum of 3 credits of research in a life sciences subject may be used toward the minor. A minimum of three courses at the 300 level or above is required. If majoring in a permitted life sciences major, no more than two of the four life science courses applied to the minor requirements may overlap with courses used to fulfill major requirements. Only life sciences courses acceptable for the biological sciences major may be used for the minor. Courses in chemistry, mathematics, or physics do not count toward the minor. A grade-point average of 2.0 or better in courses credited toward the minor is required. No more than one course with a grade of D may be used to fulfill the requirements of the minor.

Life Sciences (SAS)

Independent Study and Research in Biology

Independent Study and Research in Biology

A minimum cumulative grade-point average of 2.8 is required for a student to register for an independent study/research course in biological sciences. A maximum of 6 credits of laboratory-based independent study, research, or honors projects may be used to fulfill the elective credits requirement in biology. The independent study/research form, available from the advising office of the Office of Undergraduate Instruction, must be completed and signed by the professor in whose laboratory the student will study prior to initiating the research project. Approval of a research proposal by the director of advising and a special permission number from the Office of Undergraduate Instruction is necessary for registration. Students may not earn academic credit for laboratory projects for which they are being paid. Students wishing to apply research credits from other departments toward the major in biological sciences must get approval from the advising office of the Office of Undergraduate Instruction, Division of Life Sciences, prior to beginning their research project.

Life Sciences (SAS)

Departmental Honors Program

Departmental Honors Program

To qualify, a student must have a cumulative grade-point average of 3.0 or better and an average of 3.4 or better in life sciences core and elective courses credited toward the biological sciences major at the end of the junior year and previous research experience. At that time, the student should apply formally to the advising office of the Office of Undergraduate Instruction. Accepted students are expected to complete at least 6 credits over two semesters in an independent research project, resulting in a thesis, and to pass an oral examination before a faculty committee in the general field of the student's program of emphasis. If the research is done in a laboratory outside of the Division of Life Sciences, the examination committee must include at least one individual from the Division of Life Sciences faculty. Departmental Honors is completed in the fall and spring of senior year. Students accepted into special programs (e.g. BA/MD) may complete honors during junior year.

Honors students must register either for an honors course sequence in life sciences or for a course sequence in a school honors program. These decisions should be discussed with an adviser. An approval form (available in the advising office) must be completed.

Life Sciences (SAS)

Joint B.A./M.D. Program (Rutgers Undergraduate-Robert Wood Johnson Medical School)

Joint B.A./M.D. Program (Rutgers Undergraduate-Robert Wood Johnson Medical School)

Rutgers Undergraduate/Robert Wood Johnson Medical School Joint Bachelor of Arts/Medical Degree (B.A./M.D.) Program

This program is designed for high-achieving premedical students of Rutgers University who are in their sophomore year. Specially selected students will obtain bachelor's and medical degrees in a seven-year program of study taken at Rutgers undergraduate units and Robert Wood Johnson Medical School (RWJMS).

Application to this program is open to all undergraduate students enrolled at Rutgers University, New Brunswick. It is not directly associated with any one school within the university but see below for specific restrictions.

Admission is a two-stage and highly competitive process. In the first stage, undergraduate students are admitted into the program by an executive committee consisting of faculty from the appropriate units. Eligible applicants are sophomores at any of the undergraduate schools of Rutgers University who have spent at least a year here. Prospective applicants from Rutgers University-Newark and Rutgers University-Camden must transfer to one of the units in New Brunswick for their sophomore year and complete at least 30 credits here. All applicants must have completed 4 semesters of college with a minimum of 60 credits. Applicants with an Associate¿s Degree, regardless of whether it was earned as a dual degree in high school or as a traditional degree after high school,

are ineligible to apply for the program. Admitted students will need to complete all of the core requirements of their undergraduate unit and major requirements with the exception of Biological Sciences and Cell Biology and Neuroscience majors, who may apply credit from the first professional year toward the major requirements. During the fourth year, students will be full time at the medical school and elective credits will count towards the undergraduate degree. The executive committee reviews applications and selects those students who are deemed most qualified for the program. The second stage occurs typically after the fourth year of study. It is the responsibility of the RWJMS Admissions Committee to review the credentials of students recommended by the Joint Program Executive Committee. Students who are deemed to have met the academic and nonacademic standards of the program will be recommended to the RWJMS Admissions Committee. The purpose of this second, noncompetitive review is to ascertain that the student has maintained adequate academic and nonacademic qualities appropriate for retention in the medical school. It is expected that students will have grades of A or B (Honors or High Pass) in courses taken at both universities. However, recommendation is not automatic. The final decision rests with the RWJMS Admissions Committee. Upon approval by this admissions committee, the student will be permitted to continue into the fifth year of study and will be matriculated formally as a candidate for the M.D. degree at RWJMS.

Applicants to the B.A./M.D. program must be in their fourth semester at Rutgers University. Applications are available in the Health Professions Office after spring break; they are due by the end of May. There is no rolling admissions policy. Decisions are expected to be made in July. By the end of the semester of application, applicants must have completed a minimum of 60 credits of which at least 30 credits must be at Rutgers, and they must have been in attendance at Rutgers, New Brunswick a minimum of one year. Additionally, applicants must have a minimum cumulative and science grade-point average of 3.5 by the end of the third semester and sustain it through the end of the fourth. The applicant must have completed, or be in the process of completing by the end of the fourth semester, two semesters of biology with lab, two semesters of general chemistry with lab, two semesters of organic chemistry, one semester of college-level mathematics, and one semester of English. Applicants who have not taken General Biology I and II and lab at Rutgers University, either because they have been awarded advanced placement biology credits or because they have transferred equivalent courses from another institution, must have at least one year of upper-division biology courses at Rutgers-New Brunswick (i.e., two courses of at least 3 or more credits each at the 200 level or higher). Those students who are admitted to the program without having two semesters of physics, two semesters of English, and organic chemistry lab must complete these requirements by the end of the third year of study. Students who did not take the SAT or ACT but who are admitted to the program will be required to take the MCAT by April of the junior year and score competitively with a total score of at least 508 (minimum single sub score of 123). An application form has been developed that allows the student to provide the executive committee with information it deems useful for its deliberations.

The bachelor's degree will be awarded upon completion of the undergraduate college and major requirements, by the end of year four. Upon satisfactory completion of year seven and all RWJMS requirements, the student will receive the medical degree.

Students who wish to pursue a major other than biological sciences must discuss their plans with the appropriate department in order to establish the requirements they need to complete for their major. For a student at Rutgers-New Brunswick who has elected to major in biological sciences, 15 credits from RWJMS will be applied toward the major (as stipulated below). The baccalaureate degree will be awarded upon completion of the undergraduate college requirements and major requirements, usually by the end of year four. The number of credits, however, is not directly translated between the two universities; no more than 4 credits per laboratory course and 3 credits per non-laboratory course taken at RWJMS may be used toward the bachelor's degree at Rutgers.

A student enrolled in the program completing a major in biological sciences at Rutgers-New Brunswick is required to complete remaining Life Science Core Curriculum coursework and Intro to Biochemistry (01:694:301) and three approved life sciences electives (3- or 4-credit courses) at Rutgers-New Brunswick. Students who have not taken General Biology I and II at Rutgers, either because they have been awarded AP biology credit or because they have transferred equivalent courses from another institution, must complete an additional approved life sciences electives (3- or 4-credit courses) at Rutgers-New Brunswick.

Students in the program must meet with advisers at the medical school and at their undergraduate school when planning their elective courses. No more than one independent study/research course may be applied toward the biological sciences major for students in the B.A./M.D. program. Please be sure to meet with a biological sciences adviser when selecting life science elective courses because not all course combinations are allowed given overlap in subject matter taught at Rutgers' undergraduate units and RWJMS.

For further information on this program, you may contact the Division of Life Sciences, Health Professions Office, Nelson Biological Laboratories, 604 Allison Road, Piscataway, NJ 08854-8082, at 848-445-5667.

Life Sciences (SAS)

Joint B.A./M.D. Program (Rutgers Undergraduate-New Jersey Medical School)

Joint B.A./M.D. Program (Rutgers Undergraduate-New Jersey Medical School)

Rutgers Undergraduate/New Jersey Medical School Joint Bachelor of Arts/Medical Degree (B.A./M.D.) Program

The Rutgers Undergraduate/New Jersey Medical School joint program started in the fall of 2003. The purpose of the program is to permit students to begin their medical education after their third year or at least 96 degree credits at Rutgers. Specially selected students will obtain bachelor's and medical degrees in a seven-year program of study taken at Rutgers undergraduate units and New Jersey Medical School (NJMS).

This program is only open to students enrolled in Rutgers University-New Brunswick schools.

Admission is a two-phase and highly competitive process. In the first phase, undergraduate students are admitted into the program by the Joint Program Executive Committee consisting of faculty from the appropriate units. Eligible applicants are sophomores at any of the undergraduate schools at the New Brunswick location of Rutgers University who have been enrolled here for at least one year. The executive committee reviews applications and selects those students who are deemed most qualified for the program. The second phase occurs typically after the third year of study. It is the responsibility of the NJMS Admissions Committee to review the credentials of students recommended by the Joint Program Executive Committee. The purpose of this second review is to ascertain that the student has maintained adequate academic and nonacademic qualities appropriate for retention in the medical school. It is expected that students will have grades of A or B in courses taken at Rutgers. Students must complete the Medical College Admission Test (MCAT) by January of the junior year before matriculating at NJMS and be required to be in the competitive range of other accepted NJMS students. This second review is noncompetitive. Students who are deemed to have met the academic and nonacademic standards of the program will be recommended to the NJMS Admissions Committee. However, recommendation is not automatic. The final decision

rests with the Medical School Admissions Committee. Upon approval by the Medical School Admissions Committee, the student will be permitted to continue into the next year of study and will be matriculated formally as a candidate for the M.D. degree at the New Jersey Medical School.

Applicants for the program must be in their fourth semester at Rutgers-New Brunswick. Applications are available in the Health Professions Office after spring break; they are due by the end of May. There is no rolling admissions policy. Decisions are expected to be made in July. By the end of the semester of application, applicants must have completed a minimum of 60 credits of which at least 30 credits must be at Rutgers, and they must have been in attendance at Rutgers a minimum of one year. Additionally, applicants must have a minimum cumulative and science grade-point average of 3.5 by the end of the third semester which must be maintained through the end of the fourth. The applicant must have completed, or be in the process of completing by the end of the fourth semester, two semesters of biology with lab, two semesters of general chemistry with lab, two semesters of organic chemistry, one semester of college-level mathematics, and one semester of English. Applicants who have not taken General Biology I and II and lab at Rutgers, either because they have been awarded advanced placement biology credits or because they have transferred equivalent courses from another institution, must have at least one year of upper-division biology courses at Rutgers (i.e., two courses of at least 3 or more credits each at the 200 level or higher). Those students who are admitted to the program without having two semesters of physics, organic chemistry lab, and two semesters of English must complete these requirements by the end of the third year of study. An application form has been developed that allows the student to provide the committee with information the committee deems useful for its deliberations.

Students will be admitted at the end of the spring semester of year two and be formal members of the program beginning with year three. Prior to leaving the Rutgers undergraduate unit, students must satisfy all college and major requirements, except for the credits which they will receive from NJMS (please see next paragraph). For a student at Rutgers-New Brunswick who has elected to major in biological sciences, 15 credits from NJMS will be applied toward the major.

The baccalaureate degree will be awarded upon completion of the undergraduate college requirements and major requirements by the end of year four. Upon satisfactory completion of year seven or eight, as well as all New Jersey Medical School requirements, the student will receive the medical degree.

A student enrolled in the program completing a major in biological sciences at Rutgers-New Brunswick is required to complete remaining Life Science Core Curriculum coursework and three approved life sciences electives (3- or 4-credit courses) at Rutgers-New Brunswick. Students who have not taken General Biology I and II at Rutgers, either because they have been awarded AP biology credit or because they have transferred equivalent courses from another institution, must take Genetics 01:447:380, and four approved life sciences electives (3- or 4-credit courses) at Rutgers-New Brunswick. No more than one independent study/research course may be applied toward the biological sciences major for students in the B.A./M.D. program. Please be sure to meet with a biological sciences adviser when selecting life science elective courses because not all course combinations are allowed given overlap in subject matter taught at Rutgers and NJMS.

For further information on this program, you may contact the Division of Life Sciences, Health Professions Office, Nelson Biological Laboratories, 604 Allison Road, Piscataway, NJ 08854-8082, at 848-445-5667.

Joint B.A./D.M.D. Program (Rutgers School of Arts and Sciences-Rutgers School of Dental Medicine)

Joint B.A./D.M.D. Program (Rutgers School of Arts and Sciences-Rutgers School of Dental Medicine)

Rutgers School of Arts and Sciences/Rutgers School of Dental Medicine Joint Bachelor of Arts/Doctor of Medicine in Dentistry (B.A./D.M.D.) Program

Rutgers School of Arts and Sciences/Rutgers School of Dental Medicine joint program started in the spring of 2002. The purpose of the program is to permit students to begin their dental education after their third year or at least 98 credits at Rutgers. Specially selected students will obtain bachelor's and dental degrees in a seven-year program of study taken at Rutgers undergraduate units and Rutgers School of Dental Medicine.

This program is open to students enrolled at the School of Arts and Sciences, Rutgers University-New Brunswick. The program is administered by the Health Professions Office.

Admission is a two-phase and competitive process. In the first phase, undergraduate students are admitted into the program by the Executive Committee of the Joint Program consisting of faculty from the appropriate units. The executive committee reviews applications and selects those students who are deemed most qualified for the program. The second phase occurs typically after the third year of study. It is the responsibility of the Rutgers School of Dental Medicine Admissions Committee to review the credentials of students recommended by the articulated program executive committee. The purpose of this second review is to ascertain that the student has maintained adequate academic and nonacademic qualities appropriate for admission to the dental school. It is expected that students will have grades of A or B in courses taken at Rutgers University. Students must complete the Dental Admissions Test (DAT) and earn scores of 20 or better in Total Science, Academic Average, Organic Chemistry, General Chemistry, and Biology. Students may only take the DAT one time to qualify for this program. The second review is noncompetitive. Students who are deemed to have met the academic and nonacademic standards of the program will be recommended to the Rutgers School of Dental Medicine Admissions Committee. However, recommendation is not automatic. The final decision rests with the Dental School Admissions Committee. Upon approval by the Dental School Admissions Committee, the student will be permitted to continue into the next year of study and will be matriculated formally as a candidate for the Doctor of Medicine in Dentistry (D.M.D.) degree at the Rutgers School of Dental Medicine.

Applicants to the program must be in their fourth semester at the School of Arts and Sciences, Rutgers-New Brunswick. Applications are available in the Health Professions Office after spring break; they are due by the end of May. There is no rolling admissions policy. Decisions are expected to be made in July. By the end of the semester of application, applicants must have completed a minimum of 60 credits of which at least 30 credits must be at Rutgers, and they must have been in attendance at the School of Arts and Sciences, Rutgers-New Brunswick a minimum of one year. Additionally, applicants must have a minimum cumulative and science grade-point average of 3.5 by the end of the third semester, which must be maintained through the end of the fourth. The applicant must have completed, or be in the process of completing by the end of the fourth semester, two semesters of biology with lab, two semesters of general chemistry with lab, two semesters of organic chemistry, two semesters of college-level mathematics (Calc I and either Calc II or an approved Statistics course) and one semester of English. Applicants who have not taken General Biology I and II and lab at Rutgers, either because they have been awarded

advanced placement biology credits or because they have transferred equivalent courses from another institution, must have at least one year of upper-division biology courses at Rutgers (i.e., two courses of at least 3 or more credits each at the 200 level or higher). If AP credit was granted for general chemistry, then organic chemistry I and II and laboratory and a course in biochemistry at Rutgers are required. If AP credit was granted for English, upper level English at Rutgers is required with the same amount of credit work. If AP credit was granted for physics, two approved courses from Physics or Kinesiology & Health at Rutgers are required. Those students who are admitted to the program without having two semesters of physics, biochemistry, organic chemistry lab, and two semesters of English, must complete these requirements by the end of the third year of study.

The B.A./D.M.D. program is a seven-year program with year one being the first undergraduate year. Students will be admitted at the end of the spring semester of year two and be formal members of the articulated program beginning with year three. Prior to leaving the School of Arts and Sciences, Rutgers-New Brunswick, students must satisfy all college and major requirements, except for the credits which they will receive from Rutgers School of Dental Medicine (please see below). For a student at the School of Arts and Sciences, Rutgers-New Brunswick who has elected to major in biological sciences, 15 credits from Rutgers School of Dental Medicine will be applied toward the major.

The baccalaureate degree will be awarded upon completion of the general education and major requirements by end of year four. Upon satisfactory completion of year seven or eight, as well as all Rutgers School of Dental Medicine requirements, the student will receive the dental degree.

A student enrolled in the joint program completing a major in biological sciences at Rutgers-New Brunswick is required to complete any remaining Life Sciences Core Curriculum coursework and three approved life sciences electives (3- or 4-credit courses) at Rutgers-New Brunswick. Students who have not taken General Biology I and II at Rutgers-New Brunswick, either because they have been awarded AP biology credit or because they have transferred equivalent courses from another institution, must take Genetics 01:447:380, and four approved life sciences electives (3- or 4-credit courses) at Rutgers-New Brunswick. No more than one independent study/ research course may be applied toward the biological sciences major for students in the B.A./D.M.D. program. Please be sure to meet with a biological sciences adviser when selecting life science elective courses because not all course combinations are allowed given overlap in subject matter taught at Rutgers-New Brunswick and Rutgers School of Dental Medicine.

For further information on this program, you may contact the Division of Life Sciences, Health Professions Office, Nelson Biological Laboratories, 604 Allison Road, Piscataway, NJ 08854-8082, at 848-445-5667.

Life Sciences (SAS)

Joint B.A./M.S. Physician Assistant Program (Rutgers School of Arts and Sciences-School of Health Professions)

Joint B.A./M.S. Physician Assistant Program (Rutgers School of Arts and Sciences-School of Health Professions)

Rutgers School of Arts and Sciences/Rutgers School of Health Professions Joint Bachelor of Arts/Master of Science Degree (B.A./M.S.) Physician Assistant Program

This is a six-year (3+3) program offered jointly by the School of Arts and Sciences and the School of Health Professions (SHP). The program can be looked at as a two-phase program, an undergraduate phase followed by a professional phase. This program is open to students enrolled at the School of Arts and Sciences, Rutgers University-New Brunswick, who are U.S. citizens, permanent residents of the United States, or international individuals currently on a student visa. At a minimum, applicants must be enrolled for one year at Rutgers-New Brunswick earning at least 30 credits.

The first phase of the program includes three years of undergraduate liberal arts and basic science education. Students may apply to the second (professional) phase in April of their second year by applying to the Physician Assistant (PA) program. Personal interviews will be required of those applicants being considered for admission. The interview will serve to determine the applicant's emotional and intellectual maturity, ability to communicate, and the potential to achieve career satisfaction within the physician assistant role. Applicants must have a cumulative and science GPA of 3.2. In cases where individuals may show high potential by improved performance, exceptions to this requirement may be considered. Please note that acceptance by Rutgers University does not guarantee acceptance by the PA program.

Applicants to the program must have completed the following courses with a grade of C or better: at least one semester (3 credits) of English composition, applied statistics or biostatistics (from Psychology, Biology, or Math departments), General Biology I and II with lab (119:115, 116, and 117, or equivalents); General Chemistry I and II with lab (160:161,162 and 171, or equivalents); and General Psychology (830:101, or equivalent). If the student has been granted AP credit by Rutgers for science courses, additional science courses will be required.

All applications must be received by June 1 and final notices of acceptance will be made by August 1. If the applicant is accepted into the program, it will be contingent on maintaining a 3.2 GPA through the end of the third undergraduate year at Rutgers-New Brunswick, and on all requirements for the undergraduate degree being met before the beginning of the fourth year. Students who are accepted into the second phase of the program will begin this phase at the beginning of their senior year. At the end of the senior year, these students will receive a bachelor of arts degree conferred by the School of Arts and Sciences, Rutgers University-New Brunswick. After completion of the remaining two years of the PA program, graduates will receive a master of science degree awarded by Rutgers School of Health Professions.

Before entering the second (professional) phase, a student accepted by this program must also complete for the PA program, Functional Human Anatomy (01:377:223), General Microbiology (01:447:390), Intro to Biochemistry (01:694:301) and Systems Physiology (01:146:356) (waived if Gen Bio II is completed at Rutgers-NB and not AP credit), and 6-8 additional credits of life science electives. Students majoring in biological sciences are required to have completed, in addition to the School of Arts and Sciences core distribution requirements, the Life Sciences Core requirements, Intro to Biochemistry (01:694:301) and General Microbiology (01:447:390) and one (three credit or more) course from the 216 subject area approved electives. Students with AP or transfer credit of General Biology I and II and lab must take an additional life science elective course for 3 or more credits. A maximum of 14 credits from SHP courses will be accepted toward the biological sciences major. Please be sure to meet with a biological sciences adviser when selecting life sciences elective courses because not all course combinations are allowed given overlap in subject matter taught at Rutgers and SHP.

For a complete description of the requirements for the major in biological sciences, please read the appropriate section under the Division of Life Sciences in this catalog.

For more information about this program, you may contact the PA program office at the School of Health Professions, 675 Hoes Lane, Piscataway, NJ 08854, at 732-235-4444; or the Division of Life Sciences, Health Professions Office at Rutgers University, Nelson Biological Laboratories, 604 Allison Road, Piscataway, NJ 08854-8082, at 848-445-5667.

Life Sciences (SAS)

Courses

Courses

With the exception of 01:119:115,116, and 117 General Biology I and II and Biological Research Laboratory, courses numbered at the 100 level may not be used for major credit in any of the majors within the Division of Life Sciences.

01:119:098 ***Foundations for Biological Science (E2)***
Selected topics in general biology: introduction to cellular organization, metabolism, genetics, reproduction, and organ systems. Development of analytical reasoning and science-oriented study techniques.
Preparation for college-level general biology.

01:119:103 ***Principles of Biology (4)***
Selected topics in general biology, including cell structure, genetics, plant and animal diversity, basic plant and animal biology, ecology, and evolution.
Lec. 3 hrs., lab. 3 hrs. Designed for students who must take a one-semester laboratory course in introductory biology to meet major requirements. Credit not given for this course if student has already completed 01:119:115. Not for life sciences major credit.

01:119:109,110 ***Biology Practice Group (1,1)***
Students will work actively to (1) organize the lecture content, (2) identify what they are expected to do with that content (outcomes), (3) prepare and explain study aids (organizers) to ensure that they correctly understand the week¿s content, and (4) begin the self-evaluation process to gauge exam preparedness. Discussion of the basic methods and principles.
Corequisite for 109 is 01:119:115; corequisite for 110 is 01:119:116.

01:119:111,112 ***Reading in General Biology (1,1)***
Discussion and reading providing extensive and advanced coverage of selected topics.
Corequisite for 111 is 01:119:115; corequisite for 112 is 01:119:116.

01:119:115 ***General Biology I (4)***
Broad principles of cell biology, genetics, and evolution; the diversity of life and its physiology, ecology, and population dynamics. Lec. 3 hrs., Wkshp. 80 min.
Prerequisite has two parts: writing (prerequisite of 01:355:101, 01:355:103, or 01:355:104, or placement into 355:101 or 355:104) and math (prerequisite of 01:640:026 or placement into 640:CMA, 640:PCA, 640:CLG, or 640:CLS).

01:119:116 *General Biology II (4)*
Broad principles of cell biology, genetics, and evolution; the diversity of life and its physiology, ecology, and population dynamics.
Lec. 3 hrs., Wkshp. 80 min. Prerequisite: 01:119:115 with a grade of C or better. Credit not given for both this course and 01:119:102.

01:119:117 *Biological Research Laboratory (2)*
Laboratory designed to introduce and explore principles of research in the biological sciences by engaging in semester-long research projects requiring students to analyze data, synthesize new experiments, and evaluate findings.
Prerequisite: 01:119:115 with a grade of C or better. Corequisite: 01:119:116.

01:119:120 *STEM Success Seminar (1.5)*
Increases ability to control academic success and improve transition to the university environment in furtherance of educational and career goals. Reflection on recent and current academic experience and career aspirations. Setting of priorities and alignment of time and effort towards those ends.
By special permission only.

01:119:127-128 *Anatomy and Physiology: Health Sciences (4,4)*
Structure and function of human organ systems. Some microanatomy and biochemical aspects of physiology included.
Lec. 3 hrs., lab. 3 hrs. For nursing, medical technology, physical therapy, and other professional students. Not for life sciences major credit.

01:119:131 *Microbiology for the Health Sciences (3)*
Introduction to microbes with emphasis on the nature and behavior of microorganisms, the interrelationships between microbes and the human host in health and disease, and the principles of prevention and control of infectious disease.
Not open to students who have taken 01:447:390. For nursing and other professional students. Not for life sciences major credit. Prerequisites: 01:199:115-116 or 01:119:127-128.

01:119:132 *Microbiology for the Health Sciences Laboratory (1)*
Laboratory to accompany 01:119:131.
Lab. 3 hrs. Pre- or corequisite: 01:119:131.

01:119:140 *The DNA Revolution (Honors) (3)*
Introduction to fundamentals of molecular genetics, biotechnology, and modern genetics, including a laboratory research project using molecular biology and bioinformatics techniques. Intended primarily for nonscience majors, but may also appeal to prospective chemists, physicists, engineers, and computer scientists.
Restricted to first-year and sophomore students in the School of Arts and Sciences Honors Program or the Honors College. Credit not given for both this course and 01:119:140 or 01:694:215 or 315, or 01:447:315. Not for life sciences major credit.

01:119:148 *Moving Bodies: The Biology of Movement (3)*
Considers fundamental processes that allow humans and other animals to move, including structural basis (bones and muscles), control (brain and nervous system), conversion of food into energy (digestion and nutrition),

movement of food and oxygen to muscles (circulation), and some common and familiar injuries and illnesses and their treatments.
Credit not given for both this course and 01:119:100, 103, 115-116, or 127-128. Not for life sciences major credit.

01:119:150 *Biology, Society, and Biomedical Issues (3)*
Discussion of current topics and issues in human health and medicine from a biological perspective.
Credit not given for both this course and 11:115:100. Not for life sciences major credit.

01:119:154 *Genetics, Law, and Social Policy (3)*
Principles of human and behavioral genetics and their legal, ethical, and social implications. Topics include genetic screening, counseling, and engineering; reproductive regulation; and human behavior genetics.
Prerequisite: Sophomore standing. Not for life sciences major credit or related major.

1:119:155 *Human Genetics (3)*
How our genes influence our development and health, how both normal traits and diseases are transmitted through families, how genetics is used in forensics and personalized medicine, and the genetic tests that are offered directly to consumers.
Not for life sciences major credit.

01:119:156 *Genetics, Evolution, and Human Health (4)*
The human body and human behavior, shaped by more than four billion years of evolutionary processes. Scientific and social implications of current ideas and controversies of evolution and genetics.
Not for life sciences major credit.

01:119:160 *Biology, Society, and Ecological Issues (3)*
Ecological and evolutionary ideas affecting space ecology; population increase, food supply, air and water pollution, war, and nuclear energy.
Not for life sciences major credit or related major.

01:119:182 *Essentials of Human Reproduction (3)*
Anatomical and physiological bases of human sexuality; biological and cultural aspects of sexual differentiation and psychosexual development, contraception, venereal disease, and sexual lifestyles.
Not for life sciences major credit or related major.

01:119:195 *Brain, Mind, and Behavior (3)*
Honors course discussing the interrelationship between the brain, the mind, and behavior.
Open to students in the School of Arts and Sciences Honors Program or the Honors College. Not for life sciences major credit or related major.

01:119:199 *Preparation for General Biology (4)*
For first- and second-year students planning science majors. Enrollment based on placement scores. Selected concepts in biology, proven learning strategies for college science courses, and instruction in the scientific method. Prepares students for success in the General Biology sequence (01:119:115-117).
Lec./rec. 3 hrs., lab. 3 hrs. Enrollment restricted by placement. Not for life sciences major credit.

01:119:201-202 ***Independent Study in Biology (1-3,1-3)***
Independent study under the direction of a member of the faculty. Written report required.
Prerequisites: Declared biological sciences major or minor. Permission of the Office of Undergraduate Instruction; cumulative grade-point average of 2.8 or better. May not be used to fulfill a laboratory requirement.

01:119:204 ***Outreach in Biology (1)***
Introduction to the basic principles and best practices of outreach in the biological sciences. Emphasis on understanding how to translate technical concepts and techniques to lay audiences incorporating best practices in active learning, public speaking and curriculum development. Recommended for students interested in teaching careers and related positions in science communication.
Prerequisites: 01:119:115, 01:119:116, and 01:119:117. By special permission.

01:119:205 ***Internship in Life Sciences (3)***
Development of experience and knowledge regarding the expectations, qualifications, competencies and responsibilities of professionals working within the life sciences through an internship experience with academic component. Integration of knowledge from life science coursework with the internship experience, development of new skills, and reflection on the learning experience.
Prerequisites: 01:119:116 and 01:119:117. Open only to 119 Biology Majors.

01:119:307-308 ***Research in Biology (1-3,1-3)***
Laboratory/field research on an original problem under the direction of a member of the faculty. Written report required.
Prerequisites: Declared biological sciences major or minor. Permission of the Office of Undergraduate Instruction; cumulative grade-point average of 2.8 or better. Open only to students majoring (or minoring) in biological sciences.

01:119:310 ***Communication in Biology (1)***
Effective skills for communicating science to a variety of audiences in a variety of forms including papers, grant proposals, teaching, and presentations to scientists and others. Provides support for students completing the 10-page research paper required for Research in Biology.
Prerequisites: 01:119:307, 308, 407, or 408. Corequisites: 01:119:307, 308, 407, or 408.

01:119:311 ***Current Topics in Life Sciences (1)***
Directed readings and discussion of selected scientific topics and career stories with Rutgers Life Sciences Alumni.
Junior or senior status and Division of Life Sciences major (subject code: 119, 146, 694, 447).

01:119:401 ***Clinical Practicum in the Health Professions (3)***
Development of advanced knowledge of and reflection on the qualifications, competencies, and responsibilities of physician health care providers through an internship experience and academic component integrating knowledge from life science coursework and the health care setting.
Prerequisites: 3.4 science GPA. By special permission of the Office of Undergraduate Instruction only.

01:119:406-407 ***Research in Biology (1-4,1-4)***
Laboratory/field research on an original problem under the direction of a member of the faculty. Written report is required.
Prerequisites: Declared biological sciences major or minor. Permission of the Office of Undergraduate Instruction; cumulative grade-point average of 2.8 or better. Open only to seniors majoring (or minoring) in biological sciences.

01:119:408-409 ***Honors in Biology (3-6,3-6)***
Laboratory/field research on an original problem under the direction of a member of the faculty. Written thesis, oral presentation, and defense are required.
Prerequisites: Declared biological sciences major. Permission of the Office of Undergraduate Instruction. Open only to seniors majoring in biological sciences who meet the requirements for departmental honors.

01:119:410 ***Honors Communication in Biological Sciences (1)***
Instruction on effective communication of scientific ideas and findings for both the scientific community as well as the general public. Support in writing honors theses and preparing for oral thesis defenses.
Prerequisite: 01:119:408. Corequisite: 01:119:409.

Cell Biology and Neuroscience 146

Cell Biology and Neuroscience 146

Department of Cell Biology and Neuroscience, School of Arts and Sciences

Website: http://cbn.rutgers.edu

Chair: Megerditch Kiledjian

Vice Chair and Undergraduate Director: Gabriella D'Arcangelo

Distinguished Professors:

Joanna Burger, B.S., SUNY (Albany); M.S., Cornell; Ph.D., Minnesota

Megerditch Kiledjian, B.A., Rutgers; Ph.D., University of Pennsylvania

Melitta Schachner, Diploma in Biochemistry, Tübingen (Germany); Ph.D., Max-Planck Institut für Biochemie (Germany)

Wise Young, B.A., Reed; Ph.D., Iowa; M.D., Stanford

Professors:

Lori R. Covey, B.S., California (Riverside); Ph.D., Columbia

Gabriella D'Arcangelo, B.S., Bari (Italy); Ph.D., SUNY (Stony Brook)

Robin L. Davis, B.S., Pennsylvania State; M.A., San Diego State; Ph.D., Stanford

Bonnie Firestein, B.S., Michigan; Ph.D., California (San Diego)

Martin Grumet, B.S., Cooper Union; Ph.D., Johns Hopkins

Ronald P. Hart, B.S., Connecticut; Ph.D., Michigan

Arnold G. Hyndman, A.B., Princeton; Ph.D., California (Los Angeles)

Alice Y.-C. Liu, B.S., Chinese University of Hong Kong (China); Ph.D., Mount Sinai School of Medicine

Gary F. Merrill, B.S., Weber State; Ph.D., Michigan State

Kathleen M. Scott, B.A., Brown; Ph.D., Yale

Associate Professors:

Qian Cai, M.D., Shanghai Railway Med College (China); Ph.D., National Institutes of Health-Shanghai Second Medical University

Wei Dai, B.S., M.S., Beijing Normal (China); M.S., Texas Health Science Center; Ph.D., Baylor College of Medicine

Dunne Fong, B.S., Massachusetts; M.A., Ph.D., Princeton

Shu-Chan Hsu, B.S., Ph.D., British Columbia

Peng Jiang, B.S., Soochow (China); Ph.D., University of Science and Technology of China

Kelvin Y. Kwan, B.S., California Institute of Technology; Ph.D., Harvard

David Margolis, B.S., Brown; Ph.D., Washington (Seattle)

Ping Xie, B.S., Nanjing (China); Ph.D., Hong Kong University of Science and Technology

Assistant Professors:

Victoria Abraira, B.S., Southern California; Ph.D., Harvard

Santiago Cuesta, B.A., M.S., Ph.D., National University of Rosario (Argentina)

Brian Daniels, B.A., B.S., Southern Wesleyan (Central); Ph.D., Washington (Seattle)

Rafiq Huda, B.A., Carleton College; Ph.D., Northwestern University (Chicago)

Natasha O¿Brown, B.S., Davidson College; Ph.D., Stanford

Max Tischfield, B.A., Rutgers; Ph.D., Harvard

Associate Research Professors:
Xinfu Jiao, B. S., Xinxiang Medical College (China); M.S., Tongji Medical University (China); Ph.D., Shanghai Institute of Hematology (China)

Patricia Morton, B.S., Northwestern University; M.S., Ph.D., University of Wisconsin

Assistant Research Professor:

Dongming Sun, B.S., Beijing Medical University (China); Ph.D., Columbia University

Assistant Teaching Professors:

Anne Carr-Schmid, B.S., James Madison; Ph.D., Rutgers

Tara Cominski, B.S. St. Peter's University; Ph.D., Rutgers

Anne Keating, B.S., M.S., Ph.D., Rutgers

Life Sciences (SAS)

Learning Goals

Learning Goals

The Department of Cell Biology and Neuroscience offers a course of study that provides fundamental and comprehensive training in the areas of cell biology and neuroscience. The major objective of this program is to prepare students for graduate studies in cell biology and neuroscience; entry into professional schools in medicine, dentistry, or other health-related fields; or employment in industrial and pharmaceutical companies.

Learning Goals

Students will:

I. master factual and conceptual knowledge in cell biology and neuroscience that will provide a solid foundation for success in advanced training and professional careers;

II. develop an ability to summarize, integrate, and organize information; and

III. use scientific reasoning to evaluate the potential for current research and new discoveries to improve our understanding of cell biology and neuroscience and its relevance to human health and to our society.

Life Sciences (SAS)

Entry Requirements of the Major

Entry Requirements of the Major

The major in the Department of Cell Biology and Neuroscience is open to students after their first year who have completed Fundamentals of Neurobiology (01:146:245) or Fundamentals of Cell Biology (01:146:270), with a grade of C or better. Departmental approval is required.

A grade of C or better in all courses credited toward the major is required for graduation, and each course may be repeated only once to replace D/F grades.

Life Sciences (SAS)

Major Requirements

Major Requirements

The Department of Cell Biology and Neuroscience offers a program of study from which students can select one of two tracks, depending upon particular interests and career goals: a general track (default) and an honors track. Students can apply to enter the honors track at the beginning of the senior year. This track requires a minimum GPA of 3.4 in courses credited toward the major, and departmental approval. A number of core courses are required of all students in the cell biology and neuroscience major, regardless of the chosen track. No more than 16 credits from among the life science courses required for completion of the cell biology and neuroscience major may be fulfilled by credits transferred from any school outside of Rutgers University-New Brunswick. Any life science courses applied to the major should be taken within 10 years of graduating.

Required Core Courses (65 or more credits)

01:119:115-116 General Biology (4,4)

01:119:117 Biological Research Laboratory (2)

01:160:161-162 or 01:160:163-164 or 01:160:165-166 General Chemistry (4,4)

01:160:171 Introduction to Experimentation (1)

01:160:307-308 or 01:160:315-316 Organic Chemistry (4,4)

01:160:311 Organic Chemistry Laboratory (2)

01:750:203-204 General Physics (3,3) or 01:750:193-194 Physics for the Sciences(4,4)*or 01:750:271-272 Honors Physics (3,3)

01:750:205-206 General Physics Laboratory (1,1)

01:640:135,136 or 01:640:151-152 Calculus I and II (4,4) or 01:640:135 and 01:960:401 Basic Stat for Research (3) or 01:960:379 Basic Prob and Stat or 01:640:135 and 01:960:212 Statistics II (3)**

01:447:380 Genetics (4)

01:146:245 Fundamentals of Neurobiology (3)

01:146:270 Fundamentals of Cell Biology (3)

01:694:395 Biochemistry for Life Sciences (3) or 01:694:407 Biochemistry (3)

Advanced Cell Biology and Neuroscience Courses: choose three of the following:

01:146:445 Synapses, Neurons, and Circuits (3)

01:146:447 Clinical Neurobiology (3)

01:146:465 Neurobiology of Pain and Addiction (3)

01:146:472 Developmental Biology (3)

01:146:473¿ Genetic Regulation in Cell Biology¿(3)

01:146:474 Immunology (3) or 01:146:476¿ Honors Immunology (3)

01:146:481 Protein Dynamics in Cell Biology (3)

* with approval from the Undergraduate Director or CBN Advisor 01:160:308 may be replaced by an additional elective course.
** Students who take who take Physics for the Sciences 01:750:193-194 (4,4) do not need an additional Physics laboratory.
*** Students with AP statistics equivalent of 01:960:211, transfer credit for 01:960:211, or who have taken 01:960:211 at Rutgers must take 01:960:212.

Life Sciences (SAS)

Options

Options

General Track; 4 credits

This track is for students who, upon graduation, seek immediate employment or plan to attend professional schools in health-related fields. In addition to the required core courses, students must take the following courses:

1. One elective lecture courses at the 300-400 level in the life sciences area (equaling 36 or more credits)
2. One laboratory or research course (1-3 credits). Students can take a lecture course with an associated laboratory component (3-4 credits) to satisfy both requirements, or a stand-alone lecture plus a laboratory or research course.

Honors Track; 12 credits

This area of concentration is for students interested in research who, upon graduation, plan to attend graduate school or professional schools in health-related fields. A student must qualify for admission into the honors track. See the departmental honors program page in this catalog for student qualifications. In addition to the required core courses, students must complete the following courses, produce a written research thesis and an oral thesis presentation:

1. One elective lecture course at the 300-400 level in the life sciences area (3 or more credits).
2. 01:146:405 Honors Seminar (3).
3. 01:146:408-409 Honors Research (3,3).

Life Sciences (SAS)

Departmental Honors Program

Departmental Honors Program

Honors in cell biology and neuroscience are awarded to students who have successfully completed the honors track course requirements, submitted a written research thesis, and defended the thesis orally. To qualify for the honors track, a student must have attained a grade-point average of 3.4 or better in courses required for the major. The student should apply formally to the department for acceptance into the honors program by the end of the second semester of the junior year.

Life Sciences (SAS)

Courses

Courses

01:146:201,202 *Independent Study in Cell Biology and Neuroscience (1-3,1-3)*
Laboratory research under the direction of a Rutgers faculty member.
Written report required. Permission of department and an instructor willing to sponsor the student, and a cumulative grade-point average of 2.8 or better are required. May not be used to fulfill a laboratory requirement. Open only to students majoring or planning to major in cell biology and neuroscience.

01:146:245 *Fundamentals of Neurobiology (3)*
Introduction to the biology of the nervous system. Topics covered include nerve cell signaling, sensory and motor systems, and higher brain processes.
Prerequisites: 01:119:115-116.

01:146:270 *Fundamentals of Cell Biology (3)*
Principles of cell biology. Structure, function, and macromolecular organization of cellular organelles.
Prerequisites: 01:119:115-116.

01:146:295 *Essentials of Cell Biology and Neuroscience (3)*
Provides a background in the biology of neural cells and cognition.
Prerequisites: 01:119:115-116. Not intended for cell biology and neuroscience majors.

01:146:307,308 *Research in Cell Biology and Neuroscience (1-3,1-3)*
Laboratory research on an original problem under the direction of a member of the Rutgers faculty.
Written report required. Permission of department and an instructor willing to sponsor the student, and a cumulative grade-point average of 2.8 or better. Open only to students majoring or planning to major in cell biology and neuroscience.

01:146:322 *Human Histology (4)*
Structure of the tissues and organs of the human body. Lec. 3 hrs., lab. 3 hrs.
Prerequisite: 01:146:270 or 01:146:295.

01:146:328 ***Human Parasitology (3)***
Cell biology, epidemiology, pathogenesis, and clinical manifestations of human parasitic diseases.
Prerequisites: 01:119:115-116.

01:146:329 ***Human Parasitology Laboratory (1)***
Laboratory to accompany the Human Parasitology lecture course 01:146:328. Lab. 3 hrs.
Pre- or corequisite: 01:146:328.

01:146:340 ***Virology (3)***
Principles of virology including the molecular and cellular events that occur during virus replication, the host cell response, and pathogenesis. Emphasis on animal viruses that impact human health and disease. Strategies for controlling viruses.
Prerequisite: 01:146:270.

01:146:350 ***Introduction to Light Microscopy for the Life Sciences (1, minicourse)***
This course offers a comprehensive exploration of advanced imaging techniques essential for studying tissues, cells, and organelles in the life sciences.
Prerequisite: 01:146:270 or 01:146:295.

01:146:356 ***Systems Physiology (3)***
Comprehensive study of the principal organ systems of laboratory animals and humans.
Prerequisites: 01:119:115-116 and 01:160:161-162 or 163-164, and 171 Credit not given for both this course and 11:067:300.

01:146:357 ***Systems Physiology Laboratory (1)***
Laboratory to accompany the Systems Physiology lecture course 01:146:356. Lab. 3 hrs.
Pre- or corequisite: 01:146:356.

01:146:405 ***Honors Seminar (3)***
This course is intended to help students prepare a written research thesis and practice the oral thesis presentation.
Requires departmental permission. Open only to senior honors students majoring in cell biology and neuroscience. This course fulfills the SAS WCd core requirement.

01:146:406, 407 ***Research in Cell Biology and Neuroscience (1-3,1-3)***
Research under the direction of a Rutgers faculty member.
Written report required. Permission of department and an instructor willing to sponsor the student, and a cumulative grade-point average of 2.8 or better are required. Open only to students majoring in cell biology and neuroscience.

01:146:408-409 ***Honors Research (3-3)***
Two semester laboratory research sequence under the direction of a Rutgers faculty member. Written report and oral presentation required. Culminates in a written thesis and oral thesis defense.
Permission of department and an instructor willing to sponsor the student are required. Open only to seniors majoring in cell biology and neuroscience who meet the requirements for the departmental honors program.

01:146:410-411 ***Research Thesis in CBN I and II (3-3)***
Two semester laboratory research sequence under the direction of a Rutgers faculty member and the course coordinator.
Prerequisites: 01:146:307 or 01:146:308. Requires departmental permission and acceptance by a faculty mentor who will

host the student in the laboratory. Requires submission of a written thesis draft (I = Fall semester), and submission of a final written thesis and oral defense (II = Spring semester). Open to senior students majoring in cell biology and neuroscience who are not enrolled in the departmental honors program.

01:146:445 *Synapses, Neurons, and Circuits (3)*
Cellular and systems features of neurons and the fundamental unit of signaling in the nervous system, focusing on a small number of advanced topics. Focus on how to test hypotheses related to the topics addressed: intra- and inter- cellular communication; construction of neuronal networks; protein interactions at the synapse; and signal transduction pathways.
Prerequisites: 01:146:245 and 01:146:270.

01:146:447 *Clinical Neurobiology (3)*
Development and function of the nervous system with an emphasis on diseases and disorders. Topics include neurodevelopment, demyelination, tumors, and viral infections; neurological disorders/diseases; injury to the spinal cord and brain and repair; and clinical trials and the future of spinal cord and brain trauma.
Prerequisites: 01:146:245 and 01:146:270. Intended for senior students majoring in cell biology and neuroscience.

01:146:456 *Advanced Physiology (3)*
Preparation for advanced graduate study in physiology and for medical physiology (first-year medical school). Focus on mammalian physiology and the whole animal (whole organ) approach to classical experimental physiology.
Prerequisites: 01:146:356. Intended for senior and junior students.

01:146:464 *Topics in Cell Biology and Neuroscience (3)*
Directed readings and discussion of selected topics in cell biology and neuroscience.
Prerequisites: 01:146:245 and 01:146:270. Open to junior or senior students majoring in cell biology and neuroscience.

01:146:471 *Advanced Cell Biology Laboratory (3)*
Advanced laboratory methods in cell biology. Emphasis on light and electron microscopy, imaging, immunocytochemical techniques, tissue culture, and methods of identifying and separating macromolecules.
Prerequisite: 01:146:270 or permission of instructor.

01:146:472 *Developmental Biology (3)*
Genetic, molecular and cellular processes that lead from egg to embryo to mature organism.
Prerequisite: 01:146:270 or 01:447:380 or 01:447:384.

01:146:473 *Genetic Regulation in Cell Biology (3)*
Advanced topics in cell biology, focusing on genetic animal models, genomics, chromatin function, gene expression, and RNA biology.
Prerequisite: 01:146:270.

01:146:474 *Immunology (3)*
Fundamental principles of immunology with emphasis on antibody formation, immunoglobulin molecules and genes, hypersensitivity reactions, and the cellular basis for the immune response.
Prerequisites: 01:119:115-116 and 01:447:380 or 01:447:384. Recommended: 01:447:390.

01:146:475 ***Laboratory in Immunology (1)***
Biochemical and molecular analysis of immune cell function. Application of immunological techniques to the examination of normal and diseased states.
Pre- or corequisite: 01:146:474.

01:146:476 ***Honors Immunology (3)***
Introduction to the immune system, with a focus on mammalian organisms (particularly humans). Focus on critical thinking and problem-solving abilities, as well as introduction to primary research addressing contemporary immunological questions. Open only to students enrolled in the Honors College, SAS Honors Program or CBN Honors Program.
Prerequisites: 01:447:380 or 01:447:384. Credit not given for both this course and Immunology 01:146:474.

01:146:481 ***Protein Dynamics in Cell Biology (3)***
Advanced topics in cell biology, focusing on signal transduction (module 1), cell adhesion and protein transport (module 2) and cytoskeletal dynamics controlling cell movement (module 3).
Prerequisite: 01:146:270.

Learning Goals

Learning Goals

Learning Goals:

The Department of Genetics is committed to teaching science through the way we do science: through the process of doing research. The curriculum of the Department of Genetics is centered around four main goals. These goals shape our innovative courses and provide the basis for lifelong learning.

I. Knowledge specific goals: Know the terms, concepts, and theories of genetics.

II. Integrate the material from multiple courses and research to think holistically and to see the whole as well as the parts.

III. Use genetic information and ideas to critically analyze published research articles in genetics.

IV. At the end of four years, all of our students will be able to design an experiment, carry out the research using the appropriate laboratory techniques, and analyze and interpret their data. They will also be able to communicate their discoveries through a written article appropriate for publication in a peer-reviewed genetics journal, and through talks or posters appropriate for scientific meetings.

Life Sciences (SAS)

Entry Requirements of the Major

Entry Requirements of the Major

Students wishing to major in this department must have been enrolled at Rutgers for at least one semester. In addition, students must:

1. Be an SAS student

2. Have a cumulative GPA of at least 2.00, and a GPA of at least 2.8 at the time of taking research for credit.

3. Have earned a C or better in these prerequisite courses or equivalents (25-26 credits):

a. General Biology I 01:119:115

b. General Biology II 01:119:116

c. General Biology Lab 01:119:117

d. General Chemistry I either 01:160:161 or 01:160:163

e. General Chemistry II either 01:160:162 or 01:160:164

f. Calculus I either 01:640:135 or 01:640:151

g. Calculus II or Statistic either 01:640:136, or 01:640:152, or 01:640:192, or 01:960:401, or 01:960:212, or 01:960:379

4. Students with an overall GPA < 3.0 must meet with the UGD before declaring the major.

a. Genetics is a credit-intensive major and has a requirement of a 2.80 GPA at the time of taking research for credit

b. Students entering the major with a GPA of < 3.0 may struggle to complete the major on time

5. Watch a Genetics Major Declaration Video

Life Sciences (SAS)

Major Requirements

Major Requirements

The department offers a major with a strong emphasis on research. A minimum of 20 credits of coursework in the life sciences must be completed in residence. Genetics is a credit-intensive major. Excluding the prerequisite courses (25-26 credits) to get into the major (see above), there are between 54-56 credits to complete the major (60-62 for honors). A grade of "C" or better in courses credited toward the major is required for graduation, and each course may be repeated only once to replace D/F grades. Students may not double major in two Division of Life Sciences majors.

The requirements of the major consist of:

A. Life Science Core Courses (19-21 credits) - Required for all DLS Majors (Approved AP and Transfer credits may be substituted)

a. Intro to Experimentation 01:160:171

b. Organic Chemistry I 01:160:307 or 01:160:315

c. General Physics I (01:750:203 + 205 lab), or (01:750:271 + 275 lab), or 01:750:193, or 01:750 201
Note: 193 & 201 have integrated lab

d. General Physics II (01:750:204 + 206 lab) or (01:750:272 + 276 lab) or 01:750:194 or 01:750:202
Note: 194 & 202 have integrated lab

B. Genetics Core (17 credits) - Required for all Genetics Majors- All below credits must be completed at Rutgers

a. Genetic Analysis I 01:447:384

b. Genetic Analysis II 01:447:385

c. Lab Course Req. 01:447:315, or 01:447:302, or 01:447:203, or 01:447:303, or 01:694:214, or 01:694:215, or 01:694:316

d. Biochemistry for the Life Sciences 01:694:395 or 01:694:407

e. Communications in Genetics 01:447:430 or 01:447:414 + 01:447:415 (Honors, Thesis Writing senior year)

C. Genetics Independent Scholarship (minimum 6 credits but 12 credits for honors

Note: 2.8 minimum GPA to register for research

a. Independent Scholarship 01:227:460, 407, 408, 409, 410, 488, 489, 490

b. Independent Scholarship 01:227:460, 407, 408, 409, 410, 488, 489, 490

D. Genetics Electives (6 credits)

Fifty percent must be taken within the Genetics Major (i.e.; 01:447)

a. Genetics Electives See electives table

b. Genetics Electives See electives table

c. Genetics Electives See electives table

E. Electives OR Independent Scholarship (6 credits)

Note: Additional Genetics Lab may be used as an elective

a. Independent Scholarship 01:227:460, 407, 408, 409, 410, 488, 489, 490

b. Independent Scholarship 01:227:460, 407, 408, 409, 410, 488, 489, 490

c. Genetics Electives See electives table below

Lab Note: 01:694:214 and 01:694:215 are only offered to first-year students with AP Biology credit and AP General Chemistry credits (or taking General Chemistry concurrently). 01:447:203 is only offered to first-year students in the SAS Honors Program or the Honors College. Students cannot receive credit for both 01:447:203 and 01:447:302.

Organic Chemistry Note: If you are planning to pursue a graduate degree in which a full year of organic chemistry is suggested/required (e.g., med/dental school), we strongly recommend taking Organic Chemistry II + lab as an elective (6 credits)

Life Sciences (SAS)

Departmental Honors

Departmental Honors

Departmental Honors

The Department of Genetics recognizes graduating students who have made outstanding academic achievements by awarding **departmental honors**. The department awards two types of departmental honors (see below) and these are awarded at the discretion of the Genetics Honors Committee. To be considered, students must meet all criteria for that type of honors and submit the honors request application by the deadline (April 1st of senior year).

The two types of departmental honors and their criteria are as follows:

1. GENETICS HONORS- RESEARCH

a. GPA requirement: a student must have attained, at the end of the junior year, a cumulative GPA of at least 3.4 and a Genetics major GPA of at least 3.4 (including prerequisites).

b. Complete 6 or more credits of Honors in Genetics (01:447:408-409) during senior year

c. Complete a total of 12 or more research credits (including the 6 credits of 01:447:408-409)

d. Complete Honors Thesis and Communication in Genetics 447:414 and 415 during senior year

e. Complete and defend a research thesis before a faculty committee (see Thesis Guidelines)

f. Present at Honors Day

Students can apply to do an Honors thesis by completing the relevant sections of the Independent Scholarship Form. Students must register either for an Honors course sequence in Genetics (01:447: 408 and 409) or for a course sequence in a college Honors Program (See Handbook) . These decisions should be discussed with an advisor and approved by the Department Vice Chair. Accepted students are expected to complete at least 12 credits in an independent research project, resulting in a thesis. Students may do research with Rutgers faculty outside of the Department with the approval of their advisor and the Vice Chair. Students will prepare a thesis and present an oral defense to a committee of three faculty. At least one member of the committee must come from the Department of Genetics. Students will present their research at a Departmental Symposium in April. Students contemplating an Honors thesis should refer to the much more detailed instructions and details in Section IX and Section X of the Student Handbook. For information on the thesis, see Thesis Guidelines.

Level of Honors: In determining the level of honors, the honors/awards committee takes into consideration multiple factors in aggregate, including but not limited to (1) cumulative GPA, (2) thesis defense committee recommendation, (3) research mentor evaluation, (4) faculty evaluation of presentation at Honors Day, and (5) whether or not the student took the honors versions of Genetic Analysis 1 and/or 2 (i.e., 01:447:384:H1 and/or 01:447:385:H1) and the grades received in those courses.

2. Genetics Honors - Certificate Program

a. GPA requirement: A student must have attained, by April 1st of senior year, a cumulative GPA of at least 3.4 and Genetics major GPA of at least 3.4 (including prerequisites).

b. Complete a departmental certification program (i.e.; CompGen, Cancer or Genetic Counseling).

c. By April 1st, the student must formally apply to request consideration for Certificate Honors by completing the Genetics Honors- Certificate Program Form

* *The honors committee may award Honors, High Honors or Highest Honors*

Life Sciences (SAS)

Undergraduate Certificate Programs

Undergraduate Certificate Programs

The Department of Genetics offers two certificate programs. Students who complete one of these Certificates are eligible to receive Departmental Honors.

1) Genetic Counseling Certificate Program

The Department of Genetics offers an undergraduate **Genetic Counseling Certificate Program (GCCP).** The GCCP program is intended for a select group of students interested in applying to the masters-level programs in genetic counseling. The goal is to provide students with guidance, coursework, and relevant clinical experience to improve their graduate school applications. This is a highly competitive option and is **only open to declared genetics majors**. Not all applicants will be accepted. The Certificate will be awarded only in conjunction with the awarding of a baccalaureate degree in genetics and does not replace minors. The certificate is NOT in lieu of completing the masters-level programs in genetic counseling. At the end of the program students will:

- understand genetic counseling as a profession ·
- understand application requirements for masters-level programs
- gain experience in talking with people who are in crisis
- gain experience in a clinical genetic counseling clinic

2) Certificate in Computational Genetics

The Department of Genetics offers a Certificate in Computational Genetics (CCG) for Genetics majors. The volume of data being generated in Genetics and related life science fields has been expanding tremendously in recent years, and career opportunities for geneticists with computational and quantitative expertise are simultaneously growing. This certificate program is intended for students who are either interested in applying to graduate-level programs,

or planning careers, in Computational Genetics/Biology, Statistical Genetics, Bioinformatics, or other programs in quantitative biomedical related research. The goal of the CCG is to provide students with guidance, coursework, and relevant data design and analysis experience to prepare them for graduate studies in the field or entry-level informatics jobs. This program is only open to declared Genetics Majors. The Certificate will be awarded only in conjunction with the awarding of a baccalaureate degree in Genetics. At the end of the program students will:

- Have gained competence in genetic data analysis using basic computer programming and statistical analysis.
- Be prepared to apply to M.S. or Ph.D. graduate programs in the areas of Computational Genetics and Bioinformatics.
- Be prepared to apply for career positions in industry, biotech companies, pharmaceutical companies, medical centers, or universities

3) Cancer Research Certificate

The Department of Genetics offers a Certificate in Cancer Research (CCR) for Genetics majors. Completion of the Certificate in Cancer Research will provide an advantage when applying to MD, PhD, and MS programs and facilitate transitions to careers with Cancer-related missions. The goal of the CCR is to provide students with a rigorous and Cancer-specialized curriculum. Students will do at least one year of research in a nation-leading Cancer Research Lab and students will be expected to participate in community engagement and develop skills to build community outside of academia. This program is only open to declared Genetics Majors. The Certificate will be awarded only in conjunction with the awarding of a baccalaureate degree in Genetics. At the end of the program students will:

- Have gained knowledge in Cancer Genetics with an expanded curriculum focused on Cancer biology.
- Have at least one year of experience conducting laboratory research in a Cancer research lab.
- Be prepared to apply to M.S., MD, or Ph.D. graduate programs in the areas of Cancer Genetics or for career positions in industry, biotech companies, pharmaceutical companies, medical centers, policy-driving institutes, or universities.

Life Sciences (SAS)

Courses

Courses

01:447:203 ***Honors Computational Genetics (Honors) (3)***
Honors computational genetics is a computer-based laboratory course that introduces students to the use of computers in biological research. This course is for students who are thinking of careers at the intersection of life sciences, statistics, and/or computer science, particularly students who are considering majoring in Genetics. The course fulfills the laboratory requirement for the Genetics major. In the first half of the course, students will receive instruction in introductory computer programming (Python). In the second half of the course, students will practice writing code in Python via in-depth computational projects in genetics and genomics. Each class consists of a mixture of lecture and computer-based demos and/or exercises, as well as time for students to work on

assignments. The course provides the introductory skills needed to conduct basic computational research in the life sciences, including many aspects of computer programming and genomic data analysis. Prior experience with computer programming is neither necessary nor is it expected for students who enroll in this course.

This course is for freshman or sophomore Honors students who are thinking of careers at the intersection of life sciences, statistics, and/or computer science, particularly students who are considering majoring in Genetics. The course fulfills the laboratory requirement for the Genetics major.The course fulfills the laboratory requirement for the Genetics major.
Prerequisites: Students must be in their first or second year at Rutgers in an approved Honors program (e.g., the Honors College or the SAS Honors Program). General Biology I (01:119:115) and be at least co-registered for General Biology II (01:119:116)) or have placed out of these two courses (e.g., through AP credit or approved transfer credit). Credit not given for both 01:447:203 and 01:447:302.

01:447:216 ***Analysis of Scientific Literature (Honors) (3)***
A systematic approach to the reading, analyzing, and understanding of primary literature in genetics; emphasis will be placed on data analysis and experimental design and demystifying the process of reading a scientific journal article.
Prerequisites: 01:119:115-116. Highly recommended: 01:694:215. Open only to freshmen and sophomores in the SAS or SEBS Honors Program. By permission only.

01:447:245 ***Introduction to Cancer (3)***
Introduction to Cancer provides the student with an overview of conventional and state-of-the-art aspects of oncogenesis. Students will become familiar with the process involved in neoplastic transformation to the cancer phenotype through aspects of epidemiology, pathophysiology, virology, in vitro and in vivo cellular transformation and genetics. They will then apply these aspects to the understanding of classic therapeutic modalities and new state-of-the-art rational therapies. This comprehensive course will concentrate on the human disease process by applying clinical aspects of oncogenesis during a series of Grand Rounds discussions that will include recent patient clinical cases and their outcomes.
Prerequisites: 01:119:115-116. Credit not given for both this course and 01:447:495.

01:447:302 ***Quantitative Biology and Bioinformatics (3)***
Introduction to the use of computers and computer programming to develop applications for research in genetics and molecular biology. Application topics will include evolutionary genetics, association analysis and genetics mapping, and structural biology.
Prerequisites: 01:447:380 or 01:447:384. May be used to fulfill an elective requirement or taken instead of 01:447:315 Introduction to Research in Genetics by students majoring in Genetics. Credit not given for both 01:447:203 and 01:447:302

01:447:303 ***Computational Genetics of Big Data (3)***
The main focus of this course is the application of R programming to the analysis of genetic data, particularly big data sets with multiple measurements. The primary data sets considered will contain RNA-seq and/or other expression data for multiple/all genes in a given set of individuals. This course is for junior or senior students who are thinking of careers at the intersection of life sciences, statistics, and/or computer science, particularly students who are majoring in Genetics. The course fulfills the laboratory requirement for the Genetics major. Students will learn how to acquire such data, format it for R, plot the data, and perform statistical analyses. In addition, students will learn how to simulate data under different hypotheses, and how to perform power and sample size calculations

for different statistical methods applied to real or simulated data. Each class consists of a mixture of lecture and computer-based demos and/or exercises, as well as time for students to work on assignments. Guest investigators will frequently make short presentations (in person or by skype) to provide illustrations of how programming and informatics is critical for their research. The course provides the introductory skills needed to conduct basic computational research in the life sciences, including many aspects of computer programming and data analysis.
Prerequisites: 01:447:380 or 01:447:384. May be used to fulfill the lab requirement by students majoring in genetics. May be used to fulfill an elective requirement by students majoring in genetics who have already fulfilled the lab requirement with a separate course.

01:447:315 *Introduction to Research in Genetics (3)*
Basic principles and methods of research with microbial model systems used in the analysis and manipulation of genes, followed by a research project in molecular genetics.
Prerequisites: 01:119:115,116, and 117; and 01:160:161-162, 171 (or equivalent) or 01:160:163-164, 171. May be used to fulfill the lab requirement by students majoring in genetics. May be used to fulfill an elective requirement by students majoring in genetics who have already fulfilled the lab requirement with a separate course. Credit not given for both this course and 01:694:315. Open only to genetics majors

01:447:354 *Social, Legal, and Ethical Implications of the New Genetics (3)*
Social, legal, and ethical implications of new modern genetic techniques, for example: genetic screening, stem cells and cloning, forensic genetics, genetic engineering of plants, animals, and humans, genetic enhancement, gene therapy, and the new eugenics.
Prerequisites: Genetics (01:447:380) or Genetics Analysis (01:447:384)

01:447:356 *Evolutionary Medicine (3)*
In this course, we examine human health from an evolutionary perspective, exploring the impact that our evolutionary heritage has on modern human diseases, both chronic and infectious. We will learn how the framework of evolutionary biology and modern genetic tools can inform our understanding of issues relevant to clinical and public health. Rather than focus on the immediate mechanisms underlying disease, we will endeavor to understand the ultimate factors that influence susceptibility, such as past natural selection. The course topics are wide-ranging, but particular attention is paid to emerging infectious diseases, as well as non-communicable diseases that may be exacerbated by facets of modern lifestyles.

Through lectures, critical analysis of the primary literature and popular science news, and class discussions, students will learn how evolutionary principles can be practically applied to medicine. Key readings each session will focus on genetic techniques for understanding evolutionary medicine, while additional readings will incorporate perspectives from diverse fields.

By fully participating in this course, students will be able to appreciate how modern susceptibility to non-communicable and infectious diseases has been influenced by past evolutionary processes; critically evaluate evolutionary hypotheses related to health and medicine, including those found in popular science articles; and know how genetic techniques are applied within an evolutionary framework to understand ultimate reasons for disease.
Prerequisites: (01:447:380 or 384) AND (01:960:401 or 01:960:212).

01:447:370 *Developmental Genetics (3)*
How genes influence the developmental processes of an organism. Topics include gene regulatory networks, signaling pathways, stem cell biology, and the role of developmental genetics in human disease.
Prerequisites: Genetics (01:447:380) or Genetic Analysis (01:447:384)

01:447:380 *Genetics (4)*
Introduction to the mechanisms of heredity and evolution. Mechanisms of Mendelian inheritance, meiosis, recombination, gene mutation, and mapping, and an introduction to modern biochemical, molecular, and population genetics.
Lec. 3 hrs., rec. 1 hr. Prerequisites: 01:119:115-116 and 01:160:161-162 or 01:160:163-164. Credit not given for both this course and 01:447:384-385 or 11:067:328 or 11:776:305.

01:447:382 *Genetics Laboratory (1)*
Laboratory to accompany 01:447:380. Not accepted for elective credit for Genetics majors.
Lab. 3 hrs. Pre- or corequisites: Genetics (01:447:380) or Genetic Analysis (01:447:384)

01:447:384-385 *Genetic Analysis I,II (4,4)*
Experimental methods and concepts in genetics, with emphasis on their application to genetic research. Part I covers transmission genetics and breeding analyses, basic molecular genetics, isolation and characterization of mutations, and chromosome structure and function. Part II covers mathematical genetics, recombinant DNA, genomics, and special topics relevant to modern genetic research.
Open only to majors in genetics or by permission of instructor. Credit not given for both this course and 01:447:380 or 11:067:328 or 11:776:305. Prerequisites for 01:447:384 are 01:119:115-116 (General Biology I & II) or 01:160:161-162 or 01:160:163-164 (General Chemistry I & II). Prerequisite for 01:447:385 is 01:447:384.

01:447:390 *General Microbiology (4 includes laboratory)*
Microorganisms are an essential component of the human environment and are significant not only for the disease they cause, but also for their ecological, agricultural, pharmaceutical, and industrial benefits. This course will introduce students to the physiology, morphology, pathogenicity, and genetics of groups of microorganisms and their applications. The lab component of the course will introduce microscopy and staining techniques, the growth cycle and generation of a standard curve, physiological characteristics of microorganisms, and bacterial transformation. The course is an introduction to the physiology, morphology, pathogenicity, and genetics of groups of microorganisms. Topics include: History and Overview of Microbiology, Cell Structure and function, Microbial Growth, Nutrition, culture, and metabolism, Virology, Bacterial genetics, Microbial evolution and systematics, Bacteria and Archaea, Nutrient cycles, Genetic Engineering and Biotechnology, Waste treatment, Anaerobic respiration and Nitrogen fixation, Antibiotics and chemotherapeutic agents, Normal Flora, Virulence, Toxins, Epidemiology, and Microbial Diseases.

This is an upper-level course that focuses on the basic principles of microbiology. The course is an introduction to the physiology, morphology, pathogenicity, and genetics of groups of microorganisms. Topics include:
Prerequisites: General Biology 01:119:115-116-117 or 01:119:101-102 and General Chemistry 01:160:161-162-171 (or higher) and Organic Chemistry 01:160:307. Credit not given for both this course and 11:680:390.

01:447:392 *Pathogenic Microbiology (3)*
This course will integrate basic microbiology and infectious diseases. The first quarter of the course will provide the conceptual basis of microbial morphology, metabolism and growth, heredity and variation, pathogenicity and antimicrobial chemotherapy. Then this course will introduce the students to one real life patient case study each week, moving the course toward an understanding of specific human diseases (e.g., pharyngitis, meningitis) as might be expected in a clinical environment. Each case will include a patient history, differential diagnosis, clinical cues, laboratory data, pathogenesis, treatment and prevention, additional points and references. The objective is not to attempt to cover every infectious disease or microorganism, but rather to use examples that would stress the key

principles of microbial pathogenesis, differential diagnosis and appropriate treatment and prevention. This course is intended for Life Science majors or those with a strong background in the Biological Sciences.
Prerequisites: General Biology (01:119:115-117), General Chemistry (01:160:161-162-171), and Organic Chemistry (01:160:305. and 01:160:315. Systems Physiology is recommended.

01:447:406-407 ***Research in Genetics (3)***
Laboratory research on original problem under the direction of a professor. Written thesis, oral presentation, and defense required.
Prerequisites: Permission of department and cumulative grade-point average of 2.8 or better. Open only to students majoring in Genetics.

01:447:408-409 ***Honors in Genetics (3-6,3-6)***
Laboratory research on original problem under the direction of a professor. Written thesis, oral presentation, and defense required.
Prerequisites: Open by permission to seniors majoring in genetics who meet the requirements for the departmental honors program. Corequisite: 01:447:414 (fall) and 415 (spring).

01:447:410 ***Research in Genetics - Writing Intensive (3)***
Research in Genetics- Writing Intensive is intended to provide you with an opportunity to engage in original laboratory research under the direct supervision of a faculty mentor, usually in the faculty member¿s research laboratory. You are expected to carry out your own research project. NOTE: this research requires a heavy commitment of time and effort and can impact your performance in coursework, especially if you have not yet managed the foundational material for the discipline. Fulfills the writing and communication requirements of the SAS Core Curriculum.
Prerequisites: 01:447:302, 447:315, or permission of department. Registration is by special permission only. Cumulative grade-point average of 2.8 or better. Declared genetics major.

01:447:414 ***Thesis Writing and Communication in Genetics (1.5)***
Assists students with their honors thesis; emphasis will be on library/internet research and thesis writing. Students will be expected to write the introduction, methods, and reference sections of their thesis and outline the results and discussion.
Corequisites: 01:447:408. For seniors completing departmental honors; by special permission only.

01:447:415 ***Thesis Writing and Communication in Genetics (1.5)***
Assists students with their honors thesis; emphasis will be on library/internet research and thesis writing. Students will be expected to write the introduction, methods and reference sections of their thesis and outline the results and discussion.
Prerequisite: 01:447:408. Corequisite: 01:447:409. For seniors completing departmental honors; by special permission only.

01:447:430 ***Effective Communication Skills in Genetics (3)***
Communication is an essential part of science. Whether it is communicating research findings to other scientists or conveying complex concepts to a lay audience, a scientist must be able to effectively communicate their research to succeed. Communication in science is typically through publications, posters, or oral presentations. The goal of this course is to provide students practice in effectively communicating scientific findings. This includes preparing and revising an introduction for scientific papers, writing a research description for general audience, and preparing and

giving presentations (both oral and poster).
Prerequisites: Declared major in Genetics; must have completed one semester of Research in Genetics, Advanced Independent Study, or Genetic Counseling Rotation. By special permission only.

01:447:451 *Genomes (3)*
This course will focus on Genomics, Proteomics and Bioinformatics from a Genetics perspective. Special attention will be given to the organization and functioning of the human genome.
Prerequisites: Genetics (01:447:380) or Genetic Analysis (01:447:384).

01:447:460 *Genetics of Compulsive Behavior (3)*
Compulsive urge can be channeled toward productive endeavors such as a strong drive to succeed in competitions, schooling, and career. On the other hand, improper handling of compulsive urge may lead to problematic behaviors such as alcoholism, drug use, gambling, and other undesirable behaviors. There are also conditions that are medically defined as disorders, with certain types of compulsive behaviors as part of the diagnostic symptoms, such as OCD and ADD/ADHD. There is evidence that genetics contribute to compulsive behavior in humans, and research in animal models has begun to uncover the molecular factors that underlie the genetic basis of compulsive behavior. Discussion of primary literature and other scientific publications that deal with the molecular and genetic basis of compulsive behavior. Emphasis will be placed on the development of skills for critical thinking and effective writing.
Prerequisites: Genetics (01:447:380) or Genetic Analysis (01:447:384).

01:447:465 *Genetic Approaches and Research Analysis (3)*
This class will teach students how to read, interpret and analyze research articles. The class will follow an active learning format, where we will discuss seminal and recent research articles in depth: What was the scientific question or problem? What methods and strategies were used to address it? What were the findings and conclusions? What are the alternative interpretations and methods that could have been applied? What questions are remaining?
This class will expose students to a diverse selection of research literature, involving genetic and molecular analyses in model organisms such as mice, worms, flies and yeast. The class series will begin with a research article presented by the teacher. During the majority of the class series, students will be divided into groups of 4-5. Each group will be assigned one research article and be required to work together to a) interpret, b) analyze and c) present the article in the form of an oral presentation to the class. Students will be graded on their ability to perform each of these tasks and on active participation during presentations by other groups. All groups will also be required to complete and be graded on a written discussion summary assignment at the end of each article discussion. This summary assignment may take many forms, e.g., preparation of a graphical abstract, subway advert, or other creative forms of expression.
Prerequisites: Genetics (01:447:380) or Genetic Analysis (01:447:384).

01:447:470 *Evolutionary Developmental Biology (3)*
Evolutionary origins of the vertebrate body plan are major problems in biology. While paleontology and comparative anatomy have revealed the evolutionary trajectories of the organs, recent genetics, genomics and embryology are becoming powerful tools to answer classical questions. The goals of this course are twofold; 1) obtain fundamental knowledge of anatomy, embryology, and the latest genomics and 2) learn how to integrate genetics, genomics and embryology to answer evolutionary questions through active discussion in the classroom. The training to discover and answer scientific questions in animal diversity will be performed at the American Museum of Natural History.
Prerequisites: Genetics (01:447:380) or Genetic Analysis (01:447:384)

01:447:478,479 ***Special Topics in Genetics (3,3)***
Directed readings and discussion of selected topics of special interest in genetics. Topics will vary according to semester and/or instructor.
Prerequisites: Genetics (01:447:380) or Genetic Analysis (01:447:384)

01:447:480 ***Topics in Molecular Genetics (3)***
Current research topics in microbial and molecular genetics. Lectures, discussions, and critical analyses of journal articles.
Prerequisites: Genetics (01:447:380) or Genetic Analysis (01:447:384).

01:447:484 ***Behavioral and Neural Genetics (3)***
Influence of genetics on the nervous system and behavior of various organisms. Overview of field including experimental analysis of behavior, development of the nervous system, and sensory systems. Emphasis on reading and interpreting original research,
Prerequisites: Genetics (01:447:380) or Genetic Analysis (01:447:384).

01:447:488 ***Genetic Counseling Rotation (3)***
The goal of this course is to provide students with an understanding of the genetic counseling career. Students will be placed at a local Genetic Counseling clinic to shadow a genetic counselor for one semester. During the semester, the student is expected to spend 8-9 hours a week at the rotation plus meet weekly with course director (attendance is mandatory). Course grade will be based on 1) Case presentation to Genetic Counseling group 2) ten Genetic Counseling case summary logs, and 3) evaluation by the clinical supervisor.
Prerequisites: Declared Genetics major, cumulative GPA of 2.8 or greater, and accepted into the undergraduate Genetic Counseling Certificate Program (GCCP).

01:447:489,490 ***Advanced Independent Study in Genetics (3,3)***
Advanced independent study in Genetics is an opportunity for students to complete a scholarly project under the direct supervision of a faculty mentor. Projects are varied; e.g. library research on a topic of mutual interest to both the student and the faculty member, computer simulations, informative website design, or development of teaching materials. This course may not used for laboratory research.
Prerequisites: 01:447:384 and permission of department. Open only to students majoring in Genetics

Life Sciences (SAS)

Learning Goals

Learning Goals

The Department of Molecular Biology and Biochemistry offers a course of study in which traditional and modern biochemistry are integrated with studies in molecular biology. In addition to traditional courses, students are required to carry out undergraduate research work in a Rutgers professor¿s lab who serves as the host and mentor. This course of study prepares students for graduate studies in molecular biology and biochemistry and related fields, entry into professional schools in medicine or other health professions, or employment in industries (e.g., biotechnology, pharmaceuticals) in which molecular biology and biochemistry skills are in demand. The same learning goals are also used for nonmajor students taking molecular biology and biochemistry courses.

Learning Goals:

I. Students should demonstrate an understanding of the knowledge that is needed to begin biomedical research and that is required for postgraduate exams and studies.

II. Students should demonstrate the ability to find and evaluate information about specific biological systems or problems.

III. Students should demonstrate the ability to design experiments and critically analyze data.

IV. Students should demonstrate the ability to communicate their research and findings orally through seminar and poster presentations and through written research papers.

Life Sciences (SAS)

Entry Requirements of the Major

Entry Requirements of the Major

The molecular biology and biochemistry (MBB) major is open to students beyond their first year who have a 2.0 cumulative grade-point average and have received grades of C or better in courses taken toward the major, except by special permission of the department undergraduate chair. The MBB major is also open to first year students with AP credits. In all cases, students interested in the MBB major should contact the Undergraduate Director, Sam Gunderson. A grade of C or better in all courses credited toward the major is required for graduation and each course may be repeated only once to replace D/F grades.

Departmental approval is required to declare the major in molecular biology and biochemistry. Students who want to register for the MBB major must first meet with the Undergraduate Chair Sam Gunderson, Nelson lab, Room A322/A320 (848-445-1016 gunderson@dls.rutgers.edu) to discuss details about the major.

Life Sciences (SAS)

Major Requirements

Major Requirements

A core of courses is required for completion of the major in molecular biology and biochemistry. Students supplement the core with additional required and elective courses in one of three options. Given that molecular biology and biochemistry is a dynamic and developing field, it is critical that coursework applied to the major must be current. Thus, any life science courses applied to the major in molecular biology and biochemistry should be taken within 10 years of graduating. Online courses will be reviewed on a case-by-case basis to confirm that they meet departmental learning goals before they may be used to satisfy the requirements for the major. Returning students must meet with their adviser to discuss their path to graduation. All students are required to write research reports and present them at a seminar.

Required Core Courses (58 credits)

01:119:115-116 General Biology (4,4)*
01:119:117 Biological Research Laboratory (2)*
01:160:161-162 or 01:160:163-164 or 01:160:165-166 General Chemistry (4,4)*
01:160:171 Introduction to Experimentation (1)*
01:160:309 Organic Chemistry Laboratory (2) (recommended)* or 01:160:311 Organic Chemistry Laboratory (2)
01:160:315-316 Principles of Organic Chemistry (4,4) (recommended)* or 01:160:307-308 Organic Chemistry (4,4)
01:447:380 Genetics (4)*
01:640:151-152 Calculus for Mathematical and Physical Sciences (4,4) *(recommended) or 01:640:135-136 Calculus for the Life and Social Sciences I,II (4,4)**
01:694:407 Molecular Biology and Biochemistry (3) or 01:694:395 Biochemistry for the Life Sciences (3)
01:694:315 Introduction to Molecular Biology and Biochemistry Research (3) or 01:694:215 Honors Introduction to Molecular Biology and Biochemistry Research (4) or 01:694:214 Introduction to Molecular Biology Research (3) or 01:694:316 Honors Introduction to Molecular Biology, Biochemistry, Genetics Research (4)
01:694:408 Molecular Biology and Biochemistry (3)
01:694:383 Molecular Biology and Biochemistry Seminar: Careers in Science (1)
01:694:484 Molecular Biology and Biochemistry Seminar: Research Presentations (1)
01:750:203-204 General Physics (3,3)***

01:750:205-206 General Physics Laboratory (1,1)***

*Life sciences core course
**01:960:401 Basic Statistics for Research (3) or 01:960:211-212 Statistics I,II (3,3) may be substituted for the second semester of calculus.
***01:750:193-194 (4,4) or 01:750:201-202 (5,5) may be substituted for 01:750:203-204 (3,3) plus 01:750:205-206 (1,1).

Life Sciences (SAS)

Course Requirement Options

Course Requirement Options

In addition to the required core courses, the Department of Molecular Biology and Biochemistry (MBB) offers two course options to students to fulfill the requirements for the major. Course option one comprises taking advanced electives and is intended to expose MBB students to different current topics in molecular biology and biochemistry. Course option two is for students interested in biophysical questions and research and comprises taking Physical Chemistry and Multivariable Calculus. Students completing course option two will also receive a minor in chemistry are encouraged to take the physical chemistry courses as they will fulfill the minor requirements. Course option two is intended to expose MBB students to different current topics in molecular biology and biochemistry.

Course Option One (13 credits)

Two 3-credit courses offered by the MBB department from the following list: 01:694:230; 01:694:390; 01:694:411; 01:694:412; 01:694:413; 01:694:420/421; 01:694:492

One 400-level, 3-credit elective course offered by any department in the Division of Life Sciences or approved by the MBB department. See degree navigator or the MBB department website for a list of approved courses.

Course Option Two (9 credits)

01:160:341-342 Physical Chemistry: Biochemical Systems (3,3) or 01:160:327-328 Physical Chemistry (3,3) (requires 01:640:251 as a prerequisite). Other combinations of Physical Chemistry are possible so see degree navigator for further details.

01:640:251 Multivariable Calculus (4)

One 3-credit course offered by the MBB department from the following list: 01:694:390; 01:694:411; 01:694:412; 01:694:413; 01:694:420/421; 01:694:492

Electives

Because the list of approved electives is changing, students should discuss their elective options directly with their departmental faculty advisers and with the MBB Undergraduate Director, Sam Gunderson. A list of currently approved electives can be found on the MBB department website. In addition to the undergraduate courses listed, advanced students are encouraged to choose electives from the School of Graduate Studies.

Life Sciences (SAS)

Research Options

Research Options

The Department of Molecular Biology and Biochemistry (MBB) offers two laboratory research options (laboratory option one and laboratory option two), as well as a nonlaboratory research option (nonlaboratory option). In all cases, students must take one of the Introduction to Molecular Biology and Biochemistry Research courses (01:694:214, 01:694:215, 01:694:315, or 01:694:316) and 01:694:383, 484 Seminars in Molecular Biology and Biochemistry. Course 01:694:215 is only for first-year honors students who have placed out of General Biology (01:119:115,116, and 117) by receiving a score of 4 or 5 on the AP biology exam. Course 01:694:214 is for first-year students who have placed out of General Biology (01:119:115,116, and 117) by receiving a score of 4 or 5 on the AP biology exam. Course 01:694:315 is for either qualified sophomores or junior students in the major. Course 01:694:316 is for either qualified sophomores or junior honors students in the major.

Laboratory Option One (>12 credits)

01:694:381,382, and 283 (Summer) or 384 (Summer) Undergraduate Laboratory Research (2-6,2-6)

01:694:481,482 Advanced Undergraduate Laboratory Research (2-6) or 01:694:495,496 Honors Laboratory Research (6,6)

A minimum of 12 credits is required in research courses. With the exception of Honors Laboratory Research (01:694:495/496), students who plan to take more than 3 credits of research a semester need approval from the MBB undergraduate chair.

Laboratory Option Two (6 to 11 credits)

01:694:381,382, and 283 (Summer) or 384 (Summer) Undergraduate Laboratory Research (2-6) or 01:694:481,482 Advanced Undergraduate Laboratory Research (2-6) or 01:694:495,496 Honors Laboratory Research (4-6,4-6)

One 3-credit course offered by the MBB department from the following list: 01:694:230 (3); 01:694:390; 01:694:411 (3); 01:694:412 (3); 01:694:413 (3); 01:694:420/421 (3); 01:694:492 (3).

A minimum accumulation of 6 credits is required in research courses. Students must take at least one MBB elective in addition to the course requirements to satisfy the requirements for this option. Note that students applying for honors must complete 4 up to 6 credits of honors coursework per semester for two semesters. With the exception of Honors Laboratory Research (01:694:495/496), students who plan to take more than 3 credits of research a semester need approval from the MBB undergraduate chair.

Nonlaboratory Option (9 credits)

01:694:489,490 Literature Research in Molecular Biology and Biochemistry (3,3). This non-lab option is almost never used and will need approval from the Undergraduate Director, Sam Gunderson

One 3-credit course offered by the MBB department from the following list: 01:694:230 (3); 01:694:390; 01:694:411 (3); 01:694:412 (3); 01:694:413 (3); 01:694:420/421 (3); 01:694:492 (3).

Students must take at least one MBB elective in addition to the course requirements to satisfy the requirements for this option. Students taking this option may not apply for departmental honors.

Life Sciences (SAS)

Departmental Honors Program

Departmental Honors Program

To qualify, a student must have attained, at the end of the junior year, a cumulative grade-point average of at least 3.4 and a grade-point average of 3.4 or better in courses required for the major. Exceptional students not meeting these criteria but wishing to apply for honors research may petition the Department of Molecular Biology and Biochemistry at the beginning of their senior year. Students accepted into the program are expected to complete two semesters (6 credits per semester) of honors coursework. A written honors thesis and an oral thesis presentation are required. Students enrolled in 01:694:495,496 Honors Laboratory Research or any of the various school honors programs are eligible to receive departmental honors at the time of graduation.

Life Sciences (SAS)

Courses

Courses

01:694:214 ***Introduction to Molecular Biology Research (3)***
Basic principles and methods of research, followed by a research project: analyses of molecular clones from eukaryotic cDNA libraries. Description of research opportunities available to undergraduates at the university.
Prerequisites: For first-year students only who have placed out of General Biology (01:119:115,116, and 117) with AP credits, and 01:160:161 or 01:160:163. Corequisite: 01:160:162 or 164.

01:694:215 ***Honors Introduction to Molecular Biology and Biochemistry Research (4)***
Basic principles and methods of research, followed by a research project: isolation and analyses of transcriptional regulatory mutants in yeast. Description of research opportunities that are available to undergraduates at the university.
Prerequisite: Limited only to first-year SAS Honors Program or Honors College students who have placed out of General Biology (01:119:115,116, and 117) with AP credits. Corequisites: 01:160:161 or 01:160:163 (or AP credits) and 01:640:135 or 01:640:151 (or AP credits).

01:694:230 ***Analytical Methods in Biology (3)***
Mathematical methods and tools to analyze and interpret biological and biomedical data, including probability theory; Bayes Theorem; the binomial, Poisson, and normal distributions; limit theorems; error analysis; tests of statistical significance; parameter estimation; curve fitting; sampling techniques; random number generation; and Monte Carlo methods. Analysis of sequencing and microarray data, such as sequence alignment, phylogeny inference, population structure, selection, and human migration.
Prerequisites: 01:119:115-116 and 01:640:135 or 151.

01:694:281,282 *Sophomore Laboratory Research (2-6,2-6). 281 is Fall, 282 is Spring*
Research project in the laboratory of a faculty member. Written report of research carried out during each semester required. Credits in this course cannot be used toward the required research credits for laboratory option. Students must complete a special permission form and have it signed by their research advisor and then send the signed form to the Undergraduate Director (Sam Gunderson) before they can register for the course.

01:694:283 *01:694:283 Undergraduate Laboratory Research (2-6). Summer semester*
Independent research project in the laboratory of a faculty member. A written report of research carried out during each semester required by the end of each semester.
Typically for rising Juniors and Seniors. Students must complete a special permission form and have it signed by their research advisor and then send the signed form to the Undergraduate Director (Sam Gunderson) before they can register for the course.

Prerequisite: Students must complete a special permission form and have it signed by their research and MBB faculty mentors before they can register of the course.

01:694:301 *Introductory Biochemistry and Molecular Biology (3)*
Chemistry and metabolism of proteins, carbohydrates, lipids, nucleic acids, and other biologically important compounds.
Prerequisite: 01:160:209 or 307. Not for students majoring in molecular biology and biochemistry. Credit not given for both this course and 01:694:407, 11:115:301, or 11:115:403.

01:694:313 *Introductory Biochemistry Laboratory (1)*
Techniques used in research, clinical, and food laboratories, including tests of biological materials, methods of separation, and determination of enzyme activities.
Lab. 3 hrs. Pre- or corequisite: 01:694:301. Not for students majoring in molecular biology and biochemistry.

01:694:315 *Introduction to Molecular Biology and Biochemistry Research (3)*
Basic principles and methods of research, followed by a research project: analyses of molecular clones from eukaryotic cDNA libraries. Description of research opportunities at the university available to undergraduates.
Pre- or corequisites: 01:119:115,116, and 117; and 01:160:161-162, 171 or 01:160:163-164, 171. Credit not given for both this course and 01:447:315, 01:694:214, 215, or 316. Open only to MBB majors.

01:694:316 *Honors Introduction to Molecular Biology, Biochemistry, Genetics Research (4)*
Basic principles and methods of research in molecular biology, biochemistry, and genetics, followed by a research project: isolation and analyses of transcriptional regulatory mutants in yeast. Description of research opportunities that are available to undergraduates at the university.
Prerequisites: 01:119:116 and (01:160:162 or 01:160:164). For MBB or genetics majors only or those planning on being MBB or genetics majors. Special permission required.

01:694:381,382 *Undergraduate Laboratory Research (3-6,3-6). 381 is Fall, 382 is Spring*
Research project in the laboratory of a faculty member. Written report of research carried out during each semester required. Students must complete a special permission form and have it signed by their research advisor and then send the signed form to the Undergraduate Director (Sam Gunderson) before they can register for the course.

01:694:383 *Molecular Biology and Biochemistry Seminar: Careers in Science (1)*
Discussion of career options in the life sciences, finding a research laboratory, performing literature searches, reading a scientific paper, and creating posters and abstracts. This course should be taken in the beginning of the third year.
Open to MBB majors only.

01:694:384 *Undergraduate Laboratory Research (1-6). Summer semester*
Independent research project in the laboratory of a faculty member. A written report of research carried out during each semester required by the end of each semester.
For rising Seniors. Students must complete a special permission form and have it signed by their research advisor and then send the signed form to the Undergraduate Director (Sam Gunderson) before they can register for the course.

For rising Seniors. Students must complete a special permission form and have it signed by their research advisor and then send the signed form to the Undergraduate Director (Sam Gunderson) before they can register for the course.

01:694:385 *MBB Research and Writing (3)*

Research project in the laboratory of a faculty member. Seminar on science communication. Written and oral reports of research carried out during the semester required.

Prerequisites: MBB majors only. Students need a GPA of 2.8 or better to enroll in research.

01:694:390 *Introductory Computational Biology (3)*
Disciplines of biochemistry and molecular biology and genomics all include collection and analysis of large data sets. Hands on use in a computer lab will permit students to learn and apply computer languages such as Python and R to analyze large data including for example DNA mutations and structural variations (SVs), RNA-seq and ChIP-seq as part of understanding genes and gene regulation.
Prerequisite: 01:447:380 or 01:447:384

01:694:395 *Biochemistry for Life Sciences (3)*
The course is intended for life science majors and takes a holistic approach to Biochemistry. You will learn the basics of proteins, enzymology, nucleic acids and metabolism and use these as foundations to discuss exemplary metabolic pathways for their importance to homeostasis and, when dysregulated, to disease including observable phenotypes and what current strategies are used to treat these disorders. Coursework will consist of quizzes, homework, exams and one graded paper.

Prerequisites: 01:160:307 or 01:160:315

01:694:407 *Biochemistry (3)*
Protein structure and function, structure of lipids, membranes and carbohydrates, catalysis of biochemical reactions, intermediary metabolism, oxidative phosphorylation, membrane transport, lipid metabolism, signal transduction, photosynthesis, protein secretion, targeting and turnover, nitrogen, amino acid, and nucleotide metabolism.
Pre- or corequisites: 01:160:307-308 or 315-316. Credit not given for both 01:694:407 and 01:694:301, 11:115:301, or 11:115:403.

01:694:408 *Molecular Biology and Biochemistry (3)*
Disciplines of biochemistry and molecular biology as interlocking and mutually complementary fields of study. Lectures on structure of DNA, RNA, recombinant DNA approaches, DNA replication, repair and recombination, mobile genetic elements, transcription, gene regulation, RNA splicing, translation, and viral gene expression.
Prerequisite: 01:694:407 or 01:694:301 or 01:694:395 or 11:115:403. Credit not given for both 01:694:408 and 01:146:478 or 11:126:481.

01:694:411 *Molecular Pathways and Signal Transduction (3)*
Lectures and discussion of current research areas of advanced molecular and structural biology: transcription, posttranscriptional regulation, cell cycle, neurobiology, protein folding, macromolecular recognition, and molecular virology.
Pre- or corequisites: 01:694:407 and 408, or 01:447:384-385 or 11:115:403-404 or 11:126:481.

01:694:412 *Proteomics and Functional Genomics (3)*
Survey of modern techniques of protein biochemistry, bioinformatics, proteomics, and functional genomics, including basic concepts of protein structure and function, protein folding, protein characterization and purification, enzyme kinetics, NMR and X-ray crystallography, mass spectrometry, yeast two hybrid, and various techniques and approaches to functional and structural genomics.
Prerequisites: [(01:694:301 OR 01:694:407 OR 01:694:395) AND (01:447:380) OR (01:447:384)]

01:694:413 *Chromatin and Epigenomics (3)*

Introduction to chromatin dynamics, particularly the structural and biochemical modifications of chromatin that underlie epigenetic states and their effects on gene expression and development.

Pre- or corequisites: Prerequisite: 01:694:408 or 01:146:478 or 01:447:385.

01:694:420,421 *Special Topics in Molecular Biology and Biochemistry (3,3)*
Directed reading and discussion of selected topics of special interest in molecular biology and biochemistry. Topics will vary according to semester and/or instructor.
Pre- or corequisites: [(01:694:301 or 01:694:407) and (01:447:380 or (01:447:384)] or equivalent.

01:694:481,482 *Advanced Undergraduate Laboratory Research (BA, BA). 481 is Fall, 482 is Spring.*
Research project in the laboratory of a faculty member. A written report of research carried out during each semester is required. Oral presentations of student research are required in 01:694:484.

01:694:484 *Molecular Biology and Biochemistry Seminar: Research Presentations (1)*
Oral presentation of student's own research results and the research interests of the laboratory with which the student is associated. Presentation at a required poster session.
Students should take this course in the spring semester of their senior year. MBB majors only.

01:694:489,490 *Literature Research in Molecular Biology and Biochemistry (1-3,1-3)*
Literature research projects on a selected subject under the direction of a faculty member. A written report of research carried out during each semester is required. Oral presentations of student research are required in 01:694:484. This course is rarely used, therefore contact the Undergraduate Director if you are considering to take this course.
Prerequisites: 01:694:214, 215 or 315, 407, 408, and 383.

01:694:492 ***Gene Regulation: Clocks to Cancer (3)***
Explanation of MBB as an experimental science and how molecular biologists know what they know. Covers all aspects of gene regulation from transcription to protein modification to explain how 25,000 human genes can make millions of different protein isoforms and mRNA and ncRNA. Mechanisms of molecular clocks and cancer addressed in terms of gene regulation complexity,feedback loops and rate-limiting steps with emphasis on the methods, experimental design,
Prerequisites:(01:694:407 BIOCHEM) OR (01:447:384 GEN ANALY) OR (11:126:481 MOLE GEN) OR (11:115:403 GEN BIOCHEM) OR (01:694:395 BioChem LS)

01:694:495,496 ***Honors Laboratory Research (BA)***
Two-semester-long Honors research project in the laboratory of a faculty member. In the Fall semester, 01:694:495 students are required to attend a seminar each week on writing a thesis and preparing an oral thesis presentation. In the Spring semester, students take 01:694:496 where they complete their Honors thesis and give their oral presentation to their honors committee.

Barbara Jane Hinch, B.A., M.A., Ph.D., Cambridge (UK)

Leslie Jimenez, B.A., Pomona College; M.S., Cornell; Ph.D., California (Los Angeles)

Deirdre O'Carroll, B.E., Ph.D., University College Cork (Ireland)

Lu Wang, B.S., Nanjing (China); Ph.D., Wisconsin (Madison)

Ralf Warmuth, Dipl. Chem., Cologne (Germany); Ph.D., Frankfurt a. M. (Germany)

Assistant Professors:

Enver Cagri Izgu, B.Sc., Middle Eastern Technical University (Turkey); Ph.D., Minnesota

Yuwei Gu, B.S. Tsinghua University (China); Ph.D., MIT

Mark Lipke, B.S., Case Western Reserve; Ph.D., California (Berkeley)

Andrew Nieuwkoop, B.A., Carleton College; Ph.D., Illinois

Richard C. Remsing, B.S., University of the Sciences (Philadelphia); Ph.D., Maryland (College Park)

Jean Rivera-Rios, B.S., University of Puerto Rico; Ph.D., Harvard

Zheng Shi, B.S., University of Science and Technology (China); Ph.D., Pennsylvania

Christopher Shuck, B.S., Princeton; PhD., Notre Dame

Kate Waldie, B.Sc., Victoria (Canada); Ph.D., Stanford

Jianyuan Zhang, B.S., Beijing Normal; Ph.D., Virginia Tech

Associate Research Professors:

Timothy Giese, Ph.D., Minnesota

Vera Gindikin, Ph.D., Rutgers

Tai-Sung Lee, Ph.D., Duke

Yong Mao, B.S., Sichuan (China); M.S., Chinese Academy of Sciences; Ph.D., Rutgers

Sanjeeva Murthy, B.E., Mysore (India); M.T., Indian Institute of Science, Bangalore; M.S., Ph.D., Connecticut

Jens Volker , Ph.D., Cape Town (South Africa)

Assistant Research Professors:

Conceicao A Minetti, Ph.D., São Paulo (Brazil)

David Remeta, Ph.D., Rutgers

Associate Professors for Professional Practice:

Mary Emenike, B.S., Nazareth College (Rochester); Ph.D., Miami University (Oxford, OH)

Assistant Professors for Professional Practice:

Marc Muniz, B.S. Montclair State; Ph.D. North Carolina State (Raleigh)

Teaching Professors:

Geeta Govindarajoo, B.S., Ph.D., California (Irvine)

Emmanuel G. Hove, B.S., Sierra Leone; Ph.D., Pennsylvania State; Postdoc, Northwestern

Yeung-Gyo Shin, B.S., Seoul National (south Korea); Ph.D., Rutgers

Associate Teaching Professors:

Anna Kornienko, B.S., M.S., Kiev Polytechnic (Ukraine); Ph.D., Rutgers

Brian Langowski, B.S., Rutgers; M.S., CUNY (John Jay College); Ph.D., Rutgers

Christine Altinis-Kiraz, B.S., M.S., California (Los Angeles); Ph.D., Rutgers

Manese Rabeony, B.S., M.S., Ph.D., Institut Pasteur (France)

Lipika Roychowdhury, B.S., M.S., Christ Church College (India); Ph.D., Harcourt Butler Technological Institute (India)

Assistant Teaching Professors:

Francesca Guerra , Ph.D., Calabria (Italy)

Kim-Phuong Le, B.S., Ph.D., Rutgers

Sanhita Pramanik ; B.S., M.S., Calcutta (India); Ph.D., Rutgers

Kiranjot Sethi , B.S., Ph.D., Punjab (India)

Michael Vitarelli, B.S., Ph.D., Rutgers

Hongmei Zhang, B.S., Jilin (China); M.S., Ph.D., Rutgers

Teaching Instructor

Tatiana Fadeeva; M.S. Moscow State University of Fine Chemical Technologies (Russia); Ph.D., Rutgers

Faculty Emeriti:

Helen M. Berman, A.B., Barnard College; Ph.D., Pittsburgh

David A. Case, B.S., Michigan State; A.M., Ph.D., Harvard

Edward W. Castner Jr., B.A., Rochester; M.S., Ph.D., Chicago

Kuang Yu Chen, B.S., National Taiwan; M.Ph., Ph.D., Yale

Martha Cotter, B.A. Southern Illinois; Ph.D., Georgetown

Lionel Goodman, B.A. New York; Ph.D., Iowa State

Rolfe Herber, B.S. California (Los Angeles); Ph.D., Oregon State

Gregory F. Herzog, B.A., Cornell; M.A., Ph.D., Columbia

Stephan Isied, B.S., M.S., American University (Beirut); Ph.D., Stanford

Roger A. Jones, B.S., Delaware; Ph.D., Alberta (Canada)

Joachim Kohn, B.Sc., Hebrew (Israel); M.Sc., Ph.D., Weizmann Institute (Israel)

John Krenos, B.A., Connecticut; M.S., Ph.D., Yale

Karsten Krogh-Jespersen, M.S., Ph.D., New York

Gerald S. Manning, Ph.D., California (San Diego)

Laurence S. Romsted, A.B., DePauw; Ph.D., Indiana

Heinz D. Roth, Dipl. Chem., Dr. Rer. Nat., Köln (Germany)

Ronald R. Sauers, B., Penn State; Ph.D., Illinois

Irwin Tobias, Ph.D., Princeton

Sidney Toby , B.S., London; Ph.D., McGill

Chemistry 160 (SAS)

Learning Goals

Learning Goals

Students will demonstrate mastery of the body of knowledge specified by the core chemistry curriculum. Students at the upper level will apply what they have learned to problems that require the evaluation of the scientific literature and the design of studies to test hypotheses. Students will use quantitative methods, both analytical and statistical, for modeling and interpreting the behavior of chemical systems. Students will be familiar with the basic experimental methods of organic, inorganic, analytical, and physical chemistry. Students will communicate clearly, both orally and in writing, the methods used in chemical scholarship and research and the results obtained with them.

Chemistry 160 (SAS)

Entry Requirements for the Major and Minor in Chemistry

Entry Requirements for the Major and Minor in Chemistry

Students wishing to declare a major or minor in chemistry must have successfully completed one semester of a general chemistry course for science majors (01:160:159, 161, 163, or the equivalent) with a grade of C or better. A score of 4 or 5 on the Advanced Placement test or appropriate transfer credit from another institution is also acceptable. Petitions for exceptions may be addressed to the vice chair of the undergraduate program.

Chemistry 160 (SAS)

Major Requirements

Major Requirements

The Department of Chemistry and Chemical Biology offers a program of study that provides broad and comprehensive training in all areas of modern chemistry. A certain core of courses is required for completion of the major in chemistry. Included is coursework in the four major subdisciplines of chemistry--inorganic, organic, physical, and analytical--as well as work in mathematics and physics. A minimum grade-point average of 2.0 in all chemistry courses is required for graduation.

Within the program, the following six options permit students to select an area of concentration that reflects their particular interests and career goals:

- core option (A)
- general American Chemical Society option (B)
- chemical biology option (C)
- environmental option (D)
- business/law option (E)
- chemical physics option (F)
- and forensic chemistry option (G)

Normally, this selection is made in consultation with a chemistry adviser in the semester that the major is declared.

The required core courses for option A are listed below. Completion of these courses satisfies the requirements in chemistry for graduation. Additional advanced and research courses are required in options B, C, and D, each of which leads to a degree certified by the American Chemical Society (ACS). Degree options also are available for students interested in using chemistry as a basis for interdisciplinary training (options E, F). For options E and F, courses marked with an asterisk (*) or two (**) in the core are substituted by appropriate courses from other disciplines. The required additional courses or substitutions are described under the individual options.

Some options require upper-level courses in disciplines other than chemistry. These courses may have as prerequisites lower-level courses in those other disciplines. When planning the courses for an option, students should make sure to research the prerequisites well in advance to avoid being prevented from entering a particular course.

An advanced chemistry course is a course that is not part of the core and has a major portion of the 160 (Chemistry) curriculum as a prerequisite, including physical chemistry, in most cases. All 400-level courses offered by the department are considered advanced courses.

Career Options: The curriculum is designed to permit the student a wide range of career choices, including, but not limited to, chemistry, medicine, law, business, chemical physics, environmental science, and secondary school teaching.

Required Courses for All Major Options

01:160:161-162 General Chemistry (4,4) or 01:160:163-164 Honors General Chemistry (4,4)

01:160:171 Introduction to Experimentation (1)

01:160:251 Analytical Chemistry (3)

01:160:307-308 Organic Chemistry (4,4) or 01:160:315-316 Honors Organic Chemistry (4,4)

01:160:309-310 Organic Chemistry Laboratory (2.5,2.5) *

01:160:327-328 Physical Chemistry (4,4) or 01:160:341-342 Physical Chemistry: Biochemical Systems (3,3)***

01:160:329 Experimental Physical Chemistry (2.5)

01:160:348 Instrumental Analysis (3)

01:160:351 Inorganic Chemistry 1 (3)

01:160:352 Inorganic Chemistry 2 (1.5) or 01:160:353 Inorganic Chemistry 3 (1.5)

01:160:491-492 Seminar in Chemistry (1,1)

01:640:151-152 Calculus for Mathematical and Physical Sciences (4,4)

01:640:250 Introductory Linear Algebra (3)*

01:640:251 Multivariable Calculus (4)

01:750:203-204 General Physics (3,3)**

01:750:205-206 General Physics Laboratory (1,1)**

Core Option (A). For students who plan to seek immediate employment as chemists, and who do not seek certification by the American Chemical Society.

Required: Chemistry core courses

General ACS Option (B). For students who seek to find immediate employment as chemists, or who plan to attend graduate or medical school. Leads to a degree certified by the American Chemical Society.

Required: In addition to the chemistry core courses, 4 credits of senior-level research, one semester of biochemistry [01:694:407 Molecular Biology and Biochemistry (3) or 11:115:403 General Biochemistry (4)], and one advanced course in chemistry

Chemical Biology Option (C). For students whose interests are in the application of chemistry to the solution of biological problems. Appropriate for students who plan to attend graduate school in chemistry or related biological sciences or medical school, or who plan to seek immediate employment. Leads to a degree certified by the American Chemical Society.

Required: In addition to the chemistry core courses, 4 credits of senior-level research, one semester of biochemistry [01:694:407 Molecular Biology and Biochemistry (3) or 11:115:403 General Biochemistry (4)], and one course from the following:

01:160:418 Bioorganic Mechanisms (3) or 11:115:412 Protein and Enzyme Chemistry (3)

01:160:437 Physical Chemistry of Biological Systems (3) or 11:115:410 Physical Biochemistry (3)

01:160:476 Bioinorganic Chemistry (3)

01:694:408 Molecular Biology and Biochemistry (3) or 11:115:404 General Biochemistry (3)

Environmental Option (D). For students whose interests are in the application of chemistry to environmental problems, who plan to seek employment in environmentally related areas, or who plan to attend graduate school. Leads to a degree certified by the American Chemical Society if one additional course in biochemistry is taken [01:694:407 Molecular Biology and Biochemistry (3) or 11:115:403 General Biochemistry (4)].

Required: In addition to the core courses, 4 credits of senior-level research and two courses from the following:

01:160:415 Theory and Interpretation of Organic Spectra (3)

01:160:451 Analytical Spectroscopy (3)

01:460:304 Introduction to Geochemistry (4)

01:460:417 Environmental Geochemistry (3)

11:375:422 Air Sampling and Analysis (3)

11:375:444 Water Chemistry (3)

11:628:472 Chemical Oceanography (4)

Business/Law Option (E). For students who seek business or law careers that require a scientific background. Appropriate for those seeking nonlaboratory employment in industry as well as those planning to attend graduate school in business or law.

Required substitutions in the core curriculum: For the following two courses from the list of core courses, 01:160:310 Organic Chemistry Laboratory (2.5) and 01:640:250 Introductory Linear Algebra (3), substitute three business or business-related courses. One of the three courses must be chosen from the following:

01:355:302 Scientific and Technical Writing (3)

01:830:373 Organizational and Personnel Psychology (3)

33:010:272 Introduction to Financial Accounting (3)

The remaining courses must be at the 200 level or above and offered in accounting, communication, economics, finance, management, or marketing. Students electing this option should consult with the vice chair of the undergraduate program in chemistry as early as possible for assistance in selecting the courses for the option and in meeting professional or graduate school requirements.

Chemical Physics Option (F). For students whose interests are in chemical physics and who plan to attend graduate school.

Required substitutions in the core curriculum: For 01:750:203-204 General Physics (3,3), substitute either 01:750:123-124 Analytical Physics (2,2) and 01:750:227-228 Analytical Physics IIA, IIB (3,3) or 01:750:271-272-273 Honors Physics (3,3,3). For 01:750:205-206 General Physics Laboratory (1,1), substitute either 01:750:229-230 Analytical Physics II Laboratory (1,1) or 01:750:275-276 Classical Physics Laboratory (1,1). For 01:160:310 Organic Chemistry Laboratory (2.5) and 01:160:348 Instrumental Analysis (3), substitute 01:640:252 Elementary Differential Equations (3) and 01:750:381 Mechanics (3) and 01:750:385 Electromagnetism (3).

Students who choose the chemical physics option only after having taken 01:750:203-204 General Physics (3,3) and 01:750:205-206 General Physics Laboratory (1,1) normally should take 01:750:323 Advanced General Physics (3) before enrolling in either 01:750:381 Mechanics (3) or 01:750:385 Electromagnetism (3). A physics adviser should be consulted if there is uncertainty about the proper preparation for any physics course in this option.

Required advanced courses: Two courses chosen from the following:

01:160:421 Atomic and Molecular Structure (3) or 01:750:361 Quantum Mechanics and Atomic Physics (3)

01:160:425 Thermodynamics I (3)

01:160:434 Kinetics (3)

01:750:406 Introductory Solid State Physics (3)

01:750:417 Intermediate Quantum Mechanics (3)

Two semesters of senior-level research of at least 3 credits each may be used as a substitute for one advanced course.

The major in chemistry provides an excellent basis for those students who wish to teach in secondary school. Additional requirements for students interested in certification as teachers are set by the Graduate School of Education, which should be consulted for details.

Forensic Chemistry Option (G). The forensic chemistry option is intended for undergraduate students with a strong career interest in forensic science.

Required substitutions in the core curriculum:

For 01:160:327-328 Physical Chemistry (4,4) or 341-342 Physical Chemistry Biological Systems (3,3), substitute 01:119:115 General Biology (4) and either 01:694:407 Molecular Biology and Biochemistry (3) or 11:115:403 General Biochemistry (4)

For 01:640:251 Multivariable Calculus (4), 01:640:250 Linear Algebra (3), and 01:640:252 Elementary Differential Equations (3), substitute 01:960:379 Statistics (3).

For 01:160:329 Experimental Physical Chemistry (2.5), substitute 01:160:348 Instrumental Analysis (3).

Required additions to the core curriculum: The following courses in the criminal justice program: 01:202:201 Criminal Justice (3); 01:202:202 Police (3); 01:202:205 Criminal Procedure (3); 01:202:351,352 Forensic Science (3,3).

Those students whose needs are not met by any of these options may plan an individual program through consultation with a departmental adviser. Individual programs require written approval of the department chair.

*This course requires a substitute course in option E.
**This course requires a substitute course in option F.
***This course is recommended in option C.

Minor Requirements

Minor Requirements

A core of courses is required for a minor in chemistry. The core includes general introductory and organic chemistry. Additional laboratory work and upper-level courses in either inorganic or physical chemistry are required for completion of the minor.

Required Core Courses

The following courses are required of all chemistry minors:

01:160:161-162 General Chemistry (4,4) or 01:160:163-164 Honors General Chemistry (4,4)

01:160:171 Introduction to Experimentation (1)

01:160:307-308 Organic Chemistry (4,4) or 01:160:315-316 Honors Organic Chemistry (4,4)

Inorganic Chemistry Option

The following courses are required for the inorganic chemistry option:

01:160:311 Organic Chemistry Laboratory (2) or 01:160:309 Organic Chemistry Laboratory (2.5)

01:160:351 Inorganic Chemistry 1 (3)

01:160:352 Inorganic Chemistry 2 (1.5) or 01:160:353 Inorganic Chemistry 3 (1.5)

Physical Chemistry Option

The following courses are required for the physical chemistry option:

01:160:311 Organic Chemistry Laboratory (2) or 01:160:309 Organic Chemistry Laboratory (2.5) or 01:160:251 Analytical Chemistry (3)

01:160:327-328 Physical Chemistry (4,4) or 01:160:341-342 Physical Chemistry: Biochemical Systems (3,3)

Chemistry Education Option

The following chemistry courses are required for the chemistry education option:

01:160:311 Organic Chemistry Laboratory (2) or 01:160:309 Organic Chemistry Laboratory (2.5)

6 credits from 01:160:251 Analytical Chemistry (3), 01:160:327-328 Physical Chemistry (4,4), 01:160:341-342 Physical Chemistry: Biochemical Systems (3,3), 01:160:351 Inorganic Chemistry 1 (3), 01:160:352 Inorganic Chemistry 2 (1.5), or 01:160:353 Inorganic Chemistry 3 (1.5)

01:160:387 Introduction to Chemistry Education (3)

01:160:499 Introduction to Teaching Chemistry Lab (3)

The physics requirement for the chemistry education option consists of one semester of physics lecture and one semester of physics laboratory:

01:750:193 Physics for the Sciences (4) or 01:750:201 Extended General Physics (5) or 01:750:203 General Physics (3) or 01:750:271 Honors Physics I (3) and 01:750:205 General Physics Laboratory (1) or 01:750:275 Classical Physics Laboratory (1)

Chemistry 160 (SAS)

Certificate in Chemistry Education

Certificate in Chemistry Education

A selection of courses and activities leading to a certificate in chemistry education offers high-achieving students who are interested in the sciences and education the opportunity to receive valuable training and experience in chemistry education. This certificate is available to both chemistry majors and nonmajors; is offered to top-performing students in general chemistry and organic chemistry; and is an excellent opportunity to work closely with professors who may then provide informed letters of recommendation. The certificate is a credential that demonstrates outreach and leadership skills important for students pursuing a career path in chemistry, education, or the health sciences.

The certificate requires coursework in general chemistry, organic chemistry, and the teaching pedagogy of peer instruction. It also requires two courses that provide firsthand chemistry teaching experiences. Participants will learn to use modern online tools for teaching, plan and execute a chemistry lecture demonstration to a live class in coordination with the Rutgers Chemistry Lecture Demonstration Facility, and videotape themselves teaching in front of a large classroom. Each participant receives written and oral feedback on his or her teaching from students, peers, and professors, and discusses experiences and ways to teach better.

By the end of the certificate program, students will develop and refine their teaching-related skills including critical thinking, teamwork, communication, and problem solving. They will improve their mastery of general and organic chemistry. Finally, each participant in the certificate program will create a teaching portfolio that contains a record of chemistry education training and teaching experience that may become a permanent part of his or her professional credentials.

Chemistry Course Requirements

- 01:160:161-162 or 163-164 General Chemistry I,II (4,4) (8 credits total)
- 01:160:171 Introduction to Experimentation (1)
- 01:160:307-308 or 315-316 Organic Chemistry I,II (4,4) (8 credits total)
- 01:160:311 Organic Chemistry Laboratory (2)

Education and Experiential Course Requirements

- 01:090:322 Pedagogy of Peer-Led Learning (3)
- 01:160:493-494 Internship in Chemistry (variable) (2 credits total required)
- 01:160:499 Introduction to Teaching Chemistry Lab (3)

Notes: A total of 2 credits of 01:160:493-494 are required. An internship in chemistry can be taken for one or more credits, and students can select an internship in either general chemistry or organic chemistry. A total of 2 credits must be taken, but students have flexibility to take either general chemistry or organic chemistry internships, or both. These 2 credits may be taken over two semesters (1 credit each semester), or in the same semester. If an internship is taken for multiple credits in a semester, students should enroll for only one internship, either general chemistry or organic chemistry.

Written Requirements

Weekly Reflections
Participants in the certificate program are expected to post a blog for each week that they teach. These blog posts will serve as a reflection on what worked well and what could be improved. The blogs also serve as a basis for peer discussion. Teaching interns (TI) and lab teaching assistants (TA) are expected to read the blogs, comment on them, and engage in discussion. These reflections will be monitored by professors and the head TI and lab TA, who will also make comments and give advice where needed.

Teaching Portfolio
Students must create and maintain a portfolio detailing their different teaching experiences and their outcomes. At the end of each semester of teaching, students must submit an updated portfolio, including a summary of all feedback and evaluations, for review. Examples of teaching portfolios will be given to each participant, who will be guided in the development of his or her own portfolio. Each participant keeps the final teaching portfolio as part of their professional portfolio.

Chemistry 160 (SAS)

Departmental Honors Program

Departmental Honors Program

Qualification. To qualify, a student must have attained at the end of the junior year a cumulative grade-point average of at least 3.0 and a grade-point average of at least 3.4 in courses required for the major. Preferably by the end of the junior year, but no later than the first week of the senior year, the student should apply formally to the chemistry undergraduate vice chair for admittance to the chemistry honors program. A student with an undergraduate cumulative grade-point average of at least 3.0 and a grade-point average between 3.0 and 3.4 in courses required for the major also may be admitted upon review by the Undergraduate Research and Honors Committee.

Honors in Chemistry. In order to graduate with honors in chemistry, accepted candidates are expected to:

- maintain a grade-point average of at least 3.4 in courses required for the major;
- complete at least 3 credits per semester in an independent senior research project (01:160:497-498); and
- make an oral presentation at the end of the senior year.

Honors Thesis. In order to graduate with high honors or highest honors in chemistry, accepted candidates are expected to fulfill the honors requirements listed above and, in addition, write a thesis based on their independent research in chemistry and defend this thesis before a committee comprised of their research adviser and one additional faculty member selected from the Undergraduate Research and Honors Committee. A successful defense of the thesis satisfies requirement for an oral presentation.

The designations of high honors and highest honors will normally require grade-point averages greater than 3.6 and 3.8, respectively, in courses required for the major. If the thesis defense is sufficiently meritorious, the thesis committee may recommend high or highest honors for a student who has excelled in research and has a lower grade-point average than listed above. In all cases, the final recommendation will be made by the Undergraduate Research and Honors Committee.

Students in the School of Arts and Sciences (SAS) will be designated SAS Paul Robeson Scholars. An outstanding thesis qualifies a student to be considered for a Henry Rutgers Scholars Award. (See here for more details.)

As an alternate path to departmental honors, students in the School of Environmental and Biological Sciences may elect to apply to the George H. Cook Scholars Program. (See here for program and deadline information.)

Major Program Learning Goals and Requirements

Major Program Learning Goals and Requirements

Learning Goals

Majors in Chinese will acquire in-depth knowledge of the Chinese language as well as the literature and culture of China. Majors will be able to demonstrate oral, reading, and written proficiency in the language and develop critical skills in analyzing and interpreting literary, historical, and cultural texts. Students will acquire the literary, cultural, and linguistic competency necessary for continuing onto postgraduate study or employment requiring such cultural knowledge and/or linguistic skill. Students will learn the cultural heritage of China within the larger context of East Asia through a wide and coherent curriculum, which includes courses in the following humanities and social science disciplines: literature, visual culture, history, religion, language, and linguistics.

Requirements

The major in Chinese requires 36 credits distributed as follows:

1. Six courses in Chinese language above the 100 level, including at least one course in classical Chinese.
2. Four courses in Chinese literature, history, and/or culture (under subject code 165).
3. One course chosen from East Asian Civilizations: Traditional Era (098:241) OR East Asian Civilizations: Modern Era (098:242) OR Global East Asia (098:250).
4. Capstone Seminar on East Asian Societies (098:444).

Minor Program Learning Goals and Requirements

Minor Program Learning Goals and Requirements

Learning Goals

Minors will be introduced to the cultural heritage of China through courses on literature, history, visual culture, language, and linguistics. Minors will be able to communicate effectively (listening, speaking, and writing) in standard Chinese (Mandarin) and will learn critical skills in analyzing and interpreting literary and cultural materials appropriate to the student's area of specialization. Students will achieve advanced linguistic competency and be able to demonstrate practical skills in using Chinese for translation and interpretation. Students will be able to relate relevant issues to other areas in the humanities.

Requirements

The minor in Chinese consists of four courses in Chinese above the 100 level, in both modern and classical Chinese, plus two additional elective courses (of 3 credits or more) in the area of concentration (subject code 165). The elective courses may be language courses or culture courses.

Chinese 165 (SAS)

Departmental Honors Program

Departmental Honors Program

To qualify, a student must have a cumulative grade-point average of 3.0 or better and a grade-point average of 3.4 or better in the major at the end of the junior year. At that time, the student should formally apply to the chair for admission to the honors program. In addition to completing all requirements of the Chinese major, candidates are required to register for 01:165:497-498 Honors in Chinese, write an honors paper under the guidance of an assigned faculty member, and take a comprehensive examination at the end of their senior year.

Chinese 165 (SAS)

Chinese Culture Courses

Chinese Culture Courses

01:165:210 ***The Chinese Language: Description and History (3)***
Phonology, grammar, and the writing system of Mandarin Chinese; brief discussion of other major dialects of China; the influence of the Chinese language on Asian languages; and the role of language in Chinese culture.

01:165:211 ***Language and Identity in Modern Chinese Societies (3)***
Introduction to fundamental concepts in sociolinguistics and current issues in language and society in China and the Chinese diaspora, including language and ethnic identity, migrant identity, gender identity, national identity, and language and identity under modernization and globalization.

01:165:215 ***Introduction to Chinese Civilization (3)***
Material and cultural achievements of Chinese civilization, including such areas as the fine arts, literature, religion, and thought, with emphasis on individuals, institutions, events, and ideas that shaped Chinese history.

01:165:220 ***Chinese Classics and Thought: Confucianism, Daoism, and Buddhism (3)***
Introduction to Confucianism, Daoism, and Chinese Buddhism, with emphasis on their origins and interrelations, their influence on Chinese culture, and their values in the modern world.

01:165:241 ***Classical Chinese Prose and Poetry in Translation (3)***
Introduction to classical Chinese literature, with an emphasis on the prose and poetry of the Tang and Song dynasties (618-1279), as well as their cultural and historical contexts.

01:165:242 ***Classical Chinese Popular Fiction and Drama in Translation (3)***
Chinese literature from the 14th century to the present, with emphasis on traditional fiction and drama.

01:165:262 ***Chinese Cinema (3)***
Cinematic developments in China in the past two decades. Topics reflecting the emergence of a new aesthetic, and recent political, social, and cultural changes.

01:165:264 ***Chinese Drama and Performing Arts (3)***
Survey of Chinese dramatic performance from traditional times to the present, including opera, storytelling, and shadow plays, focusing on regional origins and variations.

01:165:310 ***Modern Chinese Literature in Translation (3)***
Reading selections from four historical moments: enlightenment, revolution, socialism and post-Mao according to the standards that each piece can offer a wealth of information about their periods.

01:165:341,342 ***Major Traditions in Chinese Thought (3,3)***
Rise and development of pristine Confucianism, Mohism, Taoism, Legalism, the School of Names, Sinicized Buddhism, and Neo-Confucianism; their influences on Chinese civilization, and their reevaluation in the light of new tendencies of thought after contact with the West.

01:165:350 ***Chinese Martial Arts Film and Culture (3)***
Introduction to Chinese martial arts literature, film, history, and culture.

01:165:461 ***History of Chinese Literature: Beginnings to 1300 (3)***
Introduction to traditional Chinese literature from its beginnings through the Song dynasty (960-1279), with emphasis on major narrative and poetic genres, as well as their cultural and historical contexts.

01:165:462 ***History of Chinese Literature: 1300 to 1900 (3)***
Introduction to traditional Chinese literature from the Yuan through Qing dynasties (1300-1900), with emphasis on major narrative and dramatic genres, as well as their cultural and historical contexts.

01:165:463 ***Nature in Chinese Literature (3)***
An examination of the representations of nature in major Chinese literary genres and human relations to nature during the early and medieval periods. Special attention paid to general shifts in conceptions of nature as well as larger questions of experience, perception, and representation.

01:165:470 ***The City in Modern Chinese Literature and Film (3)***
Modern literary and cinematic imagination of Chinese cities.

01:165:471 ***Early China in the World - Cosmography, Epistemology, and Encountering the Strange (3)***
An interdisciplinary examination of the perspectives from which early Chinese perceived themselves, their realm, the world, and beyond from High Antiquity to the medieval period.

01:165:473 ***The Silk Road: A History of Cultural and Material Exchanges (3)***
An interdisciplinary introduction to the history of the Silk Road with a focus on the cultural and material exchanges between the peoples and cultures it connected over the period 500 BCE to 1500 CE.
Credit not give for both this course and 01:098:473.

01:165:476 ***Women in Premodern China (3)***
An interdisciplinary seminar on women in premodern China with a focus on their roles in shaping Chinese cultural, political, religious, and social practices.

01:165:480 ***Cultural Memory in Contemporary China (3)***
Examines the representation of cultural memories in contemporary Chinese-speaking communities. Study of key primary, theoretical, and methodological texts on cultural memory.

01:165:482 ***Cold War Chinese Literature and Film (3)***
Examines Chinese literary modernity from the vantage point of the 1949 Cold War division in East Asia. Explores questions of revolution, migration, diaspora, colonialism, socialist realism, the captive mind, and the cultural Cold War through literature and film.

01:165:484 ***Youth Culture in Global Chinese Films (3)***
Through film analysis and criticism, this course examines youth as a particular cultural category to explore rapid changes that mark contemporary global Chinese-language communities.

01:165:486 ***Women in Modern Chinese Literature and Film (3)***
This course examines the representation of gender and sexuality in modern Chinese literature and film from the early 20th century to the present by discussing a wide range of key literary and filmic texts created in mainland China, Taiwan, and Hong Kong.

01:165:493,494 ***Independent Study (3,3)***
Supervised independent reading and study of a topic selected by the student and approved by the instructor.
Prerequisites: Permission of instructor and department.

01:165:497-498 ***Honors in Chinese (6,6)***
Both semesters must be completed to receive credit.

Chinese Language Courses

Chinese Language Courses

01:165:101,102 ***Elementary Chinese (4,4)***
Introduction to sounds, structure, and the writing system of modern Chinese (Mandarin); practice in speaking and reading.
Prerequisite for 01:165:102: 01:165:101 or equivalent.

01:165:103 ***Elementary Chinese Conversation (2)***
Guided conversation practice, and vocabulary review and enhancement. Builds on and consolidates foundation of student in elementary and intermediate Chinese; develops speaking skills. Texts and discussion topics related to college life and Chinese daily life and culture.
Prerequisite: 01:165:101 or equivalent.

01:165:107,108 ***Basic Spoken Chinese (4,4)***
Introduces the fundamentals of spoken Chinese. Focuses on pronunciation, mastery of basic spoken vocabulary, and conversational fluency. Does not teach written Chinese.

01:165:111,112 ***Chinese Calligraphy (2,2)***
Principles, techniques, and art of Chinese calligraphy; techniques of using the Chinese writing brush, writing styles, and construction of Chinese characters.
No previous knowledge of Chinese necessary. For Chinese language students, recommended to be taken simultaneously with 01:165:101,102. Prerequisite: 01:165:111 for 01:165:112.

01:165:121 ***Beginning Chinese Reading and Writing for Mandarin Speakers (3)***
Development of foundation in standard Chinese orthography, grammar, and vocabulary. Practice in reading, writing, and oral skills.
Credit not given for both this course and 01:165:101 or 01:165:102. Prerequisite: Speaking proficiency in Chinese.

01:165:201,202 ***Intermediate Chinese (4,4)***
Development of language skills: vocabulary building, oral proficiency, listening, and reading comprehension.
Prerequisite: 01:165:102 or equivalent for 01:165:201; 01:165:201 or equivalent for 01:165:202.

01:165:205 ***Intermediate Chinese in China (4)***
Consolidation and development of elementary Chinese conversation, reading, and writing skills through immersion in a Chinese setting on-site in China. Topics and activities related to Chinese society and culture.
Prerequisite: 01:165:102 or equivalent.

01:165:207,208 ***Intermediate Spoken Chinese (4,4)***
Continuing development of proficiency in modern standard Chinese (Mandarin) through Pinyin Romanization; development of speaking and oral-aural skills for students who wish to acquire a working competence in the language for communicative purposes. No instruction in reading or writing Chinese characters.
Prerequisite: 01:165:108 or equivalent for 01:165:207; 01:165:207 or equivalent for 01:165:208. Not open for credit to heritage speakers of Chinese (Mandarin).

01:165:222 ***Intermediate Chinese Reading and Writing for Mandarin Speakers (3)***
Continued study of standard Chinese orthography, grammar, and vocabulary. Practice in reading, writing, and oral skills.
Prerequisite: 01:165:121 or equivalent. Credit not given for both this course and 01:165:201 or 01:165:202.

01:165:301,302 ***Advanced Modern Chinese (3,3)***
Readings in a variety of literary styles with introduction to simplified characters; written and oral exercises.
Prerequisite: 01:165:202 or 01:165:222 or equivalent for 01:165:301; 01:165:301 or equivalent for 01:165:302.

01:165:305 ***Advanced Chinese in China (4)***
Consolidation and development of intermediate to advanced Chinese conversation, reading, and writing skills through immersion in a Chinese setting on-site in China. Topics and activities related to Chinese society and culture.
Prerequisite: 01:165:202 or 222 or equivalent.

01:165:321,322 ***Introduction to Classical Chinese (3,3)***
Grammar and analysis of classical Chinese (wen-yan or literary Chinese) and reading of basic texts in the language.
Prerequisite: 01:165:202 or 222.

01:165:361 ***Business Chinese (3)***
Fundamental principles governing commercial organizations and foreign trade in China, Taiwan, Hong Kong, and other Chinese-speaking regions in East Asia; practice in business correspondence.
Prerequisite: 01:165:301 or 321 or equivalent.

01:165:362 ***Business Chinese II (3)***
Continuation of 01:165:361 with emphasis on practice in advanced business correspondence.
Prerequisite: 01:165:361 or equivalent.

01:165:371 ***Contemporary Expository Chinese (3)***
Reading and discussion of selections from scholarly writings on history, philosophy, and political and social issues in modern Chinese prose. Analysis of structural patterns and practice in writing.
Prerequisite: 01:165:301 or 321 or equivalent.

01:165:393 ***Guided Research in China: Global and Local (3)***
Guided reading, study, and analysis of a topic on China in the 21st century selected by the student and approved by the instructor.
Prerequisite: 01:165:102.

01:165:401 ***Advanced Chinese Conversation and Composition (3)***
Practice of speech conversation, discussion, and composition in Mandarin Chinese; exercises in Chinese grammar and rhetoric.
Prerequisite: 01:165:302 or 322 or equivalent.

01:165:402 ***Advanced Chinese Conversation and Composition II (3)***
Continuation of 01:165:401 with emphasis on composition and speechmaking in Mandarin Chinese and exercises in Chinese grammar and rhetoric.
Prerequisite: 01:165:401 or equivalent.

01:165:410 ***Classic Chinese Novels (3)***
Analysis of such classic Chinese novels as *San-kuo yen-i* (*The Romance of the Three Kingdoms*), *Shui-hu chuan* (*Water Margin*), *Hsi-yu-chi* (*Monkey*), and *Hung-lou meng* (*Dream of the Red Chamber*).
Prerequisite: 01:165:302 or 322 or equivalent.

01:165:412 ***Chinese Poetry: Major Themes and Texts (3)***
Reading, analysis, and discussion of Chinese poetry in various forms from the classical period to the present.
Prerequisite: 01:165:302 or 322 or equivalent.

01:165:419,420 ***Readings in Classical Chinese Literature (3,3)***
Such major literary works as *Shih-ching*, Mencius, *Shih-chi*, T'ang poetry, Sung tz'u, Yuan drama, and Ming-Ch'ing fiction.
Prerequisite: 01:165:302 or 322 or equivalent.

01:165:424 ***The Origin and Development of Chinese Writing (3)***
Investigation of the early evolution of Chinese writing within the context of the beginnings of Chinese civilization. Emphasis on textual understanding of the oracle bone inscriptions of the Shang period (ca. 1700 to 1100 BC).
Pre- or corequisite: 01:165:302 or 322 or equivalent.

01:165:425 ***Chinese Dialects (3)***
Introduction to and description of Chinese dialects with an emphasis on their relationships, historical origins, and development from earliest evidence of diversity to present.
Prerequisite: 01:165:302 or 322 or equivalent.

01:165:430 ***Advanced Chinese Grammar (3)***
Analysis and discussion of Chinese grammar. Explanation of linguistic concepts through problem-solving exercises on Chinese word formation, sentence grammar, and paragraph structure.
Prerequisite: 01:165:302 or equivalent.

01:165:451,452 ***Readings in Modern Chinese Literature (3,3)***
Selections from representative literary, historical, and ideological works of modern China; emphasis on stylistic and linguistic variations.
Prerequisite: 01:165:302 or 322 or equivalent.

01:165:490 ***Seminar in Chinese Literature and Thought (3)***
Readings and research on topics in Chinese literature and thought of either the classical or modern period.
Prerequisite: Permission of instructor.

01:165:493,494 ***Independent Study (3,3)***
Supervised independent reading and study of a topic selected by the student and approved by the instructor.
Prerequisites: Permission of instructor and department.

01:165:497-498 ***Honors in Chinese (6,6)***
Both semesters must be completed to receive credit.

Cinema Studies 175 (SAS)

CINEMA STUDIES 175

School of Arts and Sciences

Website: Here

Program Director: Susan Martin-Márquez

Faculty:

Sandy Flitterman-Lewis, English; Ph.D., California (Berkeley)

David Fresko, Cinema Studies; Ph.D., Stanford

Regina Karl, German; Ph.D., Yale

Susan Martin-Márquez, Spanish and Portuguese; Ph.D., Pennsylvania

Albert G. Nigrin, Cinema Studies; M.F.A., Rutgers

Meheli Sen, AMESALL; Ph.D., Emory

Cinema Studies 175 (SAS)

Learning Goals

Learning Goals

Majors and minors will achieve mastery of the close textual analysis of moving image media, a crucial form of visual literacy in the 21st century. They will be able to demonstrate knowledge of the history of the film medium and major international film movements and creative figures, and will gain familiarity with the conventions of narrative and genre in the cinema, as well as with more experimental forms of filmmaking. Majors and minors will employ critical thinking and basic theoretical concepts to achieve an understanding of the interrelationship of film with shifting social, political, and cultural trends. They will also develop their critical writing skills, and produce an extended analytical and/or research paper in a seminar setting in the program's capstone course.

Cinema Studies 175 (SAS)

Major Program

Major Program

The interdisciplinary major in cinema studies consists of 11 courses, completed with the grade of C or better, and with a minimum of five courses at the 300 level or above. All majors must complete the following core requirements:

1. Both semesters of 01:175:201,202 Introduction to Film I,II (01:175:210 may be substituted for either 01:175:201 or 202);

2. Three electives, from the list of preapproved electives or from among other courses approved by the program director; and

3. Senior Seminar in Cinema Studies (01:175:425) or the Seminar: Film Theory (01:175:420).

A flyer listing qualifying elective courses is circulated during each preregistration period, and course descriptions are posted on the program's website. Cinema studies majors are encouraged to complete other courses in film history, analysis, or theory before enrolling in a filmmaking/production course.

Please note that cinema studies courses generally include an additional mandatory weekly meeting time for screenings, or require students to view films outside of class.

Courses that are primarily about film and may count as credits toward the major and minor are listed under the subject codes 175 (Cinema Studies), 354 (English/Film Studies), 013 (AMESALL), 050 (American Studies), 082 (Art History), 195 (Comparative Literature), 420 (French), 470 (German), 560 (Italian), 565 (Japanese), 563 (Jewish Studies), 940 (Spanish and Portuguese), and 988 (Women's, Gender, and Sexuality Studies).

01:175:210 may be substituted for either 01:175:201 or 202. No course may be used to fulfill more than two requirements.

Transfer students and study-abroad students must obtain approval of courses for the major from the program director. Students are urged to consult the program director for further information.

Grades of C or better must be earned in all courses used to fulfill the requirements of the major.

Cinema Studies 175 (SAS)

Major Requirements and Options

Major Requirements and Options

Major Requirements

The major consists of a minimum of 11 courses and offers two options, one in history and theory and one in production and criticism. Please see the program director for an up-to-date list of preapproved electives.

All majors must complete the following core requirements:

1. Both semesters of 01:175:201,202 Introduction to Film I,II (01:175:210 may be substituted for either 01:175:201 or 202);

2. Three electives, from the list of preapproved electives; and

3. Senior Seminar in Cinema Studies or Seminar: Film Theory.

Options within the Major

The program offers two options by which to structure the major. Each option requires students to complete 11 courses, including the core requirements listed above. Please see the program director for an up-to-date list of preapproved electives.

A. History and Theory Option

In addition to the requirements listed under Major Requirements above, this option requires the following:

1. Survey courses: American Cinema I (01:175:315) and American Cinema II (01:175:316) OR World Cinema I (01:175:320) and World Cinema II (01:175:321);

2. Non-U.S. cinemas: two courses selected from a preapproved list; and

3. One theory course: Seminar in Film Theory (01:175:420) OR Theories of Women in Film (01:354:385).

Students may include as electives additional courses listed as non-U.S. or theory, if they are not used to fulfill core or option requirements.

B. Production and Criticism Option

In addition to the core requirements listed under Major Requirements above, this option requires the following:

1. Two survey courses: World Cinema I (01:175:320) and World Cinema II (01:175:321)

2. One course in auteur and genre studies, from list below or from other preapproved courses:

01:175:350 Major Filmmakers I (3)

01:175:351 Major Filmmakers II (3)

01:175:352 Hitchcock and Beyond (3)

01:175:390 Global Horror (3)

01:175:370 Film Genres I (3) (may take twice, if different subtitles)

01:354:372 Film Genres II (3) (may take twice, if different subtitles)

01:354:360 Film Noir (4)

01:354:371 Film Melodrama (4)

01:354:374 Science Fiction Film (4)

01:560:320 Mafia Movies: Approaches to Genre Italian and American Film (3)

3. Two production courses, from list below or from other preapproved courses:

01:351:220 Writing for Experimental Film (3)

01:351:303 Creative Writing: Screenwriting for Film (3)

01:351:309 Creative Writing: Digital Composition (3)

01:351:314 Documentary Filmmaking for Writers (3)

01:354:308 The Craft of Screenwriting (3)

07:081:243 Media I-A Introduction to Media Art: Screen/Image/Sound (4)

07:081:244 Media I-B Experimental Practices and Techniques (4)

07:081:343 Media II-A Media Art Installation and Expanded Cinema (4)

07:081:344 Media II-B Media and Performance (4)

07:211:120 Cinematography (3)

07:211:230 2-D Animation

Students may include as electives additional production courses, or courses listed as non-U.S., auteur/genre, or theory, if they are not used to fulfill core or option requirements.

Cinema Studies 175 (SAS)

Minor Program

Minor Program

The interdisciplinary minor in cinema studies consists of seven courses, completed with a grade of C or better, and with a minimum of three courses at the 300 level or above. The courses must be distributed as follows: 1) three required courses, both semesters of 01:175: 201,202 Introduction to Film I,II (01:175:210 may be substituted for either 01:175:201 or 202), and Senior Seminar in Cinema Studies, 01:175:425 (01:175:420 may be substituted for 01:175:425); and 2) four elective courses, chosen from the list below, or from among other courses approved in advance by the program director. A flyer listing qualifying elective courses is circulated during each preregistration period, and posted on the program's website. Please note that only one production/filmmaking course may be counted toward the minor. Cinema studies minors are encouraged to complete several other courses in film history, analysis, or theory before enrolling in a filmmaking course.

Students pursuing a minor in cinema studies must select five courses for the minor that are outside their major. Exception: English majors who pursue a cinema studies minor may include more than two 01:354 courses in their minor program, but only two of those may be counted toward the major.

Please note that cinema studies courses generally include an additional mandatory weekly meeting time for screenings, or require students to view films outside of class.

Required Courses:

01:175:201 Introduction to Film I (3)

01:175:202 Introduction to Film II (3)

As indicated above, 01:175:210 Close Readings of Cinema (3) may be substituted for Introduction to Film I OR Introduction to Film II (01:175:201 or 202)

01:175:425 Senior Seminar in Cinema Studies (3)

As indicated above, 01:175:420 Seminar: Film Theory (3) may be substituted for Senior Seminar in Cinema Studies (01:175:425)

Cinema Studies 175 (SAS)

Courses

Courses

01:175:201 ***Introduction to Film I (3)***
Film study, with emphasis on basic concepts of film analysis (narrative, editing, mise-en-scène, sound) and the historical development of cinema as an institution.

01:175:202 ***Introduction to Film II (3)***
Film study, with emphasis on commercial cinema as an institution (genres, directors, stars) and on nonnarrative types of film (documentary, experimental).

01:175:210 ***Close Readings of Cinema (3)***
Formal analyses of six or seven individual films; emphasis on visual track, soundtrack, and scenario-narrative construction.

01:175:265 ***American Experimental Film and Video (3)***
Survey course focusing on the history and development of the various American experimental cinema movements from its beginnings to the present. In-depth analyses of the structure and content of films by Andy Warhol, Maya Deren, Stan Brakhage, Sidney Peterson, Kenneth Anger, Bruce Baillie, Yoko Ono, and others.
Credit not given for both this course and 01:050:265.

01:175:266 ***Cult Films in American Culture (3)***
The cult film from its origins in the 1920s to its evolution in American culture. Close analyses of cult films paired with readings by J. Hoberman and Jonathan Rosenbaum, Sigmund Freud, and others.
Credit not given for both this course and 01:050:266.

01:175:267 ***American Film Directors (3)***
In-depth analyses of the structure and content of films of Stanley Kubrick, Orson Welles, John Frankenheimer, David Lynch, Val Lewton, Andy Warhol, and others. Emphasis on the mise-en-scène, narrative form, set design, sound, and special effects in the films of these celebrated filmmakers.
Credit not given for both this course and 01:050:267.

01:175:268 *David Lynch and the American Film Avant-Garde (3)*
Focuses on the surreal films of David Lynch and the American Film Avant-Garde. Includes in-depth analyses of the structure and content of many of Lynch's bizarre and unique films including *Eraserhead*, *Mulholland Drive*, and *Blue Velvet*.
Credit not given for both this course and 01:050:268.

01:175:306 *Modern French Cinema (in English) (3)*
Survey of the development of French cinema from World War II to the present day. Emphasis on the historical, sociopolitical, and aesthetic context of films screened.
Credit not given for both this course and 01:420:306.

01:175:320 *World Cinema I (3)*
Developments in French, Italian, British, Russian, and other national cinemas from 1896 to World War II; also examines cross-influences between foreign and American cinema.
Credit not given for both this course and 01:195:320 or 01:354:320.

01:175:321 *World Cinema II (3)*
Major developments in global filmmaking from the 1950s to the present, with an emphasis on specific national and transnational cultures and their industrial and artistic practices.
Credit not given for both this course and 01:195:321 or 01:354:321.

01:175:352 *Hitchcock and Beyond (3)*
A close examination of the films of Alfred Hitchcock and the influence they have cast upon other filmmakers.

01:175:360 *Classics of German Cinema: From Haunted Screen to Hyperreality (3)*
Canonical films of the Weimar, Nazi, and post-war period. Focuses on class, gender, nation, cultural context, and the changing sociopolitical and historical climates in which they arose. Special attention to the issue of film style and to the question of what constitutes the film canon in particular in the case of recent works.
Credit not given for both this course and 01:470:360.

01:175:365 *Bollywood (3)*
A broad overview of the Bollywood industry and its cinematic productions over the years.
Credit not given for both this course and 01:013:365.

01:175:377 *Topics in World Cinema (3)*
Study of a particular region, time period, movement, or theme in world cinema.
Credit not given for both this course and 01:195:377. May be taken more than once, if content is different.

01:175:390 *Global Horror (3)*
Engaging with the horror genre both as a local and transnational phenomenon, interrogation of a vast range of horror films from the 1930s to the present, in order to understand how the often-dismissed genre articulates and amplifies an array of issues.

01:175:398 *Internship in Cinema Studies (3)*
Professional, supervised work in an approved organization or agency; an appropriately designed academic project required.
Prerequisite: Permission of the program before registration. NOTE: This internship is for enrichment and may not be used as elective credit toward the cinema studies major or minor.

01:175:420 ***Seminar: Film Theory (3)***
Major developments in film theory from the silent era to the present; writings on film by Eisenstein, Kracauer, Bazin, Metz, Barthes, and others; practice in different methods to analyze films.

01:175:425 ***Senior Seminar in Cinema Studies (3)***
One or more topics selected for their relevance to the interdisciplinary study of film. Emphasis on advanced problems and issues together with methodology and theory. Extended research paper required on a topic chosen in consultation with the instructor.
Prerequisite: Permission of program director.

01:175:477 ***Advanced Topics in World Cinema (3)***
Intensive study of a particular issue in world cinema, with special attention paid to theoretical approaches. Specific topic announced at preregistration time.
Prerequisite: Permission of instructor. Credit not given for both this course and 01:195:477. May be taken more than once, if content is different.

Cinema Studies 175 (SAS)

Elective Courses (other courses may be preapproved for elective credit)

Elective Courses (other courses may be preapproved for elective credit)

01:175:210 Close Readings of Cinema (3)

01:175:265 American Experimental Film and Video (3)

01:175:266 Cult Films in American Culture (3)

01:175:267 American Film Directors (3)

01:175:268 David Lynch and the American Film Avant-Garde (3)

CLASSICS

(Classical Humanities 190, Greek 190b, Greek and Latin 190c, Latin 190d)

Department of Classics, School of Arts and Sciences

Website: Here

Chair: Serena Connolly

Undergraduate Director: Emily Allen-Hornblower

Distinguished Professor:

Thomas J. Figueira, B.A., Fordham; Ph.D., Pennsylvania

Professors:

T. Corey Brennan, B.A., Pennsylvania; M.A., Oxford; Ph.D., Harvard

Serena Connolly, B.A., Cambridge; M.A., Ph.D., Yale

James McGlew, B.A., M.A., Ph.D., Chicago

Azzan Yadin-Israel, B.A., Hebrew; Ph.D., California (Berkeley) and Graduate Theological Union

Associate Professors:

Emily Allen-Hornblower, B.A., Sorbonne, École Normale Supérieure; M.A., Ph.D., Harvard

Timothy Power, B.A., Yale; M.A., Ph.D., Harvard

Assistant Professors:

Bice Peruzzi, B.A., Perugia (Italy); M.A., Padova (Italy); M.A., Ph.D., Cincinnati

Jeffrey Ulrich, B.A., Rutgers; M.A., Ph.D., Pennsylvania

Associate Teaching Professor:

Kristina Chew, B.A., Princeton; Ph.D., Yale

John Fisher, B.A., Kean College; M.A., Richard Stockton College; Ph.D., Princeton¿

Assistant Teaching Professors:

Salam Al Kuntar, B.A., Damascus University; M.A., University of Liverpool; Ph.D., University of Cambridge

The department offers a major in classics with options in classical humanities, Greek, Greek and Latin, and Latin. Selected courses in history, philosophy, and art history also may count for credit toward the classics major. Students with a strong interest in ancient history may pursue the ancient history and classics option within the history major (see the history section of this catalog). Minors are offered in ancient Greek, Latin, and classical humanities. For more information, consult the departmental website.

Classics (SAS)

Learning Goals

Learning Goals

See here.

- Classics is a broad discipline, characterized by its interdisciplinary nature. Pursuing classics means acquiring fundamental language skills in ancient classical languages (Greek, Latin, and, to a lesser degree, Sanskrit), along with a wide-ranging knowledge of the ancient world.
- Studying classics involves coming to grips with the ancient Greek and Roman civilizations: their myths and literature; their social, military, political, and cultural history; their philosophy; and aspects of their material culture. At every stage, students are led to reflect on the many connections of classics to the modern world, and how these ancient civilizations contributed to shape it.
- As many other humanities disciplines do, classics combines language study with the exploration of questions central to many social sciences. Classics students are led to ponder the mechanisms of human psychology, social organization, and historical evolution, and given an opportunity to appreciate the ways in which the individual and the community relate to, shape, and affect one another.

Classics (SAS)

Major Requirements

Major Requirements

Classics majors choose one of four options. Those who wish to concentrate on one or both ancient languages may choose an option in ancient Greek and Latin, ancient Greek, or Latin. The classical humanities option is for those who wish to pursue a general study of the history, literature, and culture of the classical world. All courses applied to the major must be completed with a grade of C or better.

Classical Humanities Option (Classical Humanities 190). A major who pursues the classical humanities option must complete 36 credits in the department. (Credits from approved classical humanities courses in other departments may be counted among these, as well as courses with a 190, 490, or 580 subject code.) The following are required of every classical humanities major: 1) one course in the Greek or Latin language at the 200 level or above; 2) at least six courses at the 300-level or above.

Greek Option (Greek 190b). A student majoring in classics with emphasis on Greek must take 35 credits in the department, of which 26 credits must be in the ancient Greek language (including at least six courses at the 300 level or above).

Greek and Latin Option (Greek and Latin 190c). A student majoring in classics with emphasis on Greek and Latin must take 35 credits in the department, of which at least 29 credits must be in the ancient Greek and Latin languages. The credits may be distributed between the two languages, but at least 11 credits must be taken in each language. At least six courses must be at the 300 level.

Latin Option (Latin 190d). A student majoring in classics with emphasis on Latin must take 35 credits in the department, of which at least 26 credits must be in the Latin language (including at least six courses at the 300 level or above).

Classics (SAS)

Minor Requirements

Minor Requirements

Classics minors choose one of three options. Those who wish to concentrate on one of the ancient languages may choose an ancient Greek or Latin minor. The classical humanities minor is for those who wish to pursue a general study of the history, literature, and culture of the classical world. All courses applied to the minor must be completed with a grade of C or better.

Classical Humanities (190). A minor in classical humanities requires a minimum of seven courses in the department. (Credits from approved classical humanities courses in other departments may be counted among these, as well as courses with a 190, 490, or 580 subject code.) Of these seven courses, at least three courses must be at the 300 level or above.

Latin (580). A minor in Latin requires a minimum of six courses in the Latin language, including three at or above the 300 level.

Greek (490). A minor in ancient Greek requires a minimum of six courses in the Latin language, including three at or above the 300 level.

Classics (SAS)

Teacher Certification

Teacher Certification

Classics majors interested in earning eligibility for teacher certification (K-12) in New Jersey should contact advisers in the Graduate School of Education and in the Department of Classics in their first year, or as soon as possible thereafter.

Classics (SAS)

Departmental Honors Program

Departmental Honors Program

Honors in Classics may be earned by eligible students who wish to write a senior thesis with the help of an adviser. To qualify, students must have a cumulative grade-point average (GPA) of 3.2 or better and a GPA of 3.6 or better in the major at the end of their junior year. At that time, students should complete the required application form, before the deadline of May 2 of their junior year. See the classics website under Honors & Glory for the honors thesis application form.

Note: Students writing theses must enroll in 01:190:495, 496 (8 credits total) in their senior year. Students who are interested in a topic that spans more than one academic discipline should consider the School of Arts and Sciences interdisciplinary honors thesis option: Here.

Honors in Classics may also be earned by classics majors who:

1. Maintain a 3.5 in the major

2a. Have earned 12 credits at the 300 level or above in Greek OR Latin courses

OR

2b. Have earned 6 credits in BOTH Greek and Latin at the level of 300 or above

3. Submit two papers representative of their work in classics (they may be revised versions of class papers), which a panel of two faculty members deem worthy of honors using the rubric that we have developed for senior assessment purposes.

4. Sit for a sight translation exam in the spring of senior year and pass with honors

To be eligible for honors without a thesis, the grades in the Greek and Latin courses must be at an average of 3.5 or above; for high honors, 3.7 or above; for highest honors, 3.9 or above. Highest honors will be reserved for those students who, in addition to meeting the GPA requirement, have performed at the highest level on the sight exam and paper requirement. Students should inform the undergraduate director by the fall of senior year if they would like to be considered for honors in the major.

Classics (SAS)

Courses in Classical Humanities (190)

Courses in Classical Humanities (190)

Courses in classical humanities are open to students without a knowledge of the Greek or Latin language.

01:190:101 ***Word Power (3)***
Systematic study of the basic Greek and Latin derivatives in English. Emphasis is on Greek and Latin elements in current scientific and literary use.

01:190:102 ***Medical Terminology (1.5)***
Systematic study of scientific terminology based on ancient Greek and Latin elements, with emphasis on the field of medicine.
May be taken concurrently with 01:190:101.

01:190:200 ***Ancient Near East (3)***
Origins and development of the societies of Mesopotamia, Egypt, Asia Minor, and Palestine, through the period of the Persian Empire.
Credit not given for both this course and 01:563:200, 01:508:200, or 01:685:200.

01:190:201 ***Ancient Greece (3)***
Civilization of the eastern Mediterranean world in ancient times, with emphasis on the origins of Western civilization and the Greek contribution to Western culture.
Credit not given for both this course and 01:510:201.

01:190:205 ***Greek Civilization (3)***
Survey of Greek thought and literature. Readings include Homer, the lyric poets, the Athenian dramatists, and selected readings from historians and philosophers. Artistic material may be included.

01:190:206 ***Roman Civilization (3)***
Surveys Roman thought and literature. Readings include Virgil, Ovid, Livy, Cicero, Tacitus, and Petronius. Artistic material may be included.

01:190:207 ***Greek and Roman Mythology (3)***
Examination of the nature, meaning, and continued vitality of the principal classical myths through reading, lectures, and slide presentations.

01:190:208 ***Philosophy of the Greeks (3)***
Introduction to the major philosophical thinkers of the ancient Greek world with special emphasis on Plato and Aristotle.
Credit not given for both this course and 01:730:208.

01:190:209 ***Ancient Rome (3)***
The Roman Republic and the empire, with emphasis on the rise and decline of a Mediterranean world civilization under Roman leadership.
Credit not given for both this course and 01:510:202.

01:190:211 ***Greek and Roman Religion (3)***
Study of pagan gods and goddesses, and cults and practices of the classical Greek world, Roman Republic, and Roman Empire.

01:190:212 ***Classical World in Film (3)***
Survey of film depictions of the classical world of Greece and Rome, with readings from literary, historical, and critical sources. Topics include "sword and sandals" genre and its history; parallels between America and Greece/ Rome; spectacle and empire; and the uses of history in popular historical films.

01:190:213 ***Science and Technology in Ancient Greece and Rome (3)***
Explores the nature and development of science in ancient Greece and Rome, focusing on medicine, biology, physics, and mathematics.

01:190:214 ***Sexuality in Ancient Greece and Rome (3)***
Investigates how the ancient Greeks and Romans categorized, depicted, and reacted to different sexual behaviors and identities through the study of visual and literary sources ranging from Homeric Greece to Imperial Rome.

01:190:215 ***Introduction to Greek and Roman Archaeology (3)***
Introductory survey of the archaeology, architecture, and material culture of the Mediterranean world from the Bronze Age throughout the transformation of the Roman Empire following the reign of Constantine. Consideration given to chronological developments, Greek and Roman artistic production in its social and cultural settings, and Classical Art.
Credit not given for this course and 01:070:113.

01:190:220 ***Greek Food from Antiquity to Today (3)***
Food and foodways of Greek-speaking peoples from ancient times to the present, with special emphasis on problems of continuity and change.
Credit not given for this course and 01:489:220, 01:510:222, 01:685:220, or 667:220.

01:190:251 ***Papal Rome and Its People, 1500-Present: A Select History (3)***
Case-study approach toward select aspects of the social, cultural, intellectual, and political history of the early modern and modern popes, with a particular focus on their relationship to the city of Rome. Highlights the reign of Pope Gregory XIII Boncompagni (1572-1585) and Gregory XV Ludovisi (1621-1623), and their subsequent family history to the present day.
Credit not given for both this course and 01:556:251.

01:190:254 ***The Presocratic Philosophers (3)***
Introductory survey of the Presocratic philosophers. Emphasizes exposure to the teachings of these thinkers through the remaining fragments, while also engaging scholarly writings that introduce and contextualize the sources.
Credit not given for this course and 01:730:254.

01:190:300 ***Greek and Roman Slavery (3)***
Social, economic, legal, and political aspects of slavery in ancient Greece and Rome. The sources and numbers of slaves, forms of servitude, manumission, and slave labor.

01:190:301 ***Food and Drink in the Ancient World (3)***
This course provides students an opportunity to understand the social history of the ancient Mediterranean world through an exploration of the production, preparation, and consumption of food and drink and (re)presentations of them in word and image.

01:190:303 ***Hellenistic World (3)***
Expansion and development of Greek culture from Alexander through the successor kingdoms in Greece, Egypt, Syria-Palestine, and Asia Minor.
Credit not given for both this course and 01:510:303.

01:190:305 ***The Crisis of the Roman Republic (3)***
Roman political, social, and cultural history during the crisis of the late republic from 133 BC.

01:190:306 ***Roman Empire (3)***
Political, social, and intellectual developments of the imperial period until the age of Constantine, with emphasis on the first two centuries AD.
Credit not given for both this course and 01:510:306.

01:190:309 ***Greek and Roman Athletics (3)***
Examines the ideology and cultural context of ancient athletic competition. Topics include the Olympic and other Panhellenic games, Roman chariot racing and gladiator combat, and women athletes.

01:190:310 ***Augustan Rome (3)***
The cultural renaissance under Augustus (44 BC-AD 14): the writings of Virgil, Horace, Livy, Ovid, and the elegiac poets; the building program at Rome; and artistic trends.
May be jointly taught (in part) with 01:580:310. Students wishing to earn language credit in Latin should enroll in 01:580:310. Credit not given for both this course and 01:580:310.

01:190:312 ***The Search for the Historical Socrates (3)***
Portraits of Socrates in Plato, Xenophon, Aeschines of Sphettus, and Aristophanes. Birth of the philosophical dialogue and other genres; life and thought of Socrates; and later Socratic movements.
Prerequisite: One course in ancient Greek history, culture, or philosophy; or permission of instructor. May be jointly taught (in part) with 01:490:312. Students wishing to earn language credit in Greek should enroll in 01:490:312. Credit not given for both this course and 01:490:312.

01:190:314 ***The Etruscans (3)***
Study of the social history, material culture, and artistic expression of the Etruscans. Survey of urbanism and architecture, trade, funerary practices, painted decoration, sculpture, and minor arts between the 9th and 2nd centuries BC.
Credit not offered for this course and 01:082:314.

01:190:315 ***Latin Poets in English (3)***
Selections from the Augustan poets Horace, Virgil, and Propertius. Translations by Dryden, Ezra Pound, and others, with close reference to the Latin original. Theories of translation.
Prerequisite: One year of Latin or permission of instructor.

01:190:317 ***Ancient Painting (3)***
Survey of Greek, Etruscan, and Roman painting from the eighth century BC through the Roman Empire. Emphasis on the development of style and on the cultural significance of painted images in different social contexts.
Credit not given for this course and 01:082:317.

01:190:318 ***Cleopatra (3)***
Examines the historical Cleopatra and the reception of her image from antiquity to the present in literature, art, and film. Issues considered include female power in a man's world, East versus West, and politics and propaganda.
Credit not given for both this course and 01:510:312 or 01:988:321.

01:190:320 ***Women in Antiquity (3)***
Women in the ancient societies of Greece and Rome. Their roles and images in the social, legal, political, domestic, philosophical, and artistic spheres examined using primary sources.
Credit not given for both this course and 01:510:251.

01:190:321 ***Classical Rhetoric (3)***
Origins and development of rhetorical theory: persuasive argument, emotional appeal, good style, and delivery.

01:190:323 ***Criminals and Saints: Power in Greek Political Life and Imagination (3)***
Unlimited power, tyranny, democracy. Explores the ancient Greeks' ambivalent conceptions and perceptions of autocratic versus collective power through time.
Prerequisite: 01:190:205 or permission of instructor.

01:190:324 ***Race and Ethnicity in the Classical World (3)***
Examination of ancient Greek and Roman understanding of physically different and geographically alien individuals. Consideration of the origins of our culture's beliefs about race, ethnicity, and human difference in classical world's views of strangers, foreigners, and barbarians and how our ideas about race and difference have evolved.

01:190:325 ***Cults, Magic, and Witchcraft (3)***
Magic and witchcraft in the everyday life of antiquity, from pagan to Christian times; how individuals tried to control the unknown. Literary and material sources.

01:190:328 ***Ancient Law in Action (3)***
Explores Greek and Roman constitutions and legal systems in their social contexts. Illustrates procedural elements of ancient criminal and civil law through mock trials.

01:190:350 ***Greek Society (3)***
Social and economic life of the Greeks from the Mycenaean period through the Hellenistic age. Written and material evidence employed.
Recommended: 01:510:201. Credit not given for both this course and 01:510:350.

01:190:352 ***Plato (3)***
Philosophy of Plato through close reading of selected dialogues, supplemented by relevant readings on other ancient and contemporary philosophers.
Credit not given for both this course and 01:490:352 or 01:730:352.

01:190:353 ***Aristotle (3)***
Philosophy of Aristotle through his selected works, supplemented by relevant readings in Plato and in modern philosophers.
Prerequisite: One course in ancient Greek history, culture, or philosophy; or permission of instructor. May be jointly taught (in part) with 01:490:353. Students wishing to earn language credit in Greek should enroll in 01:490:353. Credit not given for both this course and 01:490:353.

01:190:355 ***Ancient Mythology and Society (3)***
Social history and practical utilization of ancient myth (with emphasis on Greek myths), applying historical, religious, sociological, and literary-critical perspectives.

01:190:356 ***Oedipus: A Survey of the Myth from Antiquity to Freud (3)***
Survey of the Oedipus myth in earliest, pre-Sophoclean evidence; in Greek and Roman tragedy; in the Middle Ages and the Renaissance; and in the 19th and 20th centuries (with special emphasis on Oedipus in art and music).

01:190:358 ***Odysseus in Literature, Drama & Film (3)***
Evolving images of Odysseus from ancient literature through medieval poetry and modern novels, poetry, plays, and films. Significance of Odysseus as an enduring literary icon.
Credit not given for both this course and 01:195:358 or 01:489:358.

01:190:370 ***Greek Film: Love, Eros & Death (3)***
Masterpieces of modern Greek film, 1914 to present, exploring interplay of love, the erotic, and death.
Credit not given for this course and 01:489:370. Taught in English.

01:190:372 ***Cities of the Classical World (3)***
Study of urban development in antiquity, focusing on Athens and Rome, and synthesizing the evidence of literary, historical, and archaeological sources.
Credit not given for both this course and 01:512:311.

01:190:373 ***Pompeii: The Life and Death of a Roman Town (3)***
Pompeii and Herculaneum, as laboratories for the study of Roman life: the economy and society; public and private architecture, art, and inscriptions; and the birth of archaeology.
Prerequisite: One course in Roman history or culture, Latin or ancient art, or permission of instructor. Credit not given for both this course and 01:510:310.

01:190:375 ***Masterpieces of Greek and Roman Art (3)***
Analyses of selected monuments of architecture, sculpture, and painting from 800 BC to AD 500.

01:190:377 ***The Hero in Ancient Greece and Rome (3)***
Explores the ancient Greek and Roman hero from literary, religious, mythical, and comparative narrative points of view. Readings drawn mostly from ancient sources.

01:190:381 ***Greek Drama in Translation (3)***
Readings in English of the major Greek tragedies and comedies; emphasis on the dramatic structure, literary analysis, and the theatrical conventions of the ancient stage.

01:190:391 ***Roman Drama in Translation (3)***
Readings in English of the comedies of Plautus and Terence and the tragedies of Seneca to emphasize the contributions of Latin authors to the dramatic genre and their influence on European and English drama.

01:190:393 ***Greek and Roman Satire (3)***
Readings in English of classical satire from its origins in the Greek world through the fourth century AD. Emphasis on the significance of ancient satire for comedy and satire in Western culture.

01:190:395 ***Transgression in Ancient Greek Society and Culture (3)***
Violence. Obscenity. Gender roles. Punishment. Violations of cultural norm in ancient Greek practical, civic, religious, and intellectual life, through close critical analysis of their myths, literature, laws, and rituals.
Prerequisite: 01:190:205 or permission of instructor.

01:190:397 ***The Ancient Novel in Context (3)***
Readings from Greek and Roman novels of the Imperial period, with attention to their place in the literary and cultural history of the ancient world.

01:190:421 ***Indo-European Origins of the Classical Languages (3)***
Comparative survey of Latin and Greek grammar, with historical analysis of those features that the two languages share due to their common origin as Indo-European languages. Reference to the major characteristics of Indo-European languages in general.
Open only to advanced undergraduates in classics and linguistics and to graduate students with some knowledge of Latin and/or Greek.

01:190:440 ***Cultural Heritage and Preservation Studies (CHAPS): Museums, Collecting, and Preservation (3)***
Examines the history of museums, modes of collecting, and the preservation of the past, and considers these activities in the context of contemporary political issues.
Credit not given for this course and 01:082:440.

01:190:491,492 ***Independent Study in Classics (3,3)***
Directed reading and research on an assigned topic in classics under the supervision of a member of the department. An extensive essay required, reflecting in-depth research on the assigned topic.
Open only to juniors and seniors majoring in classics. Permission of the undergraduate director required.

01:190:493,494 ***Special Topics Seminar (3,3)***
Advanced study of a problem, topic, or theme in Greek and Roman studies.
Open only to junior or senior majors in classics or by permission of instructor.

01:190:495,496 ***Honors Project (4,4)***
Independent or team projects resulting in a written paper, a performance, or some other appropriate form of public presentation such as drama, poetry, narrative prose, or museum excavation materials.
Open only to honors students in one of the fields in classics.

Classics (SAS)

Courses in Greek, Ancient (490)

Courses in Greek, Ancient (490)

01:490:101 ***Elementary Greek I (4)***
Intensive study of ancient Greek grammar in conjunction with readings in simple Greek prose.

01:490:102 ***Elementary Greek II (4)***
Continued study of Greek grammar in conjunction with readings.
Prerequisite: 01:490:101 or permission of instructor.

01:490:206,207 ***Intermediate Greek Prose (3,3)***
Study of Greek prose through the reading of a work of Plato, Lysias, Herodotus, or other authors.
Prerequisite: 01:490:102 or permission of instructor.

01:490:208,209 ***Intermediate Greek Poetry (3,3)***
Study of Greek poetry through the reading of a work of Euripides, Sophocles, Homer, or other authors.
Prerequisite: 01:490:102 or permission of instructor.

01:490:211 ***Introduction to New Testament Greek (3)***
Introduction to grammar and syntax of Greek in conjunction with readings from the Gospels, Acts, or Epistles.
Prerequisite: 01:490:207 or permission of instructor.

01:490:304 ***Aristophanes (3)***
Reading of *Clouds* and one other comedy; comparison of the Aristophanic with the Platonic Socrates; study of relation of Old Comedy to Athenian life.
Prerequisites: 01:490:207 or 208 or permission of instructor.

01:490:305 ***Greek Drama (3)***
Readings in the works of fifth-century Greek dramatists with special emphasis on Sophocles.
Prerequisite: 01:490:207 or 208 or permission of instructor.

01:490:306 ***From Athens to Alexandria (3)***
Major works of the literature of Greece from the fourth century BC into the Hellenistic Age.
Prerequisite: 01:490:207 or 305 or permission of instructor.

01:490:308 ***Greek Historical Writings (3)***
Readings of selected narratives in Herodotus and of main speeches, excursuses, and parts of books six and seven of Thucydides. Comparative study of historical method.
Prerequisites: 01:490:207, 208, or permission of instructor.

01:490:309 ***Lyric Poetry (3)***
Survey of the main poets of the "lyric age" of Greece (Alcman, Sappho, Alcaeus, Archilochus, Solon, Theognis, and Anacreon); reading of an ode of Pindar.
Prerequisites: 01:490:207, 208, or permission of instructor.

01:490:310 ***Greek Heroic Poetry (3)***
Studies in the poetry and culture of Homeric Greece. Selections from the *Iliad* or *Odyssey*.
Prerequisites: 01:490:207, 208, or permission of instructor.

01:490:311 ***New Testament Greek (3)***
Selections from the Gospels, Acts, and Epistles, supplemented by a review of grammar and syntax.

01:490:312 ***Socratic Literature (3)***
Portraits of Socrates in Plato, Xenophon, Aeschines of Sphettus, and Aristophanes, with emphasis on the reading, in Greek, of selections from the writings of these authors.
Prerequisite: 01:490:207 or 208 or permission of instructor. May be jointly taught (in part) with 01:190:312. Students wishing to earn language credit in Greek should enroll in 01:490:312. Credit not given for both this course and 01:190:312.

01:490:315 ***Menander (3)***
Study of *Dyskolos* and *Samia* as examples of New Comedy; their relation to Athenian life at the end of the fourth century.
Prerequisites: 01:490:207, 208, or permission of instructor.

01:490:335 ***Greek Prose Composition (3)***
Review of syntax, composition in Greek, and translation from English to Greek of continuous passages adapted from classical authors.
Prerequisite: 01:490:207 or 208.

01:490:352 ***Readings in Plato (3)***
Reading of one or more Platonic dialogues (or thematically related selections from several) in the original Greek.
Prerequisites: 01:490:207, 208, or permission of instructor. May be jointly taught (in part) with 01:190:352; separate meetings for readings in Greek. Credit not given for both this course and 01:190:352 or 01:730:352.

01:490:353 ***Readings in Aristotle (3)***
Reading of one or more treatises by Aristotle (or thematically related selections from several) in the original Greek.
Prerequisites: 01:490:207, 208, or permission of instructor. May be jointly taught (in part) with 01:190:353; separate meetings for readings in Greek. Credit not given for both this course and 01:190:353.

01:490:391 ***Readings in Greek Prose (3)***
Readings in selected ancient Greek prose authors or genres.
Prerequisites: 01:490:305, 306, or permission of instructor.

01:490:392 ***Readings in Greek Poetry (3)***
Readings in the works of selected Greek poets or poetic genres.
Prerequisites: 01:490:305, 306, or permission of instructor.

01:490:400 ***Demosthenes (3)***
Reading of one public and one private oration; study of Demosthenes as orator; as source for Athenian law, commerce, and private life; and as statesman.
Prerequisites: 01:490:207, 208, or permission of instructor.

01:490:402 ***Plato and Aristotle (3)***
Reading of one Platonic dialogue followed by selected portions of an Aristotelian treatise. Attention to prose style and also to common problems and diverging solutions.
Prerequisites: 01:490:207, 208, or permission of instructor.

Classics (SAS)

Courses in Latin (580)

Courses in Latin (580)

01:580:101 ***Elementary Latin I (4)***
Beginning course in Latin, introducing the Latin language and its grammar and syntax.

01:580:102 ***Elementary Latin II (4)***
Continued beginning instruction in Latin, introducing Latin language, grammar, and syntax.
Prerequisite: 01:580:101 or permission of instructor.

01:580:203 ***Intermediate Latin Prose (3)***
Selections from prose authors of the late Republican and/or early empire, e.g., Caesar, Cicero, Livy; development of skill in reading continuous passages of Latin prose.
Prerequisite: 01:580:102 or permission of instructor.

01:580:204 ***Intermediate Latin Poetry (3)***
Representative poems of Catullus, Horace, and Ovid, read and studied with a view to their style, imagery, and topicality. Introduction to Latin metrics.
Prerequisite: 01:580:102 or permission of instructor.

01:580:302 ***Medieval Latin (3)***
Readings in major Latin writings and documents of the Middle Ages.
Prerequisite: 01:580:203 or 204 or permission of instructor.

01:580:303 ***Cicero: Philosophical Writings (3)***
Selected philosophical dialogues and rhetorical treatises of Cicero.
Prerequisites: 01:580:203, 204.

01:580:304 ***Cicero: Orations (3)***
Selected orations of Cicero, with emphasis on the development of Cicero's style and the significance of historical and biographical background.
Prerequisites: 01:580:203, 204.

01:580:310 ***Prose and Poetry in the Age of Augustus (3)***
The cultural renaissance under Augustus (44 BC-AD 14), with emphasis on the reading, in Latin, of selections from the writings of Virgil, Horace, Livy, Ovid, and the elegiac poets.
Prerequisite: 01:580:203 or 204 or permission of instructor. May be jointly taught (in part) with 01:190:310. Students wishing to earn language credit in Latin should enroll in 01:580:310. Credit not given for both this course and 01:190:310.

01:580:321 ***Roman Comedy (3)***
Study of the principal meters, the theater, and the staging of plays through the reading of plays of Plautus and Terence.
Prerequisites: 01:580:203, 204.

01:580:323 ***Lucretius (3)***
Readings from Lucretius' *De Rerum Natura* with analysis of its place within the literary and philosophical traditions of Rome and Greece.
Prerequisites: 01:580:203, 204.

01:580:324 ***Sallust (3)***
Readings from Sallust's *Jugurthine War*, *Histories*, and *Catiline*, with a study of selected problems from the historical periods relevant to those works.
Prerequisites: 01:580:203, 204.

01:580:325 ***The History of Livy (3)***
Readings from Livy's *Ab Urbe Condita* with a study of selected problems in Roman Republican history.
Prerequisites: 01:580:203, 204.

01:580:327 ***Latin Elegy (3)***
Survey of Latin poetry written in elegiac meter, with selections from Catullus, Tibullus, Sulpicia, Propertius, and/or Ovid.
Prerequisites: 01:580:203, 204.

01:580:328 ***Roman Satire (3)***
Selected poems of Horace, Martial, and Juvenal and a study of their interrelationship.
Prerequisites: 01:580:203, 204.

01:580:329 ***Tacitus (3)***
Reading of a minor work of Tacitus and/or selections from the *Annals of Tacitus* with an investigation of their value as sources for Imperial history in the first century AD.
Prerequisites: 01:580:203, 204.

01:580:335 ***Latin Prose Composition (3)***
Review of syntax and prose style; composition in Latin and translation into Latin of continuous passages of prose.
Prerequisites: 01:580:203, 204.

01:580:369,370 ***The Seminar in Latin (3,3)***
Extensive and rapid reading in Latin literature from the early Roman Republic to the empire.
Primarily for juniors and seniors majoring in classical humanities; open to others with permission of instructor.

01:580:401 ***Advanced Study of the Poetry of Ovid (3)***
Readings and interpretation of selected works of Ovid. A study of the poet's contribution to Roman literature and his importance in the Western literary tradition.
Prerequisites: 01:580:203, 204.

01:580:402 ***Advanced Study of Vergil's Aeneid (3)***
Readings of Vergil's *Aeneid* with an analysis of selected problems in its interpretation.
Prerequisites: 01:580:203, 204.

01:580:403 ***Readings in Latin Literature I: Literature of the Republic (3)***
Prose and poetry of Rome from its beginnings in the third century BC to the end of the republic in the first century BC. Extensive selections from epic, drama, lyric, elegy, pastoral, and other poetry and from history, rhetoric, and oratory.
Prerequisites: 01:580:203, 204.

01:580:404 ***Readings in Latin Literature II: Literature of the Empire (3)***
Prose and poetry of imperial Rome. Extensive selections from epic, history, satire, the novel, and other genres, with emphasis on writers of the Augustan and Neronian ages.
Prerequisites: 01:580:203, 204.

01:580:407 ***Advanced Study of the Poetry of Horace (3)***
Intensive reading of Horace's poems with emphasis on the variety of style and content.
Prerequisites: 01:580:203, 204.

Additional Associate Faculty

For a list of additional faculty associated with the program, consult the cognitive science webpage here.

Major Program

Major Program

The Rutgers Center for Cognitive Science (RuCCS) offers a Bachelor of Arts degree in cognitive science. The major offers an opportunity for exceptional students to explore multidisciplinary approaches to the study of the brain, behavior, and computation, including how people, animals, and computers think, act, and learn.

There are five possible tracks for the major: (1) cognitive neuroscience, (2) decision-making, (3) language, (4) mind, machines, and computation, and (5) perception. Each track is structured into five segments: (i) quantitative reasoning, (ii) foundational, (iii) distributional, (iv) topics courses, and (v) capstone. Each track will have the same two requirements in logical and statistical reasoning, the same foundational course in cognitive science, a set of three distributional requirements in cognate areas, and one capstone course involving independent research or an approved course substitute (such as 01:185:411). The selection of courses that satisfy the topic electives segment will vary by track.

Requirements for the Major

The major must consist of a minimum of 36 credits:

1. Students will be required to complete a minimum of four courses in cognitive science (curriculum code 185).
2. Grades of C or better must be earned in all courses counted toward the major.
3. At least two-thirds of the total credits must be from courses offered by the School of Arts and Sciences.
4. At least two-thirds of the total credits must be at the 300 level or above.
5. No more than four courses from philosophy and no more than four courses from computer science may be counted toward the major.
6. No more than three courses from any other department (not listed above) may be counted toward the major.

Currently, there are 38 jointly appointed faculty advisers and an additional 49 faculty affiliates housed in various departments. Most play an active role in the life of the center.

If interested in the cognitive science major, students are encouraged to check out the following website here to view the major requirements and to learn how to apply.

If an individual wants honors, they needs to meet the honors requirement for the university.

If an individual wants honors, he or she they need to meet the honors requirement for the university. For additional information about the major, send an email to undergrad@ruccs.rutgers.edu; or consult the cognitive science major webpage.

Cognitive Science 185 (SAS)

Minor Program

Minor Program

Cognitive science is an interdisciplinary area of scholarship concerned with understanding the nature and development of such intelligent capacities as perception, language, reasoning, planning, problem solving, and related skills, whether these capacities are instantiated in biological or artificial systems. The goal of the cognitive science minor is to provide a structured way for undergraduates to study and carry out research in cognitive science with guidance from faculty members in the cognitive science center. Any undergraduate may pursue a minor in cognitive science, regardless of his or her major. The interdisciplinary cognitive science minor is likely to be of particular interest to undergraduates majoring in fields that are directly related to cognitive science (e.g., computer science, linguistics, philosophy, psychology, anthropology, biological sciences, mathematics, statistics, biomathematics, communication, biological anthropology, and engineering).

Students interested in the cognitive science minor are encouraged to visit the following website here.

Requirements for the Minor

The interdisciplinary minor in cognitive science consists of a minimum of 18 credits, distributed as follows:
1. At least three of the following cognitive science courses:
01:185:201 Cognitive Science: A Multidisciplinary Introduction (4)
01:185:253 Human Nature and Diversity (4)
01:185:301 Cognition and Decision-Making (4)
01:185:310 The Concept of Concepts in Cognitive Science (3)
01:185:320 Research Methods in Cognitive Science (3)
01:185:325 From Data to Science Communication in R (3)
01:185:330 Meaning and Numbering (3)
01:185:335 Neural Structure of Language (3)
01:185:340 Language and Cognition (3)
01:185:345 Person Perception and Social Cognition (3)
01:185:350 Fundamentals of Cognitive Neuroscience (3)
01:185:360 Origins of Cognition (3)
01:185:395/396 Research in Cognitive Science (3 credits each)
01:185:401 Visual Intelligence (3)
01:185:411 Advanced Topics in Cognitive Science I (4) (offered each spring semester only)
01:185:412 Advanced Topics in Cognitive Science II (3) (only 1 section may be taken per semester)
01:185:413 Advanced Topics in Cognitive Science: Cog Neuro (3)
01:185:414 Advanced Topics in Cognitive Science: Decision Making/Behavioral Game Theory (3)
01:185:415 Advanced Topics in Cognitive Science: Language (3)
01:185:416 Advanced Topics in Cognitive Science: Minds, Machines & Computation (3)
01:185:417 Advanced Topics in Cognitive Science: Perception (3)
01:185:420 Learning in Humans and Machines (3)
01:185:430 Cognitive Neuroscience through Case Studies (4)
01:185:495/496 Senior Honors Thesis (3 credits each)

2. A minimum of 3 credits in formal/analytic methods used in cognitive science. The following courses automatically count toward the formal/analytic requirement:

01:198:107 Computing for Math and the Sciences (3)

01:198:111 Introduction to Computer Science (4)

01:198:112 Data Structures (4)

01:198:205 Introduction to Discrete Structures I (4)

01:198:206 Introduction to Discrete Structures II (4)

01:615:305 Syntax (3)

01:615:315 Phonology (3)

01:615:325 Semantics (3)

01:615:411 Morphology (3)

01:640:300 Introduction to Mathematical Reasoning (3)

01:640:338 Discrete and Probabilistic Models in Biology (3)

01:640:339 Math Models in the Social Sciences (3)

01:640:361 Set Theory (3)

01:640:428 Graph Theory (3)

01:640:454 Combinatorics (3)

01:640:461 Mathematical Logic (3)

01:640:477 Mathematical Theory of Probability (3)

01:640:478 Probability II (3)

01:640:481 Mathematical Theory of Statistics (3)

01:730:201 Introduction to Logic (3)

01:730:315 Applied Symbolic Logic (3)

01:730:407 Intermediate Logic I (3)

01:730:408 Intermediate Logic II (3)

01:830:200 Quantitative Methods in Psychology (4)

01:830:400 Advanced Statistical Methods in Psychology (3)

01:960:379 Basic Probability and Statistics (3)

01:960:381 Theory of Probability (3)

01:960:382 Theory of Statistics (3)

01:960:401 Basic Statistics for Research (3)

3. A minimum of an additional 6 elective credits. Any courses listed as approved "formal/analytic" courses may be counted as electives. If you take more than the required three courses offered by cognitive science in requirement #1, any additional course will be counted as an elective. The following additional courses automatically count toward the elective requirement:

following additional courses automatically count toward the elective requirement:

01:119:195 Brain, Mind, and Behavior (3)

01:146:245 Fundamentals of Neurobiology (3) (cell biology and neuroscience [CBN] majors)

01:146:295 Essentials of Cell Biology and Neuroscience (3) (non-CBN majors)

01:146:445 Synapses, Neurons, and Circuits (3)

01:146:447 Clinical Neurobiology (3)

01:185: --- Any Cognitive Science Course

01:198:314 Principles of Programming Languages (4)

01:198:344 Design and Analysis of Computer Algorithms (4)

01:198:405 Seminar in Computers and Society (3)

01:198:415 Compilers (4)

01:198:424 Modeling and Simulation of Continuous Systems (4)

01:198:428 Introduction to Computer Graphics (4)

01:198:440 Introduction to Artificial Intelligence (4)

01:198:452 Formal Languages and Automata (3)
01:447:380 Genetics (4)
01:447:384 Genetic Analysis I (4)
01:447:385 Genetic Analysis II (4)
01:447:410 Research in Genetics - Writing Intensive (3)
01:447:484 Behavioral and Neural Genetics (3)

01:615:201 Introduction to Linguistic Theory (3)

01:615:330 Historical Linguistics (3)

01:615:350 Pragmatics (3)

01:615:360 Theories of Language (3)

01:615:371 Psychology of Language (3)

01:615:373 Language Acquisition (3)

01:615:421 Language Typology (3)

01:615:431 Investigations into an Unfamiliar Language (3)
01:615:435 Experimental Methodologies in Language Acquisition (3)
01:615:440 Language Development (3)
01:615:441 Linguistics and Cognitive Science (3)
01:615:445 Language and Cognition (3)
01:615:451 Phonetics (3)
01:615:455 Computational Linguistics (3)
01:615:465 Introduction to Prosody (3)3
01:615:471 Selected Topics in Linguistics (3)
01:615:491 Linguistics Practicum (3)
01:730:210 Philosophy of Language (3)
01:730:220 Theory of Knowledge (3)

01:730:253 Human Nature and Human Diversity (4)

01:730:328 Philosophy of Psychology (3)

01:730:329 Minds, Machines, and Persons (3)

01:730:360 Philosophical Aspects of Cognitive Science (3)

01:730:412 Epistemology (3)

01:730:418 Philosophy of Mind (3)

01:730:419 Philosophy of Perception (3)

01:730:420 Philosophy of Language (3)

01:730:422 Philosophy of Logic (3)

01:730:424 The Logic of Decision (3)

01:730:425 Philosophy of Science (3)

01:730:428 Topics in the Philosophy of Psychology (3)

01:830:301 Sensation and Perception (3)

01:830:303 Memory (3)

01:830:305 Cognition (3)

01:830:307 Perception in Cognitive Science (3)

01:830:310 Neuropsychology (3)

01:830:311 Conditioning and Learning (3)

01:830:313 Physiological Psychology (3)

01:830:351 Psychology of Language I (3)

01:830:361 Developmental Psychobiology (3)

01:830:401 Advanced Topics in Human Cognition (3)

01:830:402 Advanced Topics in Human Cognition - Writing Intensive (3)

01:830:410 Advanced Topics in Psychobiology (3)

01:830:411 Advanced Topics in Psychobiology - Writing Intensive (3)

01:830:412 Neuropsychopharmacology (3)

01:830:463 Behavioral Pharmacology (3)

01:830:480 Advanced Topics in Visual Perception (3)
01:830:484 Language Acquisition (3)
01:940:363 Bilingualism in the Spanish-Speaking World (3)
01:940:368 The Bilingual Mind (3)
01:960:384 Intermediate Statistical Analysis (3)

14:125:405 Introduction to Neural Processes (3)

14:125:410 Sensory Processes, Mechanisms, and Computer Models (3)

Additional Requirements for the Minor

1. Grades of C or better must be earned in all courses counted toward the minor.

2. No more than 4 credits at the 100 level may be counted toward the minor.

3. At least half of the credits used toward the minor must be at the 300 level or above.

4. The same course cannot be used to fulfill both the formal/analytic and elective requirements.

5. No more than two courses from any one department (major or nonmajor curriculum) may count toward the minor with the exception of cognitive science (curriculum 185).

Students who wish to declare a minor in cognitive science should do so either at the same time or after they have declared a major field of study. Either before or immediately after declaring the cognitive science minor, students must take a formal/analytic methods course, at least three cognitive science courses, and at least 6 credits of upper-division electives. Students should be aware that many of the courses listed have prerequisites and not all of the courses are offered each semester. Students should contact the departments that offer courses to learn about prerequisites and course schedules.

The cognitive science program committee, under the direction of the undergraduate program director(s), will advise students about selection of courses, mentors, and research/independent study projects. Students may petition the undergraduate program director to have alternate courses count as formal/analytic or elective courses.

For additional information about the cognitive science minor, please mail the undergraduate director(s) at undergrad@ruccs.rutgers.edu; or consult the cognitive science undergraduate webpage.

Cognitive Science 185 (SAS)

Courses

Courses

01:185:201 ***Cognitive Science: A Multidisciplinary Introduction (4)***
Introduction to computational, linguistic, philosophical, and psychological approaches taken within cognitive science, through a survey of topics such as reasoning, language, and vision.
Pre- or corequisite: A course in computer science, linguistics, philosophy, psychology; or permission of instructor.

01:185:253 ***Human Nature and Human Diversity (4)***

A lecture course. The first goal of this course is to introduce students to some of the central ideas and theories in cognitive science that have been used to explain both human diversity and universal features of human nature. The second goal is to explore the implications of those ideas for a range of important philosophical questions. The course is organized around four areas where questions about human nature and human diversity are of great importance in contemporary society: i) Mating (sex, love and parenting); (ii) morality; (iii) religion; (iv) race.

NOTE: *Course satisfies the Core Curriculum: 21st Century Challenges [21C] and Arts and Humanities [AHo]*

01:185:301 ***Cognition and Decision-Making (4)***
A lecture/recitation course taught by a single instructor. This course introduces students to the subjects of reasoning and decision-making as a means of exploring a number of issues central to the field of cognitive science

NOTE: *Course satisfies Core Curriculum: Quantitative and Formal Reasoning (QQ).*

Prerequisite: Introduction to Cognitive Science (01:185:201).

01:185:310 ***The Concept of Concepts in Cognitive Science (3)***
A lecture course taught by a single instructor. This course introduces students to the study of concepts from a broad interdisciplinary point of view, surveying how concepts are understood in psychology, philosophy, computer

science, and neuroscience. Emphasis is on both differences in how these various disciplines view concepts as well as commonalities in the underlying ideas.
Prerequisite: Introduction to Cognitive Science (01:185:201)

01:185:320 *Research Methods in Cognitive Science (3)*
A lecture course taught by a single instructor. This course introduces students to a foundation for thinking critically about research in cognitive science. Topics may include the scientific method and consideration of strengths and weaknesses of a range of approaches, statistical reasoning and principles for ethical conduct of research.
Prerequisite: 01:185:201 or 01:185:301 or 01:185:411

01:185:325 *From Data to Science Communication in R (3)*

This course is an introduction to using R, the open-source programming environment, for data organization, wrangling, visualization, and communication. We will build these skills in the context of research questions and datasets often found in the interdisciplinary field of Cognitive Science. Throughout the course, we will highlight the relations between research questions, data structure, and decisions about data visualization and communication.

Prerequisite: 01:185:201. Credit not given for this course and 01:960:295.

01:185:330 *Meaning and Numbering (3)*
Central issues in cognitive science and strategies for addressing questions about the contributions of innate endowment and individual experience (a.k.a., nature/nurture) to mature cognition through discussion and comparison of the human capacity to understand linguistic expressions and the apparently more widespread capacity to make numerical comparisons.
Prerequisite: 01:185:201. Credit not given for both this course and 01:730:327.

01:185:335 *Neural Structure of Language (3)*
Examines how linguistic structure is represented and processed in the brain, and how the computational machinery that generates language intersects with different cognitive capacities and brain structures. Focuses on neural evidence of linguistic structures and structure-building; major brain regions associated with language and competing models of their functions; and the underlying cognitive resources necessary for producing and comprehending language.
Prerequisite: 01:185:201.

01:185:340 *Language and Cognition (3)*

A lecture course taught by a single instructor. Topics may include speech perception, language acquisition, priming, disorders, speech errors, sentence processing, memory, color, and numerosity.

NOTE: This course satisfies the Core Curriculum Quantitative and Formal Reasoning (QQ).

Prerequisite: 01:185:201 AND Introduction to Linguistic Theory (01:615:201). Credit not given for both his course and 01:615:445

01:185:345 ***Person Perception and Social Cognition (3)***
Survey of major topics in social cognition which is the study of how we understand ourselves and others as social agents and draws from psychology, neuroscience, and philosophy. Three main units: cognitive architecture, social capacities, and the social world, introduce contemporary debates in social cognition.
Prerequisite: 01:185:201.

01:185:350 ***Fundamentals of Cognitive Neuroscience (3)***
Explores the cognitive and neural processes that support attention, learning, memory, language, and guided behaviors with an emphasis on the neural mechanisms that form the substrates of human cognition. Introduces basic neuroanatomy, functional imaging techniques, and behavioral measures of cognition, and discusses methods by which inferences about the brain bases of cognition are made.
Prerequisite: 01:185:201.

01:185:360 ***Origins of Cognition (3)***
Exploration of the origins and development of human knowledge across three different time scales: ontological development, evolutionary development, and historical/cultural change. Topics include: depth, space, number, language, music, social understanding and learning & plasticity. Findings and ideas from multiple disciplines, including developmental science, comparative psychology, neuroscience, information theory, anthropology, and history of science will be included.
Prerequisite: 01:185:201.

01:185:395 ***Research in Cognitive Science (1-3)***
A supervised research internship in cognitive science. May include laboratory/library research. Final written report required.
Prerequisite: 01:185:201 AND Permission of instructor and the program.
Only faculty who are Executive Committee members or Affiliates in the Center for Cognitive Science can oversee research courses in Cognitive Science.

Prerequisite: 01:185:201 AND Permission of instructor and the program.

01:185:396 ***Research in Cognitive Science (1-3)***

A supervised research internship in cognitive science. May include laboratory/library research. Final written report required.

Prerequisites: 01:185:201, 01:185:395 and permission of instructor and the program.

Only faculty who are Executive Committee members or Affiliates in the Center for Cognitive Science can oversee research courses in Cognitive Science.

Prerequisites: 01:185:201, 01:185:395 and permission of instructor and the program.

01:185:401 ***Visual Intelligence (3)***
Seminar on visual processing with special focus on the fundamental problem of vision, Bayesian approaches, perceptual organization, and visually-guided motor behavior.
Prerequisites: 01:830:301 and 01:960:211 Corequisite: 830:301

01:185:411 ***Undergraduate Seminar in Cognitive Science (4)***
Seminar on computational, linguistic, philosophical, and psychological approaches taken within cognitive sciences through a survey of topics such as reasoning, language, vision, and cognitive development.
Pre- or corequisite: A course in computer science, linguistics, philosophy, psychology; or permission of instructor. Prerequisite: 01:185:201.

01:185:412 ***Advanced Topics in Cognitive Science II (3)***
Seminar on computational, linguistic, philosophical, and psychological approaches taken within cognitive sciences through a survey of topics such as reasoning, language, vision, and cognitive development.
Prerequisite: 01:185:201

01:185:413 ***Advanced Topics in Cognitive Science: Cognitive Neuroscience (3)***
Investigation of advanced problems and issues in cognitive neuroscience.
Prerequisite: 01:185:201

01:185:414 ***Advanced Topics in Cognitive Science: Decision-Making (3)***
Investigation of advanced problems and issues in cognitive science and decision-making.
Prerequisite: 01:185:201.

01:185:415 ***Advanced Topics in Cognitive Science: Language (3)***
Investigation of advanced problems and issues in cognitive science and language.
Prerequisite: 01:185:201.

01:185:416 ***Advanced Topics in Cognitive Science: Minds, Machines & Computation (3)***

A topical course with each section investigating advanced problems and issues in cognitive science, including topics such as the computational theory of mind. Check the Center¿s Upcoming Courses webpage for titles, descriptions, and requirements of any sections being offered

NOTE: This course satisfies the upper-division electives for the Minds, Machines & Computation track of the Cognitive Science major

Prerequisite: 01:185:201.

01:185:417 ***Advanced Topics in Cognitive Science: Perception (3)***
Investigation of advanced problems and issues in cognitive science and perception.
Prerequisite: 01:185:201.

01:185:420 ***Learning in Humans and Machines (3)***

An interdisciplinary seminar course exploring the parallels between human learning and machine learning focusing on the set of shared computational problems faced by humans and machines which includes making complex decisions; predicting future events; storing and retrieving information efficiently; and generalizing knowledge to new situations.

Prerequisite: 01:185:201.

01:185:430 *Cognitive Neuroscience through Case Studies (4)*
Structure and function of the human brain through case studies of people with developmental and acquired brain disorders.
Pre- or corequisites: 01:185:201 or 01:830:101.

01:185:495 *Senior Honors Thesis (3)*

Thesis research under the direction of a faculty adviser.

Prerequisite: 01:185:201 and eligibility for departmental honors and approval of thesis topic by faculty adviser and director of undergraduate studies.

Only faculty who are Executive Committee members or Affiliates in the Center for Cognitive Science can oversee research courses in Cognitive Science

Prerequisite: 01:185:201 and eligibility for departmental honors and approval of thesis topic by faculty adviser and director of undergraduate studies.

01:185:496 *Senior Honors Thesis (3)*

01:185:496 Senior Honors Thesis (3)

Thesis research under the direction of a faculty adviser.

Prerequisite: 01:185:201, 01:185:495, and eligibility for departmental honors and approval of thesis topic by faculty adviser and director of undergraduate studies.

Only faculty who are Executive Committee members or Affiliates in the Center for Cognitive Science can oversee research courses in Cognitive Science.
Prerequisite: 01:185:201, 01:185:495, and eligibility for departmental honors and approval of thesis topic by faculty adviser and director of undergraduate studies.

Communication (SC&I-U)

COMMUNICATION

The Department of Communication is dedicated to advancing knowledge about communication and its practice in society. The department examines how meaning is created and negotiated in human interaction to address the personal, professional, and public communication challenges and opportunities posed by 21st century life. Students become leaders in private, public and civil sectors by developing a deep and practical appreciation of how communication shapes the world in which we live. Research from SC&I's renowned faculty experts examines the complexity of communication processes.

The undergraduate major in communication provides a broad education, covering ideas and applications in preparation for communication careers in business, education, or government, for the pursuit of graduate degrees in communication and other social science fields, or as a supplement for students whose primary interests are in other areas such as political science, computer science, business, human resources, health care, and more.

Available concentrations allow students to demonstrate targeted skills in the job market. They include:

- Communication and Technology
- Health and Wellness Communication
- Leadership in Organizations and Community
- Relationship and Family Communication
- Strategic Public Communication and Public Relations

Graduates from the undergraduate program in communication gain:

- Competency in written communication in varied settings (including interpersonal, family, group, health, organizational, or mediated settings).
- Ability to use communication theories and concepts to analyze human behavior (including interpersonal, family, group, health, organizational, or mediated settings)
- Ability to apply communication theories and concepts to social and professional life (including issues of diversity, ethics, and civic engagement)
- Understanding of fundamental communication perspectives, theories, and concepts
- Proficiency in gathering and using evidence to study and understand communication processes and consequences (including asking questions and systematically attempting to answer them, understanding the value and limitations of the research processes and conclusions)
- Competency in oral communication in varied settings (including interpersonal, family, group, health, organizational, or mediated settings)

Career Opportunities

Communication graduates find opportunities in a wide variety of careers in business, education, government, and the nonprofit sectors. Skills in oral and written communication are some of the most sought-after characteristics all employers look for when hiring. Radio and TV, advertising and public relations, publishing, sales, and financial services are but a few of the many areas in which these graduates find employment. Any work that involves communicating as its focal point is a potential career field. The communications industry is a competitive one, however, and experience gives everyone an extra advantage. The communication program offers internship opportunities for credit. In addition, an advanced degree can offer an edge, and the school offers a five-year bachelor's/master's program; for more information, see below.

Admission to the Major

Admission to the communication major is competitive; meeting the minimum requirements does not guarantee acceptance. Minimum requirements for admission include

- completion of at least 15 credits at Rutgers, or 15 transfer credits, with a grade-point average of 2.0 or better;
- a grade of C or better in the required prerequisite course 04:189:101 Introduction to Communication and Information Processes (or an equivalent transfer course);
- a grade of C or better in Expository Writing or an equivalent course or placement; and
- completion of the application including a well-written personal statement.

The admissions committee seeks the following when reviewing student essays: (a) evidence of your interest in the major; (b) your future plans and their relationship to the major; (c) your strength as a writer; and (d) any other qualities that make you a strong candidate for admission to the communication major. Applications are available on the school's website: https://comminfo.rutgers.edu/admissions/undergraduate. Students may be admitted for the fall, spring, and summer semesters; check the website for application deadlines each year. Students are strongly encouraged to consult the school's website for up-to-date information regarding admissions procedures.

Major Requirements

Prerequisite survey course required before admission to the major (3 credits):

04:189:101 Introduction to Communication and Information Processes (3)

SC&I interdisciplinary requirement (3 credits):

Either
04:189:102 Introduction to Media Systems and Processes (3)
or
04:189:103 Information Technology and Informatics (3)

Requirements for the remaining credits in the major include:

Core Requirements (15 credits):

04:192:200 Communication Theory (3)
04:192:201 Communication in Relationships (3)
04:192:300 Communication Research (3)
04:192:380 Public Speaking (3)
At least one of the following four classes:
04:192:354 Communication and Technology (3) or
04:192:355 Interpersonal Communication (3) or
04:192:357 Organizational Communication (3) or
04:192:359 Persuasive Communication (3)

Upper-level electives (15 credits):

Upper-level elective courses may include all 300- and 400-level courses and must include at least two 400-level courses except those completed as part of the core requirements. Courses 04:192:491,492 Independent Study in Communication and 04:192:495 Applied Study in Communication may not be used to fulfill this or the total credit requirement in the major. Students should check the communication website or undergraduate handbook to determine prerequisites for 300- and 400-level courses and should speak with an adviser for help in planning coursework for the major.

Optional specializations:

- Communication and Technology
- Health and wellness communication
- Leadership in organizations and community
- Relationship and family communication

- Strategic public communication and public relations

The specializations are designed to provide essential knowledge of communication methods and techniques and help students build the necessary skills to start a career. The specializations require the same credits as the communication major in general, but are focused in one of the areas above. Specializations can be combined with additional coursework to better create a narrative around a student's skills and knowledge. Combining specializations can expand career opportunities further. See the webpage for the most current information and additional details: https://comminfo.rutgers.edu/undergraduate-programs.

Students must earn a grade of C or better in all 04:192 courses in order for those courses to count toward the major.

Internships and Other Educational Opportunities

The department encourages students to pursue internship experiences that complement their studies and potential career choices. Students must be accepted into the communication major in order to enroll in the internship. Students may apply up to 3 internship course credits toward their upper-division course electives in the major. Additional internship credits may be earned but do not apply to the communication major. Note that each four-year school in the university sets its own limits regarding the number of experiential credits a student may apply toward graduation.

Further information about the internship and about other educational opportunities such as specializations in the major is available at the communication program website.

Course Transfers

Courses that students have taken at other New Jersey colleges, which are articulated through the NJ Transfer system and recorded on a student's transcript with a communication course number, will be counted toward the major.

Students who wish to have a course they have taken elsewhere at Rutgers or externally at another university considered as one of their required or elective courses in the communication major must submit a request for transfer equivalency in writing to the SC&I Office of Student Services. To submit such a request, the letter of petition must include a copy of the full syllabus of the course, a copy of the student's transcript showing the grade achieved, a note which communication course it is requested to replace, and the reasons for consideration. The courses are evaluated in terms of their very close match of content and skills to the communication course, the level of the course, and the grade achieved, which should typically be a C or better. Students will be notified in writing of the outcome of the petition.

Dual-Bachelor's/Master's Degree Program for Communication Majors

Communication majors in their junior or senior year may apply to the master's program in communication and media (M.C.M.) for a dual-B.A./M.C.M. program that allows completion of both degrees in as little as five years. If accepted, students may enroll in up to four M.C.M. courses during their senior year that will count toward both the undergraduate degree and the master's. Once the bachelor's degree is completed, students will be in the master's program and complete the requirements. Two to three semesters of full-time study, or four semesters of part-time study, would allow a student to complete the remainder of the master's program.

Admission requirements for the dual degree program are the same as for all M.C.M. applicants. Details about the application process and degree requirements are on the school's website.

Planning and Public Policy Major (762, 762D) and Minor (EJB-U)

PLANNING AND PUBLIC POLICY MAJOR (762, 762D) AND MINOR

Planning and Public Policy Major (37 credits)

The Planning and Public Policy major (762, 762D) provides students with a foundation in areas such as city dynamics, environmental aspects of cities, community health, urban poverty, public policy, housing issues, social concerns, fiscal matters, and land use planning. Students are prepared for entry-level professional management and planning positions focused on overseeing and improving public programs, such as transportation, housing, planning, the environment, finance, economic development, and urban renewal. These career paths can be found in business, government, education, banking, and nonprofit settings. This program also prepares students for graduate education in public administration, public policy, and urban planning.

Upon completing all degree requirements, the student will receive the bachelor of arts (B.A.) degree.

Rutgers School of Arts and Sciences and School of Environmental and Biological Sciences Students

This program is designed to accommodate the needs of traditional students at Rutgers University-New Brunswick.

Students in the School of Arts and Sciences (SAS) and students in the School of Environmental and Biological Sciences (SEBS) who wish to remain in their primary unit must apply for admission prior to declaring the major.

SAS students may pursue Planning and Public Policy as their first major and remain within SAS. SEBS students may pursue Planning and Public Policy as a second major to remain within SEBS.

Students can apply for the Planning and Public Policy major during one of our application cycles listed here. Applicants must have a minimum grade of 'C' or better in each of the prerequisite courses and be in good academic standing. The application may be found on the school's website at¿https://bloustein.rutgers.edu/undergraduate/planningandpublicpolicy/#sas

Students are advised to declare the Planning and Public Policy major no later than their first semester of junior year to ensure completion of the major by their anticipated graduation date.**A minor program is required for this major.**

Only courses with a 'C' or better may be counted towards the major, and students must complete the core curriculum requirements of their primary school.

The most current information for the Planning and Public Policy major may be found on the Bloustein School website at https://bloustein.rutgers.edu/undergraduate/planningandpublicpolicy/

Transfer Students

This program is designed to accommodate the needs of transfer, adult, and nontraditional students.

Students seeking the Planning and Public Policy major must have at least 30 credits before applying to the Bloustein School. Successful applicants will have completed the prerequisite courses with a grade of 'C' or better, and have achieved an overall GPA of at least 2.5.

Current Rutgers students seeking a school-to-school transfer from another Rutgers unit, or students transferring to Rutgers from another college or university, must apply via the Rutgers Office of Undergraduate Admissions. Contact ugadmissions@ejb.rutgers.edu for more information.

Transfer students from New Jersey community colleges are encouraged to complete lower-division prerequisite courses and the associate's degree to benefit from the NJ Statewide Transfer Agreement.

Only courses with a 'C' or better may be counted towards the major.**A minor program is required for this major.**

For more information about transferring, please see the school's website at https://bloustein.rutgers.edu/undergraduate/planningandpublicpolicy/#transfer

PLANNING AND PUBLIC POLICY MAJOR REQUIREMENTS (762, 762D)

(37 credits)

Prerequisite Courses (9-10 credits)

- 01:355:101 College Writing (3)
- 10:775:205 Basic Statistical Methods (4) or equivalent (3-4)
- 01:220:102 Introduction to Microeconomics (3)

Major Requirements (762, 762D) (37 credits)
Core Courses (16 credits)

- One of the following (3):
    - 01:220:103 Introduction to Macroeconomics (3)
    - 01:790:104 American Government (3)
    - 10:833:210 Principles of Public Policy (3)
    - 10:971:201 Intro to Urban Planning and Design (3)
- One of the following intensive writing courses (3):
    - 10:775:300 Writing for Professionals (3)
    - 01:355:302 Scientific and Technical Writing (3)

    - 01:355:303 Writing for Business and the Professions (3)
    - 01:355:315 Writing Grant Proposals (3)
- 10:775:395 Research Methods (4) *Open to majors only*
- 10:762:400 Internship with Seminar* (3) *Open to majors only*
- 10:762:499 Senior Seminar* (3) Open to majors only with at least 100 credits **and** no outstanding core requirements

** Students qualifying for departmental honors may replace 10:762:400 and 10:762:499 with 10:762:497, 498 Bloustein Honors Research.*

Required Electives (21 credits)

- 21 credits of electives from Bloustein School undergraduate courses, 15 credits of which must be at the 300-level or higher

Students interested in specific career paths should consider clustering their electives and seek advising early in their program of study.

Joint BA/MCRP or BS/MCRP Program

Exceptional, well-prepared students from any Rutgers University-New Brunswick matriculating unit with a GPA of 3.5 or higher, exceptional GRE scores, a dedication to public service and outstanding recommendations who wish to study urban planning are encouraged to seek advising about the 3-1-1 master of city and regional planning (M.C.R.P.) program. Contact ugadmissions@ejb.rutgers.edu for more information.

Planning and Public Policy Minor (18 credits)

The Bloustein School welcomes current and prospective Rutgers-New Brunswick students to consider the Planning and Public Policy minor. Students should declare a minor with their matriculating school. They need not apply for minor status with the Bloustein School. Only courses with a grade of 'C' or better can be counted toward the minor program of study.

This minor is well-matched to majors in economics; labor studies & employment relations; political science; geography; sociology; urban planning and design; as well as the pre-law track.

Students seeking the Planning and Public Policy minor must complete three core courses and five elective courses in course code 762, excluding those designated for 'majors only'.

- 10:775:101 Introduction to Planning, Policy and Health (3)
- Five electives selected from all the undergraduate Bloustein courses that are open to non-majors. At least four of the five must be 300 or 400-level.

For the most current configuration of courses for the Planning and Public Policy minor, please see the school's website at https://bloustein.rutgers.edu/undergraduate/planningandpublicpolicy/#minor

Planning and Public Policy Certificate Programs

The Bloustein School currently offers four Planning and Public Policy certificates open to all Rutgers-New Brunswick undergraduates. Certificate programs are open to students in any major and are awarded with, or subsequent to, a bachelor's degree. Only courses with a C or better may be applied toward a certificate program.

Certificates do not qualify as a minor. **Students must declare their intention to pursue a certificate program with the Bloustein School before their last semester of study in order to qualify to receive a certificate.** Awarded certificates appear on the student's final transcript.

For the most current configuration of courses for each certificate, please see the school's website at https://bloustein.rutgers.edu/undergraduate/#certificates¿

- Community Development Certificate (24 credits)
- Community Sustainability Certificate (18 credits)
- Urban Planning Certificate (24 credits)
- Historic Preservation Certificate (15 credits)

Comparative Literature 195 (SAS)

COMPARATIVE LITERATURE 195

Program in Comparative Literature, School of Arts and Sciences

Website: http://complit.rutgers.edu

Chair: Ben Sifuentes-Jáuregui

Undergraduate Director: Karen Elizabeth Bishop

Program Coordinator: Fatimah Fischer

Core Faculty:

Ousseina Alidou, B.A., Niamey (Africa); M.A., Ph.D., Indiana

Nicola Behrmann, M.A., Free University Berlin; Ph.D., New York

Karen Elizabeth Bishop, B.A., Ph.D., California (Santa Barbara)

Lauren Goodlad[KS1] , B.A., Cornell; M.A. NYU; Ph.D., Columbia

Martha Helfer, B.A., Washington (St. Louis); M.A., Wisconsin (Madison); Ph.D., Stanford

E. Khayyat, B.A. Istanbul; M.A. Istanbul & Columbia; Ph.D., Columbia

Jeffrey Lawrence[KS2] , B.A. Amherst College; Ph.D. Princeton

Michael Levine, B.A., Cornell; M.A., Ph.D., Johns Hopkins

Preetha Mani, B.A., Tufts; Ph.D., California (Berkeley)

Jorge Marcone, B.A., Pontificia Universidad Católica del Perú; M.A., Ph.D., Texas

Susan Martin-Márquez, B.A., M.A., Chicago; Ph.D., Pennsylvania

Anaïs Maurer, B.A. Sorbonne; M.A. Sorbonne & Tulane; Ph.D. Columbia

Anjali Nerlekar, B.A., M.A., M.Phil., Pune (India); Ph.D., Kansas

Andrew Parker, B.A., Princeton; M.A., Ph.D., Chicago

Nicholas Rennie, B.A., Princeton; Ph.D., Yale

Richard Serrano, B.A., Stanford; M.A., Ph.D., California (Berkeley)

Ben Sifuentes-Jáuregui, B.A., M.Phil., Ph.D., Yale

James Swenson, B.A., Brown; M.A., Ph.D., Yale

Emily Van Buskirk, B.A., Princeton; Ph.D., Harvard

Alessandro Vettori, Dottore in Lettere, Firenze (Italy); Ph.D., Yale

Janet Walker, B.A., Wisconsin; M.A., Ph.D., Harvard

Xiaojue Wang, B.A. Peking (China); M.A, Peking (China); M.Phil, Ph.D., Columbia

Affiliate Faculty:

Ed Cohen, A.B., Georgetown; Ph.D., Stanford

Paola Gambarota, Ph.D., Pavia (Italy); Ph.D., Yale

Jae Won Edward Chung, B.A., Swarthmore; M.A., Ph.D., Columbia

Daniel Da Silva, Ph.D., Columbia

Ryan James Kernan, A.B., Princeton; Ph.D., California (Los Angeles)

Pavel Khazanov, B.A., California (Los Angeles); M.A., London; Ph.D., Pennsylvania

Chloe Kitzinger, B.A., Yale; M.A., Middlebury; Ph.D., California (Berkeley)

Benjamin Koerber, B.A., Indiana; M.A., Ph.D., Texas

Julie Rajan, B.A., Johns Hopkins; M.A., Rutgers; M.L.A., Pennsylvania; Ph.D., Rutgers

Dominik Zechner, M.A., Vienna; M. Phil., Ph.D., New York

Ann Jurecic, B.A., Bryn Mawr College; M.A.T., Brown; Ph.D., Princeton

Mukti Mangharam, B.A., York (UK); M.Phil., Cambridge; Ph.D., Cornell

Louis Sass, B.A., Harvard; M.A., Ph.D., California (Berkeley)

Louisa Schein, B.A., Brown; M.A., Ph.D., California (Berkeley)

Meheli Sen, B.A., M.A., Jadavpur (India); Ph.D., Emory

Weijie Song, B.A., Xi'an Jiaotong (China); M.A., Ph.D., Peking (China); Ph.D., Columbia

Michelle Stephens, B.A., SUNY (Stony Brook); Ph.D., Yale

Andrea Baldi, B.A., Firenze; Ph.D., California (Los Angeles

Camilla Stevens, B.A., Tulane; M.A., New Mexico; Ph.D., Kansas

Wendy Swartz, B.A., California (San Diego); M.A., Ph.D., California (Los Angeles)

Comparative literature is an interdisciplinary program that studies global literary and cultural expressions as they shape and are shaped by science, economics, religion, politics, sexuality, and other historical forces. It attracts students with wide-ranging interests in literature, theory, cultural and media studies, and who wish to read literature in the original language as well as in translation. Students are urged to begin or continue the study of a language other than English, and to study abroad.

The program offers students the opportunity to design an individualized and interdisciplinary major and minor. Students generally begin with Literature across Borders (01:195:201), a course whose theme changes every year and whose weekly lectures are taught by different members of the program¿s core faculty. Students then choose 200- and 300-level courses in comparative literature and other programs that reflect their individual focus. Since students have different preparations and interests, no two pathways through the program are identical. Students might choose as their focus, for example, topics such as a national language and literature, the novel or film studied across cultures, cultural theories and philosophy, literature in relation to art and/or film, or two national literatures. Because of the individualized nature of the major, students are required to confer with the undergraduate director at least once each semester during the registration period.

Comparative literature core faculty members are accomplished scholars and devoted teachers. Many have won awards for their teaching and scholarship from Rutgers and around the world. The major and minor programs offer students the opportunity to work closely with these professors, who are from a wide range of departments, including African, Middle Eastern, and South Asian Languages and Literatures (AMESALL); Asian Languages and Cultures (ALC); English; French; German; Russian and East European languages and Literatures (REELL); Italian; Latino and Caribbean Studies; and Spanish and Portuguese. Core faculty members are available to mentor students and serve as advisers of honors theses.

Because of the intensive training in analytical thinking and writing, undergraduates who major or minor in comparative literature often go on to study literature or related fields in graduate school, attend law school, or find employment in a wide variety of professional fields such as publishing, business, and government service.

Comparative Literature 195 (SAS)

Learning Goals

Learning Goals

Students in comparative literature will demonstrate familiarity with a variety of world literatures, as well as with methods of studying literature and culture across national and linguistic boundaries. They will learn how to evaluate the nature, function, and value of literature from a global perspective; demonstrate critical reasoning and research skills; design and conduct research in an individual field of concentration (such as literary or critical theory, women's literature, postcolonial studies, film and media studies, etc.); and analyze a specific body of work and write clear and well-developed papers or design projects about a topic related to more than one literary and cultural tradition.

Comparative Literature 195 (SAS)

Major Requirements

Major Requirements

Major in Comparative Literature: 34 credits

All majors take the three core courses in the discipline of comparative literature. They organize the rest of their courses, taken in both comparative literature and in related fields, into a coherent, individualized program, in regular consultation with and subject to the approval of the undergraduate director.

Core Courses (7 credits)

01:195:201 Literature across Borders (3)

01:195:301 Introduction to Literary Theory (3)

01:195:394 Jr. Sem/Tpc Comp Lit (3)

Foreign Literature Requirement (9 credits)

Two courses at the 200 level or above in a national or regional literature (6)

One course on a literature from outside the European and Anglo-American literary traditions (3)

Major Focus (18 credits)

Six further courses at the 200 level or above in a foreign language, a foreign literature, film, or cultural studies, including two courses at the 300 level or above in comparative literature (18).

Grades of C or better must be earned in the above courses used to fulfill the requirements of the major.

Advanced Studies in Comparative Literature: 45 credits

Students wishing to achieve a wide knowledge of world literatures and cultural theories may choose this option. All students in the Advanced Studies in Comparative Literature option take five core courses in comparative literature. They organize the rest of their courses, taken in both comparative literature and related fields, into a coherent, individualized program, in regular consultation with and subject to the approval of the undergraduate director.

Core Courses (15 credits)

01:195:201 Literature across Borders (3)

01:195:203 Masterworks of Western Literature (3)

01:195:301 Introduction to Literary Theory (3)

01:195:307 Introduction to Postcolonial Literatures and Theories or one course on the 200 or 300 level in a non-European literature: examples are African, Caribbean, East Asian, Latin American, Middle Eastern, South Asian (3)

01:195:394 Sem/Tpc Comp Lit (3)

Foreign Languages and Literature Requirement (at least 15 credits)

Three literature courses (9 credits) from a single national or regional literary tradition other than English or American. At least two of these must be taught in the original language.

Two courses (or at least 6 credits) in either language or literature taught in a language other than English.

Major Focus (9 credits)

Students select an area of concentration, such as period, region, theoretical approach, or theme (for example: gender/sexuality, colonialism/decoloniality, migration, translation, etc.) and choose a group of at least three courses (9 credits) in this area. One of these must be a comparative literature course at the 300 level or above. Two additional relevant courses may be chosen from other departments in the humanities or social sciences.

Grades of C or better must be earned in the above courses used to fulfill the requirements of the major.

Senior Thesis (6 credits)

Students write a final thesis related to the area of concentration and enroll in 01:195:495,496 Honors in Comparative Literature (3,3). Grades of B+ or better must be earned in the two Honors courses.

Minor Requirements

Minor Requirements

Minor Requirements

Minor Requirements: 18 credits

All minors take two core courses in the discipline of Comparative Literature: Literature Across Borders (201) and Introduction to Literary Theory (301). Please see below for more information about when these required courses are offered. If a course runs once per year, be sure to check the schedule of classes to see if it's running and/or reach out to the DUS for further information.

Minors in Comparative Literature are required to fill out and submit the above checklist every year by 1 November to the DUS to make sure they're on track. It is recommended you do so for the first time by at least fall of your junior year. If you have not done so by the beginning of your senior year, reach out for an advising appointment ASAP. Not meeting with the DUS to approve your checklist may mean that you will not be on track to graduate.

Please see below for more information about when the required courses for both the Major and Advanced Major are offered. If a course runs once per year, be sure to check the schedule of classes to see if it's running and/or reach out to the DUS for further information.

The minor consists of 18 credits of coursework in Comparative Literature:

Core courses (6 credits)

01:195:201 Literature across Borders (3) :: OFFERED ONCE PER YEAR, IN EITHER FALL OR SPRING

01:195:301 Introduction to Literary Theory (3) :: OFFERED ONLY IN THE FALL SEMESTER

Electives (12 credits)

Four other courses in Comparative Literature, chosen in consultation with and approved by the undergraduate director. One of these may be at the 100 level, and one must be at the 300 level or above. (12)

Grades of C or better must be earned in all courses used to full the requirements of the minor.

A minor in Comparative Literature may not count more than 3 credits towards both the CompLit minor and another minor or major.

Minor in Translation Studies:18 credits

Foundational Courses (6 credits)

01:195:303 Introduction to Translation Studies (3)

Senior Seminar in Translation Studies

Elective Courses (12 credits)

Four courses

Comparative Literature 195 (SAS)

Departmental Honors Program

Departmental Honors Program

To graduate with Honors in Comparative Literature, students must complete a thesis, which will be evaluated by a director and a second reader. Students will receive 3 credits each semester for independent work on the thesis. A grade of B+ or better is required in the two Honors in Comparative Literature courses (01:195:495,496).

To qualify, at the end of their junior year majors must have a cumulative grade-point average of 3.0 or better, and a grade-point average of 3.5 or better in the major. They must have their topic approved as adequate for an honors thesis by their chosen thesis director and the undergraduate director. Such approval is usually required by the end of the spring semester of the junior year and in no case later than the end of the add/drop period of the first semester of the senior year.

Comparative Literature 195 (SAS)

Courses

Courses

01:195:101 ***Introduction to World Literature (3)***
Study of outstanding works of fiction, plays, and poems from European, North and South American, African, Chinese, Japanese, Indian, and Middle-Eastern literature through a chosen theme. Focus on questions of culture, class, gender, colonialism, and on the role of translation.

0:195:110 ***Introduction to Heritage Culture and Language Studies (3)***
Analysis and understanding of cognitive, social, and cultural aspects related to bilingual speakers of a minority language in a majority-language society. A hybrid online course.
Credit not given for both this course and 01:940:110.

01:195:120 ***Global Science Fiction (3)***
Novels, short stories, and films from around the globe in the genre of science fiction. Works approached as experiments in the narrative imagination of world-making and -unmaking; and for the light they shed on the relation between science and fiction in different global contexts over the past two centuries. Attention also given to language, environment, nation, race, gender, and sexuality as aspects of fictional worlds.

01:195:135 ***Short Fiction (3)***
Study of various genres of short fiction, in English translation, by some of the most important writers in world literature. Course themes focus on the city, the nation, migration and exile, colonialism, science fiction, the fantastic, magical realism, horror, mystery, among others.

01:195:137 ***The Haunted (3)***
Examines what haunts us, both from within and without. Different approaches to understanding our own ghosts--as individuals and as a society--by turning to what haunts some of the key works of modern Western literature.

01:195:140 ***Being Human (3)***
Definitions in literature and film of what it means to be human. Ancient conceptions of the ideal human being; early modern and modern definitions of the human in relation to ethnic others, animals, aliens, and machines.

01:195:145 ***Heroes and Heroines (3)***
An introduction to the heroic dimension of human life as represented in literature.

01:195:150 ***World Mythology (3)***
Story, structure, and meaning in myths of many cultures. Myth as a primary literary phenomenon, with some attention to anthropological and psychological perspectives.

01:195:170 ***The Art of Comparison (1.5)***
An introduction to the arts and methodologies of comparison as practiced in the field of comparative literature, through topics that change each time the course is offered. Topics include love, envy, greed, etc. Development of skills in close reading and writing through an exposure to literary texts from a variety of cultures, as well as the capacity to reflect on the role that the topics play in students' own lives.

01:195:201 ***Literature across Borders (3)***
Concept and practice of comparative literature across historical periods, cultures, and genres. Topics vary from year to year: war, metamorphosis, friendship, sex, being human, poison, the forbidden, translation and love, among others.

01:195:203 ***Masterworks of Western Literature (3)***
Journey through Western literature from its beginnings to the 21st century. The epic, love poetry, drama, novels, and short novels. Classic Greek and Roman, medieval, Renaissance, modern French, German, English, and Russian literatures. European literary texts in their literary and sociopolitical contexts. All works read in translation.

01:195:204 ***Masterworks of World Literature (3)***
Key works of literature from a variety of literary traditions, Western and non-Western, modern and ancient. Topics such as class, gender, politics, time, identity, and translation. All works read in translation.

01:195:206 ***Banned Books (3)***
Global history of censorship with a focus on the political and cultural contexts of countries like the USA, Niger, Egypt and India. How ideas in great books have been suppressed through debates about sedition, blasphemy, obscenity, and sexuality and strategies that people used to undermine that suppression, such as book smuggling, underground markets, exile and translation.
Credit not given for this course and 01:013:206.

01:195:216 ***Introduction to World Literatures in English (3)***
Survey of English language literatures, including Asian, African, and Caribbean, in a global context.
Credit not given for both this course and 01:351:216.

01:195:220 *Our World: Social Justice and the Environment (3)*
Study of the imagining of human/nonhuman relationships in recent social movements as represented in world literature, film, visual arts, and digital social networks. Interpretation of these representations within their cultural traditions, and in dialogue with local, regional, or planetary environmental changes and activism.

01:195:221 *Introduction to the Literatures of the Middle East (3)*
Literatures of the Middle East from their origins to the present.
Credit not given for both this course and 01:013:221 or 01:685:221.

01:195:227 *Tales of Horror (3)*
Examination of historical and political context, and psychoanalytical underpinnings, of horror tales in literature and film of the Western tradition from Brothers Grimm to Alfred Hitchcock. Focus on some of the most spellbinding creatures from this tradition: Frankenstein and Dracula, vampires and zombies, Doppelgängers, ghosts, artificial humans, and other figures that continue to haunt the cultural imagination.
Credit not given for both this course and 01:470:227.

01:195:230 *Modern Jewish Culture: Key Texts and Their Afterlives (3)*
Examines four key texts, written between 1894 and 1944, that have become fixtures not only of modern Jewish culture but also of world culture, primarily through adaptations and remediations in stage, film, broadcasting, music, and visual art.
Credit not given for both this course and 01:563:230.

01:195:231 *Masterpieces of Hispanic Literature in Translation (3)*
Reading and interpretation of outstanding Hispanic writers.
Credit not given for both this course and 01:940:241. Prerequisite: 01:940:201, 202, 203, or 204 only for students who wish to count this course for the Spanish major or minor, and if all written work is done in Spanish.

01:195:232 *Women Writers of South Asia (3)*
Survey of recent writings by women from a variety of cultural, linguistic, and regional areas of South Asia.
Credit not given for both this course and 01:013:232 or 01:098:232.

01:195:233 *Understanding the French Enlightenment (3)*
Critical examination through major philosophical and literary works of the history, concepts, and values of the French Enlightenment, with particular emphasis on their relevance in past and present debates about civil society, political institutions, nature, morality, artistic creation, scientific progress, religion, and changing notions of selfhood. Taught in English.
Credit not given for both this course and 01:420:230.

01:195:235 *Detective Stories (3)*
The detective story in its historical and philosophical context. The formal logic of the 19th- and early 20th-century detective story examined in respect to concepts such as identity, action, time, and social agency in works by American, Argentinian, British, French, and German authors. All non-English texts read in translation.

01:195:237 *Arabic Classical Literatures (3)*
Survey of a wide selection of Arabic literary texts in translation, dating from the sixth to the twelfth centuries, including poetry and prose in both classical and colloquial Arabic.
Credit not given for both this course and 01:013:343. All works studied in translation.

01:195:240 ***Animals and Humans (3)***
Animals and humans in global literary and filmic texts. Animals as moral teachers; symbolic animals; animal narrators; humans turning into animals in metamorphosis stories; and ecofeminist versions of human-animal relations.

01:195:241 ***Masterpieces of Modern Greek Literature (3)***
Reading and discussion of great works of modern Greek literature including short stories, poetry, the novel, and film.
Taught in English translation. Credit not given for both this course and 01:489:241 or 01:489:340.

01:195:242 ***The Portuguese-Speaking World: A Literary Introduction for English Speakers (3)***
Introduction to literary texts from the Portuguese-speaking world (Portugal, Brazil, and Lusophone Africa).
Credit not given for both this course and 01:810:242.

01:195:243 ***Introduction to the Literatures of South Asia (3)***
Literatures of South Asia from their origins to the present. All works studied in translation.
Credit not given for both this course and 01:013:231.

01:195:244 ***Introduction to Myth (3)***
Myths of various cultures; their structures and functions in social and especially literary contexts.
Credit not given for both this course and 01:351:244 or 01:358:244.

01:195:245 ***Introduction to Folklore (3)***
Major genres of folklore, including folktale, folk song, and legend, with attention to the methods of collecting and analyzing these materials.
Credit not given for both this course and 01:351:245 or 01:358:245.

01:195:246 ***Fairy Tales Then and Now (3)***
Analysis of structure, meaning, and function of fairy tales and their enduring influence on literature and popular culture.
Credit not given for both this course and 01:470:225.

01:195:247 ***PSY-FI: Literature and Psychoanalysis (3)***
Key psychoanalytical concepts explored through readings of literature, film, case studies, and literary theory.
Credit not given for both this course and 01:470:247.

01:195:249 ***Modern Literatures of South Asia (3)***
Literary works from modern South Asia.
Credit not given for both this course and 01:013:331. All works studied in translation.

01:195:250 ***Comparative Approaches to African Literatures (3)***
Reading and discussion of literature in translation from different geographic, linguistic, and cultural areas of Africa.
Credit not given for both this course and 01:016:250.

01:195:251 ***Major French Writers in Translation (3)***
Landmarks of French literature from the Renaissance to the present. Plays, novels, and essays of such authors as Molière, Voltaire, Rousseau, Balzac, Flaubert, Sartre, and Camus.
Credit not given for both this course and 01:420:241 or 01:420:242.

01:195:255 ***The City and Literature (3)***
Reading and discussion of different forms of representation of major cities in the United States, South America, Europe, and East Asia. Analysis of poetry, short stories, novels, film, and critical essays with emphasis on the similarities and differences between discourses about urban centers such as Paris, New York, London, Mexico City, São Paulo, Moscow, Tokyo, and Shanghai.

01:195:257 ***The Postcolonial City (3)***
Study of literary and cultural representations of cities around the postcolonial world. Discussions regarding issues of community, violence, migration, displacement, homelessness, mass communication, and mass transportation.

01:195:258 ***From Nietzsche to Superman (3)***
Examination of transformation of Nietzsche's Ubermensch ("overman") into the American Superman heroes of our contemporary culture. Analysis of impact of this motif on gender studies, animal studies, and contemporary media technologies, i.e. Hitler's racist Aryan superman and its dismantling in modern art; female versions of Superman such as Wonder Woman or the "material girl" in pop culture; figures of the "outlaw", the "idiot", and the cyborg.
Credit not given for both this course and 01:470:254 or 01:470:258.

01:195:260 ***Introduction to Caribbean Literature (3)***
Reading and discussion of poetry, prose, and drama by major literary figures representative of different histories and cultures of the Caribbean and its diaspora.
Credit not given for both this course and 01:595:270 or 01:940:270.

01:195:261 ***Introduction to Theater (3)***
Survey of various genres of theater across multiple cultures; theater's function in social and literary contexts.

01:195:262 ***Life Writing in France (3)***
Critical interpretation of autobiographical texts, with particular attention to the distinction of fact and fiction, and theories of subjectivity, identity, and memory.
Credit not given for both this course and 01:420:261.

01:195:267 ***Latino Literature (3)***
Latino experiences in the United States through literary voices drawn from the Mexican, Puerto Rican, Dominican, Central American, and Cuban diasporas and native cultures. Topics include: cultural identity, hybridity, mestizaje, border writing, transnationalism, transculturation, language appropriation, subversion and negotiation, and gender issues.
Credit not given for both this course and 01:595:267.

01:195:268 ***Walking in the City (3)***
Representations of walking in modern European culture. Readings: Baudelaire, Calvino, Serao, Mansfield, Marinetti, Ortese, and Woolf. Screenings: Rossellini, De Sica, Sorrentino. Taught in English.
Credit not given for both this course and 01:560:268.

01:195:269 ***Dominican Literature (3)***
Study of the development of Dominican literature from the Spanish colonial period to the present. Emphasis on major writers such as Columbus, Pané, Galván, Bosch, Alvarez, Danticat, Andújar, Rita Indiana, and Junot Díaz.
Credit not given for both this course and 01:595:269 or 01:940:331,332. Reading knowledge of Spanish recommended.

01:195:270 *Past Today (3)*
Analysis of 21st-century conflicts through historical context, using literature, film, and the visual arts, music, architecture, and other forms of cultural production.

01:195:271 *Resisting Petrocapitalism: Oceanians against Climate Collapse (3)*
Analysis of how literary works of the Pacific Islands¿ Indigenous activists across Oceania denounce the entanglement of capitalism, imperialism, and environmental crises and use their strategic position at the heart of the global fluxes of oil, goods, and capital transiting between Asia and North America to challenge petrocapitalism and the military industrial complex protecting it.Credit not given for both this course and 01:988:261.

01:195:272 *Russia: Between Empire and Nation (3)*
Study of Russia's imperial culture, history, and politics from the 19th to the 21st century as a window onto geopolitical shifts in contemporary Russia's relations to the wider world.
Credit not given for both this course and 01:510:277 or 01:860:272.

01:195:274 *Major French Plagiarists: Literature between Repetition and Originality (3)*
Critical examination of the history and practice of literary plagiarism, with particular emphasis on the pre-modern tradition of imitation and past and present debates about originality, creativity, plagiarism, and changing values of authorship.
Taught in English. Credit not given for both this course and 01:420:272.

01:195:276 *Realism and Revolution (3)*
Introduction to 19th-century German literature and its response to and critical reflection of the French Revolution.
Taught in English. Credit not given for both this course and 01:082:276 or 01:470:276.

01:195:277 *Radical Modernism and Anti-Art (3)*
Introduction to the major movements and protagonists of the early 20th-century European avant-garde--Expressionism, Futurism, Dada, Surrealism--and the impact of these movements on Pop Art and Punk Rock of the 1960s and 1970s. Includes examples from visual works (Kirchner, Kandinsky, Duchamp, Ernst), literature (Wedekind, Ball, Marinetti, Apollinaire), and cinema (Murnau, Richter, Buñuel, Warhol).
Taught in English. Credit not given for both this course and 01:470:277 or 01:470:358.

01:195:280 *Textual Transformations (3)*
Introduction to a broad range of possible textual transformations such as literary translation, film adaptation, transcription, ekphrasis, and dramatization. Discussions regarding notions of originality and derivation and examination of the ways artists use form to domesticate, subvert, celebrate, or modernize other artists' works.
Credit not given for this course and 01:195:303.

01:195:282 *Music, Culture, and Memory in the French-Speaking World (3)*
The place of music in French and Francophone culture, with particular attention to its role in historical events and in the way they are remembered.
Credit not given for both this course and 01:420:282.

01:195:295 *Latino and Caribbean Cultural Studies (3)*
Comparative study of Latino and Caribbean cultures. Reviews key definitions of culture, historical and disciplinary evolution of the term, and key debates on cultural studies in the humanities.
Credit not given for both this course and 01:595:295 or 01:050:295.

01:195:296 ***A Cultural History of Artificial Intelligence (3)***
A cultural-critical analysis of the notion of artificial intelligence, particularly as it relates to race, gender, and agency in multicultural and non-Western contexts. Analysis of the intellectual history within which our contemporary perceptions of artificial intelligence evolved via a survey of the history of computing and representations of artificial intelligence in fiction, cultural criticism, and film.

01:195:301 ***Introduction to Literary Theory (3)***
An examination of theoretical concepts and contexts that constitute and frame contemporary views of literature. Critical analysis of formalist, psychoanalytic, structuralist, poststructuralist, Marxist, and feminist approaches to theory and literature. Structured to familiarize students with recent debates in critical and cultural theory.

01:195:302 ***Writing in the Discipline: Literary and Cultural Studies (3)***
Advanced writing course for students of literature and humanities. Introduction to research methods, library resources, and scholarly writing in general. Assignments include writing abstracts, book reviews, research papers, and preparation for longer writing projects such as honors theses and sample writings for admission to graduate school.
Prerequisite: One second-level writing course or permission of the undergraduate director.

01:195:303 ***Introduction to Translation Studies (3)***
Introduction to the main themes and issues in contemporary Translation Studies.
Taught in English. Credit not given for this course and 01:013:304 or 01:195:280.

01:195:304 ***Fiction and Ideology (3)***
Fictional narratives as statements about social order. Texts by major thinkers such as Marx, Lukács, Goldmann, Benjamin, and Williams.

01:195:305 ***Readings in Latin American Literature and Theory (3)***
Analysis of Latin American literature as theory and criticism. Close readings of texts in Anglo-American and French criticism alongside Latin American literary and cultural production to compare the relationship and articulation of these different theoretical modes.

01:195:306 ***Literature and Cultural Conquest (3)***
Dissemination and reception of hegemonic literatures: the function of travel literature; the transformation and appropriation of popular cultures.
Credit not given for both this course and 01:353:326 or 01:359:345. 01:353:326 may be counted for major core requirement with permission of undergraduate director.

01:195:307 ***Introduction to Postcolonial Literatures and Theories (3)***
Study of novels, poetry, essays, and films from regions of the world deemed postcolonial, which may include Africa, Latin America, South and Southeast Asia, and the Caribbean. Discussion of major issues in postcolonial theory and criticism.
Credit not given for both this course and 01:013:307.

01:195:308 ***Gender, Race, and Textual Imagination (3)***
Literature as the privileged representation of the other. The connection between the form(s) of creative writing and the evolution of the notion of sexual and/or racial differences.

01:195:309 ***Major Literary Trends (3)***
Survey of major literary periods or movements such as classical, medieval, Renaissance, romanticism, realism, and naturalism.

01:195:310 ***Literary Institutions (3)***
Literature as a socially determined phenomenon. The historical evolution of the status of the writer, the work, the critic, and the vicissitudes of the dissemination of literary writing in various societies.

01:195:311 ***Dostoevsky (3)***
Major works in historical, intellectual, and aesthetic contexts. *The Brothers Karamazov*, *Crime and Punishment*, *Notes from Underground*, and short works. All readings and discussion in English.
Credit not given for both this course and 01:860:330.

01:195:312 ***Russian and East European Science Fiction (3)***
Exploration of the 19th-21st-century tradition of Russian and East European science fiction in literature and film. Discussions include the problem of utopia, new technologies and how they transform our understanding of the human, alien encounter narratives, and more. No prerequisites. Course taught in English.
Credit not given for this course and 01:860:326.

01:195:314 ***German and Comparative Literature (3)***
Examination of the literary and artistic traditions of German-speaking Europe as they relate to the social, technological, religious, political and linguistic histories of both these regions, and those of other cultures with which these traditions have, historically, been in dialogue.
Credit not given for this course and 01:470:304.

01:195:315 ***Dante and Medieval Culture (3)***
Dante's work in historical perspective: theological antecedents, memory of the classical writers, and new profane literary experience.
Credit not given for both this course and 01:560:315.

01:195:316 ***Politics, Literature, and the Arts (3)***
Discussion and analysis of political elements in selected aesthetic works. Themes vary according to instructor.
Credit not given for both this course and 01:790:316.

01:195:318 ***Postmodern Approaches to Sacred Literature (3)***
Postmodern literary analysis of religious texts drawn from Jewish, Christian, and Hindi traditions.
Credit not given for both this course and 01:840:362.

01:195:319 ***Unraveling Race in Latino and Latin American Studies (3)***
Study of the history and cultural representation of race and ethnicity in Latin American and Latino Studies from the colonial period to the present. Emphasis on major writers working with race, miscegenation, and radicalization.
Credit not given for both this course and 01:595:319.

01:195:320 ***World Cinema I (3)***Developments in French, Italian, British, Russian, and other national cinemas from 1896 to World War II; also examines cross-influences between foreign and American cinema.
Credit not given for both this course and 01:354:320 or 01:175:320.

01:195:321 ***World Cinema II (3)***
Major developments in global filmmaking from the 1950s to the present, with an emphasis on specific national and transnational cultures and their industrial and artistic practices.
Credit not given for both this course and 01:354:321 or 01:175:321.

01:195:324 ***Twentieth-Century Literature in a Global Context (3)***
Twentieth-century writing in English other than British and American.
Credit not given for both this course and 01:350:378 or 01:358:361.

01:195:326 ***Sexuality and Literary Studies (3)***
Survey of how sexual identities (gay, lesbian, transgender, queer, and others) relate to narrative and cultural theory.
Credit not given for both this course and 01:351:315.Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:195:327 ***Women's Traditions in Literature (3)***
Focus on the social context of a feminine literary tradition and the relationship between gender and genre.
Prerequisite: One course in women writers or permission of instructor.

01:195:329 ***Japanese Selves, Western Others (3)***
The Japanese gaze on European and American concepts, people, and objects in fiction from the late 19th century to the present. Japanese identity defined through the encounter with the Western Other.

01:195:330 ***Literature and Culture of Brazil (3)***
Reading and discussion of selected works of fiction and nonfiction with emphasis on their place in the development of Brazilian literature and their relationship to Brazilian culture.
Credit not given for both this course and 01:810:330.

01:195:331 ***The Novel, East and West (3)***
The novel of the last one hundred years as a cross-cultural form. Comparison of novels from America, Europe, Asia, India, and Africa.

01:195:332 ***The Samurai Tradition in Japanese Literature and Film (3)***
The samurai warrior as a focus of cultural and political expression in Japanese literature and cinema. Supplementary readings on samurai culture and thought.
Credit not given for both this course and 01:565:320.

01:195:333 ***Modern Writers and East Asia (3)***
Influence of Asian literature and philosophy on the development of Western poetry, drama, and fiction of the 20th century. Works include poems of Pound, Brecht, and Gary Snyder; plays of Yeats and Brecht; novels of Forster, Conrad, and Hesse.

01:195:336 ***Literatures of Migration, Immigration, and Diaspora (3)***
Writings that foregrounds representations of place, community, and identity in relation to national and international movement and displacement.
Credit not given for both this course and 01:351:366 or 01:358:384.

01:195:337 ***Literature and Memory in the Arab World (3)***
Explores the interconnections between memory and literature in the Arab world through close readings of memoirs, novels, poems, short stories, films, and graphic art.
Credit not given for both this course and 01:013:346 or 01:685:347.

01:195:338 ***Caribbean Pluralities and Indo-Caribbean Literature (3)***
A study of some of the major canonical works of the Anglophone Caribbean and Indo-Caribbean writers.
Credit not given for both this course and 01:013:335 and 01:595:335.

01:195:340 ***Renaissance and Baroque (3)***
Intellectual currents and representative works, including epic, lyric, prose fiction, and drama of the European Renaissance. Readings from Marlowe, Rabelais, Montaigne, Erasmus, More, and others.

01:195:341 ***European Neoclassicism (3)***
European literature in the 17th and early 18th centuries and its connections with political, philosophical, and scientific thought of the time. Authors include: Galileo, Descartes, Corneille, Molière, Milton, Dryden, Pope, and Grimmelshausen.

01:195:342 ***The Romantic Movement (3)***
Intellectual currents and representative works, including lyric, fiction, and drama of the European romantic movement. Major romantic texts of France, Germany, and Russia.

01:195:345 ***From Dostoevsky to The Wire: Serial Storytelling across Media (3)***
Investigation of serial narrative as a modern mode of storytelling, from the emergence of the serial novel in 19th-century Europe and Russia through 21st-century American serial television and podcasts. Exploration of the enduring power of this narrative form, in multiple media, to interweave fiction with the course of current events and the rhythms of everyday life. All readings and discussions in English.
Credit not given for both this course and 01:860:345 or 01:359:347.

01:195:346 ***Classical Backgrounds of Literature (3)***
Influence on literature of classical Greek and Roman epic, tragedy, comedy, and other literary forms.
Credit not given for both this course and 01:351:317 or 01:358:302.

01:195:347 ***The Life and Works of Odysseus Elytis (3)***
Examination of the works of Odysseus Elytis; the writers and artists who influenced his work.
Credit not given for both this course and 01:489:347.

01:195:348 ***Stories of Russian Life: Memory, Invention, Experience (3)***
Examination of how Russian writers have imagined and represented the self in various kinds of life narratives (autobiography, diary, memoir, and semifiction). Memory and invention, history and personality, genre and technique, from the medieval era to the present, with emphasis on the 20th century.
Taught in English. Credit not given for both this course and 01:860:348.

01:195:349 ***The Bible and Western Literature (3)***
Influence of the King James and other versions of the Bible on literature in English.
Credit not given for both this course and 01:351:319 or 01:358:204.

01:195:350 ***Theory of Narrative (3)***
Logic of narrative and its implications in modern culture. Theoretical texts by Jakobson, Foucault, Genette, and Propp; modern fiction by Poe, Borges, Robbe-Grillet; newspaper articles, and advertisements.
Prerequisite: One course in literature or permission of instructor.

01:195:352 ***The European Novel (3)***
Comparative study of the emergence of forms, themes, and techniques of the novel from the Renaissance to the 20th century.

01:195:354 ***The Nineteenth-Century Novel (3)***
Major works of fiction in their historical and social context. Authors from Europe, the Americas, and the non-Western world.

01:195:356 ***Modern Fiction (3)***
Major works of fiction from 1900 to 1945 in their historical and political context. Works by authors such as Lawrence, Gide, Woolf, Mann, Malraux, Kafka, Proust, Sõseki, and Lu Xun.

01:195:357 ***Contemporary Novel (3)***
Major novels written since 1945 by authors from Europe, the Americas, and the non-Western world.

01:195:358 ***Odysseus in Literature, Drama & Film (3)***
Evolving images of Odysseus from ancient literature through medieval poetry and modern novels, poetry, plays, and films. Significance of Odysseus as an enduring literary icon.
Credit not given for both this course and 01:190:358 or 01:489:358. Taught in English.

01:195:359 ***Literature of the Fantastic (3)***
Short stories of the 19th and 20th centuries, with some consideration of longer forms and parallel literary developments in ancient and Eastern cultures. Structuralist and psychological approaches to genre.

01:195:360 ***Autobiography (3)***
Major works with special focus on theory and poetics.
Credit not given for both this course and 01:351:341 or 01:358:250.

01:195:361 ***Brazil and the United States: Comparative Approaches (3)***
Comparative and interdisciplinary study of Brazilian literature and culture as it relates to contemporary issues of race relations, diversity, cultural dependency, and globalization.
Course taught in English. Credit not given for both this course and 01:810:361.

01:195:362 ***Contemporary Caribbean Women Writers (3)***
Reading and discussion of recent writings by women from the Anglophone, Francophone, and Spanish-speaking Caribbean.

01:195:363 ***Women Writers of Africa (3)***
Survey of recent writings by women from a variety of cultural, linguistic, and regional areas of Africa.
Credit not given for both this course and 01:013:311 or 01:016:363.

01:195:364 *Big Bang: The Literature of Chaos and Order (3)*
Examination of literary and philosophical works from the Renaissance to the present, aimed at understanding how dramatic upheavals in the physical universe have been conceived as analogies for crisis and revolution in the realms of history, politics, psychology, science, gender, and the arts.
Credit not given for both this course and 01:470:364.

01:195:365 *Modern Arabic Literature (3)*
Survey of representative works of modern Arabic literature in translation, including poetry, the novel, the short story, and plays.
Credit not given for both this course and 01:013:342.

01:195:370 *Germany Confronts the Holocaust (3)*
Analysis of the shifting role of the Holocaust in postwar German public life, including art, literature, museums, memorials, film, television, and political discourse. Some attention given to Austria and Switzerland; contrasts will be drawn to place of Holocaust in postwar and contemporary America.
Credit not given for both this course and 01:470:370 or 01:563:370.

01:195:371 *Holocaust Media (3)*
Examines the wide array of uses of media to represent the Holocaust, from World War II to the present. Examples range from wartime radio broadcasts and newsreels to documentaries, television dramas, videotaping of Holocaust testimonies, art, photography, as well as the use of media in museum displays and tourist practices.
Credit not given for both this course and 01:563:366.

01:195:372 *Holocaust Literature in Translation (3)*
Interpretation of works dealing with the Holocaust by leading Hebrew, Yiddish, and European writers. Appropriate films used.
Credit not given for both this course and 01:563:365.

01:195:373 *Justice and Violence (3)*
Justice, violence, and the law are entangled in complex ways. While we may think that following the law will always ensure a just outcome, justice inevitably exceeds the boundaries of legal stipulations. In fact, it is quite uncertain whether and how it is possible to make a just decision, to act or speak justly. While the law is never fully able to represent justice, it is also fundamentally reliant on violence. But how is legal violence different from the unrestrained violence of lawlessness?

Taught in English. Credit not given for both this course and 01:470:309 or 01:904:309.

01:195:374 *Marx, Nietzsche, Freud (3)*
Exploration of the work of three German writers who revolutionized modern philosophy, theology, psychology, aesthetics, social and political science, gender studies, historiography, literature, and the arts.
Credit not given for both this course and 01:470:371 or 01:730:344.

01:195:375 *The Devil in the Text (3)*
An investigation of the devil's image in literature across cultures and centuries.

01:195:377 ***Topics in World Cinema (3)***
Study of a particular region, time period, movement, or theme in world cinema. Specific topic announced at preregistration.
Credit not given for both this course and 01:175:377. May be taken more than once, if content is different.

01:195:380 ***German-Jewish Literature and Culture from the Enlightenment to the Present (3)***
Survey of German-Jewish culture, 18th century to the present. Literature in political-historical context, with some attention to music, philosophy, and film.
Credit not given for both this course and 01:470:380.

01:195:381 ***Topics in Comparative Cultural Studies (1.5)***
Seven-week course. Variable content. Studies in particular ideas, themes, forms, and historic units in literature and other fields in the humanities. Specific titles available at registration.

01:195:382 ***Kafka and World Literature (3)***
Introduction to Kafka's work and its impact on world literature. Topics include: literary modernism and European modernity; Jewish languages, culture, identity, and music in the early 20th century and beyond; minor and postcolonial literature; rethinking the relationship among humans, animals, hybrids, and monsters; and new directions in art, literature, film, and music.
Taught in English. Credit not given for both this course and 01:470:354 or 01:563:355.

01:195:383 ***Nikos Kazantzakis (3)***
Works of Nikos Kazantzakis (1885-1957) and the Eastern and Western ideas that influenced him: Homer, Henri Bergson, Nietzsche, Freud, and Buddhist philosophy.
Pre- or corequisite: 01:489:241 or permission of instructor. Credit not given for both this course and 01:489:350 or 01:489:383.

01:195:384 ***Poetry (3)***
Poetry from the ancient Greeks to the 21st century, including Western and Asian poetry

01:195:385 ***Modern Poetry (3)***
Comparative survey of poetry in languages other than English from 1850 to the present. Poets include Baudelaire, Mallarmé, Rimbaud, Rilke, Brecht, Neruda, Vallejo, Mandelstam, Akhmatova, Pessoa, Apollinaire, and Artaud.

01:195:386 ***Twentieth-Century Greek Poetry (3)***
Modern Greek poetry from 1900 to 2000.
Credit not given for both this course and 01:489:386.

01:195:387 ***Hybrid Western Modernity in Literature and the Arts (3)***
The formation of European modernity in literature and the arts from the 1880s-1930 under the impact of Japanese and other non-Western aesthetics.

01:195:388 ***The Cultures of the Middle Ages (3)***
Detailed introduction to a particular aspect of the rich cultural diversity of the European Middle Ages. Topics vary.
Credit not given for both this course and 01:350:388 or 01:667:388 or 01:358:308.

01:195:389 ***Love and Power in the Italian Renaissance (3)***
Interdisciplinary investigation of early modern Italian culture, seen through the perspective of power structures.
Credit not given for both this course and 01:560:358.

01:195:390 ***Comedy (3)***
Study of the major comic traditions, especially the Menandrian (Menander, Plautus, Terence, Molière) and its modern descendant, the comedy of social criticism (Beaumarchais, Gogol, Chekhov, Shaw).

01:195:391 ***Tragedy (3)***
Study of the literature and theory of tragedy from the Greeks to the 20th century.
Credit not given for both this course and 01:351:326 or 01:358:248.

01:195:392 ***The Realistic Theater (3)***
History of the realistic presentation of theatrical spectacles in Europe from the 18th to the 20th century. Equal emphasis on staging and playwriting. Includes Ibsen, Chekhov, Shaw, and Becque.

01:195:393 ***Israeli Film (3)***
Explores major social, cultural, and political issues central to contemporary Israeli society and its development, and their representation in Israeli cinema.
Credit not given for both this course and 01:563:393.

01:195:395,396,397,398 ***Issues in Comparative Literature (3,3,3,3)***
Separate sections focusing on comparative, interdisciplinary topics. Specific titles announced at the time of registration.
Prerequisite: Permission of instructor. May be taken more than once if content is different.

01:195:399 ***Service Learning Internship (1)***
One-credit community service placement in comparative literature.
Must be taken in conjunction with a designated CESEP (Civic Engagement and Service Education Partnerships) course offered in comparative literature.

1:195:419 ***History of Criticism (3)***
History of criticism from Plato and Aristotle to the 20th century.

01:195:420 ***History of Criticism (3)***
Major criticism of the 20th century.

01:195:430 ***Gender, Nation, and Literature in South Asia (3)***
Course focuses on how representations of women have shaped ideas of modern Indian citizenship and belonging in colonial and postcolonial periods.
Credit not given for both this course and 01:013:430 or 01:988:431.

01:195:440 ***Seminar: Topics in Genre (3)***
Intensive study, in a discussion-oriented format, of a particular genre (e.g., pastoral, epic, comedy, lyric) or relationship among genres. Topics vary.
Credit not given for both this course and 01:351:440.

01:195:471 ***Yukio Mishima: His Fictions and Global Literary Legacy (3)***
Explores the many facets, fictions, and global literary legacy of one of Japan¿s most formidable 20th-century writers, Yukio Mishima (1925-1970).
Taught in English. Credit not given for both this course and 01:565:471.

01:195:475 ***The Tale of Genji as World Literature (3)***
The *Tale of Genji* in the context of world literature as court romance, psychological novel, and feminist text. Extensive readings from critical literature in English and discussion of issues in translation.
Credit not given for both this course and 01:565:475.

01:195:477 ***Advanced Topics in World Cinema (3)***
Intensive study of a particular issue in world cinema, with special attention paid to theoretical approaches. Specific topic announced at preregistration.
Prerequisite: permission of instructor. May be taken more than once, if content is different. Credit not given for both this course and 01:175:477.

01:195:480 ***Special Topics in Comparative Literature (3)***
Special studies in particular ideas, themes, forms, and historic units in literature. Content varies according to instructor.
Prerequisite: permission of instructor.

01:195:484 ***Russia after Stalin: Literature, History, Theory (3)***
Recent past of Russian culture and politics. How the Stalinist past influenced late Soviet Russian culture, contributed to the collapse of the USSR, and shaped post-Soviet Russia through examination of powerful fictional texts and films that defined the post-Soviet era, from 1950s onward, as well as nonfiction and theoretical texts on Stalinism and its aftermath.
Taught in English. Credit not given for both this course and 01:510:484 or 01:860:484.

01:195:489 ***Tolstoy's War and Peace (3)***
Detailed study of Leo Tolstoy's monumental novel *War and Peace* (1869) in its historical, cultural, and critical context. Readings and discussion in English.
Credit not given for both this course and 01:860:289 or 01:860:489.

01:195:493,494 ***Independent Study (BA,BA)***
Independent reading under supervision of a member of the department.
Prerequisites: permission of instructor and undergraduate director.

01:195:495,496 ***Honors in Comparative Literature (3,3)***
Independent research on the honors thesis.
Prerequisite: permission of the department and undergraduate director.

01:195:497 ***Capstone Seminar Workshop (1)***
Assessment of the undergraduate experience as a major in comparative literature. Debate around the present state of the discipline. Series of workshops intended to explore professional and academic careers, including preparation for graduate school and grant writing.
Open to comparative literature seniors only.

Computer Science 198 (SAS)

COMPUTER SCIENCE 198

Department of Computer Science, School of Arts and Sciences

Website: Here

Chair: Ulrich Kremmer

Associate Chair: Richard Martin

Director of Undergraduate Program: Santosh Nagarakatte

Distinguished Professors:

Dimitris N. Metaxas, Board of Governors Professor of Computer Science ; M.Sc., Maryland; Ph.D., Toronto

Mario Szegedy, M.S., Eötvös Lóránd (Hungary); Ph.D., Chicago

Professors:

Ahmed Elgammal, M.Sc., Ph.D., Maryland

Jie Gao, B.A. China, PH.D., Stanford

Tomasz Imielinski, M.S., Gdansk Politechnica (Poland); Ph.D., Polish Academy of Sciences

Ulrich Kremer, M.S., Ph.D., Rice

Badri Nath, Ph.D., Massachusetts

Thu D. Nguyen, B.S., California (Berkeley); M.S., Massachusetts Institute of Technology; Ph.D., Washington

Vladimir Pavlovic, M.S., Illinois (Chicago); Ph.D., Illinois (Urbana-Champaign)

David Pennock, B.S., M.S. Duke, Ph.D. University of Michigan

Matthew Stone, Sc.B., Brown; Ph.D., Pennsylvania

Liring Xia, B.A.(China), M.A., Ph.D., Duke

Zhang Zheng B.S., China; M.S., Ph.D., William & Mary

Associate Professors:

Abdeslam Boularas, B.S., Ecole nationale Superieure d'Informatique (Algeria);M.S., Paris Sud; Ph.D., Laval (Canada)

Mubbasir Kapadia, B.Eng., Sanghvi (India); Ph.D., California (Los Angeles)

Amélie Marian, B.S., M.S., Université de Paris-Dauphine; Ph.D., Columbia

Richard P. Martin, B.A., Rutgers; M.S., Ph.D., California (Berkeley)

Konstantinos Michmizos, B.S., Patras (Greece); M.S., McGill (Canada); Ph.D., National Technical University of Athens (Greece)

Jingjin Yu, B.S.; Ph.D., University of Illinois

Yongfeng Zhang, B.S., Peking; B.E., Ph.D., Tsingha (China)

Zhang Zheng B.S., China; M.S., Ph.D., William & Mary

Assistant Professors:

Arpita Biswas, B.T.,IEM(India), M.E., Ph.D., India Institute of Science

Dong Deng, B.S., Beihang; Ph.D., Tsinghua University

Xiong Fan, M.S., Chinese Academy of Science; Ph.D.,Cornell

Sumegha Garg, BT, India Institute(Delhi), Ph.D., Princeton

Yipeng Huang, B,S., M.S.,Ph.D., Columbia

Sudarsun Kannan, B.E., Anna (India); M.S., Ph.D., Georgia Tech

Minsung Kim, B.E., Korea University, M.A., Ph.D., Princeton

Roie Levin, B.S., Brown, Ph.D., Carnegie Mellon

Sharon Levy, B.S., M.S., Ph.D., UC Santa Barbera

Srinivas Narayana, B.Tech IIT, Madras (India); M.A., Ph.D., Princeton

Minesh Patel, B.S., UT Austin, Ph.D., Carnegie Mellon, Ph.D., ETH Zurich

Karl Stratos, B.S., University of Rochester; Ph.D., Columbia

Zihan Tan, B.S., Tsinghua, Ph.D., U of Chicago

Ruixiang Tang, B.S., Tsinghua, Ph.D., Rice

Hao Wang, B.S., Shanghai Jiao Tong University; Ph.D.

Kangning Wang, B.Eng.,Tsinghua, Ph.D., Duke

Xintong Wang, B.S., Washington, Ph.D., U of Michigan

Peng Zhang, B.S., Zhejiang; M.S., Purdue; Ph.D., Georgia Tech

Qiong Zhang, B.S., National University of Singapore; Ph.D., Carnegie Mellon

He Zhu, M.S., Tsinghua University; Ph.D., Purdue

Teaching Professors:

Frances Trees, M.A., Montclair; Ph.D., Pace

Sesh Venugopal, M.S., Ph.D., Rutgers

Associate Professor of Practice:

James Abello Monedero, M.S., California (Santa Barbara); Ph.D., California (San Diego)

Associate Teaching Professors ;

Ana Paula Centeno, B.S.,UCPel; M.S. UFRGS and Stony Brook; Ph.D.,, Rutgers

Lily Chang , M.S., NJIT; Ph.D.,Florida International

Antonio Miranda Gacia, B.S., Universidad Nacional Autónoma de México; Ph.D., Texas A&M

Assistant Teaching Professors:

Charles Wesley Cowan, Ph.D., Rutgers

Abraham Gale, B.A., Yeshiva University, Ph.D., Rutgers (NB)

Surya Teja Gavva, Ph.D., Rutgers (NB)

Samaneh Gholizadeh Hamidi, B.S.,Islamic Azad; M.S., Khayyam; Ph.D., University of Malaya

David Menendez, Ph.D., Rutgers

Faculty Emeriti:

Eric Allender

Alex Borgida

Martin Farach-Colton

Michael Fredman

Apostolos Gerasoulis

L. Thorne McCarty

Naftaly Minsky

Gerard Richter

Robert Vichnevatsky

Sholim Weiss

Students should check the Department of Computer Science website regularly, especially before selecting each semester¿s courses. Announcements of particular importance are highlighted on the main webpage.

Courses in computer science introduce students to a broad range of formal and applied material, as well as new ways of thinking. Mastery of material is important for moving on toward deeper ideas. Please note that courses for which a student has received a grade of D cannot be used to satisfy prerequisite requirements. Students who are having difficulty earning grades of C or better are strongly encouraged to see a computer science academic adviser.

Computer Science 198 (SAS)

Learning Goals

Learning Goals

Majors will:

1. be prepared to contribute to a rapidly changing field by acquiring a thorough grounding in the core principles and foundations of computer science (e.g., techniques of program design, creation, and testing; key aspects of computer hardware; algorithmic principles);

2. acquire a deeper understanding on (elective) topics of more specialized interest, and be able to critically review, assess, and communicate current developments in the field; and

3. be prepared for the next step in their careers, for example, by having done a research project (for those headed to graduate school), a programming project (for those going into the software industry), or some form of business plan (for those going into start-ups).

Computer Science 198 (SAS)

Entry Requirements for the Major

Entry Requirements for the Major

Students wishing to declare a major in computer science must achieve a grade of C or better in 01:198:111, 112, and 205, and 01:640:151-152. Transfer students are required to take at least three courses in the Rutgers University-New Brunswick Department of Computer Science before being accepted to the major.

Computer Science 198 (SAS)

Major Requirements

Major Requirements

The basic major, leading to a bachelor of arts (B.A.) degree, consists of:

1) six required courses in computer science, 01:198:111, 112, 205, 206, 211, and 344;

2) three courses in mathematics, 01:640:151-152 and 01:640:250; and

3) five electives from a designated list of courses in computer science and related disciplines (e.g., electrical engineering, mathematics).

For details, see a computer science adviser or the departmental website. At most, two of the five electives may be taken outside the Department of Computer Science; at least two must be computer science courses at the 300 level or above.

To receive a bachelor of science (B.S.) degree, students must satisfy requirements 1 and 2 (above) for the bachelor of arts degree, and, in addition, complete seven courses from category 3, no more than two of these outside the Department of Computer Science; plus four physics courses: 01:750:203, 204, 205, and 206 (or 01:750:123, 124, 227, and 229 or 01:750:193 and 194 or 01:750:271, 272, 275, and 276 or 01:750:201 and 202 or 01:750:193, 194); or chemistry 01:160:159, 160, and 171 (or 01:160:161, 162, and 171 or 01:160:163, 164, and 171).

The B.A. option requires 51-55 credits (depending on 3-credit or 4-credit elective options); the B.S. option requires 67-72 credits. No more than one grade of D can be accepted in the courses required for the major.

Declared computer science majors (198) will not receive credit (major or degree) for subsequent enrollment in computer science 105, 107,110, 142, 170, or 405.

A minimum of seven courses must be taken in the Rutgers University-New Brunswick Department of Computer Science.

Computer Science 198 (SAS)

Minor Requirements

Minor Requirements

The minor consists of six computer science courses, at least two of which are at the 300 or 400 level, chosen in consultation with a departmental adviser. Computer science courses 01:198:105, 107, 110, 170, or 405 cannot be credited toward a minor in computer science. Only courses that count toward the major may be counted toward the minor. No more than one D will be accepted in courses taken toward the minor. A minimum of five courses must be taken in the Rutgers University-New Brunswick Department of Computer Science.

Computer Science 198 (SAS)

Departmental Honors Program

Departmental Honors Program

The Department of Computer Science's honors program consists of an honors track and honors graduation requirements.

Honors Track
The department offers a special honors track to qualified students. Students in the honors track will have their progress reviewed by the honors committee and are expected to earn grades of B or better in their advanced computer science courses (300 level and above). Students who successfully complete the honors track with a grade-point average (GPA) in their computer sciences courses of at least 3.6 will automatically qualify for graduation with honors in computer science. The program offers a capstone option where the student will formulate a proposed course plan to meet honors graduation requirements, subject to the approval of the computer science honors committee.

Honors Graduation Requirements
The honors graduation requirements are:

- two units of honors credit (These are either honors sections at the 300 or 400 level in computer science, a computer science capstone project, or another program approved by the honors committee and a sponsoring faculty member. Alternatives include graduate courses in computer science or advanced honors-level courses in a related discipline such as mathematics.)
- a GPA in computer science courses of at least 3.6

Computer Science 198 (SAS)

Courses

Courses

01:198:103 ***Introduction to Computer Infrastructure (1)***
Provides students with no computer experience other than basic word processing and spreadsheets the computer skills needed for the introductory computer science courses including effectively use the Rutgers Linux computing environment to iteratively design, build, and debug programming assignments.
Pass/No Credit

01:198:105 ***Great Insights in Computer Science (3)***
Fundamental concepts of computer science for nonscience majors. Influential ideas that have shaped the discipline. Example problems drawn from areas such as artificial intelligence (robotics), bioinformatics (DNA analysis), computer graphics (3-D visualization), networking (high-speed communication), and security (cryptography).
Prerequisite: 01:640:026 or higher, or placement. Not for credit toward the computer science major or minor.

01:198:107 *Computing for Math and the Sciences (3)*
Introduction to computers and programming for noncomputer science majors in math and the sciences. Introduces key ideas in computer science, including programming (MATLAB) and symbolic algebra (MAPLE).
Prerequisite: CALC1 (01:640:135 or 151 or 153 or 191). This course is for math and physical science majors. Not for credit toward the computer science major or minor.

01:198:110 *Principles to Computer Science*
General survey about what computers are and how they are used, including an introduction to computer programming and contemporary application packages.
Lec. 2 hrs., rec. 1 hr. Students planning further study in computer science should take 01:198:111. Credit not given for both this course and 01:198:170. Not open to students with a prebusiness major.

01:198:111 *Introduction to Computer Science (4)*
Intensive introduction to computer science. Problem solving through decomposition. Writing, debugging, and analyzing programs in Java. Algorithms for sorting and searching. Introduction to data structures, recursion.
Prerequisite: 01:640:115 or placement in CALC1. For students in science, mathematics, and engineering. Credit not given for both this course and 14:332:252.

01:198:112 *Data Structures (4)*
Queues, stacks, trees, lists, and recursion; sorting and searching; hashing; complexity of algorithms; graph representations and algorithms.
Prerequisites: 01:198:111. Credit not given for both this course and 14:332:351.

01:198:142 *Data 101 (4)*
Topics in data literacy for nonmajors in computer science or statistics.
Prerequisite: Any course equal to or greater than 01:640:025 or placement into Intermediate Algebra or higher. Credit not given for both this course and 01:198:143 or 01:960:142.

01:198:143 *Data 101 (3)*
Topics in data literacy for students not majoring in Computer Science or Statistics. Hybrid course: meets in the classroom and online.

Prerequisite: Any course equal to or greater than 01:640:025 or placement into Intermediate Algebra or higher. Credit not given for both this course and 01:198:142 or 01:960:142.

01:198:170 *Computer Applications for Business (3)*
Introduction to the fundamentals of information technology, with an emphasis on business applications. Examination of computer hardware and software, networking and technology concepts, and hands-on experience with electronic spreadsheets, webpage design, and programming applications for problem solving using JavaScript. No prior experience in using a computer is needed--this course is intended for beginners
Lec. 2 hrs., rec. 1 hr. This course is for students seeking admission to Rutgers Business School: Undergraduate-New Brunswick. Limited to prebusiness and business majors. Credit not given for both this course and 01:198:110. Not open to students with a declared major in computer science.
Lec. 2 hrs., rec. 1 hr. This course is for students seeking admission to Rutgers Business School: Undergraduate-New Brunswick. Limited to prebusiness and business majors. Credit not given for both this course and 01:198:110. Not open to students with a declared major in computer science.

01:198:195,196 *Honors Seminar in Computer Science (1,1)*
Discussion of selected topics in computer science.
Prerequisite: Permission of department required. Corequisite: Any course offered by the Department of Computer Science at Rutgers.

01:198:205 *Introduction to Discrete Structures I (4)*
Sets, propositional and predicate logic, logic design, relations and their properties, and definitions and proofs by induction with applications to the analysis of loops of programs.
Prerequisites: 01:198:111 or 14:332:252. Credit not given for both this course and 14:332:312.

01:198:206 *Introduction to Discrete Structures II (4)*
Counting (binomial coefficients, combinations), methods of finding and solving recurrence relations, discrete probability, regular expressions and finite automata, basic graph theory.
Prerequisites: 01:198:205 or 14:332:312; 01:640:152. Credit not given for both this course and 01:640:477 or 14:332:226.

01:198:210 *Data Management for Data Science (4)*
Provides knowledge and skills needed to acquire and curate real word data, to explore the data to discover patterns and distributions, and to manage large datasets with databases.
Prerequisites: 01:198:142, 01:960:142, or 01:198:111.

01:198:211 *Computer Architecture (4)*
Levels of organization in digital computer systems; assembly language programming techniques; comparative machine architectures; assemblers, loaders, and operating systems. Programming assignments in assembly language.
Prerequisite: 01:198:112, with a grade of C or better. Credit not given for both this course and 14:332:331.

01:198:213 *Software Methodology (4)*
Principles, techniques, tools, and methods used to build modern software applications. Object-oriented design and implementation, graphical user interfaces, portability to the mobile platform, and collaborative work.
Prerequisite: 01:198:112.

01:198:214 *Systems Programming (4)*
C-level programming and its accompanying paradigm; mapping of high-level language programs to underlying computing architecture; tools for effective scaling; automation using scripts.
Prerequisite: 01:198:112. Corequisite: 01:198:211.

01:198:310 *Data Science Capstone Project (1)*
This is a 1-credit capstone course for the Data Science Certificate Program. Students must already have completed the three core courses in the Certificate program, and must have either completed or be concurrently enrolled in a domain course for the Certificate in order to register for this course. The course is meant to be a largely independent empirical project which makes concrete use of all aspects of data science explored in the core and possibly in domain course, from identifying a data source, cleaning and organizing the data, conducting appropriate statistical analysis, to interpreting and reporting the results of the study in a standard scholarly form. Finding an appropriate project and data source with suitable characteristics for a data science-oriented study is an important component of the course.

Students must complete ALL prerequisites before registering for Capstone 310. It cannot be taken simultaneously with any of the three prerequisite courses.
Prerequisites: 01:198:142 OR 01:960:142 AND 01:960:291 OR 01:960:212 OR 01:960:384 OR 33:136:385 AND 01:198:210 OR 01:960:295 OR 04:547:221

01:198:314 *Principles of Programming Languages (4)*
Syntax: formal languages, parsing. Design: modeling relations, modules, information hiding, abstraction. Compiler versus interpreter; names; binding; memory; pointers; types. Functional, imperative, object oriented, and logic programming; concurrency.
Prerequisites: [(01:198:205 and 01:198:211) and (01:640:152) or 01:640:192)] or [(01:198:205 and 14:332:331 and 01:640:152)] or [(14:332:312 and 14:332:331) and (01:640:152 or 01:640:192)] or [(14:332:312 and 01:198:211 and 01:640:152)].

01:198:323 *Numerical Analysis and Computing (4)*
Approximation, interpolation, numerical differentiation, integration; numerical solution of nonlinear equations, linear algebraic systems, and ordinary differential equations.
Prerequisites: 01:640:152 and 250, both with grades of C or better. Credit not given for both this course and 01:640:373.

01:198:324 *Numerical Methods (4)*
Computational methods for linear algebraic systems, eigenvalues and eigenvectors, approximation of functions, splines; numerical solution of initial and boundary value problems for differential equations.
Prerequisite: 01:198:323 or 01:640:373, with a grade of C or better. Credit not given for both this course and 01:640:374.

01:198:334 *Introduction to Imaging and Multimedia (4)*
Introduction to digital image processing, computer vision, and multimedia computing; image, video, and audio formation and processing; the basics of multimedia lossless and lossy compression.
Prerequisites: 01:198:112 or 14:332:351; 01:198:206 or 14:332:226 or 01:640:477; 01:640:250.

01:198:336 *Principles of Information and Data Management (4)*
Describing and querying various forms of information such as structured data in relational databases, unstructured text (IR), semistructured data (XML, Web), and deductive knowledge. Conceptual modeling and schema design. Basics of database management systems services (transactions, reliability, security, and optimization). Advanced topics: finding patterns in data, information mapping, and integration.
Prerequisites: (01:198:205 and 01:198:112 and (01:640:152 or 01:640:192) or (01:198:205 and 14:332:351 and (01:640:152 or 01:640:192) or (14:332:312 and 01:640:152 and (01:198:112 or 14:332:351). Linear Algebra is recommended.

01:198:344 *Design and Analysis of Computer Algorithms (4)*
Study of algorithms. Techniques for efficiency improvement. Analysis of complexity and validity for sorting (internal, external), shortest path, spanning tree, connected and biconnected components, and string matching. Introduction to NP-completeness.
Prerequisites: 01:198:112 and 206.

01:198:345 *Algorithms in Society (4)*
This class introduces students to various types of algorithms used for real-world decisions in a wide range of applications: public policy, health, e-commerce, and justice.
Prerequisite: 01:198:112 or 01:198:210.

01:198:352 *Internet Technology (4)*
TCP/IP protocols, media access protocols, socket programming in C/UNIX, multicasting, wireless and mobile communication, multimedia over the internet, ATM, switching theory, and network architectures.
Prerequisites: 01:198:211 or 14:332:331; 01:198:206 or 01:640:477 or 14:332:226.

01:198:405 *Seminar in Computers and Society (3)*
Study and discussion of the impact of computers on man and society. For all students interested in exploring the social consequences of computer developments.
Prerequisites: At least one computer science course and one course in sociology, political science, anthropology, or philosophy; senior standing. May not be used for major credit.

01:198:411 *Computer Architecture II (4)*
Characteristics of a modern computer. Topics to be covered include pipelining, instruction level parallelism, VLIW and speculative dynamic super scalar architectures, computer arithmetic, assessing performance, memory hierarchy, input-output, and multiprocessors.
Prerequisite: 01:198:205 and either 01:198:211 or 14:332:331, all with grades of C or better.

01:198:415 *Compilers (4)*
Study of compilers and interpreters. Parsing, lexical analysis, semantic analysis, code generation, and optimization.
Prerequisites: 01:198:211 or 14:332:331; 01:198:314, all with grades of C or better.

01:198:416 *Operating Systems Design (4)*
Computer organization, process and thread management, synchronization, scheduling, memory management, virtual memory, I/O management, file systems, and case studies.
Prerequisites: 01:198:211 and 01:198:214 or (14:332:331 and 351).

01:198:417 *Distributed Systems: Concepts and Design (4)*
Introduction to the concepts and design principles used in distributed computer systems. Communication methods, concepts, and strategies used in distributed services such as file systems, distributed shared memory, and distributed operating systems.
Prerequisite: 01:198:416, with a grade of C or better.

01:198:419 *Computer Security (4)*
Introduction to computer security. Topics include applied cryptography, authentication, authorization and basic security principles, as well as recent topics such as web security and virtual machine-based security.
Prerequisites: [01:198:205 and 01:198:416 and (01:640:152 or 01:640:192)] or [(01:198:205 and 14:332:352 and (01:640:152 or 01:640:192)] or [(14:332:312 and 01:640:152 and (01:198:416 or 01:198:352)].

01:198:425 *Brain-Inspired Computing (4)*
Overview of the fundamental concepts and current trends in neuro-mimetic and neuro-inspired computing with a focus on designing neuromorphic networks for vision and movement.
Prerequisite: 01:198:206 and (01:640:136 or 01:640:152.)

01:198:428 ***Introduction to Computer Graphics (4)***
Displays, colors, perception, images, sampling, image processing, geometric transformations, viewing and visibility, modeling hierarchies, curve and surface design, animation, lighting, rendering, rasterization, shading, and ray tracing.
Prerequisites: CALC2 and 01:640:250; 01:198:112 or 14:332:351. Credit not given for both this course and 14:332:474.

01:198:431 ***Software Engineering (4)***
Problems and techniques involved in the specification, design, and implementation of large-scale software systems, studied in conjunction with actual group construction of such a system.
Prerequisites: 01:198:213 and one of 01:198:314, 336, 352, or 416. Credit not given for both this course and 14:332:452.

01:198:437 ***Database Systems Implementation (4)***
Focuses on the implementation of database management systems (DBMS). Provides students the tools to understand the internals of a DBMS: transaction management, query processing and query optimization, implementation of systems handling text data, and management issues in a web context.
Prerequisites: 01:198:214 and 336.

01:198:439 ***Introduction to Data Science (4)***
Focuses on algorithms and tools for solving data-science problems, including preparation, characterization and presentation, analysis, and applications.
Prerequisites: (01:198:205 or 14:332:202 or 14:332:312) and (01:640:152 or 01:640:192).

01:198:440 ***Introduction to Artificial Intelligence (4)***
Broad introduction to artificial intelligence, including search, knowledge representation, natural language understanding, and computer vision.
Prerequisites: (01:198:205 or 14:332:202 or 14:332:312) and (01:640:152 or 01:640:192).

01:198:442 ***Topics in Computer Science (3-4)***
Advanced topics in computer science. Topics vary from year to year according to the interests of students and faculty.

01:198:445 ***Topics in Computer Science (3)***
Advanced topics in computer science. Topics vary from year to year according to the interests of students and faculty.
Prerequisites: (01:198:111 or 01:198:142). Restricted to Computer Science majors.

01:198:446 ***Topics in Computer Science (3)***
Advanced topics in computer science. Topics vary from year to year according to the interests of students and faculty.

01:198:452 ***Formal Languages and Automata (3)***
Finite automata and regular languages; context free languages, pushdown automata, and parsing; language hierarchies; Turing machines; decidability and complexity of languages. Applications emphasized throughout.
Prerequisite: 01:198:344 with a grade of C or better.

01:198:460 ***Introduction to Computational Robotics (4)***
General introduction to robotics from a computational perspective with a focus on mobile robots. Provides hands-on experience through projects on various robotic platforms including exposure to industry standard software.
Prerequisite: 01:198:206 or instructor's permission.

01:198:461 ***Machine Learning (4)***
Principles Systematic introduction to machine learning, covering theoretical as well as practical aspects of the use of statistical methods. Topics include linear models for classification and regression, support vector machines, regularization and model selection, and introduction to deep learning. Application examples are taken from areas like computer vision, natural language processing, information retrieval and others.
Prerequisites: 01:198:112, 0:198:206, 01:640:250.

01:198:462 ***Introduction to Deep Learning (4)***
Introduction to deep learning. Includes theories, principles, and practices of traditional neural networks and modern deep learning. The topics include fundamentals of Machine Learning, neural networks, modern deep learning, and applications and advanced topics.
Prerequisites: 01:198:112, 0:198:206, 01:640:250.

01:198:463 ***Design and Analysis of Randomized Algorithms (4)***
This course offers an introduction into the tools and techniques of randomized algorithms, at a level accessible to advanced undergraduates.

Prerequisite: 01:198:344

01:198:493,494 ***Independent Study in Computer Science (BA,BA)***

01:198:495-496 ***Computer Science Honors Capstone Program (3,3)***
Fall and spring semester of year long capstone program for Computer Science undergraduate honors students.

Criminal Justice 202 (SAS)

CRIMINAL JUSTICE 202

School of Arts and Sciences

Website: Here

Program Director: Paul Hirschfield

Undergraduate Director: Sinan Celiksu

Professors:

Lisa L. Miller, Political Science; B.A., Virginia; M.A., Ph.D., Washington

Alec D. Walen, Law and Philosophy; B.A., Maryland; M.A., Ph.D., Pittsburgh; J.D., Harvard

Michael Welch, Criminal Justice; B.A., Benedictine College; M.A., Missouri (Kansas City); M.S., Illinois State; Ph.D., North Texas

Associate Professor:

Noura S. Erakat, Africana Studies; B.A., J.D., California (Berkeley); LL.M., Georgetown; LL.M., Temple

Paul Hirschfield, Sociology; B.A., Kalamazoo College; M.A., Ph.D., Northwestern

K. Sebastian Leon, Latino and Caribbean Studies; B.S., Florida State; M.A., George Washington; Ph.D., American

Calvin Lai, Psychology, Sociology; B.A Rutgers; M.A., Ph.D., U of Virginia, Charlottesville

Assistant Professors:

Ricardo Martinez-Schuldt, Sociology; B.A., St. Cloud State; M.A., Ph.D., U. of North Carolina

Kevin Dahaghi, Sociology; B.A. Rutgers; M.A., Ph.D., U. of Texas at Austin.

Assistant Teaching Professors:

Mark Desire, Criminal Justice; B.A., Rutgers; M.S., Allegheny; J.D., New York Law School

Sinan Celiksu, Anthropology; B.A., Police Academy, Turkey; M.A., Uludag University; M.A., M.Phil.,Ph.D., Columbia

Instructor:

Christopher Chuckwuedo, Criminal Justice, B.A, U. of Texas San Antonio; M.A. U of Louisville, Ph.D. Rutgers

Criminal Justice 202 (SAS)

Learning Goals

Learning Goals

The program in criminal justice is a comprehensive, interdisciplinary program that blends a strong liberal arts educational experience with preprofessional instruction in the field of criminal justice. Majors will be able to demonstrate skills in effective written and oral communication, critical analysis of data and ideas, and computer literacy; knowledge of the major theories, methodologies, and research topics and strategies in the field of criminal justice; a historical and contemporary understanding of the social, cultural, and legal factors that influence the criminal justice field in the United States and around the world; an understanding of the ethical and moral issues that permeate the criminal justice field; awareness of local, national, and international perspectives of criminal justice; and an understanding of the role of human behavior and social order on issues of criminal justice. Majors will be prepared for postbaccalaureate graduate or professional studies in criminal justice, sociology, public policy, social work, and law or employment in a variety of legal, policy making, and law enforcement occupations.

Criminal Justice 202 (SAS)

Major Requirements

Major Requirements

The major in criminal justice requires a total of 36 credits distributed as follows:

01:202:201 Introduction to Criminal Justice (3)

01:202:202 Police (3)

01:202:203 Prison and Prisoners (3)

01:202:204 Crime and Public Policy (3) or
01:202:205 Criminal Procedure (3) or
01:790:106 Law and Politics (3)

01:202:307 Criminal Justice Research Methods (3) or
01:830:200 Quantitative Methods in Psychology (4) or
01:920:311 Introduction to Social Research (4) or
01:920:312 Introduction to Statistics in Sociology (4) or
01:960:285 Introductory Statistics for Business (3)

01:920:222 Criminology (3)

Nine credits in courses offered by School of Arts and Sciences departments relevant to the themes of crime, justice, and law and drawn from the approved list of thematic courses. These courses must be chosen from at least two of the following three thematic areas:

- human behavior, deviance, and crime
- social control institutions
- law and ethics

Majors must take at least three electives, chosen from any of the criminal justice course offerings (courses with a 202 subject code) at the 300 and 400 level, at least one of which is at the 400 level.

Only courses completed with a grade of C or better may be counted toward the major. At least one 3-credit criminal justice course (01:202) must be at the 400 level. Only 3 credits from 01:202:406, 407, 408 (internships) may count toward the major. Students can take only 3 credits of internship per semester with a limit of 6 credits overall. No more than 6 credits of 01:202:495 Independent Study may count toward the major; no more than 3 credits may be taken in a single semester. Courses listed above with subject codes other than 202 may also have prerequisites; such requirements are described under the departments offering these courses.

Honors

Honors

Thesis Option

Students who have completed 15 credits toward the major, have senior standing, a 3.4 grade-point average (GPA) in the major, and a 3.0 GPA overall are eligible to elect the honors thesis option. These independent research projects, carried out in the senior year under the supervision of program faculty, carry 6 credits. The honors program for criminal justice majors may be undertaken in conjunction with a School of Arts and Sciences honors thesis.

Departmental Honors

Honors--Students in the major who earn a 3.6 GPA in departmental coursework (01:202 courses, required research methods course, and thematic courses) will graduate with honors.

High Honors--Students in the major who earn a 3.8 GPA in departmental coursework (01:202 courses, required research methods course, and thematic courses) will graduate with high honors.

Highest Honors--Students in the major who earn a 4.0 GPA in departmental coursework (01:202 courses, required research methods course, and thematic courses) will graduate with highest honors.

Criminal Justice 202 (SAS)

Approved Thematic Courses

Approved Thematic Courses

Theme: Human Behavior, Deviance, and Crime

01:050:306 American Detective in Fiction and Film

01:050:324 Wayward Americans (3)

01:830:320 Forensic Psychology (3)

01:830:375 Stereotyping and Prejudice (3)

01:920:304 Sociology of Deviant Behavior (3)

01:920:306 Race Relations (3)

01:920:307 Mental Illness (NB) (3)

01:920:361 Sociology of Drug Use (3)

01:920:410 Sociology of Alcohol Problems (3)

Theme: Social Control Institutions

01:014:353 Black Community Law and Social Change (3)

01:070:360 Law, Justice, Rights (3)

01:220:331 Economics of Crime (3)

01:220:395 Law and Economics (3)

01:512:404 American Constitutional History from 1865 (3)

01:595:370 Law and the Latino Community (3)

01:790:340 Law and Society (3)

01:790:341 Public Administration: American Bureaucracy (3)

01:790:343 Counterterrorism & Democracy (3)

01:790:404 Politics of Criminal Justice (3)

01:920:349 Law and Society (3)

11:370:414 Forensic Entomology (3)

Theme: Law and Ethics

01:730:342 Social and Political Philosophy through History (3)

01:730:345 Philosophy and the Law (3)

01:730:358 Philosophy of Law (3)

01:790:373 Legal Philosophy, Rights, and Justice (3)

01:790:401 American Constitutional Law (3)

01:790:406 Civil Liberties and Civil Rights (3)

01:988:307 Women and the Law (3)

Courses

Courses

01:202:201 ***Introduction to Criminal Justice (3)***

Societal responses to people and organizations that violate criminal codes; police, courts, juries, prosecutors, defense and correctional agencies, and the standards and methods used to respond to crime and criminal offenders; social forces that affect the evolution of criminal laws.

01:202:202 *Police (3)*
The function of police in contemporary society; the problems arising between citizens and police from the enforcement and nonenforcement of laws, from social changes, and from individual and group police attitudes and practices.
Pre- or corequisite: 01:202:201.

01:202:203 *Prison and Prisoners (3)*
Origins and methods of revenge, coercive custody, confinement, punishment, rehabilitation, restitution, deterrence, and prisoner education programs are examined. Includes emphasis on current controversies related to jail and prison overcrowding, treatment of violent juveniles and chemically dependent offenders, and AIDS risk assessment of juvenile and adult offenders.
Pre- or corequisite: 01:202:201.

01:202:204 *Crime and Public Policy (3)*
Introduction to the process by which criminal law and criminal justice policies are crafted and implemented in the American political process. Basic concepts of public policymaking across local, state, and national governments; unique challenges of developing effective crime control policies.
Pre- or corequisite: 01:202:201.

01:202:205 *Criminal Procedure (3)*
Description and discussion of what is commonly characterized as the "criminal justice process and public policy consideration" through which the substantive criminal law is enforced.
Prerequisite: 01:202:201.

01:202:210 *Introduction to Security (3)*
Principles and methods for screening people; monitoring environments; effective use and care of preventive techniques; preventive response and control; response procedures; legal aspects of security; individual and collective behavior; and developing problems in security such as terrorism and organized vandalism.
Pre- or corequisite: 01:202:201.

01:202:302 *Police Organization and Administration (3)*
The effect of organizational structure and administrative procedure on police function; the processes of police recruitment, career advancement, and leadership.
Prerequisite: 01:202:201.

01:202:303 *Correctional Systems (3)*
The major types of community-based correctional alternatives ranging from probation, shock incarceration, parole, work-release, overnight and weekend incarceration, and halfway houses to community-based centers; discussion of correctional laws, personnel development, correctional management, controversies, political pressures, and emerging trends in organization and goals.
Prerequisite: 01:202:201.

01:202:305-306 *Scientific Applications in Justice (3,3)*
Contributions of physical science to crime prevention, detection, and prosecution; significant forensic aspects of chemistry, biology, geology, and physics as applied to prevention planning, contraband control, preserving evidence, ballistics, optics, sound, and sampling natural materials.
Prerequisite: 01:202:201.

01:202:307 ***Criminal Justice Research Methods (3)***
Underlying research concepts, methodologies, and techniques appropriate for application in the main behavioral environments of justice; application of course content to justice agencies, policies, and programs.
Prerequisites: 01:202:201; 01:640:112 or 115, or Calculus I; or placement.

01:202:308 ***Advanced Criminal Justice Research Methods (3)***
Advanced research concepts, methodologies, and techniques appropriate for application in the main behavioral environments of justice; application of course content to justice agencies, policies, and programs.
Prerequisites: 01:202:201 and 307.

01:202:309 ***Criminal Law: Theory and Practice (3)***
Study of the substantive criminal laws and judicial opinions, with emphasis on the New Jersey Code of Criminal Justice to enhance insights into an understanding of the potentialities and limitations on the law as an instrument of social control.
Prerequisite: 01:202:201.

01:202:310 ***Victimology and Domestic Violence (3)***
Definitions and scope of violent crime in society. Includes a review of the issues, prevalence, myths, policies, programs, and services aimed at victims of violent crimes. The expanding role of the courts, police, battered women shelters, victim/witness assistance programs, crisis intervention units, and legislation highlighted.
Prerequisite: 01:202:201.

01:202:311 ***Political Terrorism (3)***
Analysis of diverse organizations using terror, starvation, torture, and murder for political objectives.
Prerequisite: 01:202:201.

01:202:312 ***Crimes against Humanity (3)***
Applies the concept of "crimes against humanity," as developed at the Nuremberg trials, to an analysis of similar events.
Prerequisite: 01:202:201.

01:202:315 ***Race, International Law and Empire (3)***
Critical examination of the role of international law establishing racial regimes in a global order using TWAIL (Third World Approaches to International Law). Topics may include laws of armed conflict, international criminal law, sovereignty, self-determination, and human rights using an interdisciplinary approach combining law, history, anthropology, geography, and political science.
Credit not given for both this course and 01:014:305.

01:202:322 ***Juvenile Justice (3)***
Examination of the recent political history of American juvenile justice; the policies, trends, and programs in juvenile justice during the past two decades. Focus on historical developments, the full range of contemporary alternatives for counseling and treatment, legal issues and functions of juvenile justice agencies, an exploration of future directions, and a reform agenda for the next two decades.
Prerequisite: 01:202:201.

01:202:327 ***Sex, Crime, and Justice (3)***
Survey of changing social values about sex, changing criminal codes about sex crimes, changing law enforcement policies and procedures in prosecuting sex offenders, and emerging legal doctrines about privacy and sexual rights.
Prerequisite: 01:202:201.

01:202:351-352 ***Forensic Science (4,4)***
Lecture and laboratory training in scientific methods and techniques applied to criminal investigation. Suitable for natural science majors and criminal justice majors interested in forensic science.
Prerequisites: 01:119:115-116, 01:160:161-162, 01:202:201, 01:202:205; and 01:640:112 or 01:640:115 or Calculus I; or placement.

01:202:360 ***Ideas in Justice (3)***
Twentieth-century contributions to the development and application of penology, criminology, and criminal and social justice; study of the main ideas and key events that influenced the ideas and ideals evident in our social institutions.
Prerequisite: 01:202:201 or 01:920:222.

01:202:370 ***Crisis Intervention in Criminal Justice Settings (3)***
Focuses on the conceptual framework for crisis intervention practice including crisis theory, crisis concepts, crisis intervention models and strategies, and guidelines for evaluating program outcomes.
Prerequisites: 01:202:201, and 01:830:340 or 01:920:210. Credit not given for both this course and 01:202:422.

01:202:388,389 ***Criminal Justice Seminar (3,3)***
Examination of some central issues in contemporary criminal justice. Topics vary from semester to semester.
Prerequisite: 01:202:201.

01:202:406,407,408 ***Internship in Criminal Justice (3,3,3)***
The internships are 120 hours in a local criminal/administration of justice agency. Involves an intensive learning experience under professional agency supervision, as well as periodic symposia and study sessions, research, semester papers, and oral presentations.
Prerequisites: 01:202:201, 3 credits in criminal justice, senior standing, and permission of instructor.

01:202:425 ***Race, Crime, and Justice (3)***
Explores the economic, political, and sociological relationships between the criminal justice system and racial minorities in the United States.
Prerequisites: 01:202:201, 01:920:222 and 307 or other research methods course satisfying the criminal justice major requirement.

01:202:488,489 ***Advanced Criminal Justice Seminar (3,3)***
Examination of some central issues in contemporary criminal justice. Topics vary from semester to semester.
Prerequisite: 01:202:201.

01:202:495 ***Independent Study (1-3)***
Independent study under the direction of a member of the faculty.
Prerequisites: 01:202:201 and permission of instructor and program.

01:202:496-497 ***Special Topics (3,3)***
Focuses on critical issues in criminal justice. May encompass topics related to law, law enforcement, the courts, corrections, etc. Specific issues are determined by the instructor.
Prerequisite: 01:202:201.

01:202:498,499 ***Honors Thesis in Criminal Justice (3,3)***
Individual research projects to be written as an honors thesis.
Prerequisites: Permission of program. For majors only. Students must have completed 15 credits toward the major, have senior standing, a 3.4 GPA in the major, and a 3.0 GPA overall.

Criminology 204 (SAS)

Learning Goals

Learning Goals

1. Students will understand the criminological perspective, a distinctly interdisciplinary approach to the criminal justice system.

2. Students will understand how key questions in the criminal justice system can be better analyzed using both sociological and psychological concepts.

3. Students will develop the skills necessary to read and evaluate criminological research in an intelligent and critical manner.

4. Students will understand the role of theory and methods in criminological research.

Criminology 204 (SAS)

Minor Program

Minor Program

The interdisciplinary minor in criminology consists of eight courses (24 credits).

Six courses are required:
01:202:201 Introduction to Criminal Justice (3)
01:830:101 Introduction to Psychology (3)
01:830:340 Psychopathology (3)
01:920:101 Introduction to Sociology (3)
01:920:222 Criminology (3)
01:920:306 Race Relations (3)

One Sociology elective course must be taken from the following:
01:920:304 Sociology of Deviant Behavior (3)
01:920:307 Mental Illness (3)
01:920:349 Law and Society (3)

One additional 3-credit elective course offered by the criminal justice program (01:202) must be taken.

All courses must be passed with a grade of C or better to earn credit toward the minor.

The criminology minor is not available to criminal justice majors.

If a student is a criminal justice major and a sociology minor, 01:920:222 may not count toward their sociology minor due to overlap.

Dance 203 (MGSA)

DANCE 203

Department of Dance, Mason Gross School of the Arts

Website: Here

See the Mason Gross School of the Arts section for faculty listing and bachelor of fine arts (B.F.A.) degree program information.

The bachelor of arts (B.A.) major program in dance combines a broad experience in the liberal arts with a specialization in the area of dance. It prepares students to advance beyond the bachelor's degree in performance, teaching, dance criticism, or history. Audition required.

The Department of Dance is an accredited institutional member of the National Association of Schools of Dance.

Major Requirements: B.A. Program

Major Requirements: B.A. Program

Audition required.

Dance majors in the bachelor of arts (B.A.) program are required to complete a total of 41 credits of courses listed in this chapter under 07:203 and 07:206. It is recommended that dance majors elect additional courses in the major after a consultation with an academic advisor for dance.

All B.A. majors are required to perform in at least one public performance sponsored by the Department of Dance.

Dance 203 (MGSA)

Minor Requirements

Minor Requirements

Audition required.

The minor in dance requires a total of 20 credits. It includes the following sequence in modern dance studio courses (07:203:123, 124, 225, 226); 07:203:149 Ballet 1; 07:206:142 Dance Improvisation 1; 07:203:329 Dance Composition; 07:206:161 Production Study (1 credit). In addition, dance minors elect any two of the following courses: 07:203:101 Dance Appreciation or 07:203:131 Dance Appreciation Online; 07:203:150 Ballet 2; 07:206:441 Dance History World Survey; 07:206:442 Dance History 1900 to Present.

Dance 203 (MGSA)

Courses (203)

Courses (203)

Dance 203

07:203:101 *Dance Appreciation (3)*
Dance Appreciation is an introduction to dance as an art form, wherein students study the historical, cultural, social, and performative contexts of diverse dance forms. Students engage with aesthetic, theoretical, and scholarly discourses aimed at illuminating how dance functions as a form of communication and personal, aesthetic expression. In addition, students explore the ways in which dance both reflects and comments upon contemporary society. Students develop fundamental dance literacy through critical analysis of dance in live and recorded formats; identify aesthetic concepts and ideas through written and visual media; demonstrate comprehension in their utilization of dance vocabulary and terminology; discuss influential choreographers and genres of dance; and articulate critical conclusions about the reciprocal relationship between dance, the arts, and societal concerns.
Please note: Students may not receive credit for both 07:203:101 and 07:203:131.

07:203:110 *Street and Club Dances (2)*
The study of fusion dance evolving from traditional and contemporary African and African diasporic dance forms, including contemporary social dances. Students will be introduced to these dance forms through studio practice, video, masterclasses, and performance.
Open to BA majors, minors, and non-dance majors.

07:203:115 *Introduction to Dance Studies (3)*
Introduction to the domain of dance practice and theoretical frameworks, within a humanities context that acknowledges the intersection of multiple intelligences. Students observe and describe dance as a performing art and as cultural intervention. Guest artists provide performance demonstrations on a variety of topics including race/ethnicity, gender/sexuality, disability studies, screendance technology, and sound/lighting/costume design, among others. Descriptive and analytic writing required.
Open only to dance majors.

07:203:123 *Modern Dance 1 (2)*
Introduction to the fundamentals of movement skills and body awareness in modern dance technique, improvisation, and composition.

07:203:124 *Modern Dance 2 (2)*
Continued development of movement skills, improvisation, and composition in modern dance.
Prerequisite: 07:203:123 or permission of instructor.

07:203:131 *Dance Appreciation (3)*
Dance Appreciation Online is an introduction to dance as an art form, wherein students study the historical, cultural, social, and performative contexts of diverse dance forms. Students engage with aesthetic, theoretical, and scholarly discourses aimed at illuminating how dance functions as a form of communication and personal, aesthetic expression. In addition, students explore the ways in which dance both reflects and comments upon contemporary society. Students develop fundamental dance literacy through critical analysis of dance in live and recorded formats; identify aesthetic concepts and ideas through written and visual media; demonstrate comprehension in their utilization of dance vocabulary and terminology; discuss influential choreographers and genres of dance; and articulate critical conclusions about the reciprocal relationship between dance, the arts, and societal concerns.
Please note: Students may not receive credit for both 07:203:101 and 07:203:131.

07:203:132 *History of Broadway Dance Online (3)*
Explores the evolution of dance in musical theater and on Broadway. Course topics will include a historical survey of dance on Broadway; an examination of the reciprocal relationship of Broadway dance to economic and cultural change; and a close look at the power structure and organization of Broadway musicals. The evolution of Broadway dance steps and styles and the contribution of notable dancers will be examined.

07:203:134 *Dance in Israel: Body, Ideology, and Culture (3)*
Survey of Israel's concert dance history, from roots in imported styles in the pre- and immediate post-state decades to the blossoming of a homegrown Israeli contemporary dance within the last few decades. Topics include aesthetic influences, significant artists, and recent innovations, with discussions about technical, stylistic, and thematic concerns. Throughout the course, dance is situated within a larger historical, sociopolitical context, and connections to politics, nationalism, religion, ethnicity, and culture are considered.

07:203:135 *Dance Forms in Africa (3)*
Explores dance forms from different cultures in different blocks on the African continent. Through readings, viewings, and engagement with movement, students use skills of observation, movement learning, and contextual and comparative analysis, focusing on the social, cultural, religious, and political significance of African dance forms. Types and functions of traditional African dances, contexts of performance, and their unique characteristics will also be explored.

07:203:136 *Dance in India (3)*
Covers a wide range of forms practiced in India in the 20th and 21st century, including folk dances, classical dance styles, contemporary choreography, and film dances, among others. Also looks beyond India, into the diaspora and global contexts in which Indian dance forms are practiced. Methods include analysis of readings, video documentaries, dance films, and interviews, as well as concept mapping. Practical engagement with movement material and aesthetic principles included.

07:203:149 *Ballet 1 (2)*
Introduction to ballet as an art form with an emphasis on traditional steps.

07:203:150 *Ballet 2 (2)*
Practice in the development of ballet technical skill, body alignment, and concepts of ballet aesthetics.
Prerequisite: 07:203:149 or permission of instructor.

07:203:155 *Introduction to Jazz Dance (2)*
Familiarizes nondance majors to technical and performance aspects of jazz dance. The course introduces students to a variety of jazz styles to provide a broad foundation from which to select future training opportunities.
Open to BA majors, minors, and non-dance majors.

07:203:160 *Pilates Mat (1)*
Covers the 34 Pilates mat exercises as developed by Joseph and Clara Pilates. Variations and modifications for each of these exercises will also be taught in an effort to not only further explore the possibilities that the method offers, but to prevent injury and suit the needs of each student. Use of foam roller and magic circle props will be integrated into this practice.
Open to dance majors, minors, and non-majors.

07:203:170 *Yoga for Wellness (2)*
In this course, students will learn the historical beginnings of yoga, gaining a broad understanding of the cultural significance of this practice. Basic Sanskrit, Hindu mythology, and the culture of India will also be discussed.
Open to dance majors, minors, and non-majors.

07:203:329 *Dance Composition (2)*
Development of fundamental skills in choreography.
Pre- or corequisite: 07:203:142. Open only to B.A. dance majors and dance minors.

07:203:350 *Performing Climate Change (3)*
This course provides a conceptual framework and creative practicum for students who wish to engage with climate change through the performing arts. The course is open to students of all disciplines. The prerequisites are an interest in climate change and a willingness to active the creative imagination.

07:203:363 *B.A. and Minor Modern Dance Repertory (2)*
Study and performance of original or repertory works, both historical and contemporary, by guest or resident choreographers.
Open only to B.A. dance majors and dance minors.

Courses (206)

Courses (206)

07:206:100 *Dance Assembly (N.5)*
Grade based on attendance. Required of all B.F.A dance majors for eight semesters of enrollment as a declared major.

07:206:126 ***Rhythm for Dancers (2)***
Analysis of rhythmic structure relative to movement. Sight-reading note values, movement dictation, and composition.
Prerequisites: 07:203:123 and 124. Open to dance majors only.

07:206:130 ***African Diasporic Movement Practices 1 (1.5)***
African Diasporic Movement Practices brings forward for dancers the origins of Black African Diasporic derived dance forms and fusions and their value in dance training. Forms and fusions of forms will be identified and contextualized culturally and historically in order to provide students with skills essential to embody and physically master the movement practice. The dance form's social and cultural roots will be studied as essential to movement practice. Studio work, readings, and self-reflections will help students to understand the physical, intentional, and expressive values by which a dancer is understood to be proficient in the form.
Open only to B.F.A. dance majors.

07:206:131 ***Classical/Traditional Movement Practices 1 (1.5)***
Dance forms centered in codified movement vocabularies emerging from global, temporal, and cultural contexts. Example forms include: Classical Ballet, Kathak, Chinese classical dance, and forms based on or derived from Cunningham, Fosse, Cole, Graham, Horton, Limon, Luigi, and Taylor Techniques.
Open only to B.F.A. dance majors.

07:206:132 ***Contemporary Fusion Movement Practices 1 (1.5)***
Studio course in which students engage both physically and theoretically with contemporary movement practices that draw from at least two forms of dance. The course situates the individual forms and fused practice within historical, social, and cultural lenses to provide an understanding of lineage, to accurately represent the values of the practice, and to help students recognize their individual relationship to the practice.
Only open to B.F.A. dance majors.

07:206:133 ***Somatic Movement Practices 1 (1.5)***
Movement practices that emphasize wellness, functional efficiency, and injury prevention through embodied experience and integration of body/mind/spirit. Example practices include: Alexander Technique, Bartenieff Fundamentals, Feldenkrais Method, Franklin Method, Functional Movement Training, Klein Technique, Pilates, and Yoga.
Open only to B.F.A. majors.

07:206:142 ***Dance Improvisation 1 (2)***
Introductory experience in dance improvisation including the use of kinetics, movement design, and spatial sensing as potential sources of movement and partner interaction.
Open only to dance majors and minors.

07:206:145 ***Performance Skills 1 (2)***
Development of performance skills for first-year B.F.A. dance majors. Students are engaged in an extensive rehearsal process with a guest or faculty choreographer in order to introduce them to generative improvisational and compositional strategies for the creation of original works of choreography.
Open only to B.F.A. majors.

07:206:146 ***African Diasporic Movement Practices 2 (1.5)***
African Diasporic Movement Practices brings forward for dancers the origins of Black African Diasporic derived dance forms and fusions and their value in dance training. Forms and fusions of forms will be identified and contextualized culturally and historically in order to provide students with skills essential to embody and physically master the movement practice. The dance form's social and cultural roots will be studied as essential to the movement practice. Studio work, readings and self-reflections will help students to understand the physical, intentional and expressive values by which a dancer is understood to be proficient in the form.
Open only to B.F.A. dance majors.

07:206:147 ***Classical/Traditional Movement Practices 2 (1.5)***
Through engaging in a new Classical/Traditional form, Movement Practices 2 inwardly builds, outwardly expands, and develops variation in learning from Somatic Movement Practices 1. Students continue to find connections among the five course goals and learning outcomes listed below. Students will add to their movement vocabulary and also continue to unearth personal voice through a non-hierarchical nexus of learning.
Open only to B.F.A. dance majors.

07:206:148 ***Contemporary Fusion Movement Practices 2 (1.5)***
Through engaging in a new Contemporary Fusion form, Movement Practices 2 inwardly builds, outwardly expands, and develops variation in learning from Contemporary Fusion Movement Practices 1. Students continue to find connections among the five course goals and learning outcomes listed below. Students will add to their movement vocabulary and continue to unearth personal voice through a non-hierarchical nexus of learning. Students will investigate another Contemporary Fusion form that draws from at least two forms of dance. This is a studio course in which students engage both physically and theoretically with such contemporary movement practices.
Open only to B.F.A. dance majors.

07:206:149 ***Somatic Movement Practices 2 (1.5)***
Somatic Movement Practices 2 focuses on theoretical and embodied understanding of selected somatic practice(s) with a special focus on application to dance training and performance. Students will examine somatic theories and principles and how they manifest in somatic practices that emphasize internal physical perception and experience.
Open only to B.F.A. dance majors.

07:206:154 ***Pointe Class (1)***
Class includes participation in a ballet barre and center work. The focus will be on the practice and principles of the classical ballet vocabulary with an emphasis on strengthening foundational skills in pointe technique. Advice will be given on how students can best prepare and maintain their pointe shoes.
Open to dance majors only. B.A. dance majors and dance minors with permission of instructor only.

07:206:155 ***Ballet Jumps and Turns (1)***
Class includes participation in a ballet barre and center work. The focus will be on the practice and principles of classical ballet jumps and turns.
Open to B.F.A. dance majors only. B.A. dance majors and dance minors with permission of department only.

07:206:161 ***Production Study (1-2)***
Crew assignments and production support for department dance performances.
Dance majors and dance minors to complete 1 credit; B.F.A. dance majors to complete 2 credits.

07:206:235 ***Choreography 1 (2)***
Introduction to the choreographic process. Solo forms and group choreography.
07:206:243 or permission of the instructor. Open only to B.F.A. dance majors.

07:206:237 ***Dance Production (3)***
Theoretical and practical applications of computer, lighting, audio, and technical theater skills necessary to produce, promote, and direct dance productions. Students develop computer skills in graphic design and sound design/ editing as well as computer lighting consoles and theatrical lighting equipment in two professional theaters. Students study lighting design and stage management for dance in theory and practical application around a department production.

07:206:243 ***Dance Improvisation 2 (2)***
Exploration of dance improvisation as the source of movement for choreography.
07:206:142 or permission of the instructor. Open only to B.F.A. dance majors.

07:206:245 ***Performance Skills 2 (2)***
Continued development of performance skills for second-year B.F.A. dance majors. Students are challenged to further refine their technical skills and advance their performance abilities through a collaborative, creative process with a guest or faculty choreographer.
07:206:145 or permission of the instructor. Open only to B.F.A. majors.

07:206:260 ***African Diasporic Movement Practices 3 (1.5)***
African Diasporic Movement Practices 3 inwardly builds, outwardly expands, and develops variation in learning from Movement Practices 2. Students will elevate connections among the five course goals and learning outcomes and incorporate an additional goal towards communication of their individual identities, perspectives and artistry. Students apply skills, approaches to movement, and contexts learned in Movement Practices 1 and 2 to train in a new African Diasporic-derived form as an informed dancer in the movement practice. Students will add to their movement vocabulary and artistic strategies as they navigate the use of their year one Movement Practices training to illuminate embodied communication and strengthen performance in the form. Leadership skills will also be developed.
Open only to B.F.A. dance majors.

07:206:261 ***Classical/Traditional Movement Practices 3 (1.5)***
Students apply skills, approaches to movement, and contexts learned in Movement Practices 1 and 2 to train in a new Classical/Traditional form as an informed dancer in the movement practice. Students will add to their movement vocabulary and artistic strategies as they navigate the use of their year one Movement Practices training to illuminate embodied communication and strengthen performance in the form. Leadership skills will also be developed. Students will deeply investigate this codified, Classical/Traditional form and its value in their dance training. Forms and fusions of forms will be identified and contextualized culturally and historically in order to provide students with skills essential to embody and physically master the movement practice. The form's traditions, modes of study, movement vocabularies, and prescriptive grammars will also be studied and expressed
Open only to B.F.A. dance majors

07:206:262 ***Contemporary Fusion Movement Practices 3 (1.5)***
Through engaging in a new Contemporary Fusion form, Movement Practices 3 advances the artistic and kinesthetic investment of inwardly building, outwardly expanding, and developing variation in learning from Contemporary Fusion Movement Practices 1 and 2. Students will investigate a Contemporary Fusion form that draws from at

least two forms of dance. This is a studio course in which students engage both physically and theoretically with contemporary movement practices. The course situates the individual forms and fused practice within historical, social, and cultural lenses to provide an understanding of lineage, to accurately represent the values of the practice, and to help students recognize their individual relationship to the practice. The course emphasizes the progression from internal investigation to external expression.
Open only to B.F.A. dance majors.

07:206:263 ***Somatic Movement Practices 3 (1.5)***
Somatic Movement Practices 3 continues to focus on theoretical and embodied understanding of selected somatic practice(s) with a special focus on application to dance training and performance. Students will examine somatic theories and principles and how they manifest in somatic practices that emphasize internal physical perception and experience. Distinctive forms enable students to better understand how they can promote wellness and self-knowledge, and prevent injury through continued and varied experiences with and reflective thinking about somatic practices.
Open only to B.F.A. dance majors.

07:206:264 ***African Diasporic Movement Practices 4 (1.5)***
Through engagement in a new form, African Diasporic Movement Practices 4 continues to advance the artistic and kinesthetic investment in inwardly building, outwardly expanding, and developing variations in learning from African Diasporic Movement Practices 1, 2 and 3. Students elevate increasingly sophisticated connections among the six course goals and learning outcomes listed below and apply skills, approaches to movement, and contexts learned in Movement Practices 1 and 2 to train in a new African Diasporic-derived form as an informed dancer in the movement practice.
Open only to B.F.A. dance majors.

07:206:265 ***Classical/Traditional Movement Practices 4 (1.5)***
Continued study and training in dance forms centered in codified movement vocabularies, emerging from global temporal and cultural contexts. Example forms include: Classical Ballet, Bharatanatyam, Chinese classical dance, and forms based on or derived from Cunningham, Fosse, Cole, Graham, Hawkins, Horton, Limon, Luigi, and Taylor Techniques.
Open only to B.F.A. dance majors.

07:206:266 ***Contemporary Fusion Movement Practices 4 (1.5)***
Through engagement in a new Contemporary Fusion form, Movement Practices 4 continues to advance the artistic and kinesthetic investment of inwardly building,¿outwardly expanding, and developing variation in learning from Contemporary Fusion Movement Practices 1, 2 and 3. Students investigate this additional Contemporary Fusion form that draws from at least two forms of dance. This is a studio course in which students engage both physically and theoretically with contemporary movement practices. The course situates the individual forms and fused practice within historical, social, and cultural lenses to provide an understanding of lineage, to accurately represent the values of the practice, and to help students recognize their individual relationship to the practice. The course emphasizes the progression from internal investigation to external expression.
Open only to B.F.A. dance majors.

07:206:267 ***Somatic Movement Practices 4 (1.5)***
Somatic Movement Practices 4 continues to focus on theoretical and embodied understanding of selected somatic practice(s) with a special focus on application to dance training and performance. Students will examine somatic

theories and principles and how they manifest in somatic practices that emphasize internal physical perception and experience. Distinctive forms enable students to better understand how they can promote wellness and self-knowledge, and prevent injury through continued and varied experiences with and reflective thinking about somatic practices.
Open to only B.F.A. dance majors.

07:206:274 *Jazz Dance (2)*
Various styles and techniques in the idiom of jazz dance.
May be repeated for credit. Open only to dance majors and minors.

07:206:277 *Latino and Hispanic Dance Forms (2)*
Studio course includes technique and performance of selected dance forms within their historical and cultural contexts. Dance forms may include indigenous, diasporic, and hybrid dances from the Caribbean, Mexico, and South America; classical Spanish and Flamenco dance; and Filipino dances derived from Spanish influence.
May be repeated for credit if a new culture.

07:206:312 *Advanced Ballet (2)*
Studio-based course with barre and center format. We will call upon our curiosities and sense of play to examine and embody classical ballet vocabulary through the applications of somatic practices, repertory, and improvisation techniques. Class material will increase with complexity of vocabulary, tempos, and spatial pathways over the course of the semester. Journaling and class discussions will include, but are not limited to: the role of ballet a Eurocentric form in the 21st century, the potential for ballet class to be an individual and/or collective practice, and applications of tools/approaches learned in this class to other dance forms.
Classical/Traditional Movement Practices 2 or Ballet 2

07:206:319 *Sound and Movement (3)*
Analysis of the relationships of music and dance in content, form, and structure.
B.A. dance majors complete 07:203:126 prior to enrollment.

Kaushal Trivedi

Learning Goals

LEARNING GOALS

Students will be able to:

- Transform and map data (otherwise called data wrangling) from one "raw" data format into another format for further analysis, querying, learning, and prediction.
- Acquire data management skills such as database design and database querying. They will be able to create and maintain databases to facilitate querying and the incorporation of new data.
- Execute data analyses with professional statistical and machine learning software such as R and python.
- Visualize (plot) data relationships in meaningful ways, such as scatter plots, bar charts, box plots, and histograms, to communicate salient features of datasets. They will be able to adapt visualizations to the intended audience ranging from novice to expert.
- Understand the conceptual basis of those analyses used in data science and how those analysis methods aid in finding and articulating salient features of the data.
- Apply data science concepts and analysis methods to solve real-world problems by extending concepts and methods to novel contexts.
- Support an argument or stance with data, as well as critique findings and conclusions that are not justified by the data. They will be able to use data analysis methods to distinguish between and/or compare arguments and stances and discern between arguments strongly supported by the data versus those that misinterpret, distort, and/or misrepresent the data analysis to suit the argument, such as selectively emphasizing a subset of data while neglecting other conflicting data.
- Analyze the ethical, legal, and social implications of data collection, data processing, and algorithm development.

Data Science 219 (SAS)

Major Requirements

Major Requirements

Entry Requirements for the Major
Students wishing to declare a major in Data Science must have successfully completed three courses: Data Literacy/ Data101, Statistical Inference (or one of its equivalents), and one of the Data Management courses with a grade of C or better.

Major Requirements

Required Courses for All Major Options

01:198:142/01:960:142 Data 101: Data Literacy

01:960:291 Statistical Inference for Data Science or one of the following equivalents:

01:960:212 Statistics II

01:960:384 Intermediate Statistical Analysis

33:136:385 Statistical Methods in Business

One of the following Data Management courses:

01:198:210 Data Management for Data Science

01:960:295 Data Management and Wrangling with R

04:547:221 Fundamentals of Data Curation and Management

01:640:250 Introductory Linear Algebra

04:189:220 Data in Context

B.A. in Data Science-Statistics Track NB219TJ (must do a Minor, except a Minor in Statistics):

01:640:136 Calculus II or 01:640:/152 Calculus II

01:198:111 Intro Comp Science

01:198:112 Data Structures

01:960:463 Regression Methods

01:960:486 Applied Statistical Learning

One of the following:

01:960:365 Bayesian Data Analysis

01:960:467 Applied Multivariate Analysis

01:960:490 Intro to Experimental Design

B.A. in Data Science-Societal Impact Track NB219IJ (must do a Minor):

01:640:135 Calculus I or 01:640:151 Calculus I

01:960:463 Regression Methods

01:960:486 Applied Statistical Learning

04:189:103 IT and Informatics

04:547:201 Information Technology Fundamentals

04:547:321 Information Visualization

One of the following:

01:960:365 Bayesian Data Analysis

01:960:467 Applied Multivariate Analysis

01:960:490 Intro to Experimental Design

B.S. in Data Science-Computer Science Track NB219SJ:

01:640:152 Calculus II

01:640:251 Multivariable Calculus

01:198:111 Introduction to Computer Science

01:198:112 Data Structures

01:198:205 Intro to Discrete Structures I

01:198:206 Intro to Discrete Structures II

01:198:336 Principles of Information and Data Management

01:198:439 Introduction to Data Science

01:198:461 Machine Learning Principles or, 01:198:462 Introduction to Deep Learning

01:960:463 Regression Methods

01:960:486 Applied Statistical Learning

04:547:321 Information Visualization

B.S. in Data Science-Economics Track NB219EJ:

01:640:136 Calculus II or /01:640:152 Calculus II

04:547:321 Information Visualization

01:220:102 Intro to Microeconomics

01:220:103 Intro to Macroeconomics

01:220:320 Intermediate Microeconomics Analysis

01:220:321 Intermediate Macroeconomic Analysis

01:220:322 Econometrics

01:220:421 Economic Forecasting and Big Data

01:220:422 Advanced Econometrics for Microeconomic Data or 01:220:423 Advanced Time Series and Financial Econometrics

01:220:424 Advanced Analytics for Economics

B.S. in Data Science-Chemical Data Science Track NB219CJ:

01:640:152 Calculus II

01:198:111 Introduction to Computer Science

One of the following:

01:160:161 General Chemistry

01:160:159 General Chemistry for Engineers

01:160:163 Honors General Chemistry

01:160:165 Extended General Chemistry

One of the following:

01:160:162 General Chemistry

01:160:160 General Chemistry for Engineers

01:160:164 Honors General Chemistry

01:160:166 Extended General Chemistry

01:160:171 Introduction to Experimentation

One of the following:

01:160:307 Organic Chemistry

01:160:315 Honors Organic Chemistry

One of the following:

01:160:308 Organic Chemistry

01:160:316 - Honors Organic Chemistry

Nine credits from the following:

01:160:251 Analytical Chemistry (3)

01:160:309 Organic Chemistry Laboratory (2.5)

01:160:348 Instrumental Analysis (3)

01:160:351 Inorganic Chemistry (3)

01:160:352 Inorganic Chemistry IIA (7-week course) (1.5)

01:160:353 Inorganic Chemistry IIB (7-week course) (1.5)

Either 01:160:327 Physical Chemistry (4) OR 01:160:341 Physical Chemistry: Biochemical Systems (3) **

Either 01:160:328 Physical Chemistry (4) OR 01:160:342 Physical Chemistry: Biochemical Systems (3) OR 01:160:438 Introduction to Computational Chemistry (3)**

Either 01:694:407 Molecular Biology and Biochemistry (3) OR 11:115:403 General Biochemistry I (4) **

** Students cannot select both courses to fulfill the 9 credits; they are only allowed to choose one.

One of the following:

01:960:365 Introduction to Bayesian Data Analysis

01:960:463 Regression Methods

One of the following:

01:198:310 Data Science Capstone Project

01:160: TBD Chemical Data Science and Machine Learning Applications (under development)

Data Science 219 (SAS)

Minor Requirements

MINOR REQUIREMENTS

To declare the Data Science minor, students must successfully complete the Data Literacy course, Data 101 (198:142/960:142), with a grade of C or better.

Required Core Courses

The following courses are required for all Data Science minors:

01:198:142/01:960:142 Data 101: Data Literacy

01:960:291 Statistical Inference for Data Science or one of the following equivalents:

01:960:212 Statistics II

01:960:384 Intermediate Statistical Analysis

33:136:385 Statistical Methods in Business

One of the following Data Management courses:

01:198:210 Data Management for Data Science

01:960:295 Data Management and Wrangling with R

04:547:221 Fundamentals of Data Curation and Management

One of the following domain courses:

01:198:439 Introduction to Data Science

01:220:322 Econometrics

01:359:207 Data and Culture

01:447:303 Computational Genetics of Big Data

01:450:320 Spatial Data Analysis

01:450:321 Geographic Information Systems

01:450:330 Geographical Research Method

01:750:345 Computational Astrophysics

01:790:391 Data Science for Political Science

01:920:360 Computational Social Science

01:960:365 Introduction to Bayesian Data Analysis

01:960:463 Regression Methods

01:960:486 Applied Statistical Learning

04:189:220 Data in Context

04:547:321 Information Visualization

11:126:486. Functional Genomics for Research

14:332:443 Machine Learning for Engineers

One of the following Capstone Course:

Data Science Capstone Project (01:198:310) - default, or

Data Science and Econometrics (01:220:323)

Minor in Data Science-Computer Science Track:

This track targets students with existing programming experience. It requires courses in statistics, data-centric programming, data management, and data analysis. Note that the courses 01:198:461 and 01:198:462 have prerequisites that include courses in addition to those required for the minor.

- 01:960:463 Regression Methods
- One of the following Machine Learning courses:

01:198:461 Machine Learning Principles

01:198:462 Introduction to Deep Learning

Minor in Data Science-Statistics Track:

This track targets students with a quantitative background but perhaps little programming experience. It can be pursued without any additional prerequisite courses beyond those in requirements I, II, and III.

- 01:960:486 Applied Statistical Learning
- One of the following:

04:547:321 Information Visualization

04:189:220 Data in context

01:960:463 Regression Methods

Minor in Data Science-Economics Track:

This track is intended mainly for Economics majors or Quantitative Economics minors. In any case, completion of the intermediate economics core courses (01:220:320, 321, and 322) is required, as these courses are prerequisites to Advanced Analytics for Economics, 01:220:424. Calculus II (01:640:152) is a prerequisite.

- 01:220:424 Machine Learning for Economics
- One of the following:

04:547:321 Information Visualization

04:189:220 Data in Context

Minor in Data Science-Societal Impact Track:

This track will allow students to develop skills in human-centered aspects of data science.

- 04:547:321 Information Visualization
- 04:189:220 Data in Context

Data Science 219 (SAS)

Undergraduate Certificate in Data Science

Undergraduate Certificate in Data Science

Undergraduate Certificate in Data Science:
The goals of the Data Science Certificate program are achieved by completing three foundational courses followed by an advanced domain-specific course and a mini-capstone course.

Students must take 4 courses (14 to 16 credits) which include a 1-credit mini-capstone for skills demonstration for the successful completion of the Certificate in Data Science.

Students must maintain a G.P.A. of 2.0 in the courses applied to the certificate. No courses with a grade of D can be counted toward the certificate.

Data Science Undergraduate Certificate Requirements:

01:198:142/01:960:142 Data 101: Data Literacy

01:960:291 Statistical Inference for Data Science or one of the following equivalents:

01:960:212 Statistics II

01:960:384 Intermediate Statistical Analysis

33:136:385 Statistical Methods in Business

One of the following Data Management courses:

01:198:210 Data Management for Data Science

01:960:295 Data Management and Wrangling with R

04:547:221 Fundamentals of Data Curation and Management

One of the following domain courses:

01:198:439 - Introduction to Data Science

01:220:322 Econometrics

01:359:207 Data and Culture

01:447:303 Computational Genetics of Big Data

01:450:320 Spatial Data Analysis

01:450:321 Geographic Information Systems

01:450:330 Geographical Research Method

01:750:345 Computational Astrophysics

01:790:391 Data Science for Political Science

01:920:360 Computational Social Science

01:960:365 Introduction to Bayesian Data Analysis

01:960:463 Regression Methods

01:960:486 Applied Statistical Learning

04:189:220 Data in Context

04:547:321 Information Visualization

11:126:486. Functional Genomics for Research

14:332:443 Machine Learning for Engineers

One of the following Capstone Courses:

01:198:310 Data Science Capstone Project

01:220:323 Data Science and Econometrics

Medicine and Dentistry (SAS)

MEDICINE AND DENTISTRY

The Association of American Medical Colleges, the American Association of Colleges of Osteopathic Medicine, and the American Dental Association have set the following entrance requirements for their member medical and dental schools:

Subject	Credits
Biology	8
Chemistry: General Inorganic	8
Chemistry: Organic	8
English	6
Humanities	6
Physics	8
Biochemistry	3/4*
Psychology	3*
Sociology	3*
Statistics	3*

*These courses are recommended for the Medical College Admissions Test (MCAT) as of 2015.

All four science areas should include a laboratory. In addition, some medical and dental schools may require knowledge of a foreign language, a year of college mathematics, and additional work in the sciences. There is, however, no prescribed premedical major. Applicants to medical and dental schools should have excellent records, especially in the sciences, as well as experience in a health care field. Also, all schools recognize the importance of well-developed communication skills and a strong background in the humanities and the social sciences.

Before sitting for either the MCAT or Dental College Admissions Test (DAT), it is recommended that students take coursework in psychology, sociology, statistics, and other biomedical sciences such as biochemistry, genetics, physiology, and/or cell biology. Students should contact the Rutgers Health Professions Office (848-445-5667) for more information.

(See also Health Professions Office in the School of Arts and Sciences chapter of this catalog.)

Ecology, Evolution, and Natural Resources 216 (SEBS)

ECOLOGY, EVOLUTION, AND NATURAL RESOURCES 216

(Formerly 704)

Degree: B.S.

Director: Kimberly N. Russell; 124 ENR Building, 848-932-9383, (Kimberly.russell@rutgers.edu)

Program Webpage: http://deenr.rutgers.edu/undergrad

Department of Ecology, Evolution, and Natural Resources Webpage:https://deenr.rutgers.edu

The ecology, evolution, and natural resources curriculum provides an understanding of how natural living systems function and evolve, and how they can be managed to conserve biodiversity while providing benefits to people. Students may pursue coursework that prepares them for traditional careers in resource management or they may take a broader array of courses that meets interests related to the conservation of natural resources and the ecology and evolution of natural systems. Graduates may pursue further study at the graduate level or find career opportunities in academia and in public or private organizations involved in the management of natural resources. The major provides a broad general understanding of the functioning, significance, and conservation of living systems. In addition to the general major curriculum, we offer two specialized disciplinary tracks with a more focused sequence of courses in 1) Natural Resources and Ecosystem Management, or 2) Urban Forestry (https://urbanforestry.rutgers.edu). The flexibility of this major is intended to meet a variety of student interests and needs. Students are encouraged to organize curricular and elective courses to fulfill simultaneously the requirements of a minor or certificate program. Particularly appropriate are the Minor in Sustainability; the Certificate in Environmental Geomatics; and the Certificate in Evolutionary Medicine.

Learning Goals

Learning Goals

Goal 1: Explain basic population, community ecology, and ecosystem-level concepts.

Goal 2: Describe the evolutionary origins, processes, and patterns over geologic time.

Goal 3: Create a natural resource management plan demonstrating an understanding of societal values and interests.

Goal 4: Effectively utilize software, hardware, field, and laboratory techniques commonly used in the study of ecology, evolution, and natural resource management.

Goal 5: Use quantitative methods to analyze and understand ecological systems, including interpretation of numeric and graphical data.

Goal 6: Communicate effectively orally and through written text and graphics.

Goal 7: Evaluate ecology, evolution, and natural resource management concepts in a global context.

Natural Resources and Ecosystem Management Track Specific Learning Goals:

Goal 3a: Utilize common forestry inventory methods and apply a fundamental knowledge of silviculture and ecology to create a forestry management plan that fosters the long-term capacity of the land and demonstrates an understanding of societal values and interests.

Goal 8: Evaluate conflicts and dilemmas through a lens of professional ethics.

Goal 9: Describe natural resource relevant laws and policies in New Jersey and at the national level.

Urban Forestry Track Specific Learning Goals:

Goal 3b: Utilize common urban forestry analysis tools to create a community forestry management plan demonstrating an understanding of societal values and interests as well as the long-term capacity of the urban forest.

Goal 10: Apply a fundamental knowledge of tree biology and professional ethics to tree care management and practice.

Goal 11: Describe urban forestry relevant laws and policies in New Jersey and at the national level.

The department has publicly posted mission statement and curricular learning goals on its website athttp://deenr.rutgers.edu/undergrad/.

Ecology, Evolution, and Natural Resources 216 (SEBS)

Graduation Requirements for the Major

Graduation Requirements for the Major

EENR General Track

Biology: Required
01:119:115 Gen Bio I
01:119:116 Gen Bio 2
01:119:117 Bio Res. Lab

Chemistry & Physics - Choice of: 1 Year of Chemistry (with lab) OR 1 Year of Physics (with lab) OR 1 Semester of Each (with labs)
01:160:161 Gen Chem 1
01:160:162 Gen Chem 2
01:160:171 Intro to Exp.
01:750:203 Gen Physics 1
01:750:204 Gen Physics 2
01:750:205 Gen Physics 1 Lab

01:750:206 Gen Physics 2 Lab
01:750:193 Phys for the Sci. 1
01:750:194 Phys for the Sci. 2

Experienced Based Education: Required (3 cr)
11:216:440 Pract Exp in EENR
11:216:484 Res. Probl in EENR
11:216:376 Pract Fish.
11:216:377 Pract Forestry
11:554:488 GHCook
11:902:300 SEBS Internship I
11:902:301 SEBS Internship II
01:556:221/2 or 301/302 Aresty

Math - Choice of 1
01:640:135 Calculus 1 for Life/SS
01:640:151 Calculus 1 for Math/Phy

Core Courses: Required
11:216:104 Topics in EENR
11:216:217 Principles of Natural Resource Management
11:216:351 Principles of Ecology
11:216:352 Principles of Ecology lab
11:216:369 Analytical Methods (SEBS Core QQ)
11:216:431 FEEM
11:216:499 Capstone in EENR

Evolution Core: Choice of 1
11:216:486 Principles of Evolution
11:216:251 Fundamentals of Evolution
Required
11:216:252 Fundamentals of Evol. Lab

Ecology Electives: Choice of 2
11:216:272 Dendrology
11:216:317 Conservation Ecology (SEBS Core CCO/WCd)
11:216:332 Plant Ecology
11:216:360 Anim Phys. Ecol
11:216:450 Landscape Ecology
11:216:451 Global Change Ecology
11:216:487 Urban Ecology
11:216:296 Honors Seminar
11:216:435 Freshwater and Wetland Ecosystems

Evolution Electives: Choice of 2
11:216:240 Behavioral Biology
11:216:269 Evol of Animal Behavior

11:216:296 Honors Seminar
11:216:323 Ornithology
11:216:324 Invertebrate Zoology
11:216:325 Vertebrate Zoology
11:216:405 Evolution of Infec. Dis.
11:216:441 Animal Behavior
11:216:411 & 412 Plant Diversity & Evol

Natural Resources/Techniques Electives: Choice of 2
11:216:314 Forest Measurements
11:216:274 Field Techniques
11:216:371 Introduction to Remote Sensing
11:216:464 Wildlife Ecology & Cons
11:216:471 Silviculture
11:216:477 Forest Management Applications
11:573:232 & 233 Fund. of Geom. & lab
11:216:403 Urban Forestry
11:573:362 Intem. Envi. Geom.
11:573:462 Advan. Envi. Geom.
11:216:210 Nature Journaling
11:216:315 Conservation Techniques
11:216:320 Controversies in Sustainability
11:216:365 Arboriculture
11:216:474 Adv. Remote Sensing
11:216:475 Winter Field Ecology

Additional Courses: Choice of 4
Any 216 or 573 course listed above and/or:
11:216:101 Intro to Ecol & Evol (SEBS Core NS)
11:216:110 Evol Disease and Med (SEBS Core NS)
11:216:115 Evol Sex & Gender (SEBS Core NS/CCO)
11:216:199 Trees in the Environment (SEBS Core NS) Fall Only
Non-216 (approval possible for 200+ level courses)
11:067:300 Integrative Physiology
11:067:328 Animal Genetics
11:067:404 Animal Diseases
11:115:301 Introductory Biochemistry
11:115:423 Fundamentals of Genomics
11:370:300 Insects & The Environment
11:370:320 Insect Ecology and Evolution
11:370:308 Apiculture
11:370:355 Applied Acarology
11:370:380 Insect Biotechnology
11:370:381 Insect Biology
11:370:402 Aquatic Entomology

11:370:403 Insect Structure and Function
11:370:404 Insect Structure and Function II
11:370:406 Medical and Veterinary Entomology
11:370:409 Insect Classification
11:370:430 Urban Entomology
11:573:231 Fundamentals of Environmental Planning
11:573:322 Land Measurement and Mapping
11:573:371 Air-Photo Interpretation
11:373:362 Natural Resource Economics
11:373:363 Environmental Economics
11:374:313 U.S. Environmental Policy
11:374:314 Natural Resource Policy
11:374:325 Environmental Communication
11:375:346 Introduction to Atmospheric Chemistry
11:375:360 Soils and Water
11:375:407 Environmental Toxicology
11:375:411 Environmental Microbiology
11:375:421 Air Pollution
11:375:444 Water Chemistry
11:375:450 Terrestrial Carbon Cycle
11:375:453 Soil Ecology
11:628:309 Fishery Science
11:628:320 Dynamics of Marine Ecosystems
11:628:342 Marine Conservation
11:670:201 Elements of Meteorology
11:670:202 Elements of Climatology
11:680:491 Microbial Ecology and Diversity
11:776:210 Principles of Botany
11:776:242 Plant Science
11:776:305 Plant Genetics
11:776:306 Weed Science and Management
11:776:382 Plant Physiology
11:776:400 Fungi in the Environment
01:460:101 Introductory Geology
01:460:303 Paleontology
01:070:212 Life of Primates
01:070:348 Primate Behavioral Ecology
01:070:402 Primate Conservation
01:070:409 Primate Nutritional Ecology
01:160:209 Elementary Organic Chemistry
01:160:307 Organic Chemistry
01:160:308 Organic Chemistry
01:447:380 Genetics
01:640:136 Calculus II for the Life and Social Sciences
01:640:138 Calculus II for the Biological Sciences

EENR Urban Forestry Track

Biology: Required
01:119:115 Gen Bio I
01:119:116 Gen Bio 2
01:119:117 Bio Res. Lab

Chemistry: Required
01:160:161 Gen Chem 1
01:160:171 Intro to Exp.

Physics: Choice of 1
01:750:203 Gen Physics 1 & 01:750:205 Gen Physics 1 Lab
01:750:193 Phys for the Sci. 1

Experienced Based Education: Choice (3 cr)
11:216:440 Pract Exp in EENR
11:216:484 Res. Probl in EENR
11:216:377 Pract Forestry
11:554:488 GHCook
11:902:300 SEBS Internship I
11:902:301 SEBS Internship II

Math: Choice of 1
01:640:135 Calculus 1 for Life/SS
01:640:151 Calculus 1 for Math/Phy

Core Courses: Required
11:216:104 Topics in EENR
11:216:217 Principles of Natural Resource Management
11:216:351 Principles of Ecology
11:216:352 Principles of Ecology lab
11:216:369 Analytical Methods (SEBS Core QQ)
11:216:431 FEEM
11:216:499 Capstone in EENR

Ecology: Required
11:216:272 Dendrology
11:216:487 Urban Ecology

Evolution: Required
11:216:411 & 412 Plant Diversity & Evol

Natural Resources/Techniques: Required
11:216:371 Introduction to Remote Sensing
11:216:471 Silviculture

11:573:232 & 233 Fund. of Geom. & lab
11:216:403 Urban Forestry
11:216:365 Arboriculture

Additional Courses: Required
11:373:101 Economics, People, and the Environment (SEBS Core CCO/ECN/SCL)
11:573:202 Environmental Issues in US (SEBS Core CCO/WCd)
11:776:302 General Plant Pathology
11:374:250 Environmental Justice (SEBS Core CCD)
Additional Courses: Choice of 2
11:370:350 Agricultural Entomology and Pest Management
11:373:362 Natural Resource Economics (SEBS Core GVT/SCL)
11:375:360 Soils and Water
11:573:231 Fundamentals of Environmental Planning
11:776:202 Applied Physiology of Horticultural Crops
11:776:404 Soil Management for Sport and Landscapes
11:550:230 Environmental Design Analysis
11:216:199 Trees in the Environment
11:573:413 Open Space Planning

EENR: Natural Resources and Ecosystem Management Track

Biology: Required
01:119:115 Gen Bio I
01:119:116 Gen Bio 2
01:119:117 Bio Res. Lab

Chemistry: Required
01:160:161 Gen Chem 1
01:160:171 Intro to Exp.

Physics: Choice of 1
01:750:203 Gen Physics 1 & 01:750:205 Gen Physics 1 Lab
01:750:193 Phys for the Sci. 1

Experienced Based Education: Choice (3 cr)
11:216:440 Pract Exp in EENR
11:216:484 Res. Probl in EENR
11:216:377 Pract Forestry
11:554:488 GHCook
11:902:300 SEBS Internship I
11:902:301 SEBS Internship II

Math: Choice of 1
01:640:135 Calculus 1 for Life/SS
01:640:151 Calculus 1 for Math/Phy

Core Courses: Required
11:216:104 Topics in EENR
11:216:217 Principles of Natural Resource Management
11:216:351 Principles of Ecology
11:216:352 Principles of Ecology lab
11:216:369 Analytical Methods (SEBS Core QQ)
11:216:431 FEEM
11:216:499 Capstone in EENR

Ecology: Required
11:216:272 Dendrology
Ecology: Choice of 1
11:216:317 Conservation Ecology
11:216:332 Plant Ecology
11:216:360 Animal Physiological Ecology
11:216:450 Landscape Ecology
11:216:451 Climate Change Ecology
11:216:487 Urban Ecology
11:216:296 Honors Seminar

Evolution: Required
11:216:411 & 412 Plant Diversity & Evol

Natural Resources/Techniques (Required)
11:216:371 Introduction to Remote Sensing
11:216:471 Silviculture
11:573:232 & 233 Fund. of Geom. & lab
11:216:314 Forest Measurements
11:216:274 Field Techniques
11:216:464 Wildlife Ecology & Conservation
11:216:477 Forest Management Applications

Additional Courses: Required
11:373:101 Economics, People, and the Environment (SEBS Core CCO/ECN/SCL)
11:573:202 Environmental Issues in US (SEBS Core CCO/WCd)
11:776:302 General Plant Pathology
11:374:250 Environmental Justice (SEBS Core CCD)
Additional Courses: Choice of 2
11:370:350 Agricultural Entomology and Pest Management
11:373:362 Natural Resource Economics (SEBS Core GVT/SCL)
11:375:360 Soils and Water
11:573:231 Fundamentals of Environmental Planning
11:776:202 Applied Physiology of Horticultural Crops
11:776:404 Soil Management for Sport and Landscapes

11:374:201 Research Methods in Human Ecology
11:216:199 Trees in the Environment
11:375:453 Soil Ecology

ECONOMICS 220

Department of Economics, School of Arts and Sciences

Website: Here

Chair: John Landon-Lane

Undergraduate Program Director: Colin Campbell

Distinguished Professors:

Michael D. Bordo, B.A., McGill (Canada); M.S., London School of Economics; Ph.D., Chicago

Roberto Chang, B.S.S., Universidad Catolica Del Peru; Ph.D., Pennsylvania

Hugh T. Rockoff, A.B., Earlham; M.A., Ph.D., Chicago

John Tomas Sjöström, B.A., Stockholm; Ph.D., Rochester

Norman R. Swanson, B.A., Waterloo (Canada); M.A., Ph.D., California (San Diego)

Professors:

Oriol Carbonell-Nicolau, B.A., M.A., Pompeu Fabra (Spain); Ph.D., New York

Ira N. Gang, B.A., Johns Hopkins; M.A., Ph.D., Cornell

Joseph P. Hughes, A.B., Davidson; Ph.D., North Carolina

Jennifer Hunt, S.B., Massachusetts Institute of Technology; Ph.D., Harvard

Todd Keister, B.S., Duke; Ph.D., Cornell

Mark R. Killingsworth, A.B., Michigan; B.Phil., Ph.D., Oxford

Roger W. Klein, A.B., California (Berkeley); Ph.D., Yale

John S. Landon-Lane, B.Sc. (Hons), M.Comm., Canterbury (New Zealand); M.A., Ph.D., Minnesota

Yuan Liao, B.A., Tsinghua (China); Ph.D., Northwestern

Richard P. McLean, B.S., Pennsylvania State; M.A., M.S., Ph.D., Stony Brook

Bruce Mizrach, A.B., M.A., Tufts; Ph.D., Pennsylvania

Carolyn Moehling, B.A., Michigan State; Ph.D., Northwestern

Anne Morrison Piehl, A.B., Harvard; Ph.D., Princeton

Thomas J. Prusa, B.A., Georgetown; M.A., Ph.D., Stanford

Hilary Sigman, B.A., Yale; M.Phil., Cambridge; Ph.D., Massachusetts Institute of Technology

Barry Sopher, B.A., M.A., Ph.D., Iowa

Associate Professors:

Colin Campbell, A.B., Columbia; Ph.D., Northwestern

Martin Saavedra, B.A., B.S., Catholic University of America; M.A., Ph.D., Pittsburgh

Bingxiao Wu, B.A., Tsingua (China); Ph.D., Northwestern

Xiye Yang, B.A., Peking; Ph.D., Amsterdam

Assistant Professors:

Jacob Bastian, B.A., Azusa Pacific; M.A., New York; Ph.D., Michigan

Hector Blanco, B.A, Pompeu Fabra (Spain); M.S., Barcelona (Spain); Ph.D., Massachusetts Institute of Technology

Zhifeng Cai, B.A., Hong Kong; Ph.D., Minnesota

Carlos Esquivel, B.A., ITAM; Ph.D., Minnesota

Rosemary Kaiser, B.S., Ball State; M.S., Ph.D., Wisconsin-Madison

Andrew Mackenzie, B.S., Union College; M.A., Ph.D., Rochester

Daniel Maggio, B.A., New York at Geneseo; M.A., Boston; Ph.D. Cornell

Kenwin Maung, B.A., Waseda (Japan); M.A., Ph.D., Rochester

Ruonan Xu, B.A., Fudan; Ph.D., Michigan

Associate Teaching Professor:

Daijiro Okada, B.A., M.A., Tohoku (Japan); Ph.D., Stony Brook

Assistant Teaching Professor:

Alex Hohmann, B.S., M.S., Drexel; M.A., Rutgers

Teaching Instructors:

Michael Elgawly, B.A., M.B.A., Rutgers

Raymond Stone, B.A., New York; M.A., Ph.D., Rutgers

Economics is the study of individual and collective decision-making given the limited availability of material resources. The economics curriculum is designed to contribute to a liberal arts education by increasing a student's understanding of the economic problems that confront individuals and societies and to prepare students for graduate work in a variety of fields. Majors are expected to develop skills that permit critical analysis of important economic problems and are exposed to a wide variety of economic policy issues.

The curriculum stresses such skills as gathering and interpreting information, predicting the consequences of specific decisions, evaluating alternative choices, and managing public and private enterprises. Computer applications are a major component of instruction. The economics major provides a sound basis for a variety of professional careers, including graduate study in economics, business, management science, law, and public policy. A successful major also is well prepared for employment opportunities that demand strong analytical skills. Students who anticipate business careers may find courses in financial economics and international economics particularly beneficial.

Economics 220 (SAS)

Learning Goals for Economics Majors

Learning Goals for Economics Majors

1. *Economic Literacy*--Students who complete the major in economics should understand and be able to articulate, both orally and in writing, the core economic principles, concepts, and theories that form the foundation for modern economic analysis and economic research.
2. *Economic Numeracy*--Students who complete the economics major should be familiar with the tools, techniques, and methods of empirical economics. They should be able to analyze data using computer applications and should be familiar with regression methods and other statistical techniques. They should be able to read and assess general interest articles on economic topics. In addition, they should be able to understand and evaluate key findings in published economic research from a wide range of sources including academic economists, public policy think tanks, and government agencies.
3. *Economic Citizenship*--Upon completion of the major, students should be able to apply their understanding of core concepts and quantitative tools to analyze and research real-world problems and evaluate alternative economic policy proposals on microeconomic and macroeconomic issues.
4. *Economic Scholarship*--Qualified majors should have an opportunity through such avenues as advanced coursework, faculty interactions, national and local competitions, and honors courses and programs to utilize up-to-date methodological tools and become fully engaged in economic research and issues on the frontiers of economics.

Economics 220 (SAS)

Major Requirements

Major Requirements

The foundation of the curriculum in economics consists of 01:220:102,103, 320, 321, and 322. It also requires one semester of statistics (01:960:211 or preferably 285) with a grade of C or better. If possible, 01:960:285 should be

taken in the semester immediately prior to the one in which the student expects to take econometrics (01:220:322). One semester of calculus (01:640:135 or equivalent) with a grade of C or better also is required. Second semesters of both calculus and statistics are strongly recommended. The seven required courses (five in economics, one in statistics, and one in mathematics) plus seven electives within economics (which may, under certain circumstances, include a limited number of courses from related disciplines) constitute the major. Engineering students who take 01:220:200 Economic Principles and Problems will use this in place of 01:220:102 and 103, and will need to take eight electives instead of seven. Credit is not given for 01:220:200 and for 01:220:102 or 103.

Students can count no more than three courses that have no prerequisites, or whose prerequisites are only 01:220:102 and 103 (or only 200), toward the seven required electives needed to complete the economics major. (These courses are often referred to as "lower-level" electives.) Typically, most transfer courses that count as economics electives fall into this category. An economics major who has taken 200 in lieu of 102 and 103 may take a maximum of four electives that have no prerequisites or only 102 and 103 as prerequisites.

For both students who begin at Rutgers as first-year students and for transfer students, a maximum of three economics courses taken outside the Department of Economics at Rutgers University-New Brunswick may be applied toward the major. Transfer students who wish to apply transfer courses toward the major must obtain approval from the undergraduate adviser. Enrolled economics majors who wish to take an economics course outside of Rutgers-New Brunswick must have prior approval from the undergraduate adviser. Equivalencies are not awarded to transfer courses that do not have comparable calculus prerequisites. Students should consult the economics department for further information on courses offered by the Department of Agricultural, Food, and Resource Economics (major in environmental and business economics) at the School of Environmental and Biological Sciences and by other departments in the School of Arts and Sciences.

Economics majors can receive credit for two accounting courses offered by the Rutgers Business School: Undergraduate-New Brunswick program. Students may take 33:010:272 and 275. These courses will count toward the required seven electives and are considered courses outside the Rutgers-New Brunswick Department of Economics. Accounting courses are considered lower-level electives.

The Department of Economics allows economics majors to receive 1 credit for an approved internship. See here for more information or contact the undergraduate director.

To declare a major in economics, a student must have a grade of C or better in both 01:220:102 Introduction to Microeconomics and 01:220:103 Introduction to Macroeconomics. The student must also have completed the required calculus course with a grade of C or better.

To satisfactorily complete the major, students must have a minimum cumulative grade-point average of 2.0 in the major. A grade of C or better is required in 102,103, 320, 321, 322, the required statistics course, and the required calculus course. Only one elective course with a grade of D can count toward the major.

Students who major in economics (220) may not minor in environmental and business economics (373).

All courses taken outside Rutgers-New Brunswick need to be preapproved.

Economics 220 (SAS)

Minor in Economics Requirements

Minor in Economics Requirements

The traditional Minor in Economics introduces students to both microeconomics and macroeconomics, allows students to explore a variety of economic institutions and economic policies that characterize the modern economy, and provides training in basic data analysis.

This minor requires a total of 18 credits in economics.

Specific requirements for the traditional Minor in Economics:

Introduction to Microeconomics (01:220:102) and Introduction to Macroeconomics (01:220:103), both with a grade of C or better.

Economic Data Analytics: Introduction to Data Management, Statistics and Regression Analysis (01:220:212) with a grade of C or better.

Three electives or core economics courses (i.e., 300-level economics courses). One grade of D is allowed for this minor. The following 300 level courses are the most usual choices for electives by students completing the minor:

01:220:300 International Economics (3)

01:220:301 Money, Banking and the Financial System (3)

01:220:305 American Economic History (3)

01:220:307 Economics of Globalization: A Historical Perspective (3)

01:220:331 Economics of Crime (3)

01:220:334 Energy Economics (3)

01:220:389 Public Policies toward Business (3)

01:220:395 Law and Economics (3)

"The intermediate core courses (01:220:320, 321 and 322) or any 400-level elective course in economics, may also be used, though additional prerequisites are required for these courses."

Engineering students may use 14:540:343, Engineering Economics, as an elective course for this minor.

Note that accounting courses cannot be used towards either minor. Only two courses outside of the Economics Department in Rutgers-New Brunswick will be accepted towards either minor.

Minor Quantitative Economics Requirements

Minor Quantitative Economics Requirements

The new Minor in Quantitative Economics permits quantitatively well-prepared students to do the core of the Economics major, and gives them access to the Certificate Programs in Economics, with fewer required electives than the full Major in Economics.

This minor requires a total of 18 credits in economics.

Specific requirements for the Minor in Quantitative Economics:

Introduction to Microeconomics (01:220:102) and Introduction to Macroeconomics (01:220:103), both with a grade of C or better.

Intermediate Microeconomic Analysis (01:220:320) and Intermediate Macroeconomic Analysis (01:220:321), both with a grade of C or better. These courses have the introductory courses and Calculus I (01:640:135 or 151), all with a grade of C or better, as prerequisites.

Econometrics (01:220:322), with a grade of C or better. This course has the introductory courses, Calculus I, and Statistics (01:960:285 or 01:960:211), all with a grade of C or better, as prerequisites. Mathematical Theory of Probability (01:640:477) or Mathematical Theory of Statistics (01:640:481) may substitute for the Statistics prerequisite.

One upper level (i.e., 400-level) elective in economics from the following list:

01:220:410 Advanced Macroeconomic Theory (3)

01:220:423 Advanced Time Series and Financial Econometrics (3)

01:220:424 Machine Learning for Economics (3)

01:220:480 Behavioral and Experimental Economics (3)

01:220:481 Economics of Uncertainty (3)

01:220:482 Game Theory and Economics (3)

01:220:483 Markets, Games and Information (3)

01:220:485 Advanced Microeconomic Theory (3)

01:220:488 Networks and Complexity in Economics (3)

01:220:489 Advanced Topics in Economic Theory (3)

All of these 400 level courses have an additional prerequisite of Calculus II (01:640:136 or 152) with a grade of C or better. One grade of D is allowed for this minor.

Students completing this minor may, opt to pursue the Certificate Programs in Economics, including the Certificate in Economic Theory, the Certificate in Computational Economics and Data Analytics, the Certificate in Financial Economics, the Certificate in Global Economics, or the Certificate in Public Policy Economics. Details on the Certificates are elsewhere on the Economics web page.

Note that accounting courses cannot be used towards either minor. Only two courses outside of the Economics Department in Rutgers-New Brunswick will be accepted towards either minor.

Economics 220 (SAS)

Minor in Philosophy, Politics, and Economics

Minor in Philosophy, Politics, and Economics

Minor in Philosophy, Politics, and Economics (PPE)

The minor in philosophy, politics, and economics (hereafter shortened to PPE) is designed to engage students with the practical problems of organizing and running human society. The minor stands at the confluence of three major fields of study--philosophy, political science, and economics--and combines elements of these into a coherent framework in which to address questions about the nature of citizenship and the role individuals can and must play in making critical decisions facing society.

Students pursuing the PPE minor are expected to develop the ability to read and listen critically, to reason analytically concerning questions of public policy (especially economic policy), to engage in thoughtful moral judgment, and to write and speak clearly. The minor combines the best of the three participating fields: confronting the ethical issues of philosophy, the policy questions of political science, and the quantitative analytical problems of economics.

Generally, students taking the PPE minor will be majoring in one of the three included disciplines: philosophy, political science, or economics, and the courses that can be used toward the PPE minor taken in the student's major department may be used for both the major and the PPE minor. In other words, while the minor requires 9 courses (27 credits), students majoring in philosophy, political science, or economics will only need to take 6 courses (18 credits) outside the major.

Main contacts for PPE: Alec Walen (Philosophy), Barry Sopher (Economics), and Christy Cahill (Political Science).

Learning Goals

At the end of this program students will be able to:

- Identify key factors in evaluating the morality of individual behavior and the legitimacy of regulations about that behavior.
- Explain the process through which the public regulation of individuals and groups occurs.
- Evaluate the economic ability of institutions to provide for the common welfare.
- Critique boundaries between private market forces and their just and efficient public regulation.

Minor Requirements

The minor requires students to take 3 courses (9 credits) in each of three fields of study. The course offerings in each field are structured to give students a solid grounding in each field, as well as a taste of what more advanced work in the field involves.

Students are permitted to bring in only three credits for each field from outside of Rutgers University-New Brunswick. In other words, at least two of the three classes for each field must be taken at Rutgers University-New Brunswick; only one course in each field can come from transfer credit, AP credit, study abroad, or other Rutgers campuses. Courses that are cross listed may be used to satisfy only one requirement.

All courses must be completed with a grade of C or better in order to be used for the minor.

Below are the requirements for each field, which must be completed whether the student majors in the field or pursues them as other parts of the minor.

Requirements for the Philosophy Component of the PPE Minor (3 courses, 9 credits)

Total of three philosophy courses, no more than one at the 100 level, and two from the following list, at least one of which must be at a 300 level or higher (other courses on a case-by-case basis):

01:730:105/106 Current Moral and Social Issues

01:730:107 Introduction Ethics

01:730:249 Bioethics

01:730:250 Environmental Ethics

01:730:251 Ethics and Business

01:730:255 Introduction to Social and Political Philosophy

01:730:330 Ethics of War and Conflict

01:730:341 Ethics through History

01:730:342 Social and Political Philosophy through History

01:730:343 Marx and Marxism

01:730:345 Philosophy and the Law

01:730:347 Philosophical Issues in Feminism

01:730:358 Philosophy of Law

01:730:371 Philosophies of Death and Dying

01:730:441 Ethical Theory

01:730:442 Moral Responsibility

01:730:445 Topics in Social and Political Philosophy

01:730:450 Topics in Moral Philosophy

01:730:459 Advanced Seminar in Ethics

01:730:470 Ethics and Practical Reason

Requirements for the Political Science Component of the PPE Minor (3 courses, 9 credits)

1 course in political theory, from the following list:

01:790:101 Nature of Politics

01:790:365 Gender and Political Theory

01:790:371 Western Tradition: Plato to Machiavelli

01:790:372 Western Tradition: Hobbes to Mill

01:790:373 Legal Philosophy, Rights, and Justice

01:790:374 Democratic Political Philosophy

01:790:375 American Political Thought to 1865

01:790:376 American Political Thought from 1865

01:790:472 Religion and Politics

01:790:473 Critics of Modernity

01:790:477 Critical Theory and Society

2 courses in policy or group relations, from the following list:

01:790:305 Public Policy Formation

01:790:318 Comparative Public Policy

01:790:319 Issues of American Foreign Policy

01:790:320 Political and Social Policy: Lessons from Europe

01:790:322 Strategy in International Relations

01:790:323 Defense Policy

01:790:330 Interest Groups

01:790:333 Race, Ethnicity, and Politics

01:790:334 Politics of Black America

01:790:335 Women and American Politics

01:790:338 Government and Business

01:790:350 Environmental Politics-U.S. and International

01:790:355 Women and Public Policy

01:790:358 Globalization, Democracy, and Contemporary Capitalism

01:790:360 Gender and Politics and Global Perspective

01:790:363 Conflict Resolution in World Politics

01:790:364 Global Order

01:790:386 Political Change in China

01:790:401 American Constitutional Law I

01:790:404 Politics of Criminal Justice

Requirements for the Economics Component of the PPE Minor (3 courses, 9 credits)

Both of these introductory courses:

01:220:102 Introduction to Microeconomics

01:220:103 Introduction to Macroeconomics

One course from the following list:

01:220:327 History of Economic Thought

01:220:331 Economics of Crime

01:220:390 Choice and Strategy in Politics (Prerequisite: 01:220:102)

01:220:402 Labor Economics (Prerequisites: 01:220:320 and 01:220:322)

01:220:417 Health Economics (Prerequisites: 01:220:320 and 01:220:322)

01:220:432 Environmental Economics (Prerequisites: 01:220:320 and 01:220:322)

01:220:460 Public Economics (Prerequisites: 01:220:320 and 01:220:322)

01:220:463 Economics of Taxation (Prerequisites: 01:220:320 and 01:220:322)

01:220:482 Game Theory and Economics

Certificate Programs in Economics that are open to students that complete the Quantitative Economics Minor

- Certificate in Economic Theory
- Certificate in Computational Economics and Data Analytics
- Certificate in Financial Economics

- Certificate in Global Economics
- Certificate in Public Policy Economics

See the economics certificate programs page for more details.

Economics 220 (SAS)

Honors Research in Economics

Honors Research in Economics

Majors who apply for departmental honors research usually have cumulative grade-point averages that generously exceed the minimum required 3.0 overall and 3.4 in economics.

Honors research consists of two tracks that differ in the way students identify and develop a topic. Either track can be launched as soon as the applicant has completed the prerequisites--typically in the senior year, but sometimes earlier.

Independent Launch

The student using the independent launch chooses a thesis topic in consultation with his or her faculty supervisor and with the approval of the department. Topics vary widely. The student must submit an application, which describes the topic, provides a preliminary review of some of the relevant literature, and identifies the data to be used in the econometric analysis. Both the faculty supervisor and the undergraduate director must approve the application. The independent launch is the most common approach to doing honors research.

The first (fall) semester of the Honors Research Seminar (01:220:493) is used to refine the topic by extending the literature review, by developing a theoretical and an empirical model for the investigation, and by launching preliminary econometric work on the data. Students enrolled in 493 must have completed or be enrolled in Advanced Econometrics (01:220:401).

In the second (spring) semester, 01:220:494, the student completes the investigation and submits the final draft of the thesis.

Course-Based Launch

The course-based launch uses a research-oriented elective course to develop and refine the topic in contrast to the independent launch, which uses 01:220:493. Research-oriented courses assign scholarly papers and econometric analysis of data. For an updated list of research-oriented courses, contact the department.

Having enrolled in one of these courses, the student identifies a topic, writes a literature review both from papers assigned in the course and from additional readings, and carries out some preliminary analysis of data (perhaps extending work done in the course). This work constitutes an application to 01:220:494, in which the student would complete the thesis. The student would need to enroll in Advanced Time Series and Financial Econometrics (01:220:400) or Advanced Cross-sectional and Panel Econometrics (01:220:401) along with the other honors research students.

Note that the research-oriented elective course launches the honors research and substitutes for the first semester of work, 01:220:493, in the independent launch.

Honors and Awards

The completed thesis can be submitted to the Awards and Honors Committee of the Economics Faculty, which will evaluate the thesis and, if appropriate, assign it one of three designations: honors, high honors, or highest honors. The committee also awards the Simon Prize for the best honors thesis, which may be shared by more than one thesis.

Economics 220 (SAS)

Certificate Programs

Certificate Programs

GENERAL INFORMATION ON CERTIFICATES IN ECONOMICS

The Department of Economics has five certificate programs for declared Economics majors. The certificates are in Financial Economics, Global Economics, Public Policy Economics, Economic Theory and Computational Data Analytics. These certificates are meant to provide economics majors with an incentive to plan and organize their thinking along several specific career paths that an economics degree is a good launching pad for, to the extent that this appeals to them. There are specific grade requirements, including a minimum overall g.p.a. of 3.0 to receive the certificate, and a minimum B grade for all courses taken to satisfy the certificate requirements.

The certificates are uniform in requiring four courses from a select list of mainly upper-level economics electives, including a core course for the certificate, which may be a specific course or one course from a short list of courses. In the latter situation, other courses in the core list may also be used to satisfy the overall course requirement for the certificate. Note that the Certificate in Economic Theory has some additional course requirements outside of economics. Click the tab for the Economic Theory Certificate for details. Certificates are noted on the student's transcript at graduation and may be listed on a c.v. or resume as an additional credential.

The Department of Economics no longer offers the Certificate in Quantitative Economics (CQE), which was a more credit-intensive certificate. However, the combination of the Certificate in Economic Theory and the Certificate in Computational Data Analytics is approximately equivalent to the old CQE.

Finally, note that the certificates are also available to students who are completing the Minor in Quantitative Economics, as the prerequisite courses in economics necessary to complete any of the certificates will satisfy the requirements for the Minor in Quantitative Economics.

Certificate in Financial Economics:

This concentration provides students with a deep background in the institutions, theory, quantitative practice, and history of the important field of financial economics. Students completing this certificate are well prepared for a career in Wall Street or for graduate study in economics, quantitative finance or financial engineering. Besides the normal core courses for the economics major, students take four of the following courses as part of the seven

electives required for the major. One of these is a required core course. There are specific grade requirements, including a minimum overall g.p.a. of 3.0 to receive the certificate, and a minimum B grade for all courses taken to satisfy the certificate requirements. In addition, students completing the Certificate in May 2021 or later must take either 01:220:423, 436, or 481 as one of their electives to complete the certificate.

Core:
220:413 Financial Economics
Electives (three courses):
220:421 Economic Forecasting and Big Data
220:423 Advanced Time Series and Financial Econometrics
220:436 International Finance and Macroeconomics
220:481 Economics of Uncertainty
220:495 Markets and Finance

Certificate in Global Economics:

This concentration is for students with an interest in global economic issues, including the international business cycle, long-term economic growth, balance of payments issues, integration of international markets and economic development. This certificate is a good preparation for employment in the Federal Reserve System or other central banks and in international organizations such as the IMF, the World Bank and the UN, and for graduate study in international relations, public policy or economics. Besides the normal core courses for the economics major, students take four courses, including one core course, as part of the seven electives required for the major. There are specific grade requirements, including a minimum overall g.p.a. of 3.0 to receive the certificate, and a minimum B grade for all courses taken to satisfy the certificate requirements.

Core: One of the following courses:
220:300 International Economics
220:435 International Trade
220:436 International Finance and Macroeconomics

Electives: Three of the following courses, with the option of including an additional course from the core list above. Note that only two of the three core courses may be used for credit toward the economics major, and this general rule applies to the certificate as well.

220:410 Advanced Macroeconomic Theory
220:411 Global Financial Crises
220:423 Advanced Times Series and Financial Econometrics
220:439 Economic Development
220:477 Economics of Population

Certificate in Public Policy Economics: The Certificate in Public Policy Economics is intended for students with an interest in working on fundamental policy issues related to labor, health, taxation, the environment, economic equality, gender, and other microeconomic issues. Employment in state and federal government agencies, in non-profit or non-governmental policy organizations, or graduate study in economics or public policy, are likely career paths. Besides the normal core courses for the economics major, students take four of the electives listed below as

part of the seven electives required for the major. One of these is a required core course. There are specific grade requirements, including a minimum overall g.p.a. of 3.0 to receive the certificate, and a minimum B grade for all courses taken to satisfy the certificate requirements.

Core: One of the following courses:
220:402 Labor Economics
220:433 Health Economics
220:460 Public Economics

Electives: Three of the following courses, with the option of including additional courses from the core list above.
220:331 Economics of Crime
220:422 Advanced Econometrics for Microeconomic Data
220:431 Urban Economics
220:432 Environmental Economics
220:438 Education Economics
220:463 Economics of Taxation

Certificate in Economic Theory: The certificate in economic theory is appropriate for students with a strong mathematical preparation who wish to deepen their understanding of microeconomic theory. This track is particularly recommended for students who would like to be better prepared for graduate study in economics. Students are advised to fulfill the major Calculus I requirement with 01:640:151 rather than 01:640:135. Besides the normal core requirements, students take Calculus II (640:152), Linear Algebra (640:250), and the sequence of Mathematical Theory of Probability (640:477) and Mathematical Theory of Statistics (640:481), or the sequence of Theory of Probability (960:381) and Theory of Statistics (960:382). The 477/481 math sequence or the 381/382 statistics sequence can substitute for 960:285 in the major core. For the seven electives for the major, students must take at least four courses, including one core course. With instructor approval, appropriate courses in the economics Ph.D. program may be used as electives as well. Students who aspire to enroll in a Ph.D. program in economics are encouraged, though not required for the certificate, to take additional mathematics courses, including Multivariable Calculus (640:251), Elementary Differential Equations (640:252), and Real Analysis (640:300 and 640:311). There are specific grade requirements, including a minimum overall GPA of 3.0 to receive the certificate, and a minimum B grade for all courses taken to satisfy the certificate requirements.

Core: One course from the following:
220:481 Economics of Uncertainty
220:482 Game Theory and Economics

Electives: Three courses from the following, with the option of including an additional course from the core list above:
220:441 Industrial Organization
220:480 Behavioral and Experimental Economics
220:483 Markets, Games, and Information
220:485 Advanced Microeconomic Theory

Certificate In Computational Economics and Data Analytics:

This concentration provides students with a deep background in advanced tools for analysis of economic data, including traditional regression methods commonly used in economics, as well as more computationally intensive methods, such as machine learning.¿ Students completing this certificate will be well-prepared for positions in a wide range of business and government organizations where high through-put analysis of incoming data is valued.¿ The certificate is also an excellent preparation for graduate study in economics or decision sciences, particularly for areas where computational modeling of economic decision making and analysis of data from decision making is the focus.¿Students planning to pursue this certificate should have a strong aptitude and interest in econometrics and are recommended to complete econometrics (01:220:322) and calculus II (01:640:136 or 152) as early as possible.¿ As for all the certificate programs in economics, a total of four courses, each with a grade of B or better, are required, as well as an overall g.p.a. of at least 3.0.¿

Required
220:420 Computational Methods for Research in Economics
Data Methods electives (at least three from this list):
220:421 Economic Forecasting and Big Data
220:422 Advanced Econometrics for Microeconomic Data
220:423 Advanced Time Series and Financial Economics
220:424 Advanced Analytics for Economics

Economics 220 (SAS)

Courses

Courses

01:220:102 ***Introduction to Microeconomics (3)***
The market system and alternative mechanisms for determining prices and allocating resources. Economic analysis of monopoly, cartels, wage and price controls, pollution, and other contemporary problems.
Prerequisite: 01:640:111, or 115, or calculus placement. Credit not given for both this course and 11:373:121.

01:220:103 ***Introduction to Macroeconomics (3)***
Determinants of aggregate employment and national income; evaluation of government policies to alleviate inflation and unemployment. Money, banking, and monetary policy. International trade and finance, and the prospects for world economic development.
Prerequisite: 01:640:111, or 115, or calculus placement. Credit not given for both this course and 11:373:122.

01:220:110 ***Personal Finance and Financial Decision-Making (3)***
Economics and financial literacy; basic tools of financial planning; simple and compound interest; investment and retirement planning; insurance, futures, and options.
Prerequisite: 01:640:025. Credit not given for both this course 11:373:353 and 37:575:250. Course cannot be used for major or minor credit.

01:220:200 *Economic Principles and Problems (3)*
Economic principles and their application to current problems.
Prerequisite: 01:640:111, or 115, or calculus placement. Open only to engineering students. Credit not given for both this course and 01:220:102 and 103. 01:220:200 may be used in place of 01:220:102 and 103 to satisfy the prerequisite for more advanced courses.

01:220:212 *Economic Data Analytics: Introduction to Data Management, Statistics, and Regression Methods for Decision-Making (3)*
Introduction to data collection, visualization, analysis, and presentation; introduction to basic linear regression methods, hypothesis testing, and interpretation of estimates; use of Microsoft Excel and Regressit, an Excel add-in, throughout.
This course is equivalent to the 210-211 sequence. Prerequisite: 01:640:026 or placement into higher. May be used for economics minor credit only. Credit not given for both this course and 01:220:210 or 01:220:211.

01:220:300 *International Economics (3)*
Pure or "real" aspects of international trade, including the basic comparative advantage model, commercial policy (tariffs, quotas, etc.), economic integration, and the role of international trade in economic development. Monetary aspects of international trade, including international capital movements, foreign exchange market, concept and measurement of balance of payments, alternative means of correcting disequilibrium in the balance of payments, and international monetary arrangements.
Prerequisites: 01:220:102, 103. Major credit may be earned for only two of the three courses: 01:220:300, 335, 336.

01:220:301 *Money, Banking, and the Financial System (3)*
Economic significance of money; structure, history, and present state of the American monetary system; credit, banking, and Federal Reserve; instruments of credit control; Federal Reserve and treasury policies; monetary reform, monetary theory and policy. Lower-level elective.
Prerequisites: 01:220:102, 103.

01:220:303 *Labor Institutions and Markets (3)*
Private and public employee unions, industrial relations, and collective bargaining. Public regulation of labor markets including industrial safety and wage levels. Lower-level elective.
Prerequisites: 01:220:102, 103, or 200.

01:220:305 *American Economic History (3)*
Long-term trends in economic growth and institutions from the colonial period to World War II. Development of transportation and industry. Effects of technological change and immigration.
Prerequisites: 01:220:102, 103, or 200.

01:220:307 *Economics of Globalization: A Historical Perspective (3)*
Examination of the evolution of globalization from the 1800s to the present; assessment of the benefits of financial and trade integration relative to the costs associated with integration such as the consequences of financial crises. Lower-level elective.
Prerequisite: 01:220:102 and 01:220:103.

01:220:311 *Methods of Cost-Benefit Analysis (3)*
Introduction to theoretical and applied welfare economics. Theories of social welfare; the normative basis for, and practical techniques of, cost-benefit analysis. Selected applications.
Prerequisites: 01:220:102 and 103.

01:220:320 *Intermediate Microeconomic Analysis (3)*
Households and firms as maximizing agents; implications for demand and supply of goods and productive services in competitive and monopolistic markets; general equilibrium; welfare economics.
Prerequisites: 01:220:102, grade of C or better; 01:640:135 or 151, grade of C or better. Credit not given for both 01:220:320 and 203.

01:220:321 *Intermediate Macroeconomic Analysis (3)*
Modern and classical theories of income determination, stabilization, and economic growth; emphasis on unemployment and inflation.
Prerequisites: 01:220:102, 103, grade of C or better; 01:640:135 or 151, grade of C or better. Credit not given for both 01:220:321 and 204.

01:220:322 *Econometrics (3)*
Introduction to the application of statistical methods for the estimation, testing, and prediction of economic relationships. Emphasizes ordinary least squares regression and problems in its application. Extensive use of microcomputers. Special topics may include limited dependent variable models, simultaneous equation methods, and time-series methods.
Prerequisites: 01:220:102, 103, grade of C or better; 01:960:211 or 285 or equivalent, grade of C or better; 01:640:135 or 151, grade of C or better.

01:220:323 *Data Science and Econometrics (1)*
Empirical capstone project for Data Science Certificate Program. Includes proposing an economic research project and conducting a data-based project including identifying a data source, cleaning and organizing the data, conducting appropriate statistical analysis, and interpreting and reporting the results of the study in a standard scholarly form. Requires finding an appropriate project and data source with suitable characteristics for a data science-oriented study.
Prerequisites: (01:198:142 or 01:960:142) and 01:960:291 and (01:198:210 or 01:960:295 or 04:547:221) and 01:220:322.

01:220:327 *History of Economic Thought (3)*
Historical examination of the major concepts of economic theory. Covers all major traditions within economic thought, with special emphasis on the school of classical political economy. Lower-level elective.
Prerequisites: 01:220:102, 103, or 200, or permission of instructor.

01:220:331 *Economics of Crime (3)*
Economic analysis of crime and the criminal justice system, criminal behavior, law enforcement, crime prevention, sentencing, capital punishment, organized crime, and the war on drugs. Lower-level elective.
Prerequisites: 01:220:102, 103, or 200.

01:220:334 *Energy Economics (3)*
Economic analysis of energy problems. Critical examination of government energy policies. Lower-level elective.
Prerequisites: 01:220:102, 103.

01:220:362 *Comparative Economic Systems (3)*
Comparative analysis of differing economic systems with emphasis on plan/market comparisons and the nature of transitions in formerly planned economies. Lower-level elective.
Prerequisites: 01:220:102, 103, or 200.

01:220:389 *Public Policies toward Business (3)*
Analysis of major policies affecting competition. Topics include antitrust, traditional public-utility regulation, and newer regulatory alternatives. Lower-level elective.
Prerequisites: 01:220:102, 103, or 200.

01:220:390 *Choice and Strategy in Politics (3)*
Rational-choice approaches to understanding political behavior and institutions. Spatial models of direct and representative democracy; strategic behavior of political actors; ideal voting systems; selected applications in U.S. and other political systems.
Credit not given for both this course and 01:790:390. Prerequisites: 01:220:102, 103.

01:220:395 *Law and Economics (3)*
Economic rationale and consequences of legal rules. Contracts, compensation, property rights, liability rules, crime, safety, monopoly, discrimination, health care, pollution, and public interest law. Lower-level elective.
Prerequisites: 01:220:102, 103, or 200.

01:220:396 *Corporations, Bankruptcies, and Takeovers (3)*
Origin and nature of corporations; corporate bankruptcy, including liquidation and reorganization; mergers and acquisitions; takeover disputes. Lower-level elective.
Prerequisites: 01:220:102, 103, or 200. Credit not given for both this course and 01:220:309.

01:220:397 *Internship in Economics (1)*
Supervised internship in economics-related position. Approval of the director of undergraduate studies and semester paper required.
Prerequisites: 01:220:102, 103, or 200. Each student is limited to one internship in economics. Students are responsible for finding internships. Majors only. Graded Pass/No Credit.

01:220:398,399 *Independent Study in Economics (3,3)*
Independent research supervised by a faculty member.
Prerequisites: 01:220:102, 103. By permission of instructor and department. Maximum of two independent study courses in economics allowed.

01:220:402 *Labor Economics (3)*
The firm's labor demand, the household's labor supply, and wage determination in competitive and noncompetitive markets. Economics of unions. Human capital, occupational choice, wage structure, and unemployment. Upper-level elective.
Prerequisites: 01:220:320 and 322. Credit not given for both this course and 01:220:302.

01:220:403 *Special Topics in Labor Markets (3)*
Analysis of topics such as hours of work, fertility and population, mobility, job search, and unemployment. Investment in human capital, wage and retirement policies, and occupational training. Upper-level elective.
Prerequisites: 01:220:320 and 322. Credit not given for both this course and 01:220:304.

01:220:410 *Advanced Macroeconomic Theory (3)*
Use of models of household and firm behavior and equilibrium analysis to study macroeconomic issues. Competing theories of aggregate fluctuations, including real business cycle theory and the New Keynesian model. Effects of fiscal and monetary policy on the economy in the short and long run. Upper-level elective.
Prerequisites: 01:220:320, 01:220:321, 01:220:322, 01:640:136, or 01:640:152. Credit not given for both this course and 16:220:586.

01:220:411 *Global Financial Crises (3)*
Financial crises from a historical perspective; survey of the history of banking, currency, and debt crises across the world for the past century and a half; in-depth discussion of the 2008 crisis in the United States and the Euro-zone crisis of 2010-2013. Seminar. Upper-level elective.
Prerequisites: 01:220:320, 321, and 322.

01:220:412 *Monetary Theory and Policy (3)*
Role of money and the monetary system in determining income, employment, and price level; techniques of monetary policy; relation of monetary and fiscal policy; international policies. Upper-level elective.
Prerequisites: 01:220:321 and 322.

01:220:413 *Financial Economics (3)*
Analysis of financial decision-making; market structure; asset valuation; return on assets; determinants of relative yields. Upper-level elective.
Prerequisites: 01:220:320 and 322. Credit not given for both this course and 01:220:393.

01:220:414 *Economics of Capital Markets (3)*
Capital markets uncertainty; capital budgeting; theories of stock and bond market activity. Innovations in financial instruments. Upper-level elective.
Prerequisites: 01:220:321, 322, and either 393 or 413. Credit not given for both this course and 01:220:394.

01:220:415 *Portfolio Theory (3)*
Selection of a financial portfolio under conditions of uncertainty. Treatment of risk. Case histories of investment fund performance. Upper-level elective.
Prerequisite: 01:220:393 or 413.

01:220:420 *Computational Methods for Research in Economics (3)*
Computational tools and custom-designed data collection methods for economic research; self-contained primer in building computational tools; use of computational tools in adapting tightly specified and general theoretical models to more complex and realistic settings; primer in research design, with emphasis on efficient collection of data to test theory. Upper-level elective.
Prerequisites: 01:220:320, 321, 322; 01:640:136 or 152.

01:220:421 *Economic Forecasting and Big Data (3)*
Application of forecasting methods to data sets with large numbers of observations and variables. Introduction to Big Data methods for economics and finance. Upper-level elective.
Prerequisites: 01:220:320, 321, and 322.

01:220:422 ***Advanced Econometric for Microeconometric Data (3)***
Advanced topics in microeconomic applications of econometrics. May include fixed effects, panel data, instrumental variables and simultaneous equation methods, limited dependent variable models, duration models, regression discontinuity and difference-in-difference designs. Emphasis on application of these methods to economic issues with focus on computer exercises.
Prerequisites: 01:220:320, 01:220:321, and 01:220:322, Calculus II and admission by special permission.

01:220:423 ***Advanced Time-Series and Financial Econometrics (3)***
Application of multivariate time-series methods to economics and finance. Upper-level elective.
Prerequisites: 01:220:320, 321, and 322,; and 01:640:136 or 152. Open to students doing honors research, and others by special permission. (Credit not given for both this course and 01:220:400.)

01:220:424 ***Advanced Analytics for Economics (3)***
Advanced regression and classification methods applied to economic research questions; consideration of linear, graphical, kernel and neural network methods; emphasis on Bayesian methods for research design; consideration of broader social and distributional implications of the use of these methods.
Prerequisites: 01:220:320, 321, and 322, and 01:640:136 or 152.¿

01:220:431 (3) ***Urban Economics***
Introduction to the economic forces shaping cities. Theoretical and empirical analysis of the location decisions of firms and households and the factors driving urban growth. Agglomeration economies, housing, land use, segregation, transportation, and local government policies.
Prerequisites: 01:220:320 and 322.

01:220:432 ***Environmental Economics (3)***
Economic basis of problems of air and water pollution and general environmental quality. Issues relating to externalities and public goods. Economic solutions to problems of environmental quality. Upper-level elective.
Prerequisites: 01:220:320 and 322. Credit not given for both this course and 01:220:332 or 11:373:363.

01:220:433 ***Health Economics (3)***
Medical care costs; production of health; demand for health care and insurance; health services personnel; physician and hospital behavior; cost containment; review and evaluation of public programs. Upper-level elective.
Prerequisites: 01:220:320 and 322. (Credit not given for both this course and 01:220:433 (formerly 417) or 10:832:332.)

01:220:435 ***International Trade (3)***
Theories analyzing the gains from, and causes of, the international exchange of goods and services. The impact of commercial policy and other government policies on these gains and resource allocation. Upper-level elective.
Prerequisites: 01:220:320, 322. Major credit may be earned for only two of the three courses: 01:220:300, 435, 436. Credit not given for both this course and 01:220:335.

01:220:436 ***International Finance and Macroeconomics (3)***
Theory of the balance of payments and balance-of-payments adjustment. International financial system, foreign exchange market, determinants of the trade balance and capital accounts, and the impact of government financial policies in the open economy. Upper-level elective.
Prerequisites: 01:220:320, 321, and 322. Major credit may be earned for only two of the three courses: 01:220:300, 435, 436. Credit not given for both this course and 01:220:336.

01:220:437 *Economics of the European Union (3)*
Intraregional macroeconomic analysis of the European Union, elimination of all trade barriers, integration of capital and labor markets, coordination of monetary and fiscal policies, the Euro currency. Upper-level elective.
Prerequisites: 01:220:320, 321, and 322. Credit not given for both this course and 01:220:337.

01:220:438 *Education Economics (3)*
Economic theory applied to educational policy issues. The nature of education and its relation to personal and societal development from economic perspectives. Upper-level elective.
Prerequisites: 01:220:320 and 322. Credit not given for both this course and 01:220:338.

01:220:439 *Economic Development (3)*
Theories and experience of qualitative and quantitative changes involved in the process of raising living standards in less-developed countries. Upper-level elective.
Prerequisites: 01:220:320, 321, and 322. Credit not given for both this course and 01:220:339.

01:220:440 *Economics of Income Inequality and Discrimination (3)*
Income distribution in the United States and elsewhere; the roles of occupation, education, and discrimination. Government policies concerning inequality, discrimination, and poverty. Upper-level elective.
Prerequisites: 01:220:320 and 322. Credit not given for both this course and 01:220:340.

01:220:441 *Industrial Organization (3)*
Theories of firm and market behavior. Evidence on relationships between structure, conduct, and performance. Includes pricing, profitability, innovation, and advertising. Upper-level elective.
Prerequisites: 01:220:320 and 322. Credit not given for both this course and 01:220:341.

01:220:442 *Economics of Innovation and Intellectual Property (3)*
Incentives to innovate, economic models of innovation, intellectual property protection including patents and copyrights, and government programs to stimulate innovation. Upper-level elective.
Prerequisites: 01:220:203 and 322. Credit not given for both this course and 01:220:342.

01:220:443 *European Economic History (3)*
Emergence of the modern economy in Europe from the 16th to the 20th century. Price revolution and mercantilism. Industrial revolution in England and the continent, and the formation of international markets. The Great Depression and renewed prosperity. Upper-level elective.
Prerequisites: 01:220:320 (or 203) and 321 (or 204) and 322. Credit not given for both this course and 01:220:343.

01:220:444 *Financial and Monetary History of the United States (3)*
Development of financial institutions, money, and capital markets. Central banking and the Federal Reserve system. Gold standard and floating exchange rates. Financial panics and economic crises. Upper-level elective.
Prerequisites: 01:220:320, 321, and 322. Credit not given for both this course and 01:220:344.

01:220:445 *Advanced Topics in International Economics (3)*
Topics may include strategic trade, trade and economic growth, the political economy of trade policy, exchange rate determination, international coordination of macroeconomic policy, empirical issues in international economics, and foreign direct investment. Upper-level elective.
Prerequisites: 01:220:320, 321, and 322. Credit not given for both this course and 01:220:433.

01:220:449 *Economics of Transition (3)*
Economic analysis of the policies and performance of the transition economies of the former Soviet Union and Eastern Europe. Upper-level elective.
Prerequisites: 01:220:203, 204, and 322. Credit not given for both this course and 01:220:349.

01:220:460 *Public Economics (3)*
Rationale for the public sector; public expenditure theory; economics of political process; expenditure structure and growth; incidence and incentives of specific taxes; fiscal incidence; stabilization. Upper-level elective.
Prerequisites: 01:220:320 and 322. Credit not given for both this course and 01:220:360.

01:220:463 *Economics of Taxation (3)*
Structure of the U.S. tax system. Effects on the allocation of resources and economic growth; distribution of the burden of taxation across income groups. Upper-level elective.
Prerequisites: 01:220:320 and 322. Credit not given for both this course and 01:220:363.

01:220:464 *Personal Economics and Public Policy (3)*
Examination of how public policy affects and is affected by individuals' economic decisions and actions. Upper-level elective.
Prerequisites: 01:220:320 and 322. Credit not given for both this course and 01:220:364.

01:220:469 *State and Local Public Finance (3)*
Evolution of federalism; analysis of expenditure and revenue decisions and intergovernmental grants; discussion of stabilizing and distributional aspects of state-local finances; and specific state-local fiscal problems. Upper-level elective.
Prerequisites: 01:220:320 and 322. Credit not given for both this course and 01:220:369.

01:220:470 *Economic Growth (3)*
Theories, experience, and measurement of quantitative changes in output, employment, price levels, and other economic aggregates in modern developed countries. Upper-level elective.
Prerequisites: 01:220:320, 321, and 322. Credit not given for both this course and 01:220:370.

01:220:471 *Economics of Regulation (3)*
Applied topics in rate-of-return regulation. Emphasis on underlying financial, accounting, and pricing issues in selected utilities industries. Upper-level elective.
Prerequisites: 01:220:320 and 322.

01:220:475 *Women, Men, and the Economy (3)*
Description and analysis of women's economic status. Theories of discrimination against women in the labor market, including neoclassical, institutional, and Marxian. Women's work in the home analyzed from three perspectives: household utility maximization, patriarchy, and a sex-gender system. Application of theories to case studies. Upper-level elective.
Prerequisites: 01:220:320 and 322. Credit not given for both this course and 01:220:375.

01:220:477 *Economics of Population (3)*
Theoretical and empirical study of the interrelations between population change and economic change in developed as well as less-developed countries. Upper-level elective.
Prerequisites: 01:220:320, 321, and 322. Credit not given for both this course and 01:220:377.

01:220:480 *Behavioral and Experimental Economics (3)*
Alternative theories of anomalous behavior in economic settings. Choice under uncertainty, strategic interaction, and behavior in anonymous markets. Experimental methods for the study of economic behavior.
Prerequisites: 01:220:320, 01:220:322, 01:640:136 or 01:640:152. Credit not given for both this course and 01:220:404 or 01:220:405.

01:220:481 *Economics of Uncertainty (3)*
Measurement of risk, attitudes toward risk, decision-making under uncertainty, Bayesian decision theory, applications to asset markets. Upper-level elective.
Prerequisites: 01:220:320; 01:960:211 or 285; 01:640:136 or 152 all with grades of C or better. Credit not given for both this course and 01:220:405.

01:220:482 *Game Theory and Economics (3)*
Expected utility theory, zero and nonzero sum games, cooperative and noncooperative games, bargaining models, supergames, oligopoly, core market games, strategy-proof systems.
Prerequisites: 01:220:320; 01:960:211 or 285; 01:640:136 or 152. (01:220:320 and; 01:960:211) or (01:220:320 and 01:960:285. Credit not given for both this course and 01:220:406 or for both this course and 01:640:355.

01:220:483 *Markets, Games and Information (3)*
Private and asymmetric information, moral hazard with optimal contracts, adverse selection with applications to signaling and screening, and incentive mechanisms such as auctions and tournaments. Upper-level elective.
Prerequisites: 01:220:320; 01:960:211 or 285; 01:640:136 or 152. (01:220:320 and; 01:960:211) or (01:220:320 and 01:960:285). Credit not given for both this course and 01:220:407.

01:220:484 *Market Discipline (3)*
Theories and evidence of agency problems and firm performance at for-profit, not-for-profit, and mutual organizations; internal discipline of managerial performance derived from ownership structure, boards of directors, incentive compensation, and debt financing; external discipline derived from regulation and markets for products, capital, labor, and donors. Upper-level elective.
Prerequisites: 01:220:320, 01:640:136 or 152, 01:220:322. Credit not given for both this course and 01:220:408.

01:220:485 *Advanced Microeconomic Theory (3)*
Consumer and producer theory, general equilibrium analysis, and game theory. Emphasis on rigorous mathematical approach to economics. Recommended for students interested in graduate-level study in economics. Upper-level elective.
Prerequisites: 01:220:320, 321, and 322; 01:640:136 or 152. Credit not given for both this course and 16:220:585.

01:220:486 *Operations Research I (3)*
Application of quantitative methods to production management including decision theory, game theory, deterministic inventory theory, queuing, and linear programming. Upper-level elective.
Prerequisites: 01:220:320 and 322. Credit not given for both this course and 33:623:386. Credit not given for both this course and 01:220:386.

01:220:487 *Operations Research II (3)*
Development and use of advanced techniques of production management, including advanced topics in linear programming, PERT, nonlinear programming, dynamic programming, stochastic inventory theory, and Markov analysis and simulation. Upper-level elective.
Prerequisites: 01:220:320 and 322; 01:640:136 or 152. Credit not given for both this course and 01:220:410.

01:220:488 *Networks and Complexity in Economics (3)*
Analysis of network connections among economic agents; game- and information-theoretic considerations; complexity and the need for alternatives to traditional optimization methods for understanding complex environments; applications to neighborhood segregation, diffusion of information, contagion in financial markets; introduction to neuroeconomics. Upper-level elective.
Prerequisites: 01:220:320, 321 and 322; 01:640:136 or 152.

01:220:489 *Topics in Advanced Economic Theory (3)*
Economic dynamics; variational methods with applications; economics under uncertainty; imperfect information and market structure; social choice; design of incentive-compatible systems; general equilibrium. Upper-level elective.
Prerequisites: 01:220:320, 321 and 322; 01:640:136 or 152. Credit not given for both this course and 01:220:430.

01:220:490,491 *Advanced Independent Study and Research (3,3)*
Specialized research supervised by a faculty member. Upper-level elective.
Prerequisites: 01:220:320, 321, and 322. Open to juniors and seniors by permission of instructor and department. Maximum of two independent study courses in economics allowed.

01:220:493 *Honors Research Seminar I (3)*
Workshop in which students, in conjunction with faculty advisers, formulate and develop individual research projects and present and discuss their research findings. Upper-level elective.
Prerequisites: 01:220:320, 321, and 322. Pre- or corequisite: 01:220:401. Open to sophomores, juniors, and seniors by permission of department.

01:220:494 *Honors Research Seminar II (3)*
Workshop in which students, in conjunction with faculty advisers, complete individual research projects begun in 01:220:493 or in a research-oriented economics elective course and present and discuss their research findings.
Prerequisites: 01:220:320, 321, 322. Pre- or corequisite: 01:220:401. Open to sophomores, juniors, and seniors by permission of department.

01:220:495,496 *Seminar in Economics (3,3)*
Readings, analysis, and discussion of topics announced in advance each semester. Upper-level elective.
Open to juniors and seniors by permission of department.

Robert Zisk, Ph.D., Rutgers

Education 300 (GSE)

Programs

Programs

The Graduate School of Education offers two different programs for undergraduates at Rutgers.

One program, the urban social justice teacher education program, begins in the senior year of undergraduate studies and continues into a fifth year of study, culminating in a master's degree. This program leads to state certification as a K-12 teacher, in one or more content areas, eligible for employment in New Jersey's public schools. The program offers a robust combination of coursework at the GSE combined with clinical experiences in carefully selected schools and classrooms that are part of the GSE-Community School Partnership Network (CSPN). By combining experiences in the university classroom, K-12 schools, and local communities, GSE's urban social justice teacher education program offers students a unique opportunity to blend theory and practice to develop best practices in teaching and in the service of some of the most underresourced students, schools, and communities in the state.

The other program is an educational minor with several tracks. Each track, or area of concentration, provides an opportunity for undergraduates to study deeply in a particular context in the field of education taking both a scholarly and practical point of view on the concentration area.

Both programs serve as a minor in the School of Arts and Sciences.

Education 300 (GSE)

Noncertification Minor in Education as a Social Science

Noncertification Minor in Education as a Social Science

Education as a social science minor is designed for students interested in investigating learning and teaching in a broad range of human contexts. This minor takes a multidisciplinary approach to the study of educative practices and is premised on several key assumptions:

- Learning and teaching are fundamental human and cultural processes.
- Education is intimately bound up with social, cultural, economic, and political systems.
- Reflection and inquiry are powerful tools for exploring teaching and learning in all human contexts.

Through a minor in education, students will examine each of these assumptions by investigating educative practices in and outside of formal settings. There are many ways in which a student can complete the minor.

1. Educational Policy and Social Justice. This concentration will permit students to focus on issues related to the history of American education, race and American schools, and queer issues in schools.
2. Creativity and Play. This concentration will permit students to focus on creativity and imagination in professional settings, the arts and the young child, and the role of play in education.
3. Global Education. This concentration will provide students with grounding in the areas of global education, issues of migration and education, and comparative education acrosscountries.
4. Exceptional Learners. This concentration provides students with knowledge of both gifted education and education for students with learning disabilities.
5. Digital Learning. This concentration will permit students to learn about education and computers, digital games and learning, and other topics related to learning in digital learningenvironments.
6. Community Studies and Civic Engagement. This concentration is for students interested in educational leadership in informal learning settings, such as museums and community organizations.
7. General Studies. This concentration will allow students to take a menu of courses in education tailored to ones own interests; this concentration is also appropriate for students in our five-year urban teacher education program.

See the GSE website and Degree Navigator for more information.

Education 300 (GSE)

Certification Programs

Certification Programs

The Graduate School of Education's (GSE) teacher preparation program is designed to develop professionals committed to excellence, equity, and social justice in their teaching practice. New Jersey is a uniquely diverse and urban state, as defined by the following: large numbers of students from historically marginalized linguistic, economic, and cultural backgrounds; high-poverty districts or schools; and population density combined with educational inequality. GSE's teacher preparation program aims to develop a generation of teachers with the knowledge, skills, and dispositions to teach and advocate for all students as well as the ability to learn from students

and their communities. Teachers prepared at the GSE learn to critically analyze the social politics of urban, rural, and suburban schools and use that analysis to inform their teaching practice as they advocate for each other and their students, and for best practices within schools. Our students benefit from working with some of the best education faculty in the world and gain real-world experience partnered with carefully selected mentor teachers in the economically, racially, ethnically, and linguistically diverse communities and schools in New Jersey. They engage in clinical work in school- and community-based settings located in urban partner districts where they develop unique skills to prepare them for success in our nation's increasingly diverse schools.

An urban and social justice teacher education program prepares candidates to

- develop meaningful understandings of diverse students, their experiences, and communities;
- analyze the social, economic, historical, and political dimensions of urban settings and schools;
- effectively teach diverse students, including those from historically marginalized linguistic, cultural, and economic backgrounds;
- identify and disrupt instances and patterns of discrimination and marginalization, and develop their students' critical and active citizenship capacities;
- balance constructivist, student-centered approaches with explicit instruction and scaffolding;
- deeply understand their disciplines and create learning experiences that make disciplinary content knowledge accessible to students; and
- be caring, competent, rigorous, and reflective practitioners.

Certification programs exist in the following teaching areas (K-12): agriculture, biological science, dance, English, foreign language (Chinese, French, German, Italian, Latin, Russian, and Spanish), mathematics, music, physics, physical science, social studies, and special education. A certification program in elementary education (K-6) with subject matter specialization for the middle grades (5-8) or preschool through grade 3 (P-3) is also available. Most of these programs are offered directly by the Graduate School of Education (GSE), but some are offered by other units of the university in cooperation with the GSE.

The certification program in music education is a four-year program and is offered by the Mason Gross School of the Arts. All of the other teacher preparation programs are sponsored by the GSE and are five-year programs. In these programs, the baccalaureate degree is awarded after four years by the School of Arts and Sciences, Mason Gross School of the Arts, or the School of Environmental and Biological Sciences, and the master's degree in education is awarded by the GSE after one more year of study. A recommendation is made to the state of New Jersey after the successful completion of the fifth year of the program.

Admission: Students apply to and are admitted to these programs during the second semester of the junior year; the study of professional education begins during the junior or senior year and continues with an internship and advanced professional studies in the fifth year. Admission into the education programs is competitive.

To be considered for admission students must demonstrate proficiency in written and oral communication and have successfully completed a college-level mathematics course. Additionally, applicants must have successfully completed 05:300:200/201 Introduction to Education with Clinical Field Experience, and 05:300:306 Principles of Classroom Learning. Admission is based upon the cumulative grade-point average; passing/minimum required scores on one or more of the ACT, SAT, GRE, or Praxis Core Combined Exam for Educators; performance in the introductory education courses and related fieldwork; letters of recommendation; and a written personal statement.

Program Requirements: Individuals preparing for subject area certification must major in the field in which they are planning to teach. Elementary education students and special education students must major in any appropriate liberal arts field.

In addition to the major, education programs include coursework in educational psychology, social and philosophical foundations of education, and methods of teaching, as well as fieldwork and student teaching. All programs also have a required distribution of liberal arts courses. Coursework is required in the following general education areas: arts, humanities, mathematics, science, technology, and psychology. Additionally, demonstration of competence in a foreign language at least equal to that of the second college semester is required.

Education 300 (GSE)

For More Information

For More Information

Students seeking admission to any of the programs offered by the Graduate School of Education should meet with an education adviser to review program requirements as soon as possible or during their first year. Detailed information about all programs and advisement can be obtained from the Office of Academic Services, Graduate School of Education, 10 Seminary Place, New Brunswick, NJ 08901-1183; academic.services@gse.rutgers.edu or refer to the website.

Education 300 (GSE)

Courses

Courses

05:300:200 ***Introduction to Education (3)***
Taking a multidisciplinary approach to the study of education, this course examines educative practices in and outside of school contexts. It focuses on critical issues in U.S. education, including: the structures of schools and schooling, theories of learning and teaching, students' experiences, teachers' experiences, inequality, family and community relationships, and contemporary school reform policies.
Prerequisite for admission to the teacher education program.

05:300:201 ***Introduction to Education Field-Based Lab - Clinical Experience (.5)***
This clinical course is designed around five-to-six facilitated experiences in urban schools so that students can systematically and carefully begin to understand the unique challenges and opportunities of urban schools and communities. Students will have opportunities to meet with stakeholders at urban schools as well as observe in schools and communities.
Corequisite: 05:300:200.

05:300:202 ***Introduction to How People Learn (3)***
Education occurs not just in schools but in nearly every setting where people live and work--workplaces, organizations, communities, families, museums, and so on. Nearly all professions involve educating others. This course helps students learn to be effective educators in out-of-school contexts. It examines processes of effective

learning and motivation in a variety of learning settings, such as learning through games, learning in after-school programs, and learning through cultural apprenticeships. It also examines connections of learning with issues of equity, diversity, and culture within and across these settings.

05:300:303 ***Why We Play: Play in Children, Adults, and Animals (3)***
Play is a part of life among all social animals as well as among humans. Play begins in childhood, but transforms and has critical import for later life. Students will learn about how play has been considered from ancient times to the present and be able to interpret play in their own lives and lives of those around them. Activities include observation of children playing, playing yourself, and written assignments. This course offers the opportunity for students to determine their personal perspective on the question of play.

05:300:304 ***Arts and the Young Child (3)***
This course will focus on drama, movement, visual art, music, and creative writing, individually and together, as well as imagination and creativity. Students in the course will experience the processes of these arts themselves and create products/presentations using various art forms. They will learn how to stimulate arts processes and lead art activities with young children, how to talk about these activities with children, and how to evaluate and assess these activities.

05:300:305 ***Creativity and Imagination in Educational Settings (3)***
Students will become acquainted with the fields of creativity and mental imagery through online and live lectures, readings, and leading and or participating in a variety of activities designed to stimulate personal creativity. Students will respond to almost weekly probes and submit journal entries stimulated by those probes. Students will develop two different presentations that demonstrate their personal take on creativity. Students will work in groups to create two concluding pieces (a creativity box and an original text segment) that utilize the creative and imaginative skills and abilities of all participants in that group.

05:300:306 ***Educational Psychology: Principles of Classroom Learning (3)***
Surveys areas of psychology most relevant to education. How children think, learn, and remember; influence of motivation; principles of measurement.
Prerequisite: 01:830:101.

05:300:307 ***Human Development: Birth through the Transition to Adulthood (3)***
Introductory course in human development providing an overview of learning and developmental processes from birth through the transition to adulthood. Development during infancy, early childhood, middle childhood, adolescence, and early adulthood is considered. Changes in physical, neurological, social, cognitive, and emotional functioning during these periods are examined through the lenses of sociocultural, developmental, and learning sciences.

05:300:308 ***Introduction to Motivation***
This course provides an overview of motivation in formal and informal educational settings from a psychological perspective. Most theories and research on motivation are framed around two major components of ones¿ motivation: Can I do this task? Why do I want to do this task? We will address these questions through the theoretical lenses of major theories of motivation including expectancy value theory, attribution theory, achievement goal theory, self-determination theory, theories of personal and situational interest, and engagement. We will examine how and why ones¿ responses to these questions shape their engagement and learning.

05:300:313 ***Introduction to Tutoring***
Tutoring occurs not just in schools, but also in a variety of out-of-school contexts, standardized test preparation, museum exhibits, and so on. Tutors are typically more experienced peers, teachers, or anyone with expertise in a particular subject matter. The most effective tutors not only have expertise in their subject area, but also have a thorough understanding of the strategies needed to monitor and produce meaningful learning in both one-on-one and group settings. In this course, students learn to be effective tutors in K-12 settings, both inside and outside of the classroom. It also examines connections of learning and tutoring with issues of equity, diversity, and culture within and across these settings. Students in this course will engage in frequent role-playing activities to apply what they learn about effective tutoring.

05:300:314 ***Presentation of Self in Professional Settings (3)***
Focuses on the theoretical foundations and the practical development of each student's personal presentation. Covers both theory and practice so that, by the end of the course, each student will be ready for graduate school, to be interviewed for a job, to interact with others in a new work situation, or to speak in front of a group.

05:300:315 ***Interactive Training for Workplace and Community Settings (3)***
Focuses on how to use adult learning theory and interactive face-to-face and web-based strategies to design and implement training in a variety of settings including workplaces, community-based organizations, and schools.

05:300:317 ***The Teacher in Film: Analyzing What Hollywood Has Been Telling Us about Teaching (3)***
Focuses on films in which a teacher is the central character. Students will study these films as a cinematic art form, as positive inspirational role models for students considering a teaching career, and as unrealistic examples that shape the public's view concerning teaching.

05:300:318 ***The Teacher as Performer: The Presentation of Self (3)***
Focuses on the techniques and skills used in the theater by actors, directors, dancers, playwrights, and designers, all modified and transformed by each student to create a personal approach for dealing with various educational interactive settings. The course will be broken into three segments. The first will be primarily a skill-based segment during which the student participates in technical and improvisational work. The second section will focus on lecture and discussion of key theoretical ideas. The third will focus on each student's personal presentation of self within an educational setting.

05:300:319 ***Community-Based Learning in Urban Environments (3)***
This course is designed to assist students in learning from local urban community centers, as well as from the families and individuals who use these services, and about how multiple organizations serve an educative function. Through readings and practical hands-on, community-based experiences, students will come to understand both the broad educative needs as well as the enormous resources that exist within the communities and families of urban and other diverse settings. At the same time, students will gain practical skills for working with and learning from families and individuals in community-based settings.

05:300:320 ***Introduction to Gifted Education (3)***
This introductory course in gifted education focuses on the cognitive and psychosocial development of gifted individuals over a lifetime. Emphasis will be placed on exploring the characteristics of giftedness and the influences that support or hinder the development of potential talent. The relationship between creativity, intelligence, and giftedness will be explored, along with implications for educational settings.

05:300:322 ***The Social and Emotional Needs of Gifted Learners (3)***
This course is designed to provide a strong background for students related to working with gifted children to promote positive affective development. It will feature core affective characteristics and needs, and demonstrate the connections to students' cognitive make-up. Emphasis will be on affective approaches to use in the classroom as well as more formalized programs and services in guidance and counseling deemed essential for their talent development. Course readings, discussions, and assignments focus on special issues and concerns for addressing the social and emotional needs of this population of learners including asynchronous development, perfectionism, risk avoidance, fear of failure, and over-excitabilities. Special emphasis will be placed on special populations of gifted learners--twice exceptional learners, students from poverty and minority groups, and underachievers.
Prerequisite: 05:300:320.

05:300:324 ***Community-Based Learning: Theory and Practice***
Children and teens learn a great deal from community-based programs that take place outside of school. These programs contribute to the development of the whole child and are an important part of a healthy, balanced life. This course helps students learn about development from early childhood through adolescence in order to understand how to meet the needs of youth in out-of-school learning environments. It examines ways to develop youth¿s potential by developing positive relationships with youngsters within community-based programs. Students will better understand issues of equity, diversity, and culture as they pertain to community-based learning.

05:300:326 ***Introduction to Teaching with Digital Tools***
This online course available to all graduate students at GSE was developed based on the philosophy that knowledge is socially constructed and that students and teachers learn best when learning by doing. Students will have various opportunities to engage in both individual and collaborative, project-based activities that emphasize learning through inquiry. They will explore theories of learning and how they inform the effective uses of technology in K-12 environments. Additionally, students will investigate what the latest research has to say about the integration of technology in K-12 classrooms, with emphasis being placed on the types of 21st-century skills that are required to be successful in today's digital age society. By engaging students in a variety of project-based activities throughout the semester, this course will introduce them to the various ways that new technologies are challenging traditional ways of communicating and learning. Students will be introduced to various online communication and collaboration tools while exploring how these new technologies are changing the teaching landscape. The course will also introduce students to the potential challenges and benefits that arise from these changes.

05:300:328 ***Developing the Digital eLearning Environment***
Provides an in-depth overview of both theory and practice related to online distance education. The principles identified and the issues studied in the course are applicable across a variety of settings, including but not limited to: K-12 classrooms, universities, community colleges, business/industry, and health care. Also examines the theoretical framework, historical development, pedagogical issues, and practical applications of both online and hybrid eLearning education. Prerequisite: 05:300:326 or by instructor approval.
Prerequisite: 05:300:326 or by instructor approval.

05:300:335 ***Informal Science Education (3)***
This course focuses on the teaching and learning of science in out-of-school contexts. These contexts are widely referred to as "informal learning" contexts and include: zoos, aquariums, science centers, natural history museums, docent-led walks/tours, after-school programs, and eco/enviro tours. As part of this course, we will read and discuss

literature on informal science education (ISE). Learning theory in this area draws heavily from sociocultural perspectives on knowing and learning, and we will discuss its influence, along with cognitive and educational psychology, on the teaching and learning of science in out-of-school contexts.

05:300:336 *Climate Change: Course for Educators (3)*
Explores the science of climate change. Students will learn how the climate system works; what factors cause climate to change across different time scales and how those factors interact; how climate has changed in the past; how scientists use models, observations, and theory to make predictions about future climate; and the possible consequences of climate change for our planet. The course explores evidence for changes in ocean temperature, sea level, and acidity due to global warming. Students will learn how climate change today is different from past climate cycles and how satellites and other technologies are revealing the global signals of a changing climate. Finally, the course looks at the connection between human activity and the current warming trend and considers some of the potential social, economic, and environmental consequences of climate change. It is intended for educators and those who are interested in learning and teaching in this area.

05:300:337 *Space, Time, and Motion: Course for Educators (3)*
Throughout history, humans have grappled with questions about the origin, workings, and behavior of the universe. This seminar begins with a quick tour of discovery and exploration in physics, from the ancient Greek philosophers on to Galileo Galilei, Isaac Newton, and Albert Einstein. Einstein's work then serves as the departure point for a detailed look at the properties of motion, time, space, matter, and energy. It is intended for educators and those who are interested in learning and teaching in this area.
Prerequisite: Students should have taken an introductory physics course.

05:300:338 *The Solar System: Course for Educators (3)*
This course provides an overview of what we know about the solar system: how it began and evolved, its components and their properties, and how these elements interact as a system. However, much of our knowledge remains incomplete, and so unanswered questions and mysteries figure prominently in the story. This course addresses our scientific understanding of the solar system, how we know what we know, and many hotly debated questions at the cutting-edge of scientific research. It is intended for educators and those who are interested in learning and teaching in this area.

05:300:339 *Earth Systems: Course for Educators (3)*
Though the geologic record is incredibly ancient, it has only been studied intensely since the end of the 19th century. Since then, research in fields such as plate tectonics and climate change, and exploration of the deep sea floor and the inner Earth have vastly increased our understanding of geological processes. This course delves into the five questions listed below in order to understand how our dynamic planet evolved and what processes continue to shape it. In the process, learners will get to know the Museum of Natural History's Hall of Planet Earth, explore geologic time, and gain an understanding of how scientists study vast Earth systems. It is intended for educators and those who are interested in learning and teaching in this area. 1. How do geologists "read" the rocks? 2. How has the Earth evolved? 3. What causes climate and climate change? 4. Why are there ocean basins, mountains, and continents? 5. Why is the Earth habitable?

05:300:341 *High School Math Content: Teaching and Assessment (3)*
In-depth study and concentration of some key ideas in the high school mathematics curriculum. Viewing of mathematics in terms of the ideas built up in the minds of students.
Prerequisites: 01:198:111 or equivalent; 01:640:250,251.

05:300:342 ***Supervised Undergraduate Tutoring in Mathematics (3)***
Develop teaching strategies, an interactive style, and an approach to high school mathematics content in a one-on-one tutorial or small group setting. Students work with other undergraduates in lower-level, E-credit mathematics courses.
Prerequisites: 01:640:250,251.

05:300:350 ***Education and Computers (3)***
Establishes a foundation for using the computer and technology in a variety of educational settings across all subject areas. The course is hands-on in nature, with a focus on current trends. Additionally, learners can expect to discuss theory, practice, and social/philosophical issues related to the use of computers in education. Some familiarity with computers is recommended; no prior computer skills are required.

05:300:361 ***Science: Knowledge and Literacy (3)***
Examines the emerging role of science education in society. Special attention given to the influence of professional societies. Places current trends in science education in a historical perspective that reflects the development of science in the United States.
Prerequisite: Science course at the 200 level or above.

05:300:363 ***Public School Policy and Reform (3)***
This course is designed as an elective for upper-level undergraduate students interested in understanding policy and reform efforts related to elementary and secondary education in the United States. The course is built around readings of very recent books on education policy topics, ranging from racial residential segregation and the government policies that codified and reinforced that segregation, to modern education policies that further exacerbate racial inequality, the financing and economics of elementary and secondary education, issues with the measurement of the quality of our education systems, and the politics of teaching and the teacher workforce over time.

05:300:364 ***History of American Education (3)***
A historical survey of American education from the colonial period to the present. Topics considered will include the following: 1) colonial American education, 2) the origins of common schools, 3) the development of a public school system, 4) 20th- and 21st-century educational reform.

05:300:365 ***Contemporary Issues in Education (3)***
A critical examination of contemporary issues in educational theory, policy, and practice.

05:300:371 ***Foundations of the Resident Assistant Experience I (1.5)***
This course has been designed to assist in the development of a more comprehensive understanding of the theoretical and practical knowledge needed for the Resident Assistant (RA) position at Rutgers University. The learning experience will provide an understanding of student and community development, leadership, communication, and diversity theories. Through exposure to theories, experiential learning situations, and the use of critical thinking and reflective analysis, participants will develop the background and knowledge that will allow them to conceptually understand their new leadership role.

05:300:372 ***Foundations of the Resident Assistant Experience II (1.5)***
The course has been designed to assist in the development of a more comprehensive understanding of the theoretical and practical knowledge needed for the Resident Assistant (RA) position at Rutgers University. The learning experience will provide an understanding of the theories and their practical implementation processes for

peer counseling/advising; behavioral and mental health issues; conflict mediation; ethical and moral development; and group development. Through exposure to theories, experiential learning situations, and the use of critical thinking, and using their current experiences in the RA position, participants will develop the knowledge to create a richer, more comprehensive experience in the RA position and subsequently enhance the experience for the RA's students.

05:300:383 ***Introduction to Special Education (3)***
Overview of the diverse physical, psychological, and social disabilities of special education children.

05:300:385 ***Teaching English Language Learners (3)***
This introductory course provides preservice teachers and current practitioners with an understanding of how to teach English language learners or emerging bilinguals. Undergraduate students will be provided with the foundations of teaching English language learners and will be guided in constructing successful knowledge, skills, and dispositions for teaching students who are learning English.

05:300:386 ***Language Learning and Community Engagement in Argentina (3)***
Provides students with an understanding of modern Argentinian culture and society in all its complexity, from national heritage to contemporary social problems, and the role language and education play in this society. This course entails service-learning, and as such students will participate in teaching activities in La Paz elementary and/or secondary school as scheduled in the syllabus. A critical component to this course is that students will also acquire and improve Spanish linguistic and communicative skills through experiential learning opportunities in the Rosario community. Students will be immersed in Spanish-speaking contexts through a combination of community engagement and coursework. Family stays are also a vital component of the course, which provide students with a personal perspective and knowledge of Spanish, Rosarino family lifestyles, and Argentine culture.

05:300:401 ***Individual and Cultural Diversity in the Classroom (3)***
Focuses on the range of student diversity in contemporary classrooms, including cultural, linguistic, and academic differences. Emphasizes strategies to enhance academic success, promote interaction, and facilitate the inclusion of diverse students in the regular school setting.
Prerequisite: 05:300:200.

05:300:402 ***Special Topics in Education (3)***
Seminar on selected topics of current interest. Topics differ each semester. Consult instructor for description of topic under study.

05:300:403 ***Independent Study in Education (BA)***
Independent project in education to be carried out in consultation with appropriate faculty. Arrangements for a project supervisor must be made prior to registering for this course.

05:300:406 ***Community-Based Language Learning (3)***
The Community-Based English Language Learning course is required for students who are new participants in the Conversation Tree: Community-Based Language Partnerships (formerly the SALSA Program). The course provides a curriculum-based service-learning experience built upon a community-identified need for English language instruction and aligns with the university's mission of contributing to the cultural and social well-being of the community. Course topics include demographic trends in the United States and New Jersey; an introduction to second-language learning theory and practice; and the meanings of civic engagement, community, and citizenship

in a multicultural society. The course provides opportunities to work with adult English language learners at a community center and to discuss these experiences, connecting practice to scholarly research.
Prerequisite: Students must be admitted via an application process.

05:300:407 ***Community-Based Language Learning Leadership (1-3)***
The Community-Based English Language Learning Leadership course is required for returning Conversation Tree students who desire to take on a leadership role in the Conversation Café. The course provides a curriculum-based service-learning experience built upon a community-identified need for English language instruction and aligns with the university's mission of contributing to the cultural and social well-being of the community. Course topics focus on facilitation, session planning, leadership, communication, and troubleshooting for the Conversation Cafés. The course provides opportunities to act in a leadership capacity with adult English language learners at a community center hosting a Conversation Café and to discuss these experiences, connecting practice to scholarly research.
Prerequisite: For returning Conversation Tree students only; students must have taken CBELE as a prerequisite.

05:300:408 ***Community-Based Language Learning Internship (3)***
The Community-Based Language Learning Internship is for language education students or students returning to the Conversation Tree: Community-Based Language Partnerships (formerly the SALSA program). The course provides a curriculum-based service-learning experience built upon a community-identified need for English language instruction and aligns with the university's mission of contributing to the cultural and social well-being of the community. In this internship, students continue to serve as an English conversation partner at community partner sites alongside students enrolled in the Community-Based Language Learning (CBLL) and CBLL Leadership courses. Students will continue to develop knowledge and skills to foster the language development of adult English language learners, as well as skills related to working together as a team (collaboration, communication, flexibility, etc.).
Prerequisite: Students must have taken CBLL (05:300:406 or 04:300:403) or Principles of Second and Foreign Language Acquisition (05:300:430 or 15:253:520:80).

05:300:409 ***Children's Literature in the Early Childhood and Elementary School (3)***
Children's literature is studied based on genre and includes author and illustrator studies. Literature is connected to content area teaching and extended literary experiences to enhance literacy development.

05:300:410 ***Learning and Development in a Social Context: Preschool and Primary Years (3)***
This is an advanced course in child development for prospective teachers with a focus on learning and development during the preschool, kindergarten, and primary years. Children's social and emotional development as well as emerging skills in language, representation, and problem solving are examined from a cognitive developmental-ecological framework. Students will integrate theory and research with observations of children in classroom and community contexts.
Prerequisite: Admission to the teacher education program.

05:300:412 ***Learning and Teaching in the Early Childhood Classroom (3)***
Addresses teaching strategies and curricula appropriate for the young child aged 3 to 8. Emphasizes the role of play in learning and development and instructional strategies to foster cognitive, social, and emotional development. Curriculum planning around integrated, thematically related experiences explored.
Prerequisite: Admission to the teacher education program.

05:300:413 ***Practicum in Early Childhood/Elementary Education I (1.5)***
Fieldwork in a local elementary school to observe and participate as a teaching assistant; one full day per week for nine weeks in a prekindergarten, kindergarten, or first- through third-grade classroom.
Prerequisite: Admission to the teacher education program. Can be taken before or after 05:300:414. Coordinated with 05:300:412 and 494.

05:300:414 ***Practicum in Early Childhood/Elementary Education II (1.5)***
Fieldwork in a local elementary school to observe and participate as a teaching assistant; one full day per week for nine weeks in a fourth- through eighth-grade classroom.
Prerequisite: Admission to the teacher education program. Can be taken before or after 05:300:413. Coordinated with 05:300:441, 461, 471, and 495.

05:300:420 ***Inquiry-Based Teaching, Learning, and Assessment (3)***
Students learn how teachers use students' experiences, interests, and ways of learning to plan responsive curricula. Through structured experiences, students learn that an inquiry approach to teaching and learning can teach specific content while helping children to learn how to learn in more formal contexts. Students learn how to integrate subject matter in a student-centered environment and practice methods of inquiry and sources of knowledge that can be used with elementary and middle school students.
Prerequisite: Admission to special education and elementary education initial teacher licensure programs.

05:300:421 ***Language and Linguistics I (3)***
Examines sociocultural theories of language and considers the critique they offer of traditional school grammar. Explores the educational and political implications of teaching traditional school grammar in the light of these critiques.
Prerequisite: Senior status.

05:300:422 ***Teaching Literature: Readers, Texts, and Contexts (3)***
Examines a variety of theories about what literary reading is and why it should be taught. Develop strategies for introducing, sequencing, and discussing literary texts as well as for integrating the study of literature into the other language arts. Field experience required.
Prerequisite: Senior status.

05:300:423 ***Teaching Writing: Social and Cognitive Dimensions (3)***
Examines a variety of perspectives on the nature of the writing process. Considers research and theory on how teachers should teach and respond to writing. Field experience required.
Prerequisite: 05:300:421.

05:300:424 ***Adolescent Literature (3)***
Allows teacher candidates the opportunity to engage with a range of adolescent and young adult literature for middle and high school students. The course structure allows for a view of adolescents as multiliterate beings with rich and diverse cultural worlds and identities, and an exploration of how literature can be used to engage adolescents in meaningful learning. The course is intended to provide a space for you to think and talk about how your own personal connections with literature texts inform your evolving personal theory of and professional approach to literacy instruction.

05:300:430 ***Principles of Second/Foreign Language Acquisition (3)***
Introductory course that examines the research and theory on first and second language acquisition related to children, teens, and adults in the United States and abroad.
Prerequisites: 05:300:200; admission to the teacher education program.

05:300:431 ***Introduction to World Language/Elementary Methods (3)***
Provides an introduction to the field of world language teaching and its methodology.
Prerequisite: Admission to the language education program.

05:300:432 ***World Language Secondary Methods (3)***
Prepares world language teachers with pedagogical methods and techniques for secondary school language instruction.
Prerequisite: Admission to the language education program.

05:300:433 ***Language and Culture (3)***
Relationship of linguistic, cognitive, attitudinal, and behavioral patterns within each culture and how they affect cross-cultural communication and language education.
Prerequisites: 05:300:200; admission to the teacher education program.

05:300:434 ***Language Foundations I (3)***
Nature of language relevant to teachers involved with other languages and cultures. Topics include functional motivation of linguistic structure, linguistic sign, phonetics, phonemic and morphemic analysis, world semantics, and correctness.
Prerequisites: 05:300:200; admission to the teacher education program.

05:300:438 ***Methods for Teaching and Assessing World Language Learners (3)***
Provides an introduction to methods of teaching and assessing world language learners. Through course readings, seminar discussions, clinical experiences, and in-class presentations, students will develop expertise in two main areas: 1) methods for teaching students of world languages; and 2) research-based best practices and policies for working in a variety of programs. The class includes a clinical experience that includes observations in a school in New Jersey.
Prerequisite: Admission to language education programs.

05:300:439 ***Methods for Teaching and Assessing English Language Learners (3)***
Provides an introduction to methods of teaching and assessing English language learners. Through course readings, seminar discussions, clinical experiences, and in-class presentations, students will develop expertise in two main areas: 1) methods for teaching emergent bilinguals; and 2) research-based best practices and policies for working in a variety of programs. The class includes a clinical experience that includes observations in a school in New Jersey.
Prerequisite: Admission to language education initial licensure program.

05:300:441 ***Teaching Mathematics in the Elementary School (3)***
Concrete, manipulative approach to teaching mathematics concepts. Psychology of learning mathematics; the elementary curriculum; effective teaching techniques.
Prerequisites: 05:300:200; admission to the teacher education program.

05:300:442 ***Problem-Solving Processes in Mathematics (3)***
Focuses on understanding one's own mathematical problem-solving processes and how such processes develop in mathematics learners of all ages.
Prerequisite: Admission to the teacher education program.

05:300:443 ***Methods of Teaching Secondary School Mathematics (3)***
Reviews the status of secondary mathematics teaching in the United States, the reform movement of the 1990s, and current thinking about issues of concern to practicing teachers. Encourages development of personal style and approach to teaching high school mathematics. Topics include instructional planning, assessment, individual differences, cultural and gender differences, and teaching styles.
Prerequisite: Admission to the teacher education program.

05:300:444 ***Practicum in Teaching Secondary School Mathematics (3)***
Gives prospective secondary mathematics teachers an opportunity to observe experienced teachers, serve as an aide, work with individuals and small groups, and teach several class sessions in a high school setting.
Prerequisite: Admission to the teacher education program. Corequisite: 05:300:443. Students spend two complete mornings in the school each week.

05:300:450 ***Urban Education I (1.5)***
Deepens students' understandings of the strengths and complexities of urban schools and communities, with the ultimate goal of developing the knowledge, skills, and dispositions essential to socially just teaching in urban and diverse settings. Through school- and community-based inquiry and critical reading students will become more knowledgeable about the contexts of students and the issues facing urban schools and communities.
Prerequisite: Admission to the teacher education program.

05:300:451 ***Urban Education II (1.5)***
Deepens students' understandings of the strengths and complexities of urban schools and communities, with the ultimate goal of developing the knowledge, skills, and dispositions essential to socially just teaching in urban and diverse settings. Students will use their clinical placements to practice and reflect on the skills, knowledge, and dispositions that are necessary for successful teaching for social justice in urban settings.
Prerequisite: Admission to the teacher education program.

05:300:452 ***Teaching Emerging Bilinguals in PK-12 Classrooms I (1.5)***
In this first module, our objective is to foster a set of dispositions toward emerging bilinguals, language, and power, and the social-political context of learning English in U.S. public schools. The goal is to introduce students to key terms and best practices that will be followed up on in content-specific settings in module II. By learning about emerging bilinguals, their experiences, and communities, students will consider their own positioning within and responsibility to language learners in their school communities.
Prerequisite: Admission to the teacher education program.

05:300:453 ***Teaching Emerging Bilinguals in PK-12 Classrooms II (1.5)***
In this second module, our objective is to continue to sensitize students to the linguistic and cognitive demands of academic English within their disciplines. By learning about emerging bilinguals, their experiences, and communities, students will be able to take a critical stance toward the discourse within their disciplines regarding stereotypes, the achievement gap, and language deficits. They will continue to develop a funds-of-knowledge toolkit to disrupt mainstream views of emerging bilinguals. Students will learn instructional strategies for affording

emerging bilinguals equitable access to the teaching and learning interactions and the unique social life of the classrooms they are working within.
Prerequisite: Admission to the teacher education program.

05:300:461 ***Science in the Elementary School (3)***
Presents science as an integrated body of knowledge using investigative and inquiry techniques. Thematic or problem-based approach to science teaching.
Prerequisites: Completion of student's liberal arts school science requirement and admission to the teacher education program.

05:300:462 ***Demonstrations and Technology in Science Teaching (3)***
Creating science teaching support materials using resources available over the internet. For use in creating laboratory, demonstration, and related activities that would complement classroom practice. Involvement in the broad internet community of interest in science and science teaching.
Prerequisite: Admission to the teacher education program.

05:300:463 ***Comparative Education (3)***
This course will investigate a wide variety of social, cultural, economic, and political issues in schooling in an international context. Included will be a study of implications of education for pressing contemporary social issues in Africa, western and eastern Europe, Oceania, the Americas, and the Near and Far East. The goal will be to develop a critical understanding of the impact of globalization on education, as well as an understanding of the dominant and alternative paradigms of education and development, and how these translate into educational policy and practice in communities, schools, and classrooms across the globe.

05:300:464 ***Race and Ethnicity in American Schools (3)***
This course focuses on race and ethnicity in American schools. Beginning with a historical exploration of the social construction of race/ethnicity in the United States, the course aims to help students think about the meaning of race/ethnicity and its significance in U.S. society. Drawing on multiple disciplinary frameworks, the course examines schools as sites where racial/ethnic inequality is both produced and resisted.

05:300:465 ***Sexuality, Gender, and the Politics of U.S. Public Schooling (3)***
As Americans became increasingly aware of differing sexualities and multiple genders, the public school site has become a venue for great battles over which understandings will be transmitted--and which will not. From early concerns over public schools creating "sissified boys" to the contemporary debates over sexuality education, teen pregnancy, and gay-straight alliances, the public school site has been an arena of much public concern and anxiety around issues of sexuality and gender.

05:300:466 ***Urban Schools: Policy and Practice (3)***
This is an introduction to urban education. The course is designed to deepen your understanding of the complexity and challenge of providing quality education in urban schools. It also aims to inspire you with examples of innovative and successful education programs in urban settings. We will examine urban education from a variety of disciplines and perspectives. You will conduct research of urban communities and schools. The class is centered around the following key questions: How do urban contexts shape urban schools? What is the role of schooling both in producing and reducing economic inequality? How do youth develop as learners in urban settings? What practices push this development in a positive direction?

05:300:467 ***Global Education: 21st-Century Trends and Issues (3)***
This course introduces students to critical global themes and issues shaping the design, delivery, and impact of educational policies and practices in the United States, as well as internationally. Students will analyze how rapidly evolving networks of global communication, patterns of world migration, trade and environmental change, efforts to manage regional and global conflicts, and movements to expand social justice and realize guarantees of human rights are changing both the content and processes used in diverse educational settings, including schools, workplaces, and other institutions. Competing (and often conflicting) conceptions of global citizenship will also be examined, along with their implications for what it means to be an educated person during the 21st century.

05:300:468 ***Migration, Globalization, and U.S. Education (3)***
Globalization and mass migration are reconfiguring the modern world and reshaping the contours of nation-states. This course focuses on the experiences of the youngest members of these global migration patterns--children and youth--and asks: What do these global flows mean for educating young people to be members of the multiple communities to which they belong? What is globalization and why is it leading to new patterns of migration? How do children and youth experience ruptures and continuities across contexts of migration? How do language policies affect young people's capacity to be educated in a new land? What does it mean to forge a sense of belonging and citizenship in a "glocalized" world, and how does this challenge our models of national citizenship? How are the processes by which young people are incorporated into their new country entwined with structures of race, class, and gender? Drawing on fiction, autobiography, and anthropological and sociological research, this class will explore these questions from a variety of disciplinary perspectives.

05:300:469 ***Queer Issues in School (3)***
Introduces students to queer issues as they arise in and around U.S. public schools. Draws on multiple disciplines (e.g., history, sociology, law) to examine the intersections of queer issues and queer theory, the experiences of queer students and queer educators historically and at the present, educational laws and policies, curricula and pedagogies, intersectionality and queer diversities, and queer activism. Using course readings, class discussions and activities, and written reflections, students will learn to apply queer theory to begin uncovering queer erasure, homophobia, and heterosexism in schooling contexts. In addition, students will collaborate toward designing more socially just formations of U.S. public schooling vis-a-vis queer issues.

05:300:470 ***Human Rights and Education (3)***
Explores critical relationships between education in the United States and the core concepts, policies, and practices of international human rights. Course topics include: the historic development of international human rights law and policies, the rights of children, historic and contemporary conflicts in the United States dealing with the right to public education, and the theory and practices related to building a human rights culture in school settings. Course readings, activities, and assessments are designed for application to any school setting and are not focused on a single subject field or certification program. Online conferences with experts in the field of human rights education will be implemented during the semester for course participants.

05:300:471 ***Teaching Social Studies in Elementary School (3)***
Examines strategies and materials for teaching social studies in the elementary school. Focuses on a cluster of teaching models to engage children in the active pursuit of knowledge, skills, and values.
Prerequisite: Admission to the teacher education program.

05:300:472 ***Materials and Methods in Social Studies (3)***
Study of instructional practices, curricular trends, and teaching materials used in social studies.
Prerequisites: 05:300:200. Open only to students who have been formally admitted to the social studies teaching program.

05:300:474 ***Integrated Curriculum with Young Children***
Students will learn how early childhood teachers use children's experiences, interests, and ways of learning (e.g., play) to plan responsive curricula that also teaches specific content and helps children to learn how to learn in more formal contexts. To understand how teachers of young children integrate subject matter in a student-centered environment, this class will focus on methods of inquiry and sources of knowledge that can be used with young children.

05:300:480 ***Literacy for Students with Disabilities (3)***
This course focuses on instructional practices in special education. It explores special education approaches to teaching literacy to students with disabilities and/or at-risk learners. Procedures covered are applicable to inclusive, as well as more restrictive settings, and address the needs of students from a broad array of cultural, linguistic, and economic backgrounds. This course is taken in conjunction with a field placement, where students apply specific procedures and strategies from class.
Open only to special education students.

05:300:481 ***Materials and Methods in Special Education (3)***
This course focuses on instructional practices in special education. Students will learn to plan instruction for students with disabilities. They will learn a variety of research-based instructional strategies for diverse learners. Students will learn to develop lesson plans for a variety of instructional settings and in collaboration with other professionals. Research-based practices will be used to plan instruction, implement instruction, and evaluate instructional effectiveness. This course is taken in conjunction with a field placement, where students apply specific procedures and strategies from class.
Prerequisites: 05:300:200 and 383.

05:300:488 ***Dance Clinical Practice Phase 2A (2)***
This clinical practice requires a minimum of 181 hours of classroom practice (two full days per week) in an assigned GSE clinical partnership school under the supervision of a fully credentialed cooperating teacher in the candidate's area of anticipated licensure.
Prerequisites: Admission to the teacher education program and successful completion of Clinical Experience Phase 1.

05:300:489 ***Dance Clinical Practice Phase 2B (2)***
This clinical practice requires a minimum of 181 hours of classroom practice (two full days per week) in an assigned GSE clinical partnership school under the supervision of a fully credentialed cooperating teacher in the candidate's area of anticipated licensure.
Prerequisites: Admission to the teacher education program and successful completion of Dance Clinical Experience Phase 2A.

05:300:494 ***Literacy Development in the Early Years (3)***
Focus on literacy skills for children from birth through third grade. Emphasis on emergent literacy strategies, language and vocabulary development, word study, comprehension, writing, and parent involvement. Children's literature is explored.
Prerequisites: 05:300:200; admission to the teacher education program.

05:300:495 ***Literacy Development in the Elementary and Middle School (3)***
Focus on literacy skills for grades 3 through 8. Emphasis on higher-order comprehension skills, vocabulary development, content area reading, writing, and struggling readers. Upper-elementary and adolescent literature is explored.
Prerequisites: 05:300:200; admission to the teacher education program.

05:300:498 ***Clinical Experience Phase 1 (.5)***
This clinical internship requires 50-60 hours of structured observation and guided participation in a GSE partnership school. Activities include: working with individual and small groups of students; participating in school and community activities geared toward youth development; analyzing and understanding the context of urban schools; observing and analyzing the experiences of students in urban schools including emerging bilinguals and students with special needs.
Prerequisite: Admission into initial licensure program.

05:300:499 ***Clinical Practice Phase 2 (4)***
This clinical practice requires a minimum of 181 hours of classroom practice (two full days per week) in an assigned GSE clinical partnership school under the supervision of a fully credentialed cooperating teacher in the candidate's area of anticipated licensure.
Prerequisites: Admission to the teacher education program and successful completion of Clinical Experience Phase 1.

Chair: Brad Evans

Undergraduate Director: Sean Silver

Director of Writing Program: Abigail Zitin

Distinguished Professors:

Lynn Festa, B.A., Yale; M.A., Ph.D., Pennsylvania

Lauren Goodlad, B.A., Cornell; M.A., New York; Ph.D., Columbia

Leah Price, A.B., Harvard; Ph.D., Yale

Jonah Siegel, B.A., Middlebury College; Ph.D., Columbia

Evie Shockley, B.A., Northwestern; J.D., Michigan; M.A., Ph.D., Duke

Carolyn Williams, B.A., Wellesley College; M.A., Ph.D., Virginia

Nancy Yousef, A.B., Harvard; Ph.D., Columbia

Professors:

Emily C. Bartels, B.A., Yale; A.M., Ph.D., Harvard

Ann Baynes Coiro, B.A., George Washington; M.A., Ph.D., Maryland

Brad Evans, B.A., Cincinnati; M.A., Ph.D., Chicago

Thomas Fulton, B.A., Wisconsin; Ph.D., Yale

Allan Punzalan Isaac, B.A., Williams College; Ph.D., New York

Colin Jager, B.A., Calvin College; Ph.D., Michigan

David Kurnick, A.B., Harvard; Ph.D., Columbia

Dana Luciano, A.B. Brown; M.A., Ph.D., Cornell

Meredith McGill, B.A., Williams College; M.A., Ph.D., Johns Hopkins

Richard E. Miller, B.A., St. John's; M.A., Massachusetts (Boston); Ph.D., Pittsburgh

Kurt Spellmeyer, B.A., Virginia; Ph.D., Washington

Michelle Stephens, B.A., SUNY (Stony Brook); M.Phil., Ph.D., Yale

Henry Turner, B.A., Wesleyan; M.A., Sussex (UK); Ph.D., Columbia

Maurice Wallace, A.B., Washington; Ph.D., Duke

Associate Professors:

Matthew Buckley, A.B., Princeton; M.A., M.Phil., Ph.D., Columbia

Sandy Flitterman-Lewis, B.A., M.A., Ph.D., California (Berkeley)

Martin Gliserman, B.A., Colby College; M.A., Ph.D., Indiana

Andrew Goldstone, A.B., Harvard; Ph.D., Yale

Christopher Iannini, B.A., Colby College; M.A., Johns Hopkins; Ph.D., CUNY

Olabode Ibironke, B.A., M.A., Obafemi Awolowo (Nigeria); M.A., Ph.D., Michigan State

Greg Jackson, B.A., B.S., Oregon State; Ph.D., California (Los Angeles)

Ann Jurecic, A.B., Bryn Mawr College; M.A.T., Brown; Ph.D., Princeton

Ryan James Kernan, B.A., Princeton; Ph.D., California (Los Angeles)

Stacy S. Klein, B.A., Dartmouth; M.A., Sussex (UK); Ph.D., Ohio State

Jeffrey Lawrence, B.A., Amherst; Ph.D., Princeton

Ronald Levao, B.A., Rutgers; M.A., Ph.D., California (Berkeley)

Mukti Mangharam, B.A., York (UK); M.Phil., Cambridge; Ph.D., Cornell

Carter Mathes, B.A., Virginia; Ph.D., California (Berkeley)

Ricardo Montez, PhD. NYU

Sarah Elliott Novacich, B.A., Brandeis; M.Phil., Ph.D., Yale

Imani Owens, B.A., Rutgers; M.A., M.Phil., Ph.D., Columbia

Stéphane Robolin, B.A., Tulane; M.A., Ph.D., Duke

Larry Scanlon, B.A., Brandeis; M.A., Ph.D., Johns Hopkins

English (SAS)

Student Responsibility to Keep Informed

Student Responsibility to Keep Informed

Before registering for the semester, students should consult the English department website. Students can also consult with advisers in the undergraduate office (Murray Hall, Room 102, 104, or 106, College Avenue campus). All English department information can be found online here.

English (SAS)

Learning Goals

Learning Goals

Students who major in English will demonstrate

1) knowledge of literatures in English: their historical, cultural, and formal dimensions and diversity;

2) strategies of textual interpretation, including an ability to use critical and theoretical terms, concepts, and methods;

3) the ability to write persuasively and precisely, in scholarly or creative forms; and

4) the ability to engage with the work of other critics and writers, using and citing such sources effectively.

English (SAS)

Major Requirements

Major Requirements

The major consists of a minimum of 36 credits in English above the 100 level, including at least 18 credits at or above the 300 level. All majors must fulfill the following requirements:

1. Principles of Literary Study, 01:359:201, which should be taken early in the major.

2. Four courses in different historical periods, taken at the 300 or 400 level: one each in four of the following five categories:

a. Medieval

b. Renaissance

c. Restoration/18th century

d. Nineteenth century

e. Twentieth century and contemporary

3. One course in African-American Literature, taken at the 300 or 400 level.

4. One course in Literature's of the Global South

5. One course in literary theory

6. One 400-level seminar

A course taken to fulfill a period requirement may also be used to fulfill the African-American, Ethnic American, or Global Anglophone literature or the seminar requirement, if it is so designated on the departmental webpage. Likewise, a seminar may be used to meet the literary theory or African-American, Ethnic American, or Global Anglophone literature requirement, if it is so designated. However, no course may be used to fulfill more than two requirements.

Courses that may count as credits toward the major and minor are listed under the subject codes 351 (English: Creative Writing), 354 (English: Film Studies), 355 (Writing Program only at the 300 level), 358 (English: Literature), and 359 (English: Theories and Methods).

A maximum of four English courses taken outside the Department of English at Rutgers University-New Brunswick may be applied toward the major. Students who participate in Study Abroad may apply a total of six courses from outside toward the major. Transfer students who wish to apply transfer courses toward the major must first obtain approval from the undergraduate director. Enrolled English majors who wish to take English courses outside Rutgers-New Brunswick must have prior approval from the undergraduate director. Students are urged to consult the English department for further information.

Grades of C or better must be earned in all courses used to fulfill the requirements of the major.

English (SAS)

Minor Requirements

Minor Requirements

The minor consists of 18 credits in English above the 100 level, including at least 12 credits at or above the 300 level. All minors are required to take at least one 300- or 400-level course designated as medieval, Renaissance, or Restoration/18th century (period a, b, or c, as indicated on the major requirements page). A maximum of 6 credits total in creative writing and in film may be counted toward the minor. A maximum of one 01:355:300-level Writing Program course may be counted toward the minor. Grades of C or better must be earned in all courses used to fulfill the requirement of the minor.

English (SAS)

Minor in Creative Writing

Minor in Creative Writing

The minor in creative writing gives students a rigorous background in the fundamentals of creative work by providing them with the opportunity to study with established poets, prose writers, and dramatists. At the same time, the minor also ensures that students pursue creative work within the larger context of academic study. The curriculum (21 credits) begins with a foundational course in creative writing, followed by a series of electives in a variety of genres and media, culminating in an advanced workshop. Concurrently with their course work in creative writing, students are also required to elect a total of two courses from the English department's offerings in literature (358), theory and methods (359), or film (354), thus further coordinating their creative pursuits with critical study.

Creative Writing Minor Program Learning Goals

Students who minor in creative writing will demonstrate

1) knowledge of the traditions and conventions of literary expression in a variety of genres and media;

2) the ability to engage deeply with the process of composition, and with the work of other writers and critics; and

3) the ability to write persuasively and precisely in creative and scholarly forms.

If English majors would like to minor in creative writing, NO creative writing minor courses can count toward the English major. There can, however, be overlap for literature classes.

In addition, if a student double-minors in creative writing and English, NO creative writing minor courses can count toward the English minor. There can, however, be overlap for literature classes.

Students also cannot complete the creative writing minor and the creative writing certificate at the same time. They must choose one or the other.

Minor Requirements

The minor consists of 21 course credits (seven courses). Grades of C or better must be earned in all courses used to fulfill the minor requirements:

One (1) required introductory course:

351:211 or 351:212 Introduction to Creative Writing

Any three (3) of the following courses:

351:209 Introduction to Multimedia Composition

351:220 Experimental Filmmaking

351:303 Screenwriting for Film

351:304 Screenwriting for Television

351:305 Creative Nonfiction

351:306 Form and Technique in Poetry

351:307 Form and Technique in Fiction

351:308 Form and Technique in Playwriting

351:309 Digital Composition (Digital Storytelling)

351:314 Documentary Filmmaking for Writers

Any one (1) of the following courses:

351:405 Advanced Workshop: Multi-Genre

351:406 Advanced Workshop: Poetry

351:407 Advanced Workshop: Fiction

Any two (2) courses in literature (358) and/or theory (359)

English (SAS)

Minor in Business and Technical Writing

Minor in Business and Technical Writing

The Writing Program offers a minor in business and technical writing to all interested undergraduates in the School of Arts and Sciences.

The primary goal of the business and technical writing minor is to enhance students' writing proficiency in order to increase their eligibility for employment in business and technical professions that require advanced writing competency. The minor provides students with writing training, research practice, computer knowledge, and an internship experience designed to give students professional writing experience. Students must complete a minimum of 18 credits for the minor and any one course cannot be used in more than one skill area. Twelve out of the 18 required credits must be completed from Writing Program (01:355) courses.

Requirements

The minor requires six courses (for a total of 18 credits) in four key skill areas. Students must achieve a grade of C or better in each of these courses in order to qualify for the minor.

1. Writing Training (6 credits) Since writing competence is at the heart of the minor, students must complete two writing courses intended to improve writing, editing, collaboration, and general communication skills. Electives may be chosen from among the following writing courses:

01:351:209 Introduction to Multimedia (3)

01:355:202 Technical Writing Essentials (3)

01:355:203 Business Writing Essentials (3)

01:355:315 Grant Writing (3)

01:355:342 Science Writing (3)

01:355:352 Writing as a Naturalist (3)

01:355:355 Writing in the Professions (3)

01:355:365 Technical Editing (3)

04:192:315 Professional Writing and Communication (3)

04:192:380 Public Speaking (3)

11:374:325 Environmental Communication

11:374:435 Advanced Communication in the Sciences

2. Research Writing (3 credits) In the information and technology economy, the ability to conduct research and use information to develop viable plans of action is essential to success and advancement. Students therefore must complete a research writing course in business or technical writing. These courses will also fulfill most students' second-level writing requirements (consult with your school's academic advising office for specific requirements in your program). Research writing courses include:

01:355:302 Scientific and Technical Writing (3)

01:355:303 Writing for Business and the Professions (3)

01:355:312 Writing for Biology (3)

01:355:315 Writing Grant Proposals (3)

01:355:322 Writing for Engineers (3)

3. Digital Image Fundamentals (6 credits) Basic computer knowledge and the ability to learn new programs quickly are essential to success in business and technical writing environments. Students in the program will be introduced to general and advanced writing software in many classes and they will be required to pass an introductory course in computer science.

a) Though several courses will expect students to learn relatively simple programs (such as Microsoft Word and PowerPoint), students are also required to take one of the following courses, which teach advanced writing software, covered in our upper-level workshop courses. These include:

01:351:312 Digital Literary Studies (3)

01:355:375 Collaborative Writing Practices (3)

01:355:402 Advanced Writing Workshop (3)

01:355:410 Composing Graphic Narratives (3)

01:355:415 Information Design (3)

01:355:425 Web Authoring (3)

11:374:240 Visualizing Information: Storytelling with Data (3)

b) Students will also need to pass one of the following introductory computer science courses:

01:198:107 Computing for Math and the Sciences (3)

01:198:110 Principles of Computer Science (3)

01:198:111 Introduction to Computer Science (4)

01:198:170 Computer Applications for Business (3)

04:189:103 Information Technology and Informatics (3)

04:547:220 Retrieving and Evaluating Electronic Information (3)

14:440:127 Introduction to Computers for Engineers (3)

4. Internship Experience (3 credits) Hands-on training in work environments offers an invaluable, practical component to the minor, providing students with useful experience while encouraging professional attitudes toward work. As part of the minor program, students must complete an independent internship in one of the following options:

01:355:395/396 Internship (3,3)

01:355:397/398 Writing Internship for Business and Technical Writing Minor (3, 3)

Please see the internships course webpage for more information.

5. In addition, a minimum of 12 out of the 18 required credits are to be selected from Writing Program (01:355) courses.

The Writing Program also offers Professional Writing and Technical Writing Certificates. Please see Certificates for more information. Please speak with your academic advising office regarding declaration of majors and minors. Students graduating with the minor may want to consider pursuing a Master of Business and Science degree in the field of User Experience Design-UDX.

There is also a BS/MS (4+!) for Rutgers undergraduate students.

English (SAS)

Departmental Honors Program 350

Departmental Honors Program 350

Departmental Honors Program

English Honors provides an opportunity for students to pursue an independent project under the guidance of Department faculty. Students choose one of two options: a critical/research thesis or a creative writing thesis. The program begins in the second half of spring semester junior year and runs through senior year.

Candidates for honors in English must have a cumulative grade point average of 3.0 or better and an average of 3.6 or better in English at the end of junior year. They will also have completed 359:201 and at least one 400-level course in either the 358 or 359 subject codes for a critical/research thesis or 351 subject codes for a creative writing thesis. (Note that students, especially transfer students, with strong records of achievement who have not fulfilled these requirements will be reviewed on a case-by-case basis.)

Interested students should register for the Junior Honors Seminar (359:496), a 1.5-credit mini course running in the second half of spring semester. Students who are studying abroad or have other obligations that take them off campus in the spring of junior year will be able to join the course remotely. Upon completion of the course, students continuing with departmental honors will have secured the approval of a faculty advisor for their thesis proposal.

Completion of English Honors entails a total of 9 credits of coursework: the Junior Honors Seminar (359:496, 1.5 credits); the Senior Honors Seminar (359:497, 1.5 credits); and two semesters of independent study, the Senior Honors Tutorials (359:498 and 359:499, 3 credits each). The completed thesis will be evaluated by the advisor and a second reader. A grade of B+ or better will be required in order to earn the honors designation.

Students wishing to complete an English honors project in conjunction with the Honors College, SAS Honors, or other College Honors Programs will also be required to secure the approval of the appropriate College Dean by the end of the spring semester of the junior year.

Consult the departmental website for more detailed information: https://english.rutgers.edu/.

English (SAS)

Certificate Programs

Certificate Programs

Certificate in Drama and Performance Studies (16 credits)

The certificate in drama and performance studies offers the opportunity for students pursuing the English major or minor to develop a specialized concentration in the study of the performing arts. The certificate program curriculum (a total of 16 credits) requires a foundational course in the field (Introduction to Dramatic Literature or Introduction to Performance Theory), four approved electives, and a 1-credit capstone in which students produce a portfolio.

Students who fulfill all requirements with a minimum grade-point average (GPA) of 3.0 in these courses will be awarded the certificate. For more information, contact the faculty director, Professor Thomas Fulton tfulton@english.rutgers.edu

The certificate consists of 16 course credits, with a minimum 3.0 GPA in the following courses:

1. One (1) required introductory course:

358:240 Introduction to Dramatic Literature

359:220 Introduction to Performance Theory

2. Any four (4) of the following courses:*

351:303 Screenwriting for Film

351:304 Screenwriting for Television

351:308 Creative Writing Playwriting

351:408 Advanced Creative Writing Workshop: Playwriting

358:202 Shakespeare

358:240 Introduction to Dramatic Literature*

358:310 Medieval Drama

358:313 Drama in the Age of Shakespeare

358:314 Shakespeare: The Elizabethan Plays

358:315 Shakespeare: The Jacobean Plays

358:320 Shakespeare in England

358:325 Restoration and 19th-Centurey Theater and Drama

358:335 19th-Century Theater and Drama

358:347 American Theater and Drama

358:356 Early 20th-Century Theater and Drama

358:357 Later 20th-Century Theater and Drama

358:372 Black Theater and Drama

358:378 Black Music and Literature

358:394 Theater and Drama by Women

358:426 Seminar: Shakespeare

359:220 Introduction to Performance Theory

*At the discretion of the faculty director of the certificate, new and other courses in the department not listed above, as well as courses in other departments, might also count.

Other Certificate Programs (16-18 credits)

The primary goal of the certificate programs is to enhance the writing proficiency of business and science students in order to increase their eligibility for employment in professions that require advanced writing competency. Any student working toward the business and technical writing minor is eligible to receive either the professional writing certificate or the technical writing certificate upon completion of all required courses with a grade of C or above.

These certificates are only available to students enrolled in the business and technical writing minor at Rutgers University.

Professional Writing Certificate (16-18 credits)

Any student may request this certificate upon completion of the minor. There is a significant need for college graduates who can research and communicate information at a high level of competence in business, industry, and government. The professional writing certificate is designed to give students a firm grounding in the skills of oral, written, and electronic communication and prepare them to enter professions that require extensive writing skills.

Technical Writing Certificate (18 credits)

This certificate is open to undergraduates with majors or minors in approved scientific or technical subject areas (such as biology, mathematics, engineering, or computer science). The need for technical writers capable of communicating scientific or technically sophisticated information to various audiences is well established, and technical writing skills are in demand in a wide range of fields. This certificate program is designed to give students with a science or technical background a strong foundation in the skills of oral, written, and electronic communication.

Certificate Requirements

Both certificates require six courses in four key skill areas:

1. Writing Training (6 credits)

Since writing competence is at the heart of the certificate program, students must complete two writing courses intended to improve writing, editing, collaboration, and general communication skills. Electives may be chosen from among the following writing courses:

01:355:202 Technical Writing Essentials (3)

01:355:203 Business Writing Essentials (3)

01:355:315 Grant Writing (3)

01:355:342 Science Writing (3)

01:355:352 Writing as a Naturalist (3)

01:355:355 Writing in the Professions (3)

01:355:365 Technical Editing (3)

01:355:375 Collaborative Writing Practices (3)

04:192:315 Professional Writing and Communication (3)

04:192:380 Public Speaking (3)

04:567:205 Digital News Reporting and Writing (3)

2. Research Practice (3 credits)

In the information and technology economy, the ability to conduct research and use information to develop viable plans of action is essential to success and advancement. Students therefore must complete a research writing course in business or technical writing. These courses will also fulfill most students' second level writing requirements (consult with your school's academic advising office for specific requirements in your program). Research writing courses include:

01:355:302 Scientific and Technical Writing (3)

01:355:303 Writing for Business and the Professions (3)

01:355:315 Grant Writing (3)

01:355:322 Writing for Engineers (3)

3. Computer Knowledge (6 credits)

Basic computer knowledge and the ability to learn new programs quickly are essential to success in business and technical writing environments. Students in our program will be introduced to general and advanced writing software in many classes, and they will be required to pass an introductory course in computer science.

a) Though several of our courses will expect students to learn relatively simple programs (such as Microsoft Word and PowerPoint), students are also required to take one of the following courses, which teach advanced writing software, covered in our upper-level workshop courses. These include:

01:355:402 Advanced Writing Workshop (3)

01:355:415 Information Design (3)

01:355:425 Web Authoring (3)

b) Students will also need to pass one of the following introductory computer science courses:

01:198:107 Computing for Math and the Sciences (3)

01:198:110 Introduction to Computers and Their Application (3)

01:198:111 Introduction to Computer Science (4)

01:198:170 Computer Applications for Business (3)

04:198:103 Information Technology and Informatics (3)

04:547:220 Retrieving and Evaluating Electronic Information (3)

4. Internship Experience (1 or 3 credits for a professional writing certificate; 3 credits for a technical writing certificate)

Hands-on training in the work environment offers an invaluable, practical component to the certificate program, providing students with useful experience while encouraging professional attitudes toward work. In our program, students will have the option of fulfilling an independent internship or taking credits through the CESEP Program:

01:355:395,396,397,398 Internship (3,3,3,3)

Please see the internships website for more information.

For information on the Writing Program's business and technical writing minor through the School of Arts and Sciences, please see the Minor in Business and Technical Writing page in this catalog. For more information on the certificate programs or the minor, please see http://wp.rutgers.edu.

Students completing the certificate should fill out the Application for Professional and Technical Writing Certificates form. This form should be completed and submitted to donald.dow@rutgers.eduDonaldDow@rutgers.edu. All information will be verified and the certificate will be processed.

01:358:262 ***Introduction to Literature and the Environment (3)***
General introduction to environmental writing, focusing on nonfiction, novels, and poems from the mid-19th century to the present day.

01:358:263 ***Civilization and Its Discontents (3)***
Introduction to texts of fundamental importance for the imagination of the individual in society, focusing on the forms through which a culture understands itself including dialogue, tragedy, parable, and public address.

01:358:275 ***The Cultural History of Now (3)***
Analysis of an issue of pressing global concern from a multidisciplinary perspective, but especially from that of literary and cultural history. Topics vary according to individual instructors; consult departmental information.

01:358:301 ***History of the English Language (3)***
Growth and structure of the English language from its origins to the present with some attention to methods of linguistic description.
Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:358:302 ***Classical Backgrounds of Literature in English (3)***
Influence on literature in English of classical Greek and Roman epic, tragedy, comedy, and other literary forms.
Credit not given for both this course and 01:195:346. Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:358:303 ***Literature of Medieval Courts (3)***
Concepts of nobility, rule, courtship, and faith in works such as *Beowulf*, *Sir Gawain and the Green Knight*, *Pearl*, and Malory's *Morte d'Arthur*.
Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:358:304 ***Medieval Literature of Dissent (3)***
Traditions of dissent in later medieval England. Texts may include writings by Wulfstan and Ælfric, *Chronicle* poems, *Piers Plowman*, Lollard writings, macro-plays, the Wakefield cycle, and *The Book of Margery Kempe*.
Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:358:305 ***Medieval Romance (3)***
Medieval romances and their origins in the British Isles and on the continent, with emphasis on English versions of Arthurian material, especially *Sir Gawain and the Green Knight* and Malory's *Morte d'Arthur*.
Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:358:306 ***Chaucer (3)***
Selected works of Chaucer, with an emphasis on *The Canterbury Tales*.
Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:358:307 ***Medieval and Early Modern Women Writers (3)***
Selections from significant women writers of the medieval and early modern period, including Julian of Norwich, Margery Kempe, Aemelia Lanyer, Elizabeth Cary, Lady Mary Wroth, Katherine Philips, and others.
Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:358:308 ***Cultures of the Middle Ages (3)***
Detailed introduction to a particular aspect of the rich cultural diversity of the European Middle Ages. Topics vary.
Credit not given for both this course and 01:195:388 or 01:667:388. Prerequisite: 01:355:101 or equivalent.

01:358:309 ***Issues and Problems in Medieval Literature and Culture (3)***
Studies in particular themes, questions, forms, and historical issues in medieval literature and culture. Sections designed by individual instructors; students should consult departmental announcement.
Prerequisite: 01:355:101 or equivalent.

01:358:310 ***Medieval Drama (3)***
Surveys works of medieval drama, investigating relationships between history and religion, world and stage, work and play, and actors and audience.

01:358:311 ***Renaissance Literature: The 16th Century (3)***
Poetry, plays, and prose from the Henrician to the Elizabethan periods.
Prerequisite: 01:355:101 or equivalent.

01:358:312 ***Renaissance Literature: The 17th Century (3)***
Poetry, plays, and prose from the Jacobean to Restoration periods.
Prerequisite: 01:355:101 or equivalent.

01:358:313 ***Drama in the Age of Shakespeare (3)***
Early modern drama, with emphasis on Marlowe, Jonson, Beaumont, Fletcher, Webster, and others.
Prerequisite: 01:355:101 or equivalent.

01:358:314 ***Shakespeare: The Elizabethan Plays (3)***
Selected comedies, tragedies, and English history plays written between the beginning of Shakespeare's career and the death of Elizabeth I in 1603.
Prerequisite: 01:355:101 or equivalent.

01:358:315 ***Shakespeare: The Jacobean Plays (3)***
Selected comedies, tragedies, and tragicomedies written after the succession of James I in 1603.
Prerequisite: 01:355:101 or equivalent.

01:358:316 ***Milton (3)***
Paradise Lost, *Paradise Regained*, *Samson Agonistes*, the shorter poems, and selected prose.
Prerequisite: 01:355:101 or equivalent.

01:358:317 ***Major Renaissance Writers (3)***
Selected writings of Milton studied in relation to other 16th- or 17th-century writers, such as Spenser, Shakespeare, Donne, Marvell, Cavendish, or Dryden.
Prerequisite: 01:355:101 or equivalent.

01:358:318 ***Sixteenth-Century Poetry (3)***
Forms, styles, and development of poetry from Skelton to Spenser.
Prerequisite: 01:355:101 or equivalent.

01:358:319 ***Seventeenth-Century Poetry (3)***
Forms, styles, and development of poetry from Jonson and Donne to Milton and Marvell.
Prerequisite: 01:355:101 or equivalent.

01:358:320 ***Issues and Problems in Renaissance Literature and Culture (3)***
Studies in particular themes, questions, forms, and historical issues in Renaissance literature and culture. Sections designed by individual instructors; students should consult departmental announcement.
Prerequisite: 01:355:101 or equivalent.

01:358:321 ***Renaissance Women Writers (3)***
Selections from significant women writers of the Renaissance including Mary Sidney, Emelia Lanyer, Mary Wroth, Anne Bradstreet, Margaret Cavendish, and Aphra Behn.

01:358:322 ***Restoration and Early 18th-Century Literature (3)***
Poetry, prose, and drama by writers such as Dryden, Rochester, Behn, Pope, Haywood, Swift, and their contemporaries.
Prerequisite: 01:355:101 or equivalent.

01:358:323 ***Later 18th-Century Literature (3)***
Poetry, prose, and drama by writers such as Johnson, Sterne, Burney, Cowper, Sheridan, Equiano, Wollstonecraft and their contemporaries.
Prerequisite: 01:355:101 or equivalent.

01:358:324 ***Restoration and 18th-Century Poetry (3)***
Poems by authors such as Philips, Dryden, Behn, Swift, Pope, Gray, Cowper, and Wheatley.
Prerequisite: 01:355:101 or equivalent.

01:358:325 ***Restoration and 18th-Century Theater and Drama (3)***
Comedies and tragedies from the British modern age, by Congreve, Behn, Wycherly, Etheridge, Centlivre, Gay, Lillo, Sheridan, and others.
Prerequisite: 01:355:101 or equivalent.

01:358:326 ***Eighteenth-Century Novel (3)***
The early novel to Jane Austen, including authors such as Behn, Defoe, Haywood, Fielding, Richardson, Lennox, Sterne, and Burney.
Prerequisite: 01:355:101 or equivalent.

01:358:327 ***Restoration and 18th Century Women Writiers (3)***
Writing by women between the Restoration and the Romantic period, including authors such as Behn, Haywood, Montagu, Burney, Wheatley, and Austen.
Prerequisite: 01:355:101 or equivalent.

01:358:328 ***Issues and Problems in 18th-Century Literature and Culture (3)***
Studies in particular themes, questions, forms, and historical issues in Restoration and 18th-century literature and culture. Sections designed by individual instructors; students should consult departmental announcement.
Prerequisite: 01:355:101 or equivalent.

01:358:330 ***Early Romantic Literature (3)***
Works of poetry and prose by Austen, Blake, Coleridge, Wordsworth, and their contemporaries.
Prerequisite: 01:355:101 or equivalent.

01:358:331 ***Later Romantic Literature (3)***
Works of poetry and prose by Keats, P.B. Shelley, M. Shelley, Byron, Hemans, De Quincey, and their contemporaries.
Prerequisite: 01:355:101 or equivalent.

01:358:332 ***Victorian Literature (3)***
Poetry and prose from the 1830s to 1900, by Barrett Browning, Tennyson, Browning, Carlyle, Arnold, Christina Rossetti, the Brontës, Dickens, George Eliot, and Hardy.
Prerequisite: 01:355:101 or equivalent.

01:358:333 ***Late Victorian and Edwardian Literature (3)***
Poetry and prose of the transition to modernism by such authors as Pater, Wilde, the Decadents, the New Women novelists, Olive Shriner, Yeats, Hardy, Lawrence, and Woolf.
Prerequisite: 01:355:101 or equivalent.

01:358:334 ***Victorian Poetry (3)***
Major poetry of Tennyson, Barrett Browning, Browning, Arnold, the Pre-Raphaelites, Christina Rossetti, Hopkins, Yeats, and others.
Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:358:335 ***Nineteenth-Century Theater and Drama (3)***
Drama from 1800 to the 1880s in England and America. Melodrama, the development of social realism, and the rise of modern drama. Plays by Holcroft, Jerrold, Boucicault, Taylor, Lewis, and others.
Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:358:336 ***Nineteenth-Century British Fiction (3)***
Development of the novel into the major popular literary genre in England. Writers include Scott, Dickens, the Brontës, Thackeray, Gaskell, Eliot, Hardy, and others.
Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:358:337 ***Nineteenth-Century Women Writers (3)***
Appearance of women writers as major public voices in British literature. Writers include Wollstonecraft, Austen, Mary Shelley, the Brontës, Gaskell, George Eliot, and Christina Rossetti.
Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:358:338 ***Issues and Problems in 19th-Century Literature and Culture (3)***
Studies in particular themes, questions, forms, and historical issues in 19th-century literature and culture. Sections designed by individual instructors; students should consult departmental announcement.
Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:358:340 ***Literature and Culture of the Colonial Americas (3)***
English writing of the New World, from exploration through colonization, on both sides of the Atlantic. Puritanism, the Enlightenment, empire, and the development of nationalism.
Prerequisite: 01:355:101 or equivalent.

Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:358:342 ***Nineteenth-Century American Poetry (3)***
Primary focus on Whitman and Dickinson, with additional readings in Wheatley, Bryant, Sigourney, Longfellow, Emerson, Fuller, Poe, Whittier, Horton, Melville, Harper, Dunbar
Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:358:343 ***Nineteenth-Century American Fiction (3)***
Novels, stories, and sketches by Irving, Cooper, Poe, Fern, Stowe, Hawthorne, Melville, Alcott, Twain, James, Wharton, Chesnutt, and others.
Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:358:344 ***American Realism and Naturalism (3)***
American writing from the Civil War to modernism. Works by Dickinson, Alcott, Twain, James, Howells, Jewett, Chopin, Sui Sin Far, Zitkala-Sa, Crane, Wharton, Dreiser, Du Bois, Johnson, Cather.
Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:358:345 ***Early 20th-Century American Literature (3)***
Writing by American authors from 1900 to 1945.
Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:358:346 ***Later 20th-Century American Literature (3)***
Writing by American authors from 1945 to the end of the century.
Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:358:347 ***American Theater and Drama (3)***
American theatrical traditions from the 18th century to the present, with emphasis on such 20th-century playwrights as O'Neill, Hellman, Williams, Miller, Albee, Hansberry, Wilson, Mamet, and Baraka.
Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:358:348 ***American Women Writers (3)***
Writing by American women including Bradstreet, Wheatley, Sedgwick, Wilson, Stowe, Jacobs, Child, Dickinson, Stoddard, Harper, Hopkins, Chopin, Wharton, Cather, Hurston, O'Connor, Le Guin, Angelou and Morrison
Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:358:349 ***American Autobiography (3)***
Changing representations of self in narrative form. Readings range from conversion, captivity, and slave narratives, to modern autobiographies and memoirs.
Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:358:351 ***Literatures of the Americas (3)***
Literatures of the Western Hemisphere from the 19th century to the present.
Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:358:352 ***Early 20th-Century Literature (3)***
Writing from 1900 to 1945, including one or more of the following: American, British, and other literatures in English.
Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:358:353 *Later 20th-Century Literature (3)*
Writing from 1945 to the end of the century, including one or more of the following: American, British, and other literatures in English.
Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:358:354 *Early 20th-Century Poetry (3)*
Poetry from 1900 to 1945, including one or more of the following: American, British, and other literatures in English.
Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:358:355 *Later 20th-Century Poetry (3)*
Poetry from 1945 to the end of the century, including one or more of the following: American, British, and other literatures in English.
Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:358:356 *Early 20th-Century Theater and Drama (3)*
Drama from the 1880s to the 1920s in relation to modernism and contemporary social movements. Plays by Ibsen, Strindberg, Chekhov, Wilde, Jarry, Glaspell, and others.
Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:358:357 *Later 20th-Century Theater and Drama (3)*
Expressionism through the Absurd (1920s through 1960s), in artistic and social contexts. Plays by Pirandello, O'Neill, Brecht, Genet, Beckett, Pinter, Williams, Hansberry, and others.
Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:358:358 *Early 20th-Century Fiction (3)*
Fiction from 1900 to 1945, including one or more of the following: American, British, and other literatures in English.
Prerequisite: 01:355:101 or equivalent.

01:358:360 *Later 20th-Century Fiction (3)*
Fiction from 1945 to the end of the century, including one or more of the following: American, British, and other literatures in English.
Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:358:361 *Twentieth-Century Literature in a Global Context (3)*
Twentieth-century writing in English other than British and American.
Credit not given for both this course and 01:195:324. Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:358:362 *Twentieth-Century Women Writers (3)*
Twentieth-century writing by women, including one or more of the following: American, British, and other literatures in English.
Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:358:363 *Issues and Problems in 20th-Century Literature and Culture (3)*
Studies in particular themes, questions, forms, and historical issues in 20th-century literature and culture. Sections designed by individual instructors; students should consult departmental announcement.
Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:358:365 ***Twenty-First-Century Literature (3)***
Writing from the last 20 years, including one or more of the following: American, British, and other literatures in English.
Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:358:370 ***Black Narrative (3)***
Historical and stylistic range of prose forms; slave narratives, folklore, biography and autobiography, short fiction; social, literary, and cultural criticism; Douglass, Du Bois, Toomer, Hurston, and Walker.
Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:358:371 ***Black Poetry (3)***
History of black American poetry, including the influence of oral traditions; poems by such writers as Wheatley, Dunbar, Hughes, and Brooks.
Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:358:372 ***Black Theater and Drama (3)***
Work of modern black American playwrights, including Hansberry, Baraka, Baldwin, Bullins, Gordone, Fuller, and Shange.
Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:358:373 ***Black Novel (3)***
Thematic and structural development of the black novel as a voice for social and political change, including works by Wright, Ellison, Baldwin, Marshall, Walker, and Morrison.
Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:358:374 ***Black Autobiography (3)***
Examination of self-representation by major black autobiographers, including Frederick Douglass, Harriet Jacobs, Solomon Northup, Booker T. Washington, Maya Angelou, and Malcolm X.
Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:358:375 ***Nineteenth-Century Black Literature (3)***
Prominent African-American writers of fiction, poetry, autobiography, and essays of the 19th century, including Frederick Douglass, Harriet Wilson, Pauline Hopkins, Charles Chesnutt, and W.E.B. Du Bois.
Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:358:376 ***Harlem Renaissance (3)***
Black literature during the 1920s and 1930s in the context of African-American social and cultural history; essays, poems, and novels by such authors as Cullen, Hughes, Hurston, McKay, and Toomer.
Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:358:377 ***Black Writers and the 1960s (3)***
Innovations in black literature of the 1960s in light of the tumultuous social, cultural, and political movements of the decade.
Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:358:378 ***Black Music and Literature (3)***
Thematic and structural influences of black music on American poetry, fiction, and drama; writers may include Sterling Brown, Hughes, Baraka, Cortez, Bambara, Kerouac, Shepard, and August Wilson.
Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:358:379 ***Black Women Writers (3)***
Fiction and poetry by African-American women such as Brooks, Hurston, Marshall, Morrison, and Alice Walker; discussion of issues of literary influence and comparable traditions.
Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:358:380 ***Literature of the Black World (3)***
Comparative study of writing in English by African-American, Caribbean, and African authors, including Derek Walcott, V.S. Naipaul, Paule Marshall, and Chinua Achebe.
Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:358:381 ***Issues and Problems in Black Literature (3)***
Studies in particular themes, questions, forms, and historical issues in black literature and culture. Sections designed by individual instructors; students should consult departmental announcement.
Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:358:382 ***Southern African Literature (3)***
Study of selected literary works from the region of Southern African written or translated in English. Topics vary; consult departmental announcement.

Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:358:383 ***Readings in Colonial and Postcolonial Literature (3)***
Study of literature and criticism that explore facets of Western imperial expansion.
Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:358:384 ***Literatures of Migration, Immigration, and Diaspora (3)***
Writings that feature representations of place, community, and identity in relation to national and international movement and displacement.
Credit not given for both this course and 01:195:336. Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:358:385 ***Literatures of Africa in English (3)***
Study of selected literary works from Africa written in English. Topics vary; consult departmental announcement.
Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:358:386 ***Literatures of Asia in English (3)***
Study of selected literary works from Asia written in English. Topics vary; consult departmental announcement.
Prerequisite: 01:355:101 or 103 or 104 or equivalent

01:358:387 ***Ethnic Literature in the United States (3)***
Selected literary works by Asian-American, black, Chicano/Chicana, and Native American writers. Topics vary; consult departmental information.
Prerequisite: 01:355:101 or 103 or 104 or equivalent

01:358:388 ***Native American Literatures in English (3)***
Fiction, poetry, and autobiography by such writers as Apes, Momaday, Welch, Silko, and Erdrich. Attention to issues of Native American representation.
Credit not given for both this course and 01:050:376. Prerequisite: 01:355:101 or 103 or 104 or equivalent

01:358:389 ***Asian-American Literatures in English (3)***
Theme or genre-based study of selected Asian-American writing in English. Topics chosen by individual instructors; consult departmental announcement.
Prerequisite: 01:355:101 or 103 or 104 or equivalent. Credit not given for both this course and 01:050:377.

01:358:390 ***Chicano/Chicana Literature (3)***
Theme or genre-based study of selected Chicano/Chicana literature; attention to comparative contexts (Puerto Rican, Cuban, and Dominican).
Prerequisite: 01:355:101 or 103 or 104 or equivalent

01:358:391 ***Irish Writing in English (3)***
Works of Irish writers in English from 1800 to the present.
Prerequisite: 01:355:101 or 103 or 104 or equivalent

01:358:393 ***Independent Study (3)***
Individual work on a topic designed by the student in conference with an instructor who directs the project.
Prerequisite: Permission of department. Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:358:394 ***Theater and Drama by Women (3)***
Selected plays in English by women writers, with emphasis on the study of forms, conventions, and cultural contexts. Topics vary; consult departmental announcement.
Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:358:395 ***Fiction by Women (3)***
Selected works of fiction in English by women writers, with emphasis on the study of forms, conventions, and cultural contexts. Topics vary; consult departmental announcement.
Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:358:396 ***Poetry by Women (3)***
Selected poetry in English by women writers, with emphasis on the study of forms, conventions, and cultural contexts. Topics vary; consult departmental announcement.
Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:358:398 ***The English Bible (3)***
The English Bible, its literary variety, and the evolution of its text. Special attention will be given to problems of interpretation and translation and their Hebrew and Greek origins.
Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:358:411 ***Old English Language and Literature (3)***
Intensive study of the English language and an introduction to its literature.
Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:358:412 ***Seminar: Old English Language and Literature (3)***
Intensive study, in a discussion-oriented format, of Old English poems, such as *Beowulf*, and prose writings studied in their original language. Topics vary according to individual instructors; consult departmental information.
Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:358:420 ***Seminar: Chaucer (3)***
Intensive study of *The Canterbury Tales, Troilus and Criseyde*, and other selected works.
Prerequisites: 01:359:201 or 202; English major.

01:358:422 ***Seminar: Topics in Medieval Literature and Culture (3)***
Intensive study, in a discussion-oriented format, of a specifically defined area of medieval literature and culture. Topics vary according to individual instructors; consult departmental information.
Prerequisites: 01:359:201 or 202; English major.

01:358:424 ***Seminar: Spenser (3)***
The Faerie Queene, *The Shepherd's Calendar*, *Amoretti*, *Epithalamion*, and selected minor works.
Prerequisites: 01:359:201 or 202; English major.

01:358:426 ***Seminar: Shakespeare (3)***
Special studies in selected plays and poems. Consult departmental announcement.
Prerequisites: 01:359:201 or 202; English major.

01:358:428 ***Seminar: Milton (3)***
Special studies in Milton's poetry and prose.
Prerequisites: 01:359:201 or 202; English major.

01:358:434 ***Seminar: Topics in Renaissance Literature and Culture (3)***
Intensive study, in a discussion-oriented format, of a specifically defined area of Renaissance literature and culture. Topics vary according to individual instructors; consult departmental information.
Prerequisites: 01:359:201 or 202; English major.

01:358:435 ***Seminar: Topics in Restoration and 18th-Century Literature and Culture (3)***
Intensive study, in a discussion-oriented format, of a specifically defined area of 18th-century literature and culture. Topics vary according to individual instructors; consult departmental information.
Prerequisites: 01:359:201 or 202; English major.

01:358:436 ***Seminar: Topics in 19th-Century Literature and Culture (3)***
Intensive study, in a discussion-oriented format, of a specifically defined area of 19th-century literature and culture. Topics vary according to individual instructors; consult departmental information.
Prerequisites: 01:359:201 or 202; English major.

01:358:437 ***Seminar: Topics in 20th-Century Literature and Culture (3)***
Intensive study, in a discussion-oriented format, of a specifically defined area of 20th-century literature and culture. Topics vary according to individual instructors; consult departmental information.
Prerequisites: 01:359:201 or 202; English major.

01:358:438 ***Seminar: Topics in 21st-Century Literature (3)***
Focuses on topics and issues in 21st-century literature of all genres.
Prerequisites: 01:359:201 or 202; English major.

01:358:440 ***Seminar: Topics in Genre (3)***
Intensive study, in a discussion-oriented format, of a particular genre (e.g., pastoral, epic, comedy, and lyric) or relationship among genres. Topics vary; consult departmental information.
Credit not given for both this course and 01:195:440. Prerequisites: 01:359:201 or 202; English major.

01:358:441 ***Seminar: Topics in American Literature and Culture to 1800 (3)***
Intensive study, in a discussion-oriented format, of a specifically defined area of American literature and culture to 1800. Topics vary according to individual instructors; consult departmental information.
Prerequisites: 01:359:201 or 202; English major.

01:358:442 ***Seminar: Topics in 19th-Century American Literature and Culture (3)***
Intensive study, in a discussion-oriented format, of a specifically defined area of 19th-century American literature and culture. Topics vary according to individual instructors; consult departmental information.
Prerequisites: 01:359:201 or 202; English major.

01:358:445 ***Seminar: Topics in Black Literature and Culture (3)***
Intensive study, in a discussion-oriented format, of a specifically defined area of black literature and culture. Topics vary according to individual instructors; consult departmental information.
Prerequisites: 01:359:201 or 202; English major.

01:358:452 ***Seminar: Special Topics in American Literature (3)***
Special studies in particular ideas, themes, forms, and historical units in American literature. Sections designed by individual instructors; consult departmental announcement.
Prerequisites: 01:359:201 or 202; English major.

01:358:460 ***Seminar: Topics in Colonial and Postcolonial Literature (3)***
Intensive study, in a discussion-oriented format, of a specifically defined area of colonial and postcolonial literature. Topics vary; consult departmental information.
Prerequisites: 01:359:201 or 202; English major.

01:358:491 ***Seminar: Special Topics in Literature (3)***
Special studies in particular ideas, themes, forms, and historical units in literature. Sections designed by individual instructors; consult departmental announcement.
Prerequisites: 01:359:201 or 202; English major.

01:358:493 ***Independent Study (3)***
Individual work on a topic designed by the student in conference with an instructor who directs the project.
Prerequisites: Permission of department; 01:359:201 or 202; English major.

01:358:495 ***Independent Study (BA)***
Individual work on a topic designed by the student with an instructor who directs the project.
Prerequisites: 01:359:201 or 202; English major.

English Theories and Methods Courses (359)

English Theories and Methods Courses (359)

01:359:201 ***Principles of Literary Study (3,3)***
An introduction to principal methods and materials in contemporary literary studies. This course will include close attention to works from at least two genres and two historical periods to be selected by the instructor. The course will introduce students to the meaning and use of key terms in literary studies.
Required of all English majors.

01:359:205 ***Introduction to Research Methods (3)***
Workshop in advanced library skills and the use of secondary scholarship.
Open only to junior English majors in the departmental honors program.

01:359:207 ***Data and Culture (3)***
Introduction to understanding and using data in humanistic scholarship.

01:359:209 ***Introduction to Health, Medicine, and Literature (3)***
Examines how literature about disease, disability, or the body opens questions concerning language, metaphor, narrative traditions, and the shifting cultural meanings of health, medicine, and human experience.

01:359:210 ***Introduction to Literary Theory (3)***
Literary theory through the close reading of texts with common themes; representation of diverse historical periods and theoretical frameworks.

01:359:211 ***The Culture of Sport (3)***
Explores the cultural aspects of sport, focusing on basketball, soccer, and American football, using literature, film, journalism, televised events, and some secondary material.

01:359:220 ***Introduction to Performance Theory (3)***
Interdisciplinary course introduces students to key concepts of performance and performativity from a variety of critical perspectives, including those of literary studies, critical theory, philosophy, theatre history, and anthropology, among others.

01:359:310 ***History of Literary Theory I (3)***
Literary and rhetorical theory from antiquity to the Enlightenment.
Prerequisite: 01:355:101 or 103 or 104 or equivalent

01:359:311 ***History of Literary Theory II (3)***
Selected trends and texts of literary theory from Romanticism to the present.
Prerequisite: 01:355:101 or 103 or 104 or equivalent

01:359:312 ***Issues and Problems in Literary Theory (3)***
Close investigation of a specifically defined area of literary theory. Topics vary according to individual instructors; consult departmental information.
Prerequisite: 01:355:101 or 103 or 104 or equivalent

01:359:315 ***Theories of Genre (3)***
Introduction to the ways in which criticism has theorized literature according to genre, form, and kind.
Prerequisite: 01:355:101 or 103 or 104 or equivalent

01:359:316 ***Issues and Problems in Genre Theory (3)***
Formal and cultural issues within the development of a particular genre, or in the relation between genres, in literature in English.
Prerequisite: 01:355:101 or 103 or 104 or equivalent

01:359:320 ***Cultural Theory in Literary Studies (3)***
Approaches to defining what culture is and how to theorize culture in relation to the production and consumption of literary and nonliterary texts.
Prerequisite: 01:355:101 or 103 or 104 or equivalent

01:359:321 ***Popular Culture (3)***
Exploration of how popular forms like TV, movies, music video, rap, rock, comics, magazines, and advertising shape meaning and value in contemporary America.
Prerequisite: 01:355:101 or 103 or 104 or equivalent

01:359:322 ***Marxist Literary Theory (3)***
Marxist analysis of literature, culture, and society. Attention to dialectical philosophy, the problem of base and superstructure, and theories of ideology and fetishism.
Prerequisite: 01:355:101 or 103 or 104 or equivalent

01:359:325 ***Psychoanalytic Literary Theory (3)***
Impact of psychoanalysis upon theories of literature, language, and interpretation; Freud and beyond; attention to theories of subjectivity, trauma, affect, sexuality, textuality, and culture.
Prerequisite: 01:355:101 or 103 or 104 or equivalent

01:359:326 ***Literature and Psychology (3)***
Exploration of interrelationships of literature and psychology (from Freud to feminists and contemporary theorists); topics include subjectivity, affect, trauma, gender, intersubjectivity, and identity.
Prerequisite: 01:355:101 or 103 or 104 or equivalent

01:359:330 ***Theories of Gender and Sexuality (3)***
History and critique of gender and sexuality as discursive categories. May include nonliterary as well as literary texts and involve various theoretical perspectives.
Prerequisite: 01:355:101 or 103 or 104 or equivalent

01:359:331 ***Literature and Sexuality (3)***
Themes and assumptions of sexual literature and its basis in sexual fantasy, including gender issues. Reading in major works of sexual literature.
Prerequisite: 01:355:101 or 103 or 104 or equivalent

01:359:335 ***Feminist Theory in Literary Study (3)***
"Woman," "gender," and related concepts as discursive categories deployed in theoretical, literary, philosophical, and popular texts. Attention to historical issues and current debates.
Prerequisite: 01:355:101 or 103 or 104 or equivalent

01:359:336 ***Issues and Problems in Feminist Literary Studies (3)***
Themes, questions, forms, and historical issues in feminist literary studies. Sections designed by individual instructors; consult departmental announcement.
Prerequisite: 01:355:101 or 103 or 104 or equivalent

01:359:340 ***Deconstruction and Poststructuralist Theory (3)***
Poststructuralism and its origins in France in the late 1960s; attention to the theoretical writings of Derrida, Barthes, Kristeva, and de Man.
Prerequisite: 01:355:101 or 103 or 104 or equivalent

01:359:345 ***Colonial and Postcolonial Theory (3)***
Theories of colonial and postcolonial discourse; attention to issues of imperialism, primitivism, creolization, and globalization in fiction, film, and travel narratives.
Prerequisite: 01:355:101 or 103 or 104 or equivalent

01:359:347 ***Serial Storytelling (3)***
Investigation of serial narrative as a modern mode of storytelling, from serialized novels in 19th-century Britain and Russian through the multimedia serials of our digital age. Exploration of this narrative form's enduring power, in multiple media, to interweave fiction with the course of current events and the rhythms of everyday life, and to bring together international audiences shaped by cultural, social, and geographical differences.
Prerequisite: 01:355:101 or 103 or 104 or equivalent. Credit not given for 359:347 and either 01:195:345 or 01:860:345.

01:359:351 ***Literature and Medicine (3)***
Literature about medicine, exploring the meeting place of disease, medical treatment, and literary culture, along with shifting understandings of patient and healer, health and illness, and the reach and responsibility of medicine.
Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:359:352 ***Literary and Scientific Writings (3)***
Readings in English that explore the impact of science upon literary writing and the literary and discursive dimensions of selected scientific texts.
Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:359:360 ***Theories of Text and Image (3)***
Exploration of the field of media theory, especially as it has developed in dialogue with literary and cultural studies. Course materials and class projects will include works in multiple media.
Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:359:361 ***Literature and Visual Culture (3)***
Interactions of word and image on the page, on the stage, and onscreen. Examples may include graphic narratives, tableaux, public spectacles, photography, film, and digital culture, read alongside literary and theoretical texts.
Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:359:362 ***Digital Literary Studies (3)***
The relationship between literary practices and the technologies of recording, transmitting, data mining, and archiving. Topics: the history of the book, media shift, the history of reading, literature in relation to other media, hypertext, and digital literacies and analysis.
Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:359:365 ***Literature, Religion, and Theory (3)***
Relationships between theological and literary ways of reading texts, including both sacred and secular examples.
Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:359:366 ***Literary Approaches to Sacred Texts (3)***
Literary analysis of the formation and structure of the major texts of several world religions. Attention to style, genre, and cross-cultural interpretation.
Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:359:370 ***Literary Editing and Publishing (3)***
The place and purpose of literary journals within the publishing world; history and current state of the publishing industry, including mainstream book publishing, independent presses, and literary magazines.

Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:359:394 ***Independent Study (3)***
Individual work on a topic designed by the student in conference with an instructor who directs the project.
Prerequisites: Permission of department and 01:355:101 or equivalent.

01:359:395 ***Junior Honors Seminar (3)***
Focus on particular text, theme, or approach in order to develop reading and writing skills using critical and theoretical materials.
Open only to junior English majors in the departmental honors program.

01:359:410 ***Seminar: Topics in Literary Theory (3)***
Intensive study, in a discussion-oriented format, of a specifically defined area of literary theory. Topics vary according to individual instructors; consult departmental information.
Prerequisites: 01:359:201 or 202; English major.

01:359:425 ***Seminar: Topics in Literature and Psychology (3)***
Examines literary texts and the processes of reading them through the lens of psychological theory, including psychoanalytic and cognitive.
Prerequisites: 01:359:201 or 202; English major.

01:359:435 ***Seminar: Topics in Feminist Theory (3)***
Intensive study, in a discussion-oriented format, of a specifically defined area of feminist theory. Topics vary according to individual instructors; consult departmental information.
Prerequisites: 01:359:201 or 202; English major.

01:359:460 ***Seminar: Media Theory (3)***
Explores the field of media theory, especially as it has developed in dialogue with literary and cultural studies.
Prerequisites: 01:359:201 or 202; English major.

01:359:470 ***History and Theory of Tragedy (3)***
Explores, contextualizes, and assesses the most prominent and influential works in the history and theory of tragedy, beginning with the dramas of Greek antiquity and extending through modern philosophy.
Prerequisites: 01: 359:201 or 202; English major

01:359:494 ***Independent Study (3)***
Individual work on a topic designed by the student in conference with an instructor who directs the project.
Permission of department; 01:359:201 or 202; English major.

01:359:495 ***Independent Study (3)***
Individual work on a topic designed by the student in conference with an instructor who directs the project.

Prerequisites: Permission of department; 01:359:201 or 202; English major.

01:359:496 ***Junior Honors Seminar (1.5)***
Workshop focusing on methodological and theoretical aspects of literary study or creative writing, with particular emphasis on preparing to write an honors thesis.
Open only to junior English majors in the departmental honors program.

01:359:497 ***Senior Honors Seminar (3)***
Workshop focusing on methodological and theoretical aspects of literary study, with particular emphasis on the senior thesis.
Open only to senior English majors in the departmental honors program.

01:359:498,499 ***Senior Honors Tutorial (3,3)***
Workshop focusing on methodological and theoretical aspects of literary study, with particular emphasis on the senior thesis.
Open only to senior English majors in the departmental honors program.

English (SAS)

English Creative Writing Courses (351)

English Creative Writing Courses (351)

01:351:209 ***Introduction to Multimedia Composition (3)***
Introduction to composition across digital media platforms, with attention to the conceptual challenges it poses. Individual digital media projects, blog posts, and group exercises to provide experience composing and sharing works that are both thought provoking and entertaining.

01:351:211,212 ***Introduction to Creative Writing (3,3)***
Practice in creative writing in various forms (fiction, poetry, drama, and essay); critical analysis of students' manuscripts in class and/or individual conferences.

01:351:220 ***Writing for Experimental Film (3)***
A hands-on film making experience focusing on writing and producing experimental film.

01:351:303 *Screenwriting for Film (3)*
Practice in screenwriting for film focused on dramatic action, narrative structure, and character.
Prerequisite: 01:351:211 or 212.

01:351:304 *Screenwriting for Television (3)*
Practice in screenwriting for television focused on dramatic action, scene structure, and character.
Prerequisite: 01:351:211 or 212.

01:351:305 *Creative Nonfiction (3)*
Investigation, through weekly reading and writing assignments, of creative nonfiction, emphasizing modes of first-person writing such as memoirs, travel narratives, and personal essays.
Prerequisite: 01:351:211 or 212.

01:351:306 *Form and Technique in Poetry (3)*
Prerequisite: One 200-level course in creative writing or permission of instructor. Pre- or corequisite: A literature course in poetry.

01:351:307 *Form and Technique in Fiction (3)*
Prerequisite: One 200-level course in creative writing or permission of instructor. Pre- or corequisite: A literature course in fiction.

01:351:308 *Form and Technique in Playwriting (3)*
Prerequisite: One 200-level course in creative writing or permission of instructor. Pre- or corequisite: A literature course in drama.

01:351:309 *Digital Composition (3)*
Filmmaking as creative writing, including study of film language, grammar, and narrative structure, with focus on visual composition, placement of dialogue, and editing to assemble a story for the screen.
Prerequisite: 01:355:101 or 103 or 104 or equivalent

01:351:314 *Documentary Filmmaking for Writers (3)*
This course focuses on the importance of storytelling in documentaries and teaches students about the various filmic techniques, elements, and choices needed to create their own successful short film.
Prerequisite: 01:355:101 or 103 or 104 or equivalent

01:351:405 *Advanced Workshop: Multi-Genre (3)*
Advanced work in creative writing; criticism of manuscripts in individual conferences and/or class.
Prerequisite: One 300-level course in creative writing or permission of instructor.

01:351:406 *Advanced Workshop: Poetry (3)*
Advanced workshop in poetry.
Prerequisite: One 300-level course in creative writing and/or permission of instructor.

01:351:407 *Advanced Workshop: Fiction (3)*
Advanced workshop in fiction.
Prerequisite: One 300-level course in creative writing and/or permission of instructor.

01:351:408 *Advanced Workshop: Playwriting (3)*
Advanced workshop in playwriting.
Prerequisite: One 300-level course in creative writing and/or permission of instructor.

English (SAS)

English Film Studies Courses (354)

English Film Studies Courses (354)

01:354:201 *Introduction to Film I (3)*
Film study, with emphasis on basic concepts of film analysis (narrative, editing, mise-en-scène, and sound) and the historical development of cinema as an institution.
Credit not given for both this course and 01:175:201.

01:354:202 *Introduction to Film II (3)*
Film study, with emphasis on commercial cinema as an institution (genres, directors, and stars) and on nonnarrative types of film (documentary, experimental).
Credit not given for both this course and 01:175:202.

01:354:205 *Cinema Today (4)*
This course surveys contemporary cinema from 2000 to the present.

01:354:210 *Close Readings of Cinema (4)*
Formal analyses of six or seven individual films; emphasis on visual track, sound track, and scenario-narrative construction.
Credit not given for both this course and 01:175:210. Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:354:250 *The Films of Alfred Hitchcock (4)*
A survey of the major films of the "master of suspense" from the silent era through the 1970s.

01:354:270 *American Screen Comedy (4)*
Classical American screen comedy: American screen comedy from the 1920s to the 1960s, ranging from the films of comedians to those of writers and directors.

01:354:301 *Digital Cinema (4)*
A study of the role played by digital technology in shaping the imaging and sound practices found in the contemporary cinematic landscape from the 1990s to the present.
Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:354:308 *The Craft of Screenwriting (3)*
Nature and theory of the screenplay; practice in writing for the screen, from short scenes to longer projects.
Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:354:312 *Cinema and the Arts (3)*
Relationship between film and aesthetic movements in literature and the arts, such as expressionism, cubism, futurism, constructivism, and surrealism.
Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:354:315 *American Cinema I (3)*
American film from the silent period to 1940; emphasis on the development of American cinema both as a social institution and a symbolic form.
Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:354:316 *American Cinema II (3)*
American film from 1940 to the present; emphasis on the height of the Hollywood studio and its decline in the late 1950s and 1960s.
Prerequisite: 01:355:101 or 103 or 104 or equivalent. Credit not given for both this course and 01:175:316.

01:354:318 *Cinema of New York and New Jersey (4)*
A history of the development of the motion picture industry in New York and New Jersey, where filmmakers unhappy with conditions of industrial mass production on the west coast worked to create an alternative "Hollywood on the Hudson."
Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:354:320 *World Cinema I (3)*
Developments in French, Italian, British, Russian, and other national cinemas from 1896 to World War II; also examines cross-influences between foreign and American cinema.
Credit not given for both this course and 01:195:320 or 01:175:320. Prerequisite: 01:355:101 or 103 or 104 or equivalent

01:354:321 *World Cinema II (3)*
Developments in French, Italian, British, Russian, Japanese, and other national cinemas after World War II; also examines cross-influences between foreign and American cinema.
Credit not given for both this course and 01:195:321 or 01:175:321. Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:354:330,331 *Critical Methodology in Film (3,3)*
Critical methodology, reviewing genre theory, theories of authorship, Marxist, feminist, cultural-materialist, and psychoanalytic criticism as applied to film.
Prerequisite: 01:355:101 or 103 or 104 or equivalent

01:354:335 *Film Sound (4)*
An international history of film sound with emphasis on the development of sound technology, the stylistic and aesthetic conventions of film sound, and theoretical discourses surrounding sound in the cinema.
Prerequisite: 01:355:101 or 103 or 104 or equivalent

01:354:350,351 *Major Filmmakers (3,3)*
Questions of meaning in film through the work of such major directors as Ford, Renoir, Hawks, Ophuls, Bergman, Mizoguchi, and Hitchcock.
Prerequisite: 01:355:101 or 103 or 104 or equivalent. Credit not given for both this course and 01:175:350, 351.

01:354:355 *Films of John Ford (4)*
A study of films made by American cinema's poet laureate that explores topics such as Ford, Lincoln, and history; race and ethnicity; populism and politics; and women, native Americans, and the West.
Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:354:356 *Films of Jean Renoir and Fritz Lang (4)*
A comparison of the work of two European directors who, after achieving international prominence in their respective countries (France, Germany), fled Hitler and came to Hollywood in the 1940s
Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:354:360 *Film Noir (4)*
Survey of American hard-boiled cinema from the early 1940s to 1958 with a focus on private eyes, lone wolves, femme fatales, and losers.
Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:354:370 *Film Genres (3)*
Analysis of film genres, such as the western, comedy, horror film, film noir, and the musical; theory of genre; and history of genre criticism. May cover more than one genre.
Prerequisite: 01:355:101 or 103 or 104 or equivalent. Credit not given for both this course and 01:175:370.

01:354:371 *Film Melodrama (4)*
Survey of film melodrama from the silent era to the present, including subgenres such as the family melodrama, the romantic melodrama, melodramatic triangles, the maternal melodrama, and race and melodrama.
Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:354:373 *The Documentary (3)*
History, theory, and practice of documentary film, including ethnographic film, propaganda, newsreel, direct cinema, video verite, social activist film, postmodern documentary, and antidocumentary.
Prerequisite: 01:355:101 or 103 or 104 or equivalent. Credit not given for both this course and 01:175:373.

01:354:374 *Science Fiction Film (4)*
A survey of science fiction cinema that explores the relationship between the human and the inhuman, the fantastic and the realistic, the familiar and the "other," and the present and the future.
Prerequisite: 01:355:101 or 103 or 104 or equivalent. Credit not given for both this course and 01:050:322 or 01:175:322.

01:354:375 *Film and Society (3)*
Analysis of films in their sociopolitical contexts, including issues of race, class, and gender; relation between film as art form and the politics of culture.
Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:354:385 *Theories of Women and Film (3)*
Basic concepts in feminist film theory; the female voice in cinema; representations of women in classical Hollywood film; and films made by women.
Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:354:391,392 ***Special Topics in Film Studies (3,3)***
Intensive study of a particular national cinema, period in film history, studio, or genre. Sections designed by individual instructors; consult departmental announcement.
Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:354:410 ***Seminar in Film Studies (3)***
Contemporary issues in film studies, ranging from the return to history to questions about the role of theory in the age of post-theory.
Prerequisite: 01:359:201 or 202.

01:354:420 ***Seminar: Film Theory (3)***
Major developments in film theory from the silent era to the present; writings on film by Eisenstein, Kracauer, Bazin, Metz, Barthes, and others; practice in using different methods to analyze films.
Prerequisites: 01:359:201 or 202 plus any 200-level English department film course (01:354:201, 202, or 210). Credit not given for both this course and 01:175:420.

English (SAS)

English Composition and Writing Courses (355)

English Composition and Writing Courses (355)

Learning Goals

Students who complete English 201 and 301 will be able to read and understand specialized texts from a range of disciplines; cite and explicate key passages in support of specific claims; evaluate the claims of individual texts and synthesize information provided by multiple sources; engage in independent research using print and online sources; develop a written argument with a thesis supported by reasoning, explanation, illustration, and the use of evidence; understand the major conventions of argument, quotation, paraphrase, and citation; understand the conventions of standard written English including paragraphing, grammar, and punctuation; evaluate the quality of information; and make a public presentation of their course research.

Students who complete Writing Program courses beyond 201 will be able to demonstrate proficiencies in the specialized areas indicated by the course title and description.

01:355:090 ***Grammar Workshop (E1.5)***
The Grammar Workshop is a support class in grammar skills featuring both group and individualized instruction.
Open to all students in Writing Program courses.

01:355:096 ***Writing Center (E1.5)***
At the tutorial centers located on the College Avenue, Livingston, and Douglass campuses, registered students receive concentrated assistance in specific writing skills.
The Writing Center is open to all undergraduates.

01:355:100 *Basic Composition (4.5)*
Basic Composition focuses primarily on the reading-comprehension skills necessary for success in Expository Writing (01:355:101) and in future college courses. Students read eight complex nonfiction essays and write four expository papers.
Prerequisites: 01:355:099 or 01:355:098 or 01:356:156.

01:355:101 *Expository Writing I (3)*

College Writing introduces students to the strategies and practices necessary to become a successful writer at the university level and beyond. As the required writing course for undergraduate students at Rutgers University-New Brunswick, College Writing challenges students to reflect upon and cultivate their strengths as readers and writers at this new stage of their education careers. College Writing is required of all students except those who are exempt through AP credit or transfer equivalency. Prerequisites: Placement,.

May not be used for credit toward the English major or minor. Prerequisites: 01:355:100, 01:356:156, or placement.

01:355:103 *Exposition and Argument (3)*

Exposition and Argument is an intensive writing course for first-year students who demonstrate advanced reading and writing skills.

Open only to honors students, and is not open to students who have taken 01:355:101. Credit is not given for both this course and 01:355:101.

Prerequisites: Placement in 01:355:101.

01:355:104 *College Writing Extended (4.5)*
College Writing Extended introduces students to the strategies and practices necessary to become a successful writer at the university level and beyond. Students develop their critical reading abilities and written communication skills through meaningful writing projects of diverse genres, including multimodal composition. Satisfies The College Writing core curricular requirement. Prerequisites: placement.
Prerequisites: placement.

01:355:197 *SAS Summer Writing Practicum (1)*
The Summer Writing Practicum will focus on developing reading strategies that encourage connective and analytical thinking, drafting an academic paper that presents a coherent and independent claim, and revising a rough draft for submission. Students will read nonfiction texts, discuss those texts, and develop claims of their own using textual evidence.

01:355:201 *Research in the Disciplines (3)*
Research in the Disciplines promotes further development of competence in reading, thinking, and writing, with emphasis on the intellectual and practical skills required for the research paper.
May not be used for English major or minor credit. Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:355:202 *Technical Writing Essentials (3)*
Technical Writing Essentials is designed to meet the fundamental workplace communication needs of students and professionals in a wide range of fields, including scientific and technical careers. The course teaches students how to effectively communicate using various kinds of documents common to the workplace including memos, business

letters, research reports, and instructions.
May not be used for English major or minor credit. Credit not given for both this course and 01:355:203. Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:355:203 *Business Writing Essentials (3)*
Business Writing Essentials is designed to meet both the basic communication needs of students planning careers in business and the writing improvement needs of current working professionals. The class writing assignments will be structured around scenarios where students will apply both writing and critical thinking skills in the context of real business situations.
May not be used for English major or minor credit. Credit not given for both this course and 01:355:202. Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:355:301 *College Writing for Transfer Students (3)*
If you have received WC credit for English 101 College Writing, consider taking English 301 College Writing for Transfer Students to fulfill one of your upper-level Core Curriculum WCr or WCd writing requirements. Students will write two four page essays that emphasize the writing, reading, and critical thinking skills valued by Rutgers, then complete an 8-10 page research paper on a subject of personal interest.
Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:355:302 *Scientific and Technical Writing (3)*
Scientific and Technical Writing offers students practice in the forms and discourses of scientific and technical writing as they develop, research, and revise an independent project. The purpose of the class is to prepare students for their professional lives in scientific, technical, or public service fields by helping them organize their knowledge while exploring ways of applying it, thus developing their professional expertise.
Credit not given for both this course and 01:355:303. Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:355:303 *Writing for Business and the Professions (3)*
Writing for Business and the Professions offers students practice writing for a business or professional audience as they develop, research, and revise an independent project. The purpose of the class is to prepare students to think as managers capable of putting information to practical use.
Credit not given for this both course and 01:355:302. Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:355:312 *Writing for Biology and Natural Science(3)*
This project-focused course is designed to address the needs of students doing research in natural sciences. Coursework covers grant proposals, research papers, and journal publications.
Prerequisites 01:355:101 or 01:355:103 or 01:355:104.

Prerequisites 01:355:101 or 01:355:103 or 01:355:104.

01:355:315 *Writing Grant Proposals (3)*
This course focuses on the theory and practice of grant writing to support research, education, or community. It includes a focus on identifying appropriate sources of grant funding, organizing research, and tailoring projects to specific audiences.
Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:355:322 ***Writing for Engineers (3)***
This project-focused course is designed to address the needs of students in engineering. Covers project proposals, patent applications, technical reports, and other engineering documents.
Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:355:342 ***Science Writing (3)***
This course provides students with practice in writing about science for general readers and presenting scientific issues or information in the genres common to journals, magazines, newspapers, and the internet.
Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:355:352 ***Writing as a Naturalist (3)***
Advanced writing course focusing on observing and writing about animals and the natural world.
Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:355:355 ***Writing in the Professions (3)***
Provides specialized writing training for professional, business, scientific, or technical fields.
Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:355:365 ***Technical Editing (3)***
Practice editing technical documents for grammar, syntax, organization, style, emphasis, and audience awareness.

Prerequisites: 01:355:101 or or 01:355:103 or 01:355:104.

01:355:375 ***Collaborative Writing Practices (3)***
Students will engage in the theory and practice of managing collaborative writing in organizations. Students will collaborate on group projects involving planning, writing, presentation, and editing tasks.
Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:355:395,396,397,398 ***Internship (3,3,3,3)***
These internships include the application of skills learned in literary studies in professional settings and an appropriately designed academic project resulting in a paper.
Prerequisite: Permission of department required to enroll in these internships. Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:355:399,400 ***CESEP Internship (1,1)***
The Civic Engagement and Service Education Partnerships (CESEP) internship is a one-credit community service placement in English.
Not for English major or minor credit. Must be taken in conjunction with designated Civic Engagement and Service Education Partnerships (CESEP) program course in the English department.

01:355:402 ***Advanced Writing Workshop (3)***
Focuses on advanced work in expository, scientific, technical, or business writing. Topics vary from semester to semester.
Prerequisite: 01:355:101 or 103 or 104 or equivalent.

01:355:410 ***Composing Graphic Narratives (3)***
Composing Graphic Narratives is an advanced writing workshop devoted to producing both fiction and non-fiction comics and other forms of text image communication. We'll explore ways to communicate information, construct

arguments, and tell stories through the medium of graphic narrative. The course approaches graphic narrative as a flexible form of writing that uses images, text, narrative structure, and page design as active parts of its language. ***Prerequisites: 01:350:101 or 01:355:101 or 01:350:103 or 01:355:103.***

01:355:415 ***Information Design (3)***
This project-focused workshop course uses specialized writing software to design and produce a portfolio of user-friendly documents for a specific audience and purpose.
Prerequisite: Complete 01:355:101 or 103 or 104 or equivalent before enrolling.

01:355:425 ***Web Authoring (3)***
This project-focused workshop course uses specialized software to design, research, generate content for, and publish a website.
Prerequisite: 01:355:101 or 103 or 104 or equivalent. May not be used for major or minor credit.

English (SAS)

English for Academic Purposes Courses (356)

English for Academic Purposes Courses (356)

01:356:152 ***Discussion and Presentation Skills (1)***This course improves listening and note-taking skills and builds confidence to speak in front of groups through individual and collaborative projects. Skills acquired through this course include planning oral presentations, developing visual aids such as PowerPoint, and responding to audience questions.***Pre- or corequisite: 01:356:155 or 156.***

01:356:155 ***English for Academic Purposes I: Writing Across Cultures (4.5)***First-year writing course for learners of English as an additional language. Reading, responding to, and critically analyzing texts from a range of perspectives and fields addressing the relationship between culture and communication.***Prerequisite Note: Placement required**

01:356:156 ***English for Academic Purposes II: Academic Writing in the United States (4.5)***First-year writing course for learners of English as an additional language. Narrative, analytical, and synthetic writing assignments, a discipline specific research project, and a final digital project showcasing critical thinking and composition.***Prerequisite: EAP I: Writing Across Cultures (01:356:155)**

Entomology 370 (SEBS)

ENTOMOLOGY 370

Degree: B.S.

Director: Chloe Hawkings (c.hawkings@rutgers.edu)

Program Webpage: http://entomology.rutgers.edu/undergraduate

Managing Department Webpage: http://entomology.rutgers.edu

The entomology major is the study of insects and their arthropod relatives. Insects are one of the most diverse and abundant organisms on the planet and play important roles in their ecosystems. Insects are exceptional models for understanding fundamental aspects of genetics, ecology, and evolution. Society benefits from diverse roles of insects as critical pollinators, sources of food in agricultural and wildlife food chains, as well as decomposers; on the flip side, many insects as well as ticks pose a danger to human health, our structures, and agriculture. Students in the Entomology major gain career opportunities in corporate and private agribusiness, urban pest management companies, scientific and technical organizations, public health agencies, local, state, and federal governments, and international organizations. Employment also exists in conservation biology, scientific policy, and environmental quality assurance. Our curriculum is flexible so students may expand their knowledge to interdisciplinary areas to meet their career goals. Students interested in the major or a double major should contact an academic advisor for additional information.

In addition to offering a major in entomology, the School of Environmental and Biological Sciences offers a minor in entomology.

Entomology 370 (SEBS)

Learning Goals

Learning Goals

Graduates of the undergraduate entomology major will have demonstrated:

1. Broad knowledge of the systematics, anatomy, physiology, ecology, and biochemistry of insects
2. Ability to explain and assess the detrimental and beneficial impacts that insects have on plants, animals, and humanity
3. Ability to design, implement, and analyze experiments or pest management programs and interpret data
4. Communication of entomological information to the scientific community and to the general public
5. Ethical principles required in professional fields

Entomology 370 (SEBS)

Graduation Requirements for the Major

Graduation Requirements for the Major

For an up-to-date description of the entomology program major requirements, courses, and course sequences, please refer to the program webpage at https://entomology.rutgers.edu/undergraduate.

SEBS UNDERGRADUATE CORE CURRICULUM (39 credits)

Options are chosen from lists of courses certified in each learning goal: https://sebs.rutgers.edu/core.

Note: The SEBS Core Curriculum requirements differ slightly from SAS Core Curriculum requirements

I. Contemporary Challenges (total 6 credits, 3 in CCO and 3 in CCD)
Suggested Course: 11:373:101 Economics, People, and Environment (CCO)
Suggested Course: 11:550:371 Agriculture and the Landscape (CCD)

II. Natural Sciences (total 6 credits, 3 in A and 3 in B)
A. Life Sciences (3 credits)
Required: 01:119:115 or 116 General Biology (4)

B. **Physical Sciences** (3 credits)
Required 01:750:193 Physics for the Sciences (4)

III. Historical Analysis (3 credits)
Suggested Course: 01:070:102 Introduction to Human Evolution

IV. Social Analysis (6 credits)
Suggested Course: 11:373:362 Natural Resource Economics
Suggested Course: 11:372:202 Environmental Issues in the USA
Suggested Course: 11:373:101 Economics, People, and Environment*
**also counted under Contemporary Challenge.*

V. Arts and the Humanities (3 credits)
Suggested Course: 01:190:101 Word Power
Suggested Course: 01:730:103 Introduction to Philosophy

VI. Writing and Communication (6 credits)
One from 01:355:101 Expository Writing (3) or 01:355:103 Exposition and Argument (3)
One from 01:355:302 Scientific and Technical Writing (3), 01:355:312 Writing for Biology and Natural Science (3), or 01:355:342 Science Writing (3)

VII. Quantitative and Formal Reasoning (6 credits)
Major required: 01:640:135 Calculus I (4)
One from 01:960:211 Statistics I (3), or 01:640:136 Calculus II for the Quantitative Social and Life Sciences (3)

VIII. Experiential Learning (3 credits)
All students are required to obtain practical experience in an area of entomology. Students can demonstrate appropriate employment or volunteer service with a public agency, private industry, nonprofit organization, or fulfill the requirement by research or field experience in suitable courses. Before starting an experienced-based course students must get the approval of their adviser. Possible courses include:
11:370:493, 494 Research problems in Entomology
11:015:497, 498 George H. Cook Scholars Program
11:902:300 and 400 SPIN Student to Professional Internship Network

Required: Entomology Major
Total 44-45 credits

01:119:115-116, 117 General Biology and Lab (4,4,2).
Note: 4 credits can be counted as SEBS core - Natural Sciences

01:160:161-162, 171 General Chemistry & Lab (4,4,1)
Note: 4 credits can be counted as SEBS core - Natural Sciences

01:640:135 Calculus I (4) or 01:960:211 Statistics I (3)
or 11:216:369 Analytical Methods in EENR (3)

11:216:351 Principles of Ecology (3)

11:370:350 Agricultural Entomology & Pest Management (3)
11:370:381 Insect Biology (4)
11:370:409 Insect Classification (4)
11:370:403 Insect Structure and Function (4)
11:370:407 Careers and Professional Development in Entomology (1)
11:370:495, 496 Seminar in Entomology (3)

Note: Seminar in Entomology is 1 credit per semester. Students are required to take a total of three times to equal 3 credits
Note: Juniors and seniors may, with the permission of the instructor and the graduate dean, register for appropriate graduate courses in entomology for elective credits.

Entomology Electives
At least 5 (15+ credits)

11:370:308 Apiculture (3)
11:370:355 Applied Acarology (3)
11:370:414 Forensic Entomology (3)
11:370:352 Toxicology of Insecticides (3)
11:776:408 Turfgrass Pest Science (4)
11:370:406 Medical & Veterinary Entomology (3)
11:370:430 Urban Entomology (3)
11:370:404 Insect Structure & Function (4)
11:370:415 Decomposition Ecology (3)
11:370:380 Insect Biotechnology (3)

Note: Additional entomology electives can be taken and counted for approved elective credits

Note: For Careers in Pest Management, the following entomology elective courses are recommended:
11:370:430 Urban Entomology (3)
11:370:352 Toxicology of Pesticides (3)
11:776:408 Turfgrass Pest Science (4)
11:370:380 Insect Biotechnology (3)

Approved General Electives
At least 8 (24+ credits)

11:573:232 Fundamentals of Environmental Geomatics (4)
11:216:371 Intro to Remote Sensing Image Analysis (3)
11:776:302 General Plant Pathology (3)
11:776:402 Principles of Weed Science (3)
11:776:405 Plant Biosecurity Issues & Technologies (3)
01:160:209 Elementary Organic Chemistry (4)
01:160:307-308 Organic Chemistry (4,4)
01:447:380 Genetics (4)
11:115:301 Introductory Biochemistry (3)
11:115:403 Biochemistry (4)
11:115:404 Biochemistry (4)
11:776:305 Plant Genetics (4)
11:216:302 Parasite Ecology (4)
11:216:317 Conservation Ecology (3)
11:216:324 Invertebrate Zoology (4)
11:216:332 Plant Ecology (4)
11:216:411 Plant Diversity & Evolution (3)
11:216:421 Wetland Ecology (3)
11:216:441 Animal Behavior (3)
11:216:464 Wildlife Ecology & Conservation (3)
11:375:407 Environmental Toxicology (3)
11:776:210 Principles of Botany (4)
11:776:382 Plant Physiology (4)
11:680:390 General Microbiology (4)
11:216:269 Evolution of Animal Behavior (3)
11:067:328 Animal Genetics (3)
11:126:481 Molecular Genetics (3)
11:126:484 Tools for Bioinformatic Analysis (3)
11:776:485 Functional Genomics for Research (3)
11:776:391 Weeds, Disease, and Insects of Plants (3)
11:020:436 Sustainable Agriculture (3)
11:020:321 Principles and Practices of Organic Farming (3)
11:375:453 Soil Ecology (3)

Note: For Careers in Pest Management, the following courses nonentomology elective courses are recommended:
11:115:301 Introductory Biochemistry (3)
11:115:403 Biochemistry (4)
11:115:404 Biochemistry (4)
11:375:407 Environmental Toxicology (3)

Environmental and Business Economics 373 (SEBS)

ENVIRONMENTAL AND BUSINESS ECONOMICS 373

Degree: B.S.

Director: Isaac Vellangany; Cook Office Building Room 112, 848-932-9131, isaacv@sebs.rutgers.edu

Program Webpage: http://dafre.rutgers.edu/ebe.html

Department of Environmental and Business Economics Webpage:http://dafre.rutgers.edu

The environmental and business economics program provides students with a foundation in the principles of economics, a knowledge of practical economic and analytical problem-solving techniques, an ability to apply economic concepts to the analysis of public and private policy issues, and an understanding of the institutional factors underlying and influencing policy decisions. The program qualifies students for a broad spectrum of positions in business and government, or for continued study at the graduate level.

To encourage students to develop depth in their understanding of the applications of economics, the curriculum offers the following four options:

Business Economics. This option includes all of the same foundation courses required in traditional business school curricula plus the additional analytical tools provided in the program's economic courses. It is this rich blend of courses such as Finance, Management, Marketing, Demand and Price Analysis, and Economics of Production that make graduates of this option so attractive to employers in business and industry as well as to those in government agencies and nonprofit organizations. Indeed, many of the graduates from this option are among the ranking economists, analysts, financial advisers, managers, marketing specialists, consultants, and policy directors in agencies and companies ranging from biotechnology and pharmaceutical industries on Wall Street to smaller organizations including small business and entrepreneurial ventures. The option familiarizes students both with analytical and decision-making techniques used in the business world and with the public and private institutional framework within which businesses operate. It is also appropriate for students who are interested in graduate studies in business management or economics.

Environmental and Natural Resource Economics. This option emphasizes the application of economics to policy issues associated with environmental problems and the utilization of natural resources. It familiarizes students both with analytical and decision-making techniques used in assessing problems of the environment and natural resources and with the institutional framework within which environmental policy must be developed. It is appropriate for students interested in employment either by private organizations concerned with environmental policies or by government agencies responsible for policies relating to the environment and natural resources and for students interested in graduate study in environmental or natural resource economics.

Food Industry Economics. This option emphasizes the application of economics in the areas of food policy, marketing, and finance. It is appropriate for students interested in employment in the food industry or by federal or state departments of agriculture and for students interested in graduate study in agricultural economics.

Food Science and Management Economics. This option, offered in cooperation with the food science curriculum, is designed for students with a strong interest in the management aspects of food science, process, production, and product development. While the option requirements of both programs are similar, students seeking degrees in environmental and business economics take additional courses in economics. This option is appropriate for students interested in employment in the food industry or in graduate study in agricultural economics, economics, or business administration.

Environmental and Business Economics 373 (SEBS)

Learning Goals

Learning Goals

After completing the program in environmental and business economics students will be able to:

1. utilize and explain core economic, management, financial, and accounting concepts;

2. apply economic theories and concepts to contemporary social issues, as well as the formulation of policy;

3. demonstrate quantitative reasoning skills;

4. recognize the role of ethical values in economic decisions; and

5. demonstrate critical and effective communication skills.

Environmental and Business Economics 373 (SEBS)

Entry Requirements for the Major

Entry Requirements for the Major

Official admission to the major requires completion of introductory courses in micro- and macroeconomics, a semester of calculus, and a semester of statistics, with grades of C or better. These four courses are prerequisites to junior- and senior-level courses in the required option areas. Students may, however, declare the major before completing these four courses.

Environmental and Business Economics 373 (SEBS)

Graduation Requirements for the Major

Graduation Requirements for the Major

For an up-to-date description of environmental and business economics major requirements, courses, and course sequences please refer to the program webpage at http://dafre.rutgers.edu/ebe.html.

SEBS UNDERGRADUATE CORE CURRICULUM (39 credits)

Contemporary Challenges (6 credits) *Two courses, one in each of the Contemporary Challenges areas: Diversities and Social Inequalities* [CC-D] *and Our Common Future* [CC-O]

Experiential Learning (3 credits) *Students must participate in a certified experience that meets this goal* [EL]

Natural Sciences (6 credits) *Students must take two courses, one each in two of the following areas: physical, biological, or environmental sciences* [NS]

Historical Analysis (3 credits) *Students must take one course* [HST]

Social Analysis (6 credits) *SEBS students must complete two courses, one in either social/cultural analysis or economic analysis, and one in governmental and regulatory analysis* [SCL]

Arts and Humanities (3 credits) *Students must complete one course* [AH]

Writing and Communication (6 credits) *Students must take 01:355:101 or its equivalent [WC] and one course that fulfills the learning goal, communicate effectively in modes appropriate to a discipline or area of inquiry* [WCD].

Quantitative and Formal Reasoning (6 credits) *Students must take two courses* [QQ; QR]

Major Requirements for All Students Regardless of Matriculation Date

Proficiency in Environmental and Business Economics (55-70 credits)

A. REQUIRED COURSES (22-23)

Quantitative Skills (10)

11:373:211 Applied Mathematical Concepts in Ag Economics I (4) or 01:640:1__ CALC1 (4)

11:373:215 Applications of Statistics in Business Economics (3) or 01:960:285 Introductory Statistics for Business (3) or 01:960:211 Statistics I (3)

11:373:200 Agricultural Accounting (3) or 33:010:272 Introduction to Financial Accounting (3)

Computer and Information Technology Competence (3)

11:373:210 Business Decision Computer Tools (4) or 01:198:170 Computer Applications for Business (3)

Professional Ethics

11:373:201 Corporate Social Responsibility (3)

Additional Requirements (9)

11:373:241 Introduction to Management (3)

11:373:321 Economics of Production (3)

11:373:422 Demand and Price Analysis (3)

B. OPTIONS (33-44)

Majors must complete all option-required courses with a grade of C or better. No more than one grade of D is allowed in the remaining option elective courses.

1. Business Economics (33-35)

Required courses (12)

11:373:201 Corporate Social Responsibility (3) or equivalent

11:373:231 Introduction to Marketing (3)

11:373:341 Organizational Dynamics (3)

11:373:351 Business Finance I (3)

Electives (21-23)

At least three of the following business/economics courses:

01:220:300 International Economics (3)

01:220:301 Money and Banking (3)

01:220:302 Labor Economics (3)

01:220:308 Introduction to Managerial Economics (3)

01:220:311 Methods of Cost Benefit Analysis (3)

01:220:322 Econometrics (3)

01:220:394 Economics of Capital Markets (3)

01:220:415 Portfolio Theory (3)

11:373:331 Economics of Food Marketing Systems (3)

11:373:352 Economics of Futures Markets (3)

11:373:402 Global Marketing (3)*

11:373:403 Innovation and Entrepreneurship (3)*

11:373:425 Econometric Applications (3)

11:373:451 Business Finance II (3)

11:373:465 Business Research (4)*

At least two of the following policy courses:

11:373:202 Sustainability Decision Tools (3)

11:373:218 Sustainable Food Policy for Developing Countries (3)

11:373:323 Agricultural and Food Policy (3)

11:373:335 Energy Economics and Policy (3)

11:373:361 Land Economics (3)

11:373:362 Natural Resource Economics (3)

11:373:363 Environmental Economics (3)

11:373:371 Food, Nutrition, and Health (3)

11:373:404 Bioscience Policy (3)

11:373:431 International Trade Policy (3)

11:374:313 Environmental Policy and Institutions (3)

11:374:314 Human Dimensions of Natural Resource Management (3)

01:790:237 Political Economy and Society (3)

01:790:305 Public Policy Formation (3)

01:790:327 International Political Economy (3)

01:790:337 American Political Economy (3)

01:790:338 Government and Business (3)

11:374:315 International Environmental Policy (3)

At least two additional courses in environmental and business economics (373), economics (220), or Calculus II.

2. Environmental and Natural Resource Economics (33-34)

Required courses (12)

11:373:201 Corporate Social Responsibility (3) or equivalent

11:373:361 Land Economics (3)

11:373:362 Natural Resource Economics (3)

11:373:363 Environmental Economics (3) or 01:220:332 Environmental Economics (3)

Electives (21-22)

At least three of the following courses in problem solving or policy analysis:

01:220:311 Methods of Cost Benefit Analysis (3)

01:220:386 Operations Research I (3)

01:220:395 Law and Economics (3)

01:790:305 Public Policy Formation (3)

01:960:337 Managerial Statistics (3)

11:372:232 Fundamentals of Environmental Geomatics (3)

11:373:351 Business Finance I (3)

11:373:425 Application of Econometrics in Agricultural Economics (3)

11:375:333 Environmental Law I (3)

11:375:409 Environmental Statement and Impact (3)

At least one of the following courses in policy applications:

01:450:140 The Greenhouse Effect (3)

01:450:370 Global and Regional Climate Change (3)

11:373:231 Introduction to Marketing (3)

11:373:335 Energy Economics and Policy (3)

11:373:404 Bioscience Policy (3)

11:374:315 International Environmental Policy (3)

11:375:301 Environment and Health (3)

11:375:410 Workshop in Environmental Assessment and Impact (3)

11:375:421 Air Pollution (3)

11:628:401 Science in Shoreline Management (3)

11:704:451 Ecosystems Ecology and Global Change (3)

At least one of the following interdisciplinary courses:

01:512:323,324 History of the North American Environment (3,3)

10:975:315 Theory and Methods of Land-Use Planning (3)

11:372:231 Fundamentals of Environmental Planning (3)

11:372:384 A Systems Approach to Environmental and Agricultural Issues (3)

11:373:431 International Trade Policy (3)

11:375:333,334 Environmental Law I,II (3,3)

11:704:351 Principles of Ecology (3)

Two additional courses in environmental and business economics (373), economics (220), or Calculus II.

3. Food Industry Economics (33-35)

Required courses (12)

11:373:201 Corporate Social Responsibility (3) or equivalent

11:373:231 Introduction to Marketing (3)

11:373:331 Economics of Food Marketing Systems (3)

11:373:341 Management: Human Systems Development (3)

Electives (21-23)

Four of the following courses, of which at least three must come from group A:

A. Courses in business strategy/policy

11:373:205 Small Business Essentials (3)

11:373:323 Agriculture and Food Policy (3)

11:373:351 Business Finance I (3)

11:373:352 Economics of Futures Markets (3)

11:373:371 Food, Nutrition, and Health (3)

11:373:402 Global Marketing (3)*

11:373:403 Innovation and Entrepreneurship (3)*

11:373:425 Econometric Applications (3) *or* 01:220:322 Econometrics (3)

11:373:451 Business Finance II (3)

11:373:465 Business Research (4)*

B. Courses in environmental/resource economics

11:373:335 Energy Economics and Policy (3)

11:373:361 Land Economics (3)

11:373:362 Natural Resource Economics (3)

11:373:363 Environmental Economics (3)

At least 3 credits of courses in one of the following areas: animal science (067), soils (in environmental sciences 375), food science (400), nutritional sciences (709), or plant biology (776).

At least two additional courses in environmental and business economics (373), economics (220) or Calculus II.

4. Food Science and Management Economics (43-44)

Required courses in the sciences (26)

01:160:209 Elementary Organic Chemistry (3)

11:400:201 Principles of Food Science (3)

11:400:301 Food Processing Technologies (4)

11:400:405 Sensory Evaluation of Foods (3)

11:400:411 Food Chemistry (3)

11:400:412 Food Product Development (3)

11:400:423 Food Microbiology (3)

11:680:390 General Microbiology (4)

Required courses related to business management (17-18)

11:373:201 Corporate Social Responsibility (3) or 11:400:314 Current Issues in Food Science (2) or equivalent

11:373:231 Introduction to Marketing (3)

11:373:321 Economics of Production (3)

11:373:323 Agricultural and Food Policy (3) or 11:373:371 Food, Nutrition, and Health (3)

11:373:351 Business Finance I (3)

11:373:422 Demand and Price Analysis (3)

**Fulfills SEBS Experience-Based Education requirement.*

Unspecified Electives

In addition to courses meeting the above requirements, students can take other courses offered by the university, for which they meet the course eligibility requirements, to bring their total number of credits to the minimum of 120 (matriculated 2018 or later) or 128 (matriculated prior to 2018) required for graduation.

Minors and Certificate Programs (SEBS)

MINORS AND CERTIFICATE PROGRAMS

The following minors and interdisciplinary certificate programs in a number of the mission areas of the School of Environmental and Biological Sciences are open to all undergraduate students at Rutgers. Options in several of the minors indicate either a subject-matter emphasis or a degree of expertise in cognate fields represented by the courses of the option. Certificates are awarded only with or subsequent to the awarding of a baccalaureate degree in an approved major. The minors are listed first (alphabetically), followed by the certificate programs.

Minor in Agriculture and Food Systems (18 credits)

Minor in Agroecology (21-24 credits)

Minor in Animal Science (22-24 credits)

Minor in Biochemistry (23-25 credits)

Minor in Community Health Outreach (22 credits)

Minor in Creative Expression and the Environment (18 credits)

Minor in Culinary Nutrition

Minor in Ecology, Evolution, and Natural Resources (20-23 credits)

Minor in Entomology (19-26 credits)

Minor in Environmental and Business Economics (21-23 credits)

Minor in Environmental Geomatics (19 credits)

Minor in Environmental Planning (18 credits)

Minor in Environmental Policy, Institutions, and Behavior (21 credits)

Minor in Environmental Sciences (21 credits)

Minor in Fisheries Science (21-22 credits)

Minor in Food Science (18-21 credits)

Minor in Green Technology (20 credits)

Minor in Horticultural Therapy (18 credits)

Minor in Landscape Design

Minor in Leadership Skills (21-22 credits)

Minor in Marine Sciences (18 credits)

Minor in Medicinal and Economic Botany (18-19 credits)

Minor in Meteorology (18 credits)

Minor in Microbiology (19-21 credits)

Minor in Nonprofit Leadership (23 credits)

Minor in Nutrition (20-24 credits)

Minor in Plant Science (18-20 credits)

Minor in Public Garden Management

Minor in Science Communication (18 credits)

Minor in Sustainable Global Food Systems (18 credits)

Minor in Sustainability

Minor in Urban Forestry (21 credits)

Certificate in Environmental Geomatics (19 credits)

Certificate in Environmental Planning (21 credits)

Certificate in Evolutionary Medicine

Certificate in Food Systems Education and Administration (21-22 credits)

Certificate in Horticultural Therapy (34-37 credits)

Certificate in Medicinal and Economic Botany (25 credits)

Certificate in Plant Biosecurity (25 credits)

Turfgrass Science Certificate Program (25-28 Credits)

Environmental Planning 573 (SEBS)

ENVIRONMENTAL PLANNING 573

Degree: B.S.

Director: Frank Gallagher (gallagher@sebs.rutgers.edu)

Program Webpage: https://landarch.rutgers.edu/environmental-planning.html

Managing Department Webpage: http://landarch.rutgers.edu

The Environmental Planning curriculum provides a broad educational experience emphasizing an understanding of planning and management of the physical and cultural environments. The program strives to consider our relationship with the land, in an effort to foster ethical planning solutions. A program that promotes sustainability regardless of location, strives for social equity, and envisions a post-industrial landscape that provides ecological services.

Environmental Planning Major: The environmental planning curriculum provides a broad educational experience emphasizing an understanding of planning and management of the physical and cultural environments. The program strives to consider our relationship with the land, in an effort to foster ethical planning solutions. The program promotes sustainability regardless of location, strives for social equity, and envisions a postindustrial landscape that provides ecological services.

Environmental Planning Minor: Environmental planning requires the integration of environmental information into the planning process and is concerned with the protection and enhancement of environmental systems while meeting demands for growth and development. This minor is intended for students from any discipline, who are interested in pursuing professional careers in environmental planning and related areas. It also provides a basis for graduate and professional studies. An environmental planning certificate program is also available for students in other programs of study as well as all minors of this major. View course requirements for minor.

Environmental Geomatics Minor: Environmental geomatics synthesizes a number of concepts and techniques, including remote sensing, spatial analysis, geographic information systems (GIS), and global positioning systems (GPS) that are used to improve the planning and management of natural resource systems. These techniques include the development of complex spatial databases from a wide range of data sources and the application of this information to solve environmental problems. The minor is intended for students interested in pursuing professional careers in environmental planning/management, remote sensing, and geomatics, and provides a basis for graduate and professional studies. An environmental geomatics certificate program also is available for students in other programs of study as well as all minors of this major. View course requirements for minor.

Green Technologies Minor: As individuals, businesses, and communities seek solutions to pressing environmental concerns, the green technology minor is positioned as an emerging source of innovation, entrepreneurialism, and action towards the development of sustainable land use practices. This minor seeks to provide students with a broad-based education in preparation for careers in landscape-related industries such as contracting, maintenance, nursery production, and garden-center operations. While covering pragmatic issues associated with the maintenance and management of gardens and properties, the curriculum also gives students opportunities to study best practices and new approaches to on-site stormwater management, energy production, and healthy ecological systems. View course requirements for minor.

Urban Forestry Minor: Urban and community forestry is the fastest growing segment of the forestry profession, especially in the northeast, where the total expenditure of time and money on community forestry (nursery, planting, pruning, removals, and line clearance) exceeds that spent on woodlands. This certificate is designed to provide students with the necessary credentials for employment by providing the fundamental knowledge and expertise required for this field. View course requirements for minor.

Learning Goals

Learning Goals

1) Understand, analyze, and incorporate natural features and systems in planning and land management practices.

2) Analyze and incorporate social, cultural, and behavioral factors in planning.

3) Understand the history of environmental planning and policy, including contemporary and sustainable practices and their impact on people and the land.

4) Evaluate implications of institutions and policy in terms of their ability to shape sustainable regions.

5) Effectively communicate with the public, communities, and policy makers on issues of land stewardship, environmental justice, and social well-being.

Environmental Planning 573 (SEBS)

Graduation Requirements for the Major

Graduation Requirements for the Major

For an up-to-date description of environmental planning major requirements, courses, and course sequences, please refer to the program webpage at https://landarch.rutgers.edu/ep-course-sequence.html.

SEBS UNDERGRADUATE CORE CURRICULUM (39 credits)

Contemporary Challenges (6 credits) *Two courses, one in each of the Contemporary Challenges areas: Diversities and Social Inequalities* [CC-D] *and Our Common Future* [CC-O]

Experiential Learning(3 credits)*Students must participate in a certified experience that meets this goal*[EL]

Natural Sciences(6 credits)*Students must take two courses, one each in two of the following areas: physical, biological, or environmental sciences*[NS]

Historical Analysis(3 credits)*Students must take one course*[HST]

Social Analysis(6 credits)*SEBS students must complete two courses, one in either social/cultural analysis or economic analysis, and one in governmental and regulatory analysis*[SCL]

Arts and Humanities(3 credits)*Students must complete one course*[AH]

Writing and Communication(6 credits)*Students must take 01:355:101 or its equivalent [WC] and one course that fulfills the learning goal, communicate effectively in modes appropriate to a discipline or area of inquiry*[WCD].

Quantitative and Formal Reasoning (6 credits) *Students must take two courses* [QQ; QR]

Graduation Requirements: Major in Environmental Planning (573)

The environmental planning curriculum provides a broad educational experience emphasizing an understanding of planning and management of the physical and cultural environments. The program strives to consider our relationship with the land, in an effort to foster ethical planning solutions. A program that that promotes sustainability regardless of location, strives for social equity and envisions a post-industrial landscape that provides ecological services.

Course Number	Credits	Name	SEBS

16:550:545	3	Intro. Geomatics	
11:216:474	3	Adv. Geomatics	
TOTAL	**71**		
Cannot use planning electives twice within the major.			

List of suggested but not required certificates/minors and required number of credits:

Certificate Programs:
Environmental Geomatics (19)

Minor Programs:
Agroecology (21-24)
Ecology, Evolution, and Natural Resources (20-23)
Environmental and Business Economics (21-23)
Entomology (19-26)
Environmental Policy, Institutions, and Behavior (21)
Environmental Sciences (21)
Marine Sciences (18)
Meteorology (18)
Plant Science (18-20)
Urban Forestry (21)

Environmental Policy, Institutions, and Behavior 374 (SEBS)

ENVIRONMENTAL POLICY, INSTITUTIONS, AND BEHAVIOR 374

Degree: B.S.

Director: Rachael Shwom (shwomrac@sebs.rutgers.edu)

Program Website: http://humeco.rutgers.edu/undergrad.asp

Managing Department (Department of Human Ecology): http://humeco.rutgers.edu

Program Description

Environmental policy, institutions, and behavior (EPIB) examines the human dimensions of environmental problems. It addresses such issues as how human actions affect the environment; how societies adapt to changes in natural resource availability; and how individuals, nations, and international agencies respond to environmental hazards. Courses in the program deal with local, regional, and national differences in the use of resources; social and environmental aspects of health and illness; alternative strategies for environmental management; ethical, moral, and legal dimensions of environmental and resource issues; and the roles of governmental and nongovernmental agencies in environmental affairs.

To understand these topics, students are exposed to a multidisciplinary view of the environment and draw upon concepts from a variety of fields, including anthropology, ecology, economics, geography, sociology, political science, and psychology.

The objectives of the curriculum are to teach basic concepts and methods from the social, biological, and physical sciences as they relate to the interactions among people and the environment; to train students in the techniques of empirical research; to provide opportunities for experiences in real-world situations; to guide students in acquiring practical skills such as environmental assessment, professional writing, data analysis, and demographic analysis; and to broaden students' knowledge regarding environmental problems and how people cope with them.

Graduates are prepared for careers in health and environmental agencies at all levels of government, nonprofit organizations in the United States and internationally, and private companies, including environmental consulting firms, pharmaceutical companies, and green businesses. Some students also pursue graduate or professional studies in the social sciences, public health and medicine, public administration, law, and international development.

Environmental Policy, Institutions, and Behavior 374 (SEBS)

Learning Goals

Learning Goals

Learning goals for the environmental policy, institutions, and behavior major:

Goal 1

Students graduating from the major will understand and analyze the varied perspectives offered by the social and natural sciences regarding the causes and consequences of social, ecological, and environmental change. This includes interactions among natural resources, climate, population, energy use and technology, health, forces of globalization, social institutions, and cultural values.

Graduates should be able to:

1.1 Describe major patterns and drivers of natural resource use, pollution, and climate and environmental change.

1.2 Identify different approaches to the governance and management of human activities that affect the environment, both in the United States and abroad, including institutions, property relations, management regimes, politics, and policies.

1.3 Explain characteristics of human populations, including population growth, demographic transitions, social stratification, consumption, and indicators of human welfare.

1.4 Describe technological trends affecting human well-being and the environment including energy use and development, biotechnology, and geospatial and communication technologies.

1.5 Evaluate major issues in health, including race, gender, and socioeconomic position, food and nutrition access and policies, cultural factors, and understanding of risk and vulnerability.

1.6 Discuss the dynamics of development and globalization, including historical antecedents, current trends and pathways, and local responses to global forces.

1.7 Explain how social forces, cultural values, and behavior affect human environmental interactions, including issues such as political and economic relations, inequality, access to resources, and interactions between human diversity and biological diversity.

Goal 2

Students will acquire the skills to use appropriate conceptual and methodological tools to structure inquiries about human-environment interactions.

Graduates should be able to:

2.1. Assess the relevant contexts for addressing environmental problems at the appropriate spatial, temporal, and organizational scale(s).

2.2. Identify the relevant biological, historical, sociocultural, governance, and political issues that need to be addressed.

2.3. Identify what constitutes valid and relevant evidence to address the question and demonstrate an ability to understand and work with quantitative information.

2.4. Conduct ethical primary and secondary research using appropriate methods and considering relevant community norms.

2.5. Analyze and interpret evidence.

2.6. Identify appropriate governance tools to manage human-environment impacts and be capable of engaging with regulatory, legislative, and other democratic processes.

2.7. Apply this understanding to identify policies and plans that address the problem.

2.8. Identify different decision-making processes and criteria for selecting from among alternatives.

2.9. Evaluate the alternatives' environmental and differentiated social consequences.

2.10. Identify relevant audiences, determine communication goals, and communicate the results in oral and/or written form in a manner effective for each targeted audience.

2.11. Work effectively in team settings.

Goal 3

Students will undertake their work guided by ethical considerations. They will identify their own values with respect to environmental, health, and food issues. They will evaluate and address the ethical dimensions and implications of related problems, assessments, plans, and communication, including their differentiated social impacts.

Environmental Policy, Institutions, and Behavior 374 (SEBS)

Graduation Requirements for the Major

Graduation Requirements for the Major

For an up-to-date description of environmental policy, institutions, and behavior major requirements, courses, and course sequences please refer to the program webpage at http://humeco.rutgers.edu/undergrad.asp.

SEBS UNDERGRADUATE CORE CURRICULUM (39 credits)

Contemporary Challenges (6 credits) *Two courses, one in each of the Contemporary Challenges areas: Diversities and Social Inequalities* [CC-D] *and Our Common Future* [CC-O]

Experiential Learning (3 credits) *Students must participate in a certified experience that meets this goal* [EL]

Natural Sciences (6 credits) *Students must take two courses, one each in two of the following areas: physical, biological, or environmental sciences* [NS]

Historical Analysis (3 credits) *Students must take one course* [HST]

Social Analysis (6 credits) *SEBS students must complete two courses, one in either social/cultural analysis or economic analysis, and one in governmental and regulatory analysis* [SCL]

Arts and Humanities (3 credits) *Students must complete one course* [AH]

Writing and Communication (6 credits) *Students must take 01:355:101 or its equivalent* [WC] *and one course that fulfills the learning goal, communicate effectively in modes appropriate to a discipline or area of inquiry* [WCD].

Quantitative and Formal Reasoning (6 credits) *Students must take two courses* [QQ; QR]

Major Requirements for All Students Regardless of Matriculation Date

Requirement V8: Foundation courses (15 credits)

11:374:101 Introduction to Human Ecology
11:374:279 Politics of Environmental Issues
11:374:305 Globalization, Development, and Environment
11:374:312 Environmental History
11:374:460 Environmental Law and Policy

Requirement V9: Methods (9 credits)

Statistics (choose one):
01:960:211 Statistics I
01:960:401 Basic Statistics for Research
10:762:205 Basic Statistical Methods for Policy, Planning, and Health
11:374:302 Data Analysis in Human Ecology

Required:
11:374:110 Theories and Reasoning in Human Ecology
11:374:201 Research Methods

Requirement V10: Math Proficiency

Notes: All students must place in Precalculus or higher or complete Intermediate Algebra (01:640:026)

Requirement V11: Skills (9 credits)

Required:
11:374:220 Environmental Solutions
11:374:280 Careers in EPIB

Communication, choose one:
11:374:225 Environment in Society and Mass Media
11:374:240 Visualizing Information: Storytelling with Data
11:374:310 Storytelling About Science
11:374:311 Environmental Writing
11:374:325 Environmental Communication

Requirement V12: Experiential Learning Requirement (3 credits)

Choose one:
11:374:399 Practicum in Sustainability
11:374:481 Watershed Management Internship
11:374:482 Climate Action Internship
11:374:483 Science and Communication Internship
11:374:490 Readings and Practicum in Human Ecology
11:374:492 Environmental Studies Internship

Requirement V13: Policy, Governance, and Management Cluster (3 credits)

Choose one:
11:374:175 Energy and Society
11:374:115 Water and Society
11:374:313 U.S. Environmental Policy
11:374:314 Natural Resource Policy
11:374:428 Marine Fisheries Policy
11:374:462 International Environmental Law

Requirement V14: Food, Health, and Disease Cluster (3 credits)

Choose one:
11:374:141 Health and Society
11:374:430 Risk, Health, and Safety
11:374:436 Segregation and Health
11:374:437 Culture and Health
11:374:438 Health in the Latino Community

Requirement V15: Globalization, Development, and Sustainability Cluster (3 credits)

Choose one:
11:374:289 Sustainable Food: Politics, Policy, and Ethics
11:374:299 Introduction to Sustainability
11:374:426 Climate Change Policy
11:374:429 Agrarian Landscapes

Requirement V16: People, Communities, and the Environment Cluster (3 credits)

Choose one:
11:374:223 Urban Society and Environment
11:374:322 Environmental Behavior
11:374:335 Communities and Environmental Change
11:374:440 Race and the Environment
11:374:416 Environmental Education
11:374:433 Environmental Justice

Requirement V17: Upper-Level Classes (6 credits)

Choose two additional 374 courses at the 300-400 level that are not being counted to fulfill other requirements. **Please note: 11:374:490, 11:374:491, and 11:374:492 cannot count toward this requirement.**

Requirement V18: Capstone (3 credits)

Choose one:
11:374:499 Capstone in Human Ecology
11:015:497 George H. Cook Honors
11:015:498 George H. Cook Honors
11:374:491 Capstone Independent Study

Unspecified Electives

In addition to courses meeting the above requirements, students can take other courses offered by the university, for which they meet the course eligibility requirements, to bring their total number of credits to the minimum of 120 (matriculated 2018 or later) or 128 (matriculated prior to 2018) required for graduation.

Environmental Sciences 375 (SEBS)

ENVIRONMENTAL SCIENCES 375

Degree: B.S.

Department: Environmental Sciences

Department Chair: Donna Fennell

Department Website: www.envsci.rutgers.edu

Undergraduate Program Director: Jeffra Schaefer

The environmental sciences program is designed to provide students with an understanding of the application of the biological, chemical, and physical sciences to problems in the environment. The core emphasizes the chemical, physical, and biological principles, and options and electives allow specialization in the study of air, water, or soils, as well as pollution and treatment sciences, and environmental health.

With the consultation of a faculty adviser, students can design a program to meet the requirements for graduate study or to provide the basis for a professional career in government, education, consulting, or industry.

The program offers a bachelor of science (B.S.) in environmental sciences, as well as a minor in environmental sciences. Within the B.S. program, we offer three options: environmental science, applied environmental science, and environmental health. The differences between the options are not large, but generally the environmental science option is more theoretical and is preferred by students considering graduate school, while the applied option is more practical and is intended to prepare students for careers in the environmental field. The environmental health option is geared toward careers in health, such as the occupational health and safety arena.

Environmental science offers a co-terminal 4+1 BS+MS program where students can pursue a 5-year joint Bachelor of Science (B.S.) and Master of Science (M.S.) degree in environmental science (website: https://envsci.rutgers.edu/academics/envsci_grad/). Likewise, students can apply for the Accelerated Bachelors and Masters of Public Health degrees (BS/MPH) at Rutgers (website: https://sph.rutgers.edu/academics/ba-ru.html). Students interested in this either opportunity should discuss specific course requirements with their adviser or the undergraduate program director of environmental science.

Students can meet the requirements for the 40-hour OSHA Hazardous Waste Operations and Emergency Response certification by including the following course in their program:

11:375:434 Principles of Industrial Hygiene (3)

Environmental Sciences 375 (SEBS)

Learning Goals

Learning Goals

Students completing this program will be able to:

1. Apply knowledge, skills, and techniques from the sciences and mathematics to identify, characterize and provide solutions to environmental problems
2. Design and conduct experiments, analyze, and interpret data to draw informed conclusions
3. Communicate technical information effectively (orally, in writing, and through electronic media)
4. Function effectively on teams to accomplish collaborative tasks
5. Recognize and discuss the ethical and professional responsibilities of environmental scientists in addressing contemporary environmental science issues and the impact of environmental science in a global and societal context

Environmental Sciences 375 (SEBS)

Graduation Requirements for the Major

Graduation Requirements for the Major

For an up-to-date description of the environmental science major requirements, courses and course sequences please refer to the program webpage at http://envsci.rutgers.edu/academics/envsci/graduation_requirements.html.

SEBS UNDERGRADUATE CORE CURRICULUM (39 credits)

Options are chosen from lists of courses certified in each learning goal: https://sebs.rutgers.edu/core.

Note: The SEBS Core Curriculum requirements differ slightly from SAS Core Curriculum requirements

Contemporary Challenges (6 credits) *Two courses, one in each of the Contemporary Challenges areas: Diversities and Social Inequalities* [CC-D] *and Our Common Future [CC-O]*

Experiential Learning (3 credits) *Students must participate in a certified experience that meets this goal* [EL]

Natural Sciences (6 credits) *Two courses, one each in two of the following areas: physical, biological, or environmental sciences* [NS]

Historical Analysis (3 credits) *One course* [HST]

Social Analysis (6 credits) *Two courses, one in either social/cultural analysis or economic analysis, and one in governmental and regulatory analysis* [SCL]

Arts and Humanities (3 credits) *One course* [AH]

Writing and Communication (6 credits) *01:355:101 or its equivalent* [WC] *and one course in communicating effectively in modes appropriate to a discipline or area of inquiry* [WCD]

Quantitative and Formal Reasoning (6 credits) *Two courses* [QQ; QR]

Graduation Requirements for the Major

Students matriculating prior to the fall semester 2015 in the School of Environmental and Biological Sciences (SEBS) must complete the SEBS general education requirements. In addition, students majoring in environmental sciences must complete the major requirements described below.

Students matriculating fall 2015 or after and transfer students matriculating in 2016 and after must complete a goal-based Core Curriculum in place of general education requirements. The goal-based core is described here: http://sebs.rutgers.edu/core. Courses are certified for the Core Curriculum by a faculty committee. A current list of certified courses can be found here: http://sebs.rutgers.edu/core. Environmental sciences major requirements are as described below.

For an up-to-date description of environmental sciences major requirements, courses, and course sequences please refer to the program webpage at http://envsci.rutgers.edu/academics/envsci/graduation_requirements.html.

PROFICIENCY IN THE ENVIRONMENTAL SCIENCES (63-82 credits)

1. Biological and Physical Sciences (24-34)

01:119:103 Principles of Biology (3) or 01:119:115-116 General Biology I & II (3,3)1
01:160:161-162 General Chemistry (4,4)1
01:160:171 Introduction to Experimentation (1)
01:160:209 Elementary Organic Chemistry (3) or 01:160:307-308 Organic Chemistry (4,4)
01:750:193-194 Physics for the Sciences (4,4) or 01:750:203-204 General Physics (3,3)1
11:216:351 Principles of Ecology (3)

2. Quantitative Skills (7)

Calculus I (4)2
Choose one of the following:

i. 01:960:211 Statistics I (3)3 or equivalent
ii. 11:375:303 Numerical Methods in Environmental Science (3)
iii. 11:573:232 Fundamentals of Geomatics (3)

3. Environmental Sciences (12)

11:375:201 Biological Principles of Environmental Sciences (3)
11:375:202 Chemical Principles of Environmental Sciences (3)
11:375:203 Physical Principles of Environmental Sciences (3)
11:375:310 Analytical Environmental Chemistry Laboratory (3)4

4. Environmental Science Lab Course, *choose one* (2-4)

11:375:312 Environmental Microbiology Laboratory (2)
11:375:360 Soils and Water (4)
11:375:424 Air Sampling Techniques (3)

Also choose from one of the following options:

Environmental Science Option (25)
01:640:1 Calculus 2 (4)
11:375:423 Environmental Fate and Transport (3)
Environmental Science Option Courses, choose *three* (9)
11:375:346 Introduction to Atmospheric Chemistry (3)
11:375:340 Environmental Applications of Organic Chemistry (3)
11:375:302 Water and Wastewater Treatment (3)
11:375:411 Environmental Microbiology (3)
11:375:444 Water Chemistry (3)
11:375:453 Soil Ecology (3)
Electives, *see below (9)*

Applied Environmental Option (24)
11:375:302 Water and Wastewater Treatment (3)
11:375:307 Solid Waste Management and Treatment (3)
11:375:430 Hazardous Waste (3)
11:375:407 Environmental Toxicology (3)
Electives, *see below (12)*

Environmental Health Option (23-25)
11:375:302 Water and Wastewater Treatment (3)
11:375:307 Solid Waste Management and Treatment (3)
11:375:407 Environmental Toxicology (3) or ENOH 0594 Environmental and Occupational Toxicology (3)*
10:832:335 Epidemiology (3) or PHCO 0502 Principles and Methods of Epidemiology (3)*
Microbiology course, choose one (2-4):
11:375:312 Environmental Microbiology Laboratory (2) (if not already used for other major requirement)
11:680:201 Introduction to Microbiology (3)
11:680:390 General Microbiology (4)
Electives, see below (9)

*School of Public Health classes for B.S./M.P.H students or B.S. students with permission.

ELECTIVES

Students can choose from any 300- or 400-level 375 course or any of the following list of non-375 courses. **Note that to satisfy as an elective course, it must not already be used to satisfy other environmental science major or option requirements.**

Possible electives:
11:680:201 Introduction to Microbiology (3)
11:680:390 General Microbiology (4)
11:374:460 Environmental Law and Policy I - Nature, Law, and Society (3)
11:375:302 Water and Wastewater Treatment (3)
11:375:303 Numerical Methods (3)
11:375:307 Solid Waste Management and Treatment (3)
11:375:322 Energy, Technology, and its Environmental Impact (3)

11:375:340 Environmental Applications of Organic Chemistry (3)
11:375:346 Introduction to Atmospheric Chemistry (3)
11:375:360 Soils and Water (4)
11:375:407 Environmental Toxicology (3)
11:375:411 Environmental Microbiology (3)
11:375:421 Principles of Air Pollution (3)
11:375:423 Environmental Fate and Transport (3)
11:375:424 Air Sampling and Analysis Techniques (3)
11:375:430 Hazardous Wastes (3)
11:375:434 Principles of Industrial Hygiene (3)
11:375:444 Water Chemistry (3)
11:375:450 The Terrestrial Carbon Cycle (3)
11:375:453 Soil Ecology (3)
11:375:474 Coastal Biogeochemical Cycles in a Changing World (3)

_____

1Satisfies SEBS Natural Science [NS] requirement
2Satisfies SEBS Mathematical or Formal Reasoning [QR] requirement
3Satisfies SEBS Quantitative Information [QQ] requirement
4Satisfies SEBS Discipline-Based Writing and Communication [WCd] requirement

Environmental Studies 381 (SAS)

ENVIRONMENTAL STUDIES 381

Department of Geography, School of Arts and Sciences

Website: https://geography.rutgers.edu/environmental-studies-2

Chair: Kevin St. Martin

Director of Undergraduate Studies: Asa K. Rennermalm

The environmental studies program provides an interdisciplinary curriculum that spans the natural sciences, social sciences, and humanities. Distribution requirements enable students to develop a broad understanding of complex environmental issues that entails thinking beyond existing disciplinary frameworks and boundaries.Through their coursework, environmental studies students acquire skill sets--in historical and scientific inquiry; critical thinking and effective communication; and social, cultural, and political analysis--that are essential to solving contemporary environmental problems. Students in the program are trained in the use of digital mapping and spatial analytical tools that are increasingly in demand by governmental agencies, nonprofit organizations, and the private sector, preparing them for a range of professional opportunities.

Learning Goals

Learning Goals

This program has four learning goals. Students who complete the programs will:

1. Environmental Literacy: Understand and be able to articulate, both orally and in writing, the core principles, concepts, and theories that form the field¿s interdisciplinary foundation in the humanities, social sciences and natural sciences.

2. Environmental Justice: Be aware of the ways that social inequality and unequal power structures shape people¿s exposure and vulnerability to environmental risks/problems.

3. Environmental Methods/Techniques/Strategies of Interpretation: Be able to demonstrate proficiency in at least one method, technique, or strategy of interpretation for environmental inquiry in the natural sciences, social sciences and/or humanities.

4. Environmental Problem Solving Be able to apply perspectives from the social sciences, natural sciences and humanities in an integrated fashion to analyze concrete environmental problems and evaluate diverse approaches to addressing these problems.

Environmental Studies 381 (SAS)

Major Requirements

Major Requirements

The major in environmental studies (ENVS) is available only as a second major to students within the School of Arts and Sciences. It consists of 36 credits of coursework reflecting the program's four-field approach (natural sciences, humanities, social sciences, and methods/techniques).

At least 18 of these credits must be earned through coursework at the 300 level or higher. No more than 9 of these credits can be double-counted for either the student's primary major or any other degree. No more than one D grade will be accepted for credit toward the major.

Dual Major Requirement

The major in environmental studies is designed as a second major and it is meant to complement a student's primary major in another field. All requirements for both majors must be met before the major in environmental studies can be conferred. A student's primary major may be drawn from any major recognized by the School of Arts and Sciences.

Approved Courses

Courses not included in the lists below must be approved by the ENVS undergraduate program director before being applied toward meeting ENVS degree requirements. Courses marked with an asterisk [*] have prerequisites in their home departments.

Introduction to Environmental Studies (3 credits)

01:381:101 Introduction to Environmental Studies

Natural Science (NS) Requirement (6 credits)

No more than 3 credits from the following list:

01:070:111 Extinction

01:119:160 Biology, Society, and Ecological Issues

01:450:101 Earth Systems (or 01:460:101 Introductory Geology)

01:460:100 Planet Earth

01:460:101 Introductory Geology (or 01:450:101 Earth Systems)

01:460:110 Sea Change

01:556:143 Energy and Climate Change

11:216:110 Evolution, Disease, and Medicine

11:375:103 Introduction to Environmental Health

11:670:102 Introduction to Climate Science (or 01:450:213 Global Climate System)

At least 3 credits from the following list:

01:070:213 Environment and Human Evolution

01:070:336 Primatology, Wildlife Ecology, and Conservation in Kenya (note: summer field school in Kenya)

01:070:337 Field Methods and Analysis in Primatology in Kenya (note: summer field school in Kenya)

01:070:345 Study Abroad - Applied Conservation in Ecosystem Management

01:070:402 Primate Conservation Biology*

01:160:439 Physical Chemistry of the Environment

01:450:212 Water Resources (or 01:460:204 The Water Planet)

01:450:213 Global Climate System (or 11:670:102 Introduction to Climate Science)

01:450:214 Conservation

01:450:306 Global Ecosystems and Biodiversity

01:450:313 Climate Change

01:450:413 Climate System and Global Climate Change

01:450:414 Geographical Hydrology

01:450:417 Coastal Geomorphology

01:460:202 Environmental Geology

01:460:203 Building and Maintaining a Habitable Planet

01:460:204 The Water Planet (or 01:450:212 Water Resources

01:460:207 Earth Resources and Sustainability

11:216:320 Controversies in Sustainability

11:573:444 Watershed Planning and Management: An Interdisciplinary Perspective

Environmental Humanities (EH) Requirement (6 credits)

01:195:220 Our World: Social Justice and the Environment

01:358:205 The Coming Apocalypse

01:359:209 Introduction to Health, Medicine, and Literature

01:358:262 Introduction to Literature and the Environment

01:450:409 Geohumanities

01:470:364 Big Bang: The Literature of Chaos and Order

01:506:251 History of Science and Society

01:512:111 Race, Place, and Space in American History

01:512:320 American Frontier History

01:512:324 History of the North American Environment

01:512:329 Technology and Nature in American History

01:730:249 Bioethics

01:730:250 Environmental Ethics

01:730:252 Eating Right: The Ethics of Food Choices and Food Policy

11:550:250 History of Landscape Architecture

Environmental Social Science (ESS) Requirement (6 credits)

No more than 3 credits from the following list:

01:070:111 Extinction

01:450:211 Environment, Society and Justice

01:450:214 Conservation

01:920:227 Population and Society

01:920:232 Sociology of Food and Eating

01:988:240 Gender and Science

11:374:115 Water and Society

11:374:141 Health and Society

11:374:175 Energy and Society

11:374:220 Environmental Solutions

11:374:269 Population, Resources, and Environment

11:374:279 Politics of Environmental Issues

11:550:230 Environmental Design Analysis

11:572:202 Environmental Issues in the United States

11:573:231 Fundamentals of Environmental Planning

At least 3 credits from the following list:

01:070:302 Culture and the Environment*

01:070:486 Gender, Development, Environment: Policies, Politics, Perspectives

01:220:334 Energy Economics*

01:220:432 Environmental Economics*

01:450:311 Natural Hazards and Disasters

01:450:317 Geography of Energy Resources

01:450:360 Cultural and Political Ecology

01:450:370 Climate Change and Society

01:790:350 Environmental Politics - U.S. and International

01:920:359 Environmental Sociology*

01:988:409 Gender, Environmental Justice, and Health

11:374:462 International Environmental Law

11:550:271 Agriculture and the Landscape

Environmental Methods/Techniques/Modes of Inquiry (EMTM) Requirement (3 credits)

01:450:320 Spatial Data Analysis

01:450:321 Geographic Information Systems (or 11:573:232 Fundamentals of Environmental Geomatics)

01:450:322 Remote Sensing

01:450:355 Principles of Cartography

01:450:356 Advanced Cartography*

01:450:402 Field Geography

01:450:421 Advanced Geographic Information Systems*

11:216:315 Conservation Techniques

11:375:197 Environmental Science Literacy

11:550:237 Landscape Drawing & Drafting¿

11:550:301 Social and Cultural Aspects of Design

11:573:232 Fundamentals of Environmental Geomatics (must also enroll for 1-credit lab)

11:573:233 (or 01:450:321 Geographic Information Systems)

Environmental Studies Capstone (ESC) Requirement (3 credits)

The environmental studies capstone requirement is typically met through participation in the upper-level environmental studies seminar listed below. The ENVS seminar is an integrative, problem-based, project-oriented course for students in their junior or senior years who have declared the ENVS major and completed the bulk of their ENVS coursework. This faculty-led seminar is structured to facilitate interdisciplinary student work. Seminar participants work collaboratively over the course of a semester on a selected environmental issue, demonstrating through specific assignments how perspectives representing each of the ENVS fields can be brought to bear on a given environmental problem. The ESC requirement may also be met through an internship, service-learning experience, study abroad, or honors project with approval of the undergraduate adviser. Students fulfilling the ESC requirement through one of these alternative means may also enroll in the ENVS seminar as an elective.

01:381:400 Environmental Studies Seminar (3 credits)

Electives (9 credits)

Electives may be drawn from among any of the approved courses listed above. Special topics courses taught in ENVS or other departments may also be counted toward particular degree requirements with permission of the undergraduate director. Similarly, the following special courses may be applied to meet any of the ENVS distribution requirements with the approval of the undergraduate director, depending on their contents. No course may be used to satisfy more than one degree requirement, however.

01:381:371,372 Environmental Studies Topics

01:381:485,486 Environmental Studies Internship

01:381:491,492 Environmental Studies Independent Study

01:381:495,496 Honors in Environmental Studies

Study abroad courses not listed above.

Departmental Honors Program

The distinction of Honors in Environmental Studies is awarded to graduating seniors who achieve: (1) a GPA of 3.50 or higher within the major at the end of their penultimate semester prior to graduation; or (2) a GPA of at least 3.35 within the major at the end of the penultimate semester, followed by the successful submission and defense of an approved honors thesis. The distinction of Highest Honors in Environmental Studies is awarded to students who achieve a cumulative GPA of 3.50 or higher within the major at the end of the penultimate semester, and successfully submit and defend an approved honors thesis.

The honors thesis is produced under the supervision of a faculty committee. This committee consists of two faculty members: a principal thesis supervisor, who works closely with the student on the honors project over the course of a full academic year; and a second reader of the thesis, who reviews the final product and participates in the thesis defense. Faculty members who teach approved ENVS courses typically serve as thesis advisers. Students should recruit their advising team at the end of the junior year. Thesis research and writing fulfills the requirements of Honors in Environmental Studies 381:495 and 381:496 (3 credits per semester scheduled during senior year). After completing relevant research and producing a finished draft of the thesis, the student gives an oral presentation of their work and defends the thesis by responding to questions posed by the primary supervisor and second reader. Final revisions to the thesis must be completed to meet degree completion deadlines--typically mid-April for a spring degree--if the student plans to graduate with honors on the basis of the thesis option.

Minor Requirements

Minor Requirements

The minor in environmental studies (ENVS) consists of 18 credits of coursework reflecting each of the program's major fields. Detailed course list is available on Degree Navigator.

Requirement 1: 01:381:101 Introduction to Environmental Studies (3)

Requirement 2: Natural Sciences. A total of 3 credits (See detailed course list on Degree Navigator.)

Requirement 3: Environmental Humanities. A total of 3 credits (See detailed course list on Degree Navigator.)

Requirement 4: Environmental Social Sciences. A total of 3 credits (See detailed course list on Degree Navigator.)

Requirement 5: ENVS Methods/Techniques. A total of 3 credits (See detailed course list on Degree Navigator.)

Requirement 6: Elective. A total of 3 credits (See detailed course list on Degree Navigator.)

A maximum of 6 credits toward the minor in ENVS can be earned at the 100 level.

At least 6 credits toward the minor in ENVS must be earned at the 300-400 level.

No more than 6 of these credits can be double-counted for another program.

No more than one course with a grade of D may be used in the minor in ENVS.

Environmental Studies 381 (SAS)

Courses

Courses

01:381:101 ***Introduction to Environmental Studies (3)***
Introduction to the field of environmental studies, including biophysical, social science, and humanities-based frameworks. Integrated, interdisciplinary approach to contemporary environmental issues.

01:381:371,372 ***Environmental Studies Topics (3,3)***
Focused review of current research on a contemporary environmental topic.

01:381:400 ***Environmental Studies Seminar (3,3)***
Integrative, problem-based, project-oriented course. Students work collaboratively over the course of a semester on a selected interdisciplinary environmental issue.

01:381:485,486 ***Environmental Studies Internship (3,3)***
Application of environmental studies skills in a professional employment setting. Individually designed and evaluated experience under supervision of internship adviser.

01:381:491,492 ***Environmental Studies Independent Study (BA,BA)***
Research on topic in environmental studies for environmental studies students in their junior or senior year. Individually designed and evaluated experience under supervision of faculty member.

01:381:495,496 ***Honors in Environmental Studies (3,3)***

European Studies 360 (SAS)

EUROPEAN STUDIES 360

Center for European Studies, School of Arts and Sciences

Website: http://www.europe.rutgers.edu

Director: Belinda Davis

The program in European studies seeks to enrich Rutgers University students' understanding of the historical and ongoing transformations of Europe's peoples, cultures, societies, and politics through an interdisciplinary approach. The major encourages the comparative and transnational analysis of various issues concerning the construction of Europe itself and its place in a global context. The program defines Europe broadly and focuses primarily if not exclusively on the modern (post-1700) period.

The faculty supports the idea that different disciplinary approaches to European studies complement each other and enable students to examine the complex variety of ways that Europe can be understood. For this reason, the two core course requirements are situated in several disciplines; for remaining courses, majors, and minors may choose from the range of relevant courses across the University. Students should be in close contact with a program adviser in designing their course of study.

European Studies 360 (SAS)

Learning Goals

Learning Goals

Students will develop a historically informed, contextual, and interdisciplinary understanding of modern Europe. Students will gain an appreciation of the historical, social, political, linguistic, and geographic forces that shaped European cultures with courses from history, geography, the social sciences, and language and literature departments. The program breaks with the traditional distinctions between the study of eastern and western Europe, enabling students to explore the broader boundaries of Europe and its role in the global context. European studies is committed to encouraging linguistic and cultural knowledge. Majors will become familiar with one or more European cultures via language acquisition and in-country experience through study abroad of at least six weeks. With their adviser, majors will develop an individual concentration. European studies majors and minors will be able to apply their knowledge to analyze current global challenges, including the relationship of Europe (the European Union [EU], and also well beyond) to the rest of the world.

European Studies 360 (SAS)

Disciplinary Tracks

Disciplinary Tracks

The curriculum offers a choice among three general tracks. The European environment and geography and the European culture tracks reflect orientations to inquiry that have traditionally been associated with the (natural and social) sciences and the humanities, respectively. The European politics, economics, and society track emphasizes interdisciplinary approaches to contemporary public issues.

Students with interests in the evolution, transformation, or management of Europe's physical environments or the role of science and technology in European affairs should choose the European environment and geography track. Within this track it is possible to choose either an earth and atmospheric science focus or a bioscience-ecological (including human ecological) science focus.

Students with interests in the development of distinctive European ideas, identities, and cultural achievements should choose the European culture track. Within this track it is possible to specialize in the study of belief systems or creative expression and communication systems.

Students with interests in contemporary processes of European social, political, and economic restructuring should choose the European politics, economics, and society track. Within this track it is possible to specialize in sociological, anthropological, economic, political, institutional, and spatial dimensions of contemporary change in the context of an expanding Europe and its evolving role in global affairs.

European Studies 360 (SAS)

Major Requirements

Major Requirements

The major consists of 36 credits. Except for the core courses, all courses chosen, including electives, must first be approved by an adviser. See the complete list of European studies courses online.

Core Courses (15 credits)

All majors are required to take the following courses:

01:510:101 Ancient and Medieval Europe (3)

01:510:102 Europe in the Global Age (3)

01:360:301 The Construction of Contemporary Europe (3)

01:360:401 The Idea of Europe: 18th Century to the Present (3)

01:450:332 Eastern Europe and Eurasia (3) *or* 01:450:334 Western Europe (3)

Focus: 12 credits within a chosen track.

Electives: 9 credits (may include up to 3 credits for language instruction). In addition to 01:510:101, students are encouraged to take an elective course that covers a period earlier than 1700.

A grade of C or better in all courses credited toward the major is required for graduation.

European Studies 360 (SAS)

Focus

Focus

Students, with the help and approval of an adviser, will develop an idea or theme of special interest, which they will explore in four courses (12 credits) within their chosen track. At least two courses must be at the 300 level or above.

Special topics courses in different disciplines may be used to satisfy these requirements with the prior permission of the program director. One independent study course may be used to satisfy part of these requirements. Students may develop an individualized concentration that focuses on a period before the 18th century.

European Studies 360 (SAS)

World Language Requirement

World Language Requirement

All majors are required to demonstrate proficiency in at least one European language other than English. The minimum requirement is fulfilled by demonstrated proficiency equivalent to four semesters of college-level study with an average grade of B or better. A standardized test can be used to satisfy this requirement.

European Studies 360 (SAS)

Study Abroad Requirement

Study Abroad Requirement

All students are required to complete an approved study abroad program in Europe of at least six weeks in duration. Students are strongly encouraged to spend a semester or academic year abroad. Courses taught by Rutgers faculty in Europe can be used to fulfill this requirement. Under special circumstances this requirement may be waived. Credit from approved study abroad courses may be applied to fulfill the focus or elective requirements.

European Studies 360 (SAS)

Minor Requirements

Minor Requirements

Students must complete 18 credits with a grade of C or better in the following courses:

01:510:101 Ancient and Medieval Europe (3)

01:510:102 Europe in the Global Age (3)

01:360:301 The Construction of Contemporary Europe (3)

01:360:401 The Idea of Europe: 18th Century to the Present (3)

01:450:332 Eastern Europe and Eurasia (3) *or* 01:450:334 Western Europe (3)

One elective course focusing on Europe, to be approved by the director of the European studies program (3)

There is no foreign language or study abroad requirement for the minor.

European Studies 360 (SAS)

Honors

Honors

The program is intended for senior majors in European studies. Students who have successfully completed at least 15 credits in European studies with a grade-point average of 3.4 or better in these courses and a grade-point average of 3.0 or better overall are invited to apply. Eligible candidates may pursue honors in one of two ways.

The first is a two-semester 6-credit senior thesis option in which students are expected to conduct original research and prepare an original piece of scholarship as their senior thesis. Both semesters must be completed in order to receive credit. Students are responsible for recruiting an appropriate faculty member to supervise their research and thesis. Interested students should draft a thesis proposal and consult with faculty members whose expertise lies in an appropriate area. During the second semester of work, a faculty committee will conduct an oral examination in which the honors candidate will defend his or her findings and demonstrate a grasp of the literature in the area encompassed by the research undertaken.

Alternatively, students may elect to achieve honors through one of the school honors programs or Honors College. Successful completion of any of the school honors programs under the supervision of a faculty member in the European studies program will automatically result in the award of departmental honors.

European Studies 360 (SAS)

Courses

Courses

01:360:101 ***Perspectives on Europe (3)***
Multidisciplinary perspectives on European cultures, politics, languages, and histories. Topics and instructors may vary.
Primarily for first- and second-year students.

01:360:292 ***Topics in European Studies (3)***
Selected topics, varying by semester. Specific titles announced at the time of registration.

01:360:301 ***The Construction of Contemporary Europe (3)***
A survey of the politics, history, economics, geography, economy, and culture of the European Union.
Prerequisites: 01:510:101,102.

01:360:320 ***Politics and Social Policy: Lessons from Europe (3)***
European approaches to 21st-century policy challenges in common with the United States, such as health care, climate change, education, a fractured social safety net, an aging population, high unemployment, and growing deficits.
Credit not given for both this course and 01:360:290 or 01:790:290 or 01:790:320.

01:360:401 ***The Idea of Europe: 18th Century to the Present (3)***
Philosophical-historical dimensions of European identity and unity. Readings of primary sources central to the invention and ongoing redefinitions of the concept of Europe. Focuses on European identity, boundaries, and "otherness" in their historical development.
Prerequisites: 01:510:101,102. Credit not given for both this course and 01:510:401.

01:360:490 ***Independent Study (3)***
Independent study in the field of European studies. Topic subject to approval of director of program in European studies.
Prerequisite: Permission of program director.

Exercise Science 377 (SAS)

EXERCISE SCIENCE 377

Department of Kinesiology and Health, School of Arts and Sciences

Website: https://kines.rutgers.edu

Chair: Brandon Alderman

Vice Chair Education and Administration: Joanne Hunt

Vice Chair Research: Marsha Bates

Undergraduate Academic Director: Andrea Spaeth

Distinguished Professors:

Marsha Bates, B.A., Indiana (Pennsylvania); M.S., Ph.D., Rutgers

Labros Sidossis, B.S., Thessaloniki (Greece); M.S., CUNY (Queens College); M.A., Texas (Austin); Ph.D., Texas Medical Branch (Galveston)

Professor:

Peter Kokkinos, B.S., Bowie; M.A., Ph.D., Maryland

Jennifer Buckman, B.A., Rutgers; M.S., Ph.D., Oregon Health and Science; M.B.A., Rutgers

Associate Professors:

Brandon Alderman, B.S., B.A., M.S., Wyoming; Ph.D., Arizona State

Sara Campbell, B.S., M.S., Bloomsburg, Ph.D., Florida State

Steven K. Malin, B.S., King¿s College; M.S., Delaware; Ph.D., Massachusetts Amherst

Andrea Spaeth, B.A., Elon; M.A., William and Mary; M.A., Ph.D., University of Pennsylvania

Assistant Professors:

Ryan Dougherty, B.S., Wisconsin; M.S., Wisconsin; Ph.D., Wisconsin

Erik Hummer, B.S. Pacific Lutheran, M.S., Western Washington, Ph.D. Tennessee

Assistant Teaching Professors:

Anthony Delli Paoli, B.S. Rutgers, M.S. Michigan State, Ph. D Michigan State

Jason Henderson, B.S., Rutgers; M.M.S., Duke University; J.D., Rutgers

Joanne Hunt, B.S., Pennsylvania State; M.A., New York

Nicole Nagle, B.S., Rutgers; D.P.T., New York Medical College

Javier Robles, B.A., Rutgers, J.D. Seton Hall Law

Lisa Rossman-Murphy, B.A., Rutgers; B.S., M.S., CUNY (Staten Island); D.P.T., Arcadia

Latisha Forster Scott, B. A. Hofstra; M.S. Brooklyn College (CUNY); Ph.D., Temple

Assistant Teaching Professors:

Anthony Delli Paoli, B.S. Rutgers, M.S. Michigan State, Ph. D Michigan State

Jason Henderson, B.S., Rutgers; M.M.S., Duke University; J.D., Rutgers

Joanne Hunt, B.S., Pennsylvania State; M.A., New York

Nicole Nagle, B.S., Rutgers; D.P.T., New York Medical College

Javier Robles, B.A., Rutgers, J.D. Seton Hall Law

Lisa Rossman-Murphy, B.A., Rutgers; B.S., M.S., CUNY (Staten Island); D.P.T., Arcadia

Latisha Forster Scott, B. A. Hofstra; M.S. Brooklyn College (CUNY); Ph.D., Temple

Teaching Instructors:

Jaime Cosloy, B.S., Rutgers, J.D., Baltimore

Adam DiVine, B.S., Rutgers

Reubinedde Malamug, B.S., Rutgers, M.H.A., Drexel

Morgan Murray B.S., Rutgers, M.S., Rutgers

Nadyne Venturin-Trindade: M.Sc., Federal University of Paraná

Learning Goals

Learning Goals

Exercise science majors will demonstrate mastery of concepts crucial to an understanding of basic human anatomy and physiology. After two years of basic math and science (biology, chemistry, physics, calculus, and statistics), upper-level students study human physiology as it relates to exercise and physical activity via such courses as system physiology, exercise physiology, kinesiology, motor learning, exercise and aging, administration, biomechanics, and movement for special populations. Upon completion of the undergraduate science program, students are qualified for graduate or professional programs in medicine, exercise physiology, physical and occupational therapy, cardiac rehabilitation, corporate fitness, athletic training, nurse practitioner, physician assistant, as well as most other health-related professions.

Exercise Science 377 (SAS)

Major Requirements

Major Requirements

Declaring the Major

Students who wish to declare a major in exercise science must:

1. Have completed a minimum of one semester at Rutgers University with a minimum overall grade-point average of 2.0

   OR

   Have transferred in to Rutgers University with a minimum of 15 credits
2. Attend a department declaration meeting
   Meetings for declaring a major are scheduled throughout the fall and spring semesters. At the start of each semester, the link to register for a declaration meeting posted on the department website.

Meetings for declaring a major are scheduled throughout the fall and spring semesters. At the start of each semester, the link to register for a declaration meeting posted on the department website.

Students in the Schools of Arts and Sciences (SAS) or the School of Environmental and Biological Sciences (SEBS) use the MyMajor system to submit the major declaration request. The declaration request is approved after the student attends the mandatory department declaration meeting.

Students from other schools within Rutgers University can declare a major in exercise science only with approval of the dean of their school and attendance at the declaration meeting.

Course Requirements

To graduate with a degree in exercise science, students must have at least a 2.0 grade-point average in the required courses.

The following courses are required for the exercise science major:

01:119:115-116 General Biology I,II (4,4)
01:119:117 Biological Research Lab (2)
01:146:356 Systems Physiology (3)
01:160:161-162 General Chemistry I,II (4,4)
01:160:171 Introduction to Experimentation (1)
01:377:140 Foundations of Kinesiology and Health (1.5)
01:377:205 Principles of a Healthy Lifestyle (1.5)
01:377:223 Functional Human Anatomy (3)
01:377:224 Functional Human Anatomy Lab (1)
01:377:275 Basic Statistics for Exercise Science (3)
01:377:301 Psychology of Sport and Exercise (3) or 01:377:455 Exercise Psychology (3)
01:377:310 Motor Learning (3)
01:377:350 Biomechanics (3)
01:377:370 Exercise Physiology (3)
01:377:371 Exercise Physiology Lab (1)
01:377:407 Administration of Exercise Science (1.5)
01:377:410 Exercise Testing and Prescription (3)
01:377:493 Internship in Exercise Science (3)
01:640:135 Calculus I (4)
01:750:193-194 Physics for the Sciences I,II (4,4)
01:830:101 General Psychology (3)

Elective Requirement - must complete 6 credits of electives

The exercise science major requires 6 credits of electives. Students should consult the university online catalog, Degree Navigator, or speak to the Department of Kinesiology and Health Academic Adviser to determine if any of the courses have prerequisites or restrictions.

A minimum of 3 elective credits must be within the department (377 or 955 subject code). At least 3 elective credits must be at the 300+ level. A maximum of 3 elective credits can be at the 200 or lower level.

DPT 4 + 3 Program

Within the exercise science major, there is a Pre-Physical Therapy Concentration. This Pre-PT concentration is only available to first-year students enrolled in the School of Arts and Sciences or the School of Environmental and Biological Sciences. This concentration is designed to prepare students who will be applying to the Rutgers University doctor of physical therapy (D.P.T.) program after graduation and provides seminars, career development workshops, and volunteering opportunities.

Students who meet the following requirements are eligible to apply for this concentration:

- Declare exercise science major in the spring of their first year. It is recommended students attend one of the first two declaration meetings.

- Apply to the Pre-PT concentration application. This opens February 1 each year and access to the application is granted by emailing Dr. Nagle at nmnagel@kines.rutgers.edu.
- Complete the following courses at Rutgers University during their first-year fall semester: 01:119:115 General Biology and 01:377:140 Foundations of Kinesiology and Health. If you have not completed these courses email Dr. Nagle at nmnagle@kines.rutgers.edu to discuss.
- Maintain a minimum of 3.3 GPA during first-year fall semester at Rutgers University and can have no more than one C in any course
    - If a grade of C is received, that course must be retaken by the time of application into the DPT 4+3 program, and a letter grade of B or better needs to be achieved in that course.

Exercise Science 377 (SAS)

Internship Program

Internship Program

Students in the exercise science major must complete a 3-credit internship 01:377:493 (126 hours) during their senior year. The option is also available to complete a 6-credit internship 01:377:498 (252 hours). The internship provides students with the opportunity to practice and/or apply knowledge and skills in various professional environments.

To qualify for the senior internship, students must satisfy the following criteria:

1. Complete a minimum of 90 credits, with a minimum of 20 credits in the major.
2. Overall GPA must be at least 2.0.
3. Major GPA must be at least 2.0.
4. Meet all deadlines for submission of the application document.
5. Attend the mandatory pre-internship Canvas page as well as a course meeting prior to the start of the start of their internship hours.

Exercise Science 377 (SAS)

Departmental Honors

Departmental Honors

Departmental Honors
There are three categories of honors in exercise science: honors, high honors, and highest honors. The criteria for achieving honors involves academic performance, as evidenced by the student's major grade-point average (GPA).

Honors Criteria
Honors: 3.600 major GPA

High Honors: 3.800 major GPA

Highest Honors: 4.00 major GPA

Exercise Science 377 (SAS)

Courses

Courses

01:377:140 ***Foundations of Kinesiology and Health (1.5)***

Historical, philosophical, and scientific foundations of the discipline.

Not open to seniors.

01:377:160 ***Introduction to Physical Therapy (PT) (1.5)***
Introduction to the health care rehabilitation specialty of physical therapy prior to a subsequent clinical experience.

01:377:161 ***Observation in Physical Therapy (1.5)***
A minimum of 50 hours of supervised exposure in a clinical physical therapy setting for those interested in pursuing the field. Clinical application of academic coursework.
Prerequisite: 01:377:160.

01:377:170 ***Principles of Strength and Conditioning (1.5)***
Organization, implementation, and supervision of strength training programs, with an emphasis on the anatomical and kinesiological aspects of strength training.

01:377:180 ***Exercise and Relaxation (1.5)***
Utilizes the components of fitness with an emphasis on cardiorespiratory endurance and flexibility to achieve fitness. Modalities used for stress reduction include progressive relaxation techniques and humor.

01:377:191 ***Cardiovascular Conditioning (1.5)***
Individualized programming of aerobic activities based on needs and interests of adult populations; designing aerobic fitness programs for specific populations.

01:377:205 ***Principles of Healthy Lifestyle (1.5)***
Introduction to the concept of healthy lifestyle for prevention and treatment of lifestyle-related diseases such as cardiovascular diseases, diabetes, strokes and obesity. Concept of wellness and the role of lifestyle in health promotion and disease prevention. Focus on evidence-based knowledge to design and promote an integrated health approach.
Credit not given for this course and 01:377:240.

01:377:213 ***Functional Human Anatomy (4)***Systemic and regional study of gross structure of the human body emphasizing functional interdependency among anatomical systems. Human cadaver lab.
Lec./Lab. Prerequisites: 01:119:115-116.

01:377:215 ***Techniques of Athletic Training (3)***
Techniques of athletic training including evaluation, treatment, and rehabilitation of injuries common in athletics.
Prerequisite: 01:377:223-224 or 01:119:128.

01:377:223 ***Functional Human Anatomy (3)***
Systemic and regional study of gross structure of the human body emphasizing functional interdependency among anatomical systems.
Prerequisites: 01:119:115-116

01:377:224 ***Functional Human Anatomy Lab (1)***

Human cadaver lab.

Pre-requisites: 01:119:115-116. Co-requisite: 01:377:223

01:377:225 ***Contemporary Health Topics (3)***
Principles in healthful living. A concept of total health, influence factors, and issues of mental health, family living, consumer education, disease prevention and control.

01:377:246 ***Safety Education and Emergency Care (3)***
Prevent, and manage and treat life-threatening illnesses and injuries. Topics to include both emergent and nonemergent injuries and illnesses. This course leads to certification in First Aid, Adult, Child and Infant CPR, and AED.

01:377:252 ***Health and Wellness in Underserved Populations (3)***
Health and Wellness in Underserved Populations examine issues of health equity, health disparities, and social justice in often underserved and marginalized communities.

01:377:275 ***Basic Statistics for Exercise Science (3)***
Introduction to applied descriptive and inferential statistics for exercise science.
Prerequisite: 01:640:026 or above. Credit not given for both this course and 01:955:276.

01:377:282,283 ***Current Topics in Kinesiology and Health (1.5,3)***
Current issues in kinesiology and health. Topics vary by interest of instructor and students.

01:377:301 ***Psychology of Sport and Exercise (3)***
Psychological theories and principles applied to sport. Sport influence on the quality of life at all levels of sport proficiency. Psychological techniques related to performance enhancement.
Prerequisite: 01:830:101.

01:377:304 ***Exercise and Aging (3)***

Examination of the effects of exercise and chronic activity on the physiological and psychological changes that occur with aging and of the factors to consider when structuring exercise programs for the aged.

Prerequisite: 01:377:223.

01:377:310 ***Motor Learning (3)***
Study of the processes that underlie learning and performance of motor skills.
Lec./Lab. Prerequisites: 01:377:223 or 01:119:128, and 01:830:101.

01:377:315 *Advanced Techniques of Athletic Training (3)*
In-depth analysis of athletic injury mechanisms, injury evaluation techniques, use of modalities and anatomy of the extremities.
Prerequisite: 01:377:215.

01:377:324 *Movement Experiences for Individuals with Disabilities (3)*
Survey of major mental and physical conditions that may require consideration in movement experiences.
Prerequisite: 01:377:223-224.

01:377:325 *Methods and Lifestyle Assessment (3)*
Introduction to lifestyle assessment methodology. Specific assessment tools for body composition, diet, physical activity, stress, and readiness for behavioral change. Interpretation of assessment results in holistic, integrated manner stressing the importance of overall lifestyle components in health promotion and wellness. Lab reinforces the practical application of assessment methodologies.
Lecture/Lab. Prerequisite: 01:377:370.

01:377:327 *Field Experience for Special Populations (1.5)*
Provides supervised exposure to professional opportunities with children/adults with disabilities or senior citizens. Must have completed at least 60 credits to enroll.

Must have completed at least 60 credits to enroll.

01:377:334 *Physical Activity and Health (3)*
Physical, social-psychological, and neurobiological responses to physical activity and the health benefits associated with physically active lifestyles; psychological theories of health-oriented exercise behavior; and interventions for increasing behavioral adherence to physical activity. Examines health consequences of physical inactivity and sedentary living. Focus on obesity, anxiety, depression, cancer, cardiovascular diseases, and the psychodynamics of rehabilitative medicine.
Prerequisite: 01:377:140.

01:377:336 *Sleep, Health and Performance (3)*
Functions of the brain and body underlying sleep and circadian rhythms with a focus on the relationship between sleep, health, performance, and safety. Introduction to the causes and treatments of insufficient sleep and sleep disorders. Personal and public policy towards sleep.
Prerequisite: 01:119:115,116 and 01:830:101

01:377:340 *Pediatric Physical Development and Fitness*
Provides a basic framework of knowledge on pediatric development from birth through maturation; the relationship between exercise and growth and the unique needs of the pediatric population; current trends and health protocols including youth sports participation; and the impact of technology on the wellness of today's youth as it pertains to physical fitness.
Prerequisite: 01:377:223 or 01:119:128.

01:377:343,344 *Workshop in Exercise Science (1,1)*
Laboratory experience in analyzing and evaluating human movement.
Open only to junior and senior majors by permission of department.

01:377:350 *Biomechanics (3)*

Study of human movement through the application of basic mechanical principles and cinematographic procedures; emphasis on analysis of sport skills from a quantitative perspective.

Prerequisites: 01:377:223-224 or 119:128 and 01:750:193 or 01:750:201 or 01:750:205.

01:377:360 *Cannabis: From Counterculture to Cure-All (3)*
Basic principles of numerous scientific fields, such as neuroscience, physiology and pharmacology, from the vantage of Cannabis Sativa. Covers the plant's biological and genetic characteristics and the pharmacology, physiology and neurobiology of its well-known active ingredients THC and CBD. Influence of THC and CBD on human health and behavior and addiction potential.
Prerequisites: 01:119:115-116 and 01:830:101.

01:377:362 *Independent Study in Exercise Science (3)*
Supervised individual research or study in the field of exercise science.
Open only to junior and senior majors by permission of department.

01:377:370 *Exercise Physiology (3)*
Selected topics dealing with the physiological responses to exercise stress and the adaptive changes that occur with training.
Prerequisites: 01:377:223-224 or 01:119:128 and 01:160:162 and 01:160:171

01:377:371 *Exercise Physiology Laboratory (1)*
Laboratory to accompany 01:377:370.
Pre-requisite: 01:377:223-224 or 01:119:128 and 01:160:162 and 01:160:171 Pre/Co-requisite: 01:377:370.

01:377:381 *Metabolic Adaptations to Exercise (3)*
Essential concepts of biochemistry--molecular biology, basic chemistry, metabolism, and transcription regulation--as applied to the exercising human, as well as current understanding of sports nutrition.
Pre- or corequisite: 01:146:356 and 01:377:370.

Pre- or corequisite: 01:146:356 and 01:377:370.

01:377:401 *Theory of Strength and Conditioning (3)*
The purpose of this course is to equip exercise science students with the knowledge, skills and abilities required of a strength and conditioning professional. This course will also prepare students for the Certified Strength and Conditioning Specialist (CSCS) exam administered by the National Strength and Conditioning Association (NSCA).
Prerequisite: 01:377:370

Prerequisite: 01:377:370

01:377:404 *Research Methods for Exercise Science (1.5)*

Logic and design of experiments typical in the field of exercise science; analysis and interpretation of data; writing of formal research reports.

Prerequisite: 01:377:275 or 413 or 01:830:200 or 01:960:212 or 401. Open only to majors.

01:377:407 *Administration of Exercise Science (1.5)*

Application of managerial processes to include management concerns in both clinical settings and fitness management.

Open only to senior majors. Prerequisite: Must have 90 credits. Recommended as corequisite for internship.

Open only to senior majors. Prerequisite: Must have 90 credits. Recommended as corequisite for internship.

01:377:408 *Exercise and Epidemiology of Chronic Disease (3)*
The relationship between health-related behaviors and chronic diseases such as cardiovascular diseases, diabetes, and obesity. Evidence of the effect of lifestyle practices including diet, exercise, and stress on the human metabolism and the overall health. Etiology of major chronic diseases and early life determinants on health.
Prerequisite: 01:377:370.

01:377:410 *Exercise Testing and Prescription (4)*

Application of physiological principles and development of practical skills for fitness evaluation and exercise prescription.

Prerequisites: 01:377:370-371 and 01:377:275 or 01:830:200 or 01:960:212 or 01:960:401.

Prerequisites: 01:377:370-371 and 01:377:275 or 01:830:200 or 01:960:212 or 01:960:401.

01:377:412 *Advanced Exercise and Aging - Health Outcomes and Risk Assessment (3)*
Students will explore the relationship between health-related and chronic diseases more prevalent in the elderly such as sarcopenia, osteoporosis, atrial fibrillation, and stroke. Students will gain evidence-based knowledge on how to assess fitness status in the elderly, risk associated with certain exercise, medication-exercise interaction, and cardiac responses during exercise and their clinical significance.
Prerequisites: 01:377:370 and 01:377:304.

01:377:415 *Lifestyles of the Mediterranean - Greece (3)*
Study abroad opportunity in Greece. Students will study and experience the adoption of the Mediterranean lifestyle in everyday life, combining lectures with experiential activities to cover its fundamental principles and components. These include the adoption of the Mediterranean diet, along with a physically active lifestyle (emphasis on group outdoor activities), and other lifestyles habits that have been found beneficial for health (e.g., adequate rest, relaxation, hydration, conviviality).

01:377:416 *Exploring the Origins of the Mediterranean Diet in Crete Island - Greece (6)*

Study abroad in the Crete Island. Study of the Mediterranean diet in its place of origin. Sustainable food production and consumption patterns emphasizing traditional Mediterranean practices.

01:377:417 *Pediatric Health: Contemporary and Cultural Factors (3)*
This course examines contemporary and cultural factors impacting physical activity and health of the developing child. Areas of study will include environmental conditions, climate change, obesity, use of new technology, risk behavior, substance use, and cultural differences and their effect on stress levels, participation in physical activity, and overall healthful living and development for the pediatric population.
Prerequisites: 01:830:101 and 01:377:223 or 01:119:128

Prerequisites: 01:830:101 and 01:377:223 or 01:119:128

01:377:454 *Advanced Exercise Physiology (3)*
Contemporary research topics in exercise physiology that include acute and chronic adaptations to exercise, central and peripheral neuromotor function, neuroendocrine response to exercise, environmental physiology, biochemical monitoring of exercise, and performance enhancement/training theory.
Prerequisites: 01:377:370.

01:377:455 *Exercise Psychology (3)*
Major psychological theories that have been employed to study human behavior in the context of physical activity. Includes theories in the areas of personality, anxiety, motivation, goal-setting, and social support among others.
Prerequisite: 01:830:101

Prerequisite: 01:830:101

01:377:475 *Nutrition and Fitness (3)*
The interactions between nutrition and exercise by integrating metabolism and physiology concepts in the context of recreational physical fitness training. Topics include fluid, macronutrient, and micronutrient requirements for sport and explore specific roles that carbohydrates, fats, proteins, vitamins, and minerals play in fueling the body for exercise. Special topics include nutritional concerns of athletes and dietary supplements.
Credit not given for both this course and 11:709:475. Prerequisites: 01:377:370 or 01:119:115-116 and 11:709:255. Open only to juniors and seniors.

01:377:480 *Honors Seminar in Exercise Science (3)*
Design of an original research project in exercise science complete with a literature survey, problem statement, research hypotheses, experimental design, research procedures, appropriate data analyses, and potential implications.
Prerequisite: 01:377:275 or 01:377:413 or 01:830:200 or 01:960:212 or 01:960:401. Open only to juniors in departmental honors program.

01:377:481 *Honors Research in Exercise Science (3)*
Independent study for seniors who have been accepted into the departmental honors program.
Prerequisites: 01:377:480 and permission of department.

01:377:482 *Topics in Kinesiology and Health (1.5)*
Current issues within the fields of kinesiology and health. Contact the department for titles, descriptions, and requirements of each section offered.

01:377:483,484,485 *Topics in Kinesiology and Health (BA)*
Current issues within the fields of kinesiology and health. Contact the department for titles, descriptions, and requirements of each section offered.

01:377:491 *Independent Study (BA)*
Supervised individual research or study.
Prerequisite: Permission of department. Open only to majors.

01:377:493 *Internship in Exercise Science, 3 credit (3)*
Supervised individual fieldwork in exercise science.
Prerequisites: Permission of department via its application process, 90 credits, and a 2.0 cumulative grade-point average both overall and in the major. Open only to exercise science majors.

01:377:496 ***EKG: Use and Interpretation (3)***
Evaluation of the scientific basis and utility of the EKG and exercise stress test. Information on obtaining and interpreting EKGs.
Prerequisite: 01:146:356. Recommended: 01:377:370.

01:377:497 ***Internship 2 in Exercise Science (3)***
Additional supervised individual fieldwork.
Prerequisites: 01:377:493 or 01:377:498. Permission of department via its application process and a 2.0 cumulative grade-point average both overall and in the major. Open only to majors.

01:377:498 ***Internship in Exercise Science, 6 credit (6)***
Supervised individual fieldwork in exercise science.
Prerequisites: Permission of department via its application process, 90 credits, and a 2.0 cumulative grade-point average both overall and in the major. Open only to exercise science majors.

Cinema Studies 175 (SAS)

CINEMA STUDIES 175

School of Arts and Sciences

Website: Here

Program Director: Susan Martin-Márquez

Faculty:

Sandy Flitterman-Lewis, English; Ph.D., California (Berkeley)

David Fresko, Cinema Studies; Ph.D., Stanford

Regina Karl, German; Ph.D., Yale

Susan Martin-Márquez, Spanish and Portuguese; Ph.D., Pennsylvania

Albert G. Nigrin, Cinema Studies; M.F.A., Rutgers

Meheli Sen, AMESALL; Ph.D., Emory

Learning Goals

Learning Goals

Majors and minors will achieve mastery of the close textual analysis of moving image media, a crucial form of visual literacy in the 21st century. They will be able to demonstrate knowledge of the history of the film medium and major international film movements and creative figures, and will gain familiarity with the conventions of narrative and

genre in the cinema, as well as with more experimental forms of filmmaking. Majors and minors will employ critical thinking and basic theoretical concepts to achieve an understanding of the interrelationship of film with shifting social, political, and cultural trends. They will also develop their critical writing skills, and produce an extended analytical and/or research paper in a seminar setting in the program's capstone course.

Cinema Studies 175 (SAS)

Major Program

Major Program

The interdisciplinary major in cinema studies consists of 11 courses, completed with the grade of C or better, and with a minimum of five courses at the 300 level or above. All majors must complete the following core requirements:

1. Both semesters of 01:175:201,202 Introduction to Film I,II (01:175:210 may be substituted for either 01:175:201 or 202);

2. Three electives, from the list of preapproved electives or from among other courses approved by the program director; and

3. Senior Seminar in Cinema Studies (01:175:425) or the Seminar: Film Theory (01:175:420).

A flyer listing qualifying elective courses is circulated during each preregistration period, and course descriptions are posted on the program's website. Cinema studies majors are encouraged to complete other courses in film history, analysis, or theory before enrolling in a filmmaking/production course.

Please note that cinema studies courses generally include an additional mandatory weekly meeting time for screenings, or require students to view films outside of class.

Courses that are primarily about film and may count as credits toward the major and minor are listed under the subject codes 175 (Cinema Studies), 354 (English/Film Studies), 013 (AMESALL), 050 (American Studies), 082 (Art History), 195 (Comparative Literature), 420 (French), 470 (German), 560 (Italian), 565 (Japanese), 563 (Jewish Studies), 940 (Spanish and Portuguese), and 988 (Women's, Gender, and Sexuality Studies).

01:175:210 may be substituted for either 01:175:201 or 202. No course may be used to fulfill more than two requirements.

Transfer students and study-abroad students must obtain approval of courses for the major from the program director. Students are urged to consult the program director for further information.

Grades of C or better must be earned in all courses used to fulfill the requirements of the major.

Cinema Studies 175 (SAS)

Major Requirements and Options

Major Requirements and Options

Major Requirements

The major consists of a minimum of 11 courses and offers two options, one in history and theory and one in production and criticism. Please see the program director for an up-to-date list of preapproved electives.

All majors must complete the following core requirements:

1. Both semesters of 01:175:201,202 Introduction to Film I,II (01:175:210 may be substituted for either 01:175:201 or 202);

2. Three electives, from the list of preapproved electives; and

3. Senior Seminar in Cinema Studies or Seminar: Film Theory.

Options within the Major

The program offers two options by which to structure the major. Each option requires students to complete 11 courses, including the core requirements listed above. Please see the program director for an up-to-date list of preapproved electives.

A. History and Theory Option

In addition to the requirements listed under Major Requirements above, this option requires the following:

1. Survey courses: American Cinema I (01:175:315) and American Cinema II (01:175:316) OR World Cinema I (01:175:320) and World Cinema II (01:175:321);

2. Non-U.S. cinemas: two courses selected from a preapproved list; and

3. One theory course: Seminar in Film Theory (01:175:420) OR Theories of Women in Film (01:354:385).

Students may include as electives additional courses listed as non-U.S. or theory, if they are not used to fulfill core or option requirements.

B. Production and Criticism Option

In addition to the core requirements listed under Major Requirements above, this option requires the following:

1. Two survey courses: World Cinema I (01:175:320) and World Cinema II (01:175:321)

2. One course in auteur and genre studies, from list below or from other preapproved courses:

    01:175:350 Major Filmmakers I (3)

    01:175:351 Major Filmmakers II (3)

01:175:352 Hitchcock and Beyond (3)

01:175:390 Global Horror (3)

01:175:370 Film Genres I (3) (may take twice, if different subtitles)

01:354:372 Film Genres II (3) (may take twice, if different subtitles)

01:354:360 Film Noir (4)

01:354:371 Film Melodrama (4)

01:354:374 Science Fiction Film (4)

01:560:320 Mafia Movies: Approaches to Genre Italian and American Film (3)

3. Two production courses, from list below or from other preapproved courses:

01:351:220 Writing for Experimental Film (3)

01:351:303 Creative Writing: Screenwriting for Film (3)

01:351:309 Creative Writing: Digital Composition (3)

01:351:314 Documentary Filmmaking for Writers (3)

01:354:308 The Craft of Screenwriting (3)

07:081:243 Media I-A Introduction to Media Art: Screen/Image/Sound (4)

07:081:244 Media I-B Experimental Practices and Techniques (4)

07:081:343 Media II-A Media Art Installation and Expanded Cinema (4)

07:081:344 Media II-B Media and Performance (4)

07:211:120 Cinematography (3)

07:211:230 2-D Animation

Students may include as electives additional production courses, or courses listed as non-U.S., auteur/genre, or theory, if they are not used to fulfill core or option requirements.

Minor Program

Minor Program

The interdisciplinary minor in cinema studies consists of seven courses, completed with a grade of C or better, and with a minimum of three courses at the 300 level or above. The courses must be distributed as follows: 1) three required courses, both semesters of 01:175: 201,202 Introduction to Film I,II (01:175:210 may be substituted for either 01:175:201 or 202), and Senior Seminar in Cinema Studies, 01:175:425 (01:175:420 may be substituted for 01:175:425); and 2) four elective courses, chosen from the list below, or from among other courses approved in advance by the program director. A flyer listing qualifying elective courses is circulated during each preregistration period, and posted on the program's website. Please note that only one production/filmmaking course may be counted toward the minor. Cinema studies minors are encouraged to complete several other courses in film history, analysis, or theory before enrolling in a filmmaking course.

Students pursuing a minor in cinema studies must select five courses for the minor that are outside their major. Exception: English majors who pursue a cinema studies minor may include more than two 01:354 courses in their minor program, but only two of those may be counted toward the major.

Please note that cinema studies courses generally include an additional mandatory weekly meeting time for screenings, or require students to view films outside of class.

Required Courses:

01:175:201 Introduction to Film I (3)

01:175:202 Introduction to Film II (3)

As indicated above, 01:175:210 Close Readings of Cinema (3) may be substituted for Introduction to Film I OR Introduction to Film II (01:175:201 or 202)

01:175:425 Senior Seminar in Cinema Studies (3)

As indicated above, 01:175:420 Seminar: Film Theory (3) may be substituted for Senior Seminar in Cinema Studies (01:175:425)

Cinema Studies 175 (SAS)

Courses

Courses

01:175:201 ***Introduction to Film I (3)***
Film study, with emphasis on basic concepts of film analysis (narrative, editing, mise-en-scène, sound) and the historical development of cinema as an institution.

01:175:202 ***Introduction to Film II (3)***
Film study, with emphasis on commercial cinema as an institution (genres, directors, stars) and on nonnarrative types of film (documentary, experimental).

01:175:210 ***Close Readings of Cinema (3)***
Formal analyses of six or seven individual films; emphasis on visual track, soundtrack, and scenario-narrative construction.

01:175:265 ***American Experimental Film and Video (3)***
Survey course focusing on the history and development of the various American experimental cinema movements from its beginnings to the present. In-depth analyses of the structure and content of films by Andy Warhol, Maya Deren, Stan Brakhage, Sidney Peterson, Kenneth Anger, Bruce Baillie, Yoko Ono, and others.
Credit not given for both this course and 01:050:265.

01:175:266 ***Cult Films in American Culture (3)***
The cult film from its origins in the 1920s to its evolution in American culture. Close analyses of cult films paired with readings by J. Hoberman and Jonathan Rosenbaum, Sigmund Freud, and others.
Credit not given for both this course and 01:050:266.

01:175:267 ***American Film Directors (3)***
In-depth analyses of the structure and content of films of Stanley Kubrick, Orson Welles, John Frankenheimer, David Lynch, Val Lewton, Andy Warhol, and others. Emphasis on the mise-en-scène, narrative form, set design, sound, and special effects in the films of these celebrated filmmakers.
Credit not given for both this course and 01:050:267.

01:175:268 ***David Lynch and the American Film Avant-Garde (3)***
Focuses on the surreal films of David Lynch and the American Film Avant-Garde. Includes in-depth analyses of the structure and content of many of Lynch's bizarre and unique films including *Eraserhead*, *Mulholland Drive*, and *Blue Velvet*.
Credit not given for both this course and 01:050:268.

01:175:306 ***Modern French Cinema (in English) (3)***
Survey of the development of French cinema from World War II to the present day. Emphasis on the historical, sociopolitical, and aesthetic context of films screened.
Credit not given for both this course and 01:420:306.

01:175:320 ***World Cinema I (3)***
Developments in French, Italian, British, Russian, and other national cinemas from 1896 to World War II; also examines cross-influences between foreign and American cinema.
Credit not given for both this course and 01:195:320 or 01:354:320.

01:175:321 ***World Cinema II (3)***
Major developments in global filmmaking from the 1950s to the present, with an emphasis on specific national and transnational cultures and their industrial and artistic practices.
Credit not given for both this course and 01:195:321 or 01:354:321.

01:175:352 ***Hitchcock and Beyond (3)***
A close examination of the films of Alfred Hitchcock and the influence they have cast upon other filmmakers.

01:175:360 *Classics of German Cinema: From Haunted Screen to Hyperreality (3)*
Canonical films of the Weimar, Nazi, and post-war period. Focuses on class, gender, nation, cultural context, and the changing sociopolitical and historical climates in which they arose. Special attention to the issue of film style and to the question of what constitutes the film canon in particular in the case of recent works.
Credit not given for both this course and 01:470:360.

01:175:365 *Bollywood (3)*
A broad overview of the Bollywood industry and its cinematic productions over the years.
Credit not given for both this course and 01:013:365.

01:175:377 *Topics in World Cinema (3)*
Study of a particular region, time period, movement, or theme in world cinema.
Credit not given for both this course and 01:195:377. May be taken more than once, if content is different.

01:175:390 *Global Horror (3)*
Engaging with the horror genre both as a local and transnational phenomenon, interrogation of a vast range of horror films from the 1930s to the present, in order to understand how the often-dismissed genre articulates and amplifies an array of issues.

01:175:398 *Internship in Cinema Studies (3)*
Professional, supervised work in an approved organization or agency; an appropriately designed academic project required.
Prerequisite: Permission of the program before registration. NOTE: This internship is for enrichment and may not be used as elective credit toward the cinema studies major or minor.

01:175:420 *Seminar: Film Theory (3)*
Major developments in film theory from the silent era to the present; writings on film by Eisenstein, Kracauer, Bazin, Metz, Barthes, and others; practice in different methods to analyze films.

01:175:425 *Senior Seminar in Cinema Studies (3)*
One or more topics selected for their relevance to the interdisciplinary study of film. Emphasis on advanced problems and issues together with methodology and theory. Extended research paper required on a topic chosen in consultation with the instructor.
Prerequisite: Permission of program director.

01:175:477 *Advanced Topics in World Cinema (3)*
Intensive study of a particular issue in world cinema, with special attention paid to theoretical approaches. Specific topic announced at preregistration time.
Prerequisite: Permission of instructor. Credit not given for both this course and 01:195:477. May be taken more than once, if content is different.

Elective Courses (other courses may be preapproved for elective credit)

Elective Courses (other courses may be preapproved for elective credit)

01:175:210 Close Readings of Cinema (3)

01:175:265 American Experimental Film and Video (3)

01:175:266 Cult Films in American Culture (3)

01:175:267 American Film Directors (3)

01:175:268 David Lynch and the American Film Avant-Garde (3)

01:175:315,316 American Cinema I,II (3,3)

01:175:320,321 World Cinema I,II (3,3)

01:175:350,351 Major Filmmakers I,II (3,3)

01:175:352 Hitchcock and Beyond (3) (cannot count alongside 354:250 The Films of Alfred Hitchcock)

01:175:360 Classics of German Cinema: From Haunted Screen to Hyperreality (3)

01:175:365 Bollywood (3)

01:175:370 Film Genres (3)

01:175:373 The Documentary (3)

01:175:377 Topics in World Cinema (3)

01:175:390 Global Horror (3)

01:175:420 Seminar: Film Theory (3)

01:050:315 American Documentary (3)

01:175:477 Advanced Topics in World Cinema (3)

01:351:303 Creative Writing: Screenwriting for Film (3)

01:354:205 Cinema Today (4)

01:354:250 Films of Alfred Hitchcock (4) (cannot count alongside 175:352 Hitchcock and Beyond)

01:354:270 American Screen Comedy (4)

01:354:301 Digital Cinema (4)

01:354:308 The Craft of Screenwriting (3)

01:354:318 Films from Here: The Cinema of New York and New Jersey (4)

01:354:330,331 Critical Methodology in Film (3,3)

01:354:335 Film Sound (4)

01:354:355 Films of John Ford (4)

01:354:356 Films of Jean Renoir and Fritz Lang (4)

01:354:360 Film Noir (4)

01:354:370 Film Genres (3)

01:354:371 Film Melodrama (4)

01:354:374 Science Fiction Film (4)

01:354:375 Film and Society (3)

01:354:385 Theories of Women and Film (3)

01:354:391,392 Special Topics in Film Studies (3,3)

01:420:306 Modern French Cinema (in English) (3)

01:420:307,308 The French Film in French (3,3)

01:420:371,372 Topics in French Cinema (3,3)

01:420:471,472 Advanced Topics in French Cinema (3,3)

01:470:349 Contemporary German Cinema (3)

01:560:320 Mafia Movies: Approaches to Genre Italian and American Film (3)

01:560:345 Classics of Italian Cinema (3)

01:560:346 Contemporary Italian Cinema (3)

01:940:345,346 Spanish Film - English (3)

01:940:347,348 Latin American Cinema - English (3)

390 Finance (RBS-NB)

390 Finance

Major requirements for students who entered RBS ***prior to the fall 2023 semester***

Business Core

33:010:275 Introduction to Managerial Accounting (3) (prerequisite: 33:010:272)
33:011:300 Business Forum (2)
33:136:370 Management Information Systems OR 33:010:458 Accounting Information Systems (3) (33:010:458 required if double majoring in Accounting, Prerequisite for 33:010:458: 33:010:272)
33:136:385 Statistical Methods in Business (3)
33:136:386 Operations Management (3)
33:140:320 Business Law I (3) OR 33:522:334 Business Ethics (3) (junior or senior year, 33:140:320 required if double majoring in Accounting)
33:390:310 Financial Management for Finance Majors (3)**
33:620:301 Introduction to Management (3)
33:620:302 Management Skills (3)
33:620:492 Business Policy and Strategy (3) (prerequisites: 33:390:300 or 33:390:310, 33:620:301, 33:630:301, and senior year)
33:630:301 Introduction to Marketing (3)
33:799:301 Introduction to Supply Chain Management (3)

Required Finance Courses

33:390:380 Investment Analysis (3) (prerequisite: 33:390:310)
33:390:420 Derivatives (3) (prerequisite: 33:390:380)
33:390:400 Corporate Finance (3) (prerequisite: 33:390:310)

Four Finance Electives (12)

If you major in Finance as your first, second, or third major, you are required to take 33:390:310 Financial Management for Finance Majors. You will not earn credit for taking 33:390:300 Financial Management.

If you major in Accounting as your first, second, or third major, you are required to take 33:010:458 Accounting Information System and 33:140:320 Business Law I. You will not earn credit for taking 33:136:370 Management Information System. You can earn credit towards graduation if you take 33:522:334 Business Ethics but it will not fulfill a major requirement.

Students with more than one Business School major may only double count one RBS course between those majors.

Major requirements for students who entered RBS ***in the fall 2024 semester or later:***

Business Core

33:010:275 Introduction to Managerial Accounting (3) (prerequisite: 33:010:272)
33:011:301 Foundations for Your Career Journey (1)
33:011:302 Building Your Brand (1) (prerequisite: 33:011:301)
33:011:303 Conquering Your Transition (1) prerequisite: 33:011:302)
33:136:370 Management Information Systems OR 33:010:458 Accounting Information Systems (3) (33:010:458 required if double majoring in Accounting, Prerequisite for 33:010:458: 33:010:272)

33:136:385 Statistical Methods in Business (3)
33:136:386 Operations Management (3)
33:140:320 Business Law I (3) OR 33:522:334 Business Ethics (3) (33:140:320 required if double majoring in Accounting)
33:390:300 Financial Management (3)
33:620:301 Introduction to Management (3)
33:620:302 Management Skills (3)
33:620:492 Business Policy and Strategy (3) (prerequisites: 33:390:300 or 33:390:310, 33:620:301, 33:630:301, and senior year)
33:630:301 Introduction to Marketing (3)
33:799:301 Introduction to Supply Chain Management (3)

Required Finance Courses

33:390:380 Investment Analysis (3) (prerequisite: 33:390:310)
33:390:420 Derivatives (3) (prerequisite: 33:390:380)
33:390:400 Corporate Finance (3) (prerequisite: 33:390:310)

Four Finance Electives (12)

A grade of B or better is required to take any additional Finance department courses beyond 33:390:300 Financial Management.

If you major in Accounting as your first, second, or third major, you are required to take 33:010:458 Accounting Information System and 33:140:320 Business Law I. You will not earn credit for taking 33:136:370 Management Information System. You can earn credit towards graduation if you take 33:522:334 Business Ethics but it will not fulfill a major requirement.

Students with more than one Business School major may only double count one RBS course between those majors.

Food Science 400 (SEBS)

FOOD SCIENCE 400

Degree: B.S.

Director: Chitra Ponnusamy (chitra.ponnusamy@rutgers.edu)

Program Webpage: http://foodsci.rutgers.edu/undergrad.html

Managing Department Webpage: http://foodsci.rutgers.edu

Food science is the study of the chemical, biological, and engineering aspects of food and its components. While this curriculum applies principles acquired in biology, chemistry, physics, and mathematics to food, there is emphasis on the development of important problem-solving skills, giving students experience in reasoning and the use of

scientific and mathematical techniques. Attention also is devoted to current issues, innovations, and ethical issues in foods and food processing. Finally, students are given an opportunity to utilize their creative abilities in a course devoted to the development of new foods and food products.

All Food Science majors are required to complete basic sciences and Food Science courses, along with the current SEBS Core Curriculum. Starting Fall 2022, all Food Science majors must follow One Pathway to Food Science Major. Upon graduation, students can choose to apply for jobs in food, beverage, and related industries or pursue graduate studies.

Food Science 400 (SEBS)

Learning Goals

Learning Goals

Program Goal 1: Graduates will demonstrate and apply knowledge of the core competencies in food processing and engineering.

Program Goal 2: Graduates will demonstrate and apply knowledge of the core competencies in food chemistry and analysis.

Program Goal 3: Graduates will demonstrate and apply knowledge of the core competencies of food microbiology.

Program Goal 4: Graduates will demonstrate critical thinking and quantitative reasoning skills to solve technical and applied problems in food science.

Program Goal 5: Graduates will effectively communicate food science issues.

Program Goal 6: Graduates will demonstrate effective professional and leadership skills.

Food Science 400 (SEBS)

Graduation Requirements for the Major

Graduation Requirements for the Major

For an up-to-date description of food science major requirements, courses, and course sequences please refer to the program webpage http://foodsci.rutgers.edu/undergrad.html.

SEBS UNDERGRADUATE CORE CURRICULUM (39 credits)

Contemporary Challenges(6 credits)*Two courses, one in each of the Contemporary Challenges areas: Diversities and Social Inequalities*[CC-D]*and Our Common Future*[CC-O]

Experiential Learning(3 credits)*Students must participate in a certified experience that meets this goal*[EL]

Natural Sciences(6 credits)*Students must take two courses, one each in two of the following areas: physical, biological, or environmental sciences*[NS]

Historical Analysis(3 credits)*Students must take one course*[HST]

Social Analysis(6 credits)*SEBS students must complete two courses, one in either social/cultural analysis or economic analysis, and one in governmental and regulatory analysis*[SCL]

Arts and Humanities(3 credits)*Students must complete one course*[AH]

Writing and Communication(6 credits)*Students must take 01:355:101 or its equivalent*[WC]*and one course that fulfills the learning goal, communicate effectively in modes appropriate to a discipline or area of inquiry*[WCD]

Quantitative and Formal Reasoning(6 credits)*Students must take two courses*[QQ; QR]

Graduation Requirements for One Pathway to Food Science (400) Major
Starting Fall 2022, all Food Science majors must follow One Pathway to Food Science Major. One Pathway provides all majors with a unified, comprehensive education in Food Science major. All Food Science majors are required to complete basic sciences and Food Science courses, along with the current SEBS Core Curriculum. Upon graduation, students can choose to apply for jobs in food, beverage, and related industries or pursue graduate studies.

A. CORE + FOOD SCIENCE MAJOR REQUIRED COURSES (18 Cr)

QQ - 01:640:135/151 (4) Calculus I
QR - 01:960:211/285/401/11:373:215 (3) Statistics
NS - 01:119:115 (4) General Biology I
NS - 01:160:161 (4) General Chemistry I
EL - 11:400:493/494/11:902:300 SPIN (3) Experiential Learning

B. SEBS CORE COURSES (24 cr)

WC - 01:355:101 (3) Expository Writing
CC Contemporary Challenges (6)
A & H Arts and Humanities (3)
HST, SCL Historical, Social Analysis (9)
WCD 2nd writing course (3)

C. REQUIRED FOOD SCIENCE COURSES (38 cr)

11:400:103 OR 104 (3) Science of Food/Food and Health
[Satisfies NS-core requirements]. This course satisfies Food Science Program Learning Goal: Graduates will effectively communicate food science issues.
Prerequisites: None. Need to complete only one.

11:400:201+ 202 (5) Principles of Food Science + lab
This course satisfies the Food Science Program Learning Goal: Graduates will demonstrate and apply knowledge of the core competencies in food chemistry and analysis.
Prerequisites: General Biology I and II (01:119:115-116) and General Chemistry I and II (01:160:161-162). Pre- or corequisites for 201: Organic Chemistry (01:160:209 or 307).
Co-requisite for 202: Principles of Food Science (11:400:201)

11:400:301 (4) Food Processing Technologies
This course satisfies the Food Science Program Learning Goal: Graduates will demonstrate and apply knowledge of the core competencies in food processing and engineering.
Prerequisites: Physics I (01:750:193 or 201 or 203 and 205) and Calculus I (01:640:135 or 151).

11:400:302 (3) Food Process Engineering
This course fulfills Food Science Program Learning goal: Graduates will demonstrate and apply knowledge of the core competencies in Food Processing and Engineering.
Pre-requisite: Food Processing Technologies 11:400:301

11:400:304+305 (4) Food Analysis + Laboratory
This course fulfills Food Science Program Learning Goal: Graduates will demonstrate and apply knowledge of the core competencies in Food Chemistry and analysis. Students MUST register for 304 and 305 in the same semester.
Pre-requisites for 304: Principles of Food Science (11:400:201), Organic Chemistry (01:160:209)
Co-requisite for 305: Food Analysis (11:400:304).

11:400:314 (2) Current Issues in Food Science Food Laws
This course satisfies Food Science Program Learning Goal: Graduates will effectively communicate food science issues.
Prerequisite: Principles of Food Science (11:400:201).

11:400:405 (3) Sensory Evaluation of Foods
This course satisfies Food Science Program Learning Goal: Graduates will demonstrate critical thinking and quantitative reasoning skills to solve technical and applied problems in food science.
Prerequisite: Statistics (01:960:211/285/401 or 11:373:215).

11:400:411+ 413 (4) Food Chemistry + laboratory
This course satisfies Food Science Program Learning Goal: Graduates will demonstrate and apply knowledge of the core competencies in food chemistry and analysis.
Prerequisites for 411: Principles of Food Science 11:400:201; Must have previously taken Biochemistry (11:115:301 or 403) or be registered this semester.
Co-requisite for 413: Food Chemistry 11:400:411

11:400:412 (3) Food Product Development
This course satisfies Food Science Program Learning Goal: Graduates will demonstrate effective professional and leadership skills.
Prerequisites: Food Processing Technologies (11:400:301) and Current Issues in Food Science and Food Law (11:400:314) and Food Chemistry (11:400:411) and Sensory Evaluation of Foods (11:400:405).
Pre-or corequisite: Food Microbiology (11:400:423).

11:400:419 (3) Food Physical Systems
This course satisfies Food Science Program Learning Goal: Graduates will demonstrate and apply knowledge of the core competencies in Food Chemistry and analysis.
Prerequisite: Biochemistry 11:115:301 or 403.

11:400:423+ 424 (4) Food Microbiology + laboratory
This course satisfies Food Science Program Learning Goal: Graduates will demonstrate and apply knowledge of the core competencies of food microbiology.
Prerequisite: Elementary Organic Chemistry (01:160:209) OR Orgo I (01:160:307) OR Introduction to Microbiology (11:680:201) OR General Microbiology (01:447:390/11:680:390)
Pre- or corequisite: Food Microbiology 11:400:423

D. REQUIRED SCIENCE COURSES (22 cr)

01:160:209+ 211 (4)	Elementary Organic Chemistry + lab
01:750:193/201/203,205(4)	Physics with lab
11:115:301 OR 01:694:301 (3)	Biochemistry
01:119:116 + 117 (6)	General Biology II + lab
01:160:162 + 171 (5)	General Chemistry II + lab

E. ELECTIVE COURSES (18 cr)
Students can choose their area of specialization using elective course credits. There is sufficient flexibility for each student to add a minor of their choosing (although some minors will require credits beyond the 120 required for graduation.) This flexibility allows students to build expertise in a complementary field (Microbiology, Spanish, Entrepreneurship, etc.) that may enhance their career prospects in food technology (Business Economics for management positions, Sustainability for specialized positions, Animal Sciences to work within pet food industries, etc.) or even to satisfy a purely personal academic interest (philosophy, history, linguistics, etc.).

Elective Courses offered by the Food Science department

11:400:106 (3)	Food as Medicine
11:400:107 (3)	Foods: from Field to Table
11:400:315 (3)	Food and Sustainability: Study abroad in Thailand
11:400:316 (3)	Sustainable Food Production: Study abroad in Ireland
11:400:350 (1.5)	Wine Basics from Field to Glass
11:400:410 (3)	Nutrigenomics and Nutraceuticals
11:400:422 (3)	Food Safety: Fads, Facts, and Politics
11:400:490 (3)	Applying immersive learning to rural Agro-Food issues: Study Abroad in Southern India

French 420 (SAS)

FRENCH 420

Department of French, School of Arts and Sciences

Website: http://french.rutgers.edu

Chair: Lorraine Piroux

Undergraduate Director: Carole Allamand

Professors:

Carole Allamand, B.A., M.A., Geneva; M.A., Ph.D., Cornell

Andrew Parker, B.A., Princeton; M.A., Ph.D., Chicago

Richard Serrano, B.A., Stanford; M.A., Ph.D., California (Berkeley)

James B. Swenson Jr., B.A., Brown; M.A., Ph.D., Yale

Associate Professors:

Ana Pairet-Viñas, B.A., Paris IV; M.A., Ph.D., Pennsylvania

Lorraine Piroux, B.A., M.A., Paris III; M.A., Illinois; Ph.D., Northwestern

Jennifer Tamas-Le Menthéour, B.A., M.A., Ph.D., Paris IV; Ph.D., Stanford

Assistant Professor:

Shanna Jean-Baptiste, B.A., City College of New York; M.A., Ph.D., Yale

Anaïs Maurer, B.A., M.A., Paris IV; M.A., Tulane; Ph.D., Columbia

Assistant Teaching Professor:

Myriam Alami, B.A., M.A., Oregon

Instructor:

Anne-Catherine Aubert, B.A., M.A., Neuchâtel (Switzerland); M.A., Indiana; Ph.D., Rutgers

Faculty Emeriti:

François Cornilliat, B.A., M.A., Paris IV; Doctorat 3e cycle, Doctorat d'Etat, Paris VIII

Uri Eisenzweig, B.A., Tel Aviv; M.A., Doctorat 3e cycle, Paris VIII

Jerry Aline Flieger, B.A., Wisconsin; M.A., Ph.D., California (Berkeley)

Renée Larrier, B.A., Hofstra; M.A., Atlanta; Ph.D., Columbia

Mary Shaw, B.A., Arizona; M.A., M.Phil., Ph.D., Columbia

Mary Speer, B.A., Duke; M.A., Ph.D., Princeton

Placement

Placement

Students are placed in French courses according to performance on the online placement test taken upon entering the university as first-year or transfer students.

French 420 (SAS)

Learning Goals

Learning Goals

1. Cultural Awareness: understand the diversity of cultural expression in French-speaking areas around the world; develop cultural competence, cross-cultural skills, and global literacy.

Students are exposed to a wide range of forms of cultural expression in French-speaking areas across the globe. Course materials and topics promote awareness of linguistic and cultural diversity, facilitate intercultural connections, and help learners develop cross-cultural skills. Students with no prior knowledge of French may explore Francophone cultural issues through courses taught in English.

2. Communicative Competence: gain proficiency in oral and written French

In lower-division 100-level courses, students practice listening to French, and learn to speak, read, and write in French through oral practice, readings, and written assignments. In 200-level and upper-division courses taught in French, students develop comprehension and communication skills (interpretive, interpersonal, presentational) both spoken and written. Majors and minors will attain Advanced Mid language proficiency as defined in the American Council on the Teaching of Foreign Languages (ACTFL) proficiency guidelines.

3. Critical Thinking and Interpretive Skills: analyze oral, print, film, and digital cultural production in French

In advanced and upper-division courses, students will develop skills in critical thinking and in the comprehension, analysis, and interpretation of written, audio, visual or multimodal texts in relation to specific historical, political, social, and environmental contexts.

4. Career Readiness and Project-Based Skills

Through teamwork, experiential learning and capstone experiences in upper-level courses, students apply their linguistic proficiency and cross-cultural literacy to collaborative projects and independent research on French and Francophone topics. Study abroad programs and courses with a practical component (French for the health professions; outreach to French learners in K-12; business French) encourage experiential learning.

Majors in French will develop readiness for education careers and international postgraduate study as well as for professions where language and cultural competence are expected. By taking a senior seminar or equivalent capstone, majors will develop research skills as applied to French and Francophone topics and perfect their command of interpretive and presentational modes of communication.

Eligible majors may complete the Honors Thesis in French or the Interdisciplinary Honors Thesis in French or in English. In preparing this 25 to 50-page document students will develop research and communication skills that prepare them for entry into graduate programs or jobs requiring research and communication in multilingual contexts.

Major Requirements

Major Requirements

The French major consists of 33 credits. Students majoring in French may choose between the Language Intensive and the Interdisciplinary options. All French majors are strongly urged to spend at least one semester in residence in the French Language & Culture Living-Learning Community and/or to participate in a program of study in a French-speaking country.

A grade-point average of 2.0 in all French courses taken at Rutgers is required of all majors.

Language Intensive Option

The Language Intensive Option is designed for students who want to build advanced language proficiency in French. The option fosters cultural fluency, intercultural skills, and global literacy through critical exploration of cultural production in French. It consists of 33 credits above the introductory level including:
1. 9 credits in French language above the elementary level (or numerically above 420:128), with a minimum of 3 credits at the advanced level (or numerically above 420:200)
2. 6 credits in French and Francophone literatures (215 or 217; 216 or 218).
3.15 credits at the 300-level and above, with 3 credits in the study of French and Francophone civilization (315 or 316). Students may take up to 9 credits in approved English-taught courses. All students must take a senior seminar (480, 481) or an equivalent capstone at the 400-level, usually in the fall of their senior year. 6 of the required upper-level credits must be taken with faculty in the Department of French (New Brunswick).

Interdisciplinary Option

The Interdisciplinary Option allows students to combine knowledge, skills and abilities acquired in several disciplines or areas of study, including French. It is designed to foster language proficiency, cultural awareness, intercultural skills and global literacy through critical exploration of cultural production in French-speaking regions. It consists of 33 credits, including:
1. 12 credits in French language above 101, with a minimum of 3 credit at the advanced level (or numerically above 420:200).
2. 3 credits in French and Francophone literatures (215 or 217; 216 or 218).
3. 18 credits in Electives, with a minimum of 9 credits at the 300-level or above taught in English or French, including a 3-credit capstone course. Up to 6 credits may be taken in another department, provided that the courses focus on subjects relevant to French/Francophone cultures and are approved in writing by a departmental advisor. At least 6 of the required upper-level credits must be taken with faculty in the Department of French (New Brunswick).

French 420 (SAS)

Minor Requirements

Minor Requirements

The minor in French consists of a sequence of at least six 3-credit courses above the elementary level (or numerically above 420:128). It must include one of the following: 01:420:215, 01:420:216, 01:420:217, 01:420:218, and another 200-level course taught in French.

In addition, two courses at the 300-level or above are required. Only one of the following may be counted towards the minor: 420:132, 420:137.

French 420 (SAS)

Departmental Honors Program

Departmental Honors Program

Students majoring in French may elect to prepare an honors thesis during their senior year. An overall cumulative grade-point average of 3.0 and a grade-point average of 3.4 or better in French are required. Credits earned in the honors program may be counted toward the major requirements. Students interested in undertaking a thesis should, select a topic in the spring of the junior year. Students select either the comprehensive examination and honors paper option, 01:420:495-496 (6 credits), or an interdisciplinary thesis option, 01:420:498 (3 credits). Interested students are invited to obtain a full program description from the honors coordinator at the department.

At the introductory level, 01:420:217 and 218 are offered as honors courses to students with strong placement scores or who participate in school honors programs. Also, each semester, the department designates an advanced course (01:420:395, 396) for students in the department of college honors program.

French 420 (SAS)

Teaching Certificate Option

Teaching Certificate Option

Students intending to seek certification as secondary teachers should obtain information about application requirements from the Graduate School of Education no later than the second year.

French 420 (SAS)

Summer Program in Paris

Summer Program in Paris

Each summer the Department of French offers the Rutgers Summer Program in Paris. This immersion program, staffed by faculty from the department and from universities in Paris, offers an opportunity to earn 6 credits in a native French setting and provides cultural and extracurricular activities to acquaint students more fully with French life. To participate in this program, a student must have at least one year of college-level French or the equivalent. Inquiries should be addressed to the Department of French.

French 420 (SAS)

Study Abroad Programs in France

Study Abroad Programs in France

Rutgers offers yearlong, one-semester, and three-week programs of study in Paris and in other cities in France, includng Aix-en-Provence (Winter Session). The programs, which offer courses in most disciplines, can be very beneficial to prospective French majors and minors, particularly if attended in the sophomore year. The prerequisites for participation in the program differ for sophomore and junior years. Detailed information is available from the French department or Rutgers Global-Study Abroad.

French 420 (SAS)

Certificate of Basic Knowledge in French

Certificate of Basic Knowledge in French

The department awards a certificate of basic proficiency in French based on demonstrated ability to comprehend, speak, read, and write French as attested by a grade of B or better in 6 credits of work taken in courses conducted entirely in French at the 200 level or above. Qualified students should apply before the seventh week of their last semester of residence. French majors and minors are not eligible.

French 420 (SAS)

Diploma in French Commerce

Diploma in French Commerce

This internationally recognized diploma is granted by the Chambre de Commerce de Paris to those successfully completing a special examination offered at Rutgers each May after the final examination period. Details are available from the Department of French.

French 420 (SAS)

Information for Students

Information for Students

Each semester, the department makes available in its offices a detailed description of its programs and all courses to be offered the following semester. Students are strongly encouraged to consult this information and the departmental advisors.

Program and course information is also available on the department's website.

Courses in English

Courses in English

01:420:105 ***French for Reading Knowledge I (3)***
Development of reading skills to intermediate-mid level. Readings in standard French drawn from contemporary journalism and introductory texts in the humanities and social sciences.
Not open for credit to students who have completed two or more years of secondary school French or have completed 01:420:132, 137.

01:420:106 ***Frenchb for Reading Knowledge II (3)***
Continuation of 01:420:105. Development of reading skills to intermediate-high level. Readings from more advanced texts in the humanities and social sciences, with some selections chosen for pertinence to students' research or interest.
Prerequisite: 01:420:105 or permission of department. Not open for credit to students who have completed two or more years of secondary school French or 01:420:132, 137.

01:420:140 ***Translation Workshop (1.5)***
Introduction to basic translation theory and strategies with intensive practice in written translation of short texts from a variety of cultural, literary, journalistic, and media sources from French to English and English to French.
Prerequisite: 01:420:102 or 01:420:121 or 01:420:128 or placement in 131.

01:420:160 ***Short Stories of France (3)***
Some of the most important French short stories in English translation. Close reading and historical overview. Authors include Beckett, Camus, Maupassant, Nerval, Sartre, Stendhal, and Voltaire.

01:420:161 ***Belonging in Francophone Literature and Film (3)***
Critical examination of the concepts of belonging and exclusion in contemporary literature and film, as an essential measure by which identities and lives are shaped in the global Francophone world.

01:420:230 ***Understanding the French Enlightenment (3)***
Critical examination, through major philosophical and literary works of the history, of the concepts and the values of the French Enlightenment, with particular emphasis on their relevance in past and present debates about civil

society, political institutions, nature, morality, artistic creation, scientific progress, religion, and changing notions of selfhood.
Credit not given for both this course and 01:195:233.

01:420:241,242 ***Major French Writers in Translation (3,3)***
Landmarks of French literature from the Renaissance to the present. Plays, novels, and essays of such authors as Molière, Voltaire, Rousseau, Balzac, Flaubert, Sartre, and Camus.
Credit not given for both 01:420:241 or 242 and 01:195:251.

01:420:243 ***20th Century Women Writing in French (3)***
Range of literature by 20th century women writers translated from the French, analyzed in relation to literary and social contexts.
Credit not given for both this course and 01:988:263.

01:420:251 ***France in the World--the World in France (3)***
An exploration through architecture, cinema, music, literature, and visual arts of 21st-century France's place in the world and the rest of the world's conception of France.

01:460:260 ***The Theater of France (3)***
An introduction to important plays in the history of French theater in English translation. Approach combines close reading with discussion of historical context and staging practices.

01:420:261 ***Life Writing in France (3)***
Critical interpretation of autobiographical texts, with particular attention to the distinction of fact and fiction, and theories of subjectivity, identity, and memory.
Credit not given for both this course and 01:195:262.

01:420:271 ***Francophilia: Literature and Sexuality in Modern France (3)***
Explores cultural representations of nonconforming sexualities in France from the late-19th century to the present. Approach combines writing exercises with close reading and analytical discussion of literature, theory, and film within evolving historical context.
Credit not given for both this course and 01:888:291.

01:420:272 ***Major French Plagiarists: Literature between Repetition and Originality (3)***
Critical examination of the history and practice of literary plagiarism, with particular emphasis on the pre-modern tradition of imitation and past and present debates about originality, creativity, plagiarism, and changing values of authorship.
Credit not given for both this course and 01:195:274.

01:420:281 ***French and Francophone Text(s) and Image(s) (3)***
Explorations of the relationship between the visual arts and landmark texts written in French during various periods from the Middle Ages to the present, with particular emphasis on the ways visual arts have influenced and been influenced by the literature of France and Francophone cultures.

01:420:282 ***Music, Culture, and Memory in the French-Speaking World (3)***
The place of music in French and Francophone culture, with particular attention to its role in historical events and in the way they are remembered.
Credit not given for both this course and 01:195:282.

01:420:283 *French Gastronomy and Global Food Culture (3)*
Cultural codes and socioeconomic contexts that shape the preparation and consumption of food in France and the United States. Cross-cultural interdisciplinary perspectives on contemporary issues such as technology and cultural identity, cultural heritage in a globalized world, food and migration, sustainable communities, food insecurity, food justice, and food sovereignty.
Credit not given for both this course and 01:070:382.

01:420:306 *Modern French Cinema (in English) (3)*
Survey of the development of French cinema from World War II to the present day. Emphasis on the historical, sociopolitical, and aesthetic content of films screened.
Credit not given for both this course and 01:420:308 or 01:175:306.

01:420:313 *Gender and Sexuality in Modern France and the Francophone World (3)*
Survey of modern and contemporary works from France and the Francophone world that challenge conventional representations of gender and sexuality. Works to be discussed (from comparative feminist, queer, trans, and critical race approaches) include narrative fiction, memoir, drama, essay, and graphic novel. The focus will shift at the end of the term to films that explore the impact of the AIDS pandemic and the legacy of French colonialism.
Credit not given for this course and 01:988:313.

01:420:314 *Contemporary French Critical Thought (3)*
Introduction to contemporary French intellectual trends, with emphasis on poststructuralist movements. Readings of such writers as Barthes, Derrida, Foucault, and Lacan.

01:420:391 *Topics in French/Francophone Literature and Culture (3)*
Special topics selected to meet the interests and needs of the students.

01:420:407 *Francophone Linguistics (3)*
Study of problems in French and Francophone dialects and creoles in conjunction with theoretical problems in linguistics.
Prerequisite: 01:420:333 or 01:615:201, or permission of instructor. Credit not given for both this course and 01:615:407.

Courses in French

Courses in French

Prerequisites

French 01:420:215, 216, 217, or 218, or 3 credits at the 300 level are prerequisites to 300 and 400-level courses in culture and literature taught in French, except 01:420:301, 303, 318, 324, 499.

01:420:100 *Intensive Elementary French I (3)*
Functional use of the language in speaking, writing, and reading modern French. Part of three-week intensive Winter Session program in Aix-en-Provence, France.
Not open to students with two or more years of high school French. Credit not given for both 01:420:100 and 01:420:101.

01:420:101-102 ***Elementary French (4,4)***
Functional use of the language in speaking, writing, and reading modern French. Laboratory exercises.
Not open for credit to students who have had two or more years of secondary school French. Credit not given for both 01:420:101 and 01:420:100. Credit not given for both 01:420:102 and 01:420:128.

01:420:103,104 ***Elementary French Laboratory (1,1)***
Instructor-guided practice to ¿¿develop listening comprehension and speaking skills in French at the introductory level. Communicative activities involve media, individual and group activities, and assessment of pronunciation and fluency.
Corequisites: (103) 01:420:101; (104) 01:420:102.

01:420:121 ***French Fundamentals (4)***
Intensive review and practice of the fundamentals of French conversation, reading, and composition. Laboratory exercises.
Prerequisite: Placement test.

01:420:128 ***Intensive Elementary French II (3)***
Functional use of the language in speaking, writing, and reading modern French. Part of three-week intensive Winter Session in Aix-en-Provence, France.
Prerequisite: 01:420:101; 01:420:105,106; 01:420:121; placement; or permission of the department. Credit not given for both 01:420:128 and 01:420:102. 01:420:128 will substitute for 01:420:102 in prerequisite for 01:420:131.

01:420:131-132 ***Intermediate French (4,4)***
Development of fluency in written and spoken French. Conversation, composition, and grammar review using short literary texts and audiovisual materials.
Prerequisites: (131) 01:420:102 or 121 or 128 or placement test. (132) 01:420:131, or placement test.

01:420:133,134 ***Intermediate French Lab (1,1)***
Instructor-guided practice to develop listening comprehension and oral skills in French at the intermediate level. Communicative activities involve media, individual and group activities, and assessment of pronunciation and fluency.
Prerequisite: 01:420:102 or 01:420:121 or equivalent. Corequisites: (133) 01:420:131; (134) 01:420:132.

01:420:137 ***Accelerated Intermediate French (4)***
Development of fluency in written and spoken French. Conversation, composition, and grammar review using short literary texts and audiovisual materials in a one-semester format.
Prerequisites: 01:420:102, 121 and permission of department. Corequisite: 01:420:133.

01:420:171 ***French Theater Workshop (1.5)***
Production of selected scenes in French.

01:420:201 ***Francophone Culture and Language for Heritage Speakers (3)***
Culture and composition through contemporary arts and media. Development of all linguistic skills with emphasis on vocabulary building, grammar structures, and writing skills.
Prerequisite: Special permission required; contact department.

01:420:210 *Intensive French Conversation (3)*
Development of facility and accuracy in oral expression and listening comprehension. Class exercises and discussion, written work, and extensive audio and video laboratory work.
Prerequisite: Placement test or 01:420:132.

01:420:213 *Advanced French I: Stories of Scandals and Mysteries (3)*
Study of the forms and structures of the French language to complete mastery of foundations for advanced courses. Written work, class discussion, audio-visual materials.
Prerequisite: placement test or 01:420:132.

01:420:214 *Advanced French II: Writing Styles (3)*
Study and practice in composition to perfect skills for written French. Analysis of writing styles and forms; vocabulary development, syntax.
Prerequisite: placement test or 01:420:213 or equivalent.

01:420:215 *Modern Literature in French (3)*
Introduction to literature and culture from the 18th century to the present, through close reading of selected texts; focusing on significant themes, genres, and artistic movements.
Prerequisite: 01:420:132 or equivalent. Credit not given for both 01:420:215 and 217.

01:420:216 *French Literature from the Middle Ages to the Enlightenment (3)*
Introduction to literature through the reading of representative authors from the 13th to the 18th century; focusing on significant themes, literary forms, and genre.
Prerequisite: 01:420:132 or equivalent. Credit not given for both 01:420:216 and 218.

01:420:217 *Modern Literature in French Honors (3)*
Introduction to literature and culture from the 18th century to the present, through close reading of selected texts; special attention to the nature of literary work, and to the goals and methods of literary analysis.
Prerequisite: 01:420:132 or equivalent. Honors status by special permission or placement test. Credit not given for both 01:420:215 and 01:420:217 or for both 01:420:216 and 01:420:218.

01:420:218 *French Literature from the Middle Ages to the Enlightenment Honors (3)*
Introduction to French literature through reading of representative authors from the 13th to the 18th century; special attention to the nature of literary work, and to the goals and methods of literary analysis.
Prerequisite: 01:420:132 or equivalent. Honors status by special permission or placement test. Credit not given for both 01:420:215 and 01:420:217 or for both 01:420:216 and 01:420:218.

01:420:224 *French for Healthcare (3)*
Necessary linguistic, writing and oral communicative tools for students who plan to enter the medical profession, work with French-speaking patients, or volunteer in a Francophone country in a medical setting.
Prerequisites: 01:420:132, 137, or one 200-level course in French, or placement, or special permission. No prior knowledge in the healthcare field is necessary.

01:420:297,298 *French Cultural Experience (1.5,1.5)*
Special topics in French and Francophone cultures selected to meet the interests and needs of the students. Required of the residents of the Leupp French House.
Prerequisite: 01:420:102, 106, 121, 128, or placement test. May be repeated for credit.

01:420:301 ***Learning and Sharing French I (1.5)***
Development of articles reflecting upon acquisition of a second language and promoting French language and culture, via an online magazine to be shared with K-12 students.

Prerequisites: 01:420:210, 213, 214, 215, 216, 217, 218, 224, or placement.

01:420:303 ***Advanced French Conversation (3)***
Discussion of topics to develop fluency of speech and command of idioms. Group conversations and debates.
Prerequisite: 01:420:210 or 216. Not open to native speakers or to students returning from junior year in France.

01:420:307,308 ***The French Film in French (3,3)***
Film as a major expression of French culture; viewing and analysis of films by such directors as Truffaut, Chabrol, Rohmer, Renoir, Clair, and Cocteau. Introduction to methods of criticism.
Credit not given for these courses and 01:420:305,306. Prerequisites: 01:420:215, 216, 217, 218, or placement.

01:420:310 ***Introduction to Francophone Literature (3)***
Survey of texts in French from Africa (including Maghreb and Madagascar), the Caribbean, North America, and Southeast Asia.

01:420:315 ***French Civilization from the Middle Ages to the Revolution (3)***
Analysis of Old Régime foundations of French culture; concentration on interaction and evolution of social and intellectual phenomena.
Prerequisites: 01:420:215, 216, 217, 218, or placement.

01:420:316 ***French Civilization from the Revolution to the Present (3)***
Analysis of development of modern French culture; concentration on interaction and evolution of social and intellectual phenomena.
Prerequisites: 01:420:215, 216, 217, 218, or placement.

01:420:318 ***Learning and Sharing French II (1.5)***
Development of an interactive presentation reflecting upon acquisition of a second language and promoting French language and culture, to be shared with K-12 students.
Prerequisites: 01:420:210, 213, 214, 215, 216, 217, 218, 224, or placement.

01:420:319 ***Women Writers from 1789 to the Present (3)***
Analysis and discussion of the cultural contexts, modes of expression, and self-definitions of women writers in modern France from the Revolution of 1789 to the post-1968 revolutions in feminist theory and practice.
Prerequisites: 01:420:215, 216, 217, 218, or placement.

01:420:320 ***Theater Workshop (3)***
Reading, discussion, and production of representative texts from French dramatic literature.

01:420:324 ***French Commerce (3)***
Fundamental principles governing commercial organizations in France. Practical business correspondence.
Prerequisites: 01:420:210, 213, 214, 215, 216, 217, 218, 224, or placement.

01:420:332 ***French Sounds (3)***
French phonetics in theory and practice. A comparative study of English and French sounds. Exercises in transcription and correct pronunciation.
Prerequisite: 01:420:132. Not open to first-year students.

01:420:333 ***French Linguistics (3)***
Introduction to the methods and concerns of modern theoretical linguistics and to the practice and theory of syntax through the study of particular problems in the syntax of French.
Prerequisite: 200-level French course or permission of instructor.

01:420:335,336 ***The French Novel (3,3)***
Forms and techniques of the novel from *La Princesse de Clèves* to the present.
Prerequisites: 01:420:215, 216, 217, or 218.

01:420:337 ***The French Theater (3)***
Analysis of dramatic structure and meaning in texts selected from the classical tradition to the Theater of the Absurd.

01:420:338 ***French Poetry (3)***
Critical interpretation of French poetry with particular attention to the unique problems of French prosody and poetic theory. Selected texts from the 16th century to the 20th century.
Prerequisites: 01:420:215, 216, 217, or 218.

01:420:341,342 ***One French Writer (3,3)***
Intensive study of the work of a single author. Analysis of elements such as writer's place in literary or cultural history, critical approaches, the writer's role in a given genre. Author chosen each semester/year dependent on faculty and student interest.
Prerequisites: 01:420:215, 216, 217, or 218.

01:420:351 ***Literature in French Society (3)***
Exceptional role of literature in French culture, politics, and day-to-day life. Generally studies one topic in a given historical period.

01:420:371,372 ***Topics in French Cinema (3,3)***
Topics such as relations between film and other genres (novel, theater); film in relation to cultural history; introduction to critical approaches to film. Consult departmental announcement.
Recommended: One course in French cinema, 01:420:305, 306, 307, or 308.

01:420:391 ***Topics in French/Francophone Literature and Culture (3,3)***
Special topics selected to meet the interests and needs of the students.
Prerequisites: 01:420:215, 216, 217, 218, 315, 316, or 318.

01:420:393,394 ***Topics in French Literature and Culture (1.5,1.5)***
Special topics selected to meet the interests and needs of the students. Seven-week courses.

01:420:395,396 ***Junior Honors Seminar (3,3)***
In-depth examination of a problem, topic, or theme in French literature or culture, in order to develop analytic and research skills. Subject announced by department.
Open to students in departmental or school honors programs or by permission of department.

01:420:401 ***Translation (3)***
Techniques of translation; study of dictionaries and specialized vocabularies; texts selected from the humanities and the social sciences.

01:420:402 ***Advanced Stylistics and Composition (3)***
Study of rhetoric through the detailed stylistic analysis of literary texts and the imitation of writing techniques.
Prerequisite: One 300-level course conducted in French.

01:420:403 ***History of the French Language (3)***
Development of the French language from its origins to the present; suggestions of possible future evolution. Emphasis on phonology, morphology, syntax, and lexicon; consideration of cultural forces influencing linguistic stability or change at crucial points in French history.
Prerequisites: 01:420:315 or 316.

01:420:405,406 ***Modern France (3,3)***
First semester: economic and social background; interpretive analysis of major problems affecting French life; audiovisual materials. Second semester: analysis of major trends in French culture and institutions.

01:420:409 ***Studies in Cultures of the Francophone World (3)***
Analysis of the cultural production (including film, music, visual and performing arts, and literature) of regions in which the French language plays a major role.

01:420:410 ***Sub-Saharan African Literature (3)***
Study of literature in French by writers in or from sub-Saharan Africa.
Credit not given for both this course and 01:016:410.

01:420:411 ***North African Literature (3)***
Study of literature in French by writers in or from the Maghreb.
Credit not given for both this course and 01:016:411.

01:420:412 ***Canadian Literature (3)***
Study of literature in French by writers in or from Québec and other regions of Canada.

01:420:413 ***Caribbean Literature (3)***
Study of literature in French by writers in or from the Caribbean (Haiti, Martinique, Guadeloupe, French Guiana).

01:420:415 ***Medieval French Literature (3)***
The French Middle Ages: readings in epic, romance, didactic literature, and lyric poetry of the 12th through the 15th centuries; texts usually read in modern French translations.

01:420:416 ***Sixteenth-Century French Literature (3)***
The French Renaissance: tradition and innovation in the writings of such authors as Marot, Rabelais, Marguerite de Navarre, Montaigne, and the poets of the Pléiade.

01:420:421 ***French Poetry and Prose of the 17th Century (3)***
Selected works from the major writers representing the aesthetic and intellectual currents of the age.

01:420:422 ***French Classical Drama (3)***
Major plays of Corneille, Molière, and Racine.

01:420:431,432 ***The Age of Enlightenment (3,3)***
Great writers of the 18th century--Montesquieu, Voltaire, Diderot, and Rousseau--and their relationship to the social, literary, and intellectual currents of the period.

01:420:441 ***Romanticism in France (3)***
French romanticism, its origins, psychology, and development, with readings from Madame de Staël, Hugo, Balzac, Stendhal, and their contemporaries.

01:420:451 ***Twentieth-Century French Drama (3)***
French drama from Claudel through Beckett to Koltès; new concepts in dramatic art. Relations among authors, actors, the public, and the period.

01:420:452 ***Twentieth-Century French Novel (3)***
Readings in works by such authors as Proust, Gide, Camus, Sartre, Duras, and Perec; the "nouveau roman." The novel in relation to social, philosophical, and political thought.

01:420:455,456 ***Major Currents of French Thought (3,3)***
Critical and formal analysis of literary texts selected to illustrate the development of ideas in France from the *Roman de la Rose* to the present.

01:420:469,470 ***Topics in French Studies (3,3)***
Topics such as detailed studies of issues in French culture, civilization, or literature; in-depth study of an author, movement, genre, or period.
Offered only in the Rutgers Summer Program in Paris. Consult departmental announcement.

01:420:471,472 ***Advanced Topics in French Cinema (3,3)***
Topics such as detailed studies of issues in film theory, analysis, or history; in-depth study of schools, movements, or specific filmmakers. Consult departmental announcement.
Prerequisites: 6 credits from the following courses: 01:420:305, 306, 307, 308, or 371.

01:420:480 ***Senior Seminar in French Literature (3)***
Thorough and probing study of an important theme, topic, or movement within the history of French literature. Subject announced by the department.

01:420:481 ***Senior Seminar in French Culture (3)***
In-depth examination of a problem or period in French civilization, with a focus on development of interpretive and analytic skills. Subject announced by the department.
Prerequisites: 01:420:315 or 316.

01:420:490 ***Advanced Topics in French and Francophone Linguistics (3)***
Prerequisites: 01:420:333 and 01:615:201, or permission of instructor.

01:420:491,492 *Advanced Topics in French/Francophone Literature and Culture (3,3)*
Special topics selected to meet the interests and needs of the students.
Prerequisites: 01:420:315 or 316.

01:420:493,494 *Independent Study (BA,BA)*
Prerequisites: Permission of instructor and undergraduate director.

01:420:495 *Senior Honors Thesis I (3)*
Preparation for written and oral honors examination and honors paper based on research under the direction of the departmental honors committee.
Prerequisite: Permission of departmental honors committee.

01:420:496 *Senior Honors Thesis II (3)*
Preparation for written and oral honors examination and honors paper based on research under the direction of the departmental honors committee.
Prerequisite: Permission of departmental honors committee.

01:420:498 *Senior Honors Thesis: Interdisciplinary (3)*
Represents research and writing in French complementing honors theses written in English on a French-related topic in other disciplines such as history, art history, or political science. Research thesis and defense under the direction of the departmental honors committee.
Prerequisite: Special permission.

01:420:499 *French for Oral Proficiency (1)*
Instructor-guided oral proficiency practice sessions in advance of the Oral Proficiency Interview (OPI).
Prerequisite: Open only to junior and senior majors and minors in French or permission of department.

05:300:331 *Materials and Methods in French (3)*
Solutions to classroom problems. Course planning: teaching aims, pedagogical devices, language content, cultural background, selections of text.
Only for students in the French teaching program (MAT); others by permission of instructor. May count as education credit.

Gender and Media 438 (SAS)

GENDER AND MEDIA 438

Department of Women's, Gender, and Sexuality Studies, School of Arts and Sciences

Director of Interdisciplinary Studies: Mary Chayko

Gender and Media 438 (SAS)

Program Information

Program Information

Complementing any major, the gender and media minor is a cross-unit, interdisciplinary undergraduate minor offered jointly by the School of Communication and Information and the School of Arts and Sciences' women's, gender, and sexuality studies program. Students are introduced to the minor through a foundational course that offers a shared vocabulary for analyzing issues of power and representation within the media. Students then have the choice of taking two electives in media production, as well as two electives in critical media/feminist theory. At the end of the program, students apply skills and knowledge of gender and the media in the completion of a project in a capstone course that offers internship, service learning, and multimedia project options.

Gender and Media 438 (SAS)

Program-Level Learning Goals

Program-Level Learning Goals

The gender and media minor provides a course of study designed for students interested in a combination of theory and practice perspectives on the representation and production of gender in the media.

- Students will apply technical skills as media producers with the ability to add their own critical voices and unique perspectives.
- Students will demonstrate critical thinking skills that enable them to critique and improve current conditions of media production and consumption.
- Students will articulate, create, examine, inform, and improve systemic and individual power dynamics of the contemporary landscape for gender and media.

Gender and Media 438 (SAS)

Minor Requirements

Minor Requirements

The minor is open to all majors at Rutgers. Students are required to complete six 3-credit courses with a grade of C or better, for a total of 18 credits. There is one foundational course, two practice/production courses, two conceptual courses, and a capstone project course. Students are strongly encouraged to speak with an adviser to create a plan for completing the program. Note that courses taken to fulfill requirements in the gender and media minor **will count** toward the requirements of any other major or minor in the School of Communication and Information (SC&I) and/or for the program in women's, gender, and sexuality studies (WGS).

Foundation Course (3 credits/one course)

Choose one of the following foundational courses:

- 01:988:202 Gender, Culture, and Representation (3)
- 04:567:215 Gender, Race, and Class in the Media (3)

Practice/Production Courses (6 credits/two courses)

The first practice/production course is required:

- 01:988:200 Gender, Digital Media, and Social Curation (3)

Choose one of the following courses for the second course:

- 04:189:251 Strategic Presentation Methods in Digital Media (3)
  04:567:200 Writing for Media (3)

Conceptual Courses (6 credits/two courses)

Only one of these course (3 of the 6 credits) may be taken at the 200 level; the other must be taken as a 300 level.

Choose one of the following for the first conceptual course:

- 04:567:274 Consumer Media Culture (3)
- 04:567:380 Media and Social Change (3)
- 04:547:340 Gender and Technology (3)
- Relevant Special Topics courses (SC&I)

Choose one of the following for the second conceptual course:

- 01:988:255 Gender, Art, and Society (3)
- 01:988:257 Gender and the Body: Representations and Pornography (3)
- 01:988:258 Gender, Race, and Contemporary Art (3)
- 01:988:259 Homosexuality and Visual Culture (3)
- 01:988:317 Gender and Consumption (3)
- 01:988:341 Gender and Popular Culture(3)
- 01:988:376 Theories of Women and Film (3)
- Relevant Special Topics courses (WGS)

Capstone Course (3 credits/one course)

Students may enroll in the capstone after completing a minimum of 12 credits in the minor. Choose one of the following courses to fulfill the capstone requirement:

- 01:988:499 Capstone in Gender and Media (course within the women's, gender, and sexuality studies program)
- 04:567:499 Capstone in Gender and Media (course within the journalism and media studies program)

Courses Offered in Women's, Gender, and Sexuality Studies

Courses Offered in Women's, Gender, and Sexuality Studies

01:988:200 *Gender, Digital Media, and Social Curation (3)*
This course investigates the relationship between the construction of gender and technologies of digital media. Students will engage with theories of new media, as well as critical intersectional scholarship on gender, race, sexuality, and ability. Central to the course are questions of materiality and embodiment in the digital age; the impact of digital interactivity on the construction and production of gender, race, and sexuality; and the digital distribution of power relations, discipline, and surveillance. While this course does not focus on the acquisition of technical skills for the making and curation of digital media, students will complete a digital media project developed over a large portion of the semester.
Prerequisite: 01:988:202 or 04:567:215.

01:988:202 *Gender, Culture, and Representation (3)*
Examines how gender is represented in cultural texts and artifacts; introduces students to theories of representation.

01:988:255 *Gender, Art, and Society (3)*
Women artists, their achievements, and impact. Social and cultural reasons for their neglect in the visual arts and how that neglect is being remedied today. Different ways in which men and women are depicted in art and how those differences relate to culture and society.
Please note that this is an online course.

01:988:257 *Gender and the Body: Representation and Pornography (3)*
Examination of representations of gendered bodies in art, sexuality, gender, politics, and pornography. Examines how to understand who defines what is obscene and why some work is called pornography.

01:988:258 *Gender, Race, and Contemporary Art (3)*
Intersection of gender and race in contemporary American art. Black and white racial politics in relation to gender and contemporary art in the United States. Special focus on African-American artists.

01:988:259 *Homosexuality and Visual Culture (3)*
Central role of homosexuality and homoeroticism in visual culture in the distant and recent past as well as the present. Marginalization of homosexual artists, critics, and patrons despite direct participation in cultural production of art and popular culture.

01:988:317 *Gender and Consumption (3)*
Introduces feminist approaches to consumption through readings that examine the relation of consumption to body, race, nation, and sex work.
Prerequisite: 01:988:101 or 201 or 235 or permission of instructor.

01:988:385 *Theories of Women and Film (3)*
Basic concepts in feminist film theory; the female voice in cinema; representations of women in classical Hollywood film; films made by women.

01:988:396 ***Topics in Women's and Gender Studies: Gender, Race, and Technoscience (3)***
Selected topics in women's and gender studies. Topics vary each semester. Consult department or the course schedule for each semester's offering.

01:988:499 ***Capstone in Gender and Media (3)***
In this capstone to the Gender and Media minor, students will develop, discuss, produce, and critique a project related to gender, media, and technology. Students will articulate and present the project in written and oral formats and will have the option to also (1) create an in-depth multimedia component to the project; 2) complete an internship; or 3) complete a service learning experience.
Note: students in the minor, especially those who are not otherwise SC&I majors, may choose to enroll in the capstone through the program in Women's and Gender Studies, course number 01:988:499.
close
Prerequisite: 12 or more credits in the minor Corequisite: none

Gender and Media 438 (SAS)

Courses Offered in the School of Communication and Information

Courses Offered in the School of Communication and Information

04:189:251 ***Strategic Presentation Methods in Digital Media (3)***
This course examines theories and techniques for analyzing, producing, and disseminating messages. Students will learn how to use web-based and multimedia presentation tools to connect with a variety of audiences and convey a desired message. Each student will craft a message to support some social change by developing and shaping the message into compelling digital media presentations in a range of formats.
This course counts toward the digital communication, information, and media minor.

04:547:340 ***Gender and Technology (3)***
The course analyzes gender in relation to race, class, nationality, culture, religion, and sexuality in the context of technological innovation. Its focus is on fundamental concepts, the feminist critique of the social construction of technology, and the impact of gender issues on the workplace. By studying inclusiveness and equity in a transnational and historical perspective, the course examines the effects of gender on the development and use of information technologies and on gender-based information and technology preferences.

04:567:205 ***Digital Newswriting and Reporting (3)***
Fundamentals of gathering information and journalistic writing. By the end of the course, students will learn basic journalistic newswriting and reporting techniques and concepts, including writing in journalistic style, fact-gathering, conducting observation, freedom of information, and professional ethics. (Foundational course)
Prerequisites: 04:189:102; 04:567:200.

04:567:215 ***Gender, Race, and Class in the Media (3)***
Content, treatment, and effects of women and minority group coverage in television, newspapers, magazines, popular music, and film. (Foundational course)
Formerly numbered 04:567:334.

04:567:274 ***Consumer Media Culture (3)***
Provides a critical understanding of advertising's role in modern society. Examines the history of advertising, the commercial and social aspects of the messages conveyed by ads, and the advertising industry's influence on social relations and institutions. (Conceptual course)

04:567:380 ***Media and Social Change (3)***
This course looks at how past and present social movements (e.g., environmental, civil rights, labor movements) challenge dominant social, economic, and political structures and how they have been portrayed in the mass media. It also examines how social activists use media technologies to organize themselves and communicate their messages to wide audiences in order to achieve social change. (Conceptual course)

04:567:499 ***Capstone in Gender and Media (3)***
In this capstone to the gender and media minor, students will develop, discuss, produce, and critique a project related to gender, media, and technology. Students will articulate and present the project in written and oral formats and will have the option to also (1) create an in-depth multimedia component to the project; 2) complete an internship; or 3) complete a service-learning experience. Note: Students in the minor, especially those who are not otherwise SC&I majors, may choose to enroll in the capstone through the program in women's, gender, and sexuality studies, course number 01:988:499.
Prerequisite: Minimum of 12 credits in the minor must be completed before enrolling in the capstone.

Life Sciences (SAS)

LIFE SCIENCES

Division of Life Sciences, School of Arts and Sciences

Website: http://lifesci.rutgers.edu

Dean: Lori R. Covey

Director, Office of Undergraduate Instruction: Martha Haviland

Chair, Department of Cell Biology and Neuroscience: Megerditch Kiledjian

Chair, Department of Genetics: Tara C. Matise

Chair, Department of Kinesiology and Health: Brandon Alderman

Chair, Department of Molecular Biology and Biochemistry: Barth Grant

The following majors are available in the Division of Life Sciences:

Biological Sciences 119
Cell Biology and Neuroscience 146
Exercise Science 377
Genetics 447
Molecular Biology and Biochemistry 694
Sport Management 955

Students interested in the life sciences also may consider related tracks within major programs offered by the Department of Chemistry and Chemical Biology (chemical biology option) and the Department of Psychology (specialization in behavioral neuroscience).

The Division of Life Sciences coordinates, fosters, and integrates the instructional and research activities of a broad range of faculty with interests in the biological sciences. The principal units of the division include four departments: Cell Biology and Neuroscience, Genetics, Kinesiology and Health, and Molecular Biology and Biochemistry, as well as two sections, the biological chemistry section of the Department of Chemistry and Chemical Biology, and the biopsychology and behavioral neuroscience section of the Department of Psychology. The division's primary goal is to provide a high caliber of interdisciplinary teaching and research in the life sciences as it trains the next generation of teachers, researchers, and future health professionals.

Instruction in the life sciences has undergone enormous changes over the past 15 to 20 years. These changes reflect the intellectual revolution of the last two decades, as well as technical advances that have expanded greatly the tools available to life scientists. Today, students majoring in the life sciences at Rutgers University-New Brunswick experience an exciting atmosphere of learning that exposes them to the concepts and methods of these intellectual and technological advances. The students have open to them a plethora of learning avenues, ranging from thought-provoking lecture presentations to original and cutting-edge research opportunities in state-of-the-art laboratories. A first-class faculty and modern laboratory equipment reflect the division's commitment to provide its students with the best learning environment.

The division offers a wide spectrum of majors for students interested in the life sciences. These options range from a division-based major in biological sciences, designed to provide a general life sciences education, to department-based majors in cell biology and neuroscience, exercise science, genetics, molecular biology and biochemistry, and sport management aimed at providing specialized training, with a strong emphasis on research. Graduates of the division will be highly competitive for a range of postbaccalaureate opportunities, including graduate education and research, health-professions training, and biomedical and biotechnological research positions, as well as teaching careers in the sciences.

The first two years of the student's tenure at Rutgers is expected to revolve around the life sciences core curriculum, a series of basic offerings designed to provide the general background required for pursuing upper-division courses in any of the individual majors. Regardless of the major chosen, students are encouraged to participate in independent study within a research laboratory in order to take advantage of the rich expertise of the many life sciences faculty in New Brunswick and Piscataway. The exercise science and the sport management majors require an internship experience. The division also has a highly developed advising system, with dedicated and knowledgeable faculty advisers available to work with individual students in their selection of courses, completion of major requirements, and preparation for future careers.

Students may not major in more than one of the following majors in the Division of Life Sciences: Biological Sciences (119), Cell Biology and Neuroscience (146), Exercise Science (377), Genetics (447), Molecular Biology and Biochemistry (694), or Sport Management (955). Furthermore, students majoring in one of these four majors may not minor in Biological Sciences (119). Life science majors or minors may not be combined as double majors or as major/minors with Biomathematics (122), Biochemistry (115), or Microbiology (680).

No more than 16 credits from among the life science courses required for completion of any Division of Life Sciences major may be fulfilled by credits transferred from any school outside of Rutgers-New Brunswick.

For additional information and announcements about the Division of Life Sciences, please visit the division's website.

Life Sciences (SAS)

Life Sciences Core Curriculum

Life Sciences Core Curriculum

The life sciences core curriculum is a set of courses that include a series of introductory- and intermediate-level courses in the physical and life sciences forming a foundation of knowledge necessary to understand modern biology and to prepare for the more advanced courses required for each major. Following are core courses:

1. 01:119:115-116 General Biology (4,4)

2. 01:119:117 Biological Research Laboratory (2)

3. 01:160:161-162 General Chemistry (4,4) or 01:160:163-164 Honors General Chemistry (4,4) or 01:160:165-166 Extended General Chemistry (4,4)

4. 01:160:171 Introduction to Experimentation (1)

5. 01:160:307-308 Organic Chemistry (4,4) or 01:160:315-316 Honors Organic Chemistry (4,4)

6. 01:160:311 Organic Chemistry Laboratory (2)

7. 01:750:203-204 General Physics (3,3) or 01:750:271-272 Honors Physics (3,3)*

8. 01:750:205-206 General Physics Laboratory (1,1)*

9. 01:640:135,136 Calculus for the Life and Social Sciences (4,4) or 01:640:151-152 Calculus for Mathematical and Physical Sciences (4,4)**

10. 01:447:380 Genetics (4)***.

*01:750:193-194 (4,4) or 01:750:201-202 (5,5) may be substituted for 01:750:203-204 (3,3) plus 01:750:205-206 (1,1).

**Basic Statistics for Research (01:960:401, 3 credits), Basic Probability and Statistics (01:960:379, 3 credits), or Statistics I and II (01:960:211 and 212) may be substituted for the second semester of Calculus.

***Students majoring in genetics must take 01:447:384-385 (4,4) instead of 01:447:380

Life Sciences (SAS)

Learning Goals

Learning Goals

Our overarching goal for educating our students majoring in biological sciences is to inspire them to want to discover and understand the natural world. In the process of achieving this goal, we expect our students to acquire not only facts and concepts, but also skills and perspectives. We hope that our learning goals will both prepare our students for a variety of career objectives and supply them with the tools to become lifelong learners in the ever-evolving world of biological sciences.

Learning Goals:

I. To acquire the appropriate factual and conceptual knowledge that provides students with a foundation to further their education and career in the areas of life science or health science. Students will be able to demonstrate basic knowledge (e.g., identify, define, explain, etc.) of the concepts, practices, and principles that comprise the biological sciences.

II. To develop data analysis and statistical reasoning skills that prepare students for a society increasingly reliant on the use of data and information. Students will be able to interpret/evaluate patterns in data presented in tables, figures, and graphs, as well as be able to organize, summarize, and present data.

III. To develop the ability to use scientific reasoning as embodied by the structured process commonly known as the scientific method to empower students with the ability to generate and refine knowledge. Students will be able to evaluate and apply the practice of science.

IV. To develop critical thinking and problem-solving skills necessary to prepare students to evaluate, synthesize, and generate knowledge that provides them with a competitive advantage to adapt to an evolving, global, and knowledge-based society. Students will be able to demonstrate application of higher-order thinking (e.g., classify, diagnose, evaluate, synthesize, hypothesize, etc.). Students will develop an understanding of not only the connections within biology, but also the connections between biology and other scientific disciplines.

Life Sciences (SAS)

Entry Requirements of the Major

Entry Requirements of the Major

Students wishing to major in biological sciences must have completed two semesters of General Biology and Biological Research Laboratory with a grade of C or better in each course. Both semesters of General Biology must have been completed at the same institution or on the same campus at Rutgers. No more than two courses with a grade of D may be used to fulfill the requirements of the major. A 2.0 grade-point average must be maintained in the life sciences core and elective courses applied toward the major. Students must meet with an adviser before they can successfully declare their major.

Life Sciences (SAS)

Major Requirements

Major Requirements

The program in biological sciences, administered through the Division of Life Sciences Office of Undergraduate Instruction, is intended to provide a broad and comprehensive training in modern biology. This course of study is recommended for those who wish to study biology as part of their liberal arts education, preparing them for a career in one of the health professions, graduate studies in biology, a teaching career in secondary schools (courses in education also are required), as well as employment in various areas of the life sciences. If a student wishes to concentrate his or her studies in a specific area of biology, he or she should consider a major offered by one of the departments in the Division of Life Sciences or in the School of Environmental and Biological Sciences. Faculty advisers are available to assist each student with course selection and program requirements.

A minimum of 20 credits of coursework from among general biology, genetics, and life sciences electives must be completed in residence. In other words, no more than 16 credits in this part of the major requirements may be transferred from any institution outside of Rutgers University-New Brunswick. This rule is intended to assure that students receiving degrees from Rutgers-New Brunswick have taken a minimum number of courses in their major with this faculty. Please keep in mind that although a course may transfer from another institution into one of the Rutgers-New Brunswick schools, it will not necessarily be accepted toward the major in biological sciences. Therefore, all transfer courses must be evaluated and accepted by the advising office of the Office of Undergraduate Instruction in order to count toward the major. As indicated earlier, students must complete both semesters of general biology at the same institution or on the same campus of Rutgers before becoming eligible to declare the biological sciences major. Any life sciences courses applied to the major in biological sciences should be taken within 10 years of graduating. Returning students must meet with their adviser to discuss their path to graduation. Credits for cooperative education and Winter Session courses (exceeding 1 credit) may not be used to satisfy requirements for the major in biological sciences. To be applied to the major, Summer Session courses must be offered over a minimum of five weeks. Online courses will be reviewed on a case-by-case basis to confirm that they meet departmental learning goals before they may be used to satisfy the requirements for the major.

The course requirements for the biological sciences major are divided into two sections: the life sciences core courses and the life sciences electives.

Required Life Sciences Core Courses (47 credits)

01:119:115-116 General Biology I,II (4,4)
01:119:117 Biological Research Laboratory (2)
01:160:161-162 General Chemistry (4,4) or 01:160:163-164 Honors General Chemistry (4,4) or 01:160:165-166 Extended General Chemistry (4,4)
01:160:171 Introduction to Experimentation (1)
01:160:307-308 Organic Chemistry (4,4) or 01:160:315-316 Honors Organic Chemistry (4,4)*
01:160:311 Organic Chemistry Laboratory (2)
01:750:203-204 General Physics (3,3) or 01:750:271-272 Honors Physics***
01:750:205-206 General Physics Laboratory (1,1)***
01:640:135,~~138~~136 Calculus for the Life and Social Sciences (4,4)** or 01:640:151-152 Calculus for Mathematical and Physical Sciences (4,4)
01:447:380 Genetics (4)
* With approval from a Biological Sciences Advisor, 01:160:308/316 may be replaced by another elective course. Please meet with an Advisor to discuss.

**01:750:193-194 (4,4) or 01:750:201-202 (5,5) may be substituted for 01:750:203-204 (3,3) plus 01:750:205-206 (1,1).
***Calculus II 01:640:13~~8~~6(4) may be substituted by 01:960:379 Basic Probability and Statistics (3), 01:960:401 Basic Statistics for Research (3), or 01:960:211-212 Statistics I,II (3,3).

Life Sciences Electives (24 credits)

It is highly recommended that students meet with a life sciences adviser in the Division of Life Sciences Office of Undergraduate Instruction when planning their elective courses. It is important that the courses taken complement each other as much as possible and are not merely a collection of unrelated topics.

The electives must include at least three laboratory courses, only one of which may be satisfied by research work. Biological Research Laboratory and "library research" do not qualify for this requirement. A minimum of six courses (18 credits) must be at the 300 or 400 level, including at least three separate laboratory courses or three courses with a laboratory component. The laboratory associated with genetics (01:447:382 or equivalent), if taken, may be used to satisfy one of the three laboratory requirements.

No course at the 100 level may be used to satisfy the life sciences elective requirements. A maximum of 6 credits of independent study/research/honors research may be used toward the 24 elective credits. Please keep in mind that a minimum grade-point average of 2.8 is required to enroll in an independent study/research course in biological sciences. Research courses can satisfy only one of the three laboratory requirements, regardless of number of credits. Courses taken on a pass/fail basis may not be used to satisfy requirements for the major in biological sciences. A grade-point average of 2.0 or better in courses credited toward the major is required. No more than two courses with a grade of D may be used to fulfill the requirements of the major.

The elective courses must include at least one course (3 or 4 credits) each from the Departments of Cell Biology and Neuroscience 146, Genetics 447, Molecular Biology and Biochemistry 694, and Ecology, Evolution, and Natural Resources 11:216 at the School of Environmental and Biological Sciences. A list of approved courses in subject areas in addition to those in the Division of Life Sciences (Biological Sciences 119, Cell Biology and Neuroscience 146, Genetics 447, and Molecular Biology and Biochemistry 694) will be published by the advising office of the Office of Undergraduate Instruction. It is strongly recommended that students consult this list, which is available

on the website, prior to registering for their courses. Generally, acceptable courses from other departments on any campus of Rutgers University have a year of general biology as a prerequisite; however, there are exceptions. It is imperative for students to consult the published list and meet with an adviser. Credits from cooperative education and Winter Session courses (exceeding 1 credit) may not be used to satisfy requirements for the major in biological sciences. To be applied to the major, Summer Session courses must be offered over a minimum of five weeksIf double majoring with another permitted life sciences major, at least four of the 3-4 credit life science courses applied to the Biology major may not overlap with courses used to fulfill second major requirements. Given that biological sciences is a dynamic and developing field, it is critical that coursework applied to the major must be current. Thus, any life sciences courses applied to the major in biological sciences should be taken within 10 years of graduating. Returning students must meet with their adviser to discuss their path to graduation.

Life Sciences (SAS)

Minor Requirements

Minor Requirements

The minor requires four courses of at least 3 credits each in life sciences subjects as well as General Biology and Biological Research Laboratory. Both semesters of General Biology must be completed at the same institution or on the same campus at Rutgers. No other course at the 100 level may be used to satisfy the minor. A minimum of 11 credits must be taken at Rutgers University-New Brunswick. A maximum of 3 credits of research in a life sciences subject may be used toward the minor. A minimum of three courses at the 300 level or above is required. If majoring in a permitted life sciences major, no more than two of the four life science courses applied to the minor requirements may overlap with courses used to fulfill major requirements. Only life sciences courses acceptable for the biological sciences major may be used for the minor. Courses in chemistry, mathematics, or physics do not count toward the minor. A grade-point average of 2.0 or better in courses credited toward the minor is required. No more than one course with a grade of D may be used to fulfill the requirements of the minor.

Life Sciences (SAS)

Independent Study and Research in Biology

Independent Study and Research in Biology

A minimum cumulative grade-point average of 2.8 is required for a student to register for an independent study/research course in biological sciences. A maximum of 6 credits of laboratory-based independent study, research, or honors projects may be used to fulfill the elective credits requirement in biology. The independent study/research form, available from the advising office of the Office of Undergraduate Instruction, must be completed and signed by the professor in whose laboratory the student will study prior to initiating the research project. Approval of a research proposal by the director of advising and a special permission number from the Office of Undergraduate Instruction is necessary for registration. Students may not earn academic credit for laboratory projects for which they are being paid. Students wishing to apply research credits from other departments toward the major in biological sciences must get approval from the advising office of the Office of Undergraduate Instruction, Division of Life Sciences, prior to beginning their research project.

Life Sciences (SAS)

Departmental Honors Program

Departmental Honors Program

To qualify, a student must have a cumulative grade-point average of 3.0 or better and an average of 3.4 or better in life sciences core and elective courses credited toward the biological sciences major at the end of the junior year and previous research experience. At that time, the student should apply formally to the advising office of the Office of Undergraduate Instruction. Accepted students are expected to complete at least 6 credits over two semesters in an independent research project, resulting in a thesis, and to pass an oral examination before a faculty committee in the general field of the student's program of emphasis. If the research is done in a laboratory outside of the Division of Life Sciences, the examination committee must include at least one individual from the Division of Life Sciences faculty. Departmental Honors is completed in the fall and spring of senior year. Students accepted into special programs (e.g. BA/MD) may complete honors during junior year.

Honors students must register either for an honors course sequence in life sciences or for a course sequence in a school honors program. These decisions should be discussed with an adviser. An approval form (available in the advising office) must be completed.

Life Sciences (SAS)

Joint B.A./M.D. Program (Rutgers Undergraduate-Robert Wood Johnson Medical School)

Joint B.A./M.D. Program (Rutgers Undergraduate-Robert Wood Johnson Medical School)

Rutgers Undergraduate/Robert Wood Johnson Medical School Joint Bachelor of Arts/Medical Degree (B.A./M.D.) Program

This program is designed for high-achieving premedical students of Rutgers University who are in their sophomore year. Specially selected students will obtain bachelor's and medical degrees in a seven-year program of study taken at Rutgers undergraduate units and Robert Wood Johnson Medical School (RWJMS).

Application to this program is open to all undergraduate students enrolled at Rutgers University, New Brunswick. It is not directly associated with any one school within the university but see below for specific restrictions.

Admission is a two-stage and highly competitive process. In the first stage, undergraduate students are admitted into the program by an executive committee consisting of faculty from the appropriate units. Eligible applicants are sophomores at any of the undergraduate schools of Rutgers University who have spent at least a year here. Prospective applicants from Rutgers University-Newark and Rutgers University-Camden must transfer to one of the units in New Brunswick for their sophomore year and complete at least 30 credits here. All applicants must have completed 4 semesters of college with a minimum of 60 credits. Applicants with an Associate¿s Degree, regardless of whether it was earned as a dual degree in high school or as a traditional degree after high school,

are ineligible to apply for the program. Admitted students will need to complete all of the core requirements of their undergraduate unit and major requirements with the exception of Biological Sciences and Cell Biology and Neuroscience majors, who may apply credit from the first professional year toward the major requirements. During the fourth year, students will be full time at the medical school and elective credits will count towards the undergraduate degree. The executive committee reviews applications and selects those students who are deemed most qualified for the program. The second stage occurs typically after the fourth year of study. It is the responsibility of the RWJMS Admissions Committee to review the credentials of students recommended by the Joint Program Executive Committee. Students who are deemed to have met the academic and nonacademic standards of the program will be recommended to the RWJMS Admissions Committee. The purpose of this second, noncompetitive review is to ascertain that the student has maintained adequate academic and nonacademic qualities appropriate for retention in the medical school. It is expected that students will have grades of A or B (Honors or High Pass) in courses taken at both universities. However, recommendation is not automatic. The final decision rests with the RWJMS Admissions Committee. Upon approval by this admissions committee, the student will be permitted to continue into the fifth year of study and will be matriculated formally as a candidate for the M.D. degree at RWJMS.

Applicants to the B.A./M.D. program must be in their fourth semester at Rutgers University. Applications are available in the Health Professions Office after spring break; they are due by the end of May. There is no rolling admissions policy. Decisions are expected to be made in July. By the end of the semester of application, applicants must have completed a minimum of 60 credits of which at least 30 credits must be at Rutgers, and they must have been in attendance at Rutgers, New Brunswick a minimum of one year. Additionally, applicants must have a minimum cumulative and science grade-point average of 3.5 by the end of the third semester and sustain it through the end of the fourth. The applicant must have completed, or be in the process of completing by the end of the fourth semester, two semesters of biology with lab, two semesters of general chemistry with lab, two semesters of organic chemistry, one semester of college-level mathematics, and one semester of English. Applicants who have not taken General Biology I and II and lab at Rutgers University, either because they have been awarded advanced placement biology credits or because they have transferred equivalent courses from another institution, must have at least one year of upper-division biology courses at Rutgers-New Brunswick (i.e., two courses of at least 3 or more credits each at the 200 level or higher). Those students who are admitted to the program without having two semesters of physics, two semesters of English, and organic chemistry lab must complete these requirements by the end of the third year of study. Students who did not take the SAT or ACT but who are admitted to the program will be required to take the MCAT by April of the junior year and score competitively with a total score of at least 508 (minimum single sub score of 123). An application form has been developed that allows the student to provide the executive committee with information it deems useful for its deliberations.

The bachelor's degree will be awarded upon completion of the undergraduate college and major requirements, by the end of year four. Upon satisfactory completion of year seven and all RWJMS requirements, the student will receive the medical degree.

Students who wish to pursue a major other than biological sciences must discuss their plans with the appropriate department in order to establish the requirements they need to complete for their major. For a student at Rutgers-New Brunswick who has elected to major in biological sciences, 15 credits from RWJMS will be applied toward the major (as stipulated below). The baccalaureate degree will be awarded upon completion of the undergraduate college requirements and major requirements, usually by the end of year four. The number of credits, however, is not directly translated between the two universities; no more than 4 credits per laboratory course and 3 credits per non-laboratory course taken at RWJMS may be used toward the bachelor's degree at Rutgers.

A student enrolled in the program completing a major in biological sciences at Rutgers-New Brunswick is required to complete remaining Life Science Core Curriculum coursework and Intro to Biochemistry (01:694:301) and three approved life sciences electives (3- or 4-credit courses) at Rutgers-New Brunswick. Students who have not taken General Biology I and II at Rutgers, either because they have been awarded AP biology credit or because they have transferred equivalent courses from another institution, must complete an additional approved life sciences electives (3- or 4-credit courses) at Rutgers-New Brunswick.

Students in the program must meet with advisers at the medical school and at their undergraduate school when planning their elective courses. No more than one independent study/research course may be applied toward the biological sciences major for students in the B.A./M.D. program. Please be sure to meet with a biological sciences adviser when selecting life science elective courses because not all course combinations are allowed given overlap in subject matter taught at Rutgers' undergraduate units and RWJMS.

For further information on this program, you may contact the Division of Life Sciences, Health Professions Office, Nelson Biological Laboratories, 604 Allison Road, Piscataway, NJ 08854-8082, at 848-445-5667.

Life Sciences (SAS)

Joint B.A./M.D. Program (Rutgers Undergraduate-New Jersey Medical School)

Joint B.A./M.D. Program (Rutgers Undergraduate-New Jersey Medical School)

Rutgers Undergraduate/New Jersey Medical School Joint Bachelor of Arts/Medical Degree (B.A./M.D.) Program

The Rutgers Undergraduate/New Jersey Medical School joint program started in the fall of 2003. The purpose of the program is to permit students to begin their medical education after their third year or at least 96 degree credits at Rutgers. Specially selected students will obtain bachelor's and medical degrees in a seven-year program of study taken at Rutgers undergraduate units and New Jersey Medical School (NJMS).

This program is only open to students enrolled in Rutgers University-New Brunswick schools.

Admission is a two-phase and highly competitive process. In the first phase, undergraduate students are admitted into the program by the Joint Program Executive Committee consisting of faculty from the appropriate units. Eligible applicants are sophomores at any of the undergraduate schools at the New Brunswick location of Rutgers University who have been enrolled here for at least one year. The executive committee reviews applications and selects those students who are deemed most qualified for the program. The second phase occurs typically after the third year of study. It is the responsibility of the NJMS Admissions Committee to review the credentials of students recommended by the Joint Program Executive Committee. The purpose of this second review is to ascertain that the student has maintained adequate academic and nonacademic qualities appropriate for retention in the medical school. It is expected that students will have grades of A or B in courses taken at Rutgers. Students must complete the Medical College Admission Test (MCAT) by January of the junior year before matriculating at NJMS and be required to be in the competitive range of other accepted NJMS students. This second review is noncompetitive. Students who are deemed to have met the academic and nonacademic standards of the program will be recommended to the NJMS Admissions Committee. However, recommendation is not automatic. The final decision

rests with the Medical School Admissions Committee. Upon approval by the Medical School Admissions Committee, the student will be permitted to continue into the next year of study and will be matriculated formally as a candidate for the M.D. degree at the New Jersey Medical School.

Applicants for the program must be in their fourth semester at Rutgers-New Brunswick. Applications are available in the Health Professions Office after spring break; they are due by the end of May. There is no rolling admissions policy. Decisions are expected to be made in July. By the end of the semester of application, applicants must have completed a minimum of 60 credits of which at least 30 credits must be at Rutgers, and they must have been in attendance at Rutgers a minimum of one year. Additionally, applicants must have a minimum cumulative and science grade-point average of 3.5 by the end of the third semester which must be maintained through the end of the fourth. The applicant must have completed, or be in the process of completing by the end of the fourth semester, two semesters of biology with lab, two semesters of general chemistry with lab, two semesters of organic chemistry, one semester of college-level mathematics, and one semester of English. Applicants who have not taken General Biology I and II and lab at Rutgers, either because they have been awarded advanced placement biology credits or because they have transferred equivalent courses from another institution, must have at least one year of upper-division biology courses at Rutgers (i.e., two courses of at least 3 or more credits each at the 200 level or higher). Those students who are admitted to the program without having two semesters of physics, organic chemistry lab, and two semesters of English must complete these requirements by the end of the third year of study. An application form has been developed that allows the student to provide the committee with information the committee deems useful for its deliberations.

Students will be admitted at the end of the spring semester of year two and be formal members of the program beginning with year three. Prior to leaving the Rutgers undergraduate unit, students must satisfy all college and major requirements, except for the credits which they will receive from NJMS (please see next paragraph). For a student at Rutgers-New Brunswick who has elected to major in biological sciences, 15 credits from NJMS will be applied toward the major.

The baccalaureate degree will be awarded upon completion of the undergraduate college requirements and major requirements by the end of year four. Upon satisfactory completion of year seven or eight, as well as all New Jersey Medical School requirements, the student will receive the medical degree.

A student enrolled in the program completing a major in biological sciences at Rutgers-New Brunswick is required to complete remaining Life Science Core Curriculum coursework and three approved life sciences electives (3- or 4-credit courses) at Rutgers-New Brunswick. Students who have not taken General Biology I and II at Rutgers, either because they have been awarded AP biology credit or because they have transferred equivalent courses from another institution, must take Genetics 01:447:380, and four approved life sciences electives (3- or 4-credit courses) at Rutgers-New Brunswick. No more than one independent study/research course may be applied toward the biological sciences major for students in the B.A./M.D. program. Please be sure to meet with a biological sciences adviser when selecting life science elective courses because not all course combinations are allowed given overlap in subject matter taught at Rutgers and NJMS.

For further information on this program, you may contact the Division of Life Sciences, Health Professions Office, Nelson Biological Laboratories, 604 Allison Road, Piscataway, NJ 08854-8082, at 848-445-5667.

Joint B.A./D.M.D. Program (Rutgers School of Arts and Sciences-Rutgers School of Dental Medicine)

Joint B.A./D.M.D. Program (Rutgers School of Arts and Sciences-Rutgers School of Dental Medicine)

Rutgers School of Arts and Sciences/Rutgers School of Dental Medicine Joint Bachelor of Arts/Doctor of Medicine in Dentistry (B.A./D.M.D.) Program

Rutgers School of Arts and Sciences/Rutgers School of Dental Medicine joint program started in the spring of 2002. The purpose of the program is to permit students to begin their dental education after their third year or at least 98 credits at Rutgers. Specially selected students will obtain bachelor's and dental degrees in a seven-year program of study taken at Rutgers undergraduate units and Rutgers School of Dental Medicine.

This program is open to students enrolled at the School of Arts and Sciences, Rutgers University-New Brunswick. The program is administered by the Health Professions Office.

Admission is a two-phase and competitive process. In the first phase, undergraduate students are admitted into the program by the Executive Committee of the Joint Program consisting of faculty from the appropriate units. The executive committee reviews applications and selects those students who are deemed most qualified for the program. The second phase occurs typically after the third year of study. It is the responsibility of the Rutgers School of Dental Medicine Admissions Committee to review the credentials of students recommended by the articulated program executive committee. The purpose of this second review is to ascertain that the student has maintained adequate academic and nonacademic qualities appropriate for admission to the dental school. It is expected that students will have grades of A or B in courses taken at Rutgers University. Students must complete the Dental Admissions Test (DAT) and earn scores of 20 or better in Total Science, Academic Average, Organic Chemistry, General Chemistry, and Biology. Students may only take the DAT one time to qualify for this program. The second review is noncompetitive. Students who are deemed to have met the academic and nonacademic standards of the program will be recommended to the Rutgers School of Dental Medicine Admissions Committee. However, recommendation is not automatic. The final decision rests with the Dental School Admissions Committee. Upon approval by the Dental School Admissions Committee, the student will be permitted to continue into the next year of study and will be matriculated formally as a candidate for the Doctor of Medicine in Dentistry (D.M.D.) degree at the Rutgers School of Dental Medicine.

Applicants to the program must be in their fourth semester at the School of Arts and Sciences, Rutgers-New Brunswick. Applications are available in the Health Professions Office after spring break; they are due by the end of May. There is no rolling admissions policy. Decisions are expected to be made in July. By the end of the semester of application, applicants must have completed a minimum of 60 credits of which at least 30 credits must be at Rutgers, and they must have been in attendance at the School of Arts and Sciences, Rutgers-New Brunswick a minimum of one year. Additionally, applicants must have a minimum cumulative and science grade-point average of 3.5 by the end of the third semester, which must be maintained through the end of the fourth. The applicant must have completed, or be in the process of completing by the end of the fourth semester, two semesters of biology with lab, two semesters of general chemistry with lab, two semesters of organic chemistry, two semesters of college-level mathematics (Calc I and either Calc II or an approved Statistics course) and one semester of English. Applicants who have not taken General Biology I and II and lab at Rutgers, either because they have been awarded

advanced placement biology credits or because they have transferred equivalent courses from another institution, must have at least one year of upper-division biology courses at Rutgers (i.e., two courses of at least 3 or more credits each at the 200 level or higher). If AP credit was granted for general chemistry, then organic chemistry I and II and laboratory and a course in biochemistry at Rutgers are required. If AP credit was granted for English, upper level English at Rutgers is required with the same amount of credit work. If AP credit was granted for physics, two approved courses from Physics or Kinesiology & Health at Rutgers are required. Those students who are admitted to the program without having two semesters of physics, biochemistry, organic chemistry lab, and two semesters of English, must complete these requirements by the end of the third year of study.

The B.A./D.M.D. program is a seven-year program with year one being the first undergraduate year. Students will be admitted at the end of the spring semester of year two and be formal members of the articulated program beginning with year three. Prior to leaving the School of Arts and Sciences, Rutgers-New Brunswick, students must satisfy all college and major requirements, except for the credits which they will receive from Rutgers School of Dental Medicine (please see below). For a student at the School of Arts and Sciences, Rutgers-New Brunswick who has elected to major in biological sciences, 15 credits from Rutgers School of Dental Medicine will be applied toward the major.

The baccalaureate degree will be awarded upon completion of the general education and major requirements by end of year four. Upon satisfactory completion of year seven or eight, as well as all Rutgers School of Dental Medicine requirements, the student will receive the dental degree.

A student enrolled in the joint program completing a major in biological sciences at Rutgers-New Brunswick is required to complete any remaining Life Sciences Core Curriculum coursework and three approved life sciences electives (3- or 4-credit courses) at Rutgers-New Brunswick. Students who have not taken General Biology I and II at Rutgers-New Brunswick, either because they have been awarded AP biology credit or because they have transferred equivalent courses from another institution, must take Genetics 01:447:380, and four approved life sciences electives (3- or 4-credit courses) at Rutgers-New Brunswick. No more than one independent study/ research course may be applied toward the biological sciences major for students in the B.A./D.M.D. program. Please be sure to meet with a biological sciences adviser when selecting life science elective courses because not all course combinations are allowed given overlap in subject matter taught at Rutgers-New Brunswick and Rutgers School of Dental Medicine.

For further information on this program, you may contact the Division of Life Sciences, Health Professions Office, Nelson Biological Laboratories, 604 Allison Road, Piscataway, NJ 08854-8082, at 848-445-5667.

Life Sciences (SAS)

Joint B.A./M.S. Physician Assistant Program (Rutgers School of Arts and Sciences-School of Health Professions)

Joint B.A./M.S. Physician Assistant Program (Rutgers School of Arts and Sciences-School of Health Professions)

Rutgers School of Arts and Sciences/Rutgers School of Health Professions Joint Bachelor of Arts/Master of Science Degree (B.A./M.S.) Physician Assistant Program

This is a six-year (3+3) program offered jointly by the School of Arts and Sciences and the School of Health Professions (SHP). The program can be looked at as a two-phase program, an undergraduate phase followed by a professional phase. This program is open to students enrolled at the School of Arts and Sciences, Rutgers University-New Brunswick, who are U.S. citizens, permanent residents of the United States, or international individuals currently on a student visa. At a minimum, applicants must be enrolled for one year at Rutgers-New Brunswick earning at least 30 credits.

The first phase of the program includes three years of undergraduate liberal arts and basic science education. Students may apply to the second (professional) phase in April of their second year by applying to the Physician Assistant (PA) program. Personal interviews will be required of those applicants being considered for admission. The interview will serve to determine the applicant's emotional and intellectual maturity, ability to communicate, and the potential to achieve career satisfaction within the physician assistant role. Applicants must have a cumulative and science GPA of 3.2. In cases where individuals may show high potential by improved performance, exceptions to this requirement may be considered. Please note that acceptance by Rutgers University does not guarantee acceptance by the PA program.

Applicants to the program must have completed the following courses with a grade of C or better: at least one semester (3 credits) of English composition, applied statistics or biostatistics (from Psychology, Biology, or Math departments), General Biology I and II with lab (119:115, 116, and 117, or equivalents); General Chemistry I and II with lab (160:161,162 and 171, or equivalents); and General Psychology (830:101, or equivalent). If the student has been granted AP credit by Rutgers for science courses, additional science courses will be required.

All applications must be received by June 1 and final notices of acceptance will be made by August 1. If the applicant is accepted into the program, it will be contingent on maintaining a 3.2 GPA through the end of the third undergraduate year at Rutgers-New Brunswick, and on all requirements for the undergraduate degree being met before the beginning of the fourth year. Students who are accepted into the second phase of the program will begin this phase at the beginning of their senior year. At the end of the senior year, these students will receive a bachelor of arts degree conferred by the School of Arts and Sciences, Rutgers University-New Brunswick. After completion of the remaining two years of the PA program, graduates will receive a master of science degree awarded by Rutgers School of Health Professions.

Before entering the second (professional) phase, a student accepted by this program must also complete for the PA program, Functional Human Anatomy (01:377:223), General Microbiology (01:447:390), Intro to Biochemistry (01:694:301) and Systems Physiology (01:146:356) (waived if Gen Bio II is completed at Rutgers-NB and not AP credit), and 6-8 additional credits of life science electives. Students majoring in biological sciences are required to have completed, in addition to the School of Arts and Sciences core distribution requirements, the Life Sciences Core requirements, Intro to Biochemistry (01:694:301) and General Microbiology (01:447:390) and one (three credit or more) course from the 216 subject area approved electives. Students with AP or transfer credit of General Biology I and II and lab must take an additional life science elective course for 3 or more credits. A maximum of 14 credits from SHP courses will be accepted toward the biological sciences major. Please be sure to meet with a biological sciences adviser when selecting life sciences elective courses because not all course combinations are allowed given overlap in subject matter taught at Rutgers and SHP.

For a complete description of the requirements for the major in biological sciences, please read the appropriate section under the Division of Life Sciences in this catalog.

For more information about this program, you may contact the PA program office at the School of Health Professions, 675 Hoes Lane, Piscataway, NJ 08854, at 732-235-4444; or the Division of Life Sciences, Health Professions Office at Rutgers University, Nelson Biological Laboratories, 604 Allison Road, Piscataway, NJ 08854-8082, at 848-445-5667.

Life Sciences (SAS)

Courses

Courses

With the exception of 01:119:115,116, and 117 General Biology I and II and Biological Research Laboratory, courses numbered at the 100 level may not be used for major credit in any of the majors within the Division of Life Sciences.

01:119:098 ***Foundations for Biological Science (E2)***
Selected topics in general biology: introduction to cellular organization, metabolism, genetics, reproduction, and organ systems. Development of analytical reasoning and science-oriented study techniques.
Preparation for college-level general biology.

01:119:103 ***Principles of Biology (4)***
Selected topics in general biology, including cell structure, genetics, plant and animal diversity, basic plant and animal biology, ecology, and evolution.
Lec. 3 hrs., lab. 3 hrs. Designed for students who must take a one-semester laboratory course in introductory biology to meet major requirements. Credit not given for this course if student has already completed 01:119:115. Not for life sciences major credit.

01:119:109,110 ***Biology Practice Group (1,1)***
Students will work actively to (1) organize the lecture content, (2) identify what they are expected to do with that content (outcomes), (3) prepare and explain study aids (organizers) to ensure that they correctly understand the week¿s content, and (4) begin the self-evaluation process to gauge exam preparedness. Discussion of the basic methods and principles.
Corequisite for 109 is 01:119:115; corequisite for 110 is 01:119:116.

01:119:111,112 ***Reading in General Biology (1,1)***
Discussion and reading providing extensive and advanced coverage of selected topics.
Corequisite for 111 is 01:119:115; corequisite for 112 is 01:119:116.

01:119:115 ***General Biology I (4)***
Broad principles of cell biology, genetics, and evolution; the diversity of life and its physiology, ecology, and population dynamics. Lec. 3 hrs., Wkshp. 80 min.
Prerequisite has two parts: writing (prerequisite of 01:355:101, 01:355:103, or 01:355:104, or placement into 355:101 or 355:104) and math (prerequisite of 01:640:026 or placement into 640:CMA, 640:PCA, 640:CLG, or 640:CLS).

01:119:116 *General Biology II (4)*
Broad principles of cell biology, genetics, and evolution; the diversity of life and its physiology, ecology, and population dynamics.
Lec. 3 hrs., Wkshp. 80 min. Prerequisite: 01:119:115 with a grade of C or better. Credit not given for both this course and 01:119:102.

01:119:117 *Biological Research Laboratory (2)*
Laboratory designed to introduce and explore principles of research in the biological sciences by engaging in semester-long research projects requiring students to analyze data, synthesize new experiments, and evaluate findings.
Prerequisite: 01:119:115 with a grade of C or better. Corequisite: 01:119:116.

01:119:120 *STEM Success Seminar (1.5)*
Increases ability to control academic success and improve transition to the university environment in furtherance of educational and career goals. Reflection on recent and current academic experience and career aspirations. Setting of priorities and alignment of time and effort towards those ends.
By special permission only.

01:119:127-128 *Anatomy and Physiology: Health Sciences (4,4)*
Structure and function of human organ systems. Some microanatomy and biochemical aspects of physiology included.
Lec. 3 hrs., lab. 3 hrs. For nursing, medical technology, physical therapy, and other professional students. Not for life sciences major credit.

01:119:131 *Microbiology for the Health Sciences (3)*
Introduction to microbes with emphasis on the nature and behavior of microorganisms, the interrelationships between microbes and the human host in health and disease, and the principles of prevention and control of infectious disease.
Not open to students who have taken 01:447:390. For nursing and other professional students. Not for life sciences major credit. Prerequisites: 01:199:115-116 or 01:119:127-128.

01:119:132 *Microbiology for the Health Sciences Laboratory (1)*
Laboratory to accompany 01:119:131.
Lab. 3 hrs. Pre- or corequisite: 01:119:131.

01:119:140 *The DNA Revolution (Honors) (3)*
Introduction to fundamentals of molecular genetics, biotechnology, and modern genetics, including a laboratory research project using molecular biology and bioinformatics techniques. Intended primarily for nonscience majors, but may also appeal to prospective chemists, physicists, engineers, and computer scientists.
Restricted to first-year and sophomore students in the School of Arts and Sciences Honors Program or the Honors College. Credit not given for both this course and 01:119:140 or 01:694:215 or 315, or 01:447:315. Not for life sciences major credit.

01:119:148 *Moving Bodies: The Biology of Movement (3)*
Considers fundamental processes that allow humans and other animals to move, including structural basis (bones and muscles), control (brain and nervous system), conversion of food into energy (digestion and nutrition),

movement of food and oxygen to muscles (circulation), and some common and familiar injuries and illnesses and their treatments.
Credit not given for both this course and 01:119:100, 103, 115-116, or 127-128. Not for life sciences major credit.

01:119:150 *Biology, Society, and Biomedical Issues (3)*
Discussion of current topics and issues in human health and medicine from a biological perspective.
Credit not given for both this course and 11:115:100. Not for life sciences major credit.

01:119:154 *Genetics, Law, and Social Policy (3)*
Principles of human and behavioral genetics and their legal, ethical, and social implications. Topics include genetic screening, counseling, and engineering; reproductive regulation; and human behavior genetics.
Prerequisite: Sophomore standing. Not for life sciences major credit or related major.

1:119:155 *Human Genetics (3)*
How our genes influence our development and health, how both normal traits and diseases are transmitted through families, how genetics is used in forensics and personalized medicine, and the genetic tests that are offered directly to consumers.
Not for life sciences major credit.

01:119:156 *Genetics, Evolution, and Human Health (4)*
The human body and human behavior, shaped by more than four billion years of evolutionary processes. Scientific and social implications of current ideas and controversies of evolution and genetics.
Not for life sciences major credit.

01:119:160 *Biology, Society, and Ecological Issues (3)*
Ecological and evolutionary ideas affecting space ecology; population increase, food supply, air and water pollution, war, and nuclear energy.
Not for life sciences major credit or related major.

01:119:182 *Essentials of Human Reproduction (3)*
Anatomical and physiological bases of human sexuality; biological and cultural aspects of sexual differentiation and psychosexual development, contraception, venereal disease, and sexual lifestyles.
Not for life sciences major credit or related major.

01:119:195 *Brain, Mind, and Behavior (3)*
Honors course discussing the interrelationship between the brain, the mind, and behavior.
Open to students in the School of Arts and Sciences Honors Program or the Honors College. Not for life sciences major credit or related major.

01:119:199 *Preparation for General Biology (4)*
For first- and second-year students planning science majors. Enrollment based on placement scores. Selected concepts in biology, proven learning strategies for college science courses, and instruction in the scientific method. Prepares students for success in the General Biology sequence (01:119:115-117).
Lec./rec. 3 hrs., lab. 3 hrs. Enrollment restricted by placement. Not for life sciences major credit.

01:119:201-202 ***Independent Study in Biology (1-3,1-3)***
Independent study under the direction of a member of the faculty. Written report required.
Prerequisites: Declared biological sciences major or minor. Permission of the Office of Undergraduate Instruction; cumulative grade-point average of 2.8 or better. May not be used to fulfill a laboratory requirement.

01:119:204 ***Outreach in Biology (1)***
Introduction to the basic principles and best practices of outreach in the biological sciences. Emphasis on understanding how to translate technical concepts and techniques to lay audiences incorporating best practices in active learning, public speaking and curriculum development. Recommended for students interested in teaching careers and related positions in science communication.
Prerequisites: 01:119:115, 01:119:116, and 01:119:117. By special permission.

01:119:205 ***Internship in Life Sciences (3)***
Development of experience and knowledge regarding the expectations, qualifications, competencies and responsibilities of professionals working within the life sciences through an internship experience with academic component. Integration of knowledge from life science coursework with the internship experience, development of new skills, and reflection on the learning experience.
Prerequisites: 01:119:116 and 01:119:117. Open only to 119 Biology Majors.

01:119:307-308 ***Research in Biology (1-3,1-3)***
Laboratory/field research on an original problem under the direction of a member of the faculty. Written report required.
Prerequisites: Declared biological sciences major or minor. Permission of the Office of Undergraduate Instruction; cumulative grade-point average of 2.8 or better. Open only to students majoring (or minoring) in biological sciences.

01:119:310 ***Communication in Biology (1)***
Effective skills for communicating science to a variety of audiences in a variety of forms including papers, grant proposals, teaching, and presentations to scientists and others. Provides support for students completing the 10-page research paper required for Research in Biology.
Prerequisites: 01:119:307, 308, 407, or 408. Corequisites: 01:119:307, 308, 407, or 408.

01:119:311 ***Current Topics in Life Sciences (1)***
Directed readings and discussion of selected scientific topics and career stories with Rutgers Life Sciences Alumni.
Junior or senior status and Division of Life Sciences major (subject code: 119, 146, 694, 447).

01:119:401 ***Clinical Practicum in the Health Professions (3)***
Development of advanced knowledge of and reflection on the qualifications, competencies, and responsibilities of physician health care providers through an internship experience and academic component integrating knowledge from life science coursework and the health care setting.
Prerequisites: 3.4 science GPA. By special permission of the Office of Undergraduate Instruction only.

01:119:406-407 ***Research in Biology (1-4,1-4)***
Laboratory/field research on an original problem under the direction of a member of the faculty. Written report is required.
Prerequisites: Declared biological sciences major or minor. Permission of the Office of Undergraduate Instruction; cumulative grade-point average of 2.8 or better. Open only to seniors majoring (or minoring) in biological sciences.

01:119:408-409 ***Honors in Biology (3-6,3-6)***
Laboratory/field research on an original problem under the direction of a member of the faculty. Written thesis, oral presentation, and defense are required.
Prerequisites: Declared biological sciences major. Permission of the Office of Undergraduate Instruction. Open only to seniors majoring in biological sciences who meet the requirements for departmental honors.

01:119:410 ***Honors Communication in Biological Sciences (1)***
Instruction on effective communication of scientific ideas and findings for both the scientific community as well as the general public. Support in writing honors theses and preparing for oral thesis defenses.
Prerequisite: 01:119:408. Corequisite: 01:119:409.

Cell Biology and Neuroscience 146

Cell Biology and Neuroscience 146

Department of Cell Biology and Neuroscience, School of Arts and Sciences

Chair: Megerditch Kiledjian

Vice Chair and Undergraduate Director: Gabriella D'Arcangelo

Distinguished Professors:

Joanna Burger, B.S., SUNY (Albany); M.S., Cornell; Ph.D., Minnesota

Megerditch Kiledjian, B.A., Rutgers; Ph.D., University of Pennsylvania

Melitta Schachner, Diploma in Biochemistry, Tübingen (Germany); Ph.D., Max-Planck Institut für Biochemie (Germany)

Wise Young, B.A., Reed; Ph.D., Iowa; M.D., Stanford

Professors:

Lori R. Covey, B.S., California (Riverside); Ph.D., Columbia

Gabriella D'Arcangelo, B.S., Bari (Italy); Ph.D., SUNY (Stony Brook)

Robin L. Davis, B.S., Pennsylvania State; M.A., San Diego State; Ph.D., Stanford

Bonnie Firestein, B.S., Michigan; Ph.D., California (San Diego)

Martin Grumet, B.S., Cooper Union; Ph.D., Johns Hopkins

Ronald P. Hart, B.S., Connecticut; Ph.D., Michigan

Arnold G. Hyndman, A.B., Princeton; Ph.D., California (Los Angeles)

Alice Y.-C. Liu, B.S., Chinese University of Hong Kong (China); Ph.D., Mount Sinai School of Medicine

Gary F. Merrill, B.S., Weber State; Ph.D., Michigan State

Kathleen M. Scott, B.A., Brown; Ph.D., Yale

Associate Professors:

Qian Cai, M.D., Shanghai Railway Med College (China); Ph.D., National Institutes of Health-Shanghai Second Medical University

Wei Dai, B.S., M.S., Beijing Normal (China); M.S., Texas Health Science Center; Ph.D., Baylor College of Medicine

Dunne Fong, B.S., Massachusetts; M.A., Ph.D., Princeton

Shu-Chan Hsu, B.S., Ph.D., British Columbia

Peng Jiang, B.S., Soochow (China); Ph.D., University of Science and Technology of China

Kelvin Y. Kwan, B.S., California Institute of Technology; Ph.D., Harvard

David Margolis, B.S., Brown; Ph.D., Washington (Seattle)

Ping Xie, B.S., Nanjing (China); Ph.D., Hong Kong University of Science and Technology

Assistant Professors:

Victoria Abraira, B.S., Southern California; Ph.D., Harvard

Santiago Cuesta, B.A., M.S., Ph.D., National University of Rosario (Argentina)

Brian Daniels, B.A., B.S., Southern Wesleyan (Central); Ph.D., Washington (Seattle)

Rafiq Huda, B.A., Carleton College; Ph.D., Northwestern University (Chicago)

Natasha O¿Brown, B.S., Davidson College; Ph.D., Stanford

Max Tischfield, B.A., Rutgers; Ph.D., Harvard

Associate Research Professors:
Xinfu Jiao, B. S., Xinxiang Medical College (China); M.S., Tongji Medical University (China); Ph.D., Shanghai Institute of Hematology (China)

Patricia Morton, B.S., Northwestern University; M.S., Ph.D., University of Wisconsin

Assistant Research Professor:

Dongming Sun, B.S., Beijing Medical University (China); Ph.D., Columbia University

Assistant Teaching Professors:

Anne Carr-Schmid, B.S., James Madison; Ph.D., Rutgers

Tara Cominski, B.S. St. Peter's University; Ph.D., Rutgers

Anne Keating, B.S., M.S., Ph.D., Rutgers

Life Sciences (SAS)

Learning Goals

Learning Goals

The Department of Cell Biology and Neuroscience offers a course of study that provides fundamental and comprehensive training in the areas of cell biology and neuroscience. The major objective of this program is to prepare students for graduate studies in cell biology and neuroscience; entry into professional schools in medicine, dentistry, or other health-related fields; or employment in industrial and pharmaceutical companies.

Learning Goals

Students will:

I. master factual and conceptual knowledge in cell biology and neuroscience that will provide a solid foundation for success in advanced training and professional careers;

II. develop an ability to summarize, integrate, and organize information; and

III. use scientific reasoning to evaluate the potential for current research and new discoveries to improve our understanding of cell biology and neuroscience and its relevance to human health and to our society.

Life Sciences (SAS)

Entry Requirements of the Major

Entry Requirements of the Major

The major in the Department of Cell Biology and Neuroscience is open to students after their first year who have completed Fundamentals of Neurobiology (01:146:245) or Fundamentals of Cell Biology (01:146:270), with a grade of C or better. Departmental approval is required.

A grade of C or better in all courses credited toward the major is required for graduation, and each course may be repeated only once to replace D/F grades.

Life Sciences (SAS)

Major Requirements

Major Requirements

The Department of Cell Biology and Neuroscience offers a program of study from which students can select one of two tracks, depending upon particular interests and career goals: a general track (default) and an honors track. Students can apply to enter the honors track at the beginning of the senior year. This track requires a minimum GPA of 3.4 in courses credited toward the major, and departmental approval. A number of core courses are required of all students in the cell biology and neuroscience major, regardless of the chosen track. No more than 16 credits from among the life science courses required for completion of the cell biology and neuroscience major may be fulfilled by credits transferred from any school outside of Rutgers University-New Brunswick. Any life science courses applied to the major should be taken within 10 years of graduating.

Required Core Courses (65 or more credits)

01:119:115-116 General Biology (4,4)

01:119:117 Biological Research Laboratory (2)

01:160:161-162 or 01:160:163-164 or 01:160:165-166 General Chemistry (4,4)

01:160:171 Introduction to Experimentation (1)

01:160:307-308 or 01:160:315-316 Organic Chemistry (4,4)

01:160:311 Organic Chemistry Laboratory (2)

01:750:203-204 General Physics (3,3) or 01:750:193-194 Physics for the Sciences(4,4)*or 01:750:271-272 Honors Physics (3,3)

01:750:205-206 General Physics Laboratory (1,1)

01:640:135,136 or 01:640:151-152 Calculus I and II (4,4) or 01:640:135 and 01:960:401 Basic Stat for Research (3) or 01:960:379 Basic Prob and Stat or 01:640:135 and 01:960:212 Statistics II (3)**

01:447:380 Genetics (4)

01:146:245 Fundamentals of Neurobiology (3)

01:146:270 Fundamentals of Cell Biology (3)

01:694:395 Biochemistry for Life Sciences (3) or 01:694:407 Biochemistry (3)

Advanced Cell Biology and Neuroscience Courses: choose three of the following:

01:146:445 Synapses, Neurons, and Circuits (3)

01:146:447 Clinical Neurobiology (3)

01:146:465 Neurobiology of Pain and Addiction (3)

01:146:472 Developmental Biology (3)

01:146:473¿ Genetic Regulation in Cell Biology¿(3)

01:146:474 Immunology (3) or 01:146:476¿ Honors Immunology (3)

01:146:481 Protein Dynamics in Cell Biology (3)

* with approval from the Undergraduate Director or CBN Advisor 01:160:308 may be replaced by an additional elective course.
** Students who take who take Physics for the Sciences 01:750:193-194 (4,4) do not need an additional Physics laboratory.
*** Students with AP statistics equivalent of 01:960:211, transfer credit for 01:960:211, or who have taken 01:960:211 at Rutgers must take 01:960:212.

Life Sciences (SAS)

Options

Options

General Track; 4 credits

This track is for students who, upon graduation, seek immediate employment or plan to attend professional schools in health-related fields. In addition to the required core courses, students must take the following courses:

1. One elective lecture courses at the 300-400 level in the life sciences area (equaling 36 or more credits)
2. One laboratory or research course (1-3 credits). Students can take a lecture course with an associated laboratory component (3-4 credits) to satisfy both requirements, or a stand-alone lecture plus a laboratory or research course.

Honors Track; 12 credits

This area of concentration is for students interested in research who, upon graduation, plan to attend graduate school or professional schools in health-related fields. A student must qualify for admission into the honors track. See the departmental honors program page in this catalog for student qualifications. In addition to the required core courses, students must complete the following courses, produce a written research thesis and an oral thesis presentation:

1. One elective lecture course at the 300-400 level in the life sciences area (3 or more credits).
2. 01:146:405 Honors Seminar (3).
3. 01:146:408-409 Honors Research (3,3).

Life Sciences (SAS)

Departmental Honors Program

Departmental Honors Program

Honors in cell biology and neuroscience are awarded to students who have successfully completed the honors track course requirements, submitted a written research thesis, and defended the thesis orally. To qualify for the honors track, a student must have attained a grade-point average of 3.4 or better in courses required for the major. The student should apply formally to the department for acceptance into the honors program by the end of the second semester of the junior year.

Life Sciences (SAS)

Courses

Courses

01:146:201,202 *Independent Study in Cell Biology and Neuroscience (1-3,1-3)*
Laboratory research under the direction of a Rutgers faculty member.
Written report required. Permission of department and an instructor willing to sponsor the student, and a cumulative grade-point average of 2.8 or better are required. May not be used to fulfill a laboratory requirement. Open only to students majoring or planning to major in cell biology and neuroscience.

01:146:245 *Fundamentals of Neurobiology (3)*
Introduction to the biology of the nervous system. Topics covered include nerve cell signaling, sensory and motor systems, and higher brain processes.
Prerequisites: 01:119:115-116.

01:146:270 *Fundamentals of Cell Biology (3)*
Principles of cell biology. Structure, function, and macromolecular organization of cellular organelles.
Prerequisites: 01:119:115-116.

01:146:295 *Essentials of Cell Biology and Neuroscience (3)*
Provides a background in the biology of neural cells and cognition.
Prerequisites: 01:119:115-116. Not intended for cell biology and neuroscience majors.

01:146:307,308 *Research in Cell Biology and Neuroscience (1-3,1-3)*
Laboratory research on an original problem under the direction of a member of the Rutgers faculty.
Written report required. Permission of department and an instructor willing to sponsor the student, and a cumulative grade-point average of 2.8 or better. Open only to students majoring or planning to major in cell biology and neuroscience.

01:146:322 *Human Histology (4)*
Structure of the tissues and organs of the human body. Lec. 3 hrs., lab. 3 hrs.
Prerequisite: 01:146:270 or 01:146:295.

01:146:328 ***Human Parasitology (3)***
Cell biology, epidemiology, pathogenesis, and clinical manifestations of human parasitic diseases.
Prerequisites: 01:119:115-116.

01:146:329 ***Human Parasitology Laboratory (1)***
Laboratory to accompany the Human Parasitology lecture course 01:146:328. Lab. 3 hrs.
Pre- or corequisite: 01:146:328.

01:146:340 ***Virology (3)***
Principles of virology including the molecular and cellular events that occur during virus replication, the host cell response, and pathogenesis. Emphasis on animal viruses that impact human health and disease. Strategies for controlling viruses.
Prerequisite: 01:146:270.

01:146:350 ***Introduction to Light Microscopy for the Life Sciences (1, minicourse)***
This course offers a comprehensive exploration of advanced imaging techniques essential for studying tissues, cells, and organelles in the life sciences.
Prerequisite: 01:146:270 or 01:146:295.

01:146:356 ***Systems Physiology (3)***
Comprehensive study of the principal organ systems of laboratory animals and humans.
Prerequisites: 01:119:115-116 and 01:160:161-162 or 163-164, and 171 Credit not given for both this course and 11:067:300.

01:146:357 ***Systems Physiology Laboratory (1)***
Laboratory to accompany the Systems Physiology lecture course 01:146:356. Lab. 3 hrs.
Pre- or corequisite: 01:146:356.

01:146:405 ***Honors Seminar (3)***
This course is intended to help students prepare a written research thesis and practice the oral thesis presentation.
Requires departmental permission. Open only to senior honors students majoring in cell biology and neuroscience. This course fulfills the SAS WCd core requirement.

01:146:406, 407 ***Research in Cell Biology and Neuroscience (1-3,1-3)***
Research under the direction of a Rutgers faculty member.
Written report required. Permission of department and an instructor willing to sponsor the student, and a cumulative grade-point average of 2.8 or better are required. Open only to students majoring in cell biology and neuroscience.

01:146:408-409 ***Honors Research (3-3)***
Two semester laboratory research sequence under the direction of a Rutgers faculty member. Written report and oral presentation required. Culminates in a written thesis and oral thesis defense.
Permission of department and an instructor willing to sponsor the student are required. Open only to seniors majoring in cell biology and neuroscience who meet the requirements for the departmental honors program.

01:146:410-411 ***Research Thesis in CBN I and II (3-3)***
Two semester laboratory research sequence under the direction of a Rutgers faculty member and the course coordinator.
Prerequisites: 01:146:307 or 01:146:308. Requires departmental permission and acceptance by a faculty mentor who will

host the student in the laboratory. Requires submission of a written thesis draft (I = Fall semester), and submission of a final written thesis and oral defense (II = Spring semester). Open to senior students majoring in cell biology and neuroscience who are not enrolled in the departmental honors program.

01:146:445 *Synapses, Neurons, and Circuits (3)*
Cellular and systems features of neurons and the fundamental unit of signaling in the nervous system, focusing on a small number of advanced topics. Focus on how to test hypotheses related to the topics addressed: intra- and inter- cellular communication; construction of neuronal networks; protein interactions at the synapse; and signal transduction pathways.
Prerequisites: 01:146:245 and 01:146:270.

01:146:447 *Clinical Neurobiology (3)*
Development and function of the nervous system with an emphasis on diseases and disorders. Topics include neurodevelopment, demyelination, tumors, and viral infections; neurological disorders/diseases; injury to the spinal cord and brain and repair; and clinical trials and the future of spinal cord and brain trauma.
Prerequisites: 01:146:245 and 01:146:270. Intended for senior students majoring in cell biology and neuroscience.

01:146:456 *Advanced Physiology (3)*
Preparation for advanced graduate study in physiology and for medical physiology (first-year medical school). Focus on mammalian physiology and the whole animal (whole organ) approach to classical experimental physiology.
Prerequisites: 01:146:356. Intended for senior and junior students.

01:146:464 *Topics in Cell Biology and Neuroscience (3)*
Directed readings and discussion of selected topics in cell biology and neuroscience.
Prerequisites: 01:146:245 and 01:146:270. Open to junior or senior students majoring in cell biology and neuroscience.

01:146:471 *Advanced Cell Biology Laboratory (3)*
Advanced laboratory methods in cell biology. Emphasis on light and electron microscopy, imaging, immunocytochemical techniques, tissue culture, and methods of identifying and separating macromolecules.
Prerequisite: 01:146:270 or permission of instructor.

01:146:472 *Developmental Biology (3)*
Genetic, molecular and cellular processes that lead from egg to embryo to mature organism.
Prerequisite: 01:146:270 or 01:447:380 or 01:447:384.

01:146:473 *Genetic Regulation in Cell Biology (3)*
Advanced topics in cell biology, focusing on genetic animal models, genomics, chromatin function, gene expression, and RNA biology.
Prerequisite: 01:146:270.

01:146:474 *Immunology (3)*
Fundamental principles of immunology with emphasis on antibody formation, immunoglobulin molecules and genes, hypersensitivity reactions, and the cellular basis for the immune response.
Prerequisites: 01:119:115-116 and 01:447:380 or 01:447:384. Recommended: 01:447:390.

01:146:475 ***Laboratory in Immunology (1)***
Biochemical and molecular analysis of immune cell function. Application of immunological techniques to the examination of normal and diseased states.
Pre- or corequisite: 01:146:474.

01:146:476 ***Honors Immunology (3)***
Introduction to the immune system, with a focus on mammalian organisms (particularly humans). Focus on critical thinking and problem-solving abilities, as well as introduction to primary research addressing contemporary immunological questions. Open only to students enrolled in the Honors College, SAS Honors Program or CBN Honors Program.
Prerequisites: 01:447:380 or 01:447:384. Credit not given for both this course and Immunology 01:146:474.

01:146:481 ***Protein Dynamics in Cell Biology (3)***
Advanced topics in cell biology, focusing on signal transduction (module 1), cell adhesion and protein transport (module 2) and cytoskeletal dynamics controlling cell movement (module 3).
Prerequisite: 01:146:270.

Learning Goals

Learning Goals

Learning Goals:

The Department of Genetics is committed to teaching science through the way we do science: through the process of doing research. The curriculum of the Department of Genetics is centered around four main goals. These goals shape our innovative courses and provide the basis for lifelong learning.

I. Knowledge specific goals: Know the terms, concepts, and theories of genetics.

II. Integrate the material from multiple courses and research to think holistically and to see the whole as well as the parts.

III. Use genetic information and ideas to critically analyze published research articles in genetics.

IV. At the end of four years, all of our students will be able to design an experiment, carry out the research using the appropriate laboratory techniques, and analyze and interpret their data. They will also be able to communicate their discoveries through a written article appropriate for publication in a peer-reviewed genetics journal, and through talks or posters appropriate for scientific meetings.

Life Sciences (SAS)

Entry Requirements of the Major

Entry Requirements of the Major

Students wishing to major in this department must have been enrolled at Rutgers for at least one semester. In addition, students must:

1. Be an SAS student

2. Have a cumulative GPA of at least 2.00, and a GPA of at least 2.8 at the time of taking research for credit.

3. Have earned a C or better in these prerequisite courses or equivalents (25-26 credits):

a. General Biology I 01:119:115

b. General Biology II 01:119:116

c. General Biology Lab 01:119:117

d. General Chemistry I either 01:160:161 or 01:160:163

e. General Chemistry II either 01:160:162 or 01:160:164

f. Calculus I either 01:640:135 or 01:640:151

g. Calculus II or Statistic either 01:640:136, or 01:640:152, or 01:640:192, or 01:960:401, or 01:960:212, or 01:960:379

4. Students with an overall GPA < 3.0 must meet with the UGD before declaring the major.

a. Genetics is a credit-intensive major and has a requirement of a 2.80 GPA at the time of taking research for credit

b. Students entering the major with a GPA of < 3.0 may struggle to complete the major on time

5. Watch a Genetics Major Declaration Video

Life Sciences (SAS)

Major Requirements

Major Requirements

The department offers a major with a strong emphasis on research. A minimum of 20 credits of coursework in the life sciences must be completed in residence. Genetics is a credit-intensive major. Excluding the prerequisite courses (25-26 credits) to get into the major (see above), there are between 54-56 credits to complete the major (60-62 for honors). A grade of "C" or better in courses credited toward the major is required for graduation, and each course may be repeated only once to replace D/F grades. Students may not double major in two Division of Life Sciences majors.

The requirements of the major consist of:

A. Life Science Core Courses (19-21 credits) - Required for all DLS Majors (Approved AP and Transfer credits may be substituted)

a. Intro to Experimentation 01:160:171

b. Organic Chemistry I 01:160:307 or 01:160:315

c. General Physics I (01:750:203 + 205 lab), or (01:750:271 + 275 lab), or 01:750:193, or 01:750 201
Note: 193 & 201 have integrated lab

d. General Physics II (01:750:204 + 206 lab) or (01:750:272 + 276 lab) or 01:750:194 or 01:750:202
Note: 194 & 202 have integrated lab

B. Genetics Core (17 credits) - Required for all Genetics Majors- All below credits must be completed at Rutgers

a. Genetic Analysis I 01:447:384

b. Genetic Analysis II 01:447:385

c. Lab Course Req. 01:447:315, or 01:447:302, or 01:447:203, or 01:447:303, or 01:694:214, or 01:694:215, or 01:694:316

d. Biochemistry for the Life Sciences 01:694:395 or 01:694:407

e. Communications in Genetics 01:447:430 or 01:447:414 + 01:447:415 (Honors, Thesis Writing senior year)

C. Genetics Independent Scholarship (minimum 6 credits but 12 credits for honors

Note: 2.8 minimum GPA to register for research

a. Independent Scholarship 01:227:460, 407, 408, 409, 410, 488, 489, 490

b. Independent Scholarship 01:227:460, 407, 408, 409, 410, 488, 489, 490

D. Genetics Electives (6 credits)

Fifty percent must be taken within the Genetics Major (i.e.; 01:447)

a. Genetics Electives See electives table

b. Genetics Electives See electives table

c. Genetics Electives See electives table

E. Electives OR Independent Scholarship (6 credits)

Note: Additional Genetics Lab may be used as an elective

a. Independent Scholarship 01:227:460, 407, 408, 409, 410, 488, 489, 490

b. Independent Scholarship 01:227:460, 407, 408, 409, 410, 488, 489, 490

c. Genetics Electives See electives table below

Lab Note: 01:694:214 and 01:694:215 are only offered to first-year students with AP Biology credit and AP General Chemistry credits (or taking General Chemistry concurrently). 01:447:203 is only offered to first-year students in the SAS Honors Program or the Honors College. Students cannot receive credit for both 01:447:203 and 01:447:302.

Organic Chemistry Note: If you are planning to pursue a graduate degree in which a full year of organic chemistry is suggested/required (e.g., med/dental school), we strongly recommend taking Organic Chemistry II + lab as an elective (6 credits)

Life Sciences (SAS)

Life Sciences (SAS)

Departmental Honors

Departmental Honors

Departmental Honors

The Department of Genetics recognizes graduating students who have made outstanding academic achievements by awarding **departmental honors**. The department awards two types of departmental honors (see below) and these are awarded at the discretion of the Genetics Honors Committee. To be considered, students must meet all criteria for that type of honors and submit the honors request application by the deadline (April 1st of senior year).

The two types of departmental honors and their criteria are as follows:

1. GENETICS HONORS- RESEARCH

a. GPA requirement: a student must have attained, at the end of the junior year, a cumulative GPA of at least 3.4 and a Genetics major GPA of at least 3.4 (including prerequisites).

b. Complete 6 or more credits of Honors in Genetics (01:447:408-409) during senior year

c. Complete a total of 12 or more research credits (including the 6 credits of 01:447:408-409)

d. Complete Honors Thesis and Communication in Genetics 447:414 and 415 during senior year

e. Complete and defend a research thesis before a faculty committee (see Thesis Guidelines)

f. Present at Honors Day

Students can apply to do an Honors thesis by completing the relevant sections of the Independent Scholarship Form. Students must register either for an Honors course sequence in Genetics (01:447: 408 and 409) or for a course sequence in a college Honors Program (See Handbook) . These decisions should be discussed with an advisor and approved by the Department Vice Chair. Accepted students are expected to complete at least 12 credits in an independent research project, resulting in a thesis. Students may do research with Rutgers faculty outside of the Department with the approval of their advisor and the Vice Chair. Students will prepare a thesis and present an oral defense to a committee of three faculty. At least one member of the committee must come from the Department of Genetics. Students will present their research at a Departmental Symposium in April. Students contemplating an Honors thesis should refer to the much more detailed instructions and details in Section IX and Section X of the Student Handbook. For information on the thesis, see Thesis Guidelines.

Level of Honors: In determining the level of honors, the honors/awards committee takes into consideration multiple factors in aggregate, including but not limited to (1) cumulative GPA, (2) thesis defense committee recommendation, (3) research mentor evaluation, (4) faculty evaluation of presentation at Honors Day, and (5) whether or not the student took the honors versions of Genetic Analysis 1 and/or 2 (i.e., 01:447:384:H1 and/or 01:447:385:H1) and the grades received in those courses.

2. Genetics Honors - Certificate Program

a. GPA requirement: A student must have attained, by April 1st of senior year, a cumulative GPA of at least 3.4 and Genetics major GPA of at least 3.4 (including prerequisites).

b. Complete a departmental certification program (i.e.; CompGen, Cancer or Genetic Counseling).

c. By April 1st, the student must formally apply to request consideration for Certificate Honors by completing the Genetics Honors- Certificate Program Form

* *The honors committee may award Honors, High Honors or Highest Honors*

Life Sciences (SAS)

Undergraduate Certificate Programs

Undergraduate Certificate Programs

The Department of Genetics offers two certificate programs. Students who complete one of these Certificates are eligible to receive Departmental Honors.

1) Genetic Counseling Certificate Program

The Department of Genetics offers an undergraduate **Genetic Counseling Certificate Program (GCCP).** The GCCP program is intended for a select group of students interested in applying to the masters-level programs in genetic counseling. The goal is to provide students with guidance, coursework, and relevant clinical experience to improve their graduate school applications. This is a highly competitive option and is **only open to declared genetics majors**. Not all applicants will be accepted. The Certificate will be awarded only in conjunction with the awarding of a baccalaureate degree in genetics and does not replace minors. The certificate is NOT in lieu of completing the masters-level programs in genetic counseling. At the end of the program students will:

- understand genetic counseling as a profession ·
- understand application requirements for masters-level programs
- gain experience in talking with people who are in crisis
- gain experience in a clinical genetic counseling clinic

2) Certificate in Computational Genetics

The Department of Genetics offers a Certificate in Computational Genetics (CCG) for Genetics majors. The volume of data being generated in Genetics and related life science fields has been expanding tremendously in recent years, and career opportunities for geneticists with computational and quantitative expertise are simultaneously growing. This certificate program is intended for students who are either interested in applying to graduate-level programs,

or planning careers, in Computational Genetics/Biology, Statistical Genetics, Bioinformatics, or other programs in quantitative biomedical related research. The goal of the CCG is to provide students with guidance, coursework, and relevant data design and analysis experience to prepare them for graduate studies in the field or entry-level informatics jobs. This program is only open to declared Genetics Majors. The Certificate will be awarded only in conjunction with the awarding of a baccalaureate degree in Genetics. At the end of the program students will:

- Have gained competence in genetic data analysis using basic computer programming and statistical analysis.
- Be prepared to apply to M.S. or Ph.D. graduate programs in the areas of Computational Genetics and Bioinformatics.
- Be prepared to apply for career positions in industry, biotech companies, pharmaceutical companies, medical centers, or universities

3) Cancer Research Certificate

The Department of Genetics offers a Certificate in Cancer Research (CCR) for Genetics majors. Completion of the Certificate in Cancer Research will provide an advantage when applying to MD, PhD, and MS programs and facilitate transitions to careers with Cancer-related missions. The goal of the CCR is to provide students with a rigorous and Cancer-specialized curriculum. Students will do at least one year of research in a nation-leading Cancer Research Lab and students will be expected to participate in community engagement and develop skills to build community outside of academia. This program is only open to declared Genetics Majors. The Certificate will be awarded only in conjunction with the awarding of a baccalaureate degree in Genetics. At the end of the program students will:

- Have gained knowledge in Cancer Genetics with an expanded curriculum focused on Cancer biology.
- Have at least one year of experience conducting laboratory research in a Cancer research lab.
- Be prepared to apply to M.S., MD, or Ph.D. graduate programs in the areas of Cancer Genetics or for career positions in industry, biotech companies, pharmaceutical companies, medical centers, policy-driving institutes, or universities.

Courses

01:447:203 ***Honors Computational Genetics (Honors) (3)***
Honors computational genetics is a computer-based laboratory course that introduces students to the use of computers in biological research. This course is for students who are thinking of careers at the intersection of life sciences, statistics, and/or computer science, particularly students who are considering majoring in Genetics. The course fulfills the laboratory requirement for the Genetics major. In the first half of the course, students will receive instruction in introductory computer programming (Python). In the second half of the course, students will practice writing code in Python via in-depth computational projects in genetics and genomics. Each class consists of a mixture of lecture and computer-based demos and/or exercises, as well as time for students to work on

assignments. The course provides the introductory skills needed to conduct basic computational research in the life sciences, including many aspects of computer programming and genomic data analysis. Prior experience with computer programming is neither necessary nor is it expected for students who enroll in this course.

This course is for freshman or sophomore Honors students who are thinking of careers at the intersection of life sciences, statistics, and/or computer science, particularly students who are considering majoring in Genetics. The course fulfills the laboratory requirement for the Genetics major.The course fulfills the laboratory requirement for the Genetics major.
Prerequisites: Students must be in their first or second year at Rutgers in an approved Honors program (e.g., the Honors College or the SAS Honors Program). General Biology I (01:119:115) and be at least co-registered for General Biology II (01:119:116)) or have placed out of these two courses (e.g., through AP credit or approved transfer credit). Credit not given for both 01:447:203 and 01:447:302.

01:447:216 ***Analysis of Scientific Literature (Honors) (3)***
A systematic approach to the reading, analyzing, and understanding of primary literature in genetics; emphasis will be placed on data analysis and experimental design and demystifying the process of reading a scientific journal article.
Prerequisites: 01:119:115-116. Highly recommended: 01:694:215. Open only to freshmen and sophomores in the SAS or SEBS Honors Program. By permission only.

01:447:245 ***Introduction to Cancer (3)***
Introduction to Cancer provides the student with an overview of conventional and state-of-the-art aspects of oncogenesis. Students will become familiar with the process involved in neoplastic transformation to the cancer phenotype through aspects of epidemiology, pathophysiology, virology, in vitro and in vivo cellular transformation and genetics. They will then apply these aspects to the understanding of classic therapeutic modalities and new state-of-the-art rational therapies. This comprehensive course will concentrate on the human disease process by applying clinical aspects of oncogenesis during a series of Grand Rounds discussions that will include recent patient clinical cases and their outcomes.
Prerequisites: 01:119:115-116. Credit not given for both this course and 01:447:495.

01:447:302 ***Quantitative Biology and Bioinformatics (3)***
Introduction to the use of computers and computer programming to develop applications for research in genetics and molecular biology. Application topics will include evolutionary genetics, association analysis and genetics mapping, and structural biology.
Prerequisites: 01:447:380 or 01:447:384. May be used to fulfill an elective requirement or taken instead of 01:447:315 Introduction to Research in Genetics by students majoring in Genetics. Credit not given for both 01:447:203 and 01:447:302

01:447:303 ***Computational Genetics of Big Data (3)***
The main focus of this course is the application of R programming to the analysis of genetic data, particularly big data sets with multiple measurements. The primary data sets considered will contain RNA-seq and/or other expression data for multiple/all genes in a given set of individuals. This course is for junior or senior students who are thinking of careers at the intersection of life sciences, statistics, and/or computer science, particularly students who are majoring in Genetics. The course fulfills the laboratory requirement for the Genetics major. Students will learn how to acquire such data, format it for R, plot the data, and perform statistical analyses. In addition, students will learn how to simulate data under different hypotheses, and how to perform power and sample size calculations

for different statistical methods applied to real or simulated data. Each class consists of a mixture of lecture and computer-based demos and/or exercises, as well as time for students to work on assignments. Guest investigators will frequently make short presentations (in person or by skype) to provide illustrations of how programming and informatics is critical for their research. The course provides the introductory skills needed to conduct basic computational research in the life sciences, including many aspects of computer programming and data analysis.
Prerequisites: 01:447:380 or 01:447:384. May be used to fulfill the lab requirement by students majoring in genetics. May be used to fulfill an elective requirement by students majoring in genetics who have already fulfilled the lab requirement with a separate course.

01:447:315 *Introduction to Research in Genetics (3)*
Basic principles and methods of research with microbial model systems used in the analysis and manipulation of genes, followed by a research project in molecular genetics.
Prerequisites: 01:119:115,116, and 117; and 01:160:161-162, 171 (or equivalent) or 01:160:163-164, 171. May be used to fulfill the lab requirement by students majoring in genetics. May be used to fulfill an elective requirement by students majoring in genetics who have already fulfilled the lab requirement with a separate course. Credit not given for both this course and 01:694:315. Open only to genetics majors

01:447:354 *Social, Legal, and Ethical Implications of the New Genetics (3)*
Social, legal, and ethical implications of new modern genetic techniques, for example: genetic screening, stem cells and cloning, forensic genetics, genetic engineering of plants, animals, and humans, genetic enhancement, gene therapy, and the new eugenics.
Prerequisites: Genetics (01:447:380) or Genetics Analysis (01:447:384)

01:447:356 *Evolutionary Medicine (3)*
In this course, we examine human health from an evolutionary perspective, exploring the impact that our evolutionary heritage has on modern human diseases, both chronic and infectious. We will learn how the framework of evolutionary biology and modern genetic tools can inform our understanding of issues relevant to clinical and public health. Rather than focus on the immediate mechanisms underlying disease, we will endeavor to understand the ultimate factors that influence susceptibility, such as past natural selection. The course topics are wide-ranging, but particular attention is paid to emerging infectious diseases, as well as non-communicable diseases that may be exacerbated by facets of modern lifestyles.

Through lectures, critical analysis of the primary literature and popular science news, and class discussions, students will learn how evolutionary principles can be practically applied to medicine. Key readings each session will focus on genetic techniques for understanding evolutionary medicine, while additional readings will incorporate perspectives from diverse fields.

By fully participating in this course, students will be able to appreciate how modern susceptibility to non-communicable and infectious diseases has been influenced by past evolutionary processes; critically evaluate evolutionary hypotheses related to health and medicine, including those found in popular science articles; and know how genetic techniques are applied within an evolutionary framework to understand ultimate reasons for disease.
Prerequisites: (01:447:380 or 384) AND (01:960:401 or 01:960:212).

01:447:370 *Developmental Genetics (3)*
How genes influence the developmental processes of an organism. Topics include gene regulatory networks, signaling pathways, stem cell biology, and the role of developmental genetics in human disease.
Prerequisites: Genetics (01:447:380) or Genetic Analysis (01:447:384)

01:447:380 *Genetics (4)*
Introduction to the mechanisms of heredity and evolution. Mechanisms of Mendelian inheritance, meiosis, recombination, gene mutation, and mapping, and an introduction to modern biochemical, molecular, and population genetics.
Lec. 3 hrs., rec. 1 hr. Prerequisites: 01:119:115-116 and 01:160:161-162 or 01:160:163-164. Credit not given for both this course and 01:447:384-385 or 11:067:328 or 11:776:305.

01:447:382 *Genetics Laboratory (1)*
Laboratory to accompany 01:447:380. Not accepted for elective credit for Genetics majors.
Lab. 3 hrs. Pre- or corequisites: Genetics (01:447:380) or Genetic Analysis (01:447:384)

01:447:384-385 *Genetic Analysis I,II (4,4)*
Experimental methods and concepts in genetics, with emphasis on their application to genetic research. Part I covers transmission genetics and breeding analyses, basic molecular genetics, isolation and characterization of mutations, and chromosome structure and function. Part II covers mathematical genetics, recombinant DNA, genomics, and special topics relevant to modern genetic research.
Open only to majors in genetics or by permission of instructor. Credit not given for both this course and 01:447:380 or 11:067:328 or 11:776:305. Prerequisites for 01:447:384 are 01:119:115-116 (General Biology I & II) or 01:160:161-162 or 01:160:163-164 (General Chemistry I & II). Prerequisite for 01:447:385 is 01:447:384.

01:447:390 *General Microbiology (4 includes laboratory)*
Microorganisms are an essential component of the human environment and are significant not only for the disease they cause, but also for their ecological, agricultural, pharmaceutical, and industrial benefits. This course will introduce students to the physiology, morphology, pathogenicity, and genetics of groups of microorganisms and their applications. The lab component of the course will introduce microscopy and staining techniques, the growth cycle and generation of a standard curve, physiological characteristics of microorganisms, and bacterial transformation. The course is an introduction to the physiology, morphology, pathogenicity, and genetics of groups of microorganisms. Topics include: History and Overview of Microbiology, Cell Structure and function, Microbial Growth, Nutrition, culture, and metabolism, Virology, Bacterial genetics, Microbial evolution and systematics, Bacteria and Archaea, Nutrient cycles, Genetic Engineering and Biotechnology, Waste treatment, Anaerobic respiration and Nitrogen fixation, Antibiotics and chemotherapeutic agents, Normal Flora, Virulence, Toxins, Epidemiology, and Microbial Diseases.

This is an upper-level course that focuses on the basic principles of microbiology. The course is an introduction to the physiology, morphology, pathogenicity, and genetics of groups of microorganisms. Topics include:
Prerequisites: General Biology 01:119:115-116-117 or 01:119:101-102 and General Chemistry 01:160:161-162-171 (or higher) and Organic Chemistry 01:160:307. Credit not given for both this course and 11:680:390.

01:447:392 *Pathogenic Microbiology (3)*
This course will integrate basic microbiology and infectious diseases. The first quarter of the course will provide the conceptual basis of microbial morphology, metabolism and growth, heredity and variation, pathogenicity and antimicrobial chemotherapy. Then this course will introduce the students to one real life patient case study each week, moving the course toward an understanding of specific human diseases (e.g., pharyngitis, meningitis) as might be expected in a clinical environment. Each case will include a patient history, differential diagnosis, clinical cues, laboratory data, pathogenesis, treatment and prevention, additional points and references. The objective is not to attempt to cover every infectious disease or microorganism, but rather to use examples that would stress the key

principles of microbial pathogenesis, differential diagnosis and appropriate treatment and prevention. This course is intended for Life Science majors or those with a strong background in the Biological Sciences.
Prerequisites: General Biology (01:119:115-117), General Chemistry (01:160:161-162-171), and Organic Chemistry (01:160:305. and 01:160:315. Systems Physiology is recommended.

01:447:406-407 ***Research in Genetics (3)***
Laboratory research on original problem under the direction of a professor. Written thesis, oral presentation, and defense required.
Prerequisites: Permission of department and cumulative grade-point average of 2.8 or better. Open only to students majoring in Genetics.

01:447:408-409 ***Honors in Genetics (3-6,3-6)***
Laboratory research on original problem under the direction of a professor. Written thesis, oral presentation, and defense required.
Prerequisites: Open by permission to seniors majoring in genetics who meet the requirements for the departmental honors program. Corequisite: 01:447:414 (fall) and 415 (spring).

01:447:410 ***Research in Genetics - Writing Intensive (3)***
Research in Genetics- Writing Intensive is intended to provide you with an opportunity to engage in original laboratory research under the direct supervision of a faculty mentor, usually in the faculty member¿s research laboratory. You are expected to carry out your own research project. NOTE: this research requires a heavy commitment of time and effort and can impact your performance in coursework, especially if you have not yet managed the foundational material for the discipline. Fulfills the writing and communication requirements of the SAS Core Curriculum.
Prerequisites: 01:447:302, 447:315, or permission of department. Registration is by special permission only. Cumulative grade-point average of 2.8 or better. Declared genetics major.

01:447:414 ***Thesis Writing and Communication in Genetics (1.5)***
Assists students with their honors thesis; emphasis will be on library/internet research and thesis writing. Students will be expected to write the introduction, methods, and reference sections of their thesis and outline the results and discussion.
Corequisites: 01:447:408. For seniors completing departmental honors; by special permission only.

01:447:415 ***Thesis Writing and Communication in Genetics (1.5)***
Assists students with their honors thesis; emphasis will be on library/internet research and thesis writing. Students will be expected to write the introduction, methods and reference sections of their thesis and outline the results and discussion.
Prerequisite: 01:447:408. Corequisite: 01:447:409. For seniors completing departmental honors; by special permission only.

01:447:430 ***Effective Communication Skills in Genetics (3)***
Communication is an essential part of science. Whether it is communicating research findings to other scientists or conveying complex concepts to a lay audience, a scientist must be able to effectively communicate their research to succeed. Communication in science is typically through publications, posters, or oral presentations. The goal of this course is to provide students practice in effectively communicating scientific findings. This includes preparing and revising an introduction for scientific papers, writing a research description for general audience, and preparing and

giving presentations (both oral and poster).
Prerequisites: Declared major in Genetics; must have completed one semester of Research in Genetics, Advanced Independent Study, or Genetic Counseling Rotation. By special permission only.

01:447:451 *Genomes (3)*
This course will focus on Genomics, Proteomics and Bioinformatics from a Genetics perspective. Special attention will be given to the organization and functioning of the human genome.
Prerequisites: Genetics (01:447:380) or Genetic Analysis (01:447:384).

01:447:460 *Genetics of Compulsive Behavior (3)*
Compulsive urge can be channeled toward productive endeavors such as a strong drive to succeed in competitions, schooling, and career. On the other hand, improper handling of compulsive urge may lead to problematic behaviors such as alcoholism, drug use, gambling, and other undesirable behaviors. There are also conditions that are medically defined as disorders, with certain types of compulsive behaviors as part of the diagnostic symptoms, such as OCD and ADD/ADHD. There is evidence that genetics contribute to compulsive behavior in humans, and research in animal models has begun to uncover the molecular factors that underlie the genetic basis of compulsive behavior. Discussion of primary literature and other scientific publications that deal with the molecular and genetic basis of compulsive behavior. Emphasis will be placed on the development of skills for critical thinking and effective writing.
Prerequisites: Genetics (01:447:380) or Genetic Analysis (01:447:384).

01:447:465 *Genetic Approaches and Research Analysis (3)*
This class will teach students how to read, interpret and analyze research articles. The class will follow an active learning format, where we will discuss seminal and recent research articles in depth: What was the scientific question or problem? What methods and strategies were used to address it? What were the findings and conclusions? What are the alternative interpretations and methods that could have been applied? What questions are remaining?
This class will expose students to a diverse selection of research literature, involving genetic and molecular analyses in model organisms such as mice, worms, flies and yeast. The class series will begin with a research article presented by the teacher. During the majority of the class series, students will be divided into groups of 4-5. Each group will be assigned one research article and be required to work together to a) interpret, b) analyze and c) present the article in the form of an oral presentation to the class. Students will be graded on their ability to perform each of these tasks and on active participation during presentations by other groups. All groups will also be required to complete and be graded on a written discussion summary assignment at the end of each article discussion. This summary assignment may take many forms, e.g., preparation of a graphical abstract, subway advert, or other creative forms of expression.
Prerequisites: Genetics (01:447:380) or Genetic Analysis (01:447:384).

01:447:470 *Evolutionary Developmental Biology (3)*
Evolutionary origins of the vertebrate body plan are major problems in biology. While paleontology and comparative anatomy have revealed the evolutionary trajectories of the organs, recent genetics, genomics and embryology are becoming powerful tools to answer classical questions. The goals of this course are twofold; 1) obtain fundamental knowledge of anatomy, embryology, and the latest genomics and 2) learn how to integrate genetics, genomics and embryology to answer evolutionary questions through active discussion in the classroom. The training to discover and answer scientific questions in animal diversity will be performed at the American Museum of Natural History.
Prerequisites: Genetics (01:447:380) or Genetic Analysis (01:447:384)

01:447:478,479 ***Special Topics in Genetics (3,3)***
Directed readings and discussion of selected topics of special interest in genetics. Topics will vary according to semester and/or instructor.
Prerequisites: Genetics (01:447:380) or Genetic Analysis (01:447:384)

01:447:480 ***Topics in Molecular Genetics (3)***
Current research topics in microbial and molecular genetics. Lectures, discussions, and critical analyses of journal articles.
Prerequisites: Genetics (01:447:380) or Genetic Analysis (01:447:384).

01:447:484 ***Behavioral and Neural Genetics (3)***
Influence of genetics on the nervous system and behavior of various organisms. Overview of field including experimental analysis of behavior, development of the nervous system, and sensory systems. Emphasis on reading and interpreting original research,
Prerequisites: Genetics (01:447:380) or Genetic Analysis (01:447:384).

01:447:488 ***Genetic Counseling Rotation (3)***
The goal of this course is to provide students with an understanding of the genetic counseling career. Students will be placed at a local Genetic Counseling clinic to shadow a genetic counselor for one semester. During the semester, the student is expected to spend 8-9 hours a week at the rotation plus meet weekly with course director (attendance is mandatory). Course grade will be based on 1) Case presentation to Genetic Counseling group 2) ten Genetic Counseling case summary logs, and 3) evaluation by the clinical supervisor.
Prerequisites: Declared Genetics major, cumulative GPA of 2.8 or greater, and accepted into the undergraduate Genetic Counseling Certificate Program (GCCP).

01:447:489,490 ***Advanced Independent Study in Genetics (3,3)***
Advanced independent study in Genetics is an opportunity for students to complete a scholarly project under the direct supervision of a faculty mentor. Projects are varied; e.g. library research on a topic of mutual interest to both the student and the faculty member, computer simulations, informative website design, or development of teaching materials. This course may not used for laboratory research.
Prerequisites: 01:447:384 and permission of department. Open only to students majoring in Genetics

Life Sciences (SAS)

Molecular Biology and Biochemistry 694

MOLECULAR BIOLOGY AND BIOCHEMISTRY 694

Department of Molecular Biology and Biochemistry, School of Arts and Sciences

Life Sciences (SAS)

Learning Goals

Learning Goals

The Department of Molecular Biology and Biochemistry offers a course of study in which traditional and modern biochemistry are integrated with studies in molecular biology. In addition to traditional courses, students are required to carry out undergraduate research work in a Rutgers professor¿s lab who serves as the host and mentor. This course of study prepares students for graduate studies in molecular biology and biochemistry and related fields, entry into professional schools in medicine or other health professions, or employment in industries (e.g., biotechnology, pharmaceuticals) in which molecular biology and biochemistry skills are in demand. The same learning goals are also used for nonmajor students taking molecular biology and biochemistry courses.

Learning Goals:

I. Students should demonstrate an understanding of the knowledge that is needed to begin biomedical research and that is required for postgraduate exams and studies.

II. Students should demonstrate the ability to find and evaluate information about specific biological systems or problems.

III. Students should demonstrate the ability to design experiments and critically analyze data.

IV. Students should demonstrate the ability to communicate their research and findings orally through seminar and poster presentations and through written research papers.

Life Sciences (SAS)

Entry Requirements of the Major

Entry Requirements of the Major

The molecular biology and biochemistry (MBB) major is open to students beyond their first year who have a 2.0 cumulative grade-point average and have received grades of C or better in courses taken toward the major, except by special permission of the department undergraduate chair. The MBB major is also open to first year students with AP credits. In all cases, students interested in the MBB major should contact the Undergraduate Director, Sam Gunderson. A grade of C or better in all courses credited toward the major is required for graduation and each course may be repeated only once to replace D/F grades.

Departmental approval is required to declare the major in molecular biology and biochemistry. Students who want to register for the MBB major must first meet with the Undergraduate Chair Sam Gunderson, Nelson lab, Room A322/A320 (848-445-1016 gunderson@dls.rutgers.edu) to discuss details about the major.

Life Sciences (SAS)

Major Requirements

Major Requirements

A core of courses is required for completion of the major in molecular biology and biochemistry. Students supplement the core with additional required and elective courses in one of three options. Given that molecular biology and biochemistry is a dynamic and developing field, it is critical that coursework applied to the major must be current. Thus, any life science courses applied to the major in molecular biology and biochemistry should be taken within 10 years of graduating. Online courses will be reviewed on a case-by-case basis to confirm that they meet departmental learning goals before they may be used to satisfy the requirements for the major. Returning students must meet with their adviser to discuss their path to graduation. All students are required to write research reports and present them at a seminar.

Required Core Courses (58 credits)

01:119:115-116 General Biology (4,4)*
01:119:117 Biological Research Laboratory (2)*
01:160:161-162 or 01:160:163-164 or 01:160:165-166 General Chemistry (4,4)*
01:160:171 Introduction to Experimentation (1)*
01:160:309 Organic Chemistry Laboratory (2) (recommended)* or 01:160:311 Organic Chemistry Laboratory (2)
01:160:315-316 Principles of Organic Chemistry (4,4) (recommended)* or 01:160:307-308 Organic Chemistry (4,4)
01:447:380 Genetics (4)*
01:640:151-152 Calculus for Mathematical and Physical Sciences (4,4) *(recommended) or 01:640:135-136 Calculus for the Life and Social Sciences I,II (4,4)**
01:694:407 Molecular Biology and Biochemistry (3) or 01:694:395 Biochemistry for the Life Sciences (3)
01:694:315 Introduction to Molecular Biology and Biochemistry Research (3) or 01:694:215 Honors Introduction to Molecular Biology and Biochemistry Research (4) or 01:694:214 Introduction to Molecular Biology Research (3) or 01:694:316 Honors Introduction to Molecular Biology, Biochemistry, Genetics Research (4)
01:694:408 Molecular Biology and Biochemistry (3)
01:694:383 Molecular Biology and Biochemistry Seminar: Careers in Science (1)
01:694:484 Molecular Biology and Biochemistry Seminar: Research Presentations (1)
01:750:203-204 General Physics (3,3)***

01:750:205-206 General Physics Laboratory (1,1)***

*Life sciences core course
**01:960:401 Basic Statistics for Research (3) or 01:960:211-212 Statistics I,II (3,3) may be substituted for the second semester of calculus.
***01:750:193-194 (4,4) or 01:750:201-202 (5,5) may be substituted for 01:750:203-204 (3,3) plus 01:750:205-206 (1,1).

Life Sciences (SAS)

Course Requirement Options

Course Requirement Options

In addition to the required core courses, the Department of Molecular Biology and Biochemistry (MBB) offers two course options to students to fulfill the requirements for the major. Course option one comprises taking advanced electives and is intended to expose MBB students to different current topics in molecular biology and biochemistry. Course option two is for students interested in biophysical questions and research and comprises taking Physical Chemistry and Multivariable Calculus. Students completing course option two will also receive a minor in chemistry are encouraged to take the physical chemistry courses as they will fulfill the minor requirements. Course option two is intended to expose MBB students to different current topics in molecular biology and biochemistry.

Course Option One (13 credits)

Two 3-credit courses offered by the MBB department from the following list: 01:694:230; 01:694:390; 01:694:411; 01:694:412; 01:694:413; 01:694:420/421; 01:694:492

One 400-level, 3-credit elective course offered by any department in the Division of Life Sciences or approved by the MBB department. See degree navigator or the MBB department website for a list of approved courses.

Course Option Two (9 credits)

01:160:341-342 Physical Chemistry: Biochemical Systems (3,3) or 01:160:327-328 Physical Chemistry (3,3) (requires 01:640:251 as a prerequisite). Other combinations of Physical Chemistry are possible so see degree navigator for further details.

01:640:251 Multivariable Calculus (4)

One 3-credit course offered by the MBB department from the following list: 01:694:390; 01:694:411; 01:694:412; 01:694:413; 01:694:420/421; 01:694:492

Electives

Because the list of approved electives is changing, students should discuss their elective options directly with their departmental faculty advisers and with the MBB Undergraduate Director, Sam Gunderson. A list of currently approved electives can be found on the MBB department website. In addition to the undergraduate courses listed, advanced students are encouraged to choose electives from the School of Graduate Studies.

Life Sciences (SAS)

Research Options

Research Options

The Department of Molecular Biology and Biochemistry (MBB) offers two laboratory research options (laboratory option one and laboratory option two), as well as a nonlaboratory research option (nonlaboratory option). In all cases, students must take one of the Introduction to Molecular Biology and Biochemistry Research courses (01:694:214, 01:694:215, 01:694:315, or 01:694:316) and 01:694:383, 484 Seminars in Molecular Biology and Biochemistry. Course 01:694:215 is only for first-year honors students who have placed out of General Biology (01:119:115,116, and 117) by receiving a score of 4 or 5 on the AP biology exam. Course 01:694:214 is for first-year students who have placed out of General Biology (01:119:115,116, and 117) by receiving a score of 4 or 5 on the AP biology exam. Course 01:694:315 is for either qualified sophomores or junior students in the major. Course 01:694:316 is for either qualified sophomores or junior honors students in the major.

Laboratory Option One (>12 credits)

01:694:381,382, and 283 (Summer) or 384 (Summer) Undergraduate Laboratory Research (2-6,2-6)

01:694:481,482 Advanced Undergraduate Laboratory Research (2-6) or 01:694:495,496 Honors Laboratory Research (6,6)

A minimum of 12 credits is required in research courses. With the exception of Honors Laboratory Research (01:694:495/496), students who plan to take more than 3 credits of research a semester need approval from the MBB undergraduate chair.

Laboratory Option Two (6 to 11 credits)

01:694:381,382, and 283 (Summer) or 384 (Summer) Undergraduate Laboratory Research (2-6) or 01:694:481,482 Advanced Undergraduate Laboratory Research (2-6) or 01:694:495,496 Honors Laboratory Research (4-6,4-6)

One 3-credit course offered by the MBB department from the following list: 01:694:230 (3); 01:694:390; 01:694:411 (3); 01:694:412 (3); 01:694:413 (3); 01:694:420/421 (3); 01:694:492 (3).

A minimum accumulation of 6 credits is required in research courses. Students must take at least one MBB elective in addition to the course requirements to satisfy the requirements for this option. Note that students applying for honors must complete 4 up to 6 credits of honors coursework per semester for two semesters. With the exception of Honors Laboratory Research (01:694:495/496), students who plan to take more than 3 credits of research a semester need approval from the MBB undergraduate chair.

Nonlaboratory Option (9 credits)

01:694:489,490 Literature Research in Molecular Biology and Biochemistry (3,3). This non-lab option is almost never used and will need approval from the Undergraduate Director, Sam Gunderson

One 3-credit course offered by the MBB department from the following list: 01:694:230 (3); 01:694:390; 01:694:411 (3); 01:694:412 (3); 01:694:413 (3); 01:694:420/421 (3); 01:694:492 (3).

Students must take at least one MBB elective in addition to the course requirements to satisfy the requirements for this option. Students taking this option may not apply for departmental honors.

Life Sciences (SAS)

Departmental Honors Program

Departmental Honors Program

To qualify, a student must have attained, at the end of the junior year, a cumulative grade-point average of at least 3.4 and a grade-point average of 3.4 or better in courses required for the major. Exceptional students not meeting these criteria but wishing to apply for honors research may petition the Department of Molecular Biology and Biochemistry at the beginning of their senior year. Students accepted into the program are expected to complete two semesters (6 credits per semester) of honors coursework. A written honors thesis and an oral thesis presentation are required. Students enrolled in 01:694:495,496 Honors Laboratory Research or any of the various school honors programs are eligible to receive departmental honors at the time of graduation.

Life Sciences (SAS)

Courses

Courses

01:694:214 ***Introduction to Molecular Biology Research (3)***
Basic principles and methods of research, followed by a research project: analyses of molecular clones from eukaryotic cDNA libraries. Description of research opportunities available to undergraduates at the university.
Prerequisites: For first-year students only who have placed out of General Biology (01:119:115,116, and 117) with AP credits, and 01:160:161 or 01:160:163. Corequisite: 01:160:162 or 164.

01:694:215 ***Honors Introduction to Molecular Biology and Biochemistry Research (4)***
Basic principles and methods of research, followed by a research project: isolation and analyses of transcriptional regulatory mutants in yeast. Description of research opportunities that are available to undergraduates at the university.
Prerequisite: Limited only to first-year SAS Honors Program or Honors College students who have placed out of General Biology (01:119:115,116, and 117) with AP credits. Corequisites: 01:160:161 or 01:160:163 (or AP credits) and 01:640:135 or 01:640:151 (or AP credits).

01:694:230 ***Analytical Methods in Biology (3)***
Mathematical methods and tools to analyze and interpret biological and biomedical data, including probability theory; Bayes Theorem; the binomial, Poisson, and normal distributions; limit theorems; error analysis; tests of statistical significance; parameter estimation; curve fitting; sampling techniques; random number generation; and Monte Carlo methods. Analysis of sequencing and microarray data, such as sequence alignment, phylogeny inference, population structure, selection, and human migration.
Prerequisites: 01:119:115-116 and 01:640:135 or 151.

01:694:281,282 *Sophomore Laboratory Research (2-6,2-6). 281 is Fall, 282 is Spring*
Research project in the laboratory of a faculty member. Written report of research carried out during each semester required. Credits in this course cannot be used toward the required research credits for laboratory option. Students must complete a special permission form and have it signed by their research advisor and then send the signed form to the Undergraduate Director (Sam Gunderson) before they can register for the course.

01:694:283 *01:694:283 Undergraduate Laboratory Research (2-6). Summer semester*
Independent research project in the laboratory of a faculty member. A written report of research carried out during each semester required by the end of each semester.
Typically for rising Juniors and Seniors. Students must complete a special permission form and have it signed by their research advisor and then send the signed form to the Undergraduate Director (Sam Gunderson) before they can register for the course.

Prerequisite: Students must complete a special permission form and have it signed by their research and MBB faculty mentors before they can register of the course.

01:694:301 *Introductory Biochemistry and Molecular Biology (3)*
Chemistry and metabolism of proteins, carbohydrates, lipids, nucleic acids, and other biologically important compounds.
Prerequisite: 01:160:209 or 307. Not for students majoring in molecular biology and biochemistry. Credit not given for both this course and 01:694:407, 11:115:301, or 11:115:403.

01:694:313 *Introductory Biochemistry Laboratory (1)*
Techniques used in research, clinical, and food laboratories, including tests of biological materials, methods of separation, and determination of enzyme activities.
Lab. 3 hrs. Pre- or corequisite: 01:694:301. Not for students majoring in molecular biology and biochemistry.

01:694:315 *Introduction to Molecular Biology and Biochemistry Research (3)*
Basic principles and methods of research, followed by a research project: analyses of molecular clones from eukaryotic cDNA libraries. Description of research opportunities at the university available to undergraduates.
Pre- or corequisites: 01:119:115,116, and 117; and 01:160:161-162, 171 or 01:160:163-164, 171. Credit not given for both this course and 01:447:315, 01:694:214, 215, or 316. Open only to MBB majors.

01:694:316 *Honors Introduction to Molecular Biology, Biochemistry, Genetics Research (4)*
Basic principles and methods of research in molecular biology, biochemistry, and genetics, followed by a research project: isolation and analyses of transcriptional regulatory mutants in yeast. Description of research opportunities that are available to undergraduates at the university.
Prerequisites: 01:119:116 and (01:160:162 or 01:160:164). For MBB or genetics majors only or those planning on being MBB or genetics majors. Special permission required.

01:694:381,382 *Undergraduate Laboratory Research (3-6,3-6). 381 is Fall, 382 is Spring*
Research project in the laboratory of a faculty member. Written report of research carried out during each semester required. Students must complete a special permission form and have it signed by their research advisor and then send the signed form to the Undergraduate Director (Sam Gunderson) before they can register for the course.

01:694:383 *Molecular Biology and Biochemistry Seminar: Careers in Science (1)*
Discussion of career options in the life sciences, finding a research laboratory, performing literature searches, reading a scientific paper, and creating posters and abstracts. This course should be taken in the beginning of the third year.
Open to MBB majors only.

01:694:384 *Undergraduate Laboratory Research (1-6). Summer semester*
Independent research project in the laboratory of a faculty member. A written report of research carried out during each semester required by the end of each semester.
For rising Seniors. Students must complete a special permission form and have it signed by their research advisor and then send the signed form to the Undergraduate Director (Sam Gunderson) before they can register for the course.

For rising Seniors. Students must complete a special permission form and have it signed by their research advisor and then send the signed form to the Undergraduate Director (Sam Gunderson) before they can register for the course.

01:694:385 *MBB Research and Writing (3)*

Research project in the laboratory of a faculty member. Seminar on science communication. Written and oral reports of research carried out during the semester required.

Prerequisites: MBB majors only. Students need a GPA of 2.8 or better to enroll in research.

01:694:390 *Introductory Computational Biology (3)*
Disciplines of biochemistry and molecular biology and genomics all include collection and analysis of large data sets. Hands on use in a computer lab will permit students to learn and apply computer languages such as Python and R to analyze large data including for example DNA mutations and structural variations (SVs), RNA-seq and ChIP-seq as part of understanding genes and gene regulation.
Prerequisite: 01:447:380 or 01:447:384

01:694:395 *Biochemistry for Life Sciences (3)*
The course is intended for life science majors and takes a holistic approach to Biochemistry. You will learn the basics of proteins, enzymology, nucleic acids and metabolism and use these as foundations to discuss exemplary metabolic pathways for their importance to homeostasis and, when dysregulated, to disease including observable phenotypes and what current strategies are used to treat these disorders. Coursework will consist of quizzes, homework, exams and one graded paper.

Prerequisites: 01:160:307 or 01:160:315

01:694:407 *Biochemistry (3)*
Protein structure and function, structure of lipids, membranes and carbohydrates, catalysis of biochemical reactions, intermediary metabolism, oxidative phosphorylation, membrane transport, lipid metabolism, signal transduction, photosynthesis, protein secretion, targeting and turnover, nitrogen, amino acid, and nucleotide metabolism.
Pre- or corequisites: 01:160:307-308 or 315-316. Credit not given for both 01:694:407 and 01:694:301, 11:115:301, or 11:115:403.

01:694:408 *Molecular Biology and Biochemistry (3)*
Disciplines of biochemistry and molecular biology as interlocking and mutually complementary fields of study. Lectures on structure of DNA, RNA, recombinant DNA approaches, DNA replication, repair and recombination, mobile genetic elements, transcription, gene regulation, RNA splicing, translation, and viral gene expression.
Prerequisite: 01:694:407 or 01:694:301 or 01:694:395 or 11:115:403. Credit not given for both 01:694:408 and 01:146:478 or 11:126:481.

01:694:411 *Molecular Pathways and Signal Transduction (3)*
Lectures and discussion of current research areas of advanced molecular and structural biology: transcription, posttranscriptional regulation, cell cycle, neurobiology, protein folding, macromolecular recognition, and molecular virology.
Pre- or corequisites: 01:694:407 and 408, or 01:447:384-385 or 11:115:403-404 or 11:126:481.

01:694:412 *Proteomics and Functional Genomics (3)*
Survey of modern techniques of protein biochemistry, bioinformatics, proteomics, and functional genomics, including basic concepts of protein structure and function, protein folding, protein characterization and purification, enzyme kinetics, NMR and X-ray crystallography, mass spectrometry, yeast two hybrid, and various techniques and approaches to functional and structural genomics.
Prerequisites: [(01:694:301 OR 01:694:407 OR 01:694:395) AND (01:447:380) OR (01:447:384)]

01:694:413 *Chromatin and Epigenomics (3)*

Introduction to chromatin dynamics, particularly the structural and biochemical modifications of chromatin that underlie epigenetic states and their effects on gene expression and development.

Pre- or corequisites: Prerequisite: 01:694:408 or 01:146:478 or 01:447:385.

01:694:420,421 *Special Topics in Molecular Biology and Biochemistry (3,3)*
Directed reading and discussion of selected topics of special interest in molecular biology and biochemistry. Topics will vary according to semester and/or instructor.
Pre- or corequisites: [(01:694:301 or 01:694:407) and (01:447:380 or (01:447:384)] or equivalent.

01:694:481,482 *Advanced Undergraduate Laboratory Research (BA, BA). 481 is Fall, 482 is Spring.*
Research project in the laboratory of a faculty member. A written report of research carried out during each semester is required. Oral presentations of student research are required in 01:694:484.

01:694:484 *Molecular Biology and Biochemistry Seminar: Research Presentations (1)*
Oral presentation of student's own research results and the research interests of the laboratory with which the student is associated. Presentation at a required poster session.
Students should take this course in the spring semester of their senior year. MBB majors only.

01:694:489,490 *Literature Research in Molecular Biology and Biochemistry (1-3,1-3)*
Literature research projects on a selected subject under the direction of a faculty member. A written report of research carried out during each semester is required. Oral presentations of student research are required in 01:694:484. This course is rarely used, therefore contact the Undergraduate Director if you are considering to take this course.
Prerequisites: 01:694:214, 215 or 315, 407, 408, and 383.

01:694:492 ***Gene Regulation: Clocks to Cancer (3)***
Explanation of MBB as an experimental science and how molecular biologists know what they know. Covers all aspects of gene regulation from transcription to protein modification to explain how 25,000 human genes can make millions of different protein isoforms and mRNA and ncRNA. Mechanisms of molecular clocks and cancer addressed in terms of gene regulation complexity,feedback loops and rate-limiting steps with emphasis on the methods, experimental design,
Prerequisites:(01:694:407 BIOCHEM) OR (01:447:384 GEN ANALY) OR (11:126:481 MOLE GEN) OR (11:115:403 GEN BIOCHEM) OR (01:694:395 BioChem LS)

01:694:495,496 ***Honors Laboratory Research (BA)***
Two-semester-long Honors research project in the laboratory of a faculty member. In the Fall semester, 01:694:495 students are required to attend a seminar each week on writing a thesis and preparing an oral thesis presentation. In the Spring semester, students take 01:694:496 where they complete their Honors thesis and give their oral presentation to their honors committee.

Geography 450 (SAS)

GEOGRAPHY 450

Department of Geography, School of Arts and Sciences

Website: http://geography.rutgers.edu

Chair: Kevin St. Martin

Director of Undergraduate Studies: Asa K. Rennermalm

Distinguished Professors:

Robin M. Leichenko, B.S., Wisconsin; M.A., Colorado; M.A., Ph.D., Pennsylvania State

David A. Robinson, B.Sc., Dickinson; M.S., Ph.D., Columbia

Professors:

D. Asher Ghertner, B.A., Colby College; M.A., Ph.D., California (Berkeley)

Kevin St. Martin, B.A., M.S., Massachusetts; Ph.D., Clark

Asa K. Rennermalm, B.S., M.S., Copenhagen (Denmark); Ph.D., Princeton

Laura Schneider, B.S., Universidad Nacional de Colombia; Ph.D., Clark

Associate Professors:

Kevon C. Rhiney, B.A., Ph.D., University of the West Indies (Jamaica)

Assistant Professors:

Priscilla Ferreira, B.A., University of São Paulo (Brazil); M.A., Ph.D., University of North Carolina at Chapel Hill

Andrea Marston, B.A., Duke; M.A., British Columbia; Ph.D., California (Berkeley)

J.T. Roane, B.A., The University of Virginia; Ph.D., Columbia

Teona Williams, A.B., Bowdoin College, MSc. University of Michigan (Ann Arbor), MPhil.,MA., Ph.D. Yale

Associate Teaching Professors:

Nathaniel J. Gabriel, B.A., Prescott College; M.S., Temple; Ph.D., Rutgers

Assistant Teaching Professors:

Paul O¿Keefe, B.A., University of Leeds; M.Sc., Universitiy of Northumbria; Ph.D., West Virtinia

Jesse Rodenbiker, B.A., Notre Dame; M.A., University of Oregon; Ph.D., California (Berkeley)

Geographers study the formation and meaning of place, spatial processes and practices, and the relationships between humans and their environments. Rutgers Department of Geography is nationally recognized for addressing critical contemporary issues, such as unprecedented environmental change, the increasingly clear limits of development, and the necessity to account for and redress racial, ethnic, and gender injustice. In addition to comprehensive major and minor degrees in Geography, the department administers Rutgers' Environmental Studies Program. The latter is a collaboration among more than twenty departments across the university, which offers major and minor degrees in Environmental Studies.

Geography 450 (SAS)

Learning Goals

Learning Goals

The Geography program has general learning goals for the entire program, and specific goals for each of the three tracts (Global Culture, Economics and Society; Environment; or Geographical Techniques), as listed below.

General Learning goals

1) Use a spatial perspective to critically examine how human and physical components of the world interact
2) Understand how geographic concepts apply to social and environmental justice
3) Acquire frameworks, methods and spatial models to identify and explain key geographical issues with attention to multi-scalar processes and connections between people, places, and environments
4) Understand how a geography degree can support career prospects

Global Culture, Economics, and Society

1) Synthesize and examine critically a range of cultural, economic and societal issues, particularly those connected with globalization, geopolitics and processes driving environmental change
2) Assess structural inequalities throughout the globe (e.g. systemic racism, wage gap, austerity)

Environment

1) Understand and apply the terminology and frames of reference used in physical and social environmental research
2) Identify and explain key physical and social environmental issues (e.g., environmental justice, climate change, and land-surface transformation).

Geographical Techniques

1) Demonstrate the fundamental principles and concepts of geographic technologies (e.g. geographic information systems, remote sensing) used in the acquisition, processing, and analysis of spatial data
2) Locate, access, manipulate, display and communicate spatial data effectively
3) Acquire frameworks and methods for analyzing how the uses of geographical technologies are power-laden practices

Geography 450 (SAS)

Major Requirements

Major Requirements

A minimum of 36 credits are required for the geography major.

Requirement 1: Survey courses: a total of 9 credits from (01:450:101,102,103)

Requirement 2: Methods course: a total of 3 credits from (01:450:330)

Requirement 3: Theory course: a total of 3 credits from (01:450:470)

Requirement 4: Tracks - a total of 18 credits, which must include 12 credits from one of three tracks, and 3 credits from each of the other two tracks. The tracks are:

1. *Global Culture, Economics, and Society: (See the complete list on degree navigator)*
2. *Environment: (See the complete list on degree navigator)*
3. *Geographical Techniques:(See the complete list on degree navigator)*

Requirement 5: Elective - a total of 3 credits of any geography course earned at the 200 level or higher.

No more than 3 credits earned at 100- or 200-level courses may be used to satisfy requirement 4.

No more than one course with a grade of D may be used in the geography major.

Depending on the content of the course, the following may be applied to any track at the discretion of the undergraduate director: 01:450:270, 271, 272, 485, 486, 491, 492, 495, and 496.

Geography 450 (SAS)

Minor Requirements

Minor Requirements

Six courses (18 credits) are required for the minor in geography. This includes two of the following three courses: 01:450:101, 102, and 103; and four other courses, at least three from one track and one from a remaining track.

The tracks are:

1. Global Culture, Economics, and Society: (See the complete list on degree navigator)
2. Environment: (See the complete list on degree navigator)
3. Geographical Techniques: (See the complete list on degree navigator)

Depending on the content of the course, the following may be applied to any track at the discretion of the undergraduate director: 01:450:270, 271, 272, 485, 486, 491, 492, 495, and 496.
Nine of these 12-track credits must be earned at the 300 or 400 levels.
No more than one course with the grade of D may be used in the geography minor.

Geography 450 (SAS)

Departmental Honors Program

Departmental Honors Program

Departmental honors are awarded to geography majors who achieve either (1) a grade-point average (GPA) of 3.50 or higher within the major following the penultimate semester prior to graduation; or (2) a GPA lower than 3.50 within the major following the penultimate semester prior to graduation, but with an approved and completed honors thesis.

Highest honors are awarded to students who achieve a cumulative GPA of 3.50 or higher within the major following the penultimate semester, and an approved honors thesis.

The honors thesis is produced under the supervision of a department faculty member. Choice of faculty supervisor will be made by the student. One additional faculty reader of the thesis is required. Thesis research and writing fulfills the requirements of honors courses 01:450:495 and 496 (one 3-credit honors course per semester). The student will be invited to give a presentation of their work and be prepared to respond to questions and requests for revisions from the faculty supervisor and reader.

Geography 450 (SAS)

Andrew Hill Clark Prize

Andrew Hill Clark Prize

The most outstanding graduating senior geography major is eligible to receive the Andrew Hill Clark Prize in Geography.

Geography 450 (SAS)

Geospatial Information Science Certificate

Geospatial Information Science Certificate

A certificate in geospatial information science is awarded to students who complete 01:450:320, 321, 322, 355, 356, and one of the following: 01:450:421, 487, or 488 with a grade of B or better for each course.

All students, regardless of major, are eligible to participate in the geospatial information science certificate program. The certificate is awarded only with, or subsequent to, the awarding of a baccalaureate degree in an approved major.

Geography 450 (SAS)

Certificate in International Geographic Perspectives

Certificate in International Geographic Perspectives

A minimum of 24 credits is required for the certificate in international geographic perspectives. Core courses totaling 15 credits are required: 01:450:102, 103, 205, 262, and 405. A regional core is also required, with a choice of one selected from: 01:450:332, 334, 335, 336, 338, 341, or 342. The final 6 credits may be taken as electives selected from: 01:450:211, 222, 241, 250, 309, 311, 361, 363, 491, and 492.

Geography 450 (SAS)

Courses

Courses

01:450:101 *Earth Systems (3)*
Systematic introduction to physical processes on earth; including earth-sun relations, weather and climate, the hydrologic cycle, earth materials, and landforms. Emphasis on interrelationships among these phenomena.

01:450:102 *Transforming the Global Environment (3)*
Introduction to the role of humans as modifiers and transformers of the physical environment. Emphasis on current changes and contemporary public issues.
Credit not given for both this course and 01:381:101.

01:450:103 *Human Geography: Space, Place, and Location (3)*
Introduction to the spatial patterning of human activities and the role of place in human affairs. Population distributions; world cultural patterns; organization of urban and nonurban societies including land use, transportation, and communications. Impacts of global restructuring.

01:450:205 ***World Cultural Regions (3)***
Geography of the world's major cultural regions: Europe; Russia and the Newly Independent States; the Americas; East Asia, Australasia, and Oceania; South Asia; the Middle East; and Africa.

01:450:208 ***Maps, Power, and the Digital World (3)***
Examination of maps, mapmaking, and map interpretation, the ways that these processes are political and rooted in dynamics of power, and the social justice potential for mapping in today's digital age.

01:450:211 ***Environment, Society and Justice (3)***
Critically examines the relationship between humans and the biophysical environment, emphasizing the major theoretical approaches to the study of social, political, economic, and technological aspects of environmental challenges.

01:4450:212 ***Water Resources (3)***
Examines freshwater resources in the 21st century. Exploration of global water resources from both physical and social science perspectives, including water cycle, water management, and water conflicts.

01:450:213 ***The Global Climate System (3)***
Explores the climate system from a geographic perspective. Examines the Earth's energy budget, hydrologic cycle, and atmospheric circulation at a variety of spatial and temporal scales. Investigates natural and human-associated aspects of climate variability and change.

01:450:214 ***Conservation (3)***
Theories and practices of conservation in critical perspective. Moral, political-economic, scientific, and practical dilemmas in meeting conservation/preservation and restoration/remediation goals.

01:450:222 ***Cultural Geography (3)***
Systematic introduction to cultural geography. Spatial analyses of peoples, languages, religions, folk and popular culture, and the varying impacts of cultures on environments.

01:450:241 ***The City: Introduction to an Urban Geography (3)***
The role of cities in the world and overview of various aspects of the city, spanning geographical, political, climactic, psychological, and socioeconomic analysis.
Credit not given for both this course and 01:450:250.

01:450:250 ***Cities (4)***
Spatial organization and functioning of cities in different world regions. Emphasis on societal system factors that influence urban development.
Credit not given for both this course and 01:450:241.

01:450:262 ***Geographic Background to Current World Affairs (3)***
Contemporary global public issues from the perspective of changes in geographical relationships. Examination of major environmental, social, political, and economic trends that involve the restructuring of society and space at a variety of scales.

01:450:270,271 ***Topics in Geography (1.5,1.5)***
Addresses a subject that is most appropriately treated in an abbreviated format. Topics vary from semester to semester. Specific titles available at time of registration.

01:450:272 ***Topics in Geography (3)***
Topics vary. Specific titles available at time of registration.

01:450:280 ***Pandemics (4)***
Exploration of pandemics, including the most recent Covid-19 pandemic, through an interdisciplinary lens that incorporates biology, ecology, politics, economics, and culture along with other themes.

01:450:306 ***Global Ecosystems and Biodiversity (3)***
Explores the spatial patterns of biological diversity. Emphasis on relationships between living organisms (animals, plants, and microbes) and their environment (climate, geology, soils), emphasizing the spatial and temporal patterns in their distributions over Earth. Uses concepts from ecology, evolutionary biology, geology, and physical geography, and employs methodologies from geography such as geographic information systems and spatial analysis.

01:450:309 ***Economic Geography (3)***
Spatial organization of economic activities; emphasis on economic globalization and urban and regional development.
Pre- or corequisite: 01:450:103 or permission of instructor.

01:450:311 ***Natural Hazards and Disasters (3)***
Human dimensions of selected types of extreme natural events (e.g., windstorms, earthquakes, floods, and droughts) in developed and developing countries.

01:450:313 ***Climate Change (3)***
Climate variability and change of the past, present, and future. Studies natural and anthropological dimensions of change across continents, ice sheets, and oceans using a systems approach.
Prerequisite: 01:450:101 or 213 or 11:670:202.

01:450:320 ***Spatial Data Analysis (3)***
Introduction to data analysis for geographers, including graphical techniques for data visualization, data interpretation, basic descriptive statistical methods, and a range of inferential statistical techniques for problem solving in geography.

01:450:321 ***Geographic Information Systems (3)***
Use of computers for management, analysis, and communication of spatial data. Geocoding, transformations, storage, and representation.

01:450:322 ***Remote Sensing (3)***
Principles and techniques of satellite remote sensing. Application of satellite sensing to the study of Earth's land, oceans, and atmosphere.

01:450:330 ***Geographical Research Methods (3)***
Approaches to geographical problem solving. Defining geographical problems; seeking, organizing, and presenting spatial data; report writing.
Prerequisites: 01:450:101, 102, 103 or permission of instructor. Required for Geography majors.

01:450:331 ***New Jersey (3)***
Physical, historical, urban, and economic geography of the state.

01:450:332 ***Eastern Europe and Eurasia (3)***
Examines social, economic, and political dimensions of the region and the resulting geographical patterns.

01:450:334 ***Western Europe (3)***
Introduction to the Western European culture area. Its evolution; the features of the physical environment and their influence on human occupancy; demographic characteristics and diversity; regional development problems; quests for regional autonomy.

01:450:335 ***Caribbean Borderlands (3)***
Regional analysis of basic human and physical differences affecting economic, political, and social conditions in the West Indies, Central America, and Mexico.
Credit not given for both this course and 01:595:336.

01:450:336 ***Latin America (3)***
Relative significance of natural and cultural environments in contributing to regional contrasts.

01:450:338 ***Africa (3)***
Regional associations of peoples and national states; analysis of resource endowment, economic development, and Africa's changing position in the world.
Credit not given for both this course and 01:016:338.

01:450:341 ***South Asia (3)***
Geographic survey of the region of South Asia (India, Nepal, Pakistan, Afghanistan, Bangladesh, and Sri Lanka) in terms of environment, development, society, and politics.

01:450:342 ***East Asia (3)***
Examination of East Asia's social, political, environmental, and cultural geographies. Examination of regional and international interconnections between people, places, and processes from the past to the present.

01:450:343 ***Global China (3)***
Examination of how modern China was formed and the country's major political and economic transitions in global contexts. Exploration of contemporary China's political, cultural, environmental, and economic geographies domestically and internationally.

01:450:351 ***Africa Region and People (3)***
Exploration of regional, cultural and environmental geographies of Africa with particular attention to refugee populations.

01:450:355 ***Principles of Cartography (4)***
Theories and techniques of geographic data gathering, analysis, and map preparation. Special attention to problems of thematic map design and preparation.
Lec. 3 hrs., lab by arrangement 3.6 hrs.

01:450:356 ***Advanced Cartography (4)***
Study of psychophysical factors in map design, including experimenting with surface representation and topography. Photographic materials and methods applicable to graphic reproduction.
Lec. 3 hrs., lab by arrangement 3.6 hrs. Prerequisite: 01:450:355 or permission of instructor.

01:450:360 ***Cultural and Political Ecology (3)***
Examines the dynamic relationship between political-economic, cultural, and ecological factors and the ways they shape access to, and control over, natural resources.

01:450:361 ***Gender Geographies (3)***
Links between gender relations and the spatial organization of society. Emphasis on the spatial division of labor, gendered places, women and development, geographies of safety and fear, and gendered political geographies.

01:450:363 ***Geography of Development (3)***
Geographical patterns of development in third world areas and less developed parts of advanced capitalist countries. Emphasis on agrarian and industrial development and the restructuring of relations among different regions.

01:450:364 ***Afro-Latinx geographies in the US and in Latin America (3)***
Examines uneven Afro-Latinx geographies in the US and Latin America. Interrogates how racialization and gender intersect spatial, economic, and environmental (in)justices that affect Afro-Latinxs communities across the Americas.
Credit not given for both this course and 01:595:364.

01:450:365 ***Geographies of Race and Ethnicity in the United States (3)***
Examines the role inequalities based on racial and ethnic identities have played in shaping the historical and contemporary spaces of the United States. Emphasis on spatial dimensions of race and ethnicity and how social and spatial patterns are produced through histories of privilege and oppression, inclusion and exclusion, conflict, containment, and mobility.

01:450:370 ***Climate Change and Society (3)***
Physical aspects and societal implications of climate change. Means of predicting and detecting change. Impacts on physical and human systems. Climate in the political arena; planning for the future.

01:450:380 ***Medical Geography (3)***
Geographical analysis applied to disease hazards, health status of populations, and health care delivery systems in selected physical and cultural environments.

01:450:402 ***Field Geography (4)***
Hands-on introduction to Geographic field methods, including mapping landscapes, using various sensors to monitor weather and water properties, and more. Some class time will be spent outdoors.
Prerequisites: 01:450:101,102,103, 01:381:101, 01:460:100, 01:375:101 or permission of instructor.

01:450:403,404 ***Advanced Physical Geography (3,3)***
Problems in the geography of landforms, climate, soils, and vegetation analyzed from the viewpoints of both pure and applied sciences.
Prerequisite: 01:450:101 or permission of instructor.

01:450:405 ***Political Geography (3)***
Basic principles of political geography and the application of these principles to selected areas around the world; causes of political conflicts and methods used in their resolution.

01:450:409 *Geohumanities (3)*
Scientific, political, and social challenges at the intersection of geography and the humanities. Critical reflections of imaginative and artistic productions. Examination of geography's concern with scale, place, and space with the humanities' focus on critical and speculative engagements with human culture.

01:450:413 *Climate Seminar(3)*
In-depth exploration of a topic related to climate science from a geographic perspective. The specific topic will be available as a subtitle at the time of registration.
Prerequisite: 01:450:101, 01:460:101, 01:375:101,11:670:202, or permission by instructor.

01:450:414 *Geographical Hydrology (3)*
Land surface water processes in a geographical perspective. Emphasis on how place and space influence stores and fluxes of water.
Prerequisite: 01:450:101 or equivalent.

01:450:417 *Coastal Geomorphology (3)*
Processes of erosion and deposition in coastal environments. Process-response models and problem-solving methods in coastal research.
Prerequisite: 01:450:101 or 01:460:101 or permission of instructor.

01:450:421 *Advanced Geographic Information Systems (3)*
Introduction to major research and application issues in geographic information systems (GIS). Themes include geodesy and georeferencing; uncertainty and error propagation; multicriteria/multiobjective decision-making; introduction to surface analysis and spatial pattern analysis; change/time series analysis; GIS and society.
Prerequisite: 01:450:321 or 11:372:362.

01:450:470 *History and Theory of Geography (3)*
Major historical themes, concepts, and theories of geography related to specific geographical changes in the real world; facilitates critical evaluation of the uses of geographic research.
Prerequisites: 01:450:101, 102, 103 or permission of instructor. Required for Geography majors.

01:450:485,486 *Internship in Geography (BA,BA)*
Application of geography skills in professional employment setting. Individually designed and evaluated experience under supervision of intern adviser.
Open only to majors and minors. Prerequisite: Permission of department.

01:450:487,488 *Cartographic Problems (3,3)*
Study for students interested in special cartographic problems.
Prerequisite: Permission of department.

01:450:491,492 *Geographic Problems (3,3)*
Study for students interested in special geographic problems.
Prerequisite: Permission of department.

01:450:495,496 *Honors Project: Geography (BA,BA)*
Honors research project under supervision of a faculty member. Permission of department needed to take the course
Prerequisite: Permission of department.

Geological Sciences 460 (SAS)

GEOLOGICAL SCIENCES 460

Department of Earth and Planetary Sciences, School of Arts and Sciences

Website: http://geology.rutgers.edu

Chair: James Wright

Undergraduate Program Director: Lauren Adamo

Distinguished Professors:

Marie-Pierre Aubry, B.S., Rouen (France); D.Sc., Pierre et Marie Curie (France)

Paul G. Falkowski, B.S., M.A., CUNY (City College); Ph.D., British Columbia

Kenneth G. Miller, A.B., Rutgers; Ph.D., Massachusetts Institute of Technology/Woods Hole Oceanographic Institution

Yair Rosenthal, B.S., M.S., Hebrew (Israel); Ph.D., Massachusetts Institute of Technology/Woods Hole Oceanographic Institution

Professors:

Ying Fan Reinfelder, B.S., Beijing; M.S., Utah; Ph.D., Utah State

Craig S. Feibel, A.B., Dartmouth ; M.S., Iowa State; Ph.D., Utah

Mark D. Feigenson, B.S., Maryland; M.S., George Washington; M.A., Ph.D., Princeton

Dennis V. Kent, B.S., CUNY (City College); Ph.D., Columbia

Robert E. Kopp, S.B., Chicago, M.S., Ph.D., California Institute of Technology

Gregory S. Mountain, B.A., Brown; Ph.D., Columbia

Roy W. Schlische, B.A., Rutgers; M.A., Ph.D., Columbia

Carl C. Swisher III, B.A., Montana; M.S., Nebraska; Ph.D., California (Berkeley)

James D. Wright, B.S., Louisiana Tech; M.S., South Carolina; Ph.D., Columbia

Nathan Yee, B.S., McGill (Canada); Ph.D., Notre Dame

Associate Professors:

Lauren Neitzke Adamo, B.S., M.S., Ph.D., Rutgers

Katherine R. Bermingham, BSc (Hons) Australian National(Australia); PhD Westfälische Wilhelms-Universität Münster (Germany)

Benjamin A. Black, A.B., Harvard; M.F.A., New York; Ph.D., Massachusetts Institute of Technology

Shaunna Morrison, Ph.D. Geosciences - University of Arizona

Robert M. Sherrell, B.A., Oberlin; Ph.D., Massachusetts Institute of Technology/Woods Hole Oceanographic Institution

Assistant Professors:

Starting in January 2025:
Yoshnori Miyazaki, B.Sc., The University of Tokyo (Tokyo, Japan); Ph.D., Yale (New Haven, CT) , Earth and Planetary Sciences

Lujendra Ojha: B.Sc. University of Arizona; PhD Georgia Tech

Crystal Pletka, B.S., Coastal Carolina University; M.S., Florida Atlantic University; Ph.D., Florida International University

Research Professors:

James V. Browning, B.A., Ohio Wesleyan; M.S., Southern California; Ph.D., Rutgers

Cathleen, Doherty, B.A., M.S., Montclair State; Ph.D., Columbia

Linda Godfrey, B.S., St. Andrews (Scotland); Ph.D., Cambridge

Richard Mortlock, B.A., Pennsylvania; M.S., Florida State; Ph.D., Rutgers

Brent Turrin, B.A., California (Berkeley); M.S., Stanford; Ph.D., California (Berkeley)

Faculty Emeriti:

Gail Ashley B.S., M.S., University of Massachusetts, Ph.D. University of British Columbia (Canada)

Michael Carr

Claude T. Herzberg, B.S., Alberta (Canada); Ph.D., Edinburgh (UK)

Roger Hewins B.Sc., University of Aberdeen, Ph.D., University of Toronto

Dennis Kent B.S., City College of New York, Ph.D., Columbia

Martha O. Withjack, B.A., Rutgers; M.A., Ph.D., Brown

Richard Olsson B.Sc., City College of New York, Ph.D., Columbia

Geological sciences explores Earth's past, present, and future, as well as other planets in our solar system and beyond. Through education and research, we examine Earth and planetary interiors, surface environments, and life through time; these are interdisciplinary fields that draw on fundamental knowledge in physics, chemistry,

biology, and mathematics. Our studies have scientific and societal relevance: global change to the solid Earth and its environment, oceans, climate, and life; natural hazards (earthquakes, volcanic eruptions, tsunamis, floods, and landslides); natural resource exploration and management (hydrocarbons, ore minerals, groundwater); and planetary geology and the search for extraterrestrial life. Several faculty have joint appointments in other departments: anthropology (in the School of Arts and Sciences), environmental sciences, and marine and coastal sciences (the latter two in the School of Environmental and Biological Sciences). The geological sciences major covers the core areas of the Earth and planetary sciences yet still allows opportunity for students to specialize through additional high-level courses in geological sciences, mathematics, and allied sciences. The major can be completed in four semesters once students have taken foundational courses in mathematics and the cognate sciences. Our majors enjoy employment opportunities in geological and environmental consulting, the energy industry, government agencies, and secondary education as well as excellent placement in top graduate programs.

Geological Sciences 460 (SAS)

Learning Goals

Learning Goals

Majors and Minors. Students will develop scientific critical-thinking, writing, and oral presentation skills and demonstrate mastery of the scientific method. Students will become proficient at collecting and interpreting data in both the field and laboratory. The required core courses will provide the knowledge of the Earth and planetary sciences needed to critically evaluate scientific issues discussed in the media.

Other Students. Students taking geological sciences classes for the general science requirement should develop an appreciation of critical thinking and the scientific method, including hypothesis testing. Students should appreciate the importance of earth sciences in understanding of the physical, social, and economic resources and history of our planet. One example: We would expect that any student successfully completing our courses should be able to critically evaluate scientific issues in earth systems discussed in the popular press.

Geological Sciences 460 (SAS)

Major Requirements

Major Requirements

The department offers several options for students pursuing a degree in earth and planetary sciences. Students should discuss with the undergraduate program director or any other faculty member in earth and planetary sciences which option is best for them.

The **geological sciences option** is for students who expect to make geology an important component of their career, e.g., in engineering/environmental consulting, oil and gas exploration, mineral exploration and mining, and federal and state government; it also provides rigorous preparation for graduate study.

The **environmental geology option** is for students who wish to work in the environmental sector, which at present is the largest employer of geoscientists in the United States; its focus is on characterizing processes and hazards in the modern shallow subsurface; it also prepares students for graduate study.

The **planetary science option** is for students who wish to pursue a research career, e.g., at universities, research institutions, government facilities such as NASA, and museums. It focuses on the physical and geochemical processes in our solar system spanning the early solar nebula to planetary formation and evolution. The option facilitates interdisciplinary knowledge in mathematics, physics, chemistry, and biology, and is therefore well suited to students transferring from other STEM disciplines as well as those preparing for graduate study.

The **general option** is for students who have an interest in the earth and planetary sciences and plan to pursue a career in science education, communication and journalism, medicine, environmental law and policy, business, etc.

Declaration of the major in earth and planetary sciences requires a grade of C or better in 01:460:101 Introductory Geology, or its equivalent, or special permission of the undergraduate program director. Course schedules for each semester should be approved by the undergraduate program director or other faculty adviser prior to registration.

460: Geological Sciences Option (B.S.) [62 credits total]

Foundation Courses

- 01:160:161 General Chemistry (4)
- 01:640 CALC1 (4)
- One of the following: 01:640: CALC2 (4) or 01:960:379 Basic Probability Theory (3) or 01:960:401 Basic Statistics for Research (3)
- One of the following: 01:750:203 General Physics (3) (recommended) or 01:750:193 Physics for the Sciences (4) or 01:750:201 Extended General Physics (5)

Core Courses

- 01:460:101 Introductory Geology (4) [alternatively 01:460:100 Planet Earth (3) and 01:460:103 Introductory Geology Lab (1)]
- 01:460:300 Introduction to Sedimentary Geology (4)
- 01:460:301 Mineralogy (4)
- 01:460:302 Petrology (4)
- 01:460:303 Paleontology (4)
- 01:460:304 Introduction to Geochemistry (4)
- 01:460:306 Introduction to Geophysics (4)
- 01:460:407 Structural Geology and Geologic Maps (4)
- 01:460:410 Field Geology (3) or equivalent (see field requirement below)
- 01:460:480 Major Events in Earth History (3)

Elective Courses

Three 3-credit courses in 01:460 at the 300 level or higher. Note: 01:119:115, 116 General Biology, 01:160:162 General Chemistry, General Physics 2, CALC 3, CALC 4, and 01:355:302 Scientific and Technical Writing (3) are acceptable electives. Other non-460 courses require permission of the undergraduate program director. Undergraduate students may take graduate courses if they have a GPA of 3.0 or higher and/or with the permission of the instructor. Students may choose from the following specializations or create their own group of electives.

- Paleobiology and Paleoceanography: 01:460:305 Evolution and Geologic Time (3); 01:460:394 Geologic Context (3); 01:460:451 Marine Geology (3); 01:460:454 Micropaleontology (3); 01:460:476 History of the Earth System (3); 16:460:526 Paleoceanography (3); 16:460:552 Stable Isotopes in the Environment (3); 16:460:625 Seminar in Sequence Stratigraphy (3)
- Tectonics, Geophysics, and Hydrology: 01:460:414 Hydrologic Processes (3); 01:460:428 Hydrogeology (3); 01:460:429 Tectonics and Regional Structural Geology (3); 01:460:441 Structure and Formation of Terrestrial Planets (3); 01:460:442 Dynamics of Planetary Interiors (3); 16:460:515 Advanced Tectonics (3); 16:460:528 Groundwater Modeling (3); 16:460:557 Seismic Acquisition and Processing (3)
- Geochemistry and Petrology: 01:460:396 Geochronology (3); 01:460:417 Environmental Geochemistry (3); 16:460:509 Meteoritics (3); 16:460:513 Volcanology (3); 16:460:551 Isotope Geochemistry (3); 16:460:617 Seminar in Geochronology (3); 16:460:631 Seminar in Petrology (3)

460E: Environmental Geology Option (B.S.) [63 credits total]

Foundation Courses

- 01:160:161 General Chemistry (4)
- 01:640 CALC1 (4)
- One of the following: 01:640 CALC2 (4) or 01:960:379 Basic Probability Theory (3) or 01:960:401 Basic Statistics for Research (3)
- One of the following: 01:750:203 General Physics (3) (recommended) or 01:750:193 Physics for the Sciences (4) or 01:750:201 Extended General Physics (5)

Core Courses

- 01:460:101 Introductory Geology (4) [alternatively 01:460:100 Planet Earth (3) and 01:460:103 Introductory Geology Lab (1)]
- 01:460:202 Environmental Geology (3)
- 01:460:300 Introduction to Sedimentary Geology (4)
- 01:460:301 Mineralogy (4)
- 01:460:302 Petrology (4)
- 01:460:306 Introduction to Geophysics (4)
- 01:460:407 Structural Geology and Geologic Maps (4)
- 01:460:410 Field Geology (3) or equivalent (see field requirement below)
- 01:460:413 Environmental Geochemistry (3)
- 01:460:428 Hydrogeology (3)

Elective Courses

Four 3-credit courses from the following list: 01:355:302 Scientific and Technical Writing (3); 01:450:321 Geographic Information Systems (3); 01:450:322 Remote Sensing (3); 01:460:304 Introduction to Geochemistry (4); 01:460:408 Geomorphology (3); 01:460:418 Geological Modeling (3); 11:375:202 Chemical Principals of Environmental Science (3); 11:375:203 Physical Principles of Environmental Science (3); 11:375:303 Numerical Methods in Environmental Science (3); 11:375:423 Environmental Fate and Transport (3).

460P: Planetary Science Option (B.S.) [63 credits total]

Foundation Courses

- 01:160:161,162 General Chemistry (4, 4)
- 01:640 CALC1, CALC2 (4, 4)
- One of the following: 01:640 CALC3 (4) or 01:960:401 Basic Statistics for Research (3)
- One of the following: 01:750:193 Physics for the Sciences (4) or 01:750:201 Extended General Physics (5) or 01:750:203 General Physics (3)
- One of the following: 01:750:194 Physics for the Sciences (4) or 01:750:201 Extended General Physics (5) or 01:750:204 General Physics (3)

Core Courses

- 01:460:101 Introductory Geology (4) [alternatively 01:460:100 Planet Earth (3) and 01:460:103 Introductory Geology Lab (1)]
- 01:460:116 Building Blocks of the Solar System (3)
- 01:460:222 Planet Mars (3) or 01:460:224 Geology of Moons and Planets (3)
- 01:460:301 Mineralogy (4)
- 01:460:302 Petrology (4)
- 01:460:304 Introduction to Geochemistry (4)
- 01:460:441 Structure and Formation of Terrestrial Planets (3) [or 01:460:442 Dynamics of Planetary Interiors (3)]
- 01:460:480 Major Events in Earth History (3)

Elective Courses

Three 3-credit courses from the following list: 01:355:302 Scientific and Technical Writing (3); 01:450:321 Geographic Information Systems (3); 01:450:322 Remote Sensing (3); 01:460:300 Introduction to Sedimentary Geology (4); 01:460:410 Structural Geology and Geologic Maps (4); 01:460:414 Hydrologic Processes (3); 01:460:418 Geological Modeling (3); 01:460:442 Dynamics of Planetary Interiors (3) [or 01:460:441 Structure and Formation of Terrestrial Planets (3)]; 16:460:630 Seminar in Planetary Science (3); 01:640:244 Differential Equations for Engineering and Physics (4) or 01:640:250 Introductory Linear Algebra (3) or 01:640:252 Elementary Differential Equations (3) or 01:640:292 Honors Calculus IV (4); 01:750:341 or 342 Principles of Astrophysics (3)

460L: General Option (B.A.) [40 credits total]

Foundation Courses

- 01:160:161 General Chemistry (4)
- 01:640 CALC1 (4)

Core Courses

- 01:460:101 Introductory Geology (4) [alternatively 01:460:100 Planet Earth (3) and 01:460:103 Introductory Geology Lab (1)]
- 01:460:300 Introduction to Sedimentary Geology (4) (assumes change in name and number)
- 01:460:301 Mineralogy (4)
- 01:460:302 Petrology (4)
- 01:460:303 Paleontology (4)
- 01:460:407 Structural Geology and Geologic Maps (4)
- 01:460:411 Geologic Field Methods (2)

Elective Courses:

Two additional 3-credit courses in 01:460, one of which must be at 300-level or higher; other acceptable courses are 01:119:115 General Biology, 01:750:203 General Physics, and those approved by undergraduate program director.

Field Requirement

All majors in the geological sciences option and the environmental geology option must take a minimum of 3 credits in field geology. Most students satisfy this requirement by taking an external field camp offered by many geoscience departments at other universities; ask the undergraduate program director for guidance. Many students do the field training during the late spring/summer between junior and senior years.

Geological Sciences 460 (SAS)

Minor Requirements

Minor Requirements

The minor in geological sciences requires completion of 01:460:101 Introductory Geology plus five additional geology courses of 3 credits or more, of which at least two must be at the 300 level or higher. Potential minors who take 01:460:100 Planet Earth may still complete a minor by requesting permission to take 01:460:103 Introductory Geology Lab.

Geological Sciences 460 (SAS)

Departmental Honors Program

Departmental Honors Program

Students may be admitted to candidacy for honors in geology if they make a written application to the undergraduate program director before May 1 of their junior year. To qualify, a student must have a minimum overall cumulative grade-point average of 3.0 and a minimum 3.4 grade-point average in major courses. In addition, the student must have completed 75 percent of all foundation and core courses.

Honors students must successfully complete at least two additional 3-credit courses in 01:460 (at the 400 level) and/or in the allied sciences, as well as 01:460:495,496 Honors in Geology, and 3 credits of Independent Study in 01:460 in their final semester.

In consultation with a faculty adviser, students choose an honors research project, which they document in a paper or a formal presentation to the department.

Geological Sciences 460 (SAS)

Courses

Courses

01:460:100 ***Planet Earth (3)***
Introductory geology for the nonscience major, designed to give a broad, basic understanding of the planet on which we reside, its age and origin, composition and evolution, interrelationships of Earth's major physical systems, scientific revolutions in Earth science, and the role the physical Earth plays in global politics and economics.
Credit not given for both this course and 01:460:101.

01:460:101 ***Introductory Geology (4)***
Geological concepts, principles, processes, chemistry, and physics of the Earth and the interplay of Earth systems. Course explores the Earth as a whole, its origin, structure, composition, history, and the nature of the processes that resulted in its formation and its present state.
Course includes a 3-hour laboratory session. Previously listed as 01:460:103. Credit not given for both this course and 01:460:100.

01:460:103 ***Introductory Geology Laboratory (1)***
For students requiring fulfillment of the geological sciences lab requirement who have previously taken 01:460:100 Planet Earth, or an equivalent of 01:460:101 Introductory Geology without a lab. Lab times are those scheduled for 01:460:101 labs. Explores mineral and rock identification, geological sample analysis, structural and seismological interpretation, and field observation.
Prerequisite: Permission of instructor only.

01:460:110 ***Sea Change (3)***
History of global and regional sea-level changes through geological time and their impact on the New Jersey coast. Relationships among carbon dioxide, temperature, and sea-level change. Social, ethical, economic, and political concerns are explored.

01:460:111 *Solving the Climate Crisis (3)*
The basic physics of Earth¿s climate. Past and future climate change. The impacts of climate change on humans. Strategies for limiting the magnitude and consequences of climate change. Climate action at a national, organizational, and personal scale.

01:460:116 *Building Blocks of the Solar System (3)*
What is the Solar System made of? How did it and the planets form? Why does the Solar System contain life? In the context of learning about the role of chemistry in the evolution of our world, these and other fundamental questions in planetary science will be discussed

01:460:120 *Introduction to Oceanography (3)*
Ongoing discoveries and developing knowledge including plate tectonics, the properties and motion of the ocean (waves, tides, and currents), ocean resources (food, energy, minerals), and related marine environmental issues that are changing our understanding of the way our planet works and that impact on our lives.
Credit not given for this course and 01:460:209 or 11:628:120.

01:460:201 *Earthquakes and Volcanoes (3)*
Plate tectonics and the origin of earthquakes and volcanoes: causes, mechanisms, consequences, and effect on humans.

01:460:202 *Environmental Geology (3)*
Analyses of issues and case studies related to cleaning up the environment, finding and using resources, predicting and mitigating natural disasters, and understanding global change.

01:460:203 *Building and Maintaining a Habitable Planet (3)*
Understanding human-caused environmental changes in the context of Earth's 4.6-billion-year history. Geological and human timescales; planetary habitability; planetary, biological, and civilizational flows of energy and entropy; feedback between life, the carbon cycle, and climate; the evolution of complex life; human alterations of the Earth system; intelligent life in the universe.

01:460:204 *The Water Planet (3)*
Survey of the science, environmental impact, and resource allocation of water on Earth. Characteristics of water: hydrologic cycle; runoff and erosion; river systems; past and present climates; water quality; political and economic aspects of water.
Credit not given for both this course and 11:628:204.

01:460:206 *Dinosaurs (3)*
Survey of dinosaurian evolution and diversity. Discovery and collection; reconstruction of anatomy, behavior, physiology, and habitats; origin, evolutionary radiation, and extinction.

01:460:207 *Oil and Gold: The Good, the Bad, and the Ugly (3)*
Introduction to the geologic setting and origin of the Earth's natural resources. Topics include the exploitation of energy resources (oil and gas) and metallic and nonmetallic deposits and its impact on society.

01:460:212 *Earth and Life through Time (3)*
Relationship between the development of continents and oceans, changes in sedimentary environments, and the evolution of life through time.
Designed for nonmajors. Credit not given for both this course and 01:460:102.

01:460:213 ***A Walk through Time: Evolution of Mammals (3)***
Introduction to current perspectives on the origins and fossil history of mammals. Critical evaluation of the how and why theories of evolution and adaption through a detailed presentation of the who, what, when, and why.

01:460:222 ***Mars: The Next Frontier (3)***
Mars observations test models of evolution of planet and the potential for life beyond the Earth. The prospect of human habitation on our neighbor Mars. Older ideas and modern models of the planets in the context of over 40 missions to Mars and evidence from known Martian meteorites.

01:460:224 ***Geology of the Moons and Planets (3)***
Formation and evolution of the solar system and the solid objects in it as constrained by both astronomical evidence of stellar/planetary evolution and by direct observations of meteorites and from missions to planets and other bodies. The concept of the "habitable zone" exoplanets around other stars compared to our local planets.

01:460:225 ***Astrobiology (3)***
Investigation of the origin, evolution, and distribution of life in our solar system and beyond. Addresses some of the biggest questions in science today such as where life began, whether there is life on other planets, and how scientists search for extraterrestrial life.

01:460:300 ***Introduction to Sedimentary Geology (4)***
Interpretation of sedimentary rocks; their relation to depositional environment and processes. Analysis of sedimentary sequences in time and space. Principles of correlation.
Lec. 3 hrs., lab. 3 hrs. Field trips. Prerequisites: 01:460:101 or 01:460:100 and 01:460:103.

01:460:301 ***Mineralogy (4)***
Chemistry, crystal structure, optical properties of minerals, and minerals as records of processes that shaped the Earth and extraterrestrial bodies. Laboratory: identification of minerals in hand specimen, thin section, electron microprobe, and scanning electron microscope.
Lec. 3 hrs., lab. 3 hrs. Field trips. Prerequisites: 01:160:161, 01:460:101 or 01:460:100 and 01:460:103. Credit not given for both this course and 01:460:210.

01:460:302 ***Petrology (4)***
Origin of Earth's crust and mantle through the study of igneous, metamorphic, and sedimentary rocks. Laboratory: hand specimens and thin sections of igneous and metamorphic rocks.
Lec. 3 hrs., lab. 3 hrs. Field trips. Prerequisite: 01:460:301. Credit not given for both this course and 01:460:210.

01:460:303 ***Paleontology (4)***
Principles of paleobiology and phylogenetic systematics. Phylogenetic and mathematical analyses of the Earth's fossil record. Laboratory study of invertebrate fossils. Field trips to examine fossil-bearing rock formations.
Lec. 3 hrs., lab. 3 hrs. Prerequisites: 01:460:101 or 01:460:100 and 01:460:103.

01:460:304 ***Introduction to Geochemistry (4)***
Low- and high-temperature geochemistry, element distribution, geochemical structure of the Earth. Laboratory exercises include sample materials, preparation techniques, mass spectrometry, data collection, reduction, and interpretation.
Lec. 3 hrs., lab. 3 hrs. Prerequisites: 01:460:101 or 01:460:100 and 01:460:103, 01:160:161.

01:460:305 *Evolution and Geologic Time (3)*
Major events in the evolution of life on Earth; evolutionary pattern and process through geologic time; relationship of macro- and microevolutionary theory.
Prerequisites: 01:460:101 or 01:460:100 and 01:460:103.

01:460:306 *Introduction to Geophysics (3)*
Principles of subsurface exploration using seismic waves, gravity and magnetic fields, electric currents, and electromagnetic waves. Applications to problems on scales from global to local. Practical training in executing local geophysical surveys (seismic, electric, magnetic).
Prerequisites: 01:460:101 or 01:460:100 and 01:460:103, 01:750:203.

01:460:355,356 *Geology Colloquium (1,1)*
Current research in geological sciences.
Lec. and discussions 1 hr. For geological sciences majors only.

01:460:394 *Geological Context (3)*
Field and laboratory studies of geological context in archaeological sites. Data collection and sampling, sediment analysis, and reporting. Interpretation of depositional and postdepositional features.
Recommended prerequisite: 01:460:300. Credit not given for both this course and 01:070:394.

01:460:396 *Geochronology in Geosciences and Anthropology (3)*
Isotopic, astronomical, and paleomagnetic dating techniques in geology and anthropology.
Prerequisites: 01:460:101 or 01:460:100 and 01:460:103.

01:460:407 *Structural Geology and Geologic Maps (4)*
Geometry and origin of brittle and ductile structures; stress, strain, rheology, and deformation mechanisms; geologic maps and cross sections; introduction to tectonics and regional structural geology.
Lec. 3 hrs., lab. 3 hrs. Field trips. Prerequisite: 01:460:101 or 01:460:103. Recommended pre- or corequisite: 01:460:300, 01:640:CALC1.

01:460:408 *Geomorphology (3)*
Application of Earth system science to understanding the evolution of landforms and landscapes on the Earth's surface.
Lec. 3 hrs. Prerequisite: 01:460:101 or equivalent.

01:460:410 *Field Geology (3)*
Methodology of field investigations: pace and compass; aerial photo and topographic mapping; construction of geological maps and cross sections; interpretations of seismic profiles; preparation of written reports.
Lec. 1 hr., lab. 6 hrs. Prerequisite: 01:460:407 or permission of instructor. Satisfies field requirement.

01:460:411 *Geological Field Methods (2)*
Introduction to geological mapping and related field investigations; surveying methods; construction of geological maps, stratigraphic sections, and cross sections; interpretation of seismic reflection profiles; computer applications; preparation of written reports.
Pre- or corequisites: 01:460:407 and 300. Course does not satisfy the field requirement.

01:460:412 *Geophysical Field Methods (By Arrangement)*
Practical training in designing and executing geophysical surveys for shallow subsurface targets, analysis of geophysical observations, and interpretation of geophysical survey results. Methods employed are seismic, ground penetrating radar and magnetic surveying. Class activities include lectures, field work, independent (guided) data analysis, and report preparation and presentation.
Prerequisite: 01:460:306 or permission of instructor.

01:460:414 *Hydrologic Processes (3)*
Introduction to physical principles of water cycling through the Earth's atmosphere, lithosphere, and biosphere, with emphasis on water storage, flux, and flow pathways among the various reservoirs near the land surface.
Prerequisites: 01:640:CALC1 and 01:750:203 General Physics (3) or equivalent, or permission of the instructor.

01:460:417 *Environmental Geochemistry (3)*
Distribution of elements in the sedimentary environment; behavior of trace metals in sediments and waters.
Pre- or corequisites: 01:160:162, 01:460:101 or 01:460:100 and 01:460:103.

01:460:418 *Geological Modeling (3)*
Computer techniques for collection, processing, interpretation, and presentation of geological and geophysical data. Computer-based modeling exercises in geologic and geophysical exploration and environment assessment.
Pre- or corequisite: 01:460:300, 301, or 303.

01:460:428 *Hydrogeology (3)*
Introduction to physical and chemical principles of fluid flow and mass transport through geologic media, with emphasis on quantitative characterization of groundwater systems.
Prerequisites: 01:640:CALC1, 01:750:203, and 01:460:101 or 01:460:100 and 01:460:103; or permission of instructor.

01:460:429 *Tectonics and Regional Structural Geology (3)*
Theories of tectonics, regional tectonostratigraphic analysis, and development of the Earth's Phanerozoic orogens.
Prerequisite: 01:460:407.

01:460:441 *Structure and Formation of the Terrestrial Planets (3)*
Examination of planetary formation processes and hypotheses of planetary evolution in the solar system drawn from seismological and petrological observations of Earth's well-organized lithological and chemical parts.
Prerequisites: 01:460:302, 01:460:304, 01:460:306, or permission of instructor. Credit not given for both this course and 16:460:506.

01:460:442 *Dynamics of Planetary Interiors (3)*
Applications of continuum mechanics, thermodynamics, and fluid dynamics to the processes within the Earth and other rocky planets of the solar system. Combines fundamental theory with hands-on computer-based data manipulation to connect theoretical expectations of simple models with current knowledge about the planets.
Prerequisite: 01:460:306.

01:460:451 *Marine Geology (3)*
Structure and oceanographic setting, marine sediments, evolution of ocean basins and margins.
Prerequisite: 01:460:300.

01:460:454 *Micropaleontology (3)*
Studies of foraminifera, calcareous nannoplankton, and siliceous microplankton emphasizing stratigraphic, paleoecologic, and paleoceanographic utility.

01:460:476 *History of the Earth System (3)*
Earth as an evolving physical/biological system, including physical and biogeochemical processes whose interactions have shaped Earth's environment over geologic time.
Pre- or corequisites: Any three of 01:119:102 or 116, 01:160:162, 01:460:101, 01:750:204, or permission of instructor.

01:460:480 *Major Events in Earth History (3)*
History of the solid Earth, oceans, atmosphere, and life over the past >4.5 billion years as narrated by major events in the geological record.
Prerequisites: All courses for geological sciences majors in their senior year, or by special permission.

01:460:493,494 *Independent Studies in Geology (1-3,1-3)*
Topic of study chosen in consultation with a faculty adviser.
Prerequisites: Minimum 3.0 cumulative and geology grade-point averages. Adviser's approval required for registration. Credits by arrangement.

01:460:495-496 *Honors in Geology (3,3)*
Research project chosen in consultation with a faculty adviser.
Both semesters must be completed to receive credit. See section on departmental honors program for registration requirements.

German 470 (SAS)

GERMAN 470

Department of Germanic, Russian, and East European Languages and Literatures, School of Arts and Sciences

Website: http://german.rutgers.edu

Chair: Martha Helfer

Undergraduate Director-German: Nicholas Rennie

Director of Language and Cultural Studies: Alexander Pichugin

Distinguished Professor:

Michael G. Levine, B.A., Cornell; M.A., Ph.D., Johns Hopkins

Professor:

Martha B. Helfer, B.A., Washington (St. Louis); M.A., Wisconsin (Madison); Ph.D., Stanford

Associate Professors:

Nicola Behrmann, M.A., Free University Berlin; Ph.D., New York

Nicholas Rennie, B.A., Princeton; Ph.D., Yale

Assistant Professors:

Regina Karl, B.A., M.A., Ludwig-Maximilians (Munich); Ph.D., Yale

Dominik Zechner, M.A., Vienna; M.Phil, Ph.D., New York

Assistant Teaching Professor:

Alexander E. Pichugin, M.Ed., Rutgers; M.A., Ph.D., Pennsylvania

Lecturer:

Silke Wehner-Franco, Ph.D. Münster (Germany)

Faculty Emeriti:

Hildburg Herbst

Maria M. Wagner

Lothar Zeidler

German 470 (SAS)

Learning Goals

Learning Goals

Students completing courses in the German program gain proficiency in written and spoken German, general cultural fluency relating to German-speaking Europe and its history, and skill in writing and in the critical analysis of written texts and other cultural artifacts related to the study of German.

Students completing a major or minor in German demonstrate advanced proficiency in the German language, cultural fluency, and analytical skills in a specific area of concentration such as German language and literature, philosophy, history, visual arts, music, or political science.

German 470 (SAS)

Major Opportunities

Major Opportunities

The German major provides students with linguistic proficiency and a broad knowledge of the literatures and cultures of German-speaking countries. It enables students to work in a number of different fields such as history, literature, film, political science, European studies, music, art history, philosophy, religion, and Jewish studies, exploring the rich and often vexed history of things German from diverse perspectives.

Note: At least 12 of the credits comprising the major must be completed in courses taught by faculty in the Rutgers University-New Brunswick School of Arts and Sciences. Students do not normally receive credit toward the major for taking German-language courses below a level at which they have already received a grade of C or better. Courses with a grade of D are not counted toward the major.

German 470 (SAS)

Minor Opportunities

Minor Opportunities

The German minor provides students with linguistic proficiency and an introduction to the literatures and cultures of German-speaking countries. It comprises 18 credits, as approved by the department. At least 9 of these credits must be completed in courses taught by faculty in the Rutgers University-New Brunswick School of Arts and Sciences. Students do not normally receive credit toward the minor for taking German-language courses below a level at which they have already received a grade of C or better. Courses with a grade of D are not counted toward the minor.

German 470 (SAS)

Major Requirements

Major Requirements

The major can be completed by combining study of the literatures and cultures of German-speaking countries with other fields such as history, political science, European studies, music, art history, philosophy, religion, and Jewish studies.

The degree comprises 36 credits arranged in the following manner: a set of core courses in German language (at any level), culture, and history; and a thematically linked set of at least 15 credits to be selected from the German studies course list with the written approval of the undergraduate director. For a list of these courses see the German studies course list on the department's undergraduate webpage within the descriptions of the German major and minor.

This list offers only a representative sample. Courses not included in the German studies course list may be considered toward the major at the discretion of the undergraduate director and the participating department.

Majors must complete the equivalent of 01:470:232 Advanced German II; and at least 6 credits, taught in German, in course numbers 01:470:299 and higher. Majors are also encouraged to include 6 credits in history courses with a strong focus on German culture.

MINIMUM REQUIREMENT: 36 credits in German language and culture

- All German majors must complete the equivalent of 01:470:232
- 6 credits, taught in German, in course numbers 01:470:299 and higher

At least 15 additional credits of coursework in which students are engaged in a thematically coherent examination of a period, topic, or set of questions from an interdisciplinary perspective. To ensure that such an examination is properly focused and productively interdisciplinary, these courses should be chosen in consultation with the undergraduate director.

German 470 (SAS)

Minor Requirements

Minor Requirements

The minor can be completed by combining study of the literatures and cultures of German-speaking countries with other fields such as history, political science, European studies, music, art history, philosophy, religion, and Jewish studies.

The degree comprises 18 credits. All minors must complete the equivalent of 01:470:232 Advanced German II. At least 9 credits must be received in a thematically linked set of German studies courses at the 300 level or above, either in German or English.

German 470 (SAS)

Departmental Honors Program

Departmental Honors Program

To be a candidate for graduation with honors, a German major must have and maintain a grade-point average of 3.4 or better in German and a cumulative grade-point average of 3.0 or better. Conferral of honors is never automatic. Whether a candidate graduates with departmental honors depends on his or her total performance in German as measured by the recommendations of the faculty. Interested students are encouraged to apply at the department toward the end of their junior year or during the first week of classes in their senior year.

Honors in German Studies Major

Students may receive honors either by taking 6 credits (3 per semester) of graduate courses with the approval of the undergraduate director or by completing a senior honors thesis. This may be done through the School of Arts and Sciences honors programs (this thesis should be submitted to a German studies faculty member to be read and approved for credit); or by enrolling in 01:470:495,496 (in any of the following credit sequences: 3-3, 6-0, 0-6). Under the supervision of a faculty adviser, honors students will in either case pursue an independent research project that requires the use of German-language source material pertinent to the area of concentration, and may in the process earn up to 6 credits toward the German studies major.

German 470 (SAS)

Summer Study in Germany

Summer Study in Germany

Each year, the Department of Germanic, Russian, and East European Languages and Literatures provides advising and significant financial support to students traveling to Germany to study within the summer program of the Free University Berlin. Depending on their course selections and scheduling preferences, students earn between 4 and 7 Rutgers credits in regular or intensive German language classes (offered at all levels) and/or courses in German and European culture. With prior approval of the undergraduate director of German, these credits may be applied toward the German major or minor. The program provides excursions and other extracurricular activities to acquaint participants more fully with the cultural life of Germany and its largest city. Students have the opportunity to stay in dormitories or apartments, or with German host families.

There is no German language prerequisite for this program; beginning German language students are welcome. It is also possible to enroll in two English-language courses in German or European studies.

For the most complete and recently updated information about the program visit the department website.

German 470 (SAS)

Semester and Year Abroad in Germany Study Options

Semester and Year Abroad in Germany Study Options

Each year, the Department of Germanic, Russian, and East European Languages and Literatures provides advising and significant financial support to select students traveling to Germany to study within the academic-semester programs of the Free University Berlin. Students may register for study abroad either for the academic year or for a single semester. All majors are strongly encouraged to spend at least one semester abroad at the Free University Berlin or another German university. Up to 18 credits (9 credits per semester maximum) may be credited toward the major, and 9 credits maximum toward the minor, from courses taken during study abroad. Such credits are assigned at the discretion of the undergraduate director of German on the basis of materials (transcripts, "Scheine," syllabi, tests, quizzes, and graded papers) provided by the student after return to the United States. In the case of students enrolling through Rutgers Global with the Free University Berlin¿s FUBEST program, credits are typically assigned in advance, at the discretion of the undergraduate director of German. German majors and minors studying in Germany are advised to remain in close contact with the undergraduate director of German during their studies in Germany to confirm their courses and progress toward the degree. The German studies senior honors thesis option must be taken at Rutgers University-New Brunswick.

German 470 (SAS)

External Fellowships for Study Abroad

External Fellowships for Study Abroad

All students who apply for fall, spring, or academic-year study in Germany via the Rutgers Study Abroad office and do so by the spring deadline for fall study in Germany are automatically considered for scholarships that the Max Kade Foundation makes available through the German program at Rutgers. In addition, external scholarships, such as those from Fulbright, DAAD (German Academic Exchange), and Rotary, can be the best way for many graduating seniors to spend a year at a university in German-speaking Europe. Our students who have received these and similar scholarships have found their experience abroad invaluable and have benefited by being able to add these awards to their résumés.

The deadlines for many scholarships come early--some of them before classes begin in September, others in the first weeks of classes: see the Rutgers undergraduate scholarships page for further information about programs and their deadlines. See also the "funding" link at http://deltaphialpha.org for information about scholarships made available by the Delta Phi Alpha German Honors Society, as well as a downloadable application form. More scholarship information can be found through the Phi Sigma Iota (foreign language honors society) website at htttps://phisigmaiota.org/scholarships.

Note also that some of the schools at Rutgers University provide scholarships of their own, and that some of these monies, in particular for study abroad, often go unspent because students fail to apply. Students should contact their school deans' offices for more information. School of Arts and Sciences students can find information at https://sasundergrad.rutgers.edu/major/additional-academic-programs/scholarships.

Keep in mind that most applications for external scholarships require transcripts, a carefully written personal statement, recommendation letters, and additional materials. Putting a strong application together is not necessarily difficult, but it takes some time and thought. Students should contact faculty early on for advice and recommendation letters.

German 470 (SAS)

Certificate of Proficiency in German

Certificate of Proficiency in German

The department awards a certificate of proficiency in German based on demonstrated ability to comprehend, speak, read, and write German as attested by a grade of B or better in 6 credits of work taken in courses conducted in German at or above the 300 level.

Note: The German certificate is awarded only with, or subsequent to, the awarding of the baccalaureate degree in an approved major.

German 470 (SAS)

Goethe Institute's Zertifikat Deutsch als Fremdsprache

Goethe Institute's Zertifikat Deutsch als Fremdsprache

The Goethe Institute (the international cultural agency of the Federal Republic of Germany) administers examinations for the internationally recognized Zertifikat Deutsch als Fremdsprache each year. For more information, go to their website or contact them at:

Goethe Institut New York
30 Irving Place
New York, NY 10003, USA
Phone: 212-439-8700
Fax: 212-439-8705

German 470 (SAS)

Courses in English

Courses in English

01:470:225 ***Fairy Tales Then and Now (3)***
Analysis of structure, meaning, and function of fairy tales and their enduring influence on literature and popular culture.
Credit not given for both this course and 01:195:246.

01:470:227 ***Tales of Horror (3)***
Examination of historical and political context, and psychoanalytical underpinnings, of horror tales in literature and film of the Western tradition from Brothers Grimm to Alfred Hitchcock. Focus on some of the most spellbinding creatures from this tradition: Frankenstein and Dracula, vampires and zombies, Doppelgängers, ghosts, artificial humans, and other figures that continue to haunt the cultural imagination.
Credit not given for both this course and 01:195:227.

01:470:244,246 ***Topics in German Culture - in English (1.5, 1.5)***
Examination of topics in German culture. May be repeated for credit, depending on topic.

01:470:247 ***Psy Fi: Literature and Psychoanalysis (3)***
Key psychoanalytic concepts explored through readings of literature, film, case studies, and literary theory.
Credit not given for both this course and 01:195:247, 01:195:312, or 01:470:356.

01:470:253 ***Tales of Horror (1.5)***
Tales of horror in literature and film from Brothers Grimm to Alfred Hitchcock. Consideration of historical, political, and psychoanalytical dimensions.

01:470:254 ***Nietzsche and Popular Culture (1.5)***
Exploration of how to define popular culture examined through analysis of Nietzsche's "Overman" and its gradual translation into the American "Superman" hero. Consideration of works from Nietzsche to Kafka, Hermann Hesse, Bertolt Brecht, Bob Dylan, Stanley Kubrick, and the Wachowski Brothers (*The Matrix*).
Credit not given for both this course and 01:470:258 or 01:195:258.

01:470:255 ***The Faust Legend through the Ages (3)***
Relevance of the Faust theme to Western civilization from biblical days to the present, with emphasis on Goethe's *Faust*.

01:470:258 ***From Nietzsche to Superman (3)***
Examination of transformation of Nietzsche's Übermensch (overman) into the American Superman heroes of our contemporary culture. Analysis of impact of this motif on gender studies, animal studies, and contemporary media technologies: Hitler's racist Aryan superman and its dismantling in modern art; female versions of Superman such as Wonder Woman or the "material girl" in pop culture; attention also to the figures of the "outlaw," the "idiot," and the cyborg.
Credit not given for both this course and 01:195:258 or 01:470:254.

01:470:261,262 ***Major German Writers (3,3)***
Selected masterpieces of German literature from the Middle Ages to the present.

01:470:275 ***Introduction to German Studies (3)***
Introduction to major cultural movements and pivotal historical moments in the German tradition examined through literature, painting, drama, philosophy, music, and film.

01:470:276 ***Realism and Revolution (3)***
Introduction to 19th-century German literature and its response to and critical reflection of the French Revolution.
Credit not given for both this course and 01:195:276.

01:470:277 ***Radical Modernism and Anti-Art (3)***
Introduction to the major movements and protagonists of early 20th century European avant-garde--Expressionism, Futurism, Dada, Surrealism--and the impact of these movements on Pop Art and Punk Rock of the 1960s and 1970s. Includes examples from visual arts (Kirchner, Kandinsky, Duchamp, Ernst), literature (Wedekind, Ball, Marinetti, Apollinaire), and cinema (Murnau, Richter, Buñuel, Warhol).
Credit not given for both this course and 01:082:276, 01:195:277, or 01:470:358.

01:470:280 ***The Culture of Yiddish: An Introduction (3)***
An overview of Yiddish, the traditional vernacular language of Ashkenazic Jews, and its culture, from its medieval origins to the present.
Credit not given for both this course and 01:563:245.

01:470:285 ***Enchanted Worlds (3)***
Exploration of how fantasy, the fantastic, and the supernatural function as a site of cultural and aesthetic critique in German literature and thought from the Enlightenment to the early twentieth century. Readings include immensely creative and influential masterpieces of world literature. Emphasis placed on developing critical reading and writing skills.
Taught in English.

01:470:303 ***Topics in Critical Issues in German Studies (3)***
Introduction to literary and artistic traditions of German-speaking Europe as they both relate to the social, technological, religious, political and linguistic histories of these regions, and reflect changing values and understandings of what it means to be human. Topics may vary from semester to semester.
Taught in English.

01:470:304 ***German and Comparative Literature (3)***
Examination of the literary and artistic traditions of German-speaking Europe as they relate to the social, technological, religious, political and linguistic histories of both these regions, and those of other cultures with which these traditions have, historically, been in dialogue.
Credit not given for this course and 01:195:314.

01:470:309 ***Justice and Violence (3)***
Justice, violence, and the law are entangled in complex ways. While we may think that following the law will always ensure a just outcome, justice inevitably exceeds the boundaries of legal stipulations. In fact, it is quite uncertain whether and how it is possible to make a just decision, to act or speak justly. While the law is never fully able to represent justice, it is also fundamentally reliant on violence. But how is legal violence different from the unrestrained violence of lawlessness?

Taught in English. Credit not given for both this course and 01:195:373 or 01:904:309.

01:470:327 ***Writing Travel: Movement, Migration, Mobility (3)***
Explores the link between narration and mobility; provides overview of the history of travel and the changes in writing travel from the 18th century until today; engages various literary forms and other media (film, art, and music) as well as cartographic tools offered by digital humanities.
Prerequisite: 01:470:232, or simultaneous enrollment in 01:470:231 or 232.

01:470:349 ***Contemporary German and European Cinema (3)***
New German cinema as a contemporary mode of artistic expression. Viewing and analysis of films by such outstanding directors as Fassbinder, Herzog, Schloendorff, and Wenders. Emphasis on the "literary" aspects of the German cinema.
One section taught in German. Credit not given for this course and 01:175:349 or 01:360:349.

01:470:353 ***The Nazi Period in Film (3)***
Exploration of important role of cinema during Nazi era. Study of historical situation in Germany between 1933 and 1945, and of representative films produced in Germany under the Nazi regime. Focus on the staging of power, representations of race, and the promotion of escapism in these films, as well as on retrospective representation of the period in contemporary cinema.

01:470:354 ***Kafka and World Literature (3)***
Introduction to Kafka's work and its impact on world literature. Topics include: literary modernism and European modernity; Jewish languages, culture, identity, and music in the early 20th century and beyond; minor and postcolonial literature; rethinking the relationship among humans, animals, hybrids, and monsters; and new directions in art, literature, film, and music.
Credit not given for both this course and 01:195:382 or 01:563:355.

01:470:355 *German Thought in the 20th Century (3)*
Exploration of the vexing history of German philosophy and thought in the 20th century with a focus on History, Language, and Technology. Taught in English.

Credit not given for this course and 01:730:316.

01:470:360 *Classics of German Cinema: From Haunted Screen to Hyperreality (3)*
Introduction to canonical films of the Weimar, Nazi, postwar, and postwall period. Focusing on class, gender, nation, and conflict through close analysis, the course seeks to sensitize students to the cultural context of these films and the changing sociopolitical and historical climates in which they arose. Special attention to the issue of film style, and to question of what constitutes the film canon in particular in the case of recent works.
Credit not given for both this course and 01:175:360.

01:470:364 *Big Bang: The Literature of Chaos and Order (3)*
Representations of dramatic upheavals in the physical universe as analogies for crisis and revolution in history, politics, psychology, science, and the arts. In literature and philosophy from the Renaissance to the present.
Credit not given for both this course and 01:195:364.

01:470:365,366 *Literature and Social Change from Nietzsche to Brecht (3,3)*
Interaction between German literature and society from the unification (1871) and industrialization of Germany to the end of World War II.
Credit not given for both this course and 01:175:365 or 01:013:365.

01:470:367 *Self and Society in the Postwar German Novel and Short Story (3)*
Major prose writers of Austria, Germany, and Switzerland since the end of World War II.

01:470:368 *Self and Society in the Postwar German Drama (3)*
Major playwrights of Austria, Germany, and Switzerland since the end of World War II.

01:470:369 *Remembering the Holocaust (3)*
Holocaust remembrance in contemporary social and cultural practices in the United States and globally considered as a paradigm for deriving lessons from the past in order to respond to traumatic losses, address present social injustices, and prevent future acts of intolerance.
Credit not given for both this course and 01:510:370 or 01:563:360.

01:470:371 *Marx, Nietzsche, Freud (3)*
Exploration of the work of three German writers who revolutionized modern philosophy, theology, psychology, aesthetics, social and political science, gender studies, historiography, literature, and the arts.
Credit not given for both this course and 01:195:374 or 01:730:344.

01:470:373 *Bertolt Brecht, Dramatist and Marxist (3)*
Study of Brecht's epic (Marxist) theater and its impact on contemporary dramatic theory and theatrical practice; an introduction to Brecht's poetry of engagement.

01:470:375 *New Subjectivity in Literature and Film (3)*
Literature and film in the context of political, social, and cultural developments since the late 1960s. Topics include the politics of the personal, reconciliation with the Nazi past, the "death of literature," and the rise of German feminism.

01:470:376 *German Culture through the Arts (3)*
Introduction to the visual arts, music, and dance created in German-speaking countries in the 19th and 20th centuries. Taught at the Zimmerli Art Museum by a team of curators, art historians, guest musicians, and dance scholars, and with visits to museums and performances in Manhattan.
Open to all students; of special interest to those considering enrolling in the German department's Berlin Summer Program.

01:470:380 *German-Jewish Literature and Culture (3)*
Survey of German-Jewish culture, 18th century to present. Literature in political-historical context, with some attention to music, philosophy, and film.
Special permission required for credit toward major. Credit not given for both this course and 01:563:380.

01:470:381 *Cultural Foundations of Germany (3)*
Significant aspects of German civilization from the age of Charlemagne to the unification of Germany in 1870. Focus on the German contribution to music, the arts, the sciences, philosophy, and literature.

01:470:383 *Germanic Mythology (3)*
Myths and religious practices of the migration period and the age of the Vikings. Sources: the Eddas, Christian and pre-Christian documents and texts, archaeological finds, place names, modern folkloristic beliefs.

01:470:384 *Gender and Politics in Yiddish Literature and Culture (3)*
Traces the cultural dynamics of Ashkenazic Jews in 16th- to 19th-century Europe through Yiddish religious writing, folktales, fiction, memoirs, and poetry. All readings in translation.
Prerequisites: 01:563:202, 260, or permission of instructor. Credit not given for both this course and 01:563:384 or 01:988:391.

01:470:385 *The Changing Image of Women in German Literature (3)*
Selected works of German literature that convey the experience of women cast into socially prescribed roles.

01:470:388,390,392 *Topics in German Literature and Civilization (3,3,3)*

Courses in German

Courses in German

Prerequisites

For courses numbered in the 200 series: any two courses between 01:470:131 and 136, or the permission of the department. For courses numbered in the 300 series: any two of 01:470:231, 232, 241, 242, 293, 294, or the permission of the department.

Introductory Courses

Beginners or students with fewer than two years of German in secondary school normally take courses 01:470:101-102, and then 131-132. Students who have had two or more years of German in secondary school and who wish to continue this language are assigned according to their achievement on a placement test. Courses 01:470:101-102 and 105-106 are conducted partly in German. All other courses, with the exception of literature, culture, and film courses in English translation, are conducted entirely in German.

01:470:101-102 *Elementary German (4,4)*
Basic skills of listening, speaking, reading, and writing; study of grammar and vocabulary building; supplementary work in the language laboratory.
Prerequisite for 01:470:102: 01:470:101 or 01:470:107 or 01:470:109. Not open for credit to students who have had two or more years of secondary school German.

01:470:103 *German for Travel (1)*
Introduction to language and culture of German-speaking countries focusing on language competencies particularly relevant to travel. Students learn to speak in German at a basic level about themselves as travelers, learn information on the German-speaking countries and their cultures, as well as different means of transportation and accommodations one can use when traveling to and in Europe.
Not open to students who have completed 01:470:102, 01:470:121, or equivalent.

01:470:104 *German Conversation (1)*
Introduction to the language and culture of German-speaking countries focusing on the language competencies particularly relevant in everyday situations. Students learn to speak in German at a basic level about themselves, their families, studies, the weather, and leisure activities.
Not open to students who have completed 01:470:102, 01:470:121, or equivalent.

01:470:105,106 *German for Reading Knowledge (3,3)*
Development of reading skills for students who wish to acquire a basic competence in the language for research purposes. Texts chosen from the humanities, the natural sciences, and the social sciences.
Not open for credit to students who have had two or more years of secondary school German. Does not satisfy prerequisite for 01:470:131 or 132.

01:470:109 *Introductory German for Business I (4)*
Introduction to the language used in business settings in German-speaking countries at the Level A1 (Beginner) of the Common European Framework of Reference for Languages (CEFR). Preparation for use of German in business-related contexts; basic understanding of German corporate culture. Practice in reading, writing, listening, and speaking on topics of the German-language business environment. Topics include business meetings and visits; offers, purchasing and leasing; and business travel.

01:470:110 *Introductory German for Business II (4)*
Continuation of introduction to the language used in business settings in German-speaking countries at the Level A2 (Elementary) of the Common European Framework of Reference for Languages (CEFR). Use of German in business-related contexts and deeper understanding of German corporate culture. Practice in reading, writing, listening, and speaking on topics of the German-language business environment. Topics include statistics, job search, planning, IT, and social interaction with business partners.

01:470:121 ***German Intensive Review (4)***
Intermediate reinforcement course. Practice in speaking, reading, and writing German; extensive grammar review; cultural topics.
Not open to students who have taken 01:470:101 or 102.

01:470:131-132 ***Intermediate German (3,3)***
Emphasis on conversation and composition, based on everyday situations, aspects of culture, and contemporary German short stories; review of major grammatical points.
Prerequisite: 01:470:102 or placement test.

01:470:211,212 ***German Conversation and Culture (3,3)***
Proficiency-oriented with strong emphasis on speaking skills. Extensive use of audiovisual material and guided conversation practice; texts and discussion topics relating to everyday life, current events, and contemporary issues in the German-speaking community.

01:470:231-232 ***Advanced German (3,3)***
Reading and discussion of advanced text material based on contemporary German culture. Intensive practice in word formation, sentence structure, and expository writing.
Prerequisite: 01:470:132 or placement test

01:470:241,242 ***Introduction to German Literature (3,3)***
Critical appreciation of German literature through the study of selections of prose fiction, drama, and poetry, and the culture of the periods in which they were written.

01:470:299 ***Contemporary German Media and Society (1.5)***
Development of active language skills through study of the role of various media (including print, internet, film, and the other arts) in informing contemporary German politics and society. Special attention to cultural differences between Germany and the United States. Texts and presentations chosen to accommodate level of students enrolled. In German. All levels of language above German 121 welcome.
Prerequisite: 01:470:102 or 122.

01:470:301,302 ***Introduction to Literary and Cultural Analysis (3,3)***
Introduction to the basic German terminology of literary and cultural analysis, and preparation for courses in German at the 300 level. Study of literary works and films, as well as newspaper articles, film reviews, and literary analyses.
Prerequisite: 01:470:232, or simultaneous enrollment in 01:470:231 or 232. May be repeated for credit.

01:470:313 ***Business German I (3)***
Development of effective communication models with emphasis on the terminology of economics. Treatment of basic principles governing commercial organizations in German-speaking countries.
Prerequisite: 01:470:232 or equivalent.

01:470:314 ***Business German II (3)***
Continuation of 01:470:313 with emphasis on the terminology of international commerce and the development of specialized language skills for diverse business situations. Contrastive treatment of cultural factors affecting German-American trade relations.
Prerequisite: 01:470:313 or permission of instructor.

01:470:315 ***Advanced Translation Seminar I (3)***
Methodology and techniques of translating German-English and English-German. Texts are drawn from a variety of fields, with special attention to stylistic, syntactic, and semantic divergences between the two languages and the latest developments in computer-generated translations.

01:470:316 ***Advanced Translation Seminar II (3)***
Methodology and techniques of translating German-English and English-German. Texts are drawn from a variety of fields, with special attention to stylistic, syntactic, and semantic divergences between the two languages and the latest developments in computer-generated translations.

01:470:321 ***Fundamentals of Literary Analysis (3)***
Introduction to textual categories, literary terminology, and methodological problems through the analysis and interpretation of representative works of literature.

01:470:323 ***Masters of German Poetry (3)***
Readings from such poets as Walther von der Vogelweide, Gryphius, Klopstock, Goethe, Schiller, the romantics, Heine, George, Hofmannsthal, Rilke, Benn, and Brecht.

01:470:324 ***German Theater (3)***
Study of German drama through readings from such playwrights as Lessing, Goethe, Schiller, Kleist, Büchner, Wedekind, Brecht, Handke, and Heiner Müller, along with analysis (using video) of current approaches to theater production.

01:470:325 ***The Short Narrative: 16th Century to Present (3)***
Studies in short genres of German prose such as the anecdote, farce, fable, novella, and short story.

01:470:326 ***The German Fairy Tale and Folk Tradition (3)***
Studies in the German fairy tale, legend, and folk song; principal characteristics and cultural contexts.

01:470:329 ***Heroes and Monsters (3)***
Survey from medieval literature to the present of the relationship between heroes and monsters, the latter considered as the incarnation of all that would destroy civilization.
Prerequisite: 01:470:232.

01:470:333 ***German Literature of the Enlightenment, Rococo, and Storm and Stress (3)***
Major authors of the 18th century, including Klopstock, Lessing, Herder, the early Goethe, and Schiller.

01:470:335 ***Goethe: Life and Works (3)***
Close reading of Goethe's works against the cultural, historical, and political background of his time. Selected poems, plays, and prose.

01:470:337 ***Schiller: Life and Works (3)***
Close reading of Schiller's works against the cultural, historical, and political background of his time. Selected poems, plays, and prose.

01:470:341 ***German Civilization I: Fifth through 15th Centuries (3)***
Cultural foundations of the German-speaking areas of central Europe from the fall of Rome to the waning of the Middle Ages. Readings from historical, didactic, and poetic documents, supplemented by slides and recorded music.

01:470:342 ***German Civilization II: 16th through 18th Centuries (3)***
Cultural foundations of the Holy Roman Empire of the German nation from the age of Luther to the Napoleonic era. Readings from historical, didactic, and poetic documents, supplemented by slides and recorded music.

01:470:343 ***German Culture Today (3)***
Contemporary cultural, social, and political life in German-speaking countries with emphasis on the daily experience. Audiovisuals, guest lectures, field trips, and contact with resource persons.

01:470:347 ***German Politics and Society: Germany 1871-1945 (3)***
Overview of significant political, historical, and social trends which shaped modern Germany in its early years from the Franco-Prussian War to the end of World War II.

01:470:348 ***German Politics and Society: Germany 1945 to the Present (3)***
Introduction to major political, historical, and social trends which have shaped German society, both east and west, from the end of the World War II to the present.

01:470:349 ***Contemporary German Cinema (3)***
See description under Courses in English.***One section taught in German.***

01:470:386 ***Junior Year in Germany (BA)***

01:470:387,389,391 ***Topics in German Literature and Civilization (3,3,3)***

01:470:393,394 ***Independent Study in German (1-3,1-3)***
For students of exceptional promise wishing to pursue an individualized project in German literature, civilization, or language under the guidance of a member of the department.
Prerequisites: Permission of instructor and undergraduate director.

01:470:395,396 ***German Teaching Apprenticeship (3,3)***
Development of various projects relevant to language teaching, e.g., preparing new teaching devices, conducting conversational groups, and tutoring.
Prerequisite: Permission of instructor.

01:470:415,416 ***Advanced Translation Seminar I,II (3,3)***

01:470:431 ***German Literature of the 19th Century: Romanticism (3)***
Romantic period from Wackenroder to Eichendorff (1790-1850), including Tieck, Novalis, Hoffmann, A.W. and F. Schlegel, Hölderlin, Kleist, and Brentano. Readings of theoretical and poetic texts.

01:470:435 ***German Literature of the 20th Century before 1945 (3)***
Major literary movements and figures from the turn of the century to the end of World War II, including naturalism (Hauptmann); impressionism (Schnitzler); symbolism (Rilke); expressionism (Kaiser, Trakl); neo-factualism (Zuckmayer); the outsiders (Wedekind, Hesse, Kafka); and the anti-Nazi writers in exile (Mann, Brecht).

01:470:436 ***German Literature of the 20th Century after 1945 (3)***
Literary trends and currents from the end of World War II to the present: the "literature of the ruins" (Borchert, Böll); documentary theater (Weiss, Hochhuth); Brecht's epic theater and East Germany; major novelists (Böll, Frisch, Grass, Wolf); and playwrights (Dürrenmatt, Handke).

01:470:441 ***German Civilization III: The 19th Century (3)***
Cultural foundations of Germany from the abolition of the First Reich by Napoleon in 1806 to the end of the Second Reich in 1918. Readings from historical, didactic, and poetic documents, supplemented by slides and recorded music.

01:470:444 ***Masters of German Satire (3)***
Satirical features and strategies in literary and visual texts from late medieval carnival plays to postmodern cabaret.

01:470:450 ***Reading Women's Lives: 20th-Century Narratives (3)***
Twentieth-century women's literature and film; historical retrospective and methodological introduction prepare for treatment of preeminent postwar texts.
Prerequisite: A 300-level course in German or permission of instructor.

01:470:460 ***Voices of a Century: 20th-Century Autobiography and Culture (3)***
Masterpieces of 20th-century autobiography read in a social, political, and philosophical context.
Prerequisite: A 300-level course in German or permission of instructor.

01:470:491,492 ***Senior Seminar in German Literature (3,3)***
Analysis and interpretation of selected works of German literature with emphasis on various literary genres; discussions, oral and written reports.

01:470:493,494 ***Independent Study in German (3,3)***
For students of exceptional promise wishing to pursue an individualized project in German literature or civilization under the guidance of a member of the department.
Prerequisites: Permission of instructor and undergraduate director.

01:470:495,496 ***Senior Honors in German (3-6,3-6)***
Independent research on a topic selected by the senior and approved by a departmental honors committee; carried out under the guidance of a member of the department.

Classics (SAS)

CLASSICS

(Classical Humanities 190, Greek 190b, Greek and Latin 190c, Latin 190d)

Department of Classics, School of Arts and Sciences

Website: Here

Chair: Serena Connolly

Undergraduate Director: Emily Allen-Hornblower

Distinguished Professor:

Thomas J. Figueira, B.A., Fordham; Ph.D., Pennsylvania

Professors:

T. Corey Brennan, B.A., Pennsylvania; M.A., Oxford; Ph.D., Harvard

Serena Connolly, B.A., Cambridge; M.A., Ph.D., Yale

James McGlew, B.A., M.A., Ph.D., Chicago

Azzan Yadin-Israel, B.A., Hebrew; Ph.D., California (Berkeley) and Graduate Theological Union

Associate Professors:

Emily Allen-Hornblower, B.A., Sorbonne, École Normale Supérieure; M.A., Ph.D., Harvard

Timothy Power, B.A., Yale; M.A., Ph.D., Harvard

Assistant Professors:

Bice Peruzzi, B.A., Perugia (Italy); M.A., Padova (Italy); M.A., Ph.D., Cincinnati

Jeffrey Ulrich, B.A., Rutgers; M.A., Ph.D., Pennsylvania

Associate Teaching Professor:

Kristina Chew, B.A., Princeton; Ph.D., Yale

John Fisher, B.A., Kean College; M.A., Richard Stockton College; Ph.D., Princeton¿

Assistant Teaching Professors:

Salam Al Kuntar, B.A., Damascus University; M.A., University of Liverpool; Ph.D., University of Cambridge

The department offers a major in classics with options in classical humanities, Greek, Greek and Latin, and Latin. Selected courses in history, philosophy, and art history also may count for credit toward the classics major. Students with a strong interest in ancient history may pursue the ancient history and classics option within the history major (see the history section of this catalog). Minors are offered in ancient Greek, Latin, and classical humanities. For more information, consult the departmental website.

Classics (SAS)

Learning Goals

Learning Goals

See here.

- Classics is a broad discipline, characterized by its interdisciplinary nature. Pursuing classics means acquiring fundamental language skills in ancient classical languages (Greek, Latin, and, to a lesser degree, Sanskrit), along with a wide-ranging knowledge of the ancient world.

- Studying classics involves coming to grips with the ancient Greek and Roman civilizations: their myths and literature; their social, military, political, and cultural history; their philosophy; and aspects of their material culture. At every stage, students are led to reflect on the many connections of classics to the modern world, and how these ancient civilizations contributed to shape it.
- As many other humanities disciplines do, classics combines language study with the exploration of questions central to many social sciences. Classics students are led to ponder the mechanisms of human psychology, social organization, and historical evolution, and given an opportunity to appreciate the ways in which the individual and the community relate to, shape, and affect one another.

Classics (SAS)

Major Requirements

Major Requirements

Classics majors choose one of four options. Those who wish to concentrate on one or both ancient languages may choose an option in ancient Greek and Latin, ancient Greek, or Latin. The classical humanities option is for those who wish to pursue a general study of the history, literature, and culture of the classical world. All courses applied to the major must be completed with a grade of C or better.

Classical Humanities Option (Classical Humanities 190). A major who pursues the classical humanities option must complete 36 credits in the department. (Credits from approved classical humanities courses in other departments may be counted among these, as well as courses with a 190, 490, or 580 subject code.) The following are required of every classical humanities major: 1) one course in the Greek or Latin language at the 200 level or above; 2) at least six courses at the 300-level or above.

Greek Option (Greek 190b). A student majoring in classics with emphasis on Greek must take 35 credits in the department, of which 26 credits must be in the ancient Greek language (including at least six courses at the 300 level or above).

Greek and Latin Option (Greek and Latin 190c). A student majoring in classics with emphasis on Greek and Latin must take 35 credits in the department, of which at least 29 credits must be in the ancient Greek and Latin languages. The credits may be distributed between the two languages, but at least 11 credits must be taken in each language. At least six courses must be at the 300 level.

Latin Option (Latin 190d). A student majoring in classics with emphasis on Latin must take 35 credits in the department, of which at least 26 credits must be in the Latin language (including at least six courses at the 300 level or above).

Classics (SAS)

Minor Requirements

Minor Requirements

Classics minors choose one of three options. Those who wish to concentrate on one of the ancient languages may choose an ancient Greek or Latin minor. The classical humanities minor is for those who wish to pursue a general study of the history, literature, and culture of the classical world. All courses applied to the minor must be completed with a grade of C or better.

Classical Humanities (190). A minor in classical humanities requires a minimum of seven courses in the department. (Credits from approved classical humanities courses in other departments may be counted among these, as well as courses with a 190, 490, or 580 subject code.) Of these seven courses, at least three courses must be at the 300 level or above.

Latin (580). A minor in Latin requires a minimum of six courses in the Latin language, including three at or above the 300 level.

Greek (490). A minor in ancient Greek requires a minimum of six courses in the Latin language, including three at or above the 300 level.

Classics (SAS)

Teacher Certification

Teacher Certification

Classics majors interested in earning eligibility for teacher certification (K-12) in New Jersey should contact advisers in the Graduate School of Education and in the Department of Classics in their first year, or as soon as possible thereafter.

Classics (SAS)

Departmental Honors Program

Departmental Honors Program

Honors in Classics may be earned by eligible students who wish to write a senior thesis with the help of an adviser. To qualify, students must have a cumulative grade-point average (GPA) of 3.2 or better and a GPA of 3.6 or better in the major at the end of their junior year. At that time, students should complete the required application form, before the deadline of May 2 of their junior year. See the classics website under Honors & Glory for the honors thesis application form.

Note: Students writing theses must enroll in 01:190:495, 496 (8 credits total) in their senior year. Students who are interested in a topic that spans more than one academic discipline should consider the School of Arts and Sciences interdisciplinary honors thesis option: Here.

Honors in Classics may also be earned by classics majors who:

1. Maintain a 3.5 in the major

2a. Have earned 12 credits at the 300 level or above in Greek OR Latin courses

OR

2b. Have earned 6 credits in BOTH Greek and Latin at the level of 300 or above

3. Submit two papers representative of their work in classics (they may be revised versions of class papers), which a panel of two faculty members deem worthy of honors using the rubric that we have developed for senior assessment purposes.

4. Sit for a sight translation exam in the spring of senior year and pass with honors

To be eligible for honors without a thesis, the grades in the Greek and Latin courses must be at an average of 3.5 or above; for high honors, 3.7 or above; for highest honors, 3.9 or above. Highest honors will be reserved for those students who, in addition to meeting the GPA requirement, have performed at the highest level on the sight exam and paper requirement. Students should inform the undergraduate director by the fall of senior year if they would like to be considered for honors in the major.

Classics (SAS)

Courses in Classical Humanities (190)

Courses in Classical Humanities (190)

Courses in classical humanities are open to students without a knowledge of the Greek or Latin language.

01:190:101 ***Word Power (3)***
Systematic study of the basic Greek and Latin derivatives in English. Emphasis is on Greek and Latin elements in current scientific and literary use.

01:190:102 ***Medical Terminology (1.5)***
Systematic study of scientific terminology based on ancient Greek and Latin elements, with emphasis on the field of medicine.
May be taken concurrently with 01:190:101.

01:190:200 ***Ancient Near East (3)***
Origins and development of the societies of Mesopotamia, Egypt, Asia Minor, and Palestine, through the period of the Persian Empire.
Credit not given for both this course and 01:563:200, 01:508:200, or 01:685:200.

01:190:201 ***Ancient Greece (3)***
Civilization of the eastern Mediterranean world in ancient times, with emphasis on the origins of Western civilization and the Greek contribution to Western culture.
Credit not given for both this course and 01:510:201.

01:190:205 ***Greek Civilization (3)***
Survey of Greek thought and literature. Readings include Homer, the lyric poets, the Athenian dramatists, and selected readings from historians and philosophers. Artistic material may be included.

01:190:206 ***Roman Civilization (3)***
Surveys Roman thought and literature. Readings include Virgil, Ovid, Livy, Cicero, Tacitus, and Petronius. Artistic material may be included.

01:190:207 ***Greek and Roman Mythology (3)***
Examination of the nature, meaning, and continued vitality of the principal classical myths through reading, lectures, and slide presentations.

01:190:208 ***Philosophy of the Greeks (3)***
Introduction to the major philosophical thinkers of the ancient Greek world with special emphasis on Plato and Aristotle.
Credit not given for both this course and 01:730:208.

01:190:209 ***Ancient Rome (3)***
The Roman Republic and the empire, with emphasis on the rise and decline of a Mediterranean world civilization under Roman leadership.
Credit not given for both this course and 01:510:202.

01:190:211 ***Greek and Roman Religion (3)***
Study of pagan gods and goddesses, and cults and practices of the classical Greek world, Roman Republic, and Roman Empire.

01:190:212 ***Classical World in Film (3)***
Survey of film depictions of the classical world of Greece and Rome, with readings from literary, historical, and critical sources. Topics include "sword and sandals" genre and its history; parallels between America and Greece/Rome; spectacle and empire; and the uses of history in popular historical films.

01:190:213 ***Science and Technology in Ancient Greece and Rome (3)***
Explores the nature and development of science in ancient Greece and Rome, focusing on medicine, biology, physics, and mathematics.

01:190:214 ***Sexuality in Ancient Greece and Rome (3)***
Investigates how the ancient Greeks and Romans categorized, depicted, and reacted to different sexual behaviors and identities through the study of visual and literary sources ranging from Homeric Greece to Imperial Rome.

01:190:215 ***Introduction to Greek and Roman Archaeology (3)***
Introductory survey of the archaeology, architecture, and material culture of the Mediterranean world from the Bronze Age throughout the transformation of the Roman Empire following the reign of Constantine. Consideration given to chronological developments, Greek and Roman artistic production in its social and cultural settings, and Classical Art.
Credit not given for this course and 01:070:113.

01:190:220 ***Greek Food from Antiquity to Today (3)***
Food and foodways of Greek-speaking peoples from ancient times to the present, with special emphasis on problems of continuity and change.
Credit not given for this course and 01:489:220, 01:510:222, 01:685:220, or 667:220.

01:190:251 ***Papal Rome and Its People, 1500-Present: A Select History (3)***
Case-study approach toward select aspects of the social, cultural, intellectual, and political history of the early modern and modern popes, with a particular focus on their relationship to the city of Rome. Highlights the reign of Pope Gregory XIII Boncompagni (1572-1585) and Gregory XV Ludovisi (1621-1623), and their subsequent family history to the present day.
Credit not given for both this course and 01:556:251.

01:190:254 ***The Presocratic Philosophers (3)***
Introductory survey of the Presocratic philosophers. Emphasizes exposure to the teachings of these thinkers through the remaining fragments, while also engaging scholarly writings that introduce and contextualize the sources.
Credit not given for this course and 01:730:254.

01:190:300 ***Greek and Roman Slavery (3)***
Social, economic, legal, and political aspects of slavery in ancient Greece and Rome. The sources and numbers of slaves, forms of servitude, manumission, and slave labor.

01:190:301 ***Food and Drink in the Ancient World (3)***
This course provides students an opportunity to understand the social history of the ancient Mediterranean world through an exploration of the production, preparation, and consumption of food and drink and (re)presentations of them in word and image.

01:190:303 ***Hellenistic World (3)***
Expansion and development of Greek culture from Alexander through the successor kingdoms in Greece, Egypt, Syria-Palestine, and Asia Minor.
Credit not given for both this course and 01:510:303.

01:190:305 ***The Crisis of the Roman Republic (3)***
Roman political, social, and cultural history during the crisis of the late republic from 133 BC.

01:190:306 ***Roman Empire (3)***
Political, social, and intellectual developments of the imperial period until the age of Constantine, with emphasis on the first two centuries AD.
Credit not given for both this course and 01:510:306.

01:190:309 ***Greek and Roman Athletics (3)***
Examines the ideology and cultural context of ancient athletic competition. Topics include the Olympic and other Panhellenic games, Roman chariot racing and gladiator combat, and women athletes.

01:190:310 *Augustan Rome (3)*
The cultural renaissance under Augustus (44 BC-AD 14): the writings of Virgil, Horace, Livy, Ovid, and the elegiac poets; the building program at Rome; and artistic trends.
May be jointly taught (in part) with 01:580:310. Students wishing to earn language credit in Latin should enroll in 01:580:310. Credit not given for both this course and 01:580:310.

01:190:312 *The Search for the Historical Socrates (3)*
Portraits of Socrates in Plato, Xenophon, Aeschines of Sphettus, and Aristophanes. Birth of the philosophical dialogue and other genres; life and thought of Socrates; and later Socratic movements.
Prerequisite: One course in ancient Greek history, culture, or philosophy; or permission of instructor. May be jointly taught (in part) with 01:490:312. Students wishing to earn language credit in Greek should enroll in 01:490:312. Credit not given for both this course and 01:490:312.

01:190:314 *The Etruscans (3)*
Study of the social history, material culture, and artistic expression of the Etruscans. Survey of urbanism and architecture, trade, funerary practices, painted decoration, sculpture, and minor arts between the 9th and 2nd centuries BC.
Credit not offered for this course and 01:082:314.

01:190:315 *Latin Poets in English (3)*
Selections from the Augustan poets Horace, Virgil, and Propertius. Translations by Dryden, Ezra Pound, and others, with close reference to the Latin original. Theories of translation.
Prerequisite: One year of Latin or permission of instructor.

01:190:317 *Ancient Painting (3)*
Survey of Greek, Etruscan, and Roman painting from the eighth century BC through the Roman Empire. Emphasis on the development of style and on the cultural significance of painted images in different social contexts.
Credit not given for this course and 01:082:317.

01:190:318 *Cleopatra (3)*
Examines the historical Cleopatra and the reception of her image from antiquity to the present in literature, art, and film. Issues considered include female power in a man's world, East versus West, and politics and propaganda.
Credit not given for both this course and 01:510:312 or 01:988:321.

01:190:320 *Women in Antiquity (3)*
Women in the ancient societies of Greece and Rome. Their roles and images in the social, legal, political, domestic, philosophical, and artistic spheres examined using primary sources.
Credit not given for both this course and 01:510:251.

01:190:321 *Classical Rhetoric (3)*
Origins and development of rhetorical theory: persuasive argument, emotional appeal, good style, and delivery.

01:190:323 *Criminals and Saints: Power in Greek Political Life and Imagination (3)*
Unlimited power, tyranny, democracy. Explores the ancient Greeks' ambivalent conceptions and perceptions of autocratic versus collective power through time.
Prerequisite: 01:190:205 or permission of instructor.

01:190:324 *Race and Ethnicity in the Classical World (3)*
Examination of ancient Greek and Roman understanding of physically different and geographically alien individuals. Consideration of the origins of our culture's beliefs about race, ethnicity, and human difference in classical world's views of strangers, foreigners, and barbarians and how our ideas about race and difference have evolved.

01:190:325 *Cults, Magic, and Witchcraft (3)*
Magic and witchcraft in the everyday life of antiquity, from pagan to Christian times; how individuals tried to control the unknown. Literary and material sources.

01:190:328 *Ancient Law in Action (3)*
Explores Greek and Roman constitutions and legal systems in their social contexts. Illustrates procedural elements of ancient criminal and civil law through mock trials.

01:190:350 *Greek Society (3)*
Social and economic life of the Greeks from the Mycenaean period through the Hellenistic age. Written and material evidence employed.
Recommended: 01:510:201. Credit not given for both this course and 01:510:350.

01:190:352 *Plato (3)*
Philosophy of Plato through close reading of selected dialogues, supplemented by relevant readings on other ancient and contemporary philosophers.
Credit not given for both this course and 01:490:352 or 01:730:352.

01:190:353 *Aristotle (3)*
Philosophy of Aristotle through his selected works, supplemented by relevant readings in Plato and in modern philosophers.
Prerequisite: One course in ancient Greek history, culture, or philosophy; or permission of instructor. May be jointly taught (in part) with 01:490:353. Students wishing to earn language credit in Greek should enroll in 01:490:353. Credit not given for both this course and 01:490:353.

01:190:355 *Ancient Mythology and Society (3)*
Social history and practical utilization of ancient myth (with emphasis on Greek myths), applying historical, religious, sociological, and literary-critical perspectives.

01:190:356 *Oedipus: A Survey of the Myth from Antiquity to Freud (3)*
Survey of the Oedipus myth in earliest, pre-Sophoclean evidence; in Greek and Roman tragedy; in the Middle Ages and the Renaissance; and in the 19th and 20th centuries (with special emphasis on Oedipus in art and music).

01:190:358 *Odysseus in Literature, Drama & Film (3)*
Evolving images of Odysseus from ancient literature through medieval poetry and modern novels, poetry, plays, and films. Significance of Odysseus as an enduring literary icon.
Credit not given for both this course and 01:195:358 or 01:489:358.

01:190:370 *Greek Film: Love, Eros & Death (3)*
Masterpieces of modern Greek film, 1914 to present, exploring interplay of love, the erotic, and death.
Credit not given for this course and 01:489:370. Taught in English.

01:190:372 ***Cities of the Classical World (3)***
Study of urban development in antiquity, focusing on Athens and Rome, and synthesizing the evidence of literary, historical, and archaeological sources.
Credit not given for both this course and 01:512:311.

01:190:373 ***Pompeii: The Life and Death of a Roman Town (3)***
Pompeii and Herculaneum, as laboratories for the study of Roman life: the economy and society; public and private architecture, art, and inscriptions; and the birth of archaeology.
Prerequisite: One course in Roman history or culture, Latin or ancient art, or permission of instructor. Credit not given for both this course and 01:510:310.

01:190:375 ***Masterpieces of Greek and Roman Art (3)***
Analyses of selected monuments of architecture, sculpture, and painting from 800 BC to AD 500.

01:190:377 ***The Hero in Ancient Greece and Rome (3)***
Explores the ancient Greek and Roman hero from literary, religious, mythical, and comparative narrative points of view. Readings drawn mostly from ancient sources.

01:190:381 ***Greek Drama in Translation (3)***
Readings in English of the major Greek tragedies and comedies; emphasis on the dramatic structure, literary analysis, and the theatrical conventions of the ancient stage.

01:190:391 ***Roman Drama in Translation (3)***
Readings in English of the comedies of Plautus and Terence and the tragedies of Seneca to emphasize the contributions of Latin authors to the dramatic genre and their influence on European and English drama.

01:190:393 ***Greek and Roman Satire (3)***
Readings in English of classical satire from its origins in the Greek world through the fourth century AD. Emphasis on the significance of ancient satire for comedy and satire in Western culture.

01:190:395 ***Transgression in Ancient Greek Society and Culture (3)***
Violence. Obscenity. Gender roles. Punishment. Violations of cultural norm in ancient Greek practical, civic, religious, and intellectual life, through close critical analysis of their myths, literature, laws, and rituals.
Prerequisite: 01:190:205 or permission of instructor.

01:190:397 ***The Ancient Novel in Context (3)***
Readings from Greek and Roman novels of the Imperial period, with attention to their place in the literary and cultural history of the ancient world.

01:190:421 ***Indo-European Origins of the Classical Languages (3)***
Comparative survey of Latin and Greek grammar, with historical analysis of those features that the two languages share due to their common origin as Indo-European languages. Reference to the major characteristics of Indo-European languages in general.
Open only to advanced undergraduates in classics and linguistics and to graduate students with some knowledge of Latin and/or Greek.

01:190:440 ***Cultural Heritage and Preservation Studies (CHAPS): Museums, Collecting, and Preservation (3)***
Examines the history of museums, modes of collecting, and the preservation of the past, and considers these activities in the context of contemporary political issues.
Credit not given for this course and 01:082:440.

01:190:491,492 ***Independent Study in Classics (3,3)***
Directed reading and research on an assigned topic in classics under the supervision of a member of the department. An extensive essay required, reflecting in-depth research on the assigned topic.
Open only to juniors and seniors majoring in classics. Permission of the undergraduate director required.

01:190:493,494 ***Special Topics Seminar (3,3)***
Advanced study of a problem, topic, or theme in Greek and Roman studies.
Open only to junior or senior majors in classics or by permission of instructor.

01:190:495,496 ***Honors Project (4,4)***
Independent or team projects resulting in a written paper, a performance, or some other appropriate form of public presentation such as drama, poetry, narrative prose, or museum excavation materials.
Open only to honors students in one of the fields in classics.

Courses in Greek, Ancient (490)

Courses in Greek, Ancient (490)

01:490:101 ***Elementary Greek I (4)***
Intensive study of ancient Greek grammar in conjunction with readings in simple Greek prose.

01:490:102 ***Elementary Greek II (4)***
Continued study of Greek grammar in conjunction with readings.
Prerequisite: 01:490:101 or permission of instructor.

01:490:206,207 ***Intermediate Greek Prose (3,3)***
Study of Greek prose through the reading of a work of Plato, Lysias, Herodotus, or other authors.
Prerequisite: 01:490:102 or permission of instructor.

01:490:208,209 ***Intermediate Greek Poetry (3,3)***
Study of Greek poetry through the reading of a work of Euripides, Sophocles, Homer, or other authors.
Prerequisite: 01:490:102 or permission of instructor.

01:490:211 ***Introduction to New Testament Greek (3)***
Introduction to grammar and syntax of Greek in conjunction with readings from the Gospels, Acts, or Epistles.
Prerequisite: 01:490:207 or permission of instructor.

01:490:304 ***Aristophanes (3)***
Reading of *Clouds* and one other comedy; comparison of the Aristophanic with the Platonic Socrates; study of relation of Old Comedy to Athenian life.
Prerequisites: 01:490:207 or 208 or permission of instructor.

01:490:305 ***Greek Drama (3)***
Readings in the works of fifth-century Greek dramatists with special emphasis on Sophocles.
Prerequisite: 01:490:207 or 208 or permission of instructor.

01:490:306 ***From Athens to Alexandria (3)***
Major works of the literature of Greece from the fourth century BC into the Hellenistic Age.
Prerequisite: 01:490:207 or 305 or permission of instructor.

01:490:308 ***Greek Historical Writings (3)***
Readings of selected narratives in Herodotus and of main speeches, excursuses, and parts of books six and seven of Thucydides. Comparative study of historical method.
Prerequisites: 01:490:207, 208, or permission of instructor.

01:490:309 ***Lyric Poetry (3)***
Survey of the main poets of the "lyric age" of Greece (Alcman, Sappho, Alcaeus, Archilochus, Solon, Theognis, and Anacreon); reading of an ode of Pindar.
Prerequisites: 01:490:207, 208, or permission of instructor.

01:490:310 ***Greek Heroic Poetry (3)***
Studies in the poetry and culture of Homeric Greece. Selections from the *Iliad* or *Odyssey*.
Prerequisites: 01:490:207, 208, or permission of instructor.

01:490:311 ***New Testament Greek (3)***
Selections from the Gospels, Acts, and Epistles, supplemented by a review of grammar and syntax.

01:490:312 ***Socratic Literature (3)***
Portraits of Socrates in Plato, Xenophon, Aeschines of Sphettus, and Aristophanes, with emphasis on the reading, in Greek, of selections from the writings of these authors.
Prerequisite: 01:490:207 or 208 or permission of instructor. May be jointly taught (in part) with 01:190:312. Students wishing to earn language credit in Greek should enroll in 01:490:312. Credit not given for both this course and 01:190:312.

01:490:315 ***Menander (3)***
Study of *Dyskolos* and *Samia* as examples of New Comedy; their relation to Athenian life at the end of the fourth century.
Prerequisites: 01:490:207, 208, or permission of instructor.

01:490:335 ***Greek Prose Composition (3)***
Review of syntax, composition in Greek, and translation from English to Greek of continuous passages adapted from classical authors.
Prerequisite: 01:490:207 or 208.

01:490:352 ***Readings in Plato (3)***
Reading of one or more Platonic dialogues (or thematically related selections from several) in the original Greek.
Prerequisites: 01:490:207, 208, or permission of instructor. May be jointly taught (in part) with 01:190:352; separate meetings for readings in Greek. Credit not given for both this course and 01:190:352 or 01:730:352.

01:490:353 ***Readings in Aristotle (3)***
Reading of one or more treatises by Aristotle (or thematically related selections from several) in the original Greek.
Prerequisites: 01:490:207, 208, or permission of instructor. May be jointly taught (in part) with 01:190:353; separate meetings for readings in Greek. Credit not given for both this course and 01:190:353.

01:490:391 ***Readings in Greek Prose (3)***
Readings in selected ancient Greek prose authors or genres.
Prerequisites: 01:490:305, 306, or permission of instructor.

01:490:392 ***Readings in Greek Poetry (3)***
Readings in the works of selected Greek poets or poetic genres.
Prerequisites: 01:490:305, 306, or permission of instructor.

01:490:400 ***Demosthenes (3)***
Reading of one public and one private oration; study of Demosthenes as orator; as source for Athenian law, commerce, and private life; and as statesman.
Prerequisites: 01:490:207, 208, or permission of instructor.

01:490:402 ***Plato and Aristotle (3)***
Reading of one Platonic dialogue followed by selected portions of an Aristotelian treatise. Attention to prose style and also to common problems and diverging solutions.
Prerequisites: 01:490:207, 208, or permission of instructor.

Classics (SAS)

Courses in Latin (580)

Courses in Latin (580)

01:580:101 ***Elementary Latin I (4)***
Beginning course in Latin, introducing the Latin language and its grammar and syntax.

01:580:102 ***Elementary Latin II (4)***
Continued beginning instruction in Latin, introducing Latin language, grammar, and syntax.
Prerequisite: 01:580:101 or permission of instructor.

01:580:203 ***Intermediate Latin Prose (3)***
Selections from prose authors of the late Republican and/or early empire, e.g., Caesar, Cicero, Livy; development of skill in reading continuous passages of Latin prose.
Prerequisite: 01:580:102 or permission of instructor.

01:580:204 ***Intermediate Latin Poetry (3)***
Representative poems of Catullus, Horace, and Ovid, read and studied with a view to their style, imagery, and topicality. Introduction to Latin metrics.
Prerequisite: 01:580:102 or permission of instructor.

01:580:302 ***Medieval Latin (3)***
Readings in major Latin writings and documents of the Middle Ages.
Prerequisite: 01:580:203 or 204 or permission of instructor.

01:580:303 ***Cicero: Philosophical Writings (3)***
Selected philosophical dialogues and rhetorical treatises of Cicero.
Prerequisites: 01:580:203, 204.

01:580:304 ***Cicero: Orations (3)***
Selected orations of Cicero, with emphasis on the development of Cicero's style and the significance of historical and biographical background.
Prerequisites: 01:580:203, 204.

01:580:310 ***Prose and Poetry in the Age of Augustus (3)***
The cultural renaissance under Augustus (44 BC-AD 14), with emphasis on the reading, in Latin, of selections from the writings of Virgil, Horace, Livy, Ovid, and the elegiac poets.
Prerequisite: 01:580:203 or 204 or permission of instructor. May be jointly taught (in part) with 01:190:310. Students wishing to earn language credit in Latin should enroll in 01:580:310. Credit not given for both this course and 01:190:310.

01:580:321 ***Roman Comedy (3)***
Study of the principal meters, the theater, and the staging of plays through the reading of plays of Plautus and Terence.
Prerequisites: 01:580:203, 204.

01:580:323 ***Lucretius (3)***
Readings from Lucretius' *De Rerum Natura* with analysis of its place within the literary and philosophical traditions of Rome and Greece.
Prerequisites: 01:580:203, 204.

01:580:324 ***Sallust (3)***
Readings from Sallust's *Jugurthine War*, *Histories*, and *Catiline*, with a study of selected problems from the historical periods relevant to those works.
Prerequisites: 01:580:203, 204.

01:580:325 ***The History of Livy (3)***
Readings from Livy's *Ab Urbe Condita* with a study of selected problems in Roman Republican history.
Prerequisites: 01:580:203, 204.

01:580:327 ***Latin Elegy (3)***
Survey of Latin poetry written in elegiac meter, with selections from Catullus, Tibullus, Sulpicia, Propertius, and/or Ovid.
Prerequisites: 01:580:203, 204.

01:580:328 ***Roman Satire (3)***
Selected poems of Horace, Martial, and Juvenal and a study of their interrelationship.
Prerequisites: 01:580:203, 204.

01:580:329 ***Tacitus (3)***
Reading of a minor work of Tacitus and/or selections from the *Annals of Tacitus* with an investigation of their value as sources for Imperial history in the first century AD.
Prerequisites: 01:580:203, 204.

01:580:335 ***Latin Prose Composition (3)***
Review of syntax and prose style; composition in Latin and translation into Latin of continuous passages of prose.
Prerequisites: 01:580:203, 204.

01:580:369,370 ***The Seminar in Latin (3,3)***
Extensive and rapid reading in Latin literature from the early Roman Republic to the empire.
Primarily for juniors and seniors majoring in classical humanities; open to others with permission of instructor.

01:580:401 ***Advanced Study of the Poetry of Ovid (3)***
Readings and interpretation of selected works of Ovid. A study of the poet's contribution to Roman literature and his importance in the Western literary tradition.
Prerequisites: 01:580:203, 204.

01:580:402 ***Advanced Study of Vergil's Aeneid (3)***
Readings of Vergil's *Aeneid* with an analysis of selected problems in its interpretation.
Prerequisites: 01:580:203, 204.

01:580:403 ***Readings in Latin Literature I: Literature of the Republic (3)***
Prose and poetry of Rome from its beginnings in the third century BC to the end of the republic in the first century BC. Extensive selections from epic, drama, lyric, elegy, pastoral, and other poetry and from history, rhetoric, and oratory.
Prerequisites: 01:580:203, 204.

01:580:404 ***Readings in Latin Literature II: Literature of the Empire (3)***
Prose and poetry of imperial Rome. Extensive selections from epic, history, satire, the novel, and other genres, with emphasis on writers of the Augustan and Neronian ages.
Prerequisites: 01:580:203, 204.

01:580:407 ***Advanced Study of the Poetry of Horace (3)***
Intensive reading of Horace's poems with emphasis on the variety of style and content.
Prerequisites: 01:580:203, 204.

Greek, Modern Greek Studies 489 (SAS)

GREEK, MODERN GREEK STUDIES 489

School of Arts and Sciences

Website: http://www.moderngreekstudies.rutgers.edu

Undergraduate Director: Timothy Power, Department of Classics

Learning Goals

Learning Goals

Minors in modern Greek studies achieve an interdisciplinary understanding of the language, literature, history, society, and culture of Greek-speaking people from the Byzantine period through contemporary times. Minors will achieve basic proficiency in the (modern) Greek language. They will understand modern Greek culture in its many forms and expressions, in terms of its ancient Hellenic legacy, developments in Byzantine times, and the special identity of Greece and Cyprus as crossroads of western Europe, the Balkans, the Eastern Mediterranean, and the Middle East.

Minor in Modern Greek

Minor in Modern Greek

Students must complete six courses (18 credits). Three courses (9 credits) must be at the 300 level or above. The following courses are required for and count toward the minor: 01:489:201,202 or the equivalent.

An additional four courses, three at the 300 level or above, may be selected from the following two catalog pages: Courses in Greek and Courses in English.

Courses in Greek

Courses in Greek

01:489:101,102 ***First-Year Modern Greek (4,4)***
Fundamentals of the language with exercises in speaking, reading, and writing.

01:489:201,202 ***Second-Year Modern Greek (4,4)***
Development of language skills, emphasis on speaking, translation drills, and grammar.
Prerequisite: 01:489:102 or permission of the discipline adviser.

01:489:301,302 ***Third-Year Modern Greek (3,3)***
Introduction to themes in the Hellenic tradition, particularly through readings in modern Greek literature. Development of facility and accuracy in oral expression and listening comprehension.
Prerequisite: 01:489:202 or permission of instructor.

01:489:305,306 ***Introduction to Modern Greek Literature (3,3)***
Introduction to modern Greek literature from medieval times to the present. Selections from works of Kornaros to Ritsos.
Prerequisite: 01:489:202 or permission of the discipline adviser.

01:489:493,494 ***Independent Study in Modern Greek (BA,BA)***
Prerequisite: Permission of the discipline adviser.

Greek, Modern Greek Studies 489 (SAS)

Courses in English

Courses in English

01:489:205 ***History of the Byzantine Empire (3)***
Survey of political, military, religious, and socioeconomic development of the eastern Roman Empire, centered at Constantinople, from late third century to Ottoman conquest in 1453.
Credit not given for both this course and 01:510:205 or 01:685:205.

01:489:207 ***Byzantine Civilization (3)***
History of Byzantine culture and civilization, including political ideology and statecraft, orthodox Christianity, transmitting classical traditions of science and literature, art and architecture, and laying foundations of modern Greek culture.
Credit not given for both this course and 01:510:207 or 01:685:207.

01:489:217 ***From Byzantium to the Ottomans: 1204-1460 (3)***
Development of Byzantine society and culture from the Latin crisis (1204-1261) through the Ottoman conquest (1460), including the Byzantine impact on West European, Slavic, and Ottoman cultures.
Credit not given for both this course and 01:510:217 and 01:685:217.

01:489:312 ***Greek Christianity (3)***
Eastern church tradition from the second through the eighth centuries; theological controversies and the development of liturgy, monasticism, and mysticism.
Credit not given for both this course and 01:840:312.

01:489:314 ***The Evolution of Christian Orthodoxy 300-787 CE (3)***
History, theology, and social context of the formation of Christian orthodoxy from the First Council of Nicea to the Second Council of Nicea.
Credit not given for both this course and 01:840:410.

01:489:315 ***Byzantine Art (3)***
Art and architecture of the eastern Roman empire, from the third through 15th centuries. Emphasis on sources of Byzantine style and iconography and on the historical context of Byzantine art.
Prerequisites: 01:470:231 or 232; 01:082:105,106; or permission of instructor. Credit not given for both this course and 01:082:312.

01:489:340 ***Major Greek Writers in Translation (3)***
Reading and discussion of great works of modern Greek literature including short stories, poetry, and a novel. Course will include selected parallel films for additional insight and analysis.
In translation. Credit not given for both this course and 01:195:241.

01:489:347 ***The Life and Works of Odysseus Elytis (3)***
Examination of the works of Odysseus Elytis; the writers and artists who influenced his work.
Credit not given for both this course and 01:195:347.

01:489:350 ***Nikos Kazantzakis (3)***
Works of Nikos Kazantzakis (1885-1957) and the Eastern and Western ideas that influenced him: Homer, Henri Bergson, Nietzsche, Freud, and Buddhist philosophy.
In translation. Credit not given for both this course and 01:195:383.

01:489:358 ***Odysseus, the Hero (3)***
Explores the Homeric figure Odysseus in literature from Homer and Vergil, through Dante and modern masterpieces by Nikos Kazantzakis, James Joyce, and Derek Walcott. Additional explorations in poetry as well as selected modern films.
Credit not given for both this course and 01:195:358. Taught in English.

01:489:370 ***Greek Film: Love, Eros, and Death (3)***
Masterpieces of modern Greek film, 1914 to present, exploring the interplay of love, the erotic, and death.
In English.

01:489:376 ***Contemporary Greek Music (3)***
Sociocultural dynamic of modern Greek music, from Byzantine chant to folk, pop-art, laiko fusion, and Greek hip-hop. How these genres shape modern Greek social routines, worldviews, and emotions.
Modern Greek not required.

01:489:381 ***Cyprus: A Global History (3)***
Dynamics of empires, ethnic politics, nationalism, colonialism, and globalization as affecting Cyprus, 16th to 21st centuries, and culminating in the division of the island.
Credit not given for both this course and 01:510:384 or 01:685:384.

01:489:382 ***History of Modern Greece (3)***
Greek experience under Ottoman rule; revolution and independence; development of national state and society from 1830s to present.
Credit not given for both this course and 01:510:382 or 01:685:382.

01:489:385 ***Politics and Culture in Greece and the Balkans (3)***
Patterns of political, social, and cultural developments in forming and developing statecraft in Greece, and comparatively in other key Balkan countries (e.g., Serbia, Bulgaria, Romania, Turkey).

01:489:386 ***Twentieth-Century Greek Poetry (3)***
Modern Greek poetry from 1900 to 2000.
Credit not given for both this course and 01:195:386.

01:489:390 ***Special Topics: Modern Greek Studies (3)***
Variable content. Special studies emphasizing particular historical ideas and themes, prominent literary figures and forms, as well as important political and social events that have contributed to the shaping of modern Greek society. Designed by individual instructors.
In Greek or in translation.

01:489:402 ***International Service Learning in Greece (3)***
Public service and international service learning projects in Thessaloniki, Greece, organized through the American College of Thessaloniki.
Summer program.

01:489:403 ***International Service Learning in Greece (3)***
Supplementary study and reflection, complementing parallel engagement in public service and international service learning sites in Thessaloniki, Greece, conducted in modern Greek.
Summer program.

01:489:493,494 ***Independent Study in Modern Greek (BA,BA)***
Prerequisite: Permission of the discipline adviser.

Programs of Study (EJB-U)

PROGRAMS OF STUDY

The Edward J. Bloustein School of Planning and Public Policy offers five major programs of study and nine minors:

- Planning and Public Policy major (762, 762D) -- Bachelor of arts (B.A.) degree
- Health Administration major (501, 501D) -- Bachelor of Science (B.S.) degree
- Public Health major (832, 832D) -- Bachelor of Science (B.S.) degree
- Public Policy major (833, 833D) -- Bachelor of Science (B.S.) degree
- Urban Planning and Design major (971, 971D) -- Bachelor of Science (B.S.) degree
- Minors in:
    - Planning and Public Policy
    - Health Administration

- Public Health
- Public Policy
- Urban Planning & Design
- Public Administration & Management
- Urban Studies
- Medical Ethics & Health Policy
- Disability Studies

All of the majors are available to students who directly transfer into the Bloustein School, as well as to students in the School of Arts and Sciences. Students in the School of Environmental and Biological Sciences are eligible to pursue the public health major.

- Bloustein School direct-admit students are permitted to double major or major/minor across programs except as noted below.
- Students in SAS are allowed to declare a Bloustein School major/minor combination except as noted below.
- Students in SEBS are allowed to declare the Public Health major with a Bloustein School minor.
- Students in a Rutgers-New Brunswick professional school need permission from their dean's office to declare more than one Bloustein School program.
- Students in the Ernest Mario School of Pharmacy may not declare a Bloustein School major.

Restrictions of major and minor combinations:

- Planning and Public Policy majors may NOT declare the Urban Studies (975), Public Policy (833), and Urban Planning and Design (971) minors. Also, PPP majors may NOT double major in Public Policy or Urban Planning and Design.
- Public Policy majors may NOT declare the Planning and Public Policy major or minor programs.
- Urban Planning and Design majors may NOT declare the Planning and Public Policy major or minor or the Urban Studies minor.

.

Exceptional, well-prepared students who are admitted to the Bloustein School may be invited by the faculty to pursue dual-degree programs in the following areas:

- B.A. or B.S./M.P.H. for public health
- B.A. or B.S./ M.P.P. for public policy
- B.A. or B.S./M.C.R.P. for city and regional planning

- Health Administration Major (501, 501D) and Minor
- Planning and Public Policy Major (762, 762D) and Minor
- Public Health Major (832, 832D) and Minor
- Public Policy Major (833, 833D) and Minor
- Urban Planning and Design Major (971, 971D) and Minor
- Disability Studies (304) Minor
- Medical Ethics and Health Policy Minor
- Public Administration and Management Minor
- Urban Studies Minor

Health and Society 502 (SAS)

HEALTH AND SOCIETY 502

School of Arts and Sciences

Website: https://sociology.rutgers.edu/academics/undergraduate/minors/782-health-society-minor

Program Director: Jeffrey Dowd

Program Faculty:

Catherine Bliss, B.A., California (Santa Cruz); M.A., San Francisco State; Ph.D., New School

Sharon Bzostek, B.A., Rice; M.A., Ph.D., Princeton

Joanna Kempner, B.A., Pennsylvania State; M.A., Ph.D., Pennsylvania

Catherine Lee, B.A., Ph.D., California (Los Angeles)

Lei Lei, B.A., Zhehiang (China); M.Sc., Tilburg (Netherlands); M.A., Central Florida; M.A., Ph.D., SUNY (Albany)

Norah MacKendrick, B.Sc, M.Sc., Alberta; Ph.D., Toronto

Dawne Mouzon, B.A., Rutgers; M.P.H. University of Medicine and Dentistry (New Jersey); M.A., Ph.D., Rutgers

Julie A. Phillips, Ph.D., Pennsylvania

Kristen W. Springer, B.S., California (Santa Cruz); M.P.H., Emory; M.A., Yale; Ph.D., Wisconsin (Madison)

Learning Goals

Learning Goals

1. Students will develop an understanding of physical and mental health, health behaviors and practices, and health care institutions in national and global contexts.

2. Students will learn the social and cultural foundations of how health and health care are conceptualized, and differences in the delivery of health care across disparate social and cultural settings.

3. Students will develop the skills necessary to read and evaluate social science research in an intelligent and critical manner.

4. Students will develop some understanding of the policy implications when health issues and social concerns intersect.

Minor Program

Minor Program

The interdisciplinary minor in health and society consists of at least six courses, which must include 01:920:101 Introduction to Sociology; 01:920:210 Sociology of Medicine and Health Care; and 01:920:307 Mental Illness or 01:920:335 Health and Inequality. In addition, at least one elective must be taken in the Department of Sociology, and at least two electives from other School of Arts and Sciences (SAS) departments affiliated with the minor (see list below). No more than two courses are allowed to overlap with the major, and no more than two electives may be taken from within the same department (except sociology). All courses must be passed with a grade of C or better to earn credit toward the minor.

Required Sociology Courses

01:920:101 Introduction to Sociology (3)

01:920:210 Sociology of Medicine and Health Care (3)

01:920:307 Mental Illness (3)

or 01:920:335 Health and Inequality (3)

Elective Sociology Courses

At least one course must be selected from the following:

01:920:115 The Color of Health: How Does Inequality Get Under the Skin (4)

01:920:227 Population and Society (3)

01:920:232 Sociology of Food and Eating (3)

01:920:303 Social Gerontology (3)

01:920:332 Social Inequalities (3)

01:920:335 Health and Inequality (3)

01:920:359 Environmental Sociology (3)

01:920:361 Sociology of Drug Use (3)*

01:920:410 Sociology of Alcohol Problems (3)

01:920:433 Race, Science, and Medicine (3)

01:920:434 Social Science and Public Policy (3)

01:920:438 Sociology of Age (3)

01:920:440 Sexuality and Society (3)

01:920:462 Sociology of Selected Institutions (3)

Elective Courses from Other SAS Departments

At least two electives must be selected from the following course offerings. No more than two courses can be taken from each department, to ensure breadth of study.

Africana Studies

01:014:347 Health Issues in the African-American Community (3)

Anthropology

01:070:307 Medical Anthropology (3)

Biology

01:119:150 Biology, Society, and Biomedical Issues (3)

01:119:154 Genetics, Law, and Social Policy (3)

Economics

01:220:316 Health Economics (3)

01:220:348 Economics of Social Welfare Programs (3)***

Genetics

01:447:354 Social, Legal, and Ethical Implications of the New Genetics (3)***

History

01:506:226 Contemporary Challenges in International Health (3)

01:506:322 Black Death to Obesity Epidemic: History of Public Health in the West (3)

01:508:328 History of Health and Healing in Africa (3)

01:512:121 Health and Environment in America (3)

01:512:225 Sexuality in America (3)

01:512:230 History of Medicine in Film (3)

01:512:321 Health Care and Society in America (3)

01:512:322 Drugs: A Social History (3)*

Kinesiology and Health

01:377:225 Contemporary Health Issues (3)

Philosophy

01:730:105 or 106 Current Moral and Social Issues (3 or 4)**

01:730:107 or 108 Introduction to Ethics (3 or 4)**

01:730:249 Bioethics (3)**

Political Science

01:790:320 Politics and Social Policy: Lessons from Europe (3)

Psychology

01:830:101 General Psychology (3)

01:830:360 Drugs and Human Behavior (3)*

01:830:333 Adolescent Development (3)

01:830:335 Adult Development and Aging (3)

01:830:340 Psychopathology Psychology (3)

01:830:377 Health Psychology (3)

Religion

01:840:112 Death and Afterlife (3)

01:840:221 Ethical Issues, Religious Responses (3)**

Women's, Gender, and Sexuality Studies

01:988:240 Gender and Science (3)

01:988:487 Language of Women's Health and Health Policy (3)

Notes:

*Students may take no more than two of the following three courses:

01:920:361 Sociology of Drug Use (3)

01:512:322 Drugs: A Social History (3)

01:830:360 Drugs and Human Behavior (3)

**Students may take no more than two of the following four courses:

01:730:105 or 106 Current Moral and Social Issues (3 or 4)

01:730:107 or 108 Introduction to Ethics (3 or 4)

01:730:249 Bioethics (3)

01:840:221 Ethical Issues, Religious Responses (3)

The Department of African, Middle Eastern, and South Asian Languages and Literatures offers a major program (013) with two options: regional concentration and global humanities. The department currently offers six minor programs:

- African Languages (013A)
- Arabic (074)
- Hindi (505)
- Languages and Literatures (013)
- Persian (723)
- Turkish (973)

For more information on these minor programs, please read the descriptions below.

Learning Objectives for the Major

Learning Objectives for the Major

Regional Option (013J)

As an African, Middle Eastern, and South Asian languages and literatures (AMESALL) major with the regional major option, you will demonstrate:

1. listening, speaking, writing, and reading proficiency in one of the languages taught through AMESALL at a level of advanced-low or higher according to the guidelines of the American Council for the Teaching of Foreign Languages (ACTFL);

2. familiarity with a cross-section of the classical literatures of all three regions; and
3. a broad understanding of the literatures of one of the three regions.

Global Humanities Option (013G)

As an AMESALL major with the global humanities option, you will demonstrate:

1. appreciation of major global issues as articulated in Africa, the Middle East, and South Asia and from the perspective of these three regions;
2. understanding of a variety of epistemologies rooted in the cultures of Africa, the Middle East, and South Asia; and
3. proficiency in critical, theoretical, and research-oriented skills in global and comparative cultural studies.

Major Requirements

Major Requirements

Regional Option

The regional option in the African, Middle Eastern, and South Asian languages and literatures (AMESALL) major requires the successful completion of at least 33 credits, with the first two years of language study/proficiency as a prerequisite.

This option is designed to allow students to explore in depth one of the literatures offered by AMESALL, within a regional context. All majors must take the following two courses to complete this major option:

- 01:013:201 Crossroads: Classical Literatures of Africa, the Middle East, and South Asia (3) and
- 01:013:401 Senior Seminar in Literature and Society (3)

Students enrolling in this option must complete at least 6 credits of language courses at the advanced 300 level or higher.

Students must also take one of the following courses, as appropriate to their region of study:

- 01:013:211 Introduction to the Literatures of Africa (3) or
- 01:013:221 Introduction to the Literatures of the Middle East (3) or
- 01:013:231 Introduction to the Literatures of South Asia (3)

Finally, students must complete 18 credits of additional literature, sociolinguistics, or linguistics courses on the region of their concentration. Of these, 9 credits must be upper-level courses at the 300 level or above. These courses must either be taught in AMESALL, cross-listed with AMESALL, or approved by the department chair.

Global Humanities Option

The global humanities option in African, Middle Eastern, and South Asian languages and literatures requires the successful completion of at least 36 credits.

This is an interdisciplinary program of study that provides opportunities to view the world from multiple perspectives, and a framework for understanding and negotiating global realities and challenges in the 21st century.

All majors must take the following three courses to complete this major option:

- 01:013:201 Crossroads: Classical Literatures of Africa, the Middle East, and South Asia (3)
- 01:013:205 Cultural Forces in International Politics (3)
- 01:013:401 Senior Seminar in Literature and Society (3)

Students enrolling in this option must also take two courses from each of the following categories:

Transregional Sociolinguistics Courses

- 01:013:115 History of the Alphabet (1.5)
- 01:013:203 Language and Society in Africa, the Middle East, and South Asia (3)
- 01:013:204 Introduction to Discourse Analysis (3)
- 01:013:225 Global Arabic
- 01:013:285 Language and Globalization (3)
- 01:013:305 Languages in Peril (3)
- 01:013:409 Introduction to Semitic Languages (3)

Transregional Culture Courses

- 01:013:202 Cinemas of Africa and Asia (3)
- 01:013:206 Banned Books (4)
- 01:013:210 World Literature and Social Change (3)
- 01:013:304 Introduction to Translation Studies (3)
- 01:013:307 Introduction to Postcolonial Literature and Theory (3)
- 01:013:365 Bollywood (3)
- 01:013:324 Ottoman Africa (3)
- 01:013:412 Literature and Religion
- 01:013:445 Storytelling in the Muslim World (3)

Majors must also take at least three courses (a total of 9 credits) in any combination of their choice, from the following departmental courses:

- African literature/cinema courses
- Middle Eastern literature/cinema courses
- South Asian literature/cinema courses

In addition, majors will take at least 6 credits, in any combination of their choice, from the following:

- AMESALL's literature/sociolinguistics/cinema/culture courses
- AMESALL's language courses at the intermediate level or above
- Study Abroad program courses
- Approved courses from other units with significant AMESALL content

African, Middle Eastern, and South Asian Languages and Literatures 013 (SAS)

Learning Objectives and Requirements for African Languages Minor (013A)

Learning Objectives and Requirements for African Languages Minor (013A)

Learning Objectives

The objective of the African languages minor is to develop listening, speaking, writing, and reading skills in an African language to the intermediate mid level, as based on the guidelines of the American Council for the Teaching of Foreign Languages (ACTFL).

Requirements

The minor program in African languages consists of 20-22 credits, which must be completed with a grade of C or better in each course.

Minors must take four courses in one African language (Akan/Twi, Arabic, Swahili, or Yoruba) (14-16 credits). They must also take EITHER:

- Two 300-level courses in the language (6 credits), OR
- 01:013:201 Crossroads: Classical Literatures of Africa, the Middle East, and South Asia (3) and *either* 01:013:312 African Folklore and Myth (3) *or* 01:013:211 Introduction to the Literatures of Africa (3)

African, Middle Eastern, and South Asian Languages and Literatures 013 (SAS)

Learning Objectives and Requirements for Arabic Minor (074)

Learning Objectives and Requirements for Arabic Minor (074)

Learning Objectives

The objective of the Arabic minor is to develop listening, speaking, writing, and reading skills in Modern Standard Arabic to the advanced level, as based on the guidelines of the American Council for the Teaching of Foreign Languages (ACTFL).

Requirements

The minor program in Arabic consists of 20 credits, which must be completed with a grade of C or better in each course.
