Demonstrate the ability to analyze and evaluate aeronautical skills and maneuvers performed by a student in an instructional context.

Name
Demonstrate the professionalism and maturity to conduct instrument flight instruction.

Name
Demonstrate scheduling awareness regarding aircraft flight time and training.

AVIP4041 - MULTI-ENGINE RATING FLIGHT TRAINING

General

Course Prefix
AVIP

Course Number
4041

Description
This course provides instruction in the basic and advanced aeronautical knowledge and piloting skills appropriate for a Certified Flight Instructor-Multi-Engine Certificate for the category and class of aircraft for which the student seeks. The course also provides provide flight instruction experiences. Credit may be granted for presenting a valid FAA Certified Flight Instructor Multi-Engine Certificate. Students must possess an FAA Class 2 or above Medical Certificate and be at least 18 years old. Some students may require additional hours of instruction beyond the course minimum to pass the course.Prerequisite: Commercial Pilot Certificate or permission

Learning Outcomes

Objective
Demonstrate scheduling awareness regarding aircraft flight time and training.

Name
Pass the FAA Multi-Engine add-on Practical Exam to the Commercial Pilot Certificate

Name
Log at least 8 hours of dual flight instruction and 5 hours of simulator instruction.

Name
Demonstrate safe ground, flight operations and maneuvers appropriate for a Commercial Pilot with a multi-engine rating.

Name
Demonstrate scheduling awareness regarding aircraft flight time and training.

AVIP4051 - CERT FLIGHT INST MULTIENG FLGT TRN

General

Course Prefix
AVIP

Course Number
4051

Description
This course provides training and experience in airplane ground and flight operations, take-off and landing, flight maneuvers, night flying, and emergency procedures appropriate for a commercial pilot in a multi-engine aircraft. Includes flight instruction in multi-engine basic and complex aircraft and simulators in final preparation for the required FAA Multi-engine add-on Practical Test to the Commercial Pilot Airplane Certificate. Credit may be granted for presenting a valid FAA Commercial Pilot Certificate with a multi-engine rating. Students must possess an FAA Class 2 or above Medical Certificate and be at least 18 years old. Some students may require additional hours of flight instruction beyond the course minimum to pass the course.Prerequisite: CFI Certificate and permission

Learning Outcomes

Learning Outcomes

Name
Demonstrate the ability to recognize business problems and deal appropriately with them.

Name
Provide an overview of business across many facets of the organization.

Name
Explain the big picture of business in a constantly changing economy through readings, lectures, and videos.

Name
Introduce students to techniques for proper resume writing, dressing for success, and interviewing.

Name
Identify problems and find solutions to everyday business problems.

Name
Describe why businesses fail and succeed.

Name
Give an overview of marketing, finance, management, and economics in todays business environment.

BBUS1033 - PERSONAL FINANCE & MONEY MGMT

General

Course Prefix
BBUS

Course Number
1033

Description

This 3-credit hour course provides a comprehensive introduction to personal financial management, focusing on practical skills and informed decision-making. Students will explore financial decision-making processes, income generation, taxation, budgeting, saving, credit management, investments, and risk protection strategies. The course emphasizes evaluating financial institutions, understanding interest and diversification, and developing long-term financial planning skills. Through critical thinking, problem-solving, and workforce literacy, students will build a strong foundation for financial independence and lifelong economic success.Prerequisite: None

Credit Hours

Learning Outcomes

Learning Outcomes

Objective
Analyze personal financial decisions and explain how cognitive biases influence financial behaviors.

Objective
Compare different sources of income, including wages and salaries, and evaluate tax obligations and career pathways.

Objective
Create a personal or family budget and assess the costs and benefits of purchasing goods and services.

Objective
Differentiate between various savings accounts and calculate the impact of interest on financial growth.

Objective
Evaluate credit and loan options by assessing their advantages, disadvantages, and long-term financial implications.

Objective
Develop an investment and retirement plan by analyzing risk, return rates, and diversification strategies.

Objective
Identify potential financial risks and formulate strategies for risk management, including the role of insurance in financial security.

BBUS1103 - FOUNDATIONS OF AI

General

Course Prefix
BBUS

Course Number
1103

Description
This course introduces students to the foundations of artificial intelligence through theological, philosophical, and historical lenses. Key topics include the theology of intelligence and technology, the history of robotics, and an overview of large language models (LLMs). Students will critically examine the implications of AI on society and faith, preparing them to engage thoughtfully in this rapidly evolving field.Prerequisite: None

Learning Outcomes

Learning Outcomes

Objective
Implement management strategies to coordinate information in both formal and informal contexts.

Justification
Assess the effectiveness of communications and suggest methods to augment results.

Name
Demonstrate an understanding of communication theory as it applies to organizations.

Name
Describe the dynamics of effective communications and its ramifications to corporate culture.

Name
Analyze communication flows as to the degree they achieve their intended purposes.

Name
Discuss ways to improve and develop flows of information in both oral and written communication deliveries.

Name
Explain the various fundamental instruments that convey messages for performance.

Name
Implement management strategies to coordinate information in both formal and informal contexts.

Name
Assess the effectiveness of communications and suggest methods to augment results.

BBUS2133 - PRINCIPLES OF FINANCIAL ACCOUNTING

General

Course Prefix
BBUS

Course Number
2133

Description
This course provides an introduction to financial accounting and basic accounting statements. Focus is on business records, the collection of financial data, the development of statements and the interpretation of this information. Extensive work is done on quantitative problem solving.Prerequisite: None

Credit Hours

Minimum Credit Hours:
0

Maximum Credit Hours:

Learning Outcomes

Learning Outcomes

Objective
Perform a basic financial analysis in the areas of profitability, asset utilization, leverage, and liquidity.

Name
Describe the accounting cycle and process.

Name
Explain how financial statements are constructed.

Name
Identify the financial statements included in an annual report.

Name
Record entries in journals and ledgers and be able to complete an accounting cycle.

Name
Perform a basic financial analysis in the areas of profitability, asset utilization, leverage, and liquidity.

Name
Define elasticity and explain what determines whether demand is elastic or inelastic.

Name
Distinguish between monopoly, oligopoly, monopolistic competition, and perfect competition.

Name
Understand how economics impacts households, firms and industries.

Name
Understand the role households play in economics.

Name
Realize the part that competition plays in economics.

Name
Realize the significance of externalities.

Name
Comprehend the economics of labor markets.

BBUS2143 - INTRODUCTION TO FRANCHISING

General

Course Prefix
BBUS

Course Number
2143

Description

This undergraduate course introduces students to the history, development, and evolution of
franchising as a business model and growth strategy. Students explore the roles and opportunities
within franchising, including franchise ownership, franchising an existing business, and employment within franchise organizations.

The course emphasizes critical evaluation of franchise opportunities, including financial, operational, and market considerations. Students assess the key factors that contribute to franchise success and failure and examine the advantages and limitations of franchising as a method of business expansion.

Students also develop an understanding of the legal and regulatory environment governing franchising, including disclosure requirements and franchise agreements. Through self-assessment exercises, students evaluate their personal capabilities and readiness for franchise ownership.

Learning is reinforced through case studies, lectures, and guest speakers, providing practical insights into real-world franchise operations.

Use the balanced scorecard to evaluate performance in an organization.

Name
Compare and contrast financial statements used for internal and external decision purposes.

Name
Describe cost behavior and value added principles.

Name
Prepare a cost-volume-profit analysis.

Name
Use incremental analysis to recommend common business decisions.

Name
Prepare basic pro forma income statements, balance sheets, and related cash flow statements used in the profit planning process.

Name
Evaluate capital investment proposals using payback period and net present value.

Name
Use the balanced scorecard to evaluate performance in an organization.

BBUS3013 - ENTREPRENEURSHIP

General

Course Prefix
BBUS

Course Number
3013

Description
This course will explore the entrepreneurial design process, equipping them with the tools and mindsets to develop innovative solutions for real-world business challenges. Emphasizing creativity, empathy, and iterative problem-solving, students will learn to identify opportunities, create viable business ideas, and prototype solutions using design thinking principles. Learners will engage in an experiential project that allows them to apply these concepts in a practical, hands-on way, fostering collaboration and entrepreneurial thinking. The course integrates a Christian worldview, encouraging students to explore how faith informs ethical decision-making, creativity, and a commitment to social impact. By the end of the course, students will be equipped to design, test, and pitch entrepreneurial ventures that reflect both business acumen and Christian values.Prerequisite: None

Examine factors influencing the determination of a firm’s capital structure.

Name
Describe the function of financial management in a business operation.

Name
Analyze a firms liquidity, profitability, and debt to determine a firms financial condition.

Name
Critique a business strategy based on risk, return, and valuation concepts.

Name
Apply time value of money concepts to analyze investment opportunities including payback period, net present value, and internal rate of return.

Name
Identify the investment opportunities offered by stocks, bonds, and money market instruments.

Name
Use working capital, accounts receivables and inventory to manage short term budgeting needs

Name
Examine factors influencing the determination of a firms capital structure.

BBUS3113 - MANAGING GROWTH THROUGH FRANCHISING

General

Course Prefix
BBUS

Course Number
3113

Description
This course examines the key disciplines required to effectively manage and scale a business through franchising. Students explore the operational and managerial responsibilities of both franchisors and franchisees, with emphasis on how integrated functions support system growth and performance.

Topics include franchise recruitment and selection, training and support systems, human resource management, legal and regulatory considerations, sales development, and marketing within franchise organizations. The course highlights how these functions work together to drive sustainable expansion and operational consistency across franchise systems.

Through lectures, case studies, and guest presentations from industry professionals, students gain practical insights into real-world franchise management. Team-based projects provide opportunities to develop and present strategies for achieving managerial effectiveness and long- term franchise success.

Name
Comprehend basic legal principles associated with normal business transactions.

Name
Discuss effectively the tenets of contract law, principal and agency law, and basic intellectual law.

Name
Describe the process of forming various legal for-profit and nonprofit entities.

Name
Examine a case study related to a legal concept discussed in class.

BBUS3413 - FRANCHISE ENTREP & LEADERSHIP

General

Course Prefix
BBUS

Course Number
3413

Description

This undergraduate course examines the principles of entrepreneurship and leadership within the
context of franchising. Students explore how franchise systems are created, developed, and
scaled, with emphasis on the entrepreneurial mindset required to launch and grow a franchise
concept as well as the leadership capabilities needed to manage and sustain a franchise
organization.

The course focuses on opportunity recognition, business model development, and the strategic
decision to franchise as a method of expansion. Students analyze the roles of founders,
franchisors, and franchisees, and evaluate how leadership influences culture, performance, and
long-term system success.

Through case studies, lectures, and guest presentations, students gain practical insights into real-
world franchise development and leadership challenges. Experiential learning components,
including team-based projects, provide opportunities for students to apply entrepreneurial and
leadership concepts by developing and presenting a franchise venture or growth strategy.
The course emphasizes critical thinking, ethical decision-making, and effective communication,
preparing students to pursue opportunities as franchise entrepreneurs, leaders within franchise
organizations, or informed participants in franchise systems.

BINT5033 - LUKE-ACTS

General

Course Prefix
BINT

Course Number
5033

Description
This course examines the narratives of Luke as he presents the story of Jesus and the story of the Early Church to Theophilus. Special attention will be given to the text with regard to its political, social and religious setting in a Greco-Roman and Jewish context. The theology that arises from the literary structure that connects these books will be investigated. The nature and function of the Spirit will be addressed, especially in relation to ecclesiology, soteriology and eschatology, as well as Pentecostal theologies that have developed from Luke's writings. The mission and message of the early Christian community will be investigated.

Learning Outcomes

Learning Outcomes

Objective
Describe the political, social and religious background of Luke/Acts.

Objective
Analyze the literary relationship between Luke and Acts.

Objective
Determine the theology that developed out of the literary patterns of these books.

Objective
Explain the pneumatological aspects of these works with regard to ecclesiology, ethnic and gender inclusion, Christology, and eschatology, including how eschatology informs apostolic proclamation.

Objective
Discuss Pentecostal theologies based upon Luke-Acts.

Objective
Develop models for engaging the continuing work of the church based on various exegetical and theological themes.

BINT5043 - PASTORAL EPISTLES

General

Course Prefix
BINT

Course Number
5043

Description
This course is a historical and exegetical exploration of 1 and 2 Timothy and Titus, examining how they functioned in the church context to which they were written. Themes will be addressed through exegetical study, including ecclesiastical organization, relationship between orthodoxy and heresy, the role of women in the household and the church, pneumatological witness to "sound doctrine," and pastoral identity and function. The implications of these themes will be related to the present church and culture.

BINT5063 - GREEK III

General

Course Prefix
BINT

Course Number
5063

Description
This course introduces students to intermediate vocabulary, grammar, and syntax of Koine Greek. It is a continuation of BINT 5023 Greek 2. The course analyzes the grammar and syntax of the Johannine Epistles.

BINT5073 - JESUS AND THE GOSPELS

General

Course Prefix
BINT

Course Number
5073

Description
This course explores specific books, focusing on their genre, literary features, and theological themes. Attention is given to the life and teachings of Jesus as well as Christology and the influence of the Gospels on the Church. The professor may overview the literature or emphasize one or more specific books.

Complete ALL of the following Courses:

- BIBL5053 - BIBLICAL INTERPRETATION AND
  OR BIBL5553 - FOUNDATIONS OF NT LITERATURE AND

Learning Outcomes

Learning Outcomes

Objective
Explain the background issues related to authorship, provenance, and date of the Gospels.

Objective
Identify the structure and literary features of the Gospels.

Objective
Articulate the mission and ministry of Jesus as presented in the Gospels

Objective
Analyze pertinent theological themes in the Gospels.

Objective
Evaluate how the Gospels contribute to Christology.

BINT5083 - NEW TESTAMENT EPISTLES

General

Course Prefix
BINT

Course Number
5083

Description
This course examines the genre of New Testament epistles, focusing on their theology and influence upon the development of the church during the first century. Attention is given to major themes as well as commonalities and differences in the writings. The professor may overview the literature or emphasize one or more specific books.

Learning Outcomes

Objective
Identify the literary structure of these books.

Objective
Demonstrate a knowledge of the various theological themes and issues relating represented in this literature.

Objective
Demonstrate knowledge of the issues relating to authorship of the writings.

Objective
Identify various moral and ethical principles that are established in the literature.

Objective
Apply the teachings of this literature to the contemporary North American church and culture.

BINT5093 - REVELATION

General

Course Prefix
BINT

Course Number
5093

Description
This course analyzes the historical setting, language, symbolism and theology of the Book of Revelation. Special attention is given to the book's genre (i.e., apocalyptic) and to its influence on Christian eschatology.

BINT5133 - LUCAS-HECHOS DE LOS APÓSTOLES

General

Course Prefix
BINT

Course Number
5133

Description
Este curso examina las narrativas de Lucas mientras presenta la historia de Jesús y la historia de la Iglesia Primitiva a Teófilo. Se prestará especial atención al texto en relación con su contexto político, social y religioso en un entorno grecorromano y judío. Se investigará la teología que surge de la estructura literaria que conecta estos libros. Se abordará la naturaleza y función del Espíritu, especialmente en relación con la eclesiología, la soteriología y la escatología, así como las teologías pentecostales que se han desarrollado a partir de los escritos de Lucas. Se investigará la misión y el mensaje de la comunidad cristiana primitiva.

Learning Outcomes

Learning Outcomes

Objective
Describir el trasfondo político, social y religioso de Lucas-Hechos.

Objective
Analizar la relación literaria entre Lucas y Hechos.

Objective
Determinar la teología que se desarrolló a partir de los patrones literarios de estos libros.

Objective
Explicar los aspectos pneumatológicos de estas obras con respecto a la eclesiología, la inclusión étnica y de género, la cristología y la escatología, incluyendo cómo la escatología informa la proclamación apostólica.

Objective
Discutir las teologías pentecostales basadas en Lucas-Hechos.

Objective
Desarrollar modelos para involucrarse en el trabajo continuo de la iglesia basado en varios temas exegéticos y teológicos.

BINT5273 - JESÚS Y LOS EVANGELIOS

General

Course Prefix
BINT

Course Number
5273

Description
Este curso explora los libros del Evangelio, centrándose en su género, características literarias y temas teológicos. Se presta atención a la vida y enseñanzas de Jesús, así como a la cristología y la influencia de los Evangelios en la Iglesia. El profesor puede hacer una visión general de la literatura o enfatizar uno o más libros específicos.Requisito previo: BIBL 5253 o BIBL 5283

Learning Outcomes

Learning Outcomes

Objective
Explicar los problemas de fondo relacionados con la autoría, el origen y la fecha de los Evangelios.

Objective
Identificar la estructura y las características literarias de los Evangelios.

Objective
Articular la misión y el ministerio de Jesús tal como se presenta en los Evangelios.

Objective
Analizar los temas teológicos pertinentes en los Evangelios.

Objective
Evaluar cómo los Evangelios contribuyen a la cristología.

BINT5283 - EPÍSTOLAS DEL NUEVO TESTAMENTO

General

Course Prefix
BINT

Course Number
5283

Description
Este curso examina el género de las epístolas del Nuevo Testamento, enfocándose en su teología y su influencia en el desarrollo de la iglesia durante el primer siglo. Se presta atención a los temas principales, así como a las similitudes y diferencias en los escritos. El profesor puede ofrecer una visión general de la literatura o enfatizar uno o más libros específicos.Requisito previo: BIBL 5253 o BIBL 5283

Learning Outcomes

Learning Outcomes

Objective
Examine data gathered from genetic experiments and apply it to patterns of inheritance.

Name
Identify the parts, functions and properties of a microscope and demonstrate the ability to use it correctly.

Name
Identify the basic structure of a eukaryotic cell and explain differences in plant and animal cell structure.

Name
Apply the scientific method to actual experimental problems.

Name
Identify the structural features of mitosis and meiosis.

Name
Understand data gathered from genetic experiments and apply it to patterns of inheritance.

Corequisite

Complete ALL of the following Courses:
- BIOL1243 - BIOLOGY II

Learning Outcomes

Learning Outcomes

Objective
Explain the methods and procedures of symbiotic relationships.

Name
Use Chi-square in determining statistical probabilities of Mendelian traits.

Name
Use karyotyping in determining human chromosomal abnormalities.

Name
Build a DNA model and simulate replication, transcription, and translation through model manipulation.

Name
To classify fungi by their structural features into various taxonomic groups.

Name
To classify protists by their structural features into their supergroups and groups using distinguishing features for each feature.

Name
Recognize the differences between vascular and nonvascular plants.

Name
Know the methods and procedures of symbiotic relationships.

Learning Outcomes

Learning Outcomes

Objective
Describe the key features of the nervous system, including nervous tissue, the spinal cord, the brain, and cranial nerves.

Name
Describe the body and its orientation using the language of anatomy.

Name
Demonstrate proper care and use of the compound microscopes, and use them to identify epithelial, connective, muscle and nervous tissues.

Name
Identify and describe the organization and components of the human skeleton and joints.

Name
Describe general skeletal muscle structure, and identify the muscles of the face, head, neck, chest, shoulder, upper limbs, abdominal walls, pelvic outlets, hips, and lower limbs.

Name
Describe the key features of the nervous system, including nervous tissue, the spinal cord, the brain, and cranial nerves.

BIOL218L - HUMAN ANATOMY AND PHYSIOLOGY II LAB

General

Course Prefix
BIOL

Course Number
218L

Description
Exercises in this course will reinforce the lecture topics through experimentation, microscopic investigation, and dissection (where applicable).

Complete ALL of the following Courses:

- BIOL2183 - HUMAN ANATOMY AND PHYSIOLOGY II

Learning Outcomes

Learning Outcomes

Objective
Describe the structure and function of male and female reproductive systems.

Name
Describe the functions of the endocrine system.

Name
Describe the structure of the heart and the major arteries and veins, as well as demonstrate how to take blood pressure.

Name
Describe the structure and function of the lymphatic system.

Name
Identify the organs of the digestive system.

Name
Identify the organs of the respiratory system.

Name
Describe the structure of the kidney.

Name
Describe the structure and function of male and female reproductive systems.

BIOL240L - INTRODUCTION TO MICROBIOLOGY LAB

General

Course Prefix
BIOL

Course Number
240L

Corequisite

Complete ALL of the following Courses:
- BIOL2533 - GENERAL GENETICS

Learning Outcomes

Learning Outcomes

Objective
Demonstrate the different modern laboratory techniques for isolation and identification of different macromolecules.

Name
Perform laboratory tests dealing with molecular function tests.

Name
Apply different techniques in genetics, genetic engineering, and molecular biology.

Name
Communicate results of practical investigations through report writing.

Name
Collect, record, and interpret laboratory data with appropriate data analysis.

Name
Demonstrate the different modern laboratory techniques for isolation and identification of different macromolecules.

BIOL333L - HISTOLOGY LAB

General

Course Prefix
BIOL

Course Number
333L

Description
This course is a microscopic study of human body organ cells, basic tissue types, and organization into specific organs and organ systems.

Credit Hours

Learning Outcomes

Learning Outcomes

Objective
Explain the physiological and anatomical mechanisms of common dysfunction.

Name
Communicate information on tissue and organ structure and function using anatomical and physiological terminology.

Name
Explain the interrelationships between organ systems and physiological processes.

Name
Recognize the complementary relationship of structure and function and describe the basic metabolic processes of the organ systems.

Name
Explain and apply basic principles of histology to other courses as they apply to anatomic and physiologic processes.

Name
Explain the major interactions of each body tissue and organ.

Name
Explain the physiological and anatomical mechanisms of common dysfunction.

BIOL401L - MICROBIOLOGY LAB

Learning Outcomes

Learning Outcomes

Name
Identify the various components of a cell with a focus on eukaryotic cell structure.

Name
Describe the basic types of biological molecules and list their basic structure and function.

Name
Elucidate the basic functions of the cell including the processes of cellular respiration and transport across membranes.

Name
Describe the various phases in the cell cycle including mitotic cell division.

Name
Students will explore evidence-based scientific findings using the scientific method to analyze and solve problems.

BIOL1243 - BIOLOGY II

General

Course Prefix
BIOL

Course Number
1243

Description
This course is an overview of cell structure, physiology, genetics, heredity, botany, zoology, and classification of living forms.

Credit Hours

Minimum Credit Hours:
3

Maximum Credit Hours:
3

(Credit Hours) Value:
3

Contact Hours (not needed)

Learning Outcomes

Learning Outcomes

Name
Understand the basic principles of genetics as it relates to inheritance, protein production from DNA and the regulation of gene expression.

Name
Students will be introduced to the principle applications of biotechnology and how those tools are used to make scientific discoveries.

Name
Students will understand the various forms of life and the biological diversity that exists on earth. This includes both non-living (viruses) and living (bacteria, plants, and animals) organisms.

BIOL1333 - ESSENTIALS OF HUMAN A & P

General

Course Prefix
BIOL

Course Number
1333

Description
This course is a study of the structure, formation and function of the eleven human body systems. Concurrent enrollment in BIOL 133L is required. This course is required for Psychology majors and meets general education requirements for non-science majors only.Corequisite: BIOL 133L

Credit Hours

Learning Outcomes

Learning Outcomes

Name
Describe the hierarchy of biological structure and organization.

Name
Comprehend basic biological chemistry.

Name
Discuss human body systems, including those involved in support, movement, transport of molecules, digestion, and reproduction.

Name
Define proper body orientation and terminology.

Name
Identify cellular organelles, reciting cellular structure and function.

Name
Recognize organs and structures of all body systems and define their individual functions.

Name
Explore evidence-based scientific findings using the scientific method to analyze and solve problems.

BIOL1334 - ESSENTIALS OF HUMAN A&P

Learning Outcomes

Learning Outcomes

Name
Explain an overview of the hierarchy of biological structure and organization.

Name
Describe basic biological chemistry.

Name
Use anatomical terminology to identify and describe locations of major organs of each system covered: Integumentary system, skeletal system, muscular system, joints, and nervous system.

Name
Explain interrelationships among molecular, cellular, tissue and organ function in each system.

Name
Describe the interdependency and interactions of the systems.

Name
Explain contributions of organs and systems to the maintenance of homeostasis. As well as identify causes and effects of homeostatic imbalances.

BIOL2084 - HUMAN ANATOMY & PHYSIOLOGY I

General

Course Prefix
BIOL

Course Number
2084

Description
This course is the first of a two-term sequence in human anatomy and physiology. Course topics include scientific measurement, basic inorganic and organic chemistry, cytology, and histology followed by detailed investigation through experimentation, microscopic investigation, and dissection (where applicable) of the skin, skeleton, joints, muscles, and nervous system.

BIOL2113 - BIOETHICS

General

Course Prefix
BIOL

Course Number
2113

Description
This course is designed to investigate the ethical issues pertaining to human life such as abortion, physician-assisted dying and suicide, the beginning and end of personhood, stem cell research, cloning, animal experimentation, genetic engineering, eugenics, and assisted reproductive technology procedures. Other matters pertaining to biological sciences and ethics can be included.Prerequisite: BIOL 1243 or BIOL 2183

Credit Hours

Minimum Credit Hours:
3

Maximum Credit Hours:
3

(Credit Hours) Value:
3

Contact Hours (not needed)

(Contact Hours) Value (not needed) :
3

Repeatable:
Yes

Number Of Repeats:
3

Number Of Credits:
3

Learning Outcomes

Learning Outcomes

Name
Discuss, defend, support, and critique various ethical arguments.

Name
Summarize and research historical cases that shape and define bioethical issues.

Name
Explore and explain scientific/clinical/medical procedures or techniques and compare them to current trends or technologies.

Name
List the policies and laws that govern bioethical issues.

BIOL2183 - HUMAN ANATOMY AND PHYSIOLOGY II

General

Course Prefix
BIOL

Course Number
2183

Description
This course is a continuation of BIOL 2083. Students will study the following topics: the circulatory system (with special emphasis on the heart), the lymphatic system, the immune system, the respiratory system, the digestive system, cellular metabolism, the urinary system, fluid-electrolyte balance, the endocrine system, reproduction, development, and a brief survey of genetics.

Credit Hours

Minimum Credit Hours:
3

Maximum Credit Hours:
3

(Credit Hours) Value:
3

Contact Hours (not needed)

(Contact Hours) Value (not needed) :
3

Repeatable:
Yes

Number Of Repeats:
3

Number Of Credits:
3

Learning Outcomes

Learning Outcomes

Name
Discuss important endocrine organs, hormones, and targets.

Name
Describe the functions of blood and the heart and identify major blood vessels.

Name
Explain the lymphatic system and process of immunity.

Name
Understand functioning of the lungs, diaphragm, and components of the upper and lower respiratory tract, and describe the mechanics of breathing.

Name
Identify the major components and processes of the digestive system.

Name
Demonstrate knowledge of urinary organs and their functions.

Name
Identify important organs of the reproductive system.

BIOL2184 - HUMAN ANATOMY & PHYSIOLOGY II

General

Course Prefix
BIOL

Course Number
2184

Description
This course is a continuation of BIOL 2084. Students will study the following topics: the circulatory system (with special emphasis on the heart), the lymphatic system, the immune system, the respiratory system, the digestive system, cellular metabolism, the urinary system, fluid-electrolyte balance, the endocrine system, reproduction, development, and a brief survey of genetics. These topics will be reinforced. through experimentation, microscopic investigation, and dissection.Prerequisites: BIOL 2084

BIOL2403 - INTRODUCTION TO MICROBIOLOGY

General

Course Prefix
BIOL

Course Number
2403

Description
This course is an introduction to the biology of microorganisms, including structure and physiology of bacteria, algae, viruses, protozoa, and lower fungi. This course is primarily for students in the BSN program and focuses on organisms relevant to their field.

Credit Hours

Minimum Credit Hours:
3

Maximum Credit Hours:
3

(Credit Hours) Value:
3

Contact Hours (not needed)

(Contact Hours) Value (not needed) :
3

Repeatable:
Yes

Number Of Repeats:
3

Number Of Credits:
3

Learning Outcomes

Learning Outcomes

Name
Understand the dynamics of prokaryotic and eukaryotic growth and the interaction of humans and microbes.

Name
Describe aseptic technique and memorize specific clinical applications of this procedure.

Name
Understand and memorize certain animal viruses and other human pathogens.

Name
Discuss the principles relating immune function and the microbial world.

Name
Compare the biological mechanism of action of different antimicrobial medications.

BIOL2533 - GENERAL GENETICS

General

Course Prefix
BIOL

Course Number
2533

Description
This course is an introduction to genetics, including the fundamental concepts of Mendelian and molecular genetics.

Credit Hours

Minimum Credit Hours:
3

Maximum Credit Hours:
3

(Credit Hours) Value:
3

Contact Hours (not needed)

(Contact Hours) Value (not needed) :
0

Repeatable:
Yes

Number Of Repeats:
3

Number Of Credits:
3

Learning Outcomes

Learning Outcomes

Name
Explain the underlying concepts and principles of the science of genetics.

Name
Identify the various aspects of a classical genetic analysis.

Name
Describe the molecular biology of genes.

Name
Evaluate the genetics of viruses, bacteria, transposons, and eukaryotic organelles.

Name
Describe the techniques of molecular genetics and the molecular analysis of genes and gene products.

Name
Know the basic methods of regulating gene expression in prokaryotes and eukaryotes.

Name
Evaluate the genetic control of biological processes.

BIOL2633 - CELL & MOLECULAR BIOLOGY

General

Course Prefix
BIOL

Course Number
2633

Description
This course is an in-depth study of the structure and molecular functions of a composite cell. The anatomy and physiology of the cell will be covered.

Credit Hours

Minimum Credit Hours:
3

Maximum Credit Hours:
3

(Credit Hours) Value:
3

Contact Hours (not needed)

(Contact Hours) Value (not needed) :
3

Repeatable:
Yes

Number Of Repeats:
3

Number Of Credits:
3

Learning Outcomes

Learning Outcomes

Name
Investigate protein structure and function and analyze their role as enzymes and molecular switches.

Name
Review DNA structure, chromosomal structure, organization, and remodeling.

Name
Describe in detail the processes of DNA replication, DNA repair, DNA recombination, transcription, RNA splicing, and translation.

Name
Understand the molecular mechanisms that create specialized cell types and how transcriptional and post-transcriptional controls work.

Name
Explore the architecture of tissues, cell junctions, the role of stem cells in tissue renewal, and repair.

BIOL3163 - IMMUNOLOGY

General

Course Prefix
BIOL

Course Number
3163

Description
In this course, students explore fundamental immunological processes to provide an orientation to immunology. Topics covered include innate and adaptive immunity as well as the function and anatomy of the cells, tissues, and organs of the immune system.

Credit Hours

Minimum Credit Hours:
3

Maximum Credit Hours:
3

(Credit Hours) Value:
3

Contact Hours (not needed)

(Contact Hours) Value (not needed) :
3

Repeatable:

Number Of Repeats:
3

Number Of Credits:
3

Learning Outcomes

Learning Outcomes

Name
Understand central immune processes including the adaptive and innate responses.

Name
Identify the cells, tissues and organs of the immune system.

Name
Understand the basic concepts of passive and acquired immunity and the role of antigens, cytokines, immunoglobulins, and complement in these processes.

Name
Assess the processes of antigen presentation, cell-mediated immunity, and humoral-mediated immunity.

Name
Characterize inflammation and immune response regulation by the body.

BIOL3223 - LIFE ORIGINS

General

Course Prefix
BIOL

Course Number
3223

Description
This course is an introduction to modern biological theories of the origin of life compared with the creation model of life origins.

Credit Hours

Minimum Credit Hours:
3

Maximum Credit Hours:
3

(Credit Hours) Value:
3

Contact Hours (not needed)

(Contact Hours) Value (not needed) :
3

Repeatable:
Yes

Number Of Repeats:
3

Number Of Credits:
3

Learning Outcomes

Learning Outcomes

Name
Compare and contrast creation and evolutionary views on the origin of life.

Name
Explore the scientific and biblical perspectives of microevolution and macroevolution.

Name
Understand and explain the common themes in modern biology from a Christian creationist perspective compared with a Darwinian perspective.

Name
Increasingly engage in critical and creative thinking and apply these skills in writing and reading.

Name
Understand effective structure and development of a research paper, including proper citation and documentation of sources.

BIOL3333 - HISTOLOGY

General

Course Prefix
BIOL

Course Number
3333

Description
This course is a microscopic study of human body organ cells, basic tissue types, and organization into specific organs and organ systems.

Credit Hours

Minimum Credit Hours:
3

Maximum Credit Hours:
3

(Credit Hours) Value:
3

Contact Hours (not needed)

(Contact Hours) Value (not needed) :

Number Of Credits:
3

Learning Outcomes

Learning Outcomes

Name
Understand the basic methods used in preparing standard histological preparations from tissue extraction through the final process of visualization of cells under the microscope.

Name
Demonstrate an advanced knowledge of the cell with special emphasis on the specific structural components that give the cell a unique and identifiable histological feature.

Name
Identify the primary histological features of the major cell types of all the various tissues in the human body.

Name
Analyze and evaluate the important histological features of the various cell types in the tissues of the human body as they relate to the function of those tissue types.

BIOL3703 - MEDICAL TERMINOLOGY

General

Course Prefix
BIOL

Course Number
3703

Description
This course teaches the medical terminology and vocabulary used by individuals working in healthcare settings. The focus of this course is on medical and clinical terminology relating to human anatomy and physiology from an organ system perspective. An emphasis is placed on those terms relating to the clinical diagnosis and pathophysiology of disease states. Students will also learn how to use prefixes, suffixes, and word roots to determine the meaning of new terms. Common shorthand used in the medical field such as acronyms and clinical abbreviations are merged to ready students for clinical engagement.

Credit Hours

Minimum Credit Hours:
3

Maximum Credit Hours:
3

Number Of Repeats:
3

Number Of Credits:
3

Learning Outcomes

Learning Outcomes

Name
List, define and identify medical terms for different body systems, as well as the components of these terms.

Name
Interpret important medical, diagnostic and laboratory abbreviations and terms.

Name
Understand concepts in medical equipment, standard medical treatments.

Name
Be able to correctly pronounce medical terms.

BIOL4013 - MICROBIOLOGY

General

Course Prefix
BIOL

Course Number
4013

Description
This course is an introduction to the biology of microorganisms, including the structure and physiology of bacteria, algae, viruses, protozoa, and lower fungi.

Credit Hours

Minimum Credit Hours:
3

Maximum Credit Hours:
3

(Credit Hours) Value:

Course Requisites

Type
Completion Requirement

Prerequisite

Complete ALL of the following Courses:
- BIOL2633 - CELL & MOLECULAR BIOLOGY

Corequisite

Enroll in the following Courses:
- BIOL401L - MICROBIOLOGY LAB

Learning Outcomes

Learning Outcomes

Name
Understand the dynamics of prokaryotic and eukaryotic growth and the interaction of humans and microbes.

Name
Describe bacterial genetics.

Name
Understand component parts of viruses and the viral life cycle.

Name
Appreciate the diversity of the normal flora of humans as well as memorize the most common pathogens.

Name
Compare the biological mechanism of action of different antimicrobial medications.

Name
Understand the importance of engaging audiences through participation in a poster presentation.

Name
Critically analyze peer-reviewed journal articles thereby increasing their confidence as reviewers.

BIOL4023 - BIOLOGY FIELD STUDY

General

Course Prefix
BIOL

Course Number
4023

Description
This course is a practical experience in biological research for one full semester, approved by the department chair, and supervised by a qualified off-site supervisor, who provides continuous evaluation of the intern's performance. Approval by department chair

Credit Hours

Minimum Credit Hours:
1

Maximum Credit Hours:

6

Learning Outcomes

Learning Outcomes

Name
Apply the scientific method to answer/solve a biological question.

Name
Evaluate their data and refine their hypotheses accordingly.

Name
Defend their independent research findings and conclusions.

Name
Outline future experimentation based on their research findings.

BIOL4033 - RESEARCH RESIDENCY PROGRAM

General

Course Prefix
BIOL

Course Number
4033

Description
This course is intended to provide a practical experience in clinical research at an inpatient setting for one full semester, approved by the department chair, and spearheaded by a qualified off-site supervisor who provides continuous evaluation of the intern's performance. This course will help establish the concepts that guide a successful research design. Furthermore, this course will expose students to the various opportunities of growth found within a large regional medical center.

Credit Hours

3

Learning Outcomes

Learning Outcomes

Name
Describe the research process to answer a biologic/clinical question.

Name
Describe the ethics of conducting biologic/clinical research on human subjects.

Name
Distinguish scenarios in which retrospective or prospective approaches are needed to answer a biologic/clinical question.

Name
Apply the principles of the research process to a research project involving human subjects.

Name
Defend their research findings and conclusions stemming from a biologic/ clinical question.

Name
Develop a proposal for future biologic/clinical research.

Name
Apply principles of therapeutic and scientific communication to prospective participants of clinical trials of investigative drugs/devices

Name
Describe how the electronic medical record informs delivery of care and facilitation of research.

Name
Present the research at the science symposium at the end of the semester.

BIOL4133 - DEVELOPMENTAL BIOLOGY

General

Course Prefix
BIOL

Course Number
4133

Description
This course is the study of embryology focusing on the anatomical, cellular, and molecular aspects of germ cell formation, fertilization, early development and morphogenesis, induction, and differentiation as they apply to vertebrates with a specific focus on human development.

Credit Hours

Minimum Credit Hours:
3

Maximum Credit Hours:
3

Learning Outcomes

Learning Outcomes

Name
Understand the current theories and applications of embryology.

Name
Examine early embryonic and fetal development through to birth in humans.

Name
Investigate the developmental anatomy of the various major organ systems of the body.

Name
Examine the common principles and differences underlying normal and abnormal development of vertebrates with a focus on humans.

BIOL4223 - PRINCIPLES OF NEUROSCIENCE

General

Course Prefix
BIOL

Course Number
4223

Description
In this course, students are introduced to the organization and function of the nervous system. Topics covered include neural signaling, channels and transporters, neurotransmitters, synaptic transmission, sensory processing, synaptic plasticity, and memory. Students will also be introduced to pathophysiology of neurological and psychological disorders.

Credit Hours

Minimum Credit Hours:
3

Maximum Credit Hours:
3

Learning Outcomes

Learning Outcomes

Name
Describe the fundamental mechanisms underlying normal function of neurons.

Name
Describe the contributions of anatomical, physiological, behavioral, pharmacological, developmental, and cell and molecular bases of neuroscience.

Name
Identify structural and functional areas of nervous system

Name
Apply knowledge of functional mechanisms and their regulation to explain the pathophysiology underlying common neurological and psychiatric diseases.

Name
Use primary literature readings to understand basic physiological principles and mechanisms in neuroscience.

Name
Read and critically evaluate the design, results and conclusions of experiments published in primary neuroscience literature

Name
Increasingly engage in critical and creative thinking and apply these skills in writing on basic physiological principles and mechanisms found in the primary literature.

Name
Understand effective structure and development of a research paper, including proper citation and documentation of sources.

BIOL4373 - RESEARCH IN BIOLOGICAL SCIENCES

General

Course Prefix
BIOL

Course Number
4373

Description
This course is a practical experience in biological research for one full semester, approved by the department chair, and supervised by a principal investigator, who provides continuous evaluation of the student's research.

Credit Hours

Minimum Credit Hours:
1

Maximum Credit Hours:
3

Learning Outcomes

Learning Outcomes

Name
Apply scientific research methods to solve significant biological questions.

Name
Evaluate their data and refine their experiments accordingly.

Name
Present their independent research findings and the conclusions they have made.

Name
Outline future experimentation based on their current research findings.

Name
Work toward the publication of their research findings.

BIOL4433 - DIAGNOSTIC CLINICAL FOUNDATIONS

General

Course Prefix
BIOL

Course Number
4433

Description
This course will mainly utilize Problem-based learning, or PBL, as its pedagogical practice. This practice is employed in many medical and graduate programs. While there are variants of the technique, the approach includes the presentation of a clinical case or vignette to a small group of students who engage in discussion and problem solving over several class meetings. The professor will act as a facilitator who only provides supportive guidance for the students. The discussions of the problem is structured to enable students to create conceptual models to explain the multidisciplinary problem presented in the case. As students reveal the limits of their knowledge, they identify learning issues. Between classes, students research their learning issues and share results at the next class session.

Credit Hours

Learning Outcomes

Learning Outcomes

Name
Acquire, synthesize, and apply basic science knowledge in a clinical context.

Name
Engage in critical thinking and problems-solving.

Name
Develop the ability to evaluate their own learning and collaborate with peers.

Name
Effectively use information technology and identify the most appropriate resources for knowledge acquisition and hypothesis testing.

Name
Demonstrate knowledge and behavior that represents the highest standard of medical research and clinical practice.

BIOL4633 - SPECIAL TOPICS IN BIOLOGY

General

Course Prefix
BIOL

Course Number
4633

Description
A seminar for the investigation of specialized topics in biology not addressed by other courses. Content is determined by the department to address special needs or interests. May be repeated for a maximum of six hours. The same topic may not be repeated.

BIOL4903 - SENIOR CAPSTONE

General

Course Prefix
BIOL

Course Number
4903

Description
Students will be required to propose a scientific research study related to the chosen concentration using the knowledge gained through the respective degree programs. This course is designed to review the student portfolio which will be developed over the course of obtaining the General Biology or Biology degree. Culmination of the student's degree will require completion of all items listed in the requirements for the student portfolio, including completion of research papers, presentations, and demonstration of knowledge of specific concepts in Chemistry, Biology, and Physics.

BIOT1133 - OLD TESTAMENT SURVEY

General

Course Prefix
BIOT

Course Number
1133

Description
This course presents a synthetic study of the books of the Old Testament in their religious and historical context. The class develops an appreciation for each book as a unit and for its contribution to God's plan of redemption as it develops in the Old Testament. Required for all majors.

Credit Hours

Minimum Credit Hours:
0

BIOT1433 - OLD TESTAMENT INTERPRETATION

General

Course Prefix
BIOT

Course Number
1433

Description
The course serves as an introduction to Old Testament interpretation. It provides an elemental framework for interpreting the Old Testament by exploring its ancient Near Eastern contexts; discussing literary, thematic, and theological constructs; and demonstrating how it informs Christian thought and practice.Prerequisite: BIBL 1113

Credit Hours

Minimum Credit Hours:
3

Maximum Credit Hours:

Simple Requirements

Course Requisites

Type
Completion Requirement

Prerequisite

Complete ALL of the following Courses:

- BIBL1113 - THE STORY OF SCRIPTURE

Learning Outcomes

Learning Outcomes

Objective
Demonstrate a basic understanding of the canon, including its formation, transmission, and reliability as Scripture.

Objective
Explain the process of OT interpretation and how to employ basic research tools.

Objective
Identify the ancient Near Eastern cultural, historical, and geographic contexts that inform biblical interpretation.

Objective
Recognize genres of the OT and how they inform interpretation.

Objective
Identify key themes, unique characteristics, and theological constructs of the OT that inform the Christian faith.

BIOT2003 - INTERMEDIATE HEBREW A

General

Course Prefix
BIOT

Course Number
2003

Description
This course introduces students to intermediate Biblical Hebrew grammar and syntax. Students will develop and improve their vocabulary and translation skills as they do rapid reading of the Hebrew Bible. Prerequisite: BIOT 1103 & BIOT 1113

Credit Hours

Minimum Credit Hours:
3

Maximum Credit Hours:
3

Complete ALL of the following Courses:

- BIOT1103 - BEGINNING HEBREW A
  AND BIOT1113 - BEGINNING HEBREW B

Learning Outcomes

Learning Outcomes

Objective
Sight-read vocabulary words used 50 times or more in the Hebrew Bible.

Objective
Translate and explain the Hebrew grammar and syntax of selective narrative passages of the Bible with the use of lexicons.

Objective
Use standard Hebrew language reference tools to assist in describing the Hebrew grammar and syntax.

BIOT2033 - ISAIAH

General

Course Prefix
BIOT

Course Number
2033

Description
A study of the ministry of Isaiah, with emphasis given to his times, his message to Judah, and his Messianic prophecies. Attention is given to the problem of authorship.

Completion Requirement

Prerequisites

Complete ALL of the following Courses:

- BIOT1103 - BEGINNING HEBREW A
  AND BIOT1113 - BEGINNING HEBREW B
  AND BIOT2003 - INTERMEDIATE HEBREW A

Learning Outcomes

Learning Outcomes

Objective
Sight-read vocabulary words used 25 times or more in the Hebrew Bible

Objective
Translate and explain the Hebrew grammar and syntax of selective narrative passages of the Bible with the use of lexicons.

Objective
Write a scholarly exegesis paper based on a specific Hebrew passage.

BIOT2223 - CHRIST IN THE OLD TESTAMENT

General

Course Prefix
BIOT

Course Number
2223

Description
This course examines the presence and work of Christ in the Old Testament, exploring major themes such as prophecy, typology, creation, exodus, temple, atonement, and the Psalms. Attention is given to how the Old Testament anticipates and reveals Christ through narrative, poetry, and symbolism, and to the interpretive methods used by biblical authors and the early church. Students will engage with primary texts, scholarly resources, and practical applications to develop the skills necessary to interpret the Old Testament Christocentrically and, in leadership roles, to guide others in reading Scripture in light of the gospel.

Credit Hours

Number Of Credits:
3

Learning Outcomes

Learning Outcomes

Name
Articulate a theological rationale for a Christocentric reading of the Old Testament by explaining how Second Temple expectations and New Testament usage shape Christian interpretation.

Name
Interpret Old Testament passages Christologically by distinguishing and applying prophecy, typology, Christophanies, intertextual allusions, and canonical patterns.

Name
Analyze and exegete major redemptive themes (e.g., creation/new creation; exodus and return; temple/tabernacle and presence; sacrifice and atonement; kingship and wisdom/Psalms) and demonstrate how these themes find their fulfillment in Christ.

Name
Evaluate and employ competing hermeneutical approaches by defending a Christ-centered interpretive method and producing written, oral, and pedagogical work that guides others to read the Old Testament in a Christ-centered manner.

BIOT2233 - OLD TESTAMENT HISTORY

General

Course Prefix
BIOT

Course Number
2233

Description
An analysis of the history of Israel from the conquest of Canaan through the return from the Babylonian exilic period. Special attention is given to the importance of the prophetic movement within Israel, the impact of foreign cultures and powers on the nation, the Babylonian captivity, and the reconstruction of the Temple and Jerusalem after the exile.

Learning Outcomes

Learning Outcomes

Objective
Learn the basics of the A.P.A. format for program papers using the 2001 Publication Manual of the American Psychological Association (5th edition). (Program Objective VIII).

Name
From a marketing perspective, integrate the Christian faith and learning through critical thinking, research, writing, and learning from the normative base of the Christian worldview. (Program Objective I)

Name
Develop the tools of analysis, synthesis, and problem formulation and learn to make intelligent, informed, ethical business decisions in the area of marketing management. (Program Objective II)

Name
Demonstrate effective decision-making skills through the exposure to the marketing function and related marketing strategies. (Program Objective V)

Name
Develop usable management skills that require the application of marketing theory/models to practical business problems. (Program Objective VII)

Name
Research contemporary marketing issues and communicate results through clear, concise, and appropriate media. (Program Objective VIII)

Name
Learn the basics of the A.P.A. format for program papers using the 2001 Publication Manual of the American Psychological Association (5th edition). (Program Objective VIII).

BUSI5133 - MANAGERIAL ECONOMICS

General

Course Prefix
BUSI

Course Number
5133

Description
Microeconomic concepts are applied to the analysis of the firm. The course examines how areas of market structure, market conduct, and market performance affect the firm in the competitive marketplace. The focus is on applying economic thinking to private firms, yet many of the analytical methods are applicable to the not-for- profit and public sector.Prerequisite: None

Develop usable management skills that require the application of organizational behavioral theory/models to practical business problems. (Program Objective VII)

Name
Research contemporary organizational behavior issues and communicate results through clear, concise, and appropriate media. (Program Objective VIII)

BUSI5223 - BUS ETHICS, LAW & CONTRACT NEGOT

General

Course Prefix
BUSI

Course Number
5223

Description
This course examines the traditional common law constraints affecting business management, the proliferation of regulatory and statutory constraints, and introduces key principles of contract negotiation. Beginning with the Sherman Antitrust Act of 1890 and continuing through the significant legislation of the 1930s and beyond, students will explore how legal and ethical frameworks intersect in business operations. Through course materials, case analysis, and practical exercises in contract negotiation, students will become familiar with identifying and managing both legal risks and negotiation strategies in business management. Prerequisite: None

Learning Outcomes

Learning Outcomes

Objective
Evaluate the strategies for effective contract negotiation within the framework of common law and statutory regulations.

Name
Explore the theories of management, law, ethics and the meaning of social responsibility from a Christian perspective.

Name
Analyze the legal, moral, and social values in business decision-making.

Name
Evaluate through case analysis the management of legal risks confronting business managers.

Name
Explore the moral issues confronting managers in the 21st century.

Name
Explore the relationships between law, ethics, and social responsibility.

Name
Evaluate the impact of the expansion of traditional common law constraints on managers.

BUSI5233 - CURRENT ISSUES IN BUSINESS

General

Course Prefix
BUSI

Course Number
5233

Description
This course is offered to include current and future dynamics within the modern business organization. Focus will be on any number of areas, including but not limited to: labor relations, total quality management, reengineering, core competencies, workforce diversity, entrepreneurship, and manufacturing. The thrust of the course will vary from class to class allowing flexibility in discussing current and future trends in business in the 21st century.Prerequisite: None

Learning Outcomes

Learning Outcomes

Objective
Develop a truly global approach in identifying, analyzing and solving problems.

Name
Identify fundamental relationships between international businesses.

Name
Describe the impact of international business on national economies and individual companies.

Name
Analyze the basic framework of international business.

Name
Compare and contrast the economic advantages and disadvantages of increased U.S. Trade activities.

Name
Discuss areas of management, marketing, accounting, finance and economics as they are impacted by international business.

Name
Appreciate and integrate the ethical and societal dimensions of international business.

Name
Develop a truly global approach in identifying, analyzing and solving problems.

BUSI5413 - RISK MANAGEMENT & DECISION MAKING

General

Course Prefix
BUSI

Course Number
5413

Description
This is an applied and practical course in concepts and techniques used in the quantitative decision-making process. Various models are considered and applied to managerial problems in public and private organizations. It focuses on the risk management and decision-making implications, stressing problem formulation, technique assumptions and limitations, and managerial information generated.Prerequisite: BUSI 5003

Learning Outcomes

Learning Outcomes

Name
Explore the elements of decision-making under uncertainty, payoff tables, decision rules, sensitivity analysis, and how statistical data adds value to the decision-making process.

Name
Analyze the relationship of confidence intervals to hypothesis tests and how it affects managerial decision-making.

Name
Identify conditions requiring the use of the t-test, chi-square test, and F-test.

Name
Evaluate different cross-sectional and time-series data.

Name
Solve statistical problems using software packages.

Name
Analyze constraints in data when applying statistical techniques to business problems.

BUSI5436 - BUSINESS STRATEGY & POLICY

General

Course Prefix
BUSI

Course Number
5436

Description

This capstone course is designed to incorporate prior core class learning by having students undertake a three-pronged term-long course, in which they will complete a graduate level course in strategic management, engage weekly in case analyses based on actual business problems faced by contemporary organizations, and finally, develop and complete a capstone project in which they will identify a significant business problem faced by an organization, conduct a literature review for context in examining the problem, prescribe an optimal solution to the problem, and specify criteria and means of measuring the effectiveness of the prescribed solution. Students are expected to draw from MBA skills and knowledge gained in previous courses in the curriculum in engaging in the case analyses, and in the development of their individual capstone projects. Grading in the cases analyses and capstone project will be based, in part, on their ability to apply knowledge gained throughout their MBA journey, and as always, an ability and willingness to engage from the perspective of a Biblical worldview.Student participation in this course is on an individual basis and is not team-based. This classshould be taken during the student's last semester in the MBA.Prerequisites: BUSI 5003, BUSI 5113, BUSI 5213, BUSI 5413, BUSI 5503

AND BUSI5213 - ORGANIZATIONAL BEHAVIOR
AND BUSI5413 - RISK MANAGEMENT & DECISION MAKING
AND BUSI5503 - MANAGERIAL ACCOUNTING

Learning Outcomes

Learning Outcomes

Objective
Complete a significant individual capstone project involving identification of a business problem, conducting a related literature review, prescribing an optimal solution, and developing means of measurement of success of the identified solution.

Name
Assess the external and internal environments of an organization.

Name
Explore key strategic issues that face managers using a simulation model.

Name
Develop a strategic plan for a company in a simulation environment.

Name
Evaluate an organizations performance through an outcomes analysis which includes recommendations for future decisions.

Name
Utilize models from earlier coursework as part of the analysis and decision making process.

Name
Prepare an annual report and shareholder meeting presentation covering the final two years of simulation results.

BUSI5443 - STUDY ABROAD

General

Course Prefix
BUSI

Course Number
5443

Description
This course is a two-week study abroad seminar that provides insight into topics such as Business Management, International Relations, Politics, Communication, Law, and Economics. Students will be able to choose a track based on the topics they are most interested in studying. Prerequisites: Admission to the MBA program

Name
Discuss evidence for and against the theses and supporting material presented.

Name
Compare and contrast the cultural differences in how business is conducted.

Name
Identify ways to improve business functionality.

Name
Integrate Christian faith in business approaches.

BUSI5503 - MANAGERIAL ACCOUNTING

General

Course Prefix
BUSI

Course Number
5503

Description
This course delves into the core principles and techniques of enterprise accounting, emphasizing its role in developing financial and operational strategies within organizations. Students will explore cost behaviors, cost-volume-profit analysis, budgeting techniques, and performance measurement systems. The course is designed to equip students with the skills necessary to analyze and interpret accounting information for internal use, aiding in the planning, controlling, and decision-making processes essential for effective management. Operational strategies will be discussed around developing budgets and setting up Freedom V's within organizations to foster a financial strategy for self-governance.Prerequisite: BUSI 5003

Learning Outcomes

Objective
Integrate Christian faith and learning through critical thinking, research, writing, and learning from the normative base of international business.

Name
Discuss BAM theory and related mission practices.

Name
Explain the biblical basis and mandate for BAM.

Name
Discuss the development of BAM throughout history.

Name
Develop a company vision and mission that addresses the quadruple bottom line: spiritual, economic, social, and environmental transformation.

Name
Plan a BAM business that integrates business and Kingdom strategy, creates jobs and income, or proposes community development projects.

Name
Analyze different BAM company examples across multiple cultures.

Name
Participate in an overseas experience trip with the class to a destination where BAM and community development projects are in operation.

Name
Research current international business issues and communicate results through clear, concise, and appropriate media.

Name
Integrate Christian faith and learning through critical thinking, research, writing, and learning from the normative base of international business.

BUSI5803 - ENTERPRISE ANALYTICS

General

Course Prefix
BUSI

Course Number
5803

Description
This leveling course bridges the gap between intuitive business reasoning and formal analytical execution. The curriculum focuses on "pre-analytical" skills: the ability to deconstruct complex business narratives into structured components. Students will master the art of framing uncertainty through probability, mapping organizational dependencies via quantitative systems thinking, and finally begin using modeling to communicate those findings. By the end of this course, students will possess the technical fluency and conceptual confidence necessary to thrive in high-intensity risk management and business analytics environments.

Complete ALL of the following Courses:
- BUSI5903 - BUSINESS PRINCIPLES

Learning Outcomes

Learning Outcomes

Name
Deconstruct qualitative sources such as case studies into structured quantitative output.

Name
Quickly identify the most efficient method for mining, manipulating, and analyzing data in a variety of situations.

Name
Master Analytical Toolkits: Demonstrate foundational proficiency in modeling software to create output that can be handed off to technical developers or risk management professionals.

Name
Develop statistical fluency in the terms and methods widely used in the market today.

BUSI5893 - BIBLICAL ROOTS OF SELF-GOVERNANCE

General

Course Prefix
BUSI

Course Number
5893

Description

This course offers a theological and historical review of the biblical and archaeological evidence relevant to the concept of self-governance. Focus will be placed on understanding how key biblical narratives, covenants, legal frameworks, and leadership models lay a foundation for Christian self-governance. The course will explore the archaeological data supporting biblical claims, thus strengthening the evidential basis for the theological framework. The primary thrust is to help students analyze and apply these ancient principles within modern organizational structures, enabling them to develop and implement effective self-governance within their own organizations.

Students will research a specific biblical text or archaeological finding related to self-governance and present an analysis of its direct application to a current organizational challenge.

Name
Analyze foundational biblical concepts as they relate to the nature of self-governance from a Christian theological perspective.

Objective
Analyze foundational biblical concepts as they relate to the nature of self-governance from a Christian theological perspective.

Name
Apply a principles-based theological framework to develop practical self-governance strategies for their own non-profit or for-profit organizations

Objective
Apply a principles-based theological framework to develop practical self-governance strategies for their own non-profit or for-profit organizations.

BUSI5903 - BUSINESS PRINCIPLES

General

Course Prefix
BUSI

Course Number
5903

Description
This course is the first course in the Quantified Systemic Understanding MBA program, and you must get a B- or better to continue in the program. In this foundational course, you will learn the framework and language of Quantified Systemic Understanding (QSU). In this course, you will explore how an organization’s purpose influences its choice of strategies. You will be able to identify key variables within the QSU model to appropriate ranges of outcomes and devise investment and risk management strategies through statistical analysis. Using the three-legged stool of the Mental Models of Excellent Organizational Leadership, you will develop synergized operational, organizational, and financial strategies to optimize a firm’s opportunities to achieve its purpose.Prerequisite: None

Learning Outcomes

Learning Outcomes

Objective
Identify a firm’s purpose and its influence on a company's choice of strategy.

Objective
Utilize basic Microsoft Excel functions to create a Quantified Systemic Understanding (QSU) of a firm.

Objective
Identify the key variables within the QSU model to appropriate ranges of outcomes and devise investment and risk management strategies through statistical analysis.

Objective
Develop synergized operational, organizational, and financial strategies to optimize a firm's opportunities to achieve its purpose.

Objective
Evaluate a firm's cash story to create a QSU forecast of a firm's value.

BUSI5913 - ORG. BEHAVIOR PRINCIPLES

General

Course Prefix
BUSI

Course Number
5913

Description
This course examines the human factors of operational and organizational strategy. This course explores key organizational behavior theories and models, including motivation, personal instincts, leadership styles, team dynamics, and organizational culture. Through case studies and applied assignments, students will analyze real-world organizational challenges and apply Quantified Systemic Understanding strategies for enhancing effectiveness and risk management. A focus on servant leadership and organizational performance metrics ensures that students integrate values-driven leadership into their professional practice.Prerequisite: BUSI 5903

5923

Description
This course delves into the core principles and techniques of enterprise accounting, emphasizing its role in developing financial and operational strategies within organizations. Students will explore cost behaviors, cost-volume-profit analysis, budgeting techniques, and performance measurement systems. The course is designed to equip students with the skills necessary to analyze and interpret accounting information for internal use, aiding in the planning, controlling, and decision-making processes essential for effective management. Operational strategies will be discussed around developing budgets and setting up Freedom V's within organizations to foster a financial strategy for self-governance.Prerequisite: BUSI 5903

Prerequisite

Complete ALL of the following Courses:

- BUSI5903 - BUSINESS PRINCIPLES

Learning Outcomes

Learning Outcomes

Objective
Perform effective problem-solving and analysis using accounting information.

Objective
Develop budgeting and analysis skills for both operational and capital budgets.

Objective
Evaluate company performance using financial statements and other non-financial performance measurements.

Objective
Articulate how the different financial statements and performance metrics translate into operational strategies.

BUSI5933 - CURRENT ISSUES IN BUSINESS

General

Course Prefix
BUSI

Course Number
5933

Description
This course is offered to include current and future dynamics within the modern business organization. Focus will be on any number of areas, including but not limited to: labor relations, total quality management, reengineering, core competencies, workforce diversity, entrepreneurship, and manufacturing. The thrust of the course will vary from class to class, allowing flexibility in discussing current and future trends in business in the 21st century.

Students will write an analysis of their own business or organization and apply the quantified systemic understanding paradigm.

Learning Outcomes

Name
Explore issues in the modern business organization.

Objective
Explore issues in the modern business organization.

Name
Analyze core competencies in for-profit and not-for-profit organizations.

Objective
Analyze core competencies in for-profit and not-for-profit organizations.

Name
Question current and future trends in business.

Objective
Question current and future trends in business.

Name
Improve problem-solving skills through cross-functional, team-based case analysis.

Objective
Improve problem-solving skills through cross-functional, team-based case analysis.

Name
Explore strategic thinking in a variety of organizational situations.

Objective
Explore strategic thinking in a variety of organizational situations.

BUSI5943 - ENTERPRISE CON. NEG. IN A LEGAL ENV

General

Course Prefix
BUSI

Course Number
5943

Description
This course examines the traditional common law constraints affecting business management, and the proliferation of regulatory and statutory constraints, and introduces key principles of contract negotiation. Beginning with the Sherman Antitrust Act of 1890 and continuing through the significant legislation of the 1930s and beyond, students will explore how legal and ethical frameworks intersect in business operations. This course will review the principles of framing and using a QSU to create win-win opportunities for organizations. Through course materials, case analysis, and practical exercises in contract negotiation, students will become familiar with identifying and managing both legal risks and negotiation strategies in business management.Prerequisite: BUSI 5903

Credit Hours

Minimum Credit Hours:
3

Maximum Credit Hours:

Complete ALL of the following Courses:

- BUSI5903 - BUSINESS PRINCIPLES

Learning Outcomes

Learning Outcomes

Objective
Explore the theories of management, law, ethics and the meaning of social responsibility from a Christian perspective.basic components of contracts and their fundamental legal underpinnings.

Objective
Analyze the role of contract negotiation using a developed QSU to create win-win opportunities for an organization and its potential partners. in managing legal, moral, and social values in business decision-making.

Objective
Evaluate through case analysis the management of legal risks confronting business managers.

Objective
Explore the moral issues confronting managers in the 21st century.

Objective
Explore the relationships between law, ethics, and social responsibility.

Objective
Evaluate the strategies use of framing for effective contract negotiation within the framework of common law and statutory regulations.

BUSI5953 - ENTERPRISE FINANCE

General

Course Prefix
BUSI

Course Number
5953

Description
This enterprise finance course is designed to equip students with a comprehensive understanding of financial management principles and strategic decision-making in business. Through an in-depth exploration of financial ratios, capital structure, risk management, and valuation, students will learn how to assess a company's financial health and viability for investment or acquisition. Using real-world case studies, students will gain practical insights into how financial strategies are developed and applied in complex business scenarios. By the end of the course, students will have practiced key financial concepts and be able to apply advanced analytical tools to real-life business problems, making strategic financial decisions with confidence.Prerequisite: BUSI 5903, BUSI 5923

Prerequisites

Complete ALL of the following Courses:

- BUSI5903 - BUSINESS PRINCIPLES
  AND BUSI5923 - ENTERPRISE ACCOUNTING

Learning Outcomes

Learning Outcomes

Objective
Demonstrate the ability to analyze a company's financial strategy and its alignment with the company's operational and organizational strategy.

Objective
Apply financial ratios and metrics to evaluate profitability, liquidity, leverage, efficiency, and valuation.

Objective
Evaluate risk profiles and capital structures to understand their impact on a company's strategic viability.

Objective
Integrate financial data into strategic recommendations for investment and acquisition opportunities.

Objective
Develop and present comprehensive financial reports, including IRR and ROI analyses.

BUSI5963 - RISK MANAGMENT & BUS. ANALYTICS

General

Course Prefix
BUSI

Course Number
5963

Description

This course explores the intersection of data-driven decision-making and risk assessment in modern business environments. Students will learn how to identify, quantify, and mitigate risks using analytical tools and methodologies, optimization techniques, and predictive modeling.
Emphasizing systems thinking and real-world applications, this course equips students with the skills to analyze uncertainty, apply visualization techniques, and leverage automation for strategic decision-making. Students will apply these skills towards building models with data visualization and statistical support, through identifying key variables and Key Performance Indicators. This modeling technique is called a Quantified Systemic Story.

Through case studies and hands-on projects, students will develop practical insights into managing business risks while optimizing organizational performance and resource allocation.

- BUSI5903 - BUSINESS PRINCIPLES

Learning Outcomes

Learning Outcomes

Name
Create a Quantified Systemic Story: a model in diagrammatic formats that serves as a foundation for building a model that identifies key variables and produces Key Performance Indicators.

Name
Analyze risk and uncertainty using probability distributions and risk-based models to support business decisions.

Name
Apply business analytics techniques to extract insights from data, visualize trends, and enhance decision-making processes.

Name
Utilize optimization and simulation tools to improve operational efficiency and resource allocation in uncertain environments.

Name
Implement systems thinking approaches to assess complex business challenges and develop strategic solutions.

Name
Evaluate real-world business scenarios through case studies, applying risk management and data analytics frameworks for informed decision-making.

BUSI5973 - ECON. FOR OPERATIONAL EXCELLENCE

General

Course Prefix
BUSI

Course Number
5973

Description

This course bridges classical economic principles with the operational realities of leading a high-performing organization. Students will learn to evaluate labor, supply, and operating costs while understanding their impact on capacity, scalability, and system constraints. Using a framework of "Act, Learn, Adjust," participants will assess current organizational realities, explore step changes in capacity, and develop economic models that connect day-to-day operational decisions with long-term strategic goals. This is economics not as abstract theory but as a practical toolkit for leaders seeking to build value-based, self-governing organizations capable of scaling with clarity and resilience.Prerequisite: BUSI 5903

Learning Outcomes

Learning Outcomes

Objective
Apply economic principles to operational decision-making, including labor, supply, and cost structures.

Objective
Analyze cost behavior to identify fixed, variable, and fluid dynamics within operations.

Objective
Model output potential and step changes to optimize operational capacity.

Objective
Use scenario planning and decision trees to navigate operational risks and opportunities.

Objective
Assess external pressures and their impact on internal economics.

Objective
Lead teams with economic clarity, fostering servant leadership and value creation.

BUSI5983 - STRATEGIC FRAMEWORKS

General

Course Prefix
BUSI

Course Number
5983

Description
This course serves as the capstone course for the MBA program. This course applies a quantified systemic understanding to comprehensive exploration of strategic management, focusing on assessing an enterprise's internal and external environments. Students will delve into key strategic issues leaders face in contemporary organizations, examining real-world cases to apply theoretical concepts and models learned in earlier coursework. The course emphasizes integrating the knowledge and skills acquired throughout the program to better understand complex cases and provide strategic recommendations to address identified business problems.Prerequisite: BUSI 5903

- BUSI5903 - BUSINESS PRINCIPLES

Learning Outcomes

Learning Outcomes

Objective
Apply a biblical worldview to business strategy concepts.

Objective
Explore key strategic issues leaders face in contemporary organizations.

Objective
Integrate a quantified systemic understanding and theoretical concepts of strategic management to actual contemporary business cases.

Objective
Utilize models and concepts from earlier coursework to understand complex cases and provide recommended solutions to identified business problems.

Objective
Develop and complete a major capstone project, identifying a strategic management problem, conducting an extensive literature review for background and context, and recommending creative, practical, and measurable solutions.

BUSI5993 - BUSINESS INTERNSHIP

General

Course Prefix
BUSI

Course Number
5993

Description
This course will give students experience applying learned theory and skills in an approved setting under a site supervisor. The appropriate setting depends on the student's desired area of specialization. Appropriate supervision must be available on-site.Prerequisite: None

Learning Outcomes

Objective
Create a final multimedia presentation giving a synopsis of learning and engagement.

Name
Demonstrate appropriate and effective business skills.

Name
Conduct evidence-based outcomes from their work.

Name
Create a final multimedia presentation giving a synopsis of learning and engagement.

BUSI6223 - CONTRACT LAW

General

Course Prefix
BUSI

Course Number
6223

Description
In this course, students will examine the strategies, objectives, and challenges that will affect how contracts are drafted. They will consider factors that influence drafting style, technique, and content. The course will begin by exploring the basic features of a contract. Next, students will analyze the standard structure and terms of a typical contract, including purpose, risk assessment, and the doctrine of foreseeability. Students then will dissect and examine a range of contracts used in business relationships to evaluate drafting techniques and decisions in specific transactions. Prerequisites: Graduate Standing

Quantitatively and qualitatively analyze data and observations.

Name
Compare laboratory results to established scientific theory.

CHEM213L - ORGANIC CHEMISTRY I LAB

General

Course Prefix
CHEM

Course Number
213L

Description
The laboratory work includes learning the basic techniques in recrystallization, sublimation, melting point determination,distillation, liquid/liquid extraction, thin layer chromatography, column chromatography and molecular modeling software. Mastery of these basic techniques lays the foundation for carrying out a number of organic syntheses or natural product isolations. Students are provided with hands-on access to state of the art instrumentation for the characterization of synthetic products or organic unknowns using standard analysis methods such as FT-IR, FT-NMR, UV/Vis spectroscopy, polarimetry, refractive index, gas chromatography and other modern techniques of characterization.

Complete ALL of the following Courses:

- CHEM2133 - ORGANIC CHEMISTRY I

Learning Outcomes

Learning Outcomes

Objective
Evaluate laboratory results in light of scientific theory and experimental precedent.

Name
Correctly use organic laboratory equipment.

Name
Proficiently perform basic organic laboratory techniques.

Name
Comprehend the relationships between the structure and reactivity properties of organic compounds through experimentation.

Name
Perform organic syntheses.

Name
Quantitatively and qualitatively analyze data and observations.

Name
Use modern instrumentation to elucidate organic structure.

Name
Evaluate laboratory results in light of scientific theory and experimental precedent.

CHEM214L - ORGANIC CHEMISTRY II LAB

General

Course Prefix
CHEM

Course Number
214L

Description
CHEM 214L is the laboratory course that accompanies CHEM 2143. CHEM 214L will have a special emphasis on organic synthesis as well as the use of modern instrumentation for the characterization of synthetic products via methods of analysis including IR, NMR, UV/Vis spectroscopy, gas chromatography, and other modern analytical methods.

Learning Outcomes

Learning Outcomes

Objective
Write formal lab reports including the procedure used, data tables, the calculations employed to determine the results of the experiment, a complete statistical analysis of the data, a discussion of possible systematic errors and the effect of each error on the final results.

Name
Apply statistical methods for the evaluation of laboratory data.

Name
Prepare standards and use a standard calibration curve to determine unknown concentrations.

Name
Identify the most appropriate analytical technique to use for a variety of samples.

Name
Perform graphical analysis to analyze laboratory results.

Name
Apply analytical methods based on titrations, separations, spectrophotometry, electrochemical measurements, and spectroscopy to chemical systems.

Name
Conduct gravimetric and volumetric techniques of analysis.

Name
Understand quantitative principles of solution equilibria and applications for example, complexometric titrations.

Name
Employ principles of chromatography, with a focus on gas chromatography and high pressure liquid chromatography.

Name
Write formal lab reports including the procedure used, data tables, the calculations employed to determine the results of the experiment, a complete statistical analysis of the data, a discussion of possible systematic errors and the effect of each error on the final results.

CHEM315L - PHYSICAL CHEMISTRY LAB

- CHEM3153 - PHYSICAL CHEMISTRY

Learning Outcomes

Learning Outcomes

Objective
Develop the ability of scientific communications through written reports and presentations.

Name
Conduct experiments to quantify thermodynamic, kinetic, or spectroscopic phenomena following experimental protocols and safety guidelines.

Name
Quantitatively analyze the results of experiments using theoretical relationships and models.

Name
Evaluate and report the experimental uncertainty of quantitative measurements.

Name
Gain familiarity with a variety of physicochemical measurement techniques as applied to biological systems.

Name
Interpret the results of experiments in terms of physical chemistry concepts.

Name
Utilize statistical methods of data analysis including error distributions, hypothesis testing, confidence intervals, the method of maximum likelihood or least-squares analysis.

Name
Develop the ability of scientific communications through written reports and presentations.

CHEM332L - INSTRUMENTAL METHODS ANALYSIS LAB

General

Course Prefix
CHEM

Course Number
332L

Description
This course is a laboratory course designed to accompany CHEM 3323. Emphasis is placed on separation methods such as chromatography along with spectroscopy. Instrumental techniques, as well as identification and quantitation using ultraviolet, visible, infrared, and nuclear magnetic resonance spectroscopies, electrophoresis, mass spectrometry, GC, HPLC, atomic absorption, and other instrumentation, may also be explored.

Learning Outcomes

Learning Outcomes

Objective
Write in scientific format reports of the theory, experimental method, and results of an analysis.

Name
Apply the principles and applications of modern chemical instrumentation, experimental design, and data analysis.

Name
Demonstrate a clear understanding of the underlying instrumental methods of analysis, including electronic and vibrational spectroscopy, reaction kinetics, chemical separation methods, and nuclear magnetic resonance.

Name
Learn to maintain and use precision electronic analytical equipment properly and appropriately for the analysis.

Name
Realize the existence of a variety of analytical methods, each with its own particular capabilities, limitations, and software package.

Name
Develop a basic understanding of the electronic, optical, mathematical, and mechanical subsystems in each instrument introduced or used in the laboratory.

Name
Understand that the selection of one method as being superior to another in the solution of a particular analytical problem. Also, understand that the success of any of the analytical techniques used depends upon a working knowledge and control of the chemical reactions, operating parameters, accuracy and precision required, and time available.

Name
Carry out calibration, preparation of a sample for analysis, safe handling of the sample during the analysis, and proper disposal of the sample after completion of the analysis.

Name
Employ techniques for recording and evaluating analytical data.

Name
Write in scientific format reports of the theory, experimental method, and results of an analysis.

CHEM336L - BIOCHEMISTRY LAB

General

Course Prefix
CHEM

Course Number
336L

Description
This is a laboratory to accompany the courses, Biochemistry I and II. This course involves the introduction of biochemical laboratory principles and techniques. Emphasis is placed on the isolation, identification, and characterization of important biomolecules.

Credit Hours

Minimum Credit Hours:
1

- CHEM3363 - BIOCHEMISTRY II

Learning Outcomes

Learning Outcomes

Objective
Perform the techniques of agarose gel electrophoresis, DNA fingerprinting, and polymerase chain reaction (PCR).

Name
Identify and characterize an unknown amino acid.

Name
Isolate and purify proteins by chromatography methods.

Name
Determine the concentration of proteins by different methods for example, SDS-PAGE MW determination of proteins, ELISA, and immunohistochemistry techniques.

Name
Perform colorimetric assays including standard curves and photometry.

Name
Understand enzyme kinetics, including determination of KM, Vmax, and KI.

Name
Evaluate the effects of temperature and pH on enzyme activity.

Name
Perform the techniques of agarose gel electrophoresis, DNA fingerprinting, and polymerase chain reaction (PCR).

CHEM1213 - INTRODUCTION TO CHEMISTRY

General

Course Prefix
CHEM

Course Number
1213

Description
This course is an introduction to basic concepts of general chemistry, introduction of periodic properties of elements and compounds, basic atomic-molecular structure, and properties of substances and reactions related to gas laws.

Credit Hours

Minimum Credit Hours:
3

Maximum Credit Hours:
3

(Credit Hours) Value:

Learning Outcomes

Learning Outcomes

Name
Describe the scientific method and be able to calculate using the English system and the metric system.

Name
Identify the physical states of matter and the gas laws and be able to solve problems related to gas laws.

Name
Characterize the Period Law, the periodic table, periods, groups, and general characteristics of the groups.

Name
Compare the structure of compounds, the different chemical bonds, and be able to use the periodic table for predicting oxidation numbers, properties, formulas, and types of bonding in compounds.

Name
Describe the chemical nomenclature of inorganic compounds; binary compounds of two metals or of a metal and a nonmetal, ternary and higher compounds, acids, salts and bases.

Name
Calculate the molecular mass, moles of units, molar volume of a gas, percent composition of compounds, and empirical and molecular formulas.

Name
Balance a chemical equation.

Name
Compare the basic types of chemical reactions and be able to complete the reaction.

Name
Describe the properties of solutions, acids, and bases, and solve ionic equations.

CHEM1214 - INTRO TO CHEMISTRY (LECTURE & LAB)

General

Course Prefix
CHEM

Course Number
1214

Description
This course is an introduction to basic concepts of general chemistry, introduction of periodic properties of elements and compounds, basic atomic-molecular structure, and properties of substances and reactions related to gas laws. This course includes study of course topics and laboratory experiments.

Learning Outcomes

Learning Outcomes

Name
Describe matter in terms of atoms, molecules, and ions.

Name
Apply the stoichiometric relationships of matter.

Name
Understand the nature of electrolytic solutions and reactions.

Name
Understand the role of thermodynamics in simple chemical reactions.

Name
Predict the properties of elements based on periodic trends.

Name
Describe the fundamental types of bonding.

Name
Predict molecular geometries in terms of molecular electron structures.

Name
Calculate the relationships between pressure, volume, moles, and temperature in gaseous systems.

CHEM1633 - GENERAL CHEMISTRY II

General

Course Prefix
CHEM

Course Number
1633

Description
This course is a continuation of CHEM 1533 with an emphasis on chemical equilibria, kinetic rate laws, acids and bases, introductory thermodynamics, and nuclear chemical reactions. Prerequisites: CHEM 1533 and CHEM 153LCorequisite: CHEM 163L

Credit Hours

Minimum Credit Hours:
3

Maximum Credit Hours:
3

(Credit Hours) Value:
3

Contact Hours (not needed)

(Contact Hours) Value (not needed) :
3

Repeatable:
Yes

Number Of Repeats:
3

Number Of Credits:
3

Learning Outcomes

Learning Outcomes

Name
Devise and apply integrated kinetic rate laws.

Name
Calculate chemical equilibrium constants and apply them to chemical equations and Le Chateliers Principle.

Name
Differentiate acids and bases according to the definitions of Arrhenius, Bronsted-Lowry, and Lewis.

Name
Evaluate acid-base titrations.

Name
Examine the solubility equilibria and factors that affect solubility.

Name
Explain the first, second, and third laws of thermodynamics.

Name
Relate free energy, entropy, enthalpy, and the equilibrium constant.

CHEM2133 - ORGANIC CHEMISTRY I

General

Course Prefix
CHEM

Course Number
2133

Description
Organic Chemistry is the study of the structure and reactivity of carbon and its compounds. Compounds are grouped according to structure, using a functional group approach. Reactions are organized according to similarities in mechanism, with an emphasis on electron flow. This includes the chemistry of alkanes, alkenes, alkynes, halogenated hydrocarbons, free-radicals and alcohols. Infrared, NMR spectroscopy and mass spectrometry are also covered.

Credit Hours

Minimum Credit Hours:
3

Maximum Credit Hours:
3

(Credit Hours) Value:
3

Contact Hours (not needed)

(Contact Hours) Value (not needed) :
3

Repeatable:
Yes

Number Of Repeats:
3

Number Of Credits:
3

Learning Outcomes

Learning Outcomes

Name
Analyze the relationship between electronic structure, reactivity, and molecular geometry.

Name
Design energy diagrams based on structural and conformational changes.

Name
Relate observed products to mechanistic pathways.

Name
Visualize and compare molecules in three dimensions.

Name
Identify molecules by systematic nomenclature.

Name
Describe the reactivity of functional groups.

Name
Predict the products of organic reactions.

Name
Develop syntheses of novel organic compounds.

Name
Elucidate organic structure from spectral data.

CHEM2143 - ORGANIC CHEMISTRY II

General

Course Prefix
CHEM

Course Number
2143

Description
CHEM 2143 is a continuation of organic chemistry I. This course is designed to provide a thorough treatment of the chemistry of ethers, thiols, polyenes, aromatic compounds, phenols, aldehydes, ketones, carboxylic acids, acid derivatives, enolates, amines, heterocycles and an introduction to biomolecules. The relationships between structure and reactivity will be studied in greater detail, as well as the mechanism of organic reactions and the applications of spectroscopy for organic structure elucidation.

Credit Hours

Minimum Credit Hours:
3

Maximum Credit Hours:
3

(Credit Hours) Value:
3

Contact Hours (not needed)

(Contact Hours) Value (not needed) :
3

Repeatable:
Yes

Number Of Repeats:
3

Number Of Credits:
3

Learning Outcomes

Learning Outcomes

Name
Name each class of compounds covered using systematic nomenclature structure or be able to draw the structure of such compounds from their IUPAC names.

Name
Describe the basic physical properties and chemical reactivity of each functional group covered.

Name
Show the synthetic steps necessary to interconvert between the functional groups.

Name
Apply a knowledge of organic reactions to a multistep synthesis of a target compound.

Name
Deduce the mechanistic pathways for key organic functional group conversions.

Name
Determine the structure of organic compounds through spectroscopic methods.

Name
Show structures for major biochemical building blocks, including carbohydrates, lipids, amino acids, peptides, nucleosides, nucleotides, and nucleic acids.

CHEM3033 - ANALYTICAL CHEMISTRY

General

Course Prefix
CHEM

Course Number
3033

Description
An overview of quantitative and qualitative chemical analysis; classical methods of gravimetric and volumetric analysis, concepts of acid-base theory, titrations, precipitation and complex formation, redox chemistry and statistical treatment of data. Introduces basic principles of modern electrochemical behavior, spectroscopic, and chromatographic analysis.

Credit Hours

Minimum Credit Hours:
3

Maximum Credit Hours:
3

(Credit Hours) Value:
3

Contact Hours (not needed)

(Contact Hours) Value (not needed) :
3

Repeatable:
Yes

Number Of Repeats:
3

Number Of Credits:
3

Learning Outcomes

Learning Outcomes

Name
Perform calculations to obtain the concentration of solutions and their dilutions.

Name
Carry out propagation of uncertainty in calculations and describe the type of experimental errors.

Name
Apply several common statistical tests to experimental data.

Name
Explain several chemical equilibria and perform related calculations.

Name
Properly select appropriate buffer systems for a given pH requirement and describe the step-by-step procedure for buffer preparation.

Name
Perform calculations for acid-base and potentiometric titrations.

Name
Describe basic concepts in electrochemistry, including the Nernst Equation, and perform related calculations.

Name
Describe and apply concepts associated with spectrophotometry and perform calculations related to the Beer-Lambert law and quantitative analysis.

Name
Describe basic terminology associated with chromatography, understand the Van Deemter equation for optimal separation, and identify various chromatographic techniques.

Name
Apply the principles and theories necessary to carry out analytical procedures and practical investigations and to interpret results from such.

CHEM3153 - PHYSICAL CHEMISTRY

General

Course Prefix
CHEM

Course Number
3153

Description
This course is a study of the basic physical principles of chemical processes. This is a math-intensive course. This course will focus on thermodynamics, roles of energy in determining molecular structure and reactivity, and kinetics. Moreover, quantum mechanics are used to connect the microscopic, molecular level to the bulk properties of substances.

Credit Hours

Minimum Credit Hours:
3

Maximum Credit Hours:
3

(Credit Hours) Value:
3

Contact Hours (not needed)

(Contact Hours) Value (not needed) :
3

Repeatable:
Yes

Number Of Repeats:
3

Number Of Credits:
3

Learning Outcomes

Learning Outcomes

Name
Describe the structure and composition of matter.

Name
Apply theoretical and mechanistic principles to the study of chemical systems employing both qualitative and quantitative approaches.

Name
Use theories of microscopic properties to explain macroscopic behavior.

Name
Explain the role of energy in determining the structure and reactivity of molecules.

Name
Use mathematical representations of physical phenomena.

Name
Constructively evaluate their own public speaking skills in expressing scientific, technical material as well as evaluate the speeches of other students, including classmates.

Name
Demonstrate understanding of the value of non-verbal communication and audience feedback.

Name
Know the role of audio-visual aids and props in the communication process.

Name
Evaluate the speeches of their peers in order to improve their listening and analysis skills.

CHEM3203 - ENZYMOLOGY

General

Course Prefix
CHEM

Course Number
3203

Description
This course is an introduction to the basic principles of enzymology including structure, reactivity, kinetics, and reaction mechanisms.

Credit Hours

Minimum Credit Hours:
3

Maximum Credit Hours:
3

(Credit Hours) Value:
3

Contact Hours (not needed)

(Contact Hours) Value (not needed) :
3

Repeatable:
Yes

Number Of Repeats:
3

Number Of Credits:
3

Learning Outcomes

Learning Outcomes

Name
Describe the primary, secondary, tertiary, and quaternary structures of proteins and how they relate to function.

Name
Distinguish between kinetic rate constants and thermodynamic constants.

Name
Describe the affinity of an enzyme for various substrates using dissociation constants.

Name
Compare the relative specificities of different enzyme systems.

Name
Discuss steady-state kinetic parameters including kcat, KM, and kcat/KM.

Name
Discuss pre-steady-state, steady-state, and single turnover kinetic conditions.

Name
Use transition state theory to describe principles of catalysis by enzymes.

Name
Be fluent in the concepts and equations used in steady-state and transient enzyme kinetic analysis.

Name
Understand different types of enzyme inhibitors, how they affect enzyme function, and how they can be differentiated through kinetic analysis.

Name
Understand the theory and application of methods to determine the kinetic mechanism and chemical mechanism of an enzyme-catalyzed reaction.

Name
Present detailed chemical mechanisms for representative enzyme-catalyzed reactions and propose reasonable mechanisms for newly encountered enzymes.

Name
Find relevant experimental information about enzymes of interest in research databases.

Name
Critically read, analyze, and summarize biochemical literature.

CHEM3323 - INSTRUMENTAL METHODS ANALYSIS

General

Course Prefix
CHEM

Course Number
3323

Description
Theory and application of instrumental methods of quantitative and qualitative analyseswith emphasis on electrolytic, optical and chromatographic techniques using acombination of problem-based learning approaches, case studies and traditional lectures.The student will develop critical thinking skills in the areas of instrument selection andmethod development and data interpretation.

Credit Hours

Minimum Credit Hours:
3

Maximum Credit Hours:
3

(Credit Hours) Value:
3

Contact Hours (not needed)

(Contact Hours) Value (not needed) :
3

Repeatable:
Yes

Number Of Repeats:
3

Number Of Credits:
3

Learning Outcomes

Learning Outcomes

Name
Demonstrate knowledge of sampling methods for all states of matter.

Name
Distinguish between qualitative and quantitative measurements and effectively compare and critically select methods for elemental and molecular analyses.

Name
Assess sources of error in chemical and instrumental analysis and account for errors in data analysis.

Name
Recognize interferences in chemical and instrumental analysis.

Name
Comprehend the concept of and perform instrument and method calibration.

Name
Apply and assess concepts of availability and evaluation of analytical standards and formulate standardization methodology.

Name
Integrate a fundamental understanding of the underlying physical principles as they relate to specific instrumentation used for atomic, molecular, and mass spectrometry, magnetic resonance spectroscopy, and chromatography.

Name
Understand and be able to apply the theory and operational principles of analytical instruments.

CHEM3353 - BIOCHEMISTRY I

General

Course Prefix
CHEM

Course Number
3353

Description
This course is an introduction to the structures and cellular functions of carbohydrates, lipids, proteins, and nucleic acids. Topics include basic concepts of enzymes and kinetics, biological membranes, and transport, and biosignaling.

Credit Hours

Minimum Credit Hours:
3

Maximum Credit Hours:
3

(Credit Hours) Value:
3

Contact Hours (not needed)

(Contact Hours) Value (not needed) :
3

Repeatable:
Yes

Number Of Repeats:
3

Number Of Credits:
3

Learning Outcomes

Learning Outcomes

Name
Identify the major classes of biological molecules including carbohydrates, lipids, proteins, and nucleic acids.

Name
Describe structural and functional processes of membrane activation and signal transduction.

Name
Understand enzymes and the regulation of metabolic processes occurring within the cell.

Name
Understand protein function in relationship to hemoglobin, immunoglobulin and protein muscle function.

Name
Understand how to use enzyme kinetic equations and kinetics as well as identify types of enzyme inhibition

Name
Understand nucleotide metabolism and structure.

CHEM3363 - BIOCHEMISTRY II

General

Course Prefix
CHEM

Course Number
3363

Description
This course is a continuation of CHEM 3353 with an emphasis on bioenergetics and metabolism. Topics include glycolysis, citric acid cycle, fatty acid catabolism, and lipid biosynthesis. Metabolic pathways of amino acids, nucleotides, and hormones will also be discussed.

Credit Hours

Minimum Credit Hours:
3

Maximum Credit Hours:
3

(Credit Hours) Value:
3

Contact Hours (not needed)

(Contact Hours) Value (not needed) :
3

Repeatable:
Yes

Number Of Repeats:
3

Number Of Credits:
3

Learning Outcomes

Learning Outcomes

Name
Know the basic pathways of cellular metabolism including glycolysis, the citric acid cycle, and electron transport.

Name
Understand fatty acid metabolism, protein turnover, and amino acid catabolism and biosynthesis.

Name
Utilize electron-pushing mechanisms to depict metabolic pathways.

Name
Evaluate membrane transport

Name
Discuss the principles of metabolic regulation and lipid metabolism.

CHEM4003 - CURRENT TOPICS IN CHEMISTRY I

General

Course Prefix
CHEM

Course Number
4003

Description
This course is an in-depth look at recent developments in one of the main areas of chemistry. The particular topic will vary by semester. Content is determined by the department to address special needs or interests.Prerequisite: To be determined according to topic

Credit Hours

Minimum Credit Hours:
3

CHEM4103 - CHEMISTRY OF CANCER

General

Course Prefix
CHEM

Course Number
4103

Description
This course is a study of the chemical concepts of carcinogenesis. In addition, this course examines the causes of cancer, the chemistry of approved anti-cancer drugs, mechanisms of interaction with the body, side effects, classifications of drugs, and environmental carcinogens. The roles of important biomolecules, such as lipids, proteins, carbohydrates, and nucleic acids, in carcinogenesis will be discussed as well as the repair mechanisms employed at a molecular level to combat nucleic acid damage and unregulated cell growth.

CHEM4223 - NEUROCHEMISTRY

General

Course Prefix
CHEM

Course Number
4223

Description
This course is a study into the chemical and biochemical concepts of neurotransmitters in neuroscience. The roles of metals; small molecules; and important biomolecules, such as lipids, proteins, carbohydrates, and nucleic acids; in neuroscience will be discussed as well as the pathologies of tauopathy, amyloid genesis, aggregation, and neurological/neuromuscular disorders with respect to mechanisms and treatments.The biochemical basis of neuroactive drugs, toxins, and diseases will be discussed. In addition, perceptive insights into the complex fields of drug abuse, compulsive behaviors, addiction, treatment, recovery, and prevention will also be addressed.

Credit Hours

Minimum Credit Hours:
3

Maximum Credit Hours:
3

(Credit Hours) Value:

Contact Hours (not needed)

(Contact Hours) Value (not needed) :
0

Repeatable:
Yes

Number Of Repeats:
3

Number Of Credits:
3

Learning Outcomes

Learning Outcomes

Name
Identify chemical neurotransmitters, presynaptic proteins and cell adhesion molecules, chemically mediated synaptic transmission, neurotransmitter receptors, receptor-activated phosphoinositide turnover, G-proteins, cyclic nucleotides, and phosphorylation in regulation of neuronal signaling functions.

Name
Explain the principles and concepts of the chemical and functional organization of the nervous system at the cellular and molecular levels.

Name
Apply neuroscience principles in health and diseases.

Name
Discuss tauopathy and amyloid genesis and their roles in neurological disorders.

Name
Compare and contrast the roles metal ions play in neurology.

Name
Evaluate the roles of disturbances in metal ion homeostasis in neurological disorders.

Name
Discuss the roles of biomoleculesincluding lipids, proteins, and nucleic acidsand the modification of biomolecules in neuroscience and neurological disorders.

Name
Explore the role of biogenic amines and chemical messengers in neuronal activations.

Name
Discuss the role of the biochemical basis of neuroactive drugs, toxins, and diseases.

Name
Describe in detail the different neurochemical mechanisms underlying the pathology of neurodegenerative and psychiatric diseases.

Name
Explain and compare the principles and application areas of neurochemical techniques.

Name
Describe and compare different neurochemical methods that are used for diagnosis of brain diseases.

Name
Compare and contrast the advantages and challenges of different cell- and animal models.

CHEM4373 - RESEARCH IN CHEMISTRY

General

Course Prefix
CHEM

Course Number
4373

Description
This course is a practical experience in chemical research for one full semester, approved by the department chair, and supervised by a principal investigator, who provides continuous evaluation of the student's research.

Credit Hours

Minimum Credit Hours:
0

Maximum Credit Hours:
4

(Credit Hours) Value:

Repeatable:
Yes

Number Of Repeats:
3

Number Of Credits:
6

Learning Outcomes

Learning Outcomes

Name
Apply scientific research methods to solve significant chemical questions.

Name
Evaluate their data and refine their experiments accordingly.

Name
Present their independent research findings and the conclusions they have made.

Name
Outline future experimentation based on their current research findings.

Name
Work toward the publication of their research findings.

CHEM4423 - MEDICINAL CHEMISTRY

General

Course Prefix
CHEM

Course Number
4423

Description
This course is an introduction to the field of medicinal chemistry with a special focus on methods of drug design, synthesis, structure-activity relationships, and modes of action. In addition, it will acquaint students with modern applications of chemical techniques in the development of drug candidates to cure diseases based on the modulation of current drug targets, including proteins, nucleic acids, and other receptor-based functionalities. Focuses on structure-activity relationships, pharmacokinetics, and pharmacodynamics.

Credit Hours

Minimum Credit Hours:
3

Maximum Credit Hours:
3

(Credit Hours) Value:
3

Contact Hours (not needed)

(Contact Hours) Value (not needed) :
3

Repeatable:

Number Of Repeats:
3

Number Of Credits:
3

Learning Outcomes

Learning Outcomes

Name
Differentiate the various phases of drug action.

Name
Appraise the structure-activity relationship of a drug based on functional groups and physical properties.

Name
Discuss the effect of pH on the solubility of acidic and basic drugs.

Name
Describe different methods of combinatorial chemistry.

Name
Assess the relationship between drug response, concentration, and site of action using pharmacokinetic models and equations.

CHEM4433 - INORGANIC & BIOINORGANIC CHEMISTRY

General

Course Prefix
CHEM

Course Number
4433

Description
A theoretical introduction to the concepts of chemical systems of inorganic chemistry with particular emphasis on the roles in biochemistry. Topics may include, atomic structure, nuclear chemistry, molecular symmetry, chemical periodicity, descriptive chemistry of the elements, simple bonding models, solids, metals & coordination chemistry, crystal field theory, ligand substitution reactions, electron transfer reactions, reaction mechanism, factors affecting chemical activity and select applications to the subfield of bioinorganic chemistry.

Credit Hours

Minimum Credit Hours:
3

Maximum Credit Hours:
3

(Credit Hours) Value:
3

Contact Hours (not needed)

(Contact Hours) Value (not needed) :
3

Repeatable:
Yes

Number Of Repeats:
3

Number Of Credits:
3

Learning Outcomes

Learning Outcomes

Name
Explain the atomic structure based on quantum mechanics and explain periodic properties of atoms/ions.

Name
Predict geometries of molecules using VSEPR and MO Theory.

Name
Understand the fundamentals of the chemistry of the main group elements, and important real world applications of many of these species.

Name
Explain the different definitions of acids / bases and predict the reactions between acids and bases.

Name
Apply group theory to recognize and assign symmetry characteristics to molecules and objects, and to predict the appearance of a molecules vibrational spectra as a function of symmetry.

Name
Evaluate the bonding models, structures, reactivities, and applications of coordination complexes, boron hydrides, metal carbonyls, and organometallics.

Name
Realize the importance of inorganic compounds and metal ions in bioinorganic systems in redox reactions.

Name
Explain selected crystal structures, perform calculations of the lattice enthalpy of ionic compounds, predict the band structure of solids and determine the electrical properties.

Name
Develop logical reaction mechanisms for inorganic reactions.

CLAS1003 - COLLEGE SUCCESS

General

Course Prefix
CLAS

Course Number
1003

Description
Through this course, students develop and improve academic skills including active listening, college-level reading, note taking, test taking, and library use, as well as advance their memory and recall techniques and the use of college resources. Students discover their individual learning styles and determine how to adjust their methods of learning for greater success. Variables such as health, finances, relationships, and attitudes that may either interfere with or enhance academic success are also analyzed.

Credit Hours

Minimum Credit Hours:

Learning Outcomes

Learning Outcomes

Objective
Investigate the qualities of diversity in relationships relevant to family, college, employment, local communities, and global communities.

Name
Examine and develop essential academic skills, behaviors, and self-awareness necessary for success in consecutive college-level courses.

Name
Engage in higher order thinking activities by formulating their personal, academic, and professional goals.

Name
Demonstrate the ability to access, evaluate, and apply information pertaining to academic support services to solve problems and to use library resources to conduct a critical analysis of a topic.

Name
Investigate the qualities of diversity in relationships relevant to family, college, employment, local communities, and global communities.

CLAS1113 - HUMANE LETTERS IIA

General

Course Prefix
CLAS

Course Number
1113

Description
This course is designed to cultivate intellectual, moral, and aesthetic formation through the study of literature, history, and philosophy. Grounded in Socratic dialogue, the course engages students with classic works of the Western tradition in pursuit of Truth, Goodness, and Beauty. Literature serves as a window into the human heart, history offers insight into human action and rhetoric, and philosophy explores the nature of reality and the good life. Together, these disciplines form a foundation for liberal arts education and support the development of more thoughtful and humane individuals.Prerequisite: None

CLAS1333 - HUMANE LETTERS IIIA

General

Course Prefix
CLAS

Course Number
1333

Description

This course builds upon prior study in the humane letters tradition by continuing to cultivate students' intellectual, moral, and aesthetic formation through Socratic engagement with classic works of literature, history, and philosophy. While maintaining a focus on reading, writing, listening, and speaking, this course distinguishes itself by drawing more deeply from ancient sources, including classical historians like Herodotus and Thucydides. Emphasizing seminar discussion over survey, students explore enduring questions of human nature, justice, leadership, and the good life—not simply to absorb ancient thought, but to practice the art of thinking well. The course seeks to sharpen students' ability to reason, interpret, and articulate insights as they engage timeless ideas that have shaped the Western tradition.Prerequisite: None

CLAS1553 - HUMANE LETTERS IVA

General

Course Prefix
CLAS

Course Number
1553

Description

This course aims to cultivate the minds and hearts of students into more humane individuals; that is, more intellectually, morally, and aesthetically alive humans by directing them in the pursuit of Truth, Goodness, and Beauty through Socratic investigation of the great works of Western literature, history, and philosophy. While training students in the art of reading, listening, speaking, and writing, this course also looks at history as taught through the chronology of the texts. It is important to keep in mind, however, that even though the course spans from Rome to modernity and is particularly concerned with developing the idea of “the West”, it is not a “Western Civ” class. Rather, it is a course centered around the seminar, and concerned with the art of thinking well.Prerequisite: None

CLAS4113 - THESIS

General

Course Prefix
CLAS

Course Number
4113

Description
This course guides students through the research, development, writing, and presentation of a Senior Thesis—a capstone project demonstrating depth of thought, academic skill, and the integration of faith and learning. Students will choose a topic of enduring significance, engage with primary texts, and construct a sustained written argument grounded in classical thought and scholarly method. Throughout the process, students will work with a faculty advisor, participate in peer review, and deliver a formal oral defense. This project reflects the culmination of a student's academic formation and prepares them for future collegiate or professional endeavors.

CMCN4001 - FAITH MUSIC & CULTURE

General

Course Prefix
CMCN

Course Number
4001

Description
The purpose of this course is to help students connect a career path in the entertainment industry with a calling to be Christ-followers. A holistic understanding of ourselves in the world includes the ability to hear the "noise" in culture, assessing personal strengths/weaknesses, considering the cost of a career in the entertainment industry and then mapping a strategy for moving forward.

Learning Outcomes

Learning Outcomes

Objective
Articulate the impact of "noise" within the culture and its numbing effect on the mind and soul of a creative person.

Objective
Critically consider a Christ-centered vision for music content, production and delivery.

Objective
Critically reflect on how to live a life that wholly incarnates their faith while living in a world of contemporary entertainment.

Objective
Identify and evaluate their creative and personal strengths and weaknesses through the lens of I Corinthians 12.

CMCN4002 - INSIDE THE MUSIC INDUSTRY

General

Course Prefix
CMCN

Course Number
4002

Description
The purpose of this course is to provide students with an overview of the entire entertainment industry and how art, business and technology interact with each other. Since employers continue to hire graduates who have skill-sets across multiple disciplines, this course equips students with a core set of “gotta knows” that will prepare them for careers in every aspect of the entertainment industry.

Learning Outcomes

Learning Outcomes

Objective
Recall and utilize core knowledge in recording, sound reinforcement and concert production.

Objective
Apply core knowledge and analytical skills to basic contract writing and interpretation.

Objective
Summarize and understand basic instrument groups, music vocabulary, and stage etiquette.

Objective
Articulate the need for principled judgment and distinguished alternative & ethical courses of action for a Christian navigating the music industry.

CMCN4003 - PRACTICUM: CMC TOUR

General

Course Prefix
CMCN

Course Number
4003

Description
This course, often referred to as “Road Trip” or “Tour” is the capstone experience of the semester. Students and faculty embark on a 6-8 day tour of college campuses and clubs mounting a show each night with full production - lights, sound, staging and video. Every student is involved in the process either as a performer, part of the technical staff or as a producer. The Business track students are also required to keep the tour on budget by tracking costs and providing a daily analysis of the budget.

Learning Outcomes

Objective
Design and build a complex, DMX-controlled lighting system.

Objective
Map a video wall and control content via resolume.

Objective
Connect a multi-camera system to a switcher and push program signal to iMag and live stream.

Objective
Configure a stage according to input lists and stage plots.

Objective
Understand the power distribution sequence from a 3-phase source to breakout.

CNST2013 - PLAN READING SPECS AND BLDG CODES

General

Course Prefix
CNST

Course Number
2013

Description
This course is designed to introduce the student to the primary design of construction design drawings, provide an understanding of reading construction design plans, (primarily architectural and structural), discover the origins and importance of building codes and their impact on the built environment and safety. This course will cover the 16 divisions within construction specification

Fulfill all requirements of their Personal Research Contract.

Name
Demonstrate that the minimum contracted readings have been accomplished.

Name
Demonstrate significant and thorough knowledge of all contracted readings.

Name
Demonstrate correct use of APA style guidelines for all references.

COMM2243 - AMERICAN RHETORICAL TRADITION

General

Course Prefix
COMM

Course Number
2243

Description
This course teaches the art of rhetoric as derived from the classical world, but exposes students to this liberal art through the robust American tradition of oratory. Students will learn this art by being instructed in rhetorical theory, by imitating the best writings and speeches America has to offer, and by regularly producing original compositions (repeating the classical pedagogical cycle of theory, imitation, and practice). Moreover, throughout the course, students will take several passes through the five rhetorical canons: Invention, Arrangement, Style, Memory, and Delivery. The course begins by providing an introduction to each canon and then proceeds by moving through the elements of each again and again, digging deeper into each canon at each pass.

Learning Outcomes

Learning Outcomes

Name
Analyze and evaluate rhetorical texts from the American tradition, identifying the use of the five canons, rhetorical appeals, and structural elements of discourse.

Name
Apply principles of classical rhetoric (invention, arrangement, style, memory, and delivery) to develop persuasive written and oral communication.

Name
Construct well-organized and persuasive arguments using appropriate rhetorical strategies, including ethos, pathos, logos, and common topics.

Name
Demonstrate effective public speaking skills, integrating voice, delivery, and memorization techniques to enhance message impact.

Name
Compose original rhetorical works that reflect clarity, stylistic sophistication, and awareness of audience and purpose.

Name
Critically assess arguments and identify logical structures and fallacies, including syllogisms and enthymemes.

COMM2323 - INTRODUCTION TO PUBLIC RELATIONS

General

Course Prefix
COMM

Course Number
2323

Description
This course provides an overview of public relations with emphasis on the tools, skills, and technology needed in the creation and exchange of messages in public and private organizations using print, broadcast, and electronic media.Prerequisites: None* Do not register for this course if you have taken DCOM 2323

Credit Hours

Learning Outcomes

Learning Outcomes

Objective
Outline how Christian and ethical principles are aligned to leadership, civic and community engagement, diversity, and personal well-being.

Name
Apply the mission, values, and traditions of Southeastern University to personal, academic, and professional goals.

Name
Align SEU Network resources to whole person growth during and after college.

Name
Demonstrate essential academic skills, behaviors, and self-awareness necessary for success in college-level courses.

Name
Outline how Christian and ethical principles are aligned to leadership, civic and community engagement, diversity, and personal well-being.

CORE1112 - DIVINE DESIGN & MISSIONAL VOCATION

General

Course Prefix
CORE

Course Number
1112

Description
This course prepares students for success in professional, academic, and social settings through leadership development aligned to whole person self-actualization. Through this course, students will explore their Divine Design and the career most aligned to their unique giftings outlining a clear path to personal and professional success. The course will focus on career readiness concepts through an exploration of critical analysis of spirituality and society, modes of inquiry through a deep dive of paths of study at SEU, and real-world problems.Prerequisite: CORE 1111

Learning Outcomes

Learning Outcomes

Objective
Outline a career path highlighting personal, spiritual, and professional attributes (strengths and weaknesses) including mentor models, supports, and goals.

Name
Investigate career paths through various modes of inquiry.

Name
Articulate real world problems to solve based on ones Divine Design.

Name
Develop a clear path toward a career aligned to Gods giftings.

Name
Outline a career path highlighting personal, spiritual, and professional attributes (strengths and weaknesses) including mentor models, supports, and goals.

CORE3003 - CREATING THRIVING COMMUNITIES

General

Course Prefix
CORE

Course Number
3003

Description
This course explores the role of believers in creating thriving communities—communities where people and institutions labor together for the common good of all. Students will engage the idea of thriving communities by reflecting on relevant concepts from biblical studies, theological studies, and social sciences. The course will give attention to particular historical and contemporary instances of thriving communities.

CORE3113 - WORLDVIEW & COMPLEX PROBLMS SEMINAR

General

Course Prefix
CORE

Course Number
3113

Description
The Worldview and Complex Problems Seminar brings Christian worldview and modes of inquiry to bear on a contemporary problem in the world today. Offered topically, students will practice intellectual flexibility for application at the university and beyond. Students will engage in thought leadership and public discourse as they work together in approaching today's toughest issues from a Christian worldview using modes of inquiry offered through the disciplines of math, science, rhetoric, history, art, culture, social sciences, and theology. Topics vary by section.Prerequisite: CORE 1112 OR Junior Standing

Learning Outcomes

Learning Outcomes

Objective
Create a final course artifact demonstrating Christian worldview through modes of inquiry applied to a contemporary complex problem.

Name
Identify modes of inquiry that contribute to solving complex problems.

Name
Apply one or more modes of inquiry to solving complex problems.

Name
Engage in public thought leadership applying Christian worldview to a contemporary complex problem.

Name
Create a final course artifact demonstrating Christian worldview through modes of inquiry applied to a contemporary complex problem.

CORE3213 - CLASSICAL ERA

General

Course Prefix
CORE

Course Number
3213

Description
This course draws on classical works of literature in the Greek and Roman eras to expose students to influential worldviews and their implications for life and culture. Students analyze classic texts such as Homer's Odyssey, Plato's Republic, and Virgil's Aeneid, studying the nuances of these texts while also making connections between them and the present day, including how plots, themes, characters, and events in classic works illuminate current trends, ideas, and ideologies in contemporary society. More deeply, students learn to identify worldview moorings and core beliefs, and how influential pagan ideas shape our lives today – and how these ideas stand in sharp contrast to Christian understandings of human identity, ethics, and God.

CORE3313 - EARLY CHRISTIAN ERA

General

Course Prefix
CORE

Course Number
3313

Description
This course draws on literature in the early Christian era as a means to expose students to influential worldviews and their implications for life and culture. Students analyze classic texts such as Dante's Divine Comedy, Beowulf, and a text from Arthurian literature, studying the nuances of these texts while also making connections between them and the present day, including how plots, themes, characters, and events in classic works illuminate current trends, ideas, and ideologies in contemporary society. More deeply, students learn to identify worldview moorings and core beliefs, and how influential pagan ideas shape our lives today – and how these ideas stand in sharp contrast to Christian understandings of human identity, ethics, and God.

CORE3413 - THE MODERN ERA

General

Course Prefix
CORE

Course Number
3413

Description
This course draws on works of literature from the time of the English Civil War to the French Revolution. Students will examine the two great political conflicts, both culminating in regicide, to learn about their vastly different motivations, goals, and outcomes. This course will make connections between them and the present day, including how plots, themes, characters, and events in classic works of literature illuminate current trends, ideas, and ideologies in contemporary society. More deeply, students learn to identify worldview moorings and core beliefs, and the terminology of the modern period shapes our lives today – and how these ideas stand in sharp contrast to Christian understandings of human identity, ethics, and God.

Completion Requirement

Prerequisites

Complete ALL of the following Courses:

- CORE1112 - DIVINE DESIGN & MISSIONAL VOCATION

OR Junior Standing (earned 60 or more credit hours)

Learning Outcomes

Learning Outcomes

Name
Identify and apply modes of inquiry that contribute to solving complex problems.

Name
Engage in public thought leadership, applying a Christian worldview to literature written between the Puritan era and the Romantics.

Name
Develop an understanding of the characteristic form and content of various genres of literature, e.g. epic, satire, lyric poetry, the novel and connect them to their (religious) worldviews.

Name
Develop an understanding of how literary language is used, and how important terms develop radically different connotations over the course of the period.

Name
Integrate the material they learn with concurrent historical and philosophical developments.

Name
Gradually develop a capacity to reflect on the religious presuppositions of every age, including our own.

Name
Analyze the Biblical worldview of how the Puritans transformed during the Enlightenment and Romantic periods into a secular framework, critiquing it on the basis of the authority of Scripture and the normativity of Christian ethics.

CORE3513 - THE CONTEMPORARY ERA

General

Course Prefix
CORE

Course Number
3513

Description
This course draws on works of literature written from the time of the Industrial Revolution to the Second World War. The course will analyze how many of today's problems are rooted in nineteenth-century ideological frameworks, including how plots, themes, characters, and events in literature written up until the Second World War illuminate trends, ideas, and ideologies that still resonate. These problems cannot be resolved using the same faulty assumptions as the period, so the course will look backwards to the different assumptions of the Classical, Christian, and Modern eras. More deeply, students will learn to identify worldview moorings and core beliefs and see how influential contemporary ideology shapes our lives today – and how these ideas stand in sharp contrast to Christian understandings of human identity, ethics, and God.

Prerequisites

Complete ALL of the following Courses:

- CORE1112 - DIVINE DESIGN & MISSIONAL VOCATION

OR Junior Standing (earned 60 or more credit hours)

Learning Outcomes

Learning Outcomes

Name
Identify and apply modes of inquiry that contribute to solving complex problems.

Name
Engage in public thought leadership, applying a Christian worldview to literature written under the auspices of the modern nation state and its hegemonic social institutions.

Name
Develop an understanding of the characteristic form and content of various genres of literature, e.g. lyric poetry, the novella, and the novel and connect them to their irreligious worldviews.

Name
Develop an understanding of how literary language is used, and how it reflects a growing sense of meaninglessness to life.

Name
Integrate the material they learn with concurrent historical and philosophical developments.

Name
Gradually develop a capacity to reflect on the cultural liturgy of a post-Christian era.

Name
Understand how the Romantics' panentheist hope in the goodness of mankind quickly gives way to the despair of Darwinist materialism, and Marx, Nietzsche and Freud's 'hermeneutics of suspicion' replaces a Biblical understanding of the authority of Scripture and the normativity of Christian ethics with forms of pragmatism, voluntarism, and psychotherapy.

CORE4003 - FIELD SCHOOL: PRACTICUM EXPERIENCE

General

Course Prefix
CORE

Course Number
4003

Description
1Day Field School Practicum Experience creates opportunities for hands-on training in uniting,empowering, and activating faith communities, NGO's, and community champions alongsidetens of thousands of volunteers to demonstrate the love of Jesus while providing sustainablesolutions to the greatest challenges facing the city.

Learning Outcomes

Learning Outcomes

Name
Explain major theories, typologies, and empirical findings related to serial offending, drawing on contemporary research.

Name
Evaluate the ethical responsibilities of criminal justice professionals when working on serial crime cases, including issues related to truth-seeking, trauma-informed practice, victim advocacy, and justice

Name
Assess psychological, social, and developmental factors that contribute to serial offending.

Name
Identify and address ethical challenges faced by criminal justice professionals, such as bias, media influence, victim sensitivity, and decision-making under pressure.

Name
Reflect on how personal values and a faith-informed worldview may influence one's approach to justice, accountability, and professional conduct in cases involving extreme violence.

Name
Integrate behavioral science and ethical reasoning to propose appropriate criminal justice responses to serial offending.

Name
Discuss how concepts such as human dignity, moral responsibility, and ethical practice impact responses to severe forms of criminal behavior.

CRIM3203 - SOCIOLOGY OF POLICING

General

Course Prefix
CRIM

Course Number
3203

Description
This course will cover the history, evolution and structure of policing in the United States. Popular innovations in policing and law enforcement will be emphasized. Special attention to conflicts and imperatives which define police officers' roles and the character of police work will be discussed along with careers and hiring practices by law enforcement agencies. Learning Outcomes

Objective
Identify the purposes of various sentencing philosophies and guidelines.

Name
Distinguish among the characteristics of the civil, juvenile, and criminal court systems.

Name
Identify the judicial process from arrest to appeal and the constitutional rights of citizens in a criminal proceedings.

Name
Discuss the public policy and political implications of decisions in the criminal court system.

Name
Analyze evidentiary rules and the various criminal defenses utilized by counsel.

Name
Discuss various U.S. Supreme Court cases that have impacted the judicial process.

Name
Explain the duties and levels of court organization within the dual court structure in the United States.

Name
Examine the key actors in the court proceedings and the function and dynamics of the courtroom work group.

Name
Identify the purposes of various sentencing philosophies and guidelines.

CRIM3503 - ETHICS IN CRIMINAL JUSTICE

General

Course Prefix
CRIM

Course Number
3503

Description
This course is an examination of the historical and philosophical background of the field of ethics, specifically professional ethics in the criminal justice system. The curriculum includes an examination of ethical theories and the relationship and ethical dilemmas faced by professionals within the criminal justice system. Prerequisite: None

Credit Hours

Minimum Credit Hours:
3

Maximum Credit Hours:
3

(Credit Hours) Value:
3

Contact Hours (not needed)

(Contact Hours) Value (not needed) :
0

Repeatable:
Yes

Number Of Repeats:
3

Number Of Credits:
3

Learning Outcomes

Learning Outcomes

Objective
Classify ethical decisions and consequences in the criminal justice system.

Name
Demonstrate a fundamental understanding of ethical theories.

Name
Discuss ethical issues within the criminal justice system.

Name
Summarize personal values, morals, and beliefs in relation to situations within the criminal justice system.

Name
Classify ethical decisions and consequences in the criminal justice system.

CRIM3603 - CORRECTIONS & PUNISHMENT

General

Course Prefix
CRIM

Course Number
3603

Description
This course is an introduction to the corrections system in the United States and will provide an overview of the history, current institutional practices, policies, and legal issues. There is an emphasis on contemporary conditions and alternatives to traditional responses to crime and an exploration of the principles and practices of correctional options afforded to offenders in various types of settings. Topics covered include incarceration, deterrence, rehabilitation, retribution, and system reform. Prerequisite: CRIM 2203

Credit Hours

Minimum Credit Hours:
3

Maximum Credit Hours:
3

(Credit Hours) Value:
3

Contact Hours (not needed)

Course Requisites

Type
Completion Requirement

Prerequisites

Complete ALL of the following Courses:

- CRIM2203 - CRIMINAL JUSTICE SYSTEMS

Learning Outcomes

Learning Outcomes

Objective
Categorize the concerns regarding different segments of the correctional population and policy implications.

Name
Examine the influence of Christian attitudes on the future of punishment.

Name
Explain the historical development of the correctional system from the Middle Ages to present.

Name
Identify the differences in the juvenile and adult correctional systems.

Name
Identify the development and types of prisoners legal rights.

Name
Compare the different types of punishment, including incarceration, probation, parole, and intermediate sanctions.

Name
Categorize the concerns regarding different segments of the correctional population and policy implications.

CRIM3803 - CRITICAL ISSUES IN CRIMINAL JUSTICE

General

Course Prefix
CRIM

Course Number
3803

Description
This course is a study of current issues and debates that affect the criminal justice system. The curriculum includes an examination and discussion on all aspects and viewpoints of the critical issues faced by professionals within the criminal justice system. Topics for discussion include but are not limited to: public policy implications, media's involvement in the criminal justice system, diversity, workforce generations, criminal justice training, terrorism, shift in types of crime and prevention, and public perceptions of criminal justice professionals.Prerequisite: CRIM 2203

Credit Hours

Minimum Credit Hours:
3

Maximum Credit Hours:
3

Completion Requirement

Prerequisite

Complete ALL of the following Courses:

- CRIM2203 - CRIMINAL JUSTICE SYSTEMS

Learning Outcomes

Learning Outcomes

Objective
Determine objective, factual, and legitimate resources for current issues impacting the criminal justice system.

Name
Identify current issues and debates that are impacting the criminal justice system.

Name
Compare various viewpoints to critical issues facing the criminal justice system.

Name
Discuss ones view on important matters being faced by criminal justice officials.

Name
Determine objective, factual, and legitimate resources for current issues impacting the criminal justice system.

CRIM4003 - SPECIAL TOPICS IN CRIMINAL JUSTICE

General

Course Prefix
CRIM

Course Number
4003

Description
Special Topics in Criminal Justice will cover particular topics of interest as determined by the College of Business and Legal Studies. These will be predicated on current events, new developments, and the interest of Criminal Justice students.

Credit Hours

Minimum Credit Hours:
0

Maximum Credit Hours:
4

CRIM4203 - THEORY AND CRIMINAL JUSTICE

General

Course Prefix
CRIM

Course Number
4203

Description
This course provides an analysis of how crime affects society. Prevention and control of criminal behavior are based on theoretical models. Several of these models are examined as they relate to the day-to-day functions of the police, courts, and corrections.Prerequisite: CRIM 2203

Credit Hours

Minimum Credit Hours:
3

Maximum Credit Hours:
3

(Credit Hours) Value:
3

Contact Hours (not needed)

Simple Requirements

Course Requisites

Type
Completion Requirement

Prerequisite

Complete ALL of the following Courses:

- CRIM2203 - CRIMINAL JUSTICE SYSTEMS

Learning Outcomes

Learning Outcomes

Objective
Evaluate the theoretical explanations of crime and determine their adequacy and relevance in today’s society.

Name
Examine the major components of the criminal justice system.

Name
Analyze theoretical frameworks which guide law enforcement, the court system, and corrections.

Name
Research the relationship between the daily functions of the subsystems and theoretical schemes.

Name
Compare competing perspectives on the causes of criminal behavior.

Name
Relate the use of theory to the practice of the criminal justice system.

Name
Evaluate the theoretical explanations of crime and determine their adequacy and relevance in todays society.

CRIM4303 - CRIMINAL JUSTICE SENIOR SEMINAR

General

Course Prefix
CRIM

Course Number
4303

Description
This course is designed as the capstone learning experience for all Criminal Justice majors. The course will integrate activities into a comprehensive understanding of the integrative nature of the criminal justice system. Emphasis is on policy evaluation, career options, and member training for a criminal justice agency. Prerequisite: CRIM 3603

Credit Hours

Minimum Credit Hours:
0

Maximum Credit Hours:
4

(Credit Hours) Value:
3

Contact Hours (not needed)

(Contact Hours) Value (not needed) :

Simple Requirements

Course Requisites

Type
Completion Requirement

Prerequisite

Complete ALL of the following Courses:
- CRIM3603 - CORRECTIONS & PUNISHMENT

Learning Outcomes

Learning Outcomes

Objective
Discuss the social, political, and academic impact on the criminal justice system.

Name
Evaluate current issues and potential solutions within the criminal justice system.

Name
Examine current criminal justice policies that are being discussed and presented at the local, state, and federal level.

Name
Assess various criminal justice statistics and research for their quality and validity.

Name
Research prospective career goals and opportunities with the criminal justice system.

Name
Discuss the social, political, and academic impact on the criminal justice system.

CRIM4403 - CRIMINAL LAW

General

Course Prefix
CRIM

Course Number
4403

Description
This course examines the core philosophies of criminal law, including both substantive and procedural elements. There is an emphasis on the theoretical foundations and principles of criminal law, state and federal criminal statutes, and court decisions. Discussions will also focus on the various criminal defenses. Prerequisite: None

Credit Hours

Minimum Credit Hours:
3

Maximum Credit Hours:
3

(Credit Hours) Value:
3

Contact Hours (not needed)

(Contact Hours) Value (not needed) :
3

Repeatable:

Learning Outcomes

Learning Outcomes

Objective
Apply critical thinking skills to research, and oral and written communication skills.

Name
Demonstrate knowledge of the history and fundamental philosophies of criminal law in our society.

Name
Apply knowledge of philosophies to scenarios in todays society.

Name
Identify the various criminal defenses and the application of such defenses.

Name
Evaluate U.S. Supreme Court cases as they pertain to criminal law.

Name
Apply critical thinking skills to research, and oral and written communication skills.

CRIM4903 - CRIMINAL JUSTICE INTERNSHIP

General

Course Prefix
CRIM

Course Number
4903

Description
This elective course requires work experience in an organization providing on-the-job training in criminal justice including state approved police academies. The intern will be supervised by a faculty coordinator and a supervisor in the organization and will report work experience through written and oral reports to the faculty coordinator.Prerequisite: CRIM 3603

Credit Hours

Minimum Credit Hours:
0

Maximum Credit Hours:
15

(Credit Hours) Value:
3

Contact Hours (not needed)

(Contact Hours) Value (not needed) :

15

Simple Requirements

Course Requisites

Type
Completion Requirement

Prerequisites

Complete ALL of the following Courses:

- CRIM3603 - CORRECTIONS & PUNISHMENT

Learning Outcomes

Learning Outcomes

Objective
Interact successfully with members of the criminal justice field.

Name
Understand how material learned in the classroom is applied in a professional setting.

Name
Participate in detailed procedures in a specific area of criminal justice as set forth in the internship agreement.

Name
Demonstrate the ability to function in the real-world environment.

Name
Interact successfully with members of the criminal justice field.

CRIS5003 - CRISIS AWARENESS

General

Course Prefix
CRIS

Course Number
5003

Description
This course will provide students with an examination of the foundation of theoretical concepts and practical applications of crisis awareness, focusing on preparedness before, during, and after the crisis. Prerequisites: None

Credit Hours

Minimum Credit Hours:
3

Maximum Credit Hours:
3

(Credit Hours) Value:
3

Contact Hours (not needed)

(Contact Hours) Value (not needed) :
3

Repeatable:
Yes

Number Of Repeats:
3

Number Of Credits:
3

Learning Outcomes

Learning Outcomes

Objective
Create and design crisis awareness information pamphlets.

Name
Articulate a theoretical understanding of what constitutes a crisis.

Name
Classify and differentiate between the various types of crises.

Name
Analyze the principal methods and techniques for overcoming barriers of crisis.

Name
Apply the principles of crisis preparedness to various case studies.

Name
Create and design crisis awareness information pamphlets.

CRIS5013 - CRISIS COMMUNICATION

General

Course Prefix
CRIS

Course Number
5013

Description
This course will examine the history, theory and development of crisis communication. The course will also analyze the crisis communication process before, during, and after the crisis, focusing on the most effective ways to communicate in response to the different types of crises. Prerequisites: None

Credit Hours

Minimum Credit Hours:
3

Maximum Credit Hours:
3

(Credit Hours) Value:
3

Contact Hours (not needed)

(Contact Hours) Value (not needed) :
3

Repeatable:
Yes

Number Of Repeats:
3

Number Of Credits:

Learning Outcomes

Learning Outcomes

Objective
Create and design a crisis communication plan that addresses communication before, during, and after the crisis.

Name
Articulate a theoretical understanding of crisis communication.

Name
Classify and differentiate between the various types of crisis communication.

Name
Break down and analyze ethical issues as they relate to crisis communication.

Name
Apply the theoretical principles of crisis communication to various case studies.

Name
Create and design a crisis communication plan that addresses communication before, during, and after the crisis.

CRJA5003 - CJ ADMINISTRATION & LEADERSHIP

General

Course Prefix
CRJA

Course Number
5003

Description
This course provides students with an in-depth understanding of public administration within the criminal justice field. Administrative functions such as organization, strategic planning, budgeting, and determining and implementing policies and procedures are examined. Students will be provided with the tools to evaluate policies and make informed decisions as managers and leaders within the criminal justice system. Prerequisites: None

Credit Hours

Minimum Credit Hours:
3

Maximum Credit Hours:
3

(Credit Hours) Value:
3

Contact Hours (not needed)

(Contact Hours) Value (not needed) :
0

Repeatable:
Yes

Number Of Repeats:
3

Number Of Credits:
3

Learning Outcomes

Learning Outcomes

Objective
Utilize decision-making skills in the context of the administration of criminal justice institutions.

Name
Identify the importance of ethical standards and behavior within criminal justice public managers.

Name
Evaluate policies and procedures as they pertain to the criminal justice system.

Name
Develop arguments for and against proposed and /or existing crime policy.

Name
Discuss the roles served by the various governmental entities in developing, implementing, and interpreting policy related to the criminal justice system.

Name
Demonstrate critical thinking, research, and oral and written communication skills on crime policy issues.

Name
Utilize decision-making skills in the context of the administration of criminal justice institutions.

CRJA5013 - ANALYSIS OF CRIMINAL JUSTICE DATA

General

Course Prefix
CRJA

Course Number
5013

Description
This course offers an introduction to theory and methodology in analyzing crime data. It will cover the essential foundations for the analysis of crime data, interpretations of analytical findings, and an introduction to geospatial analysis. The course will also explore data analysis as it relates to environmental and social issues with crime.Prerequisites: None

Credit Hours

Minimum Credit Hours:
3

Maximum Credit Hours:
3

(Credit Hours) Value:
3

Contact Hours (not needed)

(Contact Hours) Value (not needed) :
0

Repeatable:
Yes

Number Of Repeats:
3

Number Of Credits:
3

Learning Outcomes

Learning Outcomes

Objective
Construct familiarity and critical thinking skills as they relate to data analysis and its applications in law enforcement.

Name
Demonstrate knowledge of the concepts, and theoretical explanations related to data analysis in law enforcement.

Name
Develop knowledge of environmental criminology and how it influenced the creation and growth of crime analysis in law enforcement.

Name
Demonstrate the knowledge of statistical analysis and presentation of crime data.

Name
Demonstrate knowledge of geospatial analysis of crime data

Name
Construct familiarity and critical thinking skills as they relate to data analysis and its applications in law enforcement.

CRJA5023 - ETHICAL ISSUES IN CJ ADMINISTRATION

General

Course Prefix
CRJA

Course Number
5023

Description
This course is an examination of ethical dilemmas that those within criminal justice administration encounter. The curriculum includes an examination of ethical theories and their use in practical settings related to ethical decision making. Policy implementation will be evaluated as to the benefit of the criminal justice entities and the communities they serve. Areas will focus on law enforcement, the court system, and the corrections system. Prerequisites: None

Credit Hours

Minimum Credit Hours:
3

Maximum Credit Hours:
3

(Credit Hours) Value:
3

Contact Hours (not needed)

(Contact Hours) Value (not needed) :
0

Repeatable:
Yes

Number Of Repeats:
3

Number Of Credits:
3

Learning Outcomes

Learning Outcomes

Objective
Examine outcomes and consequences related to ethical situations and decision making.

Name
Demonstrate comprehensive knowledge of ethical theories.

Name
Analyze ethical situations and dilemmas confronted by those in the criminal justice field and administration.

Name
Discuss policy implementation and actions related to ethical decision making.

Name
Develop policy guidelines pertaining to ethics and the criminal justice field.

Name
Examine outcomes and consequences related to ethical situations and decision making.

CRJA5033 - LEGAL ISSUES IN CJ ADMINISTRATION

General

Course Prefix
CRJA

Course Number
5033

Description
This course examines current and frequently discussed legal topics in the United States as they pertain to the criminal justice system. Case law and legislation at the state and federal levels will be evaluated on their impact on criminal justice agencies, those working within the criminal justice field and within the society they serve. Prerequisites: None

Credit Hours

Minimum Credit Hours:
3

Maximum Credit Hours:
3

(Credit Hours) Value:
3

Contact Hours (not needed)

(Contact Hours) Value (not needed) :
0

Repeatable:
Yes

Number Of Repeats:
3

Number Of Credits:
3

Learning Outcomes

Learning Outcomes

Objective
Evaluate criminal justice policy implications that are derived from case law and legislation.

Name
Demonstrate knowledge of the history and fundamental philosophies of criminal law in our society.

Name
Apply knowledge of philosophies to scenarios in todays society as it relates to the legal field within criminal justice.

Name
Evaluate case law and legislation from various perspectives within the criminal justice system as well as from a societal perspective.

Name
Evaluate criminal justice policy implications that are derived from case law and legislation.

CRJA5043 - RESEARCH DESIGN & METHODOLOGY IN CJ

General

Course Prefix
CRJA

Course Number
5043

Description
This course examines the research process of quantitative and qualitative reasoning from question development to reporting findings. The impact of research on policy decisions will be reviewed within the criminal justice field. An emphasis will be placed on ethical considerations, research design, sampling, survey design, data collection methods, measurement of validity and reliability, and analysis in practical settings. Prerequisites: None

Credit Hours

Minimum Credit Hours:
3

Maximum Credit Hours:
3

(Credit Hours) Value:
3

Contact Hours (not needed)

(Contact Hours) Value (not needed) :
0

Repeatable:
Yes

Number Of Repeats:
3

Number Of Credits:
3

Learning Outcomes

Learning Outcomes

Objective
Identify and address breaches in ethics within the research process.

Name
Analyze various research designs and characteristics of qualitative and quantitative research.

Name
Contrast methods of data collection relating to questionnaires, observations, interviews, and focus groups.

Name
Identify different types of variables in a study and be able to know whether a causal relationship exists between variables.

Name
Understand the importance of appropriate sampling procedures and techniques.

Name
Articulate issues of reliability and validity within a research study.

Name
Assess appropriate resources and their function to research studies.

Name
Identify and address breaches in ethics within the research process.

CRJA5053 - THEORETICAL PERSPECTIVES WITHIN CJ

General

Course Prefix
CRJA

Course Number
5053

Description
This course provides students with an in-depth understanding of criminological theory. Explore and evaluate current criminological theory and evaluate their relation to policy implications and crime issues of today. Students will evaluate the validity of various theories as well as criminal justice administration policies from the perspective of law enforcement, courts, and corrections. Prerequisite: None

Credit Hours

Minimum Credit Hours:
3

Maximum Credit Hours:
3

(Credit Hours) Value:
3

Contact Hours (not needed)

(Contact Hours) Value (not needed) :
0

Repeatable:
Yes

Number Of Repeats:
3

Number Of Credits:
3

Learning Outcomes

Learning Outcomes

Objective
Evaluate how theoretical perspectives can influence policy and determine implementation strategies.

Name
Evaluate the theoretical explanations of crime from various perspectives in criminal justice.

Name
Determine the adequacy of criminological theory in todays society.

Name
Compare competing perspectives on the causes of criminal behavior.

Name
Assess the impact of theoretical perspectives on crime, criminal behavior, and administrative policies.

Name
Evaluate how theoretical perspectives can influence policy and determine implementation strategies.

CSCI1003 - INTRODUCTION TO COMPUTER SCIENCE

General

Course Prefix
CSCI

Course Number
1003

Description
This foundational course introduces students to the fundamental concepts and principles of computer science. Emphasizing both theory and practical application, the course covers a broad range of topics, including algorithms, data structures, software engineering principles, and an overview of programming languages. Students will learn about the history and evolution of computing, basic computational thinking, and problem-solving techniques. The course also touches upon essential topics such as computer architecture, operating systems, and the basics of network communication. Hands-on programming assignments and projects will be an integral part of the curriculum, providing students with the opportunity to apply theoretical concepts in practical scenarios. This course is designed to provide a comprehensive introduction to the field, paving the way for more specialized studies in computer science. No prior programming experience is required, making it ideal for students from all academic backgrounds who are interested in exploring the world of computing.Additional fees are associated with this course.

Credit Hours

Minimum Credit Hours:
3

Maximum Credit Hours:
3

(Credit Hours) Value:
3

Contact Hours (not needed)

(Contact Hours) Value (not needed) :

Learning Outcomes

Learning Outcomes

Objective
Reflect on the ethical implications of computing technologies and articulate their potential impacts on society.

Name
Describe fundamental concepts of computer science, such as algorithms and data structures, in clear terms.

Name
Implement basic programming solutions using a specific programming language to demonstrate practical skills in coding and debugging.

Name
Examine the efficiency of various algorithms, focusing on their time and space complexity.

Name
Compare different programming paradigms, including procedural, object-oriented, and functional programming, to determine their suitability for different types of problems.

Name
Design simple software solutions, showcasing an understanding of essential software development principles.

Name
Integrate knowledge of computer architecture and operating systems to better understand the interaction between software and hardware.

Name
Reflect on the ethical implications of computing technologies and articulate their potential impacts on society.

CSCI2003 - DATA STRUCTURES

General

Course Prefix
CSCI

Course Number
2003

Description
Building upon the foundational knowledge acquired in the introductory computer science course, this course delves deeper into advanced programming concepts and data structures. Students will explore complex data structures like trees, graphs, and hash tables, and understand their application and implementation. The course emphasizes algorithmic thinking, covering algorithms for searching, sorting, and data structure manipulation.Prerequisite: CSCI 1003Additional fees may be associated with this course.

Complete ALL of the following Courses:

- CSCI1003 - INTRODUCTION TO COMPUTER SCIENCE

Learning Outcomes

Learning Outcomes

Objective
Construct efficient software solutions for a set of given problems, demonstrating a strategic choice of data structures and algorithms based on the problem requirements.

Name
Implement various complex data structures such as trees, graphs, and hash tables in a high-level programming language, demonstrating understanding of their structure and use cases.

Name
Design and analyze algorithms for searching, sorting, and manipulating data within these structures, showcasing the ability to evaluate their efficiency and effectiveness.

Name
Solve practical programming problems using advanced data structures, demonstrating creativity and efficiency in approach and solution.

Name
Critique the implementation of data structures and algorithms in given code samples, identifying strengths and potential improvements.

Name
Evaluate the performance of different algorithms and data structures in varying contexts, using appropriate metrics such as time and space complexity.

Name
Construct efficient software solutions for a set of given problems, demonstrating a strategic choice of data structures and algorithms based on the problem requirements.

CSCI3103 - SPECIAL TOPICS IN COMPUTER SCIENCE

General

Course Prefix
CSCI

Course Number
3103

Description
This course provides an in-depth examination of a specialized topic within computer science. The content varies by semester based on current trends and advancements in the field of computer science, as well as the interests and needs of both students and faculty. Topics may include but are not limited to advanced algorithms, emerging programming languages, cybersecurity, artificial intelligence, and computational theory. This course may be repeated for credit a maximum of three times as long as the topic is not the same.Prerequisite: CSCI 2003

Credit Hours

Minimum Credit Hours:
3

Maximum Credit Hours:
3

Course Requisites

Type
Completion Requirement

Prerequisites

Complete ALL of the following Courses:

- CSCI2003 - DATA STRUCTURES

Learning Outcomes

Learning Outcomes

Objective
Identify and describe the fundamental concepts, techniques, and challenges specific to the special topic.

Objective
Apply critical thinking and problem-solving skills to analyze issues and solve complex problems related to the special topic.

Objective
Utilize specialized software or programming languages relevant to the special topic to implement practical solutions.

Objective
Communicate effectively using the technical vocabulary of the special topic both orally and in writing.

Objective
Evaluate current research and developments in the field related to the special topic and discuss their implications.

CSDS1003 - INTRO. TO COMM. DISORDERS

General

Course Prefix
CSDS

Course Number
1003

Description
This course is designed to introduce students to the field of communication disorders. Topics addressed are related to the function of speech, language, and hearing and how they support human communication. Communication disorders across the lifespan are also discussed. Students in various disciplines such as education, psychology, linguistics, social work, or family studies could benefit from this course.

Credit Hours

Minimum Credit Hours:
3

(Credit Hours) Value:
3

Contact Hours (not needed)

(Contact Hours) Value (not needed) :
3

Repeatable:
Yes

Number Of Repeats:
3

Number Of Credits:
3

Learning Outcomes

Learning Outcomes

Name
Demonstrate knowledge of the basic principles of human speech, language, and hearing development.

Name
Identify typical developmental milestones related to speech, language, and hearing.

Name
Demonstrate knowledge of the basic principles of evaluating and assessing individuals with communication disorders across the lifespan.

Name
Understand basic knowledge and terminology related to human communication disorders, such as articulation, fluency, voice, language, pragmatics, hearing, swallowing and cognition.

Name
Demonstrate knowledge of the basic standards of ethical conduct within the fields of audiology and speech language pathology.

Name
Demonstrate knowledge of professional credentials for speech language pathologists, audiologists, and speech and hearing scientists.

CSDS2003 - A&P OF SPEECH AND HEARING

General

Course Prefix
CSDS

Course Number
2003

Description
This course will introduce students to the anatomical structure and physiological mechanisms essential for speech production and hearing. Anatomy and physiology for respiration, phonation, articulation, resonation will be discussed in addition to innervation specific to speech and hearing.

Credit Hours

Minimum Credit Hours:
0

Maximum Credit Hours:
3

(Credit Hours) Value:
3

Contact Hours (not needed)

(Contact Hours) Value (not needed) :

Learning Outcomes

Learning Outcomes

Name
Identify anatomical and physiological structures essential for respiration, phonation, articulation, and resonation.

Name
Explain the functions of respiration, phonation, articulation, and resonation.

Name
Explain the relationships among respiration, phonation, articulation, and resonation.

CSDS2013 - SPEECH AND HEARING SCIENCE

General

Course Prefix
CSDS

Course Number
2013

Description
This course is a study in physiological frameworks and theories underlying the mechanisms of speech and hearing. Acoustic principles of speech and hearing are discussed.

Credit Hours

Minimum Credit Hours:
0

Maximum Credit Hours:
4

(Credit Hours) Value:
3

Contact Hours (not needed)

(Contact Hours) Value (not needed) :

Number Of Repeats:
3

Number Of Credits:
3

Learning Outcomes

Learning Outcomes

Name
Define concepts related to the physics of sound.

Name
Measure and interpret data representing sound frequencies.

Name
Explain the relationship between speech and hearing.

Name
Interpret current research related to speech and hearing sciences.

Name
Outline the physiological aspects of acoustics.

CSDS2023 - SPEECH SOUND DISORDERS

General

Course Prefix
CSDS

Course Number
2023

Description
This course is a study of the relationship between phonology and articulation in the context of human communication. Identification, classification, analysis, and remediation of phonological and articulation disorders will also be addressed.Prerequisite: CSDS 2003 & CSDS 2033

Credit Hours

Minimum Credit Hours:
3

Maximum Credit Hours:
3

(Credit Hours) Value:
3

Contact Hours (not needed)

(Contact Hours) Value (not needed) :
3

Repeatable:
No

Number Of Repeats:
3

Number Of Credits:
3

Learning Outcomes

Learning Outcomes

Name
Describe the anatomy and physiology of articulation.

Name
Describe typical articulation acquisition and the parameters involved in typical sound production.

Name
Identify causes of atypical articulation and phonology.

Name
Explain how human language sound systems are related to linguistic development and communication.

Name
Identify, analyze, and transcribe disordered phonology and articulation.

Name
Plan, execute, analyze, and interpret diagnostic information to determine if there is a disorder.

Name
Describe and apply various intervention approaches for articulation and phonological disorders based on contemporary research.

CSDS2033 - PHONETICS

General

Course Prefix
CSDS

Course Number
2033

Description
This course is an in-depth study of the perception and production of speech sounds and their representations in the International Phonetic Alphabet (IPA) with emphasis on analyzing and transcribing phonemes at the word level and in connected speech for English and its various dialects and for speech sound disorders.

Credit Hours

Minimum Credit Hours:
0

Maximum Credit Hours:
3

Number Of Credits:
3

Learning Outcomes

Learning Outcomes

Name
Transcribe speech sounds into IPA.

Name
Read IPA to identify sound patterns.

Name
Distinguish between standard and non-standard English speech utterances.

Name
Identify disordered speech utterances.

CSDS2043 - CSD SEMINAR

General

Course Prefix
CSDS

Course Number
2043

Description
This course prepares students to understand scopes of practice, degree requirements, and necessary preparation to work in the field of communication sciences and disorders. Students are instructed in preparation for graduate study and ongoing requirements for licensure or certification by state. This seminar is required for every Communication Sciences and Disorders (CSD) major.

Name
Identify university, local, state, federal, and ASHA requirements to enter graduate level education or professional practice.

Name
Develop a personalized learning plan.

Name
Create and maintain clinical and non-clinical documentation to support professional interest(s) post-graduation.

Name
Analyze contemporary issues that impact the field of communication sciences and disorders profession.

CSDS3003 - MULTICULTURAL ASPECTS OF COMM.

General

Course Prefix
CSDS

Course Number
3003

Description
This course will provide a framework designed to help students understand the relationship between culture and communication through both sociological and Biblical perspectives. Students will examine the impact these variables have on clinical service provision to clients from various cultural and linguistic backgrounds.

Credit Hours

Minimum Credit Hours:
3

Maximum Credit Hours:
3

(Credit Hours) Value:
3

Contact Hours (not needed)

(Contact Hours) Value (not needed) :
3

Repeatable:
Yes

Number Of Repeats:
3

Number Of Credits:
3

Learning Outcomes

Learning Outcomes

Name
Explain cultural differences in the use of pragmatic skills.

Name
Identify the influence culture exerts on language use.

Name
Compare and contrast sociological issues related to language use among and between various demographics.

Name
Demonstrate knowledge of contemporary professional issues as they relate to individuals from culturally and linguistically diverse backgrounds.

Name
Analyze cultural perspectives and responses to disability.

CSDS3033 - LANGUAGE DISORDERS & INTERVENTIONS

General

Course Prefix
CSDS

Course Number
3033

Description
This course focuses on oral and written language acquisition and development, as well as the nature of delayed or disordered language from birth to adolescence. Emphasis is placed on diagnosis and clinical management within the components of language, phonology, morphology, syntax, semantics, and pragmatics.

Credit Hours

Minimum Credit Hours:
0

Maximum Credit Hours:
3

(Credit Hours) Value:
3

Contact Hours (not needed)

(Contact Hours) Value (not needed) :
3

Repeatable:
Yes

Number Of Repeats:
3

Number Of Credits:
3

Learning Outcomes

Learning Outcomes

Name
Identify developmental milestones specific to oral (expressive and receptive) and written language.

Name
Demonstrate the ability to integrate knowledge pertaining to normal and abnormal oral (receptive and expressive) and written language development across the lifespan.

Name
Demonstrate knowledge of the impact of etiologies, characteristics, development, culture, acoustics, and psychological variables may impact oral and written language development.

Name
Demonstrate current knowledge of the principles and methods specific to prevention, assessment and intervention.

Name
Demonstrate evidence informed assessment or treatment methods for oral and written language disorders.

Name
Interpret research from the field related to the course topic.

CSDS3073 - FLUENCY & VOICE DISORDERS

General

Course Prefix
CSDS

Course Number
3073

Description
In this course students will expand their knowledge of anatomy and physiology for speech production, as they explore the world of fluency, also known as stuttering, and voice disorders. Exploration will occur related to etiology, assessment, and intervention for both disorders.

Credit Hours

Minimum Credit Hours:
0

Maximum Credit Hours:
3

(Credit Hours) Value:
3

Contact Hours (not needed)

(Contact Hours) Value (not needed) :
3

Repeatable:
Yes

Number Of Repeats:
3

Number Of Credits:
3

Learning Outcomes

Learning Outcomes

Name
Differentiate between developmental versus acquired fluency and voice disorders.

Name
Identify fluency disorders and voice disorders based on assessment data.

Name
Outline appropriate treatments for fluency and voice disorders.

Name
Integrate fluency and voice disorders into Christian worldview.

Name
Discuss the psychological and social impact on individuals with fluency or voice disorders.

Name
Interpret research from the field related to the course topic.

CSDS3083 - FAITH INTEGRATION IN CSD

General

Course Prefix
CSDS

Course Number
3083

Description
This course is designed to engage students in critical thought and reflection as they apply the tenets of their faith into the formation of thought and practice in their chosen vocation, including working with those with disabilities.

Credit Hours

Minimum Credit Hours:
0

Maximum Credit Hours:
3

(Credit Hours) Value:
3

Contact Hours (not needed)

(Contact Hours) Value (not needed) :
3

Repeatable:
Yes

Number Of Repeats:
3

Number Of Credits:
3

Learning Outcomes

Learning Outcomes

Name
Recognize the distinctive features created in humanity by God.

Name
Discuss and analyze theology in light of disability.

Name
Develop ways to integrate Christlikeness within the context vocation.

Name
Integrate faith and learning in practice and scholarship.

CSDS3093 - SPECIAL TOPICS IN CSD

General

Course Prefix
CSDS

Course Number
3093

Description
This course will cover topics in communication sciences and disorders that are not typically examined in depth in other course offerings. Students will learn about emerging topics and current research within the field of communication sciences and disorders. Topics vary with each instructor.

Credit Hours

Minimum Credit Hours:
1

Maximum Credit Hours:
3

(Credit Hours) Value:
3

Contact Hours (not needed)

(Contact Hours) Value (not needed) :
3

Repeatable:
Yes

Number Of Repeats:
3

Number Of Credits:
6

Learning Outcomes

Learning Outcomes

Name
Students will interpret and evaluate contemporary professional issues and current research in the field of speech-language pathology and audiology.

Name
Students will demonstrate competence in critical thinking and in oral and written language skills.

Name
Students will communicate effectively, recognizing the needs, values, preferred mode of communication, and cultural/linguistic background of the client/patient, family, caregivers, and relevant others.

Name
Students will collaborate with other professionals in case management in simulated or live opportunities.

Name
Students will adhere to the ASHA Code of Ethics and behave professionally.

CSDS3203 - AUDIOLOGY AND AURAL REHABILITATION

General

Course Prefix
CSDS

Course Number
3203

Description
This course is an introduction to audiology and aural rehabilitation. Basic audiological evaluation, interpretation of evaluative data, and the impact of hearing disorders on all aspects of communication across the lifespan will be addressed.

Credit Hours

Minimum Credit Hours:
3

Maximum Credit Hours:
3

(Credit Hours) Value:
3

Contact Hours (not needed)

(Contact Hours) Value (not needed) :
3

Repeatable:
Yes

Number Of Repeats:
3

Number Of Credits:
3

Learning Outcomes

Learning Outcomes

Name
Describe the physical acoustics and psychoacoustics of sound and its measurements.

Name
Describe how to evaluate typical and atypical hearing and interpret results of various types of audiometric tests.

Name
Describe the general anatomy and physiology of the hearing mechanism and its pathways of sound.

Name
Outline appropriate treatments for specific hearing disorders including aural rehabilitation and hearing assistive technology.

Name
Interpret research from the field related to the course topic.

CSDS4013 - DEAF PERSPECTIVES

General

Course Prefix
CSDS

Course Number
4013

Description
This course studies the sociological issues concerning the deaf community's interactions with and among various people groups. Social and psychological meaning of deafness, deaf community, education of deaf children, sign languages, and historical trends are addressed.

Credit Hours

Minimum Credit Hours:
0

Maximum Credit Hours:
3

(Credit Hours) Value:
3

Contact Hours (not needed)

(Contact Hours) Value (not needed) :
3

Repeatable:
Yes

Number Of Repeats:
3

Number Of Credits:
3

Learning Outcomes

Learning Outcomes

Name
Apply knowledge to define deafness.

Name
Describe the screening process for identifying deafness.

Name
Outline historical trends in perspectives on deafness.

Name
Evaluate the sociological and psychological issues surrounding deafness.

Name
Demonstrate knowledge of deaf culture by creative solutions within a variety of contexts.

CSDS4023 - CLINICAL METHODS

General

Course Prefix
CSDS

Course Number
4023

Description
This course explores clinical procedures utilized within the field of communication sciences and disorders. Students will be instructed in clinical setting types, service delivery models, utilization of screening, diagnostic and therapeutic techniques, clinical writing and guided clinical observation.

Credit Hours

Minimum Credit Hours:
3

Maximum Credit Hours:
3

(Credit Hours) Value:
3

Contact Hours (not needed)

(Contact Hours) Value (not needed) :
3

Repeatable:
Yes

Number Of Repeats:
3

Number Of Credits:
3

Learning Outcomes

Learning Outcomes

Name
Identify available speech and language testing materials and administration manuals.

Name
Select, administer, score, and interpret assessment materials including selection, administration and scoring for speech, language, and/or hearing.

Name
Interpret the results of the completed assessment.

Name
Explain the results of given assessment data and specific implications regarding speech or language.

Name
Align probable therapy targets based on the assessment outcomes.

CSDS4033 - LANGUAGE & LITERACY

General

Course Prefix
CSDS

Course Number
4033

Description
This course explores the influence of language disorders on the development of literacy. The course will apply knowledge of language disorders to the essential components of literacy (oral language, phonemic awareness, phonics, reading fluency, vocabulary, comprehension strategies, and written language).

Credit Hours

Minimum Credit Hours:
3

Maximum Credit Hours:
3

(Credit Hours) Value:
3

Contact Hours (not needed)

(Contact Hours) Value (not needed) :
3

Repeatable:
Yes

Number Of Repeats:
3

Number Of Credits:

Learning Outcomes

Learning Outcomes

Name
Understand the essential components of literacy.

Name
Explain in detail the effects of language disorders on literacy development.

Name
Select appropriate literacy interventions for learners with language disorders.

Name
Differentiate the effects of receptive versus expressive language disorders on literacy development.

Name
Distinguish between interventions and research-based interventions for dyslexia.

CSDS4043 - CLINICAL PRACTICUM

General

Course Prefix
CSDS

Course Number
4043

Description
This course provides clinical research and field work within settings related to communication sciences and disorders. Placements will provide experiences in the implementation of preventative and therapeutic services supporting speech, language, and hearing. Settings vary. Prerequisite: Must be a senior and be granted approval by the program coordinator.

Credit Hours

Minimum Credit Hours:
1

Maximum Credit Hours:
3

(Credit Hours) Value:
3

Simple Requirements

Course Requisite

Type
Prerequisite

Complete ALL of the following Courses:

- CSDS2033 - PHONETICS
  AND CSDS2023 - SPEECH SOUND DISORDERS
  AND CSDS2003 - A&P OF SPEECH AND HEARING
  AND CSDS3033 - LANGUAGE DISORDERS & INTERVENTIONS
  AND CSDS4023 - CLINICAL METHODS

Learning Outcomes

Learning Outcomes

Name
Apply critical thinking skills within the field of communication disorders for research and clinical applications.

Name
Evaluate data for research and clinical purposes within the field of communication disorders.

Name
Develop clinical skills related to screening, intervention, data collection and documentation.

Name
Demonstrate professional conduct consistent with a Biblical worldview, professional code of ethics, and cultural awareness.

CSDS4053 - NEUROLOGY OF COMM. DISORDERS

General

Course Prefix
CSDS

Course Number
4053

Description
This course is an introduction to speech and language disorders resulting from disease and/or injury to the peripheral and central nervous system. Communication disorders such as aphasia, apraxia, dysarthria, dementia, and cognitive communication disorders will be discussed.

Credit Hours

Minimum Credit Hours:
3

Maximum Credit Hours:
3

Learning Outcomes

Learning Outcomes

Name
Describe the vocabulary, principles, and organization of the central and peripheral nervous systems.

Name
Demonstrate knowledge of the neuroanatomical structures involving speech, language, and cognition.

Name
Describe the underlying causes of neurogenic communication disorders.

Name
Identify the specific characteristics of each neurogenic communication disorder.

Name
Identify the assessment and intervention strategies for specific neurogenic disorders.

Name
Explore differential diagnosis and treatment.

Name
Interpret research from the field of neuroscience as related to communication and cognitive disorders.

CSDS4113 - SENIOR CAPSTONE

General

Course Prefix
CSDS

Course Number
4113

Description
Students will be required to propose a scientific research study related to communication sciences and disorders using the knowledge gained through the respective degree program. In a culminating experience, students will present and defend their research proposal, incorporating knowledge gained in coursework in speech/language and communication science and disorders. The capstone experience offers students the opportunity to bridge theory-to-practice.

Credit Hours

Complete ALL of the following Courses:

- CSDS3203 - AUDIOLOGY AND AURAL REHABILITATION
  AND CSDS3033 - LANGUAGE DISORDERS & INTERVENTIONS
  AND CSDS3073 - FLUENCY & VOICE DISORDERS
  AND CSDS3083 - FAITH INTEGRATION IN CSD
  AND CSDS4023 - CLINICAL METHODS

Learning Outcomes

Learning Outcomes

Name
Evaluate scientific literature relevant to communication sciences and disorders, demonstrating understanding of research methodologies, statistics, and ethical considerations.

Name
Critically evaluate and interpret scientific literature to inform evidence-based practice in communication sciences and disorders.

Name
Write a scientific research paper using appropriate electronic databases and journal resources.

Name
Prepare and defend a scientific presentation.

CSEC1003 - FOUNDATIONS OF CYBERSECURITY

General

Course Prefix
CSEC

Course Number
1003

Description
This course is the first of four courses that count toward the Google Cybersecurity Professional Certificate. It equips students with the core skills necessary for a cybersecurity analyst role, encompassing both theoretical foundations and practical applications. Students will learn to identify threats, risks, and vulnerabilities impacting business operations while understanding the utilization of security frameworks and SIEM tools for protection. The course emphasizes security ethics and familiarizes students with tools used by cybersecurity professionals. Additionally, students will apply their theoretical knowledge in simulated scenarios, using playbooks to respond to cybersecurity incidents. Finally, the course covers the fundamentals of modern networking technologies and protocols and an overview of the cloud with practical applications and network troubleshooting. Upon completion, students will be prepared to make informed decisions when handling real-world cyber threats, setting the stage for a successful cybersecurity career. Prerequisites: NoneAdditional fees are associated with this course.

Credit Hours

Minimum Credit Hours:
3

Maximum Credit Hours:
3

Learning Outcomes

Learning Outcomes

Objective
Explain cloud computing, everything as a service, and cloud storage.

Name
Recognize core skills and knowledge needed to become a cybersecurity analyst.

Name
Identify how security attacks impact business operations.

Name
Explain the principles of security ethics.

Name
Identify common tools used by cybersecurity analysts.

Name
Pinpoint the primary threats, risks, and vulnerabilities to business operations.

Name
Evaluate how organizations use security frameworks and controls to protect business operations.

Name
Outline commonly used Security Information and Event Management (SIEM) tools.

Name
Use a playbook to respond to threats, risks, and vulnerabilities.

Name
Describe computer networks in terms of a five-layer model.

Name
Elaborate on the standard protocols involved with TCP/IP communications.

Name
Explain network services like DNS and DHCP that help make computer networks run.

Name
Explain cloud computing, everything as a service, and cloud storage.

CSEC2003 - NETWORK SECURITY & TOOLS

General

Course Prefix
CSEC

Course Number
2003

Description
This course is the second of four courses that count toward the Google Cybersecurity Professional Certificate. It course explores the various types of networks, their components, and the dynamics of data transmission. Students will gain practical skills in securing networks against intrusion tactics and learn system-hardening techniques to enhance security. The course also delves into the interconnectedness of operating systems, applications, and hardware, providing a comprehensive understanding of their roles in network security. It juxtaposes the graphical user interface with the command line interface, encouraging students to navigate and manage files using Linux commands via a shell. An additional component of the course is learning SQL for effective data retrieval from databases. Upon completion, students will be well-equipped with the necessary skills and knowledge to manage and secure network systems professionally. Prerequisites: CSEC 1003Additional fees are associated with this course.

Credit Hours

Minimum Credit Hours:
3

Complete ALL of the following Courses:

- CSEC1003 - FOUNDATIONS OF CYBERSECURITY

Learning Outcomes

Learning Outcomes

Objective
Use SQL to retrieve information from a database.

Name
Define the types of networks and components of networks.

Name
Illustrate how data is sent and received over a network.

Name
Secure a network against intrusion tactics.

Name
Describe system hardening techniques.

Name
Explain the relationship between operating systems, applications, and hardware.

Name
Compare a graphical user interface to a command line interface.

Name
Navigate and manage the file system using Linux commands via a shell.

Name
Use SQL to retrieve information from a database.

CSEC3003 - THREAT ANALYSIS & INCIDENT RESPONSE

General

Course Prefix
CSEC

Course Number
3003

Description
This course is the third of four courses that count toward the Google Cybersecurity Professional Certificate. It is designed to equip students with a comprehensive understanding of the methodologies and tools used in modern cybersecurity operations. Students will learn how to classify assets and analyze attack surfaces to identify potential risks and vulnerabilities, with a particular focus on threats such as social engineering, malware, and web-based exploits. The course also provides a detailed walkthrough of the threat modeling process. Students will gain hands-on experience in incident response, learning to contain, eradicate, and recover from various cybersecurity incidents. Practical exercises involve performing packet analysis to interpret network communications, using IDS and NIDS tools, utilizing queries in SIEM tools for event investigation. Upon completion, students will possess a robust skillset for professional threat analysis and incident response. Prerequisites: CSEC 2003Additional fees are associated with this course.

Completion Requirement

Prerequisites

Complete ALL of the following Courses:

- CSEC2003 - NETWORK SECURITY & TOOLS

Learning Outcomes

Learning Outcomes

Objective
Perform queries in Security Information and Event Management (SIEM) tools to investigate an event.

Name
Classify assets.

Name
Analyze an attack surface to find risks and vulnerabilities.

Name
Identify threats, such as social engineering, malware, and web-based exploits.

Name
Summarize the threat modeling process.

Name
Identify the steps to contain, eradicate, and recover from an incident.

Name
Analyze packets to interpret network communications.

Name
Describe basic syntax, components of signatures, and logs in Intrusion Detection Systems (IDS) and Network Intrusion Detection Systems (NIDS) tools.

Name
Perform queries in Security Information and Event Management (SIEM) tools to investigate an event.

CSEC3103 - SPECIAL TOPICS IN CYBERSECURITY

General

Course Prefix
CSEC

Course Number
3103

Description
This course provides an in-depth examination of a specialized topic within cybersecurity. The specific topic may vary each semester based on current trends, technological advancements, and faculty expertise. Examples of topics include but are not limited to network security, malware analysis, forensic computing, or cybersecurity policy. This focused study allows students to develop a deep and comprehensive understanding of the chosen subject area. The course may be repeated for credit as long as the topic is different.Prerequisite: CSEC 2003

Credit Hours

Minimum Credit Hours:
3

Maximum Credit Hours:
3

Completion Requirement

Prerequisites

Complete ALL of the following Courses:
- CSEC2003 - NETWORK SECURITY & TOOLS

Learning Outcomes

Learning Outcomes

Objective
Articulate the key concepts, theories, and practices related to the specialized topic.

Objective
Analyze and evaluate the challenges and issues specific to the specialized topic within the field of cybersecurity.

Objective
Apply knowledge and skills to design, implement, or assess solutions addressing these specific challenges.

Objective
Assess the impact of technologies and methodologies related to the topic on current cybersecurity practices.

Objective
Communicate complex ideas related to the topic, catering to both specialist and non-specialist audiences.

CSEC4003 - AUTOMATED SECURITY & CAREER SUCCESS

General

Course Prefix
CSEC

Course Number
4003

Description
This course is the fourth of four courses that count toward the Google Cybersecurity Professional Certificate. It bridges the gap between technical proficiency and career readiness in the field of cybersecurity. Students will explore the utilization of Python in cybersecurity, including the creation of user-defined functions and the use of regular expressions for text information extraction. The course extends beyond technical competencies to focus on the professional aspects of cybersecurity, instructing on when and how to escalate a security incident effectively. A significant component of the course is dedicated to career development, providing guidance on job hunting in cybersecurity, application processes, and interview preparation. Upon completion, students will not only have enhanced their technical skillset but also be equipped to navigate their cybersecurity career successfully. Prerequisites: CSEC 3003Additional fees are associated with this course.

- CSEC3003 - THREAT ANALYSIS & INCIDENT RESPONSE

Learning Outcomes

Learning Outcomes

Objective
Equip oneself with techniques to effectively prepare for job interviews, focusing on communication, technical knowledge, and problem-solving skills.

Name
Illustrate the applications of Python programming language in the realm of cybersecurity.

Name
Write user-defined Python functions that optimize code efficiency and manage complex tasks.

Name
Utilize regular expressions to systematically extract relevant information from large volumes of text.

Name
Develop proficiency in debugging code, identifying potential errors and implementing appropriate solutions.

Name
Assess the severity of a security incident, and formulate a strategic response for its escalation.

Name
Identify potential cybersecurity job opportunities, and apply the necessary skills and knowledge to secure these positions.

Name
Equip oneself with techniques to effectively prepare for job interviews, focusing on communication, technical knowledge, and problem-solving skills.

CTIS3803 - INTRODUCTION TO DATABASES SQL PROG

General

Course Prefix
CTIS

Course Number
3803

Description
This course develops skills needed to structure databases and generate SQL (Structured Query Language) queries for the purpose of creating, modifying, and querying multi-table databases and producing analytical output useful for analysis and decision making.

CTIS3833 - COMPUTER NETWORKING

General

Course Prefix
CTIS

Course Number
3833

Description
This course is designed to introduce the student to technical and management aspects of computer networking. The architectural design of computer networks including standards, topologies, protocols, hardware, software, and communication media will be presented.

Credit Hours

CTIS4903 - INTERNSHIP IN COMPUTERS

General

Course Prefix
CTIS

Course Number
4903

Description
This class provides supervised work experience in an organization delivering on-the-job training in management information systems. The intern will be supervised by a faculty mentor and a supervisor in the organization, and will report work experience through written and verbal reports to a faculty mentor. Dean's approval required.

DATA1003 - INTRODUCTION TO DATA SCIENCE

General

Course Prefix
DATA

Course Number
1003

Description
This course is the first of four courses that count toward the IBM Data Science Professional Certificate. It is designed to offer a thorough understanding of the field of data science, its relevance in the contemporary data-driven world, and the diverse career paths it offers. The course provides a unique blend of theoretical and practical insights, equipping learners with a solid grasp of data science methodologies, including the application of the Cross-Industry Process for Data Mining (CRISP-DM). Students will familiarize themselves with crucial tools in the data scientist's kit such as Python, R, SQL, Jupyter notebooks, RStudio, and Git. They will also be guided on the selection of suitable analytic models and data sources for their data science projects. By course completion, learners will have a clear understanding of data science, its demand in the 21st-century job market, and guidance from experienced professionals in the field. Prerequisites: NoneAdditional fees are associated with this course.

Learning Outcomes

Learning Outcomes

Objective
Determine appropriate sources of data for your data science project.

Name
Define data science and its importance in todays data-driven world.

Name
Describe the various paths that can lead to a career in data science.

Name
Summarize advice given by seasoned data science professionals to data scientists who are just starting out.

Name
Explain why data science is considered the most in-demand job in the 21st century.

Name
Describe the Data Scientists tool kit which includes: Libraries & Packages, Data sets, Machine learning models, and Big Data tools.

Name
Utilize languages commonly used by data scientists like Python, R, and SQL.

Name
Demonstrate working knowledge of tools such as Jupyter Notebooks and RStudio and utilize their various features.

Name
Create and manage source code for data science using Git repositories and GitHub.

Name
Describe what a methodology is and why data scientists need a methodology.

Name
Apply the six stages in the Cross-Industry Process for Data Mining (CRISP-DM) methodology to analyze a case study.

Name
Determine an appropriate analytic model including predictive, descriptive, and classification models to analyze a case study.

Name
Determine appropriate sources of data for your data science project.

DATA2003 - PROGRAMMING FOR DATA SCIENCE

General

Course Prefix
DATA

Course Number
2003

Description

This course is the second of four courses that count toward the IBM Data Science Professional Certificate. It is designed to equip learners with the foundational skills required to harness the power of Python in data science. The course covers Python basics, including data types, expressions, variables, and data structures. Students will apply Python programming logic through loops, functions, objects, and classes. Proficiency in critical Python libraries such as Pandas, Numpy, and Beautiful Soup is fostered. We delve into accessing web data using APIs and web scraping, emulating real-world data science projects. The practical side of this course entails hands-on experiences with Python data structures, data manipulation, and building an interactive dashboard using Pandas, Beautiful Soup, and Plotly in Jupyter Notebook. By the end of the course, students will be well-versed in employing Python for various data science applications. Prerequisites: DATA 1003Additional fees are associated with this course.

Learning Outcomes

Learning Outcomes

Objective
Build a dashboard using Python and libraries like Pandas, Beautiful Soup, and Plotly using Jupyter Notebook.

Name
Describe Python basics, including data types, expressions, variables, and data structures.

Name
Apply Python programming logic using branching, loops, functions, objects & classes.

Name
Demonstrate proficiency in using Python libraries such as Pandas, Numpy, and Beautiful Soup.

Name
Access web data using APIs and web scraping from Python in Jupyter Notebooks.

Name
Play the role of a data scientist working on a real project.

Name
Apply Python fundamentals, Python data structures, and working with data in Python.

Name
Build a dashboard using Python and libraries like Pandas, Beautiful Soup, and Plotly using Jupyter Notebook.

DATA3003 - DATA ANALYSIS

General

Course Prefix
DATA

Course Number
3003

Description
This course is the third of four courses that count toward the IBM Data Science Professional Certificate. It offers a deep dive into data manipulation and analysis using Python and SQL. Learners will master creating relational databases on the Cloud, working with tables, and constructing various SQL statements. Advanced SQL techniques like views, transactions, stored procedures, and joins will be discussed for constructing complex queries. The course emphasizes the practical application of Python for data cleaning and preparation, with a focus on handling missing values, formatting, normalizing, and binning data. Learners will engage in exploratory data analysis using key libraries such as Pandas, Numpy, and Scipy, developing the skills to manipulate data using dataframes, summarize data, understand data distribution, and create data pipelines. The course culminates in building and evaluating regression models using the machine learning scikit-learn library, preparing learners for real-world predictive analytics and decision-making. Prerequisites: DATA 2003Additional fees are associated with this course.

Complete ALL of the following Courses:

- DATA2003 - PROGRAMMING FOR DATA SCIENCE

Learning Outcomes

Learning Outcomes

Objective
Build and evaluate regression models using machine learning scikit-learn library and use them for prediction and decision making.

Name
Analyze data within a database using SQL and Python.

Name
Create a relational database on the Cloud and work with tables.

Name
Construct SQL statements including SELECT, INSERT, UPDATE, and DELETE.

Name
Compose more powerful queries with advanced SQL techniques like views, transactions, stored procedures, and joins.

Name
Develop Python code for cleaning and preparing data for analysis, including handling missing values, formatting, normalizing, and binning data.

Name
Perform exploratory data analysis and apply analytical techniques to real-world datasets using libraries such as Pandas, Numpy, and Scipy.

Name
Manipulate data using dataframes, summarize data, understand data distribution, perform correlation, and create data pipelines.

Name
Build and evaluate regression models using machine learning scikit-learn library and use them for prediction and decision making.

DATA4003 - APPLIED DATA SCIENCE

General

Course Prefix
DATA

Course Number
4003

Description
This course is the fourth of four courses that count toward the IBM Data Science Professional Certificate. It aims to empower learners to effectively implement data visualization techniques and machine learning algorithms using Python. The course explores various plotting libraries alongside advanced visualization concepts and interactive dashboard development. The course emphasizes understanding different types of machine learning algorithms, including their applications and comparative analysis. Students will write Python code to implement classification techniques such as k-nearest neighbors (KNN) and decision trees. By the course's end, students will be adept at creating, evaluating, and optimizing machine learning models for predictive analysis.Prerequisites: DATA 3003Additional fees may be associated with this course.

Course Requisites

Type
Completion Requirement

Prerequisites

Complete ALL of the following Courses:

- DATA3003 - DATA ANALYSIS

Learning Outcomes

Learning Outcomes

Objective
Evaluate the results of machine learning models for predictive analysis, compare their strengths and weaknesses, and identify the optimal model.

Name
Implement data visualization techniques and plots using Python libraries, such as Matplotlib, Seaborn, and Folium, to tell a stimulating story.

Name
Create different types of charts and plots such as line, area, histograms, bar, pie, box, scatter, and bubble.

Name
Create advanced visualizations such as waffle charts, word clouds, regression plots, maps with markers, & choropleth maps.

Name
Generate interactive dashboards containing scatter, line, bar, bubble, pie, and sunburst charts using the Dash framework and Plotly library.

Name
Describe the various types of machine learning algorithms and when to use them

Name
Compare and contrast linear classification methods, including multiclass prediction, support vector machines, and logistic regression.

Name
Write Python code that implements various classification techniques, including k-nearest neighbors (KNN), decision trees, and regression trees.

Name
Evaluate the results from simple linear, non-linear, and multiple regression on a data set using evaluation metrics.

Name
Demonstrate proficiency in data science and machine learning techniques using a real-world data set and prepare a report for stakeholders.

Name
Apply your skills to perform data collection, data wrangling, exploratory data analysis, data visualization model development, and model evaluation.

Name
Write Python code to create machine learning models, including support vector machines, decision tree classifiers, and k-nearest neighbors.

Name
Evaluate the results of machine learning models for predictive analysis, compare their strengths and weaknesses, and identify the optimal model.

DCOM1803 - INTRODUCTION TO FILM & STORYTELLING

General

Course Prefix
DCOM

Course Number
1803

Description
This course explores the various departments that contribute to the production of a feature film, surveying each major crew position and reviewing the tools, equipment, and documents with which they work. The course will focus on film jargon, set etiquette, and the tools that govern the unions, guilds, and other aspects of employment in the film industry. The course also introduces students to the fundamentals of storytelling in film.

DMIN7013 - THEORY & PRACTICE OF MINISTRY

General

Course Prefix
DMIN

Course Number
7013

Description
This course orients new students to the Doctor of Ministry degree program, underscoring the foundational principles of practical theology. Emphasis is placed upon assessment of ministry systems and health, research, theological reflection, praxis, and implementation of ministry enhancements. The elements of advanced graduate-level research and writing are highlighted.

DMIN7023 - SPIRIT-EMPOWERED LEADERSHIP

General

Course Prefix
DMIN

Course Number
7023

Description
This course explores the role of the Holy Spirit in guiding and empowering ministry leaders. It includes study and interpretation of biblical texts and theological expressions regarding Christ and the Spirit. Current and historical examples of ministry leaders will be studied to develop a theology that emphasizes the relationship of the Spirit with ministry leadership.

Learning Outcomes

Learning Outcomes

Name
Articulate objectives and methods of biblical interpretation.

Name
Explain settings for and approaches to practice-to-theory and theory-to-practice application of biblical Pentecostal theology.

Name
Describe core concepts of Pentecostal theology and the biblical grounds for them.

Name
Analyze current issues in order to provide a biblically orthodox response.

Name
Describe the significance of biblical interpretation and how it applies to the Christian community and one’s life.

Name
Explain the key aspects of the doctrines of Scripture and the interaction of the Holy Spirit from an Evangelical and Pentecostal perspective in hermeneutics.

Name
Discuss traditional and contemporary approaches to theological issues.

Name
Appreciate the relevancy of this material for one’s Christian life and ministry.

Name
Demonstrate proficiency in learning by successfully completing all course assignments.

DMIN7043 - RESEARCH METHODS

General

Course Prefix
DMIN

Course Number
7043

Description
This course addresses the values and methods for integrating research into ministry praxis. Principles of effective writing at the popular and advanced academic levels are incorporated.

General

Course Prefix
ECED

Course Number
2131

Description
In this course, students will be placed in a PreK-3 setting in area public and private schools to complete tasks that are directly tied to the Florida Educator Accomplished Practices (FEAPs). This course is designed to allow students multiple opportunities to observe PreK-3 settings (approximately 30 hours) and participate in low-level classroom tasks. The College of Education will work cooperatively with schools to place students in classrooms according to the students' major/grade level preference. As part of the course requirements, students must pass the General Knowledge Test (GKT) and provide documentation to the College of Education before the end of the course.Prerequisite: None

Learning Outcomes

Learning Outcomes

Name
Write journal reflections about their classroom observations related to the Florida Educator Accomplished Practices for pre-service teachers.

Name
Analyze the practices of current classroom teachers in the PreK-3 setting.

Name
Identify professional responsibilities of teachers in the PreK-3 setting.

Name
Identify how PreK-3 school-based faculty and staff contribute to the operations of a school.

ECED2433 - DEVELOPMENT OF THE YOUNG CHILD

General

Course Prefix
ECED

Course Number
2433

Description
This course provides an in-depth understanding of the development aspects of the young child from conception to age eight. The course also examines implications for curriculum.Prerequisite: None

Credit Hours

Minimum Credit Hours:
0

Maximum Credit Hours:
4

(Credit Hours) Value:

Learning Outcomes

Learning Outcomes

Name
Relate the history of early childhood education to current educational practice.

Name
Analyze research that supports the contention that early education can make a permanent difference in children's lives.

Name
Identify the major developmental milestones in children and explain how development influences behavior and instruction.

Name
Discuss the contributions of major theorists in child development and apply this information to classroom instruction.

Name
Explore best practices in early childhood education.

ECED3173 - METHODS OF TEACHING PREK-3 MATH

General

Course Prefix
ECED

Course Number
3173

Description
In this course, emphasis is on teaching mathematics in PreK-3 classrooms through the use of appropriate methods, materials, and evaluation techniques. Current issues, strategies, and trends in mathematics are reviewed. Integrated field experiences are included.Prerequisite: None

Credit Hours

Minimum Credit Hours:
1

Maximum Credit Hours:
4

Learning Outcomes

Learning Outcomes

Name
Develop strategies for teaching number ideas for children in PreK-3 classrooms through the use of concrete aids, models, and stories.

Name
Develop strategies for teaching number sense, operation sense, and problem solving using rational numbers.

Name
Develop activities for PreK-3 children to show their understanding of geometric concepts.

Name
Develop skills for using technology in the classroom.

Name
Design ability-appropriate assessments, including alternate methods of assessment and assessments for children with mathematical difficulties.

Name
Identify effective math strategies for children with special needs such as ELL and ESE students.

Name
Implement strategies that factor cultural differences in the mathematical classroom.

ECED3351 - CLINICAL EXPERIENCE II

General

Course Prefix
ECED

Course Number
3351

Description
In this course, students will be placed in a PreK-3 setting to complete tasks in the field that are directly tied to the Florida Educator Accomplished Practices (FEAPs). This course is designed to allow students multiple opportunities to observe and interact with teachers and students in the PreK-3 setting (approximately 45 hours) and participate in classroom tasks such as using data to drive lesson planning, parent communication, and classroom management planning. The College of Education will work cooperatively with area schools to place students in classrooms according to the students' major/grade level preference. As part of the course requirements, students must pass the Professional Education Test (PEd) and provide documentation to the College of Education before the end of the course.Prerequisites: None

Learning Outcomes

Learning Outcomes

Name
Analyze classroom observations related to the Florida Educator Accomplished Practices for pre-service teachers.

Name
Evaluate the practices of current classroom teachers in the PreK-3 setting.

Name
Demonstrate specific professional responsibilities of teachers in the PreK-3 setting.

Name
Collaborate with PreK-3 school-based faculty and staff to contribute to the operations of a school.

Name
Develop communiqu with families of PreK-3 students according to the assigned classroom.

Name
Analyze how local, state, and federal ESOL policies are carried out in school-based operations.

ECED4123 - CLASS & BEH MGMT - EARLY CHILDHOOD

General

Course Prefix
ECED

Course Number
4123

Description
This course is designed to help in the identification of developmentally-appropriate models and strategies for guiding, disciplining, and managing the behavior of children in the PK-3 classroom. Included are methods for developing intrinsic motivation in children and conflict resolution among children. During the course, students will identify environmental influences on the behaviors of young children from all home environments and familial situations by utilizing research-based best practices in education. This course includes methodology for managing a learning environment utilizing research-based best practices in education.Prerequisite: None

Credit Hours

Learning Outcomes

Learning Outcomes

Name
Examine theories and research related to classroom management approaches.

Name
Explain legislation and ethical issues related to managing a learning environment.

Name
Relate safe learning environments to diversity, academics, exceptional needs, linguistic backgrounds, family communication, and human development milestones.

Name
Assess individual functioning levels and pro-social behavior as related to individual and group dynamics of behavior.

Name
Identify strategies for increasing, decreasing, and maintaining behaviors.

Name
Discuss techniques for dealing with crisis situations in a learning environment.

Name
Implement behavioral interventions supporting student behaviors in inclusive settings.

Name
Manage the resources of time, space, and attention in the learning environment.

ECED4221 - CLINICAL EXPERIENCE III

General

Course Prefix
ECED

Course Number
4221

Description
In this course, students will be placed in a PreK-3 setting in area schools to complete tasks that are directly tied to the Florida Educator Accomplished Practices (FEAPs). This course is designed to allow students multiple opportunities to observe and interact with teachers and students in the PreK-3 setting (approximately 60 hours) and participate in classroom tasks such as using data to drive lesson planning, parent communication, and classroom management planning. The College of Education will work cooperatively with local schools to place students in classrooms according to the students' major/ grade level preference. As part of the course requirements, students must pass the Subject Area Exam (SAE) for their major and provide documentation to the College of Education before the end of the course.Prerequisites: None

ECED4423 - METHODS OF TEACHING PREK-3 SCIENCE

General

Course Prefix
ECED

Course Number
4423

Description
This course helps students master basic science concepts and skills represented in four domains: Science Knowledge, Science Process Skills and Creative Thinking, Attitudes and Values in Science, and Science Applications and Technology. The Florida Next Generation Standards for Science for grades PreK-3 form the core content for the course. Emphasis is placed on several methods and strategies for instruction, including direct instruction, concept attainment, inquiry method, and project-based instruction. Scientific demonstrations and hands-on activities are included.Prerequisite: None

Credit Hours

Learning Outcomes

Learning Outcomes

Name
Identify a variety of ways to access knowledge and information in science education.

Name
Formulate hypotheses when presented with elementary scientific methods and principles.

Name
Demonstrate an understanding of the content knowledge in the science domain.

Name
Design a science experiment to be presented in class.

Name
Demonstrate the ability to teach a science lesson.

Name
Incorporate knowledge of the cultural characteristics of Floridas ELL population to enhance instruction.

ECED4912 - STUDENT TEACHING

General

Course Prefix
ECED

Course Number
4912

Description
This course provides five seminar-style opportunities for student teachers to examine the experiences they are concurrently having in the full-time student internship in the PreK-3 setting. Seminars are designed to respond to the immediate needs of the student teachers and offer support, encouragement, and insights into the teaching process and profession. Guest speakers will play an important role in enriching the program and providing first-hand experiences from the classroom and administrative levels.Prerequisite: Attempt all required portions of the FTCE

Learning Outcomes

Learning Outcomes

Name
Examine the teaching process/information from local school district employees.

Name
Discuss student teaching issues/problems and generate potential solutions using critical thinking skills.

Name
Share instructional techniques with fellow student teachers.

Name
Exchange classroom management techniques with fellow student teachers.

Name
Develop a repertoire of communication methods for students, families, PreK-3 personnel, and peers.

EDUC1003 - GK MATH STUDY SKILLS

General

Course Prefix
EDUC

Course Number
1003

Description
This course is a remedial class that is an elective for students majoring in Education who have not passed the math portion of the General Knowledge Test (GKT). Passing the GKT is a requirement for teacher certification in Florida. Prerequisite: None

Credit Hours

Minimum Credit Hours:
3

Maximum Credit Hours:
3

(Credit Hours) Value:

Learning Outcomes

Learning Outcomes

Name
Evaluate expressions involving order of operations.

Name
Identify and classify simple two- and three-dimensional figures according to their mathematical properties.

Name
Solve real-world measurement problems including fundamental units (e.g., length, mass, time), derived units (e.g., miles per hour, dollars per gallon), and unit conversions.

Name
Solve equations and inequalities (e.g., linear, quadratic) graphically or algebraically.

Name
Identify relations that satisfy the definition of a function.

Name
Analyze and evaluate how the presentation of data can lead to different or inappropriate interpretations in the context of a real-world situation.

EDUC1013 - GK LANGUAGE ARTS SKILLS

General

Course Prefix
EDUC

Course Number
1013

Description
This course is an elective designed to review and hone skills Education majors need to pass the English Language Arts, Reading, and Essay sections of the General Knowledge (GK) Exam, which is required for Florida teacher certification.Prerequisite: None

Credit Hours

Minimum Credit Hours:
1

Maximum Credit Hours:
3

Learning Outcomes

Name
Articulate a clear understanding of the Liberal Art's key role within the order of learning.

Name
Differentiate between arts and sciences.

Name
Define and distinguish between each of the seven Liberal Arts.

Name
Demonstrate appropriate examples of each of the Liberal Arts.

EDUC2131 - CLINICAL EXPERIENCE I

General

Course Prefix
EDUC

Course Number
2131

Description
This course is the study of models and strategies of behavior and classroom management appropriate for middle and high school students in accordance with human development milestones. The course covers student attributes of behavior, including response to interventions, age-appropriate discipline, intrinsic versus extrinsic motivation, and conflict resolution. The course includes methodology for managing a learning environment utilizing research-based best practices in education. Prerequisite: None

Learning Outcomes

Learning Outcomes

Name
Write journal reflections about their classroom observations related to the Florida Educator Accomplished Practices for pre-service teachers.

Name
Analyze the practices of current classroom teachers in the K-12 setting.

Name
Identify professional responsibilities of teachers in the K-12 setting.

Name
Identify how K-12 school-based faculty and staff contribute to the operations of a school.

EDUC2143 - FOUND OF ED & INSTRUC DESIGN

General

Course Prefix
EDUC

Course Number
2143

Description
The course includes an overview of the history of American education along with an introduction to subject area competencies, professional skills and competencies, benchmarks for the pre-professional level of accomplished practices for teachers, and the Code of Ethics and Professional Conduct. Students will learn the principles of effective instructional design and delivery in the PreK-12 setting and gain practice in writing Florida standards-based lesson plans that include differentiated instruction and assessment.Prerequisite: None

Credit Hours

Learning Outcomes

Learning Outcomes

Name
Examine the educators responsibility within the teaching profession.

Name
Analyze the goals and responsibilities educators have and reflect on how these will influence ones teaching behavior.

Name
Explore current issues and controversies in American education.

Name
Describe organizational structure of schools in relation to district, state, and federal educational bodies.

Name
Apply research-based strategies for teaching students of all ability levels and needs.

Name
Explain the Florida Educator Accomplished Practices.

Name
Apply Florida Department of Education standards to vertical lesson planning and analysis of correlations in standards and throughout the spiraling curriculum.

Name
Use the principles and processes of effective curriculum design related to lesson planning.

Name
Demonstrate knowledge of teacher-centered versus student-centered instructional strategies for promoting understanding, critical thinking, engagement, and assessment of student performance as essential assets of effective teaching.

EDUC2203 - COMMUNICATING THE TRIVIUM

General

Course Prefix
EDUC

Course Number
2203

Description
After a Gymnastic and Musical education, students begin a Liberal Arts education. This course surveys the first three of these arts known as the Trivium. Studying the “Language Arts” of Grammar, Dialectic, and Rhetoric together provides students ample opportunities to read classic works, discuss rich content, and practice classical pedagogy.

Learning Outcomes

Learning Outcomes

Name
Articulate a clear understanding of the Trivium's place within the order of learning.

Name
Express and exemplify the role of grammar within the Trivium.

Name
Identify Logic/Dialectic and demonstrate its practices.

Name
Define Classical Rhetoric and embody the tools of learning associated with it.

EDUC2233 - EDUCATIONAL PSYCHOLOGY

General

Course Prefix
EDUC

Course Number
2233

Description
This course is a study of the principles and philosophy of human growth and development, motivation and learning theory, and how these are applied to teaching. Included are introductions to intelligence theories, instructional approaches, learning taxonomies, motivation, and different assessment tools.Prerequisite: None

Credit Hours

Minimum Credit Hours:
3

Learning Outcomes

Learning Outcomes

Name
Contrast teaching as an art and teaching as a science in light of educational psychology.

Name
Describe the major theories of cognitive, psychosocial, and moral development and apply these theories to classroom practice

Name
Apply behaviorist, social, cognitive (information processing, constructivist) and humanistic learning theories to classroom practice.

Name
Use evaluation and assessment procedures to determine the results of educational experiences.

Name
Define learner variability (including culture, gender, learning style, language, and socioeconomic background) to classroom practice.

Name
Describe the responsibilities and teaching strategies of an ESE-trained teacher to maintain a climate of openness, fairness, and support to the ESE student.

Name
Apply various taxonomies of educational objectives to the educational environment.

Name
List well-planned techniques to manage individual and classroom behaviors.

Name
Assess the complexities of the teachers role as an educational psychologist.

EDUC2303 - VALUING THE QUADRIVIUM

General

Course Prefix
EDUC

Course Number
2303

Description
This course is part two of the overview of the seven Liberal Arts and focuses on the Quadrivium, or the “Mathematical Arts” of arithmetic, geometry, music, and astronomy. Through discussion, the reading of classical texts, and opportunities to practice, students will develop an understanding of the foundational placement of these liberal arts in a Classical education.

Learning Outcomes

Learning Outcomes

Name
Convey a clear understanding of the Quadrivium's significance within the order of learning.

Name
Define and distinguish between each of the four mathematical arts.

Name
Demonstrate examples of each art.

Name
Show how the mathematical tools of learning are developed throughout a student's education.

EDUC2331 - IMPROV FOR TEACHERS

General

Course Prefix
EDUC

Course Number
2331

Description
This course introduces future and practicing educators to improvisational strategies that support effective teaching. Through experiential activities, low-stakes improv games, and guided reflection, students will explore adaptability, listening, classroom presence, and relationship-building. The course emphasizes practical application of improv principles to real classroom situations rather than performance or theatrical skill. No prior improv or performance experience is required.

Learning Outcomes

Name
Identify and describe foundational improvisational principles and reflect on how they may inform teaching practice.

Name
Demonstrate increased flexibility and responsiveness when faced with unexpected teaching moments.

Name
Develop strategies for building trust, rapport, and engagement with students.

Name
Practice productive recovery from mistakes and disruptions in instructional settings.

Name
Reflect on teaching as an adaptive, relational, and improvisational practice.

EDUC3023 - TRAUMA-INFORMED TEACHING

General

Course Prefix
EDUC

Course Number
3023

Description
This course is a study of the impacts and types of trauma that affect K-12 students' well-being and classroom learning. Adverse Childhood Experiences (ACEs) studies and classroom strategies for mitigating the effects of childhood trauma are outlined. Focus is given to the review of trauma's impact on the K-12 student and how the teacher can create a trauma-informed classroom to proactively empathize and care for affected students.Prerequisites: None

Name
Define trauma and adverse childhood experiences (ACEs)

Name
Describe how trauma and adverse childhood experiences affect child development.

Name
Outline strategies for planning trauma-responsive learning environments.

EDUC3103 - THE TELOS OF EDUCATION: THEOLOGY

General

Course Prefix
EDUC

Course Number
3103

Description
Medieval teachers called Theology “the queen of the sciences,” providing us with a clue as to the significant placement of theology as the culmination of the order of learning. Theology forms piety, unifies learning, informs philosophy, and unites all knowledge; it is the end and purpose of education.

Learning Outcomes

Learning Outcomes

Name
Articulate the purpose of Classical Christian education.

Name
Identify theology's significance throughout the order of learning.

Name
Distinguish between a modern and Classical understanding of theology.

Name
Demonstrate an understanding of integration across the curriculum.

EDUC3133 - ASSESSMENT OF LEARNERS

General

Course Prefix
EDUC

Course Number
3133

Description
This course focuses on the educational levels and needs of all students, including English Learners and exceptional, and at-risk students. Standardized achievement tests, diagnostic/prescriptive tests, and curriculum-based assessments are included. Use of test results in program planning is emphasized.Prerequisite: None

Credit Hours

Learning Outcomes

Learning Outcomes

Name
Diagnose student learning and individual learning needs.

Name
Plan appropriate teaching/intervention strategies based on assessment data.

Name
Use multiple measures to assess a concept, skill, or disposition.

Name
Adapt measurements and delivery methodologies to better assess learners with special learning needs.

Name
Modify instruction based on assessment results for both individuals and groups.

Name
Use observational and anecdotal records to monitor student needs and progress.

Name
Analyze assessment data to discern student strengths and weaknesses and plan differentiated instruction to meet the educational needs of individual students.

Name
Communicate effectively with parents and colleagues regarding student progress and the results of assessment.

Name
Demonstrate professional behavior with regard to testing and measurement of student knowledge, skills, and dispositions.

EDUC3143 - TEACHING BIOLOGY IN SECONDARY SCH

General

Course Prefix
EDUC

Course Number
3143

Description
This course is a study and utilization of the methods on teaching biology in secondary schools. Emphasis is on the use of appropriate strategies, materials, and evaluation techniques. Current issues, approaches, and trends in biology are reviewed. Prerequisite: None

Credit Hours

Minimum Credit Hours:
3

Learning Outcomes

Learning Outcomes

Name
Integrate biological content knowledge, conceptual understanding, and teaching skills.

Name
Design and utilize lesson plans using various teaching methods including inquiry, discussion, and demonstration and match them to the appropriate Sunshine State Standard including the implications of language barriers for English language learners, cultural and social influences, and special needs on teaching and learning science.

Name
Integrate various resources (internet, journals, mentors) and technology to improve teaching.

Name
Demonstrate mastery of major concepts and themes in biology.

Name
Locate, incorporate, and reflect on resources that promote and enhance professional development.

Name
Design and implement assessment strategies that facilitate improvements to biology teaching.

EDUC3203 - THE WONDER OF PHILOSOPHY & THEOLOGY

General

Course Prefix
EDUC

Course Number
3203

Description
A Classical education begins and ends with wonder. It embodies the pursuit of truth, goodness, and beauty. It ponders: what is the purpose of education? Who is God? What does it mean to be human? This course walks students through philosophy (the love of wisdom) to Theology (the culmination and purpose of education.) Students will read essential texts and discuss the profound ideas through Socratic dialogue and other Classical practices.EDUC 1103 Introduction to Classical Education, EDUC 1203 Classical Education Philosophy, or EDUC 1303 Classical Education Practices

AND

Name
Articulate the purpose of Classical Christian education.

Name
Demonstrate an understanding of integration across the curriculum.

EDUC3233 - LIT FOUND II LANG ARTS & LIT

General

Course Prefix
EDUC

Course Number
3233

Description
This course examines elements of research-based English language arts (ELA) curricula in the elementary school setting. Emphasis is placed on the design of ELA environments using research-based practices, frameworks for scientifically-based ELA instruction, the application of children's literature in the ELA classroom, and the integration of the arts into developmentally-appropriate instructional practices in ELA.Prerequisite: EDUC 3493

Learning Outcomes

Learning Outcomes

Name
Design developmentally appropriate learning environments in the English language arts classroom.

Name
Evaluate reading/English language arts curricula for standards-based and research-based instructional alignment.

Name
Select appropriate multicultural texts from a variety of literary genres for ELA instruction based on purpose, relevance, cultural sensitivity and responsiveness, and developmental appropriateness.

Name
Describe how writing develops in PreK-5th grades.

Name
Implement developmentally appropriate differentiated instructional frameworks for teaching writing, including student response to text, in PreK-5th grades.

Name
Implement developmentally appropriate, differentiated instructional frameworks for scaffolding development of the six areas of reading using diverse texts in the ELA classroom.

Name
Evaluate current approaches to teaching spelling and their alignment with current research.

EDUC3243 - TEACHING SOC SCI IN SEC SCHOOL

General

Course Prefix
EDUC

Course Number
3243

Description
This course is a study of strategies, techniques, materials, technology, and current research used in the teaching of social science concepts to secondary school students. Students will review the traditional and contemporary standards involved, develop an awareness of the professional resources available for teachers, and prepare unit lesson plans with related assessment procedures on a variety of topics. Emphasis is on effective teacher behaviors in areas of instructional organization and development, presentation of subject matter, and verbal/nonverbal communication.Prerequisites: None

Learning Outcomes

Learning Outcomes

Name
Explore the broad trends, developments, and debates about history and social studies and the teaching of them in our society.

Name
Explore the challenges high school social studies teachers face on a day-to-day basis and provide the tools needed to meet them.

Name
Develop lesson plans that give students the opportunity to hear the insights, observations, questions, and ideas of others and to share their own.

Name
Prepare a series of assignments, lesson plans, tests, grading rubrics, and learn to evaluate them.

Name
Prepare and present lesson and unit plans at different levels incorporating problem solving, reading, writing, speaking, and the use of manipulatives and technology.

Name
Prepare, explain, and use both traditional and alternative assessment.

Name
Demonstrate the use of a variety of teaching and motivational strategies.

EDUC3303 - THE WISDOM OF EDUCATION: PHILOSOPHY

General

Course Prefix
EDUC

Course Number
3303

Description
The Ancients defined Philosophy as the love of wisdom. This study allows us to grapple with the world around us, ethics, and questions like: “What does it mean to be human? What is the role of the church in education? And what makes science, science?” After developing the tools of learning through the Liberal Arts, students pursue the unity of knowledge through the study of Moral, Natural, and Divine Philosophy.

Prerequisites

Complete ALL of the following Courses:

- EDUC2303 - VALUING THE QUADRIVIUM
  OR EDUC2103 - HARMONIZING THE SEVEN LIBERAL ARTS

Learning Outcomes

Learning Outcomes

Name
Define philosophy and its three divisions.

Name
Differentiate between Natural, Moral, and Divine Philosophy.

Name
Explain how philosophy is evident within the whole order of learning.

Name
Demonstrate logical thinking based on prior learning while grappling the deep philosophical questions in this course.

EDUC3351 - CLINICAL EXPERIENCE II

General

Course Prefix
EDUC

Course Number
3351

Description
In this course, students will be placed in a K-12 setting to complete tasks that are directly tied to the Florida Educator Accomplished Practices (FEAPs). This course is designed to allow students multiple opportunities to observe and interact with teachers and students in the K-12 setting (approximately 45 hours) and participate in classroom tasks such as using data to drive lesson planning, parent communication, and classroom management planning. The College of Education will work cooperatively with area schools to place students in classrooms according to the students' major/grade level preference. As part of the course requirements, students must pass the Professional Education Test (PEd) and provide documentation to the College of Education before the end of the course.Prerequisites: None

Learning Outcomes

Learning Outcomes

Name
Analyze classroom observations related to the Florida Educator Accomplished Practices for pre-service teachers.

Name
Evaluate the practices of current classroom teachers in the K-12 setting.

Name
Demonstrate specific professional responsibilities of teachers in the K-12 setting.

Name
Collaborate with K-12 school-based faculty and staff to contribute to the operations of a school.

Name
Develop communiqu with families of PreK-12 students according to the assigned classroom.

Name
Analyze how local, state, and federal ESOL policies are carried out in school-based operations.

EDUC3353 - EMPOWERING ESOL TEACHERS

General

Course Prefix
EDUC

Course Number
3353

Description
This course is an overview of curriculum, instructional methods and materials, testing and evaluation, communication processes and linguistic principles as related to instructing English Language in the PreK-12 classroom. Prerequisites: None

Learning Outcomes

Learning Outcomes

Name
Compare and contrast students who are ELLs and native English-speaking students in regular education programming and ESE.

Name
Experience learning in an unfamiliar language.

Name
Understand, create, implement, and critique PreK-12 lesson plans that will help ELLs develop English skills, content-specific skills, and social skills for the American culture.

Name
Prepare a multimedia presentation on a non-native English-speaking culture.

Name
Recognize contributions made by major leaders in the field of English for Speakers of Other Languages (ESOL) methodologies and theories.

Name
Demonstrate awareness of the central role of ESOL within the total school curriculum.

Name
Demonstrate effective lesson planning by providing multi-level, multi-sensory ESOL activities for a variety of situations.

Name
Outline the historical development of ESOL legislation at the local, state, and federal levels.

EDUC3423 - DIAG ASSESS EVAL OF READING

General

Course Prefix
EDUC

Course Number
3423

Description
This course highlights formal and informal means of evaluations with emphasis on diagnosing reading ability, prescribing for instruction, administering assessment, interpreting measurement terms and data, and maintaining records.Prerequisites: EDUC 2143, EDUC 3493

Credit Hours

Learning Outcomes

Learning Outcomes

Name
Describe and apply the literacy assessment process and reading diagnosis as it relates to the instructional responsibilities of the teacher.

Name
Administer and use information from norm-referenced tests, criterion-referenced tests, formal and informal inventories, constructed response measures, portfolio-based assessments, student self-evaluations, work/performance samples, observations, anecdotal records, journals, and other indicators of student progress to inform instruction and learning.

Name
Design an individual plan of instruction, including interpreting issues that arise when English Language Learners are assessed, for a student indicating strengths, weaknesses, and appropriate corrective instruction.

Name
Write a diagnostic case study report on a student referred for experiencing reading difficulties.

Name
Demonstrate knowledge of differentiating instruction, select appropriate instructional strategies and materials for students experiencing reading difficulties, and set goals for instruction based on assessment results to monitor student progress.

Name
Cite strategies for intervention in the areas of decoding, fluency, and comprehension.

Name
Demonstrate instructional skill and specialized techniques when assessing and teaching English Language Learners.

Name
Identify and demonstrate knowledge of instructional strategies to facilitate students metacognitive skills in reading.

Name
Practice appropriate writing demonstrating an understanding that it varies from context to context, depending on such things as discipline, audience, purpose, and genre.

EDUC3493 - LITERACY FOUNDATIONS I

General

Course Prefix
EDUC

Course Number
3493

Description
This course is a study of scientific theory and effective approaches for reading instruction, focusing on reading as the interactive weaving of word recognition and language comprehension. The essential components of literacy are studied: oral language, phonological awareness, phonics, fluency, vocabulary, and comprehension. Characteristics of proficient readers, striving readers, and readers with dyslexia are examined along with practices for differentiating reading instruction. Prerequisite: None

Credit Hours

Minimum Credit Hours:
3

Maximum Credit Hours:

Learning Outcomes

Learning Outcomes

Name
Identify the phonological and morphological structures of the English language, including the phonemic, semantic, and syntactic variability between English and other languages.

Name
Describe how the brain learns to read.

Name
Demonstrate substantive knowledge of the six major areas of reading: oral language, phonological awareness, phonics, vocabulary, fluency, and comprehension.

Name
Implement explicit, systematic, sequential, and multisensory strategies, grounded in scientifically based research, for teaching each of the six major areas of reading.

Name
Apply research-based practices that scaffold instruction for childrens individual learning differences and improve reading achievement for children having difficulty with the six components of reading.

EDUC3503 - INSTRUCTIONAL TECHNOLOGY

General

Course Prefix
EDUC

Course Number
3503

Description
This course is designed to develop skills and techniques needed for the selection, utilization, and production of classroom instructional materials and for application and integration of educational technology and media to all areas of the curriculum, appropriate to PreK-12 students' developmental level.Prerequisites: None

Credit Hours

Minimum Credit Hours:
3

Maximum Credit Hours:

Learning Outcomes

Learning Outcomes

Name
Meet specific instructional objectives by utilizing media successfully in an instructional setting.

Name
Use technological devices skillfully.

Name
Design multimedia lessons which utilize instructional technology.

Name
Identify the strengths and weaknesses of each form of media.

Name
Link technology-oriented multimedia projects to Accomplished Practices, ESOL standards, Florida standards, and ISTE standards.

Name
Modify personal teaching styles, especially outdated ones, in recognition of the ways technology is changing education, including a shift away from teacher-centered instruction to student-centered learning.

EDUC3523 - TCHNG LITERACY IN THE CONTENT AREA

General

Course Prefix
EDUC

Course Number
3523

Description
This course will provide students with strategies and tools for becoming a facilitating and reflective practitioner in the content area classroom and helping adolescent students discover that content area learning is made richer when reading, writing, speaking, and listening are taught together. Particular emphasis is placed on a scientific approach to reading, vocabulary, and comprehension strategies for content reading, the role of reflection in helping students to think critically, meeting the needs of special populations, and the use of appropriate texts and mediaPrerequisites: None

Learning Outcomes

Learning Outcomes

Name
Identify cognitive task levels and the role of cognitive development in the construction of meaning of a variety of texts.

Name
Explain the reading process in the constructing of meaning from a wide variety of texts for a variety of purposes.

Name
Identify explicit, systematic instructional plans for scaffolding content area vocabulary development and reading skills, and comprehension skills and cognition.

Name
Identify resources and research-based practices that create both language-rich and print-rich environments.

Name
Identify research-based guidelines and selection tools for choosing literature and expository text appropriate to students interests and independent reading proficiency.

Name
Select appropriate materials that address cultural and linguistic differences.

Name
Apply research-based instructional practices for developing students critical thinking skills and facilitating reading comprehension.

Name
Demonstrate knowledge of and apply research-based practices for developing general and specialized content area vocabulary, facilitating reading comprehension, and developing critical thinking and content area reading skills.

EDUC3653 - TEACHING ENGLISH IN SEC SCHOOL

General

Course Prefix
EDUC

Course Number
3653

Description
This course is a study of strategies, techniques, materials, technology, and current research used in the teaching of English concepts to secondary school students. Students will review the traditional and contemporary standards involved in teaching English at the secondary school level, develop an awareness of the professional resources available for teachers, and prepare unit and lesson plans with related assessment procedures on a variety of topics.Prerequisites: None

Learning Outcomes

Learning Outcomes

Name
Discuss current theory, issues, trends, and methods in teaching secondary English students.

Name
Develop and utilize curriculum resources and materials in constructing effective units, lessons, and activities.

Name
Assess instructional methods in relation to objectives and pupils needs.

Name
Write specific objectives appropriate for a variety of students, including ESE, ESOL, and other students from diverse cultural backgrounds.

Name
Select, develop, and sequence learning activities and materials that provide for diverse needs of a variety of students, including ESE, ESOL, and other students from diverse cultural backgrounds.

Name
Identify and develop meaningful projects and other creative activities relating to specific objectives and standards.

Name
Identify and develop assessment and evaluation techniques to accommodate diversity and individual differences in learning styles and needs.

Name
Teach a lesson critiqued using the Florida Educator Accomplished Practices.

EDUC3663 - LITERATURE FOR SECONDARY TEACHERS

General

Course Prefix
EDUC

Course Number
3663

Description
This course is a study of specific literature typically taught in secondary schools and aligned to the FLDOE competencies and skills and national/state/district-adopted content standards.Prerequisite: None

Credit Hours

Minimum Credit Hours:
0

Maximum Credit Hours:
3

(Credit Hours) Value:

Learning Outcomes

Learning Outcomes

Name
Recognize the role of Christian faith and religion in American education, both historically and in contemporary society.

Name
Develop ways to reconnect religious faith, as expressed in Christian intellectual traditions, to contemporary educational practice.

Name
Explain and defend the importance and vitality of Christian education.

Name
Integrate faith and learning in teaching and scholarship.

EDUC4043 - APPLIED LINGUISTICS

General

Course Prefix
EDUC

Course Number
4043

Description
This course is a practical approach to teaching English to speakers of other languages. The course includes topics such as general linguistics, language theory, principles of language acquisition, and techniques for teaching and assessing K-12 English learners. Special attention is given to the linguistic components of English, namely phonology, morphology, semantics, syntax, discourse, and pragmatics.Prerequisite: None

Learning Outcomes

Learning Outcomes

Name
Review the Florida Consent Decree and other pertinent legislation to the ESOL field.

Name
Discuss both first and second language acquisition literature and research.

Name
Observe and linguistically analyze an ELL in a learning environment.

Name
Learn to use the International Phonetic Alphabet as a tool to recognize and transcribe language.

Name
Explain the role of literacy in the acquisition of languages and its relationship to L1 and L2 acquisition.

Name
Determine the role of L1/L2 academic development, L1/L2 linguistic development, and L1/L2 cognitive development, all in the social context of the ELL.

Name
Explore the role of technology in the classroom as a tool to enhance instruction in the ESOL context.

EDUC4103 - PIETY, WONDER, & MORAL IMAGINATION

General

Course Prefix
EDUC

Course Number
4103

Description
A Classical education begins with wonder. This course initiates the Classical order of learning with a Gymnastic and Musical education. Students will learn how these are foundational to the development of a child's moral imagination and intellectual virtues through discussions, readings, and pedagogical practices.
Note: Live Sessions Offered

Learning Outcomes

Learning Outcomes

Name
Articulate a clear understanding of a Gymnastic and Musical education.

Name
Explain how Gymnastic and Musical education are the crucial starting place for a Classical education

Name
Explain the moral imagination and how it can be cultivated throughout a person's life.

Name
Demonstrate appropriate pedagogical techniques designed to foster a child's moral imagination.

EDUC4203 - MENTORSHIP & THE GREAT BOOKS

General

Course Prefix
EDUC

Course Number
4203

Description
Classical education is the cultivation of wisdom and virtue while pursuing the true, good, and beautiful in all of learning. In this course, students read some of the greatest literature ever written while demonstrating the tools of learning they have gleaned through this course of study to continue to teach themselves. Exhibiting self-governance, students meet regularly with a tutor to discuss the deep ideas within the text, respond with their own writing, and lead their classmates to contemplate the virtues within the text. Note: Live Sessions Offered

Name
Apply the National Council of Teachers of Mathematics (NCTM) Principles and Standards for school mathematics.

Name
Compare and contrast various teaching strategies and their strengths and weaknesses.

Name
Develop an expanded view of the process of teaching mathematics.

Name
Plan and teach appropriate mathematics lessons and reflect on ones teaching.

Name
Develop strategies for assessing and evaluating what students have learned.

Name
Create and implement assessment instruments for middle school and high school mathematics courses.

Name
Identify the needs of diverse learners to develop strategies to address their needs.

EDUC4433 - CLASS & BEH MGMT - SEC SCHOOL

General

Course Prefix
EDUC

Course Number
4433

Description
This course is the study of models and strategies of behavior and classroom management appropriate for middle and high school students in accordance with human development milestones. The course covers student attributes of behavior, including response to interventions, age-appropriate discipline, intrinsic versus extrinsic motivation, and conflict resolution. The course includes methodology for managing a learning environment utilizing research-based best practices in education. Prerequisite: None

Learning Outcomes

Name
Examine theories and research related to classroom management approaches.

Name
Explain legislation and ethical issues related to managing a learning environment.

Name
Relate safe learning environments to diversity, academics, exceptional needs, linguistic backgrounds, family communication, and human development milestones.

Name
Assess individual functioning levels and pro-social behavior as related to individual and group dynamics of behavior.

Name
Identify strategies for increasing, decreasing, and maintaining behaviors.

Name
Discuss techniques for dealing with crisis situations in a learning environment.

Name
Implement behavioral interventions supporting student behaviors in inclusive settings.

Name
Manage the resources of time, space, and attention in the learning environment.

EDUC4912 - STUDENT TEACHING

General

Course Prefix
EDUC

Course Number
4912

Description
This course provides five seminar-style opportunities for student teachers to examine the experiences they are concurrently having in the full-time student internship in the PreK-12 setting. Seminars are designed to respond to the immediate needs of the student teachers and offer support, encouragement, and insights into the teaching process and profession. Guest speakers will play an important role in enriching the program and providing first-hand experiences from the classroom and administrative levels.Prerequisite: Attempt all required portions of the FTCE

Learning Outcomes

Name
Use backward design to align curriculum with assessment and instruction.

Name
Articulate and design ways to focus curriculum on the big ideas in content standards.

Name
Ascertain which learning activities are more apt to enable students to achieve desired results.

Name
Draft curricular units based on essential questions.

Name
Create performance tasks and rubrics for assessing student understanding in any subject.

Name
Organize, sequence, and guide classroom learning experiences to enhance student learning.

EDUC5033 - READING & WRITING INSTRUCTION

General

Course Prefix
EDUC

Course Number
5033

Description
This course focuses on evidence-based methods of teaching K-12 reading and writing instruction that will assist teachers in broadening their repertoire of strategies designed to increase student reading and writing achievement in both reading/language arts classes and the content areas. This course will provide the participant with techniques for implementing a delivery system in the classroom that include direct and explicit instruction of comprehension, fluency, vocabulary, and word study skills through the scaffolding of strategies.

Learning Outcomes

Learning Outcomes

Name
Identify foundational theorists and differentiate among theories of reading/ writing processes and development.

Name
Relate instructional applications to theories of reading/writing processes and development.

Name
Evaluate instructional methods for vocabulary and integrate writing strategies to support reading comprehension and development

Justification
The current ILO does not align with FDOE standards.

Name
Apply appropriate instructional methods for developing fluent reading with purpose and understanding.

Name
Apply explicit, systematic instructional practices in phonological awareness and phonics, including assessment driven differentiation.

Justification
This new ILO is needed to meet FDOE requirements and alignment.

EDUC5053 - TEACHING SCIENCE

General

Course Prefix
EDUC

Course Number
5053

Description
This course is designed to advance students' understanding of teaching and learning science. Students will gain knowledge of planning and assessing learning in science as well as integrating science with other subjects. The course will also cover the benefits using technology in science courses.

Credit Hours

Minimum Credit Hours:
3

Maximum Credit Hours:
3

Learning Outcomes

Learning Outcomes

Name
Evaluate teaching methods that facilitate student learning of science concepts and principles.

Name
Demonstrate planning and assessing learning in science

Name
Apply methods of engaging and motivating students.

Name
Explore the benefits of technology in teaching science.

Name
Research methods of integrating science with other subjects.

Name
Develop a research-based science lesson utilizing appropriate planning and instructional methods.

EDUC5063 - TEACHING MATHEMATICS

General

Course Prefix
EDUC

Course Number
5063

Description
This course focuses on the learning processes for teaching mathematics conceptually. Students will attain skills to teach number sense, geometric reasoning, data and probability, algebraic reasoning, and measurement through the lens of a growth mindset and the concrete- representational-abstract framework to enhance student understanding and increase student achievement.

Credit Hours

Minimum Credit Hours:
0

Maximum Credit Hours:
17

3

Learning Outcomes

Learning Outcomes

Name
Contrast a growth mindset and a fixed mindset.

Name
Create an explanation of the concrete-representational-abstract (CRA) framework for someone unfamiliar with it.

Name
Explain the importance of number sense.

Name
Design a resource to help students develop their geometric reasoning.

Name
Design a project for students to collect, represent, analyze, and interpret data.

Name
Write a lesson plan to build students understanding of measurement.

Name
Create a list of resources, both digital and physical, to help students develop algebraic reasoning skills.

EDUC5083 - TEACHING SOCIAL STUDIES

General

Course Prefix
EDUC

Course Number
5083

Description
This course emphasizes themes in social studies, theories of learning, teaching strategies, and ways to connect social studies to the world beyond the classroom. The course is also designed to meet the National Board of Professional Teachers Standards (NBPTS), facilitate the completion of the teaching portfolio for NBPTS, and pass the NBPTS exams leading to Middle Childhood Generalist certification.

Credit Hours

Minimum Credit Hours:
0

Maximum Credit Hours:
17

(Credit Hours) Value:

Contact Hours (not needed)

(Contact Hours) Value (not needed) :
3

Repeatable:
Yes

Number Of Repeats:
3

Number Of Credits:
3

Learning Outcomes

Learning Outcomes

Name
Demonstrate familiarity with national, state, and local social studies standards for elementary education or K-12 diverse populations.

Name
Examine research-based principles that support student achievement in social studies education.

Name
Identify essential strategies that promote knowledge acquisition, understanding, and connections in social studies.

Name
Structure opportunities for students to actively engage in constructing knowledge and understanding.

Name
Explore different grouping models for learning and instruction that support the needs of all students.

Name
Examine assessment practices used to measure student performance and inform instructional practice.

Name
Plan interdisciplinary curriculum and instructional delivery.

Name
Demonstrate knowledge of the standards for the NBPTS Middle Childhood Generalist certification.

EDUC5103 - FAITH INTEGRATIION

General

Course Prefix
EDUC

Course Number
5103

Description
This course is designed to equip public and private educators in effectively integrating their Christian faith in their schools and classrooms.

Credit Hours

Minimum Credit Hours:
3

Maximum Credit Hours:
3

(Credit Hours) Value:
3

Contact Hours (not needed)

(Contact Hours) Value (not needed) :
0

Learning Outcomes

Learning Outcomes

Name
Recognize the role of Christian faith in education.

Name
Explain and defend the importance of Christian education.

Name
Develop ways to connect Christian faith and educational practice.

Name
Describe the nature of the learner, the importance of curriculum, and the role of teacher in the learning process.

Name
Integrate faith and learning in teaching and scholarship.

EDUC5113 - EDUCATIONAL RESEARCH

General

Course Prefix
EDUC

Course Number
5113

Description
This course is designed to assist graduate students as they plan an action research project in their school or classroom.

Credit Hours

Minimum Credit Hours:
3

Maximum Credit Hours:
3

(Credit Hours) Value:
3

Contact Hours (not needed)

(Contact Hours) Value (not needed) :

Learning Outcomes

Learning Outcomes

Name
Define a research focus and articulate the underlying theory behind the proposed research questions.

Name
Conduct a review of appropriate literature and write a literature review related to their research questions.

Name
Develop a data collection plan for their research questions.

Name
Plan an action research project in collaboration with their school administration and research professor.

Name
Develop a data analysis plan for their action research project.

Name
Write a research proposal for their action research project.

EDUC5153 - CURRICULUM & INSTRUCTION

General

Course Prefix
EDUC

Course Number
5153

Description
This course focuses on assisting candidates in defining, planning, implementing, analyzing, and evaluating the K-12 curricula. The course also examines instructional strategies that have a positive impact on student achievement and school-wide policies and procedures that support learning for all students. This course is designed with a field study for students in the MEEL program who have a principal mentor and are preparing for the FELE exam.Prerequisite: None

Credit Hours

Learning Outcomes

Learning Outcomes

Name
Use backward design to align curriculum with assessment and instruction.

Name
Learn how and why to focus curriculum on the big ideas in content standards.

Name
Ascertain which learning activities are more apt to enable students to achieve desired results.

Name
Draft curricular units based on essential questions.

Name
Create performance tasks and rubrics for assessing student understanding in any subject.

Name
Organize, sequence, and guide classroom learning experiences to enhance student learning.

EDUC5163 - EDUCATIONAL LEADERSHIP RESEARCH

General

Course Prefix
EDUC

Course Number
5163

Description
This course is designed to guide graduate students through the process of developing, conducting, and reporting an action research project in their school or classroom. The major emphasis of this course is the acquisition and application of action research, decision-making skills, and techniques in school leadership and management. Candidates will understand quantitative and qualitative research in their field and learn to conduct research in their particular educational setting. This course is designed with a field study for students in the MEEL program who have a principal mentor and are preparing for the FELE exam.Prerequisite: None

Credit Hours

Learning Outcomes

Learning Outcomes

Name
Define a research focus and articulate the underlying theory behind the proposed research questions.

Name
Conduct a literature review of one effective school correlate.

Name
Collect, analyze, and report on data for a grade-level, subject-area, and AYP sub-group of their choice.

Name
Convert research results into action plans for school or class improvement.

Name
Shadow an area principal for one day and complete a detailed time and motion study.

Name
Conduct a case-study interview about ethical situations related to AYP.

EDUC5173 - ADULT & LIFELONG LEARNING

General

Course Prefix
EDUC

Course Number
5173

Description
This course provides candidates with the study of adult learning theories, behaviors, supervisory models, tasks, and skills of informal data collection. The course also includes strategies for continuous improvement for all candidates and stakeholders. This course is designed with a field study for students in the MEEL program who have a principal mentor and are preparing for the FELE exam.Prerequisite: None

Learning Outcomes

Learning Outcomes

Name
Differentiate between the aims of Christian and secular education

Name
Differentiate between models of schooling and education

Name
Define the role of the soul and imagination in education

Name
Apply the principles of classical Christian pedagogy in a classical education context

EDUC5193 - MEASUREMENT & ASSESSMENT

General

Course Prefix
EDUC

Course Number
5193

Description
The course studies measurement of student learning and its important role in the instructional process. This course is designed to assist teachers to construct and select tests and assessments that meet instructional goals, analyze and interpret test results, and to use measurement to inform and evaluate instruction.

Credit Hours

Minimum Credit Hours:
0

Maximum Credit Hours:
4

(Credit Hours) Value:

Learning Outcomes

Learning Outcomes

Name
Identify learning outcomes and their relationship to instruction and assessment.

Name
Analyze and evaluate commercially developed assessments.

Name
Use best practices in assessment to construct, implement, analyze, and evaluate valid teacher-made tests and measurements.

Name
Apply assessment data to improve teaching, learning, and student achievement.

Name
Utilize assessment data to determine and communicate student achievement to stakeholders.

EDUC5203 - EDUCATIONAL LEADERSHIP

General

Course Prefix
EDUC

Course Number
5203

Description
Educational Leadership is an administration course that addresses change, influences, and planning systems and examines personnel functions for administrators. This course is designed with a field study for students in the MEEL program who have a principal mentor and are preparing for the FELE exam.Prerequisite: None

Credit Hours

Minimum Credit Hours:
3

Maximum Credit Hours:
3

(Credit Hours) Value:

Learning Outcomes

Learning Outcomes

Name
Exhibit knowledge, skills, and dispositions to develop, articulate, and implement a shared vision that is supported by the school community.

Name
Integrate the resources of school, family, & community to positively affect student learning.

Name
Show potential ability to develop positive school culture through context-appropriate strategies that reflect a shared vision for a diverse, interactive learning community.

Name
Demonstrate the ability to promote the success of all students and colleagues by acting ethically and with integrity and fairness.

EDUC5213 - COMMUNICATION SKILLS & SUPERVISION

General

Course Prefix
EDUC

Course Number
5213

Description
This course explores the theory, research, and practices required for effective application of verbal and written communication, mediation, and conflict resolution skills needed by educational leaders in their many roles. This course is designed with a field study for students in the MEEL program who have a principal mentor and are preparing for the FELE exam.Prerequisite: None

Credit Hours

Minimum Credit Hours:
3

3

Learning Outcomes

Learning Outcomes

Name
Demonstrate knowledge of communication strategies and the relationship between self-esteem and interpersonal behavior in effective communication.

Name
Apply conflict resolution and mediation strategies in problem solving.

Name
Explain the need and role of the educational leader in shaping a vision and mission for schools.

Name
Describe the critical importance of theory, research, and practices required for effective communication skills required for school leadership.

EDUC5223 - ORGANIZATIONAL MANAGEMENT

General

Course Prefix
EDUC

Course Number
5223

Description
This course examines state and federal case laws pertaining to human resource management in education. Instructional and clinical supervision, as well as educational human resource management theories, models, and practices are examined. This course is designed with a field study for students in the MEEL program who have a principal mentor and are preparing for the FELE exam. Prerequisite: None

Learning Outcomes

Learning Outcomes

Name
Explain classical modern organizational structure and culture theories, citing relevant theorists, and research and application illustrations.

Name
Explain modern administrative theory, respecting human motivation, management, leadership, decision-making, change, planning, and communication, citing theory and application illustrations.

Name
Describe and explain: (1) the structure of the American public education system; (2) the various roles and relationships between and among the federal, state and local governments; and (3) the role of the United States case administrative law in the governance of public education.

Name
Describe and explain the key education personnel administrative concepts, theories, practices and relevant law, including education administrative career paths.

Name
Describe leadership strategies to improve the curriculum, teaching, and learning.

EDUC5233 - LEARNING & ASSESSMENT

General

Course Prefix
EDUC

Course Number
5233

Description
This course is an examination of the theory and practice of evaluating, of communicating student achievement, and the using of assessment data as decision-making tools. This course is designed with a field study for students in the MEEL program who have a principal mentor and are preparing for the FELE exam.Prerequisite: None

Learning Outcomes

Learning Outcomes

Name
Demonstrate competence with the Florida Principal Standards..

Name
Develop specialized knowledge and performance in one of the domains of the leadership standards.

Name
Obtain practical experiences with the roles of the assistant principal or other school-site administrator.

Name
Practice the various performance aspects expected of the school-based administrator.

Name
Demonstrate proficiency with each of the 45 competency indicators.

EDUC5303 - CLASSROOM MANAGEMENT

General

Course Prefix
EDUC

Course Number
5303

Description
This course is an examination of contemporary, research-based theories and applications of behavior management principles for K-12 students. Positive and proactive approaches for addressing student behavior are emphasized. The goal is to provide practical and beneficial information to elevate classroom management for all stakeholders.Prerequisite: None

Credit Hours

Minimum Credit Hours:

Learning Outcomes

Learning Outcomes

Name
Examine how philosophy affects classroom management.

Name
Examine how relationships, engagement, and procedures affect classroom management.

Name
Explain the merits and limitations of behavioral and social-cognitive approaches to behavior management.

Name
Assess the impact of the physical elements of the classroom on classroom management.

Name
Diagnose classroom behavior issues and assess the effectiveness of various interventions.

Name
Identify and analyze classroom management approaches that are culturally responsive and relevant to the community.

Name
Explain strategies that enhance student efficacy related to behavior management.

Name
Design a data-driven intervention plan for a student, classroom, or school.

EDUC5343 - CLASSICAL ARTS & THE PAIDEIA OF GOD

General

Course Prefix
EDUC

Course Number
5343

Description
An exploration of classical grammar, dialectic and rhetoric as related to the Paideia of God and unfolding story of scripture.

Prerequisites

Complete ALL of the following Courses:

- LANG5033 - LATIN TRANSLATION

Learning Outcomes

Learning Outcomes

Name
Demonstrate appropriate and effective research strategies in the field.

Name
Propose a thesis or capstone project plan.

Name
Complete an annotated bibliography of sources.

Name
Defend the thesis or capstone project and revise to meet graduate level research requirements.

EDUC5403 - TRAUMA-INFORMED PEDAGOGY

General

Course Prefix
EDUC

Course Number
5403

Description
This course is a study of the indicators and impact of trauma on a student's well-being and classroom learning. The course focuses on methods for integrating trauma-informed teaching strategies to mitigate the effects of trauma. Participants will incorporate social-emotional learning and trauma-informed pedagogy to create a plan for a trauma-responsive learning environment. Participants will also create a trauma-informed self-care plan for educators.

Learning Outcomes

Learning Outcomes

Name
Identify indicators of trauma, stress, or emotional suffering.

Name
Understand the Adverse Childhood Experiences (ACE) study.

Name
Analyze the impact trauma has on a persons brain, body, emotions, and behaviors.

Name
Evaluate methods for mitigating the effects of trauma.

Name
Utilize research to guide trauma-informed teaching strategies.

Name
Investigate the relationship between social-emotional learning and trauma-informed pedagogy.

Name
Design a plan for a trauma-responsive learning environment integrating social-emotional learning and trauma-informed teaching.

Name
Analyze the impact of secondary traumatic stress and design a self-care plan.

EDUC5413 - CLASSICAL PEDAGOGY & CURRICULA

General

Course Prefix
EDUC

Course Number
5413

Description
This course studies the principles that shape classical pedagogy and its curriculum, highlighting the current approaches of the classical education rescue movement. It analyzes how the educational principles of the past are contextualized in contemporary curricula, promoting a solid and relevant formation.Prerequisite: NoneEDiGlobal - Brazil locations only

Learning Outcomes

Learning Outcomes

Name
List the principles of classical pedagogy and curriculum.

Name
Compare the classical approaches of classical education.

Name
Demonstrate an understanding of how Christian education acts in daily teaching.

Name
Test classical pedagogy in class preparation and classroom.

Name
Formulate a Christian curriculum for the Christian school, Christian homeschooling, or Christian college.

EDUC5423 - MYTH & PHILOSOPHY

General

Course Prefix
EDUC

Course Number
5423

Description
This course explores the complex relationship between mythology and philosophy throughout the ages, including the ancient, pagan, Christian, and modern periods in Western Civilization. It analyzes how the Incarnation serves as a point of resolution for these questions and examines the essential role that mythology and philosophy play in human formation.Prerequisite: NoneEDiGlobal - Brazil locations only

Learning Outcomes

Name
Outline the mythology and philosophy main points of identity formation.

Name
Classify the various periods of mythology and philosophy in Western Civilization.

Name
Analyze the Incarnation as the climax of Christian human thought in Western Civilization.

Name
Identify points of contact and contrast between Christian worldview, mythology, and philosophy in human formation.

EDUC5433 - RESEARCH-BASED LITERACY INSTRUCTION

General

Course Prefix
EDUC

Course Number
5433

Description
This course focuses on evidence-based methods of teaching K-12 reading and writing instruction that will assist teachers in broadening their repertoire of strategies designed to increase student reading and writing achievement in both reading/language arts classes and the content areas. This course will provide the participant with techniques for implementing a delivery system in the classroom that includes direct and explicit instruction of comprehension, fluency, vocabulary, and word study skills through the scaffolding of strategies.

Learning Outcomes

Name
Identify foundational theorists and differentiate among theories of reading processes and development.

Name
Relate instructional applications to theories of reading processes and development.

Name
Evaluate instructional methods for vocabulary acquisition and use in speaking and listening, reading, and writing for diverse learners.

Name
Apply appropriate instructional methods for developing fluent reading with purpose and understanding.

Name
Analyze the role of motivation and engagement in literacy development across diverse learners.

EDUC5443 - ETHICS IN SCHOOL LAW & FINANCE

General

Course Prefix
EDUC

Course Number
5443

Description
This course introduces and examines the ethics of the school leader related to school law and finance. Constitutional and statutory law with an emphasis on school safety is emphasized. Managing the school's fiscal resources in a responsible and ethical manner, engaging in effective budgeting, and decision-making are examined. This course is designed with a field study for students in the MEEL program who have a principal mentor and are preparing for the FELE exam.Prerequisite: None

Learning Outcomes

Name
Explain the process of financial accounting, auditing, reporting and control, and school finance plan, including relevant law, computations, and other related issues.

Name
Identify and explain practical applications of school finance, concepts, and practices with respect to purchasing, inventory, risk management, technology, and auxiliary supporting services within the school environment.

Name
Understand the legal authority for state and local education agency schools governance and policy formation.

Name
Understand the legal basis for students rights and freedoms under common, statutory, and constitutional law.

Name
Know the current legal issues affecting education including school safety.

Name
Explore current law and finance regarding the implementation of school safety procedures and the rights of students, parents, and all stakeholders.

EDUC5453 - CHRISTIAN THEOLOGY & EDUCATION

General

Course Prefix
EDUC

Course Number
5453

Description
This course delves into the second to tenth centuries of the Christian tradition, primarily exploring theology and investigating how Christology, anthropology, and epistemology are related to practical issues for daily life and human formation.Prerequisite: NoneEDiGlobal - Brazil locations only

Credit Hours

Learning Outcomes

Learning Outcomes

Name
Relate the main points of Christian theology to education philosophy.

Name
Discuss the implications of Christian theology to a Christian epistemology.

Name
Apply the theology learned in the course to specific class daily situations.

Name
Contrast Christian epistemology with national standards of non-Christian philosophy.

Name
Formulate your personal Christian philosophy of education.

EDUC5463 - HISTORY OF CLASSICAL EDUCATION

General

Course Prefix
EDUC

Course Number
5463

Description
This course traces the evolution of education throughout history, with a particular focus on the perspective of Western Christendom. It explores the contributions of notable historical figures, from Quintilian and Augustine to pre-modern writers such as Comenius and Milton, and how their ideas impact contemporary education, exemplified by the work of Dorothy Sayers. It highlights the movement's dialogue between the past and present to rescue classical education.Prerequisite: EDUC 5003EDiGlobal - Brazil locations only

Learning Outcomes

Learning Outcomes

Name
Relate to Literature, History, and Philosophy in Antiquity and Middle Ages.

Name
Identify four big ideas that lead western culture to flourishing.

Name
Demonstrate with examples three big changes in culture, scientific and social in the 21st century.

Name
Analyze mythology by a Christian Worldview.

Name
Categorize the major contribution of big books from Antiquity and Middle Ages.

Name
Formulate an exposition that reflects the main themes that emerged from the Antiquity and Middle Ages historical background.

EDUC5493 - UNDERSTANDING THE HUMANITIES II

General

Course Prefix
EDUC

Course Number
5493

Description
Focusing on works from the Renaissance to the Modern Era in the West, this course continues the journey of understanding the cultural and intellectual influences that shaped our civilization by examining the literary, philosophical, and historical expressions of this crucial period.Prerequisite: EDUC 5483EDiGlobal - Brazil locations only

Learning Outcomes

Learning Outcomes

Name
Identify measurement concepts, characteristics, and uses of norm-referenced, criterion-referenced, and performance-based assessments.

Name
Identify appropriate oral and written methods for assessing individual student progress.

Name
Interpret data from informal and formal assessments to guide instructional decisions.

Name
Examine and apply individual student reading data to differentiate instruction.

Name
Evaluate the appropriateness of assessment instruments and practices.

Name
Apply assessment data to inform schoolwide decision-making and continuous improvement in literacy instruction.

EDUC5563 - CONTENT AREA LITERACY

General

Course Prefix
EDUC

Course Number
5563

Description
This course presents the theoretical foundation and current best practices for content area reading, writing, and study skills.

Credit Hours

Minimum Credit Hours:
3

Maximum Credit Hours:
3

(Credit Hours) Value:
3

Contact Hours (not needed)

Learning Outcomes

Learning Outcomes

Name
Examine instructional approaches and strategies for development and utilization of content area vocabulary.

Name
Identify and analyze text structures and features of fiction and nonfiction text.

Name
Identify and apply instructional approaches and strategies for teaching study skills.

Name
Identify and apply instructional approaches and strategies for assisting students with the comprehension of content area texts.

Name
Evaluate criteria for selecting print and non-print media for content area teaching and learning.

Name
Apply instructional strategies that integrate writing with reading to improve comprehension of content-area text.

Justification
Will meet FDOE standards.

EDUC5573 - SUPERVISION OF READING PROGRAMS

General

Course Prefix
EDUC

Course Number
5573

Description
This course explores the role of the reading supervisor in organizing and implementing reading programs from grade pre-Kindergarten through grade 12.

Credit Hours

Minimum Credit Hours:
3

Maximum Credit Hours:
3

(Credit Hours) Value:
3

Learning Outcomes

Learning Outcomes

Name
Evaluate characteristics and purposes of various reading programs.

Name
Identify the purposes and practices for involving family members, community members, and other professionals in reading efforts.

Name
Interpret reading information and assessment data to administrators, faculty, students, parents, and the community.

Name
Design and facilitate professional development sessions to support effective literacy instruction for faculty.

Justification
Current objective does not align with FDOE.

Name
Select and evaluate instructional materials for reading instruction.

Name
Identify criteria for evaluating the effectiveness of a reading program.

Name
Use school data and program evaluation results to identify methods to modify and improve curriculum and instruction.

Name
Apply principles of adult learning and coaching to support teachers in implementing effective literacy instruction.

Justification
Needed to align with FDOE.

EDUC5583 - ADVANCED FOUNDATIONS IN LITERACY

General

Course Prefix
EDUC

Course Number
5583

Description
This course investigates the historical development and cognitive foundations of reading processes. Students will review and critique reading research and its implications on classroom practices.

Credit Hours

Learning Outcomes

Learning Outcomes

Name
Identify foundational and instructional applications theories and theorists of reading processes and development.

Name
Describe characteristics of scientifically based reading research.

Name
Present findings from current reading research.

Name
Apply reliable sources of reading research, including peer-reviewed journals and technical reports, to classroom instruction.

Name
Advocate for the adoption of evidence-based literacy policies' and practices at the school, district, and state level.

Justification
Will align with FDOE requirements.

EDUC5593 - STRUCTURED LITERACY FOUNDATIONS

General

Course Prefix
EDUC

Course Number
5593

Description
This course prepares candidates to implement evidence-based structured literacy practices aligned with the Science of Reading. The course examines Orton-Gillingham as one structured literacy model while introducing additional research-based frameworks such as Wilson, UFLI, LETRS, and Reading Mastery. Candidates design and deliver explicit, systematic, and multisensory instruction informed by diagnostic assessment data and evaluate literacy programs and instructional materials for research alignment and effectiveness.

Credit Hours

Learning Outcomes

Learning Outcomes

Name
Explain the theoretical and research foundations of structured literacy and its alignment with the Science of Reading.

Name
Analyze the OG approach as one structured literacy model and compare with Wilson, UFLI, LETRS, Reading Mastery and other explicit approaches.

Name
Design and deliver multisensory, explicit, and systematic lessons in phonics, spelling, fluency, vocabulary, comprehension, and writing.

Name
Apply diagnostic assessment data to inform lesson planning and instructional decision-making

Name
Adapt structured literacy strategies for diverse populations, including students with dyslexia, multilingual learners, and struggling readers.

Name
Evaluate literacy programs and policies for research alignment and classroom effectiveness.

EDUC5603 - ELOQUENT WISDOM

General

Course Prefix
EDUC

Course Number
5603

Description
This course examines the formation of the classical Christian rhetorician from its theological and philosophical foundations to its full public expression. Organized around the paradigm of Robert Littlejohn and Charles T. Evans (Wisdom and Eloquence), the course rejects the dichotomy between speculative wisdom and technical eloquence, demonstrating that the Liberal Arts are genuine agents of character formation, not mere psychological stages or instrumental tools.

The student's starting point is accurately diagnosed: modern utilitarian education has produced skilled speakers without virtue, or serious thinkers without the ability to articulate publicly. The course corrects this dual deficiency through a rigorous and progressive path: Axis I, theological foundation and the alignment of the mind with the order of creation; Axis II, the literacy of the soul through the structures of thought (Grammar and Dialectic); Axis III, aesthetic and persuasive architecture (Poetics and Rhetoric); Axis IV, public praxis and the theological synthesis of Christian rhetoric.

The intended outcome is a student who embodies Quintilian's ideal of the vir bonus dicendi peritus, the good man who speaks well, capable of articulating the truth in a beautiful, clear, and persuasive manner in service to others and to culture, under the lordship of Christ. The foundational texts of the course (Proverbs, Cicero, Quintilian, Aristotle, Augustine) are read as living sources of formation, not as archaeological artifacts.

Credit Hours

Learning Outcomes

Learning Outcomes

Name
Articulate the distinction between Sapientia and Eloquentia and demonstrate their indissoluble interdependence in the classical Christian tradition, based on Littlejohn and Evans.

Name
Identify the vices of discourse produced by modern utilitarian education—manipulation, irrelevance, fragmentation—and contrast them with the ideal of classical rhetoric.

Name
Analyze the foundational texts of the course (Proverbs, Cicero, Quintilian, Aristotle, Augustine) as living sources of rhetorical training, situating them within the progressive arc of the course.

Name
Apply the elements of the Trivium (Grammar, Dialectic, Rhetoric) in an integrated manner within their teaching context.

Name
Develop and present public speeches (deliberative, forensic, or epidictic) that demonstrate a deliberate integration of ethos, logos, and pathos.

Name
Produce written works and oral performances that demonstrate mastery of the complete formative process, from theological foundation to public praxis, at the graduate level.

EDUC7001 - PEDAGOGY INTENSIVE

General

Course Prefix
EDUC

Course Number
7001

Description
At the heart of a Classical education is the intersection of philosophy, pedagogy, and praxis, rooted in a historically informed anthropology. This course allows the doctoral group to meet in person, engage in deep discussion, research topics within the field, practice teaching, and receive feedback. This in-person intensive is taken three times throughout the doctoral program, with specific content drawn from the coursework of the cohort during the current and adjacent sessions.Note: This course is required three times for successful completion of the doctoral program: at the start, after EDUC 8153 Pedagogy II: Poetics, and last. The specific timing and location will be announced by the supervising professor prior to each semester.

Learning Outcomes

Learning Outcomes

Name
Articulate similarities and differences between quantitative and qualitative research design and analysis.

Name
Distinguish between the different elements of a research study.

Name
Analyze professional research and identify strengths and weaknesses in its design, methodologies, and conclusions.

Name
Defend the appropriate design and analysis procedures for quantitative, qualitative, and mixed methods studies.

Name
Analyze, evaluate, and use research data to inform professional practices.

EDUC7013 - QUALITATIVE RESEARCH

General

Course Prefix
EDUC

Course Number
7013

Description
This course outlines the philosophical foundations, conceptual frameworks, and current trends in qualitative research design, analysis, and reporting. Students will explore methods for gathering, analyzing, and interpreting qualitative data.

Credit Hours

Learning Outcomes

Learning Outcomes

Name
Review and employ best practices in survey design, development, analysis, and reporting.

Name
Compare and contrast quasi-experimental, correlational, action research, and mixed methods research designs and the statistics used in the designs.

Name
Differentiate between descriptive statistics and inferential statistics.

Name
Evaluate and select appropriate research designs and statistical analyses to research educational problems, innovations, or issues.

Name
Examine research data, accurately interpret the results of the data analysis, and communicate sound conclusions.

Name
Communicate research results to professionals, public policymakers, and the public effectively.

EDUC7033 - ADVANCED QUANTITATIVE RESEARCH

General

Course Prefix
EDUC

Course Number
7033

Description
This course is an advanced exploration of experimental research design, sampling, hypothesis testing, tests of significance, inferential statistics, analysis and interpretation of data, and reporting.

Credit Hours

Minimum Credit Hours:
0

Maximum Credit Hours:
4

(Credit Hours) Value:

Learning Outcomes

Name
Compare and contrast experimental and quasi-experimental research designs and the statistics used in the designs.

Name
Evaluate and select appropriate research designs and statistical analyses to research organizational problems, innovations, or issues.

Name
Select appropriate tests of significance related to the problem, the research design, and levels of data.

Name
Examine research data, accurately interpret the results of the data analysis, and communicate sound conclusions.

Name
Communicate research results to professionals, public policymakers, and the public effectively.

EDUC7103 - ORIENTATION & INTRODUCTION

General

Course Prefix
EDUC

Course Number
7103

Description
This course provides an orientation to the doctoral program and enhances the academic writing capabilities of doctoral students. Through learning and applying APA-style formatting in this course, students will improve their scholarly writing skills. Emphasis is placed upon disciplines of effective leadership.Prerequisite: Acceptance

Credit Hours

Minimum Credit Hours:

Learning Outcomes

Learning Outcomes

Name
Demonstrate understanding of academic integrity principles and proper citation of sources.

Name
Identify and analyze the disciplines of effective leadership.

Name
Demonstrate proficiency in the grammatical, mechanical, and style conventions of APA-style academic writing.

Name
Apply clear, concise, and coherent academic writing skills in which the development, organization, structure, and style are appropriate to task, purpose, and audience.

Name
Analyze strategies and techniques that can be used to strengthen academic writing skills.

EDUC7113 - PRINCIPLES OF LEADERSHIP & ETHICS

General

Course Prefix
EDUC

Course Number
7113

Description
This course studies the theories, models, nature, styles, skills, and dynamics of effective leadership. Emphasis is placed upon synthesizing these traits and concepts into a biblical model of ethical and servant leadership to lead, manage, and transform organizations. Prerequisite: Acceptance

Credit Hours

Minimum Credit Hours:
0

Learning Outcomes

Learning Outcomes

Name
Identify and analyze current theories and styles of leadership and their relevance to decision-making.

Name
Compare and contrast historical patterns of leadership to current leadership theories.

Name
Recognize critical social, legal, and professional issues currently affecting leadership models, styles, and theories.

Name
Explain the principles, skills, traits, and characteristics necessary for a leader committed to the biblical model of servant leadership.

Name
Discuss and critique multiple leadership approaches to promote personal success with an organization.

Name
Integrate and synthesize the principles of ethical professional behavior and servant leadership into a personal leadership style based upon Gods Word.

EDUC7123 - LEARNING & COGNITION

General

Course Prefix
EDUC

Course Number
7123

Description
This course is an in-depth analysis of learning and cognition and their impact on instructional practice and policy. Prerequisite: EDUC 7113

Credit Hours

Learning Outcomes

Learning Outcomes

Name
Evaluate research relevant to learning and cognition.

Name
Differentiate the varied, unique needs of the adult learner as compared to other learners.

Name
Design activities appropriate for cognitive growth for all ages with a wide range of individual differences in abilities, interests, behavioral styles, and cultural backgrounds.

Name
Integrate learning technologies into professional practice to accelerate and reinforce cognitive development.

Name
Integrate a biblical worldview into an overall philosophy of learning.

EDUC7143 - TEACHING & MENTORING

General

Course Prefix
EDUC

Course Number
7143

Description
This course examines pedagogies, instructional strategies, and delivery systems that have been found to enhance learning for all ages, developmental stages, and backgrounds in diverse settings, with special emphasis on the instruction of adults. This course is a research-based course that provides opportunities to explore and examine effective methods that promote learning and mentoring.

Learning Outcomes

Learning Outcomes

Name
Evaluate current research on effective instructional methods used in multiple disciplines.

Name
Plan, deliver, and evaluate active learning strategies that align with critical precepts of learning theory and human growth and development.

Name
Demonstrate the ability to effectively differentiate instruction for learners from diverse linguistic and cultural backgrounds and exceptionalities.

Name
Synthesize information from assigned readings, class discussions, and student presentations to optimize instruction for all learners.

Name
Explore the effectiveness of research-based instructional strategies.

Name
Communicate the professional leaders role in the design, development, and evaluation of effective mentoring.

EDUC7163 - PROGRAM EVALUATION

General

Course Prefix
EDUC

Course Number
7163

Description
This course is an exploration of principles and methods of effective program evaluation including planning, instrumentation, data collection and analysis, and reporting. Case studies in program evaluation will be emphasized.

Credit Hours

Minimum Credit Hours:
0

Maximum Credit Hours:
4

(Credit Hours) Value:

Learning Outcomes

Learning Outcomes

Name
Compare and evaluate models of program evaluation in organizations.

Name
Analyze and assess program evaluation methods, reporting, and conclusions based on current standards of best practice in program evaluation.

Name
Evaluate the accuracy, objectivity, fairness, and ethics of the conduct and reporting of program evaluation.

Name
Critique program evaluation plans used to assess programs and/or address critical issues in the profession.

Name
Communicate the results of program evaluation to a variety of audiences, including professional colleagues, lay persons, and public policy makers.

EDUC7173 - PUBLIC POLICY

General

Course Prefix
EDUC

Course Number
7173

Description
This course addresses theoretical frameworks and research that inform public policy, the impact of public policy, and methods for influencing sound public policy. Students will explore the reciprocal relationships between professional practice and public policy at the local, state, and federal levels.

Credit Hours

Minimum Credit Hours:
0

Learning Outcomes

Learning Outcomes

Name
Examine theoretical orientations for connecting research and policy making.

Name
Research, analyze, and assess current policy issues and the impact of public policy on organizations.

Name
Examine roles that educational professionals play in researching, formulating, implementing, and evaluating policy that strengthen professional practice.

Name
Develop communication skills for expressing logical and clear arguments that promote sound policy to policymakers, professionals, and to the public.

EDUC7323 - ADVANCED QUALITATIVE METHODS

General

Course Prefix
EDUC

Course Number
7323

Description
This course allows students to study and become proficient in conducting advanced qualitative research methods. Students will become familiar with advanced qualitative data collection and data analysis. The primary focus of this course is to design a qualitative research study by demonstrating the ability to conceptualize, design, and execute quality research associated with being a doctoral scholar.

Credit Hours

Minimum Credit Hours:

Learning Outcomes

Learning Outcomes

Name
Analyze the results of existing qualitative studies to inform organizational practice and culture.

Name
Utilize a variety of qualitative methodologies, including narrative, ethnography, phenomenology, and case studies, to answer research questions with appropriate scholarly support from known experts on each specific methodology.

Name
Develop an interview protocol using best practices in conducting qualitative interviews.

Name
Code data to identify emerging themes and categories consistent with the specific qualitative methodology design.

Name
Demonstrate the ability to identify a research problem, articulate a purpose statement for a research study, and design a qualitative study to examine the research problem.

EDUC7833 - ORGANIZATIONAL BEHAVIOR

General

Course Prefix
EDUC

Course Number
7833

Description
This course addresses the theories, concepts, and research in the field of organizational behavior. Students examine models and strategies used to develop and enhance the behavior of individuals and groups in organizations and the workplace. The course also explores topics such as communication, motivation, teams, decision making, ethics, conflict, negotiation, power, influence, and emotional intelligence.

Credit Hours

Learning Outcomes

Learning Outcomes

Name
Identify theories, concepts, and strategies of organizational behavior.

Name
Analyze and synthesize the role of leadership in organizational behavior professional development.

Name
Evaluate the role and impact that organizational behavior has on an organization or a workplace.

Name
Research strategies to encourage employee awareness of emotional intelligence.

Name
Apply team-building principles to enhance the effectiveness of an organization.

EDUC8003 - CURRICULUM THEORY, CONCEPTS, DESIGN

General

Course Prefix
EDUC

Course Number
8003

Description
This course is an examination of the theoretical constructs of curriculum, taking into consideration the functional and developmental process of curriculum. An understanding of the development and implementation of curriculum will be explored by examining philosophical and theoretical perspectives. In-depth analysis of design models will be conducted and applied to the assessment of learner outcomes. The relationship of curriculum development to teaching and learning will be emphasized.Prerequisite: EDUC 7003

Learning Outcomes

Learning Outcomes

Name
Analyze the relationships between curricular design and development, learning theory, instructional materials, and pedagogy.

Name
Articulate educational and biblical values to be considered during the curriculum development process.

Name
Identify the strengths and weaknesses of curricular materials for learners of all ages.

Name
Justify the content, design, and assessment procedures of curriculum.

Name
Assess the underlying issues that affect the curriculum change process.

Name
Integrate a biblical worldview in the design of curriculum.

EDUC8023 - RESEARCH & EVALUATION OF CURRIC

General

Course Prefix
EDUC

Course Number
8023

Description
This course explores the influence of research and evaluation on pedagogy and the design and implementation of curricula. Prerequisites: EDUC 7003

Learning Outcomes

Name
Analyze the role of research and evaluation in curriculum development.

Name
Compare and contrast curriculum evaluation methodologies.

Name
Examine and analyze published research pertaining to research and evaluation of curriculum.

Name
Critique research techniques associated with the evaluation of curriculum.

Name
Analyze and identify characteristics of a research-based curriculum evaluation system.

Name
Analyze the impact and implications of research and evaluation in curriculum design, implementation, and policy-related decision-making at local, state, and national levels.

EDUC8033 - PRACTICUM

General

Course Prefix
EDUC

Course Number
8033

Description
The course is designed as a research seminar in which students will apply theory, knowledge, research, and writing skills developed during the doctoral program to develop and refine the dissertation topic in conjunction with colleagues and advisors. Prerequisite: EDUC 7003

Credit Hours

Minimum Credit Hours:
0

Maximum Credit Hours:

Learning Outcomes

Learning Outcomes

Name
Write the background, problem statement, and purpose statement for a dissertation proposal.

Name
Identify a theoretical framework relevant to the research topic.

Name
Support the use of a chosen theoretical framework for a proposed dissertation study.

Name
Analyze research studies to extract the salient elements of the studies.

Name
Summarize salient elements of extant research studies that are relevant to a proposed dissertation in a literature review.

EDUC8043 - RESEARCH SEMINAR

General

Course Prefix
EDUC

Course Number
8043

Description
This course focuses on the continued development and refinement of research skills. Students will apply theory, research, and writing skills developed during the doctoral program as they synthesize knowledge about research intent, design, and methodology.Prerequisite: EDUC 7323

Learning Outcomes

Name
Write a problem statement and purpose statement for a dissertation based on a gap in the current literature.

Name
Identify and support the choice of a theoretical framework for the research topic.

Name
Analyze research studies relevant to the topic and extract salient elements of the previous studies.

EDUC8133 - RESPONSIVE LEADERSHIP

General

Course Prefix
EDUC

Course Number
8133

Description
This course examines leadership practices within varied educational institutions and professional environments. Students will explore how leaders interpret and respond to contemporary challenges shaped by human experience, organizational structures, and societal change. Students will engage in activities to analyze, evaluate, and apply strategies that address ethical decision-making, systems thinking, and the development of responsive strategies promoting engagement and reducing barriers to participation and success.

Prerequisites

Complete ALL of the following Courses:

- EDUC7113 - PRINCIPLES OF LEADERSHIP & ETHICS

Learning Outcomes

Learning Outcomes

Name
Synthesize published scholarly research regarding current issues and leadership practices related to respectful and collaborative organizational climates.

Name
Evaluate and critique organizational procedures to recommend strategies that foster responsive leadership and improve experiences and outcomes for individuals across contemporary environments.

Name
Assess approaches and practices related to meeting the needs of all individuals in educational institutions or professional environments.

Name
Apply leadership strategies to facilitate discussions and foster biblically based perspectives that support engagement, belonging, and participation for all individuals.

Name
Analyze the role of the organizational or educational leader in establishing and promoting meaningful involvement across communities.

EDUC8143 - GRANT WRITING & ADMINISTRATION

General

Course Prefix
EDUC

Course Number
8143

Description
This course is designed to develop students' abilities to find grant opportunities, write competitive grant applications, administer grants effectively, and evaluate and report the overall impact of grant initiatives.Prerequisite: EDUC 7003

Learning Outcomes

Learning Outcomes

Name
Analyze grant opportunities critically to identify best fit for an organizations needs, capacity, and culture.

Name
Apply best practices for writing grant program objectives, activities, evaluation procedures, opportunities for partnerships, administrative oversight, and budget projections to meet an identified need.

Name
Analyze case studies of grant administration to identify best practices and pitfalls to avoid.

Name
Evaluate grant reports to determine program impacts, capacity building, cost-effectiveness, and implications for further research.

EDUC8153 - PEDAGOGY II: POETICS

General

Course Prefix
EDUC

Course Number
8153

Description
Poesis is the creation or formation of something new. Students are shaped by both knowledge and its synthesis into a cohesive whole. Poetic knowledge is differentiated from praxis, and is related to contemplation and the liberal arts. Ideas and understanding are the goals of poetic teaching and poetic lessons are not assessable via products but must be assessed as to the acquisition of knowledge and wisdom.Note: This course contains regular synchronous meetings.

EDUC8443 - PEDAGOGY OF FORM

General

Course Prefix
EDUC

Course Number
8443

Description
Throughout history, educational forms have come and gone, shaped by the views of the nature of man and his purpose in this world. Researching different models of school structures, schedules, layouts, faculty, etc., students will explore how different forms of schooling have been instantiated and how that ought to shape the contemporary renewal of classical education. Note: This course contains regular synchronous meetings.

EDUC8603 - PEDAGOGY III: DIDACTIC & DIALETIC

General

Course Prefix
EDUC

Course Number
8603

Description
Didactic teaching conveys knowledge clearly; dialectic invites students into truth through guided questioning. Practicing these methods requires both clarity of content and skillful guidance of conversation. Students in this course will read, research, and imitate historical models of both didactic and dialectic education to impart knowledge and cultivate understanding.Note: This course contains regular synchronous meetings.

EDUC8673 - PEDAGOGY I: MIMESIS

General

Course Prefix
EDUC

Course Number
8673

Description
Mimesis, or learning through emulation, involves observation, imitation, and coaching. Practicing mimetic teaching requires presentation of types and student engagement in comparison. Assessment of the skill-based lesson culminates in the students' mastery of the skill. Note: This course contains regular synchronous meetings.

EDUC8813 - ORGANIZATIONAL SYSTEMS & MANAGEMENT

General

Course Prefix
EDUC

Course Number
8813

Description
This course prepares learners to apply behavioral science to the hyper-turbulent environment of the 21st century. Students will be introduced to techniques and methodologies to systematically produce high-performing organizations. The course helps leaders contrast management versus leadership styles of stability in order to minimize management chaos and instability within organizations. Prerequisite: EDUC 7003

Credit Hours

Learning Outcomes

Learning Outcomes

Name
Compare organizational design and development theories and assess their implications.

Name
Analyze ways in which organizational performance is influenced by organizational structure, systems, design, and organizational context.

Name
Evaluate the alignment of an organization's structure by looking at various factors, its mission, goals, processes, size, environment, technology, and stakeholders.

Name
Review theories of organizational change that will help and enhance organizational effectiveness.

Name
Develop an action plan for measuring and enhancing organizational performance within an organization.

EDUC8823 - ORGANIZATIONAL CHANGE & STRATEGIES

General

Course Prefix
EDUC

Course Number
8823

Description
This course prepares learners to apply behavioral science to the hyper-turbulent environment of the 21st century. Students will be introduced to techniques and methodologies to systematically produce high-performing organizations. Learning Outcomes

Learning Outcomes

Name
Analyze and evaluate change theory related to the complexity and dynamics of change in organizations.

Name
Research and construct a comprehensive model of employee behavioral motivation techniques and employee learning.

Name
Investigate variables of change (e.g., technology, social structure, interpersonal relationships, environmental demands, economics, and organizational politics) and their interrelationships that create or impede change.

Name
Evaluate the implications of change from the perspective of the change agent, the receiver, and the initiator.

Name
Diagnose organizational problems and develop comprehensive solutions.

EDUC9000 - COMPREHENSIVE EXAM

General

Course Prefix
EDUC

Course Number
9000

Description
EdD and PhD students must pass the comprehensive exam prior to admission to candidacy and before registering for dissertation credits.

Prerequisite: Successful completion of all EdD or PhD coursework

Credit Hours

Minimum Credit Hours:
0

Maximum Credit Hours:
0

(Credit Hours) Value:

Learning Outcomes

Learning Outcomes

Name
Develop a research proposal in conjunction with the chair of the committee.

Name
Research the proposed topic and write a comprehensive review of related literature.

Name
Ensure protection of human subjects before, during, and after conducting research.

Name
Demonstrate ethical and professional behavior when conducting research.

Name
Collaborate and communicate with the dissertation committee on a regular basis throughout the dissertation process.

Name
Analyze, interpret, and report the results of the research in the dissertation.

Name
Complete the scholarly writing of the dissertation and ensure that all references are appropriately cited and accredited.

Name
Defend the dissertation before the dissertation committee.

Learning Outcomes

Learning Outcomes

Name
Apply consistent critical reflection during the learning and teaching process.

Name
Research and evaluate current social studies programs and philosophies.

Name
Identify and apply various instructionally and culturally diverse methods of integrating social studies into the elementary curriculum.

Name
Collaborate with classroom peers and the educational community to plan positive and meaningful learning experiences for all elementary students.

Name
Utilize supplemental materials within existing social studies curriculum to meet the needs of a variety of learners.

Name
Demonstrate an ability to choose and use effective teaching strategies to accommodate the cultural, linguistic and academic needs of English Language Learners.

ELED3173 - METHODS OF TEACHING ELEM MATH

General

Course Prefix
ELED

Course Number
3173

Description
In this course, emphasis is on teaching mathematics in elementary schools through the use of appropriate methods, materials, and evaluation techniques. Current issues, strategies, and trends in mathematics are reviewed. Integrated field experiences are included.Prerequisite: None

Credit Hours

Minimum Credit Hours:
3

Maximum Credit Hours:

Learning Outcomes

Learning Outcomes

Name
Develop strategies for teaching number ideas for children in PreK-3 classrooms through the use of concrete aids, models, and stories.

Name
Develop strategies for teaching number sense, operation sense, and problem solving using rational numbers.

Name
Develop activities for PreK-3 children to show their understanding of geometric concepts.

Name
Develop skills for using of technology in the classroom.

Name
Design ability-appropriate assessments, including alternate methods of assessment and assessments for children with mathematical difficulties.

Name
Identify effective math strategies for children with special needs such as ELL and ESE students.

Name
Implement strategies that factor cultural differences in the mathematical classroom.

ELED4333 - CLASS & BEH MGMT - ELEM ED

General

Course Prefix
ELED

Course Number
4333

Description
This course is the study of models and strategies of behavior and classroom management appropriate for elementary school students in accordance with human development milestones. The course covers student attributes of behavior, including response to interventions, age-appropriate discipline, intrinsic versus extrinsic motivation, and conflict resolution. The course includes methodology for managing a learning environment utilizing research-based best practices in education. Prerequisite: None

Credit Hours

Minimum Credit Hours:
0

Maximum Credit Hours:

Learning Outcomes

Learning Outcomes

Name
Examine theories and research related to classroom management approaches.

Name
Explain legislation and ethical issues related to managing a learning environment.

Name
Relate safe learning environments to diversity, academics, exceptional needs, linguistic backgrounds, family communication, and human development milestones.

Name
Assess individual functioning levels and pro-social behavior as related to individual and group dynamics of behavior.

Name
Identify strategies for increasing, decreasing, and maintaining behaviors.

Name
Discuss techniques for dealing with crisis situations in a learning environment.

Name
Implement behavioral interventions supporting student behaviors in inclusive settings.

Name
Manage the resources of time, space, and attention in the learning environment.

ELED4423 - METHODS OF TEACHING ELEM SCIENCE

General

Course Prefix
ELED

Course Number
4423

Description
This course is designed to help students master basic science concepts and skills represented in four domains: Science Knowledge, Science Process Skills and Creative Thinking, Attitudes and Values in Science, and Science Applications and Technology. The Florida Next Generation Standards for grades K-6 form the core content for the course. Emphasis is placed on several methods and strategies for instruction, including direct instruction, concept attainment, inquiry method, and project-based instruction. Scientific demonstrations and hands-on activities are included.Prerequisite: None

Credit Hours

Minimum Credit Hours:
3

Maximum Credit Hours:

Learning Outcomes

Learning Outcomes

Name
Identify a variety of ways to access knowledge and information in science education.

Name
Formulate hypotheses when presented with elementary scientific methods and principles.

Name
Demonstrate an understanding of the content knowledge in the science domain.

Name
Design a science experiment to be presented in class.

Name
Demonstrate the ability to teach a science lesson.

Name
Incorporate knowledge of the cultural characteristics of Floridas ELL population to enhance instruction.

ELPT2013 - ELECTRICAL THEORY AND NEC

General

Course Prefix
ELPT

Course Number
2013

Description
In this course, the student will learn how Kirchhoff's Law and Ohm's Law apply to a series of circuits including developing a broad understanding of the most recent version of the NFPA70 National Electrical Codes.

Learning Outcomes

Name
Develop a broad understanding of the 2020 version of NFPA 70, National Electrical Code.

Name
Classify the function and purpose of the National Electrical Code, know the guidelines for best practices of electrical work in residential and commercial settings.

Name
Explain the concepts and components of grounding and bonding, as well as how grounding and bonding work together to help ensure safety and the importance of conforming to the standards outlined in Article 250 of the NFPA 70, National Electrical Code (NEC).

Name
Apply Kirchhoff's Voltage Law, calculate the total resistance of the circuit, and then find the current using Ohm's Law.

Name
Make use of the 2020 version of NFPA 70, National Electrical Code. Specific coverage will include grounded conductors, branch circuits, feeders, overcurrent protection, and overvoltage protection.

Name
Calculate the unknown value using Ohm's Law given two known values, identify components that are wired in series, components that are wired in parallel, identify the relationship between volts, amps, and ohms.

Name
Summarize the most recent changes to the NEC.

ELPT2023 - SAFETY AND ELECTRICAL CONCEPTS

General

Course Prefix
ELPT

Course Number
2023

Description
In this course, the student will gain an understanding of the dangers of working in the electrical field as well as Personal Protective Equipment requirements. The student will learn the purposes and techniques of lockout/tagout.

Credit Hours

Minimum Credit Hours:
3

Maximum Credit Hours:
3

(Credit Hours) Value:
3

Contact Hours (not needed)

(Contact Hours) Value (not needed) :
0

Repeatable:
Yes

Number Of Repeats:
0

Number Of Credits:
3

Learning Outcomes

Learning Outcomes

Name
Evaluate personal protective equipment required based on warning labels and a given work order.

Name
Identify and predict the dangers of electrical work, the effects those dangers have on the body, usage of personal protective equipment, and electrical safety best practices.

Name
Illustrate the purpose of lockout/tagout procedures, employee roles during lockout/tagout, and hazardous energies, specifically primary, secondary, single, and multiple energy sources, emphasizing identifying all energy sources during lockout/tagout procedures.

Name
Distinguish the various sizes and structures of wires as well as code designations.

Name
Identify components of the Electrical Panels and demonstrate safety protocol when working with panels.

Name
Explain the difference between power and energy.

ELPT2103 - TECHNICIAN FUNDAMENTALS I

General

Course Prefix
ELPT

Course Number
2103

Description
In this course, the student will learn how to apply math skills in the field of electrical work as well as explain the use of a voltmeter. The student will begin developing the concepts learned previously into practical skills needed to work in the field as a technician.

Credit Hours

Minimum Credit Hours:
3

Maximum Credit Hours:
3

(Credit Hours) Value:
3

Contact Hours (not needed)

(Contact Hours) Value (not needed) :
0

Repeatable:
Yes

Number Of Repeats:
0

Number Of Credits:
3

Learning Outcomes

Learning Outcomes

Name
Explain how series and parallel circuits can be wired into a combination circuit and the theory that applies to this type of circuit.

Name
Utilize math skills used in the electrical field including transposing formulas and solving equations using Ohms Law and Kirchhoffs Law.

Name
Explain and make use of a voltmeter including the common settings on a multimeter such as voltage, resistance, amperage, diodes, and capacitance.

Name
Identify older hazardous wiring setups and assess the current state of safety conditions.

Name
Illustrate eight fundamental concepts underlying all electrical circuits and calculations: energy, power, voltage, current, resistance, charge, inductance and capacitance.

ELPT2113 - TECHNICIAN FUNDAMENTALS II

General

Course Prefix
ELPT

Course Number
2113

Description
In this course, the student will gain an understanding of electrical related service calls, learn the intricacies of the American Wire Gauge system as well as learn how transformers function. The student will continue developing the concepts learned previously into practical skills needed to work in the field as a technician.

Credit Hours

Minimum Credit Hours:
3

Maximum Credit Hours:
3

(Credit Hours) Value:
3

Contact Hours (not needed)

(Contact Hours) Value (not needed) :
0

Repeatable:
Yes

Number Of Repeats:
0

Number Of Credits:
3

Learning Outcomes

Learning Outcomes

Name
Interpret what one would encounter on electrical-related service calls - receptacles, circuit breakers, and light switches and learn the function and features of the electrical devices, relationships among them, how the devices respond to electrical problems,

Name
Understand what a transformer is and classify the three different types of transformers: isolation, auto, and buck boos.

Name
Examine detailed electrical drawings and install junction boxes, connectors, bent conduit pieces, and straps onto a concrete wall.

Name
Summarize alternating current and AC power, how it behaves and is generated.

Name
Relate understanding of AC waveform and the difference and usage of single-phase and three-phase alternating current.

Name
Illustrate the specific areas for types of wires and where they are acceptable to be installed, and how they should be installed and protected from environmental and physical damage.

Name
Understand the American Wire Gauge system including different types of strands and how to understand code designations to identify the properties of the cable.

ELPT3203 - APPLIED COMPETENCIES I

General

Course Prefix
ELPT

Course Number
3203

Description
In this course, the student will learn how to diagnose problems with electrical equipment and how to mitigate the dangers of an older panel and/or electrical system, demonstrating competency in concepts and skills for field work.

Credit Hours

Minimum Credit Hours:
3

Maximum Credit Hours:
3

(Credit Hours) Value:
3

Contact Hours (not needed)

(Contact Hours) Value (not needed) :
0

Repeatable:
Yes

Number Of Repeats:
0

Number Of Credits:
3

Learning Outcomes

Learning Outcomes

Name
Apply NEC requirements during rough-inspections of a bathroom, bedroom and kitchen areas.

Name
Model full knowledge of common hand and power tools used in the electrical industry, how these tools are used for electrical work, the risks they may present, and the precautions required to safely use the tools of your trade.

Name
Explain the function and purpose of single-pole switches, three-way and four-way switches; as well as the key National Electric Code (NEC) recommendations related to three and four-way switches.

Name
Install a residential generator and put into practice knowledge and concepts learned about power distribution and good safety practices.

Name
Interpret complex electrical drawings including different components, like 3- and 4-way switching, standard and GFCI receptacles, and 2- and 3-wire cabling.

Name
Understand shaded pole motors, split phase motors, and three phase motors as well as permanent split capacitor motor or PSC.

ELPT3213 - APPLIED COMPETENCIES II

General

Course Prefix
ELPT

Course Number
3213

Description
In this course, the student will learn how to diagnose problems with electrical equipment and how to mitigate the dangers of an older panel and/or electrical system, demonstrating competency in concepts and skills for field work.

Credit Hours

Minimum Credit Hours:
3

Maximum Credit Hours:
3

3

Contact Hours (not needed)

(Contact Hours) Value (not needed) :
0

Repeatable:
Yes

Number Of Repeats:
0

Number Of Credits:
3

Learning Outcomes

Learning Outcomes

Name
Describe how to diagnose and correct problems with fluorescent and High Intensity Discharge (HID) lighting and demonstrate troubleshooting electrical equipment in a commercial context.

Name
Apply previously learned concepts in Commercial Fire Alarm Systems; inclusive of safety procedures during installation.

Name
Demonstrate knowledge of the key ampacity tables in the National Electrical Code and how to adjust the values found in the ampacity tables, based on what are called conditions of use like the ambient temperature around a wire or how many wires inside a conduit, how to find the ampacity for any wire, and how to choose which temperature column to use.

Name
Identify and recall specific articles of code from NFPA-70E related to establishing an electrically safe work condition.

Name
Model how to mitigate the dangers of older electrical panels and fuse boxes such as knob and tube and cloth-insulated wiring

ENGL1023 - ENGLISH COMPOSITION I

General

Course Prefix
ENGL

Course Number
1023

Description
This course examines the history and philosophy of Great Books education using essays from prominent scholars as well as a curated anthology of primary source material from the Western Tradition. Students will develop skills in analytical reading while learning to craft descriptive, evaluative, and personal reflective essays. This course is equivalent to ENGL 1133.

Credit Hours

Minimum Credit Hours:
3

Maximum Credit Hours:
3

(Credit Hours) Value:
3

Contact Hours (not needed)

(Contact Hours) Value (not needed) :
0

Repeatable:
Yes

Number Of Repeats:

Learning Outcomes

Learning Outcomes

Name
Examine the scope and evaluate the importance of the Western canon.

Name
Analyze primary source material and articulate a general understanding of the interdisciplinary nature of the Western canon.

Name
Apply the appropriate criteria for descriptive, evaluative, and personal reflective essay construction and gain an understanding of the fundamentals of writing methodology.

Name
Understand the mechanical and practical essentials of college-level research and writing.

ENGL1113 - COLLEGE COMPOSITION

General

Course Prefix
ENGL

Course Number
1113

Description
This course covers the key skills and practices required for effective written communication at the college level. Students will build research and writing skills necessary to engage with critical issues, develop well-grounded arguments, and prepare students for future academic success.

Credit Hours

Minimum Credit Hours:
1

Maximum Credit Hours:
3

(Credit Hours) Value:
3

Contact Hours (not needed)

(Contact Hours) Value (not needed) :
0

Repeatable:
Yes

Number Of Repeats:

Learning Outcomes

Learning Outcomes

Objective
Control such surface features as syntax, grammar, punctuation, and spelling.

Name
Respond to various rhetorical situations.

Name
Demonstrate competency in library research.

Name
Construct texts that incorporate critical reading, analyzing, and interaction with sources.

Name
Show fluency within the various stages of the writing process.

Name
Control such surface features as syntax, grammar, punctuation, and spelling.

ENGL1123 - ENGLISH COMPOSITION II

General

Course Prefix
ENGL

Course Number
1123

Description
This course builds upon the foundation developed in English Composition 1. Students will further develop their ability to read deeply and ask probing questions of a text while learning to compose expository and persuasive essays. This course is equivalent to ENGL 1233.

Credit Hours

Minimum Credit Hours:
3

Maximum Credit Hours:
3

(Credit Hours) Value:
3

Contact Hours (not needed)

(Contact Hours) Value (not needed) :
0

Repeatable:
No

Number Of Repeats:

Learning Outcomes

Learning Outcomes

Name
Examine the scope and evaluate the importance of the Western canon.

Name
Analyze primary source material and articulate a general understanding of the living Western tradition.

Name
Apply the appropriate criteria for expository and persuasive essay construction and learn to navigate common challenges in academic research and writing methodology.

Name
Develop the ability to discern, evaluate, and discuss the ideas presented in key humane texts of the past century.

ENGL1133 - ENGLISH COMPOSITION I

General

Course Prefix
ENGL

Course Number
1133

Description
Study and practice in the critical reading and effective writing of expository prose, with an emphasis on fluency and style.

Credit Hours

Minimum Credit Hours:
3

Maximum Credit Hours:
3

(Credit Hours) Value:
3

Contact Hours (not needed)

ENGL1223 - ENGLISH COMPOSITION I

General

Course Prefix
ENGL

Course Number
1223

Description
This course is a study of effective writing processes and devices to improve the quality of composition, with an emphasis on developing solid structural models and skillful use of stylistic techniques. This course is equivalent to ENGL 1133.

Credit Hours

Minimum Credit Hours:
3

Maximum Credit Hours:
3

(Credit Hours) Value:
3

Contact Hours (not needed)

(Contact Hours) Value (not needed) :
0

Repeatable:
No

Number Of Repeats:
3

Number Of Credits:
3

Learning Outcomes

Learning Outcomes

Name
Effectively use source texts, structural models, and stylistic techniques to complete writing assignments;

Name
Demonstrate prewriting, drafting, revision, and editing on each essay assignment;

Name
Implement correct grammatical and mechanical usage in writing assignments; and

Name
Utilize analysis and critical thinking skills.

ENGL1233 - ENGLISH COMPOSITION II

General

Course Prefix
ENGL

Course Number
1233

Description
This course includes study and practice in the critical reading and effective writing of argumentative and expository prose, with an emphasis on the documented paper. A research paper is required.

Credit Hours

Minimum Credit Hours:
0

Maximum Credit Hours:
4

(Credit Hours) Value:
3

Contact Hours (not needed)

(Contact Hours) Value (not needed) :
3

Repeatable:
Yes

Number Of Repeats:
3

Number Of Credits:
3

Learning Outcomes

Learning Outcomes

Objective
Exhibit increased confidence and a positive attitude toward the writing process and toward themselves as writers.

Name
Demonstrate skill in various forms of nonfiction composition: argument, exposition, essay exam, and narration and description.

Name
Analyze and evaluate the content, structure, and style of the writing of published authors, including scholarly prose.

Name
Increasingly engage in critical and creative thinking and apply these skills in writing and reading.

Name
Conduct research leading to the discovery of reliable and reputable primary and secondary source materials.

Name
Blend research, interpretation, and opinion via the composition process.

Name
Understand effective structure and development of a research paper, including proper citation and documentation of sources.

Name
Advantageously use current computer technology, database, and online technology in the research process.

Name
Use current computer technology to properly format and document papers according to MLA style.

Name
Exhibit increased confidence and a positive attitude toward the writing process and toward themselves as writers.

ENGL1243 - GREAT BOOKS I (ANCIENT)

General

Course Prefix
ENGL

Course Number
1243

Description
An introduction to the epic genre through a close reading of the first great epic texts of Western civilization: Homer's Iliad and Odyssey and Virgil's Aeneid. The themes considered in the study of ancient epic include the hero and his vocation, honor and the virtues, the relation of man to the gods, the meaning of time, Christian typology in pagan literature, and the importance and meaning of myth. This course also serves as an introduction to the study of literature and to the basic principles of literary criticism.

Credit Hours

Minimum Credit Hours:
3

Maximum Credit Hours:
3

(Credit Hours) Value:
3

Contact Hours (not needed)

(Contact Hours) Value (not needed) :
0

Repeatable:
Yes

Number Of Repeats:
3

Number Of Credits:
3

Learning Outcomes

Learning Outcomes

Name
Obtain a basic understanding of the contemplation of images and of the literary work of art as a unity.

Name
Contemplate the major metaphors and patterns of the epic genre as they are embodied in the three works studied.

Name
Identify and contemplate the epic movement of spirit.

Name
Contemplate the truths about reality and human existence which are embodied in Homer and Virgil as part of the epic pattern.

Name
Become familiar with the gods, goddesses, men, and women of Greek and Roman mythology.

Name
Become familiar with the mythic foundations of Greek and Roman culture.

Name
Improve writing and oral communication skills, particularly in regard to the practice of literary criticism.

ENGL1253 - GREAT BOOKS II (MEDIEVAL)

General

Course Prefix
ENGL

Course Number
1253

Description
An introduction to the literature of the Medieval era, focusing on close readings of authors such as Dante, Chaucer, Kempe, Monmouth, Aquinas, Duns, Bede, and others. This course serves as an introduction to the study of medieval literature and to the basic principles of philosophical and literary inquiry.

Credit Hours

Minimum Credit Hours:
3

Maximum Credit Hours:
3

(Credit Hours) Value:
3

Contact Hours (not needed)

Number Of Credits:
3

Learning Outcomes

Learning Outcomes

Name
Obtain a basic understanding of the contemplation of medieval imagination.

Name
Contemplate the major metaphors and patterns of medieval literature as they are embodied in the works studied.

Name
Contemplate the truths about reality and human existence which are embodied in medieval authors.

ENGL1323 - ENGLISH COMPOSITION II

General

Course Prefix
ENGL

Course Number
1323

Description
This course develops intermediate skills in writing the major types of composition such as description, narration, example, analysis, definition, classification, comparison/contrast, and cause/effect. Students will practice techniques in advanced structure, syntax, and style. This course is equivalent to ENGL 1233.

Credit Hours

Minimum Credit Hours:
3

Maximum Credit Hours:
3

(Credit Hours) Value:
3

Contact Hours (not needed)

(Contact Hours) Value (not needed) :
0

Repeatable:
No

Number Of Repeats:
3

Number Of Credits:
3

Learning Outcomes

Learning Outcomes

Name
Compose advanced essays in a variety of styles, using thesis statements and evidence.

Name
Discover and evaluate information from a variety of sources, and then apply those sources to their original written work.

Name
Engage multiple perspectives on a single topic.

Name
Write in a structure and style that is pleasing, clear, and well.

Name
Compose papers free from plagiarism, using proper in text citation and works cited formatting.

ENGL2073 - WESTERN LITERATURE II

General

Course Prefix
ENGL

Course Number
2073

Description
This course is designed to introduce students to the literature, poetry and drama of the Medieval and Renaissance periods. Students are required to read, analyze and discuss period literature, write creative essays and give oral presentations, all of which will be integrated with studies in Bible and History.

Credit Hours

Minimum Credit Hours:
3

Maximum Credit Hours:
3

(Credit Hours) Value:
3

Contact Hours (not needed)

(Contact Hours) Value (not needed) :
3

Repeatable:
Yes

Number Of Repeats:
3

Number Of Credits:
3

Learning Outcomes

Learning Outcomes

Name
To analyze the elements of good writing and emulate them.

Name
To gain an understanding of the Middle Ages as the era of romance, fairy tales, tales of high adventure and courtly love.

Name
To recognize Medieval and Renaissance literature as a genre, noting stylistic devices employed as well as historical and cultural traditions displayed in the literature.

Name
To understand the biographical, historical and cultural context of each work.

Name
To engage with and respond to literary texts personally and creatively.

Name
To think, write and speak about literary texts critically and effectively.

Name
To evaluate all that is read in the light of Scripture.

ENGL2113 - PROFESSIONAL COMMUNICATION

General

Course Prefix
ENGL

Course Number
2113

Description
Professional communication introduces students to communication found in real-world settings with an emphasis on clarity, organization, format, language, and audience, for both written and oral assignments.

Credit Hours

Minimum Credit Hours:
3

Maximum Credit Hours:
3

(Credit Hours) Value:
3

Contact Hours (not needed)

(Contact Hours) Value (not needed) :
0

Repeatable:
Yes

Number Of Repeats:
0

Number Of Credits:
3

Learning Outcomes

Learning Outcomes

Objective
Apply research skills in crafting effective arguments.

Name
Analyze texts to gain a better understanding of the art of communication.

Name
Utilize written and oral communication techniques to engage, inform, and persuade modern audiences.

Name
Understand the value of verbal and non-verbal communication and audience feedback.

Name
Demonstrate awareness of professional behavior and communication in real-world settings.

Name
Apply research skills in crafting effective arguments.

ENGL2123 - INTRODUCTION TO CREATIVE WRITING

General

Course Prefix
ENGL

Course Number
2123

Description
An introductory course in creative writing with a focus on exploring the basics of narrative, poetry, and drama. Through engaging exercises, collaborative activities, and constructive feedback, students will begin to develop their voices as creative writers, discover new ideas, and learn to share their work in a supportive environment. The course emphasizes exploration, creativity, and growth over technical mastery. Prerequisite: None

Credit Hours

Minimum Credit Hours:
3

Maximum Credit Hours:
3

(Credit Hours) Value:
3

Contact Hours (not needed)

(Contact Hours) Value (not needed) :
0

Repeatable:
Yes

Number Of Repeats:
3

Number Of Credits:
3

Learning Outcomes

Learning Outcomes

Objective
Develop a positive attitude toward creative writing and explore their potential as writers.

Objective
Demonstrate understanding of the creative process through writing exercises, group activities, and feedback.

Objective
Generate ideas and express them through short writing projects.

Objective
Identify basic concepts and techniques in poetry, fiction, and drama.

Objective
Demonstrate how to prepare and submit a piece of writing for publication, though no submissions are required.

ENGL2133 - INTRODUCTION TO LITERATURE

General

Course Prefix
ENGL

Course Number
2133

Description
A course to introduce in-depth study of the poetry, fiction, and drama of American, English, and world literature.

Credit Hours

Minimum Credit Hours:
0

Maximum Credit Hours:
3

(Credit Hours) Value:
3

Contact Hours (not needed)

(Contact Hours) Value (not needed) :
3

Repeatable:
Yes

Number Of Repeats:
3

Number Of Credits:
3

Learning Outcomes

Learning Outcomes

Objective
Think, write, and speak about literary texts critically and effectively.

Name
Understand the general nature, purposes, and techniques of literature with a sense of its relationship to life and culture.

Name
Recognize a representative selection of literary works by major writers (including notable stylistic devices and features) representing a diversity of prominent historical and cultural traditions and issues.

Name
Understand the biographical, historical, and cultural contexts of a representative selection of works by major writers.

Name
Identify the relationships among the literary works studied and the philosophical/religious and political/social/economic milieus of the cultures and subcultures within and among which they were written.

Name
Engage and respond to literary texts personally and creatively.

Name
Think, write, and speak about literary texts critically and effectively.

ENGL2173 - INTRODUCTION TO DRAMA

General

Course Prefix
ENGL

Course Number
2173

Description
This course introduces the study of drama, exploring the evolution of theater from classical to contemporary works. Students analyze dramatic literature, characterization, and plot structure while examining the collaborative process of staging plays. The course fosters critical thinking about theater's cultural, social, and aesthetic roles, including attendance at live performances.

Credit Hours

Minimum Credit Hours:
3

Maximum Credit Hours:
3

(Credit Hours) Value:
3

Contact Hours (not needed)

(Contact Hours) Value (not needed) :
0

Repeatable:
Yes

Number Of Repeats:

Number Of Credits:
3

Learning Outcomes

Learning Outcomes

Name
Analyze Dramatic Evolution and Form

Name
Deconstruct Narrative and Performance Mechanics

Name
Critique Drama’s Socio-Cultural Impact

ENGL2243 - GREAT BOOKS III (REN-EARLY MODERN)

General

Course Prefix
ENGL

Course Number
2243

Description
An introduction to the literature of the Renaissance to Early Modern era, focusing on close readings of authors such as Shakespeare, Machiavelli, Donne, Milton, and others. This course serves as an introduction to the study of Renaissance and Early Modern literature and to the basic principles of philosophical and literary inquiry.

Credit Hours

Minimum Credit Hours:
3

Maximum Credit Hours:

Number Of Repeats:
3

Number Of Credits:
3

Learning Outcomes

Learning Outcomes

Name
Obtain a basic understanding of the contemplation of the Renaissance imagination.

Name
Contemplate the major metaphors and patterns of Renaissance and Early Modern literature as they are embodied in the works studied.

Name
Contemplate the truths about reality and human existence which are embodied in Renaissance authors.

Name
Articulate the foundational worldview of Renaissance and Early Modern literature and its successes and failures.

ENGL2253 - GREAT BOOKS IV (MODERN)

General

Course Prefix
ENGL

Course Number
2253

Description
An introduction to Modern literature, focusing on close readings of authors such as Hobbs, Bacon, Descartes, Spinoza, Locke, Voltaire, Hume, Rousseau, Kante, Goethe, Hegel, Mill, Marx, and others. This course serves as an introduction to the study of Modernism and to the basic principles of philosophical and literary inquiry.

Learning Outcomes

Name
Obtain a basic understanding of the contemplation of the Modernist imagination.

Name
Contemplate the major metaphors and patterns of Modern literature as they are embodied in the works studied.

Name
Contemplate the truths about reality and human existence which are embodied in Modern authors.

Name
Articulate the foundational worldview of Modern literature and its successes and failures.

ENGL2303 - GREEK AND ROMAN LITERATURE

General

Course Prefix
ENGL

Course Number
2303

Description
Examination of Hesiod’s Theogony, Homer’s Iliad, and other masterworks of Greek and Roman literature. Origins, genealogies, and mythologies of Greek gods are charted and examined in relation to literature and culture of the period. Students will focus on the foundations of Western civilization in relation to human virtue, leadership, and worldview.

ENGL2503 - LITERARY AND CULTURAL STUDIES

General

Course Prefix
ENGL

Course Number
2503

Description
This course introduces students to literary and cultural studies, particularly to the discipline specific ways of reading and writing about literary cultural texts that are expected of English and English and Intercultural Studies majors. Students will write interpretively about literary cultural texts while drawing on close textual analysis, cultural contexts, theoretical frameworks, scholarly criticism, and personal faith. Students will also become oriented to the English or English and Intercultural Studies major through an overview of the goals of these programs.

Credit Hours

Minimum Credit Hours:
3

Learning Outcomes

Learning Outcomes

Objective
Understand and reflect on the goals and organization of the English or English and Intercultural Studies program.

Name
Write interpretively about literary cultural texts through close textual analysis.

Name
Consider cultural contexts, theoretical frameworks, and scholarly criticism in the interpretive process.

Name
Practice and reflect on the integration of personal faith with disciplinary reading and writing processes.

Name
Understand and reflect on the goals and organization of the English or English and Intercultural Studies program.

ENGL2513 - BRITISH LITERATURE I

General

Course Prefix
ENGL

Course Number
2513

Description
This course introduces students to British literature from Old English through the Neo-classical period.

Credit Hours

Minimum Credit Hours:
0

Maximum Credit Hours:
3

Learning Outcomes

Learning Outcomes

Objective
Reflect on the integration of faith and the study of British literature.

Name
Demonstrate knowledge of works and features of British literature from Old English through the Neo-classical period.

Name
Write interpretively about British literary texts through close textual analysis.

Name
Understand relevant cultural contexts and critical frameworks.

Name
Reflect on the integration of faith and the study of British literature.

ENGL2523 - BRITISH LITERATURE II

General

Course Prefix
ENGL

Course Number
2523

Description
This course introduces students to British literature from Romanticism through the Contemporary period.

Credit Hours

Minimum Credit Hours:
1

Learning Outcomes

Learning Outcomes

Objective
Reflect on the integration of faith and the study of British literature.

Name
Demonstrate knowledge of works and features of British literature from Romanticism through the Contemporary period.

Name
Write interpretively about British literary texts through close textual analysis.

Name
Understand relevant cultural contexts and critical frameworks.

Name
Reflect on the integration of faith and the study of British literature.

ENGL2553 - JOURNAL EDITING

General

Course Prefix
ENGL

Course Number
2553

Description
This course focuses on the study and practice of editing various stages of expository, interpretive and argumentative texts from cross-disciplines. Students enrolling join the Oracle staff to support managing editors in the English Capstone Seminar. Through their editing efforts, Journal Editing students support the publication of Oracle in the spring semester of each year and perform writing tasks related to communications with faculty and student authors.

Credit Hours

Minimum Credit Hours:
1

Maximum Credit Hours:
4

(Credit Hours) Value:
3

Contact Hours (not needed)

(Contact Hours) Value (not needed) :
3

Repeatable:
Yes

Number Of Repeats:
6

Number Of Credits:
6

Learning Outcomes

Learning Outcomes

Objective
Reflect on their editorial practice and growth, critically analyzing their own editing choices and considering how they can continually improve their skills and contribute to the field of journal editing.

Name
Analyze the structural elements of expository, interpretive, and argumentative texts from various disciplines, identifying patterns and organizing principles that contribute to effective communication.

Name
Evaluate editorial choices, including grammar, style, and formatting, to enhance the clarity, coherence, and overall quality of written content in preparation for publication.

Name
Apply a range of editing techniques to revise and refine texts, demonstrating proficiency in proofreading, copyediting, and substantive editing to meet the standards of professional publications.

Name
Collaborate effectively within editorial teams, working alongside managing editors and peers to coordinate the publication process, provide constructive feedback, and ensure the editorial integrity of the journal.

Name
Engage in professional communication with faculty and student authors, demonstrating effective written and verbal skills in conveying editorial suggestions, addressing queries, and fostering positive author-editor relationships.

Name
Contribute to the successful publication of the Oracle journal in the spring semester, demonstrating their ability to manage timelines, oversee the editing process, and ensure the journal's readiness for distribution.

Name
Reflect on their editorial practice and growth, critically analyzing their own editing choices and considering how they can continually improve their skills and contribute to the field of journal editing.

ENGL3003 - HUMANE LETTERS IV

General

Course Prefix
ENGL

Course Number
3003

Description
This course aims to cultivate the minds and hearts of students into more humane individuals; that is, more intellectually, morally, and aesthetically alive humans by directing them in the pursuit of Truth, Goodness, and Beauty through Socratic investigation of the great works of Western literature, history, and philosophy. While training students in the art of reading, listening, speaking, and writing, this course also looks at history as taught through the chronology of the texts. It is important to keep in mind, however, that even though the course spans from Rome to modernity and is particularly concerned with developing the idea of “the West”, it is not a “Western Civ” class. Rather, it is a course centered around the seminar, and concerned with the art of thinking well.

Objective
Analyze multiple readings of the author's work through oral and written interpretation.

Name
Recognize the classifications and genres of the authors writings.

Name
Read the authors works thoughtfully, critically, and creatively.

Name
Relate the authors works to his or her time and to the present.

Name
Communicate significant ideas expressed by the author.

Name
Analyze multiple readings of the authors work through oral and written interpretation.

ENGL3243 - AMERICAN MASTERS

General

Course Prefix
ENGL

Course Number
3243

Description
Like all great writers, the authors studied in this course address the universal human condition—the “eternal verities” and “the human heart in conflict with itself,” as Faulkner wrote. Additionally, however, twentieth century American writers reflect an insight into a vanishing culture which was the American culmination of Western European civilization, reaffirming the thesis that the ethos of a culture is best seen when that culture is in decline. Authors highlighted in this course include William Faulkner, examining the scope of his vision as it moved from tragic to comic; instructors may also select texts chosen from the work of Eudora Welty, Flannery O’Connor, Robert Penn Warren, Caroline Gordon, and the Fugitive poets/ critics.

Learning Outcomes

Learning Outcomes

Name
Obtain a basic understanding of the contemplation of the American imagination.

Name
Contemplate the major metaphors and patterns of American literature as they are embodied in the works studied.

Name
Contemplate the truths about reality and human existence which are embodied in American authors.

Name
Articulate the foundational worldview of American literature and its successes and failures.

ENGL3253 - LYRIC POETRY

General

Course Prefix
ENGL

Course Number
3253

Description
The lyric genre embodies themes of vision, knowledge, love, and wholeness, exploring man's memory and intuitions of an unfallen world. Thus, study of the lyric genre includes the themes of poetic intuition, love between man and woman, and love between the soul and God. This course considers the patterns of the lyric genre from its roots in Genesis, the Song of Solomon, and the Psalms and proceeds through English and American poetry to the twentieth century, with particular emphasis upon seventeenth- and early nineteenth-century British poetry. Additional texts—short stories, novels—that embody the pattern of the lyric genre may also be studied.

Learning Outcomes

Learning Outcomes

Objective
Synthesize knowledge of topics studied with a Christ-centered worldview.

Name
Appreciate the continuity and diversity present in a body of texts or discursive practices that share a given formal structure, origin, or linguistic or topical focus.

Name
Comprehend the artistic and/or structural dimensions of course content.

Name
Communicate the social and political dimensions of course content.

Name
Relate literary, critical and methodological works of varied cultural contexts to their present cultural context.

Name
Interpret cogently course content orally and in writing.

Name
Synthesize knowledge of topics studied with a Christ-centered worldview.

ENGL4823 - CAPSTONE SEMINAR

General

Course Prefix
ENGL

Course Number
4823

Description
The Capstone Seminar for the BFA guides graduating students in a formal reflection on their writing and professional support documents. The Capstone asks students to self-assess their cumulative learning in their major courses in terms of disciplinary knowledge, Creative Writing skills, and faith integration. Students will produce a portfolio of their creative work, editors' responses of work submitted, a curriculum vitae and/or resume, and a career plan.

Learning Outcomes

Learning Outcomes

Objective
Identify the effective practices of the writing life.

Name
Select, reflect on, and present a body of original creative work.

Name
Demonstrate the procedures for publishing creative writing in multiple genres.

Name
Reflect in written form on faith integration as a writer.

Name
Identify the effective practices of the writing life.

ENGL4833 - CAPSTONE SEMINAR

General

Course Prefix
ENGL

Course Number
4833

Description
This capstone course offers graduating students in the B.A. in English program an opportunity to review and assess their cumulative learning in their major courses in terms of disciplinary knowledge, critical writing skills, and faith integration.Prerequisite: None

Credit Hours

Minimum Credit Hours:
0

Maximum Credit Hours:
4

Learning Outcomes

Learning Outcomes

Objective
Publish online a collection of their best works introduced by letter and chronicled professionally (CV/Resume).

Name
Demonstrate literary interpretive research methods and writing process through a written discourse.

Name
Deliver interpretive research and writing verbally and through question and answer in a public forum.

Name
Revise their own literary critical and creative texts that best portray their abilities and career goals.

Name
Reflect in written form on their faith and learning during their time at university.

Name
Publish online a collection of their best works introduced by letter and chronicled professionally (CV/Resume).

ENGL5013 - CLASSICAL RHETORIC

General

Course Prefix
ENGL

Course Number
5013

Description
This course is an introduction to classical rhetoric and covers classical rhetoric through Augustine, including the Sophists, Plato, Aristotle, the Romans, and Augustine. Emphasis on teaching writing with theory and praxis informed by the classical rhetoricians.

Credit Hours

Minimum Credit Hours:
3

Maximum Credit Hours:
3

(Credit Hours) Value:

Learning Outcomes

Learning Outcomes

Name
Explore the epic in relation to the Christian faith.

Name
Demonstrate competence in scholarly analysis of the epic.

Name
Analyze methods for teaching epic literature classically.

ENGL5073 - RHETORIC THESIS/CAPSTONE PROJECT

General

Course Prefix
ENGL

Course Number
5073

Description
This is a capstone course designed for students to pursue research in the field of rhetoric. Students propose, initiate, and defend the thesis or project under the supervision of a faculty mentor.

Credit Hours

Minimum Credit Hours:
3

Maximum Credit Hours:
3

(Credit Hours) Value:
3

Contact Hours (not needed)

(Contact Hours) Value (not needed) :

Number Of Repeats:
3

Number Of Credits:
3

Learning Outcomes

Learning Outcomes

Name
Demonstrate appropriate and effective research strategies in the field.

Name
Propose a thesis or capstone project plan.

Name
Complete an annotated bibliography of sources.

Name
Defend the thesis or capstone project and revise to meet graduate level research requirements.

ENGL5083 - DRAMA

General

Course Prefix
ENGL

Course Number
5083

Description
This course offers an exploration and analysis of essential great works of drama and their role in a classical Christian education.

Credit Hours

Minimum Credit Hours:
3

Maximum Credit Hours:
3

3

Learning Outcomes

Learning Outcomes

Name
Identify and become familiar with drama in the classical canon.

Name
Define methods for teaching drama classically.

Name
Demonstrate competence in scholarly literary analysis of drama.

ESED3111 - CLINICAL EXPERIENCE I

General

Course Prefix
ESED

Course Number
3111

Description
In this course, students will be placed in a K-12 setting in area schools to complete tasks that are directly tied to the Florida Educator Accomplished Practices (FEAPs). This experience is designed to allow students multiple opportunities to observe the K-12 setting (approximately 30 hours) and participate in low-level classroom tasks. The College of Education will work cooperatively with area schools to place students in classrooms according to the students' major/grade level preference. As part of the course requirements, students must pass the General Knowledge Test (GKT) and provide documentation to the College of Education before the end of the course.Prerequisite: None

Credit Hours

Learning Outcomes

Learning Outcomes

Name
Reflect upon classroom observations related to the Florida Educator Accomplished Practices for pre-service teachers.

Name
Analyze the practices of current classroom teachers in the K-12 setting.

Name
Identify professional responsibilities of teachers in the K-12 setting.

Name
Identify how K-12 school-based faculty and staff contribute to the operations of a school.

Name
Describe organizational structure of schools in relation to district, state, and federal educational bodies.

Name
Explain local, state, and federal legislation in relation to school-based operations.

ESED3113 - SURVEY OF THE EXCEP LEARNER

General

Course Prefix
ESED

Course Number
3113

Description
This is a required course for certification in all Education programs, including Music Education. This is an introductory course that examines the history, characteristics, and issues in exceptional education. The course covers all areas of exceptionality and their manifestations from early childhood through adulthood. It is designed to provide students with a firm grounding in the foundations of special education and expose them to the reconstruction of the field, in order that they may better deal with new and ever-changing developments. In addition to classroom meetings, a minimum of 10 hours of observation/participation in a clinical setting is required. Prerequisite: None

Credit Hours

Learning Outcomes

Learning Outcomes

Name
Trace the history of special education identifying how key litigation, advocacy, and legislation have impacted perceptions regarding exceptionality.

Name
Demonstrate a working understanding of the nature and impact of various special education classifications systems and models that have and can be used to address identification, intervention, planning, and approaches to service delivery.

Name
Analyze the IEP process from multiple perspectives that include the parent, students, and special education teacher, highlighting potential ethical issues.

Name
Explain the major rights of students with disabilities and their families and describe the origins of these rights.

Name
Identify methods teachers can use to promote successful inclusion of students with special needs in regular classrooms.

Name
Evaluate the contributions of technological innovations for bringing about important changes in the independent living skills and employability skills of individuals with disabilities.

Name
Demonstrate knowledge and skills in collaborating and consulting with teachers and other professionals in the delivery of Special Education services.

Name
Demonstrate knowledge and skills in involving families of children with disabilities in the delivery of special education services.

ESED3143 - INTRO TO LANG DEV & COMM DISORDERS

General

Course Prefix
ESED

Course Number
3143

Description
This course addresses language development, including identification and remediation of communication and language disorders. There is an emphasis on the impact of speech and language disorders on academic success and achievement. Further, students will be presented with an overview of alternative/ augmentative modes of communication and development of curriculum in these areas.Prerequisites: None

Credit Hours

Minimum Credit Hours:

Learning Outcomes

Learning Outcomes

Name
Synthesize etiology and diagnosis with various theoretical approaches to language development.

Name
Describe the neuroanatomical and neurophysiological aspects of language ability and understand the effects on the five domains of language development.

Name
Distinguish the characteristics of language development in infancy, toddlerhood, preschool, school-age years, and beyond.

Name
Compare and contrast the characteristics of ones own culture and use of language and the ways in which these can differ from other cultures and uses of languages.

Name
Identify and define various types of language disorders, assessments, and treatments.

Name
Evaluate various augmentative communication devices and assistive technology and apply those to a case scenario of a child.

Name
Select, design, and use materials and resources required to educate individuals whose disabilities interfere with communication.

ESED3211 - CLINICAL EXPERIENCE II

General

Course Prefix
ESED

Course Number
3211

Description
In this course, students will be placed in a K-12 setting in area schools to complete tasks that are directly tied to the Florida Educator Accomplished Practices (FEAPs). This experience is designed to allow students multiple opportunities to observe the K-12 setting (approximately 45 hours) and participate in classroom tasks. The College of Education will work cooperatively with area schools to place students in classrooms according to the students' major/grade level preference. As part of the course requirements, students must pass the Professional Education Test (PEd) and provide documentation to the College of Education before the end of the course.Prerequisite: None

Name
Analyze classroom observations related to the Florida Educators Accomplished Practices for teachers.

Name
Evaluate the practices of current classroom teachers in the K-12 setting.

Name
Demonstrate specific professional responsibilities of teachers in the K-12 setting.

Name
Collaborate with K-12 school-based faculty and staff to contribute to the operations of a school.

Name
Develop communiqu with families of K-12 students according to the assigned classroom.

Name
Analyze how local, state, and federal ESOL policies are carried out in school-based operations.

ESED4411 - CLINICAL EXPERIENCE IV

General

Course Prefix
ESED

Course Number
4411

Description
This course will allow students to be placed in an ESE Center School within Polk County Public Schools to complete tasks that are directly tied to the Florida Educator Accomplished Practices (FEAPs). This course is designed to allow students multiple opportunities to observe at the Center School (60 hours) and participate in classroom tasks with students who have low-incidence disabilities, including Severe and Multiple Disabilities and Autism Spectrum Disorders. As part of the course requirements, students must pass the Elementary Education Subject Area Exam (SAE) and a middle grades SAE of their choice (Math, Science, English, or Social Science) and provide documentation to the College of Education before the end of the course. Explain local, state, and federal legislation in relation to school-based operations.

ESED4533 - CLASS & BEH MGMT - ESE

General

Course Prefix
ESED

Course Number
4533

Description
This course is the study of models and strategies of behavior management appropriate for students with varying ability levels, in addition to students in traditional classrooms, in accordance with human development milestones. The course covers student attributes of behavior, including response to interventions, age-appropriate discipline, intrinsic versus extrinsic motivation, conflict resolution, culture, and demographics. The course includes methodology for managing a learning environment utilizing research-based best practices in education. Prerequisite: None

Credit Hours

Learning Outcomes

Learning Outcomes

Name
Examine theories and research related to classroom management approaches.

Name
Explain legislation and ethical issues related to managing a learning environment.

Name
Relate safe learning environments to diversity, academics, exceptional needs, linguistic backgrounds, family communication, and human development milestones.

Name
Assess individual functioning levels and pro-social behavior as related to individual and group dynamics of behavior.

Name
Identify strategies for increasing, decreasing, and maintaining behaviors.

Name
Discuss techniques for dealing with crisis situations in a learning environment.

Name
Implement behavioral interventions supporting student behaviors in inclusive settings.

Name
Manage the resources of time, space, and attention in the learning environment.

ESED5313 - FOUNDATIONS OF ESE

General

Course Prefix
ESED

Course Number
5313

Description
This course is a survey of learner exceptionalities, with particular emphasis on educational legislation and the field of Exceptional Student Education (ESE) in the K-12 setting. This course focuses on the foundations of special education and exposes students to the continuous improvement of the field.Prerequisite: None

Credit Hours

Learning Outcomes

Learning Outcomes

Name
Examine theories that explain human development with emphasis on the contrast between typical and atypical human development.

Name
Analyze typical and atypical developmental behaviors and stages of children.

Name
Evaluate K-12 educational practices for effectiveness and identify strategies that establish a positive and productive learning environment for students with exceptional needs.

Name
Identify family patterns, cultural values, and environmental circumstances that affect the development stages of diverse K-12 students.

Name
Understand the effects of varying exceptionalities on the educational growth of the individual.

Name
Examine and describe ESE program policies including identification, placement, monitoring, and assessment of exceptional students, program evaluation, funding, and current state and federal legislation for ESE.

Name
Identify and collect ESE resources. Demonstrate knowledge of the Council for Exceptional Children (CEC) standards and the National Board for Teaching Exceptional Needs standards.

Name
Identify the purpose of an Individualized Education Plan (IEP) and learn how to contribute to the IEP process.

ESED5511 - ESE GRADUATE PRACTICUM

General

Course Prefix
ESED

Course Number
5511

Description
This course encapsulates and synthesizes the clinical experiences for the Exceptional Students Education populations, including learning disabilities, intellectual disabilities, emotional/behavior disabilities, autism, transition planning in ESE as well as assessment of ESE students for identification. Candidates will be assigned a highly-qualified, certified, and clinical education-trained teacher in the K-12 setting. Prerequisites: Graduate status

Credit Hours

Minimum Credit Hours:
0

Maximum Credit Hours:

Learning Outcomes

Learning Outcomes

Name
Create and compare Individualized Educational Plans (IEPs) for specific students within the ESE population-specific parameters.

Name
Plan individual and group instruction based on observations of individual learning needs of population-specific students at the cognitive, social, linguistic and physical levels.

Name
Create and analyze Individualized Transition Plans for ESE students beyond high school.

Name
Describe the protocol for Gifted Education in public schools for identification, programming, teacher qualifications, and student tracking throughout the students educational career.

Name
Present a Behavior Intervention Plan (BIP) for a student identified with behavioral and/or emotional disability.

ESED5533 - GIFTED EDUCATION

General

Course Prefix
ESED

Course Number
5533

Description
This course provides knowledge about students who are gifted in an educational setting. The course presents the characteristics of students who are gifted, including their emotional, academic, and social needs. An emphasis is placed on students with giftedness and special needs. The theories and practices of differentiating instruction for students who are gifted in heterogeneous and homogeneous groups will be analyzed.Prerequisites: Graduate status

Credit Hours

Learning Outcomes

Learning Outcomes

Name
Outline the history of gifted education and current research and practices.

Name
Distinguish the nature and needs of gifted students cognitively, socially, and emotionally.

Name
Develop curriculum and instructional strategies for teaching gifted students.

Name
Explain the guidance and counseling of gifted students to include motivation, self-image, interpersonal skills, and career options.

Name
Evaluate the education of special populations of gifted students, including student characteristics and programmatic adaptations.

Name
Describe the theory and development of creativity, including elements of fluency, flexibility, originality, and elaboration.

ESED5613 - ASSESSMENT OF ESE LEARNERS

General

Course Prefix
ESED

Course Number
5613

Description
This course is designed to provide knowledge regarding assessment procedures, the assessment process (including pre-referral and referral), and protocols utilized in making decisions and judgments regarding individualized educational plans, placements, and programs for students in exceptional education. This introductory course assists students in basic knowledge regarding formal and informal assessment and in the interpretation of test scores. Prerequisite: None

Credit Hours

Minimum Credit Hours:
3

Maximum Credit Hours:
3

Number Of Repeats:
3

Number Of Credits:
3

Learning Outcomes

Learning Outcomes

Name
Distinguish among the multiple purposes of conducting an assessment: screening, identification for service eligibility, diagnosis, instructional planning, and monitoring progress in an intervention.

Name
Explain the specialized terminology used in the assessment of individuals with developmental disabilities.

Name
Explain basic test characteristics such as reliability, validity, criterion-referenced/curriculum-based and standardization/norm referenced.

Name
Interpret scores/results obtained from norm-referenced and criterion-referenced assessments (raw scores, standard scores, percentile ranks, age-grade equivalents, stanines) for varied exceptionalities, including developmental disabilities.

Name
Describe recommended test modifications/accommodations for students with disabilities as well as the environmental assessment conditions that promote maximum performance of individuals with developmental disabilities.

Name
Describe and critique instruments used to assess individual students achievement in reading, writing, oral language, and mathematics.

Name
Identify sources of bias in testing and discuss recommended strategies for conducting culturally responsive, sensitive assessments.

ESED5623 - TRANSITION

General

Course Prefix
ESED

Course Number
5623

Description
This course provides an overview of exceptionalities as manifested in the adolescent and young adult. Emphasis is placed on planning and programming for the transition of the exceptional adolescent from school to the adult community. Opportunities for the comprehensive study of characteristics, programs, assessment techniques, and strategies essential to meeting the needs of adolescents and adults with learning problems, will be provided. Special and unique problems of teenagers and young adults, curriculum models, materials, teaching strategies, and transition requirements for students with disabilities will be addressed.Prerequisite: None

Credit Hours

Minimum Credit Hours:
0

Maximum Credit Hours:

Number Of Repeats:
3

Number Of Credits:
3

Learning Outcomes

Learning Outcomes

Name
Identify model career, vocational and transition programs for individuals with disabilities.

Name
Identify alternatives for teaching skills and strategies to adolescents with different kinds of disabilities.

Name
Design and implement an instructional program that addresses instruction in independent living skills, vocational skills, and career education for students with physical and health disabilities emphasizing positive self-concepts and realistic goals.

Name
Design, implement, and evaluate instructional programs that enhance an individuals social participation in family, school, and community activities.

Name
Identify sources of unique services, networks, and organizations for individuals with disabilities, including career, vocational, and transition support.

Name
Develop skills in collaboration with parents and other professionals, in planning for transition to post-school settings with maximum opportunities for decision making and full participation in the community.

ESED5633 - HIGH INCIDENCE DISABILITIES

General

Course Prefix
ESED

Course Number
5633

Description
This course focuses on students identified as having high incidence disabilities such as learning disability, attention deficit, and other related mild disabilities. Programming within the regular education setting is emphasized.Prerequisite: None

Credit Hours

Minimum Credit Hours:
0

Maximum Credit Hours:
3

(Credit Hours) Value:

Learning Outcomes

Learning Outcomes

Name
Identify the continuum of services in exceptional student education.

Name
Compare and contrast service delivery options in exceptional student education.

Name
Recognize the educational implications of various exceptionalities in the selection of teaching strategies.

Name
Identify measurement concepts, characteristics, and uses of norm-referenced, criterion-references, and performance-based assessments for students with mild to moderate disabilities.

Name
Analyze assessment information to identify a students educational needs and instructional levels in order to select appropriate specialized instructional techniques, strategies, and materials.

Name
Select appropriate instructional approaches, materials and strategies in the academic areas (reading, mathematics, spelling, oral language, written expression, and social skills) for students with mild to moderate disabilities.

Name
Categorize strategies for creating an inclusive environment into the following categories: creating collaborative relationships, creating an environment of friendship and acceptance, creating successful transitions to inclusive settings, and creating a classroom environment that promotes positive behavior.

ESED5643 - DEVELOPMENTAL DISABILITIES

General

Course Prefix
ESED

Course Number
5643

Description
This course is designed to provide students with a broad overview of the areas of intellectual and developmental disabilities, or IDDs. A particular emphasis on accommodations and modifications to the general education curricular materials, as well as techniques for teaching students with disabilities will be addressed.Prerequisite: None

Credit Hours

Minimum Credit Hours:
0

3

Learning Outcomes

Learning Outcomes

Name
Examine the historical foundations of the field of intellectual disabilities and developmental disabilities.

Name
Determine the appropriate educational classification and support system for individuals with intellectual and developmental disabilities.

Name
Analyze various influences on prevalence rate estimates in intellectual disabilities and examine factors influencing misrepresentation of students from minority racial and ethnic backgrounds in programs for individuals with intellectual disabilities.

Name
Evaluate physiological causes of intellectual disabilities and developmental disabilities.

Name
Identify and discuss physical characteristics and related medical concerns, as well as assistive technology regarding individuals with intellectual disabilities and developmental disabilities.

Name
Determine appropriate educational placements and curricular strategies for individuals with intellectual disabilities and those identified as gifted.

Name
Discuss social, legal, and ethical issues related to intellectual disabilities, developmental disabilities and giftedness.

ESED5653 - EMOTIONAL & BEHAVIORAL DISORDERS

General

Course Prefix
ESED

Course Number
5653

Description
This course is designed to provide students with an overview of historical and theoretical perspectives on educating children with emotional and behavioral differences. Students will acquire knowledge regarding referral processes, assessment procedures and protocols utilized in making decisions, and judgment regarding individualized educational plans, placement, and programs. They will develop specialized instructional strategies and curriculum to use with the child emotional disabilities and behavioral disorders, develop a critical undsertanding of current practices in service delivery system, and examine professional issues and trends that impact the future of the field. Prerequisite: None

Credit Hours

Minimum Credit Hours:
0

Maximum Credit Hours:

Learning Outcomes

Learning Outcomes

Name
Explain basic terminology associated with the fields of emotional disabilities and behavioral disorders and discuss and critique the incidence/prevalence data regarding Emotional Disorders (ED) and Behavioral Disorders (BD).

Name
Describe the identification procedures used with ED and BD and

Name
Discuss the various etiological theories/conceptual approaches for ED and BD and critique the prevailing theories employed in explaining ED and BD.

Name
Describe and critique commonly used interventions for students with ED and BD.

Name
Modify the learning environment to manage behaviors, using performance data and information from all stakeholders.

Name
Analyze assessment information as well as information from all stakeholders to identify a students educational needs and instructional levels in order to select appropriate specialized instructional techniques, strategies, and materials.

ESED5663 - AUTISM SPECTRUM DISORDERS

General

Course Prefix
ESED

Course Number
5663

Description
This course is designed to provide students with a broad overview of the area of Autism Spectrum Disorders. There is a particular emphasis on adaptations and modifications to the regular curricular materials, as well as techniques for teaching functional skills. Prerequisite: None

Credit Hours

Minimum Credit Hours:
0

Learning Outcomes

Learning Outcomes

Name
Examine the historical foundations of the field of Autism Spectrum Disorders.

Name
Determine the appropriate educational classification and support system for individuals with Autism Spectrum Disorders.

Name
Analyze various influences on prevalence rate estimates in Autism Spectrum Disorders.

Name
Identify and discuss the specific procedures and instruments used throughout the lifespan to identify a person as having Autism Spectrum Disorders.

Name
Identify and discuss specific personal and social characteristics of individuals identified as having Autism Spectrum Disorders.

Name
Identify and discuss physical characteristics and related medical concerns, as well as assistive technology regarding individuals with Autism Spectrum Disorders.

Name
Identify and discuss appropriate educational placement and curricular emphasis for individuals with Autism Spectrum Disorders.

ESED5673 - SUCCESSFUL INCLUSIVE CLASSROOM

General

Course Prefix
ESED

Course Number
5673

Description
This course focuses on assisting candidates in defining, planning, implementing, analyzing, and evaluating the K-12 curricula based on a framework for designing lessons. The course also examines instructional strategies that have a positive impact on student achievement and school-wide policies and procedures that support learning for all. Prerequisite: None

Credit Hours

Minimum Credit Hours:
3

Maximum Credit Hours:
3

(Credit Hours) Value:

3

Learning Outcomes

Learning Outcomes

Name
Use the Universal Design for Learning (UDL) framework to design lessons to support the learning for all students.

Name
Describe how the goal of Differentiated Instruction (DI) can enable a teacher to provide a variety of levels of teaching, guided practice, and assessment to support the diverse populations in the classroom.

Name
Ascertain which learning activities are more apt to enable students to achieve desired results.

Name
Draft curricular units based on essential questions and cooperative learning, undergirded by UDL and DI.

Name
Utilize Webbs Depth of Knowledge to provide high levels of strategic thinking for students in the classroom.

Name
Develop, organize, and sequence classroom learning experiences to enhance students learning

ESED5683 - POSITIVE BEHAVIOR SUPPORT

General

Course Prefix
ESED

Course Number
5683

Description
This course focuses on behavior management strategies in exceptional student classrooms. Classroom design and planning, group and individual behavior assessment, and individualized behavior management techniques are covered.Prerequisite: None

Credit Hours

Minimum Credit Hours:
3

Maximum Credit Hours:
3

(Credit Hours) Value:

Learning Outcomes

Learning Outcomes

Name
Develop a basic understanding of the theories and research that underpin classroom management approaches.

Name
Identify and explain both laws and ethical principles that influence and impact behavior management.

Name
Create safe academic environments that honor diversity and promote learning and demonstrate understanding of basic principles of school-wide discipline/safety.

Name
Conduct a functional assessment of individual and group social behavior.

Name
Identify strategies for increasing, decreasing, and maintaining behaviors.

Name
Describe and demonstrate strategies for teaching and encouraging the development of prosocial behaviors in the classroom.

ESED5703 - HOW TO LEARN: NILD LEVEL I

General

Course Prefix
ESED

Course Number
5703

Description
This course serves to develop a foundational methodology for training students how to learn by strengthening current cognitive systems to greater efficiency. The end result for students in National Institute for Learning Development (NILD) Educational Therapy™ is significantly higher cognitive, academic, perceptual, and emotional functioning. Candidates will explore the usage of psychological and educational assessment, discovering real patterns of cognitive strengths and weaknesses. Candidates will gain a comprehensive understanding and utilization of the NILD Level I techniques. Prerequisite: None

Credit Hours

Minimum Credit Hours:
0

Maximum Credit Hours:
4

(Credit Hours) Value:
3

Contact Hours (not needed)

Learning Outcomes

Learning Outcomes

Name
Demonstrate foundational understanding of NILD philosophy and methodology.

Name
Describe NILDs comprehensive approach of intervention that develops learning through perception, academics, cognition, and emotions.

Name
Identify the differences between NILD methodology and tutoring.

Name
Evaluate how reading, math, and spelling can be impacted by improving cognitive functioning.

Name
Analyze learning challenges to efficiently apply specific tools to develop and enhance thinking skills.

Name
Identify the components for an effective intervention program based on the NILD Educational Therapy techniques.

Name
Determine future intervention based on cognitive, academic, perceptual, and emotional functioning data.

Name
Outline the importance of literacy skills in the areas of phonemic awareness, phonics, and syllabication for reading acquisition.

ESED5712 - ESE STUDENT TEACHING

General

Course Prefix
ESED

Course Number
5712

Description
This course is designed to provide opportunities for student teachers to examine the experiences they are having in student internship. Seminars are designed to respond to the immediate needs of the student teachers and offer support, encouragement and insights into the teaching process. Prerequisites: Completed course work

Credit Hours

Minimum Credit Hours:
12

Maximum Credit Hours:

Learning Outcomes

Learning Outcomes

Name
Document their understanding of the teaching process/information from local school district employees (Exceptional Student Education-ESE, Title One, Florida Comprehensive Assessment Tests).

Name
Provide support for peers as they discuss student teaching issues and generate potential solutions/problem solving.

Name
Share and exchange instructional techniques.

Name
Share and exchange classroom management techniques.

Name
Develop a resume and cover letter to be used as interview tools.

ESED5723 - HOW TO LEARN: NILD LEVEL II

General

Course Prefix
ESED

Course Number
5723

Description
This course serves to further develop educational therapists' training in accordance with the National Institute for Learning Development (NILD) intervention model. This course addresses the development of oral language through the processes of mediation and effective questioning in order to promote higher order thinking skills. The candidates will receive additional instruction in interpretation of initial assessment and annual test reporting, a review of Level I techniques, and instruction in Level II techniques. This course will foster additional skills in the ability to identify cognitive functions. Prerequisite: ESED 5703

Credit Hours

Minimum Credit Hours:
0

Learning Outcomes

Learning Outcomes

Name
Explain the impact of student learning based on the five core NILD techniques.

Name
Demonstrate proficiency in the initial level of techniques for specific student intervention.

Name
Use Level II techniques to impact processing deficits more effectively.

Name
Apply ethical standards and codes of conduct in the practice of NILD Educational Therapy.

Name
Describe the characteristics of a learning disability.

Name
Determine patterns of cognitive/academic strengths and weakness through data analysis from formal assessments.

Name
Implement language development and critical thinking practices to develop student reading, math, and spelling skills.

Name
Explain the reciprocal relationship among educational therapists, classroom teachers, parents. and NILD.

Name
Outline how questioning, pacing, transitions and bridging to life impacts students.

Name
Demonstrate mediated learning, in conjunction with NILD Educational Therapy, to ameliorate processing deficits.

ESED5733 - HOW TO LEARN: NILD LEVEL III

General

Course Prefix
ESED

Course Number
5733

Description
This course will help the participant to expand their ability to incorporate cognitive function development within the National Institute LD Educational Therapy™ techniques, effectively implement mediated learning experiences, and develop language competencies in students. Candidates will continue to explore the usage of psychological and educational assessments, which reveal patterns of cognitive strengths and weaknesses. Candidates will gain a comprehensive understanding of Level I and II techniques. Prerequisite: ESED 5723

Credit Hours

Learning Outcomes

Learning Outcomes

Name
Evaluate the five core techniques according to the tenets of Cognitive Functions.

Name
Demonstrate competency in the NILD Educational Therapy techniques providing student-specific intervention for learning deficits.

Name
Implement language competencies for student development of reading comprehension and written expression.

Name
Incorporate Cognitive Functions in conjunction with NILD Educational Therapy techniques.

Name
Determine student cognitive functions and dysfunctions through diagnostic and prescriptive competency data.

Name
Refine questioning skills to stimulate student oral language.

Name
Scaffold the skills of pacing, transition, and application of mediated learning to build competence and confidence for student learning.

Name
Articulate the theoretical constructs that underlie NILD Educational Therapy .

ESPT2003 - ESPORTS EVENTS & GAME TECHNOLOGY

General

Course Prefix
ESPT

Course Number
2003

Description
Esports Events & Game Technology examines the development, planning, and implementation of esports events. This course investigates the global infrastructure, remote networking, and technology needed to support the esports industry, as well as the coordination and communication needed to put on an event that rivals major sporting events. It offers students an opportunity to learn more about the audio and video demands associated with the esports industry. In addition, students will develop knowledge related to the broadcast and Wi-Fi requirements needed in the esports industry.Prerequisite: None

Credit Hours

Minimum Credit Hours:
3

Maximum Credit Hours:
3

(Credit Hours) Value:
3

Contact Hours (not needed)

(Contact Hours) Value (not needed) :

Learning Outcomes

Learning Outcomes

Objective
Students will gain an understanding of the importance of troubleshooting, preparation, and teamwork during an esports event.

Name
Students will be introduced to the world of designing and implementing an esports event, including the game technology, software, hardware, and how they interact.

Name
Students will be able to identify different aspects of the technology used in esports, including audio/video requirements, WiFi and cell signal integration, broadcast equipment, as well as accompanying FCC regulations.

Name
Students will be able to analyze and interpret common and infrequent issues that arise as a result of the use of technology.

Name
Students will identify and discuss differences in approaches to technology setup and security at esports events.

Name
Students will gain an understanding of the importance of troubleshooting, preparation, and teamwork during an esports event.

ESPT3003 - SPORT ANALYTICS

General

Course Prefix
ESPT

Course Number
3003

Description
This course is designed to give students an understanding of the rapidly developing sport analytics landscape. The course will cover theories and concepts currently used in sport analytics. Some topics included are data collection and management strategies, player performance, player/team management, and data analysis.Prerequisite: None

Credit Hours

Minimum Credit Hours:
3

Maximum Credit Hours:
3

(Credit Hours) Value:

Learning Outcomes

Learning Outcomes

Objective
Students will learn research methods that allow them to collect sport data for analysis and interpretation.

Name
Students will be able to identify different approaches and concepts used in sport analytics today.

Name
Students will be able to analyze and interpret sport data and develop conclusions that affect managerial decisions.

Name
Students will identify and discuss differences in approaches to sport analytics through chapter reading, class exercises, and class discussions.

Name
Students will identify and discuss the use of technology, including benefits and issues, in the deployment of sport analytics today.

Name
Students will learn research methods that allow them to collect sport data for analysis and interpretation.

Learning Outcomes

Learning Outcomes

Objective
Calculate the Sharpe ratio, Treynor ratio, and Jensen’s alpha with performance evaluations.

Name
Discuss and analyze how closed-end funds, exchange traded funds, and hedge funds are used in the investment community.

Name
Explain and apply the Option Valuation models.

Name
Discuss and calculate fixed rate mortgages.

Name
Explain how the Fama-French three-factor model is used.

Name
Calculate projected cash flow and earnings with financial statements and financial ratios.

Name
Explain and apply how profits for puts and calls are calculated.

Name
Explain and apply future contracts.

Name
Calculate the Sharpe ratio, Treynor ratio, and Jensens alpha with performance evaluations.

FINC3903 - INTERMEDIATE FINANCIAL MANAGEMENT

General

Course Prefix
FINC

Course Number
3903

Description
This course provides a rigorous treatment of corporate finance concepts. The primary objective of the course is to further students' understanding of corporate financial decisions. These decisions include choosing between investment opportunities, how much debt and equity to issue, measuring risk and return, and what level of dividend to payout.

Learning Outcomes

Learning Outcomes

Objective
Explain the importance of international investing from a Christian perspective of helping to increase the GDP in lesser developed nations.

Name
Define direct and indirect methods of foreign exchange quotations.

Name
Convert direct foreign exchange quotations into indirect foreign exchange quotations.

Name
Describe the factors that cause a nations currency to appreciate or depreciate.

Name
Define and discuss absolute and relative purchasing power parities.

Name
Calculate the international Fisher relation.

Name
Explain a foreign currency risk premium in terms of interest rate differentials and in terms of forward rates.

Name
Discuss the advantages of exchange traded funds (ETFs).

Name
Demonstrate how to conduct a global industry analysis by analyzing return potential and risk characteristics.

Name
Explain the importance of international investing from a Christian perspective of helping increase the GDP in lesser developed nations.

FINC4163 - FINANCIAL STATEMENT ANALYSIS

General

Course Prefix
FINC

Course Number
4163

Description
This course provides a background of understanding for lending, investing, and management purposes. In addition to text material, the course will utilize the financial statements of a publicly traded company for analytical skill development purposes.

Learning Outcomes

Objective
Provide professional quality presentations relating to the learning experience using both written and verbal skills.

Name
Understand how material learned in the classroom is applied in an organizational setting.

Name
Perform detailed procedures in a specific area of finance as set forth in an internship learning agreement.

Name
Provide professional quality presentations relating to the learning experience using both written and verbal skills.

FINC5603 - INTRODUCTION TO FINANCIAL PLANNING

General

Course Prefix
FINC

Course Number
5603

Description
This is the introductory course in the Financial Planning (FP) program. As the name suggests, this course will introduce students to the general principles of Financial Planning. The course will begin by describing the FP process including the collection of data, financial statements, and the budgeting process. Additionally, the requirements of both the planner and of the profession (ethics, competencies, standards, regulations, etc.) will be examined. The course will then establish the different areas of FP (law, taxes, insurance, investments, estate planning, etc.). The course will provide the appropriate foundation for the rest of the FP courses.

FINC5613 - RISK MANAGEMENT & INSURANCE

General

Course Prefix
FINC

Course Number
5613

Description
Students examine the principles of risk management and the use of insurance as a method of managing financial risk exposure. Students learn how to identify the various types of financial risk and to evaluate alternative strategies in order to lessen the impact of unplanned events. The analysis of client insurance needs and methods of determining the type and amount of insurance best suited to each client's situation is examined, incorporating discussions of life, property, liability, homeowner's and personal auto insurance. Topics covered include medical and
disability insurance and long-term care policies.

FINC5643 - EMPLOYEE BENEFITS AND RETIREMENT

General

Course Prefix
FINC

Course Number
5643

Description
This course will cover the requisite material for the field of Financial Planning. Students will begin by being versed in different benefits plans including disability and cafeteria plans as well as business applications of the above. The course will then cover retirement planning issues including Government Social Security, Medicare and Medicaid plans. Students will be exposed to needs analysis, different types and characteristics of retirement plans, distribution options, ethical considerations, etc. At the end of this segment, students should be able to recommend suitable retirement and portfolio plans.

FINC5653 - PRINCIPLES OF ESTATE PLANNING

General

Course Prefix
FINC

Course Number
5653

Description

A significant task of a financial planner is to address the estate planning needs of clients. This course covers the more complex areas of trust and tax law not normally included in a Financial Planning program. The material covered is structured for those who tailor and administer financial and estate plans covering the most important planning concepts and examines the most important techniques used to set and meet the financial goals of the client and their families. The course should provide students with the knowledge necessary to advise clients in estate planning matters as well as to recommend different plans and strategies.

FINC5663 - CAPSTONE IN FINANCIAL PLANNING

General

Course Prefix
FINC

Course Number
5663

Description

This financial plan development course is designed for students to integrate knowledge gained from all other dedicated financial planning courses (General Principles of Financial Planning,
Funding Education, Insurance, Investments, Tax Planning, Retirement Planning, Employee Benefits, and Estate Planning). Students will demonstrate their competency by writing a
comprehensive financial plan and communicating that plan in a live client presentation. A secondary benefit of the course is content review that is designed to help students prepare for
their CFP® Certification Examination.

Learning Outcomes

Learning Outcomes

Name
Identify methods of teaching across disciplines in K-8 settings.

Name
Identify best practices in teaching across disciplines in K-8 settings.

Name
Apply teaching methods in the classroom.

Name
Contextualize pedagogy across the curriculum in a variety of academic settings.

GEDU2131 - GLOBAL FIELD STUDY I

General

Course Prefix
GEDU

Course Number
2131

Description
In this course, students will be placed in a K-8 setting to complete tasks in the field. This course is designed to allow students multiple opportunities to observe the K-8 setting (approximately 30 hours) and participate in low-level classroom tasks in the K-8 setting. Students will need to find placement in schools/ classrooms according to the students' major/grade level preference.Prerequisite: GEDU 2343

GEDU2143 - FOUND OF ED & INSTRUC DESIGN

General

Course Prefix
GEDU

Course Number
2143

Description
This course is a study of the nature and character of American education and how it has been influenced by our social structure, social values, and history. The course includes an introduction to subject area competencies, professional skills and competencies, benchmarks for the pre-professional level of accomplished practices for teachers, and the expectations for ethical and professional behavior. Students will learn the principles of effective instructional design and delivery in the K-8 setting and gain practice in writing standards-based lesson plans that include differentiated instruction and assessment.Prerequisite: None

Learning Outcomes

Learning Outcomes

Name
Examine the educators responsibility within the teaching profession.

Name
Analyze the goals educators have and reflect on how these goals will influence ones teaching behavior.

Name
Explore current issues and controversies in American education.

Name
Describe organizational structure of schools in relation to district, state, and federal educational bodies.

Name
Apply research-based strategies for teaching students of all ability levels and needs.

Name
Apply state standards to vertical lesson planning and analysis of correlations in standards and throughout the spiraling curriculum.

Name
Use the principles and processes of effective curriculum design related to lesson planning.

Name
Demonstrate knowledge of teacher-centered versus student-centered instructional strategies for promoting understanding, critical thinking, engagement, and assessment of student performance as essential assets of effective teaching.

GEDU2233 - EDUCATIONAL PSYCHOLOGY

General

Course Prefix
GEDU

Course Number
2233

Description
This course is a study of student diversity, the principles and philosophy of human growth and development, motivation and learning theory, and how these are applied to teaching. Included are introductions to intelligence theories, cultural issues, instructional approaches, learning taxonomies, motivation, and different assessment tools.Prerequisite: None

Credit Hours

Minimum Credit Hours:

Learning Outcomes

Learning Outcomes

Name
Contrast teaching as an art and teaching as a science in light of educational psychology.

Name
Describe the major theories of cognitive, psychosocial, and moral development and apply these theories to classroom practice

Name
Apply behaviorist, social, cognitive (information processing, constructivist) and humanistic learning theories to classroom practice.

Name
Use evaluation and assessment procedures to determine the results of educational experiences.

Name
Define learner variability (including culture, gender, learning style, language, and socioeconomic background) to classroom practice.

Name
Describe the responsibilities and teaching strategies of an ESE-trained teacher to maintain a climate of openness, fairness, and support to the ESE student.

Name
Apply various taxonomies of educational objectives to the educational environment.

Name
List well-planned techniques to manage individual and classroom behaviors.

Name
Assess the complexities of the teachers role as an educational psychologist.

GEDU2343 - FOUNDATIONS OF EDUCATION

General

Learning Outcomes

Name
Evaluate the practices of current classroom teachers in the K-8 setting.

Name
Demonstrate specific professional responsibilities of teachers in the K-8 setting.

Name
Collaborate with K-8 school-based faculty and staff to contribute to the operations of a school.

Name
Develop communiqu with families of K-8 students according to the assigned classroom.

Name
Analyze how local, state, and federal ESOL policies are carried out in school-based operations.

GEDU3023 - TRAUMA INFORMED TEACHING

General

Course Prefix
GEDU

Course Number
3023

Description
This course is a study of the impacts and types of trauma that affect K-12 student well-being and classroom learning. Adverse Childhood Experiences (ACEs) studies and classroom strategies for mitigating the effects of childhood trauma are outlined. Focus given to the review of trauma's impact on the K-12 student and how the teacher can create a trauma-informed classroom to proactively empathize and care for affected students.Prerequisites: None

Learning Outcomes

Learning Outcomes

Name
Define trauma and adverse childhood experiences (ACEs)

Name
Describe how trauma and adverse childhood experiences affect child development.

Name
Outline strategies for planning trauma-responsive learning environments.

GEDU3113 - SURVEY OF THE EXCEPTIONAL LEARNER

General

Course Prefix
GEDU

Course Number
3113

Description
This is a required course for all Education programs. This is an introductory course that examines the history, characteristics, and issues in exceptional education. The course covers all areas of exceptionality and their manifestations from early childhood through adulthood. It is designed to provide students with a firm grounding in the foundations of special education and exposes them to the reconstruction of the field, in order that they may better deal with new and ever-changing developments. In addition to classroom meetings, a minimum of 10 hours of observation/participation in a clinical setting is required. This course is a prerequisite for all other Exceptional Student Education courses.Prerequisite: None

Credit Hours

Minimum Credit Hours:
3

Learning Outcomes

Learning Outcomes

Name
Trace the history of special education identifying how key litigation, advocacy, and legislation have impacted perceptions regarding exceptionality.

Name
Demonstrate a working understanding of the nature and impact of various special education classifications systems and models that have and can be used to address identification, intervention, planning, and approaches to service delivery.

Name
Analyze the IEP process from multiple perspectives that include the parent, students, and special education teacher, highlighting potential ethical issues.

Name
Explain the major rights of students with disabilities and their families and describe the origins of these rights.

Name
Identify methods teachers can use to promote successful inclusion of students with special needs in regular classrooms.

Name
Evaluate the contributions of technological innovations for bringing about important changes in the independent living skills and employability skills of individuals with disabilities.

Name
Demonstrate knowledge and skills in collaborating and consulting with teachers and other professionals in the delivery of Special Education services.

Name
Demonstrate knowledge and skills in involving families of children with disabilities in the delivery of special education services.

GEDU3133 - ASSESSMENT OF LEARNERS

General

Course Prefix
GEDU

Course Number
3133

Description
This course focuses on the educational levels and needs of all students, including exceptional, culturally and/or linguistically diverse, and at-risk students. Standardized achievement tests, diagnostic/prescriptive tests, and curriculum-based assessments are included. Use of test results in program planning is emphasized.Prerequisite: None

Credit Hours

Minimum Credit Hours:
3

Maximum Credit Hours:
3

(Credit Hours) Value:
3

Contact Hours (not needed)

(Contact Hours) Value (not needed) :

Learning Outcomes

Learning Outcomes

Name
Diagnose student learning and individual learning needs.

Name
Plan appropriate teaching/intervention strategies based on assessment data.

Name
Use multiple measures to assess a concept, skill, or disposition.

Name
Adapt measurements and delivery methodologies to better assess learners with special learning needs.

Name
Modify instruction based on assessment results for both individuals and groups.

Name
Use observational and anecdotal records to monitor student needs and progress.

Name
Analyze assessment data to discern student strengths and weaknesses and plan differentiated instruction to meet the educational needs of individual students.

Name
Communicate effectively with parents and colleagues regarding student progress and the results of assessment.

Name
Demonstrate professional behavior with regard to testing and measurement of student knowledge, skills, and dispositions.

GEDU3143 - INTRO TO LANG DEV & COMM DISORDERS

General

Course Prefix
GEDU

Course Number
3143

Description
This course addresses language development, including identification and remediation of communication and language disorders. There is an emphasis on the impact of speech and language disorders on academic success and achievement. Further, students will be presented with an overview of alternative/ augmentative modes of communication and development of curriculum in these areas. Prerequisites: None

Credit Hours

Minimum Credit Hours:
3

Maximum Credit Hours:
3

(Credit Hours) Value:
3

Contact Hours (not needed)

(Contact Hours) Value (not needed) :
0

Repeatable:
Yes

Number Of Repeats:
3

Number Of Credits:
3

Learning Outcomes

Learning Outcomes

Name
Synthesize etiology and diagnosis with various theoretical approaches to language development.

Name
Describe the neuroanatomical and neurophysiological aspects of language ability and understand the effects on the five domains of language development.

Name
Distinguish the characteristics of language development in infancy, toddlerhood, preschool, school-age years, and beyond.

Name
Compare and contrast the characteristics of ones own culture and use of language and the ways in which these can differ from other cultures and uses of languages.

Name
Identify and define various types of language disorders, assessments, and treatments.

Name
Evaluate various augmentative communication devices and assistive technology and apply those to a case scenario of a child.

Name
Select, design, and use materials and resources required to educate individuals whose disabilities interfere with communication.

GEDU3233 - LITERACY FOUNDATIONS II

General

Course Prefix
GEDU

Course Number
3233

Description
This course investigates children's literature, emphasizing developmentally-appropriate instructional practices. Attention is placed on understanding psychological, social, emotional, and cognitive development as they correlate to motivating students to interact with literature. Prerequisites: GEDU 3493

Credit Hours

Minimum Credit Hours:
3

Maximum Credit Hours:
3

(Credit Hours) Value:
3

Contact Hours (not needed)

(Contact Hours) Value (not needed) :

Number Of Repeats:
3

Number Of Credits:
3

Learning Outcomes

Learning Outcomes

Name
Differentiate among characteristics and elements of a variety of literary genres.

Name
Select appropriate multicultural texts based on purpose, relevance, cultural sensitivity and responsiveness, and developmental appropriateness.

Name
Implement developmentally appropriate strategies for student response to texts.

Name
Relate human growth and development to the well-being of the whole child.

Name
Distinguish between developmentally appropriate and inappropriate instructional practices considering the interaction of cognitive, affective, and psychomotor domains.

GEDU3353 - EMPOWERING ESOL TEACHERS

General

Course Prefix
GEDU

Course Number
3353

Description
This course is an overview of curriculum, instructional methods and materials, testing and evaluation, and cross-cultural communication processes and linguistic principles as related to instructing English Language Learners (ELLs) in the K-8 classroom. Prerequisite: None

Credit Hours

Minimum Credit Hours:
3

Maximum Credit Hours:
3

(Credit Hours) Value:
3

Contact Hours (not needed)

(Contact Hours) Value (not needed) :
0

Repeatable:
Yes

Number Of Repeats:
3

Number Of Credits:
3

Learning Outcomes

Learning Outcomes

Name
Compare and contrast students who are ELLs and native English-speaking students in regular education programming and ESE.

Name
Experience learning in an unfamiliar language.

Name
Understand, create, implement, and critique K-8 lesson plans that will help ELLs develop English skills, content-specific skills, and social skills for the American culture.

Name
Prepare a multimedia presentation on a non-native English-speaking culture.

Name
Recognize contributions made by major leaders in the field of English for Speakers of Other Languages (ESOL) methodologies and theories.

Name
Demonstrate awareness of the central role of ESOL within the total school curriculum.

Name
Demonstrate effective lesson planning by providing multi-level, multi-sensory ESOL activities for a variety of situations.

Name
Outline the historical development of ESOL legislation at the local, state, and federal levels.

GEDU3423 - DIAG ASSESS EVAL OF READING

General

Course Prefix
GEDU

Course Number
3423

Description
This course highlights formal and informal means of evaluations with emphasis on diagnosing reading ability, prescribing for instruction, administering assessment, interpreting measurement terms and data, and maintaining records.Prerequisites: None

Credit Hours

Minimum Credit Hours:
3

Maximum Credit Hours:
3

(Credit Hours) Value:
3

Contact Hours (not needed)

(Contact Hours) Value (not needed) :
0

Repeatable:

Number Of Repeats:
3

Number Of Credits:
3

Learning Outcomes

Learning Outcomes

Name
Describe and apply the literacy assessment process and reading diagnosis as it relates to the instructional responsibilities of the teacher.

Name
Administer and use information from norm-referenced tests, criterion-referenced tests, formal and informal inventories, constructed response measures, portfolio-based assessments, student self-evaluations, work/performance samples, observations, anecdotal records, journals, and other indicators of student progress to inform instruction and learning.

Name
Design an individual plan of instruction, including interpreting issues that arise when English Language Learners are assessed, for a student indicating strengths, weaknesses, and appropriate corrective instruction.

Name
Write a diagnostic case study report on a student referred for experiencing reading difficulties.

Name
Demonstrate knowledge of differentiating instruction, select appropriate instructional strategies and materials for students experiencing reading difficulties, and set goals for instruction based on assessment results to monitor student progress.

Name
Cite strategies for intervention in the areas of decoding, fluency, and comprehension.

Name
Demonstrate instructional skill and specialized techniques when assessing and teaching English Language Learners.

Name
Identify and demonstrate knowledge of instructional strategies to facilitate students metacognitive skills in reading.

Name
Practice appropriate writing demonstrating an understanding that it varies from context to context, depending on such things as discipline, audience, purpose, and genre.

GEDU3493 - LITERACY FOUNDATIONS I

General

Course Prefix
GEDU

Course Number
3493

Description
This course is a study of scientific theory and effective approaches for reading instruction, focusing on reading as the interactive weaving of word recognition and language comprehension. The essential components of literacy are studied: oral language, phonological awareness, phonics, fluency, vocabulary, and comprehension. Characteristics of proficient readers, striving readers, and readers with dyslexia are examined along with practices for differentiating reading instruction. Prerequisite: None

Credit Hours

Minimum Credit Hours:
3

Maximum Credit Hours:
3

(Credit Hours) Value:
3

Contact Hours (not needed)

(Contact Hours) Value (not needed) :
0

Number Of Repeats:
3

Number Of Credits:
3

Learning Outcomes

Learning Outcomes

Name
Identify the phonological and morphological structures of the English language, including the phonemic, semantic, and syntactic variability between English and other languages.

Name
Describe how the brain learns to read.

Name
Demonstrate substantive knowledge of the six major areas of reading: oral language, phonological awareness, phonics, vocabulary, fluency, and comprehension.

Name
Implement explicit, systematic, sequential, and multisensory strategies, grounded in scientifically based research, for teaching each of the six major areas of reading.

Name
Apply research-based practices that scaffold instruction for childrens individual learning differences and improve reading achievement for children having difficulty with the six components of reading.

GEDU3503 - INSTRUCTIONAL TECHNOLOGY

General

Course Prefix
GEDU

Course Number
3503

Description
This course is designed to develop skills and techniques needed for the selection, utilization, and production of classroom instructional materials and for application and integration of educational technology and media to all areas of the curriculum, appropriate to students' developmental level.Prerequisites: None

Credit Hours

Minimum Credit Hours:
3

Maximum Credit Hours:

Learning Outcomes

Learning Outcomes

Name
Meet specific instructional objectives by utilizing media successfully in an instructional setting.

Name
Use technological devices skillfully.

Name
Design multimedia lessons which utilize instructional technology.

Name
Identify the strengths and weaknesses of each form of media.

Name
Link technology-oriented multimedia projects to the Florida Educator Accomplished Practices, ESOL standards, state standards, and ISTE standards.

Name
Modify personal teaching styles, especially outdated ones, in recognition of the ways technology is changing education, including a shift away from teacher-centered instruction to student-centered learning.

GEDU3523 - TEACHING LITERACY IN CONTENT AREA

General

Course Prefix
GEDU

Course Number
3523

Description
This course will provide students with strategies and tools for becoming a facilitating and reflective practitioner, teaching reading across content areas, and helping students discover that content area learning is made richer when reading, writing, speaking, and listening are taught together. Particular emphasis is placed on a balanced approach to reading, specific reading and comprehension strategies for content reading, the role of reflection in helping students to think critically, reading for diverse students, and the use of appropriate texts and mediaPrerequisites: None

Learning Outcomes

Learning Outcomes

Name
Identify cognitive task levels and the role of cognitive development in the construction of meaning of a variety of texts.

Name
Explain the reading process in the constructing of meaning from a wide variety of texts for a variety of purposes.

Name
Identify explicit, systematic instructional plans for scaffolding content area vocabulary development and reading skills, and comprehension skills and cognition.

Name
Identify resources and research-based practices that create both language-rich and print-rich environments.

Name
Identify research-based guidelines and selection tools for choosing literature and expository text appropriate to students interests and independent reading proficiency.

Name
Select appropriate materials that address cultural and linguistic differences.

Name
Apply research-based instructional practices for developing students critical thinking skills and facilitating reading comprehension.

Name
Demonstrate knowledge of and apply research-based practices for developing general and specialized content area vocabulary, facilitating reading comprehension, and developing critical thinking and content area reading skills.

GEDU3713 - INTEGRATION OF FAITH IN EDUCATION

General

Course Prefix
GEDU

Course Number
3713

Description
This course is designed to assist educators in effectively and legally integrating their Christian faith into school and classroom settings.Prerequisites: None

Credit Hours

Minimum Credit Hours:
3

Maximum Credit Hours:
3

(Credit Hours) Value:
3

Contact Hours (not needed)

Learning Outcomes

Learning Outcomes

Name
Recognize the role of Christian faith and religion in American education, both historically and in contemporary society.

Name
Develop ways to reconnect religious faith, as expressed in Christian intellectual traditions, to contemporary educational practice.

Name
Explain and defend the importance and vitality of Christian education.

Name
Integrate faith and learning in teaching and scholarship.

GEDU4001 - GLOBAL FIELD STUDY III

General

Course Prefix
GEDU

Course Number
4001

Description
In this course, students will be placed in a K-8 setting to complete tasks in the field. This course is designed to allow students multiple opportunities to assume some of the responsibilities of teachers in the K-8 setting (approximately 60 hours) and participate in classroom tasks such as teaching lessons across the curriculum, analyzing and using data to drive lesson planning, parent communication, and classroom management implementation in the K-8 setting. Students will need to find placement in schools/classrooms according to the students' major/grade level preference.Prerequisite: None

Learning Outcomes

Learning Outcomes

Name
Self-evaluate instructional practices in relation to current classroom teachers in the K-8 setting.

Name
Modify behaviors based on K-8 teacher observations regarding the demonstration of specific professional responsibilities of teachers in the K-8 setting.

Name
Work individually and collaboratively with K-8 school-based faculty and staff to contribute to the operations of a school.

Name
Implement communication strategies with families of K-8 students according to the assigned classroom.

Name
Evaluate how local, state, and federal ESOL policies are carried out in school-based operations and individual teaching strategies.

GEDU4009 - INTERNATIONAL STUDENT TEACHING

General

Course Prefix
GEDU

Course Number
4009

Description
This course provides five seminar-style opportunities for student teachers to examine the experiences they are concurrently having in the full-time student internship in the K-8 setting. Seminars are designed to respond to the immediate needs of the student teachers and offer support, encouragement, and insights into the teaching process and profession. Guest speakers will play an important role in enriching the program and providing first-hand experiences from the classroom and administrative levels. Prerequisite: Acceptance into Internship

Learning Outcomes

Learning Outcomes

Name
Examine the teaching process/information from local school district employees.

Name
Discuss student teaching issues/problems and generate potential solutions using critical thinking skills.

Name
Share instructional techniques with fellow student teachers.

Name
Exchange classroom management techniques with fellow student teachers.

Name
Develop a repertoire of communication methods for students, families, K-8 personnel, and peers.

GEDU4043 - APPLIED LINGUISTICS

General

Course Prefix
GEDU

Course Number
4043

Description
This course is a practical approach to teaching English to speakers of other languages. The course includes topics such as general linguistics, language theory, principles of language acquisition, and techniques for teaching and assessing K-12 ELL students. Special attention is given to the linguistic components of English, namely phonology, morphology, semantics, syntax, discourse, and pragmatics.Prerequisite: None

Credit Hours

Learning Outcomes

Learning Outcomes

Name
Review the Florida Consent Decree and other pertinent legislation to the ESOL field.

Name
Discuss both first and second language acquisition literature and research.

Name
Observe and linguistically analyze an ELL in a learning environment.

Name
Learn to use the International Phonetic Alphabet as a tool to recognize and transcribe language.

Name
Review and explain the role of literacy in the acquisition of languages and its relationship to L1 and L2 acquisition.

Name
Determine the role of L1/L2 academic development, L1/L2 linguistic development, and L1/L2 cognitive development, all in the social context of the ELL.

Name
Determine and explain the role of technology in the classroom as a tool to enhance instruction in the ESOL context.

GEDU4333 - CLASSROOM & BEHAVIOR MGMT

General

Course Prefix
GEDU

Course Number
4333

Description
This course is the study of models and strategies of behavior management appropriate for specific populations of students in accordance with human development milestones. The course covers student attributes of behavior, including response to interventions, age-appropriate discipline, intrinsic versus extrinsic motivation, conflict resolution, culture, and demographics. The course includes methodology for managing a learning environment utilizing research-based best practices in education. Prerequisite: None

Learning Outcomes

Learning Outcomes

Name
Examine theories and research related to classroom management approaches.

Name
Explain legislation and ethical issues related to managing a learning environment.

Name
Relate safe learning environments to diversity, academics, exceptional needs, linguistic backgrounds, family communication, and human development milestones.

Name
Assess individual functioning levels and pro-social behavior as related to individual and group dynamics of behavior.

Name
Identify strategies for increasing, decreasing, and maintaining behaviors.

Name
Discuss techniques for dealing with crisis situations in a learning environment.

Name
Implement behavioral interventions supporting student behaviors in inclusive settings.

Name
Manage the resources of time, space, and attention in the learning environment.

GERN5023 - AGING LONG TERM CARE AND THE FAMILY

General

Course Prefix
GERN

Course Number
5023

Description
This course will provide students with a theoretical knowledge and practical understanding of the various political, physical, social and economic issues associated with aging and long term care and family. This course will also examine long-term care services and programs designed to meet the needs of seniors to include home health care, nursing home, and assistant living facilities. The course will explore the various issues surrounding long term care and its effects on the family.

Course Number
4003

Description
Applied sustainability prepares students to meet the challenges of the destitute of this world with compassion, through cutting edge technology, sustainable processes, and financially viable methods. Students investigate approaches to the provision of clean water and adequate food resources to the Least Developed Countries and to people most impacted by physical and economic disaster. Students will specifically be prepared to pass the Certified Crop Advisor Exam.

GSCI5013 - SCIENCE AND NATURAL PHILOSOPHY

General

Course Prefix
GSCI

Course Number
5013

Description
This course explores the modern approach to breaking science into distinct subjects in contrast to an integrated natural philosophy of science. Science as natural philosophy is explored in relation to a holistic classical education.

Credit Hours

Minimum Credit Hours:
3

Maximum Credit Hours:
3

(Credit Hours) Value:

Learning Outcomes

Learning Outcomes

Name
Articulate the difference between natural philosophy and science subjects.

Name
Relate natural philosophy to a holistic classical education.

Name
Apply knowledge of natural philosophy to teaching science within a learning community.

GSCI5023 - THE SOUL OF SCIENCE

General

Course Prefix
GSCI

Course Number
5023

Description
This course explores the history of science as a matter of the soul. Origin events, Chrisitian scientists, and the development of scientific thinking and Christianity are explored.

Credit Hours

Minimum Credit Hours:
3

Maximum Credit Hours:
3

(Credit Hours) Value:
3

Learning Outcomes

Learning Outcomes

Name
Describe the related histories of scientific discovery and Christianity.

Name
Articulate contributions of Christians to scientific understanding.

Name
Define the scientific authenticity of a Christian worldview.

Name
Apply knowledge of teaching science in a Christian learning community.

GSCI5033 - CLASSICAL SCIENTIFIC INQUIRY

General

Course Prefix
GSCI

Course Number
5033

Description
This course explores the scientific approach in the classical tradition through research, interdisciplinary investigation, and inquiry.

Credit Hours

Minimum Credit Hours:
3

Maximum Credit Hours:
3

(Credit Hours) Value:
3

Contact Hours (not needed)

Learning Outcomes

Learning Outcomes

Name
Demonstrate an orderly and harmonious cosmos through the lens of classical canons.

Name
Articulate the scientific method of research as an interdisciplinary skill of science and origins.

Name
Utilize inquiry as a basis of knowledge for scientific achievement in seeing the unseen.

GSCI5043 - WRITING & RESEARCH IN THE SCIENCES

General

Course Prefix
GSCI

Course Number
5043

Description
This course explores the writing genres and research methodologies in the sciences. Discourse between scientists and the public, between the public and science associations, and scientific discovery knowledge distribution will be explored. Special attention will be paid to the value of original sources.

Credit Hours

Minimum Credit Hours:
3

Learning Outcomes

Learning Outcomes

Name
Map discussions in science between scientists, associations, and communities.

Name
Demonstrate capacity to write in scientific formats and genres.

Name
Apply knowledge of teaching science writing and research within learning communities.

GSCI5063 - ETHICS AND SCIENCE

General

Course Prefix
GSCI

Course Number
5063

Description
This course explores ethical concerns in science from a historical and contemporary perspective. The relation of science education to contemporary social and cultural issues is discussed and students learn to teach scientific ethics within a community framework of advocacy.

Credit Hours

Minimum Credit Hours:
3

Maximum Credit Hours:
3

Learning Outcomes

Learning Outcomes

Name
Define ethical issues in science suitable for classroom exploration.

Name
Explore methods of teaching science and ethics in the classical tradition.

Name
Apply knowledge of teaching science and ethics within learning communities.

GSCI5073 - THESIS / CAPSTONE PROJECT

General

Course Prefix
GSCI

Course Number
5073

Description
This is a capstone course designed for students to pursue research or a capstone project within a field of science. Students propose, initiate, and defend the thesis or project under the supervision of a faculty mentor.

Credit Hours

Minimum Credit Hours:
3

Maximum Credit Hours:

Learning Outcomes

Learning Outcomes

Name
Demonstrate appropriate and effective research strategies in the field.

Name
Propose a thesis or capstone project plan.

Name
Complete an annotated bibliography of sources.

Name
Defend the thesis or capstone project and revise to meet graduate level research requirements.

HCAD5613 - PRINCIPLES ORGANIZATION & POLICIES

General

Course Prefix
HCAD

Course Number
5613

Description
Students will learn how healthcare problems are addressed and the role of culture and patient choice in establishing health policies. This covers community and national health needs, including providing for the disabled and aged in terms of long term care. With a variety of healthcare organizational structures, students will be encouraged to develop what they believe to be the best policies, based on vision, mission, and values. These include how best to deliver its services, the control measures to ensure that result. A Christian world perspective will be considered as students learn about healthcare principles, organizations and policies.

Prerequisites

Complete ALL of the following :
Admission to the MBA program

Learning Outcomes

Learning Outcomes

Name
Explain how to motivate individuals to perform effectively in health services organizations.

Name
Discuss the current state of Healthcare and the expected changes due to new regulations and technology

Name
Discuss the role of shared governance on healthcare organizations.

Name
Compare and contrast the effectiveness of various healthcare organizational structures.

Name
Analyze the underlying reasons for the rise in health care costs

Name
Summarize the impact of public health initiatives on the current and upcoming state of healthcare

Name
Identify the impact of private health insurance, Medicaid, Medicare, and individuals without insurance on the healthcare system

Name
Describe the major structural forces affecting the delivery of health services and how these forces affect the role of the health services manager.

Name
Explain how to motivate individuals to perform effectively in health services organizations.

HCAD5633 - HEALTHCARE ECON FINANCE & INFO SYS

General

Course Prefix
HCAD

Course Number
5633

Description

This class will build on the earlier Accounting & Finance class in the MBA business core. Students will evaluate how the healthcare industry functions economically and financially. This includes financial risks and rates of return measurement, third party reimbursement programs, cost measurement and allocation, and how healthcare organizations' overall financial condition can be measured and evaluated. Emphasis will be placed on the unique revenue characteristics of the healthcare industry. Scriptural principles on the stewardship of resources will also be included.

Prerequisites

Complete ALL of the following Courses:

- BUSI5003 - MBA PRINCIPLES
  AND BUSI5503 - MANAGERIAL ACCOUNTING

Learning Outcomes

Learning Outcomes

Name
Perform a cost-benefit and cost-effectiveness analysis

Name
Describe strategies to manage and regulate healthcare costs.

Name
Compare US health expenditures to those in other countries.

Name
Evaluate various methods to develop and managed electronic medical records (EMRs), and the privacy and confidentiality safeguards required.

Name
Create a plan that aligns the IT infrastructure with the strategic plan of the organization.

Name
Explain the role of health insurance and managed care

Name
Assess the risk of various healthcare related decisions.

Name
Identify the principles of budgeting and financial risk management issues.

HCAD5663 - HEALTHCARE STRATEGY & LEGAL ENV.

General

Course Prefix
HCAD

Course Number
5663

Description
Students will apply the principles they learned in the earlier five MBA healthcare courses and perform a project in healthcare administration, designed to answer a research question or contribute to pressing onward, the best practices in the industry. Thinking, planning, and acting strategically is crucial to helping healthcare administration to improve. Students will work closely with a faculty advisor and assemble an action plan to help solve real world problems in the healthcare administration field. Faith integration, importantly, enters into this capstone experience.

  AND HCAD5633 - HEALTHCARE ECON FINANCE & INFO SYS

Learning Outcomes

Learning Outcomes

Name
Assess the external and internal environments of a health care management organization.

Name
Explore key strategic issues that face managers using a simulation model.

Name
Develop a strategic plan for a company in a simulation environment.

Name
Explain the role of government laws and regulations on the delivery of health care.

Name
Discuss the benefits and drawbacks of the role government and organizational policy have on health care decisions with moral implications such as end-of-life care, right to refuse treatment, maternal-fetal conflicts, abortions, and physician assisted suicide.

Name
Assess the role of torts in the delivery of health care.

Name
Assemble an action plan to help solve real world problems in the healthcare administration field

HIST1013 - WESTERN CIVILIZATION TO THE 16TH

General

Course Prefix
HIST

Course Number
1013

Description
A survey of the history of western civilization from pre-history to the early modern era. Topics include ancient Greece, Rome, Christian institutions of the Middle Ages, and the emergence of the national monarchies in western Europe.

HIST1113 - HUMANE LETTERS II

General

Course Prefix
HIST

Course Number
1113

Description
This course is designed to cultivate intellectual, moral, and aesthetic formation through the study of literature, history, and philosophy. Grounded in Socratic dialogue, the course engages students with classic works of the Western tradition in pursuit of Truth, Goodness, and Beauty. Literature serves as a window into the human heart, history offers insight into human action and rhetoric, and philosophy explores the nature of reality and the good life. Together, these disciplines form a foundation for liberal arts education and support the development of more thoughtful and humane individuals.

HIST2003 - LEADERS AND LEGACIES I

General

Course Prefix
HIST

Course Number
2003

Description
This course follows America's growth from an infant republic to an industrial giant, showing how the presidency evolved from a modest office to a more powerful, party-driven, and globally-engaged institution. Students will trace the nation's increasing democratization, territorial expansion, and struggles over slavery and union through the leadership of presidents from Washington to McKinley. Using key primary and secondary sources, learners will see how the presidency both reflected and propelled America's rise.

HIST2033 - PHILOSOPHAE I

General

Course Prefix
HIST

Course Number
2033

Description
This course invites students to critically engage with the intricate relationship between theology and philosophy, tracing the development of Christian thought from its early roots to its contemporary expressions. By examining the philosophical inquiries of these influential thinkers, students will deepen their understanding of the intellectual currents that have shaped the Christian tradition. Students will be encouraged to apply these philosophical insights to contemporary theological issues through discussions and analytical exercises.

HIST2233 - LEADERS AND LEGACIES II

General

Course Prefix
HIST

Course Number
2233

Description
This course traces America's rise from the Progressive Era to the digital age, showing how the presidency grew from reform-driven leadership into command of a vast administrative state and the role of "most powerful man in the world." Students will explore how presidents from Theodore Roosevelt to G.W. Bush expanded federal power, faced global challenges, and responded to social and economic change. Through primary and secondary sources, learners will see how the modern presidency shaped the nation's path.

Learning Outcomes

Learning Outcomes

Name
Analyze the evolution of presidential leadership and federal power in the United States from the Progressive Era through the early twenty-first century, with particular attention to how presidents responded to political, economic, social, and international crises.

Name
Evaluate how presidents used rhetoric, media, and public communication to shape national identity, influence public opinion, justify policy decisions, and exercise executive authority during periods of reform, war, uncertainty, and social change.

Name
Compare differing perspectives on American leadership—including those of political leaders, supporters, critics, and everyday citizens—and assess how public trust, public opinion, and national expectations influenced presidential decision-making.

Name
Interpret the recurring tensions between freedom and security, reform and restraint, morality and power, and limited versus expanded government within the broader context of modern American history.

Name
Examine how major events—including reform movements, economic crises, world wars, the Cold War, and postwar transitions—reshaped American government, society, global influence, and public perceptions of executive authority.

Name
Demonstrate historical thinking skills through the analysis of primary and secondary sources, the incorporation of multiple perspectives, and the creation of evidence-based arguments and projects related to modern American political leadership and history.

Integrate the Christian faith with the discipline.

Name
Identify important figures and events in the history of the discipline.

Name
Discuss the major schools of thought in the study of history.

Name
Discuss major works of scholarship that deal with different approaches, methods, or schools of thought in the study of history.

Name
Demonstrate a familiarity with historical works that illustrate different approaches, methods, or schools of thought.

Name
Integrate the Christian faith with the discipline.

HIST3003 - HISTORY OF SCIENCE AND HUMAN BODY

General

Course Prefix
HIST

Course Number
3003

Description
Illness and suffering have been as much a part of the human experience as the attempts made to avoid them. From antiquity till now, men and women have tried to understand the human body and its place within their own cultural, social, and religious landscapes. This course explores the history of how the human body was given meaning by examining the ways in which science, medicine, illness, and the body have intersected in western civilization from Antiquity through the Scientific Revolution.Prerequisites: None

Learning Outcomes

Learning Outcomes

Name
Identify the process of academic scheduling related to being a School of Honors student.

Name
Locate the resources that will help them to be successful students within the School of Honors.

Name
Define the steps required to successfully complete the thesis process.

Name
Connect their personal identities with the history and values (truth, service, and excellence) of the School of Honors community.

Name
Design a plan for engaging in the School of Honors community.

HONR2003 - HONORS PRINCIPLES OF ETHICS

General

Course Prefix
HONR

Course Number
2003

Description
This course is an examination of moral and social conduct and decision making in light of biblical and theological teaching. Contemporary ethical issues will be addressed (abortion, euthanasia, human rights, etc.) This course requires careful study of and reflection upon the appropriate biblical texts.

Learning Outcomes

Learning Outcomes

Name
Demonstrate a comprehensive understanding of the course concepts and issues of the topic(s) in the course.

Name
Analyze the significance of the differing philosophical issues in order to develop a basis for reflection and exploration.

Name
Synthesize an understanding of the course topics with conceptual coherence.

Name
Analyze various biblical categories as a means for developing the skills to compare, contrast, and extrapolate the implications of different topics and issues.

Name
Evaluate the importance of topics and issues.

Name
Apply an understanding of the course topics for spiritual formation, community integration, and the life of the mind.

HONR2223 - CITY AS TEXT

General

Course Prefix
HONR

Course Number
2223

Description
This course will offer students a structured exploration of a city of Polk County. City as Text is an interdisciplinary investigation of people, architecture, culture, and changing demographics. The course is structured in a manner that enables students to emphasize their respective disciplinary interests. It is the goal to for students to investigate and become knowledgeable about how cities function and how people function within them.

HRDV3003 - MANAGEMENT OF RELIEF & DEVELOPMENT

General

Course Prefix
HRDV

Course Number
3003

Description
Providing disaster and humanitarian relief is a complex process involving individuals from diverse backgrounds, locations, languages, preparation, involvement, and commitment. Leadership in these settings requires both skills in leading multifaceted projects, delegating responsibilities, inspiring volunteers, and managing funds. This course prepares students for leadership within the field of community relief and development.

Learning Outcomes

Learning Outcomes

Objective
Apply a theology of compassion by analyzing specific social, cultural, and economic issues facing the church (domestically and/or internationally) in light of Christian compassion.

Name
Explain compassion as it relates to the mission and purposes of the church by identifying and discussing historical and contemporary debates on this issue.

Name
Articulate a biblical understanding of compassion by analyzing the character of God and the people of God as revealed in the Old and New Testaments and reflecting on the personal application of this revelation.

Name
Differentiate key elements in biblical compassion by defining concepts such as mercy, justice, righteousness, and love explaining how these concepts relate to one another.

Name
Apply a theology of compassion by analyzing specific social, cultural, and economic issues facing the church (domestically and/or internationally) in light of Christian compassion.

HRDV3023 - CONTEXTUALIZED COMMUNICATION

General

Course Prefix
HRDV

Course Number
3023

Description
The need to communicate across multiple cultures is an increasingly critical requirement in today's multicultural environment, where national boundaries provide minimal isolation and face-to-face communication is replaced by technological connections. Students' own philosophies and worldviews provide a foundation upon which techniques and approaches for communications are explored.

Learning Outcomes

Learning Outcomes

Objective
Articulate cultural differences that may be encountered when serving disaster survivors and describe strategies for showing honor cross-culturally in disaster services."

Name
Assess and mitigate risk by identifying the type, cause, and impact of local, regional, and national disasters.

Name
Explain the range of responses available to various domestic disasters and humanitarian issues by developing plans for the four phases of disaster services (mitigation, preparedness, response, and recovery)

Name
Collaborate with local and regional relief and governmental organizations by analyzing networking approaches between governmental (federal, state, county, local) and non-governmental (NGO/VOAD, religious) agencies in disaster service operations.

Name
Coordinate disaster services for a local church or organization by developing strategies for resource procurement, transportation, and dispersal for various disaster relief scenarios.

Name
Articulate cultural differences that may be encountered when serving disaster survivors and describe strategies for showing honor cross-culturally in disaster services."

HRDV3043 - HOLISTIC DEVELOPMENT

General

Course Prefix
HRDV

Course Number
3043

Description
This course equips students with models that foster dignity rather than dependency and empowerment rather than entitlement. Students will learn how to partner with local churches and other stakeholders, assess community assets and needs, and formulate responsible approaches to community development. This introductory course on holistic development carefully builds a biblical view of poverty and a theology of responsible aid in the context of various real-world development topics. Students will also expand and deepen their understanding through service learning opportunities.

Learning Outcomes

Objective
Formulate biblically informed, socially responsible, and sustainable solutions for low-resourced, communities by participating in a development project and designing a community development project that incorporates evidenced-based strategies.

Name
Articulate a biblical view of poverty by relating theological and social principles to the multiple elements of poverty.

Name
Define and defend a model for holistic development by applying a theology of compassion and evaluating various relief and development models and community scenarios.

Name
Identify community assets and needs by explaining the various types of assessments for domestic and international settings.

Name
Develop strategies to effectively work alongside communities by identifying practices that respect autonomy, build trust, and promote dignity

Name
Formulate biblically informed, socially responsible, and sustainable solutions for low-resourced, communities by participating in a development project and designing a community development project that incorporates evidenced-based strategies.

HRDV3053 - APPLIED SUSTAINABILITY

General

Course Prefix
HRDV

Course Number
3053

Description
Applied Sustainability prepares students to meet the destitute challenges of this world through compassion, cutting edge technology, sustainable processes, and financially viable methods. Students investigate approaches to the provision of clean water and adequate food resources to both the Least Developed Countries (LDC) and to people most impacted by physical and economic disasters.

Learning Outcomes

Learning Outcomes

Objective
Formulate a framework and skills for addressing physical human needs.

Name
Understand core concepts in water treatment, small space agriculture, and clean stove construction for use globally.

Name
Evaluate principles and methods of applied sustainability.

Name
Apply logical reasoning processes to solving environmental and food production problems.

Name
Discuss the wonders of Gods creative design.

Name
Formulate a framework and skills for addressing physical human needs.

HRDV3063 - CONFLICT MANAGEMENT & NEGOTIATION

General

Course Prefix
HRDV

Course Number
3063

Description
Leadership of humanitarian programs requires the ability to successfully manage conflict in a variety of settings. This course investigates biblical conflict and reconciliation, the principles of mediation and negotiation, the role of power and culture, and characteristics of conflict competent leaders. In addition to the Bible, this course incorporates writings and videos from experts in the field to provide a well-rounded experience for students. Upon completion of this course, students will have the knowledge, skills, and abilities needed to address conflict with confidence - whether it be as a mediator or participant.

Understand Christ’s calling to be peacemakers by explaining the Christian community’s participation in conflict management as a function of identity and witness.

Name
Understand the nature of conflict in differing world views by describing underlying causes including the biblical and theological aspects of interpersonal conflict.

Name
Respond constructively to conflict by evaluating the effectiveness of various conflict management techniques in specific settings, such as interpersonal, small group, personal, and business situations.

Name
Articulate the role of negotiation in conflict management by analyzing the theories and practices of effective negotiation.

Name
Resolve conflict by adapting conflict resolution skills to real-life situations.

Name
Understand Christs calling to be peacemakers by explaining the Christian communitys participation in conflict management as a function of identity and witness.

HRDV4003 - CHILDREN & YOUTH IN CRISIS

General

Course Prefix
HRDV

Course Number
4003

Description
Children and youth are especially susceptible to the traumatic effects of natural and human-made disasters. Because of their higher level of innocence, minimal experience, and the vulnerable place they have in many societies, relief actions and strategies must identify actions and strategies as quickly as possible. In this course, students will identify stress symptoms and emotional suffering to help as much as is appropriate and then to direct them to qualified support specialists. This course is not intended for professional or trained counselors but for those on site immediately following natural or human caused disasters or who conduct outreaches where children and youth may be in crisis.

Learning Outcomes

Objective
Differentiate the stages of the nonprofit life cycle and the actions required by the IRS at each stage.

Name
Integrate biblical stewardship principles into a personal philosophy of nonprofit financial management.

Name
Utilize the principles of program design to formulate a financially sustainable plan that solves a social issue.

Name
Construct a problem statement, incorporating multiple layers of data and effectively presenting the validity of the social issue in question.

Name
Identify the legal frameworks and documentation that differentiate the third sector from the public and private sectors.

Name
Demonstrate familiarity with regulations and effective practices associated with maintaining a 501(c)3 status.

Name
Interpret 990s, legally required by the IRS for nonprofits to maintain compliance with federal regulations.

Name
Differentiate the stages of the nonprofit life cycle and the actions required by the IRS at each stage.

HRDV4033 - HUM RELIEF & DEV PRACTICUM

General

Course Prefix
HRDV

Course Number
4033

Description
The Humanitarian Compassion Practicum allows students to apply the theory and course-based learning to real-life situations through actual operation organizations and agencies. Students are responsible for procuring their practicum site, with the assistance of their academic advisor. Hope Education Network partners are available along with the university's own practicum partners.

HUMS1223 - THE GOOD LIFE

General

Course Prefix
HUMS

Course Number
1223

Description
In this course, students will explore the concept of the "good life" through the lens of biblical wisdom, examining how the good news of Scripture shapes our understanding of fulfillment, virtue, purpose, and human flourishing. Students will compare this vision of the good life to alternative systems of thought, especially those embodied in the secular version of the so-called "American dream." Together, students will engage with biblical principles on happiness, love, justice, mercy, and wisdom, while considering how these principles inform their relationships, work, and service to both local and global communities.Prerequisite: None

Learning Outcomes

Learning Outcomes

Objective
Create a document that outlines a path toward achieving the good life.

Objective
Examine the biblical narrative to understand the origins of human flourishing, the reasons why the good life is elusive, and God's intent for His creation, and compare/contrast modern secular explanations of the good life.

Objective
Examine the biblical treatment of wealth, sexuality, and health in the book of Proverbs and compare/contrast with modern secular treatments of these subjects.

Objective
Articulate how the cultivation of virtues like prudence, temperance, justice, fortitude, faith, hope, love, humility, and kindness form the foundation for the good life.

Objective
Examine the significance of labor, vocation, and the rhythms of rest (Sabbath) as integral to human flourishing, not just for personal well-being but for the good of others.

Objective
Evaluate the contribution of social media and AI toward human flourishing.

Objective
Explore the tension between the biblical understanding of family, friendship, and Church community and the modern shift toward expressive individualism.

Objective
Examine the corporate nature of the good life in addressing issues of poverty, justice, peace, and reconciliation in our local neighborhoods and across global borders.

Objective
Explore how biblical hope offers meaning and purpose, even in the midst of pain and hardship.

HUMS2203 - DRAMATIC INTERP OF ANCIENT LITERATU

General

Course Prefix
HUMS

Course Number
2203

Description
Dramatic interpretation of Homer's Odyssey, Virgil's Aeneid, and Sophocles' Oedipus Rex. Students read and analyze ancient masterworks and then practice the rhetorical canons of memoria and delivery to present dramatic interpretations both individually and in groups. Creative presentations of themes from ancient literature provide additional opportunity to practice extemporaneous speaking and delivery of ancient texts in oral form.

Learning Outcomes

Learning Outcomes

Objective
Interpret and evaluate Western artistic expression from a Christian standpoint.

Name
Identify the various disciplines that are integrated in the humanities, such as visual art, music, architecture, literature, geography, and philosophy.

Name
Comprehend the major ideas influencing Western culture as they are expressed in various art forms.

Name
Understand the history of cultures in the context of major epochs.

Name
Differentiate between medium, function, elements, and style in various art forms.

Name
Appreciate major forms of art as the expression of individual and cultural consciousness.

Name
Synthesize knowledge of art forms and their historical development and expression.

Name
Interpret and evaluate Western artistic expression from a Christian standpoint.

HUMS3113 - INEGRATING FAITH IN THE HUMANITIES

General

Course Prefix
HUMS

Course Number
3113

Description
This course reviews central elements of a Christian worldview, examines the theoretical dimensions of prominent approaches to the humanities, and explores ways to integrate Christian thought, principles, and values in the fields of history, language, literature, and writing. A majorobjective of the course is to assist students in developing a personal understanding of how to practically integrate Christian thought, principles, and values in their study and work in their majors.Prerequisite: None

Learning Outcomes

Learning Outcomes

Objective
Identify and reflect on evidence of God’s creative design in human activities.

Name
Review the central aspects of thought, principles, and values of a Christian worldview.

Name
Explain the major theoretical approaches and/or presuppositions of prominent schools of contemporary thought and their influences on contexts and practices in contemporary culture.

Name
Critically reflect on the interactive dynamics among culture, electronic media, and written texts.

Name
Develop a personal understanding of how to practically integrate Christian thought, principles, and values, in their study and work in the humanities.

Name
Consider issues regarding the expression and application of Christian faith in pluralistic cultural settings.

Name
Identify and reflect on evidence of Gods creative design in human activities.

HUMS5003 - ANCIENT CHRISTIAN TRADITION

General

Course Prefix
HUMS

Course Number
5003

Description
This seminar focuses on the second through tenth centuries of the Christian tradition and provides students the opportunity to explore the deep human questions as understood in the Ancient Christian World. Particular focus will be given to the areas of anthropology and cosmology as they relate to the Christological questions of the time as well as the practical implications of daily living and human formation that flow forth from the ancient Christian view of the world.

HUMS5013 - HUMAN FORMATION & FLOURISHING

General

Course Prefix
HUMS

Course Number
5013

Description
This seminar serves as the foundational course of the graduate program in which the critical questions of human formation and human flourishing are explored. Emphasis in this course will be placed on conceptions of human formation and human flourishing throughout Western Civilization in light of the ancient Christian tradition. Particular focus will be placed in the following areas: 1) The formation of the child and 2) The critical relationship between Christology and anthropology as it relates to how we image the child within a given culture.

HUMS5023 - MYTH & PHILOSPHY

General

Course Prefix
HUMS

Course Number
5023

Description
This seminar will consider the complex relationship between myth and philosophy in the ancient, pagan world, ancient Christian world, and modern world within Western Civilization. Important to this course is a consideration of how the Incarnation serves as a resolution to both myth and philosophy as well as the role myth and philosophy ought to play in human formation. This seminar requires close attention be given to those aspects of life that most people receive as “given” in their daily living such that deeply embedded cultural assumptions can be unearthed and appropriately evaluated in light of the norms of the program.

HUMS5033 - THE THOUGHT OF C.S. LEWIS

General

Course Prefix
HUMS

Course Number
5033

Description
This course centers on the thought of C. S. Lewis. Perhaps no other Christian writer and thinker has had more influence on the English-speaking world since the 20th century than C. S. Lewis. Through his theological, philosophical, literary, and poetic works, Lewis envisions and re-envisions the possibilities of Christianity faced with the challenges of the modern world. Equally important, the thought of C. S. Lewis invites us into a conversation with the past, present, and future as we journey along-side him in his own intellectual and spiritual formation as a man shaped by the modern world.

HUMS7113 - PAIDEIA & TRADITION

General

Course Prefix
HUMS

Course Number
7113

Description
Chesterton described education as the soul of a culture passing from one generation to the next. Lewis says it is propagation, not propaganda. This course explores the educational goals for students, educators, and society. From Homer to Plato to Augustine to Adler, education has a purpose that must be discovered, and students will explore historical approaches passed down from past generations. Note: This course contains regular synchronous meetings.

HUMS8113 - THE ARTS & SCIENCES

General

Course Prefix
HUMS

Course Number
8113

Description
The liberal arts have been fundamental for helping children to put aside childish things and rise to become free people. The seven arts must be understood as avenues to knowledge and virtue. In this class, students will research the changing historical perspectives on the nature and role of the Seven Liberal Arts in education and their relationship to the sciences.Note: This course contains regular synchronous meetings.

HUMS8333 - MODERN EDUCATION & THE RENEWAL

General

Course Prefix
HUMS

Course Number
8333

Description
Students will explore modern “models” of education from the Prussian schools to contemporary Christian, classical schools. Evaluating the nature of truth and reality and the stated purposes of education within different systems, research will focus on the choices that seek to balance the many and the few, the practical and the normative and their outcomes.Note: This course contains regular synchronous meetings.

HUMS8553 - ANCIENT GREECE & ROME

General

Course Prefix
HUMS

Course Number
8553

Description
The Greeks and Romans educated their wealthy youth to be the next generation of leaders in their cities and states. They understood that there were both character traits and leadership skills necessary to lead well. This class will explore the definition of education according to the pietistic, pragmatic, and philosophic education of the Greeks and Romans. Examining the content, purpose, and form of their educational models allows us to establish a solid framework for our studies. Note: This course contains regular synchronous meetings.

HUMS8773 - MIDDLE AGES & ENLIGHTENMENT

General

Course Prefix
HUMS

Course Number
8773

Description
In this course, students will research and compare the educational means and philosophies of the Middle Ages and Enlightenment periods. The divergence of views of the nature of reality and mankind's experience of it led to a massive change in education as man became prescriptive rather than descriptive in his relationship to both nature around him and his own nature. Examining these changes in philosophy will inform the students' view of the connection between pedagogy and anthropology.Note: This course contains regular synchronous meetings.

Learning Outcomes

Learning Outcomes

Objective
Analyze and synthesize human services insight into the tasks, challenges, and opportunities of life-long human change, growth, and development.

Name
Understand the influences of human services on human development through a variety of support agencies.

Name
Demonstrate an understanding of the interconnectivity and interplay of human services with physical, biological, emotional, and environmental factors.

Name
Develop a base knowledge of developmental theory and concepts pertaining to different human services agencies and their application in regard to the human lifespan.

Name
Apply the knowledge and skills of a human services generalist in linking specific stages of the lifespan with specific agencies and services.

Name
Evaluate research findings on human services and human development and apply such to the delivery of human services.

Name
Demonstrate effective communication skills related to various human service agencies.

Name
Identify the needs of participants for community support, working with participant informal systems, and assisting with identifying community connections.

Name
Demonstrate an adequate comprehension of the basic theories and concepts of human development as each relates to human services.

Name
Analyze and synthesize human services insight into the tasks, challenges, and opportunities of life-long human change, growth, and development.

HUSV3033 - GROUP DYNAMICS

General

Course Prefix
HUSV

Course Number
3033

Description
This course is a study of group dynamics, with particular attention to group development process. The role of the leader, issue-specific or problem-specific group facilitation, and strategies for dealing with particular group-process issues will be emphasized. Participation in group-process is required of every student.

Learning Outcomes

Learning Outcomes

Objective
Facilitate and deliver ethical and professional guidelines for group leaders – including competence, training, and confidentiality.

Name
Identify the principles of group dynamics including group process components, developmental stages, and group members roles and behaviors.

Name
Determine the leadership skills and the special problems and issues that arise

Name
for beginning group leaders.

Name
Apply appropriate assessment techniques and conduct a pre-group interview

Name
with prospective members to determine group participation and compatibility.

Name
Determine characteristic interaction patterns as they occur within a group setting, both as a group leader and a group member.

Name
Interpret personal thoughts, feelings, dynamics, and evaluations regarding group processes from the perspective of both a group facilitator and a group member.

Name
Facilitate and deliver ethical and professional guidelines for group leaders - including competence, training, and confidentiality.

HUSV3063 - PROGRAM PLANNING & EVALUATION

General

Course Prefix
HUSV

Course Number
3063

Description
This course will examine the theory, process, and procedures of program planning and evaluation. This course will also provide students with the basic set of skills necessary to design, develop, and evaluate various human service programs.

  AND HUSV3063 - PROGRAM PLANNING & EVALUATION
  AND HUSV3033 - GROUP DYNAMICS
  AND HUSV4053 - RESEARCH METHODS
  AND HUSV2433 - HS DEVELOPMENT ACROSS THE LIFE-SPAN

Learning Outcomes

Learning Outcomes

Objective
Communicate effectively with diverse groups of clients and staff throughout the internship.

Name
Examine the four stages (placement, initiation, working, and termination) of internship as they develop over time.

Name
Utilize a variety of theoretical models for human services clients.

Name
Examine the mission, services, and organizational structure of their site agency.

Name
Utilize the tool of journal writing to record learning into four categories: Knowledge, Skills, Personal Growth, and Career Development.

Name
Identify the roles of the various agencies within the agency delivery system.

Name
Apply the integrative process model to a direct and administrative service situation.

Name
Communicate effectively with diverse groups of clients and staff throughout the internship.

HUSV3083 - HS PRACTICUM FIELD EXPERIENCE II

General

Course Prefix
HUSV

Course Number
3083

Description
This course is a continuation of HUSV 3073. It provides students the opportunity to put theory, skills, and professional behavior into practice by working with an agency within the human services profession. Students will gain key knowledge, skills, and abilities by working within a field setting. Prerequisite: HUSV 3073

HUSV3333 - UNDERSTANDING HUMAN DIVERSITY

General

Course Prefix
HUSV

Course Number
3333

Description
This course examines the complex nature of culture and personal identity, explores populations at-risk, and encourages students to understand and appreciate diversity. Specific knowledge of individual cultures, awareness of the patterns of oppression experienced by those cultures, and skills relevant to developing a culturally competent approach to working with diverse people groups are addressed.

Learning Outcomes

Learning Outcomes

Objective
Analyze interracial communication strategies in light of biblical and theological teachings .

Name
Understand the history of race relations within the United States.

Name
Synthesize the theories, frameworks, and models in communication scholarship that has influenced the study of interracial communication.

Name
Examine how advances in communication scholarship have influenced the study of interracial communication.

Name
Develop oral and written proficiency in articulating the key concepts and statements of core theories related to improving interracial communication.

Name
Demonstrate effective communication strategies that can improve ones ability to successfully interact with persons of other races and ethnic groups.

Name
Analyze interracial communication strategies in light of biblical and theological teachings

HUSV4053 - RESEARCH METHODS

General

Course Prefix
HUSV

Course Number
4053

Description
The application of the scientific method of inquiry to theory and practice for the purpose of knowledge building and the development of best practice. The content of this course includes research design, quantitative and qualitative research methodologies, systematic evaluation of practice and evaluation of theory. The focus is on the development of social research and practice with individuals, groups, organizations, and communities.

Learning Outcomes

Learning Outcomes

Objective
Design research plans that are sensitive to diversity and discrimination.

Name
Demonstrate the methods of problem formation, intervention strategies, and evaluation of service delivery.

Name
Formulate research questions that are designed to test, refine, and build practice theory.

Name
Develop a research proposal to inform or evaluate an area of social practice (clinical, program, or policy).

Name
Utilize qualitative and quantitative research to examine human services issues.

Name
Apply reliability and validity to examine human services issues.

Name
Determine appropriate sampling strategies based on probability and non-probability sampling techniques.

Name
Determine an appropriate method of data collection.

Name
Identify the ethical issues when conducting social research.

Name
Demonstrate competence in the writing and research when reporting findings.

Name
Analyze the potential biases and issues of race, gender, socioeconomic status, religion, and cultural/ethnic diversity that can affect all stages of the research process.

Name
Design research plans that are sensitive to diversity and discrimination.

HUSV5003 - HUMAN SERVICES ADMINISTRATION

General

Course Prefix
HUSV

Course Number
5003

Description
This course addresses the historical and current trends in the development and administration of human services organizations. Emphasis will be placed on the administrative and management skills necessary to plan, develop, implement, and administer the overall and day-to-day activities of a human service agency or organization. Prerequisite:

Credit Hours

Learning Outcomes

Learning Outcomes

Objective
Demonstrate a basic level of competence in the ability to plan and administer a human service organization

Name
Articulate an understanding of the historical context and emergence of human service organizations

Name
Demonstrate knowledge of the organization, development and administration of human service organizations

Name
Articulate and diagram the organizational structure of various human service organizations

Name
Identify and define basic terms and concepts used in the administration of human service organizations

Name
Define the skills necessary to plan, develop, implement, and administer human services programs and activities

Name
Demonstrate a basic level of competence in the ability to plan and administer a human service organization

HUSV5023 - ORG LEADERSHIP & MANAGEMENT

General

Course Prefix
HUSV

Course Number
5023

Description
This course examines the impact of leadership and management as they relate to human services organizations. Emphasis will be placed on a broad-based understanding of leadership and management including what constitutes effective leadership in various contexts, the role of teams in organizations, the roles of power, politics, and conflict in organizations, and how to facilitate organizational change through visionary “servant-leadership.” Prerequisite: None

Learning Outcomes

Learning Outcomes

Objective
Design a program that meets the needs of a community.

Name
Describe the basic essentials of the planning and evaluation process.

Name
Discuss the ethical and legal issues in planning and evaluating human services.

Name
Examine the major issues related to program planning and evaluation.

Name
Explain the principal methods for overcoming barriers to program implementation.

Name
Evaluate human services programs.

Name
Design a program that meets the needs of a community.

HUSV5043 - ISSUES IN HUMAN SERVICES

General

Course Prefix
HUSV

Course Number
5043

Description
This course provides an examination of past and present issues in the field of human services. It examines societal factors that have advanced the evolution of the field. Emphasis is placed on present-day topics throughout the various human services fields. It provides for examinations, trends, and current challenges in non-profit management.Prerequisites: None

Credit Hours

Learning Outcomes

Learning Outcomes

Objective
Determine the role of the courts and how their decisions continue to impact human services delivery and social change.

Name
Assess current problems and issues relating to ethical behavior in the human services field.

Name
Distinguish between moral, legal, and ethical behavior and describe the comparative implications for individuals working in the field of human services.

Name
Determine the areas of law that affect human services workers and clients of these agencies.

Name
Identify the development of laws and regulations which pertain to the operation of human service agencies.

Name
Apply knowledge and skills of a human services professional in identifying legal and ethical issues of clients.

Name
Identify current information on human, legal, and civil rights in order to make referrals to advocacy and other organizations

Name
Establish their own personal, moral, and ethical code and how it affects their provision of professional service and identify related to personal strengths and challenges.

Name
Determine the role of the courts and how their decisions continue to impact human services delivery and social change.

HUSV5063 - GROUP DEVELOPMENT & CHANGE

General

Course Prefix
HUSV

Course Number
5063

Description
This course introduces human services as a collaborative process that takes place across many different agencies. It examines theories, research, and practices of effective team development. The focus of the course will be on the stages and functions of team development. Team dynamics such as motivation and decision making will be examined. Prerequisite: None

Credit Hours

Learning Outcomes

Learning Outcomes

Objective
Demonstrate cultural competence in working with various components of communities

Name
Describe the role of a human services professional as it relates to the community.

Name
Design an awareness campaign that brings community awareness to underrepresented

Name
issues related to the community, such as adequate housing or social support agencies.

Name
Examine the availability of public and private human service resources in the community

Name
and make recommendations for improvement.

Name
Analyze public policies and discuss the positive and negative impact of them on

Name
communities.

Name
Demonstrate an understanding of specific community organizing strategies and tactics.

Name
Apply systems theory to communities and organizations

Name
Demonstrate cultural competence in working with various components of communities

HUSV5233 - MULTICULTURAL ISSUES IN HUMAN SERV

General

Course Prefix
HUSV

Course Number
5233

Description
This course will examine the impact and effects that different cultural environments have on the Human Services professional, clients, and the helping process. This course will also explore the cultural challenges that Human Services professional can expect to encounter. Students will also examine the effects that past and present policies have had on multicultural issues.

Examine worker-client relations in working with at-risk children.

Name
Examine the impact that various social and economic issues have on at-risk children.

Name
Explore the basic principles, strategies, and techniques used in working with at-risk children.

Name
Analyze the theoretical approaches of working with at-risk children.

Name
Analyze information and research on challenging conditions for at-risk children.

Name
Examine worker-client relations in working with at-risk children.

HVAC2103 - TECHNICIAN FUNDAMENTALS I

General

Course Prefix
HVAC

Course Number
2103

Description
In this course, the student will learn to diagnose common component faults and usage of the voltmeter, ohmmeters, ammeter and multimeter among other system tools. The student will develop the concepts learned previously into practical skills needed to work in the field as a technician.

Credit Hours

Minimum Credit Hours:
3

Maximum Credit Hours:
3

(Credit Hours) Value:
3

Learning Outcomes

Learning Outcomes

Name
Develop the ability to use a voltmeter, ohmmeter, ammeter, and multimeter.

Name
Understand compressor failure including flooding, overheating as well as diagnosis from tear down and diagnostic charts.

Name
Diagnose common indoor and outdoor component faults and causes of mechanical faults that frequently occur in a residential heat pump typical faults.

Name
Develop proficient use of HVAC systems tools, materials and diagnosing devices.

Name
Identify the major refrigeration and heating systems components and their function.

HVAC2113 - TECHNICIAN FUNDAMENTALS II

General

Course Prefix
HVAC

Course Number
2113

Description
In this course, the student will learn how to work with refrigerants and apply techniques to ensure safety, detect leaks and interpret charts connected to the EPA 608 Exam. The student will develop the concepts learned previously into practical skills needed to work in the field as a technician.

Credit Hours

Minimum Credit Hours:
3

Maximum Credit Hours:
3

(Credit Hours) Value:
3

Contact Hours (not needed)

(Contact Hours) Value (not needed) :
0

Repeatable:
Yes

Number Of Repeats:

Learning Outcomes

Learning Outcomes

Name
Understand proportions of refrigerant blends, types of cylinders, safe handling when working with refrigerants.

Name
Explain refrigerant recovery requirements, techniques, and system-dependant (Passive) Recovery of Type 1

Name
Summarize leak detection, recovery and servicing of Type II refrigeration systems.

Name
Demonstrate an understanding of leak detection, recovery, and servicing of Type III low pressure appliances.

Name
Analyze how a Temperature Pressure and Leak Repair Charts are used on the EPA 608 Exam.

HVAC2303 - SAFETY AND CONCEPTS I

General

Course Prefix
HVAC

Course Number
2303

Description
In this course, the student will learn how to identify three mechanisms of heat transfer, how temperature affects molecular motion as well as the basic use of evaporators and compressors.

Credit Hours

Minimum Credit Hours:
3

Maximum Credit Hours:
3

(Credit Hours) Value:
3

Contact Hours (not needed)

(Contact Hours) Value (not needed) :
0

3

Learning Outcomes

Learning Outcomes

Name
Explain changes in temperature, reading and performing Farenheit / Celsius conversions.

Name
Identify three mechanisms of heat transfer.

Name
Understand how changes in temperature affect molecular motion.

Name
Make use of the basic functionality and interaction between evaporators and condensers.

Name
Demonstrate usage of metering devices.

HVAC2333 - SAFETY AND CONCEPTS II

General

Course Prefix
HVAC

Course Number
2333

Description
In this course, the student will gain an understanding of the Clean Air Act as well as the usage of refrigerants and safety protocols for usage of refrigerants and basic electrical concepts.

Credit Hours

Minimum Credit Hours:
3

Maximum Credit Hours:
3

(Credit Hours) Value:
3

Contact Hours (not needed)

(Contact Hours) Value (not needed) :
0

Repeatable:
Yes

Number Of Repeats:
0

Number Of Credits:
3

Learning Outcomes

Learning Outcomes

Name
Learn the differences between various systems and which climate they are used in.

Name
Understand and diagnose issues with low voltage current.

Name
Show full knowledge of the Clean Air Act and exams required for HVAC technicians.

Name
Demonstrate knowledge of how specific systems heat and control a structure.

Name
Apply a full understanding of usage of differing refrigerants and safety protocols for usage.

HVAC3203 - APPLIED COMPETENCIES I

General

Course Prefix
HVAC

Course Number
3203

Description
In this course, the student will learn the proper application of skills and concepts in the field such as diagnosing common mechanical and wiring faults by way of fault codes and trouble.

Credit Hours

Minimum Credit Hours:
3

Maximum Credit Hours:
3

(Credit Hours) Value:
3

Contact Hours (not needed)

(Contact Hours) Value (not needed) :
0

Repeatable:
Yes

Number Of Repeats:
0

Number Of Credits:
3

Learning Outcomes

Learning Outcomes

Name
Diagnose a residential heat pump system, with a faulty indoor fan relay and loose wiring

Name
Learn the indicators of a faulty thermostat, and loose wiring within the thermostat

Name
Diagnose common indoor and outdoor component faults

Name
Causes of mechanical faults that frequently occur in a residential heat pump typical faults

Name
Identify the fault code of outdoor major loads using the resistance value table.

Name
Determine the voltage and resistance of both the indoor and outdoor unit using the multimeter.

HVAC3213 - APPLIED COMPETENCIES II

General

Course Prefix
HVAC

Course Number
3213

Description
In this course, the student will learn how to diagnose problems with electrical equipment and how to mitigate the dangers of an older panel and/or electrical system. The student will demonstrate proper application of skills and concepts in the field.

Credit Hours

Minimum Credit Hours:
3

Maximum Credit Hours:
3

(Credit Hours) Value:
3

Contact Hours (not needed)

(Contact Hours) Value (not needed) :
0

Repeatable:
Yes

Number Of Repeats:
0

Number Of Credits:
3

Learning Outcomes

Learning Outcomes

Name
Learn to diagnose and repair faulty compressor, blower motor, as well as faulty primary control board.

Name
Diagnose and repair faulty compressor, faulty blower motor, faulty primary control board, faulty temperature sensors, and faulty valve coil.

Name
Understand and perform organized methods of troubleshooting

Name
Review of normal High Side conditions

Name
Review of normal Low Side conditions

Name
Diagnose system components

Name
Diagnose 11 common system problems

IDES2002 - DESIGN PROCESS

General

Course Prefix
IDES

Course Number
2002

Description
In this class, students will learn how a designer can develop an agile mindset that allows them to address complex issues both in and out of the design business. Reading, lectures, and creative exercises will prepare the student to observe, identify, and address any challenge--from a simple design brief to a complex problem.

Credit Hours

IDES2003 - HISTORY & INFLUENCS INDUSTRL DESIGN

General

Course Prefix
IDES

Course Number
2003

Description
This course will survey the history of industrial design, and its rise as a profession, focusing on the industrial revolution to contemporary times. The course will focus primarily on three-dimensional design movements, trends, societal impact, and materials and manufacturing processes as they relate to interior and exterior architectural spaces, furnishings, consumer product design and transportation design. Content will explore the transitions from applied arts to manufactured products, from engineering to aesthetics, and mass proliferation to sustainability and human-centric design practices.

IDES2012 - SKETCHING FOR COMMUNICATION

General

Course Prefix
IDES

Course Number
2012

Description
In this class, students will learn how basic sketching techniques can be used to quickly and effectively express concepts as well as how to use sketching as a collaboration tool. Students will also learn the role sketching plays in interpersonal communication, how a sketching for communication is different than sketching for art, and the benefits visual thinking has when addressing complex problems.

IDES3003 - DRAWING IN DYNAMIC PERSPECTIVE I

General

Course Prefix
IDES

Course Number
3003

Description
This hands-on course includes lecture, demonstration, progressive hand-generated drawing exercises, and project work, all designed to reveal the hidden keys to training our creativity to perceive space and the geometry of space with greater authority. The principles of one-point and two-point perspective and related visual systems will be presented in a bold problem-solving format ranging in scale from the simple to the complex in order to accurately express our conceptual capabilities. (Fee $350)

IDES3013 - DRAWING IN DYNAMIC PERSPECTIVE II

General

Course Prefix
IDES

Course Number
3013

Description
Building on the visual authority and refined hand-drawing skills developed in Drawing in Dynamic Perspective I, this course explores the application of advanced perspective principles in problem-solving scenarios for a diverse range of industrial design exercises.

Credit Hours

IDES3014 - LANGUAGE OF LINE

General

Course Prefix
IDES

Course Number
3014

Description
Rapid visualization (Power Drawing) skills will be presented in lecture, demonstration, progressive hand-generated drawing exercises, and project work in an in-depth study of the “language of line” and how it generates visual confidence. The course analyzes the three keys to drawing authority: form, position and texture. Further, the course will place these elements into a process that will produce and solve design problems ranging from understanding basic volumes to successfully illustrating complex volumes through study of applied science, ergonomics, and ethics.

IDES3015 - INNOVATIVE MEDIA SYSTEMS

General

Course Prefix
IDES

Course Number
3015

Description
This course will introduce and encompass the application of creative “mediums” to complete presentation graphic pieces. Design media such as marker, pastel, tempera, toned pencils, computer graphics, etc., will be utilized in demonstration and practical hands-on study to generate impactful presentation studies.

Credit Hours

IDES3023 - FUNDAMENTALS OF SURFACE DEVLPMT I

General

Course Prefix
IDES

Course Number
3023

Description

This course introduces the principles of creating innovative shapes, forms, and volumes, and explores how those principles influence manufacturing systems. Students will engage in using a variety of materials such as paper, structural foam, plastics, glass, wood, etc., to successfully convey a three-dimensional model interpretation. (Fee: $350)

IDES3034 - THREE DIMENSIONAL COMPOSITION

General

Course Prefix
IDES

Course Number
3034

Description
This course is designed to inspire, cultivate, and strengthen the student's creativity, design thinking application, and three-dimensional problem solving skills. Students will be given a design problem, and through application of research design and creative thinking skills, will generate possible solutions to a real-world problem.

Credit Hours

IDES4043 - PROFES & ETHICAL PRACTICES IN DESGN

General

Course Prefix
IDES

Course Number
4043

Description

This course is designed to introduce students to the day-to-day professional practices of working as an industrial designer and creative professional. This course presents students with practical and relevant material as it relates to preparing to find work, the search itself, transitioning to work life, and also the many options available through companies, entrepreneurialism and consultancy. Through lecture, guest presenters, relevant books and articles, videos and assignments, students will be challenged with the business world surrounding design, and how design brings value to brands, companies and consumers. Students will develop an appreciation for the birth of entrepreneurialism in America that fueled the country's growth in the industrial age.

IDES4054 - CONSUMER PRODUCT DESIGN

General

Course Prefix
IDES

Course Number
4054

Description
This course is designed to focus on the development of the designer's personal vision and preparation for careers in the area of product design. Completed solutions will be created by the candidates through concept sketches, renderings, layout studies, 3-D models, and a final, scale foam study. (Fee: $350)

IDES4074 - ARCHITECTURAL/EXTERIOR SPACE DESIGN

General

Course Prefix
IDES

Course Number
4074

Description
Architectural exterior space design concentrates on the discipline of developing the designer's expertise in utilizing structural materials to create the next generation of architectural design systems. Projects will include glass, metals, stone, and a diverse vocabulary of other materials that integrate the creative process to build confidence for this vocational choice.

INTL3153 - INTERNATIONAL BUSINESS

General

Course Prefix
INTL

Course Number
3153

Description
This course presents an analysis of geographic, political, social, economic, legal, and technological influences on international businesses. During the course, students will examine how businesses operate in an international environment composed of different political and cultural traditions and different governmental institutions. They will also study the opportunities and constraints presented by adjusting and accommodating varying national requirements.

Credit Hours

Learning Outcomes

Learning Outcomes

Name
International trade and how they affect Multinational Corporations. Understand the various modes of entry into international business, trade unions, and trade barriers

Name
Understand todays global economy, to include the cultural, economic, legal political, and technological environments for doing business in countries world-wide

Name
Expatriate management. Formulate strategies for staffing, training, and retaining high quality management teams for international operations.

Name
Cross cultural communication. Describe the role various cultures may play on operations, decision making and communications, and identify strategies for managing cultural influences on business objectives.

Name
Describe strategies for effective cross-cultural communication, negotiation, decision making, and leading and motivating people of different cultures.

Name
Cultural value dimensions. Understand and apply the GLOBE Projects nine and Geert Hofstedes five cultural value dimensions, and Edward Halls concept of high and low context cultures.

INTL4900 - INTERNATIONAL EXPERIENCE

General

Course Prefix
INTL

Course Number
4900

Description
This course pass/fail, no credit course provides documentation that a student has fulfilled the international experience requirement of certain majors and internships by traveling, working, ministering, or studying in a culture other than his/her own. The requirement includes successfully completing one of the following overseas opportunities:• The CBLS's Study Abroad Programs (i.e., Central Europe in 2020, etc.) • Study abroad for a semester through other approved agencies and schools. • The five-week Jerusalem study experience with the College of Christian Ministries & Religion in the fall or spring semesters. • The three-week Jerusalem study experience with the College of Business and Legal Studies in the summer. • Approved missions trips overseas.

INTL4903 - INTERNATIONAL BUSINESS INTERNSHIP

General

Course Prefix
INTL

Course Number
4903

Description
This is a supervised, structured work experience designed to augment and develop practical experience in conjunction with regular coursework. Participants are strongly encouraged to utilize this option to explore potential career paths. An International Internship is required of all international business majors.Prerequisite: INTL 3153, BUSI 3203, Approval by the Academic Advisor and the Chair of the Business Administration Department or his/her designee; Junior status and 2.5 GPA

Simple Requirements

Course Requisites

Type
Completion Requirement

Prerequisites

Complete ALL of the following Courses:
- INTL3153 - INTERNATIONAL BUSINESS
  AND BUSI3203 - PRINCIPLES OF MANAGEMENT

Approval by the Academic Advisor and the Chair of the Business Administration Department or his/her designee; Junior status and 2.5 GPA

Learning Outcomes

Learning Outcomes

Objective
Provide professional quality presentations relating to the learning experience using both written and verbal skills.

Name
Understand how material learned in the classroom is applied in an organizational setting.

Name
Perform detailed procedures in a specific area of international business and management as set forth in an internship learning agreement.

Name
Appreciate the experience of working and relating in a cross-cultural environment.

Name
Provide professional quality presentations relating to the learning experience using both written and verbal skills.

KINS2203 - INTRODUCTION TO KINESIOLOGY

General

Course Prefix
KINS

Course Number
2203

Description
This course is an introduction to the fundamental principles of human movement and their relationship to fitness and activity. The course will introduce the subdisciplines of Kinesiology including Sport Psychology, Motor Learning, Biomechanics, Exercise Physiology and Sport Pedagogy. The application of Kinesiology content will be discussed as it relates to professional development.

Credit Hours

Minimum Credit Hours:
3

Maximum Credit Hours:

Learning Outcomes

Learning Outcomes

Name
Apply the basic concepts of kinesiology, including terms and philosophy, from an exercise and sport movement perspective.

Name
Employ the movement analysis model to evaluate athletic, dance, or fitness performance.

Name
Recognize how performance is influenced by emotions, thoughts, and behavior.

Name
Evaluate the different career opportunities related to kinesiology professions.

KINS3013 - SPECIAL POPULATIONS AND EXERCISE

General

Course Prefix
KINS

Course Number
3013

Description
This course provides an integrative study of chronic conditions, developmental disorders, and diverse abilities, focusing on the underlying pathophysiology and the principles of adaptive exercise programming. The central theme of the course is to build an understanding of the physiological, physical, and motor characteristics of individuals with a wide range of needs, and to master the methods of modifying and accommodating individuals during physical activity and exercise.

Credit Hours

Minimum Credit Hours:
3

Maximum Credit Hours:

Number Of Repeats:
3

Number Of Credits:
3

Learning Outcomes

Learning Outcomes

Name
Explain the underlying pathophysiology of major chronic diseases and exceptional conditions, and how these affect exercise capacity and response.

Name
Identify specific exercise-related contraindications and safety guidelines for a wide range of special populations.

Name
Adapt and modify assessment and exercise prescription programs to meet the physical, intellectual, and affective needs and limitations of individuals with disabilities in diverse settings.

KINS3123 - ADAPTIVE PHYSICAL EDUCATION

General

Course Prefix
KINS

Course Number
3123

Description
An analysis of the neuromuscular and perceptual motor development of individuals with limited abilities and a study of activities designed to improve their motor skills. An introduction to some special populations in the clinical setting will also be introduced.

Credit Hours

Minimum Credit Hours:
3

Maximum Credit Hours:
3

Learning Outcomes

Learning Outcomes

Name
Research issues, problems and legislation related to individuals with disabilities.

Name
Identify the importance of planning and creating appropriate IEPs based on student assessments.

Name
Identify different special needs and how to create an adaptive PE class, tailoring to specific disorders and conditions.

Name
Explore the different career opportunities related to adaptive kinesiology professions.

Name
Identify appropriate items and equipment for the assessment of the motor development of students with Autism Spectrum Disorders.

Name
Observe an Adaptive Physical Education class setting, and identify teaching methods and equipment used during the lesson.

Name
Examine the history, role and importance of the Special Olympics.

KINS3133 - THEORY/PRACTICE OF COACHING

General

Course Prefix
KINS

Course Number
3133

Description
A study in the theory and practice of the fundamental techniques, organizational problems, and strategies involved in athletic coaching.

Credit Hours

Minimum Credit Hours:
3

Maximum Credit Hours:

3

Learning Outcomes

Learning Outcomes

Name
Explain the uniqueness of working and having a career as a coach

Name
Determine your personal definition of success and be able to explain it

Name
Develop a philosophy of coaching based on foundational belief

Name
Explain the dynamics of a team and use techniques to create a synergistic system for team development

Name
Develop a strategy and plan of how a team and program will develop

Name
Understand and use communication skills as they relate to interpersonal contracts with individuals and groups

Name
Understand the concept of motivation and develop techniques for motivating athletes

Name
Identify symptoms of coaching burnout and methods of overcoming it

KINS3303 - APPLIED BIOMECHANICS

General

Course Prefix
KINS

Course Number
3303

Description
This course is the study of basic biomechanical principles and concepts and their application in the analysis of various human movements with emphasis on sport and exercise skills.Prerequisite: KINS 2203 (required); BIOL 2083 or BIOL 1333 (preferred)

Credit Hours

Minimum Credit Hours:

Learning Outcomes

Learning Outcomes

Name
Identify the various movements of the body including the planes of motion.

Name
Analyze sport skills using the application of sport mechanics.

Name
Determine the anatomical and mechanical factors that relate to the performance of an observed movement.

Name
Identify and correct errors in sport skills using the application of sport mechanics.

Name
Recognize the application of sport mechanics as it is applied to teaching physical education and coaching.

KINS3403 - ENERGY SUPPLIES

General

Course Prefix
KINS

Course Number
3403

Description
This course addresses the nutrition needs of active people and athletes. Course topics include carbohydrate, protein, fat, vitamin, mineral, and water requirements for fitness and sport. Weight control, popular nutrition supplements, and ergogenic aids will also be reviewed.

Credit Hours

Minimum Credit Hours:
3

Maximum Credit Hours:

Learning Outcomes

Learning Outcomes

Name
Analyze how the intensity, duration, and fitness level influence the type of fuel used by the muscles for energy.

Name
Indicate the amount of macronutrients recommended per day for a training diet based on exercise intensity and duration.

Name
Explain the role of exercise in weight control (weight gain, maintenance, and weight loss), regarding calorie balance and body composition.

Name
Design a training diet that meets calorie needs based on the persons body weight, activity, and duration of exercise.

KINS3503 - EXERCISE TESTING AND PRESCRIPTION

General

Course Prefix
KINS

Course Number
3503

Description
This course explores the interconnected processes of health risk appraisal, exercise testing, and exercise prescription across the lifespan and for diverse populations. Students will gain the knowledge and practical skills necessary to accurately assess an individual's health status, stratify their risk given a variety of health conditions, and prescribe safe and effective personalized exercise programs.

Learning Outcomes

Learning Outcomes

Name
Identify and analyze critical components of physical movements.

Name
Demonstrate an understanding of basic principles of physical fitness concepts.

Name
Demonstrate the ability to assess physical capacity, peak performance and physiological responses to exercise using available technology.

Name
Perform comprehensive health risk appraisals and apply risk stratification models to classify individuals appropriately.

Name
Select, administer, and interpret the results of appropriate exercise tests.

Name
Design individualized, safe, and effective exercise prescriptions for healthy adults.

KINS4013 - KINESIOLOGY PRACTICUM I

General

Course Prefix
KINS

Course Number
4013

Description
A course designed to provide students with practical hands-on experience in the instruction of exercise technique in resistance training, plyometric training, aerobic and anaerobic training programs under the direction and supervision of the Kinesiology faculty.Prerequisite: KINS 2203

Credit Hours

Minimum Credit Hours:
3

Learning Outcomes

Learning Outcomes

Name
Gain practical experience in a specific area in Kinesiology under professional supervision and guidance.

Name
Conduct a systemic assessment to obtain subjective and objective information about clients.

Name
Assess pre-activity levels on clients and utilize results to personalize a fitness training program.

Name
Design and implement an integrated flexibility and core-training program for apparently healthy clients and those with a variety of stable, chronic diseases.

KINS4023 - KINESIOLOGY PRACTICUM II

General

Course Prefix
KINS

Course Number
4023

Description
This course provides the opportunity for Exercise Science, Pre-PT, Pre-OT, and Pre-AT students to gain hands on or observational experience required for their post-bachelors continued education. Students will be required to complete 70 hours with an industry professional in their chosen concentration. Students are responsible for securing their practicum location and for their own transportation to their practicum sites. This course will also prepare students for the application process for admittance into their chosen graduate program.

Learning Outcomes

Learning Outcomes

Name
Develop and prepare specific industry research project pertaining to chosen field of study

Name
Identify an understanding of the specialties within intended field of study

Name
Complete 70 hours of field observation in specified field

Name
Demonstrate proficient interview etiquette

Name
Prepare necessary documents required for application to graduate school

KINS4033 - CLINICAL KINESIOLOGY PRACTICUM II

General

Course Prefix
KINS

Course Number
4033

Description
This course provides the opportunity for Pre-PT, Pre-OT, and Pre-AT students to gain hands-on or observational experience required for their post-bachelors continued education. Students will be required to complete 70 hours with an industry professional in their chosen concentration. Students are responsible for securing their practicum location and for their own transportation to their practicum sites. This course will also prepare students for the application process for admittance into their chosen graduate program.

Learning Outcomes

Learning Outcomes

Name
Develop and prepare specific industry research project pertaining to chosen field of study

Name
Identify an understanding of the specialties within intended field of study

Name
Complete 70 hours of field observation in specified field

Name
Demonstrate proficient interview etiquette

Name
Construct professional eportfolio

Name
Prepare necessary documents required for application to graduate school

KINS4303 - THERAPEUTIC EXERCISE

General

Course Prefix
KINS

Course Number
4303

Description
This course explores the foundational concepts and practical application of Therapeutic and Corrective Exercise. Students will learn to distinguish therapeutic interventions from general fitness activities and apply principles of systematic movement assessment to identify and address common movement dysfunctions and muscle imbalances. Emphasis is placed on the use of exercise to restore physical function, manage chronic pain, prevent injury and disability, and enhance overall well-being and performance.

Credit Hours

Simple Requirements

Course Requisites

Type
Completion Requirement

Prerequisites

Complete ALL of the following Courses:

- KINS2203 - INTRODUCTION TO KINESIOLOGY

Learning Outcomes

Learning Outcomes

Name
Differentiate between therapeutic exercise, corrective exercise, and general exercise based on their distinct goals, design principles, and application.

Name
Analyze and explain the goals and benefits of therapeutic exercise, including its role in restoring function, pain management, and preventing future impairments.

Name
Identify and categorize the key types of therapeutic exercises (e.g., active, passive, strengthening, endurance) and justify the appropriate application of each in a case scenario.

Name
Discuss and apply the principles of corrective exercise, including how to systematically assess posture and movement to identify muscle imbalances or movement dysfunctions.

Name
Design and articulate a safe and effective exercise progression plan utilizing resistance (weights, bands), body weight, and cardiovascular modalities.

Name
Explain the role and responsibilities of a Corrective Exercise Specialist in elevating client performance and reducing injury risk.

KINS4403 - PHYSIOLOGY OF EXERCISE

General

Course Prefix
KINS

Course Number
4403

Description
This course investigates physiological mechanisms responsible for adaptations to acute and chronic exercise in the metabolic, endocrine, pulmonary, cardiovascular, and neuromuscular systems.Prerequisite: KINS 2203

Credit Hours

Minimum Credit Hours:
3

Maximum Credit Hours:
3

(Credit Hours) Value:
3

Contact Hours (not needed)

(Contact Hours) Value (not needed) :
3

Repeatable:
Yes

Number Of Repeats:
3

Number Of Credits:
3

Learning Outcomes

Learning Outcomes

Name
Explain the physiological mechanisms responsible for adaptations during acute exercise and after chronic exercise.

Name
Demonstrate an understanding of the various energy systems and their relationships to physical exercise and training.

Name
Identify the contributors to strength and anaerobic power and potential training adaptations.

KINS4503 - DESIGN OF FITNESS & WEIGHT TRAINING

General

Course Prefix
KINS

Course Number
4503

Description
In this course students will obtain detailed knowledge of the essentials of exercise science in order to design appropriate, effective, and safe long-term exercise programs.This course provides each student with the opportunity to design a fitness program for a specific sport or training goal. At the end of the semester, the student will have a personal fitness manual for their specific sport or training goal that they created through personal research.Prerequisite: KINS 2203

Credit Hours

Number Of Credits:
3

Learning Outcomes

Learning Outcomes

Name
Apply an understanding of the basic structure and function of the muscular, neuromuscular, cardiovascular, and respiratory systems related to strength training and conditioning.

Name
Apply an understanding of the bioenergetics of exercise and training.

Name
Describe the biomechanical concepts used in strength training and conditioning.

Name
Demonstrate and understand appropriate tests for assessment of participants current strength and conditioning status.

Name
Design strength training and conditioning prescription based on desired participant outcomes and evidence-based research.

Name
Communicate and educate participant on appropriate use of exercises.

Name
Evaluate appropriate and inappropriate uses of strength training and conditioning with consideration of participant safety.

KINS4533 - CARE & PREVENTION OF ATHL. INJURIES

General

Course Prefix
KINS

Course Number
4533

Description
This course is designed to introduce students to entry level knowledge of sport related injuries. The course includes units that deal with the history of athletic training, basic anatomy of common injuries in athletics, evaluation procedures of such injuries, preventative measures to reduce the incidence of injuries and basic treatment and rehabilitation procedures that are used after an injury occurs.Prerequisite: KINS 2203

Credit Hours

Minimum Credit Hours:
3

Maximum Credit Hours:
3

(Credit Hours) Value:
3

Contact Hours (not needed)

(Contact Hours) Value (not needed) :
0

Repeatable:
Yes

3

Learning Outcomes

Learning Outcomes

Name
Describe the mechanisms of tissue trauma

Name
Know and recall the anatomy of the foot, ankle, lower leg, knee, hip, shoulder, elbow, wrist, and hand.

Name
Describe injuries associated with the different areas of the body.

Name
Use conditioning methods of rehabilitation and injury prevention.

Name
Describe nutritional, pharmacological, and therapeutic methods of rehabilitation.

Name
Understand environmental conditions that are conducive to injury.

KINS4633 - ORTHOPEDIC EVALUATION ATHL INJURIES

General

Course Prefix
KINS

Course Number
4633

Description
This course is a study of principles and processes involved in the recognition, assessment, and orthopedic evaluation of athletic injuries. Application is made to sport and rehabilitation.Prerequisite: KINS 2203; KINS 4533

Credit Hours

Minimum Credit Hours:
3

Maximum Credit Hours:

Learning Outcomes

Learning Outcomes

Name
Distinguish the difference between types and causes of athletic injuries.

Name
Demonstrate knowledge on how to prevent sports injuries.

Name
Demonstrate the ability to evaluate orthopedic injuries.

Name
Demonstrate the ability to evaluate and treat neck and low back injuries.

Name
Demonstrate the ability to evaluate and treat injuries involving the appendicular skeleton.

KINS5123 - TOPICS IN KINESIOLOGY

General

Course Prefix
KINS

Course Number
5123

Description
This course explores contemporary events and topics in the field of Kinesiology. Topics coveredinclude current issues and trends in Sport Administration, Ministry, Coaching, Law, and SportTraining.

Credit Hours

Minimum Credit Hours:
1

Maximum Credit Hours:
4

(Credit Hours) Value:

KINS5663 - PSYCHOLOGY OF HUMAN PERFORMANCE

General

Course Prefix
KINS

Course Number
5663

Description
This course will explore the psychological issues faced by athletes, teams, coaches, educators, and organizations. Elements of social psychology impacting the coach-athlete relationship will be analyzed. Topics explored consist of intrinsic and extrinsic motivation, psychosocial development, and perceptions of efficacy.

Credit Hours

Minimum Credit Hours:

KINS5703 - ADAPTIVE KINESIOLOGY

General

Course Prefix
KINS

Course Number
5703

Description
This course is an advanced study of biomechanical principles of human performance and its application to the analysis of motor development. Students will study the dynamics of human velocity, laws of motion, pathomechanics, and varying teaching and coaching methods used in adaptive kinesiology.

Credit Hours

Minimum Credit Hours:

KINS5993 - THESIS CAPSTONE PROJECT

General

Course Prefix
KINS

Course Number
5993

Description
The Kinesiology graduate capstone is a student led research project which is completed in the form of a thesis or project/presentation. The area of study pursued in each capstone will be based upon the research specialization of the student. Research areas may include, but is not limited to: Sport Administration, Sport Law, Exercise Science, Physical Education, Coaching, Sport Ministry, etc.

KINS6223 - HEALTH AND WELLNESS

General

Course Prefix
KINS

Course Number
6223

Description
This course is an overview of health promotion, wellness, and disease prevention concepts as applied to individual, familial, and community health. Students will be introduced to the importance of overall wellness, exercise physiology, and health education. This course also explores the correlation of nutrition and fitness on the development of wellness-based training programs.

KINS6403 - KINETIC ANATOMY

General

Course Prefix
KINS

Course Number
6403

Description
This course is an overview of anatomical structures and their role in the movement of the human body. Students will recall anatomical structures, movements, bones, muscles and joints and how these impact and allow us to move throughout various activities. The course will explore various injuries, and how these impact movement.

Credit Hours

Learning Outcomes

Learning Outcomes

Name
Identify and use appropriate verbiage when referring to anatomical structures and the human body.

Name
Identify and locate various anatomical structures such as bones, muscles, tendons.

Name
Explain how these anatomical structures produce movement and how movements are impacted by injury or changes in these structures.

Name
Identify causes, signs/symptoms, and treatment options for various injuries impacting movement of the human body.

KINS6503 - APPLIED STUDIES IN MOTOR LEARNING

General

Course Prefix
KINS

Course Number
6503

Description
This course provides a survey of theories of motor control and motor learning, their application in understanding typical movement patterns, and introduces the practical utilization of these principles in clinical practice, coaching, and motor skill education. This course has a focus on current research and hands-on experiments.Prerequisite: NoneRepeatable: Course not repeatable

KINS6913 - HEALTH LAW AND BIOETHICS

General

Course Prefix
KINS

Course Number
6913

Description
This course is a survey-style introduction to legal topics in health policy and bioethics. Topics covered may include the legal aspects of the doctor-patient relationship, medical malpractice, privacy issues, health care finance, end-of-life issues, organ donation, disability, mental health, medical product regulation, and intellectual property.

KINS7004 - RESEARCH METHODS, AI, AND ETHICS

General

Course Prefix
KINS

Course Number
7004

Description
This foundational course provides an in-depth exploration of research methodologies and techniques essential for the field of Kinesiology, with an added focus on Artificial Intelligence (AI) and ethical considerations in research. Students will engage with both quantitative and qualitative research designs, emphasizing their application in Kinesiology and the integration of emerging AI technologies. Key topics include the development of literature reviews, research design principles, methodological rigor, data analysis, and ethical dilemmas in AI use. Students will also explore the evolving role of AI in data collection, analysis, and decision-making within Kinesiology research. The course will foster critical thinking about how AI intersects with human-centered research, particularly in areas that demand ethical responsibility. A significant focus will be placed on preparing students to conduct original research, adhering to ethical standards, and navigating the dissertation process while incorporating AI tools.

KINS7014 - QUALITATIVE RESEARCH

General

Course Prefix
KINS

Course Number
7014

Description

This course offers a comprehensive exploration of qualitative research methods within the field of Kinesiology. Students will learn how to design, conduct, and analyze qualitative studies, focusing on methodologies such as interviews, focus groups, ethnography, and case studies. Emphasis will be placed on the philosophical foundations of qualitative research, ethical considerations, data collection techniques, and strategies for data interpretation. The course prepares students to contribute to Kinesiology research through a deep understanding of qualitative inquiry and its applications.

KINS7024 - QUANTITATIVE RESEARCH

General

Course Prefix
KINS

Course Number
7024

Description

This course provides a deep dive into quantitative research methodologies in Kinesiology. Students will learn to design, conduct, and analyze quantitative studies, with a focus on statistical methods, data collection strategies, and measurement techniques specific to the field. The course will cover research design, hypothesis testing, and data interpretation to ensure the application of robust statistical analysis in Kinesiology research. Emphasis will also be placed on critically evaluating existing quantitative studies and designing rigorous, reproducible research.

KINS7034 - STATISTICAL EVALUATION

General

Course Prefix
KINS

Course Number
7034

Description
This course focuses on the application of statistical techniques, measurement principles, and evaluation methods in Kinesiology research. Students will gain an in-depth understanding of statistical analysis and the use of measurement tools for assessing physical performance, health outcomes, and program effectiveness. Special emphasis will be placed on program evaluation within health, fitness, and sport settings, equipping students with the skills to critically assess and improve interventions. The course will also explore the ethical and practical considerations of using statistical methods and evaluation tools in real-world contexts.

KINS7204 - NUTRITIONAL BIOCHEMISTRY

General

Course Prefix
KINS

Course Number
7204

Description
This course explores the biochemical foundations of nutrition and its critical role in health, fitness, and sport performance. Students will examine the molecular mechanisms through which nutrients influence metabolic pathways, energy production, and overall physiological function. Special emphasis will be placed on understanding how nutritional biochemistry impacts athletic performance, recovery, and health outcomes. The course will also delve into the application of biochemistry in designing nutrition interventions for athletes and active individuals, with a focus on evidence-based practices.

KINS7214 - PSYCHOPATHOLOGY

General

Course Prefix
KINS

Course Number
7214

Description

This course provides an in-depth exploration of psychopathology, focusing on the symptoms, behaviors, causes, development, and treatments of various mental health disorders, with a specific emphasis on their relevance in health, fitness, and sport contexts. Students will examine how mental health conditions can impact performance, behavior, and overall well-being in clients or patients. The course will also address strategies for identifying, assessing, and providing appropriate support or referrals for individuals with mental health concerns in athletic and fitness settings. Emphasis will be placed on a holistic approach to understanding mental health and its intersection with physical health and performance.

KINS7222 - HEALTH LAW, TORTS, & NEGLIGENCE

General

Course Prefix
KINS

Course Number
7222

Description

This course provides an in-depth exploration of legal and ethical issues relevant to health, fitness, and sport. Students will examine key legal principles, including Tort Law, Constitutional Law, Contract Law, and Organizational Compliance, and their application to Kinesiology-related fields. Special emphasis will be placed on understanding negligence and its implications for health and fitness professionals, as well as the ethical considerations in organizational practices. The course will also focus on bioethical dilemmas and legal responsibilities in both clinical and athletic settings, equipping students with the knowledge to navigate complex legal and ethical challenges in Kinesiology practice.

KINS7234 - CLIENT, PATIENT, & ATHLETE ADVOCACY

General

Course Prefix
KINS

Course Number
7234

Description
This course explores the essential skills and strategies for advocating for clients, patients, and athletes in health, fitness, and sports settings. Students will learn how to effectively connect with individuals at various stages of their health, fitness, or performance journey, with a focus on empathy, communication, and understanding unique needs. Special emphasis will be placed on the concept of meeting individuals "where they are" and collaboratively developing tailored plans to improve their outcomes. The course will also cover ethical considerations and practical approaches to ensure successful advocacy and support for diverse populations.

KINS7404 - APPLIED MOTOR LEARNING

General

Course Prefix
KINS

Course Number
7404

Description
This course provides an in-depth exploration of motor learning principles and their practical application in the context of Kinesiology. Students will examine how individuals acquire, refine, and retain motor skills, with a focus on the influence of cognitive, environmental, and physiological factors. The course will explore evidence-based strategies for enhancing motor learning in diverse populations, including athletes, patients, and individuals in physical therapy or fitness settings. Emphasis will be placed on applying theoretical knowledge to real-world scenarios to improve performance and motor skill acquisition.

KINS7414 - APPLIED BIOMECHANICS

General

Course Prefix
KINS

Course Number
7414

Description

This course offers an advanced examination of the principles of biomechanics and their practical applications in the field of Kinesiology. Students will explore the mechanical principles governing human movement, including force, motion, and tissue response to stress, with an emphasis on real-world scenarios such as athletic performance, rehabilitation, and injury prevention. The course will focus on using biomechanical analysis tools and techniques to assess movement patterns, optimize performance, and inform interventions. Students will also engage in research aimed at advancing biomechanical applications in health, fitness, and sports.

KINS7424 - APPLIED EXERCISE PHYSIOLOGY

General

Course Prefix
KINS

Course Number
7424

Description

This course explores the physiological responses and adaptations to exercise, with a focus on their practical application in health, fitness, and sport. Students will investigate the mechanisms behind cardiovascular, muscular, and metabolic responses to physical activity, as well as the effects of training on performance and health outcomes. Emphasis will be placed on applying exercise physiology knowledge to design, implement, and evaluate exercise interventions tailored to diverse populations, including athletes, patients, and individuals in clinical settings. The course will also provide an opportunity for students to engage in research that bridges theory with applied practice in exercise science.

KINS9106 - DISSERTATION I

General

Course Prefix
KINS

Course Number
9106

Description
This course is designed to guide students through the process of developing and completing their dissertation proposal, which includes drafting Chapters 1-3 of the doctoral dissertation: Introduction, Literature Review, and Methodology. Students will refine their research questions, conduct a thorough review of existing literature, and develop a clear and rigorous methodology for their proposed research. Emphasis will be placed on building a strong theoretical framework, identifying gaps in the literature, and creating a well-structured research design. The course will prepare students for the next steps in their dissertation journey, providing the foundation for data collection and analysis.

KINS9206 - DISSERTATION II

General

Course Prefix
KINS

Course Number
9206

Description
This course provides students with the opportunity to complete their doctoral research study and present their findings in an oral dissertation defense. Building upon the dissertation proposal, students will carry out the research outlined in their proposal, analyze their data, and compose their final dissertation. The course culminates in an oral defense, where students will present their research methodology, results, and conclusions to a committee, demonstrating their ability to defend their work and contribute new knowledge to the field of Kinesiology. Emphasis will be placed on effective communication, critical thinking, and the integration of feedback to refine the final dissertation.

KINS9901 - DISSERTATION MATRICULATION

General

Course Prefix
KINS

Course Number
9901

Description
This course provides additional time and support for students who need further research refinement or have completed requirements during their dissertation proposal semester. Students will work closely with their dissertation advisor to refine their research, address any remaining questions, and develop a clear plan for completing their dissertation. The course focuses on individualized guidance, ensuring students make steady progress toward their dissertation defense.

Learning Outcomes

Learning Outcomes

Objective
Compose cogent, sophisticated essays based on detailed textual analysis.

Name
Demonstrate a sound general understanding of the chosen texts, including their historical, literary, and cultural contexts.

Name
Understand and apply, in written and in oral contexts, a range of literary and critical terms.

Name
Analyze selected texts, relating them to significant elements in their cultural and historical contexts.

Name
Adopt a critical approach to the selection and organization of material in order to produce a written or oral argument.

Name
Research, plan, and write an expository essay related to the selected course readings.

Name
Compose cogent, sophisticated essays based on detailed textual analysis.

LACS3933 - CENTRAL AMERICA

General

Learning Outcomes

Learning Outcomes

Objective
Interpret course content cogently orally and in writing.

Name
Recognize the continuity and diversity present in a body of texts or discursive practices that share a given formal structure, origin, or linguistic or topical focus.

Name
Comprehend the artistic and/or structural dimensions of course content.

Name
Communicate the social and political dimensions of course content.

Name
Relate literary, critical and methodological works of varied cultural contexts to his or her present cultural context.

Name
Interpret course content cogently orally and in writing.

LANG1003 - LATIN I: GRAMMAR & TEXTS

General

Course Prefix
LANG

Course Number
1003

Description
This is the first course in the initial three-semester sequence in which the student undertakes the mastery of basic Latin forms, syntax, and vocabulary. The analytic approach of forms and syntax is retained, with attendant English-to-Latin composition, while attention to the comprehension of Latin sentences and connected prose is not neglected.

Learning Outcomes

Learning Outcomes

Name
Exhibit mastery of the morphology of core grammar lessons - particularly:

Name
a. Nouns of the first to third declensions;

Name
b. Adjectives of the first and second declensions;

Name
c. Active, indicative system of all regular verbs;

Name
d. Active, indicative system of sum and possum;

Name
e. The demonstrative pronouns/adjectives hic, ille, is, and idem; the personal pronouns, and intensive pronouns.

Name
Mastery of the vocabulary and basic case usages presented, both in listed entries as well as in the Practice and Review sentences and the Sententiae Antiquae.

LANG1013 - LATIN II: SYNTAX & TEXTS

General

Course Prefix
LANG

Course Number
1013

Description
This is the second course in the initial three-semester sequence in the study of basic Latin forms, syntax, and vocabulary. The method of study pursued in Latin I is continued in this course. The semester concludes with the formation and basic usage of the subjunctive.

Learning Outcomes

Learning Outcomes

Name
Memorize foundational Latin forms, syntax, and vocabulary.

Name
Internalize several hundred vocabulary words.

Name
Begin to engage in basic Latin texts.

Name
Become familiar with various styles of Latin literature.

LANG1023 - GREEK I: GRAMMAR & TEXTS

General

Course Prefix
LANG

Course Number
1023

Description
The Greek alphabet and the pronunciation of classical and Hellenistic Greek are introduced straightaway. The declension of nouns and adjectives and the conjugation of regular verbs are studied systematically. Vocabulary lists are introduced in each lesson and are reinforced by the translation of both Greek-to-English and English-to-Greek sentences. By the end of the semester, the readings in the lesson are centered on unaltered passages of Greek set texts; thus, a serious literary text is the basis of study from the very first course.

Learning Outcomes

Learning Outcomes

Name
Memorize the declensions of nouns and adjectives and the conjugation of basic regular verbs.

Name
Memorize 500+ vocabulary words.

Name
Read quickly and accurately in simple Greek texts.

Name
Become familiar with various literary texts in Greek.

LANG1033 - GREEK II: SYNTAX & TEXTS

General

Course Prefix
LANG

Course Number
1033

Description
Unaltered passages from Greek set texts are the center of each lesson. Additional forms and syntactic principles are introduced to complete the basic examination of the Greek language (pronouns, verbs, third- declension adjectives, and irregular verbs). Thus by the end of the semester the essential properties of the language have been covered.

Name
Read quickly and fluently with intermediate Greek text selections.

Name
Become increasingly familiar with a selection of Greek authors and literary styles.

LANG1123 - CLASSICA GREEK I: GRAMMAR & TEXTS

General

Course Prefix
LANG

Course Number
1123

Description
Classica Greek I is an introductory course designed for students eager to explore the foundations of classical Attic Greek, the language of renowned philosophers, playwrights, and historians such as Plato, Sophocles, and Herodotus. Students will
acquire a solid understanding of the Greek alphabet, essential grammar rules, and a foundational vocabulary. Emphasis will be placed on developing reading and writing skills, focusing on authentic ancient Greek texts. By the end of the course, students will be equipped to read and translate simple passages from classical Greek literature.

Learning Outcomes

Learning Outcomes

Name
Demonstrate the ability to read, write, and pronounce the letters of the Greek alphabet, laying the groundwork for further linguistic exploration.

Name
Analyze fundamental grammatical structures, including nouns, verbs, adjectives, and articles that will develop their understanding of sentence construction and syntax in classical Greek.

Name
Develop a foundational vocabulary of common words and expressions in classical Greek literature.

Name
Demonstrate strategies for reading and accurately translating authentic classical Greek texts, starting with simplified passages and gradually progressing to more complex excerpts.

Name
Analyze ancient Greece's historical and cultural context, exploring the significance of language in shaping societal norms, beliefs, and artistic expression.

Name
Practice writing in classical Greek through short compositions and translation exercises, and engage in oral exercises to enhance pronunciation and conversational skills.

Name
Apply language skills in the context of meaningful and culturally significant texts by exploring selected works from classical Greek literature

Name
Apply grammar, dialectic, and rhetoric to integrate the topic with God's revelation through His creation, Moral PhiloSophae, and OrthoDoxia defined through scriptural paideia.

LANG1124 - SPANISH I: LOST TOOLS OF WRITING I

General

Course Prefix
LANG

Course Number
1124

Description
This is an elementary course designed for students who wish to develop the basic skills of speaking, listening to, reading, and writing Spanish. Students will learn conversational skills and beginning grammatical concepts, gain a strong vocabulary base, and practice nuances of pronunciation through comprehensible input by reading fairy tales in Spanish.

Learning Outcomes

Name
Explain the intricacies of advanced grammatical structures and syntactical constructions found in the New Testament, including complex verb forms, participles, and conditional clauses, to be able to navigate biblical Greek's subtleties confidently.

Name
Build their biblical Greek vocabulary to include terms relevant to theological discourse, specialized contexts, and diverse genres within the New Testament.

Name
Demonstrate understanding of biblical exegesis and hermeneutical principles through interpreting and analyzing more challenging passages.

Name
Explain the principles of textual criticism by examining the manuscripts of the New Testament and understanding the process of determining the most likely original readings.

Name
Interpret and translate more complex passages from the New Testament.

Name
Analyze practical applications of biblical Greek in ministry, preaching, and academic research.

Name
Write and present an independent research project that explores a specific section of the New Testament

Name
Apply grammar, dialectic, and rhetoric to integrate the topic with Gods revelation through His creation, Moral PhiloSophae, and OrthoDoxia defined through scriptural paideia.

LANG2083 - CLASSICA HEBREW NEVI'IM

General

Course Prefix
LANG

Course Number
2083

Description
Students will embark on an advanced exploration of Hebrew Nevi'im literature, focusing on the profound contributions of the Jewish Prophets. Building upon the foundational knowledge acquired in Classica Hebrew II, this course aims to further refine your Hebrew language skills by delving into the captivating linguistic and cultural expressions found in the prophetic texts. From the majestic visions of Isaiah to the lamentations of Jeremiah, the narratives of Samuel, the symbolic acts of Ezekiel, and the concise messages of the Minor Prophets, this course invites students to engage deeply with the linguistic nuances, theological depth, and cultural context of the prophetic voices in the Hebrew Bible.Prerequisite: LANG 1093 Classica Hebrew II: Syntax and Texts

Learning Outcomes

Learning Outcomes

Name
Analyze unique linguistic elements and stylistic devices employed by the Prophets to review and advance their understanding of grammatical structures and syntax, explicitly focusing on features found in prophetic literature.

Name
Analyze the linguistic and literary features that characterize each Prophet's unique style.

Name
Analyze prophetic passages for literary devices, rhetorical strategies, and symbolic language, and the use of metaphors, parallelism, and other literary features to convey profound messages.

Name
Investigate how linguistic choices reflect the time's socio-political and religious realities, including the cultural and historical context in which the Prophets lived and wrote.

Name
Identify theological themes presented by the Prophets, including the concept of covenant, repentance, and messianic expectations that conveyed hope, rebuke, and the promise of restoration.

Name
Compare the linguistic and stylistic features of different Prophets and how their styles and messages contribute to the overall narrative of the Hebrew Bible.

Name
Discuss how the Prophets are interpreted and understood in different religious traditions and the enduring relevance of the prophetic messages in contemporary contexts.

Name
Apply grammar, dialectic, and rhetoric to integrate the topic with Gods revelation through His creation, Moral PhiloSophae, and OrthoDoxia defined through scriptural paideia.

LANG2093 - CLASSICA HEBREW TORAH

General

Course Prefix
LANG

Course Number
2093

Description
In this course, students will explore how Scripture reveals God’s intended paideia for His creation. We are encouraged to live our God-given lives and employ reasoning consistent with this worldview. This course considers how the practice of Chemistry topics and investigations are inextricably connected with implementing this paideia in our lives and connecting these Chemistry topics with Moral PhiloSophae and OrthoDoxia.Prerequisite: LANG 1093 Classica Hebrew II: Syntax and Texts

Complete a comprehensive review of advanced grammatical structures and syntax learned in Hebrew II to address specific grammatical challenges encountered in Torah passages.

Name
Employ understanding of the linguistic diversity and nuances of words used in legal, narrative, and poetic sections of the Torah by reading and translating complex sentences.

Name
Analyze Torah passages for literary devices, rhetorical strategies, and stylistic elements, including the use of parallelism, chiastic structures, and other literary features.

Name
Analyze the social, religious, and political influences on the composition of the Torah and the cultural and historical context in which the Torah was written.

Name
Investigate how linguistic choices in Torah passages, including the Ten Commandments and legal codes, conveyed ethical principles and societal norms.

Name
Compare the narrative complexity and theological messages within the Torah with other biblical genres.

Name
Analyze how the Torah's style influences and contrasts with prophetic, poetic, and historical writings.

Name
Apply grammar, dialectic, and rhetoric to integrate the topic with Gods revelation through His creation, Moral PhiloSophae, and OrthoDoxia defined through scriptural paideia.

Learning Outcomes

Objective
Read and understand contemporary texts from a variety of sources.

Name
Demonstrate an understanding of increasingly complex Spanish grammatical structures.

Name
Analyze and manipulate increasingly complex Spanish language structures.

Name
Comprehend increasingly complex Spanish spoken at conversational speed.

Name
Communicate in Spanish with confidence.

Name
Demonstrate a capacity to translate from English to Spanish and Spanish to English on an intermediate level.

Name
Write a non-guided, descriptive essay in Spanish.

Name
Read and understand contemporary texts from a variety of sources.

LANG2153 - TESOL METHODS AND MATERIALS

General

Course Prefix
LANG

Course Number
2153

Description
This course provides students with a professional repertoire of theory- and research-based methods, materials, and current best practices for teaching English as a foreign or second language to juvenile and adult beginner, intermediate, and advanced proficiency students. This course is not applicable to FLDOE ESOL training requirements.

Learning Outcomes

Learning Outcomes

Name
Demonstrate proficiency of the specialized vocabulary, linguistic nuances, and stylistic characteristics of the Greek language used by the Early Greek Fathers.

Name
Analyze the socio-historical context in which the Early Greek Fathers lived and wrote, the theological challenges they faced, and the development of Christian doctrine in the early centuries of the Church.

Name
Analyze key works of Early Greek Fathers such as Ignatius of Antioch, Clement of Alexandria, and Irenaeus of Lyons.

Name
Investigate major doctrinal themes the Early Greek Fathers addressed, including the Trinity, Christology, ecclesiology, and soteriology.

Name
Demonstrate advanced skills in textual analysis and interpretation of patristic Greek texts, including rhetorical strategies, literary devices, and exegetical methods employed by the Early Greek Fathers.

Name
Compare the language and style of the Early Greek Fathers with classical Greek literature, examining how they adapted and transformed linguistic traditions to convey Christian theological concepts.

Name
Investigate the cultural and philosophical influences on the thought of the Early Greek Fathers, including the interaction with Hellenistic philosophy and the impact of Roman governance.

Name
Apply grammar, dialectic, and rhetoric to integrate the topic with Gods revelation through His creation, Moral PhiloSophae, and OrthoDoxia defined through scriptural paideia.

LANG3013 - LATIN TEXT

General

Course Prefix
LANG

Course Number
3013

Description
A text in Latin is chosen for each seminar with a view to its relevance to the disciplines of theology, philosophy, and literature rather than for its philological interest. In addition to reading the text each student will deliver a seminar presentation on pertinent secondary scholarship or other classical works in translation. The primary aim of the course is for the student to begin to appreciate the sensibility of the text in the original language and to begin to heed the import of that exact meaning for its significance in its own particular discipline. The student may repeat the text seminar any number of times as the texts change.

Learning Outcomes

Learning Outcomes

Name
Examine the cultural and theological context in which Jerome undertook the translation, with an historical overview of the Vulgate and its significance in the Christian tradition.

Name
Analyze the linguistic characteristics and stylistic nuances of Vulgate Latin and Jerome's vocabulary, syntax, and linguistic choices in translating the Scriptures.

Name
Identify Jerome's translation techniques and strategies, including his approach to rendering Hebrew idioms and preserving theological nuances.

Name
Examine the societal, ecclesiastical, and linguistic influences that shaped the Vulgate to deepen understanding of the cultural and theological context of the Roman Christian world in Jerome's time.

Name
Analyze the hermeneutical principles employed in the Vulgate and their impact on Christian theology.

Name
Compare the Vulgate with earlier translations of the Scriptures, including the unique contributions and innovations introduced by Jerome, the Vulgate's role in shaping Christian thought and its influence on subsequent translations.

Name
Engage in translation exercises from the Vulgate, honing skills in understanding and conveying biblical Latin texts and exploring commentaries on select passages to deepen knowledge of exegetical choices.

Name
Apply grammar, dialectic, and rhetoric to integrate the topic with Gods revelation through His creation, Moral PhiloSophae, and OrthoDoxia defined through scriptural paideia.

LANG3043 - ASSESSMENT PRACTICES & MATERIALS

General

Course Prefix
LANG

Course Number
3043

Description
This course provides students with the knowledge, skills, and resources for selecting, designing, developing, implementing, and interpreting valid, reliable, and authentic measures of English language proficiency to meet the targeted English language needs of individual students and their communities. This course is not applicable to FLDOE ESOL training requirements.

- LANG3033 - INTRO TO THEOLOGICAL GERMAN

Learning Outcomes

Learning Outcomes

Name
Identify theological themes, linguistic developments, and doctrinal controversies in Patristic Latin during the 2nd through 4th centuries by engaging with primary texts from key Christian writers Tertullian, Cyprian, and others exploring their theological contributions.

Name
Investigate the Fathers' teachings on the nature and role of the Church with an exploration of their perspectives on sacraments and liturgical practices.

Name
Investigate the development of ascetic and monastic traditions in the Fathers' writings, including an analysis of their teachings on Christian living, ethics, and the pursuit of holiness.

Name
Conduct a comparative examination of theological perspectives among the Fathers with a discussion on the unity and diversity within early Christian theology.

Name
Explain social, political, and philosophical factors that shaped theological developments to deepen understanding of the historical and cultural context that influenced Christian thought during the 2nd through the 4th centuries.

Name
Discuss the impact on contemporary theology and Christian spirituality and the enduring relevance of the theological contributions of the Fathers from the 2nd through the 4th centuries.

Name
Complete and present an advanced research project on a specific theological theme or a particular Father.

Name
Apply grammar, dialectic, and rhetoric to integrate the topic with Gods revelation through His creation, Moral PhiloSophae, and OrthoDoxia defined through scriptural paideia.

LANG4073 - CLASSICA ARAMAIC HEBREW

General

Course Prefix
LANG

Course Number
4073

Description
Students will embark on a captivating linguistic and textual journey through Classica Aramaic Hebrew found in the biblical books of Daniel, Ezra, Nehemiah, Malachi, and Chronicles. This advanced course invites students to delve into the distinctive linguistic features, historical context, and cultural expressions found in the Aramaic sections of these canonical texts.Prerequisite: LANG 1203 Classica Hebrew II: Syntax and Texts

Learning Outcomes

Learning Outcomes

Name
Identify the linguistic characteristics of Classical Aramaic Hebrew, distinguishing it from Biblical Hebrew.

Name
Analyze the thematic and linguistic variations in the Aramaic sections of Daniel, Ezra, Nehemiah, Malachi, and Chronicles to expand vocabulary with a concentration on words unique to Aramaic Hebrew.

Name
Engage with selected passages from the Book of Daniel, exploring the linguistic diversity within its apocalyptic visions and analyzing the Aramaic expressions used in narrative and visionary contexts.

Name
Analyze the prophetic messages of Malachi, examining the linguistic expressions unique to Aramaic and the theological and cultural nuances conveyed through Aramaic Hebrew.

Name
Demonstrate understanding in how linguistic choices contribute to each text's overall aesthetic and thematic impact to conduct a detailed textual analysis of Aramaic sections, focusing on literary devices such as parallelism, chiasmus, and inclusion.

Name
Investigate how linguistic choices reflect the socio-political and religious realities of the post-exilic period to deepen understanding of the cultural and historical context in which the Aramaic sections were written.

Name
Compare and discuss the linguistic and stylistic features of Aramaic Hebrew with Classical Biblical Hebrew.

Name
Apply grammar, dialectic, and rhetoric to integrate the topic with Gods revelation through His creation, Moral PhiloSophae, and OrthoDoxia defined through scriptural paideia.

LANG4322 - READINGS IN THE GREEK NEW TESTAMENT

General

Name
Articulate the significance of the Latin language to Western civilization.

Name
Apply the paradigms of Latin to learning and teaching the language.

LDRS1033 - SERVANT LEADERSHIP

General

Course Prefix
LDRS

Course Number
1033

Description
This course provides an overall framework for student success in higher education and beyond. It provides students with a way to integrate their Christian faith with every area of academic study. In particular, students are taught a mental toolkit that enables them to identify worldview-sensitive topics in every field of study, contrast secular perspectives with a biblical perspective in these fields, and apply a biblical view with consistency and creativity to each area of study. More specifically, the course also prepares students for success beyond their college years by teaching students biblical principles of self-governance, servant leadership, ownership, proper use of power, perseverance, truth seeking, effective communication, and conflict resolution. Collectively, this course prepares students to think, act, and live wisely and "Christianly" both in their collegiate years and in their future lives and careers.Prerequisite: None

Learning Outcomes

Learning Outcomes

Objective
Define leadership and identify the importance leaders play in shaping organizational culture.

Objective
Understand the structure for life as There-Here-Path and create a Transcendent There.

Objective
Have a clearer understanding of current reality (Here) and how to create clarity (There).

Objective
Understand how SMART goals work and learn to become goal oriented.

Objective
Identify the types of influence available to leaders, how to gain more influence and how to apply that influence through leadership styles.

Objective
Understand and apply the principles of freedom and control through Self-Governance.

Objective
Seek and share truth with the Moment of Truth Tool while having a healthy understanding of conflict resolution.

Objective
Understand what emotions are and how to handle them appropriately both internally and externally.

Objective
Understand how the human brain operates within the Systems Thinking context.

Objective
Demonstrate understanding of the ways that Christian faith can—and should—influence academic study.

Objective
Identify worldview-sensitive issues in academic fields and the difference between secular and Christian approaches to these issues.

Objective
Analyze and identify secular and/or Christian assumptions, presuppositions, and implications in a given text or verbal communication.

LDRS1043 - COLLEGE AND CAREER ADVISING

General

Course Prefix
LDRS

Course Number
1043

Description
This course utilizes the ideas and methods of college and career planning to equip students with the knowledge and skills to assist in guiding clients in their college and career paths. Students will learn how to interpret and use various career assessment tools and planning resources. Finally, students will explore personal and professional coaching skills to help guide clients in making informed decisions toward their college and career paths.

Learning Outcomes

Objective
Discover personal values, work style preferences, desired lifestyle, and expected job growth in various fields.

Objective
Prepare an up-to-date resume and personal networking list using career-planning focused resources (books, websites, and assessments) and professional contacts.

Objective
Use the Strong Interest Inventory to understand careers that may be well suited to individual personalities and preferences.

Objective
Assess the various resources offered by colleges and how these resources aid in career planning.

Objective
Learn basic job search skills and strategies

Objective
Develop a career plan that includes and combines personal career goals and future academic possibilities.

Objective
Outline pre-interview research strategies and design a post-interview checklist.

Objective
Recognize core work values and identify specific labor market information.

Objective
Demonstrate knowledge and understanding of the various aspects of career planning.

LDRS2043 - MENTORING

General

Course Prefix
LDRS

Course Number
2043

Description
This course provides an overview of the ministry practice and process of mentoring. Students explore core characteristics of mentoring through biblical and theological perspectives, including the vision of God as Storyteller and the mentor as a co-reader of God's story. Students will also gain personal self-awareness by applying selected mentoring tools in a mentoring relationship, such as utilizing a life map and understanding their own family of origin. Finally, students will engage in a mentoring relationship where they practice applying basic components of a mentoring relationship.

Learning Outcomes

Objective
Cultivate a lifelong commitment to be aware of how diversity influences the lives of people and to advocate for any changes necessary to decrease oppression and discrimination and enhance the wellbeing of all persons.

Name
Comprehend the patterns, mechanisms, dynamics, and consequences of discrimination, economic deprivation, and oppression as it relates to diversity and leadership.

Name
Apply an ecological, systems perspective to the analysis of the complex dynamics of oppression, discrimination, and its effects on social functioning and leadership.

Name
Identify and integrate Christian beliefs and values that influence attitudes regarding sensitivity to and appreciation of human diversity.

Name
Apply a strengths perspective to the understanding of diverse cultures, ethnicities, and people groups.

Name
Comprehend the demographics, cultural characteristics, and general experiences of various minorities in the United States.

Name
Develop awareness of ones own leadership style and its impact on cultural heritage in the context of other cultures.

Name
Identify individual experiences, values, and biases that impede or enhance sensitivity to diverse people groups.

Name
Identify culturally competent assessment and practice skills for working with ethnically and racially diverse groups.

Name
Cultivate a lifelong commitment to be aware of how diversity influences the lives of people and to advocate for any changes necessary to decrease oppression and discrimination and enhance the wellbeing of all persons.

LDRS3043 - HOW TO LEAD AN EXTENSION SITE

General

Course Prefix
LDRS

Course Number
3043

Description
This course provides an overview of key principles, processes, and practices involved in effectively launching, growing, and sustaining an educational extension site. Students will examine the extension site model, clarify their local site mission and vision, and design localized systems to effectively develop and manage an educational extension site. Students will also consider the functions of managing enrollment, developing a marketing strategy, and overseeing student care and support. Finally, students will investigate best practices of effective extension site directors, including ongoing student recruitment and retention practices, and how to develop a ministry team to help support an educational extension site.

Complete ALL of the following Courses:
- LDRS2123 - LEADERSHIP PRINCIPLES
  AND LDRS2223 - LEADERSHIP THEORY

Learning Outcomes

Learning Outcomes

Objective
Assess self and supervisor’s leadership and followership skills and styles.

Name
Transfer leadership principles learned in class to an organizational setting.

Name
Perform as a member of a team.

Name
Communicate professionally.

Name
Assess self and supervisors leadership and followership skills and styles.

LDRS5001 - RELATIONAL INTELLIGENCE I

General

Course Prefix
LDRS

Course Number
5001

Description
This graduate-level course explores relational intelligence from a Christ-centered perspective. It provides a framework for building healthy, God-honoring relationships in various arenas of life including ministry and leadership. There is emphasis on self-awareness and social awareness, developing conversational skills, learning to ask questions, listen attentively, and remain fully present. Students will be introduced to effective practices for growing in empathy, likeability, conflict management skills, and learn how to set healthy relational boundaries. This course complements the content in LDRS 5011 and 5021.

Learning Outcomes

Objective
Analyze the toxic and nourishing effects of interpersonal skills.

Name
Define social intelligence.

Name
Describe the various constructs of social intelligence and how they affect a leaders ability to handle various social interactions.

Name
Compare and contrast social intelligence and emotional intelligence.

Name
Apply the constructs of social intelligence through self-introspection.

Name
Analyze the toxic and nourishing effects of interpersonal skills.

LDRS5153 - LEADERSHIP IN CONTEXT

General

Course Prefix
LDRS

Course Number
5153

Description
This course provides a study of the contextual considerations of leadership. Context may include such things as culture, socio-economic status, institutional, political, etc. When leadership decisions are being made in any organization, the contextual aspects of the environment must also be taken into account. More specifically, interaction between the leader and the follower will be analyzed, as well as the applicability of leadership theories such as situational leadership, leader-member exchange, and adaptive leadership. Additionally, differentiation of an objective context versus subjective context will be discussed.Prerequisite: None

Learning Outcomes

Objective
Develop institutional value statements which apply to either a for-profit or not-for-profit organization.

Name
Identify contemporary research regarding strategic thought, organizational culture, and leading change in businesses and not-for-profit organizations.

Name
Demonstrate the ability to create strategic plans in a competitive environment.

Name
Develop a strategic-level model of leading and managing change.

Name
Develop institutional value statements which apply to either a for-profit or not-for-profit organization.

LDRS5173 - LEADER AS STORYTELLER

General

Course Prefix
LDRS

Course Number
5173

Description
Leaders today must create vision, inspire action, and create communities—all of which are best accomplished using stories. Leader storytelling involves converting the experiences of life into a more powerful and meaningful form with a clear thesis to accomplish a set purpose. Often the right anecdote motivates followers more surely than hours of lectures. Students will learn why stories are persuasive, the common features of great stories, how to make stories more visual, and the importance of rewriting. They will also learn how stories can build brands, drive growth, and inspire action. Special topics include how the leader finds stories to change others and how to promote stories in a digital world.

Learning Outcomes

Objective
Discover their own stories and know how to convert them into more powerful narratives and anecdotes.

Name
Explain the common elements and structures of great stories.

Name
Understand the power of visual storytelling and know how to make stories more visceral for enhanced impact and retention.

Name
Analyze stories for their themes and craft stories to accomplish objectives.

Name
Discover their own stories and know how to convert them into more powerful narratives and anecdotes.

LDRS5193 - MENTORING

General

Course Prefix
LDRS

Course Number
5193

Description
This course provides an overview of the ministry practice and process of mentoring. Students explore core aspects of mentoring through biblical and theological perspectives, including the vision of God as Storyteller and the mentor as a co-reader of God’s story. Students will also gain insight and self-awareness by applying selected mentoring tools in a mentoring relationship, such as utilizing a life map and understanding their own family of origin. Finally, students will engage in a mentoring relationship where they practice key components of mentoring over the process from beginning to ending a mentoring relationship. Prerequisite: None

Learning Outcomes

Name
1. Explain the significance of the relational aspect of leadership.

Name
2. Develop a personal leadership philosophy that includes at least three core values.

Name
3. Reflect on an experience that involved taking a leadership risk and failed.

Name
4. Determine a process to foster greater collaboration in an organization.

Name
5. Apply the concept of appreciation to an individual and record how they reacted.

Name
6. Apply scriptural principles to various aspects of leadership.

LDRS5223 - LEADERSHIP IN HISTORY

General

Course Prefix
LDRS

Course Number
5223

Description
Perhaps the best way to learn leadership is to observe a great leader in action. Since that is often impossible to do in person, in this course students will study the lives of great leaders to broaden their understanding of what leadership is and how it is implemented. Readings will include many short biographies from multifarious types of leaders and contexts throughout time, and the course is designed to allow students some participation in choosing which leaders to study. The intent is to extract lessons and insights which can be applied to students' own approaches to leadership, and to help students understand both commonalities and differences between great leaders. Prerequisite: None

Name
Determine leadership models that facilitate coaching, mentoring, and consulting.

Name
Design a mentoring program for a managers-in-training initiative.

LDRS5313 - NEGOTIATION & CONFLICT MANAGEMENT

General

Course Prefix
LDRS

Course Number
5313

Description
Complex relationships and flat organizational hierarchies require leaders to master negotiation skills and be able to implement them to manage interpersonal and inter-organizational conflict. Nearly every transaction with another person involves some type of negotiation. This course equips students to develop their perception, persuasion, analytical thinking, and interpersonal skills to build agreement and to manage relationship break-down. Students will learn negotiation and conflict management theory, processes, strategies, and related ethical considerations. Specific topics addressed include investigation, mediation, arbitration, multicultural contexts, personality conflicts, crisis planning, and developing enduring system-wide solutions. Learning Outcomes

Objective
Generate creative options and implement long-term system-wide solutions.

Name
Identify and explain the theory, processes, and practices of negotiation and conflict management.

Name
Assess the importance of factors that impact negotiations and conflict management, including identifying relevant issues, understanding stakeholder positions and interests, identifying the importance of existing relationships, and operating within the inherent group dynamics.

Name
Employ effective communication, problem-solving, and influence techniques appropriate to given situations.

Name
Explain how Hofstedes theories of cultural dimensions and individual personalities impact negotiations.

Name
Develop a crisis management plan for a real or fictitious organization.

Name
Assess the ethical considerations in a given negotiation or conflict situation.

Name
Generate creative options and implement long-term system-wide solutions.

LDRS5323 - LEADING BRAND CREATION

General

Course Prefix
LDRS

Course Number
5323

Description
Fundraising and marketing feed off one another and ideally fuel an organization's growth and success. This course provides students an understanding of the interplay between these two forces, as well as addresses the role of leadership, audience analysis, message creation, strategies, and ethics. Students will create a marketing and fundraising plan for a real or fictitious organization and be able to identify, secure, and maintain a diverse portfolio of funding sources.

Learning Outcomes

Objective
Develop the skills to identify, evaluate, and resolve a variety of issues relating to poor innovative performance in an organization.

Name
Explain the relationship between the entrepreneur and the innovator.

Name
Explain the innovation processes, structures and the challenges of innovation in organizations.

Name
Distinguish the strategies most effective for exploiting innovation.

Name
Apply the concepts of innovation and technology to real world situations.

Name
Develop the skills to identify, evaluate, and resolve a variety of issues relating to poor innovative performance in an organization.

LDRS5353 - BUSINESS START-UP PLAN (CAPSTONE)

General

Course Prefix
LDRS

Course Number
5353

Description
This course integrates all prior learning in the entrepreneurship concentration and helps students discover how an idea, a market, and price form the basis of a business start-up. The course introduces students to the entrepreneurial journey, from finding an idea, to accessing the marketplace, to raising capital for a business venture by developing a well thought out business plan. This process engages students to think through crucial issues in an organized way and help improve business acumen. The business plan will also help students prepare a roadmap for becoming a successful entrepreneur. Prerequisite: None

Learning Outcomes

Learning Outcomes

Objective
Develop a business plan.

Name
Develop research and data analysis skills to assess the market.

Name
Examine how to price their services to make a profit.

Name
Develop creative thinking skills necessary for branding and positioning their products or services in the market.

Name
Understand the various strategies for financing different types of business ventures and how to speak to investors.

Name
Develop a business plan.

LDRS5403 - ORGANIZATIONAL LEADERSHIP

General

Course Prefix
LDRS

Course Number
5403

Description
This course focuses on practical experience that blends theory and practice. Students reflect on prior leadership experiences and then apply lessons learned to further develop their leadership capabilities. Environmental factors, organizational objectives, company culture, and individual and group ethical standards will be examined to incorporate situational determinants of organizational leadership effectiveness.Prerequisite: None

Credit Hours

Learning Outcomes

Learning Outcomes

Objective
Understand leadership at the personal, interpersonal, team and organizational levels and the different leader-follower situations that influence the leadership process within an organization.

Name
Evaluate the state of current leadership capacity within organizations and suggest how leadership can support and enhance organizational effectiveness.

Name
Evaluate personal values, beliefs, and ethical standards to enhance self-awareness in regard to their impact on organizational effectiveness.

Name
Describe the role of culture in determining effective leadership perceptions and outcomes.

Name
Describe leadership development activities and the condition for leadership development

Name
Understand leadership at the personal, interpersonal, team and organizational levels and the different leader-follower situations that influence the leadership process within an organization.

LDRS5413 - FOLLOWERSHIP DYNAMICS

General

Course Prefix
LDRS

Course Number
5413

Description
This course considers a critical review of followership, and how those that follow can impact an organization. Leadership studies have had prominence through much of the 20th century, however, studies involving followership have been severely underrepresented in scholarly literature. Societal thoughts on followership will be considered from ancient times until present day. Various types of followership models will be considered, and what impact followers can have on leaders and the organization.Prerequisite: None

Credit Hours

Learning Outcomes

Learning Outcomes

Objective
Critically analyze followership styles in various situations.

Name
Define what followership means, and the societal perspective associated with it.

Name
Describe the dyadic interaction of leaders and followers and the importance of it to accomplishing the organizational mission.

Name
Compare and contrast what it means to be designated a leader or follower.

Name
Critically analyze followership styles in various situations.

LDRS5423 - LEADING TEAMS

General

Course Prefix
LDRS

Course Number
5423

Description
Leading teams involves managing different personalities, cultures, conflicting political agendas, and varying skill levels while simultaneously securing resources and managing expectations of senior stakeholders. This course focuses on group dynamics and the principles of building highly effective teams. Students will receive theoretical and practical knowledge about small group interactions, often learning through participation in hands-on group activities that demonstrate and reinforce the textual material. Emphasis is placed on leadership skills, subordinate participation, power dynamics, and team problem-solving.
Prerequisite: None

Learning Outcomes

Learning Outcomes

Objective
Improve team leadership effectiveness by diagnosing team effectiveness, undergoing self-assessments, drafting action plans, and soliciting feedback.

Name
Explain fundamental concepts of team dynamics such as group stages of formation, goal-setting, roles, communication patterns, and planning.

Name
Define effective team leadership and its impact on organization success.

Name
Explain and predict how individuals will act and interact within a group and how those actions impact group processes and outcomes.

Name
Compare and contrast group theory with observed practice.

Name
Analyze team decision-making and problem-solving strategies, allowing students to identify, select, and work under various leadership styles effectively.

Name
Examine the factors that enhance the performance of virtual teams.

Name
Improve team leadership effectiveness by diagnosing team effectiveness, undergoing self-assessments, drafting action plans, and soliciting feedback.

LDRS5433 - COMMUNITY LEADERSHIP DEVELOPMENT

General

Course Prefix
LDRS

Course Number
5433

Description
This experiential-learning course provides students the opportunity to explore the key institutions and civic structures that contribute to a flourishing community, including local government, economic development, the environment, criminal justice, business, education, communication and the media, health and social services. Along with developing personal leadership skills, students will have the opportunity to increase their social capital and capacity to serve as leaders in their community. The course is taught concurrent with the student's participation in an approved community leadership development program.

Learning Outcomes

Learning Outcomes

Objective
Develop their own personal capacity for leadership.

Name
Develop students reflection about leadership theories and practices.

Name
Apply critical thinking to the complexity of the field of leadership studies.

Name
Compare and contrast traditional and emergent paradigms of leadership.

Name
Connect leadership principles with practices in a deep and meaningful way.

Name
Develop a purposeful set of actions and beliefs related to leadership.

Name
Build an awareness of leadership issues facing our community and society.

Name
Refine their own personal philosophies of leadership to guide them in transitioning from collegiate leadership environments to new contexts.

Name
Develop their own personal capacity for leadership.

LDRS5523 - DISNEY LEADERSHIP INSTITUTE

General

Course Prefix
LDRS

Course Number
5523

Description
This course provides insight into the strategies that drive the Disney organization, including its emphasis on creativity and innovation, leadership excellence, people management, quality service, and brand loyalty practices. Other comparable business experiences may be substituted with permission of advisor. Prerequisite: None

Credit Hours

Minimum Credit Hours:

Learning Outcomes

Learning Outcomes

Objective
Describe their organization's values and vision during times of change.

Name
Identify the personal and organizational values that drive them as leaders.

Name
Create alignment between personal values and vision and those of the organization or team.

Name
Communicate a compelling vision for the future that drives action today.

Name
Analyze the values-infused role of a leader in culture-building and team support.

Name
Describe their organization's values and vision during times of change.

LDRS5543 - LEADING ORGANIZATIONAL CHANGE

General

Course Prefix
LDRS

Course Number
5543

Description
Leading organizational change is a significant challenge facing today’s organizations. This course will explore the nature of these changes, the basis for their adoption, and both the management and leadership of organizational change in the 21st century. It also presents a perspective of theories of organizations through a historical and developmental context as well as through current practices and their application to organizational transformation in one or more current settings. Prerequisite: None

Learning Outcomes

Learning Outcomes

Objective
Describe the link between communication and organizational change.

Name
Summarize the important leadership challenges which occur within organizations.

Name
Explain how organization improvement creates long-term organizational success.

Name
Examine approaches to organizational change in practical situations.

Name
Demonstrate application of the process of organizational change / development. including initiating change and relationships, diagnosing organizational issues, and collecting and analyzing data as well as the steps necessary to implement change efforts.

Name
Describe the link between communication and organizational change.

LDRS5603 - PHILOSOPHY OF COACHING

General

Course Prefix
LDRS

Course Number
5603

Description
This courses stimulates philosophical thinking and fosters and spirit of confidence in developing research based methods of coaching in sport or other contexts. Coverage is given to the spiritual and faith-based aspects of motivation and performance.

Learning Outcomes

Objective
Apply leadership theory to contemporary ministry contexts.

Name
Conduct research on ministerial leadership.

Name
Design research study protocols for ministerial leadership contexts.

Name
Collaborate with other scholars in the implementation of a research design.

Name
Write scholarly, publishable research papers on ministerial leadership.

Name
Apply leadership theory to contemporary ministry contexts.

LDRS7113 - SPIRITUAL FORMATION IN MIN. LEAD.

General

Course Prefix
LDRS

Course Number
7113

Description
This course explores the biblical and theoretical aspects of leader spiritual formation. Students will employ exegetical research methods to study spiritual formation and wholeness from a biblical perspective. Students will review and compare the scholarly literature on biblical, sacred, and secular perspectives of spiritual formation, spirituality, and wholeness. This course will cultivate personal spiritual formation while preparing students to lead their organizations, teams, and followers in the spiritual formation process.Prerequisite: None

Learning Outcomes

Learning Outcomes

Objective
Analyze, evaluate, and use research data to inform professional practices.

Name
Articulate similarities and differences between quantitative and qualitative research design and analysis.

Name
Distinguish between the different elements of a research study.

Name
Review and employ best practices in survey design, development, analysis, and reporting.

Name
Compare and contrast quasi-experimental, correlational, action research, and mixed methods research designs and the statistics used in the designs.

Name
Differentiate between descriptive statistics and inferential statistics.

Name
Analyze professional research and identify strengths and weaknesses in design, methodologies, and conclusions.

Name
Defend the appropriate design and analysis procedures for quantitative, qualitative, and mixed methods studies.

Name
Analyze, evaluate, and use research data to inform professional practices.

LDRS7213 - QUANTITATIVE RESEARCH METHODS

General

Course Prefix
LDRS

Course Number
7213

Description
This course introduces doctoral students to quantitative research methods. Students will utilize descriptive and inferential statistics, experimental vs. non-experimental designs, reliability, and validity. Students will learn to conduct various statistical analyses, including correlations, z-tests, t-tests, ANOVAs, linear regressions, and multiple regressions. Students will utilize various tools to conduct quantitative research, write and display results, and provide analysis and implications to improve organizational culture and contexts. Prerequisite: LDRS 7123

- LDRS7123 - FOUNDATIONS OF RESEARCH

Learning Outcomes

Learning Outcomes

Objective
Demonstrate the ability to conduct quantitative data analysis, analyze and interpret results, and communicate the results in an APA formatted report.

Name
Discuss the advantages and limitations of specific quantitative research methods.

Name
Identify and analyze existing quantitative research studies.

Name
Practice various quantitative research methods, including determining means of central tendency, correlations, t-tests, ANOVAs, linear regression, and multiple regression.

Name
Demonstrate the ability to conduct quantitative data analysis, analyze and interpret results, and communicate the results in an APA formatted report.

LDRS7223 - QUALITATIVE RESEARCH METHODS

General

Course Prefix
LDRS

Course Number
7223

Description

This course introduces doctoral students to qualitative research methods. Students will utilize grounded theory, narrative, phenomenology, ethnography, and case study design approaches. Students will learn how to analyze existing studies by examining research designs. Students will gain experience designing and conducting qualitative research by writing and displaying results, providing analysis and implications to improve organizational culture and contexts. Learning Outcomes

Learning Outcomes

Objective
Synthesize research findings into a well-written APA formatted report.

Name
Discuss the advantages and limitations of specific qualitative methods.

Name
Analyze existing qualitative research studies and assess the rigor and validity of the studies with a working knowledge of major qualitative designs.

Name
Design a qualitative research plan consistent with the selected qualitative methodology.

Name
Conduct qualitative research by designing an interview protocol, conducting interviews, and coding the results.

Name
Recommend organizational change and implications based on the findings from a research study.

Name
Synthesize research findings into a well-written APA formatted report.

LDRS7313 - ADVANCED QUANTITATIVE METHODS

General

Course Prefix
LDRS

Course Number
7313

Description
This course allows students to study in-depth and employ quantitative research methods, including Z-tests, t-tests, regression analysis, analysis of variance, factorial analysis of variance, post hoc comparisons, multivariate analysis of variance, analysis of covariance, multiple regression, logistic regression, factor analysis, and path analysis.Prerequisite: LDRS 7213

Name
Describe a variety of quantitative research methods.

Name
Discuss when various quantitative research methods are appropriate.

Name
Compare and contrast various quantitative research methods.

Name
Apply quantitative research methods to situations.

Name
Utilize quantitative methods research as it relates to leadership studies.

LDRS7323 - ADVANCED QUALITATIVE METHODS

General

Course Prefix
LDRS

Course Number
7323

Description
This course allows students to study and become proficient in conducting advanced qualitative research methods. Students will become familiar with the variety of advanced qualitative data collection and data analysis. The primary focus of this course is to design a qualitative research study by demonstrating the ability to conceptualize, design, and execute quality research associated with being a doctoral scholar.Prerequisite: LDRS 7223

Name
Discuss situational and transformational leader traits, skills, and styles.

Name
Describe a variety of situational and transformational models, frameworks, and theories.

Name
Compare and contrast the various theories of situational and transformational leadership.

Name
Apply situational and transformational leadership models to situations.

Name
Research situational and transformational leadership, traits, skills, and styles.

LDRS7443 - ORGANIZATIONAL CHANGE & STRATEGIES

General

Course Prefix
LDRS

Course Number
7443

Description
This course prepares learners to apply behavioral science to the hyper-turbulent environment of the 21st century. Students will be introduced to techniques and methodologies to produce high-performing organizations systematically. The course helps leaders contrast management versus leadership styles of stability to minimize management chaos and instability within organizations.Prerequisite: None

Learning Outcomes

Learning Outcomes

Objective
Diagnose organizational problems and create comprehensive solutions.

Name
Analyze and evaluate change theory related to the complexity and dynamics of change in organizations.

Name
Research and construct a comprehensive model of employee behavioral motivation techniques and employee learning

Name
Investigate variables of change (e.g., technology, social structure, interpersonal relationships, environmental demands, economics, and organizational politics) and their interrelationships that create or impede change.

Name
Evaluate the implications of change from the perspective of the change agent, the receiver, and the initiator.

Name
Diagnose organizational problems and create comprehensive solutions.

LDRS7453 - SERVANT & AUTHENTIC LEADERSHIP

General

Course Prefix
LDRS

Course Number
7453

Description
This course critiques theories and definitions of servant leadership and authentic leadership. The course emphasizes the importance of self-discipline, humility, and the art of being contemplative as an effective leader. Prerequisite: None

Learning Outcomes

Objective
Research how faith, ethics, and values affect the leader-follower dynamic.

Name
Discuss different views of faith, ethics, and values.

Name
Describe various religious and secular constructs of ethics.

Name
Compare and contrast espoused vs. practiced values and the dangers of situational ethics.

Name
Apply faith, ethics, and values to leadership/followership situations.

Name
Research how faith, ethics, and values affect the leader-follower dynamic.

LDRS7523 - FOLLOWERSHIP

General

Course Prefix
LDRS

Course Number
7523

Description
This course explores current theories and concepts of the follower role in various contexts, including follower behaviors and expectations of leaders by followers. Emphasis is placed on synthesizing these traits and concepts into follower behavior at the individual, group, and organizational levels.Prerequisite: None

Learning Outcomes

Learning Outcomes

Objective
Communicate the real-world applications of followership theory.

Name
Conduct research on followership from a Christian worldview.

Name
Apply followership theory to contemporary organizational contexts.

Name
Explore the primary components of followership and their implications on the individual, group, and organizational levels.

Name
Assess personal followership style.

Name
Communicate the real-world applications of followership theory.

LDRS7533 - MOTIVATION & INFLUENCE

General

Course Prefix
LDRS

Course Number
7533

Description
This course explores the intersection of influence, persuasion, and motivation between leaders, followers, and other organizational stakeholders.Prerequisite: None

Credit Hours

Minimum Credit Hours:
1

Maximum Credit Hours:
4

(Credit Hours) Value:
3

Contact Hours (not needed)

Learning Outcomes

Learning Outcomes

Objective
Conduct research related to influence, persuasion, and motivation

Name
Discover leader, follower, and stakeholder motivations.

Name
Articulate sources of power in human and organizational relationships.

Name
Examine content and process theories of motivation.

Name
Characterize Person-Environment, Person-Organization, and Person-Job Fit.

Name
Conduct research related to influence, persuasion, and motivation

LDRS7543 - CULTURAL INTELLIGENCE

General

Course Prefix
LDRS

Course Number
7543

Description
This course addresses current issues and leadership practices associated with cultural diversity for domestic and international applications. The course is designed to develop intercultural competencies of leaders working with diverse populations in various settings. It prepares students to communicate and consult across cultures and explores strategies for creating inclusive climates in diverse organizations.Prerequisite: None

Credit Hours

Minimum Credit Hours:
1

Maximum Credit Hours:
4

Learning Outcomes

Learning Outcomes

Objective
Analyze cross-cultural leadership and communication styles

Name
Discuss different cultural dimensions.

Name
Describe various cultural dimensions models, frameworks, and theories, including a framework for understanding and reducing bias.

Name
Compare and contrast cultural dimension models.

Name
Apply cultural dimension models to situations, including implementing strategies to manage and respond to organizational diversity.

Name
Articulate and facilitate biblical practices that encourage reconciliation.

Name
Analyze cross-cultural leadership and communication styles

LDRS7553 - TEAMWORK DYNAMICS

General

Course Prefix
LDRS

Course Number
7553

Description
This course provides an in-depth exploration of teamwork theory. Areas of emphasis include distinguishing between groups and teams, group dynamics, characteristics of effective teams, supporting teamwork in organizations, and developing research-based team interventions.Prerequisite: None

Credit Hours

Minimum Credit Hours:
3

Maximum Credit Hours:

Learning Outcomes

Learning Outcomes

Objective
Design a research-based team intervention

Name
Discuss and analyze various aspects of group dynamics.

Name
Describe a variety of teamwork models, frameworks, and theories.

Name
Identify characteristics of exemplary teamwork, including qualities of effective team members and leaders.

Name
Analyze how organizational culture impacts team processes and performance.

Name
Evaluate the effectiveness of various teamwork interventions.

Name
Design a research-based team intervention

LDRS7583 - CAPSTONE PROJECT PROPOSAL

General

Course Prefix
LDRS

Course Number
7583

Description
This course serves as the final core course of the Doctorate in Strategic Leadership core courses. Students will present an oral defense before doctoral faculty that integrates their learning during the program and personal research. They will explain how their proposed capstone project aligns program core learning outcomes, DSL learning outcomes, and capstone project learning outcomes. Students will provide an overview of the proposed capstone project including the type of project, elements of the project, proposed timeline for completion, and alignment with career goals. Prerequisite: Advisor Approval

Requirements
Prerequisite: Advisor Approval

Learning Outcomes

Learning Outcomes

Name
Demonstrate an in-depth knowledge of leadership theory by analyzing, evaluating, and applying organizational research.

Name
Pass an oral defense of the proposed capstone project suitable for creating expert-level strategic leadership content in a book manuscript, business plan, leadership seminar, curriculum design, or another artifact approved by the project chair.

Name
Evaluate how the proposed capstone project aligns with the program learning outcomes, capstone project learning outcomes, and career goals.

LDRS7593 - LEADERSHIP PROSPECTUS

General

Course Prefix
LDRS

Course Number
7593

Description
This course serves as the final core course for the Ph.D. in Organizational Leadership core courses. Students will take two comprehensive exams, one theoretical and one scenario-based. Students will also write a prospectus for their dissertation project.Prerequisite: Complete 39 doctoral credits identified as organizational and strategic leadership core courses

Credit Hours

Minimum Credit Hours:
3

Maximum Credit Hours:
3

Requirements
Prerequisite: Complete 39 doctoral credits identified as organizational **AND** strategic leadership core courses.

Learning Outcomes

Learning Outcomes

Objective
Reflect on one’s doctoral journey and one’s growth of leadership while being a doctoral student.

Name
Demonstrate an in-depth knowledge of leadership theory by analyzing and evaluating organizational trends.

Name
Apply qualitative, quantitative, and mixed methods research to study and advise organizations.

Name
Articulate a written prospectus suitable for conducting original research in organizational leadership, conceptualizing practical, real-world implications of scholarly research.

Name
Reflect on ones doctoral journey and ones growth of leadership while being a doctoral student.

LDRS7603 - COMMUNICATION IN MINISTRY LDRSHP

General

Course Prefix
LDRS

Course Number
7603

Description

This course equips ministry leaders to communicate with theological depth, cultural intelligence, and strategic clarity in diverse global contexts. Through engagement with transformational communication theories, students examine the complexities of worldview, personality, conflict, and relational dynamics as they shape ministry practice. A final conference-style presentation challenge students to integrate biblical principles, communication scholarship, and cultural analysis. By the end of the course, students will develop advanced, research-informed frameworks for proclaiming the gospel, teaching for spiritual growth, and leading effectively within intercultural ministry settings.

Credit Hours

Learning Outcomes

Learning Outcomes

Name
Critically analyze and apply major communication theories to ministry leadership across diverse cultural, linguistic, and socio-religious contexts.

Name
Evaluate factors that complicate communication—including personality, conflict, worldview, and relational dynamics—and formulate strategies for effective ministry engagement.

Name
Integrate biblical principles with contemporary communication research to design contextually appropriate gospel-proclamation and teaching models.

Name
Construct advanced communication frameworks that support cross-cultural ministry effectiveness and spiritual formation.

Name
Synthesize research, theory, and praxis into professional conference-level presentations that demonstrate doctoral-level communication competency.

LDRS7613 - LEADERSHIP AND ORG HEALTH

General

Course Prefix
LDRS

Course Number
7613

Description
This course examines the behavioral, relational, and cultural forces that shape organizational health and leadership effectiveness. Students explore key dimensions of organizational behavior—including individual differences, team dynamics, conflict management, leadership theory, and organizational culture—and apply them to real ministry and organizational settings. Through a sequence of analytical evaluations and a culminating organizational health strategy paper, students integrate scholarly research with practical leadership insights. The course equips leaders to diagnose systemic issues, strengthen organizational culture, and cultivate healthy, high-performing teams grounded in ethical and ministry leadership principles.

Enroll in the following Courses:

- LDRS7603 - COMMUNICATION IN MINISTRY LDRSHP

Learning Outcomes

Learning Outcomes

Name
Critically evaluate individual and interpersonal dynamics that influence organizational behavior, health, and long-term effectiveness.

Name
Diagnose organizational challenges related to teams, conflict, leadership style, and culture using evidence-based frameworks.

Name
Integrate organizational behavior theory, leadership research, and theological/ethical principles to assess organizational health in ministry and marketplace contexts.

Name
Develop advanced, research-supported strategies to strengthen organizational culture, relational systems, and leadership capacity.

Name
Produce a comprehensive organizational health strategy that synthesizes course concepts into a doctoral-level applied analysis.

LDRS7623 - ORG CULTURE IN MINISTRY CONTEXTS

General

Course Prefix
LDRS

Course Number
7623

Description
This course equips ministry leaders to analyze and engage organizational culture with clarity, depth, and strategic insight. Students will examine the three levels of culture within their own organizations, articulate their ministry context and mission, and evaluate how culture shapes identity, behavior, and decision-making. Emphasis is placed on navigating internal dynamics and external societal pressures that influence organizational health. Through research, reflection, and applied analysis, students will develop a comprehensive strategy for cultural engagement and organizational change that empowers leaders to advance their mission faithfully and effectively.

Learning Outcomes

Objective
Identify characteristics of a successful consulting proposal

Name
Identify various theoretical and developmental models that inform coaching techniques.

Name
Demonstrate coaching techniques, such as empathetic listening, powerful questioning, etc.

Name
Build trust and rapport with coaching and consulting clients.

Name
Identify a range of client needs and related coaching specializations.

Name
Understand strategies for coaching as a manager.

Name
Describe the skills needed for effective consulting.

Name
Understand the stages involved in a consulting process.

Name
Identify characteristics of a successful consulting proposal

LDRS8123 - CREATIVE, CRITICAL &DESIGN THINKING

General

Course Prefix
LDRS

Course Number
8123

Description
This course is designed to help students lead their organizations in developing creativity, critical thinking, design thinking, and problem-solving skills and processes. It explores factors that affect creativity and debunks creativity myths. The course explores a variety of design-based methodologies and tools.Prerequisite: None

Credit Hours

Minimum Credit Hours:

Name
Examine various job search techniques.

Name
Identify a support system for a job search.

Name
Identify effective interviewing skills

Name
Create employment documentation.

Name
Analyze job description and job evaluation.

Name
Differentiate workplace roles and relationships (e.g., co-worker, supervisor, customer, client).

LKES0542 - INTERNSHIP III

General

Course Prefix
LKES

Course Number
0542

Description
Coursework will focus on all aspects of locating and succeeding at employment. Students will create a resume, cover letter and list of references during the course. Internship Level III class (1 hour per week face to face) will run concurrently with the Level III externship. The externship should 10+ required work hours at an off-campus site. The job(s) will be related to the student's stated career concentration. Supervisors will complete weekly job evaluations and students will complete daily self-assessments which are a required part of the course and will be due every week. Students will also schedule a private meeting with the instructor at midway point and end of semester to review Supervisor's weekly job evaluations. Prerequisites: LKES 0411

Learning Outcomes

Learning Outcomes

Name
Finalize their resume for post-graduation job search.

Name
Dramatize effective interviewing skills.

Name
Complete job applications.

Name
Send resumes for post-graduation jobs.

Name
Demonstrate effective conflict resolution and problem-solving strategies when initiating, taking responsibility for and completing workplace tasks.

Name
Demonstrate the ability to follow required safety procedures.

Name
Demonstrate effective strategies to regulate emotions when working with others.

LKES0551 - INTERNSHIP IV

General

Course Prefix
LKES

Course Number
0551

Description
Coursework will focus on all aspects of locating and succeeding at employment. Students will complete portfolios, update their resumes, send resumes, and participate in mock interviews. In addition, students will learn about, and practice various communication and problem-solving strategies related to employment. Internship Level IV class will be 2 hours per week face to face. It will run concurrently with the Level IV externship. The externship includes 25-30 required work hours at an off-campus site. The job(s) will be related to the student's stated career concentration. Supervisors will complete weekly job evaluations and students will complete daily self-assessments which are a required part of the course and will be due every week. Students will also schedule a private meeting with the instructor at midway point and end of semester to review Supervisor's weekly job evaluations. Prerequisites: LKES 0542

Learning Outcomes

Learning Outcomes

Name
Complete a portfolio and update their resume for post-graduation job search.

Name
Participate in at least 3 mock or real interviews.

Name
Create flashcards with questions and answers for real life situations to use during interviews.

Name
Complete at least 5 job applications.

Name
Send at least 5 resumes for post-graduation jobs.

Name
Discuss and demonstrate effective conflict resolution and problem-solving strategies during the internship job.

Name
Demonstrate understanding of reasons for termination and how to leave a job professionally.

Name
Demonstrate effective time management strategies for daily tasks when given close to a full-time schedule.

Name
Demonstrate effective strategies to regulate emotions and maintain professionalism when working with others.

LKES0651 - LIFE SKILLS III

General

Course Prefix
LKES

Course Number
0651

Description
This course equips students with essential life skills, focusing on self-advocacy, workplace rights and responsibilities, and personal wellness. Students will develop skills in self-knowledge, communication, and social interactions, while completing a project on health and wellness. They will also explore community resources, practice self-care techniques, and engage in conflict resolution exercises, with an emphasis on self-determination and effective communication.Prerequisites: LKES 0451

LKES0751 - LIFE SKILLS IV

General

Course Prefix
LKES

Course Number
0751

Description
This course equips students with essential life skills for personal and professional growth. It focuses on self-advocacy, financial management, workplace preparedness, emotional regulation, and goal-setting. Students will complete a personal budgeting project, create a mock resume and cover letter, and practice workplace communication through role-plays. They will also develop long-term goals and engage in activities for emotional regulation, including stress management techniques. Emphasis is placed on self-knowledge, communication, social interactions, and building persistence through self-determination, helping students navigate the workplace, manage their finances, and maintain emotional well-being.Prerequisites: LKES 0651

LPHD9013 - DISSERTATION I

General

Course Prefix
LPHD

Course Number
9013

Description
The dissertation is the major capstone research and writing project designed to demonstrate program mastery and to make an original contribution to the professional field. Students will enroll in the dissertation sequence while they study for and take the comprehensive exam. The dissertation consists of six phases: introduction, literature review, methodology, results, discussion, and defense. This course is variable credit for 1 to 3 credit hours.Prerequisite: LPHD 9043; Permission of advisor

MATH121L - COLLEGE ALGEBRA WORKSPACE

General

Course Prefix
MATH

Course Number
121L

Description
In this course a systematic development of fundamental algebraic operations is stressed. Included in this development are systems of linear equations and inequalities; linear, quadratic, exponential and logarithmic functions; absolute value equations; radicals; conic sections.Corequisite: MATH 1214

Credit Hours

Minimum Credit Hours:

- MATH1214 - COLLEGE ALGEBRA WITH LAB

Learning Outcomes

Learning Outcomes

Objective
Use properties of logarithms to solve exponential equations and logarithmic equations.

Name
Demonstrate an understanding of and employ function notation.

Name
Interpret information displayed graphically such as domain, range, intercepts, function values, increasing/decreasing intervals, and maximums/minimums.

Name
Analyze the graphs of linear, absolute value, quadratic, rational, cubic, radical, exponential, and logarithmic functions.

Name
Apply transformations to the graphs of common functions.

Name
Combine functions using algebra of functions, specifying domains.

Name
Write functions as compositions.

Name
Verify and find the inverse of a one-to-one function.

Name
Describe the end behavior, determine zeros of, and graph polynomial functions.

Name
Utilize the Rational Zero Theorem, Remainder Theorem, Factor Theorem, and synthetic division to solve a polynomial equation.

Name
Calculate the domain and asymptotes of rational functions.

Name
Convert an exponential equation to logarithmic form, and a logarithmic equation to exponential form.

Name
Use the properties of logarithms to expand a logarithmic expression, and to write an expanded logarithmic expression as a single logarithm.

Name
Use properties of logarithms to solve exponential equations and logarithmic equations.

MATH131L - TOPICS IN MATHEMATICS WORKSPACE

General

Course Prefix
MATH

Course Number
131L

Description
This is a discrete mathematics course that demonstrates the beauty and utility of mathematics. Topics for this course are set theory, logic, financial mathematics, probability, elementary graph theory and voting theory. Corequisite: MATH 1314

Credit Hours

Minimum Credit Hours:
1

Maximum Credit Hours:
1

(Credit Hours) Value:

Corequisite

Complete ALL of the following Courses:

- MATH1314 - TOPICS IN MATHEMATICS WITH LAB

Learning Outcomes

Learning Outcomes

Objective
Apply various voting and apportionment methods and use the fairness criteria to determine flaws in voting methods.

Name
Use quantitative methods to help analyze problems in academic or social contexts; develop in-depth arguments supported by quantitative evidence; and communicate those arguments in both verbal form and quantitative displays (e.g., tables, diagrams, graphs, mathematical equations, or other relevant formats).

Name
Use set theory and Venn diagrams to model relationships and solve problems in varying contexts.

Name
Use logic connectors and quantifiers to express statements, truth tables and DeMorgan's Law to determine the equivalence of statements, and Euler circles to determine the validity of syllogistic arguments.

Name
Use basic financial mathematics to calculate simple and compound interest, monthly payments, and the cost of installment loans using annual percentage rate tables.

Name
Apply empirical, theoretical, and conditional probability and solve problems involving tree diagrams, conditional and mutually exclusive events, the counting principle, permutations, and combinations.

Name
Use graphs and trees to represent real-life settings and solve problems using Euler and Hamilton paths and circuits.

Name
Apply various voting and apportionment methods and use the fairness criteria to determine flaws in voting methods.

MATH1003 - MATHEMATICS I

General

Course Prefix
MATH

Course Number
1003

Description
Mathematics studied as a liberal art through close reading and discussion of Euclid's Elements, books I-V. Directed not only toward developing the student's mathematical competence through demonstration of propositions, this course emphasizes reflection upon the meaning and nature of mathematics. Topics investigated include: Book I: The geometry of triangles and parallelograms, through the Pythagorean Theorem. Book II: Geometrical algebraBook III: The geometry of circles. Book IV: The geometry of circles, continued.Book V: The general theory of ratio and proportion.Book VI: Application of the theory of ratio, and proportion to plane figures.

Learning Outcomes

Learning Outcomes

Name
Have a sound understanding of rigorous mathematical reasoning and classical geometry.

Name
Demonstrate elementary knowledge of classical mathematical ideas.

Name
Apprehend and practice the distinctive intellectual habits of the disciplines.

Name
Interpret and investigate the relations among mathematical ideas.

MATH1073 - INTERMEDIATE ALGEBRA

General

Course Prefix
MATH

Course Number
1073

Description
This course covers the fundamental principles of algebra. Topics include signed numbers, graphs of linear equations, equations and inequalities, polynomials, rational expressions, radicals, and factoring.

Credit Hours

Minimum Credit Hours:
3

Maximum Credit Hours:
3

(Credit Hours) Value:
3

Learning Outcomes

Learning Outcomes

Name
Simplify algebraic expressions

Name
Solve simple equations and inequalities

Name
Graph linear equations

Name
Add, subtract, multiply, divide polynomials

Name
Understand how to factor polynomials.

Name
Simplify radical expressions and perform basic operations using radical expressions.

Name
Simplify and solve problems using complex numbers

Name
Solve quadratic equations

Name
Identify functions, domain, and range.

MATH1083 - ARITHMETICA THEORY

General

Course Prefix
MATH

Course Number
1083

Description
The focus of this course is understanding number theory. Students will learn how and why arithmetical properties and operations work, recognizing and applying the beautiful axiom systems upon which mathematics is built. Beyond addressing simple
calculations, this course investigates how and why arithmetic works. Learning experiences will include investigations, dialogues, proofs, and applications.

Credit Hours

Minimum Credit Hours:
3

Maximum Credit Hours:
3

(Credit Hours) Value:
3

Contact Hours (not needed)

(Contact Hours) Value (not needed) :
0

Repeatable:

Number Of Repeats:
3

Number Of Credits:
3

Learning Outcomes

Learning Outcomes

Name
Compare number systems in their subset and superset relationships and perform arithmetic operations in each.

Name
Examine the field axioms associated with the respective number systems and employ them in arithmetic operations.

Name
Apply reflexive, symmetric, transitive, and equivalent relations and their applications to arithmetic and appropriately apply the trichotomy property and order of operations.

Name
Explain why arithmetic operations work as they do and algebraic and transcendental numbers.

Name
Demonstrate prime factorization of composite numbers and understand their significance in number theory.

Name
Demonstrate the ability to construct and present mathematical proofs to justify their reasoning and solutions.

Name
Identify numerical patterns and formulate conjectures based on their observations.

Name
Apply grammar, dialectic, and rhetoric to integrate the topic with Gods revelation through His creation, Moral PhiloSophae, and OrthoDoxia defined through scriptural paideia.

MATH1093 - LOGICA

General

Course Prefix
MATH

Course Number
1093

Description
This course serves as an introduction to classical logic, a foundational branch of mathematics, within the framework of the Christian worldview. It explores the principles governing valid reasoning and argumentation. The primary focus is on propositional and first-order logic, providing students with a rigorous framework for analyzing and constructing logical arguments. Topics include propositional logic, first-order logic, proof theory, model theory, predicate calculus, and metalogic.

Credit Hours

Minimum Credit Hours:
3

Maximum Credit Hours:

Number Of Credits:
3

Learning Outcomes

Learning Outcomes

Name
Demonstrate the ability to critically analyze logical arguments within the framework of a Christian worldview to evaluate propositions and logical structures considering Christian principles, fostering a deeper understanding of the compatibility between faith and reason.

Name
Demonstrate ethical reasoning skills by applying logical principles to moral and ethical dilemmas.

Name
Integrate faith and reason by demonstrating how classical logic provides a rational foundation for Christian beliefs.

Name
Master the propositional and first-order logic principles to develop clarity in expressing Christian ideas and beliefs and construct precise and well-reasoned arguments.

Name
Apply a biblical worldview in the analysis of logical systems to explore how the principles of classical logic align with biblical teachings, promoting a holistic understanding of truth and reasoning.

Name
Construct valid logical arguments to use their analytical skills responsibly in discussions and debates, reflecting the Christian virtues of humility and respect in intellectual discourse.

Name
Delineate the foundational role of logic in theological inquiry for further studies in OrthoDoxia or Natural PhiloSophae, enabling them to explore the relationship between faith, reason, and logic within the Christian tradition.

Name
Apply grammar, dialectic, and rhetoric to integrate the topic with Gods revelation through His creation, Moral PhiloSophae, and OrthoDoxia defined through scriptural paideia.

MATH1123 - EUCLIDEAN GEOMETRIA I

General

Course Prefix
MATH

Course Number
1123

Description
In this course, students will investigate plane geometry through several perspectives, including synthetic, metric, analytic, and locus geometry. Each is guided by logic within axiom systems. Learning experiences will include investigations, dialogues, proofs, and applications.

Credit Hours

Minimum Credit Hours:
3

Maximum Credit Hours:

Learning Outcomes

Learning Outcomes

Name
Demonstrate logical reasoning and critical thinking, drawing upon the philosophical foundations of logic.

Name
Construct rigorous geometrical proofs, enhancing logical and deductive reasoning skills.

Name
Apply the principles and concepts to real-world situations, emphasizing the practical utility of geometric reasoning in various contexts.

Name
Demonstrate understanding of synthetic, metric, analytic, and locus geometries by working between them as appropriate.

Name
Classify undefined terms, defined terms, axioms, theorems, and corollaries in applications and proofs of synthetic and metric geometry theorems regarding lines, angles, triangles, and quadrilaterals.

Name
Illustrate direct and indirect proofs and proofs by construction.

Name
Experiment with dynamic geometry software to investigate plane geometry concepts.

Name
Apply grammar, dialectic, and rhetoric to integrate the topic with Gods revelation through His creation, Moral PhiloSophae, and OrthoDoxia defined through scriptural paideia.

MATH1153 - EUCLIDEAN GEOMETRIA II

General

Course Prefix
MATH

Course Number
1153

Description
This course builds upon Geometry I through plane synthetic, metric, analytic, and locus geometries; 3-dimensional geometry; and brief introductions to neutral and non-Euclidean geometries. Learning experiences will include investigations, dialogues, proofs, and applications.Prerequisite: MATH 1123 Euclidean GeoMetria I

MATH1163 - ALGEBRA I

General

Course Prefix
MATH

Course Number
1163

Description
This course considers real and complex numbers and operations, the Cartesian coordinate system, transformations of rigid figures, linear equations and inequalities, relations and functions, direct and indirect variation, polynomials, rational functions, and data analysis and probability. Learning experiences will include investigations, dialogues, proofs, and applications.

Credit Hours

Learning Outcomes

Learning Outcomes

Name
Demonstrate the ability to use algebraic notation to represent mathematical relationships, rewrite them, evaluate them, solve systems of linear equations by various methods, and interpret the solutions in terms of real-world problems.

Name
Factor quadratic expressions and solve quadratic equations using various methods, including the quadratic formula, by writing radical expressions into equivalent forms, performing arithmetic operations with them, graphing quadratic functions, and understanding their key features.

Name
Appraise functions and understand their properties to master the concepts and applications of the Cartesian coordinate system.

Name
Demonstrate understanding of transformations such as translations, reflections, and rotations on the Cartesian plane by solving problems and direct and indirect variations.

Name
Evaluate operations on and factor polynomials in order to rewrite, manipulate, solve, and apply rational expressions; collect, analyze, and interpret data; make decisions and predictions; and apply probability concepts.

Name
Participate in investigative activities and discussions to deepen their understanding of mathematical concepts.

Name
Apply algebraic concepts to real-world applications, demonstrating the practical relevance of the material.

Name
Apply grammar, dialectic, and rhetoric to integrate the topic with Gods revelation through His creation, Moral PhiloSophae, and OrthoDoxia defined through scriptural paideia.

MATH1173 - ALGEBRA II

General

Course Prefix
MATH

Course Number
1173

Description
This course builds upon Algebra I and considers functions and their inverses, quadratic functions, sequences and series, systems of equations and inequalities, polynomials and operations, the Fundamental Theorem of Algebra, radical function, exponential and logarithmic functions, and transformations of functions. Learning experiences will include investigations, dialogues, proofs, and applications.Prerequisite: MATH 1163 Algebra I

Learning Outcomes

Learning Outcomes

Name
Employ their knowledge of functions and inverses to solve equations and real-world problems, graph and analyze quadratic functions, and apply them to modeling real-world scenarios.

Name
Demonstrate proficiency in understanding arithmetic and geometric sequences and series, their terms and sum formulas, and how to solve problems related to patterns and mathematical modeling.

Name
Perform operations on, factor, and solve polynomials, using the fundamental theorem of algebra to find roots of polynomial equations and apply radical, exponential, and logarithmic functions.

Name
Translate and transform functions through translations, reflections, stretches, and compressions.

Name
Participate in investigative activities and discussions to deepen their understanding of mathematical concepts and relationships.

Name
Demonstrate their ability to construct and present mathematical proofs to justify their reasoning and solutions.

Name
Apply the concepts and techniques learned in the course to real-world situations and problem-solving.

Name
Apply grammar, dialectic, and rhetoric to integrate the topic with Gods revelation through His creation, Moral PhiloSophae, and OrthoDoxia defined through scriptural paideia.

MATH1203 - MATHEMATICS II

General

Course Prefix
MATH

Course Number
1203

Description
Euclid II will complete the introduction of students to the concepts and methods of Greek geometry through intensive study of the latter books of the Elements. Emphasis will be placed on understanding and achieving rigor in mathematical proofs. Classes will be conducted in a participatory manner, with students demonstrating propositions.Prerequisite: MATH 1003

Learning Outcomes

Learning Outcomes

Name
Demonstrate an understanding of and employ function notation.

Name
Interpret information displayed graphically such as domain, range, intercepts, function values, increasing/decreasing intervals, and maximums/minimums.

Name
Analyze the graphs of linear, absolute value, quadratic, rational, cubic, radical, exponential, and logarithmic functions.

Name
Apply transformations to the graphs of common functions.

Name
Combine functions using algebra of functions, specifying domains.

Name
Write functions as compositions.

Name
Verify and find the inverse of a one-to-one function.

Name
Describe the end behavior, determine zeros of, and graph polynomial functions.

Name
Utilize the Rational Zero Theorem, Remainder Theorem, Factor Theorem, and synthetic division to solve a polynomial equation.

Name
Calculate the domain and asymptotes of rational functions.

Name
Convert an exponential equation to logarithmic form, and a logarithmic equation to exponential form.

Name
Use the properties of logarithms to expand a logarithmic expression, and to write an expanded logarithmic expression as a single logarithm.

Name
Use properties of logarithms to solve exponential equations and logarithmic equations.

MATH1223 - QUANTITATIVE REASONING

General

Course Prefix
MATH

Course Number
1223

Description
This course emphasizes quantitative reasoning skills and is designed to prepare students to think critically about the world they live in. Applications in consumer education, civic engagement, and personal finance will be presented. Topics include logic, probability, statistics, exponential growth, and data analysis.

Credit Hours

Minimum Credit Hours:

MATH1313 - TOPICS IN MATHEMATICS

General

Course Prefix
MATH

Course Number
1313

Description
This is a discrete mathematics course that demonstrates the beauty and utility of mathematics. The topics for this course are set theory, logic, financial mathematics, probability, elementary graph theory and voting theory.

Credit Hours

Minimum Credit Hours:
3

Maximum Credit Hours:
3

Learning Outcomes

Learning Outcomes

Name
Use quantitative methods to help analyze problems in academic or social contexts; develop in-depth arguments supported by quantitative evidence; and communicate those arguments in both verbal form and quantitative displays (e.g., tables, diagrams, graphs, mathematical equations, or other relevant format).

Name
Demonstrate an understanding of fundamental sets and subset concepts.

Name
Construct Venn Diagrams to illustrate set relationships and verify the equality of sets.

Name
Use Venn Diagrams and set concepts to solve application problems.

Name
Express statements using appropriate logic connectors and quantifiers.

Name
Determine the equivalence of two statements using truth tables, DeMorgans Law, and conditional statement rules.

Name
Determine the validity of syllogistic arguments and syllogistic arguments.

Name
Calculate simple and compound interest to solve real-life loan and investment problems.

Name
Apply basic financial mathematics to monthly payments and annual percentage rate for fixed installment loans.

Name
Demonstrate an understanding of empirical, theoretical, conditional probability.

Name
Solve probability problems, including conditional and mutually exclusive events.

Name
Solve probability problems using the counting principle, permutations, and combinations.

Name
Use graphs and trees to represent real-life settings.

Name
Demonstrate an understanding of graph movement through paths, circuits, and bridges.

Name
Solve real-life problems using Euler and Hamilton paths and circuits.

Name
Apply various voting methods to determine the winner of an election.

Name
Apply the fairness criteria to determine flaws in voting methods.

Name
Apply various methods of apportionment and identify flaws.

MATH1314 - TOPICS IN MATHEMATICS WITH LAB

General

Course Prefix
MATH

Course Number
1314

Description
This course introduces students to non-algebraic principles including sets, logic, Euclidean geometry, probability, and statistics.

A one-hour concurrent lab with an emphasis on the prerequisite skills necessary for solving mathematical problems will be required of any student with a math ACT score less than 19 or a math SAT score less than 440 and may be used as elective credit only.

Learning Outcomes

Name
Use quantitative methods to help analyze problems in academic or social contexts; develop in-depth arguments supported by quantitative evidence; and communicate those arguments in both verbal form and quantitative displays (e.g., tables, diagrams, graphs, mathematical equations, or other relevant formats).

Name
Use set theory and Venn diagrams to model relationships and solve problems in varying contexts.

Name
Use logic connectors and quantifiers to express statements, truth tables and DeMorgan's Law to determine the equivalence of statements, and Euler circles to determine the validity of syllogistic arguments.

Name
Use basic financial mathematics to calculate simple and compound interest, monthly payments, and the cost of installment loans using annual percentage rate tables.

Name
Apply empirical, theoretical, and conditional probability and solve problems involving tree diagrams, conditional and mutually exclusive events, the counting principle, permutations, and combinations.

Name
Use graphs and trees to represent real-life settings and solve problems using Euler and Hamilton paths and circuits.

Name
Apply various voting and apportionment methods and use the fairness criteria to determine flaws in voting methods.

MATH1323 - EXPLORATION IN MATHEMATICS

General

Course Prefix
MATH

Course Number
1323

Description
This is a discrete mathematics course that demonstrates the beauty and utility of mathematics. Possible topics for this course are set theory, elementary number theory, history of mathematics, numbers and number systems, financial mathematics, systems of equations, and matrices.

Credit Hours

Minimum Credit Hours:
3

Maximum Credit Hours:
3

Learning Outcomes

Learning Outcomes

Name
Comprehend early systems of numeration and computational methods.

Name
Explain the properties of the Hindu-Arabic numeration system and other place value systems we use today.

Name
Solve application problems by applying linear, quadratic, and exponential models.

Name
Solve application problems of systems of linear inequalities using linear programming graphing methods.

Name
Calculate simple and compound interest to solve real-life loan and investment problems.

Name
Apply basic financial mathematics to monthly payments and annual percentage rate for fixed installment loans.

Name
Use graphs and trees to represent real-life settings.

Name
Demonstrate an understanding of graph movement through paths, circuits, and bridges.

Name
Solve real-life problems using Euler and Hamilton paths and circuits.

Name
Apply various voting methods to determine the winner of an election.

Name
Apply the fairness criteria to determine flaws in voting methods.

Name
Apply various methods of apportionment and identify flaws.

MATH1343 - COLLEGE ALGEBRA

General

Course Prefix
MATH

Course Number
1343

Description
This course provides students a college level academic experience that emphasizes the use of algebra and functions in problem solving and modeling, provides a foundation in quantitative literacy, supplies the algebra and other mathematics needed in partner disciplines, and helps meet quantitative needs in and outside of academia. Students address problems presented as real-world situations by creating and interpreting mathematical models. Solutions to the problems are formulated, validated, and analyzed using mental, paper and pencil, algebraic, and technology-based techniques as appropriate.Prerequisite: Geometry and Algebra II

Learning Outcomes

Learning Outcomes

Name
Organize mathematical concepts into orderly systems and use both computational and non-computational methods as needed to solve problems.

Name
Interpret information displayed graphically.

Name
Solve real-world problems using a variety of techniques and strategies.

Name
Analyze the graphs of linear, absolute value, quadratic, rational, exponential and logarithmic functions.

Name
Perform operations on functions.

Name
Simplify expressions involving complex numbers, logarithms and radicals.

Name
Solve equations/inequalities involving linear, quadratic, absolute value, rational, radical, exponential and logarithmic expressions.

MATH1413 - PRECALCULUS

General

Course Prefix
MATH

Course Number
1413

Description
This course covers algebraic relations and functions, systems of equations, rational functions, polynomials, exponential functions and logarithms, trigonometric functions and their inverses, graphs, and identities. A placement exam is given at the beginning of each course. Students must demonstrate proficiency to remain in this course.A math score on the ACT of 21 or the SAT of 500 is required. Cost for items and materials provided by our Bookstore are charged as a fee attached to the course.

Learning Outcomes

Learning Outcomes

Name
Demonstrate an understanding and employ function notation.

Name
Interpret a function from an algebraic, numerical, graphical, and verbal perspective and extract information such as domain, range, intercepts, function values, increasing/decreasing intervals, maximums/minimums, and symmetry.

Name
Analyze the graphs of linear, absolute value, quadratic, rational, cubic, radical, exponential, logarithmic, trigonometric, and piecewise functions.

Name
Apply transformations to the graphs of common functions.

Name
Combine functions using algebra of functions, specifying domains.

Name
Write functions as compositions.

Name
Verify and find the inverse of a one-to-one function.

Name
Describe the end behavior, determine zeros of, and graph polynomial functions.

Name
Utilize the Rational Zero Theorem, Remainder Theorem, Factor Theorem, and synthetic division to solve a polynomial equation.

Name
Calculate the domain and asymptotes of rational functions.

Name
Convert an exponential equation to logarithmic form, and a logarithmic equation to exponential form.

Name
Use the properties of logarithms to expand a logarithmic expression, and to write an expanded logarithmic expression as a single logarithm.

Name
Use properties of logarithms to solve exponential equations and logarithmic equations.

Name
Convert angles between degrees and radians.

Name
Describe relationship between the Unit Circle and the trigonometric functions.

Name
Find the inverse of the trigonometric functions.

Name
Utilize the trigonometric functions to solve right triangles.

Name
Verify trigonometric identities and equations.

MATH1443 - CALCULUS I

General

Course Prefix
MATH

Course Number
1443

Description
This course includes topics that cover the range of the first semester of a Calculus course in college. The course is separated into three topics: Limits, Differentiation, and Integration. The limits section includes their properties and both graphical and numerical representations. The differentiation and integration sections include the definitions, rules, graphs, and real-life applications for the derivative and integral functions and how both are related to each other.Prerequisite: Advanced Trigonometry & Pre-Calculus

Credit Hours

Minimum Credit Hours:
3

Maximum Credit Hours:

Learning Outcomes

Learning Outcomes

Name
Determine the existence of, estimate numerically and graphically, and find algebraically the limits of functions.

Name
Recognize and determine infinite limits and limits at infinity and interpret with respect to asymptotic behavior.

Name
Determine continuity at a point or on intervals and distinguish between the types of discontinuities at a point.

Name
Determine the derivative of a function using the limit definition. Interpret the derivative as the slope of a tangent line to a graph, the slope of a graph at a point, and the rate of change of a dependent variable with respect to an independent variable.

Name
Determine the derivative and higher derivatives of a function explicitly and implicitly using differentiation formulas.

Name
Determine absolute extrema for a continuous function on a closed interval. Use these and other appropriate techniques to solve optimization problems.

Name
Use the first and second derivatives to analyze and sketch the graph of a function, including asymptotes, intervals on which the graph is increasing, decreasing, concave up, or concave down, and any local extrema and inflection points.

Name
Solve related rates problems.

Name
Determine antiderivatives and indefinite integrals and integrate by substitution.

Name
Use the Fundamental Theorem of Calculus to evaluate definite integrals.

Name
Use definite integrals to find areas of planar regions and volumes of three dimensional figures.

Name
Use definite integrals to solve problems involving work.

MATH2003 - STATISTICS

General

Course Prefix
MATH

Course Number
2003

Description
This course is an introduction to statistical problem solving and methodology. Topics include representations of univariate and bivariate data; designed methods for data collection and the role of randomness in statistical studies; probability, statistical distributions, confidence intervals, and hypothesis testing; and statistical estimation and significance. Emphasis will be on conceptual understanding and interpretation of results rather than theoretical development. Learning experiences will include investigations, dialogues, proofs, and applications.Prerequisite: MATH 1173 Algebra II

Credit Hours

Minimum Credit Hours:
3

Maximum Credit Hours:
3

(Credit Hours) Value:
3

Contact Hours (not needed)

(Contact Hours) Value (not needed) :
0

Repeatable:
Yes

Number Of Repeats:
3

Number Of Credits:
3

Learning Outcomes

Learning Outcomes

Name
Construct univariate and bivariate data using appropriate graphical and numerical methods, such as histograms, scatterplots, and summary statistics.

Name
Apply probability theory, including concepts like sample spaces, events, and probability rules, to common statistical distributions (e.g., normal, binomial, and Poisson distributions) and their properties.

Name
Interpret confidence intervals, understanding their role in estimating population parameters to learn the principles of hypothesis testing, including setting up null and alternative hypotheses, conducting tests, and making decisions based on the results.

Name
Model population parameters using point estimation and interval estimation to interpret the meaning of these estimates in real-world contexts.

Name
Demonstrate a conceptual understanding of statistical concepts and their applications rather than theoretical development.

Name
Engage in investigative activities and discussions to gain hands-on experience in collecting and analyzing data, applying statistical techniques, and solving real-world problems.

Name
Demonstrate the ability to interpret statistical results, draw meaningful conclusions, and make informed decisions based on data analysis.

Name
Apply grammar, dialectic, and rhetoric to integrate the topic with Gods revelation through His creation, Moral PhiloSophae, and OrthoDoxia defined through scriptural paideia.

MATH2023 - INTRO TO PROBABILITY AND STATISTICS

General

Course Prefix
MATH

Course Number
2023

Description
This course is an introduction to the concepts and methods of probability and statistics. The course is designed for students interested in the application of probability and statistics in business and other social sciences. Topics include descriptive statistics, probability theory, random variables and probability distributions, sampling distributions, estimating population parameters, testing hypothesis about population parameters, correlation and regression, and analysis of variances.

Credit Hours

Minimum Credit Hours:
3

Maximum Credit Hours:
3

(Credit Hours) Value:
3

Contact Hours (not needed)

(Contact Hours) Value (not needed) :
3

Repeatable:
Yes

Number Of Repeats:
3

Number Of Credits:
3

Learning Outcomes

Learning Outcomes

Name
Summarize data graphically by displaying data using methods from two variables descriptive statistics, find measures of central tendency and measure of variation for data sets.

Name
Construct a histogram for a given set of data. This can be done by hand or with a graphing calculator.

Name
Find simple probabilities and probabilities of compound events.

Name
Standardize a normally distributed random variable, use normal distribution tables to find probabilities for normally distributed random variables and the t-distribution, use the Central Limit Theorem to find probabilities for sampling distributions.

Name
Construct and interpret confidence intervals for proportions, means, and variances.

Name
Identify the basics of hypothesis testing and perform hypothesis testing for means, proportions and standard deviations from one population, and difference of means and proportions from two populations.

Name
Construct a single-sample confidence interval and draw an appropriate conclusion. This can be done by hand or with a graphing calculator.

Name
Construct a single-sample hypothesis test based on a given claim and draw an appropriate conclusion. This can be done by hand or with a graphing calculator.

Name
Find linear least-squares regression equations for appropriate data sets, graph least-square regression equations on the scatter plot for the data sets and find and apply the coefficient of correlation.

Name
Use the chi-square distribution to test independence and to test goodness of fit.

Name
Use appropriate statistical technique to analyze and interpret applications based on data related to business, social sciences, psychology, life sciences, health sciences or education, and interpret results using technology-based statistical analysis.

MATH2043 - PRECALCULUS

General

Course Prefix
MATH

Course Number
2043

Description
This course builds upon Algebra II and considers: functions (trigonometric, power, polynomial, rational, exponential, logarithmic, logistic, and polar) and transformations; trigonometry (unit circle; trigonometric functions, equations, and graphs; right triangle trigonometry; trigonometric functions and inverses; laws of sines and cosines; trigonometric identities; double and half-angle formulas); Fundamental Theorem of Algebra; conic sections; vectors; complex numbers in trigonometric form; polar equations of conic sections; 3-D coordinate system; The Binomial Theorem; matrix algebra; sequences and series; and limits. Learning experiences will include investigations, dialogues, proofs, and applications.Prerequisite: MATH 1173 Algebra II

Learning Outcomes

Learning Outcomes

Name
Apply various functions, including trigonometric, power, polynomial, rational, exponential, logarithmic, logistic, and polar functions, with properties and transformations to become proficient in trigonometry, including the unit circle, trigonometric functions equations, and graphs. They can apply trigonometric concepts in various contexts and demonstrate a strong understanding of right triangle trigonometry, including using trigonometric functions to solve right triangle problems.

Name
Show trigonometric functions and their inverses, understanding their relationships and properties to learn and apply the laws of sines and cosines to solve problems related to triangles, including cases of oblique triangles, and develop proficiency in working with trigonometric identities, including proving and applying them in various mathematical situations.

Name
Construct double and half-angle formulas for trigonometric functions to understand the fundamental theorem of algebra and apply it to find roots of polynomial equations and master conic sections, including their properties and equations, and be able to identify and work with different types of conic sections, vectors, including vector operations, vector components, and vector applications in geometry and physics.

Name
Illustrate proficiency in representing complex numbers in trigonometric form and working with them to perform operations.

Name
Solve problems, apply polar equations to describe and graph conic sections in polar coordinates, and examine a 3-dimensional coordinate system to represent points and shapes in three dimensions.

Name
Apply the binomial theorem to expand binomial expressions, find coefficients in binomial expansions and sequences and series, including arithmetic and geometric series, and understand their properties and applications.

Name
Grasp the concept of limits and be able to evaluate the limits of functions as they approach specific values.

Name
Apply grammar, dialectic, and rhetoric to integrate the topic with Gods revelation through His creation, Moral PhiloSophae, and OrthoDoxia defined through scriptural paideia.

MATH2053 - MATHEMATICA PROOF

General

Course Prefix
MATH

Course Number
2053

Description
This course investigates methods of mathematical proof. Formal proof topics include propositional calculus, predicate calculus, and several first-order theories. Informal proof topics are drawn from number theory, set theory, and other areas of mathematics. Learning experiences will include investigations, dialogues, proofs, and applications.Prerequisite: MATH 2043 PreCalculus

Credit Hours

Minimum Credit Hours:
3

Maximum Credit Hours:

Learning Outcomes

Learning Outcomes

Name
Apply the principles and techniques of propositional calculus, including truth tables, logical connectives, propositional logic rules, predicate calculus, quantifiers, and predicates.

Name
Employ rules of inference in first-order logic in formal proof methods, including proof by contradiction, direct proof, and mathematical induction.

Name
Model theorems in number theory, set theory, and other mathematical topics.

Name
Participate in dialogues and discussions to enhance their mathematical communication skills.

Name
Demonstrate the ability to explain and justify their mathematical reasoning to others.

Name
Present mathematical proofs, including sound arguments, logical structure, and rigorous reasoning.

Name
Appraise their critical thinking skills by dissecting and solving complex mathematical problems by applying formal and informal proof techniques.

Name
Apply grammar, dialectic, and rhetoric to integrate the topic with Gods revelation through His creation, Moral PhiloSophae, and OrthoDoxia defined through scriptural paideia.

MATH2133 - GEOMETRY

General

Course Prefix
MATH

Course Number
2133

Description
This course is a study of Euclidean geometry and Non-Euclidean geometries.

Credit Hours

Minimum Credit Hours:
3

Maximum Credit Hours:
3

(Credit Hours) Value:
3

Contact Hours (not needed)

(Contact Hours) Value (not needed) :
3

Repeatable:
Yes

Number Of Repeats:
3

Number Of Credits:
3

Learning Outcomes

Learning Outcomes

Name
Know vocabulary and symbolism of Euclidean geometry.

Name
Use line and angle relationships.

Name
Apply triangle congruence rules to various types of problems.

Name
Apply properties of parallel lines and quadrilaterals to solve problems.

Name
Apply principles of similarity to polygons.

Name
Apply procedures for finding perimeter, area, and volume to geometric shapes.

Name
Apply properties of related segments and angles to circles.

Name
Apply principles of transformational geometry.

Name
Analyze postulates, theorems, and properties to construct proofs.

MATH2144 - CALCULUS I

General

Course Prefix
MATH

Course Number
2144

Description
This course involves the study of limits and continuity, derivatives and applications.

Credit Hours

Minimum Credit Hours:
4

Maximum Credit Hours:
4

(Credit Hours) Value:
4

Contact Hours (not needed)

(Contact Hours) Value (not needed) :
4

Repeatable:

Number Of Credits:
4

Learning Outcomes

Learning Outcomes

Name
Verify the value of the limit of a function at a point using the definition of the limit.

Name
Calculate the limit of a function at a point numerically and algebraically using appropriate techniques, including LHospitals rule.

Name
Find points of discontinuity for functions and classify them.

Name
Demonstrate an understanding of the consequences of the Intermediate Value Theorem for continuous functions.

Name
Describe the relationship between the slope of the secant line and the slope of the tangent line.

Name
Discuss the derivative of a function at a point as the instantaneous rate of change.

Name
Interpret the derivative of a function at a point as the slope of the tangent line and estimate its value from the graph of a function.

Name
Recognize the graph of the derivative from the given graph of a function.

Name
Approximate the value of the derivative at a point using the difference quotient.

Name
Compute the value of the derivative at a point algebraically using the (limit) definition.

Name
Derive the expression for the derivative of elementary functions from the (limit) definition.

Name
Show whether a function is differentiable at a point.

Name
Compute the equation for the line tangent to a function at a point.

Name
Interpret the tangent line geometrically as the local linearization of a function.

Name
Compute the expression for the derivative of a function using the rules of differentiation, including the power rule, product rule, quotient rule, and chain rule.

Name
Differentiate a relation implicitly and compute the line tangent to its graph at a point.

Name
Differentiate exponential, logarithmic, trigonometric, and inverse trigonometric functions.

Name
Obtain expressions for higher-order derivatives of a function using the rules of differentiation.

Name
Demonstrate understanding of the consequences of Rolles theorem and the Mean Value Theorem for differentiable functions.

Name
Interpret the value of the first and second derivative as measures of increase and concavity of a function.

Name
Compute the critical points of a function on an interval.

Name
Identify the extrema of a function on an interval and classify them as minima, maxima, or saddles using the first derivative test.

Name
Implement Newtons Method to find a root of a polynomial.

Name
Find the antiderivative of elementary polynomials, exponential, logarithmic, and trigonometric functions.

Name
Estimate the area under a curve using finite sums.

Name
Evaluate Riemann sums.

Name
Compute definite integrals.

Name
Apply the Fundamental Theorem of Calculus.

MATH2213 - DISCRETE MATHEMATICS

General

Course Prefix
MATH

Course Number
2213

Description
An introduction to topics in discrete mathematics including propositional and predicate logic, functions and sets, induction and other proof techniques, recurrences, and modular arithmetic.

Credit Hours

Minimum Credit Hours:
3

Maximum Credit Hours:
3

(Credit Hours) Value:
3

Learning Outcomes

Learning Outcomes

Name
Evaluate the limits of functions as they approach specific values.

Name
Analyze continuity and discontinuities in functions to demonstrate understanding of the implications for a functions behavior.

Name
Classify algebraic, trigonometric, exponential, and logarithmic functions.

Name
Apply the derivative to solve real-world problems by analyzing various aspects of a function and definite integrals.

Name
Explain the fundamental theorem of calculus and its implications for evaluating definite integrals and finding antiderivatives.

Name
Determine the definite integral to solve practical problems related to area, volume, work, and other applications.

Name
Engage in investigative activities and discussions to deepen their understanding of mathematical concepts related to limits, continuity, differentiation, and integration.

Name
Apply grammar, dialectic, and rhetoric to integrate the topic with Gods revelation through His creation, Moral PhiloSophae, and OrthoDoxia defined through scriptural paideia.

MATH3023 - CALCULUS II

General

Course Prefix
MATH

Course Number
3023

Description
This course builds upon Calculus I and investigates logarithmic and exponential functions, circular functions and their inverses, techniques of integration, improper integrals, infinite series, Taylor polynomials, and power series. Learning experiences will include investigations, dialogues, proofs, and applications..Prerequisite: MATH 3003 Calculus I and MATH 2053 MatheMatica Proof

Learning Outcomes

Learning Outcomes

Name
Demonstrate how to explain and apply logarithmic, exponential, trigonometric, and inverse trigonometric functions, including graphs, properties, and applications.

Name
Apply various integration techniques, including integration by parts, trigonometric substitutions, partial fractions, and u-substitution, to solve definite and indefinite integrals.

Name
Evaluate improper integrals, including those with infinite limits and unbounded integrands.

Name
Construct infinite series, including arithmetic and geometric series, to demonstrate understanding of their convergence and divergence properties.

Name
Construct Taylor polynomials to approximate functions, understand their applications in calculus and power series, and find power series representations for functions.

Name
Demonstrate through investigative activities and discussions an understanding of mathematical concepts related to logarithmic and exponential functions, circular functions, integration techniques, and series.

Name
Apply critical thinking skills in solving complex mathematical problems using logarithmic, exponential, circular, and series functions.

Name
Apply grammar, dialectic, and rhetoric to integrate the topic with Gods revelation through His creation, Moral PhiloSophae, and OrthoDoxia defined through scriptural paideia.

MATH3043 - CALCULUS III

General

Course Prefix
MATH

Course Number
3043

Description
This course builds upon Calculus II and investigates parametric equations, vectors, vector-valued functions, functions of several variables, double and triple integrals, and vector analysis. Learning experiences will include investigations, dialogues, proofs, and applications.Prerequisite: MATH 3023 Calculus II

Credit Hours

Minimum Credit Hours:

Learning Outcomes

Learning Outcomes

Name
Apply parametric equations and their representations in describing curves and motion and work with vectors, vector addition, subtraction, scalar multiplication, dot product, and cross product.

Name
Explain vector-valued functions, how to graph them in three-dimensional space to study functions of several variables, partial derivatives, compute gradients, and the chain rule for multivariable functions.

Name
Evaluate double and triple integrals, applying them to calculate areas, volumes, and other physical quantities.

Name
Demonstrate multivariable calculus concepts to solve real-world problems, including optimization, surface area, and finding the center of mass.

Name
Engage in investigative activities and discussions to deepen their understanding of mathematical concepts related to parametric equations, vectors, and functions of several variables.

Name
Present mathematical proofs related to properties and theorems in vector analysis and multivariable calculus.

Name
Demonstrate critical thinking skills by solving complex mathematical problems using parametric equations, vectors, and functions of several variables.

Name
Apply grammar, dialectic, and rhetoric to integrate the topic with Gods revelation through His creation, Moral PhiloSophae, and OrthoDoxia defined through scriptural paideia.

Course Prefix
MATH

Course Number
3044

Description
This course focuses on integration, polar coordinates, vectors in space, indeterminate forms and proper integrals.

Credit Hours

Minimum Credit Hours:
4

Maximum Credit Hours:
4

(Credit Hours) Value:
4

Contact Hours (not needed)

(Contact Hours) Value (not needed) :
4

Repeatable:
Yes

Number Of Repeats:
3

Number Of Credits:
4

Learning Outcomes

Learning Outcomes

Name
Apply the principles of vector space.

Name
Calculate vector-valued functions to describe the path and motions of objects moving in space.

Name
Understand functions of several variables.

Name
Solve several applications of multiple integrals.

Name
Apply line and surface integrals to science and engineering problems.

MATH3123 - PROBABILITY

General

Course Prefix
MATH

Course Number
3123

Description
This course is an introduction to the study of randomness. Topics include discrete and continuous probability distributions, conditional probability, independence, combinatorial probability, expected value and variance, and laws of large numbers.

Credit Hours

Minimum Credit Hours:
3

Maximum Credit Hours:
3

(Credit Hours) Value:
3

Contact Hours (not needed)

(Contact Hours) Value (not needed) :
3

Repeatable:
Yes

Number Of Repeats:
3

Number Of Credits:
3

Learning Outcomes

Learning Outcomes

Name
Describe data graphically and compute measures of centrality and dispersion.

Name
Compute probabilities by modeling sample spaces and apply rules of permutations and combinations, additive and multiplicative laws, and conditional probability.

Name
Construct the probability distribution of a random variable, based on a real-world situation, and use it to compute expectation and variance.

Name
Compute probabilities based on practical situations using binomial and normal distributions.

Name
Acquire the necessary skills and knowledge to pass the introductory level Society of Actuaries exams.

MATH3133 - NUMBER THEORY

General

Course Prefix
MATH

Course Number
3133

Description
This course is a study of number theory including Euclid's algorithm, prime numbers, greatest common divisors, common multiples, prime factorization, congruence, diaphontine problems, and quadratic residues.

Credit Hours

Minimum Credit Hours:
3

Maximum Credit Hours:
3

(Credit Hours) Value:
3

Contact Hours (not needed)

(Contact Hours) Value (not needed) :
3

Repeatable:
No

Number Of Repeats:
3

Number Of Credits:
3

Learning Outcomes

Learning Outcomes

Name
Know basic properties of integers.

Name
Recognize the greatest common divisors and prime factors.

Name
Solve congruence problems.

Name
Demonstrate knowledge of multiplicative functions.

Name
Evaluate quadratic residues.

Name
Solve Diophantine equations.

MATH3223 - STATISTICAL METHODS I

General

Course Prefix
MATH

Course Number
3223

Description
This course is a study of the theory and techniques of statistical analysis; random variables, discrete and continuous distributions, estimation, and statistical hypothesis testing.

Credit Hours

Minimum Credit Hours:
3

Maximum Credit Hours:
3

(Credit Hours) Value:
3

Contact Hours (not needed)

(Contact Hours) Value (not needed) :
3

Repeatable:
Yes

Number Of Repeats:
3

Number Of Credits:
3

Learning Outcomes

Learning Outcomes

Name
Describe data graphically and compute measures of centrality and dispersion.

Name
Demonstrate conceptual understanding of probability and statistical ideas, principles, and procedures.

Name
Demonstrate an understanding of the variation in data and its relationship to the normal theory-based sampling distributions for the mean, variance, and ratio of two variances, including the concept of robustness.

Name
Conduct inference using parameter estimation and hypothesis testing for one and two samples, simple linear regression, one-way analysis of variance, and contingency tables, including use of appropriate technology.

Name
Interpret and explain the results of inferential procedures in the appropriate context.

MATH3234 - LINEAR ALGEBRA

General

Course Prefix
MATH

Course Number
3234

Description
This course is a study of vector spaces, transformations, matrices, eigenvalues, and systems of linear equations.

Credit Hours

Minimum Credit Hours:
4

Maximum Credit Hours:
4

(Credit Hours) Value:
4

Contact Hours (not needed)

(Contact Hours) Value (not needed) :
4

Repeatable:
Yes

Number Of Repeats:
3

Number Of Credits:
4

Learning Outcomes

Learning Outcomes

Name
Interpret vectors in the real and complex number system.

Name
Solve linear equations or a system of linear equations.

Name
Demonstrate knowledge of matrices.

Name
Apply knowledge of determinants.

Name
Distinguish the difference between a vector space and subspace.

Name
Demonstrate knowledge of eigenvalues.

MATH3243 - HISTORY OF MATHEMATICS

General

Course Prefix
MATH

Course Number
3243

Description
This course surveys the history of mathematics from antiquity to modern mathematics, using assigned readings, problems, discussion, research topics and present results orally and in writing. Required for all mathematics majors, and those seeking to teach in middle or high school.

Credit Hours

Minimum Credit Hours:
1

Maximum Credit Hours:
4

(Credit Hours) Value:
3

Contact Hours (not needed)

(Contact Hours) Value (not needed) :
3

Repeatable:
No

Number Of Repeats:
3

Number Of Credits:
3

Learning Outcomes

Learning Outcomes

Name
Know important people throughout mathematical history.

Name
Understand factors in society that influenced what happened mathematically.

Name
Analyze important mathematical development during various time periods.

Name
Be able to prove some of the classical theorems.

Name
Comprehend algorithms of mathematical principles from a historical perspective.

Name
Name one of the three principal professional organizations for American Mathematicians.

MATH3333 - DIFFERENTIAL EQUATIONS

General

Course Prefix
MATH

Course Number
3333

Description
This course entails various methods for solving first order ordinary differential equations and higher order linear differential equations. Methods involving series solutions, the Laplace transform, and numerical procedures are introduced. Some applications modeled by first order or second order linear differential equations are considered.

Credit Hours

Minimum Credit Hours:
3

Maximum Credit Hours:
3

(Credit Hours) Value:
3

Contact Hours (not needed)

(Contact Hours) Value (not needed) :
3

Repeatable:
Yes

Number Of Repeats:
3

Number Of Credits:
3

Learning Outcomes

Learning Outcomes

Name
Understand the principle of first order differential equations.

Name
Solve mathematical problems using higher order linear differential equations.

Name
Know basic concept of series solutions.

Name
Demonstrate knowledge of the Laplace Transform rule.

Name
Apply theorems of first and second order linear differential equations to practical situations.

MATH3733 - MATHEMATICAL COMPUTING

General

Course Prefix
MATH

Course Number
3733

Description
This is designed to teach Application Development from a programming perspective. One of a variety of current languages is used based on the decision of the instructor, with approval from the department chair. The main purpose of this course is to teach students basic programming logic. Basic computer proficiency is required to take this course.

Credit Hours

Minimum Credit Hours:
3

Maximum Credit Hours:
3

(Credit Hours) Value:
3

Contact Hours (not needed)

(Contact Hours) Value (not needed) :
3

Repeatable:
Yes

Number Of Repeats:
3

Number Of Credits:
3

Learning Outcomes

Learning Outcomes

Name
Demonstrate an understanding of programming logic, both structured and object-oriented.

Name
Demonstrate a knowledge of the syntax of the language used, computer programming terms, and use mathematical formula and functions.

Name
Apply the appropriate algorithms to design the logic for a computer program from a set of specifications.

Name
Demonstrate the ability to debug a computer program.

Name
Utilize computing technologies to model and solve mathematical problems.

MATH4003 - REAL ANALYSIS

General

Course Prefix
MATH

Course Number
4003

Description
This course investigates the treatment of the calculus of functions of real variables, including sequences, limits of functions, continuity, and differentiation. Learning experiences will include investigations, dialogues, proofs, and applications.Prerequisite: MATH 3003 Calculus I

Credit Hours

Minimum Credit Hours:
3

Maximum Credit Hours:
3

(Credit Hours) Value:
3

Contact Hours (not needed)

(Contact Hours) Value (not needed) :
0

Repeatable:
Yes

Number Of Repeats:
3

Number Of Credits:
3

Learning Outcomes

Learning Outcomes

Name
Apply real analysis through sequences, limits of functions, continuity, and differentiation.

Name
Evaluate limits of functions, including cases involving indeterminate forms.

Name
Analyze the continuity and discontinuities of real-valued functions, including understanding the role of limits in continuity, to learn about the differentiation of real-valued functions related to the mean value theorem, Rolles theorem, and the relationship between differentiability and continuity.

Name
Engage in investigative activities to deepen their understanding of mathematical concepts in real analysis.

Name
Participate in discussions that enhance their mathematical communication skills and allow them to explain and justify their reasoning to others.

Name
Demonstrate the ability to construct and present mathematical proofs, particularly in the context of real analysis, ensuring logical rigor.

Name
Demonstrate critical thinking skills by solving complex mathematical problems using the concepts of real analysis.

Name
Apply grammar, dialectic, and rhetoric to integrate the topic with Gods revelation through His creation, Moral PhiloSophae, and OrthoDoxia defined through scriptural paideia.

MATH4013 - MATHEMATICA MODELING I

General

Course Prefix
MATH

Course Number
4013

Description
This course will investigate the generation of physical, conceptual, or MatheMatica representations of natural phenomena that are difficult to observe directly. Models are used to explain and predict the behavior of natural objects or systems and are used in MatheMatica disciplines.Prerequisite: MATH 3003 Calculus I

Credit Hours

Minimum Credit Hours:
3

Maximum Credit Hours:
3

(Credit Hours) Value:
3

Contact Hours (not needed)

(Contact Hours) Value (not needed) :
0

Repeatable:
Yes

Number Of Repeats:
3

Number Of Credits:
3

Learning Outcomes

Learning Outcomes

Name
Create physical, conceptual, and MatheMatica models to represent natural systems, objects, and phenomena that are challenging to observe directly in the natural world.

Name
Demonstrate strong problem-solving skills by using modeling techniques to address real-world challenges and critically analyze and interpret various models from others.

Name
Apply modeling techniques in MatheMatica disciplines, bridging the gap between theoretical concepts and practical applications.

Name
Critically evaluate the effectiveness of models and refine them for better accuracy to effectively communicate their model findings, making their predictions and explanations accessible to others.

Name
Engage in interdisciplinary learning by using modeling techniques in various scientific and philosophical domains to recognize and appreciate the wide range of real-world applications where modeling is employed.

Name
Use technology and software tools for creating and simulating MatheMatica models that collaborate with others in developing and analyzing complex models.

Name
Identify real-world problems that can be addressed through modeling and effectively formulate these problems to appreciate the limitations and assumptions inherent in modeling and understand the need for ongoing refinement.

Name
Apply grammar, dialectic, and rhetoric to integrate the topic with Gods revelation through His creation, Moral PhiloSophae, and OrthoDoxia defined through scriptural paideia.

MATH4023 - ALGEBRAIC STRUCTURES

General

Course Prefix
MATH

Course Number
4023

Description
This course considers equivalence relations, groups, subgroups, homomorphisms, isomorphisms, and a survey of other algebraic structures such as rings, integral domains, and fields. Learning experiences will include investigations, dialogues, proofs, and applications.Prerequisite: MATH 3023 Calculus II

Credit Hours

Minimum Credit Hours:
3

Maximum Credit Hours:
3

(Credit Hours) Value:
3

Contact Hours (not needed)

(Contact Hours) Value (not needed) :
0

Repeatable:
Yes

Number Of Repeats:
3

Number Of Credits:
3

Learning Outcomes

Learning Outcomes

Name
Demonstrate understanding of equivalence relations and their properties through applying them in various mathematical contexts.

Name
Evaluate the study of groups, group axioms, subgroups, group operations, homomorphisms, and isomorphisms between algebraic structures and how these mappings preserve group properties.

Name
Apply algebraic structures, such as rings, integral domains, and fields to demonstrate understanding of defining properties and relationships.

Name
Participate in investigative activities to deepen their understanding of algebraic structures, equivalence relations, and group theory.

Name
Present their defense of mathematical proofs, particularly in the context of algebraic structures and group theory.

Name
Demonstrate algebraic concepts to solve problems and analyze mathematical structures in various mathematical and practical contexts.

Name
Elaborate their critical thinking skills by solving complex mathematical problems using the concepts of equivalence relations, groups, and other algebraic structures.

Name
Apply grammar, dialectic, and rhetoric to integrate the topic with God's revelation through His creation and Moral PhiloSophae and OrthoDoxia defined through scriptural paideia.

MATH4043 - PROBABILITY

General

Course Prefix
MATH

Course Number
4043

Description
The course includes an introduction to discrete probabilities and related applications and problem solving from the fundamentals of probability. Problem topics include general probability, random variables for univariate and multivariate distributions, independence, conditional probability, continuous and discrete distributions, and various named distributions, including the normal distribution, moments from univariate and multivariate distributions, and probability and moment-generating functions. Learning experiences will include investigations, dialogues, proofs, and applications.Prerequisite: MATH 3003 Calculus I

Credit Hours

Minimum Credit Hours:
3

Maximum Credit Hours:
3

(Credit Hours) Value:
3

Contact Hours (not needed)

(Contact Hours) Value (not needed) :
0

Repeatable:
Yes

Number Of Repeats:
3

Number Of Credits:
3

Learning Outcomes

Learning Outcomes

Name
Demonstrate mastery in solving problems related to general probability, including calculating probabilities, applying counting principles, and solving practical problems.

Name
Apply the concept of random variables for both univariate and multivariate distributions in analyzing random phenomena and concepts of independence and conditional probability.

Name
Apply continuous and discrete probability distributions in modeling real-world phenomena.

Name
Compare moments from univariate and multivariate distributions and the concept of moment-generating functions for probability distributions.

Name
Participate in investigative activities to deepen their understanding of probability concepts and their applications and enhance their mathematical communication skills in dialogues and discussions.

Name
Construct mathematical proofs, particularly in probability theory, to apply probability concepts in solving problems and analyzing real-world situations.

Name
Demonstrate critical thinking skills by solving complex probability problems and making informed decisions based on probability analysis.

Name
Apply grammar, dialectic, and rhetoric to integrate the topic with Gods revelation through His creation, Moral PhiloSophae, and OrthoDoxia defined through scriptural paideia.

MATH4053 - NUMBER THEORY

General

Course Prefix
MATH

Course Number
4053

Description
This is an introduction to elementary number theory. Possible topics include primes, congruences, quadratic reciprocity, Diophantine equations, irrational numbers, continued fractions, partitions, the Euclidean Algorithm, Fibonacci numbers, the golden ratio, modular arithmetic, Fermat's Little Theorem, RSA public key cryptography, Gaussian integers, and others. Learning experiences will include investigations, dialogues, proofs, and applications.Prerequisite: MATH 3003 Calculus I

Credit Hours

Minimum Credit Hours:
3

Maximum Credit Hours:
3

(Credit Hours) Value:
3

Contact Hours (not needed)

(Contact Hours) Value (not needed) :
0

Repeatable:
Yes

Number Of Repeats:
3

Number Of Credits:
3

Learning Outcomes

Learning Outcomes

Name
Apply prime numbers in number theory, congruences, modular arithmetic, and residue classes.

Name
Demonstrate quadratic reciprocity and the relationships between quadratic forms, investigate Diophantine equations, apply various techniques to find integer solutions, and investigate irrational numbers and their unique properties.

Name
Examine continued fractions, integer partitions and combinatorial properties, and the use of the Euclidean Algorithm to find the greatest common divisors.

Name
Construct Fibonacci numbers and their recurrence relations to apply the golden ratio in nature and mathematics, modular arithmetic in applications such as cryptography, and Fermats Little Theorem to solve mathematics problems.

Name
Demonstrate understanding of RSA public key cryptography and its underlying mathematics principles, Gaussian integers and their properties in complex number theory, and how to construct mathematics proofs and arguments.

Name
Apply number theory concepts to practical applications and problem-solving.

Name
Demonstrate strong critical thinking skills through investigations and dialogues to gain an appreciation for the historical importance of number theory and its impact on various fields of mathematics.

Name
Apply grammar, dialectic, and rhetoric to integrate the topic with Gods revelation through His creation, Moral PhiloSophae, and OrthoDoxia defined through scriptural paideia.

MATH4073 - SPECIAL TOPICS IN MATHEMATICS

General

Course Prefix
MATH

Course Number
4073

Description
This course is intended to investigate specialized topics in mathematics notaddressed by other courses. Content is determined by the department to addressspecial needs or interests. The course may be repeated for a maximum of threetimes. The same topic may not be repeated.

Credit Hours

Minimum Credit Hours:
0

Maximum Credit Hours:
9

(Credit Hours) Value:
3

MATH4083 - MATHEMATICA RESEARCH/ THESIS I

General

Course Prefix
MATH

Course Number
4083

Description
This course considers historical and current MatheMatica research findings and how they affect our world and lives. In this course, each student will select a MatheMatica topic that connects to the student's life or world, argue for its interconnected importance, and complete a research project on that topic with the instructor's guidance. Additionally, each student will collaborate with some classmates on a larger group research project.Prerequisite: MATH 3023 Calculus II

Credit Hours

Minimum Credit Hours:
3

Maximum Credit Hours:
3

(Credit Hours) Value:
3

Contact Hours (not needed)

(Contact Hours) Value (not needed) :
0

Repeatable:
Yes

Number Of Repeats:
3

Number Of Credits:
3

Learning Outcomes

Learning Outcomes

Name
Demonstrate mastery in conducting MatheMatica research, including formulating research questions, gathering and analyzing data, and drawing meaningful conclusions in the context of their connection to understanding Gods creation.

Name
Compare historical MatheMatica research findings and significance to contemporary MatheMatica research and the latest developments in the field.

Name
Identify the practical applications of MatheMatica research and how it influences various aspects of our lives and the world.

Name
Conduct research on their chosen MatheMatica topic, demonstrating self-reliance in exploration and collaborating with classmates on a larger group research project.

Name
Employ communication skills in conveying their research findings clearly and persuasively.

Name
Employ critical thinking skills to analyze complex MatheMatica issues, propose solutions, and address the moral and ethical aspects of their research.

Name
Conduct individual and group research projects that contribute to MatheMatica research, recognizing that MatheMatica is a continuously evolving field and that research is pivotal in driving its progress.

Name
Apply grammar, dialectic, and rhetoric to integrate the topic with Gods revelation through His creation, Moral PhiloSophae, and OrthoDoxia defined through scriptural paideia.

MATH4103 - MATHEMATICA PAIDEIA I

General

Course Prefix
MATH

Course Number
4103

Description
This course considers how the practice of MatheMatica topics and investigations are inextricably connected with God's intended paideia for His creation. Students will implement this paideia in their lives and connect these MatheMatica topics with Moral PhiloSophae and OrthoDoxia.Prerequisite: MATH 2043 PreCalculus

Credit Hours

Minimum Credit Hours:
3

Maximum Credit Hours:
3

(Credit Hours) Value:
3

Contact Hours (not needed)

(Contact Hours) Value (not needed) :
0

Repeatable:
Yes

Number Of Repeats:
3

Number Of Credits:
3

Learning Outcomes

Learning Outcomes

Name
Demonstrate understanding of concepts in MatheMatica with Scripture and the role of MatheMatica in Gods creation, recognizing the interconnectedness of MatheMatica, Moral PhiloSophae, and orthodoxia in Gods ordained paideia.

Name
Apply reasoning and problem-solving in MatheMatica in alignment with their God-given purpose and a moral and ethical framework.

Name
Investigate the historical development of concepts and theories in MatheMatica, understanding how it has developed over time.

Name
Apply MatheMatica to practical, real-life scenarios, making it relevant and meaningful.

Name
Employ critical thinking to analyze problems in MatheMatica and their moral implications.

Name
Demonstrate an appreciation for the beauty and truth of MatheMatica in the context of a Christian worldview.

Name
Connect principles in MatheMatica with their faith, deepening their spiritual understanding.

Name
Apply grammar, dialectic, and rhetoric to integrate the topic with Gods revelation through His creation, Moral PhiloSophae, and OrthoDoxia defined through scriptural paideia.

MATH4133 - ABSTRACT ALGEBRA

General

Course Prefix
MATH

Course Number
4133

Description
This course is a study of set theory, relations and functions, equivalence relations, integers, mathematical induction, elementary number theory, groups, rings, fields, and polynomials.

Credit Hours

Minimum Credit Hours:
3

Maximum Credit Hours:
3

(Credit Hours) Value:
3

MATH4223 - INTRODUCTION TO BIOSTATISTICS

General

Course Prefix
MATH

Course Number
4223

Description
This course will prepare students for further study and job preparation in a variety of science fields. Students will investigate how complex systems in biology can be studied using applied mathematics. The course will examine several case studies which might include topics from microbiology, enzyme reaction kinetics, neuroscience, ecology, epidemiology, physiology, and bioengineering. Students work in groups to define and tackle meaningful scientific problems and learn to collaborate effectively. It will emphasize understanding of data and interpretation of statistical analyses.

Credit Hours

MATH4423 - STATISTICAL METHODS II

General

Course Prefix
MATH

Course Number
4423

Description
This course combines statistical methods with practical applications and computersoftware. Statistical models such as principles of linear models, simple and multiple linearregression, analysis of variance for basic designs, multiple comparisons, random effects,and analysis of covariance are studied. The statistical models are studied in context ofactual data sets using statistical software.

MATH4453 - ACTUARIAL SCIENCE CAPSTONE

General

Course Prefix
MATH

Course Number
4453

Description
This course intended for to enhance student competencies in by applying advanced statistical methodology to the challenges imposed by real data. Additionally, develop effective writing skills to effectively communicate project requirements and findings. Students will be exposed to several aspects of statistical practices including elements of statistical consulting, study design, setting project goals and deliverables, applying appropriate methodology, performing accurate analyses, and providing clear and concise explanations of results.

Prerequisite

Complete ALL of the following Courses:
- MATH5063 - CLASSICAL MATH DIMENSIONALITY

Learning Outcomes

Learning Outcomes

Name
Understand algebraic and geometric representations of vectors in Rn.

Name
Solve systems of linear equations and interpret the existence and uniqueness of solutions.

Name
Demonstrate competence with matrix theory.

Name
Discuss the dimensional implications of linear algebra.

MATH5083 - IMAGINATION & N-SPACE ND

General

Course Prefix
MATH

Course Number
5083

Description
This course applies the Trivium arts of dialectic and rhetoric to examine the Quadrivium, the classical study of mathematics, and integrates fundamental concepts of each student's chosen topic into the broader map of mathematics through the exploration of historical significance, independent study, and dimensional application.

Prerequisite

Complete ALL of the following Courses:

- MATH5063 - CLASSICAL MATH DIMENSIONALITY
  AND MATH5013 - PHILOSOPHY OF MATHEMATICS
  AND MATH5033 - GEOMETRY & PLANAR SPACE, 2D
  AND MATH5043 - CLASSICAL GEOMETRY

Learning Outcomes

Learning Outcomes

Name
Identify topics of historical significance and modern relevance in mathematics.

Name
Conduct independent research about mathematical topics.

Name
Discuss the dimensional implications of their chosen topic.

Name
Demonstrate mastery of rhetorical skills by creating a portfolio and delivering a presentation to an academic panel.

MATH5093 - BIOSTATISTICS AND EPIDEMIOLOGY

General

Course Prefix
MATH

Course Number
5093

Description
The course prepares the student in the development and application of statistical reasoning and methods in addressing, analyzing, and solving problems using epidemiologic principles and research designs used in healthcare research. Application will be made toward disease prevention and health promotion.Prerequisite:NURS 5003 – Advanced Practice RolesNURS 5013 – Information Systems & TechnologyNURS 5023 – Nursing Theory & Research

MGMT7123 - DATA-DRIVEN DECISION MAKING

General

Course Prefix
MGMT

Course Number
7123

Description
This course explores the critical role of data in shaping informed and strategic decisions within organizations. Students will delve into advanced analytical techniques and tools used to extract insights from complex data sets, enabling them to make evidence-based decisions that drive organizational success. The course emphasizes the integration of data analytics with management theory, focusing on how leaders can leverage data to enhance decision-making processes, optimize operations, and achieve competitive advantages. Through case studies, simulations, and research, students will develop the skills necessary to critically evaluate data sources, interpret analytical results, and apply findings to real-world management challenges. By the end of the course, participants will be equipped to lead data-driven initiatives that foster innovation and informed decision-making at the highest organizational levels.Prerequisite: None

Credit Hours

Minimum Credit Hours:
3

Learning Outcomes

Learning Outcomes

Objective
Assess the validity and reliability of data sources, ensuring the integrity of data-driven decisions in complex organizational contexts.

Objective
Apply advanced data analytics techniques to interpret large and complex data sets, generating actionable insights that inform strategic decision-making.

Objective
Integrate data-driven insights with management theory to develop and implement evidence-based strategies that enhance organizational performance.

Objective
Communicate complex data insights effectively to both technical and non-technical stakeholders, demonstrating advanced skills in data visualization and storytelling.

MGMT7223 - CASE STUDIES IN MANAGEMENT

General

Course Prefix
MGMT

Course Number
7223

Description
This course offers an in-depth examination of real-world management challenges through the analysis of comprehensive case studies. Students will engage with complex scenarios that span various aspects of management, including data analytics, strategy, leadership, organizational behavior, and decision-making. The course emphasizes the application of theoretical frameworks to practical situations, encouraging students to develop critical thinking and problem-solving skills. By dissecting and discussing a range of case studies, students will learn to navigate the intricacies of management practice, identify effective solutions, and apply best practices in diverse organizational contexts. This course prepares students to approach management challenges with a strategic mindset and to make informed decisions that drive organizational success.Prerequisite: None

Learning Outcomes

Learning Outcomes

Objective
Analyze complex management case studies, identifying key challenges, stakeholders, and strategic implications within various organizational contexts.

Objective
Apply theoretical frameworks and management models to develop effective solutions for real-world management problems presented in case studies.

Objective
Demonstrate advanced problem-solving skills by synthesizing information from diverse sources to make informed, and evidence-based decisions in case scenarios.

Objective
Evaluate the outcomes of different management strategies in case studies, assessing their effectiveness and identifying best practices for future application.

Objective
Communicate well-reasoned solutions and strategic recommendations clearly and persuasively, both in written and oral formats, demonstrating a deep understanding of management principles.

MGMT7413 - APPLIED MANAGEMENT THEORY

General

Course Prefix
MGMT

Course Number
7413

Description
This course provides an in-depth exploration of key management theories and their practical applications in contemporary organizations. Students will critically examine foundational and emerging management models, assessing their relevance and effectiveness in addressing real-world challenges. Through case studies, data analysis, research, and experiential learning, participants will learn to apply theoretical concepts to enhance organizational performance, leadership strategies, and decision-making processes. The course emphasizes the integration of theory with practice, preparing students to lead effectively in complex and dynamic environments. By the end of the course, students will have developed a robust theoretical framework to inform their management practices and research initiatives. Prerequisite: None

Learning Outcomes

Learning Outcomes

Objective
Evaluate foundational and contemporary management theories and assess their applicability to complex organizational challenges.

Objective
Develop data-driven strategies for addressing management issues, integrating theoretical models with empirical research.

Objective
Apply advanced management theories to real-world organizational scenarios..

Objective
Synthesize interdisciplinary insights to create innovative management solutions that enhance organizational performance and sustainability.

MGMT8123 - STRATEGIC MGMT IN THE DIGITAL AGE

General

Course Prefix
MGMT

Course Number
8123

Description
This course examines the evolving landscape of strategic management in the context of digital transformation. Students will explore how digital technologies disrupt traditional business models and create new opportunities for innovation and competitive advantage. The course covers key topics such as digital strategy development, platform-based business models, and the role of data and analytics in shaping strategic decisions. Through case studies, simulations, and research projects, students will learn to craft and implement strategies that leverage digital technologies to drive organizational success. Emphasizing a forward-looking approach, the course prepares students to navigate the complexities of the digital age and to lead organizations in an era of rapid technological change.Prerequisite: MGMT 7123

Prerequisites

Complete ALL of the following Courses:

- MGMT7123 - DATA-DRIVEN DECISION MAKING

Learning Outcomes

Learning Outcomes

Objective
Analyze the impact of digital technologies on traditional business models and evaluate the strategic opportunities and challenges they present.

Objective
Develop and implement digital strategies that align with organizational goals and leverage technological innovations to achieve competitive advantage.

Objective
Integrate data and analytics into strategic decision-making processes, using insights to drive digital transformation and organizational growth.

Objective
Evaluate the ethical and social implications of digital strategies, ensuring that technological advancements are implemented responsibly and sustainably.

Objective
Conduct research on emerging digital trends and their potential impact on strategic management practices, contributing to the advancement of knowledge in the field.

MGMT8133 - ORGANIZATIONAL BEHAVIOR

General

Course Prefix
MGMT

Course Number
8133

Description
This course delves into the advanced study of human behavior within organizational settings, examining how individual, group and structural dynamics influence organizational effectiveness. Students will explore key theories and models of organizational behavior, focusing on topics such as motivation, leadership, team dynamics, organizational culture, and change management. The course integrates psychological and sociological perspectives with management practices to provide a comprehensive understanding of how to manage and lead people in complex environments. Through case studies, research, and experiential learning, students will develop strategies to enhance organizational performance, foster a positive workplace culture, and drive sustainable change. This course prepares students to lead effectively by understanding and influencing the behavior of individuals and groups within organizations.Prerequisite: None

Learning Outcomes

Learning Outcomes

Objective
Analyze and apply key theories of organizational behavior to understand and influence individual and group dynamics within complex organizations.

Objective
Evaluate the impact of organizational culture, structure, and leadership on employee behavior and overall organizational performance.

Objective
Develop and implement strategies for motivating and leading teams, fostering collaboration, and enhancing workplace productivity.

Objective
Assess and manage organizational change initiatives, utilizing behavioral insights to ensure successful transitions and sustainable outcomes.

Objective
Integrate psychological and sociological perspectives to create a comprehensive approach to managing organizational behavior, with a focus on ethical leadership and long-term success.

MGMT8153 - PLANNING & FORECASTING

General

Course Prefix
MGMT

Course Number
8153

Description
This course provides an in-depth exploration of advanced planning and forecasting models essential for strategic decision-making in complex organizational environments. It emphasizes the integration of strategic foresight with management practices to enable leaders to anticipate future trends, identify potential challenges, and seize emerging opportunities. Students will delve into scenario planning, modeling techniques, and decision support matrices, learning how to apply these tools to create robust strategies that align with organizational goals. The course also covers the use of data analytics and predictive modeling to inform long-term planning and enhance managerial decision-making. By the end of the course, students will be equipped to lead in environments characterized by uncertainty and change, using sophisticated planning and forecasting techniques to guide their organizations toward sustained success.Prerequisite: MGMT 7123

1011

Description

Focuses on introduction to the Army and basic Soldier skills. It introduces Cadets to the Army and the Profession of Arms. Students will examine the Army Profession and what it means to be a professional in the U.S. Army. The overall focus is on developing basic knowledge and comprehension of the Army Leadership Requirements Model while gaining a complete understanding of the Reserve Officers' Training Corps (ROTC) program, its purpose in the Army, and its advantages for the student. Cadets also learn to perform basic Soldier skills to survive in a field environment to support their development as an Army leader. Included is a weekly lab facilitated by MS III Cadets, supervised by MS IV's and cadre.Prerequisite: NoneCorequisite: MISL 101L

MISL2011 - LEADERSHIP & ETHICS

General

Course Prefix
MISL

Course Number
2011

Description
Focuses on leadership and ethics. The course adds depth to the Cadets knowledge of the different leadership styles. Cadets will conduct a leadership analysis of famous leaders and self-assessment of their own leadership style. The Army Profession is also stressed through understanding values, ethics and how to apply both to different situations they may encounter as a leader. Army Values and Ethics and their relationship to the Law of Land Warfare and philosophy of military service are also stressed. Students are then required to apply their knowledge outside the classroom in a hands-on performance-oriented environment during a weekly lab facilitated by MS III Cadets, supervised by MS IV's and cadre.Prerequisite: None Corequisite: MISL 201L

MISS3013 - MISSIONAL LIFE

General

Course Prefix
MISS

Course Number
3013

Description
This course equips students to think through the personal and missional implications of an integrated Christian worldview. Students will learn to apply biblical theology to their identity, work, and calling. The course briefly surveys historical epochs of missions, and examines critical ideas for 21st century missiological living, including: the history and theology of missions, global communication, non-profit and project management, digital ministry, and sustainable development.

MISS3023 - MINISTRY INNOVATION

General

Course Prefix
MISS

Course Number
3023

Description
This course equips students for developing and participating in outcome-based ministry. Because ministry design forms the foundation for effective outcome-based ministry, much of the course will center around ministry design. Students will learn how to assess needs and develop appropriate ministry interventions.

MISS3033 - MISSIONAL DEVELOPMENT AND IMPACT

General

Course Prefix
MISS

Course Number
3033

Description

This course reviews the biblical and theological foundations for generous mercy, justice, and compassion, while practically orienting students to strategically apply these biblical and theological principles to issues related to poverty alleviation, community development, refugee and migrant populations, and sustainable impact. Students will learn how to holistically engage in a hurting world by bringing long-term and dignifying aid resulting in fruitful outcomes and will gain necessary knowledge and skills to develop effective strategies that respond to emerging challenges and opportunities for mission. The course guides students in acquiring practical skills and innovation tools to improve program interventions, service offerings, and product ideas.

MISS7013 - MISSIONAL THEOLOGY

General

Course Prefix
MISS

Course Number
7013

Description

This course explores contemporary opportunities and challenges in 21st century missional theology. The course covers robust biblical theologies of the mission of the Church, and missiological theories of near-culture and cross-cultural mission. Students will integrate insights into missional leadership arising from related disciplines in the social sciences, for-profit and nonprofit management, and the emerging fields of network and movement theory.

MISS7053 - MISSIONAL THOUGHT LEADERSHIP

General

Course Prefix
MISS

Course Number
7053

Description

This course focuses on enhancing missional alignment through the transmission of knowledge and skills from missional thought leadership to movement stakeholders throughout their organizations. Students will explore thought leadership distribution channels including coaching, consulting, and educational course design. These elements will contribute to the creation and implementation of developmental training in formal and informal missional programs and offerings. It also promotes successful publishing of ideas in academic journals, practitioner and popular press journals, magazines, and web platforms in missiological settings.

MISS8012 - CONTEXTUAL ENGAGEMENT I

General

Course Prefix
MISS

Course Number
8012

Description
This course incorporates individualized and contextualized research, reflection, and planning on a current challenge or opportunity related to the Researcher's missional leadership. Students will collaborate with the course professor to develop theoretically informed, research grounded, and outcome-based strategies and offerings that coherently address relevant missiological problems and possibilities. In this first of three Contextual Engagement courses, students will begin analyzing contextual challenges and opportunities in their missional ecosystems, in light of salient theoretical and empirical literature, for the purpose of discovering the focus and direction of their doctoral project.

MISS8023 - MISSIONAL IMPACT

General

Course Prefix
MISS

Course Number
8023

Description

This course presents contemporary approaches for assessing and designing strategies that yield missional impact. Students will consider the theological and cultural demands for effectiveness. Missional efficacy will be presented through the frameworks of resource allocation, reputation, goal-attainment,needs assessment, asset mapping, and other evaluation strategies. Each of these strategies will be evaluated theologically and missiologically, yielding an integrated approach to designing and assessing missional impact. Particular attention will be given to the development of formative and summative assessments in outcome-based evaluation for missional movements.

MISS9003 - DOCTORAL PROJECT I

General

Course Prefix
MISS

Course Number
9003

Description

This course includes the initial phase of formulating a contextually relevant and missiologically focused research question and writing of the doctoral project. The doctoral project is a professional and applied capstone study representing the culmination of the student's work in the D.Miss. program. The project integrates academic rigor and missional praxis through theological and sociological reflection, scholarly research, and practical ministry strategies. Each student selects a practical missional issue relevant to their global context and develops theoretical frameworks and applied research to understand, plan, and implement appropriate responses that contribute to the improvement of missional movements.

MKTG1113 - INFLUENCER ENTREPRENEURSHIP

General

Course Prefix
MKTG

Course Number
1113

Description
This course examines the entrepreneurial and operational foundations required for content creators to function as independent business owners within the digital marketplace. Students will explore how influencers operate as contracted brands, manage intellectual property, license creative assets, negotiate agreements, and maintain financial and legal accountability. Emphasis is placed on business formation principles, contract literacy, invoicing and payment systems, intellectual property ownership, brand asset protection, licensing strategy, and long-term enterprise sustainability. Students will develop the knowledge and skills necessary to manage influence-based ventures as professional, legally compliant businesses.

Learning Outcomes

Learning Outcomes

Name
Evaluate business formation options and legal statuses to establish a compliant, scalable foundation for an influence-based enterprise.

Name
Analyze and execute professional service agreements, focusing on the alignment of scope, deliverables, and structured financial documentation.

Name
Differentiate between intellectual property ownership and licensing to develop pricing strategies that reflect brand value and market positioning.

Name
Apply management principles to maintain contract compliance, mitigate risk exposure, and ensure long-term brand integrity across partnerships.

Name
Integrate professional accountability and ethical stewardship into business operations to ensure sustainable growth and personal brand protection.

MKTG1413 - INTRO TO INFLUENCER MARKETING

General

Course Prefix
MKTG

Course Number
1413

Description
This course examines the strategic, financial, and regulatory foundations of influencer marketing as a modern advertising discipline. Students study campaign budgeting, pricing models, talent evaluation, contract development, negotiation strategy, and performance measurement. Emphasis is placed on ethical standards and compliance with Federal Trade Commission (FTC) endorsement guidelines, including material connections, clear and conspicuous disclosures, and advertising transparency within the influencer marketing industry.

Name
Explain the structure and economic impact of the influencer marketing industry.

Name
Analyze influencer campaign budgets, pricing models, and ROI considerations.

Name
Evaluate influencer talent using audience, engagement, and brand alignment metrics.

Name
Interpret and apply FTC endorsement and disclosure requirements.

Name
Analyze essential contract elements and negotiation strategies in influencer partnerships.

Name
Design a basic influencer marketing campaign plan with measurable objectives.

Name
Assess campaign performance using relevant metrics and reporting methods.

MKTG2003 - DIGITAL MEDIA LAW & FTC COMPLIANCE

General

Course Prefix
MKTG

Course Number
2003

Description
This course examines the legal and regulatory frameworks governing digital media, influencer marketing, and advertising in the creator economy. Students will study Federal Trade Commission (FTC) disclosure requirements, contract fundamentals, intellectual property law, usage rights, whitelisting practices, moral clauses, and platform terms of service. Emphasis is placed on understanding compliance obligations, legal risk management, and the responsibilities of digital creators and brands operating in sponsored content environments. Students will analyze real-world case studies and apply legal principles to contemporary marketing scenarios.

Name
Demonstrate the ability to recognize logistic and channel problems and deal appropriately with them.

Name
Emphasize and appropriately relate how customer services impacts business and logistics.

Name
Relate examples of logistics through reading, lecture, and videos.

Name
Explain and recognize how logistics can give business a competitive advantage in todays marketplace.

Name
Identify problems and find solutions to everyday business problems.

Name
Describe why businesses fail and succeed in the area of logistics.

Name
Give an overview of logistics, marketing, finance, management, and economics in todays business environment.

MKTG4133 - MARKETING RESEARCH

General

Course Prefix
MKTG

Course Number
4133

Description
This course will examine the techniques used to define problems, gather research information, process primary and secondary sources of information, and the reporting of the information to solve marketing problems. Statistical analysis in the reporting of information is given a heavy emphasis.Prerequisite: BUSI 3033, MATH 1433

Completion Requirement

Prerequisite

Complete ALL of the following Courses:

- BUSI3033 - QUANTITATIVE METHODS IN BUSINESS II **AND** MATH1433 - PRE-CALCULUS WITH TRIGONOMETRY

Learning Outcomes

Learning Outcomes

Objective
Interpret data analysis into useful reports for management.

Name
Understand the role of research in strategic planning.

Name
Understand how to design research projects.

Name
Study the different data analysis techniques used in research.

Name
Apply the techniques learned to real-world data.

Name
Utilize research techniques in problem solving.

Name
Learn how to design a research project.

Name
Demonstrate proper data analysis techniques.

Name
Interpret data analysis into useful reports for management.

MKTG4153 - E-COMMERCE

General

Course Prefix
MKTG

Course Number
4153

Description
This course will study the concepts, strategies, and applications involved in e-commerce and direct marketing. The applications used in direct marketing today will be examined, including direct mail, direct response advertising, telemarketing, catalogs, and broadcast.Prerequisite: BUSI 3303

Credit Hours

Minimum Credit Hours:
3

Maximum Credit Hours:
3

(Credit Hours) Value:
3

Type
Completion Requirement

Prerequisite

Complete ALL of the following Courses:
- BUSI3303 - MARKETING

Learning Outcomes

Learning Outcomes

Objective
Demonstrate the ability to create an internet marketing plan.

Name
Demonstrate how the World Wide Web should be part of the overall portfolio of a companys strategy.

Name
Provide an overview of the history and future of the web for marketing of ideas, services and products.

Name
Explain internet marketing plans for successful incorporation of a business online.

Name
Demonstrate how to build traffic to a business site.

Name
Identify problems with web pages.

Name
Describe how a web presence can build business.

Name
Give an overview of e-commerce.

Name
Demonstrate the ability to create an internet marketing plan

MKTG4173 - RETAIL MANAGEMENT

General

Course Prefix
MKTG

Course Number
4173

Description
Retailing is examined from a decision making approach. Topics covered include retailing strategy, consumer shopping behavior, human resource planning, the retail mix, communications, merchandising, atmospherics and location.Prerequisite: BUSI 3303

Credit Hours

Minimum Credit Hours:
3

Maximum Credit Hours:
3

(Credit Hours) Value:
3

Completion Requirement

Prerequisite

Complete ALL of the following Courses:
- BUSI3303 - MARKETING

Learning Outcomes

Learning Outcomes

Objective
Articulate the ethical dilemmas particular to retail management.

Name
Demonstrate the retail promotional mix.

Name
Comprehend merchandise assortment and selection.

Name
Provide an overview of customer relations in a retail environment.

Name
Explain customer buying behavior.

Name
Explain retail store strategy.

Name
Identify problems in the general retail environment.

Name
Describe the different types of retail settings.

Name
Explain how customer relations are improved through proper retailing techniques.

Name
Give an overview of merchandise assortment and selection.

Name
Articulate the ethical dilemmas particular to retail management

MKTG4903 - MARKETING INTERNSHIP

General

Course Prefix
MKTG

Course Number
4903

Description
This course involves work experience on and/or off campus, in an organization involving on-the-job training in a marketing related area. Intern will be supervised by a faculty coordinator and a supervisor in the organization. Reports of work experience are submitted to the coordinator. Prerequisite: Approval of the Chair of the Department of Business

Credit Hours

Completion Requirement

Prerequisite

Complete ALL of the following :
Approval of the Chair of the Department of Business

Learning Outcomes

Learning Outcomes

Objective
Provide professional quality presentations relating to the learning experience using both written and verbal skills.

Name
Understand how material learned in the classroom is applied in an organizational setting.

Name
Perform detailed procedures in a specific area of marketing as set forth in an internship learning agreement.

Name
Provide professional quality presentations relating to the learning experience using both written and verbal skills.

MNGT3173 - HUMAN RESOURCE MANAGEMENT

General

Course Prefix
MNGT

Course Number
3173

Description
This course is a survey of the practices of staffing, development, employee relations, compensation and documentation applied to achieve productivity and the quality of work life. Topics include equal opportunity and other regulations impacting human performance.

Credit Hours

Minimum Credit Hours:
3

Maximum Credit Hours:
3

MNGT4163 - ENTREPRENEURSHIP

General

Course Prefix
MNGT

Course Number
4163

Description
This course studies the science of designing and operating a new venture. The roles of personnel, operations, logistics, marketing, finances, legal structure, and ethics are examined. Creating a business plan and operating a micro business for a viable enterprise are critical to this course.Prerequisites: None

Credit Hours

Minimum Credit Hours:
0

Maximum Credit Hours:
17

Learning Outcomes

Learning Outcomes

Objective
Define financial independence.

Name
Create a viable business plan within a team.

Name
Operate a microbusiness within a team.

Name
Manage personnel, operations, logistics, marketing, and financial aspects of the business.

Name
Articulate securing funds and legal structures for a business.

Name
Illustrate ethical considerations within business operations.

Name
Define financial independence.

MNGT4903 - MANAGEMENT INTERNSHIP

General

Course Prefix
MNGT

Course Number
4903

Description
This is a supervised, structured work experience designed to augment and develop practical experience in conjunction with regular coursework. Participants are strongly encouraged to utilize this option to explore potential career paths. Junior standing and at least 2.5 cumulative GPA are requirements of this course. Dean's approval required

MRKT5933 - MARKETING STRATEGY & PLANNING

General

Course Prefix
MRKT

Course Number
5933

Description
This course is an introduction and overview of marketing, both as a philosophy of business and a function of the enterprise. It is designed to provide a practical understanding of the discipline, highlight marketing's role in overall corporate strategy, present key marketing principles and concepts, and outline necessary steps and best practices for a marketing plan and program development within the QSU construct. Upon course completion, students will have a comprehensive understanding of the role, value, and practical use of marketing to deliver on business objectives. Along the way, students will build practical knowledge based on real-world examples.Prerequisite: BUSI 5903

Credit Hours

Completion Requirement

Prerequisite

Complete ALL of the following Courses:
- BUSI5903 - BUSINESS PRINCIPLES

Learning Outcomes

Learning Outcomes

Objective
Integrate the marketing perspective with the Christian faith through reading, learning, discussion, and class exercises.

Objective
Understand both the philosophy and function of marketing in a business context and the role of marketing in the C-suite.

Objective
Develop the ability to apply marketing thinking to business problems, evaluate how well or poorly marketing is being used in an enterprise, and make intelligent, informed, ethical marketing decisions.

Objective
Research, discuss, and evaluate contemporary examples of brand marketing, and communicate an understanding of them through clear, concise assignments.

MSMS511L - ORGANIC CHEMISTRY I LAB

General

Course Prefix
MSMS

Course Number
511L

Description
This laboratory is to accompany Organic Chemistry I. The laboratory work includes learning the basic techniques in recrystallization, sublimation, melting point determination, distillation, liquid/liquid extraction, thin layer chromatography, column chromatography, and molecular modeling software. Mastery of these basic techniques lays the foundation for carrying out a number of organic syntheses or natural product isolations. Students are provided with hands-on access to state-of-the-art instrumentation for the characterization of synthetic products or organic unknowns using standard analysis methods such as FT-IR, FT-NMR, UV/Vis spectroscopy, polarimetry, refractive index, gas chromatography, and other modern techniques of characterization.Prerequisite: NoneCorequisite: MSMS 5113

Corequisite

Complete ALL of the following Courses:
- MSMS5113 - ORGANIC CHEMISTRY I

Learning Outcomes

Learning Outcomes

Objective
Correctly use organic laboratory equipment.

Objective
Proficiently perform basic organic laboratory techniques.

Objective
Comprehend the relationships between organic compounds' structure and reactivity properties through experimentation.

Objective
Perform organic syntheses.

Objective
Quantitatively and qualitatively analyze data and observations.

Objective
Use modern instrumentation to elucidate organic structure.

Objective
Evaluate laboratory results in light of scientific theory and experimental precedent.

Objective
Demonstrate general knowledge of organic chemistry and will be able to apply chemical and physical principles in the solution of qualitative and quantitative chemical problems.

Objective
Understand the interplay of observational data, hypotheses, and hypothesis-driven experimentation through the application of the scientific method.

Objective
Become proficient in chemical laboratory techniques and be able to apply these to practical and current problems in research.

Objective
Be able to read and critically evaluate the chemical and scientific literature.

Objective
Learn to present scientific data clearly and effectively through both written and verbal communication.

Objective
Demonstrate a high degree of understanding of organic chemistry laboratory techniques to identify an unknown organic solid or liquid utilizing a student-developed experimental procedure, physical properties, chemical tests, and spectroscopic data.

MSMS512L - ORGANIC CHEMISTRY II LAB

General

Course Prefix
MSMS

Course Number
512L

Description
MSMS 512L is the laboratory course that accompanies Organic Chemistry II. Organic Chemistry II Lab will have a special emphasis on organic synthesis as well as the use of modern instrumentation for the characterization of synthetic products via methods of analysis, including IR, NMR, UV/Vis spectroscopy, gas chromatography, and other modern analytical methods. Prerequisite: MSMS 5113Corequisite: MSMS 5123

Complete ALL of the following Courses:

- MSMS5223 - GENERAL PHYSICS I

Learning Outcomes

Learning Outcomes

Name
Identify basic lab equipment, apply fundamental lab techniques, and optimize laboratory settings to improve measurements.

Name
Measure a variety of physical properties pertaining to mechanics, thermodynamics, and periodic motion.

Name
Observe and recognize real-life physical phenomena.

Name
Analyze data and observations and apply statistical tools in data analysis.

Name
Present results graphically as a function of variables.

Name
Compare results to established scientific theory.

Name
Integrate theoretical understanding with practical application.

Name
Execute an independent laboratory experiment, demonstrating the ability to formulate a research question, select appropriate methods, and analyze results in the context of scientific inquiry.

Execute an independent laboratory experiment, demonstrating the ability to formulate a research question, select appropriate methods, and analyze results in the context of scientific inquiry.

MSMS5009 - GROSS ANATOMY, EMBRYO & IMAGINE

General

Course Prefix
MSMS

Course Number
5009

Description

The Human Gross Anatomy, Embryology & Imaging course consists of a detailed study of the normal structure, development, and organization of the human body. This course undertakes a regional approach rather than a systemic approach to Human Gross Anatomy, Embryology & Imaging. It is distributed into three block contents. Gross structures are studied in the laboratory by the use of virtual applications. The radiology component of Gross Anatomy serves as the introduction to radiology and prepares the student for further development. Lectures stress the contribution of developmental events to gross anatomical organization and the correlation of this organization with clinically relevant conditions.

MSMS5113 - ORGANIC CHEMISTRY I

General

Course Prefix
MSMS

Course Number
5113

Description

Organic Chemistry is the study of the structure and reactivity of carbon and its compounds. Compounds are grouped according to structure, using a functional group approach. Reactions are organized according to similarities in mechanism, with an emphasis on electron flow. This includes the chemistry of alkanes, alkenes, alkynes, halogenated hydrocarbons, free radicals, and alcohols. Infrared, NMR spectroscopy and mass spectrometry are also covered. Prerequisite: NoneCo-requisite: MSMS 511L

MSMS5123 - ORGANIC CHEMISTRY II

General

Course Prefix
MSMS

Course Number
5123

Description
Organic Chemistry II continues Organic Chemistry I. This course is designed to provide a thorough treatment of the chemistry of ethers, thiols, polyenes, aromatic compounds, phenols, aldehydes, ketones, carboxylic acids, acid derivatives, enolates, amines, heterocycles, and an introduction to biomolecules. The relationships between structure and reactivity will be studied in greater detail, as well as the mechanism of organic reactions and the applications of spectroscopy for organic structure elucidation. MSMS5405 - MEDICAL BIOCHEMISTRY I

General

Course Prefix
MSMS

Course Number
5405

Description

Biochemistry is the science concerned with studying the various molecules, chemical reactions, and processes related to living cells and organisms. Medical Biochemistry is a two semester long course presented to medical and graduate students in their first year. The first semester of Medical Biochemistry includes the following units: Structural and functional relationships of proteins, Energy generation and storage from carbohydrate metabolism. Medical aspects are emphasized to build up the necessary background for future application in other basic sciences and clinical courses.

MSMS6305 - NEUROSCIENCE

General

Course Prefix
MSMS

Course Number
6305

Description
This course is designed to give students a foundational knowledge of the human central nervous system that they will use when learning how to diagnose and treat neurological disorders. The course provides students with important principles of neurological function, from cellular and molecular mechanisms of neural communication to the organization and function of sensory and motor systems and higher cognitive function. Students will take virtual or wet-laboratories, clinical correlations and demonstrate mastery of the neurological exam to reinforce knowledge of brain structure and strengthen skills to understand the human nervous system.

MSMS6504 - HISTOLOGY AND CELL BIOLOGY

General

Course Prefix
MSMS

Course Number
6504

Description
This course focuses on the study of the different aspects of the internal structure of cells, tissues, and organs in the human body, presenting a comprehensive survey of many of their complex interrelationships. Lectures discuss the cytoarchitecture, clinical correlations are utilized to stress histological changes and their impact on health, and virtual laboratory sessions detail interactive work with slides that show normal and metaplastic specimens. The course is delivered in the form of recorded lectures with accompanying in class-sessions using the flipped classroom model.

MSMS6701 - MEDICAL ETHICS

General

Course Prefix
MSMS

Course Number
6701

Description

This course will attempt to provide didactic experiences for medical students in specific areas within the field of medical ethics. The need for these experiences stems from the recognition that ethical dilemmas are inherent in medical care. Although dramatic issues such as cloning, abortion and organ donation have strong ethical implications, it is important to realize that the practicing doctor will face ethical decisions every day while solving more commonplace problems. Most everyday ethical questions have well- accepted answers; only the most difficult ethical questions seem to defy resolution. Even so, it is important for physicians to develop an understanding of the principles of medical ethics and a system of ethical reasoning that will result in consistent decisions.

MSMS6751 - INTERPROFESSIONAL PERSPECTIVE IN

General

Course Prefix
MSMS

Course Number
6751

Description

This course is designed to provide a general overview of gaps in health outcomes associated with health disparities. A special emphasis will be given to the social determinants of health such as race/ethnicity, social class, socioeconomic status, sex, sexuality, nationality, and migration status. The course will focus on the impact of health disparities' impact at multiple system's levels (e.g. Individual, patient-clinician, healthcare system, etc.).

Requirements
Prerequisites: Audition and Instructor Permission.

Learning Outcomes

Learning Outcomes

Objective
Learn and perform instrument-appropriate repertoire based on collegiate expectations.

Objective
Demonstrate musical skills and techniques appropriate for the instrument and the student’s degree program.

Objective
Develop presentational skills and repertoire that are appropriate for a recital.

Objective
Learn and perform college-level literature from the Western Art tradition.

Objective
Develop practice habits and skills that lead to steady progress in technique, performance practice, and memorization of literature assigned by the instructor.

Objective
Present solos and/or etudes on recitals and juries.

MUAI0102 - EUPHONIUM APPLIED LESSONS

General

Course Prefix
MUAI

Course Number
0102

Description
The School of Music will determine the student's level of instruction. Thirteen lessons (50 minutes per week) plus individual practice are required.Prerequisites: Audition and Instructor Permission.

Learning Outcomes

Learning Outcomes

Name
Demonstrate the appropriate holding position, hand position, and embouchure formation for woodwind and/or brass instruments, as well as fundamental performance technique and sound quality on a woodwind and/or brass instrument.

Name
Describe the physical characteristics necessary for optimum initial performance on the following instruments: flute, oboe, clarinet, bassoon, horn, cornet/trumpet, trombone, euphonium, and tuba.

Name
Demonstrate fundamental performance technique and sound quality on snare drum, timpani, drum set, and keyboard percussion instruments.

Name
Identify the numerous percussion instruments utilized by school band programs.

Name
Demonstrate current level of teaching ability by preparing and completing a series of in-class teaching demonstrations.

Name
Identify and resolve basic repair issues that might occur in an instrumental class setting.

Name
Identify methods of including technology into elementary and secondary wind instruction.

Learning Outcomes

Name
Explain the fundamental principles of how sound is produced by all brass instruments.

Name
Explain the proper assembly, care, and maintenance for brass instruments.

Name
Explain the principles involved in producing a characteristic tone on brass instruments, including correct embouchure, air support, articulation, posture, and holding position.

Name
Demonstrate correct hand position and fingerings.

Name
Explain the transposition and notation for common brass instruments.

Name
Demonstrate common problems found in brass instruction and explain solutions to those problems.

Name
Identify appropriate beginning method books and other resource materials.

Name
Demonstrate basic performance proficiency on at least one assigned brass instrument.

MUSC322L - CONDUCTING I LAB

General

Course Prefix
MUSC

Course Number
322L

Description
This course is a study of conducting techniques and skills. This course includes instruction in basic baton technique and simple score study. Special emphasis is placed on conducting posture and the development of clear beat patterns. Students also learn to indicate various articulation styles, dynamics, cuing, entrances, and releases. Co-requisite: MUSC 3502Prerequisites: MUSC 1133, MUSC 1233

Learning Outcomes

Learning Outcomes

Name
Demonstrate clear beat patterns in 2, 3, 4, and 1.

Name
Demonstrate conducting gestures that evoke marcato, legato, and staccato articulation styles from ensembles.

Name
Conduct clear entrances and releases with consistency.

Name
Conduct with a right hand position that indicates clear differences across the dynamic continuum.

Name
Demonstrate the ability to use the left hand to achieve crescendos and diminuendos independently from the right hand.

Name
Display a firm baton grip that does not distract the attention of ensemble participants.

Name
Demonstrate excellent posture for conducting with consistency.

MUSC323L - CONDUCTING II LAB

General

Course Prefix
MUSC

Course Number
323L

Description
This course is a study of advanced conducting techniques and skills. This course includes instruction in basic baton technique and simple score study. Topics covered in the course include conducting fermatas, tempo changes, orchestral score study, conducting non-metric passages, and mixed meter. Additional emphasis is placed on developing listening skills and solving complex conducting problems.Prerequisites: MUSC 1133, 1233, 2133, 322L (Conducting 1 Lab)Co-requisite: MUSC 3502

Learning Outcomes

Learning Outcomes

Objective
Relate the cultural and philosophical aspects of each time period with the musical and art forms.

Name
Communicate accurately and effectively-students will develop their skills in both written and spoken English through formal and informal writing assignments.

Name
Locate, select, organize, and present information efficiently-students will learn to retrieve and organize information from various disciplines and to use appropriate computer technologies.

Name
Think and reason analytically-students will learn to use methods of form and analysis in music inquiry; understand and apply analytical concepts; and reason by evaluation, analyzing, and synthesizing information about a musical performance, composition, or recording.

Name
Function responsibly in the natural, social, and technological environments-students will recognize and understand both the dynamics of social implications on popular music in the United States from the earliest examples through the twentieth century.

Name
Recognize and respond to aesthetic values in creative human expression-students will develop an appreciation for the arts and humanities.

Name
Recognize and value the multicultural nature of American Society, develop an understanding and respect for the cultural diversity within American society, and respect the rights of all citizens- students will learn about the interaction of European, African American, and Latin American traditions in the development of popular music in America and consider how issues of race, gender, class, and generation have affected this music throughout history.

Name
Analyze the elements of music.

Name
Understand the philosophical and cultural elements of music.

Name
Survey the history of Western Music from the Medieval era through Contemporary period.

Name
Develop critical listening skills.

Name
Examine the lives of musical composers (influences and effects).

Name
Understand form, dynamics, styles, tempo, and time periods.

Name
Relate the cultural and philosophical aspects of each time period with the musical and art forms.

Learning Outcomes

Objective
Synthesize course materials in the creation of musical works.

Name
Demonstrate the accepted procedures for correct pitch notation.

Name
Write music that demonstrates correct rhythmic notation

Name
Identify and write all major and minor key signatures.

Name
Identify and construct major and minor scales.

Name
Recognize and write simple and compound intervals.

Name
Identify and compose triads

Name
Explain the use of beat and meter in music

Name
Implement appropriate voice leading in two and four-part writing.

Name
Exhibit an understanding of cadences and non-harmonic tones.

Name
Exhibit an understanding of texture and textural reduction.

Name
Make practical application of skills and knowledge acquired in the course in the performance and enjoyment of commercial, concert, and church music.

Name
synthesize course materials in the creation of musical works.s

Learning Outcomes

Name
Identify the tasks and expectations of the therapist and client in the following stages of the therapeutic process: assessment, treatment, evaluation, and termination of services (AMTA Professional Competencies 10.2, 10.6).

Name
Explain therapeutic principles related to therapist-client relationship, dynamics and processes of therapy groups, and accepted methods of major therapeutic approaches (ATMA Professional Competencies 8.1, 8.2, 8.3)

Name
Connect the ways in which one’s own feelings, attitudes, and actions can influence the client and the therapy process (AMTA Professional Competency 9.1)

Name
Demonstrate basic group leading skills incorporating movement, voice, guitar, piano, and/or percussion. (AMTA Professional Competencies 4.1.1, 4.1.2, 4.1.3, 4.1.4, 4.1.8, 4.2, 6.1, 6.2, 13.3).

MUSC2203 - INTRODUCTION TO MUSIC THERAPY

General

Course Prefix
MUSC

Course Number
2203

Description
This course provides music therapy students with an introduction to the philosophical, psychological, physiological, and sociological foundations of music as therapy. Students will gain insight into the clinical populations served by music therapists across the lifespan, as well as various settings in which music therapy is practiced.

Credit Hours

Learning Outcomes

Learning Outcomes

Name
Describe the strengths and limitations of a variety of clinical populations across the lifespan (AMTA Professional Competency 7.1)

Name
Summarize the philosophical, psychological, physiological, and sociological concepts related to the therapeutic use of music. (AMTA Professional Competency 10.5)

Name
Compare and contrast settings serving individuals across the lifespan and explore setting-specific employment options.

MUSC2233 - MUSIC THEORY IV

General

Course Prefix
MUSC

Course Number
2233

Description
This course is an advanced study of melodic, rhythmic, harmonic and formal elements of music as well as compositional techniques from the late 19th century to the present. Prerequisite: MUSC 2133; Corequisite: MUSC 2051

Credit Hours

Minimum Credit Hours:
3

Complete ALL of the following Courses:
- MUSC2133 - MUSIC THEORY III

Corequisite

Complete ALL of the following Courses:
- MUSC2051 - AURAL THEORY IV

Learning Outcomes

Learning Outcomes

Name
Demonstrate understanding of the function of advanced chromatic harmony.

Name
Demonstrate understanding of pitch organization in post-Romantic music

Name
Exhibit an understanding of compositional techniques in post-Romantic music.

Name
Interpret the performance objectives of post-Romantic composition

Name
Create formal analyses of music of the Common Practice era.

Name
Recognize and utilize chord symbols in jazz and pop music idiom

Name
Harmonize melodies using jazz chord progressions.

Name
Synthesize course materials and compose short homophonic and polyphonic pieces in a post-tonal idiom.

Name
Apply the skills and knowledge acquired in course in the performance, composition, and enjoyment of commercial, concert and church music.

MUSC2411 - RHYTHM SECTION TECHNIQUES

General

Course Prefix
MUSC

Course Number
2411

Description
This course is a workshop for the study and development of musical techniques for the rhythm section of a rock, pop, or jazz band. Rhythm section includes guitar, bass, drums, percussion, and keyboards. Emphasis will be placed on the methods of performance, communication, and organization of a rhythm section in a church context.

Learning Outcomes

Learning Outcomes

Name
Perform at a rudimentary level all the instruments of a rhythm section.

Name
Communicate with terms and concepts that the typical rhythm section musician will understand.

Name
Organize, administrate, and lead a rhythm section rehearsal and performance

Name
Create basic musical arrangements and charts for the rhythm section.

MUSC2412 - ELECTRONIC MUSIC COMPOSITION

General

Course Prefix
MUSC

Course Number
2412

Description
This course studies the aesthetics, history, and techniques of music composition using electronic resources including computers, hardware samplers, synthesizers and digital or analogue recording equipment. Class work includes hands-on work with recording, editing, and compositional software and hardware.

Credit Hours

Minimum Credit Hours:

Learning Outcomes

Learning Outcomes

Name
Manipulate musical and audio materials with computer software.

Name
Create musical compositions using only electronic resources

Name
Create electro-acoustic compositions performed by a combination of live performers and electronic sound equipment.

Name
Create music and sound effects tracks to accompany film, multimedia or theatrical presentations.

Name
Use digital recording and editing equipment.

Name
Critique electro-acoustic compositions.

MUSC2503 - INTRO TO MUSIC EDUCATION W/ FIELD

General

Course Prefix
MUSC

Course Number
2503

Description
This is a course for music majors to participate in field experiences, lectures, readings, discussions, and writing assignments designed to provide an introduction to the profession of music teaching. Informed by a Christian worldview, emphasis will be placed on acquiring the personal, professional, and musical skills needed for effective music teaching and learning.

Learning Outcomes

Name
Examine characteristics of good teaching; interrelationships among teaching, learning, and performing; the development of music education in the United States; current pedagogical approaches; methods of implementation for modern technology; effective verbal and nonverbal communication, and career options available to graduates who obtain a degree in music.

Name
Demonstrate professional behavior by reading assigned texts, participating in class discussions and activities, submitting work in a timely manner, and adhering to the attendance policy.

Name
Demonstrate current level of teaching ability by completing in-class teaching demonstrations.

Name
Develop a personal philosophy of music education and describe it in written form.

Name
Demonstrate control of writing style, format, and genre conventions appropriate to writing in the discipline.

Name
Locate and assess appropriate sources and use them in substantive ways, such as citing relevant data, building on the ideas of others, and situating arguments within larger contexts.

Name
Follow Standard Edited English conventions for correct grammar, punctuation, and usage.

Name
Apply critical consideration of ethical principles and actions to their lived experiences as Christians.

MUSC3002 - FUNCTIONAL TECHNIQUES OF MT

General

Course Prefix
MUSC

Course Number
3002

Description
This course introduces students to the functional use of voice, piano, guitar, and percussion in clinical settings. Special emphasis is placed on development of repertoire and accompaniment styles to utilize music from various decades and genres with clients across the lifespan. Students will also harmonize, transpose, and improvise on pitched and unpitched instruments.

Learning Outcomes

Learning Outcomes

Name
Understand the biblical definition, purpose, and dynamics of congregational worship.

Name
Evaluate and embody the spiritual, character, and musical requirements needed for effective worship leadership.

Name
Identify resources, repertoire, and methods to aid in effective worship planning.

Name
Create parameters for evaluating worship and apply them to a variety of generational and cultural styles.

Name
Create and implement a seamless flow of elements in a worship service, culminating in a 20-song setlist for direct application upon employment.

Name
Understand the differences between attracting attention as a performer and enhancing worship through musical excellence.

Name
Analyze and apply concepts concerning the presence and guidance of the Holy Spirit in both the preparation of and spontaneous moments in worship.

MUSC3123 - MT PRINCIPLES & PRACTICE I

General

Course Prefix
MUSC

Course Number
3123

Description
This course provides music therapy students with foundational knowledge of human development across the lifespan. Emphasis is placed on typical and atypical development, diagnostic characteristics, and intervention development to address the needs of various clinical populations.

Name
Record, edit, and manipulate digital sound.

Name
Understand basic acoustics and digital sound

Name
Operate synthesizers, samplers, and sequencers in a MIDI environment.

Name
Compose music using various electronic media

Name
Produce CDs and DVDs using creation software and hardware burners.

Name
Notate music and produce scores and parts using notation software

Name
Develop and utilize resources for audio and multimedia content.

MUSC3143 - AUDIO & PRODUCTION TECHNOLOGY I

General

Course Prefix
MUSC

Course Number
3143

Description
This course is a study of entry level techniques to produce music, audio, and multimedia content using computer technologies. It provides hands-on experience in entry level techniques in worship support ministries including sound reinforcement, theatrical lighting, and multimedia projection. Emphasis will be placed on the practical application of these technologies in a church setting. During the semester, students will apply learned techniques and principles during student-organized, in-class concert productions and individualized digital music projects.

Learning Outcomes

Learning Outcomes

Name
Discover how information is gathered about music of the past when scores are not available or extant scores are not decipherable.

Name
Describe the development of chant-based composition for its liturgical context in the Roman church from the early Medieval into the Renaissance period.

Name
Examine stylistic traits of opera and oratorio in the Baroque era as well as orchestral conventions developed through them.

Name
Explore philosophical underpinnings and formal implications of Classical-era aesthetics.

Name
Recognize broad revolutionary currents that shaped the Romantic sensibility.

Name
Experience an introduction to basic research techniques and materials in the discipline of musicology.

MUSC3621 - MUSIC THERAPY PRACTICUM III

General

Course Prefix
MUSC

Course Number
3621

Description
This course provides practical application of classroom learning through field experience with community partners. Students will gain advanced knowledge of a clinical population through observation, assessment, music therapy treatment planning, implementation, evaluation, and documentation. Musical skill development will focus on stylistic variation of music utilized in sessions. Clinical skill development will focus on intervention facilitation, in-the-moment response to events in sessions, and session documentation under the supervision of a board-certified music therapist (MT-BC).

  AND MUSC2503 - INTRO TO MUSIC EDUCATION W/ FIELD

Corequisites

Complete ALL of the following Courses:

- MUSC3502 - APPLIED MUSIC EDUCATION

Learning Outcomes

Learning Outcomes

Name
Investigate the philosophical bases and practical application of the general music methods used commonly in North American schools including, Dalcroze, Kodaly, Orff-Schulwerk, Comprehensive Musicianship, Gordon Theory of Music Learning, and the Manhattanville Music Curriculum Project.

Name
Teach age-appropriate music lessons to children in public or private elementary schools at the K-5 level.

Name
Review lessons designed for the commercially developed basal series typically used in North American public schools including Quaver.

Name
Create original, age-appropriate lesson plans for students in Pre-K through grade 5 that teach musical elements such as, form, pitch organization, rhythm, meter, dynamics, and timbre.

Name
Develop strategies for teaching ESOL students in an elementary general music setting

Name
Develop strategies for teaching mainstreamed and inclusion students in an elementary general music setting.

Name
Create and teach a music lesson using an original arrangement for Orff classroom instruments.

Name
Create written reviews of all readings, field experiences, and micro-teaching experiences.

Name
Develop listening maps, graphic organizers, movement exercises and other models that accommodate various learning styles.

Name
Discuss and evaluate various assessment strategies used commonly by elementary general music teachers.

Name
Investigate, observe, and discuss classroom management strategies that lead to smooth transitions, effective use of time and space, and a safe environment for children.

MUSC3952 - METHODS TEACHING MUSIC SECONDARY

General

Course Prefix
MUSC

Course Number
3952

Description
This is a course for music education majors to prepare preservice teachers for specialized music teaching in the middle grades (5-9) and secondary (6-12) schools. Emphasis is placed on developing and evaluating music curriculum, lesson planning, and selection and utilization of methods, instructional materials and technology. The course includes field-based experiences.Prerequisite: EDUC 2133, EDUC 2233, EDUC 3123, MUSC 2503 Corequisite: MUSC 3502

Corequisite

Complete ALL of the following Courses:

- MUSC3502 - APPLIED MUSIC EDUCATION

Learning Outcomes

Learning Outcomes

Name
Identify methods of communicating high expectations for academics and behavior in the secondary music classroom.

Name
Identify a variety of critical thinking skills for secondary music courses.

Name
Plan instruction that incorporates a variety of thinking skills in performance and non-performance based courses in the secondary music education curricula.

Name
Identify significant historical developments in secondary music education.

Name
Plan instruction that links multiple subject areas.

Name
Evaluate techniques used to communicate ways in which families can support classroom goals and continuous quality improvement techniques.

Name
Apply inventory, organizational, and management procedures used in secondary music settings.

Name
Plan instructional experiences that incorporate technology to support standards-based instruction.

Name
Evaluate technology tools to assist with management of student learning.

Name
Develop a professional portfolio based on the Accomplished Competencies for the Teachers of the Twenty-First Century from the Florida Education Standards Commission.

MUSC4021 - SENIOR CAPSTONE

General

Course Prefix
MUSC

Course Number
4021

Description
Available only for students in BS Music Industry or BS Worship Studies. This course requires students to demonstrate the culmination of their studies via successful completion of a senior level capstone project as outlined by their assigned instructor.Prerequisites: Permission of the instructor.

MUSC5203 - FOUNDATIONS IN MUSIC EDUCATION

General

Course Prefix
MUSC

Course Number
5203

Description
This course examines the historical and philosophical bases of music education in the United States. Students will study important events and movements that shaped contemporary music education. The course will also focus attention on music education's value to the intellectual, psychological, and physical development of children.

Credit Hours

MUSC5401 - CONTEMPORARY BAND

General

Course Prefix
MUSC

Course Number
5401

Description
The Contemporary Band is a performance ensemble that is designed to explore the various styles within the repertoire for the commercial/contemporary band including but not limited to jazz, rock, fusion, rhythm and blues, hip hop, progressive rock, funk and world music. Members of this ensemble are expected to perform at each concert scheduled throughout the semester.

MUSC5990 - COMPREHENSIVE REVIEW

General

Course Prefix
MUSC

Course Number
5990

Description
This course is reserved for the final semester of study in a master's degree music program. Comprehensive reviews cover all of the coursework for the degree, with particular emphasis on the student's area of concentration. The exam is administered orally with a selection of the faculty of the School of Music. Successful completion of this review is a requirement for graduation.

NPHI2044 - GEOGRAPHICA

General

Course Prefix
NPHI

Course Number
2044

Description
This course is an introduction to the basic concepts of Physiography and Geomorphology or the study of landforms, to understand the forces shaping andaltering the primary relief elements of the terrestrial surface, including tectonic activity, surficial earth movements, weathering, erosion, and deposition caused by wind, glacial ice, and streams. This course integrates modeling and experimental dialectic laboratory experiences.

Credit Hours

Number Of Credits:
4

Learning Outcomes

Learning Outcomes

Name
Demonstrate understanding of the basic concepts of Physiography and Geomorphology and the forces that shape and alter terrestrial relief elements.

Name
Interpret how various forces contribute to the formation of landforms on the Earth's surface.

Name
Demonstrate proficiency in using Geographical Information Systems and understanding its four interactive components.

Name
Apply knowledge to real-world scenarios, using GIS for mapping, spatial analysis, and solving geographic problems related to landforms and Earth's surface processes.

Name
Demonstrate mastery in remote sensing processes, including detecting physical characteristics by measuring reflected and emitted radiation from a distance.

Name
Integrate concepts from geography, geology, and environmental science to analyze and understand the complex interactions between natural forces and landforms.

Name
Develop critical thinking skills and the ability to solve problems related to physiography and geomorphology.

Name
Apply grammar, dialectic, and rhetoric to integrate the topic with God's revelation through His creation and Moral Philosophy and OrthoDoxia defined through scriptural paideia.

NSCI102L - INTRO TO SCIENCE AND TECH LAB

General

Course Prefix
NSCI

Course Number
102L

Description
This is a laboratory to accompany NSCI 1023. Corequisite: NSCI 1023

Credit Hours

Corequisite

Complete ALL of the following Courses:

- NSCI1023 - INTRO TO SCIENCE AND TECH

Learning Outcomes

Learning Outcomes

Objective
Examine evidence to identify patterns, differences, similarities, limitations, and/or implications related to the focus.

Name
Use appropriate tools and techniques to obtain and interpret data and communicate the results of inquiry.

Name
Formulate predictions by analyzing data gathered in the laboratory.

Name
Perform interactive laboratory activities through demonstrations and simulations.

Name
Demonstrate the ability to use the scientific method.

Name
Demonstrate proper technique and safety practices.

Name
Examine evidence to identify patterns, differences, similarities, limitations, and/or implications related to the focus.

NSCI104L - NUTRITION SCIENCE LAB

General

Course Prefix
NSCI

Course Number
104L

Description
This course is to accompany NSCI 1043, Nutrition Science.

Learning Outcomes

Learning Outcomes

Objective
Describe how different nutrients are used by the body.

Name
Explain USDA dietary guidelines.

Name
Develop a meal plan.

Name
Understand and utilize math to analyze food intake.

Name
Examine and analyze different nutrition labels.

Name
Understand how different nutrients are used by the body.

NSCI132L - INTRO TO ECOLOGY LAB

General

Course Prefix
NSCI

Course Number
132L

Description
This is a laboratory to accompany NSCI 1323. Students will develop critical thinking skills as they apply the concepts learned in the lecture to actual hands-on laboratory and field conditions.Corequisite: NSCI 1323

Credit Hours

Minimum Credit Hours:
1

Maximum Credit Hours:

Learning Outcomes

Learning Outcomes

Objective
Demonstrate competence in scientific writing through a lab report submission.

Name
Understand the basics of data collection.

Name
Sort, analyze, and present data in tables, graphs, and other formats.

Name
Apply the scientific method under laboratory conditions.

Name
Conduct a simple scientific investigation in local field conditions.

Name
Demonstrate competence in scientific writing through a lab report submission.

NSCI143L - BOTANY LAB

General

Course Prefix
NSCI

Course Number
143L

Description
This course helps students apply what they have learned about plant anatomy, physiology and taxonomy through hands-on activities and field trips.Corequisite: NSCI 1433

Credit Hours

Minimum Credit Hours:
1

Maximum Credit Hours:
1

(Credit Hours) Value:

Corequisite

Complete ALL of the following Courses:
- NSCI1433 - BOTANY

Learning Outcomes

Learning Outcomes

Objective
Describe and differentiate between the groups of plants and plant diversity on SEU's campus and central Florida.

Name
Identify roots, stems, flowers, fruit and leaves of plants at the macroscopic and microscopic level.

Name
Demonstrate the ability to use the dichotomous key to identify plants by examining twigs and leaves.

Name
Classify the various groups of plants down to their classes.

Name
Explore the complexity and differences in the fruiting plants and the fruits they produce.

Name
Describe and differentiate between the groups of plants and plant diversity on SEUs campus and central Florida.

NSCI223L - ASTRONOMY LAB

General

Course Prefix
NSCI

Course Number
223L

Description
This lab is to enhance the material learned in the accompanying lecture class, Astronomy.

Learning Outcomes

Learning Outcomes

Objective
Describe the physical characteristics and the phases of the Moon.

Name
Download and be able to use cell phone app to identify objects in the night sky.

Name
Describe the motions of the planets and satellites in the solar system.

Name
Use the Hertzsprung-Russell Diagram to determine the characteristics of a star.

Name
Understand the relationship of the Sun, Moon and Earth.

Name
Describe the physical characteristics and the phases of the Moon.

NSCI243L - ANIMAL DIVERSITY LAB

General

Course Prefix
NSCI

Course Number
243L

Description
This course is a laboratory to accompany NSCI 2433.Corequisite: NSCI 2433

Credit Hours

Learning Outcomes

Learning Outcomes

Name
Quantify the biodiversity of a real ecological system by learning how to conduct a field survey and analyze its results in a laboratory setting.

Name
Demonstrate basic zoological lab skills, including dissections, data collection and analysis, and maintaining a scientific log of lab records.

Name
Describe basic anatomy and physiology of representative vertebrates and invertebrates.

Name
Identify invertebrate specimens in the field and classify them into their various phyla and classes.

Name
Identify vertebrate specimens in the field and classify them into their correct sub-phyla and classes.

NSCI270L - INTRO TO FORENSIC SCIENCE LAB

General

Course Prefix
NSCI

Course Number
270L

Description
This is the accompanying lab to the forensic science lecture. This course is an overview of forensic lab techniques with an emphasis on physical evidence recovery and analysis including trace evidence, blood splatter, fingerprinting, and DNA analysis. When taken with the lecture, this course meets the science (with lab) general education requirement. This course also meets the specialized needs of the Criminal Justice program.Corequisites: NSCI 2703

- NSCI2703 - INTRO TO FORENSIC SCIENCE

Learning Outcomes

Learning Outcomes

Objective
Perform DNA analysis techniques such as isolation of DNA, polymerase chain reaction (PCR), and electrophoresis.

Name
Secure and document a crime scene.

Name
Reconstruct a crime scene.

Name
Recover and identify trace evidence such as fiber, paint, and hair.

Name
Know the parts of a microscope.

Name
Analyze blood stain patterns.

Name
Perform DNA analysis techniques such as isolation of DNA, polymerase chain reaction (PCR), and electrophoresis.

NSCI333L - ECOLOGY LAB

General

Course Prefix
NSCI

Course Number
333L

Description
This is a laboratory to accompany NSCI 3333. Students will discern the interconnectivity between and among various species of organisms through the conduct of actual laboratory and field surveys in various habitats applying critical analysis to explain ecological phenomena learned in lecture.Corequisite: NSCI 3333

Complete ALL of the following Courses:

- NSCI3403 - AVIAN BIOLOGY (ORNITHOLOGY)

Learning Outcomes

Learning Outcomes

Objective
Demonstrate the ability to correctly identify central Florida's birds in the field.

Name
Apply their knowledge of avian anatomy while dissecting bird specimens.

Name
Differentiate between pigment-based and structural colors in birds.

Name
Investigate various properties of bird feathers.

Name
Explain how bird visual perception differs from that of humans.

Name
Learn the basics of bird identification and classification.

Name
Demonstrate the ability to correctly identify central Floridas birds in the field.

NSCI1023 - INTRO TO SCIENCE AND TECH

General

Course Prefix
NSCI

Course Number
1023

Description
This course is designed to develop the foundation for the scientific literacy necessary to understand technology's role in modern society. Basic scientific concepts underlying matter, energy, life and systems are introduced, and students engage in development of reasoning and problem-solving skills associated with scientific issues. The course is an introduction with applications to environmental science, human biology and health, physical and chemical principles, energy, earth science, and systems. Using an integration approach of the natural sciences allows the student to employ an understanding of science, technology and some current health problem areas in order to appraise alternative futures. Case studies and/or individual student projects will be used. Corequisite: NSCI 102L

Credit Hours

Minimum Credit Hours:

Learning Outcomes

Learning Outcomes

Name
Demonstrate an understanding of the nature of scientific knowledge and inquiry.

Name
Apply scientific concepts, principles, laws, and theories to generate multiple solutions to contemporary issues.

Name
Apply scientific principles to solve problems, make decisions, and further understand nature and technology.

Name
Demonstrate an awareness of the interrelationship of science, technology, and society.

Name
Cultivate the confidence to confront scientific and technological issues in areas such as human health, energy, and the environment.

NSCI1024 - INTRO TO SCIENCE &TECHNOLOGY

General

Course Prefix
NSCI

Course Number
1024

Description
A course designed to develop the foundation for the scientific literacy necessary to understand technology's role in modern society. Basic scientific concepts underlying matter, energy, life and systems are introduced, and students engage in development of reasoning and problem-solving skills associated with scientific issues as demonstrated in laboratory activities. The course is an introduction with applications to environmental science, human biology and health, physical and chemical principles, energy, earth science, and systems. Using an integration approach of the natural sciences allows the student to employ an understanding of science, technology and some current health problem areas in order to appraise alternative futures. Case studies and/or individual student projects will be used.

Learning Outcomes

Learning Outcomes

Name
Define health and nutrition.

Name
Describe the process of nutrient digestion, absorption and transport.

Name
Identify and understand utilization of the different nutrients, vitamins, and minerals in the body.

Name
Explain food labels and how to apply this information to establishing eating habits.

Name
Discuss how nutrient needs change as related to life cycle.

Name
Explain how the nutritional status of patients may be compromised by illness.

NSCI1044 - NUTRITION SCIENCE

General

Course Prefix
NSCI

Course Number
1044

Description
This online course provides an overview of nutrition including nutrients, digestion and transport, different nutrition needs as related to life cycle, and how certain disease states affect nutrition status. Also included is interpretation of current USDA nutritional guidelines, and application of nutrition knowledge in the establishment of eating habits.

NSCI1114 - SURVEY OF NATURAL SCIENCES

General

Course Prefix
NSCI

Course Number
1114

Description
This course provides a historically-informed introduction to significant theories and discoveries of modern physics, chemistry, astronomy, cosmology, geology, and biology, while promoting a clear understanding of the harmony between science and the Christian faith. Topics pertaining to a Christian worldview receive special attention: evidence of intelligent design in cosmology and biology, Christian perspectives on creation and evolution, and foundational questions about the nature of science and the methods of scientific inquiry. The course incorporates some “do-it-yourself” lab assignments (which online students can perform using readily available materials at home).

NSCI1224 - INTRODUCTION TO LIFE SCIENCES

General

Course Prefix
NSCI

Course Number
1224

Description

This course is a survey of the life sciences in their cultural context. The course not only analyzes key concepts and discoveries in the life sciences, but also explores how science interacts with worldviews that dominate society's larger cultural setting. In particular, students examine contemporary issues in bioethics, sexuality, health, evolution, and intelligent design. By studying these areas – as well as the life sciences more broadly – students learn how to live a better life in practical ways. They also learn how to analyze biological entities and events, and how to provide scientific explanations for these phenomena. This analysis includes careful consideration of how (and when) to explain certain phenomena by reference to chance, the laws of nature, or intelligent design. This course includes lab components.Prerequisite: None Credit Hours: 4Repeatable: Course not repeatable

1323

Description

This course caters to non-science majors who want to gain basic knowledge and understanding of ecology which explores the interrelationships between plants, animals and the environment. Topics covered include aquatic and terrestrial ecology, population growth, and ecological interactions. Corequisite: NSCI 132L

Credit Hours

Learning Outcomes

Learning Outcomes

Name
Identify the biological levels of organization in living systems.

Name
Differentiate the characteristics between terrestrial and aquatic habitats.

Name
Apply the scientific method in exploring ecological problems.

Name
Describe the relationship between the biotic and abiotic components of the ecosystem.

Name
Analyze how birth and death rates, immigration, and emigration affect population growth.

Name
Identify organisms that exhibit competition, predation, commensalism, mutualism, and parasitism, and how these relationships affect community.

Name
Explain the basic concept of trophic structure and its significance in a balanced ecosystem.

NSCI1433 - BOTANY

General

Course Prefix
NSCI

Course Number
1433

Description
This course is an introductory course in plant anatomy, physiology and taxonomy. The history of mankind’s medicinal use of plants and current updates will be covered.Corequisite: NSCI 143L

Credit Hours

Minimum Credit Hours:
3

Maximum Credit Hours:
3

(Credit Hours) Value:

Learning Outcomes

Learning Outcomes

Name
Understand the basic principles of plant biology.

Name
Evaluate the structure and function of the various plant tissues, such as the stem, leaf, and root.

Name
Recognize the requirements for life in plants, including growth, reproduction, and the importance of the basic elements of light and water.

Name
Identify the taxonomic categories of plants as well as their general classification schemes.

Name
Compare and contrast the properties of the seedless vascular plants and seed plants.

NSCI2013 - BASIC ASTRONOMY

General

Course Prefix
NSCI

Course Number
2013

Description
The history of the heavens and man's study of their motion. Selections from Ptolemy, Copernicus, Galileo, and Kepler are read.

Credit Hours

Minimum Credit Hours:
3

Maximum Credit Hours:
3

(Credit Hours) Value:
3

Learning Outcomes

Learning Outcomes

Name
To appreciate the wonder and beauty of the Universe and how it works.

Name
To understand the relationships among history, philosophy, theology, and science and see how they are all intertwined in the study of astronomy.

Name
To become comfortable and proficient with some of the basic equations used by modern astrophysics.

NSCI2014 - INTRODUCTION TO ASTRONOMY

General

Course Prefix
NSCI

Course Number
2014

Description
This course is a survey of astronomy and astrobiology (the search for life beyond earth) with emphasis on the interaction between science and worldviews through historical and contemporary case studies. In addition to coursework, students do nighttime outdoor skywatches and computer simulations of celestial phenomena to feel more at home in the cosmos, and to explore how astronomy explains these phenomena. The course also examines major cosmic events and entities, and exposes students to arguments which show that these phenomena are best explained by intelligent design. These arguments include an examination of universal physical laws and local planetary conditions that must be fine-tuned within narrow parameters for life to be possible. (Notably, the only math used in the course is simple geometry.) Not only does the course provide students with strong evidence for intelligent design, but also shows more generally how science and Christianity are in harmony and how attempts to use science to attack Christianity are mistaken. This course includes lab components.

NSCI2233 - ASTRONOMY

General

Course Prefix
NSCI

Course Number
2233

Description
This course is an introduction to the astronomy of the solar system, astrophysics, and constellations. The course level assumes no physics background.

Credit Hours

Minimum Credit Hours:
3

Maximum Credit Hours:
3

(Credit Hours) Value:
3

Contact Hours (not needed)

(Contact Hours) Value (not needed) :
3

Learning Outcomes

Learning Outcomes

Name
Demonstrate the ability to reason and develop evidence-based decisions and logical methods to analyze and solve problems.

Name
Know the history of Astronomy and the major astronomers.

Name
Understanding of the science used to understand the formation of solar systems and galaxies.

Name
Understand how light is used to determine the properties of stars and galaxies.

Name
Comprehend the geocentric and heliocentric models, the Big Bang Theory, and The Intelligent Design Theory.

Name
Be familiar with the various techniques used to discover exoplanets.

Name
Understand the relationships of the astronomical bodies in the universe.

Name
Describe the life and death of stars.

NSCI2433 - ANIMAL DIVERSITY

General

Course Prefix
NSCI

Course Number
2433

Description
This course introduces foundational principles of zoology, including taxonomy, animal architecture, biology, and ecology. Emphasis will be placed on the survey of invertebrate and vertebrate biodiversity.Corequisite: NSCI 243L

Credit Hours

Minimum Credit Hours:
3

Maximum Credit Hours:
3

(Credit Hours) Value:
3

Contact Hours (not needed)

(Contact Hours) Value (not needed) :
3

Repeatable:

Number Of Repeats:
3

Number Of Credits:
3

Learning Outcomes

Learning Outcomes

Name
Review basic principles of animal taxonomy, architecture, and ecology.

Name
Survey the major invertebrate phyla, including Protozoan groups, Porifera, Cnidaria, Platyhelminthes, Nematoda, Annelida, Arthropoda, Mollusca, and Echinodermata.

Name
Survey the major chordate classes, including Chondrichthyes, Osteichthyes, Amphibia, Reptilia, Aves, and Mammalia.

Name
Discuss the basic biology (including physiological systems) of each phylum.

Name
Reflect on the significance of biodiversity on earth, including how specific animal taxa contribute to the healthy functioning of ecological systems.

NSCI2703 - INTRO TO FORENSIC SCIENCE

General

Course Prefix
NSCI

Course Number
2703

Description
This course is an overview of the application of forensic science and how it applies to the criminal justice system. This course is designed to provide students an understanding of the techniques and abilities of forensic science regarding investigative and criminalistic activities. When taken with its accompanying lab, this course meets the science (with lab) general education requirement. This course also meets the specialized needs of the Criminal Justice program.Corequisites: NSCI 270L

Credit Hours

Minimum Credit Hours:
3

Maximum Credit Hours:
3

(Credit Hours) Value:
3

Contact Hours (not needed)

(Contact Hours) Value (not needed) :
0

Repeatable:
Yes

Number Of Repeats:
3

Number Of Credits:
3

Learning Outcomes

Learning Outcomes

Name
Know the scope of forensic science as it applies to criminal justice.

Name
Discuss issues that have deterred the credibility of forensic science.

Name
Identify the process of handling multiple scientific materials in a laboratory setting.

Name
Explain the multiple factors affecting the collection, processing, and preservation of evidence prior to admission into trial.

Name
Explain the overall implication of forensic science technology as it applies to criminal investigation in the twenty first century.

NSCI3003 - ANIMAL PHYS. AND MOL. BIOLOGY

General

Course Prefix
NSCI

Course Number
3003

Description
This course reviews and investigates the fundamental molecular processes and mechanisms that regulate the functions of various organ systems of animals (emphasis on vertebrates) to maintain homeostasis.Prerequisite: BIOL 1243 or NSCI 2433

Credit Hours

Minimum Credit Hours:
3

Maximum Credit Hours:
3

(Credit Hours) Value:
3

Contact Hours (not needed)

(Contact Hours) Value (not needed) :
0

Repeatable:
Yes

Number Of Repeats:
3

Number Of Credits:
3

Learning Outcomes

Learning Outcomes

Name
Develop a working knowledge of the major physiological systems including respiratory, circulatory, digestive, thermoregulatory, osmoregulatory, renal, nervous, musculoskeletal, neuroendocrine and sensory systems.

Name
Describe the connections between anatomical design and function.

Name
Explore the molecular mechanisms and biochemical processes that regulate and integrate physiological systems from the cellular level up to the organismal level.

Name
Discuss the environmental and ecological challenges animals face and the physiological adaptations in response to these challenges.

Name
Analyze current concepts, developments and applications in research on animal physiology.

NSCI3333 - ECOLOGY

General

Course Prefix
NSCI

Course Number
3333

Description
This course introduces foundational principles of ecology, the study of relationships between organisms and the surrounding environment. This course will provide students with a broader understanding of how the physical and chemical characteristics of the environment influence the distribution and abundance of various species of organisms in an ecosystem. Corequisite: NSCI 333L

Credit Hours

Minimum Credit Hours:
3

Maximum Credit Hours:
3

(Credit Hours) Value:
3

Contact Hours (not needed)

(Contact Hours) Value (not needed) :
3

Repeatable:
Yes

Number Of Repeats:
3

Number Of Credits:
3

Learning Outcomes

Learning Outcomes

Name
Illustrate the hierarchy of biological structure and organization.

Name
Discuss terrestrial and aquatic biomes.

Name
Explain the role that temperature, water availability, energy, and nutrient sources play within balanced or disrupted ecosystems.

Name
Describe select social relations occurring in the living world.

Name
Outline a general overview of population ecology.

Name
Discuss community interactions of living organisms.

Name
Explain food chains, food webs, energy flow, and nutrient recycling.

Name
Describe important aspects of large-scale ecology.

NSCI3403 - AVIAN BIOLOGY (ORNITHOLOGY)

General

Course Prefix
NSCI

Course Number
3403

Description
This course introduces the biology, ecology, and conservation of birds with a particular emphasis on Florida's avifauna.

Credit Hours

Minimum Credit Hours:
3

Maximum Credit Hours:
3

(Credit Hours) Value:
3

Contact Hours (not needed)

(Contact Hours) Value (not needed) :
0

Repeatable:
Yes

Number Of Repeats:
0

Number Of Credits:
3

Learning Outcomes

Learning Outcomes

Name
Understand how birds are classified, identified, and studied.

Name
Identify avian anatomical features and physiological processes, and describe how these traits permit flight.

Name
Explain how the link between colors and avian visual perception impacts bird communication, behavior, and mate selection.

Name
Understand bird vocalizations and their impact on social biology.

Name
Describe avian cognitive abilities as they pertain to problem-solving skills, intraspecific interactions, and navigation.

Name
Differentiate among various avian reproductive and life history strategies.

Name
Explain how birds fit into environmental niches to perform specific ecological roles.

Name
Demonstrate the history of ornithology through influential naturalists and relate these figures to the future of bird conservation.

NSCI4403 - SCIENCE FIELD STUDY I

General

Course Prefix
NSCI

Course Number
4403

Description
This course provides the student supervised work/research experience in a setting relevant to the major area of study but outside the department and university.Prerequisite: Faculty Advisor or Department Chair Approval

Credit Hours

Minimum Credit Hours:
1

Maximum Credit Hours:
3

(Credit Hours) Value:

Learning Outcomes

Learning Outcomes

Name
Express scientific ideas clearly and persuasively in writing.

Name
Present orally scientific ideas clearly and persuasively.

Name
Use industry-specific terminology appropriately.

Name
Apply knowledge and skills learned in science and/or math classes within a workplace/professional setting.

NURS300L - HEALTH ASSESSMENT LAB

General

Course Prefix
NURS

Course Number
300L

Description
This course is the companion clinical course to NURS 3003. Students participate in skills lab learning the ways and tools of health assessment.Prerequisite: Acceptance into BSN ProgramCorequisite: NURS 3003, NURS 3106, NURS 310L, & NURS 3223

Credit Hours

  AND NURS310L - FOUNDATIONS NURS CLINICAL
  AND NURS3223 - ESSENTIALS OF PATHOPYSIOLOGY

Additional Comments:
TEST CATALOG (Additional Comments Field)

Requirements
Prerequisite: Acceptance into BSN Program

Learning Outcomes

Learning Outcomes

Objective
Document results of a health assessment using an Electronic Health Record (EHR).

Name
Use interview, observation, auscultation, and palpation techniques in performing a physical assessment.

Name
Document results of a health assessment using an Electronic Health Record (EHR).

NURS310L - FOUNDATIONS NURS CLINICAL

General

Course Prefix
NURS

Course Number
310L

Description

This course focuses on developing competence in nursing interventions required to deliver safe and effective patient care to stable patients. Students practice relevant skills necessary to provide care discussed in class by integrating them into skills practice through demonstration, practice, and skill checks as well as actual patient situations. Students spend a total of 90 contact hours between nursing skills lab and clinical rotations.Prerequisite: Acceptance into BSN ProgramCorequisite: NURS 3106, NURS 3003, NURS 300L, NURS 3223

  AND NURS3003 - HEALTH ASSESSMENT
  AND NURS300L - HEALTH ASSESSMENT LAB
  AND NURS3223 - ESSENTIALS OF PATHOPYSIOLOGY

Requirements

Prerequisite: Acceptance into BSN Program

Learning Outcomes

Learning Outcomes

Objective
Communicate effectively with patients, significant others, and members of the interdisciplinary team.

Name
Demonstrate beginning competence in nursing skills associated with identified physiological and psychological concepts.

Name
Practice skills of basic nursing care including but limited to hygiene, safety, sterile and nonsterile invasive skills of a nurse, ambulation, nutrition, oxygenation, and more

Name
Administer oral, intramuscular, subcutaneous, and intradermal medications safely and according to legal and practice guidelines.

Name
Document nursing care using an Electronic Health Record (EHR) or other means of communication.

Name
Provide safe, high quality care for patients with simple needs and stable conditions.

Name
Provide effective patient education and support for patients with simple needs and stable conditions.

Name
Communicate effectively with patients, significant others, and members of the interdisciplinary team.

NURS313L - PSYCH NURSING CLINICAL

General

Course Prefix
NURS

Course Number
313L

Description
This course provides an opportunity for students to develop beginning level competence in caring for patients with mental health/substance abuse issues. Students will spend 10 hours in the simulation laboratory, developing skills specific to psychiatric nursing and 80 hours in direct patient care.Prerequisite: NURS 3003, NURS 300L, NURS 3223, NURS 3106, NURS 310LCorequisite: NURS 3133, NURS 3124, NURS 3144, NURS 314L

Learning Outcomes

Learning Outcomes

Name
Develop, implement, and evaluate a plan of care that considers legal and ethical guidelines for patients with mental health/substance abuse issues.

Name
Administer required psychiatric medications safely.

Name
Provide appropriate patient education regarding psychiatric drugs and treatments which reflects the patients age, condition, and developmental stage.

NURS314L - MED-SURG NURS I CLINICAL

General

Course Prefix
NURS

Course Number
314L

Description
This course provides opportunities for students to develop beginning level competence in caring for patients with simple to intermediate chronic medical-surgical needs. Students spend 30 hours in the simulation laboratory developing skills specific to medical-surgical nursing and 105 hours in direct patient care.Prerequisite: NURS 3003, NURS 300L, NURS 3223, NURS 3106, NURS 310LCorequisite: NURS 3133, NURS 313L, NURS 3124, NURS 3144

  AND NURS3223 - ESSENTIALS OF PATHOPYSIOLOGY
  AND NURS3106 - FOUNDATIONS NURS CARE
  AND NURS310L - FOUNDATIONS NURS CLINICAL

Corequisite

Complete ALL of the following Courses:
- NURS3133 - PSYCHIATRIC NURSING
  AND NURS313L - PSYCH NURSING CLINICAL
  AND NURS3124 - APPLIED PHARMACOLOGY
  AND NURS3144 - MEDICAL-SURGICAL NURSING I

Learning Outcomes

Learning Outcomes

Objective
Use technology to enhance care delivery and evaluation.

Name
Develop strategies to implement and evaluate safe, evidence-based, and effective care for selected patients with chronic medical-surgical conditions.

Name
Base care for selected patients with chronic medical-surgical conditions on comprehensive, ongoing physical, psychosocial and spiritual assessment.

Name
Administer required medications safely, providing appropriate patient education regarding the drugs given.

Name
Use technology to enhance care delivery and evaluation.

NURS420L - MED-SURG NURS II CLINICAL

General

Course Prefix
NURS

Course Number
420L

Description
This course provides an opportunity for students to develop beginning level competence in caring for patients with acute medical-surgical needs. Students will spend 20 hours in the simulation lab developing skills specific to medical-surgical nursing and 115 hours in direct patient care in a variety of practice settings. Prerequisite: NURS 3144, NURS 314L, NURS 3133, NURS 313L, NURS 3124Corequisite: NURS 4204, NURS 4212, NURS 421L, NURS 4322, NURS 432L, NURS 3153

  AND NURS313L - PSYCH NURSING CLINICAL
  AND NURS3124 - APPLIED PHARMACOLOGY

Corequisite

Complete ALL of the following Courses:

- NURS4204 - MED-SURG NURS II
  AND NURS4212 - CARE OF THE CHILDBEARING FAMILY
  AND NURS421L - CARE OF THE CHILDBEARING FAMILY
  AND NURS4322 - PEDIATRIC NURSING
  AND NURS432L - PEDIATRIC NURSING CLINICAL
  AND NURS3153 - RESEARCH & EBP

Learning Outcomes

Learning Outcomes

Objective
Communicate effectively with members of the interprofessional team to enhance the quality of patient care given.

Name
Plan, implement, and evaluate safe, evidence-based, and effective care for selected patients with acute medical-surgical conditions.

Name
Develop care plans for selected patients with acute medical-surgical conditions based upon comprehensive, ongoing physical, psychosocial and spiritual assessment.

Name
Administer required medications safely while providing appropriate patient education regarding the drugs given.

Name
Provide appropriate patient education based upon age, developmental stage, and condition including health promotion.

Name
Communicate effectively with members of the interprofessional team to enhance the quality of patient care given.

NURS421L - CARE OF THE CHILDBEARING FAMILY

General

Course Prefix
NURS

Course Number
421L

Description
This course provides an opportunity for students to develop beginning level competence in caring for the childbearing family. These clinical hours are shared between simulation laboratory developing skills and direct patient care specific to care of the childbearing families.

Credit Hours

Minimum Credit Hours:
0

Maximum Credit Hours:

  AND NURS313L - PSYCH NURSING CLINICAL
  AND NURS2123 - PATHOPHYSIOLOGY

Corequisite

Complete ALL of the following Courses:

- NURS4212 - CARE OF THE CHILDBEARING FAMILY
  AND NURS4203 - MEDICAL-SURGICAL NURSING II
  AND NURS420L - MED-SURG NURS II CLINICAL
  AND NURS4322 - PEDIATRIC NURSING
  AND NURS432L - PEDIATRIC NURSING CLINICAL

Learning Outcomes

Learning Outcomes

Objective
Provide educational support to child-bearing family related to care of the infant and nutrition for mother and baby including health promotion.

Name
Provide care based on a thorough assessment including cultural and spiritual implications of the childbearing family.

Name
Consider strategies to develop, implement and evaluate safe, effective evidence -based nursing care for the child bearing family prior to and throughout the pregnancy, labor and delivery, and post-partum period.

Name
Use appropriate pharmacological and non-pharmacological measures to enhance comfort of the mother during labor and delivery.

Name
Provide educational support to child-bearing family related to care of the infant and nutrition for mother and baby including health promotion.

NURS424L - TRANSITION TO NURS CLINICAL

General

Course Prefix
NURS

Course Number
424L

Description
This capstone clinical course provides the student an opportunity to prepare for practice as a registered professional nurse and explore leadership roles in healthcare settings. Building upon the competencies developed in the previous semesters students will hone their clinical judgment in a variety of nursing situations as they learn to care more as a team of patients working side by side with a clinical preceptor. Prerequisite: NURS 4322, NURS 432L, NURS 4204, NURS 420L, NURS 4212, NURS 421L, NURS 3153 Corequisite: NURS 4243, NURS 4314, NURS 431L, NURS 4332

  AND NURS4212 - CARE OF THE CHILDBEARING FAMILY
  AND NURS421L - CARE OF THE CHILDBEARING FAMILY
  AND NURS3153 - RESEARCH & EBP

Corequisite

Complete ALL of the following Courses:

- NURS4243 - TRANSITN NURS PRACTICE
  AND NURS4314 - COMMUNITY NURSING
  AND NURS431L - COMMUNITY NURSING AND CARE OF THE
  AND NURS4332 - QUALITY AND SAFETY

Learning Outcomes

Learning Outcomes

Objective
Demonstrate ability to act to prevent unsafe, illegal, or unethical practice.

Name
Synthesize knowledge and skills developed in previous courses to develop, implement and evaluate safe, effective, evidence based nursing care in selected situations.

Name
Integrate leadership principles and processes in actual organizational systems to ensure safe, quality outcomes of patient care across the healthcare continuum.

Name
Portray professional values when providing competent, compassionate, culturally sensitive and individualized care across the healthcare continuum.

Name
Collaborate in collection, documentation and dissemination of evidence regarding nursing care.

Name
Manage patient care technologies and information management systems when delivering care across the healthcare continuum.

Name
Demonstrate ability to act to prevent unsafe, illegal, or unethical practice.

NURS431L - COMMUNITY NURSING AND CARE OF THE

General

Course Prefix
NURS

Course Number
431L

Description
This course provides an opportunity to provide care to a group of patients, assessing their needs, and developing, implementing, and evaluating an appropriate intervention(s). Students also care for individual clients within a community setting with particular attention to strategies to support patients as they transition from one level of care to another.

Credit Hours

Learning Outcomes

Learning Outcomes

Name
Complete a comprehensive needs assessment for an identified group including access, availability, and cost of identified health care services and make appropriate recommendations.

Name
Develop a process of care for a group based upon a related needs assessment using standards of care and evidence-based practice guidelines as well as other relevant factors.

Name
Demonstrate the ability to assist patients/families/significant others as they transition through different levels of care.

Name
Give examples of clinical prevention and population-focused intervention with attention to effectiveness, efficiency, and equity.

Name
Use evidence-based practices to guide health teaching, health promotion, health counseling, screening outreach, disease and outbreak investigations, referral, and follow-up throughout the life span.

Name
Meet or exceed established benchmarks on the standardized Community Health examination.

NURS432L - PEDIATRIC NURSING CLINICAL

General

Course Prefix
NURS

Course Number
432L

Description
This course provides students the opportunity to care for children with appropriate health promotion and illness needs. These clinical hours are shared between simulation laboratory developing skills and direct patient care specific to pediatric patients and a variety of settings serving infants, children, and adolescents.

Credit Hours

Minimum Credit Hours:
0

  AND NURS4203 - MEDICAL-SURGICAL NURSING II
  AND NURS420L - MED-SURG NURS II CLINICAL
  AND NURS4212 - CARE OF THE CHILDBEARING FAMILY
  AND NURS421L - CARE OF THE CHILDBEARING FAMILY

Learning Outcomes

Learning Outcomes

Objective
Work with the interprofessional team to plan and provide transitional care to meet physical, psycho-social, spiritual, and educational needs as pediatric patients move through various levels of service including health promotion.

Name
Plan, implement and evaluate safe, effective nursing care integrating physical, psycho-social, and spiritual assessment findings; developmental stages; standards of care; and evidence-based practice to meet the needs of pediatric patients and their families.

Name
Administer medication to the pediatric patient considering physiological and psychological influence of age and developmental stage of the child and needs of the family.

Name
Adapt communication techniques and educational strategies to the developmental age of the patient.

Name
Work with the interprofessional team to plan and provide transitional care to meet physical, psycho-social, spiritual, and educational needs as pediatric patients move through various levels of service including health promotion.

NURS2011 - NURSING IN SOCIETY

General

Course Prefix
NURS

Course Number
2011

Description
This course is designed to assimilate all concepts within the three domains of Nursing: Individual, Nursing and Healthcare. Emphasis is placed on the complex alterations in health and wellness as they pertain to the three domains. Concepts related to the Individual domain includes the topics of biophysical, psychosocial, and sexuality. The Nursing domain includes aspects distinct to nursing practice and the profession. The course serves to assist the student to synthesize the many diverse and complex concepts unique to the healthcare environment related to nursing in society. Two hours of lecture provided weekly.

2013

Description
This course provides the conceptual framework to develop, implement, and evaluate nursing care to patients with mental health and/or substance abuse issues. Effective therapeutic communication techniques and the development of therapeutic relationships in multiple clinical settings are emphasized and include safe, effective psychiatric nursing care for patients across the lifespan. Clinical hours are shared between the simulation lab and direct patient care.

Simple Requirements

Course Requisite

Type
Completion Requirement

Prerequisites

Complete ALL of the following Courses:
- NURS2109 - ADULT MEDICAL-SURGICAL NURSING
- NURS3023 - ADN APPLIED PHARMACOLOGY
- BIOL2403 - INTRODUCTION TO MICROBIOLOGY
- BIOL240L - INTRODUCTION TO MICROBIOLOGY LAB

Corequisites

Enroll in the following Courses:
- NURS2016 - NURSING CARE OF THE FAMILY
- SSCI2133 - INTRODUCTION TO SOCIOLOGY
- PSYC2333 - DEVELOPMENTAL PSYCHOLOGY

Learning Outcomes

Learning Outcomes

Name
Develop plans of care which include legal and ethical guidelines for patients with mental health/substance use and abuse issues.

Name
Provide emotional support and advocacy to mental health patients and their families.

Name
Integrate legal and ethical principles into care provided to patients, including vulnerable populations.

Name
Develop appropriate therapeutic relationships with patients with mental health/substance use and abuse issues.

Name
Demonstrate therapeutic verbal and non-verbal communication techniques that are effective in caring for mental health/substance use and abuse patients and their families.

Name
Communicate effectively with members of the inter-professional team to enhance the quality of patient care.

NURS2016 - NURSING CARE OF THE FAMILY

General

Course Prefix
NURS

Course Number
2016

Description
This course prepares the student to assess, plan, implement, and evaluate care for the family prior to and throughout pregnancy, labor and delivery, post-partum care, and to the pediatric population. The nurse's role in health promotion and care during high-risk situations are both considered, as well as health promotion and illness care to infants, children, and adolescents. Clinical hours are shared between the simulation lab and direct patient care. Prerequisites: NURS 2109, NURS 3023, BIOL 2403, BIOL 240LCorequisites: NURS 2013, SSCI 2133, PSYCH 2333

NURS2019 - FUNDAMENTALS OF NURSING CARE

General

Course Prefix
NURS

Course Number
2019

Description

This course introduces the fundamentals of nursing practice, beginning with frameworks for evidenced-based nursing practice, nursing roles, and basic legal and ethical principles of care. Concepts of professional communication and documentation, safety and quality care, infection control, mobility, sleep, rest and comfort, oxygenation, nutrition, fluid and electrolytes, elimination, medication administration, and patient education are introduced using the nursing process as a framework for developing, implementing, and evaluating care. Care of the pre- and post-operative patient is also introduced. This course focuses on developing competence in nursing interventions required to deliver safe and effective patient care to stable patients with chronic illness and disease. Students practice relevant skills necessary to provide safe patient care by integrating them into simulation and patient scenarios. Clinical hours for the course are distributed between the skills labs and direct patient care.Prerequisite: Application and admittance into the ADN program BIOL 2083, BIOL 208L, CORE 1111, ENGL 1113, MATH 1213, PSYC 1133Co-requisite: BIOL 2183, BIOL 218L, CORE 1112, NURS 2223

NURS2109 - ADULT MEDICAL-SURGICAL NURSING

General

Course Prefix
NURS

Course Number
2109

Description

his course provides opportunities for students to develop beginning level competence in caring for patients with simple to intermediate chronic medical-surgical needs. This course introduces students to the care of patients with chronic medical-surgical conditions related to cardiac, respiratory, gastrointestinal, urinary, reproductive, musculoskeletal, sensory, and endocrine problems; and prepares students to develop, implement, and evaluate evidence-based nursing care to adults with simple to intermediate needs that can be met in acute and long-term care settings or in the home environment. Clinical experiences and skills development are shared between the simulation laboratory and in direct patient care that is specific to intermediate medical-surgical nursing. Prerequisite: BIOL 2183, BIOL 218L, CORE 1112, NURS 2019, NURS 2223 Co-requisite: BIOL 2403, BIOL 240L, NURS 3023, PSYC 2333

Learning Outcomes

Learning Outcomes

Name
Define health and wellness.

Name
Describe health promotion.

Name
Identify the six nutrient categories.

Name
Identify factors that influence food selection.

Name
List factors that influence body fat levels.

Name
Discuss nutrient needs across the life cycle.

Name
Explain how the nutritional status of patients may be compromised by illness.

Name
Outline the specific nutritional therapy needs of patients with various disease processes.

NURS2209 - ADVANCED NURSING CARE

General

Course Prefix
NURS

Course Number
2209

Description
This course builds on student competencies developed in NURS 2109 (Adult Medical-Surgical Nursing). Evidence-based nursing care appropriate for adults with intermediate to complex medical-surgical conditions is addressed, with particular emphasis on acute conditions such as shock and multiple organ dysfunction, acute respiratory distress or failure or other conditions requiring critical care intervention. Emergency nursing and disaster nursing are also explored. Clinical hours are shared between the simulation lab and direct patient care.Prerequisites: NURS 2013, NURS 2016, SSCI 2133Corequisites: NURS 2011, Creative aesthetic elective

NURS2223 - ADN HEALTH ASSESSMENT

General

Course Prefix
NURS

Course Number
2223

Description

This course prepares students to complete physical, psychosocial, spiritual, and cultural assessments for patients across the lifespan. The course focuses on differentiating between normal and abnormal findings. Students will develop beginning competence in performing a complete physical assessment and health history using interview, observation, palpation, and auscultation techniques. Students will also perform specialized assessments, including mental status exams, pain assessments, nutritional and cultural assessments, as well as domestic violence and substance abuse evaluations, and be able to choose assessment techniques that are appropriate in specific patient care situations. Students will practice and apply learned skills in the simulation and skills laboratory.Prerequisite: Application and admittance into the ADN program, BIOL 2083, BIOL 208L, CORE 1111, ENGL 1113 MATH 1213, PSYC 1133Co-requisite: BIOL 2183, BIOL 218L, CORE 1112, NURS 2019

NURS3003 - HEALTH ASSESSMENT

General

Course Prefix
NURS

Course Number
3003

Description

This course prepares students to complete a physical, psychosocial, spiritual, and cultural assessment for patients throughout the life span. The course focuses on differentiating between normal and abnormal findings. Students will develop beginning competence in performing a complete physical assessment and health history, using interview, observation, palpation, and auscultation techniques. They will also perform specialized assessments, including mental status exams, pain, nutritional, family and cultural assessments, as well as domestic violence and substance abuse evaluations, and be able to choose assessment techniques appropriate in specific patient care situations.Prerequisite: Acceptance into BSN ProgramCorequisite: NURS 300L, NURS 3106, NURS 310L, NURS 3223

Learning Outcomes

Learning Outcomes

Name
Discriminate among normal and abnormal health assessment findings in all body systems of an individual patient.

Name
Adapt the health assessment to the age, developmental stage, and condition of an individual patient.

Name
Select appropriate strategies to assess mental status, pain, nutritional status, spiritual health, psycho-social wellbeing, and family functioning based upon the patient situation.

Name
Determine patient needs based on an effective health assessment.

NURS3013 - NURSING HISTORY AND THEORY

General

Course Prefix
NURS

Course Number
3013

Description
This course provides an introduction of the history of nursing and the nursing theories developed throughout the eras of nursing practice. The discussion of history nursing will guide the different nursing theories discussed from Nightingale to present day. It will include the development of nursing theory including components and concepts found in nursing theories. The connections between theory and their importance for practice and the nursing profession will be discussed. This course is a synthesis of theoretical and clinical knowledge and skills for the professional baccalaureate-prepared nurse.

Learning Outcomes

Learning Outcomes

Name
Explore the history of nursing.

Name
Identify major historical aspects which have contributed to nursing theory, practice, and nursing education.

Name
Review theory development in nursing.

Name
List the components of a nursing theory.

Name
Identify the major concepts of selected nursing theories.

Name
Evaluate selected nursing theories for their potential utilization in nursing practice, education, and research.

NURS3023 - ADN APPLIED PHARMACOLOGY

General

Course Prefix
NURS

Course Number
3023

Description
This course prepares students to integrate pharmacologic principles into the care of patients and to administer drugs with consideration to safety, lifespan, cultural, legal and ethical implications. Drugs affecting cardiac, renal, respiratory, endocrine, gastrointestinal, reproductive, and central/autonomic nervous systems, as well as anti-infective, anti-inflammatory and chemotherapeutic agents are presented. Relevant nursing interventions, including patient education, are emphasized. Prerequisite: BIOL 2183, BIOL 218L, CORE 1112, NURS 2019, NURS 2223 Co-requisite: BIOL 2403, BIOL 240L, NURS 2019, PSYC 2333

NURS3106 - FOUNDATIONS NURS CARE

General

Course Prefix
NURS

Course Number
3106

Description
This course introduces the foundations of nursing practice, beginning with frameworks for evidenced-based nursing practice, nursing roles, and basic legal and ethical principles of care. The concepts of communication and documentation; safety and quality; infection control; mobility, sleep, rest and comfort; oxygenation; nutrition; fluid and electrolytes; elimination; medication administration, and patient education are introduced using the nursing process as a framework for developing, implementing, and evaluating care. Care of the pre- and post- operative patient is also introduced.Prerequisite: Acceptance into BSN ProgramCorequisite: NURS 310L, NURS 3003, NURS 300L, NURS 3223

Learning Outcomes

Learning Outcomes

Name
Apply principles of nursing care drawn from the following physiological and psychological concepts; Mobility, Infection control, Elimination, Hygiene, Oxygenation, Sensory Alterations, QSEN, Nutrition, Stress & Coping, Comfort/Pain, Fluid and Electrolytes, Genetics.

Name
Compute dosage and solution problems accurately.

Name
Implement the nursing process to plan care for patients with stable conditions.

Name
Communicate effectively with patients, significant others, and members of the interdisciplinary team.

Name
Describe the advocate role to assist patients and families/significant others as part of the care rendered.

Name
Care for patients in the pre-operative, inter-operative, and post-operative period.

Name
Meet the established school benchmark for the required Foundations of Nursing standardized examination.

Name
Demonstrate responsibility for students own actions.

NURS3124 - APPLIED PHARMACOLOGY

General

Course Prefix
NURS

Course Number
3124

Description
This course prepares students to integrate pharmacologic principles into the care of patients and to administer drugs with consideration to safety, lifespan, cultural, legal and ethical implications. Drugs affecting cardiac, renal, respiratory, endocrine, gastrointestinal, reproductive, and central/ autonomic nervous systems, as well as anti-infective, anti-inflammatory and chemotherapeutic agents are presented. Relevant nursing interventions, including patient education, are emphasized.

Learning Outcomes

Learning Outcomes

Name
Demonstrate safe the calculation and administration of medications.

Name
Assess the effects of multiple medications across the lifespan, including vulnerable populations and the effects of polypharmacy in adult and older adult patients.

Name
Apply the principles of pharmacokinetics and pharmacodynamics in planning for the administration of medications for culturally and spiritually diverse populations.

Name
Integrate legal and ethical principles of pharmacology into care provided to medical-surgical patients including vulnerable populations.

Name
Collaborate intra-professionally to assess the costs of drugs and potential issues related to health care financing, insurance, or other mechanisms to assist patients in obtaining and maintaining their medication regimens.

Name
Plan appropriate patient education consistent with the age and developmental stage of the patient including health promotion and medication awareness.

Name
Identify actual and potential adverse drug reactions and significant drug interactions of single and multiple drug regimens on patients health.

NURS3133 - PSYCHIATRIC NURSING

General

Course Prefix
NURS

Course Number
3133

Description
This course provides a conceptual framework to develop, implement, and evaluate nursing care to patients with mental health and/or substance abuse issues. Effective communication and development of therapeutic relationships in all settings are emphasized including safe, effective psychiatric nursing care for patients across the lifespan.

Credit Hours

Minimum Credit Hours:
0

Learning Outcomes

Learning Outcomes

Name
Assess the condition of patients with mental health/substance abuse issues.

Name
Consider strategies to develop, implement, and evaluate a plan of care which considers legal and ethical guidelines for patients with mental health/ substance abuse issues.

Name
Communicate and use self appropriately to develop therapeutic relationships with patients with mental health/substance abuse issues.

Name
Develop, implement, and evaluate a plan of care which considers legal and ethical guidelines for patients with mental health/substance abuse issues.

Name
Evaluate a 12-step program.

Name
Act as an advocate for patients with mental health/substance abuse issues by developing, implementing, and evaluating plans to support patients and families as they transition from one level of care to another.

Name
Collaborate with other interprofessionals to coordinate care for patients with mental health/substance abuse issues.

Name
Meet the established school benchmark for the required Psychiatric Nursing standardized examination.

NURS3144 - MEDICAL-SURGICAL NURSING I

General

Course Prefix
NURS

Course Number
3144

Description
This course introduces students to the care of patients with chronic medical-surgical conditions related to cardiac, respiratory, gastrointestinal, urinary, reproductive, musculoskeletal, sensory, and endocrine problems. This course prepares students to develop, implement, and evaluate evidence-based nursing care to adults with simple to intermediate needs that can be met in acute and long-term care settings or in the home environment.

Learning Outcomes

Learning Outcomes

Name
Consider strategies to develop, implement, and evaluate safe, evidenced-based, and effective care for selected patients with chronic medical-surgical conditions.

Name
Model care for selected patients with chronic medical-surgical conditions on comprehensive, ongoing physical, psychosocial, and spiritual assessment.

Name
Integrate legal and ethical principles into care provided to medical-surgical patients, including vulnerable populations.

Name
Plan and implement appropriate patient education and health promotion consistent with the age and developmental stage of the patient.

Name
Communicate effectively with members of the inter-professional team to enhance the quality of patient care.

Name
Demonstrate skills in using patient care technology, information systems, and communication devices to support safe, effective, and quality practices.

Name
Demonstrate competence with mathematical calculations for medication administration.

NURS3153 - RESEARCH & EBP

General

Course Prefix
NURS

Course Number
3153

Description
This course prepares students to evaluate and synthesize research data, particularly from outcomes, intervention, and translational research. Students use these skills to analyze practice protocols, making recommendations for their improvement.Prerequisite: NURS 3144, NURS 314L, NURS 3124, NURS 3133, NURS 313L OR Enrollment in RN/BSN Program Corequisite: NURS 4204, NURS 420L, NURS 4212, NURS 421L, NURS 4322, NURS 432L

Learning Outcomes

Learning Outcomes

Name
Compare and contrast types of research, suggesting ways in which each can be effective in improving nursing practice, education, and administration.

Name
Evaluate credibility of the resources used in nursing practice and scholarship.

Name
Consider ethical and legal issues related to the use of information technology, including copyright, privacy, and confidentiality.

Name
Generate nursing research questions which can expand the knowledge base upon which nursing is based.

Name
Evaluate nursing studies to determine the strengths, weaknesses, validity, reliability, generalizability, and applicability to various nursing situations.

Name
Analyze selected care protocols to determine the level of evidence upon which they are based.

NURS3203 - TRANSITION TO BSN ROLE

General

Course Prefix
NURS

Course Number
3203

Description
This course explores the BSN competencies, which differ from those of a nurse holding an associate degree. The course will focus on a deep understanding of the changing U.S. health care delivery system, including its relationship to nursing theories, standards and scope of practice, and roles and responsibilities of the nurse. The role of the nurse in policy development and political action at the employer, local, state, and national levels are emphasized.Prerequisite: Admittance to the RN-BSN Program

Learning Outcomes

Learning Outcomes

Name
Apply the 2010 Future of Nursing Recommendations from the Institute of Medicine to an analysis of past, present, and future nursing practice.

Name
Compare and contrast current conceptual and philosophical frameworks of nursing care to past and current practice.

Name
Expand the roles and responsibilities of the nurse caring for an individual patient or family to the roles associated with caring for groups of patients requiring similar care.

Name
Evaluate standards of care and care guidelines/protocols against available evidence and best practices, making recommendations as necessary.

Name
Demonstrate inquiry and analysis in applying patient care technologies and information systems to support safe nursing practice and population risk reduction.

Name
Develop a professional development plan for the next 3-5 years in response to the analysis of past, present, and future care.

NURS3214 - HEALTH ASSESSMENT FOR RN

General

Course Prefix
NURS

Course Number
3214

Description
This course builds upon the RN's current competence in physical assessment. The course focuses on increasing students' skill level in performing a complete physical examination and health history. A variety of specialized assessments, including mental status exams, pain, nutritional, family and cultural assessments, as well as domestic violence and substance abuse evaluations are considered and strategies to integrate findings into the plan of care are explored. Students complete 45 contact hours completing health assessments/health history on actual patients with mentor supervision. Prerequisites: NURS 3203

Credit Hours

Learning Outcomes

Learning Outcomes

Name
Select appropriate health assessment techniques and activities to gain a greater understanding of the patient/family/significant others needs.

Name
Integrate findings from a physical assessment and health history into a specific plan of care.

NURS3223 - ESSENTIALS OF PATHOPYSIOLOGY

General

Course Prefix
NURS

Course Number
3223

Description
This course explores the etiology, pathogenesis, clinical manifestations, and treatment of pathological disorders. This course considers the anatomy and physiology of each body system and the disease processes that may occur. The emphasis is on the clinical implication of pathophysiologic concepts and relationship to patient history, physical examination findings, lab and diagnostic studies, therapies and follow-up care.Prerequisite: Acceptance into BSN ProgramCorequisites: NURS 3003, NURS 300L, NURS 3106, NURS 310L

Learning Outcomes

Learning Outcomes

Name
Integrate the principles of pathophysiology from the following body systems to plan and implement safe, appropriate, and evidence-based nursing care:

Name
a. Oxygen Transport, Blood Flow, and Blood pressure

Name
b. Cardiac Function

Name
c. Respiratory Function

Name
d. Renal & Bladder Function

Name
e. Genital & Reproductive Function

Name
f. Gastrointestinal Function

Name
g. Endocrine Function, Metabolism, and Nutrition

Name
h. Neurology/Psychological Functioning

Name
i. Integumentary System

Name
j. Genetics

Name
Integrate pathophysiological principles into patient education.

NURS4204 - MED-SURG NURS II

General

Course Prefix
NURS

Course Number
4204

Description
This course builds on student competencies developed in NURS 3144 Med-Surg Nurs I. Evidence-based nursing care appropriate for adults with intermediate to complex medical-surgical conditions are addressed, with particular emphasis on acute conditions such as shock and multiple organ dysfunction, acute respiratory distress or failure or other conditions requiring critical care intervention. Emergency nursing and disaster nursing will also be explored.Prerequisites: NURS 3144, NURS 314L, NURS 3133, NURS 313L, & NURS 3124Corequisites: NURS 420L, NURS 4212, NURS 421L, NURS 4322, NURS 432L, & NURS 3153

Learning Outcomes

Learning Outcomes

Name
Design a plan of care in collaboration with culturally diverse patients, families, spiritual leaders, and health care providers that incorporates community resources to promote, maintain, and restore health, or provide end-of-life care.

Name
Identify strategies to develop, implement, and evaluate safe, evidence-based, ethical, culturally sensitive, and cost-effective manner for individuals, families, and groups across the lifespan.

Name
Examine moral, ethical, social, and economic issues affecting the delivery of nursing care to individuals, families, and groups, including vulnerable populations.

Name
Apply critical thinking skills to apply the nursing process to assess a patients health status, analyze and cluster data to formulate a nursing or collaborative nursing diagnosis, prioritize patient needs, identify realistic goals and outcomes, select appropriate nursing and collaborative interventions, and evaluate the effectiveness of those interventions using the outcome criteria.

Name
Plan and implement appropriate patient education consistent with the age and developmental stage of the patient including health promotion, maintenance, or end-of-life.

Name
Model professional attitudes and behaviors consistent with professional standards at entry-level practice.

Name
Determine and implement nutritional needs of the critical care client such as specialized diets, calorie counts, parenteral nutrition, and enteral nutrition.

NURS4212 - CARE OF THE CHILDBEARING FAMILY

General

Course Prefix
NURS

Course Number
4212

Description
This course prepares the student to assess, plan, implement, and evaluate care for the childbearing family prior to and through pregnancy, labor and delivery, and postpartum care. The nurse's role in health promotion and care during high-risk situations are both considered.

Credit Hours

Minimum Credit Hours:
0

Learning Outcomes

Learning Outcomes

Name
Model care on a thorough assessment including cultural implications of the childbearing family.

Name
Consider strategies to develop, implement, and evaluate safe, effective evidence-based nursing care for the childbearing family prior to and throughout the pregnancy, labor and delivery, and post-partum period.

Name
Integrate health promotion into the plan of care of childbearing families.

Name
Provide emotional support to patients and families during the childbearing years, serving as an advocate for the family as necessary.

Name
Work with members of the interprofessional team to ensure effective communication that supports safe, effective care.

Name
Provide information and support to the childbearing family facing legal and ethical issues common during the childbearing period.

Name
Provide appropriate care for the high risk situations in pregnancy, labor and delivery, post-partum and the neonatal process.

Name
Evaluate the advantages and disadvantages of various environments where intrapartal care is provided.

NURS4243 - TRANSITN NURS PRACTICE

General

Course Prefix
NURS

Course Number
4243

Description
This capstone course provides an opportunity to prepare for practice as a registered professional nurse and explore leadership roles in healthcare settings. The course explores concepts associated with leadership such as interpersonal communication, conflict, change, strategic decision making, team building, power, politics and influence, and delegation. Building upon the competencies developed in the previous semesters students will hone their clinical judgment in a variety of nursing situations. The students will prepare for the licensing process and the NCLEX examination. Prerequisite: NURS 4322, NURS 432L, NURS 4204, NURS 420L, NURS 4212, NURS 421L, & NURS 3153Corequisite: NURS 424L, NURS 4314, NURS 431L, NURS 4333

Learning Outcomes

Learning Outcomes

Name
Analyze leadership principles and processes that ensure safe, effective, and quality outcomes of patient care across the healthcare continuum.

Name
Demonstrate beginning competence in strategic decision-making, team building, and delegation as well as managing conflict and change in a health care environment.

Name
Analyze environmental and human factors such as staffing and scheduling which impact safety and quality in a nursing care unit and make recommendations as appropriate.

Name
Evaluate care provided in selected situations in light of national standards for nursing patient care making recommendations as appropriate.

Name
Demonstrate an understanding of the role and scope of practice for a professional nurse.

Name
Prepare for the NCLEX RN licensing examination and for continuing professional development for lifelong learning.

Name
Develop a resume and a plan for a job search.

Name
Examine further educational and service opportunities following graduation.

Name
Demonstrate knowledge of the Florida Nurse Practice Act and related Regulations.

Name
Meet the established school benchmark for the required Leadership and Management standardized examination.

Name
Meet the established school benchmark for the required Pharmacology standardized examination.

Name
Meet established benchmarks on the standardized exit examination.

NURS4314 - COMMUNITY NURSING

General

Course Prefix
NURS

Course Number
4314

Description
This course provides a solid foundation in community and public health nursing concepts. It examines interventions for individuals, families, and communities including health promotion and the multifaceted role of the community-oriented nurse. The focus will be on developing competence in assessing the needs of a population, developing, and implementing appropriate interventions and evaluating their effectiveness.Prerequisites: NURS 4322, NURS 432L, NURS 4204, NURS 420L, NURS 4212, NURS 421L, & NURS 3153Corequisites: NURS 431L, NURS 4243, NURS 424L, & NURS 4333

Learning Outcomes

Learning Outcomes

Name
Differentiate between care of a group or aggregate and care of an individual or family in a community setting considering the relative roles and responsibilities of the nurse in each situation.

Name
Assess predictive and protective factors including genetics to evaluate the health of groups or communities.

Name
Evaluate current public health needs of the community, state, and nation while exploring the nurses role in meeting these needs.

Name
Examine the impact of changes in the US healthcare system upon the role of the nurse and other health care providers including potential outcomes for consumers of care.

Name
Explore the roles and responsibilities of the nurse in non-acute hospital settings.

Name
Use an ethical framework to evaluate the impact of social policy on health care particularly regarding vulnerable populations.

NURS4322 - PEDIATRIC NURSING

General

Course Prefix
NURS

Course Number
4322

Description
This course focuses on child development and health promotion as well as evidence-based nursing care for specific health problems common to children from infants to adolescents. It prepares students to provide nursing care to all children in a variety of care settings.

Credit Hours

Minimum Credit Hours:
0

Maximum Credit Hours:

Learning Outcomes

Learning Outcomes

Name
Consider strategies to develop, implement, and evaluate safe, effective nursing care integrating physical, psycho-social, and spiritual assessment findings; developmental stages; standards of care and practice; and evidence-based practices to meet the needs of pediatric patients and their families.

Name
Examine care required for patients with genetic disorders including their families and significant others.

Name
Integrate health promotion and disease prevention strategies into the care of infants, children and adolescents and their families.

Name
Meet or exceed established benchmarks on the standardized Pediatric examination.

NURS4333 - QUALITY AND SAFETY

General

Course Prefix
NURS

Course Number
4333

Description
This course explores the concepts of quality and safety in healthcare, including evidence-based care, nurse-sensitive indicators, patient centered care, working conditions, and patient safety and quality tools. Students learn strategies to collect and analyze data related to the safety and quality of selected processes and recommend changes as necessary.Prerequisite: Acceptance into BSN or RN/BSN Program Corequisite: None

Learning Outcomes

Learning Outcomes

Name
Evaluate patient safety and quality standards and national reports.

Name
Synthesize principles of quality management into all components of nursing practice.

Name
Analyze factors and evidence, which influence safety and quality in healthcare.

Name
Use nurse-sensitive indicators as a framework for evaluating care in a selected acute care facility.

Name
Explore patient safety and quality tools to improve care provided to patients.

NURS4404 - NURSING LEADSHIP & MGMT

General

Course Prefix
NURS

Course Number
4404

Description
This course introduces the roles of provider of care, designer/manager/ coordinator of care, and a member of the profession in the context of healthcare organizations. The course explores concepts associated with leadership, such as interpersonal communication, conflict, change, strategic decision-making, team building, power, politics and influence, and delegation. The competencies for a first-line manager examined budgeting, staffing, scheduling, and other human relations functions. The competencies of a first-line manager in budgeting, staffing, scheduling, and other human relations functions are also explored. Students will spend 90 hours in leadership and manager activities related to developing a project with a nursing leader.Prerequisite: NURS 3203, NURS 3214, NURS 2113, NURS 3013, NURS 3153, NURS 4333, & NURS 4415Co-requisite: NURS 4502

Learning Outcomes

Learning Outcomes

Name
Analyze leadership principles and processes that ensure safe, quality outcomes of patient care across the health care continuum.

Name
Demonstrate beginning competence in strategic decision-making, team building, delegation and managing conflict and change in a health care environment.

Name
Demonstrate basic knowledge of health care law and policy, finances, reimbursement mechanisms and the regulatory environment in the assessment of organizational care delivery.

Name
Analyze environmental and human factors, such as staffing and scheduling, which impact safety and quality in a nursing care unit, making recommendations as appropriate.

Name
Evaluate care provided in selected situations in light of national standards for nursing patient care, making recommendations as appropriate.

Name
Use aggregate data from decision support tools to develop programs that positively impact a group of patients.

Name
Integrate leadership principles and processes in actual organizational systems to ensure safe, quality outcomes of patient care across the health care continuum.

Name
Portray professional values when providing competent, compassionate, culturally sensitive, and individualized care across the health care continuum.

Name
Manage patient care technologies and information management systems when delivering care across the health care continuum.

Name
Contribute to the development of a process or protocol designed to improve patient care to groups of patients.

NURS4415 - COMMUNITY NURSING RNBSN

General

Course Prefix
NURS

Course Number
4415

Description
This course provides a solid foundation in community and public health nursing concepts; interventions for individuals, families, and communities; health promotion; and the multifaceted role of the community-oriented nurse. The focus will be on developing competence in assessing the needs of a population, developing and implementing appropriate interventions and evaluating their effectiveness. They will spend 90 hours preparing a project to provide care to a group of patients, assessing needs, then developing, implementing, and evaluating an appropriate intervention(s). Students also care for individual clients within a community setting, with particular attention to strategies to support patients as they transition from one level of care to another. This course is for the RN-to-BSN program only. Prerequisites: NURS 3203, NURS 3214, NURS 2113, NURS 3013

Learning Outcomes

Name
Differentiate between care of a group or aggregate and care of an individual or family in a community setting, considering the relative roles and responsibilities of the nurse in each situation.

Name
Assess predictive and protective factors, including genetics, to evaluate the health of groups or communities.

Name
Evaluate current public health needs of the local, state, and nation, and explore the nurses role in meeting these needs.

Name
Analyze the impact of changes in the US health care system upon the role of the nurse and other health care providers, as well as potential outcomes for consumers of care.

Name
Explore the roles and responsibilities of the nurse in non-acute hospital settings.

Name
Use an ethical framework to evaluate the impact of social policy on health care, particularly regarding vulnerable populations.

Name
Complete a comprehensive needs assessment for an identified group, including access, availability and cost of identified health care services and make appropriate recommendations.

Name
Develop and/or evaluate a process of care for a group, based upon a related needs assessment, standards of care and practice, appropriate evidence and other relevant factors.

Name
Demonstrate ability to assist patients/families/significant others as they transition through levels of care.

Name
Participate in clinical prevention and population-focused interventions with attention to effectiveness, efficiency, and equity.

Name
Use evidence-based practices to guide health teaching, health counseling, screening outreach, disease and outbreak investigation, referral and follow-up throughout the life span.

NURS4502 - CAPSTONE PROJECT

General

Course Prefix
NURS

Course Number
4502

Description
This course is a synthesis of theoretical and clinical knowledge and skills for the professional baccalaureate-prepared nurse. This course focuses on critical thinking, professional collaboration, and level of practice. It provides the opportunity to develop a philosophy of nursing statement as well as reconstructing a professional CV/Resume as well as generating a professional e-Portfolio.

Learning Outcomes

Learning Outcomes

Name
Analyze the various roles of a professional nurse.

Name
Demonstrate beginning competence in strategic decision-making; team building; delegation; and conflict resolution in a changing healthcare environment.

Name
Analyze environmental and human factors, such as staffing and scheduling, which affect safety and quality of nursing care.

Name
Evaluate care provided in selected situations and compare to national standards of care.

Name
Integrate leadership principles and processes in actual organizational systems to ensure safe quality outcomes for patients across the healthcare continuum.

NURS5002 - QUALITY INITIATIVE: RISK MANAGEMENT

General

Course Prefix
NURS

Course Number
5002

Description
This course focuses on the trending of staff and patient quality, safety, and risk management data using performance improvement tools and analyzing the future direction of the health care organization. (Includes 50 practicum hours)Prerequisite: NURS 5003; NURS 5013; NURS 5023; MATH 509

Learning Outcomes

Learning Outcomes

Name
Use health informatics, research, and evidence to evaluate the safety, quality, and cost effectiveness of patient care.

Name
Discover methods, tools, performance measures, and standards related to quality for outcomes improvement.

Name
Review healthcare delivery models that focus on a team-oriented approach to patient care to provide coordinated care with easily measured outcomes.

Name
Explore performance and quality improvement methods that underlie value-based nursing care.

Name
Discover the foundation of clinical information collection, processing, and recording used to support decision-making in healthcare environments.

Name
Review the requirements for compliance with regulatory standards, safety, and emerging informatics initiatives.

Name
Examine the principles of business planning and finance, care delivery models, and risk management, especially with the care of vulnerable populations.

NURS5003 - ADVANCED PRACTICE ROLES IN NURSING

General

Course Prefix
NURS

Course Number
5003

Description
This course facilitates the transition of the professional nurse to the advance practice role. Emphasis is placed on effective communication as a member of an interprofessional team; strategies to promote change in the healthcare system; and leadership skills necessary to deliver high quality & culturally competent health care. Students will understand the underpinnings that provide an ethical framework for nursing practice; exploring and analyzing how values shape professional practice and influence decisions, interventions, and patient outcomes.Prerequisite: Admission to MSN Program

Learning Outcomes

Learning Outcomes

Name
Conduct and in-depth analysis of emerging nursing roles within the context of the global healthcare system.

Name
Explore the core competencies and essential characteristics of the advanced practice nurse in the role of leader or educator.

Name
Discover evidence-based strategies to facilitate interprofessional collaboration on teams.

Name
Gather and analyze data to identify patients and populations at risk and recommend policy changes to improve health outcomes.

NURS5004 - ADVANC HEALTH ASSESS, PATHOPH & PHA

General

Course Prefix
NURS

Course Number
5004

Description
Study of normal physiologic and pathologic mechanisms of disease, comprehensive physical assessment and pharmacotherapeutics. Assessment, diagnosis, and management of patient's common health problems in a safe, high-quality, cost-effective manner. Analysis of an in-depth health history, including signs and symptoms, developmental stages and psychosocial and cultural characteristics.Prerequisite: NURS 5003; NURS 5013; NURS 5023; MATH 5093

Learning Outcomes

Learning Outcomes

Name
Examine pathophysiologic mechanisms in complex disease states with an emphasis on advanced assessment strategies and pharmacologic interventions to maximize patient outcomes.

Name
Identify and discuss specific disease processes and pharmacological considerations in a case scenario format.

Name
Correlate changes and disruptions in major physiological systems and pathophysiological mechanisms with clinical data resulting from physical examination, laboratory data, and diagnostic test data with anticipated pharmacologic treatment.

Name
Utilize critical inquiry and judgment to design patient educational materials focusing on health promotion, health protection, disease prevention and management across diverse healthcare delivery settings.

Name
Synthesize knowledge of health assessment, pharmacology and pathophysiology to develop evidenced-based, cost-effective plans of care taking into consideration life circumstances, cultural, ethnic, and developmental variations.

NURS5013 - INFORMATION SYSTEMS AND TECHNOLOGY

General

Course Prefix
NURS

Course Number
5013

Description
This course will prepare the nurse to coordinate, integrate and translate technologies, including the electronic health record, policies governing privacy, confidentiality, and security as it relates to complex decision making and the promotion of safe, quality and effective care.Prerequisite: Admission to MSN Program

Credit Hours

Minimum Credit Hours:

Learning Outcomes

Learning Outcomes

Name
Demonstrate basic principles of nursing informatics to enhance evidenced-based outcomes, patient education and improve advanced nursing practice.

Name
Identify and describe ethical and legal issues within healthcare systems relating to the use of information, information technology, communication networks, and patient care technology using key data informatics standards.

Name
Analyze critical elements of meaningful use as it applies to the electronic health record (EHR) in the collection, storage, classification, access and transmission of health data.

Name
Apply concepts from theoretical frameworks to the development, implementation, and evaluation of health information systems.

Name
Design, select, and use programs that evaluate and monitor patient outcomes, care systems, and quality improvement including consumer use of healthcare information.

Name
Evaluate processes, systems, and utilize current technology to positively influence patient outcomes and quality improvement measures.

NURS5014 - NSG EDU IN ACADEMIC & CLINICAL

General

Course Prefix
NURS

Course Number
5014

Description
This course focuses on both classroom and clinical teaching in nursing, integrating core competencies and best teaching practices. Construction of learning plans, measurement of the principles of reliability and validity of test construction, assessment of skill acquisition, competence, and interpretation of results are included. (Includes 50 practicum hours)Prerequisite: NURS 5003; NURS 5013; NURS 5023; MATH 5093

Learning Outcomes

Learning Outcomes

Name
Examine the role of the nurse educator in the clinical and academic setting.

Name
Analyze the role of health literacy and its impact on health education.

Name
Identify appropriate learning theories suitable for different learner populations that addresses their age, gender, socioeconomic, health and cultural educational needs.

Name
Examine ethical, legal, philosophical, social, political, and cultural forces that influence the development of educational materials suitable for the learner population being addressed.

Name
Plan engaged learning experiences in an academic and clinical areas of specialization that will guide nursing students to obtain designated course objectives.

Name
Construct evaluation methods in a nursing area of clinical specialization measuring competency and clinical reasoning skills, consistent with learning outcomes, level of student, and purpose.

NURS5023 - NURSING THEORY & RESEARCH

General

Course Prefix
NURS

Course Number
5023

Description
This course explores the scientific and philosophical foundations of nursing practice. Principles of theory development are applied toward critiquing theories from nursing and related fields. This course also focuses on quantitative and qualitative research designs, methods of appraisal, and research from the evidenced-based practice (EBP) paradigm.Prerequisite: NURS 5003; NURS 5013

Learning Outcomes

Learning Outcomes

Name
Apply concepts learned from the liberal arts, sciences, and professional nursing experience to synthesize the definition of nursing theory.

Name
Appraise nursing theories and conceptual frameworks as a foundation for affecting the comprehensive health care provided to diverse populations and communities.

Name
Critique a nursing theory and its application in nursing education, nursing. administration, research, and health policy.

Name
Compare and contrast methods of appraisal used in nursing research.

Name
Analyze qualitative and quantitative research data.

NURS5033 - TEACHING STRATEGIES FOR NURSING EDU

General

Course Prefix
NURS

Course Number
5033

Description
This course emphasizes the development and implementation of teaching and learning strategies; approaches are designed to promote productive and effective achievement of learner outcomes in a variety of settings.
Prerequisite: NURS 5003; NURS 5013; NURS 5023; MATH 5093

Credit Hours

Learning Outcomes

Learning Outcomes

Name
Assemble evidence-based resources to guide teaching strategies.

Name
Evaluate the expected outcomes of various teaching strategies.

Name
Explore teaching strategies which promotes advancement in knowledge among different learning styles.

NURS5043 - CURRICULUM DESIGN & DEVELOPMENT

General

Course Prefix
NURS

Course Number
5043

Description
This course examines the development of curricula in nursing education, focusing on the methods of curriculum development and improvement processes in a variety of settings. The relationship of nursing curriculum to the parent institution's mission and philosophy is analyzed. Students will also explore methods of curriculum design, examine curricular frameworks, and apply best practices to curricular evaluation.Prerequisite: NURS 5003; NURS 5013; NURS 5023; MATH 5093

Credit Hours

Minimum Credit Hours:

Learning Outcomes

Learning Outcomes

Name
Examine outcomes of past, current and innovative trends on curriculum development.

Name
Compare applicable research literature and theories to guide course development.

Name
Formulate methods of curriculum development relevant to classroom and clinical settings.

Name
Evaluate student learning associated to curriculum design.

Name
Interpret needs of relevant stakeholders to guide course development.

Name
Distinguish curriculum development and its association to the mission and philosophy of the parent institution.

NURS5053 - ASSESS & EVAL STRAT FOR NURSING ED

General

Course Prefix
NURS

Course Number
5053

Description
This course focuses on the process of assessment and evaluation of learning. It emphasizes formative and summative assessment of learning outcomes, including methods for program evaluation to promote compliance with relevant standards, accountability, and criteria for evaluation. Accreditation, standards of professional nursing practice, and legal/ethical issues are analyzed within the context of curriculum development and program evaluation.Prerequisite: NURS 5003; NURS 5013; NURS 5023; MATH 5093

Learning Outcomes

Learning Outcomes

Name
Design a program evaluation plan.

Name
Examine the criteria for evaluations as compliant to accrediting agencies standards.

Name
Analyze and assess program evaluation plans utilized to assess nursing education programs and address essential concerns in the nursing profession.

Name
Implement evidence-based practice in the formation and assessment process throughout the programs.

Name
Identify the advanced practice nurses role in formation and evaluation of nursing education programs.

NURS5063 - ADVANCED NURSING PRACTICUM/CAPSTONE

General

Course Prefix
NURS

Course Number
5063

Description
The purpose of the role practicum experience is to operationalize theoretical principles within the graduate's specialty area of practice, applying acquired knowledge and skills in supervised diverse professional settings. The capstone provides the student an opportunity to synthesize and integrate concepts learned throughout the educational experience. (Includes 90 practicum hours)Prerequisite: NURS 5003; NURS 5013; NURS 5023; MATH 5093; NURS 5004; NURS 5033; NURS 5043; NURS 5053; NURS 5014

Learning Outcomes

Learning Outcomes

Name
Integrate knowledge from a variety of disciplines to support and improve nursing practice in diverse healthcare settings.

Name
Communicate, collaborate, and consult with interdisciplinary teams to deliver and/or coordinate direct and/or indirect care for populations to promote health and improve healthcare outcomes.

Name
Utilize ethical principles and critical decision-making skills to function as a leader and advocate to assess, plan, and deliver evidence-based preventative care to populations while providing culturally appropriate care.

Name
Design nursing strategies to solve clinical problems and improve patient care through the integration of knowledge from practice, theory, and research.

Name
Appraise theories and conceptual frameworks from nursing and related disciplines as a foundation for implementing change in nursing and applies research outcomes within practice.

Name
Compose a plan for professional development and lifelong learning that will continue to advance the level of nursing knowledge.

NURS5073 - ADVANCED LEADERSHIP AND MANAGEMENT

General

Course Prefix
NURS

Course Number
5073

Description
This course is designed for the advanced practice nurse to synthesize knowledge and leadership skills that will result in practice and/or policy change at the local, state, federal or national levels. Ethical and legal concerns related to the nursing leadership role are explored while applying organizational theories within a framework of systems thinking.Prerequisite: NURS 5003; NURS 5013; NURS 5023; MATH 5093

Learning Outcomes

Learning Outcomes

Name
Analyze leadership models and theories and organizational frameworks for systems change applicable to nursing in clinical practice, clinical teaching and healthcare systems.

Name
Discuss how current issues in sociocultural, political and legal forces influence nursing leadership initiatives and priorities.

Name
Develop an ethical framework that promotes professional and ethical conduct for the nurse leader applicable to making decisions in todays health care organizational culture.

Name
Design leadership and management strategies to effectively manage conflict and change within the health care environment.

Name
Describe and discuss policies developed and strategies employed in the advanced nursing practice role that foster interprofessional collaboration in improving health outcomes.

Name
Evaluate the impact of leadership style, behaviors, collaborative abilities, and assessment of interpersonal skills and emotional intelligence on nursing leadership success.

Learning Outcomes

Learning Outcomes

Objective
Outline the roles of the professional counselor in advocating on behalf of, and with, individuals receiving counseling services to address systemic, institutional, architectural, attitudinal, disability, and social barriers that impede access, equity, and success.

Name
Describe historical, societal, cultural, economic, and advocacy dimensions of professional counseling.

Name
Differentiate the philosophical foundation of the counseling profession from other helping professions.

Name
Identify the variety of settings and work roles in which counselors are employed.

Name
Describe the counseling roles, functions, techniques, and professional identities appropriate in various settings.

Name
Analyze current trends, legislation, and public policies relevant to professional counseling and specialized practice areas.

Name
Employ self-care, self-awareness, and self-evaluation strategies for ethical and effective practice.

Name
Engage in professional counseling organizations and understand the importance of utilizing membership benefits, activities, and service opportunities.

Name
Understand the role and process of the counselor as an advocate of the counseling profession.

Name
Outline the roles of the professional counselor in advocating on behalf of, and with, individuals receiving counseling services to address systemic, institutional, architectural, attitudinal, disability, and social barriers that impede access, equity, and success.

PCOU5013 - COUNSELING THEORIES & PRACTICES

General

Course Prefix
PCOU

Course Number
5013

Description
This course examines the various theoretical approaches and techniques utilized in the practice of counseling and psychotherapy. Attention will be given to a comprehensive understanding of each theory.Prerequisite: PCOU 5003

Prerequisites

Complete ALL of the following Courses:

- PCOU5003 - FOUNDATIONS OF COUNSELING

Learning Outcomes

Learning Outcomes

Objective
Articulate how the major counseling theories interact with the basic tenets of the Christian faith on a philosophical and spiritual level.

Name
Identify and explain the major theoretical approaches utilized in professional counseling.

Name
Describe the history and philosophical foundations of each theoretical approach.

Name
Explain how each theoretical approach guides counselors in conceptualizing their clients needs and how to intervene effectively.

Name
Identify personal beliefs about the process of change, integrate those beliefs with appropriate theoretical approaches, and develop a personal philosophy of counseling.

Name
Explain the nature of human behavior and behavior change as presented in the major theoretical approaches to enhance effective case analysis and treatment goals.

Name
Identify and demonstrate the techniques, strategies, and practices suggested by each theoretical approach as a means of implementing change.

Name
Analyze the roles of racial, ethnic, cultural, socioeconomic status, age, gender, sexual orientation, religious and spiritual beliefs, physical and mental status, and equality issues in counseling theories.

Name
Articulate how the major counseling theories interact with the basic tenets of the Christian faith on a philosophical and spiritual level.

PCOU5023 - RESEARCH METHODS

General

Course Prefix
PCOU

Course Number
5023

Description
This course introduces students to the research process in counseling (and related social sciences). It is designed to enable students to understand concepts, purposes, and methods that are fundamental to conducting systematic inquiry and appropriate application to practice.Prerequisites: PCOU 5003

Credit Hours

Minimum Credit Hours:

Learning Outcomes

Learning Outcomes

Objective
Analyze, interpret, and apply the results of research, evaluation, and follow-up.

Name
Describe the major types of research designs used in counseling

Name
Discuss sampling techniques and other design strategies, the meaning of statistical inference, the use and interpretation of statistical tests, and the process of scientific inquiry.

Name
Critique research studies in counseling

Name
Describe how research informs the counseling profession and practice.

Name
Apply the principles, models, and usage of needs assessment and program evaluation in order to use research findings to effect program modifications.

Name
Analyze, interpret, and apply the results of research, evaluation, and follow-up.

PCOU5033 - GROUP THEORY & COUNSELING

General

Course Prefix
PCOU

Course Number
5033

Description
The course examines group counseling theory and types of groups, as well as descriptions of group practices, methods, various approaches, dynamics, and facilitative skills for various group settings. Group participation is required in this course.Prerequisites: PCOU 5003 and PCOU 5043

Complete ALL of the following Courses:

- PCOU5003 - FOUNDATIONS OF COUNSELING
  AND PCOU5043 - COUNSELING SKILLS LAB

Learning Outcomes

Learning Outcomes

Objective
Describe the ethical and professional guidelines for group leaders.

Name
Analyze group dynamics, group process, developmental stages, and group members roles and behaviors related to group counseling.

Name
Describe the major tenets of the various theories of group therapy.

Name
Identify the main factors that facilitate therapeutic change within a group counseling context.

Name
Discuss group leadership and facilitation approaches, including characteristics of varying group leaders.

Name
Identify the therapists basic tasks and role in the group process.

Name
Apply appropriate assessment techniques to conduct a screening interview to determine group member selection.

Name
Evaluate personal characteristics that influence group dynamics as both a group leader and a group member.

Name
Describe the ethical and professional guidelines for group leaders.

PCOU5043 - COUNSELING SKILLS LAB

General

Course Prefix
PCOU

Course Number
5043

Description
This course provides a laboratory setting in which students master basic skill sets that are fundamental for effective communication, advanced counseling, and therapy. The course allows students the opportunity to create, discover, and/or examine and expand their personal counseling style through deep investigation of both self and the professional literature. A primary focus is on being more conscious and intentional in interpersonal communication and subsequently in the counseling process. Co-Requisite: PCOU 5003 and PCOU 5043

Learning Outcomes

Learning Outcomes

Objective
Examine ethical and legal issues relevant to establishing and maintaining counseling relationships across various service-delivery modalities.

Name
Demonstrate competent interviewing, attending, supportive, challenging, and empathic listening skills in the counseling process.

Name
Display appropriate use of questions to elicit client information and responses.

Name
Demonstrate careful observational skills.

Name
Apply culturally responsive strategies to establish and maintain the counseling relationship across service-delivery modalities.

Name
Utilize counseling strategies and techniques to facilitate client change, while adapting the counseling process to client culture, context, abilities, and preferences.

Name
Elicit and reflect meaning to explore clients values and beliefs.

Name
Identify client concerns and conflicts.

Name
Apply techniques to cooperatively develop counseling goals with a client.

Name
Examine ethical and legal issues relevant to establishing and maintaining counseling relationships across various service-delivery modalities.

PCOU5053 - HUMAN GROWTH & DEVELOPMENT

General

Course Prefix
PCOU

Course Number
5053

Description
This course examines the nature and needs of individuals at all developmental levels. Areas such as human behavior, personality development, family relations, and life cycle issues are emphasized as a basis for understanding the counseling process.Prerequisites: None Co-Requisite PCOU 5003 and PCOU 5043

Learning Outcomes

Objective
Develop and apply a personal framework of optimal development to personal goals and objectives.

Name
Describe the various areas of physical, mental, social, and emotional development over the course of the human life-span.

Name
Summarize the major theories of human growth and development, including psychosexual stages of development, cognitive stages of development, moral stages of development, and psychosocial stages of development.

Name
Apply a theoretical understanding of the stages of life in counseling settings.

Name
Describe the impact of trauma and crisis across the life-span.

Name
Develop and articulate a personal theory of how to promote optimal development; physical, cognitive, affective, and socioemotional for individuals and families across the life-span.

Name
Apply their own personal theory of optimal development; physical, cognitive, affective, and socioemotional to their personal goals and objectives.

Name
Develop and apply a personal framework of optimal development to personal goals and objectives.

PCOU5063 - COMMUNITY COUNSELING

General

Course Prefix
PCOU

Course Number
5063

Description
This course examines counseling practices in relation to adults, children and adolescents in the community setting and the role and function of the counselor as a partner and advocate in the community. Focus is on available resources, collaboration, developmental needs, and age-related issues. Special problems of physical and sexual abuse, substance abuse, suicide and grief are examined.Prerequisites: PCOU 5003

Objective
Determine ethical and culturally sustaining strategies for conducting, interpreting, and reporting results of a community program evaluation

Name
Describe the roles of mental health counselors/professionals and their relationship to interdisciplinary teams.

Name
Identify the impact of crisis and trauma on individuals and communities.

Name
Describe the practices of community advocacy, prevention, intervention, and crisis response.

Name
Describe suicide prevention and intervention strategies.

Name
Identify and describe various community service networks in the local community.

Name
Describe and apply effective approaches to administration, budgeting, and management of mental health services.

Name
Develop an intervention plan for community counseling including a comprehensive needs assessment, a plan for implementation, and evaluation process.

Name
Determine ethical and culturally sustaining strategies for conducting, interpreting, and reporting results of a community program evaluation

PCOU5073 - PROFESSIONAL ETHICS

General

Course Prefix
PCOU

Course Number
5073

Description
This course examines goals and objectives of professional counseling organizations, codes of ethics, standards of preparation, certification, licensing, and impact of legislation. The role identity of counselors, impact of supervision and self-reflection and self-evaluation are addressed. The impact of technology and other trends that affect ethical and legal implications within the counseling profession are considered. Prerequisites: PCOU 5003

Objective
Develop a personal model of ethical decision-making and apply the model to commonly faced issues in clinical practice.

Name
Demonstrate an understanding of the major ethical and legal issues and trends related to the counseling profession.

Name
Compare and contrast the relevant ethical codes of professional organizations and credentialing bodies.

Name
Apply counseling and state board ethical and legal codes to common clinical situations to engage in ethical decision-making when appropriate.

Name
Describe professional credentialing, including certification, licensure, and accreditation, and the effects of public policy on these credentials and clinical practice.

Name
Identify models and ethics of counseling supervision and consultation.

Name
Develop a personal model of ethical decision-making and apply the model to commonly faced issues in clinical practice.

PCOU5083 - PSYCHOPATHOLOGY & DIAGNOSIS IN COUN

General

Course Prefix
PCOU

Course Number
5083

Description
This course is designed to prepare students to assess and diagnose specific clinical problems (i.e., anxiety disorders, personality disorders, mood disorders) as defined by the most recent edition of the Diagnostic Statistical Manual of Mental Disorders. The focus will be on assessment, diagnosis, differential diagnosis, decision-making, and evidence-based interventions in counseling.Prerequisites: PCOU 5003 and PCOU 5043

Learning Outcomes

Objective
Identify etiology, predominant dynamics, and treatment approaches for dysfunctional sexual behavior.

Justification
Describe the personal and social dynamics regarding the relationship of human sexuality and violence.

Name
Describe the influence of the family and developmental social and cultural variables on an individuals gender and sexual values, attitudes, and behavior.

Name
Analyze major variables and dynamics to be considered when providing gender and sexuality related counseling to individuals and couples.

Name
Identify the biological, physiological, interpersonal, cognitive, emotional, and social variables that affect sexual health and functioning.

Name
Identify etiology, predominant dynamics, and treatment approaches for dysfunctional sexual behavior.

Name
Describe the personal and social dynamics regarding the relationship of human sexuality and violence.

PCOU5103 - PRACTICUM

General

Course Prefix
PCOU

Course Number
5103

Description

This course will give students experience providing counseling and counseling-related services in an approved setting under a licensed or certified supervisor. Appropriate supervision must be available on site. Students complete supervised counseling practicum experiences that total a minimum of 100 clock hours over a full academic term that is a minimum of 10 weeks including at least 40 clock hours of direct service with actual clients that contributes to the development of counseling skills. Practicum students have weekly interaction with supervisors that averages one hour per week of individual and/or triadic supervision and participate in an average of 1½ hours per week of group.Prerequisites: PCOU 5003, PCOU 5013, PCOU 5043, PCOU 5073, PCOU 5083, PCOU 5263

  AND PCOU5083 - PSYCHOPATHOLOGY & DIAGNOSIS IN COUN
  AND PCOU5263 - TREATMENT PLANNING IN COUNSELING

Learning Outcomes

Learning Outcomes

Objective
Demonstrate the necessary skills for establishing working relationships with clients, colleagues, consultants, and supervisors.

Name
Develop rapport and an effective therapeutic relationship with client(s), and use basic counseling skills effectively.

Name
Identify client concerns and cooperatively develop counseling goals with clients.

Name
Apply a counseling approach consistent with personal values, traits, and theoretical orientation.

Name
Develop a critical awareness of ones own counseling performance and utilize feedback from supervision and consultation to enhance professionalism in counseling.

Name
Apply appropriate documentation procedures in counseling records and reports in a way that meets the standards of the counseling site, the practicum course, and the state in which the student is working.

Name
Apply the American Counseling Association's Code of Ethics in a way that shows ethical reasoning.

Name
Discuss the various counseling, consulting, and assessing functions performed by professional counselors in the context of their practicum site.

Name
Demonstrate the necessary skills for establishing working relationships with clients, colleagues, consultants, and supervisors.

PCOU5113 - INDIVIDUAL EVALUATION & ASSESSMENT

General

Course Prefix
PCOU

Course Number
5113

Description
This course examines the various frameworks for understanding the individual, including methods of data collection and interpretation, and the application and use of assessment data in the counseling profession. Individual and group testing, case study approaches, and the study of individual differences are addressed. Cultural, ethnic, and gender issues are considered.Prerequisite: PCOU 5003

Prerequisite

Complete ALL of the following Courses:

- PCOU5003 - FOUNDATIONS OF COUNSELING

Learning Outcomes

Learning Outcomes

Objective
Identify how age, race, gender, sexual orientation, ethnicity, language, disability, culture, spirituality, and other social and cultural factors relate to the assessment and evaluation of individuals in counseling.

Name
Understand the historical significance and meaning of assessment within case conceptualization, diagnosis, and treatment in counseling.

Name
Explain basic concepts of standardized and non-standardized testing and other assessment techniques such as norm-referenced and criterion-referenced assessment, environmental assessment, performance assessment, inventory methods, and behavioral observations.

Name
Evaluate the ethical and legal considerations for selecting, administering, and interpreting assessments and evaluation instruments.

Name
Apply culturally sustaining and developmentally appropriate assessments for diagnostic and intervention planning purposes.

Name
Apply statistical concepts, including scales of measurement, measure of central tendency, indices of variability, shapes and types of distributions, and correlations to assessment processes.

Name
Evaluate the validity and reliability of tests and measurements.

Name
Articulate knowledge of issues and trends in testing and evaluation as they relate to the work of the counselor.

Name
Demonstrate competence in communicating assessment results to clients in a developmentally appropriate and culturally-aware manner.

Name
Identify how age, race, gender, sexual orientation, ethnicity, language, disability, culture, spirituality, and other social and cultural factors relate to the assessment and evaluation of individuals in counseling.

PCOU5123 - SOCIAL&CULTURAL FOUNDATIONS IN COUN

General

Course Prefix
PCOU

Course Number
5123

Description
This course examines the impact of the cultural context of relationships and provides an analysis of the issues and trends related to a multicultural society. This course examines some of the major diverse groups in the United States and the implications of diversity for counseling practice.Prerequisites: PCOU 5003 and PCOU 5043

Learning Outcomes

Objective
Apply principles of independence, self-empowerment, and access to services both inside and outside the counseling relationship.

Name
Identify the influence of heritage, cultural identities, attitudes, values, beliefs, understandings, within-group differences, and acculturative experiences on individuals' worldviews and help-seeking/coping behaviors.

Name
Apply major theories and models of multicultural counseling, social justice, and advocacy to counseling individuals with diverse identities and needs.

Name
Describe the socio-cultural influences, including public policies, social movements, and cultural values, on an individual's wellness.

Name
Discuss the effects of oppression, racism, privilege, discrimination, violence and stereotyping on counselors and clients.

Name
Describe how personal cultural identity development, values, biases, and worldview are experienced within a community and/or school setting.

Name
Develop an ongoing commitment to exploring multicultural issues and promoting understanding and acceptance of diverse populations.

Name
Apply ethical guidelines, developed by professional counseling organizations, to social justice efforts, advocacy engagement, and counseling individuals with diverse identities.

Name
Examine the role of religion and spirituality in clients' and counselors' psychological functioning.

Name
Identify the effects of poverty, income disparities, and health disparities toward people with marginalized identities and develop strategies for eliminating barriers, prejudices, and oppression.

Name
Understand the effects of historical events, multigenerational trauma, and current issues on diverse groups.

Name
Apply principles of independence, self-empowerment, and access to services both inside and outside the counseling relationship.

PCOU5133 - CAREER & LIFESTYLE DEVELOPMENT

General

Course Prefix
PCOU

Course Number
5133

Description
This course examines such areas as vocational choice theory, the relationship between choice and lifestyle, sources of occupational and educational information, approaches to career decision-making processes, and career development exploration techniques.Prerequisites: PCOU 5003 and PCOU 5043

Objective
Analyze the interrelationships between work, socioeconomic standing, wellness, disability, trauma, relationships, and other life roles and factors.

Name
Demonstrate an understanding of the significant tenets of major theories of career development and career decision-making models.

Name
Administer and interpret assessment instruments, including computer-based or assisted career applications, strategies, and guidance systems relevant to career planning and decision-making.

Name
Apply developmentally responsive strategies for empowering individuals to engage in culturally sustaining career/educational development and employment.

Name
Identify state and national legislation programs impacting the practice of career counseling for marginalized groups, and apply advocacy strategies for employment and educational support.

Name
Demonstrate awareness of vocational, educational, and labor market information resources available, including visual and print media and computer-based career information systems.

Name
Understand ethical and legal issues involving career counseling, career assessment, and computers as tools in counseling.

Name
Create a career development program (including organization, implementation, administration, and evolution) for a particular setting (e.g., school or community agency), based on specific goals for the population.

Name
Analyze the process of educational decision-making with career and postsecondary training readiness.

Name
Analyze the interrelationships between work, socioeconomic standing, wellness, disability, trauma, relationships, and other life roles and factors.

PCOU5143 - ADDICTIONS COUNSELING

General

Course Prefix
PCOU

Course Number
5143

Description
This course examines the motivation, addiction, and behavior patterns of the substance user. Different approaches to substance abuse counseling will be investigated. A portion of the course will be devoted to substance abuse assessment, and the evaluation of the series and programs available to the substance user and the impacts on society. Process addictions will be addressed. Prerequisites: PCOU 5003 and PCOU 5043

Activity
Identify the bio-psycho-social-spiritual contributors to substance abuse and addiction.

Objective
Describe theories and neurobiological etiology of addictions.

Name
Distinguish between the use, abuse, and dependency of alcohol and other drugs.

Name
Identify school and community programs addressing substance addiction, prevention, intervention and treatment.

Name
Identify the neurological, behavioral, psychological, physical, and social effects of substances on the individual and significant others.

Name
Explain how addictions affect the family system and discuss the importance of family involvement in recovery.

Name
Identify the bio-psycho-social-spiritual contributors to substance abuse and addiction.

Name
Apply culturally-aware assessment procedures in identifying substance use and addiction disorders.

Name
Evaluate the effectiveness of counseling approaches with diverse populations and identify strategies where counselors can promote client access to community-based resources.

Name
Describe theories and neurobiological etiology of addictions.

PCOU5153 - TRAUMA, DISASTER, & CRISIS COUN

General

Course Prefix
PCOU

Course Number
5153

Description
This course examines the theories and counseling strategies related to trauma and crisis intervention and management with diverse populations. Students will gain an understanding of how crisis and trauma can impact cognitive, emotional, behavioral, spiritual, and community functioning. Issues covered will include natural disasters, domestic abuse, sexual trauma, school violence, suicide, terrorism, and war. Students will also complete training in Psychological First Aid.Prerequisites: PCOU 5003 and PCOU 5043

Objective
Describe a counselors' role as a member of an interdisciplinary community outreach and emergency management response team during and following a crisis, disaster, or other trauma-causing event

Name
Explain the principles of crisis intervention for people during crisis, disasters, and other trauma-causing events

Name
Identify the effects of crisis, disasters, and trauma on individuals across the lifespan

Name
Evaluate the presence of trauma symptoms through the use of assessments for diagnostic and intervention planning purposes

Name
Articulate crisis intervention, trauma-informed, and community-based strategies, such as Psychological First Aid

Name
Describe suicide prevention models, assessing suicidality, and strategies to clinically address suicidality

Name
Explain the adverse impact of crisis and trauma on individuals with mental health diagnoses

Name
Explain symptoms of secondary traumatic stress and compassion fatigue and develop an appropriate self-care plan

Name
Differentiate between maladaptive and developmentally or culturally appropriate responses to crises, disasters, and other trauma-causing events and apply the appropriate diagnosis in the treatment process

Name
Describe a counselors' role as a member of an interdisciplinary community outreach and emergency management response team during and following a crisis, disaster, or other trauma-causing event

PCOU5203 - INTEGRATION OF COUN & CHRISTIANITY

General

Course Prefix
PCOU

Course Number
5203

Description
This course explores and critically examines the contemporary evangelical efforts to integrate Counseling and Christianity, focusing on the value of an integrative approach to both disciplines. Topics include behavior, cognition, emotion, and motivation. Prerequisites: PCOU 5003 and PCOU 5043

General

Course Prefix
PCOU

Course Number
5273

Description
This course provides an introductory understanding of psychopharmacology for professional counselors. Students will learn the basics of neuroanatomy, neuronal function, psychodynamics, psychokinetics, side effects, and indications/ contraindications in relation to the use of common psychotropic medications. Students will learn how to engage with clients and interdisciplinary teams regarding psychopharmacological interventions within the boundaries of professional counseling practice. Students will explore how access to healthcare and psychopharmacological interventions can differ among special populations and cultural groups. Students will learn how to advocate at the individual and system level related to access and use of psychopharmacological interventions within the boundaries of professional counseling practice.Prerequisites: PCOU 5003 and PCOU 5043

Complete ALL of the following Courses:

- PCOU5003 - FOUNDATIONS OF COUNSELING
  AND PCOU5043 - COUNSELING SKILLS LAB

Learning Outcomes

Learning Outcomes

Objective
Employ self-evaluation strategies to explore personal views related to psychopharmacological interventions within the student's faith-informed counselor identity and practice.

Name
Describe the key neurochemicals and biological processes involved in the biological basis of emotions, cognitions, and behaviors.

Name
Describe the basic classes of psychopharmacological medications.

Name
Describe the indications, contraindications, and side effects of commonly prescribed psychopharmacological medications.

Name
Identify ethical and legal boundaries of professional competence in making referrals, communicating with clients, and communicating with other treatment providers regarding psychopharmacological interventions.

Name
Apply diagnosing, case conceptualization, assessment, and multiculturally competent counseling skills to assist client understanding of psychopharmacological interventions.

Name
Apply diagnosing, case conceptualization, and assessment skills to create interdisciplinary team referrals and communications to prescribing treatment providers.

Name
Explore various socio-cultural influences, including privilege, public policies, social movements, aspects related to special populations, and cultural values that may create or impede access to psychopharmacological treatment interventions for clients.

Name
Create advocacy actions to use in future counseling practice to assist clients in gaining equitable access to psychopharmacological treatment interventions.

Name
Employ self-evaluation strategies to explore personal views related to psychopharmacological interventions within the students faith-informed counselor identity and practice.

PCOU5333 - CHILD & ADOLESCENT COUNSELING

General

Course Prefix
PCOU

Course Number
5333

Description
The course will provide students in the MSPC with the foundational theoretical knowledge and clinical skills of counseling necessary to assess and treat children and adolescents. The course will review child and adolescent development as well as cover various theories, modalities, and respective techniques for counseling with children and adolescents. In addition, important treatment issues and contexts unique to working with these populations will be addressed.

Learning Outcomes

Learning Outcomes

Name
Solve ethical dilemmas typical to the field of children, adolescent and parent counseling.

Name
Apply developmental considerations when working with children, adolescents, and parents.

Name
Identify appropriate theoretical counseling models for counseling children, adolescents, and parents.

Name
Demonstrate an ability to apply theory into practice, through experiential activities and case conceptualizations.

Name
Conduct literature searches about current trends regarding children, adolescents and parent counseling issues.

Name
Apply creative arts strategies to theoretical application, treatment planning, and intervention design in counseling children and adolescents.

Name
Demonstrate basic knowledge of play therapy in case conceptualization and treatment planning in counseling children.

Name
Explain how to approach children, adolescents, and parents from a multicultural mindset.

Name
Identify how to establish successful consultative relationships both with parents or families, and other professionals who deal with children and adolescent clients.

Name
Solve ethical dilemmas typical to the field of children, adolescent and parent counseling.

PCOU5343 - INTRODUCTION TO PLAY THERAPY

General

Course Prefix
PCOU

Course Number
5343

Description

This course provides a foundational understanding of how play therapy functions within counseling children. The course reviews the history of play therapy, a variety of theoretical models, and the application of core play therapy skills. In addition, students will learn which toys to use in play therapy, how to organize and structure a playroom, and which modalities can be used in play therapy to address a variety of presenting issues. The course also examines ethical and multicultural considerations in play therapy, as well as the integration of AI-assisted tools in play therapy practice.

Learning Outcomes

Learning Outcomes

Name
Explain the essential elements and principles of play therapy.

Name
Summarize the history and development of play therapy.

Name
Analyze and apply major theories, modalities, skills, and techniques used in play therapy.

Name
Demonstrate core play therapy skills and implement them appropriately in the playroom.

Name
Explain children’s behavior and needs within the context of developmental frameworks.

Name
Apply ethical principles when using play therapy with children and teens.

Name
Evaluate diversity and neurodivergence issues in play therapy and adapt interventions accordingly.

Name
Describe infant mental health issues in the context of child development and attachment.

Name
Explain and evaluate how play therapy fosters neuroplasticity and supports left–right brain integration to help children regulate emotions and behavior.

Name
Identify and evaluate appropriate uses of AI in play therapy.

PCOU5353 - INTERNSHIP I

General

Course Prefix
PCOU

Course Number
5353

Description
This course will give students experience applying diagnostic, counseling and therapeutic skills in an approved setting under a licensed or certified supervisor. The appropriate setting depends on the student's desired area of specialization. Appropriate supervision must be available on site. Three hundred (300) hours of clinically related experience are required. Prerequisites: PCOU 5003, PCOU 5013, PCOU 5033, PCOU 5043, PCOU 5053, PCOU 5073, PCOU 5103

  AND PCOU5053 - HUMAN GROWTH & DEVELOPMENT
  AND PCOU5073 - PROFESSIONAL ETHICS
  AND PCOU5103 - PRACTICUM

Learning Outcomes

Learning Outcomes

Objective
Develop and Execute treatment plans that motivate clients through the use of evidence-based strategies for identified problems and collaborative goals.

Name
Demonstrate skills in establishing a counseling relationship with clients.

Name
Demonstrate the ability to cooperatively develop counseling goals with a client.

Name
Demonstrate the ability to conduct a psychosocial history that includes client background, behavioral observations, current functioning, relationships, strengths, and barriers.

Name
Develop critical awareness of ones own counseling performance and of the counseling performance of others.

Name
Apply the American Counseling Associations Code of Ethics to various ethical and legal dilemmas.

Name
Demonstrate the ability to seek consultation, and to accept and utilize feedback to enhance professionalism in counseling

Name
Implement skills of clear clinical documentation in a way that meets the standards of the counseling site, third-party payers, and the state in which the student is working.

Name
Develop client case conceptualizations that lead to an accurate diagnosis using the DSM-5 TR.

Name
Develop and Execute treatment plans that motivate clients through the use of evidence-based strategies for identified problems and collaborative goals.

PCOU5383 - EXPRESSIVE ARTS IN COUNSELING

General

Course Prefix
PCOU

Course Number
5383

Description
This course examines and applies expressive arts in counseling with children, teens, and adults. A variety of modalities—including visual arts, literature, poetry, journaling, drawing, music, movement, clay, sand tray, dance, drama, puppets, Legos, collages, guided imagery, visualization, cards, and games—will be introduced and practiced. Students will learn foundational art-making skills and experience the power of using expressive arts in counseling to facilitate insight, promote healing, and strengthen the therapeutic relationship. In addition, the course explores how expressive arts interventions impact and can be adapted for diverse populations.

Learning Outcomes

Learning Outcomes

Name
Analyze and apply the use of expressive arts in counseling and therapy and how they impact brain development.

Name
Integrate specific play skills to process the use of expressive arts in counseling and therapy across multiple modalities.

Name
Implement and reflect on the use of expressive arts with a client.

Name
Critically evaluate research and emerging theories in the field of expressive arts.

Name
Design and implement expressive arts interventions, grounded in child development, to facilitate emotional expression, promote personal growth, and foster attachment.

Name
Demonstrate appropriate counseling responses and assessment skills to be used in therapy while integrating expressive arts with children, teens, and adults.

Name
Explain and assess how expressive arts allow children, teens, and adults to express deeper emotions in a safe and protective way.

Name
Integrate and apply expressive arts techniques within a variety of theoretical orientations while counseling children, teens, and adults.

PCOU5443 - NEUROBIOLOGY OF PLAY THERAPY

General

Course Prefix
PCOU

Course Number
5443

Description
This course explores how play impacts the developing brain and informs brain-based interventions in play therapy. Students will examine key concepts in interpersonal neurobiology, including neural integration, attachment, affect regulation, and neuroplasticity, and apply these concepts to promote the emotional well-being of children and adolescents in clinical settings. Emphasis is placed on understanding how play experiences impact brain development, stress response systems, and emotional regulation, particularly in the context of trauma, adversity, and neurodivergence. Students will learn to design and implement developmentally appropriate, brain-based play interventions, translate complex neuroscience into caregiver-friendly language, and integrate ethical, multicultural, and diversity-informed perspectives into their play therapy practice.

Learning Outcomes

Learning Outcomes

Name
Explain core concepts of interpersonal neurobiology and articulate their relevance to play therapy with children and adolescents.

Name
Describe major brain structures and systems involved in attachment, emotion regulation, and social engagement, and relate them to the role of play in child development.

Name
Analyze how play experiences influence brain development, neural integration, and neuroplasticity from infancy to adolescence.

Name
Conceptualize child and adolescent clinical presentations through a brain-based, relational, and developmental lens, including the impact of trauma, stress, and adversity.

Name
Design and implement brain-based play therapy interventions that support emotional regulation, integration of left and right brain processes, and healing in children and adolescents.

Name
Evaluate the evidence base for brain-based interventions in play therapy and integrate research findings into clinical decision-making.

Name
Communicate neurobiological concepts and the benefits of play to caregivers and other stakeholders in clear, developmentally appropriate language.

Name
Apply ethical, multicultural, and neurodiversity-informed considerations when using brain-based play interventions with diverse children, teens, and families.

Name
Reflect on and utilize the counselor's own self-regulation, presence, and use of self as a co-regulating, brain-based intervention within the play therapy process.

PEDU0502 - TENNIS & RAQUETBALL

General

Course Prefix
PEDU

Course Number
0502

Description
This course is designed to teaching and implement the fundamentals of tennis through the applied concepts of the game. We will discuss and practice the rules and regulations involved in tennis, along with techniques and basic strategy needed to learn and play the game.Prerequisite: None

Credit Hours

Learning Outcomes

Name
Perform Taekwondo warmups and stretches.

Name
Memorize the Taekwondo forms, building defensive reflexes.

Name
Exercise self-control when being attacked in the controlled environment of one-step sparring.

Name
Perform Taekwondo conditioning exercises.

Name
Working knowledge of Taekwondo blocks, strikes, and kicks.

Name
Demonstrate a basic knowledge of the history of Taekwondo and the United States Chung Do Kwan Association.

Name
See improved flexibility and physical conditioning.

Name
Establish self-defense methods using the one-step sparring and basic self-defense strategies.

Name
Have a clear understanding of the value of the 5 Taekwondo Tenants in their everyday life.

Name
Complete requirements for national certification of taekwondo ranks or a course Certificate of Completion

PEDU1003 - FUNDAMENTALS OF JIU-JITSU

General

Course Prefix
PEDU

Course Number
1003

Description
This course is designed to teach and implement the basic fundamentals of jiu-jitsu through the applied concepts of the sport. Students will learn and practice positioning, escapes, submissions, and self-defense. Participation in beginning level sparring will be learned with particular attention to safety. Jiu-Jitsu is a complete art and sport that integrates mind, body, and spirit. Studying Jiu-Jitsu develops all aspects of the physical qualities such as force, resistance, flexibility, coordination, agility, and speed. It helps one to develop one's self-control, confidence, and determination.

Learning Outcomes

Learning Outcomes

Name
Demonstrate fundamental knowledge and skills of Jiu-Jitsu history, etiquette, hygiene, and safety.

Name
Execute beginner-level Jiu-Jitsu techniques.

Name
Identify, analyze, and experience the elements of a Jiu-Jitsu tournament.

Name
Describe the main rulesets in Jiu-Jitsu.

PEDU1091 - SCUBA DIVING I

General

Course Prefix
PEDU

Course Number
1091

Description
This course is an entry-level recreational SCUBA training and certification in accordance with the National Association of Underwater Instructors (NAUI) standards. This course focuses on the necessary knowledge and skills for participants to conduct themselves with competence while using self-contained underwater breathing apparatus (SCUBA). Emphasis is placed on responsible diving practices, diving science, and dive planning.Prerequisite: Instructor approval required

Learning Outcomes

Learning Outcomes

Name
Operate buoyancy compensation devices, breathing regulators, and proper SCUBA diving pressure tank for each dive.

Name
Administer a safe dive without assistance using a non-decompression Navy dive table.

Name
Apply the principles of Daltons Law, Charles Law and Boyles Law to each dive.

Name
Demonstrate proper Skin Diving and SCUBA skills.

Name
Apply general first aid to hazardous marine life stings, cuts, and rashes.

Name
Demonstrate safety signaling and underwater audible devices.

Name
Administer general maintenance to dive equipment.

Name
Perform an emergency-controlled swimming ascent in confined and open water.

PEDU1113 - PHYSICAL EDUCATION

General

Course Prefix
PEDU

Course Number
1113

Description

Physical Education is an academic introduction to the principles, purpose, and impact of physical education as a discipline. Students will examine the historical development of physical education, explore major theories of motor learning and physical development, and analyze the role of physical education in schools and communities. Through readings, video lectures, and interactive assignments, students will learn how movement contributes to cognitive, social, and emotional development. This course emphasizes planning, pedagogy, equity in access to physical activity, and the role of physical education in lifelong health and well-being.

PEDU1203 - EXTERNAL PHYSICAL EDUCATION

General

Course Prefix
PEDU

Course Number
1203

Description

External Physical Education provides students the opportunity to engage in self-directed physical activity outside of a traditional classroom setting while meeting clearly defined health and fitness goals. Students will design and track their own fitness plan, participate in consistent physical activity, and reflect on their growth in areas such as endurance, strength, coordination, and overall wellness. Emphasis is placed on personal responsibility, goal-setting, and lifelong health habits. The course supports flexibility by allowing students to pursue a range of physical activities, from team sports and dance to strength training or recreational movement, while receiving structured guidance and accountability through an online platform.

Learning Outcomes

Learning Outcomes

Objective
Describe key Christ-centered yoga terms and concepts.

Objective
Identify key yoga postures that release physical and mental tension within the body.

Objective
Identify the physical, emotional, and spiritual wellness benefits of Christ-centered yoga.

Objective
Illustrate how yoga can serve as a spiritual practice within the Christian faith.

Objective
Articulate how yoga wellness practice can assist with stress release and relaxation.

PEDU2003 - TEAM SPORTS

General

Course Prefix
PEDU

Course Number
2003

Description
Team Sports introduces students to the principles, strategies, and values of participating in cooperative, competitive physical activity. Through personal participation in team-based sports such as basketball, soccer, volleyball, ultimate frisbee, or others of the student's choosing, learners will explore concepts such as teamwork, communication, leadership, and physical fitness. Students will track their involvement, analyze team dynamics, and reflect on how their experiences in sport relate to personal growth and community development. This course emphasizes engagement, effort, and self-awareness over elite performance.

Learning Outcomes

Learning Outcomes

Name
Recognize the need to have a philosophy and understand the importance of ethical decision making in the administration of sports and physical education.

Name
Identify and discuss leadership traits and theories exhibited by administrators.

Name
Apply the fundamental concepts of organizational management to achieve objectives in physical education and sport programs.

Name
Develop an understanding of job descriptions, job analysis, and create possible interview questions for positions in physical education and sport.

Name
Understand fundamental principles and guidelines for successful public relations, promotions, and fundraising in physical education and sport.

Name
Identify, evaluate, and prepare sample budgets used for physical education and sport.

Name
Identify and understand legal trends and the importance of risk management in physical education and sport.

Name
Identify various approaches to the evaluation of programs and personnel.

Name
Describe components and barriers to effective communication.

Name
Demonstrate an understanding of basic concepts behind facility and event evaluation.

Name
Participate in and recognize the importance of professional organizations in the field of sport and physical education.

PEDU3321 - COACHING FOOTBALL

General

Learning Outcomes

Learning Outcomes

Name
Understand the coaching perspective of the relationship between the coach and the player of sport.

Name
Comprehend the tension between Christian values and morals vs. the win at all cost mentality of modern athletics.

Name
Understand the convictions, movement, and impact of Coaching with a Christianity mindset.

Name
Understand the coaching psychology, philosophy, and theology related to spirituality in sport.

Name
Synthesize and articulate a comprehensive biblical worldview integrated into the sport management vocation.

PEDU3341 - COACHING BASEBALL/ SOFTBALL

General

Course Prefix
PEDU

Course Number
3341

Description
This course is designed to provide the foundations of coaching baseball and softball to help current and future coaches accomplish the development of successful baseball and softball programs. This course provides aspects of the competitions of baseball and softball.

Name
Establish academic focus toward teaching the subject matter

Name
Affirm Students efforts with appropriate & positive feedback

Name
Make sound curriculum decisions which affect learners based on theory, research, wisdom of practice

PEDU4133 - DESIGN/CONTENT OF SOCCER COACHING

General

Course Prefix
PEDU

Course Number
4133

Description
This course prepares the prospective secondary (6-12) physical education teacher with the necessary instructional design and content material for teaching team sports and activities in soccer. Emphasis is placed on mastery of psychomotor skills and methods of instruction with practical application.

Learn to utilize practical and innovative practice techniques.

Name
Develop skills for improving players position specific technical ability.

Name
Develop skills for improving players group and team tactical ability.

Name
Implement improvement techniques for economical training sessions.

Name
Practice, develop, and integrate soccer specific fitness.

Name
Understand leadership qualities in successful coaches.

Name
Integrate faith into your soccer coaching.

Name
Develop skills to analyze and improve team dynamic.

PEDU4143 - DESIGN/CONTENT OF TEACHING GOLF

General

Course Prefix
PEDU

Course Number
4143

Description
The student will have the opportunity to develop basic golf skills through lectures, demonstration, drills, and game play. The student will also gain knowledge of golf etiquette and other areas as related to the game of golf. Students will development basic proficiency in golf to recognize and enjoy it as a lifetime activity; including U.S.G.A. rules, etiquette and the fundamental mechanics involved in the use of irons and woods.

Learning Outcomes

Learning Outcomes

Name
To understand the physiological, psychological, and social benefits of golf.

Name
To learn basic terms, rules, history, and etiquette related to the game of golf.

Name
To learn about the equipment and attire used in golf (different clubs and uses, shoes, clothing).

Name
To understand and perform the basic mechanics involved in the set-up, swing, and contact point for each area of golf (driving, chipping, and putting).

Name
To be able to recognize the cause and correction of common errors (i.e.; slicing, topping).

Name
To develop the cooperative skills necessary for preparing and playing a round of golf on a course (i.e., keeping score, location of courses).

Name
To recognize the various emotions involved with golf and identify how they can be helpful or detrimental to the game and ones concentration.

Name
To gain an appreciation for the game. Learn how adults and their families can enjoy golf and the lifetime benefit it provides.

PHIL1003 - INTRO TO PHILOSOPHICAL THOUGHT

General

Course Prefix
PHIL

Course Number
1003

Description
This course introduces students to the foundational concepts and issues in Western philosophy. Students will explore the development of philosophical thought, learn basic logic skills, and engage with the core questions that have shaped human understanding and inquiry. The course aims to provide a comprehensive overview of the major philosophers: Socrates, Plato and Aristotle. The student will gain an understanding of the questions, and the answers offered by these philosophers throughout history.

Learning Outcomes

Learning Outcomes

Name
Describe the formation and development of major issues in philosophy within the Western Tradition.

Name
Explain the historical context and evolution of key philosophical ideas.

Name
Utilize basic logic skills.

Name
Apply logical reasoning to analyze and construct philosophical arguments.

Name
Critically evaluate the answers that these philosophers have offered to basic philosophical questions.

PHIL1013 - PHILOSOPHY OF NATURE

General

Course Prefix
PHIL

Course Number
1013

Description
Philosophy of nature seeks to identify the primary causes and principles of the natural world and thereby to explain this world. Therefore, students will be led to contemplate the natural world as a whole, so as to discover the principles that constitute natural beings and, ultimately, the Principle that moves the natural world. Focusing on change as the primary phenomenon that natural things exhibit, philosophy of nature deals with such topics as matter, motion, nature, chance, the infinite, space, and time. Philosophy of nature also addresses, in preliminary fashion, the relationship of man to nature.

Name
Study the ideas of several significant philosophers and give an in-class overview of one particular text, chosen from among the course readings.

Name
Develop an understanding of the distinctive character of the philosophical field, especially the philosophy of Aristotle, and Augustine, and the Natural Law thinkers.

Name
Become familiar with various questions concerning the nature of creation and its relationship to the transcendent.

PHIL1023 - APOLOGETICS I

General

Course Prefix
PHIL

Course Number
1023

Description
This course will introduce the discipline of Christian apologetics—its history, biblical grounding, methods, and application. Prominent theistic arguments, including cosmological, design, and moral arguments, will be explored. Students will be mentored in effective application in rhetorical writing as well as real world evangelistic situations.

Name
Examine the broad range of subfields of Christian apologetics.

Name
Articulate the rationale of apologetics, including its biblical basis and its dual purpose of pre-evangelism and personal faith enhancement.

Name
Assess the different apologetics methodologies and articulate their respective strengths and weaknesses.

Name
Evaluate and apply various philosophical arguments for the existence of God.

PHIL1033 - LOGIC

General

Course Prefix
PHIL

Course Number
1033

Description
This course includes a thorough introduction to propositional logic, a lighter introduction tomodal logic and first-order predicate logic, an exploration of several modes of non-deductive reasoning (including enumerative induction, argument by analogy, and inference to the best explanation), along with a substantive but accessible introduction to Bayesian confirmation theory. The course emphasizes practical, real-world applications of these reasoning tools in students' lives—especially applications to Christian faith integration, apologetics, polemics, and worldview analysis.Prerequisite: None

PHIL1113 - FOUNDATIONS OF PHILOSOPHY

General

Course Prefix
PHIL

Course Number
1113

Description
In this course, students will learn to think clearly and carefully about important questions. Wewill grapple with fundamental questions about the nature of reality, humanity, morality, truth,knowledge, and even about thought itself. Keeping our focus on the philosophical foundations ofa robust Christian worldview, we will gain insights from significant historical and contemporarythinkers. All the while, we will hone our reasoning skills as we learn to employ philosophicalmethods or tools—such as conceptual analysis, thought experiments, formal logic, inference tothe best explanation, and simple Bayesian methods—to construct and evaluate complexarguments. In each successive unit of the course, the tools or methods learned in previous unitswill be applied to new philosophical questions, enabling students to practice these methods inmeaningful ways. The aim of the course is to produce genuine philosophers in the etymologicalsense of that word: lovers of wisdom, that is, men and women who value wisdom and diligentlypursue it not only in college but throughout their lives.Prerequisite: None Credit Hours: 3Repeatable: Course not repeatable

Learning Outcomes

Learning Outcomes

Objective
Employ philosophical methods—including conceptual analysis, thought experiments, formal logic, inference to the best explanation, and Bayesian mental models—to reason carefully about important questions.

Objective
Engage the work of significant historical and contemporary thinkers.

Objective
Critically evaluate important philosophical arguments, views, ideas, and mental models, especially those relevant to a Christian worldview (meta mental model).

Objective
Identify and cultivate intellectual virtues including intellectual courage, carefulness, tenacity, fair-mindedness, curiosity, honesty, and humility.

Objective
Describe the nature of philosophical inquiry and recognize both its practical value and its intrinsic worth as part of a flourishing Christian life.

PHIL1123 - APOLOGETICS II

General

Course Prefix
PHIL

Course Number
1123

Description
This course will build upon the foundation developed in Christian Apologetics I. Arguments supporting the existence and divine identity of Jesus of Nazareth, the Resurrection, and miracles will be explored. In addition, the problem of evil and the problem of religious pluralism will be analyzed. Students will be mentored in effective application in rhetorical writing as well as real world evangelistic situations.

Learning Outcomes

Learning Outcomes

Name
Examine arguments for the uniqueness of humanity, including higher cognition and moral intuition.

Name
Evaluate and apply various philosophical arguments for Christian theism, including the historicity of Jesus of Nazareth and his resurrection.

Name
Assess and respond to the intellectual, emotional, and existential problems that the existence of evil seems to present for the Christian worldview.

Name
Evaluate arguments for the exclusivity of Christianity as compared with other major world religions.

PHIL1223 - GRAMMAR LOGIC RHETORIC I

General

Course Prefix
PHIL

Course Number
1223

Description
This course intends to provide students with the tools of learning. The term trivium denotes the three liberal arts of grammar, logic, and rhetoric concerned with methods of discourse, or linguistic operations. These arts are meant to prepare a student for the study of the higher disciplines of philosophy and theology by means of the study of language. The method of the course is an intensive study of grammar, logic, and rhetoric, and the student will acquire both theoretical and practical knowledge of these arts in this class.

Become familiar with various questions concerning the nature of the human person.

PHIL2033 - ETHICS

General

Course Prefix
PHIL

Course Number
2033

Description
This course offers an introduction to moral philosophy through an investigation of the tradition of ethical thought that has informed Western civilization. The course examines various accounts of the human desire for what is good; questions concerning moral choice and the nature of good and evil actions; distinctions between utility, right, and duty; and conceptions of human happiness. In so doing, this course examines the nature and role of the virtues and of the moral law.

Name
Examine a range of ethical issues that shape human society.

Name
Articulate the philosophical connection between objective biblical truth claims and ethical decision making.

Name
Analyze and critique secular approaches to contemporary ethical issues.

Name
Understand and articulate the coherence and sufficiency of the Christian worldview as it applies to ethical human living.

PHIL2113 - IMAGINATIVE APOLOGETICS I

General

Course Prefix
PHIL

Course Number
2113

Description
This course will introduce the discipline of imaginative apologetics: the practice of using literature and cinema to effectively convey deep truths about God and humankind. Using essays along with the imaginative works (books, films, etc.) as the case study, students will learn how imaginative works are used in the practice of apologetics. In addition, they will develop foundational skills in the philosophical and theological analysis of literature and cinema.

Name
Assess the importance of appealing to shared human intuitions about goodness, truth, and beauty.

Name
Evaluate the corpus of a particular author and specific film adaptations of his or her work to determine their value in contemporary imaginative apologetics.

PHIL2143 - CS LEWIS, SCIENCE & SOCIETY

General

Course Prefix
PHIL

Course Number
2143

Description
CS Lewis, Science and Society and exposes students to scientific theories and their impact on culture, especially in light of CS Lewis's view of science and its role in society. In particular, the course examines scientific problems with Darwinism and Neo-Darwinism, the positive scientific evidence for intelligent design, and the social and political implications of both evolutionary theory and intelligent design theory. Students learn not just about the scientific debate between proponents of the two theories, but also about how Lewis's insights can help us understand the impact of these theories on various cultures. In sum, this course highlights the fact that "ideas have consequences" and that scientific theories can significantly impact the lives of many people worldwide, even outside the apparent confines of science.Prerequisite: None Repeatable: Course not repeatable

Learning Outcomes

Objective
Define key terms in the evolution/intelligent design debate, including science, scientism, pseudoscience, evolution, and intelligent design.

Objective
Explain the relationship between Christian faith and various definitions of evolution.

Objective
Explain the relationship between Christian faith and intelligent design theory.

Objective
Explain CS Lewis's view of science and of intelligent design.

Objective
Explain CS Lewis's view of the negative impact of scientism and evolutionary theory on society.

Objective
Evaluate the scientific case for evolutionary theory.

Objective
Explain the scientific case for intelligent design as well as the objections to ID theory.

Objective
Explain how scientific theories have real-world impact.

Objective
Identify multiple ways that evolutionary ideas have harmed people in various societies.

PHIL2173 - LOGIC & COMPUTATION

General

Course Prefix
PHIL

Course Number
2173

Description
An important narrative of the course begins with the computer coming out of formal logic, but builds towards a sense of the power of the universal computer (an idea that develops through formal languages, regular expressions, deterministic finite automata, and Turing machines). However, the climax of the course occurs in the proof of the Halting Problem, demonstrating once and for all the limitation of algorithm, and therefore the objective limitations of computers, a discussion of which began with limitation due to complexity and speed, particularly for NP problems, and headed towards the use of heuristics when algorithms were not possible. This narrative ultimately highlights that the human mind has the ability not only to think algorithmically, but also to be struck with insight, which is not a function of algorithm. The computer, by contrast, has only the ability to perform algorithms. Thus, this thread raises strong arguments against the notion of truly creating "artificial intelligence" on the computer.

The focus of most of the course is on our programming of the computer, which can be seen as "man's influence on the machine." After following the arc of the course, students are in a position to consider the reverse: the influence of technology on man. The main thought leader for students in this is Neil Postman, but we also include a short story by E.M. Forster that deals with related themes.

Learning Outcomes

Name
Learn the foundational elements of formal logic.

Name
Build a foundation in basic coding.

Name
Grasp the philosophical connection between formal logic and coding.

Name
Begin to see the world through the lens of computation.

Name
Understand the limits of formal logic and computation.

Name
Apply this to consider the appropriate place of computers in society and in the lives of individuals. All these are oriented toward the end of adding computational and algorithmic thinking to the students' intellectual toolbox.

PHIL2213 - WORLD RELIGIONS & EVANGELISM

General

Course Prefix
PHIL

Course Number
2213

Description
This course explores major world religions and how to effectively share the gospel with adherents of each faith. Emphasizing the concept of "kerygma," the unchanging message of the gospel, students will analyze the core beliefs of major religious traditions and develop evangelistic strategies tailored to each worldview. The course will balance academic study with practical evangelism training, equipping students with the knowledge and skills to engage in interfaith conversations with grace and truth.Prerequisite: PHIL 2013

PHIL2223 - HUMANE LETTERS III

General

Course Prefix
PHIL

Course Number
2223

Description
This course builds upon prior study in the humane letters tradition by continuing to cultivate students' intellectual, moral, and aesthetic formation through Socratic engagement with classic works of literature, history, and philosophy. While maintaining a focus on reading, writing, listening, and speaking, this course distinguishes itself by drawing more deeply from ancient sources, including classical historians like Herodotus and Thucydides. Emphasizing seminar discussion over survey, students explore enduring questions of human nature, justice, leadership, and the good life—not simply to absorb ancient thought, but to practice the art of thinking well. The course seeks to sharpen students' ability to reason, interpret, and articulate insights as they engage timeless ideas that have shaped the Western tradition.

Name
Articulate and defend their own position on the philosophy of knowledge.

PHIL3013 - METAPHYSICS

General

Course Prefix
PHIL

Course Number
3013

Description
Metaphysics, the highest branch of philosophy, is the systematic study of being qua being. Beginning with the study of finite being and concluding with natural theology, metaphysics seeks to identify the principles, structures, and properties pertaining to existents as existing. This course offers an introduction to this most fundamental of all philosophical investigations. Students will contemplate such basic metaphysical topics as finite and infinite being, substance and accident, essence and existence, the transcendentals of being, analogical predication of being, participation, first principles, and the existence and attributes of God.

Name
Enhance their ability to read and understand metaphysical texts.

Name
Speak and write clearly on metaphysical issues.

PHIL3023 - POLITICS AND PHILOSOPHY

General

Course Prefix
PHIL

Course Number
3023

Description
This course offers an introduction to the philosophical study of political activity. Students become acquainted with various manifestations of the political community in the West since the time of the ancient Greeks. Students examine the distinctive characters of the Greek polis, the Roman res publica, the Medieval realm, and the modern state, while investigating the assigned authors' attempts to answer questions concerning the limits of political activity, the nature of law, and the character of the political community.

Be familiar with the discipline of political philosophy and understand its relation to philosophy as a whole;

Name
Understand the tradition of philosophical thought concerning political activity that has formed western civilization, especially in its classical and Anglo-American manifestations;

Name
Know the content of those books specified in the syllabus.

PHIL3033 - AESTHETICS

General

Course Prefix
PHIL

Course Number
3033

Description
The main goals of the course are to introduce the student to the history and logic of Western philosophy's ways of thinking about questions of beauty and aesthetics from classical Greece down to the present.

Credit Hours

Minimum Credit Hours:
3

Maximum Credit Hours:
3

Learning Outcomes

Learning Outcomes

Name
Students will be able to restate key teachings in writing, handle multiple-choice questions that test understanding as well as recall, and apply versions of aesthetic theories in experience as reported in papers.

Name
Be able to restate key teachings on Aesthetics from the history of philosophical inquiry.

Name
Understand the various distinctions made in aesthetic contemplation.

Name
Engage with the foundations of aesthetic thought in Greece and its development in the medieval era.

Name
Enhance their ability to read and understand aesthetic texts.

Name
Address the major questions of aesthetics, such as What is the nature of aesthetic experience? What is the relationship between art and morality?

Name
Speak and write clearly on aesthetic issues.

PHIL3113 - WORLD RELIGIONS AND EVANGELISM

General

Course Prefix
PHIL

Course Number
3113

Description
This course explores major world religions and how to effectively share the gospel with adherents of each faith. Emphasizing the concept of "kerygma," the unchanging message of the gospel, students will analyze the core beliefs of major religious traditions and develop evangelistic strategies tailored to each worldview. The course will balance academic study with practical evangelism training, equipping students with the knowledge and skills to engage in interfaith conversations with grace and truth.

Credit Hours

Type
Completion Requirement

Prerequisite

Complete ALL of the following Courses:
- PHIL2013 - INTRODUCTION TO CHRISTIAN

Learning Outcomes

Learning Outcomes

Name
Understand the Core Beliefs of Major Religions – Demonstrate knowledge of the historical background, theology, and worldview of the eight religions studied.

Name
Analyze Points of Contact and Contrast – Identify theological similarities and differences between Christianity and each religion.

Name
Develop Contextualized Evangelistic Strategies – Learn how to share the gospel in ways that resonate with adherents of each worldview.

Name
Defend the Christian Faith in Interfaith Dialogue – Engage in respectful conversations that present biblical truth while addressing common objections.

Name
Practice Effective Gospel Presentations – Develop and present evangelistic messages that faithfully communicate the gospel while considering cultural and theological contexts.

Name
Evaluate the Role of Kerygma in Evangelism – Reflect on how the gospel remains unchanged while its presentation must be adapted to different audiences.

PHIL3233 - INTRODUCTION TO PHILOSOPHY

General

Course Prefix
PHIL

Course Number
3233

Description
A systematic survey of the fundamental concepts of philosophy with special attention given to the problems of knowledge, being, the existence of God, the freedom of will, and good and evil. Intended to familiarize the student with the method of abstract thinking.

PHIL4123 - APOLOGETICS

General

Course Prefix
PHIL

Course Number
4123

Description
A philosophical study and defense of the Christian faith as it is related to naturalistic science and humanism with emphasis on the necessity of the deity of Christ, His supernatural incarnation, His substitutionary death, and His physical resurrection.

Credit Hours

Number Of Repeats:
3

Number Of Credits:
3

Learning Outcomes

Learning Outcomes

Name
Compare multiple approaches to writing about philosophy.

Name
Practice disciplinary methods of research.

Name
Apply classical skills to teaching philosophy skills to non-philosophers in a local community.

Name
Develop the ability to identify and assess the techniques philosophers use in writing.

Name
Produce philosophically informed writing, displaying sound reasoning and a strong connection to Truth.

PHIL5063 - CLASSICAL PEDAGOGY OF PHILOSOPHY

General

Course Prefix
PHIL

Course Number
5063

Description
This course offers an exploration and analysis of the classical method of teaching philosophy.

Credit Hours

Minimum Credit Hours:
3

Maximum Credit Hours:

Learning Outcomes

Learning Outcomes

Name
Explore the study and teaching of philosophy in relation to the Christian faith.

Name
Apply the classical method to teaching philosophy in the local community.

Name
Analyze approaches to teaching philosophy classically.

PHIL5503 - PHILOSOPHY AND THE CHRISTIAN FAITH

General

Course Prefix
PHIL

Course Number
5503

Description
This course will investigate the relationship between the philosophical tradition and theology. Topics to be covered may include the nature of religion, religious experience, faith and reason, the existence of God, religious language, life after death, and the problem of evil.

Credit Hours

Minimum Credit Hours:
3

Learning Outcomes

Learning Outcomes

Objective
Integrate theoretical understanding with practical application.

Name
Identify basic lab equipment, apply fundamental lab techniques, and optimize laboratory settings to improve measurements.

Name
Measure a variety of physical properties pertaining to mechanics, thermodynamics, and periodic motion.

Name
Observe and recognize real-life physical phenomena.

Name
Analyze data and observations and apply statistical tools in data analysis.

Name
Present results graphically as a function of variables.

Name
Compare results to established scientific theory.

Name
Integrate theoretical understanding with practical application.

Apply statistical tools in data analysis.

Name
Present results graphically as a function of variables.

Name
Compare results to established scientific theory.

PHYS1004 - ASTRONOMIA

General

Course Prefix
PHYS

Course Number
1004

Description
This course considers the history of the heavens and man's study of their motion. Selections from Ptolemy, Copernicus, Galileo, and Kepler are read. Topics include geocentric and heliocentric models, planetary motion, the discovery of moons and other celestial objects, and the laws of planetary motion. This course integrates modeling and experimental dialectic laboratory experiences.Prerequisite: MATH 1123 Euclidean GeoMetria I

Credit Hours

Minimum Credit Hours:
4

Maximum Credit Hours:
4

(Credit Hours) Value:
4

Contact Hours (not needed)

(Contact Hours) Value (not needed) :

Learning Outcomes

Learning Outcomes

Name
Demonstrate understanding of the historical development of astronomical knowledge and the significant contributions of astronomers such as Ptolemy, Copernicus, Galileo, and Kepler.

Name
Demonstrate knowledge of the geocentric and heliocentric models of the universe and the key differences between them and explain the laws of planetary motion proposed by Kepler.

Name
Interpret astronomical observations and data to gain insights into the motion and behavior of celestial bodies and recognize the significance of the discoveries of moons and other celestial objects within our solar system.

Name
Identify the cultural, religious, and philosophical implications of the shift from geocentric to heliocentric models, how these theories challenged existing beliefs and worldviews, and demonstrate an understanding of the scientific method as applied to the study of astronomy.

Name
Apply principles of planetary motion and celestial mechanics to explain phenomena such as retrograde motion, orbital periods, and planetary alignments, and analyze and explain the historical context in which astronomical discoveries and theories were made.

Name
Communicate effectively about key concepts and principles in classical astronomy and engage in informed discussions about the historical significance and ongoing relevance of the study of celestial motion.

Name
Appropriately model, experiment with, analyze, and evaluate the course concepts through investigative designs in the form of labs.

Name
Apply grammar, dialectic, and rhetoric to integrate the topic with Gods revelation through His creation, Moral PhiloSophae, and OrthoDoxia defined through scriptural paideia.

PHYS1013 - MUSICA

General

Course Prefix
PHYS

Course Number
1013

Description
This course delves into the captivating intersection of physics and art with an introductory musicology course, where physics and music appreciation converge. This course is designed for students curious about the underlying physics principles that shape the sonic landscapes we experience.

Credit Hours

Minimum Credit Hours:
3

Maximum Credit Hours:
3

(Credit Hours) Value:

Number Of Credits:
3

Learning Outcomes

Learning Outcomes

Name
Articulate the fundamental concepts of acoustics to apply knowledge of acoustic principles to explain how various musical instruments produce distinct sounds.

Name
Employ physics principles to analyze and interpret musical compositions, recognizing the role of harmony, frequency, and resonance in shaping musical structures.

Name
Demonstrate practical knowledge of the mechanics of musical instruments through hands-on exploration, linking the physical design and construction of instruments to their sonic characteristics.

Name
Apply mathematical concepts to comprehend harmonic relationships in music and demonstrate understanding of the mathematical ratios contributing to consonance and dissonance.

Name
Analyze the psychological and physiological aspects of how humans perceive and respond to music, recognizing the role of the ear, brain, and cultural factors in shaping musical experiences.

Name
Trace the historical development of music and its intersection with scientific advancements, identifying key milestones and understanding how innovations in science have influenced musical expression across different cultures and periods.

Name
Critically evaluate contemporary applications of the physics of sound in modern music production, recording, and digital technologies and analyze current trends in music consumption and creation.

Name
Apply grammar, dialectic, and rhetoric to integrate the topic with Gods revelation through His creation, Moral PhiloSophae, and OrthoDoxia defined through scriptural paideia.

PHYS1113 - INTRODUCTION TO PHYSICS

General

Course Prefix
PHYS

Course Number
1113

Description
This is an introductory course designed for the non-science major or for the student who wants a foundational introduction to the subject. This is a minimally mathematical investigation of physics and explores the basics of mechanics, motion, sound, electricity, and magnetism. This course will count as an elective toward the divine design requirement. Prerequisite: None Corequisite: PHYS 111L

Credit Hours

Minimum Credit Hours:
3

Maximum Credit Hours:
3

(Credit Hours) Value:
3

Contact Hours (not needed)

(Contact Hours) Value (not needed) :

3

Simple Requirements

PHYS 111L - Introduction to Physics Lab

Type
Corequisite

Learning Outcomes

Learning Outcomes

Name
Demonstrate the ability to reason and justify evidence-based decisions and develop logical methods to analyze and solve problems.

Name
Apply the basics of Mechanics, including Newton’s Laws of Motion, to calculate acceleration, velocity, momentum, and energy. Apply Newton’s universal law of gravity to physical scenarios.

Name
Explain the concepts of temperature and the mechanisms of heat transfer.

Name
Illustrate the nature of sound as a wave and analyze the characteristics of wave motion.

Name
Differentiate between the regions of the electromagnetic spectrum. Predict the behavior of light (reflection, refraction) when it encounters an interface and describe its wave-like properties (interference).

Name
Construct and analyze simple electric circuits. Explain the operational principles of generators and electric motors based on the relationship between electricity and magnetism.

PHYS2024 - PHYSICS WITH ALGEBRA I

General

Course Prefix
PHYS

Course Number
2024

Description
This course considers Classical Physics built upon Algebra I, which covers the foundational principles of Newtonian mechanics, work, energy, power, mechanical waves, sound, friction, free-body diagrams, and gravitational forces. This course integrates modeling and experimental dialectic laboratory experiences.Prerequisite: MATH 1163 Algebra I

Credit Hours

Minimum Credit Hours:
4

Maximum Credit Hours:
4

(Credit Hours) Value:
4

Contact Hours (not needed)

(Contact Hours) Value (not needed) :
0

Repeatable:
Yes

Number Of Repeats:
4

Number Of Credits:
4

Learning Outcomes

Learning Outcomes

Name
Apply the foundational principles of classical physics to analyze and solve problems involving the motion of objects under various forces and constraints and comprehend the concepts of work, energy, and power, and apply them to calculate and analyze the mechanical work done, energy transformations, and power output in different physical scenarios.

Name
Interpret the behavior of mechanical waves to demonstrate understanding of the nature and properties of sound waves and apply these principles in analyzing sound phenomena.

Name
Demonstrate understanding of the principles of friction and its role in various physical systems.

Name
Use free-body diagrams and Newtons second law to analyze and solve problems involving forces acting on objects in equilibrium and non-equilibrium situations and calculate the gravitational forces and the motion of objects within a gravitational field.

Name
Apply critical thinking and problem-solving skills to solve complex physics problems involving the principles of Newtonian mechanics, work, energy, power, mechanical waves, sound, friction, free-body diagrams, and gravitational forces and use mathematical modeling and algebraic techniques to represent and solve physical problems.

Name
Communicate scientific concepts and findings effectively using appropriate scientific language, diagrams, calculations, and reasoning.

Name
Appropriately model, experiment with, analyze, and evaluate the course concepts through investigative designs in the form of labs.

Name
Apply grammar, dialectic, and rhetoric to integrate the topic with Gods revelation through His creation, Moral PhiloSophae, and OrthoDoxia defined through scriptural paideia.

PHYS2044 - PHYSICS WITH ALGEBRA II

General

Course Prefix
PHYS

Course Number
2044

Description
This course considers Classical Physics built upon Algebra I, which covers the foundational principles of simple circuits, charge distribution, conduction, induction, electric forces, and electromagnetic forces are investigated. This course integrates modeling and experimental dialectic laboratory experiences.Prerequisite: PHYS 2023 Physics with Algebra I

Credit Hours

Minimum Credit Hours:
4

Maximum Credit Hours:

Learning Outcomes

Learning Outcomes

Name
Apply knowledge of the basic principles and laws governing simple electric circuits in solving problems involving circuit components and configurations.

Name
Analyze the concepts of electric charge, charge distribution, and conductors; the behavior of charged objects in static and dynamic situations; and the relationship between current density, electric field, and resistivity.

Name
Demonstrate understanding of the production of induced electromotive force in circuits and calculate electromagnetic induction phenomena.

Name
Demonstrate understanding of the concept of an electric field and its influence on charged particles by calculating electric field strength and potential in various configurations.

Name
Calculate the behavior of charged particles in electromagnetic fields, including the Lorentz force and the motion of charged particles in magnetic fields.

Name
Apply critical thinking and problem-solving skills to analyze and solve complex physics problems involving electrical circuits, charge distribution, conduction, induction, electric forces, and electromagnetic forces.

Name
Appropriately model, experiment with, analyze, and evaluate the course concepts through investigative designs in the form of labs.

Name
Apply grammar, dialectic, and rhetoric to integrate the topic with God's revelation through His creation and Moral PhiloSophae and OrthoDoxia defined through scriptural paideia.

PHYS2533 - GENERAL PHYSICS I

General

Course Prefix
PHYS

Course Number
2533

Description
This course is an introduction to the physics of mechanics, heat, electricity, wave motion, and optics.Prerequisite: MATH 1413 or math placement exam; Corequisite: PHYS 253L

Credit Hours

Minimum Credit Hours:
3

Maximum Credit Hours:
3

Type
Completion Requirement

Corequisites

Complete ALL of the following :

Learning Outcomes

Learning Outcomes

Name
Integrate force, velocity, acceleration, and displacement to analyze and describe the motion of an object.

Name
Describe circular motion, demonstrating an understanding of its fundamental principles.

Name
Understand the law of universal gravitation and apply it to describe gravitational interactions between objects.

Name
Understand the relationship between work and energy and explain how they are related in the context of physical systems.

Name
Describe the motion of objects in terms of momentum and analyze how momentum changes in different situations.

Name
Apply conservation laws to predict changes in velocity, momentum, and energy in various physical scenarios.

Name
Describe the forces involved in rotational motion, demonstrating an ability to analyze the dynamics of rotating objects.

PHYS2633 - GENERAL PHYSICS II

General

Course Prefix
PHYS

Course Number
2633

Description
This course is the second semester of an introduction to the physics of heat, electricity, wave motion, and optics.Prerequisite: PHYS 2533

Credit Hours

Minimum Credit Hours:
3

Maximum Credit Hours:
3

(Credit Hours) Value:
3

Contact Hours (not needed)

(Contact Hours) Value (not needed) :
4

Repeatable:

Number Of Credits:
3

Learning Outcomes

Learning Outcomes

Name
Apply the laws of periodic motion to predict the position of an object as a function of time, demonstrating the ability to apply these principles in practical scenarios.

Name
Understand the principles of sound waves and apply this understanding to describe the fundamental qualities of sound waves and their interactions.

Name
Understand how lenses and mirrors produce real or virtual images, gaining a comprehensive knowledge of optics principles.

Name
Understand the basics of electrostatics, including Coulomb's law, electric fields, and electric potential, and explain their significance and applications.

Name
Analyze the current through circuits that include resistors, capacitors, and inductors, applying knowledge to analyze and solve complex circuit problems.

Name
Understand the relationship between electricity and magnetism and explain how this connection can produce an electromotive force (emf), demonstrating a deep comprehension of the underlying principles.

PHYS3004 - ASTRONOMIA WITH RELATIVITY

General

Course Prefix
PHYS

Course Number
3004

Description
This course considers the fascinating realms of astronomy, the revolutionary concepts of Einstein's theory of gravitation, and the principles of special and general relativity, including the nature of space-time, the concept of gravitational waves, and the impact of massive objects on the curvature of space. Special attention is given to the mathematical frameworks that underpin these theories, equipping students with the tools necessary to analyze and solve problems related to relativity. This course integrates modeling and experimental dialectic laboratory experiences.Prerequisite: PHYS 1004 AstroNomia

Credit Hours

Minimum Credit Hours:
4

Maximum Credit Hours:
4

(Credit Hours) Value:
4

Contact Hours (not needed)

(Contact Hours) Value (not needed) :
0

Repeatable:
Yes

Number Of Repeats:
3

Number Of Credits:

Learning Outcomes

Learning Outcomes

Name
Demonstrate mastery of Einsteins theory of gravitation and the principles of special and general relativity and explain the mathematical foundations of relativity.

Name
Apply the concepts of space and time dilation, time synchronization, and the relativity of simultaneity.

Name
Demonstrate understanding of the principle of equivalence and the effects of gravity on the behavior of light and the passage of time and analyze and interpret the phenomenon of gravitational lensing and its implications in observational astronomy.

Name
Summarize the concept of spacetime curvature and the equations of general relativity, including Einsteins field equations.

Name
Explain the principles of relativity in various astrophysical contexts, such as black holes, gravitational waves, and cosmology, and the expanding universe and the Big Bang theory through the lens of general relativity.

Name
Apply mathematical techniques and problem-solving skills involving relativity and its applications in physics and astronomy and engage in critical discussions about the implications and significance of Einsteins theories in contemporary physics and astronomy.

Name
Appropriately model, experiment with, analyze, and evaluate the course concepts through investigative designs in the form of labs.

Name
Apply grammar, dialectic, and rhetoric to integrate the topic with Gods revelation through His creation, Moral PhiloSophae, and OrthoDoxia defined through scriptural paideia.

PHYS3024 - PHYSICS WITH CALCULUS I

General

Course Prefix
PHYS

Course Number
3024

Description
This course considers Classical Physics built upon Calculus that covers the foundational principles of Newtonian mechanics, work, energy, power, mechanical waves, sound, friction, free-body diagrams, and gravitational forces are investigated. This course integrates modeling and experimental dialectic laboratory experiences.Prerequisite: MATH 3003 Calculus I

Credit Hours

Learning Outcomes

Name
Apply the foundational principles of classical physics, including Newtons laws of motion, to calculate and analyze the mechanical work done, energy transformations, and power output in different physical scenarios.

Name
Apply the principles of the behavior of mechanical waves and the nature and properties of sound waves to analyze sound phenomena.

Name
Demonstrate understanding of the principles of friction and its role in various physical systems.

Name
Use free-body diagrams and Newtons second law to analyze and solve problems involving forces acting on objects in equilibrium and non-equilibrium situations, analyzing and calculating the gravitational forces and the motion of objects within a gravitational field.

Name
Apply critical thinking and problem-solving skills, including mathematical modeling and algebraic techniques, to analyze and solve complex physics problems involving the principles of Newtonian mechanics, work, energy, power, mechanical waves, sound, friction, free-body diagrams, and gravitational forces.

Name
Communicate scientific concepts and findings effectively, both orally and in written form, using appropriate scientific language, diagrams, calculations, and reasoning to convey an understanding of classical physics principles.

Name
Appropriately model, experiment with, analyze, and evaluate the course concepts through investigative designs in the form of labs.

Name
Apply grammar, dialectic, and rhetoric to integrate the topic with Gods revelation through His creation, Moral PhiloSophae, and OrthoDoxia defined through scriptural paideia.

PHYS3044 - PHYSICS WITH CALCULUS II

General

Course Prefix
PHYS

Course Number
3044

Description
This course considers Classical Physics built upon Calculus that covers the foundational principles of simple circuits, charge distribution, conduction, induction, electric forces, and electromagnetic forces are investigated. This course integrates modeling and experimental dialectic laboratory experiences.Prerequisite: PHYS 3024 Physics with Calculus I

Learning Outcomes

Learning Outcomes

Name
Apply understanding of the basic principles and laws governing simple electric circuits, including Ohms law, Kirchhoffs laws, and series and parallel circuits analysis to solve problems involving circuit components and configurations.

Name
Analyze the concepts of electric charge, charge distribution, and conductors, and the behavior of charged objects in static and dynamic situations to explain the principles of electric conduction and conduction mechanisms in different materials.

Name
Calculate electromagnetic induction phenomena and understand the production of induced electromotive force in circuits.

Name
Explain the concept of an electric field and its influence on charged particles and calculate electric field strength and potential in various configurations.

Name
Calculate the behavior of charged particles in electromagnetic fields.

Name
Apply critical thinking and problem-solving skills to analyze and solve complex physics problems involving electrical circuits, charge distribution, conduction, induction, electric forces, and electromagnetic forces.

Name
Appropriately model, experiment with, analyze, and evaluate the course concepts through investigative designs in the form of labs.

Name
Apply grammar, dialectic, and rhetoric to integrate the topic with Gods revelation through His creation, Moral PhiloSophae, and OrthoDoxia defined through scriptural paideia.

PLAW3003 - LEGAL TERMS & LIT PROCESS

General

Course Prefix
PLAW

Course Number
3003

Description
This legal course introduces the student to legal terms in the legal profession. Students will use knowledge from this course foundationally as they progress through the Legal Studies major. It will provide a better understanding of the legal process and the profession.Prerequisites: None

Credit Hours

Minimum Credit Hours:
0

Maximum Credit Hours:
4

(Credit Hours) Value:
3

Contact Hours (not needed)

(Contact Hours) Value (not needed) :
3

Repeatable:
Yes

Number Of Repeats:
3

Number Of Credits:
3

Learning Outcomes

Learning Outcomes

Objective
Examine various federal and state court rules.

Name
Define terminology associated with the various stages of civil and criminal litigation.

Name
Examine aspects of civil and criminal procedure.

Name
Describe the trial and appeals process.

Name
Review the document preparation process in litigation.

Name
Examine various federal and state court rules.

PLAW3013 - INTRODUCTION TO LEGAL THEORY

General

Course Prefix
PLAW

Course Number
3013

Description
This course introduces students to the profession of law with emphasis on the distinction and relationship of theory and practice. Advice is offered to students on preparing for and choosing a law school. The course also provides practical advice on how to succeed in law school. Students will also be exposed to basic legal research and writing techniques.Prerequisite: None

Credit Hours

Minimum Credit Hours:
3

Maximum Credit Hours:
3

(Credit Hours) Value:
3

Contact Hours (not needed)

(Contact Hours) Value (not needed) :
3

Repeatable:
Yes

Number Of Repeats:
3

Number Of Credits:
3

Learning Outcomes

Learning Outcomes

Objective
Comprehend basic legal research techniques and basic bluebook methods as they are used in proper legal writing.

Name
Comprehend the fundamentals of the legal profession in contemporary America.

Name
Understand the difference and the challenge of applying legal theory to practice.

Name
Identify law school admission requirements.

Name
Comprehend the lifestyle and discipline necessary to succeed in law school.

Name
Identify and utilize testing techniques on the LSAT.

Name
Comprehend basic legal research techniques and basic bluebook methods as they are used in proper legal writing.

PLAW3333 - LAW SCHOOL PREPARATORY COURSE

General

Course Prefix
PLAW

Course Number
3333

Description
This course is designed to assist students in developing a proper skillset in preparation for the Law School Assessment Test (LSAT). Students will also be trained in the proper style for law school applications and personal statements.
Prerequisites: None

Credit Hours

Minimum Credit Hours:
0

Maximum Credit Hours:
3

(Credit Hours) Value:
3

Contact Hours (not needed)

(Contact Hours) Value (not needed) :
0

Repeatable:
Yes

Number Of Repeats:
3

Number Of Credits:
3

Learning Outcomes

Learning Outcomes

Objective
Create a course of action for the completion of the LSAT examination and the submittal of law school applications.

Name
Identify and define legal vernacular in preparation for the LSAT examination.

Name
Develop and learn various testing techniques for the LSAT examination.

Name
Produce three mock LSAT examination questions and include the corresponding answers.

Name
Demonstrate knowledge of the LSAT through a practice examination.

Name
Create a course of action for the completion of the LSAT examination and the submittal of law school applications.

PLAW3433 - LEGAL RESEARCH & WRITING

General

Course Prefix
PLAW

Course Number
3433

Description
This course is designed to teach students how to identify and analyze legal problems. Students will engage in legal research using primary and secondary sources. Upon completion of the legal analysis of a problem, students will prepare a written form that adheres to the conventions of the legal profession.Prerequisites: None

Learning Outcomes

Learning Outcomes

Objective
Compile legal research with other students and collectively present a defense for various case studies.

Name
Recognize and differentiate between primary and secondary sources in the legal field of research.

Name
Demonstrate the correct formatting of legal document writing.

Name
Illustrate understanding of legal memorandum writing through reading assessment of mock legal cases, contracts, and journals.

Name
Write a legal memorandum demonstrating skills in syntax and organization.

Name
Classify and draft common legal documents.

Name
Compile legal research with other students and collectively present a defense for various case studies.

PLAW4003 - SPECIAL TOPICS IN PRE-LAW

General

Course Prefix
PLAW

Course Number
4003

Description
This course will cover particular topics of interest as determined by the College of Business and Legal Studies. These will be predicated on current events, new developments, and the interest of Pre-Law students.Prerequisite: Consent of Instructor

Credit Hours

Minimum Credit Hours:
0

Maximum Credit Hours:
17

(Credit Hours) Value:
3

Contact Hours (not needed)

(Contact Hours) Value (not needed) :
3

Repeatable:

Number Of Repeats:
6

Number Of Credits:
6

Requirements
Prerequisite: Consent of Instructor

Learning Outcomes

Learning Outcomes

Name
Write a summary paper and make a presentation on selected sections of the course content.

Name
Demonstrate the required knowledge in the special topic.

Name
Discuss the topic covered in the course.

Name
Write a summary paper and make a presentation on selected sections of the course content.

PLAW4143 - LEGAL DRAFTING

General

Course Prefix
PLAW

Course Number
4143

Description
This course is an introduction to purposes and uses of various legal document drafting formats. The primary focus is on creation of basic legal documents that meet appropriate professional standards.Prerequisites: None

Credit Hours

Minimum Credit Hours:
0

Maximum Credit Hours:
3

(Credit Hours) Value:
3

Contact Hours (not needed)

(Contact Hours) Value (not needed) :
0

Repeatable:
Yes

Number Of Repeats:

Learning Outcomes

Learning Outcomes

Objective
Review the purpose of the code of civil procedure and distinguish among the states where there is variance.

Name
Label various legal documents and delineate their function pertaining to various legal cases.

Name
Review the foundational legal documents of the United States of America including the Declaration of Independence and the Constitution.

Name
Demonstrate a strong knowledge of American law and litigation through drafting a legal memorandum.

Name
Identify various types of audiences through legal document readings.

Name
Review the purpose of the code of civil procedure and distinguish among the states where there is variance.

PLAW4243 - MOOT COURT

General

Course Prefix
PLAW

Course Number
4243

Description
This course will prepare students to work in a team setting. Students will be assigned to a team and will prepare appellate arguments based on hypothetical cases. Students will develop, prepare, and practice their arguments in class. The teams will participate in regional and national competitions that are judged by law school students, professors, and sitting jurists.Prerequisites: None

Learning Outcomes

Learning Outcomes

Objective
Develop good inter-personal and communication skills to prepare written and oral presentations both independently and as a member of a team.

Name
Develop advanced problem solving skills in order to analyze complex fact scenarios and identify the relevant legal issues.

Name
Locate, analyze, and evaluate materials through advanced legal research.

Name
Practice the skills of written advocacy.

Name
Develop good inter-personal and communication skills to prepare written and oral presentations both independently and as a member of a team.

PLAW4413 - ETHICS IN THE LEGAL PROFESSION

General

Course Prefix
PLAW

Course Number
4413

Description
This course introduces students to the types of ethical situations and dilemmas they may encounter in the legal workforce. Students will learn applicable disciplinary rules for both the lawyer and the paralegal, in order to understand how to function responsibly as a legal professional. Prerequisites: Junior standing

Credit Hours

Minimum Credit Hours:

Prerequisites: Junior standing

Learning Outcomes

Learning Outcomes

Objective
Comprehend ways in which law practices can solicit clients and advertise their practice.

Name
Recognize which actions lead to the unauthorized practice of law.

Name
Apply the American Bar Association Model Rules of Professional Conduct.

Name
Apply ethical rules concerning client fees and law firm billing practices.

Name
Describe ethical rules governing client confidentiality and attorney client privilege.

Name
Comprehend ways in which law practices can solicit clients and advertise their practice.

PLAW4443 - ADVANCED LEGAL RESEARCH & THEORY

General

Course Prefix
PLAW

Course Number
4443

Description
This course emphasizes the use of advanced electronic legal research techniques and critical analysis of legal issues. Using a variety of hypothetical and factual situations, students will prepare effective written persuasive presentations in an acceptable legal format.Prerequisites: None

Credit Hours

Minimum Credit Hours:
0

Maximum Credit Hours:
3

Learning Outcomes

Learning Outcomes

Objective
Prepare advanced legal documents which can be used in a legal proceeding.

Name
Select the appropriate research method for analyzing legal documents.

Name
Recognize the various types of legal documents through complex reading and writing.

Name
Show a strong grasp of English rhetoric and composition through an extensive research writing project.

Name
Synthesize online navigation of research material with a persuasive writing and speaking presentation.

Name
Prepare advanced legal documents which can be used in a legal proceeding.

PLAW4903 - PRE-LAW INTERNSHIP

General

Course Prefix
PLAW

Course Number
4903

Description
This course is designed to give students a practical introduction to the legal profession by spending time observing and working with a practicing local attorney or judge. This course is a supervised, structured work experience designed to augment and develop practical experience in conjunction with regular coursework. Students are strongly encouraged to utilize this option to explore potential career paths.Prerequisite: PLAW 3013

Learning Outcomes

Learning Outcomes

Name
Explain how water is transported to a building and how plumbing pipes are distributed throughout, as well as how water leaves the building.

Name
Compare and contrast the difference between the two types of plumbing systems: supply piping and DWV piping.

Name
Identify how the design of plumbing is determined by the effects of pressure and gravity.

Name
Execute the safe usage of basic plumbing tools for both residential and commercial.

Name
Explain the various materials and piping for potable water usage, sanitary drainage, and fuel gas piping.

Name
Demonstrate the installation and tools required for four common plumbing fixtures: toilets, faucets, drop-in sinks and shower trim.

PLMB2113 - TECHNICIAN FUNDAMENTALS II

General

Course Prefix
PLMB

Course Number
2113

Description
In this course, the student will gain an understanding of various fixture drains, analyze and apply water test data to determine treatment solutions as well as be able to describe the function and application of water softeners, filters, etc.

Credit Hours

Minimum Credit Hours:
3

Maximum Credit Hours:
3

(Credit Hours) Value:

Learning Outcomes

Learning Outcomes

Name
Describe key plumbing tasks, hand tools and equipment for each.

Name
Explain proper PPE and safety procedures for tool use.

Name
Configure tubular pipes in addition to some common errors to avoid and understand the various supply trim parts, including supply lines and shut off valves.

Name
Understand the function and various applications of fixture drains and components; differentiating between lavatory, kitchen, shower, roof and floor drains.

Name
Analyze and apply water test data to determine water treatment solutions.

Name
Describe the function and application of water softeners, micron filters, UV disinfectors, reverse osmosis systems and acid neutralizers.

Name
Understand the components and operation of wells and execute water treatment methods for both public water and well water.

PLMB2303 - SAFETY AND CONCEPTS I

General

Course Prefix
PLMB

Course Number
2303

Description
In this course, the student will learn how to identify various types of pipe, fittings, and valves as well as their function in the piping system. The student will also be able to describe the anatomy of a gas and electric water heater and the controls for each.

Credit Hours

Minimum Credit Hours:
3

Maximum Credit Hours:

Number Of Repeats:
0

Number Of Credits:
3

Learning Outcomes

Learning Outcomes

Name
Identify all of the different pipe fittings, including elbows, branches and couplings, as well as demonstrate the proper application for each.

Name
Classify valves and explain how each valve works and when to use them.

Name
Describe the anatomy of each type of water heater; install various types of water heaters and explain the purpose of relief valves, expansion tanks, dip tubes, and anode rods.

Name
Select the piping associated with electric and gas water heaters and explain the function and types of venting.

Name
Identify controls for gas-fired units including standing pilot, piezo igniters, power vent with HSI, vent motors, and pressure switches.

Name
Understand the effects of sediment on a water heater and how to flush sediment out.

Name
Locate, remove, and replace anode rods.

PLMB2313 - SAFETY AND CONCEPTS II

General

Course Prefix
PLMB

Course Number
2313

Description
In this course, the student will be able to describe materials for residential gas piping including pipe type and sizing, tubing, pipe support, and protection for gas systems. The student will also gain an understanding of PVC, flex, and metal pipe leak detection and repair techniques.

Credit Hours

Minimum Credit Hours:
3

Number Of Credits:
3

Learning Outcomes

Learning Outcomes

Name
Explain residential gas piping and the basics of fuel gas in a residential setting, from the point that it enters the home up to the control valve serving individual appliances.

Name
Identify the risks of gas leaks and how to spot and respond to danger; demonstrate safety codes and best practices.

Name
Describe the materials of pipes, tubes, fittings, pipe support and protection, and pipe sizing for gas piping.

Name
Illustrate the various types of joining methods for plastic tubing and piping including comparing the different types of PEX and polyethylene and high density polyethylene tubing and piping.

Name
Repair PVC and PEX fitting leak, damaged CPVC and PEX pipe as well as metal piping.

Name
Understand the fundamentals of backflow and specific hazards related to it; the two causes of reverse flow-backpressure and backsiphonage-and determine ways in which the water supply can be protected.

PLMB3203 - APPLIED COMPETENCIES I

General

Course Prefix
PLMB

Course Number
3203

Description
In this course, the student will learn how to analyze drain clogs and explain repair procedures; analyze and repair manual and automatic flushometers as well as replace damaged cast iron fittings and pipe.

Credit Hours

Minimum Credit Hours:
3

Maximum Credit Hours:
3

Learning Outcomes

Learning Outcomes

Name
Diagnose and repair 5 of the most common problems that occur with a toilet.

Name
Replace the damaged cast iron fitting due to a drainage leak and damaged cast iron pipe due to erosion.

Name
Utilize procedures for repairing and replacing parts and assemblies of the diaphragm-based manual flushometers.

Name
Identify for replacement and installation of two types of retrofitting for diaphragm-based automatic flushometers.

Name
Explain where a drain clog is, including individual fixtures, a branch connection, a stack, and even a main building drain clog and how to remove it.

Name
Repair and unclog various plumbing fixtures.

PLMB3213 - APPLIED COMPETENCIES II

General

Course Prefix
PLMB

Course Number
3213

Description
In this course, the student will learn to troubleshoot and repair common symptoms of a faulty gas heater. The student will gain a full understanding of how to install tankless water heaters.

Credit Hours

Minimum Credit Hours:
3

Maximum Credit Hours:
3

(Credit Hours) Value:
3

3

Number Of Credits:
9

Learning Outcomes

Learning Outcomes

Name
Utilize a multimeter to test the wiring, a pressure gauge and a thermometer to diagnose problems with electric water features.

Name
Identify, troubleshoot and repair the three common symptoms of a faulty gas heater: no hot water, insufficient hot water, and water that's too hot.

Name
Install tankless water heater, water piping, gas piping, venting, and condensate piping

Name
Identify the burner and heating capacity of a tankless water heater

Name
Show the benefits of using the valve kit and how to activate the relief valve in the tankless water heater

Name
Measure the pressure and firing rate of the relief valve in tankless water heater

Name
Summarize the requirements of installing the condensate drain and venting system.

PMCC5003 - FOUND OF PASTORAL CARE & COUNSELING

General

Course Prefix
PMCC

Course Number
5003

Description
This course provides an overview of the need for pastoral care, counseling, and mentoring in the church and how it should be integrated into the ministry of the church. The course deals with the basic training in academic and practical dimensions involved in the preparation of students for the complex task of pastoral care and counseling. The focus is upon the pastor in the congregational setting as a provider of services to individuals, couples, families and groups in the Body of Christ.

Credit Hours

Learning Outcomes

Learning Outcomes

Objective
Determine the importance of being able to assess, evaluate, formulate, and provide a pastoral impression or diagnosis of personal and relational problems and design methods of positive change based on the Bible.

Name
Develop a sound Biblical and theological foundation for conduct by examining the theological and psychological structures, processes and expressions that operate in the whole person.

Name
Examine fundamental care, counseling, and mentoring skills that are used for effective pastoral guidance and direction.

Name
Engage in effective listening and responding skills for those who are in need of pastoral care, counseling, and mentoring.

Name
Recognize ones talents and giftedness, interpersonal boundaries, as well as limits in ones knowledge, expertise, and capacity to deal appropriately, ethically, morally, and legally, and do so within the operational definitions of pastoral work.

Name
Assess and evaluate the complaints and problems brought into pastoral care, counseling, and mentoring situations by individuals, couples, and families in order to determine their nature, extent, severity, and the associated consequences experienced in their lives and relationships.

Name
Determine the importance of being able to assess, evaluate, formulate, and provide a pastoral impression or diagnosis of personal and relational problems and design methods of positive change based on the Bible.

PMCC5013 - SPIRITUAL FORM MINISTERS & LAY LDRS

General

Course Prefix
PMCC

Course Number
5013

Description
This course provides a model for spiritual and psychological growth. It begins from a self-centered perspective and grows step-by-step toward the goal of a Godly life motivated by love and conformed to the image of Christ. This course helps the student identify where they are in this process, leads he/she toward maturity in Christ, and teaches how to care, counsel, and mentor for spiritual growth.

Learning Outcomes

Learning Outcomes

Objective
Design a practical spiritual formation plan (Growth Plan for Life Management) for the next 1-3 years that will serve as a foundation for the student’s overall life and ministry well-being.

Name
Develop self-awareness and understanding of how ones own genetic predisposition to developing meaning in life impacts Christian spiritual formation.

Name
Integrate the spiritual knowledge gained by personal experience with daily spiritual practices in order to develop an understanding and practical structure of how to remain spiritually healthy over a lifetime.

Name
Identify processes that diminish and/or destroy faith over a lifetime that are influenced by ones own personality (shadow traits and pride), by emotional immaturity, by the stresses of ministry, and by ones own expectations.

Name
Utilize devotional practices as a method of discipleship in a ministry context and include ways in which persons may teach others how to use these same practices.

Name
Construct a systematic evaluation of ones own spiritual growth by recognizing the importance of mentors in ones life.

Name
Design a practical spiritual formation plan (Growth Plan for Life Management) for the next 1-3 years that will serve as a foundation for the students overall life and ministry well-being.

PMCC5023 - SELF-CARE FOR MINISTERS & LAY LDRS

General

Course Prefix
PMCC

Course Number
5023

Description
This course will promote the perspective that self-care is under the individual's control. Attention will be given to self-care as learned, purposeful, and continuous, and it refers to the care and cultivation of self in a comprehensive sense, focusing on the minister's spiritual, physical, and psychological health.

Learning Outcomes

Learning Outcomes

Objective
Analyze the physical and psychological antecedents that are indicative of burnout.

Name
Identify basic lifestyle factors that promote the healthy development of the body and mind.

Name
Determine how to modify risk factors in preventing major health problems, including how to self-manage ones physical, spiritual, and psychological health.

Name
Recognize the physical symptoms and consequences of acute and chronic stress.

Name
Implement a plan for spiritual self-care and growth.

Name
Evaluate how to stay within ones sphere of limitation and measure related to ones gifts and talents.

Name
Analyze the physical and psychological antecedents that are indicative of burnout.

PMCC5033 - CRISIS INTERVENTION

General

Course Prefix
PMCC

Course Number
5033

Description
This course studies crisis intervention applied to various crises such as post-traumatic stress disorder, death and bereavement, sexual assault, addictions, partner violence, and loss. Current models of crisis intervention will be investigated, including a multi-step model that informs and empowers the minister and layperson in crisis situations.

Objective
Investigate local and national crisis intervention resources such as crisis hotlines, non-profit organizations, and state and federal government agencies.

Name
Identify the theoretical bases related to crisis intervention models.

Name
Recognize basic interviewing skills necessary to employ effective crisis intervention strategies.

Name
Assess affective, behavioral, and cognitive functioning associated with a person in crisis.

Name
Apply a multi-step model of crisis intervention utilizing a case study format.

Name
Associate crisis intervention approaches applied to specific crises, such as PTSD, lethality, loss, and other crisis scenarios.

Name
Investigate local and national crisis intervention resources such as crisis hotlines, non-profit organizations, and state and federal government agencies.

PMCC5043 - PSYCHOPATHOLOGY

General

Course Prefix
PMCC

Course Number
5043

Description
This course provides an overview of the common forms of abnormal behavior as defined by the psychological community. Symptoms, etiology, and treatment according to the nomenclature of the Diagnostic and Statistical Manual for Mental Disorders (DSM-5) will be used. It is intended to provide the minister with the background to identify, assess, and assist in positive change or refer clients which might present cases beyond the capabilities of the minister. The focus will be on separating physical and psychological (pathological) behavior from Bible-based spiritual issues.

Learning Outcomes

Learning Outcomes

Objective
Describe a Biblical worldview of abnormal behavior and psychopathology.

Name
Identify the historical and contemporary perspectives of abnormal behavior, including a basic understanding of the procedures and methods used to assess and classify abnormal behavior.

Name
Explain the nature and qualifying characteristics of various forms of abnormal behavior including the differential characteristics that distinguish one mental disorder from another mental disorder.

Name
Distinguish between various approaches to treating mental disorders.

Name
Apply critical thinking skills to the assumptions and evaluations made of human behavior by the media, social scientists, academicians, friends, and family.

Name
Appraise ones sensitivity and understanding for those whose lives have been touched by mental illness.

Name
Describe a Biblical worldview of abnormal behavior and psychopathology.

PMCC5053 - MARRIAGE & FAMILY INTERVENTIONS

General

Course Prefix
PMCC

Course Number
5053

Description
This course studies the counseling approaches to marriage and family issues, including the problems associated with communication, problem solution/conflict resolution, and role expectations. Various methods and models of care, counseling, and mentoring will be explored.

Credit Hours

Minimum Credit Hours:
3

Maximum Credit Hours:

Learning Outcomes

Learning Outcomes

Objective
Apply principles and interventions related to family therapy including foundational and postmodern models to others and one’s self.

Name
Identify the historical development of family systems and family therapy.

Name
Recognize the various theories commonly used in marriage and family counseling.

Name
Explore the systemic and environmental factors that affect human development, functioning, and behavior that impacts families.

Name
Examine the effects of crisis, disasters, and trauma that occur in a family system.

Name
Discuss the skills necessary to engage in marriage and family counseling.

Name
Apply principles and interventions related to family therapy including foundational and postmodern models to others and ones self.

PMCC5063 - GROUP DYNAMICS & TECHNIQUES

General

Course Prefix
PMCC

Course Number
5063

Description
This course examines the dynamic of group, especially small groups and their effectiveness. Exploring the dynamic of one and how a small group of individuals can come together and accomplish more than the effort of an individual will be the focus. Related principles, theories, and techniques will be included to broaden an understanding of group dynamics.

Learning Outcomes

Learning Outcomes

Objective
Report on how important group is to one’s own personal growth.

Name
Demonstrate an understanding of the principles and theories related to group dynamics.

Name
Develop an applied knowledge of the various types of groups, the stages of group evolution and the various skills group leaders need to be able to facilitate group work.

Name
Apply an understanding of group counseling methods and techniques.

Name
Identify the importance of the dynamic of a group as it relates to successful functioning within a community setting.

Name
Demonstrate increased awareness of ones self as it applies to the challenges of facilitating a group.

Name
Report on how important group is to ones own personal growth.

PMCC5073 - PERSONALITY LEARNING THEORIES

General

Course Prefix
PMCC

Course Number
5073

Description
This course will familiarize students with the current personality theories utilized in contemporary psychological and counseling environments. Included in the course will be the history of these theories and the applications of them in psychotherapy.

Learning Outcomes

Learning Outcomes

Objective
Apply an acquired understanding of personality theory to one’s life and others.

Name
Describe the major psychology/counseling theories and approaches that explain personality.

Name
Identify the theorists who have made significant contributions to personality learning theory.

Name
Define and compare key personality concepts, terms, and theories related to human growth and social interaction. (humanism, psychoanalytic/ psychodynamic, behaviorism, cognitive, and social-cognitive theories of personality).

Name
Understand how personality theories are used to create psychotherapeutic models used in counseling.

Name
Identify the major issues involved in developing a theory of personality and use this awareness to formulate ones own view of personality.

Name
Apply an acquired understanding of personality theory to ones life and others.

PMCC5083 - PASTORAL COUNSELING & LIFE COACHING

General

Course Prefix
PMCC

Course Number
5083

Description
This course teaches the methods and techniques contained in the Bible that focus on pastoral counseling, mentoring, and life coaching skills, and how to construct and apply those principles using the Bible as the resource.

Credit Hours

Minimum Credit Hours:
3

Maximum Credit Hours:
3

Learning Outcomes

Learning Outcomes

Objective
Apply the basic principles learned in this course to one’s own life.

Name
Acquire a biblical understanding of effective biblical pastoral counseling.

Name
Demonstrate an ability to evaluate, analyze, and assess pastoral issues and make appropriate pastoral suggestions and recommendations.

Name
Identify the methods and techniques found in the Bible that can be resources for effective mentoring.

Name
Describe the skills necessary for effective life coaching using the Bible.

Name
Facilitate the methods and techniques obtained in this course to be an effective listener, mentor, and life coach.

Name
Apply the basic principles learned in this course to ones own life.

PMCC5093 - HUMAN GROWTH & DEVELOPMENT

General

Course Prefix
PMCC

Course Number
5093

Description
This course provides an introduction to developmental psychology. It explores the different stages of the human life-span: prenatal, infancy, childhood, adolescence, adulthood, as well as the biological, psychological, and social changes that occur concurrently. Topics include: theories of development, genetics and development, birth and the neonate, cognitive and brain development, early experience, attachment, motor and language development, social, sex-role and moral development, and aging and death.

Learning Outcomes

Learning Outcomes

Objective
Integrate basic principles of developmental psychology to the student's own life experiences.

Name
Demonstrate an understanding of theories, methods, and research findings of life-span psychology.

Name
Describe how people change in terms of their physical, cognitive, and social and emotional development.

Name
Compare the major developmental theorists and what each brings to or adds to the study of human development.

Name
Evaluate the research on the relative contributions of heredity (nature) versus environment (nurture) to various aspects of development.

Name
Identify some of the factors that put people at increased risk for developing psychological problems at each stage of the lifespan.

Name
Integrate basic principles of developmental psychology to the students own life experiences.

PMCC5103 - PRACTICUM I

General

Course Prefix
PMCC

Course Number
5103

Description
This course provides instruction in the application of pastoral care, counseling, and life coaching, supervision, and practice. Students will conduct simulated practical applications in the areas of pastoral care, counseling, and life coaching under faculty supervision.Prerequisite: PMCC 5063 and PMCC 5073

Course Requisites

Type
Completion Requirement

Prerequisites

Complete ALL of the following Courses:

- PMCC5073 - PERSONALITY LEARNING THEORIES
  AND PMCC5063 - GROUP DYNAMICS & TECHNIQUES

Learning Outcomes

Learning Outcomes

Objective
Develop knowledge and experience that will produce a more understanding, competent, and confident minister.

Name
Engage in practical experience in the ministry of pastoral care and counseling.

Name
Acquire practical skills that will provide an opportunity for selfexploration and assessment for the various issues found in church communities needing pastoral care, counseling, mentoring, and life coaching.

Name
Provide an opportunity to analyze and resolve challenges found in the real world of pastoral care, counseling, mentoring, and life coaching.

Name
Gain practical experience in the operations of a successful ministry as well as the daily duties of ministers, lay ministers, and volunteers in the ministry.

Name
Build interpersonal skills that are important and necessary to help and minister to the community in which they serve.

Name
Develop knowledge and experience that will produce a more understanding, competent, and confident minister.

PMCC5203 - PRACTICUM II

General

Course Prefix
PMCC

Course Number
5203

Description
This course provides actual (on-site) pastoral care, counseling, and life coaching instruction, supervision, and practice in an approved setting. The practicum students will be supervised by qualified individuals approved by the faculty Practicum professor.Prerequisite: PMCC 5103

Credit Hours

PMIN1001 - RELATIONAL INTELLIGENCE I

General

Course Prefix
PMIN

Course Number
1001

Description
This course explores relational intelligence from a Christ-centered perspective. It provides a framework for building healthy, God-honoring relationships in various arenas of life including ministry and leadership. There is emphasis on self-awareness and social awareness, developing conversational skills, learning to ask questions, listen attentively, and remain fully present. Students will be introduced to effective practices for growing in empathy, likeability, conflict management skills, and learn how to set healthy relational boundaries. This course complements the content in PMIN 1011 and 1021.

Learning Outcomes

Learning Outcomes

Objective
Understand their God-given gifting and how it should be used inside and outside the church and in every facet of life.

Name
Evaluate how scripture systematically communicates that the church and Christians were created for multiplication, not consumption.

Name
Analyze biblical texts related to how the different roles of ministry and related giftings can be applied to any church, believer, and ministry worldwide.

Name
Apply the five core parts of being a Christian who is a Multiplier, setting the foundation for living a productive and fruitful Christian life.

Name
Understand their God-given gifting and how it should be used inside and outside the church and in every facet of life.

PMIN1031 - CALLED

General

Course Prefix
PMIN

Course Number
1031

Description
This course teaches that all people have a God-given calling. In fact, there are two different kinds of callings that each one of us has. We have a general calling and a specific calling. God's general calling is for us to live a holy life, to know Jesus intimately, to forgive when we've been treated unfairly, to live in freedom, and to serve one another. Ultimately, each of us is called to advance God's kingdom through faith, hope, and love being expressed through our lives. However, God also gives each of us a specific calling and this is the focus of this course.

PMIN1041 - THE BAIT OF SATAN

General

Course Prefix
PMIN

Course Number
1041

Description
This course covers the topic/issue of offense both in the individual and in the life of the church along with other ministry contexts. The greater our expectations, the greater potential we have to be offended. Once we're offended, we begin to build walls in our relationships to protect and insulate ourselves from additional wounds. Over time, these walls become mental and emotional strongholds that do us more harm than good. Holding on to offense activates a progressive chain of pain in our lives and for those around us.

PMIN1051 - UNDER COVER

General

Course Prefix
PMIN

Course Number
1051

Description
This course will teach students about living under legitimate and life-giving authority. Cover or authority can be a positive behavior both in one's own life, the life of a leader, and in any ministry/organizational context. Those who are under God's cover gain access to His benefits of peace, protection, and provision. The question we should ask is: how do we stay under cover and access these benefits? Scripture gives us a clear answer: we are under cover when we are under authority.

PMIN1053 - STRATEGIC IMAGINATION

General

Course Prefix
PMIN

Course Number
1053

Description
In an era defined by rapid change and ethical guesswork, Christ-centered professionals across diverse sectors — from religion to business — are rediscovering the important values and sacred concerns of moral precision, strategic imagination, and anguish and virtue. This course will explore Strategic Imagination and the leader's ability to biblically envision and conceptualize innovative strategies in the face of complex and dynamic environments. This course will focus on Moral Imagination, a framework that challenges leaders to remain embodied in the immorality (crisis) of society while at the same time providing a future design that is both moral and redemptive.

Name
The student will have a thorough and lifelong understanding of Strategic Imagination and its vital role in leadership.

Name
The student will be able to identify theological differences between vain imagination and strategic imagination.

Name
The student will be able to articulate the principles of sacred leadership and apply them across varied settings, including corporate, community, and ecclesiastical environments.

Name
The participant will develop better strategic foresight and learn how to conduct an environmental assessment through the lens of sacred leadership.

Name
The participant will be able to integrate relevant philosophical and theological frameworks that enrich their understanding of moral and ethical leadership.

PMIN1093 - ANGUISH & VIRTUE

General

Course Prefix
PMIN

Course Number
1093

Description
In an era defined by rapid change and ethical guesswork, Christ-centered professionals across diverse sectors — from religion to business — are rediscovering the important values and sacred concerns of moral precision, strategic imagination, and anguish and virtue. The course will explore Anguish and Virtue and the complex interplay between suffering (anguish) and moral excellence (virtue). Not only must a leader face personal tensions of anguish and virtue, but they are also responsible for providing sacred guidance and sensemaking to their world around them.

PMIN1113 - MORAL PRECISION

General

Course Prefix
PMIN

Course Number
1113

Description
In an era defined by rapid change and ethical guesswork, Christ-centered professionals
across diverse sectors — from religion to business — are rediscovering the important
values and sacred concerns of moral precision, strategic imagination, and anguish and
virtue. This course will focus on Moral Precision from a Biblical perspective and explore
the leadership processes of moral clarity and moral obligation. As organizations grapple
with complex challenges, it's imperative that Christ-centered leaders become resolute
champions of organizational designs that are biblical, groundbreaking, and teeming with
relational promise.

PMIN1403 - UNDERSTANDING & PASTORING FAMILIES

General

Course Prefix
PMIN

Course Number
1403

Description
This course equips students to understand and pastor families across generations by integrating biblical theology, developmental research, and cultural analysis. Emphasis is placed on partnering with parents as primary faith influencers, discerning contemporary worldviews shaping children, youth, and young adults, and fostering aligned, intergenerational ministry within the local church. Students will engage current generational research and emerging trends to develop thoughtful, ethical, and trauma-informed pastoral strategies for NextGen families.

Learning Outcomes

Learning Outcomes

Name
Articulate a coherent theology of family, church, and intergenerational discipleship that informs parent partnership and aligned adult–NextGen ministry.

Name
Evaluate and synthesize research from theology, developmental science, and cultural studies to inform ethical, evidence-based ministry with children, youth, and families.

Name
Analyze contemporary and emerging generational worldviews (Gen Alpha, emerging adulthood, and beyond) and design biblically grounded pastoral responses without speculation-driven practice.

Name
Understand and integrate collaborative, trauma-informed parent discipleship strategies that integrate pastoral care across life stages in partnership with church leadership.

PMIN1503 - THE GOSPEL FOR THE NEXT GENERATION

General

Course Prefix
PMIN

Course Number
1503

Description
This course prepares students to communicate the gospel effectively to children and adolescents by integrating developmental theory, biblical pedagogy, and creative communication practices. Students learn to present the gospel through the unified redemptive story of Scripture—Creation, Fall, Redemption, and Restoration—and to adapt that story across ages, abilities, and cultural contexts using storytelling, teaching, digital media, and interactive design. Emphasis is placed on developmentally appropriate discipleship, accommodating learning environments, and engaging, well-managed group settings that invite the next generation into God's redemptive work.

Learning Outcomes

Learning Outcomes

Name
Apply research-informed frameworks of child and adolescent development to communicate the gospel as the coherent, Scripture-shaped story of God's redemptive purposes.

Name
Communicate Scripture clearly and compellingly across multiple contexts and mediums, employing metanarrative, expository, and creative approaches appropriate to audience and setting.

Name
Design and lead accommodating ministry environments that address diverse ability differences through thoughtful pedagogy, volunteer coaching, and parent collaboration.

Name
Implement effective classroom and group engagement practices that integrate creative arts, storytelling, and clear expectations to support gospel-centered learning and discipleship.

PMIN1513 - EXTENSION SITE PRACTICUM I

General

Course Prefix
PMIN

Course Number
1513

Description
This course is an integrative learning experience, where the university partners with extension sites to create robust training. Practicum I provides students service opportunities and interaction with local church leadership. Special attention is given to the development of the students calling and divine design. Practicum I and Practicum II provide the framework for practicum III through the senior capstone.

PMIN1603 - EFFECTIVE NEXTGEN MINISTRY OUTCOMES

General

Course Prefix
PMIN

Course Number
1603

Description
This course equips students to design and evaluate NextGen ministry with clarity of purpose, theological coherence, and long-term spiritual outcomes in view for the church as a whole. Students will learn to assess ministry models, plan teaching with intentional scope and sequence, and integrate curriculum that aligns with Scripture, developmental stages, church vision, and organizational priorities. Emphasis is placed on outcome-based leadership, the metanarrative of Scripture, and human-centered learning as drivers of sustainable discipleship, volunteer engagement, and shared mission across the congregation.

Learning Outcomes

Learning Outcomes

Name
Define and assess spiritual growth objectives for NextGen ministry that contribute to the church’s broader theory of ministry and long-term discipleship outcomes.

Name
Evaluate ministry models and curricula with theological, developmental, and missional discernment, articulating how chosen approaches support organizational clarity, alignment, and stewardship.

Name
Design multi-year teaching plans that reflect the unified redemptive story of Scripture and foster theological balance, continuity, and shared language across ministries.

Name
Create biblically faithful, age-appropriate curriculum and learning experiences that align with church culture, leadership gifting, and sustainable volunteer and congregational engagement.

PMIN1703 - NEXTGEN MINISTRY LEADERSHIP

General

Course Prefix
PMIN

Course Number
1703

Description
This course prepares students for strategic leadership in NextGen ministry by integrating developmental understanding, organizational leadership, and discipleship-focused planning. Students will develop skills in vision casting, team and volunteer recruitment and multiplication, event leadership, and resource stewardship while navigating the complexities of church structures and change. Emphasis is placed on safety and security, effective communication, and adaptive leadership that aligns ministry practices with long-term spiritual outcomes

Learning Outcomes

Learning Outcomes

Name
Design and lead strategic NextGen ministries, events, and discipleship pathways that align with developmental frameworks and desired spiritual outcomes.

Name
Recruit, train, and multiply volunteer leaders while clearly communicating vision, roles, and expectations within diverse church structures.

Name
Demonstrate responsible stewardship through budgeting, risk management, and safeguarding practices that promote safe and sustainable ministry environments.

Name
Lead effectively through organizational change by applying adaptive leadership, critical thinking, and strategic communication with key stakeholders.

PMIN1803 - PASTORING THE NEXT GENERATION

General

Course Prefix
PMIN

Course Number
1803

Description
This course focuses on the pastoral formation and practical skills required to shepherd the next generation with wisdom, integrity, and compassion. Students will develop relational, ethical, and trauma-informed approaches to caring for children, youth, families, and volunteer teams and recognize the opportunity to engage the community through strategic partners such as schools and other community organizations. Emphasis is placed on biblical fluency in cultural engagement, responding to crises, and sustaining healthy pastoral practices within accountable ministry contexts.

Learning Outcomes

Learning Outcomes

Name
Demonstrate Christ-centered relational shepherding with children, youth, families, and volunteers, fostering healthy community and pastoral accountability.

Name
Respond appropriately to crises and trauma by applying ethical standards, mandated reporting requirements, and referral best practices.

Name
Implement ministry practices that foster spiritual formation for children, youth, families, and volunteers, ensuring welcoming environments for individuals of all learning abilities.

Name
Apply Scripture wisely in pastoral conversations and cultural engagement, helping the next generation interpret life through the biblical story.

PMIN1913 - MOBILIZING THE NEXT GEN FOR MISSION

General

Course Prefix
PMIN

Course Number
1913

Description
This course equips students to mobilize children and youth for mission by integrating biblical fluency, missional theology, and practical evangelism strategies across local, digital, and global contexts. Students will discover how active service and the pursuit of justice create authentic bridges for sharing the gospel in diverse contexts. Emphasis is placed on cultivating sustainable outreach cultures, age-appropriate evangelism, and wise stewardship of digital platforms.

Learning Outcomes

Learning Outcomes

Objective
Influence parents to assume the primary responsibility of leading their children morally and spiritually.

Objective
Create consistent family experiences within the church as a catalyst for meaningful interaction at home.

Objective
Design resources so core truths can be taught at home and church in a synchronized effort.

Objective
Re-engage parents with relevant content at each developmental phase and milestone.

Objective
Prioritize families who don't yet go to church.

Objective
Provide community and parent coaching to develop critical skills so they can be a positive influence and have healthy relationships with their children.

Objective
Create a digital strategy to cue parents weekly.

PMIN3022 - SEU CONFERENCE

General

Course Prefix
PMIN

Course Number
3022

Description
This course offers a unique and dynamic learning experience, specifically tailored around our annual SEU Conference. Explore diverse perspectives shared by influential pastors, gaining a deep understanding of fundamental aspects and essential skills for impactful ministry. As the SEU Conference unfolds annually with new voices and fresh perspectives, this course adapts to reflect the evolving nature of ministry, equipping both budding ministers and seasoned practitioners to navigate contemporary challenges and opportunities.

Learning Outcomes

Learning Outcomes

Objective
Demonstrate a comprehensive understanding of key topics, trends, and best practices in ministry leadership presented during the conference sessions.

Name
Synthesize conference content, reflective assignments, and application projects in their final project, demonstrating a comprehensive integration of knowledge and experience into a cohesive and forward-looking ministry leadership approach.

Name
Develop and implement strategic action plans based on conference learning, showcasing the ability to plan, execute, and assess initiatives within a ministry context.

Name
Enhance their communication skills by actively participating in discussions, articulating conference insights, and presenting their final project with clarity and coherence.

Name
Explore and articulate the intersection of faith and leadership principles, demonstrating an understanding of how personal beliefs inform their approach to ministry leadership.

Name
Establish and cultivate professional relationships with fellow conference attendees, speakers, and mentors, contributing to the development of a supportive and collaborative network.

Name
Engage in critical self-reflection, analyzing how their personal beliefs and values align with or challenge the leadership principles discussed in the conference, fostering deeper self-awareness.

Name
Apply insights gained from conference sessions to develop practical strategies and solutions for real-world ministry challenges, demonstrating the ability to translate knowledge into action.

Name
Demonstrate a comprehensive understanding of key topics, trends, and best practices in ministry leadership presented during the conference sessions.

Course Requisites

Type
Completion Requirement

Prerequisite

Complete ALL of the following Courses:

- BIBL2622 - BIBLICAL HERMENEUTICS
  OR BIBL2623 - BIBLICAL HERMENEUTICS

Learning Outcomes

Learning Outcomes

Objective
Demonstrate how to aid listeners in following the flow of a sermon

Name
Explain the relationship of the Spirit to interpreting Scripture for the purpose of proclamation.

Name
Create sources for future sermon development by means of class lectures, group discussions, note taking, reading and observation.

Name
Apply the principles of hermeneutics to a biblical text as part of sermon preparation.

Name
Apply the principles of a biblical passage to the lives of a sermons listeners.

Name
Develop skills in the creation of an expository sermon.

PMIN3143 - LIVE CHURCH PRODUCTION TECHNOLOGY

General

Course Prefix
PMIN

Course Number
3143

Description
This course is a study of the application of audio and multimedia technologies in church, concert, conference, and large event settings. Specific attention is paid to: preparing the multimedia component of a service, producing large scale worship environments, and how to work with a production team effectively.

Learning Outcomes

Learning Outcomes

Name
Explain the foundational principles that guide effective church social media strategy.

Name
Design a clear, implementable social media policy that includes ethical safeguards and volunteer expectations.

Name
Transform sermon content into multi-format social media assets using platform-appropriate storytelling techniques.

Name
Construct a streamlined, one-page social media calendar that aligns content cadence with organizational priorities.

Name
Interpret key social media performance metrics and use them to inform iterative content improvements.

Name
Evaluate communication approaches for youth audiences, recognizing safety, cultural trends, and platform behaviors.

Name
Apply governance, measurement, and creative frameworks to real-world ministry or nonprofit contexts.

PMIN3513 - EXTENSION SITE PRACTICUM V

General

Course Prefix
PMIN

Course Number
3513

Description

This course is an integrative learning experience, where the university partners with extension sites to create robust training. Practicum V provides students service opportunities and interaction with local church leadership. This course focuses on the variety of callings, how to use the Bible to help others identify God's will, how to recognize the different elements related to calling, how to mentor others, the role of emotional intelligence, and how to lead in a variety of settings.

PMIN3833 - ORGANIZATIONAL LEADERSHIP

General

Course Prefix
PMIN

Course Number
3833

Description
A theology of leadership is developed upon which current trends in church organization and leadership techniques are assessed. The history of organizational and management theory is developed, as well as organization, leadership, and group process theories. Planning, programming, budgeting, and evaluation are considered in relation to congregational programs. Other areas of management are presented on an introductory basis, such as planning and managing change in an organization, systems analysis, conflict management, and review of leadership traits. This course requires careful study of and reflection upon the appropriate biblical texts.

PMIN4083 - CRISIS PSYCHOLOGICAL MANAGEMENT

General

Course Prefix
PMIN

Course Number
4083

Description

The first few days through which individuals experience crisis are critical to their physical and psychological survivability. Support personnel must understand the foundational aspects of acute distress in both those experiencing crisis and those providing relief and support. Students are trained to identify stress symptoms and emotional suffering in order to assist as much as appropriate and then to direct individuals to qualified support specialists. This course is not intended for professional or trained counselors, but for those who are on site immediately following natural or human caused disasters. This course is cross-referenced with PSYC 4123.

PMIN4093 - PUBLIC POLICY & ADVOCACY

General

Course Prefix
PMIN

Course Number
4093

Description
Governments use public policy to address social problems such as housing and welfare, to counter threats such as crime and illegal drugs, and to pursue other objectives, including revenue generation. A nation’s regulatory, distributive, and redistributive policies have direct impact to prevent, mitigate the impact, and to recover from internal crises. This course prepares students to interact with and influence decision makers at all governmental levels, and engaging agency administration at every level. Special focus is on advocacy for those people who often have a weaker voice to the decision process. This course is cross-referenced with HUSV 4093.

POLS1013 - INTRODUCTION TO US GOVERNMENT

General

Course Prefix
POLS

Course Number
1013

Description
This course provides a comprehensive exploration of the American system of government, focusing on its unique characteristics, exceptionalism, and founding principles. Students will delve into the significance of the American Constitution as the longest-lasting national written constitution in history, and examine the foundational documents that shaped the American government. Through the lens of political theory, students will analyze and evaluate ongoing debates on various topics, including nullification, D.C. Statehood, impeachment, the Electoral College, individual rights, and government-given rights. The course will also explore the biblical view of government, citizenship, and the contributions of different spheres of life to the American founding principles, with a special emphasis on freedom. Additionally, students will study different types of law, the structure of the American Legislative Branch, political parties, and electoral behavior in America. By the end of the course, students will gain a deep understanding of the American political system, their role as citizens, and the factors that have contributed to America's exceptionalism and success.

Examine various public policies relevant to state and local governments.

Name
Define the purpose and politics of state and local governments.

Name
Identify the role of constitutional democracy in the politics and public policy making.

Name
Recognize the role that federalism and intergovernmental relations play in the politics and policy-making of state and local governments.

Name
Understand the differences among the states and localities four branches of government: legislative, executive, bureaucratic, and judicial.

Name
Explain the increasing importance of community politics.

Name
Examine various public policies relevant to state and local governments.

POLS3013 - HIST OF SELF GOVERN DURING REV ERA

General

Course Prefix
POLS

Course Number
3013

Description
This course explores the historical evolution of early American political thought, focusing specifically on the development of self-governance during the Revolutionary Era. Grounded in a commitment to socio-historical inquiry, students examine how human behavior, culture, and early political structures reflect patterns of divine providence and moral responsibility. The curriculum emphasizes the Judeo-Christian moral tradition and the *imago Dei* framework that shaped the nation's founding, equipping students to understand the founders' intent and defend the principles of the rule of law, private property, free markets, and religious liberty. Additionally, students analyze early American developments to foster a limited-government conviction and fiscal responsibility, focusing on seeking the common good under divine authority rather than human autonomy. Through this rich historical lens, individuals are prepared to engage civic life with conviction, competence, character, and moral courage.

Learning Outcomes

Name
Analyze the historical evolution of early American political thought and self-governance during the Revolutionary Era through socio-historical inquiry

Name
Explain how the Judeo-Christian moral tradition and the imago Dei framework shaped early American political structures and concepts of moral responsibility.

Name
Defend the foundational principles of the rule of law, private property rights, free markets, and religious liberty based on an analysis of the founders' intent.

Name
Examine early American political developments to illustrate the philosophical and practical arguments for limited government and fiscal responsibility.

Name
Synthesize historical perspectives on divine authority and human governance to articulate how individuals can engage civic life with conviction, competence, character, and moral courage.

POLS3053 - FOOD AND POLITICS

General

Course Prefix
POLS

Course Number
3053

Description
This course provides an overview of the politics and institutions that have shaped and continue to shape food production and consumption. This course will analyze the decisions individuals make about what to eat, and how society should manage food production and consumption. Food politics and policies have critical implications for the environment, public health, social justice, and political equality. Topics will include: agricultural subsidies, taxation, farming practices, food safety, labeling requirements, and nutrition guidelines.Prerequisite: None

POLS3113 - BUSINESS OF POLITICAL SCIENCE

General

Course Prefix
POLS

Course Number
3113

Description
This course explores the business of politics—where ideas, money, media, and influence intersect. Students will examine how campaigns and advocacy organizations operate behind the scenes: how they raise and allocate funds, manage personnel and vendors, purchase advertising, and measure return on investment. The course investigates the complex relationships between political actors, donors, lobbyists, consultants, and commercial interests, emphasizing both strategic and ethical dimensions. Through case studies and simulations, students will learn how financial incentives shape political behavior, how public opinion is monetized and managed, and how professionalization has transformed the practice of politics into a business.

PRJM2013 - APPLIED PROJECT MANAGEMENT

General

Course Prefix
PRJM

Course Number
2013

Description
This course will enable students to effectively use industry-recognized project management software. Students will learn to effectively manage a project by breaking it down into manageable parts and creating a schedule outline with task dependencies. They will apply these skills in real-world scenarios, utilizing resources and calendars to track schedules and costs, employing Earned Value Management and the Critical Path Method to ensure timely completion. Students will communicate progress through engaging status reports and correctly close the project for future reference.Prerequisite: NoneCorequisite: PRJM 2143

Learning Outcomes

Name
Identify key topics, issues, and trends pertinent to quality management.

Name
Discuss the impact of the key topics, issues, and trends on quality management.

Name
Apply problem-solving and critical-thinking skills to quality management.

Name
Formulate quality management strategies to improve services and operations.

Name
Integrate concepts from other program courses.

PRJM2043 - PROJECT RISK MANAGEMENT

General

Course Prefix
PRJM

Course Number
2043

Description
This course will enable students to demonstrate knowledge and expertise in the specialized area of assessing and identifying project risks along with plans to mitigate threats and capitalize on opportunities. It also prepares students for the internationally recognized Risk Management Professional (PMI-RMP) certification exam by Project Management Institute based on experience.

PRJM2123 - PLANNING AND SCHEDULING

General

Course Prefix
PRJM

Course Number
2123

Description
In this course, students will learn high-level planning for relevant processes, and procedures to achieve project goals. Project planning, scheduling and monitoring of construction projects including development of critical path networks (CPM & PERT), Gantt bar charts and construction cost control and reporting practices. Prepares students for the internationally recognized Scheduling Professional (PMI-SP) certification exam by Project Management Institute based on experience.

Learning Outcomes

Learning Outcomes

Name
Apply the basic concepts and techniques of creating and managing a construction schedule, which includes planning, scheduling, cost/resource allocation and controls

Name
Identify and develop Work Breakdown Structures (WBS)

Name
Create a critical path method (CPM) schedule for a construction project and manage the schedule from pre-construction to final completion.

Name
Apply cost and resource loading principals and identify the correlation to the estimate

Name
Recognize common project delays and propose solutions to best approach them

Name
Analyze management of change orders that are identified during the course of construction

Name
Identify and execute Project management process (PDCA) and understand the time impact analysis (TIA)

PRJM2133 - PROJECT MANAGEMENT CAPSTONE

General

Course Prefix
PRJM

Course Number
2133

Description
This course focuses on the integration of knowledge, skills and abilities learned in the program through a capstone project. To be taken during the last semester of the program.

Discuss the impact of the key topics, issues, and trends on the delivery of business in the global economy.

Name
Apply problem-solving and critical-thinking skills in the comprehensive analysis of a selected topic.

Name
Formulate management strategies to improve business services and operations based on the analysis of the selected issues and trends.

Name
Integrate concepts from other program courses.

PSYC1033 - A CHRISTIAN VIEW OF PSYCHOLOGY

General

Course Prefix
PSYC

Course Number
1033

Description

This course provides students with a context for the field of psychology based on a theologically informed Person-Path-Purpose model. The model incorporates a theological anthropology, a creation-fall-redemption narrative, and the concepts of ordered/disordered affections/loves. The course moves beyond describing thought and behavior and provides students with the tools to make prescriptive judgments about their lived experiences. Personal applications for students range from properly defining the self and other to concrete steps toward living life well. The corresponding textbook will provide further detail for the above model with chapters on The Person, The Developing Person, and Flourishing in addition to other key, contextual material.Prerequisite: None

Learning Outcomes

Learning Outcomes

Objective
Explain the concept of psychologies and how this concept provides more definitional precision and therefore better understanding of the various subfields of psychology.

Objective
Distinguish between materialistic and theistic views of psychology's key concepts.

Objective
Demonstrate an understanding of the creation-fall-redemption and ordered/disordered affections theological frameworks within a theological anthropology.

Objective
Apply a theological anthropology and the Person-Path-Purpose model to human development, social functioning, human flourishing, and human dysfunction.

Objective
Identify the characteristics of design across human biological and cognitive systems.

PSYC1133 - INTRODUCTION TO PSYCHOLOGY

General

Course Prefix
PSYC

Course Number
1133

Description
This course is an introduction to the field of psychology. Topics addressed are neuroscience and behavior, nature and nurture, consciousness, sensation and perception, learning, memory, intelligence, personality, psychological disorders, and social behavior.

Credit Hours

Minimum Credit Hours:
0

Maximum Credit Hours:

Learning Outcomes

Learning Outcomes

Objective
Understand the scientific method as it applies to the field of psychology.

Name
Define psychology and understand the evolution of psychology from its early pioneers to contemporary concerns.

Name
Identify the three main levels of analysis in the biopsychosocial approach and understand why psychologys varied perspectives are complementary.

Name
Identify the major attributes of neuroscience and their application to human behavior.

Name
Understand human growth and development from a life-span perspective.

Name
Understand physiological bases of sensation and perception and their relationship to human behavior.

Name
Understand cognitive processes with an emphasis on learning and conditioning.

Name
Define personality and identify various personality theories and their respective authors.

Name
Identify the major classifications of psychological disorders and their basic symptomologies.

Name
Understand the scientific method as it applies to the field of psychology.

PSYC1233 - PERSONAL AND SOCIAL ADJUSTMENT

General

Course Prefix
PSYC

Course Number
1233

Description
This course is an introduction to human adjustments and the resulting forms of behavior. Emphasis is placed on the fundamental principles underlying normal behavior. This course helps students apply mental health principles to everyday living.

Learning Outcomes

Learning Outcomes

Objective
Demonstrate intellectual and practical fluency in the stewardship of mental health & wellness.

Name
Evaluate the relationship between Christian faith and psychology and its approach to understanding and resolving unanswered questions.

Name
Identify key concepts that provide a foundation for understanding adjustment.

Name
Define personality and identify major theories/issues in the study of personality.

Name
Identify what stress is and describe its major components.

Name
Describe what coping is and select specific coping strategies.

Name
Identify the types of love and other factors involved in love.

Name
Examine the diversity of human lifestyles and how they influence peoples lives.

Name
Identify the characteristics and classification of abnormal behaviors and compare biological therapies and psychotherapies for treatment options.

Name
Demonstrate intellectual and practical fluency in the stewardship of mental health & wellness.

PSYC2003 - COMM & CAREERS IN PSYCHOLOGY

General

Course Prefix
PSYC

Course Number
2003

Description
This course is an introduction to communication in the field of psychology. Students will develop skills in information literacy, comprehension of peer-reviewed literature, synthesis of information, and use of proper APA standards. Students will also develop their verbal presentation skills. Additionally, students will be introduced to the different career opportunities at both baccalaureate and graduate-degree levels as well as requirements and skills required for admissions into graduate school.prereq: PSYC 1133

Learning Outcomes

Learning Outcomes

Objective
Identify the knowledge and skills required to successfully apply to graduate programs in psychology.

Name
Apply correct APA-style guidelines to their written work.

Name
Locate scholarly information from both library and online sources.

Name
Identify key information in scholarly sources.

Name
Synthesize information from scholarly sources.

Name
Explain ethical issues related to scholarship (e.g., authorship, plagiarism).

Name
Demonstrate effective verbal communication skills needed to make a professional presentation.

Name
Explain the different specializations within the field of psychology.

Name
Describe the career opportunities available in psychology at the bachelors, Masters, and Doctoral level.

Name
Identify the knowledge and skills required to successfully apply to graduate programs in psychology.

PSYC2013 - RESEARCH METHODS

General

Course Prefix
PSYC

Course Number
2013

Description
This course addresses the application of various research methods of inquiry in application to theory and practice for the purpose of knowledge building and the development of best practice. Emphasis is on developing general research skills that can be applied within any area of psychology. The content of this course includes research design, quantitative and qualitative research methodologies, systematic evaluation of practice, and evaluation of theory. The focus is on the development of research and practice with individuals, groups, organizations, and communities.Prerequisite: PSYC 2003Corequisite: PSYC 2023

Learning Outcomes

Learning Outcomes

Objective
Chapter Two-Literature Review, and Chapter Three- Methodology/Design.

Name
Apply a basic understanding of the different approaches utilized in psychological research.

Name
Describe the nature of psychological research, including theory formulation, hypothesis testing, variable selection and control, and quantitative and qualitative analysis and evaluation.

Name
Apply critical thinking skills to evaluate professional, peer-reviewed research.

Name
Demonstrate a sensitivity and understanding for the ethical principles that govern research with human participants.

Name
Describe potential biases and how issues of race, gender, socioeconomic status, religion, and cultural/ethnic diversity can affect all stages of the research process.

Name
Develop a research proposal to include; Chapter One- Introduction,

Name
Chapter Two-Literature Review, and Chapter Three- Methodology/Design.

PSYC2023 - STATISTICAL METHODS

General

Course Prefix
PSYC

Course Number
2023

Description
This course studies the application of statistical methods to existing data. Topics include organizing and presenting data, descriptive and inferential measures, and interpreting statistical information. Emphasis will be on sampling, probability, hypothesis testing, and appropriate application of statistical tests. Prerequisite: MATH 1213Corequisite: PSYC 2013

Learning Outcomes

Objective
Demonstrate the ability to make decisions and recommendations based on statistical analysis.

Name
Demonstrate general understanding of the nature and uses of statistics, particularly in psychology and education.

Name
Demonstrate a comprehension of the various kinds of statistical data and their collection, analysis, and interpretation.

Name
Construct and interpret various methods for organizing and displaying data.

Name
Demonstrate a working knowledge of the methods and uses of descriptive statistics.

Name
Demonstrate a working knowledge of the methods and uses of inferential statistics.

Name
Demonstrate the ability to make decisions and recommendations based on statistical analysis.

PSYC2033 - INDUSTRIAL & ORGANIZATIONAL PSYC

General

Course Prefix
PSYC

Course Number
2033

Description
This course includes an application of psychological principles to industry, business, and other organizations. Topics include organization of work, selection, training, motivation, job satisfaction, supervision, and decision-making.Prerequisite: PSYC 1133 or PSYC 1233

Credit Hours

Learning Outcomes

Learning Outcomes

Objective
Explain the definition of industrial and organizational psychology (I-O) and the importance of conducting research in the I-O field.

Objective
Differentiate between the various research methods utilized in I-O Psychology.

Objective
Develop a working knowledge of job analysis and the concept of job evaluation.

Objective
Explain how the principles of psychology are used to select, develop, and manage employees.

Objective
Identify the ways that I-O psychologists apply their knowledge to improve the lives of workers and the performance of organizations.

Objective
Describe the nature of occupational stress and its impact on occupational health.

Objective
Explain the impact technology has in the field of I/O psychology.

Objective
Describe the nature of teams, work groups, and leadership and their impact on organizational development.

Objective
Evaluate and apply communication strategies appropriate to I-O psychology for resolving organizational communication problems, including cross-cultural misunderstandings.

PSYC2133 - THEORIES OF PERSONALITY

General

Course Prefix
PSYC

Course Number
2133

Description
This course is an introduction to the study of personality formation. Major personality themes are critically examined. Students are introduced to the application of these theories in counseling and the treatment of mental illness.Prerequisite: PSYC 1133 or PSYC 1233

Learning Outcomes

Objective
Apply personality theory to case study examples.

Name
Describe the term personality and the concepts associated with the term.

Name
Differentiate between and describe the basic constructs and background of Psychoanalytic, Life-Span, Behavioral, Humanistic, Cognitive, Social Learning, and other theories of personality.

Name
Identify some of the common methods of personality assessment and recognize the kinds of interpretations that reasonably may be made based on such assessments.

Name
Identify and articulate biblical and Christian concepts which relate to personality theory and development.

Name
Apply personality theory to case study examples.

PSYC2233 - MARRIAGE & FAMILY

General

Course Prefix
PSYC

Course Number
2233

Description
This course is a study of the major issues related to courtship, marriage, and family formation. Special attention is given to the social conditions influencing courtship, marriage, divorce, and family life. Topics include dating rituals, gender differences, expectations, parenting, family dysfunction, family violence, and strategies for sound relating. The role of family counselors and therapists is also discussed.

Learning Outcomes

Learning Outcomes

Objective
Apply a Biblical worldview of abnormal behavior and psychopathology.

Name
Demonstrate a basic understanding of the historical and contemporary perspectives of abnormal behavior.

Name
Demonstrate a basic understanding of the procedures and methods used to assess and classify abnormal behavior.

Name
Identify, describe, and explain the nature and qualifying characteristics of various forms of abnormal behavior, including the differential characteristics that distinguish one mental disorder from another mental disorder.

Name
Identify, describe, and explain various approaches to treating mental disorders.

Name
Apply critical thinking skills to the assumptions and evaluations made of human behavior by the media, social scientists, academicians, friends, and family.

Name
Display a sensitivity toward and understanding of those whose lives have been touched by mental illness.

Name
Apply a Biblical worldview of abnormal behavior and psychopathology.

PSYC3023 - CULTURAL PSYCHOLOGY

General

Course Prefix
PSYC

Course Number
3023

Description
This course provides students with an introduction to multicultural and cross-cultural psychology including its theories, research, and exploration of intercultural knowledge. The course examines the dynamics of cultural relevance related to psychological processes, abnormality, and treatment. The course implements exercises of self-awareness and engagement within other cultures. Prerequisite: PSYC 2133

Learning Outcomes

Learning Outcomes

Name
Identify the biological elements and processes involved in human sexual function, sexual responsiveness, and common medical issues.

Name
Describe the important concepts, principles, and discoveries in the field of human sexuality.

Name
Examine the role of social and cultural influences in human sexual experience and expression.

Name
Describe the biblical texts and theological themes relevant to a Christian understanding of human sexuality.

Name
Consider the role of sexuality within a broader scope of holistic personhood, ethical integrity, and social responsibility.

PSYC3213 - POLITICAL PSYCHOLOGY

General

Course Prefix
PSYC

Course Number
3213

Description
The political psychology course will allow students to explore their Christian worldview as it applies to political and social issues of the world today. More specifically, this course will investigate psychological patterns that shape how an individual or group dynamic behaves, especially within political outlets. Students will recognize how both individuals and groups influence certain outcomes based on personality, thought processes, emotions, and motivations

  AND BIOL133L - ESSENT OF ANATOMY & PHYSIOLOGY LAB

Additional Comments:
Only one of the two options listed above are necessary to meet the prerequisite requirement.

Learning Outcomes

Learning Outcomes

Objective
Explain the biological underpinnings of psychological disorders and some modalities of their biochemical treatment.

Name
Display a comprehensive understanding of the brain, nervous system, and behavior.

Name
Describe the general workings of the nervous system and its largest organism, the brain.

Name
Identify organs of the sensory systems and mechanisms of movement, and explain how they work.

Name
Demonstrate an understanding of the endocrine system and its functioning.

Name
Display a working knowledge of the various regulating systems of the body.

Name
Describe the biological mechanisms of learning, memory, cognition, and emotion.

Name
Explain the biological underpinnings of psychological disorders and some modalities of their biochemical treatment.

PSYC4043 - DIAGNOSIS, ASSESSMENT & CASE MGMT

General

Course Prefix
PSYC

Course Number
4043

Description
This course is an introduction to the skills needed for client diagnosis, assessment, and case management that are currently used in the helping professions. The course will focus on identifying pertinent information for preliminary assessment of a presenting problem, goal setting and contracting, monitoring for progress, and documenting sensitive client data. Topics will include individual psycho-social assessments, and family assessments.Prerequisites: PSYC 2133; PSYC 3003

Prerequisites

Complete ALL of the following Courses:

- PSYC2023 - STATISTICAL METHODS
  AND MATH2023 - INTRO TO PROBABILITY AND STATISTICS

Learning Outcomes

Learning Outcomes

Objective
Demonstrate a general knowledge of how to administer, score, and interpret psychological tests.

Name
Discuss the history and current use of psychological assessment.

Name
Identify ethical issues related to assessment situations.

Name
Demonstrate a working knowledge of major psychometric principles and relevant statistical concepts.

Name
Identify representative tests of ability and personality.

Name
Explain how psychometric concepts such as reliability and validity apply to tests of ability and personality.

Name
Interpret information from test manuals and other helpful resources.

Name
Demonstrate a general knowledge of how to administer, score, and interpret psychological tests.

PSYC4903 - CRISIS INTERVENTION

General

Course Prefix
PSYC

Course Number
4903

Description
This course studies crisis intervention theories and strategies of intervention applied to various crises, such as posttraumatic stress disorder (PTSD), lethality, sexual assault, addiction, partner violence, and loss. Emphasis is on a six-step model of crisis intervention that informs and empowers the layperson or the helping professional.Prerequisite: PSYC 3052

Learning Outcomes

Learning Outcomes

Objective
Locate crisis resources locally and nationally.

Name
Describe the theoretical bases related to crisis intervention models.

Name
Identify basic interviewing skills necessary to employ effective crisis intervention strategies.

Name
Assess affective, behavioral, and cognitive functioning associated with a client in crisis.

Name
Apply the six-step model of crisis intervention utilizing a case study format.

Name
Describe crisis intervention as applied to specific crises, such as PTSD, lethality, loss, and others.

Name
Examine the effects of burnout, vicarious traumatization, and compassion fatigue on the human services worker.

Name
Locate crisis resources locally and nationally.

PSYC4906 - PSYCHOLOGY INTERNSHIP

General

Course Prefix
PSYC

Course Number
4906

Description
This course is a one-semester practical experience of 300 hours in a mental health, social service, educational psychology, or related setting under the supervision of a qualified in-service supervisor and a college supervisor. Prerequisites: PSYC 2133; Course Instructor approval required

Learning Outcomes

Objective
Outline future research based on their current findings.

Name
Apply scientific research methods to solve significant psychological questions.

Name
Evaluate their data and refine their research accordingly.

Name
Present their research findings and the conclusions they have made.

Name
Outline future research based on their current findings.

PSYC7113 - FOUNDATIONS OF PSYCHOLOGY

General

Course Prefix
PSYC

Course Number
7113

Description
This course provides a doctoral-level introduction to the philosophical foundations of contemporary psychology. Students will explore metaphysical and human nature assumptions related to the nature, function, and purpose of a person. The course emphasizes the connections between specific philosophical assumptions and research and practice within psychology. Special attention is given to the distinction between the effects of secular versus Christian assumptions on psychological research and theory. Prerequisite: None

PSYC7553 - DISSERTATION PROPOSAL SEMINAR

General

Course Prefix
PSYC

Course Number
7553

Description

This course prepares PhD students in psychology to design and propose original, Christian oriented research through engagement with advanced bibliographic methods, psychological and theological inquiry, and scholarly writing. Students will learn to formulate clear research problems, evaluate and apply appropriate methodologies, and analyze existing dissertations and proposals to refine their own academic focus. The course emphasizes developing coherent argumentation, engaging scholarly sources, and adhering to doctoral-level standards of style and structure. The course culminates in the submission and presentation of a dissertation proposal, which must be approved before proceeding to the dissertation phase. Prerequisite: None

SAAM1003 - THE POLITICS OF PUBLIC POLICY

General

Course Prefix
SAAM

Course Number
1003

Description
This course is offered through CCCU Best Semester as a Study Abroad course. Permission through the Study Abroad office is required prior to enrolling in this course. The course description provided by CCCU is as follows:In this course, students directly engage Washington, DCbased policy experts and organizations—governmental and non-governmental, national and international—to deepen their understanding of the roles and influence of various political actors and institutions during the formulation stage of policymaking. The course first introduces students to models of policymaking and the tools of policy analysis. Next, students will learn to apply these concepts to the study of both a foreign and domestic policy issue through desk and field research. By studying foreign and domestic policy simultaneously, students will be able to identify and explain the differences between them in political environment, policy participants, and public discourse. The course emphasizes written and oral communication through the development of professional memo-writing and presentation skills.

SAAM1013 - CHRISTIAN POLITICAL ENGAGEMENT:

General

Course Prefix
SAAM

Course Number
1013

Description

This course is offered through CCCU Best Semester as a Study Abroad course. Permission through the Study Abroad office is required prior to enrolling in this course. The course description provided by CCCU is as follows:This course provides students with an opportunity to learn how political theology is applied in the political environment of Washington, DC. The first course module focuses on key questions found in the discipline of political theology, such as, the relationship between theology and politics, the relationship between church and state, the role of religion in public life, and to what extent religious belief ought to shape our public discourse. The second module investigates how key features of modern and post-modern cultures—the context in which the faithful practice of politics takes place—influence mainstream political perspectives on identity, authority, justice, and community. The final module engages a variety of Washington, DC-based Christian political groups and professionals to better understand why different political identities and priorities exist within Christianity and the difficulties and concerns Christians share when putting political theology into practice. Classroom conversations incorporate reflections on internship and policy fieldwork experiences to deepen understanding of the real-world relevance of political theology and Christians' own political responsibilities.

General

Course Prefix
SAAM

Course Number
1033

Description

This course is offered through CCCU Best Semester as a Study Abroad course. Permission through the Study Abroad office is required prior to enrolling in this course. The course description provided by CCCU is as follows:This course provides an opportunity to learn how the issues and ideas presented in the study of communication ethics manifest themselves in the professional environment of Washington, DC. The first course module focuses on key questions found in the discipline of public theology, such as the relationship between church and other societal institutions (e.g. the state), the role of religion in public life, and to what extent religious belief ought to shape our public discourse. The second module investigates how key features of modern and post-modern cultures—the context in which the faithful practice of communication takes place—influence mainstream perspectives on identity, authority, justice, and community. The final module engages a variety of Washington, DC-based Christian organizations and communication professionals to deepen one’s understanding of the ethical challenges Christian communication professionals encounter and what they are learning from experience about how to engage them. Classroom conversations incorporate reflections on internship and fieldwork experiences to enable students to explain with more clarity your own sense of responsibility to Christ and neighbor in their work as communication professionals.

SAAU1013 - SOCIAL ENTREPRENEURSHIP:

General

Course Prefix
SAAU

Course Number
1013

Description

This course is offered through CCCU Best Semester as a Study Abroad course. Permission through the Study Abroad office is required prior to enrolling in this course. The course description provided by CCCU is as follows: This course will provide a follow-up to the comparative economic systems course offering a view from Indonesia. In addition, this course will explore the emergence of a new story about business, a story that locates business within a societal framework, recognizing that every business creates or destroys value for customers, suppliers, employees, communities and society. Within this framework, social entrepreneurship offers a model of business built around the ideas of corporate responsibility, sustainability and shared value to address social and environmental challenges and to promote the common good. As the traditional lines blur among nonprofits, government and business, it is critical that students understand the opportunities and challenges in this new landscape that will push businesses, nonprofits, and government agencies to partner together to achieve a balance between social, environmental, and economic resources. The class will offer students the opportunity to talk with small family entrepreneurs and larger social enterprises as they create products and services that add value to various stakeholders, including the common good.

SAAU1023 - ACTING JUSTLY: LIVING IN A

General

Course Prefix
SAAU

Course Number
1023

Description

This course is offered through CCCU Best Semester as a Study Abroad course. Permission through the Study Abroad office is required prior to enrolling in this course. The course description provided by CCCU is as follows: An on-site seminar that provides orientation to the history and culture of each location. In addition, the course will examine one issue of justice from each location, thereby helping students learn to navigate one of the world's most culturally (and linguistically) diverse regions in the world. Students will explore the spectrum of modern-day Australia from Aboriginal worldviews to the more than 120 ethnic communities that can be found in Queensland alone. In Indonesia, students will examine inter-faith relationships between Christians and Muslims. In Taiwan, students will examine tensions between the indigenous minorities and the Nationalist Chinese who came to the country in 1949. Through each of these case studies students will examine how such factors as religion, history, geography, climate, and diversity come together to shape each country. Students will discuss and reflect on their own cross-cultural journey as they learn from readings, interviews, and daily experiences. This course will include guest speakers and excursions throughout the semester.

Description

This course is offered through CCCU Best Semester as a Study Abroad course. Permission through the Study Abroad office is required prior to enrolling in this course. The course description provided by CCCU is as follows:The LASP group visits Limon province, affording interactions with a Costa Rican indigenous community, the traditional Afro-Caribbean population, as well as more recent immigrants. We also visit other countries in Central America during the semester. This travel practicum component is not a vacation trip; it is an integral part of the learning process. Students attend conferences, complete selected readings and maintain a journal of ideas and perceptions developed throughout the trips, and write a term paper.

SACR1033 - LATIN AMERICAN STUDIES

General

Course Prefix
SACR

Course Number
1033

Description

This course is offered through CCCU Best Semester as a Study Abroad course. Permission through the Study Abroad office is required prior to enrolling in this course. The course description provided by CCCU is as follows:This course, entitled “Responses to Latin American Reality Seminar,” builds upon the foundation set during the Perspectives Seminar. The focus is on a deeper understanding of historical and cultural realities within Latin America, while grappling with personal responses to issues encountered in other components of the program. It will expose participants to a wide range of realities ranging from Pre-Colombian Latin America histories to modern day social realities within Latin America. Students will gain differing worldviews within the context of Latin America. All course instruction and presentations by speakers are delivered entirely in Spanish. Required readings are in Spanish for those choosing to take this course for Spanish credit, while readings for all others are written in English. This course is offered Tuesday and Thursday from 3-5pm at the LASP Center.

SACR1043 - ADVANCED LANGUAGE & LITERATURE

General

Course Prefix
SACR

Course Number
1043

Description

This course is offered through CCCU Best Semester as a Study Abroad course. Permission through the Study Abroad office is required prior to enrolling in this course. The course description provided by CCCU is as follows:This course is designed for Spanish majors or minors. It offers complete Spanish immersion as a means to engage different cultures, establish relationships with diverse peoples and understand artistic forms of expression that would otherwise be difficult to access. Academic study will involve Central American literature, along with written and oral assignments in Spanish. All activities related to this concentration are entirely in Spanish. This course is offered Tuesday and Thursday from 1-3pm at the LASP Center.

SACR1053 - BUSINESS FOR SUSTAINABILITY

General

Course Prefix
SACR

Course Number
1053

Description

This course is offered through CCCU Best Semester as a Study Abroad course. Permission through the Study Abroad office is required prior to enrolling in this course. The course description provided by CCCU is as follows:This course provides a foundation for understanding International Business through experiential learning in the context of sustainable business practice (triple bottom line). Course activities take place in the LASP classroom and throughout the greater San José area. Readings, case studies and discussions complement lectures and fieldwork. BSE students are encouraged to consider the Practicum Track in order to participate in an intercultural professional environment. Most practicums are in professional settings located within the greater San José area. BSE students who select the Interdisciplinary Track are typically placed in a community immersion with a family-owned business in a location outside the metropolitan area of San José. Presentations by invited speakers are delivered in both English and Spanish, while most required readings are written in English. This course is offered Monday and Wednesday from 1-3pm at the LASP Center.

SALA1003 - FAITH & ARTISTIC DEVELOPMENT IN

General

Course Prefix
SALA

Course Number
1003

Description
This course is offered through CCCU Best Semester as a Study Abroad course. Permission through the Study Abroad office is required prior to enrolling in this course. The course description provided by CCCU is as follows:A class that explores the connection between the eye, the heart and the hand, this course focuses on the integration of faith and learning as well as developing the necessary skills for analysis of the culture of Hollywood. The first section of the class emphasizes the eye: discovering your own identity, looking at film's historical impact, spiritual impact, audience trends, the auteur movement, and vision in film, as well as providing a basis for heart preparation for production. The second section of the course emphasizes the heart: ethics, relationships and communication, passion and art. The last section of the course emphasizes the hand, exploring the collaborative process in Hollywood Production Workshop and Narrative Storytelling: roles and aspects of production, the production process, relationships on set, and communication. All students participate in this team-taught lecture seminar led by the faculty of The Los Angeles Film Studies Center.

SALA1004 - HOLLYWOOD PRODUCTION WORKSHOP

General

Course Prefix
SALA

Course Number
1004

Description
This course is offered through CCCU Best Semester as a Study Abroad course. Permission through the Study Abroad office is required prior to enrolling in this course. The course description provided by CCCU is as follows:Students work collaboratively in groups to create a festival-ready piece, including all the legal documentation and rights to enable the finished production to qualify for festival submission. The course offers students the opportunity to make a motion picture production using Hollywood locations, resources, and protocol. Students participate in a competitive vetting process of scripts, pitches, and meetings much like the process of the professional industry. For example, those who want to direct submit reels for review and writers participate in a rigorous development process in the first few weeks of the semester.

SALA1006 - INTERNSHIP: INSIDE HOLLYWOOD

General

Course Prefix
SALA

Course Number
1006

Description

This course is offered through CCCU Best Semester as a Study Abroad course. Permission through the Study Abroad office is required prior to enrolling in this course. The course description provided by CCCU is as follows:Students participate in an internship experience in some aspect of the Hollywood entertainment industry. These are nonpaying positions primarily in an office setting such as development companies, agencies, management companies, post-production facilities, etc. Students work 20 to 24 hours a week, spread over a three day schedule and accumulate 200-250 hours for the semester. Orientation to the internship includes an overview of the creative and operational aspects of the Hollywood entertainment business, including the Christian's role working therein. The internships do not include positions on actual filmmaking locations. Instead, students work in offices as support personnel to producers, writers, directors, agents, post-production personnel and others involved in the total process of producing and distributing a major motion picture. LAFSC provides interns to many of the major companies within Hollywood. After students are accepted into the LAFSC program they are encouraged to search for their own internships based on interest. If a student does not wish to search for his/her own internship, during orientation the LAFSC internship faculty will assist the student to find an internship.

SALA1013 - NARRATIVE STORYTELLING

General

Course Prefix
SALA

Course Number
1013

Description

This course is offered through CCCU Best Semester as a Study Abroad course. Permission through the Study Abroad office is required prior to enrolling in this course. The course description provided by CCCU is as follows:Concentrating on the art form of narrative storytelling, the course places special emphasis on the visual aspect of the discipline. Two tracks are offered in the course. The Structural track covers topics ranging from the history of story in culture and film to the mechanics of story creation to the development of story-writing skills. Instruction in the Technical Story track focuses on advanced methods of cinematography and post-production and how those techniques can be used to improve visual storytelling. After the core instructional period in each track, students from both tracks are reunited and will have the opportunity to hone their narrative analysis skills, participate in workshop style labs and make two short films that demonstrate their ability to utilize storytelling theory on screen.

SALA1023 - PROFESSIONAL ACTING FOR THE CAMERA

General

Course Prefix
SALA

Course Number
1023

Description

This course is offered through CCCU Best Semester as a Study Abroad course. Permission through the Study Abroad office is required prior to enrolling in this course. The course description provided by CCCU is as follows:An advanced workshop in the practice and process of acting for the camera aimed at students who have a desire to pursue acting as a career. Instruction includes an overview of current camera acting techniques and thorough discussion of the art of acting. The class primarily consists of acting scene work with all scenes being filmed and critiqued on the big screen. Students will also be required to pursue roles in student and independent films. Several class sessions throughout the course will be devoted to the business of acting for film and television in the Hollywood entertainment industry with an emphasis given to developing the materials and relationships necessary for a successful career. This course offers two tracks, a professional track and an exploratory track. The professional track is for students hoping to have a professional acting career in Hollywood. It requires students to learn about the business of acting and participate in real auditions and film projects. The exploratory track is for students who don't necessarily want to act as a career but are interested in learning about acting in order to work with actors or just act part-time.

SALA1033 - PROFESSIONAL SCREENWRITING

General

Course Prefix
SALA

Course Number
1033

Description

This course is offered through CCCU Best Semester as a Study Abroad course. Permission through the Study Abroad office is required prior to enrolling in this course. The course description provided by CCCU is as follows:This is a course in contemporary screenwriting, including an understanding of dramatic structure, character and dialogue development, and the writing process. Students complete a full-length screenplay for a feature film or "movie-of-the-week." Whether novice or advanced, students are expected to develop and improve their skills. Emphasis is given to the role of Christian faith and values as they relate to script content. The course is taught by a working, credited Christian screenwriter and screenwriting professor at UCLA. Course includes a professional pitch session to producers and extensive notes on the final screenplay.

SAME1003 - ISLAMIC THOUGHT AND PRACTICE

General

Course Prefix
SAME

Course Number
1003

Description

This course is offered through CCCU Best Semester as a Study Abroad course. Permission through the Study Abroad office is required prior to enrolling in this course. The course description provided by CCCU is as follows:This course examines many dimensions of Islamic faith - historical, legal, doctrinal, popular and behavioral - from early times to the present. Emphasis is on contemporary and "popular" Islam (the beliefs and practices of Muslims), including issues such as colonialism, gender equality, modernization, development and democracy. Students are encouraged to begin thinking about relevant similarities and differences between themselves and Muslim peoples around the world.This course, like all MESP courses, has a strong experiential component, with students being encouraged to learn about Islam by developing relationships with local Muslims. In addition, the course frequently makes use of local scholars, experts, religious figures, or other locals in order to enhance students' encounters with the religion and history of the region.

SAME1013 - CONFLICT & CHANGE IN THE MIDDLE

General

Course Prefix
SAME

Course Number
1013

Description

This course is offered through CCCU Best Semester as a Study Abroad course. Permission through the Study Abroad office is required prior to enrolling in this course. The course description provided by CCCU is as follows:This course examines the Israeli-Palestinian conflict, which many scholars now call ‘the 100 Years War.' Beginning with the collapse of the Ottoman Empire, this course traces the origin of the conflict from the early encounters between Arabs and Jews in Palestine to the contemporary struggle to achieve a final status agreement between Israelis and Palestinians.The course begins in Amman with readings, documentaries, lectures, and interactions with local Palestinians regarding their experiences and perspectives. The course then continues during a travel component to Israel/Palestine, where students hear from a variety of speakers including academic experts and local professionals working towards a reconciliatory solution.Because the conflict and its consequences - human, geographic, social, cultural, and political - are so proximate to the MESP experience, students learn intimately the complexity of reaching peace in a small land shared by two peoples with competing civilizational visions.

SAME1023 - PEOPLES & CULTURES OF THE

General

Course Prefix
SAME

Course Number
1023

Description

This course is offered through CCCU Best Semester as a Study Abroad course. Permission through the Study Abroad office is required prior to enrolling in this course. The course description provided by CCCU is as follows:This course examines the diverse mosaic of the Middle East peoples and cultures through the prism of various societies encountered along the students' travels. Jordan will provide the primary context for this course, but recent semesters have also included immersive experiences in Israel/Palestine, Morocco, and Egypt. This course seeks to introduce students to patterns of thought and behavior that characterize the region in general without losing sight of important national and religious differences. The Middle East is a multiethnic, multiconfessional region, and regional travel allows students to observe and study a great variety of social, religious and political groups. In addition, students learn about pressing issues related to gender, conflict, economic development and cultural identity that currently animate the many religious and political communities they visit. Due to regional change, please note that all travel is subject to change based upon safety considerations.

SAUG1013 - RELIGIONS IN CONTEMPORARY UGANDA

General

Course Prefix
SAUG

Course Number
1013

Description

This course is offered through CCCU Best Semester as a Study Abroad course. Permission through the Study Abroad office is required prior to enrolling in this course. The course description provided by CCCU is as follows: Religion plays a very important role in the life of Africans, dominating their social, political and economic lives. This course examines the three religions that have had a strong influence in Uganda-- African Traditional Religion (ATR), Christianity and Islam. Students will become familiar with these three major religions in Uganda with emphasis on ATR and Islam. The study of ATR will be phenomenological in its view, looking at the scheme of ideas that help us appreciate the nature of African religions. We will study the religion of three tribes in Uganda: Baganda, Bagisu and Acholi. The study of Islam will emphasize a basic understanding and appreciation of the life of Prophet Muhammad, its formative influence on Islam as a religion, and its attendant cultural influence in Africa, and Uganda in particular. In this course, we will also examine the influence of Christianity in Uganda. A very important aspect of our study will be the historical interaction between the three religions--ATR, Islam and Christianity. Finally, issues of interfaith dialogue and understanding will be examined. (Possible Credit: Religion/Theology/ Missions, Cross-Cultural Studies)

SAUG1023 - EAST AFRICAN HISTORY FROM 1800

General

Course Prefix
SAUG

Course Number
1023

Description
This course is offered through CCCU Best Semester as a Study Abroad course. Permission through the Study Abroad office is required prior to enrolling in this course. The course description provided by CCCU is as follows: This course examines the history of Uganda, Kenya, Tanzania and Rwanda from 1800 to independence. Students will become familiar with the pre-colonial era and with colonialism and its effects on East African culture and indigenous social institutions. We will review East African reaction to colonial policies and survey cultural and social changes experienced in East Africa during the colonial period up to the time of decolonialization. The focus on the history of this period will be done through the eyes of the cultures it affected rather than through the eyes of objective history.

SAUG1024 - INFECTIOUS DISEASE AND EPIDEMIOLOGY

General

Course Prefix
SAUG

Course Number
1024

Description
This course is offered through CCCU Best Semester as a Study Abroad course. Permission through the Study Abroad office is required prior to enrolling in this course. The course description provided by CCCU is as follows:This course introduces the basic methods for infectious disease epidemiology and public health case studies of important disease syndromes effecting Uganda and East Africa. Methods include epidemiology definitions and nomenclature, basic disease pathology, symptom presentation, laboratory findings, and the physiology behind basic treatment for the diseases causing most significant morbidity and mortality in East Africa. This course focuses on epidemiology with the combined learning outcomes of pathophysiology and public health for infectious diseases at individual, community and systems levels. This course must be taken concurrently with Cross-Cultural Practicum in Global Health where students gain applied field knowledge in 150 hour global health practicums with international clinicians and public health educators. This course includes case studies of: viral infections (Dengue fever, HIV/AIDS, WNV, Zika, etc), bacterial infections (Tuberculosis, Typhoid, and Diarrheal infections), and parasitic infections (Schistosomiasis, Trypanosomiasis, and Helminths).

SAUG1033 - EAST AFRICAN POLITICS SINCE

General

Course Prefix
SAUG

Course Number
1033

Description

This course is offered through CCCU Best Semester as a Study Abroad course. Permission through the Study Abroad office is required prior to enrolling in this course. The course description provided by CCCU is as follows: This course examines the politics of Uganda, Kenya, Tanzania and Rwanda, starting with the struggle for independence and concluding with an analysis of current political events in each country. Students will become familiar with the historical context for understanding contemporary politics in East Africa and with the theoretical and conceptual tools for analyzing recent developments in East Africa. We will also look at current political events in other countries bordering Uganda (DR Congo, Sudan) with a particular interest in how Uganda is affected by these events. Therefore, this course will raise profound questions regarding political change, economic development, and the nature of the international state system in African states generally.

SAUG1043 - UCU KISWAHILI I

General

Course Prefix
SAUG

Course Number
1043

Description

This course is offered through CCCU Best Semester as a Study Abroad course. Permission through the Study Abroad office is required prior to enrolling in this course. The course description provided by CCCU is as follows:In this introductory course students will develop novice-level communication skills and competency in vocabulary, grammar and cultural concepts through speaking, reading, writing and listening to Kiswahili. As Kiswahili is a language expressed primarily through oral communication, emphasis will be placed on listening and speaking. The course will run for the first six weeks of the semester in order to maximize students' opportunity to engage crossculturally utilizing their new language skills. It will be immediately followed by the intermediate-level Kiswahili II course. Student learning will be evaluated through the use of ongoing oral assessment, unit quizzes, and final oral and written examinations.

SAUG1123 - UCU UNDERSTANDING WORLDVIEWS

General

Course Prefix
SAUG

Course Number
1123

Description

This course is offered through CCCU Best Semester as a Study Abroad course. Permission through the Study Abroad office is required prior to enrolling in this course. The course description provided by CCCU is as follows:This course will introduce to students the concept of a worldview, and provide a basic understanding of most of the major worldviews in evidence today. It will also assist students in analyzing the claims of different worldviews, including Christianity, and will emphasize the importance and means of forming a Christian worldview which integrates faith and life. Students will consider the meaning, truth claims, and relevance of creation and evolution, the origin of life, sin and evil, different offers of salvation, and various beliefs about how to live one's life in the contemporary world. As they read, students will relate the topics of the course to their particular setting in Africa as well as to the larger global context of today's world.

SAUG1133 - CROSS-CULTURAL PRACTICUM

General

Course Prefix
SAUG

Course Number
1133

Description
This course is offered through CCCU Best Semester as a Study Abroad course. Permission through the Study Abroad office is required prior to enrolling in this course. The course description provided by CCCU is as follows: The Cross-Cultural Practicum is a 3, 4 or 5-credit course that provides students with the opportunity to enrich their understanding of culture and further develop cross-cultural competencies. Through an academic framework that helps students apply theory to practice, students learn more about Uganda through authentic relationships with Ugandans in various contexts. Cultural competencies will be the guide to learning, understanding, and assessment in this course with a secondary goal of specific vocational application. This course is designed as a seminar course that accompanies all USP Inter-Disciplinary Emphasis (IE) cross-cultural internships to provide an academic framework, weekly seminar discussions with peers and facilitated by the instructor, and supervision by a Ugandan professional; all components to help students engage in the Ugandan context in ways that are mutually-beneficial, meeting student learning objectives while simultaneously contributing to the work of Ugandan organizations. Building on the diversity of student interests, living contexts, and internships of IE students, this class utilizes student's bi-weekly written and verbal reflection of cross-cultural experiences to uncover valuable learning that can be applied to a North American context.

SAUG1163 - GLOBAL HEALTH HUMAN NUTRITION

General

Course Prefix
SAUG

Course Number
1163

Description

This course is offered through CCCU Best Semester as a Study Abroad course. Permission through the Study Abroad office is required prior to enrolling in this course. The course description provided by CCCU is as follows: This course introduces the concepts of basic human nutrition across the life span. Students are guided to discuss the basic sources of nutrients among local communities in Uganda and assessment for nutritional wellbeing. The common nutritional disorders for Uganda and East Africa are reviewed. Guidelines on how to address such problems are described and particular emphasis made for those at highest risk e.g. the sick, children and women. Special diets and their preparation for specific health disorders are discussed i.e. diabetes, hypertension and renal disorders. Diet supplementations are explored and recommended.

SDEV1003 - FRONT-END DEVELOPMENT I

General

Course Prefix
SDEV

Course Number
1003

Description

This course is the first of four courses that count toward the Meta Front-End Developer Professional Certificate. It provides an in-depth introduction to the world of web development, focusing on the key responsibilities of front-end developers. Students will learn to create and style webpages using HTML and CSS and gain familiarity with the benefits of UI frameworks. The course also introduces the basics of JavaScript. Additionally, students will learn the importance of writing unit tests using Jest, a popular JavaScript testing framework. The knowledge gained in this course serves as a solid foundation for anyone interested in the field of web development.Prerequisites: NoneAdditional fees are associated with this course.

SDEV2003 - FRONT-END DEVELOPMENT II

General

Course Prefix
SDEV

Course Number
2003

Description
This course is the second of four courses that count toward the Meta Front-End Developer Professional Certificate. It dives deeper into advanced aspects of front-end web development. This course covers practical skills, including version control systems implementation, command-line project navigation and configuration, and the creation and use of GitHub repositories for code management. Students will also learn to create responsive layouts with HTML5 and CSS, building simple forms and mastering the popular UI framework, Bootstrap. The course equips learners with debugging tools to rectify and enhance their coding efficiency. This course further refines and expands skills, fostering more confident and competent developers.Prerequisites: SDEV 1003Additional fees are associated with this course.

SDEV2103 - BACK-END DEVELOPMENT II

General

Course Prefix
SDEV

Course Number
2103

Description
This course is the second of four courses that count toward the Meta Back-End Developer Professional Certificate. It extends the learner's comprehension of crucial tools and principles fundamental to back-end web development. The course instructs on implementing version control systems, ensuring effective code revision management. Students learn to navigate and configure projects using the command line and the creation and utilization of GitHub repositories. An essential part of the curriculum involves databases; students will identify the principles underpinning their operation and apply this knowledge to design, plan, and implement a straightforward database development project. The course is a vital step for individuals seeking to enhance their back-end development capabilities.Prerequisites: SDEV 1103Additional fees are associated with this course.

SDEV3003 - FRONT END FRAMEWORKS

General

Course Prefix
SDEV

Course Number
3003

Description
This course is the third of four courses that count toward the Meta Front-End Developer Professional Certificate. This course provides a deep dive into the use of React, a powerful JavaScript library. Participants will learn to leverage reusable components for dynamic data rendering and use props to facilitate data interchange between these components. The curriculum also emphasizes the organization of larger projects to ensure scalability and maintainability. It covers the creation of interactive web pages and user forms, and includes the construction of a complete application. Advanced techniques for creating robust, reusable components and server interactions via APIs are also explored. Students will learn to test applications with the React Testing Library and integrate commonly used libraries to streamline development. The course culminates in the creation of a comprehensive application, encapsulating all learned skills.Prerequisites: SDEV 2003Additional fees may be associated with this course.

Learning Outcomes

Learning Outcomes

Objective
Integrate commonly used React libraries to streamline your application development.

Name
Use reusable components to render views where data changes over time.

Name
Organize React projects to create more scalable and maintainable websites and apps.

Name
Use props to pass data between components.

Name
Create dynamic and interactive web pages and apps.

Name
Use forms to allow users to interact with the app.

Name
Build an application in React.

Name
Create robust and reusable components with advanced techniques and learn different patterns to reuse common behavior.

Name
Interact with a remote server and fetch and post data via an API.

Name
Test React applications with React Testing Library.

Name
Integrate commonly used React libraries to streamline your application development.

SDEV3103 - BACK-END FRAMEWORKS

General

Course Prefix
SDEV

Course Number
3103

Description
This course is the third of four courses that count toward the Meta Back-End Developer Professional Certificate. It is an advanced course that immerses learners in the intricate world of back-end development. Participants will build a functional web server and apply data modeling concepts essential to web development. A significant portion of the curriculum is dedicated to APIs, covering their development, usage, and the principles of REST architecture. Students will demonstrate their comprehension of these principles by constructing a basic API. This course is indispensable for individuals aiming to become proficient back-end developers.Prerequisites: SDEV 2103Additional fees are associated with this course.

Learning Outcomes

Objective
Construct a basic API as a demonstration of understanding REST principles.

Name
Set up a project using a web framework.

Name
Utilize CRUD operations.

Name
Create models using a MySQL database.

Name
Use the template to ensure an efficient and maintainable build.

Name
Describe the development and usage of an API.

Name
Identify and apply the principles of REST architecture.

Name
Construct a basic API as a demonstration of understanding REST principles.

SDEV4003 - FRONT-END DEVELOPER CAPSTONE

General

Course Prefix
SDEV

Course Number
4003

Description

This course is the fourth of four courses that count toward the Meta Front-End Developer Professional Certificate. It navigates the complex process of designing and implementing user-focused web applications. It begins by introducing the fundamentals of User Experience (UX) design, accessibility considerations, and the importance of user empathy, and teaches students how to create wireframes and prototypes in Figma. The course then transitions into practical application, teaching students to design and style a responsive User Interface (UI), produce clean, bug-free code, and use React components to create multiple views. Students will create a complete website front-end using React JS. The course concludes with essential interview preparation, featuring coding problems and specific strategies for interviews at Meta.Prerequisites: SDEV 3003Additional fees may be associated with this course.

Learning Outcomes

Objective
Solve complex problems using code, showcasing proficiency in applying coding skills to real-world challenges

Name
Implement core concepts of User Experience (UX) design and accessibility.

Name
Employ Figma to create wireframes and prototypes, integrating key design principles.

Name
Develop a responsive User Interface (UI) with clean, bug-free coding practices.

Name
Utilize React components to create diverse views, showcasing effective use of modern front-end features.

Name
Construct a dynamic website front-end using React JS and JavaScript, demonstrating holistic mastery of front-end development.

Name
Prepare effectively for a coding interview, demonstrating an understanding of common interview formats and questions.

Name
Solve complex problems using code, showcasing proficiency in applying coding skills to real-world challenges

SDEV4103 - BACK-END DEVELOPER CAPSTONE

General

Course Prefix
SDEV

Course Number
4103

Description

This course is the fourth of four courses that count toward the Meta Back-End Developer Professional Certificate. It is an intensive course designed to consolidate and advance your back-end development skills. Learners will develop a fully-functioning Django application that uses both front-end and back-end technologies. Practical application includes setting up a suitable Django development environment and creating a Django web server with multiple API endpoints. Additionally, the course offers strategic preparation for coding interviews, covering common formats and questions. With a focus on problem-solving, participants will apply coding skills to tackle complex, real-world challenges. This capstone course is the ultimate step for those aiming for mastery in back-end development.Prerequisites: SDEV 3103Additional fees are associated with this course.

SDEV5913 - BACK-END DEVELOPMENT II

General

Course Prefix
SDEV

Course Number
5913

Description
This course is the second of four courses that count toward the Meta Back-End Developer Professional Certificate. It extends the learner's comprehension of crucial tools and principles fundamental to back-end web development. The course instructs on implementing version control systems, ensuring effective code revision management. Students learn to navigate and configure projects using the command line and the creation and utilization of GitHub repositories. An essential part of the curriculum involves databases; students will identify the principles underpinning their operation and apply this knowledge to design, plan, and implement a straightforward database development project. The course is a vital step for individuals seeking to enhance their back-end development capabilities.Prerequisites: SDEV 5513

SDEV6503 - FRONT-END FRAMEWORKS

General

Course Prefix
SDEV

Course Number
6503

Description

This course is the third of four courses that count toward the Meta Front-End Developer Professional Certificate. This course provides a deep dive into the use of React, a powerful JavaScript library. Participants will learn to leverage reusable components for dynamic data rendering and use props to facilitate data interchange between these components. The curriculum also emphasizes the organization of larger projects to ensure scalability and maintainability. It covers the creation of interactive web pages and user forms, and includes the construction of a complete application. Advanced techniques for creating robust, reusable components and server interactions via APIs are also explored. Students will learn to test applications with the React Testing Library and integrate commonly used libraries to streamline development. The course culminates in the creation of a comprehensive application, encapsulating all learned skills.Prerequisites: SDEV 5903

SDEV6513 - BACK-END FRAMEWORKS

General

Course Prefix
SDEV

Course Number
6513

Description

This course is the third of four courses that count toward the Meta Back-End Developer Professional Certificate. It is an advanced course that immerses learners in the intricate world of back-end development. Participants will build a functional web server and apply data modeling concepts essential to web development. A significant portion of the curriculum is dedicated to APIs, covering their development, usage, and the principles of REST architecture. Students will demonstrate their comprehension of these principles by constructing a basic API. This course is indispensable for individuals aiming to become proficient back-end developers.Prerequisites: SDEV 5913

SDEV6903 - FRONT-END DEVELOPER CAPSTONE

General

Course Prefix
SDEV

Course Number
6903

Description

This course is the fourth of four courses that count toward the Meta Front-End Developer Professional Certificate. It navigates the complex process of designing and implementing user-focused web applications. It begins by introducing the fundamentals of User Experience (UX) design, accessibility considerations, and the importance of user empathy, and teaches students how to create wireframes and prototypes in Figma. The course then transitions into practical application, teaching students to design and style a responsive User Interface (UI), produce clean, bug-free code, and use React components to create multiple views. Students will create a complete website front-end using React JS. The course concludes with essential interview preparation, featuring coding problems and specific strategies for interviews at Meta.Prerequisites: SDEV 6503

SDEV6913 - BACK-END DEVELOPER CAPSTONE

General

Course Prefix
SDEV

Course Number
6913

Description

This course is the fourth of four courses that count toward the Meta Back-End Developer Professional Certificate. It is an intensive course designed to consolidate and advance your back-end development skills. Learners will develop a fully-functioning Django application that uses both front-end and back-end technologies. Practical application includes setting up a suitable Django development environment and creating a Django web server with multiple API endpoints. Additionally, the course offers strategic preparation for coding interviews, covering common formats and questions. With a focus on problem-solving, participants will apply coding skills to tackle complex, real-world challenges. This capstone course is the ultimate step for those aiming for mastery in back-end development.Prerequisites: SDEV 6513

General

Course Prefix
SEU

Course Number
1001

Description

This course is designed to prepare new students to effectively participate in an asynchronous learning environment. Key concepts and processes are designed to help students successfully transition into college, identify and utilize motivational techniques for personal success, and apply physiological, social and psychological principles to success in college, career, and life. This knowledge will be acquired by exploring individual strengths, learning styles, personality, interests, and values to increase self-understanding and engaging in research in order to select and/or confirm academic and career plans.

Learning Outcomes

Learning Outcomes

Name
1. Demonstrate social work practice concepts and issues of the topic(s) in the course.

Name
2. Analyze the significance of the differing issues related to the stated social work practice topics in order to develop a basis for professional reflection and exploration.

Name
3. Synthesize modern social work practice theories related to the topic(s) and practice setting covered.

Name
4. Evaluate and identify gaps in services related to specific contexts of social work practice.

Name
5. Apply interventions related to the topic(s) studied to specific contexts of social work practice.

Name
6. Interpret both risk factors and protective factors of the individuals, families, groups, or communities identified and specific to the topic and/or subject matter of the course.

SOWK2013 - INTRODUCTION TO SOCIAL WORK

General

Course Prefix
SOWK

Course Number
2013

Description

This course is an examination of the fundamental knowledge, skill and attitudinal base of the social work profession. Included are philosophy, value base, ethical standards, early history, professional roles and functions, client systems, purposes served, fields of practice, professional organizations, and the current status of Social Work. An introductory exposure to generalist social work practice is provided. Corequisite: SOWK 2021

Corequisites

Complete ALL of the following Courses:

- SOWK2021 - FIELD OBSERVATION

Learning Outcomes

Learning Outcomes

Objective
Examine the “fit” between personal mission, values, and goals and the social work profession.

Name
Define social work, the types of roles that social workers play, and the functions they serve in society.

Name
Discuss the historical roots of social work as a helping profession.

Name
Identify the purpose, mission, values, and ethics of social work.

Name
Distinguish the levels of social work practice and the educational requirements for each.

Name
Examine social work values and how they interface with personal and Christian values.

Name
Describe the various fields and settings of social work practice.

Name
Communicate an understanding of and respect for diversity and its impact on social work practice. .

Name
Discuss characteristics of special population groups and implications for social work practice.

Name
Examine the fit between personal mission, values, and goals and the social work profession.

SOWK2021 - FIELD OBSERVATION

General

Course Prefix
SOWK

Course Number
2021

Description
A course designed to provide students with exposure to various social service agencies and the populations they serve. Through observation, job shadowing, and supervised learning experiences, the student acquires knowledge about how social service agencies function, populations served, the roles and functions of social workers in the delivery of social services and how social problems are addressed at micro, mezzo, and macro levels. Students are required to serve a minimum of 40 hours for a one hour credit. Corequisite: SOWK 2013

- SOWK2013 - INTRODUCTION TO SOCIAL WORK

Learning Outcomes

Learning Outcomes

Objective
Demonstrate respect and appreciation for the individual regardless of age, class, color, culture, disability, and ethnicity.

Name
Articulate the functions and roles of social workers in the delivery of social services in various agency settings.

Name
Discuss how social service agencies function to provide services to populations at risk.

Name
Critically examine fit between personal life goals, styles of relating, and the social work profession.

Name
Observe interactions between people and systems as they occur in the provision of social services.

Name
Develop awareness of the diverse people groups served by human service agencies

Name
Demonstrate respect and appreciation for the individual regardless of age, class, color, culture, disability, and ethnicity.

SOWK2053 - HUMAN BEHAVIOR & SOCIAL ENVIRON I

General

Course Prefix
SOWK

Course Number
2053

Description
This course focuses on skill development in assessing “person-in-environment” throughout the life cycle, utilizing ecological systems thinking. It is a foundation social work course that is aimed at helping students acquire basic knowledge of human functioning from a broad perspective. It is a study of the interaction of biological, psychological, sociological, cultural, spiritual, and systemic influences on human functioning.Prerequisite: none

Learning Outcomes

Learning Outcomes

Objective
Assess how social welfare policies impact individual functioning and behavior.

Name
Explain the life cycle from a person-in-environment perspective using developmental theories of normative biological, cognitive, psychosocial and moral development.

Name
Describe biopsychosocial, cultural, and spiritual forces that have shaped and continue to shape ones own development, behavior and values.

Name
Discuss the impact of biological, psychological, cultural and social stressors on individuals during stages of the life cycle, problems in functioning that may result, and sources of strength to deal with stressors.

Name
Develop respect for diversity in individuals' backgrounds, lifestyles, functioning, and value systems.

Name
Assess the relationship between individual functioning and societal inequities, especially racism, classism, sexism, heterosexism and ageism, and their influence on the achievement of social and economic justice for vulnerable populations.

Name
Utilize problem solving, critical thinking skills, and strengths orientation as approaches for understanding and analyzing human development and behavior.

Name
Critically assess human behavior research and differentiate popular opinion from science.

Name
Identify communication patterns that are used by various ages, genders, and cultures.

Name
Develop awareness of ethical dilemmas that occur during various stages of the life cycle.

Name
Assess how social welfare policies impact individual functioning and behavior.

SOWK2063 - HUMAN BEHAVIOR & SOCIAL ENVIRON II

General

Course Prefix
SOWK

Course Number
2063

Description
This course is an examination of human behavior in the macro social environment. This course focuses on the interfacing of individuals and families with communities, organizations, and groups. Issues related to cultural diversity, social and economic justice, and populations at risk are examined, as well as values and ethics in social work practice in the macro social environment. Prerequisite: none

Credit Hours

Minimum Credit Hours:
0

Learning Outcomes

Learning Outcomes

Objective
Gain understanding of how changes in governmental policy influence organizational policy and the behavior of individuals.

Name
Identify the various systems in the macro social environment, including groups, organizations, social service agencies, communities, and neighborhoods.

Name
Describe challenges and supports in the macro social environment facing people with developmental disabilities, as well as other populations at risk and oppressed populations.

Name
Discuss specific means by which group empowerment can be used, particularly with populations at risk.

Name
Determine how human behavior is affected by a group context as well as how group behavior is influenced by a broader social context.

Name
Articulate how human behavior is affected by organizations as well as how organizations are influenced by a broader social context.

Name
Identify how human behavior is affected by community as well as how community and culture are influenced by a broader social context.

Name
Examine ethical dilemmas that occur in the macro social environment.

Name
Investigate the roles and responsibilities of faith based initiatives and how these organizations interact with other organizations and individuals.

Name
Develop awareness of the impact of ones own groups, organizations, communities, and neighborhoods on individual development.

Name
Utilize research to assess the strengths and needs of a designated community and develop the analysis of community.

Name
Assess an organizations culture, structure, goals and style of management.

Name
Identify how policies affect and are affected by organizations and individuals in an organization.

Name
Gain understanding of how changes in governmental policy influence organizational policy and the behavior of individuals.

Name
Recognize positive and negative ways of communicating with colleagues and clients in an agency setting.

Name
Recognize supervision and management styles and the value of utilizing supervision in social work practice.

Name
Be able to identify and express personal reactions concerning observations of communities, organizations, and groups.

SOWK3033 - UNDERSTANDING HUMAN DIVERSITY

General

Course Prefix
SOWK

Course Number
3033

Description
This course examines the complex nature of culture and personal identity, explores populations at-risk, and encourages students to understand and appreciate diversity. Specific knowledge of individual cultures, awareness of the patterns of oppression experienced by those cultures, and skills relevant to developing a culturally competent approach to working with diverse people groups are addressed. Prerequisite: None

Credit Hours

Minimum Credit Hours:
3

Maximum Credit Hours:
3

Learning Outcomes

Learning Outcomes

Objective
Develop culturally competent assessment and practice skills for working with ethnically and racially diverse groups.

Name
Articulate the patterns, mechanisms, dynamics, and consequences of discrimination, economic deprivation, and oppression as it relates to diversity.

Name
Apply an ecological systems perspective to the analysis of the complex dynamics of oppression, discrimination, and its effects on social functioning.

Name
Integrate Christian beliefs and values that influence attitudes regarding sensitivity to and appreciation of human diversity.

Name
Correlate a strengths perspective to the understanding of diverse cultures, ethnicities, and people groups.

Name
Compare the demographics, cultural characteristics, and general experiences of various minorities in the United States.

Name
Develop an awareness of one's own cultural heritage in the context of other cultures.

Name
Identify individual experiences, values, and biases that impede or enhance sensitivity to diverse people groups.

Name
Demonstrate culturally competent assessment and practice skills for working with ethnically and racially diverse groups.

Name
Cultivate a lifelong commitment to be aware of how diversity influences the lives of people and to advocate for any changes necessary to decrease oppression and discrimination and enhance the well-being of all persons.

SOWK3083 - CHILD WELFARE PRACTICE

General

Course Prefix
SOWK

Course Number
3083

Description
Provides a framework of values, knowledge and skills necessary to practice with vulnerable children and their families. The major focus is on social work in public child welfare in the State of Florida. The course utilizes an ecosystem perspective for understanding and assessing the special needs of at-risk children and families. Specific attention is on assessing families and children using the State of Florida's Child Welfare Practice Model and other family assessment instruments. Prerequisites: None

Credit Hours

Minimum Credit Hours:
0

Learning Outcomes

Learning Outcomes

Objective
Create a child safety plan based on the Child Welfare Practice Model.

Name
Demonstrate an understanding of the knowledge, skills, ethics and values as outlined in the Florida Child Welfare Code of Ethical and Professional Conduct and the National Association of Social Workers (NASW) Code of Ethics.

Name
Develop a professional identity and practice framework which demonstrates an understanding of past and current child welfare guiding principles, history and policies; and of current practices, standards, and issues.

Name
Engage diversity and difference in practice in working with children and families.

Name
Evaluate risk, safety and caregiver protective capacities in family dynamics and functioning as they impact child safety and permanency.

Name
Distinguish the basic principles and stages of child and family development and how these principles and stages relate to child maltreatment and child welfare.

Name
Apply child welfare evidence informed research findings to practice.

Name
Demonstrate practice skills such as interviewing, engagement, planning and intervention.

Name
Develop an understanding of trauma and its impact on children and families by utilizing a trauma-informed care approach when intervening with children and families.

Name
Distinguish between present danger and impending danger in the assessment of child safety.

Name
Create a child safety plan based on the Child Welfare Practice Model.

SOWK3093 - SOCIAL WELFARE POLICY

General

Course Prefix
SOWK

Course Number
3093

Description
This course is an examination of policy practice focusing on creation and analysis of social welfare policy. An analytical approach to contemporary social welfare policy and current social welfare programs is emphasized, as is the critique of major social welfare policies and programs. Influencing policy formation at administrative, legislative, and judicial levels, and exploring the values and ethics of America's social welfare system are included. Prerequisite: SOWK 2013

- SOWK2013 - INTRODUCTION TO SOCIAL WORK

Learning Outcomes

Learning Outcomes

Objective
Discuss ways social and economic policies affect majority groups, women, and ethnic minorities

Name
Differentiate various points of view with regard to social welfare policies.

Name
Demonstrate critical analysis skills in presenting both verbally and in writing the framework for a specific social policy.

Name
Discuss theoretical and scientific underpinnings for the development of social welfare policies.

Name
Investigate a policys history and place it in contemporary context.

Name
Examine the impact of U.S. values in relation to existing social welfare policies.

Name
Articulate the roles of social workers in policy advocacy and the political processes that influence social welfare policies.

Name
Apply the NASW code of ethics to the analysis of social policies.

Name
Explain basic concepts related to welfare reform legislation.

Name
Identify the faith-based initiative responses to welfare reform and ways that government and faith-based initiatives may interact.

Name
Discuss ways social and economic policies affect majority groups, women, and ethnic minorities.

SOWK3123 - BUILDING EFFECTIVE HELPING SKILLS

General

Course Prefix
SOWK

Course Number
3123

Description
This course introduces students to the basic interpersonal skills utilized in the helping process such as client engagement, empathic listening, reflecting feeling and meaning, clarifying, identifying and exploring problems, confrontation, and helping clients develop strategies to accomplish their goals from a strengths based perspective. Prerequisite: None

Credit Hours

Minimum Credit Hours:

Learning Outcomes

Learning Outcomes

Objective
Articulate the professional values that undergird the helping process.

Name
Demonstrate the ability to understand the helping process from an empowerment and strengths-based perspective.

Name
Develop self-awareness, understanding its impact on the helping process.

Name
Apply foundational skills in building trust and respect in helping relationships.

Name
Utilize micro skills appropriate to helping relationships such as attending and listening, observation, identifying and reflecting feeling and meaning, confrontation, focusing, reframing, and appropriate use of self-disclosure.

Name
Understand how to develop collaborative partnerships with clients in the process of problem solving.

Name
Simulate the ability to utilize skills for identifying relevant issues and empowering clients to work toward solutions.

Name
Integrate personal, professional and Christian values in the helping process.

Name
Develop awareness of how ethnicity and culture impact communication styles and relationship development.

Name
Articulate the professional values that undergird the helping process.

SOWK3133 - PRACTICE WITH INDIVIDUALS

General

Course Prefix
SOWK

Course Number
3133

Description
This course is an examination of generalist social work practice, including practice skills related to the social work problem-solving process (relationship building, interviewing, contracting). It includes an exploration of social work ethics and values. Identification with the social work profession is encouraged. Social work with individuals and family systems is emphasized. Prerequisites: SOWK 2013, Admission to BSW Program

Credit Hours

Minimum Credit Hours:
3

Maximum Credit Hours:

Type
Completion Requirement

Prerequisites

Complete ALL of the following Courses:
- SOWK2013 - INTRODUCTION TO SOCIAL WORK

AND Admission to BSW Program

Learning Outcomes

Learning Outcomes

Objective
Determine the basic roles that generalist social workers play as they target change at the micro, mezzo, and macro levels.

Name
Define generalist social work practice.

Name
Articulate how the knowledge, values, and skills of generalist social work practice apply to practice with systems of all sizes.

Name
Comprehend the value base of social work practice and apply that knowledge in ethical decision-making.

Name
Describe the significance of the strengths perspective and empowerment in working with individuals and families.

Name
Develop ethnic sensitive approaches to working with people throughout all phases of the planned change process.

Name
Explain the significance of context in person-in-environment assessments, in determining appropriate strategies for change, and in applying the knowledge values, and skills of generalist social work practice.

Name
Utilize collaborative problem-solving skills in facilitating change.

Name
Apply the strengths perspective to client assessments and problem-solving strategies.

Name
Use critical thinking skills in developing bio-spiritual-social assessments.

Name
Apply the knowledge of bio-psycho-social variables that affect individual development and behavior to the process of assessment.

Name
Demonstrate communication skills related to the phases of the problem-solving process with micro systems including engagement, exploring, assessment, planning, implementation, evaluation, and transition.

Name
Evaluate research regarding practice interventions and working with diverse people groups.

Name
Demonstrate professional attitudes including a commitment to personal growth and learning.

Name
Determine the basic roles that generalist social workers play as they target change at the micro, mezzo, and macro levels.

SOWK3183 - CHILD MALTREATMENT & CHILD WELFARE

General

Course Prefix
SOWK

Course Number
3183

Description
Provides a framework of knowledge, values, and skills necessary to the field of child welfare. This course provides students with knowledge and skills related to the theory, research, and implications of child and adolescent maltreatment for child development and well-being. Course content is presented within the context of child welfare practice and social work with children and adolescents in public agencies and programs. Particular attention will be given to federal and state child welfare statutes including Chapter 39, Florida statutes, the Child Maltreatment Index and the range of services provided by the Department of Children and Families and other agencies.Prerequisites: None

Credit Hours

Minimum Credit Hours:

Learning Outcomes

Learning Outcomes

Objective
Analyze the child welfare delivery system, with specific attention to the Florida Child Welfare Practice Model.

Name
Demonstrate an understanding of the knowledge, skills, ethics and values as outlined in the Florida Child Welfare Code of Ethical and Professional Conduct and the National Association of Social Workers (NASW) Code of Ethics.

Name
Identify the characteristics and dynamics of various forms of child maltreatment as represented in the Florida Child Maltreatment Index.

Name
Describe the effects of maltreatment on child development and functioning and the importance of trauma informed care.

Name
Examine the effects of maltreatment on child development and functioning and the importance of trauma informed care.

Name
Analyze the child welfare delivery system, with specific attention to the Florida Child Welfare Practice Model.

SOWK3243 - DEATH, LOSS, AND BEREAVEMENT

General

Course Prefix
SOWK

Course Number
3243

Description
This course provides a comprehensive understanding of death, dying, loss, and bereavement for students across disciplines. Placing an emphasis on social, cultural, religious, and historical factors, the course examines common attitudes, biases, behaviors, and emotions related to end-of-life issues. Common grief reactions and appropriate intervention strategies are explored. By gaining an awareness of personal mortality, students are challenged to foster a greater appreciation of life.Prerequisites: None

Credit Hours

Minimum Credit Hours:
0

Maximum Credit Hours:
4

(Credit Hours) Value:
3

Contact Hours (not needed)

(Contact Hours) Value (not needed) :
3

Learning Outcomes

Learning Outcomes

Objective
Evaluate principles related to death, grief, and the afterlife from a Christian worldview and biblical perspective.

Name
Recognize the needs of individuals and families experiencing life-limiting illnesses and the roles of various helping professionals and organizations in meeting those needs.

Name
Demonstrate awareness of appropriate intervention strategies for assisting children, adults, and families experiencing loss, death, or bereavement.

Name
Examine different perspectives and theories related to death and dying.

Name
Assess the complexities involved in planning funeral experiences and death rituals.

Name
Identify the most common grief and loss reactions experienced by children and adults across the life cycle.

Name
Evaluate medical decisions, social policy issues, and ethical dilemmas frequently encountered by end-of-life helping professionals.

Name
Recognize the historical changes in the Western perception, experiences, and treatment of death, dying, bereavement, and loss.

Name
Examine awareness of personal spiritual beliefs, attitudes, and feelings regarding death.

Name
Recognize the significant variability in the experiences and attitudes of death, dying, grief, and mourning depending on culture, age, race, religion, gender, and social class.

Name
Evaluate principles related to death, grief, and the afterlife from a Christian worldview and biblical perspective.

SOWK3303 - WRITING FOR SOCIAL WORK PRACTICE

General

Course Prefix
SOWK

Course Number
3303

Description
This course prepares students to engage in effective written communication for generalist social work practice with systems of all sizes. Emphasis is placed on developing writing skills required to document services, develop assessments using ecosystems concepts, write reports for inter-professional communication, analyze problems, advocate for services, and utilize research to inform practice. Prerequisite: ENGL 1113

Learning Outcomes

Learning Outcomes

Objective
Recognize strengths and challenges in their writing, utilizing writing resources and corrective techniques.

Name
Analyze why professional writing is an essential practice skill.

Name
Engage in professional behavior in all written communication.

Name
Practice personal reflection and self-correction through writing.

Name
Apply critical thinking to inform and communicate professional judgments

Name
Demonstrate ownership of writing processes and outcomes, utilizing a multi-step process for completing writing projects.

Name
Utilize research resources to demonstrate information literacy.

Name
Incorporate familiarity with the content and use of APA Publications Manual.

Name
Articulate the ethical and logical rationale for responsible source citation.

Name
Integrate social work ethical principles and standards to guide professional writing.

Name
Demonstrate the essential elements of professional writing for social work practice.

Name
Recognize strengths and challenges in their writing, utilizing writing resources and corrective techniques.

SOWK3413 - MENTAL HEALTH SYSTEMS & STRATEGIES

General

Course Prefix
SOWK

Course Number
3413

Description
This social work course examines the concepts of “mental health” and “mental health disorders” from a risk and resilience framework. It studies the bio-psycho-social aspects of mental health challenges. The history of community mental health, as well as various aspects of assessment and service provision, will be studied. The role of the baccalaureate social worker in community and behavioral mental health will be explored using the generalist social work model. Prerequisites: SOWK 2013

- SOWK2013 - INTRODUCTION TO SOCIAL WORK

Learning Outcomes

Learning Outcomes

Objective
Incorporate the role of spirituality into the understanding and treatment of mental health disorders.

Name
Demonstrate an understanding of the historical perspectives of mental health/mental illness.

Name
Identify personal biases regarding mental illness, with a focus on understanding how personal views have been influenced and informed.

Name
Describe the impact of various factors such as gender, age, and culture on the assessment and treatment of mental health/mental illness.

Name
Identify strategies to help individuals overcome oppression, discrimination, and other barriers to access and quality of mental health services.

Name
Demonstrate an understanding of the continuum of mental health services from least restrictive to most restrictive settings.

Name
Explain the role of key social work values as they relate to clients rights to self-determination, basic civil rights, self-help, and reducing the stigma associated with mental illness.

Name
Discuss numerous social work roles in the mental health system.

Name
Demonstrate ability to understand a five axis diagnosis utilizing the DSM classification system.

Name
Identify types of mental health issues commonly treated in clinical and social service settings, utilizing the DSM classification system.

Name
Incorporate the role of spirituality into the understanding and treatment of mental health disorders.

SOWK4011 - PREPARATION FOR FIELD EDUCATION

General

Course Prefix
SOWK

Course Number
4011

Description
This course introduces the purpose, requirements, and expectations of the field experience. Students review ethical responsibilities, professionalism, risk management, and culturally competent practice. Field site options are explored, agency interviews conducted, and agency placement is arranged by the end of the semester. This course also provides an orientation to web-based Intern Placement Tracking program, the BSW field manual and related forms, including drafting of a Practicum Learning Contract. Pre-requisite: Admission to the BSW Program

Learning Outcomes

Learning Outcomes

Objective
Create a practicum learning contract utilizing the social work competencies and related tasks.

Name
Identify the purpose, goals, and expectations of the field experience.

Name
Evaluate his or her own professional, personal, and spiritual strengths, challenges, interests, and biases during the field selection process.

Name
Develop professional interviewing skills in preparation for internship interviews.

Name
Identify the necessary orientation tasks of the field placement.

Name
Discover strategies for maintaining safety while in the practicum.

Name
Create a plan to implement healthy coping skills.

Name
Define his or her field responsibilities.

Name
Articulate their legal responsibilities as a social worker and purchase professional liability insurance.

Name
Identify ways to constructively use supervision through identification of personal learning styles.

Name
Communicate an understanding about how to use the Intern Placement Tracking Program, including the Weekly Time Log.

Name
Appraise the importance of professional affiliation and apply for membership in one social work professional organization.

Name
Develop a personal plan for professional dress and professional business etiquette while in the practicum.

Name
Create a practicum learning contract utilizing the social work competencies and related tasks.

SOWK4023 - PRACTICE WITH FAMILIES & GROUPS

General

Course Prefix
SOWK

Course Number
4023

Description
This course is a continuation of SOWK 3133. Social work practice theories, methods, skills and values relevant to generalist practice with families and groups are emphasized. Therapeutic models used with individuals, families, and groups are assessed. Focus is on group and family assessment and interventions. Prerequisite: SOWK 2013; Admission to BSW Program

Learning Outcomes

Learning Outcomes

Objective
Evaluate research studies and findings to assessment and practice interventions.

Name
Apply a generalist model of social work practice to work with families and groups.

Name
Apply an ecological systems framework in assessing families and groups.

Name
Demonstrate the skills necessary for assessing intrapersonal and environmental systems in working with families and groups.

Name
Utilize a strengths and empowerment perspective in assessing and intervening in families and groups.

Name
Use critical thinking skills in analyzing practice interventions and their appropriate use in work with micro and mezzo systems.

Name
Discuss cultural factors that impact family systems and produce variations in family functioning among different cultural groups.

Name
Apply knowledge about cultural diversity in developing effective interventions with families and groups.

Name
Demonstrate the knowledge and skills essential to enhance individual, family, and couple functioning.

Name
Demonstrate the skills necessary for forming and assessing social work groups.

Name
Utilize knowledge and skills in managing individual and family barriers to change.

Name
Demonstrate professional use of self in role-playing practice situations involving families and groups.

Name
Evaluate research studies and findings to assessment and practice interventions.

SOWK4053 - RESEARCH METHODS

General

Course Prefix
SOWK

Course Number
4053

Description

This course deals with the application of the scientific method of inquiry in application to theory and practice for the purpose of knowledge building and the development of best practice. The content of this course includes research design, quantitative and qualitative research methodologies, systematic evaluation of practice, and evaluation of theory. The focus is on the development of social research and practice with individuals, groups, organizations, and communities. Prerequisites: PSYC 1133

Learning Outcomes

Learning Outcomes

Objective
Demonstrate competence in the writing needed to describe social intervention research and to report findings.

Name
Demonstrate an understanding of the role and contribution of a scientific approach to building knowledge for practice, including problem formation, development of intervention strategies, and evaluation of service delivery.

Name
Formulate research questions that are designed to test, refine, and build practice theory.

Name
Develop a research proposal to inform or evaluate an area of social practice (clinical, program, or policy).

Name
Demonstrate an ability to critically evaluate and interpret published research findings.

Name
Use relevant library indexes, abstracts, and online computer information services to conduct research.

Name
Conduct a search of the literature on social work issues.

Name
Differentiate among a variety of qualitative and quantitative research designs, including experimental and single subject design, survey and field research, and program and policy evaluation.

Name
Demonstrate ability to select an appropriate measurement instrument, utilizing the principles of reliability and validity.

Name
Explore appropriate sampling strategies based on understanding probability and non probability sampling techniques.

Name
Suggest an appropriate method of data collection through an understanding of diverse techniques.

Name
Examine and become sensitive to ethical issues in the conduct of social research.

Name
Demonstrate competence in the writing needed to describe social intervention research and to report findings.

SOWK4114 - FIELD PRACTICUM & SEMINAR I

General

Course Prefix
SOWK

Course Number
4114

Description
This practicum and seminar course provides students an educationally directed practicum, introducing the student to agency-based social work practice, as well as an opportunity to discuss practicum experiences with other students and to integrate theory with practice. The student completes 200 hours in a social service setting, engaging in direct social work practice, under the guidance of a professional social worker. The student begins to integrate theory and practice and demonstrates beginning social work practice behaviors, with the focus on professional growth and development. Students assess their field experiences, examine ethical issues, and demonstrate skills in understanding of agency structures and policies at the micro, mezzo, and macro levels. Prerequisite: SOWK 4011; BSW Program Admission

- SOWK4011 - PREPARATION FOR FIELD EDUCATION

AND BSW Program Admission

Learning Outcomes

Learning Outcomes

Name
Demonstrate ethical and professional behavior Make ethical decisions by applying the standards of the NASW Code of Ethics, relevant laws and regulations, models for ethical decision-making, ethical conduct of research, and additional codes of ethics as appropriate to context. Use reflection and self-regulation to manage personal values and maintain professionalism in practice situations. Demonstrate professional demeanor in behavior; appearance; and oral, written, and electronic communication. Use technology ethically and appropriately to facilitate practice outcomes. Use supervision and consultation to guide professional judgment and behavior.

Name
Advance human rights and social, racial, economic, and environmental justice Applies their understanding of social, racial, economic, and environmental justice to advocate for human rights at the individual and systems levels. Engage in practices that advance social, racial, economic, and environmental justice.

Name
Engage anti-racism, diversity, equity, and inclusion in practice Demonstrate anti-racist and anti-oppressive social work practice at the micro, mezzo, and macro levels. Present themselves as learners and engage clients and constituencies as experts of their own experiences.

Name
Apply self-awareness and self-regulation to manage the influence of personal biases and values in working with diverse clients and constituencies

Name
Engage in practice-informed research and research-informed practice Use practice experience and theory to inform scientific inquiry and research. Apply critical thinking to engage in the analysis of quantitative and qualitative research methods and research findings. Use and translate research evidence to inform and improve practice, policy, and service delivery. Identify ethical, culturally informed, anti-racist, and anti-oppressive strategies that address inherent biases for use in quantitative and qualitative research methods to advance the purposes of social work.

Name
Engage in policy practice Identify social policy at the local, state, and federal levels that impacts well-being, service delivery, and access to social services. Assess how social welfare and economic policies impact the delivery of and access to social services. Apply critical thinking to analyze, formulate, and advocate for policies that advance human rights and social, economic, and environmental justice.

Name
Engages with individuals, families, groups, organizations, and communities Apply knowledge of human behavior and the social environment, person-in-environment, and other multidisciplinary theoretical frameworks to engage with clients and constituencies. Use empathy, reflection, and interpersonal skills to effectively engage diverse clients and constituencies.

Name
Assess with individuals, families, groups, organizations, and communities Collect and organize data, and apply critical thinking to interpret information from clients and constituencies. Apply knowledge of human behavior and the social environment, person-in-environment, and other multidisciplinary theoretical frameworks in the analysis of assessment data from clients and constituencies. Develop mutually agreed-on intervention goals and objectives based on the critical assessment of strengths, needs, and challenges within clients and constituencies. Select appropriate intervention strategies based on the assessment, research knowledge, and values and preferences of clients and constituencies.

Name
Intervene with individuals, families, groups, organizations, and communities Critically choose and implement interventions to achieve practice goals and enhance capacities of clients and constituencies. Apply knowledge of human behavior and the social environment, person-in-environment, and other multidisciplinary theoretical frameworks in interventions with clients and constituencies. Use inter-professional collaboration as appropriate to achieve beneficial practice outcomes. Negotiate, mediate, and advocate with and on behalf of diverse clients and constituencies. Facilitate effective transitions and endings that advance mutually agreed-on goals.

Name
Evaluate practice with individuals, families, groups, organizations, and communities Select and use appropriate methods for evaluation of outcomes. Apply knowledge of human behavior and the social environment, person-in-environment, and other multidisciplinary theoretical frameworks in the evaluation of outcomes. Critically analyze, monitor, and evaluate intervention and program processes and outcomes. Apply evaluation findings to improve practice effectiveness at the micro, mezzo, and macro levels.

Name
Integrate faith and social work practice in a way that embraces diversity and is consistent with both the Christian Faith and the NASW Code of Ethics. Understand and work effectively with the religious, faith, and spirituality dimensions of persons and communities. Understand and work effectively within the context of the practice setting in regard to faith and spirituality. Draw from ones own faith and spirituality to practice self-care and to empower ones ability to engage in effective social work practice.

SOWK4123 - PRACTICE WITH COMMUNITIES & ORGS

General

Course Prefix
SOWK

Course Number
4123

Description
This course examines generalist practice theories, knowledge, values, methods, and skills for work with and in organizations, communities, and large social systems with special emphasis on social work with groups, organizations, and communities. Prerequisite: SOWK 2013; Admission to BSW Program

Objective
Apply research-based knowledge of cultural and social diversity and the effect of these attributes on social problems and client empowerment within communities and organizations.

Name
Describe the basic components of macro practice.

Name
Illustrate a generalist model of practice within a systems framework to macro-level systems.

Name
Describe how micro, mezzo, and macro skills are interrelated in generalist social work practice.

Name
Apply specific skills useful in initiating change in groups, organizations, and communities.

Name
Assess organizations and communities from a strengths perspective.

Name
Demonstrate mastery of a wide range of practice skills to target systems of all sizes for planned change.

Name
Apply professional values in planning interventions to combat social inequities and in the promotion of social and economic justice.

Name
Utilize critical thinking skills in identifying problems in systems and in planning interventions

Name
Apply research-based knowledge of cultural and social diversity and the effect of these attributes on social problems and client empowerment within communities and organizations.

SOWK4124 - FIELD PRACTICUM & SEMINAR II

General

Course Prefix
SOWK

Course Number
4124

Description
This course concentrates on practice related issues with a strengths based method of problem solving, providing students with an opportunity to discuss practicum experiences with other students, discuss issues related to practice and service delivery systems, integrate theory with practice, and apply research to practice. This course is a continuation of SOWK 4114, with the student completing an additional 200 hours in the same social work practicum agency. This course provides continued experience in generalist social work practice under the supervision of a professional social worker.Prerequisite: SOWK 4114, Admission to BSW Program

SOWK4143 - HUMAN TRAFFICKING IN AMERICA

General

Course Prefix
SOWK

Course Number
4143

Description
This course is an upper level undergraduate and graduate level course designed to provide students with an overview of contemporary human trafficking in America. Students will learn about the various types of human trafficking and exploitation that exist and the systems that support it. From a person in environment perspective, the bio-psycho-spiritual impact of human trafficking will be explored. Potential strategies for social work practice at the micro, mezzo, and macro level are addressed.Prerequisite: None

Learning Outcomes

Objective
Incorporate a biblical worldview and social justice perspective to address the issues surrounding human trafficking and modern day slavery.

Name
Assess the scope and magnitude of human trafficking in America.

Name
Define the various forms of human trafficking and modern day slavery that exist.

Name
Identify the complex contextual factors that are associated with human trafficking including historical, legal, economic, political, social, global, and regional elements.

Name
Apply a person-in-environment perspective to understand the impact of human trafficking and exploitation on survivors.

Name
Explore trauma-informed approaches for case management and intervention with survivors of human trafficking.

Name
Assess prevention, awareness, and outreach strategies and the inherent challenges that are involved in eradicating human trafficking in a global society.

Name
Compare laws and policies in America and around the globe that affect trafficking, considering how laws and policies can be changed to combat human trafficking and modern day slavery.

Name
Incorporate a biblical worldview and social justice perspective to address the issues surrounding human trafficking and modern day slavery.

SOWK4213 - SUBSTANCE USE DISORDERS

General

Course Prefix
SOWK

Course Number
4213

Description
This course introduces students to theories and interventions that can be used to support clients and families impacted by substance use disorders. Topics include theories and evidence-based intervention strategies applicable to the diagnosis and treatment of substance use disorders, common substances of abuse including their signs and symptoms, research and statistics about substance use in America, the impact of addiction on the family, and the role of the social worker in the prevention and intervention of substance use disorders.Prerequisites: SOWK 2013

Learning Outcomes

Objective
Examine the influence of religious and spiritual beliefs on the prevention and treatment of substance use disorders.

Name
Describe common substances of abuse and dependence including their physiological and psychological effects.

Name
Apply criteria from the Diagnostic and Statistical Manual (DSM) to render appropriate assessment and diagnosis of substance use disorders.

Name
Identify various theories and treatment interventions commonly used for substance use disorders.

Name
Examine the basic philosophy of mutual-aid support groups (i.e., Alcoholics Anonymous) and their usefulness for clients and families.

Name
Discuss the characteristics and dynamics of families affected by addiction and methods of intervention with families.

Name
Utilize person-centered language when discussing how substance use diagnoses affect individuals and families.

Name
Discuss the effects of substance abuse on special populations including clients with co-occurring disorders, adolescents, pregnant women, and older adults.

Name
Examine the influence of religious and spiritual beliefs on the prevention and treatment of substance use disorders.

SOWK4223 - INTGRTG FAITH & SCL WRK THEORY/PRAC

General

Course Prefix
SOWK

Course Number
4223

Description
This course will prepare students to integrate their faith dynamically and ethically with social work practice. The course will explore how diverse spiritual traditions impact and define clients' experiences and address the importance of religion and spirituality as an integral aspect of addressing client needs. Students will be encouraged to develop spiritual practices to sustain their own callings and a personal understanding regarding how to integrate Christian thought, values, and principles with professional ethics and practice. Learning Outcomes

Learning Outcomes

Objective
Examine the Judeo-Christian roots of social welfare and the social work profession.

Objective
Compare and contrast central elements of a Christian worldview with leading worldviews, and the underlying assumptions and values of the profession of social work.

Objective
Explore the significance of spirituality and faith when addressing the bio-psycho-social-spiritual needs of clients at the various stages of generalist social work practice.

Objective
Apply skills necessary for spiritual assessment and the development of intervention goals that are appropriate to the religious faith of clients.

Objective
Develop self-awareness regarding one's spiritual and religious values and how to utilize those as a part of the professional use of self.

Objective
Develop an understanding of various spiritual traditions likely to be encountered in social work settings.

Objective
Recognize and constructively address ethical issues regarding faith, spirituality, and values and develop strategies for resolving ethical dilemmas.

Objective
Develop a personal statement regarding beliefs, values, and calling that will facilitate confident intercourse with the social work profession regarding the ongoing role and contribution of Christians in social work.

SOWK4273 - Social Work & Healthcare

General

Course Prefix
SOWK

Course Number
4273

Description
This course provides a detailed exploration of social work practice across the continuum of healthcare services. Students are provided with the necessary knowledge, skills, and ethical understanding required for competent practice as a healthcare social worker as well as an understanding of historic, current and anticipated conditions shaping practice. Social work practice is explored within the context of the psychosocial consequences of illness, the structure of the healthcare delivery system, technological advances, changing economic and regulatory practices, as well as ethical, political and legal considerations. Social and spiritual determinants of health including class, race, gender, religious affiliation, and sexual orientation are also analyzed.

Learning Outcomes

Objective
Discuss the similarities and differences between international social work practice and faith-based international mission work.

Name
Define international social work including the need for, benefits of, and cautions important to engaging in international social work.

Name
Discuss several global perspectives and models of social welfare and social work for use in the United States and international settings.

Name
Examine the International Federation of Social Workers Statement of Ethical Principles.

Name
Identify organizations in international social work and their intended and actual impact on international social welfare.

Name
Analyze the impact of historical, religious, cultural, environmental, political, and economic factors on social welfare policies and the delivery of human services in different regions of the world.

Name
Apply knowledge of strategies related to developing trust and serving as co-learners in cross-cultural and international settings.

Name
Examine various regulations and laws regulating the practice of social work in different countries.

Name
Explore the impact of advocacy in international social work practice.

Name
Discuss the similarities and differences between international social work practice and faith-based international mission work.

SOWK4353 - SPORTS, SOCIAL WORK AND WELNESS

General

Course Prefix
SOWK

Course Number
4353

Description
This practice course provides a comprehensive understanding of sports culture, sports influence, and sports life cycle, while identifying complex dilemmas encountered in social work practice with athletes. Placing an emphasis on sociocultural factors, sports communities, belief systems, behaviors, and emotions related to sports culture, students will learn therapeutic interventions to improve performance, enhance emotional well-being, and engage in team building. Common influential sports behaviors, community beliefs, and athletic influences are explored. Emphasis will be placed on implementing therapeutic interventions such as motivational interviewing, positive psychology, and mindfulness practices. By gaining an awareness of cultural beliefs, social justice issues, and sports communities students are challenged to foster a greater appreciation of sports awareness.

Describe how cultural beliefs and values, as well as social justice and advocacy, may shape perceptions of athletes and influence athletic outcomes.

Objective
Identify ways to assess athletes and their experiences at various stages of the life cycle.

Objective
Utilize ethical decision-making strategies when identifying complex dilemmas encountered in social work practice with athletes.

Objective
Demonstrate knowledge of biopsychosocial assessment and treatment plans specifically beneficial to athletes.

Objective
Implement therapeutic interventions including motivational interviewing, positive psychology, and mindfulness practices to enhance well-being.

Objective
Compare the influence of sports communities, immediate community surroundings, and the subpopulation in the community

Objective
Identify various systems needed to empower, influence, and promote the health and wellness of athletes.

SOWK5013 - GENERALIST PRACTICE WITH INDIVIDUAL

General

Course Prefix
SOWK

Course Number
5013

Description
This generalist practice course prepares students to apply the Generalist Intervention Model to develop strengths-based approaches for engagement, assessment, intervention and evaluation with individuals and families. Evidence-based theoretical frameworks and models for working with individuals and families are explored.

Credit Hours

Minimum Credit Hours:

Learning Outcomes

Learning Outcomes

Objective
Evaluate research studies and apply research findings to assessment and practice interventions with individuals and families.

Name
Apply the knowledge, values, and skills of generalist social work practice to systems of all sizes.

Name
Make ethical decisions regarding practice with individuals and families by applying the standards of the National Association of Social Workers Code of Ethics and models for ethical decision-making, as well as appropriate Judeo-Christian ethical principles.

Name
Apply the knowledge and skills necessary for assessing intrapersonal and environmental systems in working with individuals and families.

Name
Utilize a strengths and empowerment perspective in assessing, intervening, and evaluating generalist practice with individuals and families.

Name
Use critical thinking skills in analyzing practice interventions and their appropriate use in work with individuals and families.

Name
Identify cultural factors that impact individual and family systems and produce variations in individual and family functioning.

Name
Apply knowledge of cultural diversity to develop effective interventions for individuals and families.

Name
Apply the knowledge and skills necessary to enhance individual, couple, and family functioning.

Name
Demonstrate professional use of self in role-playing practice situations involving individuals and families.

Name
Demonstrate awareness of ones own spiritual beliefs and values regarding family structures and cultures and display sensitivity, understanding, and acceptance of clients who espouse diverse beliefs and values.

Name
Evaluate research studies and apply research findings to assessment and practice interventions with individuals and families.

SOWK5014 - FIELD EXPERIENCE/SEMINAR I

General

Course Prefix
SOWK

Course Number
5014

Description

This course provides an educationally directed practicum, introducing the student to agency-based social work practice. The student completes 200 hours in a social service setting, engaging in direct social work practice, under the guidance of a professional social worker. The student begins to integrate theory and practice and demonstrates beginning social work practice behaviors. Concurrently, the field seminar provides an opportunity to discuss practicum experiences with other students and to integrate social work theories with practice. Students discuss field experiences, agency contexts, and assessment of client strengths and needs. Prerequisites: SOWK 5021, SOWK 5043, SOWK 5023, SOWK 5013, SOWK 5053

Complete ALL of the following Courses:

- SOWK5021 - ACADEMIC WRITING AT THE GRADUATE
  AND SOWK5043 - FOUNDATIONS OF SOCIAL WORK PRACTICE
  AND SOWK5023 - HUMAN BEHAVIOR & THE SOCIAL ENVIRON
  AND SOWK5013 - GENERALIST PRACTICE WITH INDIVIDUAL
  AND SOWK5053 - ENGAGING DIVERSITY AND DIFFERENCE

Learning Outcomes

Learning Outcomes

Name
Demonstrate ethical and professional behavior Make ethical decisions by applying the standards of the NASW Code of Ethics, relevant laws and regulations, models for ethical decision-making, ethical conduct of research, and additional codes of ethics as appropriate to context. Use reflection and self-regulation to manage personal values and maintain professionalism in practice situations. Demonstrate professional demeanor in behavior; appearance; and oral, written, and electronic communication. Use technology ethically and appropriately to facilitate practice outcomes. Use supervision and consultation to guide professional judgment and behavior.

Name
Advance human rights and social, racial, economic, and environmental justice Applies their understanding of social, racial, economic, and environmental justice to advocate for human rights at the individual and systems levels. Engage in practices that advance social, racial, economic, and environmental justice.

Name
Engage anti-racism, diversity, equity, and inclusion in practice Demonstrate anti-racist and anti-oppressive social work practice at the micro, mezzo, and macro levels. Present themselves as learners and engage clients and constituencies as experts of their own experiences. Apply self-awareness and self-regulation to manage the influence of personal biases and values in working with diverse clients and constituencies.

Name
Engage in practice-informed research and research-informed practice Use practice experience and theory to inform scientific inquiry and research. Apply critical thinking to engage in the analysis of quantitative and qualitative research methods and research findings. Use and translate research evidence to inform and improve practice, policy, and service delivery. Identify ethical, culturally informed, anti-racist, and anti-oppressive strategies that address inherent biases for use in quantitative and qualitative research methods to advance the purposes of social work.

Name
Engage in policy practice Identify social policy at the local, state, and federal levels that impacts well-being, service delivery, and access to social services. Assess how social welfare and economic policies impact the delivery of and access to social services. Apply critical thinking to analyze, formulate, and advocate for policies that advance human rights and social, economic, and environmental justice.

Name
Engages with individuals, families, groups, organizations, and communities Apply knowledge of human behavior and the social environment, person-in-environment, and other multidisciplinary theoretical frameworks to engage with clients and constituencies. Use empathy, reflection, and interpersonal skills to effectively engage diverse clients and constituencies.

Name
Assess with individuals, families, groups, organizations, and communities Collect and organize data, and apply critical thinking to interpret information from clients and constituencies. Apply knowledge of human behavior and the social environment, person-in-environment, and other multidisciplinary theoretical frameworks in the analysis of assessment data from clients and constituencies. Develop mutually agreed-on intervention goals and objectives based on the critical assessment of strengths, needs, and challenges within clients and constituencies. Select appropriate intervention strategies based on the assessment, research knowledge, and values and preferences of clients and constituencies.

Name
Intervene with individuals, families, groups, organizations, and communities Critically choose and implement interventions to achieve practice goals and enhance capacities of clients and constituencies. Apply knowledge of human behavior and the social environment, person-in-environment, and other multidisciplinary theoretical frameworks in interventions with clients and constituencies. Use inter-professional collaboration as appropriate to achieve beneficial practice outcomes. Negotiate, mediate, and advocate with and on behalf of diverse clients and constituencies. Facilitate effective transitions and endings that advance mutually agreed-on goals.

Name
Evaluate practice with individuals, families, groups, organizations, and communities Select and use appropriate methods for evaluation of outcomes. Apply knowledge of human behavior and the social environment, person-in-environment, and other multidisciplinary theoretical frameworks in the evaluation of outcomes. Critically analyze, monitor, and evaluate intervention and program processes and outcomes. Apply evaluation findings to improve practice effectiveness at the micro, mezzo, and macro levels.

Name
Integrate faith and social work practice in a way that embraces diversity and is consistent with both the Christian Faith and the NASW Code of Ethics. Understand and work effectively with the religious, faith, and spirituality dimensions of persons and communities. Understand and work effectively within the context of the practice setting in regard to faith and spirituality. Draw from ones own faith and spirituality to practice self-care and to empower ones ability to engage in effective social work practice.

SOWK5021 - ACADEMIC WRITING AT THE GRADUATE

General

Course Prefix
SOWK

Course Number
5021

Description
This course prepares students to engage in effective written communication for graduate education. Importance is placed on academic writing in social work to identify and build upon the work of reliable authors. This course employs guidelines set by the current Publication Manual of the American Psychological Association (APA) style for writing style, references, and citations.

Learning Outcomes

Learning Outcomes

Objective
Use media/technology ethically and appropriately in professional writing and presentations.

Name
Demonstrate ownership of writing processes and outcomes through the appropriate utilization of available academic resources (i.e., peer-review, tutoring, library assistance).

Name
Apply a multi-step process to academic writing.

Name
Access and use library databases to gather research.

Name
Apply writing style, references, and citation guidelines of the Publication Manual of the American Psychological Association.

Name
Discuss responsible source citation.

Name
Apply social work ethical principles and standards to professional writing.

Name
Identify the elements of professional writing for social work graduate education.

Name
Use media/technology ethically and appropriately in professional writing and presentations.

SOWK5023 - HUMAN BEHAVIOR & THE SOCIAL ENVIRON

General

Course Prefix
SOWK

Course Number
5023

Description
This course focuses on skill development in assessment and intervention, using a “person-in-environment” perspective throughout the life cycle. Social work theories, including ecological systems theory, will be explored. This foundational social work course is aimed at helping students acquire basic knowledge of human functioning and is a study of the interaction of biological, psychological, sociological, cultural, spiritual, and systemic influences on human functioning.

Learning Outcomes

Learning Outcomes

Objective
Demonstrate critical thinking by integrating course material and current research pertaining to issues that impact developmental trajectories.

Name
Demonstrate basic knowledge of the ecological factors stemming from biological, psychological, and sociological origins that affect the functioning of individuals, families, groups, organization and communities across the lifespan.

Name
Describe how cultural beliefs and values, as well as oppression, may shape perceptions of self and others and influence the worker-client relationship.

Name
Identify the ways that social systems and individuals promote/obstruct the achievement and maintenance of health, strength, and well-being in one another.

Name
Demonstrate knowledge of theoretical frameworks used in social work, including systems theory and the ecological perspective, by discussing the tenets of these theories and applying theories to interactions involving individuals, families, groups, organizations and/or communities.

Name
Utilize conceptual frameworks/theories to guide the practice of engagement and assessment of a client.

Name
Demonstrate critical thinking by integrating course material and current research pertaining to issues that impact developmental trajectories.

SOWK5024 - FIELD EXPERIENCE/SEMINAR II

General

Course Prefix
SOWK

Course Number
5024

Description
This course is a continuation of SOWK 5014, with the student completing an additional 200 hours in the same social work practicum agency. This course provides continued experience in generalist social work practice under the supervision of a professional social worker. Concurrently, the field seminar provides an opportunity to discuss practicum experiences with other students and to integrate social work theories with practice. Students discuss field experiences, agency contexts, and biopsychosocial assessment of clients. Students must demonstrate all social work competencies designated by the Council on Social Work Education.

Learning Outcomes

Learning Outcomes

Name
Demonstrate ethical and professional behavior Make ethical decisions by applying the standards of the NASW Code of Ethics, relevant laws and regulations, models for ethical decision-making, ethical conduct of research, and additional codes of ethics as appropriate to context. Use reflection and self-regulation to manage personal values and maintain professionalism in practice situations. Demonstrate professional demeanor in behavior; appearance; and oral, written, and electronic communication. Use technology ethically and appropriately to facilitate practice outcomes. Use supervision and consultation to guide professional judgment and behavior.

Name
Advance human rights and social, racial, economic, and environmental justice Applies their understanding of social, racial, economic, and environmental justice to advocate for human rights at the individual and systems levels. Engage in practices that advance social, racial, economic, and environmental justice.

Name
Engage anti-racism, diversity, equity, and inclusion in practice Demonstrate anti-racist and anti-oppressive social work practice at the micro, mezzo, and macro levels. Present themselves as learners and engage clients and constituencies as experts of their own experiences. Apply self-awareness and self-regulation to manage the influence of personal biases and values in working with diverse clients and constituencies.

Name
Engage in practice-informed research and research-informed practice Use practice experience and theory to inform scientific inquiry and research. Apply critical thinking to engage in the analysis of quantitative and qualitative research methods and research findings. Use and translate research evidence to inform and improve practice, policy, and service delivery. Identify ethical, culturally informed, anti-racist, and anti-oppressive strategies that address inherent biases for use in quantitative and qualitative research methods to advance the purposes of social work.

Name
Engage in policy practice Identify social policy at the local, state, and federal levels that impacts well-being, service delivery, and access to social services. Assess how social welfare and economic policies impact the delivery of and access to social services. Apply critical thinking to analyze, formulate, and advocate for policies that advance human rights and social, economic, and environmental justice.

Name
Engages with individuals, families, groups, organizations, and communities Apply knowledge of human behavior and the social environment, person-in-environment, and other multidisciplinary theoretical frameworks to engage with clients and constituencies. Use empathy, reflection, and interpersonal skills to effectively engage diverse clients and constituencies.

Name
Assess with individuals, families, groups, organizations, and communities Collect and organize data, and apply critical thinking to interpret information from clients and constituencies. Apply knowledge of human behavior and the social environment, person-in-environment, and other multidisciplinary theoretical frameworks in the analysis of assessment data from clients and constituencies. Develop mutually agreed-on intervention goals and objectives based on the critical assessment of strengths, needs, and challenges within clients and constituencies. Select appropriate intervention strategies based on the assessment, research knowledge, and values and preferences of clients and constituencies.

Name
Intervene with individuals, families, groups, organizations, and communities Critically choose and implement interventions to achieve practice goals and enhance capacities of clients and constituencies. Apply knowledge of human behavior and the social environment, person-in-environment, and other multidisciplinary theoretical frameworks in interventions with clients and constituencies. Use inter-professional collaboration as appropriate to achieve beneficial practice outcomes. Negotiate, mediate, and advocate with and on behalf of diverse clients and constituencies. Facilitate effective transitions and endings that advance mutually agreed-on goals.

Name
Evaluate practice with individuals, families, groups, organizations, and communities Select and use appropriate methods for evaluation of outcomes. Apply knowledge of human behavior and the social environment, person-in-environment, and other multidisciplinary theoretical frameworks in the evaluation of outcomes. Critically analyze, monitor, and evaluate intervention and program processes and outcomes. Apply evaluation findings to improve practice effectiveness at the micro, mezzo, and macro levels.

Name
Integrate faith and social work practice in a way that embraces diversity and is consistent with both the Christian Faith and the NASW Code of Ethics. Understand and work effectively with the religious, faith, and spirituality dimensions of persons and communities. Understand and work effectively within the context of the practice setting in regard to faith and spirituality. Draw from ones own faith and spirituality to practice self-care and to empower ones ability to engage in effective social work practice.

SOWK5033 - PRACTICE WITH GROUPS/ ORGS/COMM

General

Course Prefix
SOWK

Course Number
5033

Description
This generalist practice course prepares students to apply evidence-based theoretical frameworks and interventions while utilizing a strengths-based perspective to engage, assess, intervene, and evaluate practice with groups, communities, and organizations.

Learning Outcomes

Learning Outcomes

Objective
Apply a generalist model of social work to practice with groups, communities, and organizations.

Objective
Apply multi-disciplinary theoretical frameworks when assessing groups, communities, and organizations.

Objective
Use critical thinking skills when identifying problems and evaluating practice interventions for use with groups, communities, and organizations.

Objective
Utilize a strengths and empowerment perspective in assessing and intervening with groups, communities, and organizations.

Objective
Apply knowledge of the interrelationship between micro, mezzo, and macro systems and skills in generalist social work practice.

Objective
Identify the role of professional values and ethics in planning interventions that combat social inequities and promote social, environmental, and economic justice.

Objective
Apply knowledge of cultural diversity when intervening with groups, communities, and organizations.

SOWK5043 - FOUNDATIONS OF SOCIAL WORK PRACTICE

General

Course Prefix
SOWK

Course Number
5043

Description
This introductory course surveys the historical, philosophical and ethical foundations of the social work profession with an emphasis on adhering to professional values and understanding theoretical frameworks for practicing social work. Students will develop the personal, professional, ethical, and intellectual foundations necessary for practicing social work. Attention is given to the various practice settings found within the social work profession and the roles/responsibilities that social workers and social welfare policies hold within each setting.

Learning Outcomes

Learning Outcomes

Objective
Communicate an understanding of and respect for diversity within the various fields and settings of social work practice.

Name
Define social work, the roles of social workers in diverse settings, and the functions served by social workers in society.

Name
Discuss the historical, philosophical, and ethical foundations of social work as a helping profession

Name
Identify the purpose, mission, values, and ethics of social work.

Name
Examine social work values and how they interface with personal and Christian values.

Name
Describe the various fields and settings of social work practice.

Name
Discuss the various policies that govern settings of social work practice.

Name
Communicate an understanding of and respect for diversity within the various fields and settings of social work practice.

SOWK5053 - ENGAGING DIVERSITY AND DIFFERENCE

General

Course Prefix
SOWK

Course Number
5053

Description
This course examines the complex nature of culture and personal identity, explores populations at-risk, and encourages students to understand and appreciate diversity. An emphasis is placed on cultural competence, awareness of the patterns of power, privilege, and oppression experienced by diverse cultures, and skills relevant to engaging diversity and difference in social work practice. Students examine personal and social work values and their intersectionality with multiple factors including, but not limited to, age, class, color, culture, disability and ability, ethnicity, gender, gender identity and expression, immigration status, marital status, political ideology, race, religion/spirituality, sex, sexual orientation, and tribal sovereign status. Through experiential learning, assimilation projects, and analytical approaches, students will explore various theoretical perspectives to develop cultural competence.

Learning Outcomes

Learning Outcomes

Objective
Cultivate awareness of how diversity influences the lives of people and advocate for changes that decrease oppression and discrimination and enhance the wellbeing of all persons.

Name
Describe the patterns, mechanisms, dynamics, and consequences of discrimination, economic deprivation, and oppression as it relates to diversity.

Name
Describe and appraise changing demographics, cultural characteristics, and general experiences of various diverse populations.

Name
Apply strengths and empowerment perspectives to the understanding of diverse cultures, ethnicities, and people groups.

Name
Examine the cultural structures and values that oppress, marginalize, alienate, or create privilege and power.

Name
Identify and integrate Christian beliefs and NASW Code of Ethics that influence attitudes and decisions regarding sensitivity to and appreciation of human diversity and difference.

Name
Identify ones own cultural heritage and examine the individual life experiences, values, and biases that impede or enhance sensitivity to diverse client systems.

Name
Describe the intersectionality between personal, spiritual, and professional social work values.

Name
Cultivate awareness of how diversity influences the lives of people and advocate for changes that decrease oppression and discrimination and enhance the wellbeing of all persons.

SOWK5063 - METHODS OF SOCIAL WORK RESEARCH

General

Course Prefix
SOWK

Course Number
5063

Description
This course prepares students to become effective consumers and producers of research. Students critically evaluate social work research and its application to social work practice with individuals, groups, communities, and organizations. Topics include: the scientific method of inquiry; research sampling, design, and data collection; ethical issues in social work research; conceptualization and operationalization of research studies; quantitative, qualitative, and mixed-methods of inquiry; and bivariate and univariate statistical analysis and interpretation.

Learning Outcomes

Learning Outcomes

Objective
Employ basic data analysis skills including the use of the Statistical Package for the Social Sciences (SPSS) to conduct univariate and bivariate analyses.

Name
Demonstrate an understanding of the scientific approach to human inquiry and its role in building knowledge for practice and utilizing practice experience to inform research.

Name
Differentiate among a variety of research designs and sampling methods.

Name
Analyze and critique qualitative, quantitative, and mixed-methods research methods and findings.

Name
Utilize electronic library databases to conduct research on social work practice, policy, and/or service delivery.

Name
Translate research findings to improve social work practice, policy, and/or service delivery.

Name
Describe potential biases and ethical issues related to social work research.

Name
Employ basic data analysis skills including the use of the Statistical Package for the Social Sciences (SPSS) to conduct univariate and bivariate analyses.

SOWK5073 - INTERVIEWING AND HELPING SKILLS

General

Course Prefix
SOWK

Course Number
5073

Description
This generalist practice course facilitates the development of the interpersonal and communication skills that are foundational to each level of social work practice. Through the use of experiential learning activities including role-play, interactive exercises, and digitally recorded mock interviews students are prepared to use strengths-based strategies for engaging, communicating and developing collaborative partnerships with diverse clients and constituencies.

Learning Outcomes

Learning Outcomes

Objective
Apply and communicate understanding of the importance of diversity and difference in shaping life experiences in practice.

Name
Apply a strengths-based and empowerment perspective to the helping process.

Name
Demonstrate self-awareness and understand its impact on the helping process.

Name
Apply foundational skills in engaging client systems and building trust and respect in helping relationships.

Name
Utilize micro skills appropriate to helping relationships such as attending and listening, observation, identifying and reflecting feeling and meaning, confrontation, focusing, reframing, and appropriate use of self-disclosure.

Name
Use empathy, reflection, and interpersonal skills to effectively develop collaborative partnerships with clients in the process of problem solving.

Name
Demonstrate the ability to utilize skills for identifying relevant issues and empowering clients to work toward solutions.

Name
Integrate professional values in the helping process.

Name
Apply and communicate understanding of the importance of diversity and difference in shaping life experiences in practice.

SOWK5083 - SOCIAL WELFARE POLICY

General

Course Prefix
SOWK

Course Number
5083

Description
This course surveys the history of social welfare as an institution and current state of social welfare programs in America. Attention is given to the analysis of social, economic, environmental, and political forces that shape current policies and programs, including the values and ethics impacting policy. This course encourages critical thinking and explores analytical approaches to contemporary social welfare issues, policies, and programs. Strategies that influence organizational, local, state, and federal policy formation will be explored.

Learning Outcomes

Learning Outcomes

Objective
Analyze research and apply to policy analysis.

Name
Discuss the elements of a policy analysis and use a framework to critique social policy.

Name
Discuss the implications and unintended consequences of social welfare policies

Name
Apply critical thinking skills to analyze and present a state or federal policy.

Name
Examine the roles of social workers in policy advocacy.

Name
Apply the National Association of Social Workers (NASW) Code of Ethics when analyzing social policies.

Name
Identify faith-based initiative responses to social welfare and ways government and faith-based initiatives may interact.

Name
Demonstrate strategies that influence organizational, local, state, and federal policy formation.

Name
Analyze research and apply to policy analysis.

SOWK5093 - CHILD WELFARE PRACTICE

General

Course Prefix
SOWK

Course Number
5093

Description
Provides a framework of values, knowledge and skills necessary to practice with vulnerable children and their families. The major focus is on social work in public child welfare in the State of Florida. The course utilizes an ecosystem perspective for understanding and assessing the special needs of at-risk children and families. Specific attention is on assessing families and children using the State of Florida's Child Welfare Practice Model and other family assessment instruments.

Learning Outcomes

Learning Outcomes

Objective
Demonstrate an understanding of the knowledge, skills, ethics and values as outlined in the Florida Child Welfare Code of Ethical and Professional Conduct and the National Association of Social Workers' (NASW) Code of Ethics.

Objective
Develop a professional identity and practice framework which demonstrates an understanding of past and current child welfare guiding principles, history and policies; and of current practices, standards, and issues.

Objective
Engage diversity and difference in practice in working with children and families.

Objective
Evaluate risk, safety and caregiver protective capacities in family dynamics and functioning as they impact child safety and permanency.

Objective
Describe and distinguish the basic principles and stages of child and family development and how these principles and stages relate to child maltreatment and child welfare.

Objective
Evaluate and apply child welfare evidence informed research findings to practice.

Objective
Apply practice skills such as interviewing, engagement, planning and intervention.

Objective
Develop an understanding of trauma and its impact on children and families and utilize a trauma-informed care approach when intervening with children and families.

Objective
Distinguish between "present danger" and "impending danger" in the assessment of child safety.

Objective
Create a child safety plan based on the Child Welfare Practice Model.

SOWK5143 - HUMAN TRAFFICKING

General

Course Prefix
SOWK

Course Number
5143

Description
This course is an upper level undergraduate and graduate level course designed to provide students with an overview of contemporary human trafficking in America. Students will learn about the various types of human trafficking and exploitation that exist and the systems that support it. From a person in environment perspective, the bio-psycho-spiritual impact of human trafficking will be explored. Potential strategies for social work practice at the micro, mezzo, and macro level are addressed.

Learning Outcomes

Learning Outcomes

Objective
Recognize the scope and magnitude of human trafficking in America.

Objective
Identify the various forms of human trafficking and modern day slavery that exist.

Objective
Identify the complex contextual factors that are associated with human trafficking including historical, legal, economic, political, social, global, and regional elements.

Objective
Apply a person-in-environment perspective to understand the impact of human trafficking and exploitation on survivors.

Objective
Explore trauma-informed approaches for case management and intervention with survivors of human trafficking.

Objective
Identify and assess prevention, awareness, and outreach strategies and the inherent challenges that are involved in eradicating human trafficking in a global society.

Objective
Identify laws and policies in America and around the globe that affect trafficking and consider how laws and policies can be changed to combat human trafficking and modern day slavery.

Objective
Apply a biblical worldview and social justice perspective to address the issues surrounding human trafficking and modern day slavery.

SOWK5173 - TOPICS IN CLINICAL PRACTICE

General

Course Prefix
SOWK

Course Number
5173

Description
This course covers current issues in Clinical Social Work Practice. The course content will be set by the instructor/department.

Credit Hours

Minimum Credit Hours:
3

Maximum Credit Hours:
3

(Credit Hours) Value:
3

Contact Hours (not needed)

Learning Outcomes

Learning Outcomes

Objective
Demonstrate the clinical social work practice concepts and issues of the topic(s) in the course.

Objective
Analyze the significance of the differing issues related to the stated clinical social work practice topics in order to develop a basis for professional reflection and exploration.

Objective
Synthesize modern clinical social work practice theories related to the topic(s) and practice setting covered.

Objective
Evaluate and identify gaps in services related to specific contexts of clinical social work practice.

Objective
Apply interventions related to the topic(s) studied to specific contexts of clinical social work practice.

Objective
Interpreting both risk factors and protective factors of the individuals, families, groups, or communities identified and specific to the topic and/or subject matter of the course.

SOWK5183 - CHILD MALTREATMENT

General

Course Prefix
SOWK

Course Number
5183

Description
Provides a framework of knowledge, values, and skills necessary to the field of child welfare. This course provides students with knowledge and skills related to the theory, research, and implications of child and adolescent maltreatment for child development and well-being. Course content is presented within the context of child welfare practice and social work with children and adolescents in public agencies and programs. Particular attention will be given to federal and state child welfare statutes including Chapter 39, Florida statutes, the Child Maltreatment Index and the range of services provided by the Department of Children and Families and other agencies.

Learning Outcomes

Learning Outcomes

Objective
Demonstrate an understanding of the knowledge, skills, ethics and values as outlined in the Florida Child Welfare Code of Ethical and Professional Conduct and the National Association of Social Workers' (NASW) Code of Ethics.

Objective
Identify the characteristics and dynamics of various forms of child maltreatment as represented in the Florida Child Maltreatment Index.

Objective
Describe the effects of maltreatment on child development and functioning and the importance of trauma informed care.

Objective
Identify and analyze the child welfare delivery system, with specific attention to the Florida Child Welfare Practice Model.

SOWK5213 - SUBSTANCE USE DISORDERS

General

Course Prefix
SOWK

Course Number
5213

Description
This course introduces students to clinical practice with clients and families impacted by substance use disorders. Topics include: theories and evidence-based intervention strategies applicable to the diagnosis and treatment of substance use disorders, common substances of abuse including their signs and symptoms, co-occurring disorders, the impact of addiction on the family, and the role of the clinical social worker in the prevention and intervention of substance use disorders.

Learning Outcomes

Learning Outcomes

Objective
Describe common substances of abuse and dependence including their physiological and psychological effects.

Objective
Apply criteria from the Diagnostic and Statistical Manual (DSM) to render appropriate assessment and diagnosis of substance use disorders.

Objective
Identify various theories and treatment interventions commonly used for substance use disorders.

Objective
Examine the basic philosophy of mutual-aid support groups (i.e., Alcoholics Anonymous) and their usefulness for clients and families.

Objective
Discuss the characteristics and dynamics of families affected by addiction and methods of intervention with families.

Objective
Utilize person-centered language when discussing how substance use diagnoses affect individuals and families.

Objective
Discuss the effects of substance abuse on special populations including clients with co-occurring disorders, adolescents, pregnant women, and older adults.

Objective
Examine the influence of religious and spiritual beliefs on the prevention and treatment of substance use disorders.

SOWK5223 - INTERNATIONAL SOCIAL SERVICES

General

Course Prefix
SOWK

Course Number
5223

Description
This course provides an introduction to social work practice in an international context and/or with immigrant and refugee populations in the United States. Theories and perspectives underpinning current practice in international social work will be addressed and global social welfare issues will be discussed. Students will explore the historical, religious, cultural, environmental, political, and economic factors that impact social welfare policies and the delivery of human services in different regions of the world. The various connections between domestic and international social work will be addressed, along with the role of international social welfare and/or mission organizations in the delivery of such services. Per of Instruc Required.

Learning Outcomes

Learning Outcomes

Objective
Examine the social and governmental structures including the economic systems of the country of study.

Objective
Compare social service delivery systems in the United States and the country of study.

Objective
Participate in at least one service project dedicated to helping a local community in another country.

Objective
Demonstrate respect for the differences and practices (i.e., customs, beliefs, values, religion, traditions, rituals) of the culture of study.

Objective
Adapt to the various living conditions (i.e., transportation, housing, food, currency, shopping, communication styles, entertainment) of another country.

Objective
Practice ongoing self-reflection and assessment of one's personal identity and culture and how it influences thoughts, feelings, and behaviors when interacting with people of another culture.

Objective
Employ interpersonal skills through interaction with classmates and others encountered abroad.

SOWK5243 - DEATH, LOSS, AND BEREAVEMENT

General

Course Prefix
SOWK

Course Number
5243

Description
This course provides a comprehensive understanding of death, dying, loss, and bereavement for students across disciplines. Placing an emphasis on social, cultural, religious, and historical factors, the course examines common attitudes, biases, behaviors, and emotions related to end-of-life issues. Common grief reactions and appropriate intervention strategies are explored. By gaining an awareness of personal mortality, students are challenged to foster a greater appreciation of life.

Learning Outcomes

Learning Outcomes

Objective
Recognize the needs of individuals and families experiencing life-limiting illnesses and the roles of various helping professionals and organizations in meeting those needs.

Objective
Demonstrate awareness of appropriate intervention strategies for assisting children, adults, and families experiencing loss, death, or bereavement.

Objective
Examine different perspectives and theories related to death and dying.

Objective
Examine different perspectives and theories related to death and dying.

Objective
Assess the complexities involved in planning funeral experiences and death rituals.

Objective
Identify the most common grief and loss reactions experienced by children and adults across the life cycle.

Objective
Evaluate medical decisions, social policy issues, and ethical dilemmas frequently encountered by end-of-life helping professionals.

Objective
Recognize the historical changes in the Western perception, experiences, and treatment of death, dying, bereavement, and loss.

Objective
Examine awareness of personal spiritual beliefs, attitudes, and feelings regarding death.

Objective
Recognize the significant variability in the experiences and attitudes of death, dying, grief, and mourning depending on culture, age, race, religion, gender, and social class.

Objective
Evaluate principles related to death, grief, and the afterlife from a Christian worldview and biblical perspective.

SOWK5253 - INTERNATIONAL SOCIAL SERVICES

General

Course Prefix
SOWK

Course Number
5253

Description
In collaboration with faith-based organizations engaged in direct social service or healthcare provision, community development, and/or disaster relief activities, this experiential course explores social service delivery in an international context. The course is centered around a 5-7 day visit to another country where students will experience a contrasting social welfare system, engage in dialogue with service-providers and/or policy-makers, and provide direct-services to individuals, groups, families, communities, and/or organizations. The international on-site component will be preceded and followed by required seminars.Prerequisite: Instructor Approval Required

SOWK5273 - SOCIAL WORK & HEALTHCARE

General

Course Prefix
SOWK

Course Number
5273

Description

This course provides a detailed exploration of social work practice across the continuum of healthcare services. Students are provided with the necessary knowledge, skills, and ethical understanding required for competent practice as a healthcare social worker as well as an understanding of historic, current and anticipated conditions shaping practice. Social work practice is explored within the context of the psychosocial consequences of illness, the structure of the healthcare delivery system, technological advances, changing economic and regulatory practices, as well as ethical, political and legal considerations. Social and spiritual determinants of health including class, race, gender, religious affiliation, and sexual orientation are also analyzed.

Learning Outcomes

Learning Outcomes

Objective
Recognize the role of personal values and experiences as they may relate to healthcare issues and be able to effectively analyze and resolve ethical dilemmas.

Name
Analyze political, economic, legal, and social forces that have shaped healthcare in the United States and identify emerging trends.

Name
Describe the continuum of healthcare services in the United States and the role of the social worker.

Name
Critically analyze the multidimensional aspects of environmental, social, psychological, spiritual, and biological factors that contribute to health and illness.

Name
Examine social work values and how they interface with personal and Christian values within the healthcare setting.

Name
Demonstrate the required knowledge and skills to engage, assess, and intervene effectively with individuals, families and groups, and communities receiving healthcare services across the continuum of care.

Name
Describe the effects of illness on individual and family functioning in relation to developmental tasks, roles, and needs at various phases of the life cycle and be able to intervene effectively with individuals of all ages.

Name
Identify and analyze social determinants of health and advocate for socially just health care systems, practices and policies in order to improve the health and wellness of populations-at-risk.

Name
Recognize the role of personal values and experiences as they may relate to healthcare issues and be able to effectively analyze and resolve ethical dilemmas.

SOWK5333 - PLAY THERAPY TECHNIQUES

General

Course Prefix
SOWK

Course Number
5333

Description
This course is designed to introduce the principles and theories of play therapy, as well as techniques, skills and developmentally appropriate uses of play therapy with children and adolescents. It includes an experiential component to develop basic play therapy skills within the context of ethical and diversity-sensitive practice. This is an advanced level methods course designed to help students attain a mastery of the central concepts in direct social work practice with children and their families.

Learning Outcomes

Objective
Conduct an educational session, demonstrating clinical and leadership abilities while teaching fellow students to synthesize theory and practice of play therapy

Name
Examine unique legal and ethical considerations in child treatment, play therapy, and certification as a play therapist.

Name
Appraise the history, theories, and current research on play therapy

Name
Compare the role of play therapist and play therapy in the context of clinical (medical/psychiatric) and non-clinical (family/school/community) systems

Name
Analyze play therapy techniques or activities that may be used, outlining the process, materials, and activities that can be utilized in the context of play therapy

Name
Select developmentally appropriate play therapy materials that will be incorporated into a permanent or traveling playroom for the purposes of assessment and treatment.

Name
Conduct an educational session, demonstrating clinical and leadership abilities while teaching fellow students to synthesize theory and practice of play therapy

SOWK5353 - SPORTS, SOCIAL WORK, AND WELLNESS

General

Course Prefix
SOWK

Course Number
5353

Description
This practice course provides a comprehensive understanding of sports culture, sports influence, and sports life cycle, while identifying complex dilemmas encountered in social work practice with athletes. Placing an emphasis on sociocultural factors, sports communities, belief systems, behaviors, and emotions related to sports culture, students will learn therapeutic interventions to improve performance, enhance emotional well-being, and engage in team building. Common influential sports behaviors, community beliefs, and athletic influences are explored. Emphasis will be placed on implementing therapeutic interventions such as motivational interviewing, positive psychology, and mindfulness practices. By gaining an awareness of cultural beliefs, social justice issues, and sports communities students are challenged to foster a greater appreciation of sports awareness.

Learning Outcomes

Objective
Describe how cultural beliefs and values, as well as social justice and advocacy, may shape perceptions of athletes and influence athletic outcomes.

Objective
Identify ways to assess athletes and their experiences at various stages of the life cycle.

Objective
Utilize ethical decision-making strategies when identifying complex dilemmas encountered in social work practice with athletes.

Objective
Demonstrate knowledge of biopsychosocial assessment and treatment plans specifically beneficial to athletes.

Objective
Implement therapeutic interventions including motivational interviewing, positive psychology, and mindfulness practices to enhance well-being.

Objective
Compare the influence of sports communities, immediate community surroundings, and the subpopulation in the community

Objective
Identify various systems needed to empower, influence, and promote the health and wellness of athletes.

SOWK5543 - SOCIAL WORK PRACTICE WITH OLDER AD

General

Course Prefix
SOWK

Course Number
5543

Description
This course will examine social work practice theories and interventions as they relate to older adults including the nature of the aging process, stage of life transitions, adaptability to change, and the ways in which interventions may assist in later life. Students will learn specific issues that pertain to older adults to include coping with age related changes, caregiving demands, legal and financial planning, elder abuse, intimacy, loss, and the ability to maintain dignity. There will be focus on methods of assessment, case management, and intervention skills, including the use of rapid assessment and diagnostic tools, that are needed to work effectively with older populations and family caregivers in a variety of community-based and institutional settings.

- SOWK3133 - PRACTICE WITH INDIVIDUALS

Learning Outcomes

Learning Outcomes

Objective
Assess the biological, psychological, social, spiritual, and cultural factors that influence the functioning of older adults and their families while understanding how these factors contribute to behavior and interpersonal relationships.

Objective
Demonstrate professional expertise in translating practice concepts and skills into effective individual, family, and group service plans and interventions appropriate to the particular strengths and needs of elders.

Objective
Interpret how complex ethical and value dilemmas influence intervention considerations in providing service to elders and their families.

Objective
Explain the needs of older adults facing particular types of vulnerability, including impaired cognitive status, chronic conditions, mental health problems, abuse, and terminal illness.

Objective
Evaluate issues of client diversity (including ethnicity, culture, gender, age, sexual, orientation, disability, spiritual beliefs) at each stage of the clinical process from problem definition and diagnosis through treatment planning, intervention, and evaluation.

Objective
Identify how aging service system infrastructure and healthcare policy influence direct practice with elders and their families.

Objective
Recognize older adults at risk of significant loss of independence or institutionalization and target social work interventions to maximize dignity and independent functioning.

SOWK5613 - PSYCHOPHARMACOLOGY: PRACTICE THROUG

General

Course Prefix
SOWK

Course Number
5613

Description
This course is designed to familiarize students with the basics of psychopharmacology in behavioral health and medical settings through the lifespan. Theoretical and practical approaches to treatment of depression, bipolar and related disorders, anxiety, insomnia, attention deficit, psychosis, and trauma-related disorders are examined with the goal of advancing students' knowledge of best practices that complement current evidence-based interventions. Emphasis will be placed on the development of a range of knowledge, practice techniques, and intervention strategies in collaboration with patients, families, psychiatrists, and other providers in order for social workers to fully participate as members of the multidisciplinary treatment team and be responsive to the needs of their patients.

Learning Outcomes

Objective
Construct professional social work identity through self-reflection and the practice of social work in working with clients who are receiving psychotropic therapy

Name
Understand the scope of social work practice as it relates to the role of psychopharmacology.

Name
Interpret the role of psychopharmacology in the diagnosis and treatment of mental health behaviors and disorders

Name
Demonstrate knowledge of psychopharmacological medication classifications in relation to specific DSM 5 diagnostic categories

Name
Explain complex biological, psychological, and cultural factors (age, gender, and race) relevant to assessment, treatment, and case management of clients receiving psychotropic interventions

Name
Utilize understanding of psychopharmacology in interdisciplinary practice while providing psychosocial support and advocacy to individuals, families, communities, and organizations

Name
Apply professional expertise in translating psychopharmacological concepts and skills with individuals, families, and multidisciplinary teams

Name
Construct professional social work identity through self-reflection and the practice of social work in working with clients who are receiving psychotropic therapy

SOWK5643 - PRACTICE WITH VETERANS AND MILITARY

General

Course Prefix
SOWK

Course Number
5643

Description
This course will prepare students for social work practice with service members, veterans, and their families. Students will become oriented with the assessment tools and evidence-based treatment methods for injuries and diagnoses found among active military members, veterans, and their family members including: post-traumatic stress disorder, traumatic brain injury, depression, substance abuse, readjustment issues, intimate partner violence, and sexual trauma. Students will learn to apply treatment methods that promote health, wellness, and resiliency among service members, veterans, and their families.

Learning Outcomes

Objective
Understand military culture including rank, responsibility, and role

Objective
Assess injury and diagnoses commonly found among amongst service members

Objective
Identify risk and protective factors in coping with deployment and reintegration into civilian life

Objective
Analyze the combat experience, deployment cycle, and risk of post-traumatic stress disorder, traumatic brain injury, and depression among military members, veterans, and their families

Objective
Apply evidence-based treatment methods that promote health, wellness, and resiliency

Objective
Consider ethical dilemmas, diversity issues, and policies inherent in working with veterans and active military personnel

SOWK5723 - RESPONSES TO DISASTERS AND CRISES

General

Course Prefix
SOWK

Course Number
5723

Description
This course will examine social work practice theories, interventions, and best practices as they relate to working with individuals, families, groups, and communities recovering from the effects of trauma and crises related to natural disasters, pandemics, and man-made disasters. Students will learn specific issues that pertain to survivors of disaster-related events and will broaden their understanding of implementing effective strategies to respond to crises as a social work practitioner. Students will learn the principles of social justice, advocacy, and multicultural competence when intervening with trauma-affected individuals and communities. There will be focus on disaster mental health (DMH), psychological first aid, crisis management, and intervention skills that are needed to work effectively with individuals, families, groups, and communities recovering from a disaster-related trauma.

Learning Outcomes

Objective
Describe the nature and symptoms of secondary traumatic stress and compassion fatigue and begin to implement appropriate prevention strategies for self-care.

Name
Understand the collaborative role of the social work practitioner as part of an interdisciplinary and crisis response team.

Name
Understand the practice theories, interventions, and best practices utilized with individuals, families, groups, and communities recovering from a disaster-related trauma.

Name
Interpret how complex ethical dilemmas are linked to social, economic, and/or environmental justice issues when intervening with individuals, families, groups, and communities recovering from a disaster-related trauma from various geographical locations.

Name
Demonstrate knowledge of the effects of crises and disasters on individuals, families, groups, communities, and cultures, and apply appropriate intervention strategies including DMH, and psychological first aid.

Name
Develop an enhanced understanding of the assessment and treatment of the spectrum of traumatic stress responses, including those reflected in DSM-5 and ICD-10.

Name
Describe the nature and symptoms of secondary traumatic stress and compassion fatigue and begin to implement appropriate prevention strategies for self-care.

SOWK5833 - COGNITIVE BEHAVIORAL THERAPY

General

Course Prefix
SOWK

Course Number
5833

Description
This course will deepen students' understanding of the cognitive behavioral therapeutic model. Students will learn how to facilitate comprehensive cognitive behavioral case conceptualization, which will inform treatment planning and goal outcomes. Available evidence and efficacy data will be reviewed as students learn how to integrate cognitive behavioral psychotherapies for specific mental health disorders. Students will engage in the facilitation of individual and group cognitive behavioral interventions within the context of this course. Students will gain mastery of this model by utilizing clinical discernment, a client-centered approach, and evidence-based interventions to apply in psychotherapy.

Learning Outcomes

Learning Outcomes

Objective
Contrast other modalities, including dialectical behavioral therapy, acceptance and commitment therapy, and mindfulness-based cognitive therapy with a goal to integrate into clinical practice.

Name
Analyze common cognitive, behavioral, and experiential therapy techniques with specific discussion on utilization for various psychological diagnoses.

Name
Develop a sound case conceptualization by use of the biopsychosocial assessment and various assessment and screening tools.

Name
Interpret various evidence-based interventions and strategies used in cognitive behavior therapy to formulate effective treatment plans and structured sessions.

Name
Evaluate the effectiveness of the cognitive behavioral therapy model within the context of the client's culture, community, faith identification, and lifespan development.

Name
Demonstrate use of the cognitive behavioral therapy model through role plays and Socratic seminar paying special attention to the identification of client strengths and resiliency.

Name
Contrast other modalities, including dialectical behavioral therapy, acceptance and commitment therapy, and mindfulness-based cognitive therapy with a goal to integrate into clinical practice.

SOWK6013 - ADVANCED CLINICAL PRACTICE WITH

General

Course Prefix
SOWK

Course Number
6013

Description
Building upon the foundation of generalist social work practice, this advanced clinical course emphasizes the application of multiple theoretical orientations and evidence-based practice models for assessment and intervention with individuals. Strengths-based strategies for working with diverse populations and within a broad array of practice contexts are addressed.

Credit Hours

Minimum Credit Hours:

Learning Outcomes

Learning Outcomes

Objective
Critically analyze, monitor and evaluate interventions and outcomes of practice and use findings to improve clinical practice with individuals.

Name
Demonstrate the professional demeanor, behavior, boundaries, roles, and oral and written communication appropriate in clinical social work practice settings.

Name
Apply professional values and ethical standards for effective practice and ethical decision making when working with individuals in clinical social work practice settings.

Name
Identify and apply culturally competent social work models to engage, assess, intervene, and evaluate diverse clients.

Name
Use reflection and self-regulation to manage the influence of personal biases and values as they may apply to age, class, color, culture, disability and ability, ethnicity, gender, gender identity and expression, immigration status, marital status, political ideology, race, religion/spirituality, sex, sexual orientation, and tribal sovereign status.

Name
Apply the knowledge of human behavior in the social environment, person-in-environment, and other clinical multidisciplinary theoretical frameworks to engage, assess, intervene, and evaluate individuals.

Name
Select evidence-based practice interventions for clinical practice with individuals through the critical evaluation of empirical (qualitative and quantitative) and theoretical literature.

Name
Utilize a strengths-based perspective and critical thinking skills to conduct a comprehensive biopsychosocial assessment in the context of the clinical practice environment.

Name
Employ the Diagnostic and Statistical Manual of Mental Disorders to accurately assess and diagnose psychopathology.

Name
Use empathy and critical thinking skills to create an appropriate and mutually agreed upon treatment plan aimed at the enhancement of clients psychosocial functioning.

Name
Critically analyze, monitor and evaluate interventions and outcomes of practice and use findings to improve clinical practice with individuals.

SOWK6014 - FIELD EXPERIENCE/SEMINAR III

General

Course Prefix
SOWK

Course Number
6014

Description
This practicum experience requires the student to complete 250 hours in an approved social work agency with an approved MSW supervisor. The specialization field experience requires that the student utilize clinical practice skills in the social work practice setting, thus strengthening the student's emerging identity as a social work practitioner. Concurrently, students will participate in field seminar, which requires that students discuss theoretical frameworks and practice methods, as they apply to cases that are presented in the classroom. As a capstone course, students begin a clinical practice portfolio, which demonstrates their proficiency in accomplishment of all of the competencies and behaviors required by the Council on Social Work Education for master's level social work practitioners.

Requirements
Prerequisites: Completion of an undergraduate social work field experience (minimum of 400 hours) in a BSW program that is accredited by the Council on Social Work Education *or* successful completion (grade of B or better) of the MSW foundation year field experience to include SOWK 5014, Field Experience/ Seminar I *and* SOWK 5024 Field Experience/Seminar II.

Learning Outcomes

Learning Outcomes

Name
Demonstrate ethical and professional behavior Effectively manage professional boundaries in clinical practice. Apply the NASW Code of Ethics and strategies of ethical-decision making to clinical practice and interpersonal interventions with clients. Demonstrate professional use of self in clinical practice. Identify professional strengths, limitations, and challenges in practice.

Name
Advance human rights and social, racial, economic, and environmental justice Applies their understanding of social, racial, economic, and environmental justice to advocate for human rights at the individual and systems levels. Engage in practices that advance social, racial, economic, and environmental justice.

Name
Engage anti-racism, diversity, equity, and inclusion in practice Demonstrate anti-racist and anti-oppressive social work practice at the micro, mezzo, and macro levels. Present themselves as learners and engage clients and constituencies as experts of their own experiences. Apply self-awareness and self-regulation to manage the influence of personal biases and values in working with diverse clients and constituencies.

Name
Engage in practice-informed research and research-informed practice Use practice experience and theory to inform scientific inquiry and research. Apply critical thinking to engage in the analysis of quantitative and qualitative research methods and research findings. Use and translate research evidence to inform and improve practice, policy, and service delivery. Identify ethical, culturally informed, anti-racist, and anti-oppressive strategies that address inherent biases for use in quantitative and qualitative research methods to advance the purposes of social work.

Name
Engage in policy practice Advocate for social policies and/or agency policies that will enhance client well-being, service delivery, and/or access to social services.

Name
Engage with individuals, families, groups, organizations, and communities Apply a strengths-based, person-in-environment perspective to establish rapport and maintain therapeutic relationships with clients. Attend to the interpersonal dynamics and contextual factors that both strengthen and potentially weaken the therapeutic worker-client alliance. Establish worker-client relationships that promote client participation in the establishment of mutually agreed upon treatment goals and objectives.

Name
Assess individuals, families, groups, organizations, and communities Utilize multidimensional bio-psycho-social-spiritual assessment forms and tools. Assess client readiness for change. As appropriate, apply differential and multi-axial diagnoses.

Name
Intervene with individuals, families, groups, organizations, and communities Critically evaluate, select, and apply evidence- based practice interventions. Implement treatment plans and/or contracts with clients to meet mutually-agreed upon goals. Demonstrate use of appropriate clinical interventions for a range of presenting concerns. Modify clinical interventions as necessary throughout the treatment process.

Name
Evaluate practice with individuals, families, groups, organizations, and communities Develop evaluation plans to monitor client progress and measure the efficacy of clinical interventions.

Name
Integrate faith and social work practice in a way that embraces diversity and is consistent with both the Christian Faith and the NASW Code of Ethics. Include an examination of clients spirituality in the assessment process. As appropriate, utilize clients own faith, religious practice, and/or spirituality as a potential coping mechanism.

SOWK6023 - CLINICAL PRACTICE: CHILDREN/FAM

General

Course Prefix
SOWK

Course Number
6023

Description
This advanced clinical course explores evidence-based theories and strengths-based intervention strategies for use with couples, children and/or families. Issues of gender, ethnicity, empowerment, and multiculturalism are explored. Family-centered interventions include skills that mitigate the effects of trauma, family transitions, oppression, and social and economic injustices on families. Interventions to assist children navigating substantial changes, including loss and harm within the family system will also be explored.

Learning Outcomes

Learning Outcomes

Objective
Provide guidance and direction to parents and other caregivers regarding the psychological and developmental needs of children.

Name
Describe, critique, and apply various evidence-based intervention theories and models for use with couples, children and families.

Name
Assess and identify the unique needs of couples, children, and families and develop a congruent case plan within the context of the client's culture, community, and lifespan development.

Name
Identify client strengths and resiliency as important in assessment and intervention of couples, children, and families.

Name
Integrate the context and impact of diversity factors (including, but not limited to, culture, ethnicity, race, class, religion, gender, age, sexual orientation) into assessment and treatment plans of couples, children, and families.

Name
Provide guidance and direction to parents and other caregivers regarding the psychological and developmental needs of children.

SOWK6024 - FIELD EXPERIENCE/SEMINAR IV

General

Course Prefix
SOWK

Course Number
6024

Description
This course is a continuation of SOWK 6024, with the student completing an additional 250 hours in the same social work practicum agency. This course provides continued experience in gaining clinical expertise in assessing, intervening and evaluating individuals, families, groups, organizations and communities. This course further strengthens the student's emerging identity as a social work practitioner. Concurrently, field seminar gives students opportunity to review, critique and discuss theoretical frameworks and practice principles, as they apply to the students' cases in the practicum setting. In this capstone course, students will complete a clinical practice portfolio, which will demonstrate their proficiency in accomplishment of all of the competencies and behaviors required by the Council on Social Work Education for master's level social work practitioners.

Learning Outcomes

Learning Outcomes

Name
Demonstrate ethical and professional behavior Effectively manage professional boundaries in clinical practice. Apply the NASW Code of Ethics and strategies of ethical-decision making to clinical practice and interpersonal interventions with clients. Demonstrate professional use of self in clinical practice. Identify professional strengths, limitations, and challenges in practice.

Name
Advance human rights and social, racial, economic, and environmental justice Applies their understanding of social, racial, economic, and environmental justice to advocate for human rights at the individual and systems levels. Engage in practices that advance social, racial, economic, and environmental justice.

Name
Engage anti-racism, diversity, equity, and inclusion in practice Demonstrate anti-racist and anti-oppressive social work practice at the micro, mezzo, and macro levels. Present themselves as learners and engage clients and constituencies as experts of their own experiences. Apply self-awareness and self-regulation to manage the influence of personal biases and values in working with diverse clients and constituencies.

Name
Engage in practice-informed research and research-informed practice Use practice experience and theory to inform scientific inquiry and research. Apply critical thinking to engage in the analysis of quantitative and qualitative research methods and research findings. Use and translate research evidence to inform and improve practice, policy, and service delivery. Identify ethical, culturally informed, anti-racist, and anti-oppressive strategies that address inherent biases for use in quantitative and qualitative research methods to advance the purposes of social work.

Name
Engage in policy practice Advocate for social policies and/or agency policies that will enhance client well-being, service delivery, and/or access to social services.

Name
Engage with individuals, families, groups, organizations, and communities Apply a strengths-based, person-in-environment perspective to establish rapport and maintain therapeutic relationships with clients. Attend to the interpersonal dynamics and contextual factors that both strengthen and potentially weaken the therapeutic worker-client alliance. Establish worker-client relationships that promote client participation in the establishment of mutually agreed upon treatment goals and objectives.

Name
Assess individuals, families, groups, organizations, and communities Utilize multidimensional bio-psycho-social-spiritual assessment forms and tools. Assess client readiness for change. As appropriate, apply differential and multi-axial diagnoses.

Name
Intervene with individuals, families, groups, organizations, and communities Critically evaluate, select, and apply evidence- based practice interventions. Implement treatment plans and/or contracts with clients to meet mutually-agreed upon goals. Demonstrate use of appropriate clinical interventions for a range of presenting concerns. Modify clinical interventions as necessary throughout the treatment process.

Name
Evaluate practice with individuals, families, groups, organizations, and communities Develop evaluation plans to monitor client progress and measure the efficacy of clinical interventions.

Name
Integrate faith and social work practice in a way that embraces diversity and is consistent with both the Christian Faith and the NASW Code of Ethics. Include an examination of clients spirituality in the assessment process. As appropriate, utilize clients own faith, religious practice, and/or spirituality as a potential coping mechanism.

SOWK6033 - ADVANCED CLINICAL PRACTICE WITH

General

Course Prefix
SOWK

Course Number
6033

Description
This advanced clinical course is an examination of group work practice with clients experiencing a variety of social, emotional, and/or psychological circumstances. Using the classroom as an experiential learning laboratory, students will apply various theoretical perspectives and intervention strategies to successfully plan, implement, and facilitate groups across a diversity of practice settings.

Learning Outcomes

Learning Outcomes

Objective
Promote tolerance for debate and appreciation of diversity including factors such as race, ethnicity, age, gender, social class, and sexual orientation in establishing and maintaining group culture and structure.

Name
Apply professional values and ethical standards for effective practice and ethical decision making when engaging in group work.

Name
Engage in self-reflection across all stages of group development.

Name
Apply professional use of self to develop effective group leadership/ co-leadership skills, including the use of a mutual-aid perspective in problem solving.

Name
Apply theories of group dynamics and development when facilitating small groups.

Name
Plan, implement, and facilitate effective evidence-based group interventions for use with diverse populations.

Name
Promote tolerance for debate and appreciation of diversity including factors such as race, ethnicity, age, gender, social class, and sexual orientation in establishing and maintaining group culture and structure.

SOWK6043 - PSYCHOPATHOLOGY

General

Course Prefix
SOWK

Course Number
6043

Description
This course is a critical examination of mental health assessment, diagnosis, and intervention. Recognizing indicators of mental disorders, the context in which they occur, and identifying diagnostic criteria of mental health disorders, as described in the Diagnostic and Statistical Manual is emphasized. Students will explore biopsychosocial etiologies and their relationship to clinical assessment, diagnosis, intervention and prognosis. Particular attention is given to the relationship between the social environment, cultural influences, and emotional and mental health.

Learning Outcomes

Learning Outcomes

Objective
Utilize person-centered language when discussing how diagnoses affect individuals and families.

Name
Apply self-awareness and self-regulation to manage the influence of personal biases and values when working with people who have mental health disorders.

Name
Demonstrate familiarity with biopsychosocial theories on the etiology of dysfunctional behavioral patterns that may contribute to a mental health diagnoses.

Name
Demonstrate capacity to render an appropriate diagnosis using the Diagnostic & Statistical Manual (DSM) and how it relates to the International Classification of Diseases (ICD).

Name
Demonstrate an understanding of the limitations in using classification schemes to label and understand human behavior.

Name
Critically evaluate the research for treatment and prevention efficacy of the interventions used to address various mental health disorders.

Name
Examine cultural, personal, and spiritual values and the effects that biases may have on the diagnosis and treatment of a mental health disorder.

Name
Demonstrate the impact that social, political, and economic factors have on oppressed and disadvantaged populations in relationship to the diagnosis and treatment of mental health disorders.

Name
Identify ways to advocate for social, economic, and/or environmental justice in mental health systems.

Name
Utilize person-centered language when discussing how diagnoses affect individuals and families.

SOWK6053 - TRAUMA INFORMED CLINICAL PRACTICE

General

Course Prefix
SOWK

Course Number
6053

Description
This course addresses trauma-informed concepts with an emphasis on the strengths and resilience of clients experiencing traumatic stress. The evaluation of evidenced-based models and implementation of multidimensional assessment and intervention is explored. Biological, psychological, emotional, social, cultural, familial, and environmental influences that contribute to traumatic stress are examined. Particular attention is given to the impact of vicarious trauma and the importance of self-care for those who provide trauma-informed care.

Learning Outcomes

Learning Outcomes

Objective
Apply personal and professional strategies for minimizing the risks of vicarious traumatization.

Name
Describe the historical foundations of trauma theory/ trauma-informed care concepts.

Name
Use and translate research evidence to inform and improve practice, policy, and service delivery with/for individuals exposed to traumatic stress.

Name
Define the factors that contribute to the development of traumatic stress disorders.

Name
Discuss brain biology and the impact of trauma on basic brain function.

Name
Identify the biological, psychological, emotional, social, cultural, familial, and environmental influences that contribute to traumatic stress.

Name
Apply a variety of treatment approaches and theoretical frameworks to individuals exposed to traumatic stress, including the incorporation of client strengths, resiliency factors, and resources into chosen interventions.

Name
Apply personal and professional strategies for minimizing the risks of vicarious traumatization.

SOWK6063 - EVALUATION OF SOCIAL WORK PRACTICE

General

Course Prefix
SOWK

Course Number
6063

Description
Building on content acquired in “Methods of Social Work Research,” this course focuses on the evaluation of direct social work practices, processes, and outcomes at the micro, mezzo, and macro levels. Students will examine the implementation of single system and group designs to measure and evaluate client goals, progress, and interventions. Program evaluation methods will also be explored. The ethical implications, responsibilities, and limitations to using research to inform clinical practice and using practice to inform social work research will be explored.

Learning Outcomes

Objective
Identify strategies for using practice evaluation data to advocate for and advance human rights and social, economic, and/or environmental justice.

Name
Critically describe and assess the relationship between research and practice, including the ethical implications related to practice evaluation research.

Name
Identify various approaches to systematically evaluating social work interventions with individuals, families, and groups.

Name
Identify various approaches to systematically evaluating social work programs, organizations, and/or communities.

Name
Select evidence-based practice interventions through the critical evaluation of empirical (qualitative and quantitative) and theoretical literature.

Name
Critically evaluate existing scales and measuring instruments including their psychometric properties and their applicability for use with persons from diverse cultures and backgrounds.

Name
Define client presenting problems and proposed interventions in operational terms.

Name
Propose and defend a single system or group research design (including data collection methods and measures) for empirically evaluating the effectiveness of a social work intervention in clinical practice.

Name
Identify strategies for using practice evaluation data to advocate for and advance human rights and social, economic, and/or environmental justice.

SOWK6073 - SOCIAL WORK ADMIN AND LEADERSHIP

General

Course Prefix
SOWK

Course Number
6073

Description
This practice course explores the theories, models of supervision, and fundamental skills of leadership and administration evident in social service organizations. A variety of topics will be addressed to promote effective administrative skills including emotional intelligence, leadership styles, conflict management, power and influence, team building and group facilitation, establishing collaborative relationships with internal and external constituents, and fundraising. Students will also engage in a personal exploration of leadership styles and skills including strengths and areas for growth.

Complete ALL of the following Courses:
- SRMT2103 - INTRODUCTION TO SPORT MANAGEMENT

Learning Outcomes

Learning Outcomes

Objective
Evaluate professional sport teams' economic activity with the interaction of government subsidies.

Name
Apply the techniques of microeconomics to the sport industry through the examination of real-world issues and problems.

Name
Analyze profit variation and competitive balance along with short-run and long-run profit maximization decisions for owners.

Name
Understand the role of leagues and league structure in professional sports.

Name
Analyze the results of labor-management negotiations and the rise of unions in professional sports.

Name
Evaluate professional sport teams economic activity with the interaction of government subsidies.

SRMT4909 - SPORT MANAGEMENT INTERNSHIP

General

Course Prefix
SRMT

Course Number
4909

Description
This course requires work experience in an organization, on and/or off-campus, providing on-the-job training in the sport management field. The intern will be supervised by a faculty mentor and a supervisor in the organization and will report work experience through written and verbal reports to the faculty mentor. Internships are approved by the Coordinator of the Sport Management program.This course can be taken for a variable number of credit hours: three (3), six (6), or nine (9). The default is nine (9). Students will work a minimum of 40 hours per credit hour for an approved organization. Prerequisite: SRMT 3303 (taken no earlier than the semester prior to SRMT 4909)

Learning Outcomes

Learning Outcomes

Objective
Apply sport management concepts to professional, collegiate, interscholastic, recreational, Olympic, Paralympic, and international sport.

Objective
Describe the various governance structures within the collegiate and professional sport industries.

Objective
Describe the historical evolution of collegiate, professional, and Olympic sport.

Objective
Compare and contrast the basic principles and frameworks of sport management, law, finance, economics, sales, and ethics.

Objective
Apply knowledge of the sport industry to resolve issues and challenges commonly faced by sport business professionals.

Objective
Investigate potential career opportunities in the sport industry.

SRMT5203 - RISK MGMT & GOVERNANCE IN SPORT

General

Course Prefix
SRMT

Course Number
5203

Description
This course examines the most significant areas of risk management and law relevant to the various segments of the sport industry. Specific sport law concepts will focus on developments in negligence law, contract law, and constitutional law. Legal and risk considerations will be explored as related to managing operations, including facilities and events, transportation, crowd control, and crisis situations, which create the framework for developing risk management strategies that will assist sport managers in setting guidelines, policies, plans, and procedures. Prerequisite: None

Learning Outcomes

Learning Outcomes

Objective
Describe leadership theories and characteristics of sport and identify how these characteristics influence the sport industry.

Objective
Identify the required competencies and leadership skills for sport administrators.

Objective
Evaluate the strengths and weaknesses of different leadership styles in various sport environments.

Objective
Learn how to manage conflict, navigate group dynamics, and build high-functioning teams through effective leadership skills.

SRMT5303 - FACILITY PLANNING & MGMT IN SPORT

General

Course Prefix
SRMT

Course Number
5303

Description
This course examines the various types of indoor and outdoor facilities for sport venues and related activities. The course examines the planning, scheduling, organizing, and controlling of sport facilities for sport-related venues and their ancillary areas. The course explores the connections between facility/venue management and event management, event operations and logistics, facility and even programming and scheduling, and facility and event marketing. Specific topics include the development of strategic sport facility management plans, preparing and controlling facility logistics, and risk and crisis management issues. Prerequisite: None

Learning Outcomes

Learning Outcomes

Objective
Describe the processes of sport facility planning, development, and construction.

Objective
Apply legal issues and risk management practices to facilities, planning, design, and construction.

Objective
Evaluate different sport facility designs and their usefulness in meeting the needs of diverse populations and environments.

Objective
Synthesize significant sport facility issues, including planning, construction, use, and maintenance.

Objective
Describe the impact of organizational missions, goals, and objectives in the facility planning, construction, and management processes.

Objective
Examine various risk management issues in facilities and event planning.

SRMT5403 - FINANCIAL ISSUES IN SPORT

General

Course Prefix
SRMT

Course Number
5403

Description
This course involves an in-depth study of the financial challenges facing contemporary sport administrators, including an examination of financial data analysis, sources of funding, budgeting and financial accountability, inventory management and production control processes, profit distribution, taxation, and accounting processes. Prerequisite: None

Credit Hours

Minimum Credit Hours:

Learning Outcomes

Learning Outcomes

Objective
Explain the various issues that arise in the area of sport finance.

Objective
Review financial data through the use of various financial tools to identify the strengths and weaknesses of a sport business.

Objective
Identify various sources of funding, including government sources, venture capital, public offerings, and corporate bonds.

Objective
Analyze typical expenses for businesses, documentation of these monetary needs, budgeting for short-term planning, and managing money that is obtained or owed.

Objective
Describe the issues of taxation and fiscal risk management as they pertain to sport finance.

Objective
Examine the issues pertaining to the tracking of money and accounting techniques to ensure the success of financial auditing.

SRMT5503 - ADVANCED CONCEPTS IN SPORT MKTG

General

Course Prefix
SRMT

Course Number
5503

Description
This course develops knowledge and skill in the marketing process as it relates to understanding the sport consumer, logistics, promotions, and public relations activities in traditional and specialized areas of the sport industry. The primary focus will be on the application of marketing principles to specific sport scenarios. Prerequisite: None

Credit Hours

Minimum Credit Hours:

Learning Outcomes

Learning Outcomes

Objective
Utilize statistical tools to optimize stadium operations.

Objective
Analyze player and team data to guide scouting, training, and in-game decision-making.

Objective
Explain ethical issues surrounding data collection and privacy in sports.

Objective
Use data analytics to understand fan behavior and preferences, helping to tailor in-game experiences, marketing strategies, and fan loyalty programs for maximum engagement.

Objective
Apply data to plan sporting events with a focus on attendance forecasting, staffing needs, and safety protocols.

SRMT6303 - RESEARCH METHODS IN SPORT

General

Course Prefix
SRMT

Course Number
6303

Description
This course introduces essential research methods and analytical techniques specific to the sport field, preparing students to conduct proper and ethical research studies. Covering both quantitative and qualitative methods, students will learn how to design studies, collect and analyze data, and interpret results to address real-world challenges within the sport industry. Prerequisite: None

SSCI1603 - INTRO TO SUSTAINABLE FOOD SYSTEMS

General

Course Prefix
SSCI

Course Number
1603

Description
The course introduces students to food systems within a framework of sustainability based on one's personal relationship with God. The course will focus on the inter-relationships between food systems and agricultural producers and consumers. Conventional, industrial organic, organic, local, and indigenous food systems are contrasted economically, environmentally, and socially. The food system pathway of inputs, production, processing and distribution, consumption, and food disposal/recycling are covered in depth. Agricultural productivity plus environmental and health impacts of these food systems are explored as well as public sector and private sector responses. Regular contributions to class conversations allow students to demonstrate how they have improved, are improving, or may improve a food system(s) or improve general understanding of a food system(s).

Objective
Explain how the sociological perspective is used in everyday life to explain the social behavior of individuals, groups, organizations, and communities.

Name
Identify the main characteristics of the sociological perspective.

Name
Discuss and analyze social problems using a sociological perspective.

Name
Define sociological research and describe the stages and types of research design.

Name
Discuss ethical issues involved in sociological research.

Name
Describe the basic concepts, generalizations, theories, and the methods used in sociology.

Name
Describe the major components of culture, the development and transmission of culture and its importance in human behavior.

Name
Define and illustrate critical sociological terms such as, status, role, group, culture, acculturation, and assimilation.

Name
Analyze the contribution of the various agents of socialization such as, parents, peers, school, and media to individual development.

Name
Identify the essential components of any religion or ideology.

Name
Discuss and integrate the sociological perspective with Christian beliefs.

Name
Identify and describe the various sources of cultural and social change.

Name
Explain how the sociological perspective is used in everyday life to explain the social behavior of individuals, groups, organizations, and communities.

SSCI2233 - MARRIAGE AND FAMILY

General

Course Prefix
SSCI

Course Number
2233

Description
This course is a study of the major issues related to courtship, marriage, and family formation. Special attention is given to the social conditions influencing courtship, marriage, divorce, and family life. Topics include dating rituals, gender differences, expectations, parenting, family dysfunction, family violence, and strategies for sound relating. The role of family counselors and therapists is also discussed.

Learning Outcomes

Name
Apply knowledge of phonology, morphology, semantics, syntax, discourse, and pragmatics as related to reading, writing, listening, and speaking English.

Name
Compare and contrast the multiple purposes of English usage related to literacy development.

Name
Relate the stages of Second Language Acquisition to stages of literacy development in ELLs.

Name
Differentiate instruction based on individual learner variables in the processes of language and literacy.

Name
Evaluate literacy development of all students in order to plan, implement, and assess instruction.

TESL5013 - FOUNDATIONS OF TEACHING ELLS

General

Course Prefix
TESL

Course Number
5013

Description
This course is a practical approach to teaching English Language Learners (ELLs) through an overview of historical development of and current best practices in curriculum, instructional methods and materials, testing and evaluation, cross-cultural communication processes, and principles of Second Language Acquisition (SLA) and linguistics. The course examines issues of language and culture relevant to educating ELLs in the PK-12 setting. Prerequisite: None

Learning Outcomes

Learning Outcomes

Name
Demonstrate understanding of various cultural values and beliefs in the context of ELLs in education.

Name
Analyze how cultural identities and home/school connections affect learning and academic progress for ELLs at varying levels of English proficiency.

Name
Relate language and culture to the experiences of ELLs in PK-12 settings.

Name
Apply concepts of racism, stereotyping, and discrimination in education.

Name
Utilize a range of resources in education about the cultural experiences of ELLs and their stakeholders to guide curriculum and instruction.

TESL5033 - METHODS OF TEACHING ELLS

General

Course Prefix
TESL

Course Number
5033

Description
This course provides a study of methods and techniques of teaching English to Speakers of Other Languages (ESOL) across the curriculum in PK-12, focusing on incorporation of language arts content standards, literacy, and linguistic development. This course prepares educators to provide appropriate instruction, assessment, and learning opportunities for English Language Learners (ELLs) in all educational settings.

Learning Outcomes

Learning Outcomes

Name
Design learning and assessments with accommodations for English Language Learners.

Justification
This ILO was modified to meet the required FL DOE new language specifications.

Name
Communicate assessment results and classroom objectives with diverse stakeholders to support student achievement.

Justification
This ILO was modified to meet the required FL DOE new language specifications.

Name
Select, adapt, and use a wide range of developmentally appropriate materials, resources, and technologies.

Name
Implement appropriate standards-based instruction that embeds assessment, ESOL instructional strategies, linguistic scaffolding, and Multi-Tiered System of Support structures (MTSS).

Justification
This ILO was modified to meet the required FL DOE new language specifications.

Name
Explain major theories of second language literacy development and their application to instruction.

Justification
This ILO was added to meet the required FL DOE new language specifications and to communicate one of the goals for the course.

TESL5043 - ASSESSMENT OF ELLS

General

Course Prefix
TESL

Course Number
5043

Description
This course provides methods for creating, adapting, and utilizing tools to assess language proficiency of PK to adult English Language Learners (ELLs), including exceptional learners. The course includes a survey of legal issues/requirements related to the development, implementation, and evaluation of English for Speakers of Other Languages (ESOL) programs at the federal, state, and local levels. The course explores legal and instructional issues of assessment of ELLs, such as language screening and ESOL program placement and exit; linguistic and academic achievement; diagnostic and proficiency test instruments and analysis for measuring listening, speaking, reading, writing competencies; and, standards-based content area learning.Prerequisite: None

Learning Outcomes

Learning Outcomes

Name
Demonstrate an understanding of the purposes of assessment as they relate to ELLs of diverse backgrounds and varying levels of English proficiency.

Name
Examine and develop appropriate strategies for meeting the legal requirements for ELLs to have access to equitable education.

Name
Evaluate standardized and teacher-made assessment instruments designed to measure listening, speaking, reading, and writing competencies of ELLs.

Name
Develop and implement appropriate assessment tools, procedures, and accommodations to evaluate language proficiency and content area learning by ELLs.

Name
Utilize assessment data from a variety of resources to design curriculum and instruction to promote successful language acquisition/development of ELLs.

Name
Distinguish among ELLs language differences, giftedness, and Exceptional Student Education needs

TESL5053 - GRAMMAR FOR TEACHING ESOL

General

Course Prefix
TESL

Course Number
5053

Description
This course investigates grammar, including word formation processes (morphology) and sentence structure (syntax), in the world's languages. The course focuses on vocabulary and tools used to discover and describe patterns in human language. Course work emphasizes problem solving and working with a wide range of language data. Course topics include the nature of language, a survey of language families, the unity of languages and their diversity, regional linguistics, pidgins, Creoles, and international languages. The course studies the grammar of current English from the viewpoint of modern linguistics.

THEO1123 - REASONS FOR FAITH I

General

Course Prefix
THEO

Course Number
1123

Description

This course is designed to acquaint students with the rich diversity of evidence supporting aChristian worldview, encouraging them to grow in their faith and “be prepared to give an answerto everyone who asks” about the reasons for the hope that they have (1 st Peter 3:15, NIV).Students will examine several categories of scientific and philosophical evidence for the existence of God, archeological and (extra biblical) historical evidence for the reliability ofscripture, corroboration from “undesigned coincidences” and other internal evidence of truthfultestimony in scripture, evidence from well-documented modern miracles, and evidentialarguments for the uniqueness of Jesus Christ as Messiah and resurrected Son of God. Variousobjections to these kinds of evidence and to the tenets of Christianity, including objectionsrelated to evil and divine hiddenness, will be addressed. The course draws on the expertise of scholars in a wide range of fields, including the history of science, astronomy, physics, molecular biology, paleontology, archeology, history, biblical studies, and the philosophy of religion. Collectively, this course provides a comprehensive case for the truth of biblical Christianity.

THEO1133 - REASONS FOR FAITH II

General

Course Prefix
THEO

Course Number
1133

Description

In Reasons for Faith II, students will examine archaeological and historical evidence for Scripture’s credibility, focusing on Jesus’ life, death, and resurrection. The course highlights internal biblical features that suggest truthful eyewitness testimony. It also explores modern-day evidence of God’s work, including: (1) miraculous healings and answered prayers, (2) reports of Jesus appearing in dreams and visions—especially among non-Christians, and (3) experiences of the Holy Spirit’s guidance and supernatural gifts. Common objections to these evidences will also be addressed.

Learning Outcomes

Learning Outcomes

Objective
Explain the role of Christian thought within the Christian community, especially as it relates to the holistic spiritual formation of believers.

Objective
Identify the major aspects of Christian thought as they arise from Scripture, the teachings of the church, reason, and human experience: God, Jesus Christ, the Spirit, humanity, salvation, the church, and the future.

Objective
Analyze the connections between the major aspects of Christian thought and the roles these connections play in developing a coherent picture of God's interaction with the world.

Objective
Reflect on the relevance of the major aspects of Christian thought to the Christian community, faith, and service to God's world.

Objective
Develop a personal credo articulating their expression of each of the major aspects of Christian thought that guide their practice of the Christian faith.

THEO1313 - SURVEY OF CHRISTIAN THEOLOGY

General

Course Prefix
THEO

Course Number
1313

Description
A survey of the main Christian doctrines and their relevance today. The Bible is used as the primary source to establish and defend our theological position. Areas to be addressed include the doctrines of God, Christ, the Holy Spirit, Human Creation, Sin and Salvation, the Church and the Last Things.

Learning Outcomes

Learning Outcomes

Name
Demonstrate competence in fundamental Christological texts;

Name
Understand the pattern of catechism represented by classical handbooks;

Name
Master the issues involved in different eschatological patterns;

Name
Develop an understanding of the influence of Greek, Syriac, and Latin theology in the West;

Name
Learn the contribution of one or more Early Church historians.

THEO3013 - THEOLOGY OF COMPASSION

General

Course Prefix
THEO

Course Number
3013

Description
Compassion for others, especially for those in need, is a fundamental tenet of biblical theology. Compassion for humankind was the motivation for Christ's mission to earth, as He mentions at the inauguration of his ministry in Luke 4: "The Spirit of the Lord is on me, because he has anointed me to proclaim good news to the poor. He has sent me to proclaim freedom for the prisoners and recovery of sight for the blind, to set the oppressed free, to proclaim the year of the Lord's favor." This course reviews the biblical foundation for compassion and traces the Church's theological interpretation and practical application of compassion throughout history.

Learning Outcomes

Name
Provide an overview of Presuppositional Apologetics, examining its historical roots and the foundational principles that distinguish it from other apologetic methodologies.

Name
Explore the theological and apologetic insights of Jonathan Edwards, particularly focusing on his understanding of human depravity, the necessity of divine revelation, and the centrality of presuppositions in shaping one's worldview.

Name
Analyze the contributions of Edward J. Carnell to Presuppositional Apologetics, considering his efforts to integrate philosophical thought with Christian theology and his reflections on the nature of presuppositions in apologetic engagement.

Name
Investigate the apologetic methodology of Gordon H. Clark, emphasizing his commitment to a thoroughly scriptural foundation for presuppositional reasoning and his exploration of logical and epistemological aspects of presuppositions.

Name
Examine the distinctive approach of Cornelius Van Til, focusing on his development of Covenantal Apologetics, the transcendental argument, and the significance of presuppositions in light of God's covenantal relationship with humanity.

Name
Analyze John Frame's contribution to Presuppositional Apologetics through his triperspectival approach, considering the normative, situational, and existential perspectives and their implications for apologetic engagement.

Name
Delve into the transcendental argument as a key feature of Presuppositional Apologetics, examining its logical structure, its use in defending the existence of God, and its role in challenging alternative worldviews.

Name
Apply grammar, dialectic, and rhetoric to integrate the topic with God's revelation through His creation and Moral Philosophy and OrthoDoxia defined through scriptural paideia.

THEO3183 - THEOLOGY OF WORSHIP

General

Course Prefix
THEO

Course Number
3183

Description
This course is a study of the theological foundations and practices of Christian worship, with particular attention given to Pentecostal and contemporary practices. The course further provides theological foundations for the writing, development, and administration of liturgical practices, providing a foundation for aesthetic expression, including songwriting and other creative Christian practices.

THEO3193 - APOLOGIA II

General

Course Prefix
THEO

Course Number
3193

Description
This course invites students to explore the rich tapestry of Classical Christian Apologetics, providing them with the tools to engage thoughtfully with the intellectual foundations that underlie the defense of Christian belief. Through examining primary texts, theological reflections, and practical applications, students will gain a nuanced understanding of the diverse perspectives within this apologetic tradition and be prepared to critically evaluate its enduring significance in contemporary contexts.Prerequisite: THEO 3023

Learning Outcomes

Learning Outcomes

Name
Analyze Classical Christian Apologetics, exploring its historical roots, foundational principles, and its place in the broader landscape of Christian thought.

Name
Examine Tertullian's pioneering contributions to Christian apologetics, focusing on his defense against pagan critiques and his articulation of key theological concepts, such as the Trinity.

Name
Analyze Origen's apologetic methodology, emphasizing his use of reason and philosophy to defend Christianity and exploring his contributions to early Christian theology.

Name
Investigate Anselm's ontological argument for the existence of God, exploring the philosophical and theological implications of his unique approach to defending the Christian faith.

Name
Examine Thomas Aquinas's synthesis of faith and reason, his Five Ways argument for the existence of God, and his broader contributions to Scholastic Apologetics.

Name
Analyze Pascal's existential approach to apologetics, exploring his famous "Pascal's Wager" and his reflections on the human condition considering Christian belief.

Name
Investigate William Paley's teleological argument, examining his contributions to natural theology and the design argument for the existence of God.

Name
Apply grammar, dialectic, and rhetoric to integrate the topic with God's revelation through His creation and Moral PhiloSophae and OrthoDoxia defined through scriptural paideia.

THEO3223 - APOLOGETICS OF THE MIND & HEART

General

Course Prefix
THEO

Course Number
3223

Description
This course equips Christian students to engage thoughtfully and sensitively with contemporary secular people's hearts and minds. The course accomplishes this goal in four primary ways. First, students learn the intellectual features, philosophical foundations, and historical roots of secular thinking, including the main arguments that secular thinkers use to justify their worldview and to critique Christianity. Second, students learn how secularism appeals to people's hearts—not just their minds—by the use of cultural narratives, artistic expressions, and moral directives. Third, students learn to engage secular individuals in a winsome and respectful way by listening carefully, caring for people individually, and humbly presenting solid reasons for the hope within. Finally, students learn 'the ultimate apologetic': living out the truth, beauty, and goodness of the Christian faith in concrete ways that draw people to the person of Jesus Christ.

Learning Outcomes

Learning Outcomes

Objective
Demonstrate understanding of the intellectual features, philosophical foundations, and historical roots of secular thinking.

Objective
Accurately characterize and thoughtfully respond to secular objections to Christianity.

Objective
Demonstrate a clear grasp of how secularism persuades people by the use of cultural narratives, artistic expressions, and moral directives.

Objective
Display active listening skills, including sensitivity to the emotional, intellectual, and spiritual needs of an interlocutor.

Objective
Formulate a positive and practical vision of how to live out the Christian life in a way that winsomely and humbly displays the truth, beauty, and goodness of the Christian faith.

THEO3333 - PSYCHOLOGY OF RELIGION

General

Course Prefix
THEO

Course Number
3333

Description
This course is a critical examination of the psychological research on the effects of religious experience on individual development and mental health. Historical developments, current trends, and major contemporary contributions to this area of study will be explored. There will be an emphasis on how the church can function to facilitate mental health.

THEO3503 - WOMEN IN PENTECOSTAL LEADERSHIP

General

Course Prefix
THEO

Course Number
3503

Description
This course investigates the theological and cultural developments of female leadership as it relates to historic and current Pentecostalism, with an emphasis upon American Pentecostalism. An egalitarian hermeneutic is presented and evaluated against other interpretive models. An historical perspective respecting female Pentecostal leadership will be examined through the lives and ministries of several key female exemplars. Gender specific leadership challenges and compelling gender specific demographic needs also will be addressed.

THEO4233 - SPECIAL TOPICS THEOLOGY & CULTURE

General

Course Prefix
THEO

Course Number
4233

Description
This course explores the dynamic relationship between Christian theology and contemporary culture. Students will engage theological concepts in dialogue with cultural trends, social issues, media, art, and politics. Emphasis is placed on equipping students to think theologically about culture and to develop faithful, missional responses to the challenges and opportunities presented in today's world. Through critical analysis and practical application, students will learn how theology both shapes and is shaped by the cultural context in which it is expressed.Prerequisite: None

THEO4503 - GLOBAL PENTECOSTALISM

General

Course Prefix
THEO

Course Number
4503

Description
This course studies the theological and cultural developments of Pentecostalisms and Spirit-oriented communities within a global context, particularly the majority world. Emphases are placed on the theological and global dynamics that have influenced Pentecostalisms in various world settings and how various global expressions of Pentecostalism and Spirit-oriented communities have contributed to the whole of Christianity, particularly as relates to theological developments. Both historical and contemporary expressions are included, with particular attention given to the twentieth and twenty-first centuries.

Learning Outcomes

Learning Outcomes

Objective
Demonstrate a comprehensive understanding of the theological concepts and issues of the topic(s) in the course.

Objective
Analyze the significance of the differing theological issues in order to develop a basis for theological reflection and exploration.

Objective
Synthesize an understanding of theology with conceptual coherence and its relevance for Christian life.

Objective
Analyze various theological categories as a means for developing the skills to compare, contrast, and extrapolate the implications of different theological topics and issues.

Objective
Evaluate the importance of theological topics and issues for the Christian faith, spiritual formation, and vocational calling.

Objective
Apply an understanding of theology for spiritual formation, community integration, and the life of ministry.

THEO4933 - SENIOR CAPSTN INTEGRATN SEMINAR

General

Course Prefix
THEO

Course Number
4933

Description
This capstone course engages students in ascertaining the certainty and clarity of their call to the care of souls, recognizing such certainty and clarity for longevity in church or para-church related ministry. Students will develop strategies to engage financial, emotional, physical, and spiritual pressures that will challenge that call throughout their careers. Students will move toward the clarification and assessment of their ministerial call through a series of interactions with faculty. This course requires careful study of and reflection upon the appropriate biblical texts.

5573

Description
This course is an exploration of the relationship between theology, ethics, and the moral life in the work of key theologians and schools of thought with the philosophical goal of making sense of the connections between truth-claims, ethical obligations, virtuous character, and moral conduct. Special attention is given to the theocentric structure of ethical reasoning in Scripture.

Learning Outcomes

Learning Outcomes

Objective
Articulate similarities and differences between theological ethics and philosophical ethics.

Objective
Examine the relationship between theology and ethics in the works of key theologians and schools of thought selected from the broader Christian tradition.

Objective
Understand the theological character of ethical thinking in the Bible, especially the unity and diversity of teaching on the truly moral life.

Objective
Appreciate the relationship of Scripture, tradition, and reason as sources of Christian ethics and morality.

Objective
Develop a constructive and context-specific ethical vision drawn from the integration of critical biblical, theological, and philosophical reflection on personal experience.

THEO5583 - CHRISTIANITY & WORLD RELIGIONS

General

Course Prefix
THEO

Course Number
5583

Description
This course explores the historical and contemporary relationships of Christianity and the world religions, specifically focused at the theological level and involving Pentecostal perspectives. Topics discussed include global Renewal movements and religious pluralism, theology of religions, globalization, interfaith relations, and interreligious dialogue.

Learning Outcomes

Learning Outcomes

Objective
Respond adequately from biblical, historical, theological, and pastoral perspectives to the many questions surrounding religious pluralism and interfaith relationships.

Objective
Understand the worldviews and practices which provide coherence for members of (at least one) other faith(s).

Objective
Learn from those in other religions and from other faith traditions even while being influential as a Christian in non-Christian religio-cultural contexts.

Objective
Appreciate the diversity of religions within a Pentecostal theological framework of divine providence.

Objective
Communicate and interact more effectively with members of other faith traditions as informed by Pentecostal sensibilities and commitments.

THEO5993 - THESIS/CONTEXTUAL EDUCATION PROJECT

General

Course Prefix
THEO

Course Number
5993

Description
This course introduces students to the logic and dynamics of writing a master's level thesis or contextual education project. It is designed to enable students to understand the process of writing a thesis proposal, gaining acceptance of same and to begin writing a master's level research thesis or contextual education project. In this first step of a two-step process, the student will be assigned a reader/advisor, gain approval of the thesis topic, and develop a research and writing time-line for completion. The student will work on an individual basis with reader/advisor, submit regular iterations of work, respond to reviews, and successfully achieve agreed upon achievement goals.

Name
Demonstrate a comprehensive understanding of the theological concepts of the topics in the course.

Objective
Demonstrate a comprehensive understanding of the theological concepts of the topics in the course.

Name
Synthesize an understanding of selected theological topics with conceptual coherence and its relevance for Christian life.

Objective
Synthesize an understanding of selected theological topics with conceptual coherence and its relevance for Christian life.

Name
Develop the skills to compare, contrast, and extrapolate the implications of different biblical topics and issues by analyzing various theological categories.

Objective
Develop the skills to compare, contrast, and extrapolate the implications of different biblical topics and issues by analyzing various theological categories.

Name
Evaluate the importance of theological topics and issues for the Christian faith, spiritual formation, and vocational calling.

Objective
Evaluate the importance of theological topics and issues for the Christian faith, spiritual formation, and vocational calling.

Name
Apply an understanding of the selected theological topics for spiritual formation, community integration, and the life of ministry.

Objective
Apply an understanding of the selected theological topics for spiritual formation, community integration, and the life of ministry.

THEO7113 - THEOLOGY OF THE CHURCH

General

Course Prefix
THEO

Course Number
7113

Description
This course provides an introduction to doctoral-level research in theology and biblical studies within a Pentecostal/evangelical framework. Students will explore foundational methods for academic study, examine significant contemporary issues in theology and Scripture, and reflect on how Spirit-empowered scholarship can serve the Church and the world. Special attention is given to developing research questions, refining writing skills, and integrating biblical and theological insights. Each student will identify a key issue and method related to their proposed dissertation focus—whether in theology or biblical studies—and create a plan for deeper inquiry.Prerequisite: None

Learning Outcomes

Learning Outcomes

Name
Identify key contemporary issues in theology and biblical studies relevant to Spirit-empowered scholarship.

Name
Evaluate major methodological approaches used in theological and biblical research within a Pentecostal/evangelical context.

Name
Develop a focused research question and preliminary plan related to the student’s proposed dissertation topic.

Name
Apply advanced academic writing and research skills appropriate to doctoral-level scholarship.

Name
Integrate theological reflection and biblical interpretation in ways that serve both the Church and the academy.

THEO7223 - TEACHING & COMMUNICATING THEOLOGY

General

Course Prefix
THEO

Course Number
7223

Description
This course equips doctoral students to teach effectively in theological and ministry contexts by grounding them in biblical perspectives on teaching, learning, and Spirit-empowered pedagogy. Students will explore best practices in course design and development, with special emphasis on creating transformative learning experiences that go beyond content delivery to foster spiritual formation and critical engagement. As a culminating project, students will design a course in their area of proposed dissertation research, demonstrating the integration of theological insight, educational strategy, and practical ministry application.Prerequisite: None

THEO7333 - DISSERTATION PROPOSAL SEMINAR

General

Course Prefix
THEO

Course Number
7333

Description
This seminar prepares PhD students in theology and biblical studies to design and propose original, Spirit-empowered research through rigorous engagement with advanced bibliographic methods, theological inquiry, and scholarly writing. Students will learn to formulate clear research problems, evaluate and apply appropriate methodologies, and analyze existing dissertations and proposals to refine their own academic focus. Emphasis is placed on developing coherent argumentation, engaging scholarly sources, and adhering to doctoral-level standards of style and structure. The course culminates in the submission and peer presentation of a dissertation proposal, which must be approved before proceeding to the dissertation phase.Prerequisite: None

THEO9003 - DISSERTATION RESEARCH

General

Course Prefix
THEO

Course Number
9003

Description
Following approval of the dissertation proposal and completion of comprehensive exams, students engage in sustained research and writing under the supervision of their dissertation advisor. This phase culminates in the production of a 90,000- to 110,000-word dissertation that contributes original insight to the fields of theology or biblical studies and reflects the integration of Spirit-empowered scholarship with academic excellence. Regular feedback and guided mentoring support students in refining their argument, engaging relevant scholarship, and developing a clear, compelling, and theologically grounded contribution to the Church and the academy.Prerequisite: None

Understand the basics of brand recognition and demonstrate how to emulate the values of the company they are representing while on the job to ensure the standards of the company experience are met.

Name
Examine customer conflict or dissatisfaction in the field and be able to apply techniques for navigating and resolving conflict.

Name
Understand the companys protocols and standards for review of work completed to ensure quality service is completed.

Name
Interpret customer satisfaction and work with company staff to ensure any dissatisfaction is mitigated.

TRDS4003 - SPECIAL TOPICS

General

Course Prefix
TRDS

Course Number
4003

Description

The course introduces students to the biblical, ethical, and leadership foundations critical for a successful career in construction technology. While this course will still cover fundamental construction-related topics (project phases, site safety, collaboration, and communication), its deeper purpose is to challenge students to integrate Christian values—such as integrity, servant leadership, stewardship, and vocation—into every aspect of their professional life.
Students will explore how Scripture speaks to work, leadership, responsibility, and excellence. Through case studies, Scripture, and applied reflection, learners will gain the tools to be not only competent trades professionals but also ethical leaders and witnesses in the construction industry.

Learning Outcomes

Learning Outcomes

Name
Demonstrate the accepted procedures for correct pitch notation.

Objective
Demonstrate the accepted procedures for correct pitch notation.

Name
Identify, sing, and notate simple to moderate rhythms in different time signatures at a level of competence sufficient to teach rhythms to a worship team and discuss them confidently with a rhythm section.

Objective
Identify, sing, and notate simple to moderate rhythms in different time signatures at a level of competence sufficient to teach rhythms to a worship team and discuss them confidently with a rhythm section.

Name
Identify and write all major and minor key signatures, and construct major scales.

Objective
Identify and write all major and minor key signatures, and construct major scales.

Name
Recognize and write simple and compound intervals.

Objective
Recognize and write simple and compound intervals.

Name
Create music director’s charts of worship songs notated with key teaching elements.

Objective
Create music director’s charts of worship songs notated with key teaching elements.

Name
Identify and compose triads, seventh chords, and slash chords.

Objective
Identify and compose triads, seventh chords, and slash chords.

Name
Notate inversions of triads and seventh chords.

Objective
Notate inversions of triads and seventh chords.

Name
Demonstrate an understanding of, and successful use of The Nashville Number System.

Objective
Demonstrate an understanding of, and successful use of The Nashville Number System.

Name
Recognize common chord progressions used in worship music and successfully demonstrate their use.

Objective
Recognize common chord progressions used in worship music and successfully demonstrate their use.

Name
Transpose songs to different keys quickly, particularly at commonly used intervals such as major second, minor second, perfect fourth, perfect fifth, etc.

Objective
Transpose songs to different keys quickly, particularly at commonly used intervals such as major second, minor second, perfect fourth, perfect fifth, etc.

WRSP1121 - WORSHIP GUITAR APPLIED LESSON

General

Course Prefix
WRSP

Course Number
1121

Description
Through one-on-one private instruction, students will develop and expand their ability to play acoustic guitar in contemporary worship music using proper technique while building a greater understanding of concepts of modern worship musicianship. The understanding and use of both strumming and picking will be developed through exercises, scales, and the study of worship songs. Special emphasis will be placed on developing the ability to play and sing simultaneously on worship songs.

13 lessons (25 minutes per lesson) per semester plus individual practice are required. Course is repeatable for credit up to 5 times.

Learning Outcomes

Learning Outcomes

Name
Demonstrate instrumental familiarity with the guitar, being able to name strings, parts, and demonstrate proper tuning procedures.

Name
Identify and play notes on the E and A strings.

Name
Develop basic chord knowledge in the keys of G,C,D, and E.

Name
Demonstrate the ability to play the G Major Scale two octaves and the Chromatic Scale two octaves.

Name
Develop proper hand placement.

Name
Develop the ability to play basic strumming patterns with proper technique.

Name
Develop basic skills in picking, including fingerpicking.

Name
Demonstrate the ability to play basic worship songs.

Name
Demonstrate the ability to sing and play worship songs simultaneously.

Name
Demonstrate the ability to play acoustic guitar accurately and in tempo with a worship team.

WRSP1131 - WORSHIP PIANO APPLIED LESSON

General

Course Prefix
WRSP

Course Number
1131

Description
Through one-on-one private instruction, students will develop and expand their ability to play piano/keyboards in contemporary worship style using proper technique while building a greater understanding of concepts of modern worship musicianship.

Name
Perform major scales in all common worship keys (C, D, E, F, G, A, B) one octave with both hands separately.

Name
Perform triad inversions in the keys of C, D, E, F, G, A, B, using proper fingerings.

Name
Perform 1, 4, 5, 1 and 1, 4, 6m, 5, 1 chord progressions using chord charts and Nashville Numbers in the keys of C, G, D.

Name
Demonstrate proper reading of a chord chart and a number chart along with selecting appropriate chord inversions.

Name
Perform one contemporary worship song in each of these three keys: C, G, D.

Name
Develop basic knowledge of worship keyboard/synth instruments, with attention to patches such as pads, organs, lead synths, and piano-pad blends.

Name
Demonstrate ability to play accurately and in tempo with a worship team on simple worship songs.

Name
Develop in the area of interpretation and musicality/feel.

Name
Develop introductory knowledge of how to improvise simple piano backgrounds during instrumental moments in services.

WRSP1141 - WORSHIP VOICE APPLIED LESSON

General

Course Prefix
WRSP

Course Number
1141

Description
Through one-on-one private instruction, students will develop and expand their ability to sing in a contemporary vocal style using proper vocal technique while building a greater understanding of concepts of modern worship musicianship. The understanding and use of the voice as an instrument and of vocal technique will be developed through the use of vocal training CDs, study of the textbook, and instructor designed exercises. The appropriate contemporary vocal style elements will be communicated through the study of modern worship songs, contemporary pop/rock music, jazz standards, and classical styles.

Requirements
13 lessons (25 minutes per lesson) per semester plus individual practice are required. Course is repeatable for credit up to 5 times.

Learning Outcomes

Learning Outcomes

Name
Demonstrate proper breathing technique

Name
Demonstrate use of technical exercises and recognize basic functions of the voice.

Name
Analyze and perform different genres in contemporary vocal music, in order to be able to apply contemporary vocal style to modern worship music.

Name
Identify and develop the different vocal registers, including: head voice, chest voice, chest blend, and head blend.

Name
Use different tone colors and style elements tastefully, such as pitch bends or hooks, fall-offs, raspiness, breathiness, vibrato, straight tone, and diction.

Name
Develop proper vocal technique to relieve vocal tension and prevent vocal damage.

Name
Develop the ability to blend with other vocalists.

Name
Develop in the area of interpretation and musicality.

Name
Develop pitch accuracy.

Name
Develop a healthy vocal workout plan.

WRSP1151 - WORSHIP AURAL THEORY I

General

Course Prefix
WRSP

Course Number
1151

Description
This course is intended to provide the student with a comprehensive study in sight singing and melodic, harmonic, and rhythmic dictation.

Corequisites

Enroll in the following Courses:

- WRSP1112 - WORSHIP MUSIC THEORY I

Learning Outcomes

Learning Outcomes

Name
Demonstrate ability to read Solfege syllables, scale degree numbers, or neutral syllables.

Name
Comprehend aurally the relationship between individual pitches and vocal lines in a score without help from a pitched instrument (i.e. interval recognition).

Name
Dictate/transcribe diatonic melodies and intervals played by a pitched instrument.

Name
Dictate/transcribe chords of various harmonic progressions played by a pitched instrument.

Name
Dictate/transcribe rhythms that include beat-level patterns in duple and compound meter, by means of singing on a neutral syllable, clapping, or tapping.

Name
Hear, remember and understand musical patterns involving melody, harmony and rhythm.

WRSP1161 - WORSHIP AURAL THEORY II

General

Course Prefix
WRSP

Course Number
1161

Description
This course is intended to provide the student with a comprehensive study in sight singing and melodic, harmonic, and rhythmic dictation.

WRSP1212 - WORSHIP MUSIC THEORY II

General

Course Prefix
WRSP

Course Number
1212

Description
A study of fundamental musical concepts, including: chord study and analysis, modulation, chord progressions and patterns, basic voice leading, knowledge of minor scales and chord progressions, and improvisation of accompaniment from chord symbols. This course includes a basic overview of improvisation with exposure to some standard chord scales used in improvising solos. Knowledge of rhythms and their performance will be reinforced and augmented. Special emphasis will be placed on the practical application of music theory in teaching contemporary worship music and directing worship team rehearsals.

Learning Outcomes

Learning Outcomes

Name
Demonstrate knowledge of minor scales and chord progressions.

Objective
Demonstrate knowledge of minor scales and chord progressions.

Name
Identify, sing, and notate moderate to advanced rhythms in different time signatures at a level of competence sufficient to teach rhythms to a worship team and discuss them confidently with a rhythm section.

Objective
Identify, sing, and notate moderate to advanced rhythms in different time signatures at a level of competence sufficient to teach rhythms to a worship team and discuss them confidently with a rhythm section.

Name
Demonstrate the ability to analyze sheet music of worship songs and hymns, identifying and notating chords from written music.

Objective
Demonstrate the ability to analyze sheet music of worship songs and hymns, identifying and notating chords from written music.

Name
Create lead sheets of worship music by listening to recordings only.

Objective
Create lead sheets of worship music by listening to recordings only.

Name
Demonstrate knowledge of modulation in worship songs/hymns.

Objective
Demonstrate knowledge of modulation in worship songs/hymns.

Name
Demonstrate basic knowledge of improvising harmonic accompaniments from chord symbols, improvising solos, and improvisation of backgrounds for quiet moments in services.

Objective
Demonstrate basic knowledge of improvising harmonic accompaniments from chord symbols, improvising solos, and improvisation of backgrounds for quiet moments in services.

Name
Demonstrate basic knowledge of voice leading in triads and in 7th chords.

Objective
Demonstrate basic knowledge of voice leading in triads and in 7th chords.

Name
Create more advanced director’s charts of worship songs demonstrating the student’s ability to arrange the song in a manner that is both somewhat innovative and convincing.

Objective
Create more advanced director’s charts of worship songs demonstrating the student’s ability to arrange the song in a manner that is both somewhat innovative and convincing.

Name
Identify common chord progressions used in worship music and successfully demonstrate their use by playing them on guitar or piano, reading from a nashville number chart or chord chart.

Objective
Identify common chord progressions used in worship music and successfully demonstrate their use by playing them on guitar or piano, reading from a nashville number chart or chord chart.

Name
Demonstrate knowledge of complex chords such as 9th, 11th, and 13th chords, and secondary dominants.

Objective
Demonstrate knowledge of complex chords such as 9th, 11th, and 13th chords, and secondary dominants.

WRSP3013 - DIGITAL MUSIC COMP FOR WORSHIP

General

Course Prefix
WRSP

Course Number
3013

Description
This course studies the aesthetics and techniques of music composition using electronic resources including computers, hardware samplers, synthesizers, digital recording equipment, and analogue recording equipment. Class work includes hands-on work with recording, editing, compositional software, and compositional hardware.

Montana

Type
Completion Requirement

Science

Complete ALL of the following Courses:
- BIOL1334 - ESSENTIALS OF HUMAN A&P

Additional Comments:
Montana requires 6 credit hours of natural science with a laboratory experience. Students may choose to take BIOL 1334 to complete the requirement or any other science course to meet the credit hour requirement.

Nevada

Type
Completion Requirement

Additional Comments:
3 credit hours needed. The Socio-Historical requirement must be fulfilled by taking PPOL 2433 or by earning credit for one of the following combinations of classes from an accredited Nevada college: 1) HIST 100, 2) PCS 101, 3) HIST 101 and HIST 102, or 4) or HIST 101 and 217.

Ohio

Type
Completion Requirement

Mathematics

Complete ALL of the following Courses:
- MATH1213 - COLLEGE ALGEBRA
- * if not already taken or 2 more credits to get to 36 hours

Additional Comments:
Ohio students need an additional two credit hours in one or more of the following areas: Oral and Written Communication, Mathematics, Statistics and Logic, Arts, Humanities, Culture and Diversity, Natural Sciences, Technology and Innovation.

Oklahoma

Type
Completion Requirement

Social Science

Complete ALL of the following Courses:
- PPOL2413 - UNITED STATES GOVERNMENT
- HIST2123 - CRITICAL ISSUES IN AMERICAN HISTORY

Humanities

Complete at least 1 of the following courses:
- MUSC1003 - MUSIC APPRECIATION
- HUMS2233 - INTRODUCTION TO HUMANITIES
- ARTV2023 - PHOTOGRAPHY
- ENGL2133 - INTRODUCTION TO LITERATURE

Choose one not already chosen for Foundational Core

Additional Comments:
In addition to the courses listed below, Oklahoma students need an additional 7 credit hours in one ore more of the following: History, Social Science, Behavioral Science, Humanities, Math, Natural Science, Language, or Fine Arts.
