JAMESTOWN COMMUNITY COLLEGE 2026-2027 CATALOG*

**The information contained in the PDF download is effective as of 3.27.26. For current catalog information, please visit the online catalog available at <https://catalog.sunyjcc.edu/>*

Community colleges are unique institutions. As multifaceted as the ages and interests of their students, they react swiftly to change. As the first locally sponsored community college accepted into the State University of New York, Jamestown Community College has been in the forefront of this exciting development in education since 1950.

By providing high quality transfer programs for the university bound, occupational skills for the career-minded, flexible schedules for working students, and specialized programs for business, industry and professional groups, and by being the cultural center of the community, JCC attempts to reach every segment of the population in the area it serves.

JCC offers the first two years of a bachelor's program, awarding the Associate in Arts degree or the Associate in Science degree, which are transferable to four-year institutions. For those pursuing a two-year career degree, it also awards the Associate in Applied Science degree as well as one-year certificates. In addition, JCC offers a variety of non-credit continuing education courses for those wishing to expand their vocational proficiency, to enrich their personal lives, or to acquire additional knowledge simply for the fun of it.

JCC'S VISION, MISSION, AND BELIEFS

Vision

To support our students' journey to success in the local and global workplace with quality, in-demand learning experiences.

Mission

Jamestown Community College provides inclusive educational opportunities for all individuals and employers within our region and beyond, focusing on career goals and support through community partnerships.

Statement of Beliefs

Commitment to Quality

The college is committed to student learning and to the promotion of the college, its mission, and the welfare of our communities.

Commitment to Students

We believe students and other consumers of college services are the first priority in all we do.

Commitment to Lifelong Learning

We believe the entire college community is responsible for enriching lives by creating an atmosphere dedicated to lifelong learning and intellectual inquiry and for promoting communication, collaboration, and greater understanding of our pluralistic society and the world in which we live.

Commitment to Community Partnership

We believe we share responsibility for the well-being of our college and must play a role, in partnership with other community agencies, in fostering the economic, social, and cultural well-being of our community.

JAMESTOWN CAMPUS

Within the **Ralph C. & Isabella M. Sheldon Center** are programs related to the sciences, technology, engineering, and mathematics and the arts, humanities, and health sciences divisions. It also houses physics and computer labs, music facilities, the management information systems and institutional research departments, High School Partnerships, Robert Lee Scharmann Theatre, Weeks Gallery, and Sarita Hopkins Weeks Reception Hall.

The **Katharine Jackson Carnahan Center** houses the criminal justice and public safety programs and computer labs, conference rooms, and training facilities.

Features of the **John D. Hamilton Collegiate Center** are the Student Union, Campus Store, Success Center, Global Learning office, Applied Learning office, cafeteria, health center, art studios, box office, campus life and residence life offices, and buildings and grounds department. The student records, admissions, financial aid, marketing, and business offices are also located in the building, as are offices for JCC's administration and the JCC Foundation.

Hillside Suites, JCC's three residence halls, are comprised of suites with four or five single bedrooms along with two bathrooms and a kitchen, dining, and living area. The buildings hold spaces for additional amenities and activities for student engagement.

Hultquist Library Building houses the business and social sciences division, the Jamestown Learning Commons (library, learning center, online learning, and accessibility services offices), student lounges, Help Desk, computer labs, conference rooms, distance learning facilities, Lenna Teleconference Theatre, and Workforce Development offices and classrooms.

The **Manufacturing Technology Institute** is a partnership of JCC and the Manufacturers Association of the Southern Tier. MTI provides services through hands-on manufacturing technical training as well as technology assistance. Mechanical technology, machine tool technology, and welding technology courses, as well as noncredit customized training programs, are taught in the facility. Workforce Development is also housed there.

The **Physical Education Complex** consists of a gymnasium, swimming and diving pools, racquetball court, running track, weight room, Life Fitness Center, and locker facilities. The gymnasium is also used for special spectator events, seating up to 2,000 people.

JCC and the **Roger Tory Peterson Institute of Natural History**, which is located on Curtis Street, collaborate on providing educational and cultural opportunities.

The **Science Center** houses JCC's biology, chemistry, environmental science, and geology programs. The facility features energy efficient and sustainable elements designed to highlight resource conservation, habitat restoration, and social responsibility.

Additional area facilities that are used for college programs include Russell E. Diethrick Jr. Park and College Park and Biological Station, commonly referred to as the 100-Acre Lot. Several municipal and private facilities, which include public schools, hospitals, nursing homes, and social service agencies, provide off-campus learning experiences for JCC students.

CATTARAUGUS COUNTY CAMPUS

JCC's Cattaraugus County Campus is situated in downtown Olean in the foothills of the Allegheny Mountains.

The **Allied Health and Science Center** includes nursing, biology, chemistry and physics labs and classrooms.

College Center includes the Student Union, student lounge, Center Gallery, student lounge, community room, cafe, boardroom, and student veterans' lounge. The Student Services Center (admissions, financial aid, registration, business offices, and College Connections), Success Center, campus life office, health center, and administrative offices are also located in the building.

The 190-seat theater **Cutco Theater** accommodates theatrical and musical performances, lectures, and training programs. The adjacent Magnano Reception Room is used for college and community events.

The **Library and Liberal Arts Center** houses the Cattaraugus County Campus Learning Commons (library, learning center, and accessibility services), faculty offices, classrooms, a student lounge, and Empire State College office.

The **Technology Center** houses computer labs, classrooms, and study areas.

The **eSports Arena** is located in the historical former train "Depot."

The **Manufacturing Technology Institute** features classrooms, light duty and computer-aided design labs, and Workforce Development facilities.

The **Hatch** fills a gap in the Olean area entrepreneurial ecosystem as a place and resource for both existing businesses and for business ideation. The Hatch supports small businesses through a supportive environment that helps new and existing businesses and entrepreneurs grow and succeed. The Hatch provides resources, guidance, amenities, and physical space on campus.

ADDITIONAL LOCATIONS

JCC offers academic and workforce programming in Fredonia (Chautauqua County) and Warren (Warren County, PA). Listings of credit and Workforce courses and programs for each location can be accessed at www.sunyjcc.edu.

ADMISSIONS

The minimum requirements for admission to JCC are graduation from an accredited secondary school, possession of a high school equivalency diploma, or home-school documentation. The Scholastic Aptitude Test (SAT) or the ACT Assessment Test are not required for admission.

JCC has endorsed the concept of Full Opportunity of the State University of New York and accepts the philosophical implications of that decision. This means the college has agreed to accept all applicants who are legal residents of the sponsoring area, who are 18 years of age or older, and are high school graduates.

The college reserves the right to make exceptions to its admissions policies and to impose other criteria on students seeking admission who do not meet the requirements above. This policy does not, however, guarantee admission of students to specific programs within JCC's curriculum. It does imply a commitment to meet the special needs of the students who may require developmental courses, tutorial services, and additional counseling services. It also challenges the college to expand its career programs, institute new approaches to the teaching-learning process, and provide students with the flexibility of changing courses and programs without penalty.

Applying to JCC

Matriculated (Degree Seeking) Students

Matriculation is the formal process by which students declare their intent to enroll in a college certificate or degree program. The process is complete once the student submits an application, with supporting documentation (official transcripts, GED/TASC, placement test scores, etc.), and has been accepted to JCC in a certificate or degree program. Federal and state financial aid is not available to non-matriculated students.

Application Process

Application for admission may be initiated at any time prior to the start of each semester, but admission cannot be guaranteed for applicants who begin the process after August 1 (for the fall semester). High school seniors, especially those concerned about admission to specific programs, should apply shortly after the beginning of their senior year. In some programs, such as nursing and occupational therapy assistant, students should consider early application deadlines, and limited enrollment. Visit www.sunyjcc.edu for supplemental applications and deadlines for the nursing and occupational therapy assistant programs.

New, First-Time Students

Students who have not attended another college and who are entering JCC for the first time should follow these steps:

- Apply online at www.sunyjcc.edu/apply.
- Request high school guidance office to forward an official copy of the student's transcript to the admissions office.
- Home-schooled students must complete the necessary documentation indicating completion of secondary level education as defined by state (see below for additional information).
- Students possessing a recognized equivalent of a high school diploma, such as a GED/TASC certificate, must submit appropriate documentation.
- Students should visit JCC to acquaint themselves further with JCC's programs and facilities. Personal interviews are optional, unless requested by the admissions office.

Following notification of acceptance, students are informed of advisement and registration procedures that entering freshmen must complete prior to the start of classes.

Readmitted Students

A student who attended JCC previously and is returning after an absence must reapply. To apply, visit www.sunyjcc.edu/apply. Students who have attended another college since their last enrollment at JCC must request an official transcript be sent to the JCC admissions office.

Second Degree Candidates

A student pursuing a second degree at JCC must reapply for admission. Students must also meet with an advisor in the Success Center on either campus to update their program of study. Each additional associate's degree will require 30 additional hours, 15 of which must be earned from JCC. Apply online at www.sunyjcc.edu/apply.

Students Transferring to JCC

A candidate for admission who has completed previous coursework is required to follow the transfer application procedure:

- Complete the online application at www.sunyjcc.edu/apply and submit high school transcript, a copy of GED/TASC, or other documentation indicating successful completion of high school.
- Students seeking transfer credit from other institutions must request official college transcripts from all previous colleges attended and have them sent to the JCC admissions office.

Transfer of Alternative College Level Credit

Students who have attended other colleges or who have earned college credit through the Independent Study Programs of the State University of New York, the College Proficiency Examinations of the State Education Department, the Advanced Placement Program of the College Entrance Examination Board, College Level Examination Program, International Baccalaureate (IB) credits, or after military experience (ACE) are eligible to apply for advanced standing and credit.

A student may transfer credit hours to JCC from another accredited postsecondary institution for courses for which the student has earned the equivalent of a C grade or higher. Grades C- and below and grades that do not indicate a C or higher (i.e. credit/fail, pass/fail, satisfactory) was earned are not accepted as transfer credits. Students may also earn transfer credit from JCC recognized organizations as noted on the website. Credit hours and grades for transfer credit are not included in the calculation of the student's JCC grade point average.

Transferring Credits

Official records should be directed to the JCC admissions office.

JCC considers expected learning outcomes and standards when evaluating incoming transcripts for JCC credit course equivalency. A student may transfer up to 30 semester hours of credit to JCC from another institution or other external sources. If transfer credits are applied toward additional degrees, the credits must be a part of the maximum of 30 allowable transfer credits.

Students must complete a minimum of 30 semester hours of credit at JCC to be eligible for an associate degree, and 15 semester hours of credit to be eligible for a certificate from JCC.

Appeal Process for Transfer Evaluations

Students who wish to appeal the results of a transfer evaluation may do so by contacting the JCC registrar in writing to briefly explain the issue under appeal and request a meeting to discuss it. The registrar may request the student to provide additional information (such as a course syllabus). At the meeting, the registrar, or other evaluator, will review the criteria used to evaluate the credits brought to JCC.

If the appeal is not resolved to the student's satisfaction with the registrar, he may request that the appeal be forwarded to the academic department that oversees the course(s) under review. A program director or dean will review the credit evaluation and appeal and may request that the student provide additional information for consideration before rendering a decision.

If the appeal is not approved with the decision of the director or dean, the student may request that it be forwarded to the vice president of academic affairs who will review the appeal and supporting information. The vice president may request additional information. The vice president's decision regarding the appeal is final for students transferring credits to JCC from non-SUNY institutions.

Students transferring credits to JCC from a SUNY institution who do not agree with the vice president of academic affairs' decision may appeal to the SUNY provost by following instructions at <https://www.sunyjcc.edu/admissions/transfer>.

It is the responsibility of the student to initiate each step of the appeal process and to provide any additional information requested pertaining to the course(s) in question.

Non-Matriculated Students Registering For Courses for Personal Enrichment

A non-matriculated student is one who is taking courses to satisfy personal needs and interests without applying for candidacy for a degree or certificate. Non-matriculated students are not eligible to receive financial aid. JCC reserves the right to require placement testing for anyone wishing to register for classes. JCC will deny registration privileges to any student who does not comply with this procedure. To register for courses, visit www.sunyjcc.edu/register.

Earning a High School Equivalency Diploma

Students who do not possess a New York State high school or equivalency diploma may satisfy the equivalency requirements by successful completion of 24 college-level credits at JCC. Credit hours earned in this program will be applied toward degree requirements, and students may apply for admission upon receipt of their high school equivalency diploma from NYS. Homeschool students who wish to earn a high school equivalency diploma may apply to the REACH program at www.sunyjcc.edu/REACH.

Students with an IEP Diploma

The State Education Department has ruled that unlike the high school diploma or the high school equivalency diploma, an Individualized Education Plan (IEP) diploma "is not an indicator of successful completion of high school study," thus community colleges are under no legal obligation to accept IEP students under the terms of the state's Full Opportunity policy. Any student with an IEP diploma, or those who do not have a high school diploma or its equivalent, may attend JCC part-time with no financial aid or may pursue a GED/TASC.

Admission of Correspondence School Students

According to the State Education Department, when a student has completed a high school program through correspondence study, the correspondence school must be recognized, authorized, or approved by the state educational entity where the correspondence school is located, and the student must be a resident of that state. New York state residents may not use a high school program of correspondence study to meet the requirements for a secondary education in New York state.

Early College Programs for High School Students

High School Students have the opportunity to enroll in college-level courses while completing their high school graduation requirements. For more information on programs for students still in high school, visit www.sunyjcc.edu/highschool.

Educational Advancement for Regional Neighbors (EARN)

JCC's Educational Advancement for Regional Neighbors (EARN) program provides high school students with the opportunity to enroll in courses part-time (up to 11 credit hours per semester) at any JCC campus, extension center, or online. EARN is open to all current high school students 15 years or older by the start of the class who meet all course requirements and prerequisites. Students entering the EARN program must still be enrolled in high school or be currently homeschooled and filing an individualized home instruction plan (IHIP) with their local school district. Students graduating in June may use the EARN grant for the summer immediately following graduation.

Since some high schools give dual credit for certain courses, credit earned at JCC may also be applied toward high school graduation requirements at the discretion of the school district. Credit earned at JCC in courses taken by EARN students may be applied toward an associate degree from JCC or may be transferred to another institution. For course selection, students should confer with their high school counselor and a JCC Success Navigator or advisor to determine which classes fit into their schedule. Registration forms and deadlines can be found at www.sunyjcc.edu/EARN.

EARN students are responsible for tuition and fees. Since they cannot matriculate, federal and state financial aid is unavailable to them. The EARN grant, however, is available to provide for one-half the cost of tuition up to \$700 per semester. Students are eligible for this grant by registering as an EARN student. Enrolled students have secure access to their individual student records at banner.sunyjcc.edu. Students can view six-week and final grades, advisement transcripts, registration, and access their JCC email account. No paper bills are sent to the student. Bills can be viewed and paid online at banner.sunyjcc.edu.

As members of JCC's Faculty Student Association, EARN students can participate in both the academic and extracurricular life of the college. They have library privileges, can attend special college events, and are welcome to join various clubs and interest groups.

Homeschooled Students

JCC welcomes homeschooled students. Homeschooled students may enroll in college coursework through the EARN or REACH programs prior to graduation. Students who have been homeschooled may apply for admission to JCC if they have reached the compulsory age of attendance at their local school district and have received a letter of substantial equivalency from their superintendent. Homeschooled students unable to obtain this documentation must receive a high school equivalency diploma prior to matriculating or receiving a degree from JCC. Homeschooled students interested in earning a high school equivalency diploma may apply to participate in the Ready to Earn Advanced Credits in Homeschool (REACH) program. For more details, visit www.sunyjcc.edu/REACH. In all cases, homeschooled students must complete JCC's placement testing. Contact the High School Partnerships office for additional information.

College Connections

JCC offers college-level courses in nearly 40 area high schools through the College Connections program. Students who qualify for the program are able to choose from several courses that are completed for both high school and college credit. To date, thousands of students have received college credits prior to high school graduation. College Connections credits may be used at JCC or easily transferred to most other colleges and universities.

Courses are taught by high school teachers who meet JCC's adjunct instructor qualifications. Courses are offered in high schools throughout Chautauqua, Cattaraugus, and Allegany counties, and some are available over the BOCES network as distance learning (DL) courses. JCC faculty oversee course development and ensure that a quality, college-level educational experience is provided. The program is accredited by the National Alliance of Concurrent Enrollment Partnerships (NACEP). For details, visit www.sunyjcc.edu/collegeconnections.

Early Admissions

JCC's Early Admissions Program is designed for qualified high school students who have completed 11th grade to begin taking college level courses full-time (minimum 12 credit hours) prior to graduating from high school and, with permission from his/her high school and parent or guardian, to have JCC courses fulfill graduation requirements. Normally students should rank in the top half of their class.

In some cases, students and their guidance counselor must meet to discuss plans for early admission and determine if college courses could be used to fulfill high school graduation requirements.

- A statement from the high school principal or counselor indicating that a high school diploma will be issued upon satisfactory completion of specified college courses is required.
- The student is responsible for requesting that an official transcript be sent to the high school guidance counselor upon the completion of courses. Transcripts are available at www.sunyjcc.edu/transcripts.
- A statement from the student's parent or guardian granting permission to enroll for full-time study at JCC must be submitted.

Special Circumstances

Individuals seeking admission who do not fit one of the above categories should contact the admissions director for assistance.

Admission Policy for Students Previously Dismissed from a College for Disciplinary Reasons

JCC will consider an application for admission from these students, but it reserves the right to admit or deny any application. After applying, students must submit a detailed summary of the violations, a personal statement, and a letter of recommendation; however, certain situations may require additional information. The application deadline is 35 days prior to the start of the semester.

College Placement Testing

Math and English placement at JCC is based on high school GPA and additional success indicators. This helps determine the courses in which the student is best prepared to begin.

Students without a GPA through the junior year of high school will need to take a computer-based reading and math placement test. If you need the math and/or English test or want to challenge your placement in English and/or math, you may schedule a placement test at any of our sites.

If you have a disability and require accommodated testing, contact the Coordinator of Accessibility Services. To register for a placement test and/or to see a list of exemptions, go to www.sunyjcc.edu/placementtesting

Application/Admission Policy: International Students

Any applicant who is not a U.S. citizen, or documented permanent resident (non-immigrant) of the United States and wishes to study at JCC must do so through an F-1 (student) visa and is considered an international student throughout his or her academic stay. International students wishing to complete an entire degree online should contact the JCC admissions office.

- Contact JCC's global learning coordinator or visit www.sunyjcc.edu to learn about the international student application process.
- Submit academic documents showing high school graduation and any college study beyond high school. Applicants from countries where English is not the primary language or the language of education must have documents translated into English before submitting them to the admissions office.
- Applicants from countries where English is not the primary language or the language of education must submit the results of an English language assessment. Acceptable assessments include Test of English as a Foreign Language (TOEFL), IELTS, TOEIC, Duolingo, and Cambridge.
- Scores from JCC's college placement test can be accepted from English speaking countries in lieu of the English language assessment. The placement test can be sent to students residing outside of the U.S. on a selective basis.
- Submit documented evidence of adequate financing to cover the cost of tuition, fees, books, room, board, and other living expenses for a full academic year. Note that federal and New York state financial aid is not available to international students.

Applicants for January admission (spring semester) must complete admission procedures by November 1. Applicants for August admission (fall semester) must complete admission procedures by June 1. Applicants should take special note of the length of time required to process admissions applications and credentials. Final evaluation will take place when all admissions credentials have been submitted. If admitted to a degree program, the applicant will be issued an I-20.

Nursing Program

Accreditation

JCC's associate degree nursing program has been awarded accreditation for achievement of quality and excellence in nursing education by the Accreditation Commission for Education in Nursing (ACEN), 3390 Peachtree Rd., NE, Suite 1400, Atlanta, GA 30326, phone: 404.975.5000; fax: 404.975.5020; or www.acenursing.org. The nursing program at Jamestown Community College is registered with the New York State Education Department, Division of Professional Education (SED), 89 Washington Avenue, 2nd floor, West Wing, Albany, NY 12234, (518) 486-2967. OPPROGS@nysed.gov.

Admission Requirements

The nursing program is designed for full- or part-time study and may be completed in a minimum of two academic years of full-time study. The four-semester sequence of nursing courses, which begins each fall semester, must be completed sequentially. Students who desire part-time study may complete the general degree requirements before seeking admission to the program.

In addition to application to the college, students must apply for acceptance into the nursing program through the admissions office. Enrollment into the nursing program is highly competitive. Therefore, application by February 1 is of primary importance.

Applications will continue to be reviewed after February 1 on a space available basis.

Criteria for admission are:

- High school and college transcripts from all institutions attended must be filed in the admissions office prior to February 1 of the year seeking admission.
- A GPA from JCC of at least 2.5 for current or previous college students.
- High school students or high school graduates who have no college experience must have earned a 85% or above in high school courses. If a high school student does not meet this requirement they may still complete general education courses required for the nursing program and obtain at least a 2.5 GPA. Prior to full-time enrollment at JCC, high school students are encouraged to consider enrollment in college course opportunities, i.e. College Connections.
- A passing grade in a high school or college chemistry course. A strong science-based high school curriculum is highly recommended for student success in the nursing program.
- Eligibility for placement in ENG 1510 without supports.
- Eligibility for placement in MAT 1500: Problem Solving with Mathematics.
- Completion of required Nursing Entrance Exam (TEAS Exam).
- A record of grades from credit bearing college courses must be established by applicants with a high school equivalency diploma (GED/TASC).
- Must be 18 years of age by June 1 of the intended graduation year to be eligible to take the NCLEX exam for licensure as a registered nurse.
- Students must complete Anatomy and Physiology I and II, and Microbiology/Microbiology Lab with a "C" grade or better to progress in the program.

Admission Rubric

An admission rubric will be applied to applicants based upon eligibility criteria, previous education, and TEAS score.

CRITERIA	DESCRIPTION	SCORE
PREVIOUS EDUCATION	Licensed Practical Nurse/Licensed Vocational Nurse	1
TEAS SCORE	Developmental	0
	Basic	1
	Proficient	3
	Advanced	6
	Exemplary	9

Meeting the criteria does not guarantee admission into the nursing program. A greater score on the admission rubric improves the applicant's chances of being selected. Violations of the "Academic Integrity" or "Student Conduct" policies in JCC's Constitution of the Student Body, or any violations of equivalent policies at other postsecondary institutions, shall also be considered as a factor in the admissions decision.

Technical Standards for Nursing (Cognitive, Physical, and Behavioral Criteria)

JCC provides the following technical standards with examples of learning activities to inform prospective and enrolled students of the skills required in completing their chosen profession's curriculum and in the provision of health care services. These technical standards reflect the performance abilities and characteristics that are necessary

to successfully complete the requirements of the nursing program. These standards are not a requirement of admission into the program. Individuals interested in applying for admission to the program should review these standards to develop a better understanding of the skills, abilities, and behavioral characteristics required to successfully complete the program.

Students admitted to the nursing program are expected to be able to complete curriculum requirements, which include physical, cognitive, and behavioral core competencies that are essential to the functions of the entry-level professional nurse. These core competencies are considered to be the minimum and essential skills necessary to protect the public. These abilities are encountered in unique combinations in the provision of safe and effective nursing care and can meet the criteria with or without reasonable accommodations. Students who are unsure if they can meet these criteria because of disability, or know they will need help in meeting them, must contact JCC's Accessibility Services Office to discuss the use of reasonable accommodations and/or auxiliary aids. The college will provide reasonable accommodations but is not required to substantially alter the requirements or nature of the program.

Progression in the program may be denied if a student is unable to demonstrate the technical standards.

Cognitive:

- Recall, collect, analyze, synthesize, and integrate information from a variety of sources.
 - Measure, calculate, reason, analyze, and synthesize data.
 - Problem solve and think critically in order to apply knowledge and skill.
 - Communicate verbally, and through reading and writing, with individuals from a variety of social, emotional, cultural, and intellectual backgrounds.
 - Relay information in oral, written, and electronic form effectively, accurately, reliably, and intelligibly to individuals and groups, using the English language.
- Examples of learning activities found in the nursing curriculum and related to industry standards:
- Process information thoroughly and quickly to prioritize and implement nursing care.
 - Sequence or cluster data to determine client needs.
 - Develop and implement a nursing plan of care for clients in acute, long-term, and community settings. Discriminate fine/subtle differences in medical word terminology.
 - Report verbally and in writing client data to members of the healthcare team.
 - Read and comprehend medical orders and client information found in the medical record.
 - Perform math computations for medication dosage calculations both with and without a calculator.

Physical, Motor:

- Move efficiently enough to meet the needs of patients in a timely fashion.
 - Coordinate fine and gross motor movements.
 - Coordinate hand/eye movements.
 - Maintain balance from any position.
 - Negotiate level surfaces, ramps, and stairs.
 - Function with both hands free for performing psychomotor tasks.
 - Maneuver in small areas.
 - Attend to cognitive and psychomotor tasks for up to 7-12 hours.
- Examples of learning activities found in the nursing curriculum and related to industry standards:
- Transfer patients/clients in and out of bed from stretchers and wheelchairs.
 - Turn and position patients.
 - Control a fall by slowly lowering client to the floor.
 - Perform cardiopulmonary resuscitation (CPR).
 - Lift or move (turn, position) clients or objects, pull or push objects, weighing up to 50 pounds.
 - Reach to shoulder or higher level to place or access equipment such as intravenous fluid bags, bend or squat to access equipment below bed level.
 - Carry equipment and supplies to the client bedside.
 - Manipulate small equipment and containers, such as syringes, vials, ampoules, and medication packages to administer medications without extraneous movement, contamination, or destruction.
 - Accurately place and maintain position of stethoscope for detecting sounds of bodily functions.
 - Record data with a pen or graphics and other flow sheets.
 - Operate a computer.
 - Dispose of needles in sharps container.
 - Complete assigned periods of clinical practice (7-12-hour shifts, days, evenings, or nights).

Sensory:

- Acquire information from demonstrations and experiences, including but not limited to information conveyed through online coursework, lecture, small group activities, demonstrations, and application experiences.
 - Collect information through observation, listening, touching, and smelling.
 - Use and interpret information from diagnostic maneuvers.
- Examples of learning activities found in the nursing curriculum and related to industry standards:
- Detect changes in skin color or condition (pale, ashen, grey, or bluish).
 - Detect a fire in the client care environment.
 - Draw up a prescribed quantity of medication into a syringe.
 - Observe clients in a room from a distance of 20 feet away.
 - Detect sounds related to bodily functions using a stethoscope.
 - Detect audible alarms generated by mechanical systems such as those that monitor bodily functions, fire alarms, call bells.
 - Observe and collect data from recording equipment and measurement devices used in client care.
 - Communicate with client and members of the healthcare team in person and over the phone in a variety of settings, including isolation and the operating room where health team members are wearing masks and there is background noise.
 - Detect foul odors of bodily fluids or spoiled foods.
 - Detect smoke from burning materials.

- Detect changes in skin temperature.
- Detect unsafe temperature levels in heat-producing devices used in client care.
- Detect anatomical abnormalities, such as subcutaneous crepitus, edema, or infiltrated intravenous fluids.
- Feel vibrations such as an arterial pulse.

Behavioral:

- Demonstrate emotional stability to function effectively under stress and adapt to changing environments.
- Maintain effective, mature, and sensitive relationships with others.
- Examine and modify one's own behavior when it interferes with others or the learning environment.
- Possess attributes that include compassion, empathy, altruism, integrity, honesty, responsibility, and tolerance.
- Establish a therapeutic relationship and communicate in a supportive manner.

Licensure

Graduates of the nursing program are eligible to apply for the National Council Licensing Examination for Registered Nurses (NCLEX-RN). At the time of submission of an application for licensure and first registration, the applicant is required to report a history of a felony or misdemeanor, or if such charges are pending. State boards of nursing will review the information submitted by the applicant and will determine if the applicant is eligible for licensure. A history of a felony or a misdemeanor may jeopardize the applicant's eligibility for licensure by state boards of nursing.

Persons intending to practice nursing in New York state should contact the New York State Board of Nursing, 89 Washington Ave., Albany, NY 12234-1000 or call 518.474.3817. Those intending to practice nursing in Pennsylvania should contact the Pennsylvania State Board of Nursing, PO Box 2649, Harrisburg, PA 17105-2649 or call 717.783.7142.

Criminal Background Check and Clearance

All health care agencies in Pennsylvania require criminal background checks on nursing students before beginning a clinical placement. All JCC nursing students will be assigned to clinical experiences in PA during some semester(s). Therefore, nursing students are required, at their own expense, to complete the required child abuse background check and a state or federal background check before beginning clinical placement. Inability to obtain a satisfactory clearance will prevent a student from being assigned to clinical experiences in PA, and as a result, the student will not be able to complete the clinical objectives for the course and will not be allowed to continue in the nursing program. (The college will not move a student from an agency that denies background clearance to another.) A criminal record may also jeopardize a graduate's ability to obtain registered nurse licensure.

Cardiopulmonary Resuscitation (CPR)

Prior to entrance into NUR 1510, students are required to present evidence of completion of a course in Basic Life Support (BLS) that includes infant, child, and adult CPR and Automated External Defibrillator (AED). The acceptable courses are CPR/AED for the Professional Rescuer (American Red Cross) or BLS for the Health Care Provider (American Red Cross). Students are strongly encouraged to take BLS during the summer prior to entering the nursing program. By taking BLS during the summer, the student will be compliant with the CPR requirement throughout the two-year nursing program. Courses may be available through the nursing program, JCC, and/or in the community.

Readmission Into Nursing Program Policy

A student seeking readmission may enter the nursing program according to the following criteria:

- Each student must apply for readmission to the nursing program through the admissions office at either the Jamestown or Cattaraugus County campus. If you wish to enter the nursing program in the fall semester, you need to apply by February 1, and for the spring semester, by October 1. Applications may continue to be accepted past the deadlines on a space available basis.
- Each student must be accepted into the college for the semester being readmitted. (Reapplication must be completed by any readmitted student who was not attending JCC the semester immediately prior to admission.)
- Students seeking readmission into the nursing program need to meet the same criteria as students entering the nursing program for the first time.
- Any readmitted student who withdrew two years ago or longer will be required to enter NUR 1510.
- A minimum grade of "C" is required in each nursing course. A student will be permitted to repeat one nursing core course (NUR 1510, NUR 1520, NUR 2510, and NUR 2520) one time. Should students be unsuccessful in repeating any nursing core course, they would be ineligible to continue in the nursing program. Students who are unsuccessful in more than one nursing core course and have already repeated one core course will not be eligible to repeat a second nursing core course. Withdrawal from a core nursing course after the first 30 calendar days will be considered a failure of the course for reapplication purposes. In case of illness or other extreme circumstances, the faculty may consider a one-time exception. The student wishing to be considered for a waiver to the withdrawal counting as a failure for reapplication purposes should obtain letters of support from two faculty members. The waiver with letters of support from two full-time faculty members should be submitted to the nursing program committee for consideration.
- Once the nursing sequence of courses has begun, the student must complete the program in three years. The faculty may consider exceptions to the three-year period. The student wishing to be considered for a waiver to the three-year period should obtain letters of support from two full-time nursing faculty members. The waiver, with letters of support, will be submitted to the nursing program committee for consideration.
- A student seeking readmission into the nursing program will be considered on the basis of space available and grade point average.

Occupational Therapy Assistant Program

The occupational therapy assistant program is designed for full and part-time study and may be completed in two academic years of full-time study. The four-semester sequence of OTA courses, which begins each fall semester, must be completed sequentially. The fourth semester (OTA 2700 and OTA 2720: Fieldwork II) must be completed within 12 months following successful completion of third semester OTA coursework. Fieldwork II assignments may have special housing and transportation requirements. Students who successfully complete JCC's occupational therapy assistant program receive an Associate in Applied Science degree. Coursework includes a series of general education courses with an emphasis on the biological and psychological sciences. Professional studies focus on how human occupational development is affected by illness and injury and how function in various life roles can be facilitated.

Occupational therapy helps people of all ages participate in the everyday activities that are meaningful and necessary to their health, well-being, and independence. Services support individuals, groups, and populations whose ability to function is affected by developmental differences, aging, injury or illness, psychosocial challenges, or environmental and social barriers. Occupational therapy practitioners work in a wide range of traditional and community-based settings, using client-centered, evidence-

based approaches to promote participation, adapt tasks and environments, improve daily function, and support health across the lifespan. In addition to intervention, occupational therapy practitioners play important roles in prevention, health promotion, education, and advocacy, helping to reduce barriers, promote access and inclusion, and support individuals and communities in achieving their highest level of participation and quality of life.

Upon completion of the program, students will be able to:

- Exhibit professional, desirable workplace behaviors which reflect occupational therapy standards of practice.
- Design and implement client-centered interventions for persons, groups and populations.
- Apply evidence-based practices to positively impact interventions and inform occupational therapy practice.
- Articulate the value of occupational therapy to society.
- Cultivate a professional growth mindset through reflective practice.

Note: Technical (OTA) and professional (OT) occupational therapy programs are two distinct paths of study leading to complementary, but different, practice roles. Any OTA student contemplating application to an OT program at another institution is subject to that institution's individual requirements and articulation policies. Transfer options are available at JCC.

Accreditation

JCC's occupational therapy assistant program is accredited by the Accreditation Council for Occupational Therapy Education (ACOTE) of the American Occupational Therapy Assn. (AOTA), 7501 Wisconsin Avenue, Suite 510E, Bethesda, MD, 20814. ACOTE can be reached through AOTA at 301.652. AOTA or by accessing www.acoteonline.org

Graduates of the program will be eligible to sit for the National Certification Examination for the Occupational Therapy Assistant, administered by the National Board for Certification in Occupational Therapy (NBCOT). After successful completion of this exam, the graduate will be a certified occupational therapy assistant (COTA). In addition, most states require licensure to practice; however, state licenses are usually based on the results of the NBCOT certification examination. A felony conviction may affect a graduate's ability to sit for the NBCOT certification examination or attain state licensure.

Admission Process

New full- and part-time students seeking admission must follow JCC application procedures and apply for acceptance into the OTA program. Steps for admission are:

- Students must first apply for general admission to JCC.
- Students must then complete the application for admission to the occupational therapy assistant program. A link to the application is available at www.sunyjcc.edu/ota.

In keeping with the requirements of the Americans with Disabilities Act, preadmission inquiries about medical or disabling conditions are prohibited.

For potential students to decide whether or not they may be able to participate fully in the program, students must review the Skill Sets Expected of Students in the OTA Program form available at <https://www.sunyjcc.edu/programs/occupational-therapy-assistant-aas/responsibilities>. Students should examine these criteria carefully before applying to the program. Reasonable accommodations, including the use of auxiliary aids, will be made for students with documented functional limitations through JCC's accessibility services office.

Admission Requirements

The Occupational Therapy Assistant (OTA) program at Jamestown Community College is a selective admissions program with additional application and eligibility requirements. Meeting minimum criteria does not guarantee admission.

Applicants must demonstrate academic readiness through college coursework or high school academic performance.

The minimum criteria for admission into the OTA program includes:

- Eligibility for placement into ENG 1510 without supports
- Eligibility for placement into MAT 1500
- Completion of a HS or college biology, chemistry or physics course, with a C or better
- Academic Readiness through either their college work or high school record*:
 - Applicants with **15 or more completed college credits** (letter-graded):
 1. Must have a minimum cumulative college GPA of 2.5 from all colleges attended.
 - Applicants with fewer than **15 completed college credits**:
 1. Must have a high school average of at least 85%, or
 2. A high school GPA of at least 2.5 on a 4.0 scale (if reported in GPA format).
- Essay:
 - Review WhyChooseOT.com to gain insight into the profession of OT.
 - Submit a personal statement explaining why you want to be an OTA – using the guidelines outlined at WhyChooseOT.com.

***Additional Review:** Applicants who have completed some college coursework but fewer than 15 credits may have their academic record reviewed on a case-by-case basis, and college GPA may be considered as part of the admissions evaluation. High school equivalency (GED/TASC) recipients will be reviewed on a case-by-case basis.

NOTE: Students in the top 20% of their high school graduating class within the last 2 years and who meet the minimum requirements will receive automatic acceptance into the program, if application is received by the deadline (February 15).

After acceptance to Jamestown Community College (JCC), students must provide proof of two MMR immunizations and meningitis vaccination within the past five years (or sign a declination); prior to attending OTA clinicals (currently expected in the third semester), students should be prepared to submit documentation of a two-step TB test provided by JCC or a QuantiFERON test within the past 12 months from their own provider, varicella immunity (two vaccines, a positive titer, or documented history of chickenpox), the three-dose hepatitis B series or a signed declination, TDAP vaccination within the past 10 years, and a physical exam completed by a designated JCC provider.

Readmission to the OTA Program

A student seeking readmission may enter the OTA program according to the following criteria:

- Each student must apply for readmission. Admission criteria must be fulfilled.

- Any readmitted student who has withdrawn from the program for a period greater than one year will be given credit for OTA 1520 and OTA 1540, providing a grade of “C” or higher was obtained in OTA 1510, OTA 1520, and OTA 1530. The student is required to complete all other OTA courses in sequence.
- A student will be permitted to repeat each OTA course one time. If any students are unsuccessful in repeating any OTA course, they are ineligible to continue in the OTA program.
- A student seeking readmission to the OTA program is considered on a space available basis and GPA of at least 2.5.

CHAUTAUQUA COUNTY SHERIFF’S ACADEMY: BASIC COURSE FOR POLICE OFFICERS - Partnering with Workforce Development

Admission Policy

The Chautauqua County Sheriff’s Academy—operated in partnership with Jamestown Community College since 1978—is for students interested in becoming a local police officer or county deputy in New York State. Acceptance into the academy is conducted on a competitive selection process which is contingent on the review of a candidate’s comprehensive medical examination, psychological evaluation, intensive background investigation (felony convictions will bar admittance; misdemeanor convictions may bar admittance), law enforcement agency appointment/sponsorship, oral board interview, physical agility screening, military records, if applicable, civil service list standing, second language skills, and training zone residency. **Note: Some of these components are not required but will give the candidate additional points toward acceptance.**

Matriculated students who are enrolled in the Law Enforcement Academy are eligible to apply for Credit for Prior Learning (CPL) credits that can be applied toward an A.A.S. Individual Studies, a certificate in individual studies, or a certificate in law enforcement technology by completing a sequence of courses listed in the Program Requirements section.

All candidates must be a minimum 20 years of age and meet New York State statutes as required by the Municipal Training Council for state certification of police officers. Details on the program can be obtained by contacting the academy located in the Carnahan Building on the Jamestown Campus. For more information, call: (716) 338-1021 or visit: www.sunyjcc.edu/sheriffssacademy.

Corrections Academy

Admission Policy

The Corrections Academy is an in-service training program offered through the Chautauqua County Sheriff’s Department for individuals who have been hired by a local or county correctional agency. Admission is limited to candidates who have received a conditional or official offer of employment from a sponsoring agency prior to Academy enrollment. Applicants must complete all required application materials as directed by the hiring agency and the Academy.

Students who complete the Corrections Academy and required college coursework may be eligible to earn an A.A.S. in Individual Studies, a Certificate in Individual Studies, or a Certificate in Corrections Officer Technology, as outlined in the Program Requirements section. Previous college coursework may be applied in accordance with college policy.

Questions about the degree program should be directed to JCC’s criminal justice director. Visit <https://www.sunyjcc.edu/programs/corrections-officer-technology-certificate> for further information.

FINANCIAL PLANNING

The cost of a college education is one of the major financial concerns of the American family. While few people doubt the ultimate value of this investment, many students seeking higher education find it difficult to meet their educational expenses within a concentrated period of time.

College costs are not limited to tuition alone, and students attending JCC may participate in a full range of federal, state, and institutional grants, scholarships, loans, and work-study programs. Students must be accepted and matriculated by the JCC admissions office and meet academic requirements to receive awarded funds.

Eligibility criteria and application deadlines vary for individual sources of financial aid. Details are available at <https://www.sunyjcc.edu/admissions/financial-aid>. Students can contact the financial aid and billing office in person or by telephone for general questions and assistance, in addition to scheduling personal appointments for special circumstances.

Applying for Financial Aid

Students initiate the application process for all financial aid programs by filing the Free Application for Federal Student Aid (FAFSA) at <https://studentaid.gov/>. The FAFSA application should be filed after October 1 of each year for the following academic year. Due to limited funds for some programs, students who apply for aid by January 1 will receive priority consideration for federal campus-based and institutional aid programs. Late applicants are eligible for federal Pell grants, loans, and some state and miscellaneous scholarship programs.

After filing the FAFSA, New York state resident students should complete online applications for state grants and scholarships from hesc.ny.gov. New York state residents anticipating part-time status should download the Aid for Part-time Study (APTS) application from the financial aid web page and submit it to the college prior to the start of each semester.

Students interested in institutional scholarships and grants should complete the JCC general scholarship application and/or the individual scholarship applications at sunyjcc.edu/financialaid.

Awarding and Disbursement of Aid

Federal and state grants and institutional scholarships are awarded on an annual basis and are disbursed to the student’s account each semester when the student’s financial aid file is complete, the eligibility verification process is finalized, and attendance is confirmed. Student loans are issued in at least two disbursements to JCC’s financial aid and billing office and are available to eligible students within the first two weeks of classes each semester. Federal regulations require the exception that first time freshman borrowers wait until 30 days after the first day of classes to receive their first loan disbursement.

Credit for aid that registered students are approved to receive is temporarily applied to their student accounts approximately six weeks before classes begin. After attendance in class is confirmed, aid funds are forwarded to the college on the student’s behalf and applied to his account. The JCC financial aid and billing office issues refunds for excess aid by either direct deposit for those enrolled with Student Choice Refunds. Students not enrolled will receive a paper check via U.S. mail within 14 days of receipt of funds

Grants

The **Federal Pell Grant** is available to undergraduate students who demonstrate financial need, according to federal formulas.

The **Federal Supplemental Educational Opportunity Grant (FSEOG)** is for students of academic promise in great financial need, according to federal formulas, and who are Pell grant recipients.

The **Tuition Assistance Program (TAP)** is available to New York state resident students who enroll full-time (12 hours or more) and demonstrate financial need, according to New York state formulas. Students who were first-time freshmen in the 2006-07 academic year or thereafter, have earned 12 credits or more in each of the two prior consecutive semesters, and have maintained a minimum of a "C" average may be eligible for a reduced Part-time TAP award if enrolled in 6-11 credit hours.

Aid for Part-Time Study (APTS) is for New York state resident students who enroll part-time (less than 11 credit hours) and demonstrate financial need, according to state formulas. Applications are available in the financial aid and billing office and at sunyjcc.edu/financialaid.

The **Pre-college Enrollment Program (PEP)** at Jamestown Community College is open to all high school students, including homeschooled students. You can enroll in up to 11 credit hours at either the Jamestown or Cattaraugus County Campus locations, or online.

- PEP students get a head start on their college education while in high school with all the benefits of a full-time college student. As a PEP student, you:
 - Have the option to participate in extracurricular and academic activities.
 - Can use facilities on campus, including the gym and library.
 - Have the ability to join groups and clubs to integrate with college life.
 - Have the option to attend special events hosted by JCC.
 - The PEP grant offers students up to \$700* off their tuition each semester. This means you can apply for the grant each semester for another discount on your tuition.

Veterans' Educational Assistance programs are available to part and full-time students who are eligible armed forces veterans honorably discharged according to Veterans Administration guidelines. The application process should be initiated at www.gibill.va.gov.

Students with disabilities may be eligible for assistance through the New York State Adult Career and Continuing Education Services Vocational Rehabilitation (ACCES-VR) program. Learn more about the program at www.acces.nysed.gov/vr/.

State Aid to Native Americans is available to members of native American families located on reservations within New York state. Applications can be obtained by contacting the higher education representative on one's reservation.

The **Educational Advancement for Regional Neighbors (EARN)** grant at Jamestown Community College is open to all high school students, including homeschooled students. You can enroll in up to 11 credit hours on campus or online. EARN students get a head start on their college education while in high school. As an EARN student, you have the option to participate in extracurricular and academic activities, join groups and clubs to integrate with college life, attend special events hosted by JCC, and have access to campus facilities like the gym and library. The EARN grant offers students half the cost of tuition, up to a maximum of \$700, each semester. This means you can apply for the grant each semester for another discount on your tuition.

Loans

Students interested in federal loans start the application by filing the annual Free Application for Federal Student Aid (FAFSA).

Federal subsidized and unsubsidized Direct Loans are available to students enrolled in a minimum of six credit hours and who are in good academic standing.

Federal Direct PLUS Loans are available to the parents of part and full-time students whose financial expenses cannot be met by other funding sources.

Limited short-term emergency loans are designed for part and full-time students who have filed for financial aid and can demonstrate proof of aid eligibility beyond tuition and fees expenses. Students must have valid emergency needs which cannot be met by any other source.

Scholarships

The **JCC Unified Student Assistance (USA) Scholarship** for top students in JCC's service area is the best known of the college's institutional scholarships.

The **New York State Excelsior Scholarship** for full-time study pays for qualifying students' resident tuition not met by other federal, state or institutional grants and scholarships.

Application processes and renewal criteria for these and over 70 other scholarships can be viewed at www.sunyjcc.edu/financialaid.

Self-Help (Employment Opportunities)

The student assistant program is an on-campus employment program for matriculated students enrolled in at least six credit hours who have requested consideration for the program and meet the work schedule requirements.

The **Federal Work Study (FWS)** program is available to matriculated students enrolled in at least six credit hours who have been offered eligibility due to financial need according to a federal formula. Students who have submitted a FAFSA will be contacted if they are eligible to participate in this employment program.

Effect of Withdrawal from College on Federal Student Aid

Students who withdraw from all classes prior to the end of the semester may not be entitled to 100% of the aid they have been awarded. Financial aid is granted on the premise that the student will be enrolled for the entire semester. Students who withdraw from the college may be required to repay a proportionate amount of their federal financial aid. The amount students may be required to repay is based on the time in the semester that they withdraw. Earlier withdrawals will result in larger repayments than those filed later in the semester. Federal regulations require that students who receive Title IV funds (Pell or SEOG grants or student loans) must complete 60% of the semester or session in order to maintain eligibility for their entire grant or loan for that period. Repayment of unearned Title IV funds must be made to the federal programs in the following order: Unsubsidized Federal Direct Loans, Subsidized Federal Direct Loans, Federal Direct PLUS Loans received on behalf of the student, Federal Pell Grant, Federal SEOG Program Aid.

Students are encouraged to consult with the financial aid and billing office if they intend to stop attending classes. Instructions for withdrawal are described under the Academic Information section. Failure to complete the withdrawal process may delay refund of tuition due, pursuant to Section 5002 of the Education Law.

Maintaining Eligibility for Financial Aid

Students receiving federal and/or state financial aid must meet certain academic standards to maintain eligibility to receive aid. These standards are outlined briefly in the charts below. A detailed explanation of these standards is available at www.sunyjcc.edu/financialaid. Students with questions concerning academic eligibility to receive financial aid are encouraged to contact the financial aid and billing office.

Federal and state satisfactory academic progress standards are subject to change based on any new regulations issued by government agencies. Please read "Satisfactory Academic Progress" in the Academic Information section for details on interpreting the charts.

Chart A: Satisfactory Academic Progress for Federal Financial Aid (Pell, FSEOG, FWS, and Direct Loans)															
After attempting this many credits (college level and imputed)	6	12	18	24	30	36	42	48	54	60	66	72	78	84	90
a student must have passed this many credit hours	3	6	9	13	17	21	25	30	35	40	45	50	55	60	65
Chart B: Satisfactory Academic Progress for New York State Aid (based on full-time enrollment) Effective 2011-12 for students enrolled in a *remedial program or all other students who received their first TAP award prior to 2010-11.															
before receiving this TAP payment	1st		2nd		3rd		4th		5th		6th				
a student must have earned at least this many college level credits (does not include imputed credits)	0		3		9		18		30		45				
with at least this cumulative grade point average (GPA) (based on college level credits; does not include imputed credits)	0		.5		.75		1.3		2.0		2.0				
Chart D: Satisfactory Academic Progress for New York State Aid (based on full-time enrollment) Effective 2011-12 for *non-remedial students who received their first TAP award 2010-2011 or later.															
before receiving this TAP payment	1st		2nd		3rd		4th		5th		6th				
a student must have earned at least this many college level credits (does not include imputed credits)	0		6		15		27		39		51				
with at least this cumulative grade point average (GPA) (based on college level credits; does not include imputed credits)	0		1.3		1.5		1.8		2.0		2.0				

Tuition and Fees Payment Policy

Student bills for tuition and fees should be paid no later than the due dates published each semester in the master schedule. Students are expected to pay their bills in full, or make alternate arrangements as follows, according to semester due dates.

Student bills may be paid by debit/credit (MasterCard/Visa/ Discover) card in Banner. The college financial aid and billing office only accepts check payments and money orders. JCC also offers an online payment option for student tuition and fees through Nelnet Business Solutions which allows payment in full or in installments with authorized ACH transactions from a bank account, debit card, and most major credit cards. Contact the JCC financial aid and billing office for additional information regarding the online payment process. <https://mycollegepaymentplan.com/suny-jamestown-community-college-copy/>

Students whose bills will be paid by third party agencies or employers must submit payment or written confirmation from the agency/employer to the college financial aid and billing office by the semester due date.

Students expecting grants, loans, or scholarships to pay their bills must apply for those funds. Upon completion of the financial aid disbursement process by the college, eligible students will have their aid credited to their student bills. Students who have not completed the financial aid process as of the semester due date are expected to review their student bill and accept financial responsibility. Students expecting financial aid assume the responsibility for payment of their accounts in the event they do not receive sufficient aid to pay the entire amount of their bills.

Students with delinquent accounts may be denied the privilege of registering for additional credit and non-credit courses. Also, students who do not make satisfactory payment arrangements will be subject to collection efforts that may include the use of a collection agency.

JCC reserves the right to charge the student for any agency or attorney fees necessary for the collection of any amount not paid in accordance with the college's payment procedures.

VA Pending Payment Compliance

In accordance with Title 38 US Code 3679 subsection (e), this school adopts the following additional provisions for any students using U.S. Department of Veterans Affairs (VA) Post 9/11 G.I. Bill® (Ch. 33) or Vocational Rehabilitation and Employment (Ch. 31) benefits, while payment to the institution is pending from the VA. Jamestown Community College will not:

- Prevent nor delay the student's enrollment.
- Assess a late penalty fee to the student.
- Require the student to secure alternative or additional funding.
- Deny the student access to any resources available to other students who have satisfied their tuition and fee bills to the institution, including but not limited to access to classes, libraries, or other institutional facilities.

However, to qualify for this provision, such students may be required to:

- Produce the Certificate of Eligibility by the first day of class.
- Provide written request to be certified.
- Provide additional information needed to properly certify the enrollment as described in other institutional policies.

Tuition and Fees Refund Policy

Reduction of student tuition and fee charges for class registration and refunds of payments are determined by the date official withdrawal forms are **completed by the student** and received by Records & Registration.

Fall and Spring Semesters

Students withdrawing from college or who reduce their credit load to part-time status are entitled to a reduction of tuition and fee charges and refund of payment as outlined for the fall and spring semester 15-week class schedule. Charges for courses with alternate schedules in the fall and spring sessions will be pro-rated accordingly. Students who withdraw from any or all classes shall be liable for payment of tuition and are eligible for refunds according to the following schedule:

	TUITION LIABILITY	REDUCTION OF TUITION CHARGES
prior to first day of instruction	0%	100%
1st week of instruction*	25%	75%
2nd week of instruction	50%	50%
3rd week of instruction	75%	25%
4th week of instruction and later	100%	0%

**Students participating in drop/add procedures during the first week of classes are not assessed charges for dropped classes required for course scheduling changes.*

Summer Sessions

Students withdrawing from summer courses are entitled to a reduction of tuition and fee charges and refund of payment as outlined for the six-week class schedule. Charges for courses with alternate schedules in the summer will be pro-rated accordingly.

	TUITION LIABILITY	REDUCTION OF TUITION CHARGES
prior to first day of instruction	0%	100%
during the 1st week of instruction*	75%	25%
during the 2nd week of instruction	100%	0%
during the 3rd week of instruction	100%	0%
after 3rd week of instruction	100%	0%

**Students participating in drop/add procedures during the first two days of the summer sessions are not assessed charges for dropped classes required for course scheduling changes.*

Examples of how refunds are calculated are available upon request from the business office.

For all instructional periods, amounts reduced for students who received Title IV assistance for the period of enrollment will be returned and allocated in the following order to:

1. Federal Direct Loans (unsubsidized, subsidized)
2. Federal Direct PLUS Loans
3. Federal PELL Grants
4. Federal SEOG Program Aid
5. Required refunds of other federal, state, private, or institutional assistance
6. The student

Students may be responsible for unpaid charges after refunds have been returned to the financial aid award programs.

Students receiving federal Title IV assistance and state aid may have their awards reduced if they withdraw from JCC or stop attending classes prior to the scheduled end of any semester. As a result, JCC will return funds to the appropriate programs as listed above, and students may be responsible for repayment of some or all of their awards. Students are advised to file their course withdrawals promptly and to consult with the financial aid and business offices if they intend to stop attending classes. Explanation and examples of refund calculations for all semesters are available upon request from the business office.

Exceptions to the college's refund policy are considered under extenuating circumstances. Students may appeal a refund calculation by completing the online appeal form for further reduction of tuition and fees.

Certificate of Residence

For tuition purposes, New York residency means that the student has lived in the state as a permanent resident for the immediate 12 months prior to the start of a semester. Students who have not lived in New York state for 12 consecutive months are assessed non-resident status.

The residence for the period of time students have served active military duty is deemed to be their permanent address prior to enlistment. Those students currently serving active military duty and attending classes are considered New York state residents.

New York State Education Law 6305 requires JCC to have a current certificate of residence on record for each student account every academic year. Students who have lived in New York for at least one year are required to submit certificate of residence documentation at the following times:

Students can complete their certificate of residence no more than 60 days prior to registering for the semester you are utilizing the certificate and must be completed 30 days after the start of classes. All students are required to complete the certification process as follows:

- If you are a resident of New York and have resided in Chautauqua or Cattaraugus County for one year, no certificate of residence is required. View your bill to verify that it reflects the correct tuition rate.
- Students living in other counties in New York state must complete their specific counties affidavit and present it with proof of residency to their county treasurer's office. The county treasurer will issue a fully completed certificate of residence which should be forwarded to the JCC financial aid and billing office or cor@mail.sunyjcc.edu.

Faculty Student Association Fees

All students attending classes pay a Faculty Student Association fee. The fee amount is based on the total number of credit hours for which each part-time student is registered. The fee is a flat amount if the student is enrolled in twelve or more credit hours (full-time). These fees are used to finance a variety of non-academic activities and services, including cultural events; intercollegiate sports; speakers; noontime programs; exhibitions; access to the Total Fitness program on the Jamestown Campus and the Olean YMCA-JCC facilities through the Cattaraugus County Campus; music and theatre programs; recreation and intramural programs; and student club and student government activities. The funds are administered by an employee and student board of directors.

A student identification card is issued to each on-campus student and entitles the holder to free or reduced admission to all sports, cultural, and entertainment events supported by FSA fees.

COLLEGE FEE SCHEDULE

Tuition and fees are established annually. The figures below may be helpful in planning tuition and fee expenses.

Since tuition and fees may change, students should consult sunyjcc.edu for updated information.

TUITION (effective 2026-2027 academic year - SUBJECT TO CHANGE)	
Full-time students (12 or more credit hours)	
New York state resident with valid certificate of residence*	\$2,990 per semester
New York state resident without valid certificate of residence*	\$5,980 per semester
Out-of-state resident	\$5,980 per semester
Part-time students (1-11 hours)	
New York state resident*	\$249 per credit hour
New York state resident without valid certificate of residence*	\$498 per semester
Out-of-state resident	\$498 per credit hour
Residence Hall Suites	
Single room & meal plan	\$4,660-\$5,630 per semester
Double room & meal plan	\$4,260-\$5,230 per semester
Housing application fee	\$150

The following fees are mandatory and are not refundable after drop/add period:

Student Activities Fee	
Faculty Student Association (FSA) Fee	\$15.75 per credit hour \$238/semester flat rate for full-time students, 12 credit hours or more
Course Fees	
Health Services Fee	\$5.25 per credit hour
Technology Fee	\$19.25 per credit hour
Laboratory/Studio Fees (specified courses)	varies \$15-350
JCC Book Bundle (all students but NUR/OTA)	\$24.75 per credit hour
College Fees	
College Processing Fee (one-time fee payable upon admission to JCC)	\$85
Official Transcript Fee	refer to website for current rate
Late Payment Fee	\$75
Placement Test Retesting Fee	\$10
Returned Check Fee	\$30 per check
Special Fees	
Additional degree/certification	\$20
Life Experience assessment	
portfolio review fee	\$50

Annual College Expenses

To aid in planning for direct college expenses for full-time students, the following outline of annual estimated costs is presented.

New York state resident tuition and fees	\$7,000
Books and supplies	1,100
	\$8,100**

** Students may also incur additional costs for transportation, living expenses, and personal needs. Estimated student budgets used for financial aid eligibility are established annually and are available from the financial aid and billing office or online at sunyjcc.edu/financialaid.

STUDENT SERVICES

These programs and services are an integral part of the total educational experience:

Academic Advisement

The basic purpose of academic advisement is to provide sound and accurate academic information that will further a student's academic plan each semester. This is accomplished by assigning all full-time students an advisor in their academic area who will assist them with career planning, course selection, transfer college decision-making, and life goal setting. Part-time students are encouraged, but not required, to seek academic advisement.

Full- and part-time students meet periodically with advisors to review life and career goals, to assess movement toward these goals, and to discuss alternatives that will support goal acquisition.

It is ultimately the student's responsibility to learn and know the graduation and program requirements for the degree being sought and to monitor progress toward fulfilling those requirements.

More details on academic advisement can be obtained through the Success Center or at www.sunyjcc.edu/advising.

Learning Commons

The Learning Commons on the Jamestown and Cattaraugus campuses are academic spaces shared by accessibility services, learning centers, online learning and the library. Located on 1st floor of the Hultquist Building in Jamestown and 1st floor of the Library and Liberal Arts Center in Cattaraugus, the spaces are enhanced with technologies to support learning in a collaborative atmosphere, along with faculty and staff members who provide academic assistance.

Online Learning

Online Learning assists students with Brightspace and course-required technologies and tools. Online Learning provides students with general advice for successful online learning, such as the amount of time to set aside each week for an online course and the importance of time management and independent study skills. In addition, Online Learning will provide referrals to JCC support offices that work to meet the unique needs of online learners.

Accessibility Services

JCC is dedicated to assisting qualified students with disabilities in earning grades that reflect their abilities and not their disabilities. The accessibility services offices are located in the college's Learning Commons. Students should contact the accessibility services coordinator to inquire about and/or arrange accommodations.

Policy Statement for Students with Disabilities

Section 504 of the Rehabilitation Act of 1973 and the Americans with Disabilities Act of 1990 state that qualified students with disabilities have the right to reasonable modifications in all on- and off-campus academic programs and services, as well as in student services in order to make a college education truly accessible. The philosophy of JCC is to do its utmost to maximize the educational opportunities of all its students. Thus, our policy regarding students with disabilities is a manifestation of our general approach to all students. We believe in treating students as individuals and in doing our best to meet individual needs.

To plan for necessary modifications and support services, students must contact the coordinator of accessibility services and provide documentation that verifies the existence of a disability and supports the need for accommodation. The accessibility services office can best meet the needs of students if requests for accommodations are made as soon as possible after the credit course schedule is published each semester. For those students who have a disability requiring services and/or equipment from outside the college, such as course materials in alternate media or sign language interpreters three months' advance notice is strongly urged. All disability-related information will be treated confidentially.

Programs, or portions of programs with separate admissions policies (e.g. field placements), may have additional performance criteria for students to review prior to application. The nursing program's Technical Standards for Nursing is published elsewhere in the catalog and at www.sunyjcc.edu. Skill sets expected of students in the OTA program can be found on the college website. Both programs require medical exams prior to field placement.

Both the Chautauqua County Sheriff's Law Enforcement and Corrections Academies require medical examinations, agility/ fitness exams, and psychological profiling prior to acceptance. Full admissions criteria for both academies are published elsewhere in the catalog.

When a student requests a modification which is beyond the scope of authority of the accessibility services coordinator to decide, the request will be decided upon by a committee appointed by the vice president of either academic affairs or student experience. The procedure for filing such requests is available in the accessibility services office, through either the vice president of academic affairs or student experience, and on JCC's website.

Learning Centers

JCC Learning Centers offer complimentary academic assistance to students. In addition to help with many academic courses, students can receive personalized assistance with study skills, attend scheduled workshops, or access academic resources. Students seeking help can receive one-to-one tutoring from trained peer tutors. Tutors help students clarify course concepts, prepare for exams, brainstorm ideas, and improve writing assignments. Faculty assess student needs to help them improve their study skills, academic habits, and overall student performance. Services can be accessed in person on the Jamestown and Cattaraugus campuses and are available virtually to all JCC students. For more information, visit our website at www.sunyjcc.edu/learningcenter

Library Services

The Hultquist Library on the Jamestown Campus and the Cattaraugus County Campus Library are dedicated to supporting the mission of JCC as a student-centered institution which embraces academic excellence and meets the evolving learning needs of the college and the greater community. As a central hub of academic life, the libraries provide facilities to support students' academic needs including computer workstations, printers, group study rooms, and quiet work spaces. In addition, the libraries' leisure seating areas are a place for quiet conversation and relaxation.

JCC's libraries share a commitment to "acquire, produce, organize, and provide access to a collection of materials which reflect the needs of the college." The libraries' collections include over 90 databases containing more than 60,000 full-text periodicals (journals, magazines, and newspapers), as well as thousands of eBooks, multimedia content, and statistical resources. The libraries also maintain a small, but robust, collection of academically focused print books and periodicals to further support users' information needs. Interlibrary loan services broaden the available resources by facilitating the borrowing of materials from other libraries, worldwide.

Reference librarians provide research assistance and support through a variety of means including, course-level instruction sessions, drop-in assistance, individual research appointments, and chat, email, and phone reference. LibGuides (<https://www.sunycc.edu/library>) provide additional support with custom created subject, course, and assignment-level research guides. All library staff are available to provide technical assistance with the libraries' computers, printers, and other technology.

To learn more about the JCC Libraries, visit your campus library in person, online at <https://www.sunycc.edu/support/learning-commons/library> or call 716.338.1008 for the Jamestown Campus, and 716.376.7517 for the Cattaraugus County Campus.

Success Centers

The Success Center on the Cattaraugus County and Jamestown campuses provide JCC students with a variety of counseling services. Particular emphasis is placed on issues related to student growth and development and educational, transfer, and career decision-making and planning. Personal counseling services are designed to support and assist students with issues impeding their academic success. Services include crisis intervention, brief solution-oriented counseling, and referrals to other agencies, services, or professionals as needed.

The centers have extensive information available to those who seek a greater awareness of career and educational opportunities. Career assessment and transfer information is available at sunycc.edu/successcenter. Those interested in learning more about themselves may also take a variety of tests, including personality and vocational interest inventories.

The centers are also responsible for overseeing the Life Experience Credit Assessment Program. Students interested in life experience credit can get details through the Success Center on both campuses.

Community residents are encouraged to use the centers' career and educational counseling and information services.

Career Services

Career Services offices are located on JCC's Cattaraugus County and Jamestown campuses to help students explore and prepare for careers.

Career preparation services include developing a job search strategy; writing resumes and cover letters; creating LinkedIn profiles; preparing for interviews, obtaining information about job opportunities, and more. Career Services staff also coordinate career fairs, on-campus recruiting, and other events to facilitate connections and networking opportunities among employers, students, and alumni. All JCC students and alumni receive accounts in JCC's exclusive job and internship database, where individuals can find local and national part-time, full-time, and seasonal jobs and internships, as well as on-campus student employment opportunities. Career development resources, podcasts, and event calendars are also available within the database.

The Career Services offices also facilitate applied learning experiences including local, national and international internships; job shadowing experiences, and workplace tours.

Internships allow students to apply learning from previous coursework in real world settings while pursuing learning objectives through both work and reflection.

Students who have completed at least 12 college-level credits with a GPA of 2.0 or better are eligible to apply for credit-bearing internships. Some internships have additional requirements. While some certificate and degree programs require internships, students in other programs may opt to complete an internship to gain valuable work experience or explore career options. A student must fulfill 45 hours of work for each credit awarded.

Each internship is based on learning objectives defined within a learning contract created jointly by the student, a faculty supervisor, and a host business or agency representative. Internships with nonprofit organizations are often described as service learning and are most often unpaid. Placements with for-profit organizations may be paid or unpaid.

Students should select applied learning experiences based on their transfer and career plans and discussion with their JCC academic advisors. Students who wish to arrange an applied learning experience should speak to a faculty member of a member of JCC's Career Services staff.

For additional information, visit www.sunycc.edu/careerservices.

Health Centers

JCC's [Health Centers](#) provide a variety of services to support the health and well-being of students and employees. A Registered Nurse and trained health staff offer confidential counseling, clinical assessments, and wellness guidance. They can evaluate minor health concerns, suggest treatment options, and, when needed, refer individuals to primary care providers, urgent care, or other community resources.

The Health Centers also share educational materials on many health topics and assist with immunization requirements, medication information, and medical referrals. Clinical services include first aid, blood pressure screenings, and tuberculosis skin testing for nursing and OTA students.

Wellness services include flu vaccination clinics, smoking cessation programs, and cholesterol, weight, and stress management support. Over-the-counter medications such as acetaminophen, ibuprofen, antibiotic ointment, and antacids are available, along with dressing changes and wound checks. Staff also help with minor injuries like sprains, strains, and muscle concerns.

Additional services include illness assessments, general health and wellness counseling, emergency contraception, reproductive health supplies, medication abortion information and referrals, and guidance on next steps for care when needed.

The Health Centers are located in the Hamilton Collegiate Center (COCE) on the Jamestown Campus and in the College Center (COLL) on the Cattaraugus County Campus.

Immunization Requirements

Two New York State public health laws apply to full-time JCC college students who are enrolled in six or more credits and attend any classes on campus.

The first law requires students to show proof of immunity to measles, mumps, and rubella (MMR). Specifically, students born on or after January 1, 1957, are required to provide proof of immunity, which can be demonstrated through two MMR vaccines or a laboratory report showing antibodies against the diseases. The first MMR vaccination must have been given on or after the student's first birthday.

The second law requires each student to certify that they have received immunization against meningococcal meningitis or that they have received and reviewed the information provided by JCC, understand the risks of meningococcal meningitis and the benefits of immunization, and have decided not to obtain the meningococcal vaccine. Please note that the meningitis vaccine is not required.

High schools do not automatically send immunization records to JCC. Students are responsible for submitting their own documentation. Failure to meet these requirements will result in a \$25 fine and possible disenrollment from classes.

Student Information

Student Records and Registration

Students enrolling in credit courses have secure internet access to their individual student records at banner.sunyjcc.edu. JCC's self-service Banner student information system provides online access for grades and transcripts, placement test scores, enrollment verification, registration, financial aid, student accounts, and personal records. In addition, students can track their program completion progress in DegreeWorks and access their JCC email account.

Currently, the items accessible by students includes: general student information (view/change address and phone number, e-mail address, directory profile, PIN, etc.); holds (library, immunization, academic, financial, FSA, accounts receivable); six-week grades and final grades; unofficial academic transcript; registration status and add/drop courses; online registration; degree evaluation and "what if" analysis ("What if I changed my major?"); student tuition and fees account; enrollment certifications via a link to the National Student Clearinghouse; and placement test scores.

Release of Student Information

JCC complies with the **Family Educational Rights and Privacy Act (FERPA)** by maintaining the confidentiality of all student educational records. JCC accords all the rights under the law, regardless of age, to individuals who are in attendance at the college and have educational records. No one outside the institution shall have access to, nor will the institution disclose any information from a student's educational record without the consent of the student.

Within JCC, only those members acting in the student's educational interest are allowed access to student educational records. These members include administrative personnel and faculty, within the limits of their need to know.

Additionally, FERPA does permit the release of directory type information without the written consent of students. JCC reserves the right to disclose, at its discretion, the following information: names, permanent address, e-mail address, enrollment status, dates of attendance, class, previous institution(s) attended, major field of study, awards, honors, degree(s) conferred (including dates), past and present participation in college activities, athlete height/weight, and photos. Students who wish the college to withhold such information must notify the registrar, in writing, prior to the start of each semester. Note: JCC considers students' name and whether they are enrolled at the college as public information, essential to its operation. This, therefore, may be disclosed without restriction.

A copy of the FERPA document is on file at Records & Registration and is available for review by students. Students who believe their privacy rights have been violated may file a complaint concerning alleged failure of the college to comply with the requirements of FERPA by contacting the Family Policy Compliance Office, U.S. Department of Education, 400 Maryland Ave., SW, Washington, DC 20202-5920.

Review of Student Records

FERPA provides students with the right to inspect and review information contained in their educational records; to challenge the contents of their educational records; to have a hearing if the outcome of the challenge is unsatisfactory; and to submit explanatory statements for inclusion in their files. Students wishing to review their educational records must make a written request to the appropriate dean listing the item or items of interest and following the process as outlined in the "Student Rights, Responsibilities, Regulations" appendix of the JCC Constitution of the Student Body.

Students may not inspect and review the following as outlined by law: financial information submitted by their parents; confidential letters and recommendations associated with admission; records of instructional and administrative personnel which are in sole possession of the maker; records of someone employed by the institution; and records of a person after they no longer attend JCC, i.e., alumni records.

Official records are kept by JCC for the time limits as designated by state and federal mandates. After that time, they are destroyed. Record of a student's academic performance is retained permanently.

Student Affairs Committee

The Student Affairs Committee, comprised of JCC staff, faculty, and students, acts as an advisory board to the vice president of student experience on matters related to the student experience division, student governance, campus life, and student welfare. The committee's functions include interpretation and effective communication of college policy, procedure, and practice as they pertain to students as well as to act as a conduit between student governance and administration in matters of student concern. The committee strives to increase connections between student resources across campus and works in conjunction with other standing committees to provide seamless resources and programs. Responsibilities of the Student Affairs Committee include but are not limited to the following: annual selection of the SUNY Chancellor's Award for Student Excellence nominees; review and update of the student constitution a minimum of every three years; and forming judicial appeal panels as needed and requested.

Transfer Advisement

Transfer agreements are available to assist students with transferring to selected transfer schools. Faculty advisors will assist students in planning academic programs at JCC which conform to the requirements of transfer institutions.

Transfer agreements and course equivalent information is available at www.sunyjcc.edu/transfer.

Students may send transcripts to the colleges or universities of their choice by visiting www.sunyjcc.edu/transcripts. Some holds on student records may prohibit the release of transcripts. When necessary, faculty write letters of recommendation for qualified students.

Success Center staff on the Cattaraugus County and Jamestown campuses are available to discuss transfer alternatives.

Veterans Affairs

The veterans affairs coordinator assists veterans with questions concerning the application process. The coordinator processes enrollment certifications through the veterans affairs regional processing center. Assistance is also given to children, spouses, and survivors of veterans whose death or permanent disabilities were service connected. The veterans affairs coordinator is the liaison between the regional veterans affairs office and the veteran when various situations or policies need clarification. The coordinator's office is located in the financial aid and billing office on the Cattaraugus County Campus and in Records & Registration on the Jamestown Campus.

CAMPUS LIFE

Faculty Student Association

The Faculty Student Association (FSA) is an independent nonprofit organization and the primary sponsor of co-curricular activities at JCC. FSA is financed entirely by fees paid by all JCC students and employees. The corporation is managed by a board of directors consisting of representatives of JCC's administration, faculty, staff, and student body. Funds are allocated annually to departments and committees across campus to provide enriching activities and experiences which add to the total college experience.

Campus partners which receive their funding from FSA include Student Senate, the college program committee, campus life, arts, music, theatre, residence life, and athletics, including recreation, intramurals, and the Total Fitness program.

Campus Store

Located in the Hamilton Collegiate Center on the Jamestown Campus, the campus store offers a variety of products and services. Numerous selections of new, used, and reference textbooks are sold, and if a book cannot be found on the shelves, it can be special ordered. The campus store carries an assortment of JCC and Jayhawk merchandise, including imprinted clothing, giftware, and school supplies. In addition, the campus store stocks greeting cards, stationery, art supplies, computer supplies, snacks and drinks, and residence hall room supplies.

Dining and Vending Services

FSA partners with food service companies to provide a variety of breakfast items, wraps, sandwiches, pizza, soup, and full hot meals that are both nutritional and pleasing to the palate. Food service hours vary by campus; each location accepts cash or credit cards.

Snack and light meal vending machines items are available in all buildings on the Cattaraugus County Campus.

For additional meal plan information, contact the FSA office at 716.338.1406. Vending machines are available on all campuses.

Campus Life Offices

The campus life offices on the Jamestown and Cattaraugus County campuses coordinate leadership development opportunities, service projects, and a variety of student activities and events each semester in collaboration with the Campus Activity Board and other campus partners. The college-wide student activity hour (Monday-Friday, 12:20-1:20 pm) enables JCC students to participate in these activities, which include guest speakers, comedians, musicians, poets, intramural sports and college-wide traditions. In addition, clubs and student organizations often hold meetings and host campus activities during activity hour.

Orientation

New and transfer students are invited to participate in summer orientation prior to each fall semester. Participating in an orientation session helps ease new students' transition into collegiate academic and co-curricular life through interactive activities designed to help new students meet each other and become familiar with resources, technology, and the campus overall. Emphasis is placed on building connections, learning about the college culture, and understanding JCC's expectations.

Student Government

The Student Senate is the officially recognized student governing body on the Jamestown and Cattaraugus County campuses. These governing bodies meet regularly with meetings open for any student to attend. Student Senate operates on funding allocated by the FSA and may, in turn, allocate funds to student clubs which present appropriate budget requests.

The Student Senate also serves as an advisory board to the president of the college, bringing matters of student concern to the president's attention and making recommendations which it believes will aid JCC in meeting its commitment to students. Representation is through a general student election on the Jamestown Campus and by petition on the Cattaraugus County Campus. Student government also serves as a vehicle to select students for service on various collegewide committees.

More information about the structure of Student Senate can be accessed in the Student Constitution available on the JCC website.

Clubs & Student Organizations

Student clubs and organizations provide opportunities for leadership development, networking, as well as interpersonal and career skills development outside the classroom. Clubs are student-driven and as such, new and returning clubs are asked to submit an annual charter to the campus life office on the campus on which they are based.

Each group must present a signed list of members, as well as evidence of a commitment from a JCC faculty or staff member to serve as the group's advisor. Those wishing to obtain more information regarding clubs should contact the campus life office on the Jamestown or Cattaraugus County campuses. A list of active clubs is available on JCC's website.

College Program Committee

To enrich the quality of the college experience for students, the College Program Committee sponsors events that will be attractive to the college community in as many areas of academic and curricular interests as possible. Speakers, performers, events, touring exhibitions, demonstrations, and films are brought to JCC annually. Membership on the committee is open to students, staff, and faculty with designated representatives from each group.

All events are offered free or at a reduced charge to FSA members, and at a nominal fee to the general public. Those wishing to obtain more information about the College Program Committee should contact the campus life office on the Jamestown or Cattaraugus County campuses.

Arts at JCC

JCC's Jamestown Campus presents exhibitions, theater productions, workshops, and guest speakers in the Robert Lee Scharmann Theatre, Sarita Hopkins Weeks Reception Hall, and Weeks Gallery. The spaces share a common lobby.

The Weeks Gallery presents the work of significant artists and curates an annual student art exhibition. Each exhibition opening features an artist's lecture, music, and a reception. The gallery's art collection is displayed college wide.

The Cutco Theater and the Louis A. and Patricia Magnano Reception Room on the Cattaraugus County Campus are the focal points for cultural programs, lectures, community meetings, and social events. The Weeks Gallery collaborates with the Tri-County Arts Council to present visual arts exhibitions in the Center Gallery on the Cattaraugus County Campus.

Music

The music department presents numerous concerts each year featuring JCC students and/or regional artists. Various instrumental and vocal groups are available for credit each semester on the Jamestown Campus. These non-audition ensembles are directed by music faculty members. Music groups include concert band, college chorus, and rock ensemble.

Theater

The Uncommoners present a musical and a drama production each year. Auditions are open to JCC students. Students interested in dramatics or in any of the crafts associated with theater will find an opportunity to explore those avenues at the Jamestown Campus. The theater program encourages those who show a curiosity about the world of theater to become involved in its activities. Students wishing to present theater pieces are supported and encouraged to reach their objectives. Students involved in the theater program may be eligible for the Robert Lee Scharmann Award.

Recreation, Intramurals, and Total Fitness

The purpose of intramural sports at JCC is to provide a comprehensive and varied program of both competitive and recreational experiences designed to meet the needs and interests of enrolled students and faculty/staff members. These programs also help develop lifelong interests and recreational habits. Intramural competition is offered in men's, women's, and coed sports and is provided in the form of leagues, tournaments, and/or special events each semester.

Team and individual sports activities are designed to accommodate all individuals, regardless of skill level and experience. Programs are based on student interest and availability of resources and facilities. Some popular activities include flag football, basketball, volleyball, and badminton. Many activities are structured so students, faculty, and staff members can participate together. Awards are presented to winning teams or individuals. Details on eligibility requirements and intramural and recreational activities are available at the Physical Education Complex on the Jamestown Campus and the campus life office on the Cattaraugus County Campus.

The JCC Total Fitness program on the Jamestown Campus provides an outstanding opportunity to participate in a multitude of activities. The Physical Education Complex houses 40,000 square feet of playing space with 11,950 square feet of multipurpose flooring to accommodate basketball, volleyball, and other activities. Other facilities include a free weight room; cardiovascular machines; complete Life Fitness center; batting cage and golf area; racquetball court; indoor running track; diving pool and swimming pools; two whirlpools; and a steam room. Recreation schedules are available at the Physical Education Complex front desk and online.

Cattaraugus County Campus students are entitled to use the fitness and recreational facilities at the Olean Family YMCA/JCC Physical Education Center. Located on Wayne Street, the center includes weight rooms, aerobic equipment, gymnasium, pool, and men's and women's locker rooms.

Athletics

JCC believes that education involves body and spirit as well as the mind. Students at JCC participate in athletics for a variety of reasons which gives each student athlete an opportunity to take a real measure of himself or herself and to pursue a goal of excellence through personal discipline, striving, and hard work.

JCC believes that education involves body and spirit as well as the mind. Students at JCC participate in athletics for a variety of reasons which gives each student athlete an opportunity to take a real measure of himself or herself and to pursue a goal of excellence through personal discipline, striving, and hard work.

Cattaraugus County Campus students can participate in intramural activities as well as joint intercollegiate athletic competition in men's and women's swimming and diving and men's golf with Jamestown Campus athletes.

JCC is a member of the Western New York Athletic Conference and Region III of the National Junior College Athletic Association.

Residence Life

JCC has three residence halls located on the Jamestown Campus. Hillside Suites provide housing for up to 340 students and include suite style living and accommodations for students with disabilities. Each fully furnished suite consists of four or five bedrooms, a common kitchen with dining area, common living space, and two bathrooms. Most bathrooms have a separate vanity area and bathroom/shower space. All living areas, including bedrooms, are furnished with basic furniture and have access to wireless internet.

Utilities are included with the cost of the suites and residents are able to control their own heat and air conditioning within each suite.

Each building provides free laundry, vending machines, and features a common space for activities. Hillside Suites are alcohol, drug, and tobacco-free.

Each building has secure access as well as live-in professional and para-professional staff members who provide support and unique opportunities that enrich residential students' experiences. Through personal interaction, programming, and connectivity to campus resources, staff members provide opportunities that develop citizenship and personal growth for the members of the residential community. As students pursue academic challenges, they can also avail themselves of many support services, social activities, physical education facilities, and performances in close proximity to Hillside Suites.

STUDENT RESPONSIBILITY & EXPECTATIONS

JCC is committed to creating and maintaining an effective community of learners in which all can grow and develop. We look forward to interacting with you in a civil and respectful classroom environment that encourages dialogue, supports the acquisition of knowledge, and assists all students in meeting their academic and personal goals.

Civility and Student Responsibility Statements

JCC is committed to the highest standards of academic and ethical integrity, acknowledging that respect for self and others is the foundation of educational excellence. As such, we will cultivate an environment of mutual respect and responsibility. Whether we are students, faculty, or staff, we have a right to be in a safe environment, free of disturbance and civil in all aspects of human relations.

All JCC students are expected to take an active role in their learning by recognizing they are accountable for their academic success. Student responsibility is demonstrated when students make choices and take actions which lead them toward their educational goals. Responsible students take ownership of their actions by exhibiting the following behaviors. They:

- demonstrate academic integrity and honesty.
- attend and participate in classes, labs, and seminars, prepared and on time.
- complete the assigned work in a timely manner with attention to quality of work.
- avoid making excuses for their behavior.
- communicate in a careful and respectful manner with professors, peers, and other members of the college community
- are engaged learners who dedicate sufficient time outside of class to college work.
- act in a civil manner that respects the college learning/social environment and complies with college policies outlined in the student constitution and college catalog.
- utilize college resources and seek help when needed.
- respect diverse ideas and opinions.
- identify, develop, and implement a plan to achieve their educational goals.

Expectations of Students in the Classroom

Your academic attitude is a major factor in your success at JCC. You share responsibility, along with your professor and other students, for creating a productive learning environment. This responsibility includes behaving courteously and respectfully toward your professors and your classmates and becoming self-disciplined in your learning. To create a productive college experience for you and all students, you should:

- **Attend class and pay attention.** Do not ask the instructor to go over material you missed by skipping class or not concentrating. If you have difficulty understanding the presented material, ask the instructor to assist you.
- **Not come to class late or leave early.** If you must enter late, do so quietly and do not disrupt the class by walking between the class and the instructor. Do not leave class early unless it is an absolute necessity. If you know you need to leave class early, sit near an exit and inform the instructor prior to class.
- **Not talk with other classmates while the instructor or another student is speaking.** If you have a question or comment, please raise your hand, rather than start a conversation with your neighbor. Others in the class may have the same question.
- **Show respect and concern for others by not monopolizing class discussion.** Allow others time to give their input and ask questions. Do not stray from the topic of class discussion.
- **Turn off electronic devices, including but not limited to: cell phones and beeping watches.** If, due to work or family obligations, you need to remain in contact, inform your instructor ahead of time and set the devices to be as unobtrusive as possible.
- **Avoid audible and visible signs of restlessness.** These are both rude and disruptive to the rest of the class.
- **Focus on class material during class time.** Sleeping, talking to others, doing work for another class, checking email, exploring the Internet, etc., are unacceptable and can be disruptive.
- **Not pack bookbags or backpacks to leave until the instructor has dismissed the class.**
- **Clear any visitors you would like to bring to class with your instructor ahead of time.**

Your Rights as a Student

As a student, you have the right to a learning environment free from distractions. If others in your classroom are engaging in behavior that interferes with your learning, bring the situation to the attention of your instructor. Instructors are responsible for managing the classroom environment and determining the action that should be taken.

Consequences of Inappropriate Classroom Behavior

The instructor has the right and the responsibility to take appropriate action when they observe inappropriate classroom behavior. The form of intervention taken by the instructor will depend on the nature of the misconduct observed. The student constitution outlines the process to be followed and sanctions that may be placed on students who engage in various forms of misconduct.

Student Complaint Process

JCC has an internal complaint system available to students who believe they have a grievance with the institution. For more information on the process, consult with the vice president of student experience on the Jamestown Campus or the vice president's office on the Cattaraugus County Campus.

You can complete the [Student Complaint Form](#) in accordance with the [complaint process in the student constitution](#).

You can also file complaints with our accreditors and state approval entities, and any other relevant state official or agency:

- [MSCHE complaint process](#)
- [NYSED complaint process](#)
- [SUNY complaint process](#)
- [ACOTE complaint process](#)
- [ACEN complaint process](#)

Complaints related to distance education

Jamestown Community College is a member of the National Council for State Authorization Reciprocity Agreements (NC-SARA) and follows the [SARA complaint resolution policies and procedures](#) outlined within the [SARA Policy Manual](#).

1. Consumer protection complaints resulting from distance education courses, activities, and operations may be [submitted to Jamestown Community College](#) for investigation and resolution.
2. If a student is dissatisfied with the campus-based resolution, a concern may be submitted to [System Administration of the State University of New York](#).
3. And, if still not satisfied, a complaint may be submitted, within two years of the incident about which the complaint is made, to the [SARA State Portal Entity in New York State](#), which is the [New York State Education Department](#).

Please note, this does not include complaints related to grades or student conduct violations, both of which are to be fully addressed via campus processes, not through the NC-SARA complaint resolution procedures.

Student Constitution

Students who enroll at JCC do so with the understanding that they have accepted the responsibilities for proper conduct both in and out of the classroom. The student constitution addresses two key areas in which students have important responsibilities:

Academic Integrity - Providing an atmosphere that promotes honesty and free exchange of ideas is the essence of academic integrity. As members of the college community, students have an obligation to uphold high intellectual and ethical standards. Academic integrity includes adherence to codes of ethical behavior associated with all areas of study including specialized environments such as internships, fieldwork, and cooperative and clinical experiences. Students who violate the college's policies on academic integrity will be subject to discipline by members of the college community.

Student Conduct - When the actions of students hinder the academic life of students or the ability of the college to achieve its educational purposes, students will be subject to discipline by members of the college community.

Campus Safety and Security

Jamestown Community College is committed to assisting all members of our community in providing for their safety and security as they learn, work, and take advantage of the opportunities our campuses have to offer.

The primary campus safety office is in room 48 of the Collegiate Center on the Jamestown Campus, located at 525 Falconer St., Jamestown, NY 14701 and a secondary location in the administrative suite of the Cattaraugus Campus, located at 260 North Union St., Olean, NY

The campus safety and security director can be contacted at 716.338.1015 (office) or 716.490.0115 (cell).

Students' and Employees' Responsibilities

The cooperation and involvement of students and employees in a campus safety program is necessary. Students and employees must assume responsibility for their own personal safety and the security of their personal belongings by taking simple, common-sense precautions. For example, although the campus is well-lighted, any student or employee, male or female, may feel more comfortable walking with a friend or contacting a member of the buildings and grounds department for an escort to their cars at night. Valuables should not be left where they can be seen in the vehicle and should be locked in the trunk. Bicycles should be left in designated areas and locked.

Students and employees should report any suspicious activity, or unusual incident, or individuals whom they feel do not belong on campus to the campus safety and security director as soon as possible.

Visitors on Campus

Visitors are welcome on campus, and they are expected to abide by the same rules that apply to students. Action, including ejection from campus, may be taken against any person who is present in or on college owned or used facilities for an improper purpose or purpose which, in the judgment of the college representative, is improper or interferes with or obstructs the functioning of the college or the normal processes or activities of the college. Children on campus must remain under the direct supervision of their parents or guardians. Any unsupervised or disruptive children may be detained by a college representative. The child's parents will be contacted immediately, and the child may be asked to leave the campus.

JCC offers an open campus experience within its facilities at all locations. Campus buildings are open from approximately 7 a.m. - 9 p.m. Monday through Thursday and 7 a.m. - 5 p.m. Friday. During these times JCC students, faculty, and employees have access to academic, recreational, and administrative facilities. The general public can attend cultural and recreational events on campus, as well as access the learning commons. Many campus events are advertised for the public at large to attend.

Safety and Security Operations

Security services are coordinated as a joint effort with staff and faculty by the campus safety and security director. The campus safety and security director works closely with the local law enforcement agencies to address and criminal activity that may take place on either of the campuses.

The JCC Facilities department maintains college buildings and grounds with a concern for safety and security. The Facilities team regularly inspects campus buildings and grounds makes timely repairs of items affecting safety and security. The Facilities Team also quickly responds to reports of potential safety and security problems.

Minor crime incidents are investigated by the campus safety and security director who follows up with local law enforcement as appropriate. Serious crime incidents, felonies and missing people are reported to the appropriate police department depending on campus location.

Weapons are prohibited on JCC campuses. Intentional use, possession, or sale of firearms or other dangerous weapons on JCC campuses or college-owned property is a crime and is a violation of the college's code of conduct.

The college has adopted a drug and alcohol abuse prevention program. Alcoholic beverages are not permitted on campus without the express approval of the vice president of finance and operations.

Further information on JCC's safety and security policies and procedures can be found at <https://www.sunyjcc.edu/support/safety/programs>. Information includes:

- JCC's Sexual Offense Policy Statement
- Title IX of the Education Amendment Information
- Jacob Wetterling Crimes Against Children and
- Sexually Violent Offender Registration Act

Incident Reporting

JCC's incident reporting system provides a means for anyone who has witnessed, or knows about, a crime committed on campus to anonymously report incidents. The system, which can be accessed at www.sunyjcc.edu from any computer or smart device, provides users with an electronic option to report a wide variety of concerns or issues including crime, safety, and security issues. Once a report is submitted it is forwarded to the appropriate office for follow-up.

Crimes in progress or emergencies should be reported to 911. Safety and security incidents as well as past-tense crimes can be reported online or in person during business hours directly to the campus safety and security director by calling 716.338.1015 or 716.490.0115. During evenings and weekends, incidents should be reported to the buildings and grounds department (Jamestown Campus, 716.490.0415 and Cattaraugus County Campus, 716.490.0416).

JCC's Behavioral Intervention Team (BIT)

The JCC behavioral intervention team is comprised of a JCC faculty, staff, and administrators. The team meets biweekly to discuss behavioral incidents and concerns occurring on the campuses; to discuss, plan, and implement intervention strategies; and consult with the vice president of student experience regarding students who are at risk of concern. To respect confidentiality, meetings are closed to the college community. Members come to the team with experience in managing health, behavior, and safety aspects of the college experience and may therefore spot trends and set up early intervention services as they evaluate behaviors from a variety of college perspectives.

JCC Alert

JCC utilizes 2 separate platforms, that the college refers to as JCC Alert, to deliver emergency notifications and timely warnings. JCC Alert enables JCC to provide a safer environment, enhance emergency preparedness, and keep our faculty, staff, and students better informed. Students, faculty and staff, and others who are entered into the platform databases receive emergency alerts from JCC through a variety of methods including text messages, e-mail, phone notification, desktop computer and phone interface and public address.

Three types of messages are sent using JCC Alert: 1) messages sent to test that the system is functioning properly will be clearly identified as test messages. These test messages are delivered at a minimum of twice a year. 2) Actual alerts about campus emergencies, closures, or delayed openings. 3) Important communications from the college that affect safety. JCC will not use JCC Alert to send non-safety related messages.

JCC also uses other means of communication for emergency notification. Messages will appear on the JCC website and JCC social media outlets, as well as regional media outlets.

Blue Light Phones

JCC has strategically placed emergency blue light phones on campuses for use in the event of an emergency on campus when a person is unable to get to a phone. The blue light phones are a direct link to 911 operators who can dispatch the necessary emergency services required based on the information provided by the caller.

Tobacco-Free Policy

JCC joined a movement across the nation for college and university campuses to move toward being tobacco-free, which is in line with requests from the New York state commissioner of health and the State University of New York chancellor to promote all SUNY schools as tobacco-free.

As part of its commitment to healthy lifestyles, respect, and well-being, JCC became tobacco-free on August 1, 2014. After a thoughtful decision-making process among members of the JCC community and based on well-documented evidence that use of tobacco products poses significant health risks and that there is no safe level of secondhand smoke, JCC made the decision to prohibit smoking and the use of chewing tobacco and other tobacco products on all campus-owned grounds, including parking lots and residence halls.

JCC embraces the opportunity to make its environment the most respectful and healthiest for all students, employees, and visitors and offers smoking cessation information to those looking to quit.

Although marijuana was legalized in the state of New York, the use of marijuana is not permitted on college campuses due to federal regulation.

SDS online

JCC maintains a comprehensive list of chemicals on campus that can be accessed via SDS online (also known as Safety Data Sheets or SDS). SDS online is an online library of safety data sheets. Safety sheets contain information to keep JCC faculty, staff, and students safe from dangerous chemicals and other hazardous substances. Access SDS online at <https://www.sunyjcc.edu/support/safety/programs> to obtain information on all chemical products used at JCC.

Campus Crime Statistics Disclosure

The Jeanne Clery Disclosure of Campus Security Policy and Campus Crime Statistics Act is the landmark federal law, originally known as the Campus Security Act requiring colleges and universities across the United States to disclose information about crime on and around their campuses. JCC complies with these regulations by providing information relating to crime statistics to all current students and employees. Prospective students and employees are notified of its existence and are afforded an opportunity to request a copy. JCC's crime statistics can also be accessed at <https://www.sunyjcc.edu/support/safety/programs>.

JCC's campus safety and security director will provide, upon request, all campus crime statistics as reported to the U.S. Department of Education. Further details about campus safety and security can be obtained from JCC's campus safety and security director or at <https://www.sunyjcc.edu/support/safety>

OTHER STUDENT SERVICES

Manufacturing Technology Institute

Jamestown Campus

The Manufacturing Technology Institute on the Jamestown Campus focuses on the development and provision of training to support advanced manufacturing in the region. MTI houses several of the college's accredited educational programs such as industrial equipment technology, mechanical technology, machine tool technology, and welding technology, as well as non-credit industry specific customized training programs.

MTI's mission is to provide services to businesses and individuals in the region in the form of hands-on manufacturing technical training and technology assistance.

MTI's vision is to be the premier manufacturing skills training provider in the region. MTI works in cooperation with the public and private education system to define and implement a clear pathway of manufacturing technology training from grade school to a graduate degree. MTI builds partnerships with both public and private sectors to support this vision.

Cattaraugus County Campus

The Manufacturing Technology Institute on the Cattaraugus County Campus in Olean provides advanced manufacturing programs and processes and features classrooms, specialized training space for machining and other industrial skills, light duty labs, and a computer aided design lab.

MTI houses degree and certificate programs such as computer aided design & computer numerical control, industrial equipment technology, machine tool technology, welding technology, as well as non-credit industry specific customized training programs.

Workforce Development Programs

Workforce Development at Jamestown Community College bridges the needs of employers, the community, and individuals by providing learning opportunities to succeed personally and professionally. With locations in Jamestown, Olean, and Fredonia, we offer a broad spectrum of courses, programs and services across multiple industry sectors. Courses and programs are offered year-round at times convenient for adults. Numerous online offerings are also available.

Continuing Education Units

JCC offers Continuing Education Units (CEUs) for approved professional workforce courses offered through Workforce Development. The CEU is a nationally recognized unit of measure for professional development used for career advancement. Each CEU is defined as 10 contact hours in an organized continuing education experience.

Customized Training

Training courses and programs designed and delivered specifically to meet the unique needs of employers, offering short-term, job-specific skills development and workplace training. An employer works directly with WD to offer training tailored for their employees' specific needs. These offerings may assist in learning skills or enhance existing skills. Training delivery could be one-time or reoccurring as requested.

Professional Development

Courses that help individuals stay current in their field, adapt to industry changes, and improve job performance and career opportunities.

Vocational (Job Related)

Typically, fast-paced and intensive programs that allow individuals to pursue an industry specific set of skills leading to immediate employment or advancement in high-demand occupations.

Personal Enrichment Courses

Learning opportunities that enhance an individual's knowledge, skills, or overall well-being for personal fulfillment. Offerings include topics related to hobbies, cultural experiences, self-improvement courses, and lifelong learning pursuits that foster creativity, intellectual growth, and personal satisfaction.

Small Business Assistance

The Small Business Development Center (SBDC) at Jamestown Community College provides management and technical assistance to start-up and existing small businesses throughout Chautauqua, Cattaraugus, and Allegany Counties. The SBDC's knowledge and experienced staff provide expert one-to-one counseling, training, and instructional programs to help small businesses succeed. Any existing small business, firm, or individual considering starting a small business may request assistance. There are no charges for direct counseling by the SBDC under this program. The SBDC can assist in business plan development, packaging loan applications, financial planning including cost analysis and revenue projections, marketing and social media assistance, export and procurement guidance, complying with permit, licensing, and other regulations, productivity enhancement, and supporting the start-up and/or expansion process for small businesses. For details, call the SBDC at 716-338-1024 or visit sunyjcc.edu/sbdc.

ACADEMIC INFORMATION

Academic Affairs Mission Statement

Our mission is to prepare students for successful employment, transfer, and life-long learning. We equip students with the knowledge, skills, and attitudes necessary to succeed in their professional endeavors, and to lead in service to their communities.

Enduring Values

To achieve our mission, we pursue goals and activities within a framework of shared values which serve as a touchstone for our decision-making, and which form the foundation for assessment of our effectiveness in achieving our goals. We value:

- Excellence in all endeavors.
- Evidence-based assessment of progress towards goals.
- Continuous improvement.
- Personal responsibility for one's roles in the learning environment.
- Recognition and reward for outstanding accomplishments.
- Partnerships of varying types which advance goal achievement.
- Effective use of technology to support learning.

Policies

The academic policies and regulations adopted by JCC are designed to maximize each student's opportunity for success and to provide students with a fair and realistic assessment of their progress. Essentially, JCC's approach is a positive one, based on reward for achievement rather than penalty for failure.

Attendance

Every student is expected to attend all lecture and laboratory sessions for which they are registered. Absences will be recorded by instructors, and the student will be held responsible for making up all work missed. Attendance requirements for each course will be established by the instructor and announced, published, and distributed with the course outline at the first class meeting.

Course Withdrawal

A student may withdraw from a single, full-term course through the last day of final exams during the fall and spring semesters and receive a "W" grade. For fall and spring non-traditional courses, a student may withdraw through the last day of instruction and receive a "W" grade. During a summer session, a student may withdraw through the last day of instruction and receive a "W" grade.

A student who wishes to withdraw from a single course must discuss the withdrawal and potential ramifications with their instructor, academic advisor, or Success Center counselor.

To withdraw from a course, a student must submit an [Individual Course Withdrawal Form](#). On-campus students may obtain a paper Individual Course Withdrawal Form from Records and Registration in Jamestown or the Student Services Center in Olean. If a student chooses to use the paper withdrawal form, it must be signed by their instructor, academic advisor, or Success Center counselor. Signed withdrawal forms must be submitted to Records and Registration in Jamestown or the Student Services Center in Olean. Failure to properly withdraw from a course will result in the student receiving the grade they earned in the course. A withdrawal (W) is a permanent action and is not eligible for a grade change.

Military Withdrawal Policy

There shall be no tuition or fee liability established for a student who withdraws to enter military service or is called into active duty prior to the end of an academic term for those courses in which the student does not receive academic credit. A grade of "W" shall be recorded on the student's transcript for each class in the affected semester. If a student is forced to relocate due to the orders of an active-duty family member, the same conditions will hold true.

Note: The term "military service" means full-time active duty in the Army, Navy (including Marine Corps), Air Force, Coast Guard of the United States, or qualifying National Guard duty during a war, other military operation, or national emergency as defined in Section 5 of the Higher Education Relief Opportunities for Students (HEROES) Act (Public Law 108-76).

Enlistment under a delayed enlistment plan does not constitute "full-time duty" until the student is required to leave school on the effective date of active duty as stated in the student's or family member's orders.

A student who is a member of a National Guard, Army, Navy, or Air Force Reserve unit who is not called up for duty as defined above, is entitled to a refund only if in the judgment of the college's business office the student is unable to attend classes due to hardship beyond the student's control and the student has made bona fide efforts to permit continued class attendance. Documentation of membership on active duty in the military service shall be provided to and retained by the business office as part of the appeal process. In the event that a refund is granted to a student in National Guard or reserve status, documentation of the reasons for such action shall be in writing and retained by the campus.

Military personnel withdrawing from any program or term because of changes of assignment beyond their control and upon proper certification of such change from a base education service officer or other appropriate military official shall be deemed to have incurred no liability for tuition and fees due from the student, as opposed to tuition and fees paid by the federal government on the student's behalf (to which federal regulations on return of such funds apply).

A student who is called for short-term deployment should discuss how course work will be completed with instructors before leaving for duty. The option of an I (incomplete) grade, which is given at the end of the semester, can be discussed at this time. The student must not be forced to withdraw from the course or be given a failing grade because of the time missed. The student has the option to withdraw from the course without financial penalties.

Credit/Fail

Students may elect to take one course per semester graded on a credit/fail basis (in addition to those courses normally graded on a credit/fail basis). No more than 16 credit hours taken on a CR/F basis may be applied toward an associate degree. Students should avoid using the CR/F option in their major field of study. The F grade is reflected in the computed grade point average while the "CR" grade is not. Please note: many colleges and universities do not accept a grade of CR as transfer credit. The decision to pursue a CR/F grade is made by the student with guidance from their advisor or a member of the Counseling Center.

Credit Hour Policy

JCC has a policy for the assignment of course credit hours. This policy is located in the Academic Resources section of the JCC website <https://www.sunyjcc.edu/programs/academic-calendar>.

General Policies

Courses and programs listed in this catalog are offered whenever there is evidence of sufficient student enrollment. Since some courses require highly specialized faculty and facilities, scheduling may be limited by their availability.

Students are considered to be full-time when they are registered for 12 or more credit hours per semester. Students will be permitted to register for more than 19 credit hours only with special permission of the vice president of academic affairs, the vice president of student experience, the executive director of the Cattaraugus County Campus, or the appropriate academic dean.

A credit hour is normally equivalent to one hour per week of lecture or two hours or three hours per week of laboratory/studio work taken during a 16-week semester (inclusive of final exam work). Students are advised to plan an average of two hours of preparation per week for each credit hour of course work. Students registered for 12 or more credit hours are strongly urged not to consider outside employment requiring more than 15 hours per week.

Sophomore status has been achieved when the student has accrued 26 college level credits.

Issuance of Official Transcripts

Students can obtain an official paper or electronic transcript of their record or send transcripts directly to other colleges or prospective employers using the Parchment online service. Students will be charged a fee, based on the method of order and delivery. Refer to website for the current rate. To order official JCC transcripts or for more information, visit <https://www.sunyjcc.edu/support/registrar/transcripts>. Students may view or print an unofficial transcript through self-service Banner by selecting the student tab.

Repeating a Course

When a student wishes to raise his/her grade and average by repeating a course, their highest grade will be used in the computation of their grade point average. Only the number of credit hours offered in that course for one particular semester will be used in the computation of total hours and GPA for graduation. Repeating coursework may impact financial aid eligibility. Students who anticipate repeating a course should check with the financial aid and billing office.

Special Audit Tuition Waivers

The State University of New York chancellor has delegated to the campus president authority to determine who may attend courses as auditors and to establish rules and regulations concerning such course auditors.

JCC's tuition waiver procedure is consistent with the established SUNY rules and regulations concerning course auditors. Protocol for special audits is as follows:

- Special auditors must be 60 years old or older.
- They may begin registering the day the class begins.
- Special audits are accomplished on a space available basis. In some cases, instructor permission cards may be used.

- The instructor sets the expectations for the audit grade.
- No tuition is charged, but the special auditor pays technology fees, Open SUNY fees (if applicable), and any course-related fees.

While students 60 years old or older are permitted to take a course as a special auditor on a space available basis, persons taking the course for credit will receive priority. Special auditors will not receive college credit or formal recognition. Upon successful completion of the course, a grade of SA will be recorded on the student’s transcript. A grade of SX can be assigned if the student fails to meet the instructor’s expectations. A grade of SW is assigned if the student withdraws from the course.

Grading

Grading System

The following grading system is in effect at the time of publication of this catalog:

GRADE	MEANING	QUALITY POINTS
A	Excellent	4.0
B+	Above Average	3.5
B	Above Average	3.0
C+	Average	2.5
C	Average	2.0
D+	Below Average	1.5
D	Below Average	1.0
F	Failure	0.0
I	Incomplete	None
CR	Credit	None
W	Withdrawal	None
X	Administrative Withdrawal	None
AU	Audit	None
SA	Special Audit	None
SW	Special Audit Withdrawal	None
SX	Special Audit Administrative Withdrawal	None

Other historic grades may appear on a student’s transcript. Contact Records & Registration for an explanation of any grade that does not appear in this catalog or on the transcript legend.

AU - Audit - No Quality Points (Q.P.) A student wishing to audit a course must obtain permission from the instructor to do so. Students may enroll to audit a course at the time of registration or change from regular grading system to audit by the last day of the fifth week (33% of individual class meetings) of the semester with permission of the instructor. The instructor sets the expectations for the audit grade. Generally, the student is expected to attend all classes, but is not required to complete examinations, papers, and other class projects. No credit is awarded for the audit grade and the grade of AU will be recorded on the student’s transcript. An “X” grade can be assigned if the student fails to meet the instructor’s expectations. Audit forms are available at Records & Registration on the Jamestown Campus, the Student Services Center on the Cattaraugus County Campus, and at JCC’s extension sites. Students auditing courses will pay full tuition and fees other than those associated with matriculation and graduation.

CR- Credit (see Credit/Fail Policy) - No Q.P.

I - Incomplete - The “I” grade is a student initiated grade subject to the approval of the instructor, taking into account the circumstances under which the incomplete is requested. Arrangements to make up incompletes will be contracted between students and faculty, and the student must complete course requirements within a mutually agreed upon time, which may not exceed one calendar year. Failure to do so will result in the student receiving the grade indicated on the incomplete form. The Records & Registration must receive the completed student/ faculty agreement prior to the final grade entry deadline as listed on the academic calendar.

Students are not granted an incomplete grade in lieu of an “F” grade. The intention of the “I” grade is to allow for students to complete course requirements after the conclusion of a semester without attending subsequent offerings of the same course.

SA - Special Audit - No Q.P. (See Special Audit Tuition Waivers)

W - Official Withdrawal - No Q.P. - A student can withdraw from a single, full-term course through the last day of final exams for the fall and spring semesters and receive a “W” grade. During a summer session, a student can withdraw through the last day of instruction and receive a “W” grade. All students have the privilege, through appropriate procedure* (see below), of totally withdrawing from the college through the last day of instruction of the current semester and receiving a grade of “W.” A student may not withdraw from a course which has already ended.

X - Administrative Withdrawal - No Q.P. - The administrative “X” grade will be used for lack of attendance or maintaining enrollment requirements, including but not limited to: financial dismissals, non-compliance health dismissals, and failure to complete an “AU” course. If an administratively withdrawn student is allowed to return to class before the end of the semester, faculty will have the option of changing the “X” to a standard grade. A full-time student who receives all “Xs” must reapply for admission to JCC.

Total Withdrawal - *A student desiring to withdraw totally from JCC may officially begin this process at the Success Center (without seeing each faculty member separately). A “W” grade will be recorded on the transcript. Full-time students who officially withdraw are withdrawing from JCC and must reapply for admission should they desire to return.

Grade Appeal

Students who believe that they have been graded unjustly or who wish to present evidence of extenuating circumstances that influenced a grade should first appeal their grade at the instructor and division level. If the appeal is not approved at the division level, it can be taken to the Academic Standings Committee. To be considered, appeals need to be received by the Academic Standings Committee within one year of the grade assignment. Following a thorough review of all written documentation, it is at the committee’s discretion to request a meeting that includes the student and applicable members of the faculty and college.

A student who, due to extraordinary circumstances, wishes to appeal to change one or more failed courses to withdrawals must submit the appeal directly to the Academic Standings Committee, and must provide ample documentation to corroborate reasons for such a change. If the student wishes to appeal grades for an entire semester to a total withdrawal, then the conversion of past semesters’ grades to total withdrawal will include all courses in the designated semester, not just those the student failed.

Grade Point Average

Each student's academic standing is based on the average of all grades earned, as determined by grade point average (GPA). The GPA is determined by dividing the total number of quality points by the number of credit hours undertaken in courses for which a letter grade has been assigned. No quality points are given for courses in which a grade of CR is received, although credit hours for such courses will be included in the compilation of hours needed for completion of degree or certificate requirements. Neither credit hours nor quality points are earned for courses in which the grade "I" is recorded. Grades of "I" (incomplete) must be removed by the end of one calendar year, or earlier if specified by the instructor, or they will be replaced by either the grade provided by the instructor, an "F," or an "IF."

Neither credit hours nor quality points are earned for courses in which grades of I, CR, AU, W, X, SA, SW, or SX are recorded.

Academic Standing

The academic policies of the college are carried out by the Academic Standings Committee which meets regularly to review student progress, recommend policy changes, and review student records for satisfactory academic progress or suspension. Please visit <https://www.sunyjcc.edu/support/academic-standing> for additional information.

Satisfactory Academic Progress

Because graduation from JCC requires 60 semester hours with a cumulative grade point average of 2.00, the Academic Standings Committee directs the registrar to identify at the end of each semester students who have attempted six credit hours or more and have a cumulative grade point average or number of hours completed which is less than those shown on Federal Aid Eligibility [Chart A](#). Any student identified as not meeting these minimal standards will be considered as not making satisfactory progress and will be placed in Academic Recovery status, Academic Jeopardy status, or Progress Probation (a Financial Aid designation).

Academic Recovery

Academic Recovery status means the student is not meeting the minimal standards based on Federal Aid Eligibility [Chart A](#). Students in Academic Recovery will have a semester to improve and to meet these standards. During this time, students will have access to additional support measures. If the student fails to meet the minimal standards in subsequent semesters based on Chart A, then they may be placed in Academic Jeopardy status. Please visit <https://www.sunyjcc.edu/support/academic-standing/recovery> for additional information.

Academic Jeopardy

Academic Jeopardy status means a student has not met the standards on Federal Aid Eligibility [Chart A](#) for two or more semesters. The student will have an additional semester to improve their cumulative grade point average and hours earned or face possible suspension in subsequent semesters. During this time, students will be required to access additional support measures. If the student fails to meet the minimal standards based on Chart A, then the student may face Academic Suspension. Please visit <https://www.sunyjcc.edu/support/academic-standing/jeopardy> for additional information.

Academic Suspension

Academic Suspension is at the discretion of the Academic Standings Committee, which will consider the status of each student based upon current grades and academic history. Students who are suspended from the college can reapply after one full semester. Students who are readmitted to the college will be in Academic Jeopardy until they meet the standards on [Chart A](#). Please visit <https://www.sunyjcc.edu/support/academic-standing/suspension> for additional information.

Academic Standing and Financial Aid

If a student is placed in Academic Recovery or is placed on Progress Probation for the first time, the student retains federal financial aid eligibility. However, if the student does not meet satisfactory quality point average standards or hours earned standards a second time, eligibility for federal financial aid is lost until the student can again demonstrate satisfactory academic progress in both areas. Students who lose financial aid eligibility may, under special circumstances, receive a waiver in order to receive federal aid. Information about the waiver process can be obtained in the financial aid and billing office.

Warning Status

Warning status is defined as:

	CREDIT HOURS ATTEMPTED	GPA
Category I	1-23	0.0 to 1.75
Category II	24-41	0.0 to 1.99

Students will be warned if their semester or cumulative grade point averages fall in the above range for a given semester. Warning status denotes students who are above but close to the college's minimum standards for satisfactory academic progress (see the Satisfactory Academic Progress chart under Maintaining Eligibility for Financial Aid).

Progress probation

Progress Probation is a deficiency in hours earned only. A student on Progress Probation will continue to be on Progress Probation as long as hours earned remain below the required standards in subsequent semesters.

Appeals

Appealing a Final Grade: Students who believe that they have been graded unjustly or who wish to present evidence of extenuating circumstances that influenced a final grade should first appeal their grade at the instructor and division level. If the appeal is not approved at the division level, it can be taken to the Academic Standings Committee. Students can submit a written appeal which can be emailed to studentexperience@mail.sunyjcc.edu or submitted in person at the office of Student Experience on the Jamestown Campus or the Success Center at the Cattaraugus County Campus. To be considered, appeals need to be received by the Academic Standings Committee within six months of the grade assignment. Following a thorough review of all written documentation, it is at the committee's discretion to request a meeting that includes the student and applicable members of the faculty and college. If the appeal is not approved by the Academic Standings Committee, then the student can appeal to the Vice President of Academic Affairs. The decision of the Vice President is final.

Appealing Academic Recovery or Academic Jeopardy Status: Students have the right to appeal any academic standings decision. However, since Academic Recovery, and Academic Jeopardy are based on a mathematical calculation from Chart A, it is improbable that the designations will be revoked. If you believe there has been a calculation error, you can submit a written appeal to the Academic Standings Committee by the add/drop period of the subsequent semester for consideration. Your appeal letter

should be emailed to studentexperience@mail.sunyjc.edu or submitted in person at the office of Student Experience on the Jamestown Campus or the Success Center at the Cattaraugus County Campus. A student may further appeal to the Vice President of Academic Affairs. The decision of the Vice President of Academic Affairs is final. An appeal of the academic standings status does not impact a student's financial aid status. There is a separate process for a financial aid waiver.

Appealing Suspension Status: Students who wish to appeal their suspension from the college may appeal in writing to the Academic Standings Committee. Following a thorough review of all written documentation, it is at the Academic Standings Committee's discretion to request additional information from the student. If denied by the Academic Standings Committee, a student may appeal to the Vice President of Academic Affairs. Contact information for the Vice President of Academic Affairs is contained in the denial letter from the Academic Standings Committee. The decision of the Vice President of Academic Affairs is final.

Appealing Federal Aid Status: Students who do not meet the satisfactory academic progress standards for the second time will lose their eligibility for federal financial aid until such time as they can meet the guidelines by taking courses at their own expense. However, students who can document serious extenuating circumstances may request consideration for a waiver by submitting to the financial aid and billing office a [waiver request form](#) explaining their circumstances and documentation supporting their circumstances from an appropriate third party before the beginning of the semester for which they are requesting the waiver. Waivers are not automatic and will be determined on a case-by-case basis.

Imputed Credit

The faculty and administration have determined that some courses listed in this catalog may not be counted toward degree programs offered by JCC. These are developmental courses for students who need to prepare themselves for college level work. Courses in this category carry imputed credit and are designated as "IC". Courses carrying imputed credit will count toward financial aid requirements. The following imputed grade designations were in place at the time of the publication of this catalog:

GRADE	MEANING	QUALITY POINTS
IA	Excellent	0.0
IB+	Above Average	0.0
IB	Above Average	0.0
IC+	Average	0.0
IC	Average	0.0
ID+	Below Average	0.0
ID	Below Average	0.0
IF	Failure	0.0
II	Imputed Incomplete	None
ICR	Imputed Credit	None
IW	Imputed Withdrawal	None
IX	Imputed Administrative Withdrawal	None

Other historic grades may appear on a student's transcript. Contact Records & Registration for an explanation of any grade that does not appear in this catalog or on the transcript legend.

Graduation Requirements

To graduate with an associate degree from JCC all students must have earned a cumulative average of 2.0 or better in at least 60 credit hours of appropriate coursework as described by the Board of Regents of the State of New York and must have met the specific requirements of a degree program in place at the time of their first enrollment or any subsequent set of requirements. Requirements for subsequent degree/requirements are based on matriculation date. If a student transfers in appropriate credits toward an associate degree, a minimum of 30 JCC credits is required to complete a degree. Students graduating in a certificate program must complete all courses listed in the certificate with a minimum 2.0 cumulative average.

If a student transfers in appropriate credits toward a certificate, a minimum of 15 JCC credits is required to complete a certificate.

A student who is nearing completion of degree or certificate requirements must make formal application for the degree or certificate by completing the appropriate form at Records & Registration on the Jamestown Campus, the student services center on the Cattaraugus County Campus, or visit www.sunyjc.edu. Students should apply to graduate once they are registered for their final semester coursework. Failure to do so may result in not being included in the final review of candidates and in the awarding of degrees and certificates at commencement exercises.

Earning Additional Degrees and/or Certificates

A student interested in earning a second or subsequent degree must complete the admissions reapplication online at www.sunyjc.edu. Students pursuing additional degrees will follow the degree requirements for the new degree program as listed in this catalog at the time of matriculation into the new program. For each additional degree, students must complete the minimum number of credit hours listed in the table below with an overall GPA of 2.0 or better. Additional certificates are earned upon the completion of the certificate requirements. For each additional degree or certificate, a \$20 fee is charged to cover the cost of additional diplomas and diploma covers.

DEGREE	MINIMUM HOURS AND GPA
Second degree	90 hrs. with an overall GPA of 2.0 or better
Third degree	120 hrs. with an overall GPA of 2.0 or better
Fourth degree	150 hrs. with an overall GPA of 2.0 or better

JCC Essentials

Learning leads each of us on a unique journey. But wherever your journey leads, you will need certain essential skills and experiences to get where you want to go. Like a compass pointing the way north, the JCC Essentials point the way toward your future.

The Essentials are those fundamentals of learning that prepare you to think and act effectively in the complex modern world. After all, knowledge is only as powerful as our ability to apply it to the real world, and today's world is one of great challenges and opportunities. The changing technologies, global reach, and abundant information of the 21st century require the ability to adapt to new situations, collaborate with people of different backgrounds, and evaluate evidence with a critical eye.

JCC can't teach you everything you will need to know, but it will give you what you need to continue to grow as you navigate life's twists and turns. The JCC Essentials forge a path for lifelong learning that promotes innovative connections across fields of study and prepares students to make a positive difference in our diverse and changing world.

Three Levels of Learning

The Essentials are spread across three levels of learning. These same levels form the basis for every degree program at JCC. As you advance along your path, you will:

Level 1: Inquire into complex questions with a critical eye for evidence and differing perspectives. Learning begins with a question. Completed during the first year of study, Level 1 courses examine multi-faceted questions through a critical lens, giving students the opportunity to explore different perspectives and types of sources. As students engage their inner detectives they develop the cognitive skills needed for hands-on, college-level inquiry. In the process they learn to navigate the culture of higher education at JCC.

Level 2: Grow the versatile toolkit of skills and knowledge essential to success in the twenty-first century. Courses in this level expand students' knowledge and skills across a range of different disciplines. Students are drawn into new intellectual experiences as they build college-level proficiency in the following areas:

A number of Level 2 courses also fulfill SUNY general education requirements, allowing students to complete SUNY and JCC requirements simultaneously. Other Level 2 courses develop knowledge and skills that are specific to students' programs and career interests.

- Written composition
- Oral Communication
- Mathematical reasoning
- Scientific reasoning
- Cultural understanding

Level 3: Connect your learning to the real world and recognize the impact of your actions. Level 3 coursework challenges students to put their learning to use and make thoughtful connections between the classroom and real world. Students effectively apply their knowledge and skills to a real-world experience, creative project, or independent intellectual investigation. Other coursework broadens students' worldview to consider the potential significance of their own and others' actions in a diverse, global community.

Course Requirements

All graduates of JCC must complete appropriate liberal arts and sciences courses for the degree sought. In addition, all degree holders must meet the following collegewide requirements. Except where otherwise indicated, these requirements apply to all JCC degree recipients who matriculate in a program for the first time beginning fall 2019 and thereafter:

Level 1: Inquire

- Completion of INT 1555 Inquire or an approved inquiry-based course. Completion of this course is recommended within a year of matriculation in a degree program (for students matriculating in Fall 2020 and after).
- Completion of ENG 1510 English Composition I

Level 2: Grow*

- Completion of ENG 1530 English Composition II
- Completion of one approved SUNY Mathematics course (for students matriculating in Fall 2023 and after).
- Completion of two approved courses incorporating the study of scientific reasoning, to include one course in the SUNY Natural Sciences and one course in the SUNY Social Sciences
- Completion of one course incorporating the study of cultural understanding, to be selected from an approved list of SUNY courses

*To ensure a sufficient breadth of study, no individual course may be used to fulfill more than one Level 2 requirement. However, courses within Level 2 may be used to fulfill requirements in other levels if approved accordingly.

Level 3: Connect*

- Completion of one applied learning course or experience, to be selected from an approved list of options
- Completion of one course incorporating the study of global perspectives, to be selected from an approved list of options
- Completion of one approved SUNY Diversity course incorporating the study of diversity, equity, and social justice (for students matriculating in Fall 2023 and after).

*To ensure a sufficient breadth of study, no individual course may be used to fulfill more than two Level 3 requirements. However, courses within level 3 may be used to fulfill requirements in other levels if approved accordingly.

Additional Competencies

In addition to the requirements listed above which are incorporated into specific courses, the college also requires each degree holder to demonstrate several other competencies which are infused across the curriculum. These competencies are not necessarily associated with any one course but are included in each degree program, as determined by program faculty.

Information literacy - This competency ensures that all JCC students learn to find, understand, evaluate, and use information in various forms. Being information literate also requires an awareness of the authority, validity, and bias of different sources. Students are expected to weigh the ethical implications of using and disseminating information in the modern world.

Critical thinking reasoning - This competency ensures all JCC students learn to analyze different forms of evidence and weigh differing perspectives as they work to develop well-reasoned conclusions. Students also improve their problem-solving skills by learning to identify the various aspects of multi-faceted, interdisciplinary issues.

Technological competency - This competency ensures all JCC students possess the knowledge and skills to successfully and efficiently use computer and other appropriate technologies as individuals, students, employees, and citizens. Some elements of technological competency are infused across all courses; in addition, each program of study determines what additional technological skills are essential for graduates of its program area and incorporates those skills into required coursework.

Values and ethical reasoning - This competency challenges all JCC students to consider the significance of their own and others' actions within a larger community. Ethical awareness begins within the college classroom and extends to students' lives beyond JCC. Program-specific coursework reinforces the importance of ethical behavior in students' future professional lives.

SUNY General Education Requirements

SUNY General Education (GE) is a system-wide framework applicable to all SUNY undergraduate degree programs that addresses the fundamental goals of higher education. It promotes proficiency with essential skills and familiarizes students with different ways of knowing, both within and across subjects. It also enhances the values and disposition of an engaged 21st-century global citizenry.

Please consult the webpage for more details: <https://www.sunyjcc.edu/programs/essentials/suny-general-education>.

Writing Across the Curriculum

JCC's faculty have long understood the mutual relationship between knowing and writing. This relationship is the basis for JCC's Writing Across the Curriculum policy, which calls for instructors to use writing as a teaching tool in courses from all disciplines, including those in nursing, psychology, Spanish, criminal justice, economics, and occupational therapy assistant, as well as in such traditional writing courses as literature and philosophy.

Teachers respond to a student's writing in many ways: face-to-face conferences, referrals to the tutoring center, creation of peer-editing sessions or discussions in class, and marginal notes. Revision is taught as a way to reexamine the subject or to deepen and enrich one's understanding and expression.

JCC's Writing Across the Curriculum policy commits students and faculty to the most authentic and valuable kind of higher education.

Awards & Honors

Dean's List, Other Honors

In February and June of each year, the dean's lists are issued to recognize full- and part-time students who have achieved outstanding academic success. The names of all full-time students who have earned a GPA of 3.5 or better in 12 or more credit hours (not counting imputed credits) of work completed during the preceding semester are included on the dean's list. The names of all part-time students who have earned a GPA of 3.5 or better in 6-11 credit hours of work completed during the preceding semester are included on the parttime student dean's list. CR and imputed credits are excluded.

At commencement, the JCC board of trustees honors outstanding graduates who have been full- or part-time students and who have achieved the highest scholastic standings in each of the three associate degree areas with 60 or more credits earned at JCC. Students who have earned highest honors (4.0 GPA), high honors (3.5 to 3.99 GPA) and honors (3.25 to 3.49 GPA) in all courses at JCC have this noted on their transcripts.

JCC also recognizes special achievements in scholarship, athletics, service, and leadership at annual awards ceremonies.

Phi Theta Kappa

Each year a number of students are nominated for membership in Phi Theta Kappa, a national honor society for two-year colleges. For many years Phi Theta Kappa has been the most prestigious national honors group to which a community college student can belong. Nominated students must have a GPA of at least 3.5, completed at least 12 credit hours which are applicable toward a degree and contribute to a student's GPA.

Transfer Information

A majority of JCC graduates transfer as juniors to four-year colleges and universities throughout the United States. The Associate in Arts and Associate in Science degrees are designed for transfer and represent the first half of a baccalaureate education. While Associate in Science degrees were not originally intended for transfer, some are now transferable.

Students interested in transferring to another college or university after completing a degree program at JCC are urged to engage early in a planning process with a JCC counselor or advisor. Most four-year schools require a minimum cumulative grade point average of 2.0 (C), and some schools and degree programs require a higher average. Students should check the requirements of transfer institution(s) prior to application.

Transfer & Other Special Agreements

JCC has signed specific transfer articulation agreements with numerous four-year colleges and universities for many of its degree programs. The purpose of these agreements is to identify JCC courses that meet degree requirements at the transfer institution, and to facilitate the transfer process.

Most of the agreements guarantee acceptance of JCC students who meet requirements specified by the various four-year schools. Most also guarantee junior status and the opportunity to complete a bachelor's degree with four semesters at a transfer school, and several are dual admission agreements that simultaneously admit a student to JCC and to a bachelor's, master's, or doctoral degree program at the transfer school.

The transfer agreements are too numerous and detailed to include in this catalog, and new agreements are negotiated each year. All transfer agreements are on file in the office of the vice president of academic affairs. Divisional offices maintain files of transfer agreements appropriate to their disciplines, and transfer agreement information is available online at www.sunyjcc.edu/transfer.

Students are encouraged to examine those agreements in which they have a specific interest. Transfer agreements are updated on a regular basis to reflect changes made in the curriculum at JCC or the transfer institutions. Transfer counselors at all JCC sites are knowledgeable about these agreements and are fully prepared to assist students in the transfer process.

JCC also has "one-plus-one" arrangements for transfer to several two-year degree programs at the SUNY Alfred State and the SUNY College of Environmental Science and Forestry. In addition, JCC continually works to develop special agreements that meet the needs of students and the community in other areas such as radiologic technology and pharmacy.

Academic Statistics

Faculty statistics

Total faculty: 161 | Student to faculty ratio: 15 to 1

Graduate Job Placement

A total of 71% of 2024 JCC graduates with Associate in Applied Science degrees responding to a survey indicated they were employed full-time. Of those responding, 83% said their current occupation is highly related to their JCC degree area and 84% said JCC prepared them for their positions in the workforce (65% indicated "very well," 19% noted "adequately"). In the same survey, 88% of full-time transfer students responded that JCC prepared them for continuing their education. Of the respondents, 57% indicated JCC had prepared them "very well" and 31% said "adequately." Also, 70% of the full-time transfer students are studying in a program that is highly related to their JCC program.

Special Academic Programs

College-Level Examination Program (CLEP)

CLEP is a national program of credit-by-examination sponsored by the College Entrance Examination Board. CLEP exams allow a person to receive college credits for knowledge gained in a wide range of subjects.

CLEP exams cover material that is taught in introductory level courses and specific subject areas at many colleges and universities across the country. Each institution determines the CLEP exams for which credit will be awarded. A list of the exams for which JCC awards credit is available in the Jamestown Campus admissions office and the Student Services Center on the Cattaraugus County Campus. The list is also available online at <https://clep.collegeboard.org>. Information on the exact number of credits that may be earned under CLEP and their transferability is also available from these offices.

Honors Program

JCC's [Honors Program](#) provides challenging curriculum, supportive services, and special enrichment opportunities for highly motivated students who have demonstrated their academic ability. Honors students enroll in special honors-designated courses, engage in co-curricular activities, and complete projects that synthesize academic and real-world experiences. Students who complete the honors program requirements receive an honors citation on their transcripts along with other special graduation recognition and student privileges.

Honors courses are developed by faculty who are dedicated to providing additional rigor and support for honor students. The courses must have the following attributes: a focus on greater depth and breadth of subject matter; an interdisciplinary approach; strong attention to writing and critical thinking; and a strong focus on values and ethics.

New students with a 90% high school average who are eligible for MAT 1540 are eligible for the Honors Program. Returning students who are eligible to take a college-level English course without supports and MAT 1540 and have a GPA of 3.5 or better after 12 credit hours are honors eligible. To remain in the program, a student must earn a cumulative grade point average of 3.0 or better.

To earn JCC's honors citation, students must successfully complete a three-credit hour honors symposium course as well as two one-credit hour honors project courses. The symposium courses allow students to approach a global topic from diverse perspectives. Continuing and prospective honors students are encouraged to visit <https://www.sunyjcc.edu/experience/leadership/honors/courses> for current course offerings.

Online Courses and Degree Opportunities

JCC is a member of a statewide consortium of campuses that offers graduate and undergraduate online courses called SUNY Online, a student-centered approach to teaching and learning that eliminates the constraints of time and location for students. It utilizes an asynchronous learning model.

Class activities are the same: students read course materials, write papers, do research, and communicate with their instructor and fellow students. What is unique is that courses are designed so that you can do everything online. The learning is both interactive with faculty and collaborative with other students. Even more, a wealth of resources is readily available online.

Refer to the academic program listings page to determine which programs are available fully online.

Online courses are available in over 25 discipline areas. Students do not need to be enrolled in a degree program to take online courses. For more information regarding online courses, visit <https://www.sunyjcc.edu/programs/online>.

Independent Study Courses

Students who want to participate in an independent study project must make arrangements directly with a faculty member who agrees to serve as their project advisor. With the assistance of the advisor, the student establishes a proposal covering the work and goals to be accomplished. The number of credits to be earned for completion of the project is determined and the appropriate dean approves the project. The final grade is determined by the advisor. Credit for a single project is limited to 1-3 credit hours, and no more than six credit hours in independent study earned at JCC may be applied toward an associate degree.

Interdisciplinary Studies Courses

Courses which cross the normal boundary lines between disciplines are listed under the common heading of Interdisciplinary Studies (INT).

Global Learning and Study Abroad

JCC students have the opportunity to study abroad in 27 countries for a full semester or summer sessions through the college's membership in the College Consortium of International Studies (www.ccisabroad.org).

The International Education and Study Abroad Program is open to sophomore students with a minimum GPA of between 2.5 and 3 (depending on the program) and to freshmen with exceptional academic credentials. Students may earn 15 credits while studying abroad, which are counted toward their degrees at JCC. Programs consist of courses taken at a college or university in the host country. Credit hours earned vary by program and sessions.

Each year, JCC also offers credit-bearing courses that include short-term, faculty-led study abroad experiences. Recent offerings have provided students with opportunities to travel to Belgium, England, Guatemala, Italy, Japan, and Spain. Students can also enroll in credit-bearing, semester-long or summer internships in China, Ireland, Guatemala, Japan, and Spain.

For additional information, visit the global learning office or explore opportunities at www.sunyjcc.edu/studyabroad.

Applied Learning

Many applied learning opportunities are available to students who wish to acquire work experience related to a particular field of study while attending JCC. These experiences allow students to apply learning from previous coursework in real world settings while pursuing learning objectives through both work and reflection.

Students who have completed at least 12 college-level credits with a GPA of 2.0 or better are eligible to apply for credit-bearing internships. Some internships have additional requirements. While some certificate and degree programs require internships, students in other programs may opt to complete an internship to gain valuable work experience or explore career options. A student must fulfill 45 hours of work for each credit awarded.

Each internship is based on learning objectives defined within a learning contract created jointly by the student, a faculty supervisor, and a host business or agency representative. Internships with nonprofit organizations are often described as service learning and are most often unpaid. Placements with for-profit organizations may be paid or unpaid.

Students should select applied learning experiences based on their transfer and career plans and discussion with their JCC academic advisors. Students who wish to arrange an applied learning experience should speak to a member of JCC's applied learning staff or a dean and/or designated faculty of the specific academic field

JCC also offers non-credit applied learning experiences through career mentoring, job shadowing, and workplace tours.

Please visit sunyjcc.edu/careerservices/internships to learn more.

Credit for Prior Learning

When you come to Jamestown Community College, you can earn Credit for Prior Learning (CPL) based on your life and work experiences. CPL converts into college credit that can be applied to your JCC degree, certificate, or microcredential.

You can earn CPL based on:

- Challenge exams
- Licensure or certification
- Life experience credit portfolio <https://www.sunyjcc.edu/support/success-center/life-experience-credit>.
- Military credit transfer
- Standardized exams
- Workforce Development programs

If you think you may be eligible for CPL, we encourage you to meet with the Success Center for academic advising as early as possible. Your CPL credits can be evaluated and processed before you register for classes. Please visit sunyjcc.edu/programs/cpl for more information.

DEGREES & CERTIFICATES

JCC, in affiliation with the State University of New York (SUNY), offers three types of degree programs:

- **Associate in Arts (A.A.)**
- **Associate in Science (A.S.)**
- **Associate in Applied Science (A.A.S.)**

The college also offers certificate programs which are described in this catalog.

Associate in Arts (A.A.)

JCC is authorized to offer the Associate in Arts (A.A.) degree in Liberal Arts and Sciences: Language, Literature, & Writing, Liberal Arts and Sciences: Social Sciences, and Global Affairs. The course of study for each consists primarily of courses in the liberal arts. The A.A. degrees are primarily intended to prepare students for transfer to a four-year college or university to enter a bachelor's degree program in a specialized area.

To earn the A.A. degree, a minimum of 45 credit hours of study must be taken in the liberal arts and sciences. The general degree requirements for the A.A. degrees are outlined in the program sections of this catalog.

Associate in Science (A.S.)

JCC is authorized to award Associate in Science (A.S.) degrees in addictions counseling, business administration, communication, computer science, criminal justice, cybersecurity, engineering, fine arts, homeland security, human services, individual studies, Liberal Arts & Sciences: Education, life sciences, media arts, music, music industry, physical education studies, sport management, and studio arts.

Intended as a transfer degree, the A.S. degree programs offered by JCC are designed to prepare students to enter a bachelor's degree program at a four-year college or university.

The A.S. degree programs provide a course of study which demonstrates a balance between the liberal arts and sciences and those courses related to specific professions. Students earning the A.S. degree are prepared to enter Bachelor of Science (B.S.) degree programs in such areas as art, engineering science, business, chemistry, biology, mathematics, geology, physics, computer science, communication, education, music, and human services.

To earn the A.S. degree, a minimum of 30 credit hours of study must be taken in the liberal arts and sciences. The general degree requirements for the A.S. degrees are outlined in the program sections of this catalog.

Associate in Applied Science (A.A.S.)

JCC is authorized to offer Associate in Applied Science (A.A.S.) degrees in the following areas: administrative professional, business administration, criminal justice, early childhood, health information technology, individual studies, information technology, mechanical technology, mechatronics, nursing, occupational therapy assistant, and welding technology.

The course of study for these degree programs includes a balance between courses related to career areas and the liberal arts and social sciences. The sequence of courses in A.A.S. degrees is designed to prepare the student for proficiency in a specific career and provide a minimum of 20 credit hours in the liberal arts and sciences. The remainder of each degree program consists of core courses related to a specific field and electives. Some A.A.S. degree programs require more than 60 credit hours for completion. The requirements for each A.A.S. degree are shown in the program section of this catalog.

Originally intended as career degrees, some A.A.S. degree programs are transferable to four-year colleges and universities. The development of new degree programs by four-year colleges and universities are designed to make it possible for some A.A.S. degree holders to transfer.

In recent years a growing number of JCC graduates with A.A.S. degrees transfer to bachelor's degree programs while others enter the workforce after graduation. Specific information about the transferability of the A.A.S. degree is available from program faculty or at the Success Center.

Certificate Programs

Any student who wishes to receive a certificate must complete all courses listed in the certificate with a minimum 2.0 cumulative average. If a student transfers in appropriate credits toward a certificate, a minimum of 15 JCC credits will be required to award the certificate.

Accreditation

Jamestown Community College is an accredited institution and a member of the Middle States Commission on Higher Education (MSCHE) www.msche.org. Jamestown Community College's accreditation status is accreditation reaffirmed. The Commission's most recent action on the institution's accreditation status in 2021 was to reaffirm accreditation. MSCHE is an institutional accrediting agency recognized by the U.S. Secretary of Education and the Council for Higher Education Accreditation (CHEA). JCC's curricula are approved by the State University of New York and are registered by the New York State Department of Education. In addition, the nursing program is accredited by the Accreditation Commission for Education in Nursing (ACEN) and the occupational therapy assistant program is accredited by the Accreditation Council for Occupational Therapy Education of the American Occupational Therapy Association.

The degree and certificate programs offered by Jamestown Community College include:

* Some courses are only offered Asynchronously (fully online) or Synchronously (via Zoom or other resource).

To facilitate completion of specified credentials across multiple sites, JCC may use ITV to ensure a critical mass of students is enrolled in a given course.

DegreeWorks

DegreeWorks is a web-based advisement tool that students should use to determine program requirements and monitor their academic progress. The DegreeWorks audit system provides information on completed and outstanding requirements necessary to complete a degree, so students easily understand what coursework is still needed. Students can access DegreeWorks through MyJCC on the college's website.

GRADUATION REQUIREMENTS BY DEGREE

General Degree Requirements

- Students must meet both program and degree graduation requirements in place at the time of first matriculation or any subsequent set of requirements. Requirements for additional degrees are based on matriculation into that program. Degree requirements are outlined throughout the Academic Information section of the catalog and specific program requirements are listed for each program in the following pages.
- Cumulative grade point average (GPA) of 2.0 or better in at least 60 credit hours. (A minimum of 30 credits must be earned from JCC.)
- Complete graduation application.

DEGREE			
REQUIREMENT	ASSOCIATE IN ARTS	ASSOCIATE IN SCIENCE	ASSOCIATE IN APPLIED SCIENCE
Liberal Arts & Sciences (NY State Education Department)	Minimum of 45 credits in any category.	Minimum of 30 credits in any category.	Minimum of 20 credits in any category.
SUNY General Education (SUNY)* Minimum of 30 credits in at least 7 of the 10 categories. <ul style="list-style-type: none"> • Math (MATH) (required) • Diversity: Equity, Inclusion, and Social Justice (required) • Natural Sciences (NSCI) (required) • Social Sciences (SOCS) • US History & Civic Engagement • World History & Global Awareness • Humanities (HUMN) • Arts (ARTS) • World Languages (FLAN) • Communication; Written & Oral (required) 	X	X	X <i>Minimum of 20 credits in at least 5 of the 10 categories.</i>
JCC Essential Requirements Level 1 - Inquire <ul style="list-style-type: none"> • INT 1555** (Inquiry Course) or an approved alternative inquiry course • ENG 1510 (English Composition I) Level 2 – Grow <i>(Individual courses may not be used to fulfill more than one Level 2 requirement.)</i> <ul style="list-style-type: none"> • ENG 1530 (English Composition II) • SUNY Mathematics (Mathematical Reasoning) • SUNY Natural Sciences (Scientific Reasoning) • SUNY Social Sciences (Scientific Reasoning) • Cultural Understanding Level 3 - Connect <ul style="list-style-type: none"> • Applied Learning** • Global Perspectives • SUNY Diversity (DEISJ) Additional Competencies <ul style="list-style-type: none"> • Critical Thinking • Information Literacy • Technological Competency • Values & Ethical Reasoning 	X	X	X

* Engineering requires a minimum of 30 credits in at least five of the 10 categories, including Communication (Written & Oral), DEISJ, Mathematics, and Natural Sciences.

** Effective for students who matriculate in a program for the first time beginning fall 2020 or thereafter.

Certificate requirements are specific to each program and are defined in the following pages.

COURSE INFORMATION

The following information is designed to assist students in the selection of appropriate courses to meet the Liberal Arts & Sciences (LAS) distribution requirements of a degree program.

Specific course attributes may be found on each institutional course syllabus and online through Banner at www.sunyjcc.edu.

Liberal Arts & Sciences Courses

Courses that hold a Liberal Arts & Sciences designation include those of a general or theoretical nature that are designed to develop judgment and understanding about human beings' relationship to the social, cultural, and natural facets of their total environment.

Humanities

In general, courses in Art (ART), English (ENG), Communication (CMM), Humanities (HUM), Drama (DAN, THE), Languages (ARA, ASL, CHI, FRE, RUS, SPA), Music (MUS), Philosophy (PHL), and Religion (REL) which focus on history, composition, theory, and/or appreciation within these disciplines are considered humanities courses. Courses within these disciplines that focus on performance, studio work, or practical experiences do not count as a humanities, but rather as career and/or electives. Current humanities courses include but are not limited to:

ARA 1510	CMM 1710	ENG 2560	HMT 2540	
ARA 1520	CMM 1750	ENG 2580	INE 2730	
ART 1500	CMM 2500	ENG 2590	INT 1750	REL 1530
ART 1530	CMM 2510	ENG 2610	LDR 1660	REL 2570
ART 1540	CMM 2530	ENG 2620	MUS 1510	REL 2580
ART 1550	CMM 2570	ENG 2650	MUS 1530	RUS 1510
ART 1560	CMM 2600	ENG 2660	MUS 1570	RUS 2560
ART 1670	CMM 2610	ENG 2730	MUS 1580	SPA 1500
ART 1730	CMM 2840	ENG 2740	MUS 1590	SPA 1510

Mathematics/Sciences

In general, courses in Math (MAT), Astronomy (AST), Biology (BIO), Chemistry (CHE), Engineering (ENR), Geology (GLG), Meteorology (MET), and Physics (PHY) are considered math or natural sciences courses. Some courses within Computer Science and Criminal Justice are also classified as sciences. Courses within these disciplines that focus on practical experiences do not count as mathematics & sciences courses, but rather as career and/or electives. Current mathematics and sciences courses include but are not limited to:

AST 1510	BIO 2532	CSC 1590		
BIO 1501	BIO 2561	CSC 1600	ENR 2580

Social Sciences

In general, courses in Anthropology (ANT), Sociology (SOC), Criminal Justice (CRI), Economics (ECO), History (HIS), Psychology (PSY), and Political Science (POL) are considered social sciences courses. Courses within these disciplines that focus on practical experiences do not count as social sciences courses, but rather as career and/or electives. Current social sciences courses include but are not limited to:

ANT 1510	ANT 2590	ECO 1530	HIS 1510	HIS 2570	LDR 1660	POL 2860	PSY 2520	PSY 2580	SOC 2510

Selected Studies

Each academic division may occasionally elect to offer courses of a topical or experimental nature which draw upon the special interests and expertise of the faculty members. These courses are numbered within the appropriate discipline at 7000- 7999 (freshman level) or 8000-8999 (sophomore level); i.e. CMM 8503: Selected Studies - Public Relations.

Selected Studies courses count as electives in JCC programs or may meet depth, distribution, or core requirements. Consult your faculty advisor or counselor for details.

Frequency of Course Offerings

All courses required to earn a specific associate degree are normally offered with such frequency that a full-time student can earn the degree in a two-year period.

Each course description has designations indicating during which semester and on which campus (Jamestown - J, Cattaraugus County Campus - C, and Online) the college intends to offer the course.

Certain courses do not have a designation indicating which semester they are offered. These courses may or may not be offered on the specified campus(es). The college reserves the right to cancel course offerings if enrollment is insufficient.

Course Numbering

Credit hours to be earned in each course are shown following the course title. Course numbers are designated as: 0000-0999 - imputed and developmental courses, 1000-1999 - freshman level courses, and 2000-2999 - sophomore level courses.

COURSE DESCRIPTIONS

Descriptions of the college's regular credit courses are listed on the following pages. The number of credit hours assigned to each course follows the description. Course numbers are designated 0000-0999 - imputed and developmental courses; 1000-1999 - freshman level courses; and 2000-2999 - sophomore level courses. All courses required to earn a specific associate degree are normally offered with such frequency that a full-time student can earn the degree in a two-year period.

Each course description has designations indicating which semester and on which campus (Jamestown - J, Cattaraugus County Campus -C, or Online) the college intends to offer the course. The college reserves the right to cancel course offerings if enrollment is insufficient. Current course, degree, and certificate information can be found at sunyjcc.edu. JCC also offers noncredit courses, seminars, and workshops. For more information, contact the Workforce Readiness Center.

Requisite Definitions

Students who have completed pre/corequisites with a passing grade at another institution must provide a copy of their unofficial transcript at the time of registration.

Prerequisite

A course or other requirement that must be completed prior to enrolling in another course.

Corequisite

A course or other requirement that must be completed during the same semester as another course.

Eligibility

Refers to an academic readiness to take certain courses through successful completion of previous coursework or placement testing.

Recommendation

A condition of enrollment that a student is advised to meet but not required to meet.

Placement Test

The college placement test assesses skills in mathematics, reading, and writing. If students choose to take any course for which there is a placement test prerequisite, they must take the appropriate test. As a rule, full-time students take the complete test during the application process and prior to registration. New part-time students are strongly encouraged to take the test prior to registration. Part-time students must take the placement test prior to enrolling in any course which has a reading, writing, or math prerequisite unless they qualify for an exemption.

Permission of Instructor

A course with this notation requires the student to meet with the instructor to receive permission to take the course.

Waiver of Pre-/Corequisites

If a student feels qualified to take a course for which they do not appear to have the formal prerequisite background, the student should contact the instructor of the course. If, in the estimation of the instructor, the student meets the prerequisites in some other way, the instructor may notify Records & Registration, either by email or by signing an instructor's permission card, which the student can then present to Records & Registration on the Jamestown Campus or the Student Services Center on the Cattaraugus County Campus. In the absence of the instructor, the waiver may be signed by the discipline coordinator/ director, or dean. Students cannot register for courses for which they do not have a pre/corequisite, permission from the instructor via email, or a signed waiver form.

Special Statement Regarding Sequential Coursework

In the case of sequential coursework (i.e. math and English) where the student's entry point may be determined by way of a placement procedure or successful completion of other coursework in the sequence, a student will have met a prerequisite or corequisite for a course in the sequence if they are eligible to register for a higher level course for which the current course is a prerequisite. That is, if a student is eligible to take course C in a sequence (where course A is a prerequisite for course B, and course B is a prerequisite for course C), the student has met pre- or corequisites for both course A and course B.

Current course, degree, and certificate information can also be found at sunyjcc.edu.

STATE UNIVERSITY OF NEW YORK

The first still-active institution of the State University of New York was officially founded at Potsdam in 1816. By 1862, the Morrill Act set the stage for the four Ivy League land-grant SUNY colleges that now exist at Cornell University. The actual SUNY system did not come together until February 1948 when New York was the last of the then 48 states to establish an official state university. At this time, SUNY consisted of a consolidation of 29 unaffiliated institutions with 11 of them functioning as teachers' colleges. All of these colleges had unique histories and a common goal to serve New York state. Since then, SUNY has grown to include 64 academic institutions that had formerly been independent institutions or were directly founded by the State University of New York.

SUNY institutions include everything from world-renowned community colleges to first-rate graduate schools that include the nation's top veterinary school. The System's highly regarded doctoral degree granting universities boast top research programs and attract experts in a variety of fields. SUNY has expanded to include more than 418,000 students enrolled in 6,688 programs of study. The scope of SUNY continues to increase.

Today, extensive study abroad opportunities exist, and majors range from childhood education to biomedical engineering. International students from over 160 countries attend a SUNY school.

SUNY has also created the SUNY Learning Network, one of the nation's largest distance learning programs which provides educational opportunities to more than 70,000 students through 4,000 courses and offers sixty degree and certificate programs.

The State University motto is: "To Learn-To Search-To Serve."

John Stitt	2028
Mark J. Ward, <i>Chairperson</i>	2027

Jamestown Community College is supported by a regional partnership among Cattaraugus County, Chautauqua County, and the City of Jamestown.

Mr. Andrew Burr.
Chairperson, Cattaraugus County Legislature

Paul M. Wendel, Jr.
Chautauqua County Executive

Kimberly Ecklund
Mayor of Jamestown

ADMINISTRATION

Kyle Brown (2012)
Executive Director of Technology
B.S., DeVry University
M.S., Bellevue University

Daniel DeMarte (2018)
President
A.S., SUNY College at Alfred
B.A., University at Buffalo
M.S., SUNY College at Buffalo
Ed.D., North Carolina State University

Karen Fuller-Markham (2013)
Vice President of Finance & Operations
A.S., Jamestown Community College
B.A., M.S., Saint Bonaventure University
SUNY Chancellor's Award for Excellence in Professional Service, 2021

Marsha Hern (2004)
Executive Assistant to the President & Assistant to the Board of Trustees
A.S., Jamestown Business College
A.A.S., Jamestown Community College
B.S., Houghton College

Jessica Kubiak (2010)
Vice President, Academic Affairs and Workforce Development
Certificate, University Pittsburgh
B.A., University of Pittsburgh-Bradford
M.S., Buffalo State College
Graduate Certificate, Indiana University
Ph.D., Old Dominion University
SUNY Chancellor's Award for Excellence in Teaching, 2020

Nicolette M. Riczker (2015)
Executive Director of Human Resources & Chief Diversity Officer
B.S., SUNY at Buffalo
M.P.S., Stony Brook University

Crystal G. Rose-Williams (2006)

Associate Vice President for Strategic Initiatives

A.S. Jamestown Community College

B.S., SUNY Fredonia

M.A., St. Bonaventure University

SUNY Chancellor's Award for Excellence in Professional Service, 2019

Ronald Shidemantle (2025)

Vice President of Student Experience

B.S., M.A., Slippery Rock University

FACULTY

Debra Bablak (2017)

Assistant Professor, Nursing

B.S.N., Edinboro University

M.S.N., Robert Morris University

Brian Barone (2004)

Assistant Professor, Criminal Justice

A.S., Jamestown Community College

B.S., SUNY Fredonia

M.S., Mercyhurst College

Amanda Bartels (2011)

Associate Professor, Mathematics

B.A., M.S., University of Albany

Shannon E. Bessette (2000)

Professor, Anthropology

B.A., Cornell University

M.A., University of Oklahoma

M.P.H., University of New England

SUNY Chancellor's Award for Excellence in Teaching, 2015

Jonathan Blair (2022)

Assistant Professor, Information Technology

B.S., University of Pittsburgh

M.S., Regis University

Sarah Bray (2013)

Associate Professor, Business - Cattaraugus County Campus

A.S., Jamestown Community College

B.S., Alfred University

M.B.A., Saint Bonaventure University

Graduate Certificate, Harvard Extension School

Heather Burrell (2011)

Interim Associate Dean, Health Sciences

Associate Professor, Nursing

A.A.S., Jamestown Community College

B.S.N., Florida Hospital College of Health Sciences

M.S.N., South University

D.N.P., Walden University

Dion Daly (2022)

Associate Professor, Business, Economics, & Global Affairs

B.S. SUNY University at Buffalo

M.S., Buffalo State College

M.B.A., D'Youville College

Ph.D., SUNY University at Buffalo

Kari Dundore-Shrout (2023)

Associate Professor, Biology and Chemistry

B.S., Juniata College

M.Ed., Edinboro University

Rose Dunn (2019)

Assistant Professor, Nursing

A.A.S., Jamestown Community College

M.A., Wilkes University

Lillian Emley (2024)

Assistant Professor, Chemistry & Biology

B.S., SUNY Albany

Ph.D., Albany Medical College

Neil Flory (2013)

Associate Professor, Music

A.A., Edison Community College

B.M.E., University of Central Florida

M.M., University of Florida

D.M.A., University of Texas at Austin

Jennifer Forney (2021)

Associate Professor, Business, Tourism, & Hospitality

A.A.S., Monroe Community College

B.S., University of Pittsburgh

M.S., Canisius College

Ph.D., Iowa State University

Morgan Franchina (2021)

Assistant Professor; Director, Success Centers

B.S., SUNY College of Technology at Alfred

M.S.Ed., University of Missouri

Renee Funke (2009)

Professor, Education

B.S., M.S., SUNY Fredonia

C.A.S., SUNY Buffalo State College

Ph.D., Northcentral University

SUNY Chancellor's Award for Excellence in Teaching, 2024

Marilyn C. Gerace (2005)

Assistant Professor, Criminal Justice - Cattaraugus County Campus

A.A., Jamestown Community College

B.A., SUNY Fredonia

M.S., Buffalo State College

Kylie Harris (2025)

Assistant Professor, Nursing

B.S.N., Edinboro University of Pennsylvania

M.S.N., Clarion/Edinboro Universities

M.Ed., Indiana University of Pennsylvania

Gilbert Higgins (2006)

Assistant Professor, English

B.A., University of Pittsburgh

M.A., Clarion University of Pennsylvania

Jacob Hordych (2018)

Assistant Professor, Sport Management & Physical Education Studies

B.S., Pennsylvania State University - Behrend Campus

B.S., M.S., Lock-Haven University

M.S., Mercyhurst University

Nathan Jeffery (2025)

Assistant Professor, Art & Design

B.F.A., Edinboro University of Pennsylvania

M.F.A., Miami University of Ohio

Allison Johnson (2021)

Assistant Professor, Nursing

B.S., Allegheny College

B.S.N., SUNY University at Buffalo

M.S.N., Case Western Reserve University

Amber R. Kautzman (2000)

Dean, Science, Technology, Engineering, & Mathematics; Associate Professor, Mathematics & Computer Science

B.A., Mercyhurst College

M.A., Miami University

SUNY Chancellor's Award for Excellence in Teaching, 2021

Tracy Kelly (2017)

Assistant Professor; Registrar

B.A., SUNY Buffalo

M.S., SUNY College at Buffalo

Francis LaChappelle (2012)

Assistant Professor, Human Services, Addictions Counseling, Psychology

B.S., University of Wisconsin-Stout

B.S., University of Wisconsin-Eau Claire

M.S.Ed., Saint Bonaventure University

Arnaud Lambert (2023)

Associate Dean, Public and Professional Services

Associate Professor, Anthropology and Sociology

B.A., University of Rhode Island

M.A., University of Iowa

Ph.D., Brandeis University

Traci Langworthy (2004)

Interim Dean, Arts, Humanities, and Social Sciences

Professor, History

B.A., Oberlin College

M.A., University of Delaware

A.B.D., Penn State Harrisburg

SUNY Chancellor's Award for Excellence in Teaching, 2023

Madison LaVallee (2021)

Associate Professor, Art

B.F.A., B.S., SUNY New Paltz

M.F.A., SUNY Albany

Ellen Lehning (2003)

Professor, Biology

B.S., M.S., Ph.D., Michigan State University

SUNY Chancellor's Award for Excellence in Teaching, 2016

Beth Lisi (2011)

Professor; Coordinator, Learning Center - Cattaraugus County Campus

B.S., St. Bonaventure University

M.A., California State University

Sara Luther (2022)

Assistant Professor, Nursing

M.S.N., Chamberlain University

B.S.N., Eastern Kentucky University

A.S.N., Jamestown Community College

Justin March (2011)

Associate Professor, English

B.A., Skidmore College

M.A., City College of New York

Heather Metzger (2022)

Associate Professor, Education

B.S., M.S., C.A.S., SUNY College at Buffalo

Deborah Miller (2024)

Assistant Professor, Business/Accounting

B.S., Houghton College

M.B.A., Baker College

Melanie Murphy (2024)

Instructor, Nursing

A.S., Jamestown Community College

B.S., M.S., Capella University

Sean Nowling (2012)

Associate Professor, Physics

B.S., Purdue University

M.S., Ph.D., University of Illinois at Urbana-Champaign

Jonathan D. O'Brian (1998)

Professor, History

A.A., Jamestown Community College

B.S., SUNY Fredonia

M.A., Ph.D., University at Buffalo

Christopher P. Reisch (2000)

Professor, Mathematics & Computer Science

B.A., B.A., Ed.M., Ph.D., SUNY Buffalo

SUNY Chancellor's Award for Excellence in Teaching, 2019

Michelle Richau (2023)

Instructor, World Languages & Global Affairs

B.A., Daemen University

M.A.Ed., Canisius University

M.A., Southern Oregon University

Krysta Rives (2024)

Assistant Professor, Health Information Technology

A.A.S., Jamestown Community College

B.S., Northeastern University

M.B.A., Ed.D., Capella University

Chelz Scott (2025)

Instructor, Anthropology and Sociology

A.A., SUNY Onondaga Community College

B.A., SUNY Oswego

M.A., SUNY University at Buffalo

Simone Sellstrom (2013)

Associate Professor, Communication

B.A., M.A., University of Arkansas

Dianna Shaw (2022)

Assistant Professor, Counselor

B.S., University of Pittsburgh

M.S.Ed., St. Bonaventure University

Tammy Smith (2006)

Professor; Counselor

B.A., SUNY Fredonia

M.S., Old Dominion University

Joseph Spess (2024)

Instructor, Mechanical Technology

A.A.S., Johnson College

B.S., Pennsylvania State University

Johnny Stein (2016)

Professor, English

M.A., Texas Woman's University

Ph.D., University of Texas at Arlington

Jessica Swanson (2021)

Associate Professor, Occupational Therapy Assistant

A.A.S., Jamestown Community College

M.S., B.S., Gannon University

O.T.D., Chatham University

Sarah Tranum (2000)

Professor, Occupational Therapy Assistant

A.A.S., Erie Community College

B.S., SUNY Buffalo

M.S., SUNY College at Buffalo

SUNY Chancellor's Award for Excellence in Faculty Service, 2023

Jennifer Visbisky (2004)

Associate Professor, Nursing - Cattaraugus County Campus

A.S., B.S., University of Pittsburgh

M.S.N., University of Phoenix

SUNY Chancellor's Award for Excellence in Teaching, 2022

Kassandra Wegner (2019)

Assistant Professor; Reference Librarian

B.A., M.S.L.S., University at Buffalo

Karen J. Weyant (2001)

Associate Professor, English

B.A., University of Pittsburgh

M.A., Clarion University of Pennsylvania

M.F.A., University of Arkansas at Monticello

SUNY Chancellor's Award for Excellence in Scholarship & Creative Activities, 2011

Laura Williams (2008)

Assistant Professor, Nursing

A.A.S., Alfred State University

B.S.N., SUNY Brockport

M.S., Daemen College

Dale Yerpe (1976)

Professor, English

B.A., M.S., SUNY Fredonia

M.A., Middlebury College

SUNY Chancellor's Award for Excellence in Teaching, 1998

Erin Zeiders-Weber (2010)

Associate Professor, Mathematics

A.S., Jamestown Community College

B.A., M.A., SUNY Potsdam

Josh Zeiders-Weber (2025)

Assistant Professor, Psychology

A.S., Jamestown Community College

B.A. SUNY Potsdam

M.S., Walden University

Stephanie M. Zwylghuizen (2000)

Professor, Mathematics

B.S., Grand Valley State University

M.S., Northern Arizona University

All Programs

0212 - Liberal Arts-Social Science-AA

Overview

Program Code	Divisions	Degree Designation
0212	Arts/Humanities/Social Science	AA

Program Description

This degree program prepares students for transfer to a four-year college or university to earn a baccalaureate degree in an area of the social sciences. The social and behavioral sciences examine the development and activity of human beings both as individuals and in society. Disciplines in the social sciences include anthropology, history, global studies, political science, economics, geography, criminal justice, psychology, and sociology. JCC's social sciences curriculum is an excellent transfer program since it parallels the first two years of most baccalaureate liberal arts programs. Working closely with their faculty advisors, students can select their courses to meet degree requirements and be prepared to complete a baccalaureate degree at a transfer institution with two additional years of full-time study. Many graduates of four-year programs whose bases are in the social sciences seek careers in psychology, teaching, government, and social work. Students can choose to earn the general degree or can choose to earn the degree with a concentration in economics, psychology, or sociology (each a SUNY Transfer Path).

Information And Additional Notes

*To earn the degree, students must have courses from at least three different social sciences areas, at least 3 credits must be numbered 2000 or higher. These areas include the ECO, ANT, GEO, GLS, HIS, POL, PSY, or SOC disciplines. This requirement may be filled through Program Core Electives.

0530 - Engineering Science - AS

Overview

Program Code	Divisions	Degree Designation
0530	Science/Technology/ENR/ AS MAT	

Program Description

This degree program is designed to prepare students to transfer to a four-year college or university to earn a bachelor's degree in engineering. This degree program provides appropriate preparation for continued study toward careers in mechanical, chemical, civil, industrial, ceramic, aerospace, nuclear, environmental, or metallurgical engineering. Program completion will require students to attend some classes on the Jamestown Campus.

Information And Additional Notes

- Students in this program are required to fill only 5 of the 10 SUNY Gen Ed categories with a total of 30 credits. The 5 categories must include Communication (Written & Oral), DEISJ, Mathematics, and Natural Sciences. All other programs require 7 of 10 categories and 30 credits.
- Choosing electives carefully, with the help of an advisor, students can complete a focus in aerospace/mechanical, biomedical/chemical, civil, environmental, or industrial engineering.

0532 - Computer Science - AS

Overview

Program Code	Divisions	Degree Designation
0532	Science/Technology/ENR/ AS MAT	

Program Description

The Computer Science degree at Jamestown Community College prepares students for transfer to a four-year college and major in computer science. Students can pursue careers in UX design, programming, artificial intelligence, virtual reality, app development, and cybersecurity.

JCC's program is built around a central theme: using software as a powerful tool to solve meaningful problems. We emphasize the development of critical thinking and logical reasoning, providing you with a foundation in advanced mathematics and computer theory to tackle challenges in fields from artificial intelligence to cybersecurity.

Information And Additional Notes

- Several upper-level computer science courses are only offered online.

0622 - Nursing - AAS

Overview

Program Code	Divisions	Degree Designation
0622	Health Sciences	AAS

Program Description

Upon completion of the nursing program, the graduate will be educationally prepared to provide patient-centered care to individuals across the lifespan with diverse cultures who are experiencing disruptions in biophysical and psychosocial dimensions in a variety of healthcare settings. The graduate will provide care utilizing the National League for Nursing (NLN) Association Degree (AD) competencies, Quality and Safety Education for Nurses (QSEN) competencies; and practice within the three roles of the AD nurse. The graduate will be prepared to take the National Council of State Boards for Licensure Examination (NCLEX-RN) to become a nurse.

Information And Additional Notes

- BIO 2510: Anatomy and Physiology I must be completed with a minimum grade of "C" prior to taking NUR 1520. Students in NUR 1510 may not progress to NUR 1520 with a grade lower than a "C." Students receiving a grade lower than a "C" in either BIO 2510 or NUR 1510 will be administratively dropped from the nursing program and will be required to reapply for admission.
- BIO 2520: Anatomy and Physiology II must be completed with a minimum grade of "C" prior to taking NUR 2510. Students in NUR 1520 may not progress to NUR 2510 with a grade lower than a "C." Students receiving a grade lower than a "C" in either BIO 2520 or NUR 1520 will be administratively dropped from the nursing program and will be required to reapply for admission.
- BIO 2531: Microbiology Lecture and BIO 2532: Microbiology Lab must be completed with a minimum grade of "C" prior to taking NUR 2520
- A minimum grade of C is required in each nursing core course. A student will be permitted to repeat one nursing core course (NUR 1510, NUR 1520, NUR 2510, and NUR 2520) one time. Students who are unsuccessful in repeating any nursing core course are ineligible to continue in the nursing program. Students who are unsuccessful in more than one nursing core course and have already repeated one core course will not be eligible to repeat a second nursing core course. Withdrawal from a core nursing course after the first 30 calendar days will be considered a failure of the course for reapplication purposes. In case of illness or other extreme circumstances, the faculty may consider a one-time exception. A student seeking a waiver of the two-course limit should contact the nursing program director for more information.

0632 - Business Administration - AAS

Overview

Program Code 0632	Divisions Public & Professional Services	Degree Designation AAS
-----------------------------	---	----------------------------------

Program Description

This degree program offers students the opportunity to obtain a broad business foundation and the knowledge, skills, and values necessary for a variety of entry-level positions in business. This career program is designed to provide the student with the skills necessary to function in a professional, competent manner in business organizations. Students will take courses in accounting, management, law, computer applications, and courses that are related to business. Decision-making skills are stressed throughout the program as well as consensus-building skills that support working in team situations. Program is also available online.

0640 - Criminal Justice-Police - AAS

Overview

Program Code	Divisions	Degree Designation
0640	Public & Professional Services	AAS

Program Description

This degree program provides students with the occupational skills and background necessary for entering employment into a variety of criminal justice professions such as law enforcement on the local and state level, corrections, and private sector investigative and public safety occupations. This also provides students with a broader understanding of human nature through general education.

Information And Additional Notes

- Credit for criminal justice courses may be given to students who have successfully completed an accredited Basic Recruit School for Police. Arrangements for this corresponding credit must be made through the criminal justice coordinator or admissions director.

0644 - Life Sciences-AS

Overview

Program Code	Divisions	Degree Designation
0644	Science/Technology/ENR/ MAT	AS

Program Description

Jamestown Community College's Life Sciences associate degree provides a strong foundation in biological and chemical principles, scientific inquiry, and critical thinking skills. This program prepares graduates for transfer to four-year institutions or entry-level careers in life science fields by fostering a deep understanding of the natural world, encouraging interdisciplinary collaboration, and promoting laboratory experiences. Our comprehensive curriculum will inspire your curiosity, cultivate your problem-solving abilities, and equip you with the knowledge necessary to contribute meaningfully to scientific advancements and the betterment of society.

Information And Additional Notes

Note: Students must complete at least 30 hours of SUNY General Education courses that are distributed among at least seven of the 10 SUNY content categories.

A GPA of at least 2.0 in math/science coursework is required for graduation.

CHE 1500 and CHE 1530 - only one may count as a program core elective. If both are taken, one will count as a program core elective and the other as an additional liberal arts & sciences and/or career elective.

0665 - Occupational Therapy - AAS

Overview

Program Code	Divisions	Degree Designation
0665	Health Sciences	AAS

Program Description

Upon completion of the Occupational Therapy Assistant program, graduates earning an associate degree will be prepared to support individuals, groups, and populations in engaging in meaningful activities that promote health, well-being, and daily function. In traditional settings, Occupational Therapy Assistants work under the supervision of registered occupational therapists, delivering client-centered care that enhances independence, adapts environments, and fosters participation in everyday life. Additionally, graduates are well-qualified to pursue opportunities in non-traditional practice areas. The program integrates biological, psychological, and social sciences with professional coursework, emphasizing human development, the impact of injury and illness on daily occupations, and strategies for restoring and enhancing function. Students gain hands-on experience in assessing occupational performance, setting client goals, implementing evidence-based interventions, and documenting therapy outcomes. With a strong focus on collaboration, adaptability, and holistic care, graduates will be equipped to work with individuals across the lifespan, helping them achieve their highest level of independence. Some program courses will require in-person attendance on the Jamestown Campus.

Information And Additional Notes

- MAT 1540 is recommended and most widely transferred into OT programs.
- ENG 1540 is recommended for transfer.
- Students must earn a grade of C or better in all OTA courses in order to subsequent semesters.
- Students wishing to transfer must pass the BIO 2510 and 2520 sequence with a C or better.
- Students wishing to go directly into the profession can choose the BIO 2510/2520 sequence or BIO 1501 AND BIO 1502/HCR 2100 sequence. These students must take a 1 credit elective to graduate.
- Students wishing to transfer must earn a C or better in BIO 2520.
- Students must pass BIO 2510 in order to register for BIO 2520.
- Students taking BIO 1501 and BIO 1502 must take HCR 2100.
- Students wishing to transfer must earn a C or better in MAT 1540.
- Students must pass OTA 2700 with a C or better in order to take OTA 2720.
- See more important program information at sunyjcc.edu/programs/occupational-therapy-assistant-aas

0671 - Business Administration - AS

Overview

Program Code 0671	Divisions Public & Professional Services	Degree Designation AS
-----------------------------	---	---------------------------------

Program Description

This degree program prepares students for transfer into bachelor-level programs in business and many business-related majors. This degree allows for flexibility in selecting major and elective courses, enabling students to match the requirements set by transfer institutions. Students who successfully complete this degree can transfer into programs that lead to professional careers including accounting (CPA or CMA), business administration, financial management, human resource management, industrial relations, international business, management science, marketing, production control, and others. Working with their faculty advisor, JCC students can create a program that will help them achieve full junior status upon completion and transfer. Program is also available online.

0682 - Fine Arts - Music - AS

Overview

Program Code	Divisions	Degree Designation
0682	Arts/Humanities/Social Science	AS

Program Description

This degree program prepares students for transfer to a four-year baccalaureate degree in music or a music-related field. It includes a strong core component of mathematics/science, social sciences, and humanities. The program also serves the student interested in an associate's degree as a terminal degree before pursuing employment in music or a music-related career. Students from other areas of study such as communication, multimedia, theatre, education, arts management, sound recording, audio engineering, and therapy find JCC's course offerings useful. Full- and part-time students are welcome to participate in music courses and ensembles. Program completion will require students to attend some classes on the Jamestown Campus.

Information And Additional Notes

- Although the JCC program is endorsed by specific four-year colleges, schools of music will audition all entering freshman and transfer students from any other school in the following areas: solo performance, aural skills, written theory, and, often, piano skills. JCC students should consult with their advisor and prospective transfer school(s) to ensure that they are covering these important areas as required.
- Students should consult with their advisor in their choice of additional music electives to better prepare for transfer or employment.

0938 - Practical Nursing (LPN)

Overview

Program Code 0938	Divisions Health Sciences	Degree Designation CERT
-----------------------------	-------------------------------------	-----------------------------------

Program Description

The Practical Nursing (LPN) program provides students with the essential skills and knowledge to deliver safe, patient-centered care in various healthcare settings. Through a combination of classroom instruction, hands-on clinical experience, and simulations, students will learn nursing fundamentals, medical procedures, and patient care techniques. Upon completion, graduates will be prepared to take the NCLEX-PN exam to become licensed practical nurses, ready to contribute to the healthcare workforce with competence and compassion.

Note: The Practical Nursing (LPN) program is designed with two distinct pathways, both ultimately leading to the LPN certificate. One of these pathways will incorporate advanced science courses, offering the opportunity for students to seamlessly bridge into the existing RN program in the future.

Information And Additional Notes

- A minimum grade of C is required in each nursing core course. A student will be permitted to repeat one nursing core course (LPN 1110, LPN 1120, LPN 1130, and LPN 1140) one time. Students who are unsuccessful in repeating any nursing core course are ineligible to continue in the nursing program. Students who are unsuccessful in more than one nursing core course and have already repeated one core course will not be eligible to repeat a second nursing core course. Withdrawal from a core nursing course after the first 30 calendar days will be considered a failure of the course for reapplication purposes. In case of illness or other extreme circumstances, the faculty may consider a one-time exception. A student seeking a waiver of the two-course limit should contact the nursing program director for more information.
- BIO 2510: Anatomy and Physiology I and BIO 2520: Anatomy and Physiology II must be completed with a minimum grade of "C"

0968 - Early Childhood Developme-Cert

Overview

Program Code	Divisions	Degree Designation
0968	Public & Professional Services	CERT

Program Description

This certificate program enables students to obtain the skills, values, and knowledge necessary to work in entry-level positions in early childhood education/childcare such as assistants in preschools, childcare centers and family day care homes, and in school-age childcare settings. In addition, the program provides opportunities for those already employed in childcare facilities, including family care providers and those holding the Child Development Associate (CDA) credential, to update and refresh their knowledge and skills. The program also provides interested students the opportunity to continue their education beyond the level of a certificate to that of an associate in applied sciences in human services with the added possibility of transferring to a bachelor's level program in early childhood education. This certificate can be used as part of a more complete career ladder in early childhood education and care.

1175 - Human Services - AS

Overview

Program Code	Divisions	Degree Designation
1175	Public & Professional Services	AS

Program Description

This degree program is designed to prepare students for transfer into baccalaureate programs in social work, human services, counseling, psychology, early care and education, and other related fields. While providing a foundation of knowledge in human services, students will choose electives that match their career goals in fields such as mental health; early care and education; gerontology; alcohol and chemical dependency; and developmental, cognitive, and physical disabilities and rehabilitation services. Students will prepare for transfer and employment by completing a one- semester internship and additional liberal arts and sciences electives.

Information And Additional Notes

- Students must be willing to obtain and pay for any necessary physical or medical examinations or tests which are required by some internship agencies.
- Enrollment in the human services program does not guarantee acceptance into field placements in the human services program. A criminal history or indication of child maltreatment may jeopardize the student's acceptance into a field placement agency.
- Students must complete an application for internship and approval of the application is required for all field placement courses in human services. Some internship agencies require FBI or Child Abuse Registry checks. These processes can be lengthy and may require up to four months in order for approval to be obtained prior to placement.

1327 - Early Childhood - AAS

Overview

Program Code	Divisions	Degree Designation
1327	Public & Professional Services	AAS

Program Description

This degree program is designed to develop the skills needed to be a successful early childhood professional and is directed toward students planning to work with young children in a variety of early care and education settings, in titles such as assistant teacher or lead teacher in preschools, childcare centers, and in school-age childcare settings. In addition, the program provides opportunities for those already employed in childcare facilities, including family care providers and those holding Child Development Associate (CDA) credentials, to update and refresh their knowledge and skills. Early childhood educators need to teach and develop programs, cultivate strong written and oral communication skills, and inform the public about children and family issues. The program also provides students with the opportunity to continue their education beyond the level of a certificate to that of an A.A.S. in early childhood education with the added possibility of transferring to a bachelor's level program in early childhood education.

Information And Additional Notes

- Individuals who have earned the Child Development Associate (CDA) will receive these 11 JCC credits: EDU 1250, EDU 1260, EDU 1290, and EDU 2210.
- Students must be willing to obtain and pay for any necessary physical or medical examinations or tests, which are required by some internship agencies.
- Early childhood development certificate courses are designed as a career ladder leading to the associate degree. They, therefore, change according to changes in New York State education requirements.
- Enrollment in the program does not guarantee acceptance into field placements in the program.
- Students must complete an application for EDU 2210: Field Placement I, and approval of the application is required for the filed placement to commence. EDU 1290 with a grade of C or better is the prerequisite.
- Some internship agencies require FBI or Child Abuse Registry checks. These processes can be lengthy and may require up to four months in order for approval to be obtained prior to placement.
- Field placement will take place with children in an educational setting.

1445 - Fine Arts - Studio Arts - AS

Overview

Program Code	Divisions	Degree Designation
1445	Arts/Humanities/Social Science	AS

Program Description

This degree program includes courses in design, drawing, painting, sculpture, ceramics, photography, video, animation, art history and digital arts. Introductory courses provide students with engaging hands-on experiences, while integrating technical skills and knowledge of contemporary art. Later coursework will foster opportunities for students to refine skills while contemplating ideas and developing a body of work. The art and design facilities, technology labs and access to the Weeks Gallery at JCC will provide avenues for students to hone their skills, experiment with ideas, and become knowledgeable about creative processes. Program completion will require students to attend some classes on the Jamestown Campus.

Information And Additional Notes

- Students should consult with their advisor in their choice of program electives to better prepare for transfer or employment.
- The importance of developing a good portfolio of visual art experiences cannot be overstated. Almost all career opportunities will be based on the quality of your portfolio. Students must learn the due date for application and portfolio review from transfer institutions.

144A - Fine Arts-SA-Graphic Design-AS

Overview

Program Code	Divisions	Degree Designation
144A	Arts/Humanities/Social Science	AS

Program Description

This degree program includes courses in graphic design, typography and layout, video and sound, animation, drawing, three-dimensional design, and photography. Introductory courses provide students with technical skills and software knowledge to produce engaging visual communication projects. Later coursework will foster opportunities for students to refine skills, create meaningful design, and develop a professional portfolio. The art and design facilities, technical labs, and access to visual resources on campus, such as the Weeks Gallery, will provide students with a solid foundation in design and sought-after skill sets. Program completion will require students to attend some classes on the Jamestown Campus.

Information And Additional Notes

- Students should consult with their advisor in their choice of program electives to better prepare for transfer or employment.
- The importance of developing a good portfolio of visual art experiences cannot be overstated. Almost all career opportunities will be based on the quality of your portfolio. Students must learn the due date for application and portfolio review from transfer institutions.

1492 - Information Technology - AAS

Overview

Program Code	Divisions	Degree Designation
1492	Science/Technology/ENR/ MAT	AAS

Program Description

This degree program will help students develop both an in-depth understanding of computing technology fundamentals and the skills necessary for implementation in selected environments. Students complete several core courses and then select from a number of liberal arts and career electives. The wide range of electives provides flexibility for students as they select courses that further their technology-related career goals. Graduates are able to identify technology needs and specify appropriate systems. They have the skills to perform installation, configuration, maintenance, troubleshooting, and documentation services. Depending on their choice of electives, students are directly employable in the areas of computer support, application support, help desk support, and network and database support. Program is also available online.

1643 - Welding Technology - AAS

Overview

Program Code	Divisions	Degree Designation
1643	Science/Technology/ENR/ MAT	AAS

Program Description

This degree program is for students desiring employment in the expanding field of welding and welding technology engineering. Graduates will have the opportunity to pursue careers such as welding technician, welding supervisor, inspector, and sales engineer, qualifying for technician level positions involved in testing and improving welding processes, procedures, and equipment. Graduates also have the option of transferring to four-year institutions offering a bachelor's degree in welding engineering technology.

Information And Additional Notes

- To complete the program in two years, students must begin in a fall semester.
- With the appropriate background, students may elect to take MAT 1600 or MAT 1710; PHY 1610 and PHY 1620; or PHY 1710 and PHY 2710; or CHE 1551 AND CHE 1552 as Mathematics and Sciences courses. Students should discuss course selection with their advisor.

Overview

Program Code	Divisions	Degree Designation
1659	Public & Professional Services	AS

Program Description

This degree program focuses on courses in the liberal arts and physical education theory and activity with an emphasis on health awareness, sportsmanship, and professionalism. Students will graduate from the program with a specific knowledge base and experiences in the areas of movement, sport/athletics, recreation, and the life sciences. Individual and dual sports, fitness and conditioning, team sports, recreation, and health are among the areas that will be studied. Program completion will require students to attend some classes on the Jamestown Campus.

Information And Additional Notes

- Requirements for bachelor's degrees in this field vary. Selection of electives should be made in close consultation with an advisor and should be based on student career specialization and transfer college requirements.

1802 - LAS: Childhood Ed-Teacher Ed

Overview

Program Code	Divisions	Degree Designation
1802	Public & Professional Services	AS

Program Description

JCC's teacher education transfer degree programs provide students with knowledge, skills, theory, and hands-on educational experiences that will prepare them for transfer to a four-year institution with New York State teacher certification authority. Graduates will be able to transfer with full credit and junior status into participating SUNY four-year teacher education programs. Students will begin fulfilling their liberal arts specialization requirements along with courses in education theory and practice. Specialization areas include biology, chemistry, earth science, English, world language, general science, history/social studies, mathematics, and physics. This program is designed to prepare students for transfer to classroom teacher preparation programs in the areas of childhood education (grades 1-6) with middle school extension (grades 7-9 subject area) at four-year institutions with New York State teacher certification authority. Students who plan carefully can normally be expected to transfer to a four-year institution as juniors. The transfer institutions may have differing requirements. Students should plan their programs with a transfer counselor and an academic advisor as soon as possible and preferably before beginning their first semester at JCC.

Information And Additional Notes

- * Some courses may meet additional program requirements which may result in additional elective availability.
- Students planning to transfer should work closely with a transfer counselor and an academic advisor.
- Students planning to transfer to a four-year SUNY institution to complete their teacher education baccalaureate degree must complete the entire SUNY General Education Requirements (SUNY-GER) plus an additional three credits of world language. Students must work closely with an academic advisor when choosing the courses to fulfill SUNY General Education Requirements.
- EDU 1290, 1510, 2150, 2210, 2220, and 2460 all include a field component. The number of field hours varies by course.

1846 - Web Design - Cert

Overview

Program Code	Divisions	Degree Designation
1846	Science/Technology/ENR/ MAT	CERT

Program Description

This certificate program helps meet the growing demand by industry for people knowledgeable about web page design and Internet-related issues. It provides the student with a strong base in computer technology, complemented by an understanding of design principles. Students who successfully complete the web design certificate meet entry-level requirements for employment as a web designer or website support specialist.

Information And Additional Notes

- Several upper-level computer science courses are only offered online.

1922 - Welding Technology - Cert

Overview

Program Code	Divisions	Degree Designation
1922	Science/Technology/ENR/ MAT	CERT

Program Description

This certificate program offers students the opportunity to pursue a specific educational specialization in the field of welding technology. Successful students will earn a certificate which includes coursework and hands-on experience in high technology welding as well as general education courses. This program is an excellent starting point for new students in welding technology and as a foundation for earning the A.A.S. degree in welding technology.

Information And Additional Notes

- To complete the program in two semesters, students must begin in a fall semester.

1969 - Health Information Technol-AAS

Overview

Program Code	Divisions	Degree Designation
1969	Public & Professional Services	AAS

Program Description

This career program provides students with the skills necessary to prepare for employment in today's medical office/health information departments. The program offers an education that will prepare a student in automated medical office communications, medical terminology, medical coding, healthcare documentation, medical transcription and medical insurance, as well as advancing the implementation and effective management of electronic health records (EHRs). The program also provides a broad background in liberal arts that will add to students' ability to develop decision-making skills. Upon completion of this program, students will be able to enter the job market or transfer to a four-year institution. Program is also available online.

2027 - Machine Tool Technology - Cert

Overview

Program Code	Divisions	Degree Designation
2027	Science/Technology/ENR/ MAT	CERT

Program Description

This certificate program provides foundation skills necessary for workforce personnel whose jobs require knowledge of machine tools. It will provide a credential that indicates to employers that the student has completed fundamental coursework in machine tools. Students will become proficient in the operation of basic machine tools such as lathes, milling machines, grinders, drill presses, and precision measurement equipment. Basic courses are designed to build and strengthen knowledge of machine tool theory. Courses in solid modeling and CNC programming are included to provide an introduction to two specific areas that are important for an overall understanding of the field. Students will also develop skills in basic mathematics and writing appropriate to a machinist position.

Overview

Program Code	Divisions	Degree Designation
2050	Public & Professional Services	AS

Program Description

This degree program is designed for students who are interested in future employment within the field of alcohol, substance abuse, and other addiction treatment. Graduates of the program will fulfill New York State's educational requirements for a CASAC-TR license. Students in the program will develop knowledge of the nature and history of addiction and chemical dependency, and learn skills needed for intake assessment, treatment planning, case management, individual and group counseling. Students will participate in a fieldwork experience which provides 135 hours of practical, supervised field experience in an addiction's agency. Program is also available mostly online.

2432 - Global Affairs - AA

Overview

Program Code	Divisions	Degree Designation
2432	Arts/Humanities/Social Science	AA

Program Description

This degree program prepares students to operate in an increasingly interconnected world by promoting critical perspectives on the social, cultural, environmental, political, and economic issues and processes associated with globalization. By exposing students to a variety of academic disciplines and world cultures, the program seeks to strengthen needed competencies for continued education in any number of fields, in particular those related to global, international, or cultural studies. The idea that we exist in a complex web of interrelations serves as the core of the program that ultimately aims to foster a sense of responsibility toward the human community and the responsiveness to effect positive change toward a future of peace and conflict management.

2450 - Mechatronics

Overview

Program Code	Divisions	Degree Designation
2450	Science/Technology/ENR/ MAT	AAS

Program Description

Mechatronics is an interdisciplinary field that combines elements of engineering, machining, information technology, robotics, and electronics. It synergizes these diverse fields to keep production lines, manufacturing floors, and industry processes working smoothly. Graduates of this program will be prepared to operate and maintain electro-mechanical systems found in automated or robotically controlled environments. Program components include comprehensive analysis, assembly, and troubleshooting techniques, which are reinforced through laboratory experiences. Program will require students to attend some classes on the Jamestown Campus.

2476 - Admin Professional - AAS

Overview

Program Code	Divisions	Degree Designation
2476	Public & Professional Services	AAS

Program Description

This degree program provides the student with the skills necessary to prepare for employment in today's technology-enhanced office settings. Training is available for those who have had no office preparation and for students with limited office skills who desire to enhance or update present skills. The program emphasizes written communication in a variety of formats using technologically advanced equipment, financial tasks, management of records and files, and the use of a variety of software packages. The ability to develop decision-making and problem-solving skills will be stressed throughout the program. Upon completion of the program, students will be able to enter the workplace or transfer credits to a four-year institution. Program is also available online.

2477 - Admin Professional - Cert

Overview

Program Code	Divisions	Degree Designation
2477	Public & Professional Services	CERT

Program Description

This certificate program provides the student with the skills necessary to prepare for immediate employment in an office position. Training is available for those who have had no office preparation and for students with limited office skills who desire to enhance or update present skills. The program may also offer short-term training and development to those who may be seeking a career change or return to the job market. The ability to solve problems will be stressed throughout the certificate program. This certificate provides a basic core of work that may be applied toward the associate degree requirements. Students often combine this certificate with two-year associate degree programs from other areas. The combination enhances employment opportunities. Program is also available online.

2595 - Cybersecurity - AS

Overview

Program Code	Divisions	Degree Designation
2595	Science/Technology/ENR/ MAT	AS

Program Description

Cybersecurity has become a major concern for organizations and individuals who utilize computers. This program is designed to provide students with an understanding of computers, computer networks and the vulnerability of those systems, and methods for addressing cyber threats. Students will study a variety of tools, policies, and procedures designed to address vulnerabilities and minimize cyber threats.

Students will be prepared to complete industry certification in computer hardware and system software, networking, and security. This degree program is designed for students who plan to transfer to a four-year college or university to major in cybersecurity or computer science. Program is also available online.

Information And Additional Notes

- Students are initially placed in a mathematics course based on their mathematics background. Students that do not place in college-level mathematics may need more than two years to complete this degree.
- Work with your advisor to determine the MAT courses required at your selected transfer school. MAT 1670 and MAT 1710 are required for Computer Science transfer at SUNY schools. MAT 1720 may also be required at some transfer institutions.
- Several upper-level computer science courses are only offered online.
- Additional fees will be required if students choose to take industry certification tests such as CompTIA A+, Network +, and Security +. Additional fees will be required if students choose to take industry certification tests such as CompTIA A+, Network +, and Security +.

ANT1530 - Anthropology of Supernatural

Overview

Course Description

Students will examine cultural expressions of belief in the supernatural, focusing specifically on people's ideas about magic, witchcraft, and religion. This course takes a wide-ranging and cross-cultural approach to studying religious beliefs and behaviors. Although this class focuses on the "indigenous" religions of Africa, Asia, Australia, the Pacific, and the Americas; elements of the "world religions" such as Christianity, Judaism, and Islam are also discussed. Students will have the opportunity to contrast other people's beliefs and practices with their own and develop a deeper understanding of the role of religion in the human experience. Eligibility: ENG 1510 without supports or Corequisite: ENG 1510 with supports. J occasionally; C occasionally.

ANT1540 - World Archaeology

Overview

Course Description

Students will be introduced to the field of archaeology and the importance of learning about the human past through its material remains. Using the methods and theories of archaeology, this course will explore the cultural evolution of our human lineage. We will look at several of the remarkable migrations that resulted in the peopling of the earth, explore changes in artistic expression and technology, and talk about the transitions from hunter-gatherer societies to complex agricultural states. In examining the broad patterns of the human past, we will explore how archaeology can be used to address current and emerging social issues. No requisites. Eligibility: ENG 1510 without supports or Corequisite: ENG 1510 with supports. J, fall.

ANT2014 - HONORS SYM-Herbs & Snake Oils

Overview

Course Description

This course seeks to understand the relationships between human beings and plants in the quest to seek wellness and harmony. From the herbal and natural remedies of trained practitioners and the highly regulated pharmaceuticals developed from flora and fauna to the pushers of snake oils and drugs, this course will explore the worldviews that dictate who has the right to diagnose, produce, sell, and consume which substances. Students will be challenged to take a critical look at the history of prohibition, the war on drugs, and legalization of controlled substances in the United States and abroad. Students will explore questions such as the following: Why do people self-medicate? What is the difference between drugs and medicines? What is the global impact of drugs? and What economic, environmental, and sociological impacts do drugs and medicines have on communities and individuals? Topics include Indigenous Knowledge Systems, trafficking, the global war on drugs, addiction, self-medication, informal economies, cultural capital, cultural supremacy, commodification, worldview, taboos, sacred, profane, and ecological resources.

ANT2510 - Indigenous Peoples/Nrt America

Overview

Course Description

This course explores the cultural diversity, ways of life, history, and present-day realities of the indigenous peoples of North America. This course will be particularly geared towards overcoming persistent and incorrect stereotypes among non-indigenous Americans about indigenous peoples. The course will use ethnographic studies and indigenous scholarship to highlight their rich cultural diversity. In addition, this course will examine the continuing struggles of indigenous nations for sovereignty and survival against colonialism. ANT 1520 is suggested but is not a prerequisite. ANT2520 - Peoples/Cultures of World

Overview

Course Description

Students will survey the indigenous peoples and cultures of the modern world by examining ethnographic studies of peoples from a selection of major culture areas outside of Europe: Africa, the Middle East, South Asia, Southeast Asia, East Asia, the Pacific Islands and Australia, North America, or South America. Through this class, students will gain a critical understanding of world cultures and the utility of ethnography as a means for exploring specific cultures and ethnology as a basis for cross-cultural comparison and comprehension. ANT 1520 is suggested but not a prerequisite. Eligibility: ENG 1510 without supports or Corequisite: ENG 1510 with supports. J occasionally.

ANT2560 - Intro to Forensic Anthropology

Overview

Course Description

Students will be introduced to the fundamentals of forensic anthropology. Forensic anthropology has historically been considered to be a sub-discipline within the broader context of biological anthropology, but now incorporates elements of osteology, archaeology, cultural anthropology, and other areas of study. Forensic anthropologists work with medical teams, law enforcement, and government agencies to solve problems of medicolegal significance that generally involve human bodies. They also lend their expertise to constituencies seeking justice for past wrongs. Eligibility: ENG 1510 without supports or Corequisite: ENG 1510 with supports. J spring.

ART1530 - 2-D Design and Color

Overview

Course Description

Students will explore two-dimensional design problems through controlled and experimental sequences of exercises in drawing, abstract black and white composition, and basic color theory and its application to design. Emphasis is placed upon developing a student's personal appreciation and creative expression rather than professional skill. Students will learn ways of expressing themselves creatively through two-dimensional space through the exploration of visual design elements such as line, form, scale, color, texture as well as explore design principles of surface organization such as repetition, balance, rhythm, variety, and emphasis. Students will learn to mix a calibrated range of tones and colors and gain experience using value, hue and saturation with paint and collage. This course fosters the utilization of intuitive judgements of serious play. No prerequisites. J fall.

ART1550 - Art in Culture I

Overview

Course Description

Provides art and non-art majors with an overview of the historical evolution of the visual arts from the prehistoric through medieval periods. An overview of art from non-European cultures is also presented. Students will explore artistic philosophies, styles, media, materials, and the evolving function of art in society. Students are introduced to the formal structure of works of art and will study new methods and materials. Links between technical evolution and its relationship to stylistic change are explored. The influence of major philosophical shifts in culture-at-large on the arts is also emphasized. Material is presented through slide lectures, videotapes, classroom discussions, and readings. Course requires extensive reading, some writing, and participation in discussion groups. Prerequisite/Corequisite: ENG 1530. J fall; C occasionally.

ART1610 - Studio Projects-Ceramics I

Overview

Course Description

Students will build upon previous studio course experiences in advanced studio production courses under art faculty supervision. Students who have completed the basic and intermediate (as applicable) courses in drawing, ceramics, photography, electronic arts, design or painting, may register for one, two, or three hours of credit per semester in a studio course in that medium. Students are expected to spend two hours in studio work each week for each credit hour anticipated. Studio problem courses are student initiated with each student, together with the faculty member, creating an acceptable course outline and evaluation process for the work of the semester. In some cases, a group studio problem experience may be initiated by visual arts faculty. Students achieving 12 credit hours in art studio problems must obtain permission from the arts and humanities dean to take additional coursework (for credit) in art. Prerequisite: One studio art course in the concentration area. J occasionally

Studio problem courses are student initiated with each student, together with the faculty member, creating an acceptable course outline and evaluation process for the work of the semester. In some cases, a group studio problem experience may be initiated by visual arts faculty. Students achieving 12 credit hours in art studio problems must obtain permission from the arts and humanities assistant dean to take additional coursework (for credit) in art. Prerequisite: permission of instructor required. Campus and term: J occasionally

ASL1510 - Introductory Sign Language I

Overview

Course Description

Students will learn to interact effectively and appropriately in ASL at the novice-mid level with people from other language and culture backgrounds. Students will communicate and reflect upon personal and public identity, family and community, and contemporary life in the Deaf community. Eligibility: ENG 1510 without supports or Corequisite: ENG 1510 with supports. J fall, spring; C fall, spring.

AST1510 - Introduction to Astronomy

Overview

Course Description

Students will learn about the universe while learning the scientific way of looking at the world and life. There will be four fundamental recurring questions: What is out there? Why is it the way it is? How do we know? How sure are we that we are right? Students will learn that science is a process and will learn the connection between theory and observation. Students will demonstrate their knowledge by observations of the sky and by accessing astronomy sites on the World Wide Web. Eligibility: MAT 1590; Prerequisite: ENG 1510. J fall; C occasionally.

BIO1501 - Human Biology Lecture

Overview

Course Description

This course explores the basic biological structures, systems and processes that define human life. Students will learn about the chemical basis of life, cellular structure and metabolism, tissues, and an overall survey of the organ systems of the body. Through lectures and interactive activities, students will explore recent developments in science and medicine and the mechanisms behind human health and disease. Eligibility: ENG 1510 without supports or Corequisite: ENG 1510 with supports and Corequisite: BIO 1502. J fall, spring; C fall, spring; online fall, spring.

BIO1551 - Intro Enviro Science Lecture

Overview

Course Description

This course offers an exploration of environmental science, with an emphasis on the historical development of environmental issues, global biomes, and the complex interactions between species and their physical environment—air, water, and soil. Through a combination of lectures, discussions, and hands-on activities, students will investigate key topics such as biological resources, population dynamics, toxicology, energy use and sustainability, and land use management. Designed for both science and non-science majors, this course provides a comprehensive foundation in understanding and addressing contemporary environmental challenges. Eligibility: ENG 1510 without supports or Corequisite: ENG 1510 with supports; Corequisite: MAT 0550 or Eligibility: College Level Mathematics. J fall, spring.

BIO1571 - Prin. Cell/Molec. Bio. Lecture

Overview

Course Description

This introductory course explores the fundamental principles of cell and molecular biology. Topics include the chemical foundations of life, cell structure and function, cellular metabolism, photosynthesis, cellular respiration, cellular reproduction, and classical human and molecular genetics. Students will gain an appreciation for the complexity of cellular systems and the molecular mechanisms that underlie life processes. This course is designed for science majors as a gateway to more advanced coursework in biology and related disciplines but also serves non-science majors as a general education course. Eligibility: ENG 1510 without supports or Corequisite: ENG 1510 with supports; Corequisite: High School Chemistry or CHE 1500 (or higher); Corequisite: MAT0550 or Eligibility: MAT 1590; Corequisite: BIO1572. BIO1581 - Princ. Eco/Evol. Bio Lecture

Overview

Course Description

This foundational course introduces students to the core concepts of ecology and evolutionary biology - the scientific frameworks that explain the diversity of life and the interactions among organisms and their environments. Students will identify and evaluate the general tenets of evolutionary theory, identify and apply principles of ecology and biodiversity, identify the major episodes in the geological history of life, and evaluate and describe the evolutionary history of the Earth's major plant and animal groups. The course emphasizes the integration of evolutionary theory with ecological principles to understand how life on Earth has changed over time and continues to adapt. This course is designed for science majors as a gateway to more advanced coursework in biology and related disciplines but also serves non-science majors as a general education course. Eligibility: ENG 1510 without supports or Corequisite: ENG 1510 with supports; Corequisite: High School Chemistry or CHE 1500 (or higher); Corequisite: MAT0550 or Eligibility: MAT 1590; Corequisite: BIO1582. BIO1830 - SURI: Environmental I

Overview

Course Description

Students will participate in environmental research that pertains to their area of interest and/or as requested by local environmental organizations. As part of this experience, students will read, interpret, and present published scientific research papers. Students will be responsible for experimental design, maintaining a laboratory journal, and acquiring the necessary laboratory and field research skills to complete their research and present their results. Students are divided into either Environmental I or Environmental II, depending on their level of experience, but are blended together in a single course. Environmental I students are expected to function as technicians. As such, they will learn how to function in a research setting, learn scientific record-keeping and how to design and perform a well controlled experiment reproducibly. Prerequisite: ENG 1510 and BIO 1551 + BIO 1552, or BIO 1570 or BIO 1580. J summer.

BIO2510 - Anatomy & Physiology I

Overview

Course Description

This first of two sequential human anatomy and physiology courses is designed for students who have had little or no previous study of the body or the physical and chemical principles on which body structure and function is based. In this course, students will learn basic chemistry and physics, cytology, and histology. Students will study the following organ systems: integumentary, skeletal, muscular, cardiovascular, lymphatic, and respiratory. In the accompanying laboratory, students will learn basic terminology, microscopy, animal dissection, organ dissection, and experimental process and protocols. Prerequisite/Corequisite: ENG 1510; Prerequisite: CHE 1500 (or above)-unless high school chemistry was passed. J fall, spring; C fall, spring.

Overview

Course Description

Students will learn the basic concepts, factors, functions, and techniques of management in organizations. Students will obtain specific knowledge of planning, organizing, directing, and controlling and the interconnectedness of these functions in productive organizations. Upon course completion, students will demonstrate a knowledge of the principles of good management in individual and team-based environments. Prerequisite/Corequisite: ENG 1510 without supports or Corequisite: ENG 1510 with supports. J fall; C fall.

BUS2580 - Mgmt / Organizational Behavior

Overview

Course Description

Students will develop an understanding of the basic concepts of behavioral sciences and their application to performance of individuals working in organizations. Students will study key attitudes and behavior that affect productivity. Upon course completion, students will demonstrate an understanding of the factors that affect performance such as leadership, motivation, communication, absenteeism, and job satisfaction as well as a basic understanding of how diverse individual styles of interaction contribute to an organization.

Prerequisite/Corequisite: ENG 1510 without supports or Corequisite: ENG 1510 with supports. J spring; C spring.

CHE1500 - Intro to Chemistry

Overview

Course Description

Students will investigate fundamental concepts of chemistry from a theoretical approach using basic scientific tools of measurement and problem solving. Topics include atomic structure, nomenclature, bonding, periodic behavior, chemical equations, acids and bases, gases, liquids, solids, and properties of solutions. The course is for students with little or no chemistry background and/or who wish to continue in CHE 1551/1552. Eligibility: ENG 1510 without supports or Corequisite: ENG 1510 with supports; Corequisite: MAT 0550 or Eligibility: College Level Math. J fall; C spring.

CHE1530 - Allied Health Chemistry

Overview

Course Description

Students will consider selected basic concepts from inorganic, organic, and biological chemistry which will be applied to allied health and biological fields. Topics include matter and measurements, chemical bonds and reactions, redox, states of matter, acids and bases, organic functional groups, and common macromolecules in biological systems. The course is for students with little or no chemistry background who are pursuing a degree in an allied health field. Eligibility: ENG 1510 without supports or Corequisite: ENG 1510 with supports; Corequisite: MAT 0550 or Eligibility: College Level Math J fall; C fall; Online occasionally.

CHE1551 - General Chemistry 1 Lecture

Overview

Course Description

General Chemistry I provides a foundational understanding of chemical principles and their applications. Topics include atomic and molecular structure, the periodic table, stoichiometry, chemical bonding, thermochemistry, gases, and the properties of solids, liquids, and solutions. Emphasis is placed on problem-solving, critical thinking, and the development of quantitative reasoning skills. This course is designed for science majors and serves as a prerequisite for advanced chemistry courses, or those students who need a strong foundational chemistry knowledge for an advanced degree. Prerequisite: High School Chemistry or CHE 1500 (or higher); Eligibility: ENG 1510 without supports or Corequisite: ENG 1510 with supports and Corequisite: MAT 1590 or Eligibility: MAT 1600; Corequisite: CHE 1552. J fall, spring.

CHE1552 - General Chemistry 1 Lab

Overview

Course Description

General Chemistry I Lab reinforces theoretical concepts covered in lecture through hands-on experimentation and data analysis. Lab experimentation includes electron configuration, chemical bonds and molecular geometry, states of matter, stoichiometry, solutions, solubility, thermochemistry, and gas laws. This course is designed for science majors and serves as a prerequisite for advanced chemistry courses, or those students who need strong foundational chemistry knowledge for an advanced degree. Prerequisite: High School Chemistry or CHE 1500 (or higher); Eligibility: ENG 1510 without supports or Corequisite: ENG 1510 with supports; Corequisite: MAT 1590 or Eligibility: MAT 1600; Corequisite: CHE 1551. J fall, spring.

CHE1561 - General Chemistry 2 Lecture

Overview

Course Description

A continuation of General Chemistry 1, this course delves deeper into the principles of chemistry. Topics include intermolecular forces in solids and liquids, properties of solutions, chemical kinetics, dynamic equilibrium, acids and bases, thermodynamics, electrochemistry, and nuclear reactions. This course is intended for science majors and serves as a foundation for upper-level chemistry studies. Prerequisite: CHE 1551+1552; Corequisite: MAT 1590 or Eligibility: MAT 1600; Corequisite: CHE 1562. J spring.

CMM1510 - Intro to Communication

Overview

Course Description

Students will be introduced to the theories, processes, and applications of verbal and non-verbal human communication and explore why and how people communicate (face-to-face, in public, through the mass media, etc.). Students will also examine the ways that new communication technologies are shaping private and public discourse. Students will gain the skills necessary to recognize and analyze communication failures and be able to apply those skills in the process of becoming more effective communicators. Prerequisite: ENG 1510. J fall, spring; C fall.

Credits

CMM1700 - Intro to Social Media Mrktng

Overview

Course Description

Students will be introduced to foundational concepts in social media marketing and strategic communication. In this course, students will gain hands-on experience with a wide range of social media tools and platforms through case studies and project-based learning involving local businesses/nonprofits. Students will demonstrate proficiency in social media strategy, including: audience analysis, content planning and creation, social media marketing tactics, and success evaluation. At the completion of this course, students will have the necessary knowledge and skill set to launch an effective social media campaign. Prerequisite: ENG 1510. J fall

CMM1750 - Rhetoric of Vision and Sound

Overview

Course Description

This communication and media arts foundation course explores the vision and sound codes used in various forms of mediated communication. Students will examine films, television, radio, and the Internet to gain an understanding of the techniques employed by producers and directors to create meaning beyond content and script. Students will explore the grammatical elements which comprise the rhetoric of vision and sound: the use of light, color, two- and three-dimensional space, time, motion, and sound. In today's media saturated environment, the ability to decode mediated messages is a valuable critical thinking skill for all citizens; students interested in becoming producers of media will find the knowledge they have gained in this course especially helpful to their production efforts. Prerequisite: ENG 1510. J occasionally.

CMM2100 - Communication @ Work

Overview

Course Description

Students will be introduced to the necessary communication skills required to be successful in a professional environment. This practical course will emphasize communication concepts as they apply to the workforce. Students will actively apply oral, written, and digital communication skills throughout the semester including: the creation of a digital portfolio, email/phone/voicemail etiquette, business writing, networking, use of social media platforms, the interviewing process, and cover letter and resume writing for specific purposes. Students will enhance their digital and information literacy skills through completion of this course. Prerequisite: ENG 1510. J spring, fall.

COH1010 - Community Health Worker Intern

Overview

Course Description

Students will gain practical experience participating in a minimum of 90 hours of supervised work in a local health organization, agency, or hospital. Students will apply the skills they have learned in service navigation and referral, networking, teamwork, ethics, and communication skills. Students will further learn how to advocate for individuals and families to help reduce health disparities. The student, faculty coordinator, and site supervisor will work together to create an appropriate learning experience for the student, which also includes a weekly seminar. Eligibility: ENG 1510 without supports or Corequisite: ENG 1510 with supports. J fall, spring; C fall, spring.

COH1400 - Fundamentals Supportive Care

Overview

Course Description

Students will learn the fundamental skills involved in being a Direct Support Professional, including helping clients with their physical, social, and daily living needs, medication management, and therapies as appropriate, while completing at least 90 internship hours. Additionally, students will learn and practice assessment, planning, and communication skills. Students will also be introduced to professional ethical standards such as client confidentiality and cultural competency. Finally, the student will create a professional portfolio revolving around National Alliance of Direct Support Professionals (DSP-1) standards and earn the DSP-1 Certificate. Eligibility: ENG 1510 without supports or Corequisite: ENG 1510 with supports. J fall, spring; C fall, spring.

CRI1310 - Corrections Practicum

Overview

Course Description

During this 84-hour experiential format, the student/recruit will be placed in a correctional facility for on-the-job training. The student/recruit will be assigned to a full-time correctional officer. While applying their academic knowledge in a real world setting, students/recruits will learn and perform the requisite duties for daily operations of a correctional facility. All work experiences will be reduced to written form on a daily basis and evaluated by the assigned training officer. At the completion of the practicum, these evaluations will be used to assist in determining performance competency and certification potential. Prerequisites: Students must be a sworn corrections officer working in either a county jail or correctional facility. Campus and term: C occasionally

CRI1550 - Stress in Law Enforcement

Overview

Course Description

Students will learn about the stressors encountered in law enforcement which can have a significant impact on both the law enforcement professional and his or her family. The causes of stress, as well as both short-term and long-term reactions and effects of a stressful incident(s) will be examined. Students will also be exposed to methods of coping with the pressures of the law enforcement profession. Prerequisite/Corequisite: CRI 1510. J occasionally; C occasionally.

Credit Hours

Min:

1

CRI1560 - Homeland Security

Overview

Course Description

Students will examine the history of international and domestic terrorism and the fundamental concepts of Homeland Security both Pre and Post 9/11. Students will be provided with an overview of the structures and functions of the governmental agencies responsible for protecting the United States from terrorism. Students will review the process of planning and preparation for the potential response to future attacks in the United States. Eligibility: ENG 1510 without supports or Corequisite: ENG 1510 with supports. J occasionally; C occasionally.

Credit Hours

Credit Hours

Min:

3

CRI1600 - Intro to Intelligence Studies

Overview

Course Description

Students will be introduced to the discipline of intelligence and gain understanding of how intelligence systems function, how they fit within the policymaking systems of free societies, and how they are managed and controlled. Students will learn terms and concepts unique to this field and become acquainted with entities within the intelligence community. Students will engage in a historical overview of national security and intelligence policies and strategies from WWII to present. Prerequisite: ENG 1510. J fall; C spring.

Credits

Credit Hours

Credit Hours

Min:

3

CRI1610 - Search and Seizure

Overview

Course Description

Students will study the laws and constitutional issues governing searches and seizures by law enforcement officers. Students will gain experience in the practical application in securing, executing, and court presentation of search warrants and evidence seized pursuant to a warrant. Prerequisite/Corequisite: CRI 1510. J occasionally; C occasionally.

Credits

Credit Hours

Credit Hours

Min:

1

CRI1630 - Motor Vehicle Stops

Overview

Course Description

Students will learn about the interaction of law enforcement personnel and citizens during traffic stops. The proper procedures applied during misdemeanor and felony motor vehicle stops are also examined. Prerequisite/Corequisite: CRI 1510. J occasionally; C occasionally.

Credits

Credit Hours

Credit Hours

Min:

1

CRI1650 - Hostile Situation Management

Overview

Course Description

Students will learn how to recognize and resolve hostile situations in law enforcement which includes domestic conflicts, hostage situations, and routine calls for service. Students will also learn how to apply successful coping strategies during stressful conflicts. Prerequisite/Corequisite: CRI 1510. J occasionally; C occasionally.

Credits

Credit Hours

Credit Hours

Min:

CRI1670 - Serial Killers

Overview

Course Description

This course focuses on the etiology and typologies of the phenomenon of a serial killer, what makes a serial killer, and what impact a serial killer has on society. A cross-section of serial killers is explored, identifying what is believed to have caused these individuals to kill. Eligibility: ENG 1510 without supports or Corequisite: ENG 1510 with supports. J occasionally; C occasionally.

Credits

Credit Hours

Credit Hours

Min:

1

CRI1690 - Interview and Interrogation

Overview

Course Description

Students will learn current interview and interrogation techniques that can be applied in various accusatory and non-accusatory settings. Proper application of these techniques in accordance with the 5th Amendment (right against self-incrimination) as it applies to suspects and arrested persons and the 6th Amendment (right to counsel) is emphasized. Prerequisite/Corequisite: CRI 1510. J occasionally; C occasionally.

Credits

CRI2200 - Instructor Development

Overview

Course Description

The experienced police officer has valuable knowledge, skills and abilities which are gained through on the job experiences. The goal of this course is to assist the candidate in developing the ability to research, prepare, and communicate that knowledge to other police recruits and hired officers. Training will focus on constructing instructional objectives, planning of training, factors which influence adult learning, factors that modify behavior, the development of communication skills, and the instructional process and methods of evaluating course effectiveness. Prerequisite: students must be a certified police officer of a recognized law enforcement agency, or by permission of the academy director. Campus and term: J occasionally

CRI2270 - Law Enforcement Academy III

Overview

Course Description

This course is encapsulated in the basic police course and areas of instruction will be based on standards mandated by the NYS DCJS. Recruits who need recertification as police officers must successfully complete the entire police refresher course. Individuals who enroll in this course will receive instruction in basic patrol functions, firearms, emergency medical services, vehicle operations, and physical fitness training. All mandated training is on a case-by-case basis and will be determined after an evaluation by DCJS of the students past training records and the amount of time since they graduated from the basic police academy. Prerequisite: The students must have a prior NYS basic police certification which has lapsed or is in need of additional training hours as mandated by the Division of Criminal Justice services of New York state. Students must be appointed and placed on the police registry in Albany by a NYS recognized law enforcement agency and must have met the basic academy requirements prior to application. Students must meet DCJS requirements as they relate to the police refresher course. Campus and term: J occasionally; C occasionally

CRI2510 - Police Community Relations

Overview

Course Description

Students will study the traditional method of providing police services, along with problem-oriented and community-based policing. Students will discuss the interpersonal and intergroup relations between police and the public. Required topics include police ethics, stereotypes, minority relations, peer relations, and the role of technology in providing police services and crime prevention. Prerequisite: ENG 1510, CRI 1510. J occasionally; C occasionally.

Credits

Credit Hours

Credit Hours

Min:

3

CRI2520 - Police Administration

Overview

Course Description

Concentrates on contemporary principles of administration and their applications to the internal organization and management of law enforcement agencies. Students apply traditional management models/theories to various managerial concerns including planning, staffing, human resources, and leadership styles, as well as other proactive actions dealing with collective bargaining, future trends, and internal/external problem-solving. Prerequisite: ENG 1510, CRI 1510. J occasionally; C occasionally.

Credit Hours

Credit Hours

Min:

3

CRI2530 - Criminal Law

Overview

Course Description

Course includes an analysis of the origin and general principles of criminal law. Incorporates substantive criminal law with emphasis on the elements of each crime and the proof required to prosecute or defend the crime charged. Students are required to apply various judicial decisions to appropriate class discussions. Prerequisite: ENG 1510, CRI 1510. J occasionally; C occasionally.

Credits

Credit Hours

Credit Hours

Min:

3

CRI2540 - Criminalistics

Overview

Course Description

Provides students with an overview of the role of forensic science in investigation. Students will learn about the application of scientific and technical methods used in the discovery, collection, evaluation and presentation of physical evidence. Prerequisites: CRI 1510, CRI 2370, ENG 1530, and sophomore standing. Campus and term: J, occasionally; C, occasionally.

Credits

Credit Hours

Credit Hours

Min:

3

CRI2550 - Ethics in Criminal Justice

Overview

Course Description

Students will explore many of the ethical problems confronting legal system personnel, including police, lawyers, judges, and corrections personnel. Course materials will focus on ethical systems, the concepts of law and justice, and various real life ethical dilemmas. Prerequisite: ENG 1510, CRI 1510. J occasionally; C occasionally.

Credits

Credit Hours

Credit Hours

Min:

3

CRI2560 - Criminal Justice Internship

Overview

Course Description

Offers a classroom seminar and an assignment with a specific criminal justice agency or office matching an individual student's academic study and/or career goal. Students must relate theoretical concepts to the pragmatic operations of their placement agency and present those experiences in a seminar format. Prerequisite: CRI 1510; Prerequisites/Corequisite: ENG 1530; GPA 2.5 or better and permission of the instructor. J spring; C spring.

CRI2570 - Organized Crime in the US

Overview

Course Description

Studies the evolution of organized crime in America from the 19th century to the present. Students will demonstrate knowledge of different types of organized crime, how they affect our economy, and will become familiar with the government's response to criminal organizations. Prerequisite: ENG 1510, CRI 1510. J occasionally; C occasionally.

Credits

Credit Hours

Credit Hours

Min:

3

CRI2580 - Introduction to Terrorism

Overview

Course Description

Students will examine the complex and often misunderstood subject of terrorism. Students will learn to distinguish acts of terrorism from other types of violence, study the various objectives and ideologies of historical and contemporary terrorist groups, and learn about terrorist organizational and operational methods. Prerequisite: ENG 1510, CRI 1510. J occasionally, C occasionally.

Credits

Credit Hours

Credit Hours

Min:

3

CRI2610 - White Collar Crime

Overview

Course Description

Using historical and current incidents, this course will discuss White Collar Crime in various areas that are pertinent to the student. Areas such as unsafe products, environmental crime, securities fraud, fiduciary fraud, governmental crime, medical crime, and computer crime will be studied to show the student how these activities originated and how they are currently being used to fleece consumers and taxpayers. The core of the class will be on current criminal activity such as Enron, Adelphia Cable, and MCI WorldCom. The course will address whichever scandal is currently being debated at the time of the class offering. Prerequisite: ENG 1510, CRI 1510. J occasionally; C occasionally.

Credits

Credit Hours

Credit Hours

Min:

3

CRI2620 - Intro to Probation and Parole

Overview

Course Description

Students will explore the history, purposes, and development of probation and parole as correctional practices and will learn about the successes and problems, as well as the future, of these practices. Prerequisite: ENG 1510, CRI 1510. J occasionally; C occasionally.

Credits

Credit Hours

Credit Hours

Min:

3

CRI2640 - American Judicial System

Overview

Course Description

Focuses on the dynamics of the courthouse. Students study lawyers and their participation in the criminal court arenas. Issues such as how and why cases move from one court to another, sentencing, and proposals for reforming the court process are discussed. Prerequisite: ENG 1510, CRI 1510. J occasionally; C occasionally.

Credits

Credit Hours

Credit Hours

Min:

3

CRI2650 - Juvenile Justice System

Overview

Course Description

Students will study various causes and categories of juvenile crime and delinquency and explores the unique structure and processes of the separate legal system for juveniles. Prerequisite: ENG 1510, CRI 1510. J occasionally; C occasionally.

Credits

Credit Hours

Credit Hours

Min:

3

CRI2660 - Advanced Terrorism Studies

Overview

Course Description

Students will engage in an in-depth examination of key aspects of contemporary terrorism, including the emergence, evolution, and tactics of homegrown violent extremists and specific terrorist organization. Students will critically analyze and assess various government and non-government responses to terrorism, discussing assigned readings on these topics. Students will develop individual research topics and conduct semester-long research. Prerequisite: CRI 2580. J occasionally; C occasionally.

Credits

Credit Hours

Credit Hours

Min:

3

CRI2670 - Intelligence Analysis for HS

Overview

Course Description

Students will examine different types of intelligence methods, tools and techniques, basic data collection and management strategies and tools, and the various types of intelligence used throughout the public and private sectors. Students will delve deeper into intelligence theories, including psychology of intelligence and alternative analysis. Student research will culminate in a writing and briefing project employing intelligence methods and briefing tactics learned throughout the semester. Prerequisite/Corequisite: ENG 1530, CRI 1510. J spring; C fall.

Credits

Credit Hours

Credit Hours

Min:

3

CRI2680 - The Constitution & Homeland Se

Overview

Course Description

Students will develop a solid understanding of how the United States Constitution and its ongoing interpretation has shaped the homeland security landscape. Students will apply ethical theories and knowledge of the Constitution to analyze significant national security problems and their changing nature in the 21st century, discussing relevant court cases as appropriate. Students will study the role of intelligence professionals and federal, state, and local law enforcement authorities in upholding constitutional law while preventing and disrupting terrorism. Prerequisite: ENG 1510, CRI 1510. J fall; C spring.

Credits

Credit Hours

Credit Hours

Min:

3

CSC1510 - Intro to Computer Science

Overview

Course Description

Students will develop computer literacy by studying an overview of computing and a brief introduction to programming. Topics include a history of computers and computing, computer system components, data representation, the impact of computers on society, computer ethics, an introduction to data communications, networking, word processing, spreadsheets, programming in a structured language, and e-mail. Students will also use the Internet and a browser to access the World Wide Web. Less than 20% of class time is spent on lab exercises. No prerequisites. J fall, spring; C fall, spring; Online fall, spring.

Credits

Credit Hours

Credit Hours

Min:

3

CSC1520 - Intro to Cybersecurity

Overview

Course Description

Students will be introduced to the basics of computer security, also known as cybersecurity. The course will also provide students with a basic understanding of the types of security weaknesses and the defense strategies needed to minimize those vulnerabilities. This course combines the theoretical knowledge with the hands-on practical exercises to ensure students are well-equipped to tackle real-world cybersecurity challenges. This course introduces the topics covered by the CompTia Security+ Certification. Additional coursework will be needed prior to taking the CompTia Security+ exam. Prerequisite/Corequisite: CSC 1620, CSC 2510 strongly recommended. Online fall.

Credits

Credit Hours

Credit Hours

Min:

3

CSC1530 - Introduction to HTML & CSS

Overview

Course Description

Students will study HTML language, usability concepts, and embedding JavaScript programming code. Students will design web pages using tables, forms, cascading style sheets, multimedia, and JavaScript. Students will also learn how to publish a web page with video clips and sound. No prerequisites. J fall; C fall; Online, fall.

Credits

Credit Hours

Credit Hours

Min:

3

CSC1560 - Computer App Software I

Overview

Course Description

Students use application software such as Microsoft Office to study word processing, spreadsheets, database management, and presentation software. The integration and practical application of these topics is stressed throughout the course. Students will spend a substantial amount of out-of-class time working on computer projects. Corequisite: any developmental MAT course or eligibility for any college-level MAT course. J fall, spring; C fall, spring; Online fall, spring.

Credits

Credit Hours

Credit Hours

Min:

4

CSC1570 - CS1: Intro to Programming

Overview

Course Description

This course covers the fundamentals of computer problem solving and programming. Topics include: program development process, differences between the object-oriented, structured, and functional programming methodologies, phases of language translation (compiling, interpreting, linking, (executing), and error conditions associated with each phase, primitive data types, memory representation, variables, expressions, assignment, fundamental programming constructs (sequence, selection, iteration), algorithms for solving simple problems, tracing execution, subprograms/functions/methods, parameter passing, secure coding techniques (criteria for selection of a specific type and use, input data validation), and professional behavior in response to ethical issues inherent in computing. Corequisite: MAT 0550 or eligibility for any college-level MAT course. J fall, spring; C fall; Online fall, spring.

CSC1580 - Computer Hardware&Sys Software

Overview

Course Description

Students will study the design, installation, configuration, and maintenance of hardware and software components of a computer. Interior components covered include memory, disk drives, expansion cards, and power supplies. Other common I/O devices and peripherals such as printers and the mouse are studied. Major categories of system software, operating systems, and diagnostic utilities are covered. No requisites. J fall, spring; C spring; Online spring.

Credits

Credit Hours

Credit Hours
Min:
3

CSC1590 - CS2: Computer Programming

Overview

Course Description

This course covers the fundamentals of algorithms and object-oriented software development. Topics include: modern IDE for software development, primitive and reference data types, encapsulation, information hiding, selection, iteration, functions/methods, parameters, recursion, exception handling, generic linear data structures (arrays, records/structs) and maps, file types, file I/O, simple GUIs with event handling, programming to an interface, lambda expressions, semantics of inheritance and use of polymorphism, relation with subtyping, search (sequential, binary), select (min, max), and sort (bubble, insertion, selection) algorithms, complexity notation, documentation using standard tools, program testing (unit testing) and debugging, reasoning about control flow in a program, and societal impacts related to computing and software Prerequisite: CSC 1570. J spring; C spring; Online spring.

Credits

Credit Hours

Credit Hours
Min:

Credit Hours

Credit Hours
Min:
4

CSC1610 - Computer Programming SCI/ENR

Overview

Course Description

Students will use a microcomputer as a computation and analysis tool in engineering and scientific calculations. Students will study problem solving, numeric data storage and precision limitations, structured algorithm design, and numerical analysis methods. Students will write computer programs in a C based language to solve mathematical problems specific to the science and engineering fields. The principles of program control structures will be explored, including: selection, loops, functions, and recursive functions. Eligibility: MAT 1720 or higher. J spring.

CSC1680 - Intro to Visual Basic

Overview

Course Description

Students will learn to develop user-friendly, Windows-based business applications using Microsoft Visual Basic.Net. Topics include screen design, program organization, control structures, subprograms, arrays, and file maintenance. Students use Visual BASIC to communicate with other Windows-based applications such as Microsoft Excel and Access. Problem solving techniques and structured programming practices are emphasized. Prerequisite: CSC 1590. Online occasionally.

Credits

Credit Hours

Credit Hours

Min:

3

CSC1760 - Computer App Software II

Overview

Course Description

Students will further their study of topics from CSC 1560 using a software package such as Microsoft Office. Database topics include action queries, custom reports and forms, macros, and modules. Students spend a major portion of the semester developing an application using a relational database. Spreadsheet topics include macros, charts, and data analysis tools. Some advanced features of word processing such as directories and forms are included. Prerequisite: CSC 1560. Campus and term: J occasionally; C occasionally; Online fall

CSC2510 - Introduction to Networks

Overview

Course Description

Students will explore topics in computer networking including networking design and architecture, data transmission, standards, and protocols. Local area networks (LAN) and wide area networks (WAN) will be studied along with the technologies that support the Internet. Upon course completion, students will demonstrate knowledge of these topics and have the ability to work with these concepts. Students will have some hands-on experience in this course. Prerequisite/ Corequisite: CSC 1570. J fall, spring; C spring; Online fall.

CSC2540 - Intro to Systems Analysis

Overview

Course Description

Systems analysis and design determines the direction and scope of information system projects. Upon course completion, students will demonstrate the ability to discuss solutions to business problems, interviewing techniques, process analysis, the system life cycle, construction of data flow diagrams, interface design options, and project management. Students will apply the concepts to real problem situations. Prerequisite: CSC 1570 or CSC 1760. Campus and term: J occasionally; C occasionally; Online occasionally

CSC2550 - Advanced IT Infrastructure

Overview

Course Description

Building on the foundational concepts from the Introduction to IT course, this advanced course introduces students to the intricacies of operating systems, security, software troubleshooting, and operational procedures. Students will gain hands-on experience in managing complex systems, implementing robust security measures and developing effective customer support skills. With a focus on practical skills and real-world applications, this course prepares students for entry-level IT roles. Prerequisite: CSC1620: Introduction to IT. Campus and term: J, Fall; Online, Fall.

CSC2560 - Introduction to AI Development

Overview

Course Description

This course provides a practical introduction to artificial intelligence, focusing on the development of AI-powered bots and agents. Students will explore machine learning, deep learning, and large language models using Python. Students will gain hands-on experience in building AI projects and managing performance, including detecting and mitigating model drift. The course emphasized ethical considerations and privacy concerns in AI development, preparing students for roles in AI and related fields. Prerequisite/Corequisite: CSC 1590. Campus and Term: J, spring; Online, spring.

CSC2570 - Introduction to Linux

Overview

Course Description

This course provides comprehensive coverage of foundational Linux system management concepts. Students will develop practical skills in system installation, configuration, maintenance, user and service management, security hardening, automation, scripting, networking, virtualization, containerization, and troubleshooting. The course integrates hands-on labs and real-world scenarios to prepare students for effective Linux administration roles in diverse IT environments, emphasizing security best practices, modern automation, and performance optimization. Prerequisite: CSC 1570 and CSC 2510. Campus and term: J fall; Online fall.

EDU2150 - Infant/Toddler/Development/Edu

Overview

Course Description

Students will increase their knowledge about the developmental needs and program requirements for infants and toddlers. They will do this by strengthening their observation skills, reading, and discussing current research and trends in infant/toddler care, and applying theory in field experiences. Students will plan and implement developmentally appropriate activities based on the needs of a specific child or groups of children within their field setting. Special attention will be given to the development of the whole child, the child as the curriculum, respectful and responsive relationships, intentional and purposeful interactions, and the environment as a teaching tool. A minimum of 20 hours will be spent in the field experience with toddlers or younger. Department permission and Prerequisite/Corequisite: EDU 1290. J occasionally; C occasionally.

ENG2550 - American Lit before Civil War

Overview

Course Description

Students will study key works of early American literature (pre-1865) in their literary, cultural, and historical contexts. Students will be asked to explore what "American" means and what major ideas were at work to create a cultural definition for that term. In addition to studying the traditional texts of authors such as Hawthorne, Whitman, Fuller, Emerson, Bradstreet, Franklin, Bradford, etc., students will be exposed to literature outside of the New England canon including Native Americans, French and Spanish colonizers, and African slaves. Prerequisites: ENG 1530. J occasionally; C occasionally.

Credits

ENG2560 - American Lit since Civil War

Overview

Course Description

Students will study key works of American literature from 1865 to the present as well as major literary movements such as regionalism, naturalism, realism, modernism and beyond. American writing will be approached in both historical and artistic context. In addition to studying texts of major authors such as Twain, James, Chopin, Chestnutt, London, Cather, Faulkner, Frost, Sandburg, Ginsberg and O'Connor, as well as contemporary authors including Morrison, Silko, Erdrich, Kingston, and Updike, students will study other works that focus on the rich diversity of voices and styles of American literature. Prerequisites: ENG 1530. J occasionally; C occasionally.

ENG2570 - The Gothic Novel

Overview

Course Description

Students will trace the history of Gothic literature starting with Horace Walpole's novel *The Castle of Otranto*. Significant attention will be given to the influence of the Gothic novel in writing throughout the Romantic and Victorian ages and Modern literature. In addition to literature, students will also explore Gothic influences on architecture, art, film, and popular culture. Prerequisite: ENG 1530. J fall, spring; C fall, spring.

ENG2650 - Award Winning Young Adult Lit

Overview

Course Description

Students will discuss and prepare to teach a wide variety of young adult literature in various cultural settings as they examine the defining components of the adolescent experience. This course will be of particular interest to students majoring in secondary education as well as those students who enjoy reading young adult literature as the class is a study of the variety of texts written for and about adolescents. Students will read and discuss a range of assigned and self selected award-winning books. Prerequisite: ENG 1530. J spring.

ENG2850 - Angels & Demons: Bible as Lit

Overview

Course Description

"Bible" comes from the Greek ta biblia - literally "the books" - and within those pages lie some of the most influential and revolutionary literary texts in recorded history. In this course, students will begin by asking what "The Bible" means in relation to the literary canon; this includes examining the works that shaped its creation and the literary choices that followed the first printed biblical publication. Along the way, students will encounter works that stand beside and against it from classic texts to modern works of art across history. Prerequisite: ENG 1530. J occasionally; C occasionally.

ENG2870 - The Romance of Arthur

Overview

Course Description

Students will trace the historical and literary roots of the legend of King Arthur. Readings, films, and discussions center on the evolution of Arthur and notable features of his world: Avalon, Camelot, Merlin, Morgan Le Fay, Guinevere, Lancelot, Gawaine, and Mordred. In poems, chronicles, tales, and romances, major Arthurian images and themes will be examined, such as courtly love, chivalry, the sword of power, the Round Table, the Fisher King, and the Holy Grail. Among several works, the course examines the bardic traditions of the Brythonic Celt as well as the romance cycles of Chretien de Troyes and Sir Thomas Malory. Prerequisites: ENG 1530. C occasionally.

ENR2580 - Strength of Materials

Overview

Course Description

Students will be able to explain the concepts of stress and strain and the relationships between them in the solution of problems such as beams, columns, torsional members, connections and combined loading (Mohr's circle). Stress concentrations, thin-walled pressure vessels, and beam deflections are covered. Laboratory experiences include standard tests to determine properties of various materials when subjected to normal stress, bending, shear impact, and torsion loading. Hardness tests and non-destructive testing procedures are used. Prerequisites: ENR 2550. J spring

ENR2740 - Analysis/Linear Elec Circuits

Overview

Course Description

Students will gain expertise in the techniques of elementary circuit analysis. DC resistive circuits are first analyzed using Ohms and Kirchhoffs laws, voltage and current division, resistance and source combinations, and superposition. Basic techniques are expanded to include dependent sources, mesh analysis, nodal analysis, Thevenins and Nortons theorems, and the maximum power transfer theorem. Sinusoidal, exponential, and damped sinusoidal forcing functions are then introduced along with inductance and capacitance. LaPlace transforms are used to obtain complete solutions for first and second order RL, RC, and RLC circuits. Prerequisite/Corequisite: MAT 1720. J fall.

ENT1440 - Small Business Management

Overview

Course Description

Students will have the opportunity to develop the knowledge and skills needed by the business owner in the areas of accounting, marketing, and management. Special emphasis is given to the soft skills needed to succeed in an evolving business environment such as communication, adaptability, self-motivation, and ethical decision-making. Accounting topics include the purpose, design, and use of various financial statements. Additionally, students will learn to define target markets and plan appropriate promotional strategies including digital and social media marketing. Other topics to be discussed include effective team building, networking, and customer service. Eligibility: ENG 1510 without supports or Corequisite: ENG 1510 with supports. Online, fall.

HUS2430 - Alcohol/Chem Depend:Treatment

Overview

Course Description

Builds on previous alcoholism and substance abuse courses to provide an overview of methods used in the field of chemical dependency. Specific focus is on the primary skills required of counselors: group and individual counseling, treatment planning, diagnostic assessment, psycho-social assessment, and case management. The course assumes a working knowledge of alcoholism and other addictions and a prior course in interviewing is suggested. The New York State Division of Alcohol and Substance Abuse has reviewed this course and found it consistent with approved standards for 45 hours of education/training for the CASAC. Provider number ED0056AL OASAS. Prerequisite: HUS 1310 or extensive employment in a chemical dependency agency. Prior interviewing course suggested. B.S. and M.S. level individuals are permitted to enroll if they have prior counseling education. HUS 1280 and HUS 2230 recommended. Campus and term: J spring; C spring.

INE2730 - Semester Abroad

Overview

Course Description

The student should consult with the study abroad coordinator to determine the appropriate course number(s) to register for because credit hours vary. Offers programs in many countries including Australia, Ecuador, England, Ireland, and Spain. Programs consist of courses taken at a college or university in the host country. Credit hours earned vary by program and session. Students can choose courses in the humanities, social sciences, business, and internships for service professions. Classes are conducted in English and other languages. Students may take a conventional semester abroad, studying at a university, or they may also engage in service learning 20 hours per week, while attending a university abroad. Financial aid for which a student is eligible applies to these programs as well. Application deadline for the summer session is March 1; for the fall semester it is April 1; and for the spring semester it is November 1; with some exceptions for certain programs. Prerequisite: completion of at least 12 college-level credits with a GPA of 2.0 or better. J fall, spring.

INT1555 - Inquire

Overview

Course Description

This course engages first-year students in hands-on academic exploration while preparing them to navigate the challenges and opportunities of higher education. Students will develop the intellectual skills needed for college-level inquiry by actively exploring the various sides of a single, challenging question or issue. While the specific topic of inquiry varies from section to section, all instructors employ a problem-based, interdisciplinary approach to learning that helps students make connections across fields of study. Students will engage their critical thinking skills as they generate questions, organize information, evaluate evidence, and weigh alternative perspectives. In the process, they will become acclimated to the culture of higher education at JCC. No prerequisites. J fall, spring; C fall, spring; Online occasionally.

LIB2010 - Library Internship

Overview

Course Description

Students receive on-the-job experience consisting of 135 hours of supervised activity in a local business or industry. Students work in conjunction with a faculty mentor and a supervisor at the job site. All guidelines in the original college internship policy will be followed. Prerequisite: completion of at least 12 college-level credits with a GPA of 2.0 or better. J occasionally; C occasionally.

LPN1110 - Pharmacology & Dosage Calc

Overview

Course Description

This course provides an introduction to the core principles of pharmacology, focusing on a wide range of drug classifications and their effects on the body. A key emphasis is placed on the application of the nursing process in drug administration, and the course also includes important drug calculations. Open to Practical Nursing majors only. Pre/Co-requisite: ENG 1510. Pre/Co-requisite: BIO 1500 or 2510, MAT 1540, LPN 1120. J, spring summer fall.

LPN1120 - PN Fundamentals

Overview

Course Description

This course explores the evolution of nursing, current trends in the field, and introduces the healthcare delivery system to students. It covers essential communication techniques, including documentation, and examines legal and ethical considerations, as well as the role of the LPN within the healthcare system. Students will be encouraged to apply the nursing process and critical thinking when providing care to clients across the health-illness continuum. In the lab, students will develop fundamental nursing skills, with both lab and theoretical content being applied in a long-term care setting. Open to Practical Nursing majors only. Pre/Corequisite: ENG 1510. Pre/Corequisite: BIO 1500 or 2510, MAT 1540, LPN 110. J spring, summer, fall.

LPN1130 - PN Special Populations

Overview

Course Description

This course provides students with a comprehensive introduction to assessments and nursing concepts, specifically targeting maternity, newborn, pediatric, and mentally ill populations. Emphasizing the nursing process, students will develop critical thinking skills to effectively adapt nursing concepts and procedures to meet the unique needs of these diverse and vulnerable groups. Open to practical Nursing Majors only. Prerequisite LPN 1110 and LPN 1120. Pre/Co-requisites BIO 2520 or HCR 2100, MAT 1540, PSY 2510, LPN 1140. J, fall, spring, summer.

LPN1140 - PN Medical-Surgical Nursing

Overview

Course Description

Students will apply critical thinking and the nursing process to understand fundamental disease processes and the LPN's role in preventing illness, treating disease, and restoring health in adult patients. Throughout the course, concepts related to safety, emotional support, communication, client teaching, and pharmacology will be integrated. The nursing laboratory will be used to enhance students' psychomotor and critical thinking skills, allowing them to practice advanced nursing techniques. Clinical experiences in medical-surgical units and specialty units of acute care hospitals and clinics will provide students with the opportunity to apply theory and lab knowledge in real-world settings. Open to practical Nursing Majors only. Prerequisite LPN 1110 and LPN 1120. Pre/Co-requisites BIO 2520 or HCR 2100, MAT 1540, PSY 2510, LPN 1130. J, spring, summer, fall.

MAE2510 - Math for Elementary Teachers I

Overview

Course Description

Students will develop the skills necessary to effectively teach mathematics at the elementary school level. Topics of study will include problem solving, operations in the base-ten whole number system (as well as other bases), operations with fractions, operations with integers, operations with decimals and percents, relations and functions, estimation, number theory, and ratios and proportions. While there will be review of the basic mathematics used at the elementary school level, the emphasis of this course will be for students to understand why those mathematical procedures work and how to construct appropriate lessons and activities to illustrate the ideas to elementary students using a variety of concrete methods. Prerequisites: Fulfillment of the math requirement in the student's degree program. J fall.

MAE2520 - Math - Elementary Teachers II

Overview

Course Description

This is the second course in the Math for Elementary Teachers sequence. Students will develop the skills necessary to effectively teach mathematics at the elementary school level. Topics of study will include problem solving, operations within a variety of number systems (integers, rationals, reals), statistical problem solving and data analysis, principles of probability, and various topics in geometry. While there will be review of the basic mathematics used at the elementary school level, the emphasis of this course will be for students to understand why those mathematical procedures work and how to construct appropriate lessons and activities to illustrate the ideas to elementary students using a variety of concrete methods. Prerequisite: MAE 2510. J spring.

MAT0510 - Problem Solving Workshop

Overview

Course Description

Students will work in a supportive classroom setting with their peers and a workshop instructor to ensure they have the skills needed for success in MAT 1500, such as reading comprehension, effectively communicating mathematical solutions, order of operations, working with number systems including fractions and decimals, and basic algebra skills. Additionally, students will receive instruction in productive persistence, growth mindset, and overcoming barriers to success in college math. Corequisite: MAT 1500. J fall, C fall.

MAT0530 - Essential Mathematics

Overview

Course Description

Students will engage in the study of mathematics for everyday life. This course integrates fluency with numbers, proportional reasoning, percentages, basic algebra, and communicating quantitative information. Applications are emphasized throughout to help students improve their basic quantitative reasoning skills. Students will also learn the value of productive persistence in the learning process. This course prepares students to take MAT 1500 - Problem Solving with Mathematics. This course carries Imputed Credits. No requisites. J fall, spring; C fall, spring.

MAT0550 - Algebra Fundamentals

Overview

Course Description

Students will learn basic algebra skills necessary for further study in mathematics and other disciplines that involve quantitative problems. Topics include a review of arithmetic and Real numbers, linear equations and inequalities, the Cartesian coordinate system, unit analysis, properties of exponents, polynomial arithmetic, factoring techniques, the quadratic formula, and an introduction to right triangle trigonometry. Problem solving and applications are emphasized. This course carries Imputed Credits. No requisites. J fall, spring, C fall, spring.

MAT1230 - Mathematics of Business

Overview

Course Description

This course will provide career-oriented business students with an awareness of mathematical problems that occur in the business world. The student will learn skills necessary to solve business-related math problems. Topics include algebra and word problems, percentage problems, graphing, discounts, mark-ups, ratios, averages, presentation of data, and the calculation of interest. Prerequisite: MAT 0600 or two years of high school algebra/geometry and placement exam. Campus and term: J fall; C fall

Credits

Credit Hours

Credit Hours

Min:

3

MAT1500 - Problem Solving w/ Mathematics

Overview

Course Description

Students will develop problem solving skills through a detailed study of topics such as financial mathematics, linear and exponential modeling, and geometry, in concert with specific problem solving strategies such as drawing diagrams, making systematic lists, looking for patterns, identifying sub-problems, and working backwards. Solution presentations and communication are emphasized.

Prerequisite: any developmental MAT course or eligibility for any college-level MAT course. Prerequisite/Corequisite: ENG 1510. J fall, spring; C fall, spring; Online fall, spring.

Credits

Credit Hours

Credit Hours

Min:

3

MAT1540 - Elementary Statistics

Overview

Course Description

Students will investigate various topics in both descriptive and inferential statistics including measures of central tendency and spread, graphical analysis of data, probability, random sampling, correlation and regression, hypothesis testing and confidence intervals. Practical applications are emphasized throughout the course. A significant part of the course is taught in a laboratory setting using a software package such as Minitab. Prerequisite: MAT 0550 or MAT1500 (or higher) or as determined by college placement. J fall, spring; C fall, spring; Online fall, spring.

MAT1590 - College Algebra / Trigonometry

Overview

Course Description

Students will learn algebra and trigonometry topics necessary to prepare them for the study of precalculus. Topics include one-to-one functions and their inverses and graphs, polynomial and rational functions and their applications, radicals and exponents, complex numbers, and trigonometric functions, including graphs and basic identities. Problem-solving and applications are emphasized. An approved graphing calculator is required. Prerequisite: MAT 0550 or as determined by college placement. J fall, spring; C fall, spring; Online fall, spring.

MAT2014 - HONORS SYM-Disinformation Age

Overview

Course Description

This course will look at the ways that statistics are presented for public consumption, both numerically and graphically. Of specific focus will be statistics that may be misleading or misinterpreted and the ethical concerns related to relaying such data. Students will learn basic statistical concepts in order to evaluate information presented in the media. Students will learn about reliable sources of statistical data, proper interpretations of statistics, and why certain statistical values are more useful for comparison (i.e. median compared to mean). Students will look at data presented in any discipline, analyze and evaluate the statistics given, and discuss why the information was provided in that manner.

MCT1280 - CNC/Machine Tools

Overview

Course Description

Students will learn the programming and operation of Computer Numerically Controlled (CNC) machine tools. Manual programming of two and three axis mills and lathes using canned cycles will be covered. Topics discussed will include CNC machine components, absolute and incremental programming, preparatory functions (G-codes), miscellaneous functions (M codes), work piece offsets, tool length offsets, cutter compensation and cutting tools and workholding methods for CNC. Lab projects provide hands-on experience for students on CNC controllers. Prerequisite: MCT 1270. J spring.

MCT2250 - Industr Automation & Fixturing

Overview

Course Description

In this course, students will explore specialized areas of the machine tool trade with the intention of learning a skillset that will help them remain valuable as technology advances. Fixturing and automation are essential to manufacturing in the modern world. They allow for the accurate and efficient reproduction of parts necessary for global trade. During this course students will be introduced to the fundamental knowledge of how to design and implement these systems. The students will build on this knowledge with further individual exploration into one of these two unique topics. The students will then present their findings to their classmates at the end of the course. Prerequisite MCT 2280. J, spring.

Credits

MCT2280 - Advanced CNC Programming

Overview

Course Description

Students will continue learning computer numerically control (CNC) programming, but move into advanced programming of three, four, and five-axis CNC machines. CAD/CAM is introduced and illustrated. Students will be exposed to Fanuc and Haas controllers. Prerequisites: MCT 1280; Prerequisite/Corequisite: MAT 1500. J fall

Credits

Credit Hours

Credit Hours

Min:

3

MCT2290 - CNC Machine Tool Operations II

Overview

Course Description

In this course, students will continue to learn about programming and machining components using CNC machine tools. The students will work on projects that require multiple operations, setups, and tooling configurations to complete. These projects will introduce the students to different work holding methods such as 3-jaw chucks, collet chucks, various types of milling vises, soft jaws, and fixtures. Students will be asked to outline programming methods, setup procedures, and tooling requirements needed to complete these parts. Handwritten "g-code" programming and CAM software usage are encouraged to create these projects. Prerequisite: MCT 2280.J, spring.

MCT2340 - Dimensional Metrology

Overview

Course Description

Students gain exposure to basic and state of the art requirements for inspection and measurement of machined parts and assemblies. Students will be introduced to the various types of inspection equipment. The students will also have hands-on exposure to metrology via a CMM (Coordinate Measurement Machine) and an optical comparator. Students will hear of state of the art advances in measurement techniques from industry representatives. No requisites. J fall.

Credits

Credit Hours

Credit Hours

Min:

2

MCT2380 - Advanced Solid Modeling

Overview

Course Description

Students will extend their knowledge by using the parametric solid modeler in industrial design application. Skills are developed to support applications in the area of feature patterns, molded and cast parts, sheet metal applications, lofting, and sweeps. Assembly modeling and editing is covered as well as detailing of parts and assemblies. Links to other applications such as publication bill of materials, CAM, analysis package, and other CAD systems are also featured. Prerequisite: MCT 1380. Campus and term: J fall

Credits

Credit Hours

Credit Hours

Min:

3

MCT2410 - Computer Aided Manufacturing

Overview

Course Description

Computer-Aided Manufacturing Students will gain exposure to the principles and procedures used in PC based CAD/CAM part programming and manufacturing. Course is based on the use of local industry standard CAM software. The PC-based CAM system will be used to produce complex machined parts from detailed solid models on advanced CNC machine tools. Prerequisites: MCT 1380 and MCT 1280.J spring.

Credits

Credit Hours

Credit Hours

Min:

3

MCT2420 - Manufacturing Process I

Overview

Course Description

Students will learn traditional manufacturing processes. Topics include processes such as casting, hot and cold working, injection molding, powdered metallurgy and finishing, as well as MTL props and their effect on the manufacturing process, and lean manufacturing. Labs consist of tours of traditional manufacturing plants and a project which requires students to create a small factory that uses new manufacturing techniques. Emphasis of the project is on quality, reduced work in process, and the team approach. Prerequisites: MCT 1380. J spring.

MUS1400 - Intro to Songwriting

Overview

Course Description

Students will receive guided instruction in the application and synthesis of compositional techniques toward the creation of effective original songs in popular styles. Students will write several songs during the term, and through these efforts they will gain a familiarity with the creative process as well as begin to explore their own musical voice. Students will apply techniques of form, melody, harmony, rhythm, and lyric writing learned through the study of well-known songs by major figures in the popular music world. The course will be structured around hands-on creative projects, and will include discussion, lecture, critical music listening and analysis. No prerequisites. J fall, spring.

Overview

Course Description

Students will continue to develop National League for Nursing (NLN) Associate Degree (AD) Competencies (professional behaviors, communication, assessment, clinical decision making, caring intervention, teaching and learning, collaborating and managing care), the three roles of the AD nurse (provider of care, manager of care, and member within the discipline), and Quality and Safety Education for Nurses (QSEN) competencies. Course work emphasizes individuals experiencing complex acute and chronic biophysical and mental health deviations. Using a variety of healthcare settings, the student provides quality, safe, holistic, culturally competent patient centered care across the life span. Emphasis will be placed on the care of patients with the following alterations: psychosocial, sensory-perception, cellular regulation, mobility, nutrition, perfusion, and elimination. Students will learn the preparation and administration of intravenous medications. Prerequisites: NUR 1520, SOC 1510, ENG 1530, and successful completion of BIO 2520 with a grade of C or better; Corequisites: NUR 2550, NUR 2350; Prerequisite/corequisites: BIO 2531, BIO 2532, and PSY 2510. J fall; C fall.

NUR2550 - Pathophysiology I

Overview

Course Description

Students will study physiological and psychological changes that occur as a result of disease processes. Emphasis will be placed on the nursing assessment and the analysis of clinical manifestation development. Students will integrate concepts from chemistry, anatomy and physiology, and microbiology, and focus on their application to clinical practice. The course emphasizes the pathophysiology of clients/patients with disruptions in the following: cellular regulation, nutrition, elimination, and tissue integrity. Prerequisite: NUR 1520 and completion of BIO 2520 with a grade of C or better. Campus and term: J fall; C fall

NUR2970 - Health Assessment

Overview

Course Description

Students' knowledge, skills, and expertise will increase in all aspects of nursing health assessment: obtaining health histories; performing physical assessments; recognizing normal assessment findings and deviations from the normal; and recording accurate, concise, and clear data. Emphasis is on performing systematic health assessments of adults, incorporating developmental principles and psychological, sociological, and cultural aspects. To a lesser degree, child assessment is integrated into the course. Laboratory for integration of theory and skill mastery is included. At the end of the semester, each student will perform a health assessment on a selected client and record findings. Prerequisite: NUR 1510 or RN or LPN licensure. Campus and term: J fall, spring, summer; C fall, spring, summer

OTA1510 - Foundation/Occupation/Therapy

Overview

Course Description

This course presents an introduction to occupational therapy including history, philosophical base, values, ethics, practice framework and roles and responsibilities of the OT and OTA. Students will be introduced to the development of theories and how they can be used, along with frames of reference and models of practice, to develop interventions. The OT practice framework and terminology associated with the profession will be discussed. Prerequisite/Corequisite: ENG 1510; Prerequisite: Acceptance into the OTA program. J fall.

OTA1530 - Fundamental Skills of OT I

Overview

Course Description

This is the first course in a series of two that focus on development and refinement of skills and knowledge needed for occupational therapy practice. Students will apply the knowledge learned in Foundations of Occupational Therapy and will be introduced to standardized and non standardized assessments, documentation, and activity analysis. Intervention planning, including concepts of grading and modifying activities will be explored. Students will begin to demonstrate their ability to locate, select, and interpret evidence-based practice research that supports ethical occupational therapy practice. Prerequisite: acceptance into OTA program. J, fall.

OTA1540 - Fund. Skills of Healthcare

Overview

Course Description

This course introduces fundamental skills required in health care setting, with a focus on competencies essential for Occupational Therapy Assistants (OTAs) and other allied health professionals. Students will develop foundational knowledge in patient care, infection control, communication, documentation, body mechanics, and safety procedures. Through lectures and hands-on lab experiences, students will practice essential skills such as patient transfers, vital signs assessment, professional communication, and therapeutic interactions. Ethical considerations and inter-professional collaboration will also be emphasized. Prerequisite: ENG 1510 or Corequisite: ENG 1510 without supports. J fall.

OTA1650 - Growing Years: Birth-Young Adult

Overview

Course Description

Students will learn the major developmental disabilities across the lifespan and how a disability adversely affects the development and engagement in life roles (i.e.: student, sibling, friend, etc.). Theories of human development and occupation will be linked to provide a deeper understanding of the acquisition of functional skills and social roles of children birth to 21 years of age. Occupational assessments will be explored and relevant treatment techniques will be reviewed. Learning about treatment delivery models of children with disabilities will emphasize naturalized environments and family centered models. Prerequisite/ Corequisite: ENG 1530; Prerequisite: OTA 1520 and OTA 1530 with a grade of C or better. J spring.

OTA1660 - OT Princ&Skills: Growing Years

Overview

Course Description

Students will explore occupational therapy principles and interventions that foster autonomy, functional skills, and psychosocial well-being in children from infancy through adolescence. Students will examine the impact of disabilities on early life roles, such as play, family participation, and social interactions, as well as later roles in school, peer groups, and community settings. Emphasizing a developmental approach, the course covers assessments and interventions tailored to evolving motor, sensory, cognitive, and emotional needs. Through hands-on experiences, students will develop and implement occupation-based strategies to support self-care, academic participation, and social engagement. Additionally, students will explore the integration of high- and low-technology solutions to enhance skill acquisition and independence in daily activities. A strong focus will be placed on structuring individualized and group interventions that promote holistic growth, self-reliance, and meaningful participation across home, school, and community environments. Prerequisite: Completion of all semester one OTA courses with a C or better. J spring.

OTA2660 - OT Princ. & Skills: Adulthood

Overview

Course Description

Students will develop practical skills and clinical reasoning essential for providing occupational therapy interventions to adults across the lifespan, from early adulthood through aging. This course emphasizes assessment, planning, and implementation of occupational therapy strategies that promote functional independence, well-being, and quality of life with the adulthood and aging population. Students will examine the impact of psychosocial, physical, sensory, and cognitive changes on occupational engagement and daily activities. Through hands-on training, case studies, and competency-based learning, they will learn to adapt environments, modify activities, and address age-related challenges affecting self-care, work, leisure, and social participation. Emphasis will be placed on applying theoretical knowledge to real-world scenarios, ensuring students can effectively support individuals, groups, and populations experiencing age-related transitions, chronic conditions, and/or disabilities. By the end of the course, students will be prepared to enhance occupational performance, foster independence, and optimize well-being in adulthood and aging populations. Prerequisite: Completion of all semester 2 courses with a grade of C or better. J fall.

OTA2700 - Fieldwork IIA:Principles/Pract

Overview

Course Description

Students will participate in the first of two level II fieldwork experiences required for the program. An in-depth experience in the delivery of occupational therapy services will be provided in one of a variety of clinical placement sites. This experience shall develop and expand the students' repertoire of occupational therapy practice in an effort to develop competent, entry-level prepared occupational therapy assistants that are skilled in applying the OT process to client care. Students will be mentored through this experience by a qualified OT Practitioner. In addition, students will participate in an online portion of the course with student learning focusing on the regulation of the profession of occupational therapy at the local, state, and federal levels. Principles of occupational therapy ethics/dispute resolution systems will be explored and applied to personal and professional conflicts. Students will explore roles and responsibilities of various team members while reflecting on their own responsibilities of working in the profession of Occupational Therapy. Psychosocial factors that influence engagement in occupation will be integrated into student learning. Level II fieldwork must be completed within 12 months of academic preparation. Prerequisite: Successful completion of all prior OTA courses with a grade of C or better. J spring.

Course Description

Students will learn about a total body conditioning exercise method which combines flexibility and strength. The purpose of Pilates is to develop mind and body uniformity; provide balance, flexibility, and strength; improve posture; and strengthen the abdomen, lower back, and buttocks. No prerequisites. J fall, spring.

PHE1670 - Intro to Physical Education

Overview

Course Description

Through class discussions, research assignments, and "in the field" observations students will develop an understanding of the various career opportunities in the field of physical education. The course is primarily suited for students pursuing a career in physical education or education. No prerequisites. J fall.

Credits

Credit Hours

Credit Hours

Min:

PHE1650 - Fundamental of Basketball

Overview

Course Description

Students will learn offensive and defensive fundamentals through drill work with an emphasis on shooting the basketball. The course is taught in a team type of atmosphere and structured to meet the needs and capabilities of the competitive as well as the beginning student. No prerequisites. J fall, spring.

Credits

Credit Hours

Credit Hours

Min:

1

PHE1680 - Beginning Weight Training

Overview

Course Description

Students will use universal and free weights to develop strength and muscular endurance. The course will introduce concepts of form, repetition sequences, and provide a basic understanding of musculature and training techniques. No prerequisites. J fall, spring.

Credits

Credit Hours

Credit Hours

Min:

1

PHE1660 - Intro to Life Fitness

Overview

Course Description

Students will be introduced to The Life Fitness system of strength equipment. The course will introduce students to the Life Fitness philosophy of strength development, concepts of form and individual strength program development. No prerequisites. J fall, spring.

Credits

Credit Hours

Credit Hours

Min:

2

PHE1690 - Water Aerobics

Overview

Course Description

Students will perform uniquely designed exercises for specific muscle groups in the water. Students will become more fit through an exercise form that features repetition and resistance combined with normal body movements. Music and games will add variety and interest to the program. No prerequisites.: J occasionally; C occasionally.

Credits

Credit Hours

Credit Hours

Min:

PHE1700 - Specific Sport Training

Overview

Course Description

Students will develop and implement a training program that improves their performance in a specific sport or activity. The course will emphasize many training techniques and equipment that students will use to coordinate a comprehensive physical fitness regimen. Students will be able to chart progress toward personal and individual goals. Prerequisite: PHE 1660 or PHE 1680. Campus and term: J fall, spring

PHE2460 - Phys Ed for Law Enforcement

Overview

Course Description

Designed specifically for the basic recruit school trainee, this course emphasizes weight training and fitness for life. Students are required to complete successfully various exercises which include timed running, sit-ups, push-ups, swimming, and maintaining a measured progress throughout the semester. Also studies the need for fitness and the ideal of daily exercise. Corequisites: CRI 2250, CRI 2380, CRI 2470, and compliance with NYS regulations. Campus and term: J fall

Credits

Credit Hours

Credit Hours Min:
2

PHE2470 - Defensive Tactics/Law Enforce

Overview

Course Description

Students are given the knowledge, skills, and abilities to defend themselves during physical altercations while staying within the proper force/level of resistance matrix. Defensive tactics, mechanics of an arrest, transportation of prisoners, and searches are emphasized. Demonstration of learned skills by students is required. Eligibility: student must be current Chautauqua County Sheriff's Academy recruit. New York state certified police/peace officer may be accepted with approval of the academy director. Campus and term: J occasionally

PHY1710 - Analytical Physics I

Overview

Course Description

Students will use computer-based laboratory techniques to learn about Newtonian mechanics. They will learn good problem-solving strategies as well as good laboratory practices. They will use vector analysis and calculus to study linear kinematics, dynamics, and conservation laws for momentum and energy. Students will investigate rotating systems and rigid bodies, including solving problems which use angular momentum, torque, center of mass, and moment of inertia concepts. They will also explore simple harmonic oscillators and wave motion. This is the first semester in a three-semester sequence of physics courses designed for students planning to major in physics, chemistry, mathematics, engineering science, or computer science. Students will begin to become aware of physics in everything they do and see. A tutorial session is available and strongly recommended. Prerequisite: ENG 1510, MAT 1710, and high school physics or PHY 1500 or PHY 1610. J spring.

PHY2710 - Analytical Physics II

Overview

Course Description

Students continue their investigation into physical phenomenon by focusing on electric and magnetic interactions and the structure of matter. Students will develop an understanding of Maxwell's equations from a detailed treatment of the laws of Coulomb, Ampere, and Faraday. They will use an investigative approach to get an intuitive understanding of electric and magnetic fields and their interactions with charged matter. Students will use vector calculus concepts such as line and surface integrals and will become familiar with the operation of meters and computer based data acquisition devices. Students will also study geometric and physical optics. The course will end with perplexing problems of noncovariance of the electromagnetic theory of Maxwell. The answers to these questions lead to the study of modern physics topics. Prerequisite: PHY 1710; Prerequisite/Corequisite: MAT 2650. J fall.

PHY2720 - Modern Physics

Overview

Course Description

Students will study three major themes: the development of the theory of relativity; the old quantum theory of Planck, Einstein, Bohr, and Sommerfeld; and the new quantum physics of Schroedinger, Heisenberg, Dirac, and Pauli. Students' interest in relativity theory is motivated by the noncovariance problems discovered in the electromagnetic theory of Maxwell and Lorentz and by the null result of the Michelson-Morley experiment. The early quantum theory is developed from Planck's analysis of the problem of blackbody radiation and from Einstein's study of the photoelectric effect. This is followed by a careful study of the Schroedinger theory of quantum mechanics and solutions to the Schroedinger equation. In the laboratory students will repeat a number of historical experiments including the determination of the speed of light, the charge and charge to mass ratio of the electron, the Planck constant, and the Rydberg constant. Students may also perform the Franck-Hertz experiment. The last part of the semester in the modern lab is devoted to a special, student-designed project. Prerequisite: PHY 2710; Corequisite: MAT 2680. Campus and term: J spring

Students will be introduced to basic aspects of performance in sport and athletic competition. Primary psychological and physiological tenants will be major topics discussed and related to enhancement of athletic performance. There will be practical skills and knowledge development as well as discussion of career opportunities and the future direction of sport psychology. Prerequisite: PSY 1510. J fall.

SPT2010 - Sport Management Internship

Overview

Course Description

Students receive on-the-job experience consisting of 135 hours of supervised activity in a local educational, recreational, or health setting. Students work in conjunction with a faculty mentor and a supervisor at the job site. All guidelines in the original college internship policy will be followed. Prerequisite: completion of at least 12 college-level credits with a GPA of 2.0 or better. J occasionally; C occasionally.

SPT2015 - Honors Project I -SPT

Overview

Course Description

Honors students are required to successfully complete two one-credit, project-based honors courses which are related to courses in which they are currently enrolled or have recently completed. Each project must include some form of applied learning: field-work, internship, service learning, innovative/creative project, and/or undergraduate research. After registering, the students will be guided by the honors program coordinator and their advisors to identify a course to which to link the project and a faculty instructor.

SPT2330 - Youth Sport Administration

Overview

Course Description

Students will examine the youth sport movement by exploring a broad overview of the major topics in the area. Specifically, the course prepares students as program directors by focusing on related issues such as sport specialization, burnout, overuse injuries, and parent and coaching education. Information garnered in this course is relevant for sport management personnel, fitness professionals, teachers/coaches, and/or athletic trainers. Prerequisite: ENG 1510. J occasionally.

SPT2520 - Ethical Leadership-Spt&Fitness

Overview

Course Description

Students will examine leader behavior through an ethical lens based on case studies of past and present events in the business, educational, political, and sporting worlds. The leadership role of a sport or recreation manager, athletic administration, or fitness promotion professional in supervising subordinates and directing volunteers and other personnel within an organization will be chronicled. Prerequisite: ENG 1510. J occasionally.

SPT2530 - Sport History Through Film

Overview

Course Description

Students will be presented with an overview of sport history in the United States from 1900 to the present. Utilizing film (i.e., past and present movies and documentaries) as the platform, students will examine social, political, and economic make-up and the ability of sport to effect and shape institutions. Particular focus will be given to social class, race and ethnicity, gender, community, technology, and commercialization through the media. Prerequisite: ENG 1510. J occasionally.

THE1510 - Introduction to Theatre

Overview

Course Description

Students will obtain an understanding and appreciation of theater genres from Greek dramas through the 21st century. Theater performances are introduced, discussed, and analyzed throughout the course. Students will discuss a variety of dramatic forms. Acting styles and the elements of costuming, makeup, scene design, and the lighting necessary to stage a show are also examined. No requisites. J occasionally.

THE1520 - Modern Drama

Overview

Course Description

Students will discover the turning point that led to a new direction for contemporary drama. The musical in post-war America is examined, and African-American, Latino, Asian-American, women's theatre, and such styles as Absurdism are investigated. Plays and performances are viewed in class and independent reading is assigned. Playwriting styles and a discussion of directing and producing approaches will help the student discover modern ways of presentation. A continuation of THE 1510. Prerequisite/Corequisite: ENG 1530. J spring.

THE1570 - Acting

Overview

Course Description

Students use the physical and mental processes of acting to build self-confidence. Both improvised and rehearsed scenes are practiced in class to discover how to be at home in front of an audience. Performance skills are strengthened through acting exercises and methods. No requisites. J fall.

THE2570 - Acting II

Overview

Course Description

Students expand upon the growth begun in THE 1570, experiencing an in-depth, cumulative, and progressive study of acting. An increased character exploration and the ability to incorporate it into scene study are learned. Students are given individual attention in voice and body control and audition techniques. Prerequisite: THE 1570. Campus and term: J spring

WLD1200 - Safety and Cutting Processes

Overview

Course Description

This course introduces oxy-fuel and plasma-arc cutting systems. Topics include an intensive introduction to welding safety, proper equipment setup, and operation of oxy-fuel and plasma-arc cutting equipment with emphasis on straight line, curve and bevel cutting. Upon completion, students should be able to oxy-fuel and plasma-arc cut metals of varying thicknesses as well as have an appropriate understanding of welding safety. No prerequisites. J fall.

WLD1240 - Applied Welding

Overview

Course Description

Students will understand the three most common welding processes that are available to perform welds and the numerous ways to cut various materials. The welding processes included are oxy-fuel, plasma, and use of various mechanical cutting machines. Upon completion, students will be able to perform code quality welds on plates of various thicknesses in all three processes, as well as perform cutting operations on plates using all cutting equipment. No prerequisites. J spring.

WLD1350 - Shielded Metal Arc Welding

Overview

Course Description

This course introduces the shielded metal arc (stick) welding process. Emphasis is placed on padding, fillet, and groove welds in various positions with SMAW electrodes. Upon completion, students should be able to perform SMAW fillet and groove welds on carbon plate with prescribed electrodes. No prerequisites. J spring.

WLD1360 - Gas Metal Arc Welding

Overview

Course Description

This course introduces gas metal arc (GMAW) welding and flux core arc welding processes (FCAW). Topics include equipment setup and fillet and groove welds with emphasis on application of GMAW and FCAW electrodes on carbon steel plate. Upon completion, students should be able to perform fillet welds on carbon steel in the flat, horizontal, and overhead positions. No prerequisites. J spring.

WLD1370 - Gas Tungsten Arc Welding

Overview

Course Description

This course introduces the gas tungsten arc (GTAW) welding process. Topics include correct selection of tungsten, polarity, gas, and proper filler rod with emphasis placed on safety, equipment setup, and welding techniques. Upon completion, students should be able to perform GTAW fillet and groove welds with various electrodes and filler materials. No prerequisites. J spring.

WLD1380 - Flux Cored Arc Welding

Overview

Course Description

This course provides an introduction to Flux Cored Arc Welding (FCAW), a versatile welding process used in a variety of industries. Students will learn the fundamentals of FCAW, including the operation of equipment, the characteristics of flux-cored wire, and the various shielding gases used in the process. Through hands-on practice, students will develop welding skills on carbon steel and other materials, while emphasizing safety procedures, quality control, and the identification of common weld defects. The course will also explore the advantages and limitations of FCAW in different welding applications, preparing students for entry-level positions in the welding industry. Upon successful completion, students will have a strong foundation in FCAW and will be able to perform basic welding tasks with confidence. No prerequisites. C, Spring.

WLD2250 - Adv Shielded Metal Arc Welding

Overview

Course Description

Advanced shielded metal arc (stick) welding techniques will be performed using mild steel electrodes in the flat, horizontal, vertical, and overhead positions on structural plate. Identifying and analyzing defects in welding joints is emphasized. Carbon steel plate is welded using shielded metal arc welding (SMAW) to American Welding Society (AWS) Code. Students will develop skills necessary to make quality welds on carbon steel pipe with open root and backing rings according to AWS, American Society of Mechanical Engineers (ASME), and American Petroleum Institute (API) code. Prerequisite: WLD 1350; Eligibility: MAT 1590. J fall.

WLD2260 - Adv Gas Metal Arc Welding

Overview

Course Description

Advanced gas metal arc welding practices and power source technology, including programmable and pulsing constant voltage machines, will be used. Machine set-up and techniques for nonferrous metals, including aluminum and stainless steel, will be practiced. Advanced arc welding techniques will be performed in the flat, horizontal, vertical, and overhead positions on structural plate. Identifying and analyzing defects in welding joints is emphasized. Carbon steel plate is welded using Gas Metal Arc Welding (GMAW) to American Welding Society (AWS) Code. Students will develop skills necessary to make quality welds on carbon steel pipe with open root and with backing rings according to AWS, American Society of Mechanical Engineers (ASME), and American Petroleum Institute (API) code. WLD2270 - Adv Gas Tungsten Arc Welding

Overview

Course Description

Advanced study and practice of the gas tungsten arc welding process are emphasized. Advanced joint designs are mastered on carbon steel, aluminum, and stainless steel. A required American Welding Society Workmanship sample will be fabricated and welded. Students will also weld GTAW on pipe according to ASME (American Society of Mechanical Engineers) procedures. Theory and practice of GTAW on ferrous and non-ferrous metals in all positions will be covered. Upon completion, students should be able to perform GTAW welds with prescribed electrodes and filler materials on various joint geometries. Prerequisite: WLD 1370; Eligibility: MAT 1590. J spring.

WLD2350 - Fabrication

Overview

Course Description

Students will learn how to read blueprints with an emphasis on weld symbols, joint design, and layout techniques. Students will be introduced to equipment such as the iron worker, hand tools, press brake, and shear. The principles behind bending, punching, and fastening technologies will be discussed. Prerequisites: WLD 2260; Corequisite: WLD 2450. J spring.

WLD2360 - Alternate Processes

Overview

Course Description

Machine setup and techniques for nonferrous metals, including aluminum and stainless steel, will be practiced. Welding applications of special metals such as copper, nickel, cobalt, and titanium will be discussed. Non-traditional or advanced welding and processing procedures such as resistance welding, automated plasma cutting, robotic welding and submerged arc welding are demonstrated. Laser and electron beam welding techniques are also reviewed. Prerequisites: WLD 2250, WLD 2260, and WLD 2270. Campus and term: J fall.

WLD2450 - Capstone Project

Overview

Course Description

Through research, discussion, and presentation, students will apply welding technology knowledge toward a real life problem. Each student will prepare a case study of a local industry problem or application as well as a solution to the problem. Process selection, joint design, cost estimating, and design of a welded project are required. Corequisite: WLD 2350; Prerequisite: student must be within one semester of graduation or have permission of instructor. J spring.
